Who is the book for?
This book has been written for people whose first language is not English, and who need to use English in the context of banking and finance. It covers language useful for working in retail banking, company finance departments and other situations involving financial transactions. There is a strong focus on the language needed to communicate on financial topics, discuss financial problems and plan projects. It does not cover rarely-used terms, or academic terms used by economists. All the language in the book is intended to be accessible to intermediate level students and above.

How can the book be used?
The vocabulary is arranged by topic. Choose the topics that interest you. The pages do not have to be completed in any particular order, and there is no need to complete all the pages if some are on topics which are not useful to you. It is better to complete one or two pages in a day, and remember the vocabulary, rather than completing as many pages as possible. The answers to the exercises can be found at the back of the book. There is also an index to help you find the pages which are most useful to you.

Write new words and phrases you learn in a notebook or file. Review this language regularly so that it becomes part of your active vocabulary.

A good general dictionary will be very helpful, providing pronunciation guides and more contexts. For vocabulary relating specifically to Banking and Finance, Dictionary of Banking and Finance (A&C Black, ISBN 978-07136-7739-3) will be a useful reference source.

4. Credit and debit cards

EPOS and EFTPOS

A. Choose the correct words.

EPOS (electronic point of sale) terminals are cash 1 registers / machines found in 2 selling / retail outlets such as shops and restaurants. Data about each sale is 3 entered / put via barcode scanners, keyboards or 4 touch / finger screens. The data is used to provide an itemised 5 receipt / ticket for the customer. It can also be used for stock control and to help with marketing.

EFTPOS (electronic funds transfer point of sale) terminals are similar to EPOS terminals, but they can also 6 understand / read credit and debit cards, and 7 transfer / transmit funds directly from the customer's account to the retailer's account.

When customers pay 8 by / with card at an EFTPOS terminal, they either 9 sign / signature a sales voucher, or enter a PIN (Personal 10 identifying / identification number). Obviously, a PIN is a more 11 secure / safe method of verification than a 12 signing / signature, and in many countries, all EFTPOS 13 transactions / sellings are now 14 checked / verified by PIN.

Chip and PIN payments

A. Number the following in the correct order.

1. The transaction appears on the customer's bank statement.
2. The customer arrives at a supermarket checkout.
3. The card's electronic chip is read, and the customer enters his or her PIN.
4. Funds are transferred from the customer's account to the retailer's account.
5. The customer inserts her/his card into the chip and PIN keypad.
6. The payment is authorised.
7. The PIN is verified.
8. The cashier scans the barcodes on the products.

The stripe on the back of a credit card is a 1 ____________ strip, often called a magstripe. ATMs and EFTPOS terminals can read the information stored on the strip. If a card can’t be read, it is usually because the magstripe is scratched, or has been 2 ____________, usually from being placed close to a strong magnet.

When the cashier 3 ____________ a credit or debit card through the card reader of an EFTPOS terminal, the terminal is connected by telephone to a company which takes credit-authentication requests from retailers and provides them with payment 4 _____________. When one of these companies receives a request, it checks for retailer identification, valid card number and card 5 ____________ date. This information is 6 ____________ for security reasons. Similarly, when a card is inserted into an ATM, the ATM is linked to the bank’s central computer over an encrypted connection.

Chip cards (also known as smart cards) offer greater security and versatility than magstripe-only credit and debit cards. These cards also have a 7 ____________, and each time a transaction is made, the user must enter a PIN number (in the same way that PINs are used with ATMs).

D. Number these phrases from a part of a telephone conversation.

a. Customers with facilities for Internet banking (also known as online banking) can use their bank’s or building society’s website to carry out payments and other 1 ____________ over the Internet. This form of banking can be done outside business hours and from anywhere with Internet access. Features of Internet banking include payment of bills, funds transfers between a customer’s own accounts, transfers to a third party’s account, loan 2 ____________ and viewing bank statements.

b. In addition to the Internet banking 3 ____________ offered by high-street banks, a new generation of banks operate exclusively online. These banks tend to offer high interest rates on savings accounts and low rates on loans because their overheads are much lower than those of traditional banks.

c. Security has become a key issue in Internet banking. For most secure Internet sites, such as Internet shopping sites, single password 4 ____________ is considered sufficient. In an increasing number of countries, this is no longer considered adequate for Internet banking. In these cases, entry to the site requires the input of one of a selection of passwords and multiple 5 ____________.

All information is 6 ____________, making it almost impossible for a third party (i.e. a hacker) to access the information.

d. However, hackers can gain access to inadequately 7 ____________ home PCs, and can record the password as it is typed in (keylogging). Spyware and other malicious programs can record private banking details, and send them to a third party. A more commonplace danger is written passwords and PINs falling into the wrong hands.

e. Internet banking is perceived by some as being too vulnerable to fraud to consider using. However, the number of 8 ____________ of Internet banking fraud is very small. Statistically, in fact, conventional banking activities carry a higher risk of fraud than Internet banking – simple credit card fraud and various forms of identity theft are far more widespread. It is far easier to obtain banking and other details by going through a bag of rubbish and collecting old bank statements etc. than it is to obtain it by hacking.

f. Generally speaking, unless users are careless or gullible, Internet banking does not carry a great level of risk. Nevertheless, criminals continue to come up with inventive ways to access accounts. An example is “phishing” – using emails purporting to be from the customer’s bank to persuade people to hand over their 9 ____________.

6. Mortgages

A. Choose the best words from each pair in grey type.

For the majority of homeowners/houseowners, the purchase of their property is financed by a mortgage. The bank or building society which lends the money to buy a property is called a mortgage lender/giver or mortgagee. The person who borrows money in the form of a mortgage is called a mortgage borrower/taker or mortgagor.

There are several different types of mortgage in/on the market. Probably the most common is a repayment mortgage, in which the capital sum/capital price and the interest are paid in instalments/pieces over a long period (for example 25 years).

An alternative is an interest-only mortgage, in which the interest is paid, and the capital sum is repaid/paid in another way, for example with an endowment assurance policy (see unit 9). This type of mortgage is known as an endowment mortgage.

With an offset mortgage, the mortgage borrower's daily/current account is combined with her/his mortgage. Provided the current account is usually in/with credit, this can reduce the interest repayments on/for the mortgage.

B. Match the types of mortgage with the definition (you can find some of the information above).

1. repayment mortgage
   a. The mortgage interest rate is linked to the interest rate of country’s central bank (see unit 16).

2. interest-only mortgage
   b. The mortgage interest rate stays the same.

3. endowment mortgage
   c. You pay the capital sum and the interest.

4. offset mortgage
   d. You pay the interest in instalments, and you pay the capital sum by another method.

5. fixed rate mortgage
   e. The mortgage interest rate can only rise as far as a certain level.

6. base-rate tracker mortgage
   f. An interest-only mortgage, with the capital repaid by an endowment (see unit 9).

7. variable rate mortgage
   g. Your current and mortgage accounts are combined to reduce the interest.

8. capped mortgage
   h. The mortgage lender can change the interest rate as they wish.

15. After you have paid your last mortgage instalment, you can say that you have __________ your mortgage.
    a. paid out  b. paid up  c. paid off
7. The housing market

Mortgage arrears reduce building society profits

1. The growth in building society profits for this financial year is expected to be restrained due to a sharp increase in the number of buy-to-let property owners going into mortgage arrears.

2. However, the recent interest rate cut is likely to cause arrears to level off, and recently-introduced government measures aimed at supporting the buy-to-let market are likely to provide a last-minute boost to building society annual profits.

3. James Edwards, chief executive of the market leaders City and Provincial Building Society, said in a trading statement last week that he broadly concurred with analysts’ forecasts of full-year profits for his company to rise by 5% to £240m. However, the fact that soaring growth in the buy-to-let market (where C&P has a 19% share) has cooled significantly coupled with concerns about arrears has knocked 7.25p off the company’s share price, leaving it at 264p.

4. Despite predictions for growth across the sector as a whole averaging around 4.5%, the share prices of the five leading players in the market have declined by an average of just under 3%. Yields may be falling, but the restricted supply of new-build homes and continuing enthusiasm for buy-to-let have kept the housing market buoyant, and only the most pessimistic of analysts are predicting a slump. Nevertheless, cautious corporate investors have been reducing their holdings.

5. Such fears may well prove to be misplaced. Hints by the Bank of England regarding a further interest rate cut could underpin further growth.

6. An additional boost is likely to be provided by changes to pension rules from April 5th next year. Holders of Self Invested Personal Pensions (SIPPs) will be permitted to invest funds from their pensions in residential property.

7. Up to £15bn of pension cash is expected to flood into the market, including tax relief worth as much as £5bn. This is certain to create a boom in buy-to-let investment, shoring up building society yields, and to push up house prices, especially in areas where they have been in decline, creating more attractive investment opportunities.

8. In addition, the buy-to-let market is likely to continue to benefit from the fact that many would-be first time buyers remain priced out of the market, ensuring healthy demand for rental properties. Evidence suggests that large numbers of potential first time buyers are also delaying their plans to buy to due uncertainty on house prices, creating a build-up of demand which is likely to be released when house prices stabilise.

9. A spokesperson for the number two mortgage lender Bolton and Rochdale reported last month that new business volumes have grown steadily month on month from a low base, and that the growth of both the residential and buy-to-let mortgage markets remains robust.

10. However, this upbeat stance was offset by Banker and Mortgage Lender magazine, which predicted that house prices are poised to fall by an average of up to 7% across the UK. The South West in particular was viewed as over-valued, with prices in some areas set to see a drop as high as 15%. In contrast, London is now seen as slightly undervalued, following some dramatic falls over the last year and, according to the magazine, house prices there are set to rise by a minimum of 4% a year for the next three years.

8. The consumer credit boom

A. Read the article, and put these word into the spaces.

| credit rating • creditors • creditworthy • into the red |
|-----------------|-----------------|-----------------|-----------------|
| loans • owe • pay it back • write off |

1. The people of the United Kingdom are estimated to __________ around a trillion pounds in personal debt, which is about £16,000 for every man, woman and child. Much of this debt is of course in the form of mortgages, but an ever-increasing proportion is in the form of consumer credit: unsecured __________ in the form of overdrafts, credit card debts, store card debts, hire-purchase agreements and the numerous other ways in which the British public are able to “buy now, pay later”.

2. An inevitable result of this is that an increasing number of people are taking on more debt than they can service. Credit cards and store cards especially can have very high APRs*, and the interest soon mounts up, pushing the borrower further and further __________. Repayment in full may simply become impossible.

3. Of particular concern are so called “loan-sharks”. While the major lenders such as banks __________ millions of pounds every year in bad debts, small credit companies sometimes resort to heavy-handed measures such as sending in the bailiffs and even (although of course this is illegal) threatening physical violence.

4. Naturally, creditors try to avoid lending money to people who won’t be able to __________. Although they may not know it, every person who has ever had dealings with a financial institution (for example, had a bank account) has a credit rating. This data is stored on computers by credit reference agencies, and before agreeing to a loan, most creditors will check the applicant’s __________. However, this information can be misleading. Apparently __________ people may already be struggling to keep up the payments on their existing debts.

5. As well as having potentially disastrous consequences for people who get too heavily into debt, the boom in consumer credit could have serious repercussions for lenders. If people are genuinely unable to repay their debts, ultimately there is very little their __________ can do about it.

*APR = Annual Percentage Rate

The exporter sends the goods and 1 documents / papers to the foreign buyer. The buyer pays the invoice when the goods arrive, or within a certain period from the invoice date. This can be risky, as the exporter trusts the buyer to 2 respect / honour the original sales contract.

A foreign bank issues 3 a promise / an undertaking to the exporter (through a bank in the exporter’s country) to pay for the goods as long as the exporter 4 matches / complies with the conditions of the contract. This is a much safer form of payment for the exporter. To be even safer, the exporter can arrange for the bank in his/her country to 5 act as / be “confirming bank”, which means that the bank in the exporter’s country is responsible for the transaction.

A 6 legally-binding / legally-holding agreement that the importer will, on acceptance of the bill, pay the exporter for the goods. The risks are that the importer does not accept the bill even though the goods have arrived, or 7 doesn’t pay / dishonours an accepted bill when it 8 matures / is time to pay.

The exporter does not 9 send / dispatch the goods until payment has been received from the importer. There is no risk for the exporter - all the risk is 10 taken by / with the importer.

Bank of England raises interest rate to 5%

1. Mortgage repayments, along with the cost of overdrafts and credit card debts, are set to rise after the Bank of England surprised the City yesterday by announcing its first rise in interest rates for more than a year.

2. News of the quarter-point rise to 5% was cautiously welcomed by some financial institutions, but was largely condemned by industry and trades unions.

3. A statement from the Bank of England’s monetary policy committee said that strong growth, a recent recovery in consumer spending, buoyant export markets and signs of a pick-up in investments meant that action was necessary in order to meet the government’s 2.5% inflation target.

4. The statement said: “With inflation likely to remain above target for some while, it was judged necessary to bring consumer prices inflation back to target in the medium term.”

5. A response from the London Board of Businesses and Exporters described the move as premature, and likely to damage businesses, especially those dependent on export earnings.

6. Many homeowners will face higher monthly bills through increased mortgage costs, especially those with variable rate and base-rate tracker mortgages. If mortgage lenders pass on the rise in full, it will add around £20 to the monthly repayments on a £100,000 mortgage. According to Sarah Parker of the Family Income Monitoring Unit, the average family will need to find around another £40 a month.

7. Few analysts predicted a rate increase, and some had even been expecting a decrease to help boost a subdued housing market. Many were talking about the increase being a pre-emptive strike, with the small increase in borrowing costs now intended to ward off the need for a more painful rise later.

8. In the City’s money markets, however, there were expectations of a further tightening of the Bank’s policy and further interest rate rises - perhaps up to 5.75% – unfolding over the next twelve months. Fears that further rate increases would affect consumer spending wiped £17bn off the value of the London stock market.

19. Taxation

My name's Marcus. I work for a bank. I'm on PAYE (Pay As You Earn). This means that tax is automatically deducted from my salary. My salary isn't particularly high, so I only pay tax at the basic rate. My personal allowance is £5,000 a year. Then I pay 10% on the next £2,500, and 22% on everything above that. I also have to pay National Insurance, of course, which is another 9%. My gross pay is about £19,000 but my take-home pay is around £15,000.

My name's Yvonne. I’m a self-employed dentist. Every year I have to fill in a tax return. Dentists can earn quite a lot of money, and my income is usually well into the higher rate. In other words, I have to pay 40% on everything I earn over £45,000 a year. However, the salary I pay my receptionist, the rent for my surgery and the cost of my equipment are all tax deductible. Only about half my turnover counts as taxable income. The National Insurance rules are quite complicated for self-employed people, but my accountant takes care of that for me.

**Takeover bids**

In a takeover bid, another person or business makes an offer to the 1___________ to buy their shares at a fixed price. The aim of this is to take control of the 2___________.

If it is a welcome takeover bid, the directors of the company advise the shareholders to accept the offer. If the shareholders accept the offer, the result is usually called a 3___________.

If the bid is unwelcome, the directors advise the shareholders against accepting it. The bidders may then write to the shareholders explaining the advantages of the takeover, and perhaps improving the offer for the shares. This is known as a 4___________ bid.

To avoid an unwelcome takeover bid, the directors may devise a 5___________ – a tactic that will mean the company is worth much less if the takeover bid is successful. Alternatively, they may look for a 6___________ – an alternative bidder for the company whose takeover would be more welcome.

In an 7___________, the bidder offers a price for each share regardless of how many shares it can buy. In an 8___________, the offer price depends on the bidder being able to buy enough shares to gain a 9___________ in the target company.

24. Investments

Make a profit and make a difference

The Aware Finance Ethical Investment Fund aims to offer everything you would expect from an ethical investment: capital growth, a competitive yield and the knowledge that your gain isn’t at the expense of the environment or exploited workers. Naturally, we only invest in companies that have been thoroughly screened, and fully match up to ethical investment criteria.

Yet Aware Finance goes one step further. 20% of the fund is invested in small, unquoted companies developing the next generation of renewable energy technologies. Of course, most of these technologies are in their infancies, and this fund is particularly aimed at investors looking for long-term growth potential.

With Aware, the return on your investment isn’t just financial.

The Neptune Tracker Fund

Sometimes the simple things in life are the best. With The Neptune Tracker Fund there are no investment strategies and no fund managers to pay. The fund is invested in the 100 companies that comprise the Financial Times-Stock Exchange 100 Share Index. If the FTSE 100 goes up by 5%, the value of your holding goes up 5%. It’s as simple as that.

Despite the promises of high growth and high return associated with managed funds, the truth is that in seven out of the last ten years on average tracker funds have equalled or out-performed managed funds.

And unlike managed funds, there are no hefty fees to pay. Entry to the fund costs 1.75% of the sum invested, with a tiny 0.5% administration fee payable each year thereafter. Yields can be reinvested in the fund or can be taken as income – the choice is yours.

13. Unfortunately, all Jason's __________ were destroyed in a fire.

14. Investing is a form of gambling. As the saying goes "You have to __________ to accumulate".
25. The dot.com bubble

1. At the height of the high-tech stocks gold-rush, private investors were piling money into internet and technology companies. In many cases, these were little known businesses that had been in existence for only a few months. Nevertheless, investors were hungry for stocks, with many buying large holdings simply on the basis of wildly optimistic internet bulletin boards tips.

2. Then in March and April 2000 share prices crashed. A lucky minority had got out in the nick of time, but the majority of dot-com investors suffered substantial paper losses. Looking back at the frenzy that led up to the crash, it now seems amazing that so many were taken in by the glitter of fool’s gold, and were willing to part with their cash so readily. Dot-com shares doubtless seemed to many to be a casino where they couldn’t lose, but as the old saying goes, “If it seems too good to be true, it probably is”.

3. London Stock Exchange figures show how cheap online share-trading services caused net-based share-dealing to rocket in the months leading up to the crash. The average number of transactions ballooned to 134,000 a day in January, and hit a peak of 157,000 a day in March – just days before the first signs of disaster.

4. Many of the new share-dealing services were struggling to cope with the demand, and some had to close their doors to new customers. There were numerous complaints from investors having to wait on the phone for an hour or more to get through to a broker.

5. Following the crash, high-tech stocks continued to be traded, of course. But many investors, nursing burnt fingers, pulled out of the market altogether. Others scaled down their trading. The result was a dramatic drop in trading volumes. In the May following the crash, transactions were down to around 100,000 a day, with subsequent months mostly seeing further declines in the number of shares changing hands. In other words, there was a full-blown slump.

6. Although the party was over for private investors, online share-dealing services mostly continued to be profitable, with many new companies joining the already crowded market.

7. However, despite the fact that there was still money to be made, shares in the sector fared poorly, and in late 2000 some were standing at just a tenth of their value prior to the crash – comparable losses to those seen by the dot-coms whose shares they had once been trading so frenetically.

8. In the years following one of the most talked-about crashes in recent history, some investors who hung on to their shares have partially recouped their losses, particularly when smaller companies have been bought out by larger ones. In the majority of cases, though, the recovery has been modest, and accompanied by a strong sense of caution in investors. It general it can be said that the bubble has well and truly burst.
