fertile, *fertile, fruitful, prolific mean having or manifesting the power to produce fruit or offspring. The same distinctions in implications and connotations are observable in their corresponding nouns fertility, fecundity, fruitfulness, prolificacy. Fertile (opposed to sterile, in-fertile) applies particularly to something in which seeds take root and grow or may take root and grow because it contains the elements essential to their life and development. <fertile soil> <fertility of alluvial land> <past fields where the wheat was high . . . ; it was a fertile country—S. V. Benét> Consequently the term often applies to something in which ideas take root and thrive <a fertile mind> (in the heath's barrenness to the farmer lay its fertility to the historian—Hardy) (in him were united a most logical head with a most fertile imagination—Boswell) Fertile is also applicable to something which has in itself the elements essential to its growth and development. <a fertile egg> <fertile seed> <a fertile idea> or to a person or animal or pair that is able to produce normal living young <a fertile husband> <a fertile couple> Fecund (opposed to barren) applies especially to something which actually yields in abundance or with rapidity, fruits, or fruiting, or by extension, projects, inventions, or works of art; thus, one speaks of the fecundity of a mother if one wishes to imply that she has a large family, but of her fertility if the intent is to indicate that she is not sterile; so, by extension, a fecund rather than a fertile inventive genius <a good part of these inventions came to birth—or were further nourished—in the fecund mind of Leonardo da Vinci—Mumford> (if you had been born a Dumas—I am speaking of fecundity . . . and of nothing else . . . and could rattie off a romance in a fortnight—Quiller-Couch) Fruitful may be preferred to fecund when the reference is to plants and may replace fertile in reference to soil or land, but it is especially applicable to something that promotes fertility or fecundity <a fruitful rain> In its extended sense it is applicable to whatever bears results, especially useful or profitable results <the time has always come, and the season is never unripe, for the announcement of the fruitful idea—John Morley> <the enormously fruitful discovery that pitch of sound depends upon the length of the vibrating chord—Ellis> <Darwinism . . . is a fruitful theory of the means by which nature works—Inge> <the poet . . . is apt to lack the detachment which alone makes fruitful criticism possible—Lowes> Prolific is often interchangeable with fecund, but it often suggests even greater rapidity in reproduction and is therefore more frequently used than the latter term in disparagement or derogation especially when applied to types or kinds of things or beings <the starling is so prolific that the flocks become immense—Jeffreys> <uncultivated, defective people . . . are appallingly prolific—Shaw> (the flabby pseudoreligions in which the modern world is so prolific—Krutch)

Ana producing, bearing, yielding (see BEAR): inventing or inventive, creating or creative (see corresponding verbs at INVENT): quickening, stimulating, provoking, exciting, galvanizing (see PROVOKE)

Ant infertile, sterile —Con barren, impotent, unfruitful (see STERILE)

fertility fruitfulness, fecundity, prolificacy (see under FERTILE)

Ant infertility, sterility —Con impotence or impotency, barrenness, unfruitfulness (see corresponding adjectives at STERILE)

Ana *intense, vehement, fierce, exquisite, violent; earnest, *serious, solemn: *sincere, heartfelt, hearty, wholehearted, whole-souled

Con collected, composed, *cool, imperturbable, non-chalant: *indifferent, aloof, detached, unconcerned

fervor ardent, enthusiasm, *passion, zeal

Ana devoutness, piousness or piety (see corresponding adjectives at DEVOUT): earnestness, seriousness, solemnity (see corresponding adjectives at SERIOUS): sincerity, heartiness, wholeheartedness (see corresponding adjectives at SINCERE)

fetch vb *bring, take

Ana *get, obtain, procure: transfer, shift, *move, remove: convey, transport, transmit, *carry, bear

fetid noisome, *malodorous, stinking, putrid, rank, rancid,usty, musty

Ana foul, nasty (see DIRTY): *offensive, loathsome, repulsive, repugnant, revolting

Ant fragrant —Con *odorous, aromatic, redolent, balmy

fetish, talisman, charm, amulet are comparable when they designate an object believed to be endowed with the virtue of averting evil or of bringing good fortune. Fetish is applied to an object, either natural (as a snake or an animal's tooth or claw) or artificial (as a piece of carved wood or bone), which is held sacred in the belief that a supernatural spirit has entered into it and invested it with the power to bring success, luck, and freedom from evil to its owner or worshiper. In its basic sense the word is always connected with the religion of primitive or barbarous peoples <the Ashanti fertility fetish, carried on the backs of pregnant women to help make their children beautiful—Time> In extended use it may be applied to whatever is unreasonably or irrationally regarded as sacred or sacerdoty <make a fetish of the Constitution> <the mediocre was repellent to them; cant and sentiment made them sick; they made a fetish of hard truth—Rose Macaulay> Talisman, unlike fetish, presupposes a degree of enlightenment, a knowledge of astrology and other occult sciences, and a belief in magical powers. Primarily it is applied to a cut, incised, or engraved figure or image of a heavenly constellation or planet or to its sign, or to a
gent or a piece of metal so cut, incised, or engraved. By virtue of this representation it is supposed to be endowed with the same occult influence as what it represents 〈he had stolen from Henry ... a talisman, which rendered its wearer invulnerable—Stubbis〉 In extended use it may be applied to an object felt to exert a magical, extraordinary, and usually happy influence 〈the little circle of the schoolboy's copper coin ... had proven a talisman, fragrant with good, and deserving to be set in gold and worn next her heart—Hawthorne〉 〈the more true of a leaf was a talisman to bring me under the enchantment—Jeffersis〉 〈there is no talisman in the word parent which can generate miracles of affection—Butler d. 1902〉 〈if their hearts had been opened, there would have been found, engraved within, the talisman Education—Brooks〉

Charm basically applies to something believed to work a spell repelling evil spirits or malign influences or attracting favorable ones. It may be used in reference to an incantation, a word, or a form of words as well as to an object; thus, fetishes and talismans were often carried as an incantation 〈the gallant little Abruzzi cob was decorated with ... a panoply of charms against the evil eye—Mackenzie〉 In its extended application to a quality in persons or in things it connotes a power to attract or allure that is suggestive of spell working 〈she has great charm ... did you feel the charm of the painting?〉 〈one of the great charms of Lawrence ... was that he could never be bored—Huxley〉 Amulet is usually applied to something worn or carried on the person because of its supposed magical power to preserve one in danger or to protect one from evil and especially from disease 〈the French traveler Coudreau ... expressly states that collars made of jaguars' or bush hogs' teeth, worn round the neck by small children, are amulets intended to protect them, when they grow bigger, against the attack of ferocious beasts—Karsten〉 In its rare extended use the word still implies protection 〈righteousness will give you love ... but it will not give you an invincible amulet against misfortune—Farrar〉

fetter vb shackle, *hamper, trammel, clog, manacle, hog-tie
Ana *hinder, impede, obstruct, block, bar, dam; *restrain, curb, check: baffle, balk, thwart, foil, *frustrate; bind; *tie
Con *free, liberate, release: *extricate, disencumber, disembarrass, disentangle, untangle; disengage; *detach
fewer *less, lesser, smaller
fib n untruth, falsehood, *lie, misrepresentation, story
fib vb equivocate, palter, *lie, prevaricate
fickle *inconstant, unstable, capricious, mercurial
Ana *changeable, changeful, variable, protean: *fitful, spasmodic: light, light-minded, frivolous, flighty, volatile (see corresponding nouns at LIGHTNESS)
Ant constant, *true —Con *faithful, loyal, staunch, steadfast

fiction, figment, fabrication, fable are comparable when meaning a story, an account, an explanation, or a construction or an assumption that serves one's own ends or that satisfies the unthinking because of its accord with outward appearances 〈the notion that a business is cloathed with a public interest and has been devoted to the public use is little more than a fiction intended to beautify what is disagreeable to the sufferers—Justice Holmes〉 〈few of the usual fictions on which society rested had ever required such defiance of facts—Henry Adams〉 or, especially in legal or scientific use, to provide a convenient assumption or method whereby one can deal with what is beyond the range of rational or objective proof 〈the Linnaean and similar classificatory systems are fictions . . . having their value simply as pictures, as forms of representation—Ellis〉 Fiction may apply to something which appears to be or is believed to be true or which accords with some higher form of truth (as "poetic truth," "philosophical truth," or "spiritual truth") or with the demands of reason when these come into conflict with fact or with the world as apprehended by the senses; figment and fabrication, on the other hand, carry no implication of justification and typically suggest a defiance of truth of whatever kind or degree. Figment usually suggests the operation of fancy or of unlicensed imagination and negation of fact 〈the rude, unvarnished gibes with which he demolished every figment of defense—Stevenson〉 (a sense of unreality was creeping over him. Surely this great Chamber . . . did not exist at all but as a gigantic fancy of his own! And all these figures were figments of his brain!—Galsworthy) Fabrication applies to something that is made up with artifice and usually with the intent to deceive; consequently it is often used of a fiction that is a deliberate and complete falsehood 〈the common account of his disappearance is a fabrication〉 〈the legend, though some of its details are obviously fictitious, cannot be dismissed as a pure fabrication〉 〈it is evidence—fact, fabrication—Partridge〉 〈the Government story was not a complete fabrication but a careful distortion—Devlin〉 Fable (see also ALLEGORY 2) applies to a fictitious narrative that is obviously unconcerned with fact, usually because it deals with events or situations that are marvelous, impossible, preposterous, or incredible 〈if we may take the story of Job for a history, not a fable—Defoe〉 〈nothing but whispered suspicions, old wives' tales, fables invented by men who had nothing to do but loaf in the drugstore and make up stories—Anderson〉

Ana narrative, *story, tale, anecdote, yarn

fictitious, fabulous, legendary, mythical, apocryphal mean having the character of something invented or imagined as opposed to something true or genuine. Fictitious commonly implies fabrication and, therefore, more often suggests artificiality or contrivance than intent to deceive or deliberate falsification 〈many authors prefer to assume a fictitious name〉 〈he was a novelist: his amours and his characters were fictitious—Gogarty〉 In an extended sense fictitious definitely connotes falseness when applied to value, worth, or significance and suggests its determination by other than the right standards 〈the furore created by this incident gives it a fictitious importance〉 〈in booms and in panics the market value of a security is often fictitious〉 Fabulous stresses the marvelousness or incredibility of what is so described; only at times, however, does the adjective imply a thing's impossibility or nonexistence 〈the fabulous mill which
ground old people young—Dickens> (the company paid fabulous dividends) <(Lincoln) grows vague and more fabulous as year follows year—Mencken> Often it is little more than a vague intensive <a house with a fabulous view of the mountains> we had a fabulous vacation trip.> 

Legend usually suggests popular tradition and popular susceptibility to elaboration of details or distortion of historical facts as the basis for a thing's fictitious or fabulous character <the legendary deeds of William Tell> the Tarquins, legendary kings of ancient Rome—Bradford's John Henry . . . took a famous legendary Negro for its hero—Van Doren Mythical, like legendary, usually presupposes the working of the popular imagination, but it distinctively implies a purely fanciful explanation of the creation of the universe and its phenomena, and the myths and events especially in accounting for natural phenomena. Therefore, mythical in its wider use is nearly equivalent to imaginary and implies nonexistence <the mythical beings called nymphs> these ancestors are not creations of the mythical fancy but were once men of flesh and blood—Frazer Apocryphal typically attributes dubiety to the source of something (as a story or account) and especially suggests that the source is other than it is believed or claimed to be (this . . . epigram, has a certain fame in its own right. It too has been attributed to Ariosto, though it is evidently apocryphal—Morby> <the apocryphal work attributed to Chaucer in the 16th century—Philip Williams> In such use it does not necessarily imply that the matter is in itself untrue, but it stresses the lack of a known responsible source. Sometimes, however, apocryphal loses its stress on source and then may imply dubiety or inaccuracy of the thing itself <taking to themselves the upper rooms formerly belonging to the apocryphal invisible lodger—Dickens> <tales, possibly apocryphal and certainly embroidered, of his feats of intelligence work in the eastern Mediterranean—Firth> 

Ana invented, created (see Invent): *imaginary, fanciful, fantastic; fabricated, fashioned (see Make) 

Ant historical —Con *real, true, actual: *authentic, veritable: veracious, truthful, verisimilar (see corresponding nouns at Truth)
that there are other domains than that of physics—

Jean's Province is used in reference not only to the arts and sciences, each of which may be said to have its own domain, but also to a person or institution that because of his or its office, aims, or special character can be said to have jurisdiction, competence, power, or influence within clearly defined limits (it is within the province of a parent rather than of a teacher to discipline a pupil for misconduct out of school) (it is often stated that art goes beyond its province when it attempts to teach morals) (the almost imperceptibly realist explorations into behavior which are the province of the psychiatrist—Sapir) Province is also used in the sense of function (see also FUNCTION

n 1) and in the sense of a part of a larger domain (I should like the reader to accept engineering as a province of physics; so that the facts of the one may serve as credentials for the discoveries of the other—Darlow Sphere, even more than do others, thrive on the clear circumscription of limits; it therefore suggests aparness rather than fundamental differences and carries no hint of danger of trespass or interference (the aesthetic and ethical spheres... were never sharply distinguished by the Greeks—Dickinson) (in the sphere of morals we must often be content to wait until our activity is completed to appreciate its beauty or its ugliness—Ellis) (in the life of a man whose circumstances and talents are not very exceptional there should be a large sphere where what is vaguely termed "herd instinct" dominates, and a small sphere into which it does not penetrate—Russell) (a long and profound process of social change... but this time in the economic sphere—Strachey) Territory comes very close to domain in implying a field possessed and controlled and regarded as one's own; it does not, however, carry the implications so strong in domain of rightful ownership, of sovereignty, and of the title to inviolability; it may even suggest that the field has been usurped or taken over by the science, art, or activity in question (prose has preempted a lion's share of the territory once held, either in sovereignty or on equal terms, by poetry—Lowes) (if passageways connect the domain of physics with the domains of life or of spirit, physics ought in time to discover these passageways, for they start from her own territory—Jean's Bailiwick, basically the jurisdiction of a bailiff, is increasingly used in an extended and playful sense in reference to an individual and the special and limited province or domain in which he may or does exercise authority. It often carries a connotation of petty yet despotic display of power (a politician whose influence does not extend beyond his own bailiwick) (he will not get along with others unless he can keep within his own bailiwick) (we may neither be angry nor gay in the presence of the moon, nor may we dare to think

Ant crude —Con *rude, rough, raw, callow, green, uncouth

fire n Fire, conflagration, holocaust are comparable when meaning a blaze that reduces or threatens to reduce one or more buildings to ashes. Fire is the general term referable to such an event, whether it involves one or many buildings and whether it is checked or not (Chicago was nearly half destroyed by a fire that occurred in 1871) (there was a small fire on our street last night) Conflagration implies a devastating fire that must be contended with by all the available forces; it usually takes a length of time to check it or to prevent its further advance (a disastrous conflagration made 2000 persons homeless) (by quick work the firemen prevented the fire from developing into a conflagration) Holocaust basically denotes a burnt sacrifice, but in more general use it refers usually to a conflagration in which there has been a great loss of life and especially of human life (the burning of the Iroquois Theater at Chicago in 1903, in which nearly 600 persons lost their lives, was one of the worst holocausts ever known in the United States) In extended use holocaust usually stresses destruction of life, but it may blend in the notion of sacrifice (the Eire that had its birth in the holocaust of Easter Week —Richard Watts) (an assemblage of men whose maturity has been forged in the holocaust of battle —Loveman) Ana blaze, glare, flame, flare (see under blaze vb): burning, charring, scorching (see burn vb)

fire vb 1 kindle, ignite, *light

Ana *burn, scorch, char: *blaze, flame, flare, glare, glow; *illuminate, lighten

2 animate, inspire, *inform

Ant daunt —Con *dismay, appall

3 discharge, *dismiss, cashier, drop, sack, bounce

Ana *eject, oust, expel: *discard

firm adj Firm, hard, solid are comparable chiefly as meaning having a texture or consistency that markedly resists deformation by external force. Firm (opposed to loose, flabby) suggests such closeness or compactness of texture or a consistency so heavy or substantial that the substance or material quickly returns to shape or is difficult to pull, distort, cut, or displace (firm cloth)

firm flesh) (firm jellies) (firm ground) Hard (opposed to soft: see also hard 2) implies impenetrability or relatively complete resistance to pressure or tension but, unlike firm, hard rarely implies elasticity (hard as adamant) (hard as steel) (diamond is one of the hardest substances known) Solid (opposed to fluid) implies such density and coherence in the mass as enable a thing to maintain a fixed form in spite of external deforming forces (solid mineral matter) As opposed to flimsy, the term implies a structure or construction that makes a thing sound, strong, or stable (solid furniture) (a solid foundation) (the bungalow was a very solid one—Kipling) As opposed to hollow, it implies the absence of empty spaces within the structure or mass and, usually, the same or similar density and hardness of material throughout (a solid rubber tire) (a solid wall)

In extended use firm implies stability, fixedness, or resolution (a firm purpose) (a firm belief) (guide with a firm hand) (a firm and even tough diplomacy—Gautskell) Hard implies obduracy or lack of feeling (a hard master) (she was firm, but she was not hard—Archibald Marshall) (a sort of scoutmaster to a hard gang of boys —Lovett) Solid usually implies substantiality or genuineness (a solid meal) (solid facts) (solid virtues) (solid attainments) (money, the great solvent of the solid fabric of the old society, the great generator of illusion—Trilling) but it may imply absolute reliability or seriousness of purpose (solid banks) (a solid character) (his scholarship was solid and sound—McGiffert) or unbroken continuity (as in time, group feeling, or opinion) (put in a solid week on a piece of work) (the solid vote of the members)

Ana compact, *close, dense, thick: tough, tenacious, *strong: *stiff, rigid, inflexible

Ant loose, flabby —Con flaccid, *limp, floppy, flimsy, sleazy

fiscal *financial, monetary, pecuniary

fish vb Fish, angle mean to attempt to catch fish. Fish (except of the blues) (he works only by fits and starts) Occasionally it suggests nothing more than the un-
usual and passing character of the condition and is applied to things as well as to persons <enjoy a fit of laziness> 

A fit of bad weather

Attack always implies a sudden and often violent onslaught but carries no suggestion of length of duration <frequent attacks of pain> (an attack of melancholy) 

A prolonged attack of bronchitis

We have a second attack of hot weather—Whitman

Access and accession, though often interchangeable with attack, distractively imply the initiation of an attack or fit and often come close in meaning to outbreak or outburst (now and then an access of ... sudden fury 

would lay hold on a man—Kipling) one of his sudden sharp accessions of impatience at the leisurely motions of the Trujillo boy—Mary Austin Occasionally they also connote intensification (as of a mood or state of mind) to the point where control is lost or nearly lost (her evident, but inexplicable, access of misery—Meredith) In their technical medical senses paroxysm, spasm, and convulsion are sudden and usually short attacks especially characteristic of certain diseases. The distinguishing marks of a paroxysm are sudden occurrence or intensification of a symptom (as coughing) and recurrence of attacks; those of spasm are sudden involuntary muscular contraction, in some cases producing rigidity of the body or constriction of a passage and in others producing alternate contractions and relaxations of the muscles; those of convulsion are of repeated spasms of the latter kind affecting the whole or a large part of the body and producing violent contortions of the muscles and distortion of features. The implications of these technical senses are usually carried over into the extended senses. Paroxysm commonly occurs in the plural and suggests recurrent, violent attacks (the girls went into paroxysms of laughter) (throughout the night he suffered paroxysms of fear) Spasm, especially when used of emotional disturbances, often implies possession by something that for a moment grips and paralyzes (she could scarcely even look at the wall without a spasm of fear—Bennett)

When used in the plural, it usually suggests the more or less rapid alternation of contrasting moods or states of mind (he worked only by spasms) Convulsion implies definite physical effects accompanying the mood or state of mind and closely resembling those symptomatic of disease (the ragged crew actually laughed at me ... some of them literally throwing themselves down on the ground in convulsions of unholy mirth—Kipling)

fit adj 

Fit, suitable, meet, proper, appropriate, fitting, apt, happy, felicitous are comparable when they mean right with respect to the nature, condition, circumstances, or use of the thing qualified. Something is fit which is adapted or adaptable to the end in view, the use proposed, or the work to be done (good fit for a king) (but when to mischief mortals bend the will) (how soon they find fit instruments of ill!—Pope) (never even in the most perfect days of my development as an artist could I have found words fit to bear so august a burden—Wilde) (a wooden image, movable and fit to be carried in procession—San-tayana)

Sometimes, in addition, fit connotes competence or the possession of the required qualifications (men fit to command) (he is not a fit father for his children) (they do not know what the boy is fit for). Other times it suggests readiness (as in condition, state of health, mood, or inclination) (the vessel is now fit for service) (he played tennis to keep fit) Something is suitable which answers the requirements or demands of the occasion, the circumstances, or the conditions or suggests no incongruity with them (behavior suitable to his age and station in life)

will begin instinctively to arrange these institutions into suitable conventional categories—Marquand (clothes suitable for the occasion . . . tennis outfits, hiking outfits, cycling outfits—Laver) Something is meet which is not only suitable but nicely adapted to the particular situation, need, or circumstances; the word usually suggests rightness or justness rather than an absence of incongruity; thus, a punishment of a childish offense may be suitable if it is in accord with the years and mentality of the child, but it is not meet unless it suggests due proportion between the offense and its penalty (it is very meet, right, and our bounden duty, that we should at all times and in all places, give thanks unto thee, O Lord—Book of Common Prayer)

Sabbath was made a solemn day, meet only for preaching, praying, and Bible reading—Charles & Mary Beard

Something is proper (see also DECOROUS) which belongs to a thing on some justifiable grounds (as by nature, by custom, or by right reason) (water is the proper element for fish) (the proper observance of Memorial Day) (the article brought only half its proper price) When, as often happens, fitness or suitability is stressed rather than natural or rightful association, proper then implies determination of fitness or suitability by logic, reasonableness, or good judgment (the proper study of mankind is man—Pope) (according to Aristotle the thing to aim at is to be angry “on the proper occasions and with the proper people in the proper manner for the proper length of time”—Dickinson) Something is appropriate which is so eminently fit or suitable that it seems to belong peculiarly or distinctively to the person or thing with which it is associated, sometimes giving him or it a distinguishing grace or charm through its very congruity (an excitement in which we can discriminate two sorts of elements, the passions appropriate to the subject and the passion proper to the artist—Alexander) (the eighteenth-century gentleman spoke with a refined accent, quoted the classics on appropriate occasions—Russell) (we have agreed that our writing should be appropriate . . . that it should rise and fall with the subject, be grave where that is serious, where it is light not afraid of what Stevenson . . . calls “a little judicious levity”—Quiller-Couch)

Something is fitting which is in harmony with the spirit, the tone, the mood, or the purpose (news fitting to the night, black, fearful, comfortless and horrible—Shak) (it is a fitting paradox that he should live today . . . chiefly by those writings which contradict everything he believed—Stewart) Something is apt (see also APT 2; QUICK 2) which is nicely fitted by its nature or construction to attain the end desired, to accomplish the purpose in view, or to achieve the results contemplated (it was recognized that while one style was suited to one set of themes, another was apt for another set—Binyon) (Fourier . . . invented a mathematical process which was not only suitable for handling his problem, but proved to be so universally apt that there is hardly a field of science or of engineering where it has not penetrated—Darrow) Something is happy (see also GLAD, LUCKY) which is singularly appropriate and apt and therefore brilliantly successful or effective considered in its relation to the situation, the conditions, or other important factors (a happy choice of words, nicely expressing the subtlety of his thought) (whether a composite language like the English is not a happier instrument of expression than a homogeneous one like the German—Coerlidge) (of all writers he perhaps best combines in his style a felicitous elegance with a happy vernacular—Van Doren) Something is felicitous which is most opportunely, tellingly, or gracefully happy (I do not like mottoes but where they are singularly felicitous—Lamb) (some of the most felicitous turns of thought and phrase in poetry are the result of a flash of inspiration under the happy guidance of a rhyme—Lowes)

(let us inquire . . . whether the relation of the figures to

each other and of groups to the space they occupy is a felicitous one—Binyon

Ana adapted or adaptable, adjusted or adjustable, conformed or conformable (see corresponding verbs at ADAPT); qualified, capable, *able, competent

Ant unfit

fit vb *prepare, qualify, condition, ready

Ana endow, endue (see DOWER): furnish, *provide, supply

fitful, spasmodic, convulsive are comparable when they mean lacking steadiness or regularity in course, movement, or succession (as of acts or effects). Fitful stresses variability and intermittency; it implies an irregular succession characterized by fits and starts <after life's fitful fever he sleeps well—Shak.> <the fitful gloom and sudden laments of the room by firelight—De Quincey> <a fitful, undecided rain—Kipling> <a fitful wind swept the cheerless waste—Conrad> <hitherto I've been gloomy, moody, fitful—Gilbert> Spasmodic implies fitfulness, but it further suggests marked alternations (as of violent activity and inactivity or of great effort and of negligible effort or of zeal or enthusiasm and lack of interest); it therefore implies, even more than fitful, an opposition to what is sustained at a high pitch <spasmodic efforts to reform municipal government> <spasmodic energy> <a continuous discussion of international affairs, not spasmodic action at times of crisis—Attlee> <a spasmodic movement of despair—S. S. Van Dine> <spasmodic industry> Convulsive differs from the preceding terms in not implying intermittency and in stressing unsteadiness, strain or overstrain, and the lack of such regular rhythm as is the sign of control and especially of muscular, mental, or spiritual control <convulsive rise and fall of the breast> <the convulsive movement of the earth characteristic of an earthquake> <he had a convulsive drive, a boundless and explosive fervor—Behrman> <a convulsive little hug—Turnbull>

Ana *intermittent, periodic, recurrent: desultory, hit-or-miss, *random, haphazard

Ant constant (sense 3) —Con *steady, uniform, even, equal: regular, methodical, systematic, *orderly

fitting adj appropriate, proper, meet, suitable, *fit, apt, happy, felicitous

Ana *relevant, pertinent, germane, apposite, apropos: seemly, *decorous, decent, proper: congruous, *consonant: harmonious, concordant, accordant (see corresponding nouns at HARMONY)

Ant unfitting

fix vb 1 *set, settle, establish

Ana *stabilize, steady: determine, *decide, rule, settle: *prescribe, define

Ant alter: abrogate (a custom, rule, law) —Con modify, *change, vary: supplant, supersede, displace, *replace

2 *fasten, attach, affix

Ana *install, instill, inculcate: *secure, rivet, anchor, moor

Con eradicate, uproot, extirpate (see EXTERMINATE): upset, *overturn, overthrow, subvert

3 *adjust, regulate

Ana repair, *mend, patch, rebuild: *correct, rectify, revise, amend, emend

Con derange, disarrange, disorganize, unsettle, *disorder

fix n *predicament, plight, dilemma, quandary, scrape, jam, pickle

flabbergast amaze, astonish, astonish, *surprise

Ana dumbfound, confound, bewilder, nonplus, perplex (see PUZZLE): disconcert, rattle, faze, discomfit (see EM-BARRASS)

flabby flaccid, floppy, *limp, flimsy, sleazy

flag n Flag, ensign, standard, banner, color, streamer, pennant, pendant, pennon, jack, have are not always clearly distinguished. Flag, the comprehensive term, is applied to a piece of cloth that typically is rectangular, is attached to a staff, mast, halyard, or line, and carries an arrangement of colors, an emblematic figure, or a motto. The purpose of a flag is primarily to serve as a sign or symbol of a nation, a branch of the service, an organization, or an office, but it may also serve as a signal (as in military or naval operations) or in giving information (as of a weather change or the approach of a train) <the flag of England> <the admiral's flag> <a flag of truce> <a trainman's flag> Ensign is applied chiefly to a flag that indicates nationality and specifically to one flown by ships at sea <the Stars and Stripes is the national ensign of the United States> <of the three ensigns of Great Britain, the white ensign is flown by ships of the Royal Navy and by naval barges, the red ensign by British merchant vessels, and the blue ensign by some vessels commanded by officers of the Royal Naval Reserve and by some classes of government vessels not part of the navy> Standard and banner are more or less literary terms for the flag (as of a country, a party, or a religious, civic, or patriotic organization) thought of as a rallying point or as something to be followed. Standard especially suggests the former because the term originally designated and still often designates a flag or a sculptured figure raised on a pole so as to be a gathering point for all who belong under it <as armies at the call of trumpet... troop to the standard—Milton> Banner basically applies to a flag (often hung downward from a crosspiece instead of flying from a staff) of an individual (as an emperor, king, lord, or military leader) which was formerly flown from windows or doors or carried aloft at the head of a procession (as of troops marching to war) <hang out our banners on the outward walls; the cry is still "They come"—Shak> <tremble as an army with banners—Song of Solomon 6:4> Color (most frequently found in the plural colors) may apply to a national flag, to a flag emblematic of affiliation or partisanship, or to a flag of most military units; the term is particularly likely to suggest military activity or display <call to the colors> <hoist the colors> <trop the colors> The British colors were planted on the summit of the breach—Wellington> The remaining terms are highly specific and definite in implications. Streamer applies to a long narrow flag (as on the masthead of a government ship) that floats in the wind; pennant and pendant, the latter more English than American, apply to a streamer that is long, narrow, and tapering. Pennant even more often applies to a narrow flag, typically triangular, which is flown by ships, which is used in signaling and in decorating, or which is exhibited (as by a baseball club) as a sign of championship. Pennon may apply to a narrower flag or a small streamer suitable for attaching to a lance. Jack denotes a small oblong flag indicating nationality which is hoisted on a staff at the bow or bowsprit cap of a ship or...
glare, flame, *blaze, glow (see under BLAZE vb)  
Ana rising or rise, surging or surge, towering (see corresponding verbs at RISE): darting or dart, shooting (see corresponding verbs at FLY): flashing or flash, coruscation, scintillation (see corresponding verbs at FLASH)

flash vb Flash, gleam, glance, glint, sparkle, glitter, glister, scintillate, coruscate, twinkle mean to shoot forth light (as in rays or sparks). Flash implies a sudden and transient outbreak of light or a sudden display of something that brilliantly reflects light or seems lighted up (the head-lights . . . flashed into barnyards where fowls slept—Anderson) (flashed all their sabers bare—Tennyson) (his flashing eyes, his floating hair—Coberidge) Gleam implies a ray which shines through an intervening medium or against a background of relative darkness (1 see the lights of the village gleam through the rain and mist—Longfellow) (a light gleamed through the chimneys in the wall—Dickens) (his dislike of me gleamed in his blue eyes and in his supercilious cold smile—Rose Macaulay) Glance implies darting or obliquely reflected light; glint implies quickly glancing or gleaming light besides the glancing tears . . . some diamonds . . . glanced on the bride's hand—Dickens) (an insane light glanced in her heavy black eyes—Stowe) (specks of sail that glittered in the sunlight far at sea—Dickens) (when the first sunshine through their dewdrops glints—J. R. Lowell) (the large brass scales near the flour bins glinted—Bennett) Sparkle suggests quick, bright, brief, and innumerable small flashes of light; glitter connotes greater brilliancy or showiness than sparkle, sometimes with the implication of something sinister (the fireflies . . . sparkled most vividly in the darkest places—Irving) (the sparkling waves—Wordsworth) (everything sparkled like a garden after a shower—Cather) (eyes sparkling with amusement) (eyes glittering with greed) (glittering rings) (the sunshine sifted down and the yellow flower . . . caught it, and glittered like a topaz—Delafield) Glister implies a more or less subdued sparkle, glitter, or gleaming that suggests the lustrous shining quality of a moist surface (dew glistening in the soft morning light) (snowy mountains glittering through a summer atmosphere—Irving) (eyes glistening with heavenly tears—Carlyle) Scintillate implies the emission of sparks in a steady stream or a sparkling suggestive of such an emission; coruscate the emission of a brilliant flash or succession of flashes; both words have extended as well as literal use (a night so clear that the stars seem to scintillate) (an ornate style that coruscated with verbal epigrams—Huxley) (coruscating wit—Twinkle) Twinkle suggests a soft and intermittent sparkling, often wavered or lustre (twinkle, twinkle, little star . . . like a diamond in the sky—Jane & Ann Taylor) (sunbeams . . . twinkled on the glass and silver of the sideboard—Cather) (he looked at her and his eyes twinkled—Anderson)

flag vb *droop, wilt, sag
Ana *fall, subside, slump, sink, drop: ebb, wane, *abate
flagrant, glaring, gross, rank are comparable as derogatory intensives meaning conspicuously or outrageously bad or unpleasant. Flagrant usually applies to offenses, transgressions, or errors which are so bad that they cannot escape notice or be condoned (his treatise is marked by several flagrant errors) (a flagrant abuse of the executive power) (flagrant injustice) (open and flagrant mutiny—Kipling) (in flagrant violation of all the New York properties) Hoarse, Grating carries an even stronger implication of obtrusiveness than flagrant; the term is often applied to something which is so evidently or so conspicuously wrong, improper, or faulty as to inflict such distress or pain upon the observer as might too vividly or too harsh a light a glaring fault in a design) (a glaring inconsistency in his argument) (his second novel is in glaring contrast to his first novel) (this evil is so glaring, so inexcusable—Shaw) (glaring imperfections which go far beyond a mere lack of verbal felicity—Krutch) Gross (see also COARSE; WHOLE 2) is even more derogatory than flagrant or glaring because it suggests a magnitude or degree of badness that is beyond all bounds and wholly inexcusable or unpardonable. However, the term is not so often referred to evil acts or serious offenses as it is to human attitudes, qualities, or faults that merit severe condemnation (gross carelessness) (gross stupidity) (gross superstition) (Elizabethan and Jacobean poetry . . . had serious defects, even gross faults—T. S. Eliot) (the hero is as gross an imposition as the heroine—Shaw) (they must read as the grossest improbity and rankest treason—Sperry) (even illness cannot excuse such unflinching behavior and such gross folly—Graves) Rank (see also RANK 1) applies chiefly to nouns that are terms of reproach; it implies that the person or thing described by such a term is extremely, utterly, or violently whatever he or it is declared to be (O, my offense is rank, it smells to heaven—Shak.) (still she looked less of a rank lunatic—Meredith) (it was hatred, simple hatred, that rank poison fatal to Mr. Hazard's health, which now plagued his veins —Krutch) (a light gleamed through the chimneys in the wall—Dickens) (his dislike of me gleamed in his blue eyes and in his supercilious cold smile—Rose Macaulay) Glance implies darting or obliquely reflected light; glint implies quickly glancing or gleaming light besides the glancing tears . . . some diamonds . . . glanced on the bride's hand—Dickens) (an insane light glanced in her heavy black eyes—Stowe) (specks of sail that glittered in the sunlight far at sea—Dickens) (when the first sunshine through their dewdrops glints—J. R. Lowell) (the large brass scales near the flour bins glinted—Bennett) Sparkle suggests quick, bright, brief, and innumerable small flashes of light; glitter connotes greater brilliancy or showiness than sparkle, sometimes with the implication of something sinister (the fireflies . . . sparkled most vividly in the darkest places—Irving) (the sparkling waves—Wordsworth) (everything sparkled like a garden after a shower—Cather) (eyes sparkling with amusement) (eyes glittering with greed) (glittering rings) (the sunshine sifted down and the yellow flower . . . caught it, and glittered like a topaz—Delafield) Glister implies a more or less subdued sparkle, glitter, or gleaming that suggests the lustrous shining quality of a moist surface (dew glistening in the soft morning light) (snowy mountains glittering through a summer atmosphere—Irving) (eyes glistening with heavenly tears—Carlyle) Scintillate implies the emission of sparks in a steady stream or a sparkling suggestive of such an emission; coruscate the emission of a brilliant flash or succession of flashes; both words have extended as well as literal use (a night so clear that the stars seem to scintillate) (an ornate style that coruscated with verbal epigrams—Huxley) (coruscating wit—Twinkle) Twinkle suggests a soft and intermittent sparkling, often wavered or lustre (twinkle, twinkle, little star . . . like a diamond in the sky—Jane & Ann Taylor) (sunbeams . . . twinkled on the glass and silver of the sideboard—Cather) (he looked at her and his eyes twinkled—Anderson)

flair proclivity, propensity, *leaning, penchant
flamboyant *ornate, florid, rococo, baroque
flame n blaze, flame, glare, glow (see under BLAZE vb)
Ana elengiance, radiance, brilliance or brilliancy, refulgence, luminosity, brightness (see corresponding adjectives at BRIGHT): ardor, fervor, *passion: flashing, coruscation, gleaming, scintillation (see corresponding verbs at FLASH)
flash vb *blaze, flare, glare, glow
Ana *flash, gleam, glance, glint, coruscate: *burn: fire, ignite, kindle, *light
flamnable inflammable, incendiary, inflammatory, *combustible
flare vb *blaze, glare, *blaze, glow
Ana dart, shoot (see FLY): flutter, flicker (see FLIT): rise, arise, *spring: *flash, glance, glint, coruscate, scintillation

flag analogous words Ant antonyms Con contrasted words See also explanatory notes facing page 1
some, savory, sapid, tasty, *palatable: zestful (see corresponding noun at TASTE)

flattery adulation, *compliment

Ana blandishment, cajolery (see corresponding verbs at COAX): fawning, toady, trickling (see FAWN vb); eulogy, panegyric, *encomium: homage, obeisance, deference (see HONOR)

flatulent *inflated, tinny, turgid

fleer vb *scoff, jeer, gibe, gird, sneer, flout

Ana deride, mock, *ridicule: grin, *smile, smirk

fleet vb *while, wile, beguile

Ana *speed, hasten, hurry, quicken, accelerate

fleet adj swift, rapid, *fast, quick, speedy, hasty, expeditious

Ana *agile, brisk, nimble, spry: darting, skimming, scudding, flying (see FLY vb)

Con deliberate, leisurely, laggard, dilatory, *slow

fleeting evanescent, fugitive, passing, transitory, *transient, ephemeral, momentary, short-lived

Ant lasting

fleshy *carnal, sensual, animal

Ana physical, *bodily, corporeal, corporal, somatic: *sensuous, sensual, voluptuous, luxurious, sybaritic, epicurean

Con *moral, ethical, noble, virtuous: spiritual, divine, religious (see HOLY): intellectual, psychic, *mental

fleshy, fat, stout, portly, plump, rotund, chubby, corpulent, obese mean thick and heavy in body because of superfluous fat. Fleshy and fat are not clearly discriminated in use, although fleshy may imply overabundance of muscular tissue and fat, of adipose tissue; when a derogatory connotation is intended fat is usually preferred (the unreasonably fat woman with legs like tree trunks—K. A. Porter)

<my appetite is plenty good enough, and I am about as fleshy as I was in Brooklyn—Whitman> <a fleshy, jolly man> <a dowdy fat woman> Stout implies a thickset, bulky figure or build, but it is often merely a euphemistic substitute for fat; portly adds to stout the implication of a more or less dignified and imposing appearance (a very stout, pluffy man, in buckskins and Hessian boots—Thackeray) <one very stout gentleman, whose body and legs looked like half a gigantic roll of flannel, elevated on a couple of inflated pillow-cases—Dickens> <a large portly figure . . . the very beau ideal of an old abbthaw—J. W. Carlyle> <an elderly gentleman, large and portly, and of remarkably dignified demeanor—Hawthorne> Plump implies a pleasing fullness of figure and well-rounded curves (<the plump goddesses of Renaissance paintings> <she became plump at forty> <his wife was . . . plump where he was spare—Sayers> Rotund suggests the shape of a sphere; it often, in addition, connotes shortness or squatness (this pink-faced rotund specimen of prosperity—George Eliot) Chubby applies chiefly to children or to very short persons who are otherwise describable as rotund <a chubby cherub of a baby> Corpulent and obese imply a disfiguring excess of flesh or of fat <Mrs. Byron . . . was a short and corpulent person and rolled considerably in her gait—Thomas Moore> <a woman of robust frame, square-shouldered . . . and though stout, not obese—Bronie>

Ana *muscular, brawny, burly, husky

Ant skinny, scrawny —Con *lean, lank, lanky, gaunt, rawboned, angular, spare: *thin, slim, slender, slight

flex vb Flex, crook, bow, buckle mean to bend, but because of special implications and applications they are not freely interchangeable. Flex is used chiefly of the bending of a bodily joint especially between bones of a limb by which the angle between the bones is diminished, or it may apply to the contraction of muscles by which the bending is accomplished; in either case the word is usually opposed to extend. In the air was as if it flexed the arm at the elbow. <flex the leg at the hip joint>. <he has grown so old and stiff that he cannot easily flex his knees>. <the world . . . would jeer at any eccentric who should flex his mental muscles in public—Barzun>

Crook may replace flex <the air was so full of rheumatism that no man could crook his arm to write a sermon—Blackmore> <John, snickering, crooked his wicked thumb—Browning> but it is also used to convey an implication of circuitousness and hence of contortion or distortion <God knows, my son, by what bypaths and indirect ways I met this suggestion of submission and implies a bending under pressure—Phil 2:10> but it often means explicitly the leg at the hip <he was spare—Sayers> <a woman of robust frame, square-shouldered . . . and though stout, not obese—Bronie>

Bow (see also YIELD) may denote to bend as in reverence or submission <at the name of Jesus every knee should bow—Phil 2:10> but it often means explicitly to incline downward the head and usually the part of the body above the waist, especially as a gesture of greeting, of recognition, or of reverence <bow pleasingly to acquaintances> <bow reverently before a shrine> (grasses that now were swaying and bowing like living things in happy dance—Idriess) In a related use bow retains some suggestion of submission and implies a bending under something (as a heavy weight) that wears or oppresses <trees bowed down with ice> <an old man bowed with years>

Buckle implies a bending under stress (as from undue pressure, weight, heat, or freight) that loosens or weakens what supports and that brings on collapse, often to the point of permanent distortion <noticed the buckling of the girder of the bridge> <the freight train buckled as it left the track and fell over the embankment> <the wall buckled under the heat of the fire> <his knees buckled
and he fell down on the floor—Chandler} {the bulkhead had buckled; he had actually seen it coming forward—Crofts}

Ana bend, *curve, twist

Ant extend

flexible *elastic, supple, resilient, springy

Ana pliable, plant, maleable, ductile, *plastic: tractable (see obedient): limber, lithe, *supple

Ant inflexible —Con *stiff, rigid, wooden: tough, tenacious (see strong): brittle, crisp, fragilable, *fragile: hardened, indurated, callous

flexuous *winding, sinuous, serpentine, tortuous

flutter vb *flit, flutter, hover

Ana waver, vibrate, oscillate, fluctuate, *swing: flare, flame, glare, *blaze: *flash, gleam, glance, glint, coruscate: quiver, quiver, tremble (see shake)

flightiness light-mindedness, volatility, levity, *lightness, frivolity, flippancy

Ana capriciousness, unstableness or instability, fickleness, mercurialness or mercuriality, inconstancy (see corresponding adjectives at inconstant): effervescence, buoyancy, elasticity (see corresponding adjectives at elastic): liveliness, gaiety, sprightliness (see corresponding adjectives at lively)

Ant steadiness: steadfastness —Con constancy, equableness (see corresponding adjectives at steady): seriousness, stiffness, sedateness, earnestness (see corresponding adjectives at serious)

flimsy adj *sleazy, *limp, floppy, flaccid, flabby

Ana *thin, slight, tenuous: *loose, slack: *weak, feeble

Con stout, sturdy, *strong: *heavy, weighty

flinch vb *recoil, shrink, wince, blench, quail

fling vb *hurl, *throw, sling, toss, cast, pitch

Ana thrust, shove, propel, *push: impel, drive, *move

flippancy levity, *lightness, light-mindedness, frivolity, volatility, flightiness

Ana sauciness, pertness, archness (see corresponding adjectives at saucy): impishness, waggliness, roguishness, mischievousness, playfulness (see corresponding adjectives at playful)

Ant seriousness —Con earnestness, gravity, solemnity, sobriety (see corresponding adjectives at serious)

flirt vb *coquet, daily, *trifle, toy

Ana *play, sport, disport: *caress, fondle, pet

flit vb *flit, flutter, flitter, flicker, hover suggest the movements of a bird or other flying or floating thing and mean to move in a manner like or reminiscent of such movements

Flit implies a light and swift passing from place to place or point to point {birds flitted from tree to tree} {the talk flitting from one subject to another and never dropping so long as the meal lasts—Arnold} {seemed to pass the whole of his life flitting in and out of bedrooms—Benetti} {Clare Potter, flushed and gallantly gay, flitting about from person to person—Rose Macaulay} {flapper implies the movement of a bird rapidly beating its wings or the restlessness of a moth about a light; it especially implies unsteadiness and agitation (till she felt the heart within her fall and flirted tremulously—Tennyson) {gay moods and mysterious, moth-like meditations hovering in my imagination . . . but always the rarest, those freaked with azure and the deepest crimson, flitter away beyond my reach—L. P. Smith} {a little dark shadow flitted from the wall across the floor—Cather} {her eyes . . . timidly flitting over the depths of his—Meredith} {flitter implies the lightness and quickness of movement suggested by flit but usually also suggests the uneasiness or uncertainty conned by flutter} {the poor silly flitttering woman} {children flittering here and there} {when he was pressed and irritated to condemn the Cardinal, his eyes flittered uncomfortably—Hackett} {flared and flittered around them like light gone mad—Röllaag} {flicker implies a light fluttering or a fitfully wavering movement (translucent flickering wings between the sun and me—Stevenson) {thou small flame, which, as a dying pulse rises and falls, still flickerest up and down—Shelley} {fireflies flicker in the tops of trees—Lowell} {hover implies a hanging suspended over something like a bird maintaining its position in the air by an even usually slow movement of the wings; the word frequently connotes irresolution, sometimes menace, sometimes solicitude {vultures hovering over a battlefield} {behold him perched in ecstasies, yet seeming still to hover—Wordsworth} {your servant . . . has been hovering about us and looking at you anxiously for some minutes—Shaw} {the shark was still hovering about—Birles}

Ana *fly, dart, skim, float, scud

flitter vb *flit, flutter, flicker, hover

Ana *fly, dart, skim: quiver, quaver, teeter (see shake)

float vb *fly, skim, sail, dart, scud, shoot

Ana glide, *slide, slip: *flit, hover, flutter

flood n 1 *flow, stream, current, tide, flux

Ana *excess, superfluity, surplus: incursion, *invasion

2 Flood, deluge, inundation, torrent, spate, cataract are comparable when they mean a great or overwhelming flow of or as if of water. Flood basically implies the flowing of water, often in great abundance, over land not usually submerged; it therefore suggests usually something (as a stream) that exceeds or breaks its normal bounds, but it carries in itself no clear implication of the ultimate cause {the disastrous Mississippi river floods of 1936} {his home was washed away by the flood} {a flood of advertising was sent through the mail} {messages of sympathy came in a flood} {the rising flood of students is very much like the barbarian invasions—Bush} {Deluge may apply to a flood that destroys or drowns but especially to a tremendous and continuous downpour of rain; the term seldom suggests a flood which results from a melting of snows, a rising river, or a tidal wave. In its extended uses it implies, sometimes hyperbolically, a power that, through force of numbers, of volume, or of quantity cannot be resisted or that sweeps one away {the rain descended in a deluge} {the waters have not yet abated from the deluge} {the memorable deluge of the thirteenth century out of which the Zuyder Zee was born—Motley} {a deluge of criticisms fell on him from all sides} {the frightful deluge of spoken and printed palaver—Sat. Review} {she becomes lost in the overflow—a formless, unending deluge of realistic detail—Robert Humphrey} {Inundation implies a flood caused by a stream, lake, or exceptionally high tide overflowing adjacent land; it therefore stresses something that overspreads and extends far and wide {the annual inundation of Egypt by the Nile} {the threat of inundation by the sea—Mumford} {his tears were not drops but a little inundation down his cheeks—Wescott} {an inundation of Italy by barbarians} {Torrent implies an impetuous rushing or surging of waters (as of a river in flood or of a stream that follows a steep course). It stresses the violence and rapid movement of the stream rather than its destructiveness or its capacity for spreading far and wide, and in extended use may be applied to something that comes forth with the same suddenness, the same violence, and the same clear direction {a torrent of water swept down the hillside} {he used to say that the mountain torrents were the first road builders, and that wherever they found a way, he could find one—Cather} {pouring

Ana analogous words Ant antonyms Con contrasted words See also explanatory notes facing page 1
forth that torrent of stinging invective—Hudson (philosophy) provided a foothold for man above the torrent of circumstance—Buchan. Spate refers literally to a stream that has suddenly become full, agitated, and turbulent under the influence of a spring freshet or violent rains; hence in its extended applications it suggests a sudden swelling or outpouring of what usually flows in a quiet stream (when you are a big man, and fish such a stream as that, you will hardly care . . . whether she be roaring down in full spate—Kingsley) (she had hardly sat down when he began to talk full spate—about the war, the war of 1914—Henry Miller) (the spate of books on conservatism and liberalism in America—Nieber) (a spate of inventions in the early years of the century) Cataract denotes a waterfall or a steep rapids characterized by a great volume of water descending precipitously or headlong; it is sometimes applied to something (as a deluge of rain or of words) that suggests such a waterfall or rapids in its overwhelming downpour or rush (flow, winds, and crash your cheeks! rage! blow! You cataracts and hurricanes, spout—Shak.) (the cataract of nastiness which he poured alike on Piso and Clodius and Gabinius—Froude) (no doubt flaming cataracts of lava rushed down the sides of Vesuvius on that terrible day—Lucas).

Ana *flow, stream, tide, current
floppy *limp, flabby, flaccid, flimsy, sleazy

Ana *flow

florid *ornate, flamboyant, rococo, baroque

flounder vb *stumble, trip, lurch, lumber, galumph, lollop, bumble

Ana struggle, strive (see ATTEMPT): toil, travail, labor (see corresponding nouns at WORK): *wallow, welter

flourish vb 1 *succeed, prosper, thrive

Ana bloom, flower, *blossom, blow: *increase, augment, multiply: *expand, amplify

Ant languish —Con *wither, shrivel: shrink, *contract: ebb, *abate, wane, subside

2 brandish, shake, *swing, wave, trash

Ana wield, manipulate, ply, *handle: flaunt, display, exhibit, *show

float vb *scoff, jeer, gib, fleer, gibe, sneer

Ana scout, scorn, *despise, contemn, disdain: spurn, repudiate (see DECLINE): deride, *ridicule, mock

Ant revere —Con *regard, respect, esteem, admire (see under REGARD N)

flow vb issue, emanate, proceed, stem, derive, *spring, arise, rise, originate

Ana emerge, *appear, loom: start, *begin, commence

Flow n Flow, stream, current, flood, tide, flux are comparable when meaning something issuing or moving in a manner like or suggestive of running water. Flow may apply to the issuing or moving mass or to the kind of motion which characterizes it, but in either case it implies the type of motion characteristic of the movement of a fluid; the term may suggest either a gentle or a rapid pace and either a copious or a meager supply, but it consistently implies an unbroken continuity of the particles or parts (the flow of his ideas exceeded his capacity for setting them down in writing) (she expressed herself in a flow of words) (the hardly perceptible flow of a mountain glacier) (the thought of never ceasing life as it expresses itself in the flow of the seasons—Anderson) (she would tell you what she thought about the world and its ways in a flow of racy comment—Rose Macaulay) Stream implies a flow characteristic of a body of running water (as a river) or of water pouring forth from a source or outlet (as a fountain or a faucet). The term places emphasis more upon the volume, the duration, and the constant succession and change of particles than upon the type of motion (for weeks after the surrender a stream of refugees crossed the country’s border) (music, acting, poetry proceed in the one mighty stream: sculpture, painting, all the arts of design, in the other—Ellis) (novelists who present their characters not in action, but through the stream of consciousness of each) (let loose a stream of commentary and discussion—Southern) Current differs from stream in laying greater stress on the direction or course of the movement implied and in carrying stronger suggestions of its force or velocity (streams of people passed him in either direction, but he was finally caught by the current of those moving south) (he could not maintain his position against the current of opposition) (currents of cold air swept in from the north) (he might drift some distance with the democratic current of the age, and then, with Gladstone, grow affrighted—Kirk) (Olds might have won Ford’s success had his mind been more sealed against the currents to which it was exposed—Burlingame) Flood is often used in place of flow or stream to imply extreme copiousness in the supply or to attribute to it an overwhelming or torrential power (it is not, he then feels with a sudden flood of emotion, that America is home, but that home is America—Brownell) (this poem called forth floods of abuse—Day Lewis) Tide applies to something that flows or courses like an ocean tide and suggests either an alternation of directions (swayed by the sweeping of the tides of air—Bryant) or a power to suck one into its course by the force of its outward or inward pull (Stanley was caught in the tide of war fervor—Rose Macaulay) Flux, more specifically than stream, stresses the unceasing change in the parts, particles, or elements and, sometimes, in the direction of what flows (for this and that way swings the flux of mortal things though moving inly to one far-set goal—Arnold) (how idle is it to commiserate them for their instability, when not stability but flux is their ideal!—Brownelly) Flux often specifically applies to the outward aspect or appearance which is constantly changing in contrast to its real and abiding nature (to distinguish between the transient, unsatisfying flux of things, and the permanent, satisfying reality which lies behind it—Inge).

Ana *succession, progression, series, sequence: continuity, *continuation, continuance

flower n blossom, bloom, blow (see under BLOSSOM vb)

flow vb *blossom, bloom, blow

Ana flourish, prosper (see SUCCEED)

flowery aureate, grandiloquent, magniloquent, rhetorical, euphuistic, bombastic

florid *ornate, flamboyant, inflated, tumid, turgid: sumptuous, luxurious, *decide

fluid mundane, border) (music, acting, poetry proceed in the one mighty stream: sculpture, painting, all the arts of design, in the style, decoration) —Con bald, barren, *bare: matter-of-fact, *prosaic

flying field *airport, airfield, airstrip, landing strip, landing field

foam n Foam, froth, spume, scum, lather, suds, yeasts are comparable when they denote either a mass of bubbles gathering in or on the surface of a liquid or something as insubstantial as such a mass. Foam is the most comprehensive of these terms but is not interchangeable with all; it implies an aggregation of small bubbles such as rises to the top of a fermenting liquid or an effervescing or boiling liquid, or appears on the surface of the sea when agitated by high winds or covered with breaking waves; the term is also applicable to a bubbly slaver dribbling from the mouth of one in a rage or in great excitement or to the clotted sweat of an animal driven to exhaustion or suffering from intense heat (the rider from the château, and the horse in a foam, clattered away through the village—Dickens) Of all these words foam commonly has the most pleasant associations, usually connoting in poetry whiteness, delicacy, and grace (Idalian Aphrodite beautiful, fresh as the foam—Tennyson) (the foam that looks so sunbright when your glass of beer is half froth) (foam forming at the mouth of a mad dog) (his speech had no logical substance, being mostly froth) (in all the froth and ferment between capital and labor—Furnas) Spume is applicable where foam or froth might also be employed (they dart forth polypus-antennae, to blister with their poison spume the wanderer—Shelley) but the chief idea of the froth arising on an agitated body of water (all the billows green tossed up the silver spume against the clouds—Keats) (as when a sand-bar breaks in clotted spume and spray—Kipling) shore encumbered by rain-washed boulders and ruffed with sea spume—Hun Svin) Scum distinctively applies to the bubbly film that rises on boiling liquids, especially those containing organic matter (scum on boiling currant juice) or to a similar film which forms on molten metals (the scum or scoria of iron) or on the surface of a body of stagnant water (the ditch is covered with a green scum) Such scums ordinarily constitute impurities that are removed (as from broth or molten metal) or that constitute a contamination impairing the usability (as of stagnant
water); this notion of worthlessness or obnoxiousness is carried over into extended use especially as applied to a class or body of persons (the social scum, the passively rotting mass of people who lie at the bottom of the social scale—Geismar) Lather and suds both apply to the foam produced by agitating water impregnated with soap or detergent. Lather, however, usually suggests a less frothy condition than suds and a heavier aggregation of small soapy bubbles (hard water does not produce a good lather for shaving) Suds, on the other hand, often denotes water so covered with a soapy foam that it is usable for laundering clothes (the laundress likes the soap because it gives her plenty of suds) (soak the cloth in hot suds) Lather, rather than suds, may be preferred when the foam induced by intense sweating or emotional excitement is denoted (a hard-ridden horse working up a lather) (he was in a lather of rage) but suds is more usual when the reference is to something that suggests the appearance of suds in a laundry tub or washing machine (another [medicine man] whips up a mixture of water and meal into frothy suds symbolic of clouds—Frazer) Yeast basically applies to a froth or semisolid composed of an aggregate of small fungal cells and found in saccharine liquids (as fruit juices and malt worts) in which it induces fermentation. The same substance is used as a leavening agent in bread; from this stems one line of its extended use in which it suggests a sign of activity, vitality, or agitation (seething with the yeast of revolt—Dobie) But because yeast often appears as a froth on liquids and is accompanied by fermentation, the term has another line of extended use in which it is applied to a similar froth, foam, or spume, especially one appearing on the surface of an agitated sea (the ship . . . swam allowed with yeast and froth—Shak) (they melt into thy yeast of waves—Byron)

**focal** *central, pivotal*

*Ana* significant, important, momentous (see corresponding nouns at IMPORTANCE): salient, signal, striking, arresting, outstanding (see NOTICEABLE)

*Ana* discomfit, *embarrass, disconcert, faze, rattle: curb, check, *restrict, inhibit

*Con* *advance, further, forward, promote: abet, foment, *incite, instigate

**follow vb** 1 Follow, succeed, ensue, supernove mean to come after someone or, more often, something. Although all of these verbs occur as transitives and intransitives, *ensue* and *supernove* are more commonly intransitives. *Follow* is the general term and may imply a coming after in time, in sequence, in pursuit (see *follow 2*), in logic, or in understanding (the singing of “America” by the audience will follow the introductory prayer) (Queen Victoria followed William IV as British sovereign) (the driving force in education should be the pupil’s wish to learn, not the master’s authority; but it does not follow that education should be soft and easy and pleasant at every stage—Russell) *Succeed* commonly implies an order (as one determined by descent, inheritance, election, or rank) by which one person or thing comes after another (son *succeeded* father as head of the business for many generations) (the eldest son *succeeds* to the title) (the person who will *succeed* the late congressman will be appointed by the governor of the state) *Succeed* is often used when the idea of a fixed order is lost, but it still usually retains the idea of taking the place of someone or something (the link dissolves, each seeks a fresh embrace, another love *succeeds*, another race—Pope) (the anxieties of common life began soon to *succeed* to the alarms of romance—Austen) *simplicity of concept succeeds* complexity of calculation—Bell) *Supervene* usually implies some logical connection or the operation of some principle of sequence as that of necessity (that such a consequence would ensue) was far from the thoughts of Rights—Austen) (each knowing the other, a conversation *ensures* under the hypothesis that each to the other is unknown . . . a very silly source of equivocque—Poe) *Supervene* suggests a following by something added or conjointed and often unforeseen or unpredictable (two worlds, two antagonistic ideals, here in evidence before him. Could a third condition *supervene*, to mend their discord?—Pater) (it was not acute rheumatism, but a *supervening* peril—ditis that . . . killed her—Bennett) it is in the philosophy that *supervened* upon the popular creed . . . that we shall find the highest . . . reaches of their thought—Dickinson)

2 *Follow*, pursue, chase, trail, tag, tail are comparable when meaning to go immediately or shortly after someone or something. *Follow* is the comprehensive term; it usually implies the lead or, sometimes, guidance of someone or something (the detective *followed* the boys to their hiding place) (hangers-on *follow* the circus) (the vengeance that *follows* crime—Dickinson) *Follow* up a clue (follow a trade) (he should not desire to steer his own course, but follow the line that the talk happens to take—Benson) (not one of the many people I know who followed the hearings thought that the television reporting was slanted or unfair—Seldes) *Pursue* in its earliest sense implies a following as an enemy or hunter (*pursue* a fox) (*pursuing* rebels in flight) (*pursue* happiness) The term therefore usually suggests an attempt to overtake, to reach, or to attain, and commonly in its extended senses, even when the implications of hostility or of a desire to capture are absent, it connotes eagerness, persistence, or inflexibility of purpose in following one’s thoughts, ends, or desires (ye who . . . *pursue* with eagerness the phantoms of hope—Joyce) (thrice happy man! enabled to *pursue* what all so wish, but want the pow’r to do!—Pope) (*pursuing* the game of high ambition with a masterly coolness—Buchan) (*pursue* the career of a diplomat) *Chase* implies fast pursuit in order to or as if to catch a fleeing object or to drive away or turn to flight an oncoming thing (*chase* the fleeing thieves) (*the boys chased the intruder out of the school yard*) (*we were chased by two pirates, who soon overtook us—Swift*) (*if to dance all night, and dress all day . . . chased old age away . . . who would learn one earthly thing of use?—Pope*) *Trail* implies a following in someone’s tracks (*trail* a fugitive to his hiding place) (*trail a lost child to the edge of a creek) (*not daring to accost him . . . she had trailed him to the railroad station—Childey) *Tag* implies a persistent,
annoying following or accompanying <complained that his little sister was always tagging after him> <two unarmed launches tagged behind—Millard> <Tail specifically implies close following and surveillance <he employed detectives to tail the suspect> <Ana attend, *accompany, convoy: *copy, imitate, ape: *practice, exercise> <Ant precede (in order): forsake (a teacher or his teachings) —Con lead, *guide, pilot, steer: elude, evade, *escape: desert, *abandon> follower, adherent, disciple, sectary, partisan, henchman, satellite are comparable when denoting one who attaches himself to another. Follower is the inclusive term, denoting a person who attaches himself to the person or opinions of another <the followers of Jesus> <followers of Karl Marx> <they are creatures of the Devil, vowed to idolatry, and followers of Mithras—Nevil Shute> Its synonyms divide themselves into two groups, the first three designating a follower through choice or conviction and the last three a follower in whom personal devotion overshadows or eclipses the critical faculty. Adherent connotes closer and more persistent attachment than follower; it may be used without any implication of the personality of the teacher or leader <a doctrine that gained many adherents> <the candidate lost many adherents when he announced his views on reform> <adherents to the Communist party—Conant> Disciple typically presupposes a master or teacher and implies personal, often devoted, adherence to his views or doctrines <though ... an enthusiastic student of Fourier ... he was never a mere disciple—the individualistic stamp was too strong—Rosenzweig> but it may also imply similar adherence to a school of thought or governing principle <there is no anger, not even the most aesthetic disciple of the dry fly—Alexander MacDonald> <during the war years the disciples of the extreme Left sounded very much like the worst of the Negro-hating Southerners—Current Biog.> Sectary (see also HERETIC) usually implies the acceptance of the doctrines of a teacher or body <sectaries of Mohammed> <there dwelt, unchanged, the spirit of the Puritans and the Friends, the stiff-necked sectaries of Cromwell's army—Brooks> <Aristotle ... has suffered from the adherence of persons who must be regarded less as his disciples than as his sectaries—T. S. Eliot> Partisan suggests such devotion to the person or opinions of another or to a party, a creed, or a school of thought that there is incapacity for seeing from any other point of view. It often, therefore, connotes bigotry or prejudice <Laura was always a passionate partisan of her young brother—Mary Austin> <a few partisans argued for him—Mencken> Henchman is commonly applied to a subservient follower of a political leader or boss; in extended use it connotes abject submission to the will of a dominating and, usually, unscrupulous leader or group <the cat's-paw of corrupt functionaries and the henchman of ambitious humbugs—Shaw> Satellite, more than any of the others, suggests devotion to the person of the leader and constant obsequious attendance on him <Boswell was ... made happy by an introduction to Johnson, of whom he became the obsequious satellite—Irving> <Ana devote, votary, *addict, habitué: *parasite, syco phant, toady> <Ant leader> following n Following, clientele, public, audience are comparable when they denote the body of persons who attach themselves to another especially as disciples, patrons, or admirers. Following is the most comprehensive term, applicable to a group that follows either as a physical train or retinue or as the adherents of a leader, the disciples of a philosopher, the customers of a salesman, the admirers of a young woman, or the fans of an actor <such a man, with a great name in the country and a strong following in Parliament—Macaulay> <he unconsciously follows a following of like-minded persons—Montague> Clientele is chiefly used of the persons, collectively, who go habitually for services to a professional man (as a lawyer or physician) or who give their patronage to a business establishment (as a hotel, a restaurant, or a shop) <Dr. Doe has among his clientele all the leading families in the town> <summer hotels usually send out circulars to their clientele in the spring> Public basically denotes a group of people with a common interest and may come close to following in many of its applications (as to adherents, disciples, customers, and admirers); often, however, it distinctively conveys the notion of a group making active demands rather than one passively or admiringly following <a novelist's public, in fact, is people who read everything he writes even when they hate it—Carly> <a public relations program must be concerned with the policies of the institution, their interpretation and announcement to the college's various publics—Brecht> <protecting movie stars from their publics—New Yorker> <these two books on Spain are different in purpose, different in scope, and aimed at different publics—Bergin> Audience is applicable to a following that listens with attention to what a person has to say whenever he addresses them (as in a speech or a book) <still govern thou my song, Urania, and fit audience find, though few—Milton> <the stricken poet [Leopardi] ... had no country, for an Italy in his day did not exist, he had no audience, no celebrity—Arnold> Audience, rather than spectators (see SPECTATOR), is also the usual term for designating the body of persons attending a lecture, a play, or a concert on the assumption that they are there primarily to hear, only secondarily to see <the audience at the opera packed the house> foment abet, *incite, instigate <Ana good, spur (see corresponding nouns at MOTIVE): stimulate, quicken, excite, galvanize, *provoke: nurture, *nurse, foster, cultivate <Ant quell —Con *suppress, repress: check, curb, *restrain> fond adj 1 Fond, infatuated, besotted, insensate are comparable when they mean made blindly or stupidly foolish (as by passion or drink). Fond implies a judgment misled by credulity, undue optimism, or excessive affection (Cowper's characterization of the Biographia Britannica: "Oh, fond attempt to give a deathless lot to names ignoble, born to be forgot!") <grant I may never prove so fond, to trust man on his oath or bond—Shak> <how are we to rid ourselves of our fond prejudices and open our minds?—James Ford> Infatuated implies a weakening rather than the absence of judgment, especially under the influence of violent passion or unreasoning emotion; it is therefore correctly applied to the acts or qualities of men from whom sagacity or self-control might have been expected <what the infatuated ministry may do, I know not: but our infatuated House of Commons ... have begun a new war in America—Burke> <your people are so shortsighted, so jealous and selfish, and so curiously infatuated with things that are not ... good—Jefferies> Besotted adds to infatuated the implications of a stupefying or intoxicating influence that destroys the capacity to think clearly and sometimes makes its victim disgusting or repulsive <men besotted by drink> <are these so far besotted that they fail to see this fair wife-worship cloaks a secret shame?—Tennyson> <seemed

food, feed, victuals, viands, provender, fodder, forage are comparable when meaning applicable to all substances which satisfy hunger and build up or repair waste in the body of men or animals. Conserve your nation's supply of food! Refrigerators that keep food fresh. It is sometimes distinguished from drink. There was no lack of food or drink during their sojourn on the island! Applied specifically to human needs and then distinguished from feed, which normally denotes food for domestic animals. He needed food for his family and feed for his livestock—Gustafson! Victuals and viands basically denote food for human beings, especially food that is prepared and ready for eating. Viants is a racy or pungent word used for special effect. I worked hard enough to earn my passage and my victuals—Shaw! When I bear in mind how elegantly we eat our viants—L. P. Smith! Viands is bookish or affected and occurs chiefly where quaintness, rarity, or an especially fine quality is to be suggested (all the dainties and viands that could be wanted for a feast—Wilde! He dashed the wine on the earth and scattered about the other viands—Milman! Provisions applies to food in general as offered for sale in a market or kept in store as supplies (a country store stocked with all sorts of staples and provisions! There were not enough provisions in the hotel to care for the weekend influx of guests! A basket of provisions! Comestibles, which stresses edibility, is now found chiefly in playful use for provisions! He resolved upon having a strong reinforcement of comestibles—Hook! Bills are also discussed, and butchers and grocers, and the price of comestibles—Rose Macaulay! The remaining three terms, provender, fodder, and forage, basically denote feed for animals, but all may occasionally be used, typically derogatorily, of human food. Provender in its basic use applies to food (as hay, oats, or corn) for horses, mules, or asses! They must be dieted like mules and have their provender tied to their mouths—Shak! Fodder applies to food for domestic cattle and especially to coarse food (as hay, silage, and straw) that is harvested and fed out, as distinguished from forage, food consumed by grazing or browsing. 2 Food, aliment, pabulum, nutriment, nourishment, sustenance, pap are comparable especially when they denote material which feeds and supports the mind or the spirit. Food is applicable to whatever is taken in and assimilated to enlarge the mind or spirit or to contribute to its vitality and growth! Praise was her favorite food—Phillipotts! Those books that provide food for the imagination! Aliment and pabulum are not always distinguishable from each other, but aliment is more often applied to what nourishes or builds one's mind and nature (mischief, love, and contradiction, are the natural aliments of a woman—Richardson! The aliments nurturing our nobler part, the mind, thought, dreams, passions, and aims are... at length are made our mind itself—Lytton! Pabulum to something, and often something overrefined, bland, or worthless, which serves as an article or sometimes as the substance of one's mental diet (many motion pictures provide poor pabulum for the adolescent mind! Where every man's hand is out for pabulum, and virile creativeness has given place to the patronizing favor of swollen bureaucracy—Vannevar Bush! Nourishment and nourishment are both applied to what is needed for healthy growth (as of the body, the mind, or an institution! The central sources of the ideology, the abundant larder from which the nourishment of ideology is being drawn—A. A. Cohen! Self-esteem, one of the properties of the ego, is first regulated by the supply of nourishment from the outside—Blum! But nourishment in addition suggests, as nourishment does not, the nourishing effect produced! Professor Perry's conclusion: "The chief source of spiritual nourishment for any nation, must be its own past, perpetually rediscovered and renewed"—Time! Lacking the nourishment which enthusiasm or imagination can give, their writing is unlikely to be either robust or vivid—Glou! Sustenance stresses the supporting and maintaining rather than the nourishing aspect of food (the blossoms of Beaumont and Fletcher's imagination draw no sustenance from the soil, but are cut and slightly withered flowers stuck into sand—T. S. Eliot! Pap is found chiefly in contemptuous or ironical use and applies in its extended sense to nourishment that is as slight, as diluted, and as innocuous as soft bland food for an infant or invalid! College courses that are mere intellectual pap! A preacher whose sermons are nothing more than pap! Fool, idiot, imbecile, moron, simpleton, natural are often used popularly and interchangeably of one regarded as lacking sense or good judgment but each can be more precisely applied to someone mentally deficient in a given degree. Fool, the most general, can apply to anyone mentally deranged as well as mentally deficient, implying lack or loss of reason or intelligence; it may be used as an extremely offensive term of contempt (fools rush in where angels fear to tread—Pope! He was a fool and liable, as such, under the stress of bodily or mental disturbance, to spasmodic fits of abject fright which he mistook for religion—Norman Douglas! I was a fool, if you like, and certainly I was going to do a foolish, overbold act—Stevenson! Act like a fool! Idiot, imbecile, and moron are technical designations for one mentally deficient. An idiot is incapable of connected speech or of avoiding the common dangers of life and needs constant attendance. An imbecile is incapable of earning a living but can be educated to attend to simple wants or avoid most ordinary dangers. A moron is incapable of earning a living but can be educated to attend to simple wants or avoid most ordinary dangers. A moron may learn a simple trade but requires constant supervision in his work or recreation. In more general and nontechnical use idiot implies utter feeblemindedness, imbecile implies half-wittedness, and moron implies general stupidity (comes like an idiot, babbling and strewing flowers—Millay! Actually there never is a status quo, except in the minds of political imbeciles—Henry Miller! Even morons get college degrees—Warfel! All three, however, may imply no more than often mild derogation or disapproval of a person or his conduct (got a little high at the reunion and made a complete idiot of himself! How could he have been such a careless imbecile as to mar his manuscript?—Mackenzie! The telephone call was a fake... and Peeps climbed up into the guard.
foolhardy daring, daredevil, rash, reckless, *adventurous, venturesome
Ana bold, audacious (see brave): headlong, *precipitate, impetuous
Ant wary — Con *cautious, circumspect, calculating

foolish 1 *simple, silly, fatuous, asinine
Ana idiotic, imbecilic, moronic (see corresponding nouns at fool)
Con *intelligent, clever, quick-witted, bright, smart

2 Foolish, silly, absurd, preposterous, as applied to a person, his acts, behavior, and utterances, mean ridiculous because not exhibiting good sense. Something is foolish which does not commend itself to the judgment of others as wise or sensible or judicious (a foolish investment) 
Con courageous behavior is easier for a man who fails to apprehend dangers, but such courage may often be foolish—Russell 
Ant only a foolish optimist can deny the dark realities of the moment—Roosevelt

Something is silly which seems witless, pointless, or futile (a silly sacrifice) (how silly an ardent and unsuccessful wooer can be, especially if he's getting on in years—Hammett)
Something is absurd which is inconsistent with accepted ideas, common sense, or sound reason; the word is applied, therefore, to ideas and projects considered impersonally as well as to persons and their acts (the absurd . . dogma that the king can do no wrong—Shaw) 
Ant the absurd predicament of seeming to argue that virtue is highly desirable but intensely unpleasant—Lippmann

Something is preposterous which is glaringly absurd (if a man cannot see a church, it is preposterous to take his opinion about its altarpiece or painted window—T. H. Huxley) or sometimes merely highly unsuitable or ridiculously out of keeping (as with a particular character or situation) (he put on his preposterous old flowered cashmere dressing gown—Deland)
Ana ridiculous, ludicrous, *laughable
Ant sensible — Con *wise, sane, judicious, prudent, sage, sapient

foot vb figure, cast, *add, sum, total, tot

fop n Fop, dandy, beau, coxcomb, exquisite, dude, buck are comparable when denoting a man who is conspicuously fashionable or elegant in dress or manners. Fop is applied to a man who is preposterously concerned with fashionableness, elegance, and refinement not only in respect to dress and manners but in respect to such matters as literary or artistic taste (his tightened waist, his stiff stock . . denoted the military fop—Disraeli)
Ant might have taken him for a fop, for he wore white lace at throat and wrists—Kenneth Roberts

(Y) His love of good clothes and good living gave Bennett a reputation as a fop—Time

Dandy carries a weaker implication of affectation and overrefinement than fop and a stronger suggestion of concern for stylish or striking apparel and a spruce or dapper appearance (that he had the tastes of a dandy, we learn from a letter of the time describing his "smart white hat, kid gloves, brown frock coat, yellow cassimere waistcoat, gray duck trousers, and blue silk handkerchief carelessly secured in front by a silver pin"—Walsh

(2) This character, one of the most comical in Stendhal, should . . figure very high, in the list of his dandies. He never smirks, never thinks, and belongs to the Jockey Club—Girard

Beau suggests as much attention to details of personal appearance as does fop (a beau is one who, with the nicest care, in parted locks divides his curling hair; one who with balm and cinnamon smells sweet—Elton)

Coxcomb, like fop, is applicable to a beau as a term of contempt; it often stresses fatuousness and pretentiousness as much as or more than foppishness (of all the fools that pride can boast, a coxcomb claims distinction most—Gay)

The young coxcombs of the Life Guards—Emerson

Exquisite is a somewhat old-fashioned designation of a dandy who manifests the extreme delicacy and refinement of taste characteristic of a fop (the particular styles . . he affected had their marked influence on the young exquisites of the Mayfair balls and Pall Mall club windows—Wilde)

Dude applies chiefly to a man who makes himself conspicuously different in dress or manners from the ordinary man; it is therefore the rough man's term for the carefully dressed and groomed man, the quiet gentleman's term for the obvious dandy, or a Western American's term for an Easterner or a city-bred man (her father told her he would not allow her to marry a dude) (the boys jeer at every young man wearing a high hat and call him a dude) (they were all mountain-wise, range-broken men, picked . . for diplomacy in handling dudes—Scribner's Mag)

The dudes ogled the ladies, stroking their mustaches, adjusting their ties and scooting their shoe toes up their calves to restore the shine—Berrigan

Buck applies usually to a dashing fellow, a dandy in dress, but not conspicuously, or necessarily, a gentleman in manners (the dashing young buck, driving his own equipage—Irving)

I remember you a buck of bucks when that coat first came out to Calcutta—Thackeray

For con *because, since, as, inasmuch as

Forage n fodder, provender, *food, feed, provisions, comestibles, victuals, viands

Forbear 1 *forgo, abnegate, eschew, sacrifice
Ana *restrain, curb, bridge, inhibit: avoid, *escape, evade, shun: desist, cease (see stop)
Ant refrain, abstain
Ana suffer, tolerate, endure, *bear

Forbearance 1 long-suffering, *patience, longanimity, resignation
Ana & Ant see those at forbearance

2 tolerance, clemency, mercifulness, leniency, indulgence (see under forbearing)
Ana patience, long-suffering, longanimity: *mercy, lenity, grace, charity
Ant vindictiveness: anger

Forbearing, tolerant, clement, merciful, lenient, indulgent may be distinguished by nature, disposition, or circumstances to be severe or rigorous. The same differences in implications and connotations are observable in their corresponding verbs forbearing, tolerance, clemency, mercifulness, leniency, indulgence and adverbs forbearingly, tolerantly, clemently, mercifully, leniently, indulgently. Forbearing, forbearance, and forbearingly imply patience under provocation and deliberate abstention from judging harshly, exacting punishment, or seeking vengeance or revenge (Madame Beck was . . forbearing with all the world—Bronté)

(2) He thought of old days: of his father's forbearance, his own willfulness—Meredith

Spoke forbearingly of the lack of facilities that handicapped his work) Tolerant, tolerance, and tolerantly imply both
forbearingly, tolerantly, clemently, mercifully, leniently, forbade, forbidden on these premises) <suffer the little children to come unto me, and he began to pardon the proscribed—Buchan> Merciful, mercifulness, and mercifully imply both compassionate and forbearing treatment, especially of those who have offended or of those who merit severity or are defenseless against it <good my lord, be good to me; your honor is accounted a merciful man—Shak.> (like a perfect nightmar, it was mercifully short—W. J. Locke) Lenient (see also SOFT), leniency, and leniently differ from clement in suggesting usually softness rather than gentleness of temper, and a relaxation of discipline or rigor <a too lenient parent> I would ask you, dearest, to be . . . very lenient on his faults when he is not by—Dickens> (she could not show the slightest leniency towards the romantic impulses of her elder daughter—Bennett) «no matter how leniently you may try to put it, in the end we have . . . a struggle between men—Wister> Indulgent, indulgence, and indulgently usually imply complacency as well as leniency; they imply, even more strongly than lenient, leniency, and leniently, concessions made out of charity or the exercise of clemency in the treatment of those who offend or who are under one's government or control <that one congenial friend . . . more indulgent of his shortcomings, and, in all respects, closer and kinder than a brother—Hawthorne> (indulgently dismisses them as basically nice boys—P. D. Whitney) before her children reached school age. . . her treatment alternated spasmodically between excessive indulgence and petulant severity—Gorer> 

Ana gentle, mild (see SOFT): patient, long-suffering, longsionnian (see corresponding nouns at PATIENCE) Ant unrelenting —Con implacable, merciless, relentless, *grim: *impatient, nervous, restive

forbearingly tolerantly, clemently, mercifully, leniently, indulgently (see under FORBEARING)

forbid, prohibit, enjoin, interdict, inhibit, ban are comparable when meaning to debar a person from using, doing, or entering or to order something not to be used, done, or entered. Forbid is the more direct and familiar, prohibit, the more formal or official; they do not widely differ in their essential implications, for they both imply the exercise of authority or the existence of conditions which prevent with similar imperativeness. However, forbid carries so strong a connotation of expected obedience that it is preferred when the order is that of one in authority (as a parent, a master, an employer, or a physician) forbid a child to leave the house <smoking is forbidden on these premises> suffer the little children to come unto me, and forbid them not—Mk 10:14> (the whole attraction of such knowledge consists in the fact that it is forbidden —Russell> When circumstances absolutely debar, forbid is also preferred <his health forbade the use of tobacco>

Prohibit has been used for so long in reference to laws, statutes, and regulations that it tends to connote a less despotic exercise of authority and to suggest restraints imposed for the good of all or for the sake of orderly procedure prohibit the manufacture and sale of intoxicating liquors <the powers not delegated to the United States by the Constitution, nor prohibited by it to the States—U. S. Constitution> <the act was wrong in the sense that it was prohibited by law—Cardozo> Enjoin (see also COMMAND) is a legal term implying a judicial order forbidding a particular action by the decision of the Court the defendant should be enjoined from publishing news obtained from the Associated Press for — [a certain number of] hours after publication by the plaintiff—Justice Holmes> Interdict implies prohibition by authority, usually civil or ecclesiastical authority, typically for a given time and for a salutary purpose (as the maintenance of neutrality or the prevention of the spread of disease) or as an exemplary punishment <interdict trade with belligerents> <interdict the administration of the sacraments in a rebellious diocese> <Sunday. . . until two o'clock, was a solemn interval, during which all the usual books and plays were interdicted—Mary Austin> Inhibit implies the imposition of restraints or restrictions that amount to prohibitions, not only by authority but also by the exigencies of the time or situation <a clause was . . . inserted which inhibited the Bank from advancing money to the Crown without authority from Parliament—Macaulay> <the peril that besets a highly gifted poetic nature, when at bad moments thought inhibits imagination —Loves> In psychological use inhibit suggests the restraints imposed by inner psychological impediments and conflicts or by the interaction of human will with cultural and social factors of the environment which cause one to suppress certain thoughts or desires before they can find full expression inhibited from bold speculation by his personal loyalties and interests—Parrington> (he is inhibited, he inhibits himself, even from seeking on his own account that vital experience which is the stuff of the creative life—Brooks) Ban carries an implication of legal or social pressure as the source of prohibition and with it a strong connotation of condemnation or disapproval <ban all obscene magazines> <ban profane language> <categories of persons banned from Federal employment—Ginzburg> (more and more landlords were banning tenants with children—Wecter> 

force n 1 *power, energy, strength, might, puissance Ana *stress, strain, pressure, tension: *speed, velocity, momentum, impetus, headway 2 Force, violence, compulsion, coercion, duress, constraint, restraint denote the exercise or the exertion of power in order to impose one's will on a person or to have one's will with a thing. Force and violence ordinarily apply to physical powers used upon either persons or things; compulsion, coercion, duress, constraint, restraint apply to either physical or moral power used upon personal agents except in certain figurative uses—compulsion, coercion, and duress usually implying exercise of such power upon others than oneself, constraint or restraint upon oneself or others. Force (see also POWER 1) applies to an exercise of physical strength or of power comparable to physical strength by means of which an agent imposes his will upon another against that person's will or causes a thing to move as desired in spite of its resistance <rude fishermen . . .
Force, compel, coerce, constrain, oblige are commonly implying a greater display of power or fury and often connoting the infliction of injury or cruelty (they will by violence tear him from your palace—Shak.) (the rest of the party kept off the crowd by mingled persuasion and violence—Shaw) Violence often implies a violation of another’s legal rights or property, or it may imply a corruption or abuse of someone or something entitled to respect, observance, or security (a burglar in entering a house by forcing a door enters it by violence) (do violence to no man—Lk 3:14) (all these many and varied powers had been acquired without doing violence to republican sentiment—Buchan) (the phrase “every common carrier engaged in trade or commerce” may be construed to mean “while engaged in trade or commerce” without violence to the habits of English speech—Justice Holmes) Compulsion and, still more, coercion imply the application of physical force or of moral pressure or the exercise of one’s authority in order to control the action of a voluntary agent and to make him obedient to one’s will (I would give no man a reason upon compulsion—Shak.) (coercion by threat or intimidation) (masterpieces I read under compulsion without the faintest interest—Russell) (solutions forced upon a most practical mind by the stern compulsion of facts—Buchan) (in the submissive way of one long accustomed to obey under coercion—Dickens) (some form of coercion, overt or covert, which encroaches upon the natural freedom of individuals—Dewey) Duress implies compulsion to do or forbear some act by means that are illegal (as by imprisonment or threats to imprison or by violence) (a person is not guilty of duress when he does or threatens to do something he has a legal right to do—Fisk & Snapp) It may also imply compulsion or coercion through fear of a penalty that will or may be exacted (a false declaration of love by the heroine under duress—Dyneley Hussey) (we must eliminate the condition of economic duress under which so many human beings are unjustly forced to live—Ashley Montagu) Constraint and restraint may imply the exercise of physical or moral power either by an active agent or by the force of circumstances; constraint sometimes implies an urging or driving to action but more frequently implies its forcible restriction or confinement, whereas restraint suggests its actual hindrance or curbing (the . . . lion . . . roared with sharp constraint of hunger—Shak.) (prose is memorable speech set down without the constraint of meter—Quiller-Couch) (absolute liberty is absence of restraint; responsibility is restraint; therefore, the ideally free individual is responsible only to himself—Henry Adams) (the emotion . . . was the deeper and the sweeter for the restraint that he had put upon himself—Archibald Marshall)

**Ana** intensity, vehemence, fierceness (see corresponding adjectives at INTENSE): *effort, exertion, pains, trouble

**force** vb Force, compel, coerce, constrain, oblige are comparable when meaning to make a person or thing yield to the will of a person or to the strength or power of a thing. Force, the ordinary and most general word in this group, implies the exertion of strength, typically physical strength, or the working of something (as circumstances or logical necessity) analogous in moving power or effectiveness to such strength *(force slaves to labor)* *(force food upon a child)* *(he said hunger forced him to steal the food)* *(his conscience forced him into repaying what he had stolen)* *(force himself to smile)* *(the man could not be forced from the position he had taken)* Sometimes the term takes a simple object, naming the person forced or the thing brought about by force; in such cases the verb often carries additional implications acquired from its idiomatic use in a particular phrase; thus, to force a woman is to rape her; to force a door is to break it open; to force laughter or a smile or tears is to make oneself laugh or smile or cry against one’s will; to force bulbs is to hasten their development by artificial means *(forced language)* *(a forced style)* Compel differs from force chiefly in typically requiring a personal object; any other type of object such as a reaction or response is possible only in extended or poetic language when the specific connotations of compel (as the exertion of irresistible power or force or a victory over resistance) are to be carried by the verb *(the always compels admiration)* *(an argument that compels assent)* or a concrete thing *(such a breeze compelled thy canvas—Tennyson)* Compel commonly implies the exercise of authority, the exertion of great effort or driving force, or the impossibility for one reason or another of doing anything else *(they* submit because they are compelled: but they would resist, and finally resist effectively, if they were not cowards—Shaw) *(we see nothing in the Constitution that compels the Government to sit by while a food supply is cut off and the protectors of our forest and our crops are destroyed—Justice Holmes)* *(there is no possible method of compelling a child to feel sympathy or affection—Russell)* *(the westering sun at length compelled me to quit the wood—Hudson)* Coerce suggests more severity in the methods employed than compel does; commonly it connotes the exertion of violence or duress or the use of threats or intimidation *(there are more ways of coercing a man than by pointing a gun at his head—Inge)* *(Charles the First signed his own death warrant when he undertook to coerce that stubborn will [of Londoners]—Repplier)* Constrain stresses more than does compel, its closest synonym, the force exerted by what presses or binds; it usually suggests the influence of restrictions, self-imposed or placed upon one by force, by nature, by necessity, or by circumstances, that compel one to do a stated or implied thing, live a stated or implied way, or think certain thoughts (I describe everything exactly as it took place, constraining my mind not to wander from the task—Dickens) *(causes which he loathed in his heart but which he was constrained to consider just—Brooks)* *(tied him to the wall, where he was constrained to stay till a kind passerby released him—Galsworthy)* Oblige usually implies the constraint of necessity, sometimes physical necessity *(a sharp pain obliged him to close his eyelids quickly—Hardy)* but equally often moral or intellectual necessity *(he is obliged, in conscience, to undo the harm he has done to a man’s good name)* *(even the so-called laws of nature are only instruments to be used . . . we are not obliged to believe them—Inge)* The term also is used with reference to a person or thing which is regarded as authoritative or as having the right to determine one’s course or acts *(the discipline of their great School . . . obliges them to bring up a weekly essay to their tutor—Quiller-Couch)* *(the convention which obliged a satirist to be scathing—Inge)* *(she is obliged to learn by heart a multitude of songs—Hearn)*

**Ana** analogous words **Ant** antonyms **Con** contrasted words **See also explanatory notes facing page 1
they mean produced or kept up through effort and, therefore, neither natural nor easy nor spontaneous. Forced is the widest in range of application of any of these terms, being referred not only to what is brought about by compulsion (works of a kind which had normally been performed in antiquity by the forced labor of slaves—Farrington) or to what is accomplished by exerting force beyond the usual limit (a forced march) (many women talk excitedly at a forced pitch for long periods and finish a conversation almost exhausted—Hewitt) but also to what seems artificial because not natural, logical, or spontaneous or because constrained or affected (his . . . resolute rejection of forced and fantastic interpretation of Holy Scripture—Fosbroke) (the old man was grinning. It was a little forced and a little painful, but it was a grin—Irwin Shaw) Labored carries a stronger connotation of heaviness or of ponderousness or, sometimes, of tediousness as a result of great effort (a labored style) (suggests that the woman loves the man because he alone can give her the baby that fulfills her femininity . . . These explanations are ingenious, it labored—La Barre) (uncomfortably aware of his men behind him; of their cushioned footsteps and labored breathing—Hervey) Strained adds to these an implication of tensionness or of a result that is unnaturally or distortedly labored (strained attention) (a strained comparison) (in the style of each there is at times evidence of strained composition, a lack of verbal ease or elegance—Arnold Chapman) (a strained air of reasonableness prevails, with a good deal of nervous anxiety showing through on both sides—Bendiner) (three patients were sitting, with strained expectant eyes—Glasgow) Farfetched applies especially to an expression, an idea, an argument, or an explanation which has been carelessly sought out so that it seems unduly strained and not quite naturally used (his ideas were always farfetched) (a farfetched comparison) (these methods of interpretation . . . seem gratuitously farfetched, fantastic—Edmund Wilson) Ana compelled, coerced, constrained (see FORCE): factitious, *artificial: fatiguing, exhausting (see TIRE) Con *easy, effortless, smooth: *spontaneous, instinctive, impulsive: *natural, unsophisticated, unaffected, artless

forceful *powerful, potent, forcible, puissant Ana compelling, constraining (see FORCE vb): virile, manful (see MALE): cogent, telling, convincing, compelling (see VALID): *effective, efficient Ant feeble —Con *weak, infirm, decrepit, frail forcible forceful, *powerful, potent, puissant

A colon (:) separates groups of words discriminated. An asterisk (*) indicates place of treatment of each group.
sort of responsibility for our actions, whose consequences we are never able to foresee—Conrad
> nobody can foresee how the necessary restriction of the population will be effected—Shaw
> (the kindly-earnest, brave, foreseeing man—J. R. Lowell)

**Foreknow** usually implies supernatural powers or the assistance of supernatural powers (as through revelation) if thou art privy to thy country's fate, which, happily, foreknowing may avoid, O, speak—Shak.
> (they themselves decreed their own revolt, not I [God].)
If I foreknew, foreknowledge had no influence on their fault—Millon.
> (he cannot, however, foreknow how his opponent... will behave in action—Toynbee.

Divine is not always clearly distinguishable from foresee, but it often suggests a gift or a special power or sometimes unusual sagacity or discernment.
> (to Rime has been given this quickness of mind and power to divine distant things—Hudson.)
> (in all the years of his traveling to and fro through Europe he divined hardly one of the social tendencies that had so spectacular a denouement within four years of his death—Brooks.)

**Apprehend** conveys less of a sense of the certainty of what is foreseen than any of the preceding words, but it carries a far stronger implication of the emotional effects of advance knowledge. In general, where one apprehends an evil, one is filled with fear, anxiety, or dread; they agree with me in apprehending that this false step in one daughter will be injurious to the fortunes of all the others—Austen.
> (almost every evening he saw Lucy. The inexperienced little wife apprehended no harm in his visits—Meredit.)
> (his lips quivered, and she apprehended rather than heard what he said—Glasgow.)

**Anticipate** is a more complex term than any of its synonyms. Thus a critic may foresee the verdict of posterity on a literary work, but he anticipates it only when he formulates a judgment which is either accepted by posterity or is pronounced by it as though the verdict were new. One may foreknow one's destiny or apprehend a danger, but one anticipates one's destiny or a danger only when, through the appropriate advance enjoyment or suffering, one also has a foretaste of that destiny or that danger. One may divin a friend's wish in advance of its expression, but one anticipates it only when one also gratifies it in advance of its expression. (colleges and universities are expected to pay close attention to, and even anticipate, the many voices heard from outside the campus—Hacker.)

**Anticipate** is also used as an alternative to expect and, more distinctively, in the sense of to look forward to (something expected) with a foretaste of the pleasure or pain it promises. (I must know what is in the minds of these people. I must anticipate revolt—Steinbeck.)
> (pleasure not known beforehand is half wasted; to anticipate it is to double it—Hardy.)

**Ana** forecast, predict, *foretell, prophesy, prognosticate:* perceive, discern, descry, esp (see see)

**foreshore** beach, strand, *shore, coast, littoral

**foresight** forethought, providence, discretion, *prudence

**Ana** sagacity, perspicacity, shrewdness, astuteness (see corresponding adjectives at SHREW'D): acumen, clairvoyance, *discernment, perception

**Ant** hindsight

**foresighted** forethoughtful, provident, discreet, prudent (see under PRUDENCE)

**Ana** sagacious, perspicacious, *shrewd, astute: *intelligent, alert, quick-witted, brilliant, knowing: *wise, judicious, sage, sapient

**Ant** hindsighted

**forestall** *prevent, anticipate

**Ana** ward, avert, *prevent, preclude, obviare: *frustrate, thwart, foil, circumvent

**Con** court, woo, *invite: further, forward, *advance, promote

**foretaste** *anticipation, *prospect, outlook

**Ana** realization, actualization (see corresponding verbs at REALIZE): token, earnest, *pledge: presentment, foreboding (see APPREHENSION)

**Con** fruition, enjoyment (see PLEASURE): attainment, achievement (see corresponding verbs at REACH)

**foretell**, predict, forecast, prophesy, prognosticate, augur, presage, portend, forebode are comparable when meaning to tell something before it happens through special knowledge or occult power.

**Foretell** and predict are frequently interchangeable, but foretell stresses the announcement of coming events and does not, apart from a context, indicate the nature of the agent's power or the source of his information. Some sorcerer... had foretold, dying, that none of all our blood should know the shadow from the substance—Tennyson.
> (the marvelous exactness with which eclipses are foretold—Darow.)

**Predict** commonly implies inference from facts or accepted laws of nature; it often connotes scientific accuracy in foretelling. (Mr. Brooke's conclusions were as difficult to predict as the weather—George Eliot.)

> (an astronomer predicted the return of a comet—Gamow predicted that the explanation of the sun's heat, light, and energy would be found to lie in thermonuclear reactions—Current Bio.)

**Forecast** may occasionally imply taking forethought of the future (as by anticipation, conjecture of possible eventualities, and provision for one's needs) (a prudent builder should forecast how long the stuff is like to last—Swift.)

> More often it implies prediction, but it still retains the implication of anticipated eventualities (forecast the weather) (since hurricanes have been forecast, losses in life and property have dwindled) (when the votes began to be counted... the return of the Republicans was forecast—Paxson.)

**Prophecy** either connotes inspired or mystic knowledge or implies great assurance in prediction (ancestral voices prophesying war—Coleridge.)

> (wrinkled boughs often talked of him approvingly, and prophesied his rise—Tennyson.)

**Propagosticate** implies prediction based upon signs or symptoms (a skillful physician can prognosticate the course of most diseases) (for the last three hundred years the relation of Church to State has been constantly undergoing change... I am not concerned with prognosticating their future relations—T. S. Eliot.)

**Prophecy** and the following words also are comparable in the related sense of to betoken or foreshow future events or conditions (everything seems to prognosticate a hard winter—Cobbeit.)

**Augur** implies a divining or a foreshadowing of something pleasant or unpleasant often through interpretation of omens or signs (the morrow brought a very sober-looking morning... Catherine augured from it everything most favorable to her wishes—Austen.)

> (presage and portend more often imply foreshadowing than foretelling, though both senses are found. Both also typically suggest occult power or an ability to interpret signs and omens as a basis for prediction, but presage may be used of neutral or of favorable as well as unfavorable prognostications, whereas portend regularly suggests a threat of evil or disaster—lands he could measure, terms and tides presage—Goldsmith.)

> (the yellow and vapory sunset... had presaged change—Hardy.)

> (some great misfortune to portend, no enemy can match a friend—Swift.)

**Forebode** implies unfavorable prognostication based especially upon premonitions, presentiments, or dreams (pressed by a foreboding of evil—Ana.)

**Ana** divine, foreknow, *foresee, anticipate, apprehend:
forethought foresight, providence, discretion, *prudence

A colon (:) separates groups of words discriminated. An asterisk (*) indicates place of treatment of each group.
abnegate implies renunciation or self-effacement, but this distinction is not as commonly maintained in the verb as in the derivative noun abnegation. Communities dedicated to a humble and self-abnegating life—Mumford. One eschews (see also escape 2) something tempting, sometimes on moral or aesthetic grounds but more often because abstention or self-restraint is necessary for the achievement of a more significant desire or end (to work within these strict limits, eschewing all the help to illusion that modeling and shadow gave, was doubtless an exercise of incomparable service to the artist—Binyon) (some of the millionaires eschewed palatial magnificence—F. L. Allen). One sacrifices something highly desirable or in itself of great value for the sake of a person, ideal, or end dearer to one than the thing or person involved; the term typically connotes renunciation and self-denial and a religious or ethical motive comparable to that of self-immolation (sacrificed a college education for the sake of supporting his mother) (sacrificed his life in defense of his country) (I do not mean that the well-to-do should . . . forgo educational opportunities which . . . are not open to all. To do that would be to sacrifice civilization to justice—Russell) (sacrificed their fortune in the world for theology's sake—H. O. Taylor).

forlorn 1: lorn, lone, desolate, lonesome, lonely, *alone, solitary.

Ana: separated, parted, divorced, severed, sundered (see separate vb): forsaken, deserted, abandoned (see abandon vb): wretched, *miserable: depressed, weighed down, oppressed (see depress).

2: hopeless, *despondent, despairing, desperate.

forlornness: hopelessness, despondency, despair, desolation (see under despondent).

Ana: dejection, depression, gloom, melancholy, blues, dumps, *sadness.

form n 1: Form, figure, shape, configuration, configuration are comparable when they denote the disposition or arrangement of content that gives a particular aspect or appearance to a thing as distinguished from the substance of which that thing is made. Form is not only the most widely applicable of these terms, but it is also the least definitely fixed in its meaning, largely because of its being assigned various denotations in philosophy and aesthetics and because of its frequent use in reference to literature, music, and thought, where more is involved than the disposition or arrangement of content as immediately perceived by the senses. In general, form more than any of the other words implies reference to internal structure and disposition of details as well as to boundary lines and suggests unity in the whole (the earth was without form, and void—Gen 1:2) (a sense of interdependence and interrelated unity that gave form to intellectual stirrings that had been previously inchoate—Dewey) (you might go in for building . . . you've got a feeling for form—Mary Austin). Figure applies usually to the form as determined by the lines which bound or enclose a thing (flowers have all exquisite figures—Bacon). The term also may often suggest the lines or sometimes the visible form characteristic of a kind or type (Christ painted under the figure of a lamb) (because of the darkness it was hard to say whether the person had the figure of a man or of a woman) or the lines which follow a more or less conventional pattern rather than represent something actual (cut figures on the ice in skating) (decorate the border with figures of scrolls, circles, and crescents) (a rug design in geometrical figures). Shape, like figure, suggests reference to the boundary lines, but it carries a stronger implication of a mass or of a body than does figure and is therefore precisely applicable to something that is shown in its bulk rather than in its lines; thus, one draws the figure rather than the shape of a circle or a triangle, but one forms a mass of clay in the shape in preference to the figure of a ball or of a man (the color of his beard, the shape of his leg—Shak.). Often, shape applies to outlines that have been given to a mass (as by molding, carving, or pressure) (Brooke is a very good fellow, but pulpy; he will run into any mold, but he won't keep shape—George Eliot) (it is the business of the sensitive artist in life to accept his own nature as it is, not to try to force it into another shape—Huxley). Form, figure, and shape are also used in reference to the form of living creatures, especially of men and women. Form is perhaps the most shadowy of these terms; it is applied chiefly to persons or animals identified but not clearly seen or noted in detail (the reddleman watched his form as it diminished to a speck on the road—Hardy) (busy forms bent over intolerable tasks, whizzing wheels, dark gleaming machinery—Benson). Figure usually suggests closer vision than form and some perception of details but stresses lines, carriage, and posture (here and there a figure . . . leaned on the rail—Conrad) (they watched her white figure drifting along the edge of the grove—Cather). Shape differs little from figure except in its clearer suggestion of flesh and body (some human shapes appearing mysteriously, as if they had sprung up from the dark ground—Conrad) (and the shade under the ash trees became deserted, save by the tall dark figure of a man, and a woman's white shape—Galsworthy).

Con: Configuration stresses the structure of something as composed or fashioned of related or carefully adjusted parts or as constituting a harmonious whole; it carries only a slight suggestion of reference to the outer lines or shape (beef steers of excellent configuration) (the configuration of the vocal organs). Configuration emphasizes the disposition or arrangement of parts and the pattern that they form especially over an extent of space or territory (the configuration of the county is represented in this relief map) (the remarkable configuration of the Atlantic seabed—T. H. Huxley) (In every province there was a network of roads following the configuration of the country—Buchan).

2: Form, formality, ceremony, ceremonial, rite, ritual, liturgy mean an established or fixed method of procedure especially as enjoined by law, the customs of social intercourse, or the church. Form is the comprehensive term applicable to a recognized way of doing things in accordance with rule or prescription (observing the forms of polite society) (nothing could be worse form ... than any display of temper in a public place—Wharton) (transfer of property made in due form) (the occasional exercise of a beautiful form of worship—Irving).

Form often implies show without substance or suggests an outward shell devoid of its life or spirit (for who would keep an ancient form if the spirit breathes no more?—Tennyson). Formality applies to some more or less perfunctory or conventional procedure required by law, custom, or etiquette (there was now and then the less perfunctory or conventional procedure required by law—Tennyson) (the remarkable configuration of the Atlantic seabed—T. H. Huxley) (In every province there was a network of roads following the configuration of the country—Buchan).

A colon (:) separates groups of words discriminated. An asterisk (*) indicates place of treatment of each group.

Form

3 Form, usage, convention, convenience are comparable when they mean a fixed or accepted way of doing or sometimes of expressing something. Form can apply to a prescribed or approved way of behaving, method of procedure, or technique in any sphere of activity where correctness or uniformity of method or manner is thought essential. (the forms of good conduct) (the forms of worship) (good form in swimming) (a form of address)

Usage implies the sanction of precedent or tradition and often designates a form preserved out of respect for a class, profession, or religion (descriptions of usages presuppose descriptions of uses, that is, ways or techniques of doing the thing, the more or less widely prevailing practice of doing which constitutes the usage —Ryle) (to bury in the first furrow certain fruits of a particular structure, such as figs, pomegranates, and locust beans, is a usage frequently observed —Frazer)

Convention often replaces form especially in application to social behavior, where it stresses general agreement and therefore applies to some set way of doing or saying something that is sanctioned or believed to be sanctioned by general unquestioning acceptance. (This music followed conventions perfectly understood by the contemporaries —P. H. Lang) (certain parliamentary conventions which exist to supplement the rules of procedure —May) (this genius who was too wild and elemental ever to conform to any aesthetic convention —Ledig-Roholh)

Convenience is a somewhat literary word applied to social conventions especially regarded as essential to propriety or decorum (disregarding the social conventions, continued to chatter on —Richard Hull) (the conveniences of life —Benson)

Form vb *make, shape, fashion, fabricate, manufacture, forge

Ana devise, contrive (see corresponding nouns at device): *invent, create, produce, turn out (see bear): design, project, scheme, plan, plot (see under plan n): organize, *found, establish

Formal conventional, ceremonial, *ceremonial, solemn

Ana systematic, methodical, *orderly, regular: *decorous, proper, seemly

Ant informal

Formality *form, ceremony, ceremonial, rite, liturgy, ritual

Ana convention, convenience, usage, *form: practice, custom, *habit, use, wont

Former prior, previous, *preceding, antecedent, precedent, foregoing, anterior

Ant latter —Con following, succeeding, ensuing, supervening (see follow)

Formless, unformed, shapeless are comparable when they mean having no definite or recognizable form. Something is formless which is so fluid or so shifting in its outlines, structure, or character that it does not assume, or is incapable of assuming, a fixed or determinate form (the rising world of waters . . . won from the void and formless infinite —Milton) (sprang from the billows of the formless flood —Shelley) (a formless fear) (the formless welter of his prose works —Saintsbury) Something is unformed which has existence but has not yet attained the form or character proper to it when it has reached the height of its possible growth or development (an unformed girl of twelve) (an unformed mind) (unformed genius) Often it suggests crudeness or callousness (very clever in some ways —and very callousness —Saintsbury) (a girl of twelve) (an unformed genius) (some parliamentary conventions which exist to supplement the rules of procedure —May)

Formative *make, shape, fashion, fabricate, manufacture, forge

Ana devise, contrive (see corresponding nouns at device): *invent, create, produce, turn out (see bear): design, project, scheme, plan, plot (see under plan n): organize, *found, establish

Ant informal

Formless *formless: rough, raw, crude, *rude

Ana fluid, *liquid: rough, raw, crude, *rude

Formulation *adultery, incest

A colon (:) separates groups of words discriminated. An asterisk (*) indicates place of treatment of each group.
fork, fortress, citadel, stronghold, fastness denote in common a structure or place offering resistance to a hostile force. A fort is an enclosed, fortified structure occupied by troops. A fortress is a large fort of strong construction intended for long-term occupancy (as on the border of a hostile country). A citadel is a fortification, usually on an eminence, that protects a city or keeps it in subjection. A stronghold is a strongly fortified place whose resistance to attack or siege affords protection to its occupants (here ... a famous robber had his stronghold—Richie). A fastness is a place whose inaccessibility or remoteness makes for security. It may or may not be fortified (a strong and almost inaccessible fastness—H. H. Wilson).

These terms often have extended use. In such use a fort is something that by its very nature resists attack (oft breaking down the pales and forts of reason—Shak.) and a fortress is something that gives a feeling of security (my rock and fortress is the Lord—John Wesley). Citadel and stronghold are very similar in their extended uses, both being applied to a place where or, sometimes, to a class or group in which something prevails or persists in spite of attacks or encroachment (the very headquarters, the very citadel of smuggling, the Isle of Man—Burke) (the scientific world has been the very citadel of stupidity and cruelty—Shaw) (the South of Somersetshire, one of the strongholds ... of the Anglo-Saxon dialect—Jennings). Fastness characteristically suggests impenetrability or inaccessibility (in the impregnable fastness of his great rich nature he [the Roman] defies us—J. R. Lowell).

forth forward, *onward

forthright adj I also adv Forthright, downright are comparable because they agree in their basic sense of moving or in the habit of moving straight to the mark. Forthright (see also STRAIGHTFORWARD) applies to whatever gets its effect by a straight thrust as if of a sword driven by the arm of one person into the breast of another; it therefore usually connotes dexterity, directness, straightforwardness, or a deadly effectiveness (reach the good man your hand, my girl: forthright from the shoulder, like a brave boxer—Meredith) (the home thrust of a forthright word—J. R. Lowell) (the practical, forthright, nonargumentative turn of his mind—Farrar).

Downright, on the other hand, suggests a falling down or descending with the straightforwardness and swiftness of one who leaps from a cliff or of a weapon that delivers a crushing blow. The word, therefore, usually implies crude force rather than dexterity, and concern for the effect produced rather than the point reached; often, in addition, when applied to persons or things it connotes plainness, bluntness, flat-footedness, or an out-and-out quality (he ... shot to the black abyss, and plunged downright—Pope) (sculling against a swift current is work—downright work—Jefferies) (you seem a pretty ... downright sort of a young woman—Shaw) (a baby). What a coarse, downright word for the little creature—Rose Macaulay) (this admirably downright, if not highly sophisticated, ukase has been cited in almost every trade-secrets case ... since—John Brooks).

Ana *bluff, blunt, brusque; candid, open, plain, *frank

2 *straightforward, aboveboard

Ana reductive, spurn, reject (see DECLINE): *abide, renounce, resign: quit, leave (see GO)

Ant return to; revert to

forswear 1 *abjure, renounce, recant, retract

forsake desert, *abandon

fortify *strengthen, invigorate, energize, reinforce

fortitude, grit, backbone, pluck, guts, sand denote a quality of character combining courage and staying power. Fortitude stresses strength of mind and firmness of purpose; it implies endurance, often prolonged endurance, of physical or mental hardships or suffering without giving way under the strain (the man's courage is loved by the woman, whose fortitude again is coveted by the man—Coleridge). For years he led a life of unremitting physical toil and mental anguish (he earned with miserable health—no small test of fortitude—Buchan). Grit also implies strength and firmness of mind, but it stresses an incapacity for being downed by difficulties or hardships and usually also suggests both a willingness to suffer the privation and pain necessary to the attainment of one's ends and the fortitude to bear them (it is grit that tells in the long run) (instances of men rising from the lower ranks of society into the most highly remunerated positions in the business world are sufficiently numerous to support the belief that brains and grit can always "make good"—Hobson). Backbone emphasizes resoluteness of character; it implies either the ability to stand up in the face of opposition for one's principles or one's chosen objectives, or determination and independence that require no support from without (in spite of all his gifts, he did not have the backbone necessary to a good statesman) (when mob hysteria prevails, then, if ever, backbone is needed in our legislators) (like conscience-stricken dogs they lost backbone, and visibly were in a condition to submit to anything—Kenneth Roberts).

Pluck implies a willingness to fight or continue fighting against odds; thus, it is pluck that keeps a sick person at work; it is pluck that keeps soldiers from retreating in the face of disaster (the energy, fortitude, and dogged perseverance that we technically style pluck—Lynton) (decay of English spirit, decay of manly pluck—Thackery). Guts, which is often considered expressive but not entirely polite and is therefore sometimes facetiously replaced by intestinal fortitude, stresses possession of the physical and mental vigor essential both to facing something which repels or frightens one and to putting up with the hardships it imposes (he hasn't the guts to be a successful surgeon) (they used men with guts for the East African missions) (what bothered him was not the superzealot attackers so much as the lack of plain old-fashioned guts on the part of the people who give in to them—Davis).

Sand comes close to grit in its meaning, but since it often carries a suggestion of pluck or of the ability to fight against odds, it does not so strongly as grit connote triumph over difficulties (no more pride as a tramp. no more sand than a rabbit—Mark Twain).

Ana *courage, mettle, spirit, resolution, tenacity: bravery, couragelessness, intrepidity, dauntlessness, valorousness (see corresponding adjectives at BRAVE)

_found vb_ 1 *base, ground, bottom, stay, rest

_Ana_ *set, fix, settle, establish: sustain, *support: *build, erect, raise, rear

2 Found, establish, institute, organize are comparable when meaning to set going or to bring into existence something (as a business, a colony, or an institution).

_Found_ implies nothing more than a taking of the first steps or measures to bring into existence something that requires building up. Just what these steps and measures are vary in usage; thus, a person who provides the funds for a new educational institution may be said to have founded it, and those who first devised the project and won his support may also be said to have founded it, as may also those who took the next steps (such as the choice of a site, the erection of buildings on that site, and the selection of the staff) *found a parish in a new section of a city* —*the Pilgrims in 1620 founded Plymouth Colony in what is now the state of Massachusetts* —*a school of philosophy founded by Plato*

_Establish_ (see also SET) is often employed in the sense of found; however, it may imply not only the laying of the foundations but also a bringing into enduring existence: thus, Brook Farm was founded (not established, because its existence was short) by George Ripley and others as an experiment in communistic living: Vassar College was not established until some years after the date of its founding —*the . . . Sisters of Loretto, who came to found the Academy of Our Lady of Light. The school was now well established —*Cather* _Institute_ stresses an origination or an introduction; like *found*, it implies the taking of the first steps and like *establish*, the actual bringing into existence, but it differs from both words in its far wider range of application and in being referable to things (as a method, a study, or an investigation) which do not have a continuous life or a permanent existence (institute a new society) _institute_ a new method of accountancy _institute_ an inquiry into an official's conduct of his office _Organize_ (see also ORDER vb 1) may imply founding, but it usually implies the taking of the steps whereby an organization (as a business, an institution, or a government) is set up so that it functions properly, with its departments clearly distinguished and governed by a responsible head and with a supervisory staff responsible for the working of the whole —*Smith College was founded by Sophia Smith but was organized by its first president and board of trustees* _the company sent him to Germany to organize its new branch there*

_Ana_ *begin, commence, start, initiate, inaugurate: form, fashion (see **MAKE**

_Con_ uproot, eradicate, deracinate, extirpate, *exterminate, wipe

_foundation_ basis, *base, ground, groundwork

_Ant_ superstructure

_foxy_ insidious, wily, guileful, tricky, crafty, cunning, *sly, artful, wily

_Ana_ devious, *crooked, oblique: deceitful, *dishonest

_fracas_ *brawl, broil, melee, row, rumpus, scrap

_fraction_ fragment, piece, *part, portion, section, segment, sector, detail, member, division, parcel

_fractions_ *irritable, peevish, snappish, waspish, petulant, pettish, huffy, fretful, querulous

_Ana_ *unruly, refractory, recalcitrant, ungovernable, intractable, willful: perverse, *contrary, froward, restive, wayward

_Con_ fair: undefiled

_unstinted_ *abundant, liberal, profuse: ample, abundant,充裕的

_unstinting_ *liberal, unmeasured, lavish: liberal, abundant, prodigal

_unstintingly_ *liberally, generously, unreservedly: liberally, abundantly, prodigally

_unsuitable_ *inappropriate: improper, unsuitable, inappropriate

—weakening

**fragile** 1 Fragile, frangible, brittle, crisp, short, friable

mean easily broken. They are, however, not often inter-changeable. **Fragile** (see also WEAK) is applicable to whatever must be handled or treated carefully lest it be broken —*a fragile antique chair* —*a fragile dish* —*a fragile flower* —*I found the skeleton, or, at all events, the large bones, rendered so fragile by the fierce heat they had been subjected to, that they fell to pieces when handled —*Hudson* —*this nation, molded in the heat of battle against tyranny . . . is not a fragile thing—W. O. Douglas*

_Fragile_ stresses susceptibility to being broken rather than positive weakness or delicacy of material or construction (frangible stone) _avoid using frangible materials in ship construction_ —*using the butresses of intellect and imagination to shore up the trembling pillars of our frangible era—Fadiman* _Brittle_ implies hardness plus frangibility because of the inflexibility of, or lack of elasticity in, the substance of which a thing is made; it also suggests susceptibility to quick snapping or fracture when subjected to pressure or strain (glass is especially brittle) _as a person ages, his bones grow more brittle* _brittle sticks of candy_ _The term is often extended to things that are dangerously lacking in elasticity or flexi-bility_ _he would take no risks with a thing so brittle as the Roman polity, on which depended the fate of forty-four . . .
millions of men—Buchan> Crisp usually suggests a good quality which makes a thing firm and brittle yet delicate and easily broken or crushed, especially between the teeth <crisp toast> <crisp lettuce> In extended use it implies freshness, briskness, cleanliness of cut, incisiveness, or other qualities that suggest the opposite of limpness, languor, or slackness <a crisp morning> <a crisp style> <a crisp answer> <a languorous work . . . with occasional interludes of crisp brilliancy—Anthony West> Short implies a tendency to crumble or break readily and is applicable to several kinds of substance <a short biscuit is rich in butter or other fat and is crisp and crumbly when eaten> <short mortar is difficult to spread because of oversanding> <short timber is desiccated wood> <short (or hot-short) steel is brittle when heated beyond a certain point because of an excess of sulfur> Friable is applicable to substances that are easily crumbled or pulverized <friable soil> <friable sandstone> <friable blackboard chalk> <particles of shale, mica, or other friable and unsound minerals—Bateman> Ant tough —Con *elastie, resilient, flexible: *strong, stout, sturdy, tenacious

2 frail, *weak, feeble, decrepit, infirm

Ana impotent, *powerless: delicate, faint (see CHOICE): evanescent, ephemeral, *transient, transitory

Ant durable

fragment fraction, piece, *part, portion, section, segment, sector, division, detail, member, parcel

Ana remnant, *remainder

frangrance, perfume, incense, redolence, bouquet are comparable when denoting a sweet or pleasant odor. Fragrance usually suggests the odor diffused by flowers or other growing things, though it is applicable to odors that merely suggest the presence of flowers <fragnace after showers—Milton> <flowers laugh before thee on their beds and fragrance in thy footing treads—Wordsworth> <through the open doors . . . the soft wind . . . brought in the garden fragrance—Stark Young> <a fragrance such as never clings to aught save happy living things—Millya> Perfume originally applied either to the pleasantly odorous smoke emitted by some burning things (as various spices, gums, or leaves) <three April perfumes in three hot Junes burned since first I saw you—Shak> or to some natural or prepared substance which emits a pleasant odor. The latter sense predominates in current use, especially in reference to a preparation in liquid form, also called a scent (for full treatment of this term see SMELL), that contains the essence of fragrant flowers or is a synthetic concoction <rose like a steam of rich distilled perfumes—Milton> <a perfume redolent of the odor of violets> When applied to an odor rather than to a preparation, perfume differs little from fragrance except that it usually, when unqualified, suggests a heavier and more redolent odor, or at least a less delicate one <the perfume of lilies had overcome the scent of books—Galsworthy> <a gigantic rose tree which clambered over the house . . . filling the air with the perfume of its sweetness—L. P. Smith> Incense is usually used in place of perfume for the agreeably odorous smoke emitted by burning spices and gums <the church was filled with the odor of incense> The term, from association with the use of incense in religious ceremonies, tends to apply to odors or things comparable to odors that are not only pleasant but grateful to the senses or that for some cause uplift or are mentally or spiritually exalting <the breezy call of incense-breathing Morn—Gray> <grateful the incense from the lime-tree flower—Keats> <love wraps his wings on either side the heart . . . absorbing all the incense of sweet thoughts so that they pass not to the shrine of sound—Tennyson> <this is that incense of the heart, whose fragrance smells to heaven—Cotton> Redolence usually implies a mixture of fragrance, often pungently agreeable, odors <redolence of a forest after a rain> <the fascinating redolence and toughness of New Orleans' red-lighted Storyville, where jazz was born—Time> <the redolence of a garden in spring> Bouquet applies especially to the distinctive fragrance of a good wine, which is perceptible when one inhales the delicate and agreeable odor <lifting his glass to his lips, [he] voluptuously inhaled its bouquet—Lynton> but it may be extended to other delicate and distinctive odors (as of cooking food) that suggest the excellent savoury character of the source of the odor <the grateful smell of cooking pork grew every moment more perfect in bouquet—Ethel Anderson> Ana *smell, scent, odor, aroma Ant stench, stink

fragnant *odorous, aromatic, redolent, balmy

Ana delicious, delectable, *delightful

Ant fedid —Con *malodorous, stinking, noisome, putrid, rank

frail fragile, *weak, feeble, infirm, decrepit

Ana slight, slender, tenuous, *thin, slim: puny, *petty: flimsy, sneazy (see LIMP): *powerless, impotent

Ant robust —Con *strong, stout, sturdy, stalwart, tough, tenacious: *healthy, sound, hale: *vigoroius, lusty

frailty *fault, failing, foible, vice

Ana defect, flaw, *blemish: infirmity, fragility, feebleness, weakness (see corresponding adjectives at WEAK)

framer vb 1 *build, construct, erect, raise, rear

Ana fabricate, manufacture, fashion, *make

2 *contrive, devise, invent, concoct

Ana plan, scheme, project (see under PLAN n): conceive, envisage, *think

framework *structure, skeleton, anatomy

franchise *suffrage, vote, ballot

fragible *fragile, brittle, crisp, short, friable

frank adj Frank, candid, open, plain are comparable when they mean showing in speech, looks, and manners the willingness to tell what one feels or thinks. Frank stresses lack of reserve or of reticence in the expression of one's thoughts or feelings; it therefore usually connotes freedom from such restraints as fear, shyness, inarticulateness, secretiveness, or tact <this, to Anne, was a decided imperfection . . . she prized the frank, the openhearted, the eager character beyond all others—Austen> <things were as she had suspected: she had been frank in her questions and Polly had been frank in her answers—Joyce> <the child who has been treated wisely and kindly has a frank look in the eyes, and a fearless demeanor even with strangers—Russell> Candid is often used interchangeably with frank; it may distinguishively imply a fundamental honesty and fairness that make evasion impossible and suggest a refusal to dodge an issue or to be governed by bias or fear <I have tried to be as candid as possible, to follow out every thought as far as I could without caring where it would lead and without tempering any conclusions out of consideration to either my own sensibilities or those of any one else—Krutch> <I am sure that he was candid with me. I am certain that he had no guile—White> Open implies both frankness and candor, but it often suggests more naturalness or artlessness than frank and less conscientiousness than candid <Mr. Elliot was rational, discreet, polished, but he was not open. There was never any burst of feeling, any warmth of indignation or delight, at the evil or good of others—Austen> <for the white man to put himself mentally on their level is not more impossible than for these aborigines to be perfectly open, as children are, towards the white—Hudson> Plain comes closer to candid than to frank, but it suggests outspokenness, downrightness
ness, and freedom from affectation more than fairness of mind (a person he is trying vainly to help were less independent, an economist should form an independent judgment on currency questions, but an ordinary mortal had better follow authority—Russell) Sovereign (see also DOMINANT) and sovereignty stress the absence of a superior power and imply the supremacy within its own domain or sphere of what is so described or so designated. As applied to a state or government, these words usually involve the ideas both of political independence and of the possession of original and underived power (for many years before the Civil War it was debated whether the federal government was sovereign) (the powers of the general government, it has been said, are delegated by the States, who alone are truly sovereign . . . . It would be difficult to sustain this proposition—John Marshall) (although it [the government of the United States] is sovereign and supreme in its appropriate sphere of action, yet it does not possess all the powers which usually belong to the sovereignty of a nation—Talley) When used in reference to a thing, both words impute to that thing unquestioned supremacy and imply that everything within its sphere of influence is subject to it (noble and most sovereign reason—Shak) (the sovereignty of man lieth hid in knowledge; wherein many things are reserved that kings with their treasure cannot buy, nor with their force command—Bacon) Autonomous and autonomy may imply independence combined with freedom. The terms are much used in philosophy to describe or designate a theoretical or ideal freedom in which the individual is absolutely self-governing and acknowledges no claim of another to interference or control (the question is often asked whether an autonomous state and an autonomous church can exist side by side) (if this preeminence and autonomy of the spiritual be to be granted refusal to owe the bond of God at all—Inge) In political use the words seldom imply such absolute independence and freedom, for they are employed largely in reference to states which belong to an empire, a federation, or a commonwealth of nations. In reference to such states autonomy and autonomous commonly imply independence from the central power only in matters pertaining to self-government but recognition of the central governmental sovereignty in matters (as foreign policy) affecting the empire, federation, or commonwealth of nations as a whole. When a state is granted autonomy or become autonomous, the terms of such a grant are usually precisely stated (the Imperial Conference of 1926 defined the Dominions as "autonomous communities within the British Empire, equal in status, in no way subordinate one to another in any aspect of their domestic or foreign affairs, though united by a common allegiance to the Crown, and freely associated as members of the British Commonwealth of Nations")—Statesman's Year-Book Autarchic and autarchy historically implied absolute sovereignty or absolute or autocratic rule, but they have become interchangeable with autarkic and autarky, and both pairs of words imply economic and especially national economic self-sufficiency; the words are used in reference to states or governments that favor isolation through a policy of rigidly and arbitrarily planned economic self-sufficiency as a means of maintaining their independence (the totalitarian countries . . . . have created a self-encirclement by their abnormal economic policy, their costly and unnatural autarky—Manchester Guardian) (each community in Old China was cell-like, largely autonomous and autarkic—Leiberg) (the issue today is, therefore, whether a policy aimed at economic nationalism—self-sufficiency—autarchy—creates an environment favorable to the recon-
striction of a peaceful, tranquil, confident world—Lewis Douglas (a network of more or less closed, autarchic economies, each trying to the best of its ability to exist on a self-sufficient basis—Dean)

**Ana** liberated, emancipated, delivered, freed, released, enfranchised (see **free vb**)

**Ant** bond—Con compelled, coerced, forced, constrained, obliged (see **force vb**)

**free vb** Free, release, liberate, emancipate, manumit, deliver, discharge, enfranchise are comparable when meaning to set loose from whatever ties or binds or to make clear of whatever encumbers or holds back. **Free** is the ordinary general term interchangeable with many of the succeeding terms; it may be used not only in reference to persons that are in bondage or in a state of dependence or oppression or under restraint or constraint (free one's slaves) (free an oppressed people) (free a person from prison or from a charge) (free one from the necessity of speaking against a proposal) but also in reference to things that are confined, entangled, or encumbered and may therefore be unfastened, unloosed, disentangled, or dis-engaged (free a squirrel from a trap) (free her hair from a net) (flower scents, that only nighttime frees—Lowell)

**Release** carries a stronger implication of loosing or of setting loose from confinement, restraint, or obligation (release a prisoner) (release a person from a promise) (release me from my bands with the help of your good hands—Shak.) (activities that released his stored-up energy) (death has released him from his sufferings) (only by indulging a deep impulse towards sermonizing could he release those other impulses which made him the great writer he was—Syesks) **Liberate**, a very close synonym of the preceding words, differs from them chiefly in carrying a stronger suggestion of resulting liberty. The term may therefore connote, as do the others, emergence from some more or less disagreable bondage or restraint (liberate all slaves by a proclamation) or it may merely suggest a cutting of a tie, relationship, or connection without regard to the power of another thing or things to restrain or restrict, thereby approaching separation, disengage, or detach in meaning (oxygen is liberated when potassium chlorate is heated) (an electric current will decompose water, liberating hydrogen) (the poet draws chisement, manumission (see corresponding verbs at adj) (deliver a message) (deliver a person from a promise) (deliver a package to the purchaser) or to utter or pronounce when it implies a relieving oneself of something one must say or is charged by oneself or another with saying (deliver a message over the telephone) (deliver a speech) The term may denote the disburdening of a woman of offspring at the time of its birth (the queen was safely delivered of a son and heir) or the freeing of all prisoners confined in a prison (deliver a jail) **Discharge** (see also Dismiss 1; perform) implies the release of someone or something that is held in confinement or under restraint or within the bounds of a thing; it may suggest liberation (discharge a prisoner) (discharge a hospital patient) but often it implies an ejection (discharge a shot) (discharge an arrow) or an emission (discharge passengers from a train) (discharge a cargo) or a pouring forth through an outlet or vent (the smoke is discharged through a very large chimney) (the stream discharges its waters into the Hudson River) or a payment or settlement (as of an obligation) (discharged his debts) Often discharge differs from release in carrying a stronger connotation of force or violence (many creative writers have a critical activity which is not all discharged into their work—T. S. Eliot) (all his accumulated nervous agitation was discharged on Maud like a thunderbolt—Bennett) **Enfranchise** basically implies a freeing from subjection (the nobles desired . . . to enfranchise themselves . . . from the power of the king—Belloq) but in its commonest sense it specifically implies the removal of political disabilities and admission to full political rights as a freeman or as a citizen (slaves were emancipated by the proclamation of President Lincoln on January 1, 1863, but were not enfranchised until the fiftieth amendment went into effect in 1870)

**Con** *hamper, fetter, manacle, shackle, trammel, hog-tie:* (imprison, incarcerate, jail, immure, intern: confine, circumscribe, restrict, *limit:* restrain, curb, inhibit

**freebooter** *pirate, buccaneer, privateer, corsair

**freedom** 1 independence, autonomy, sovereignty, autarchy, autarky (see under **free adj**)

**Ana** liberation, emancipation, release, delivery, enfranchisement, manumission (see corresponding verbs at **free** adj) liberty, license (see **freedom**)

**Ant** bondage—Con *servitude, slavery

**freedom** 2 Freedom, liberty, license are comparable when meaning the state or condition of one who can think, believe, or act as he wishes. **Freedom** (see also under **free adj** is the term of widest application; in philosophy, for example, it often implies a state or condition in which there is not only total absence of restraint but release even from the compulsion of necessity; at the other extreme, in ordinary casual use, **freedom** merely implies the absence of any awareness of being restrained, repressed, or hampered; between these two extremes the term may imply the absence of a definite restraint or of compulsion from a particular power or agency (me this unchartered freedom tires—Wordsworth) (the freedom of the press) (he was not affected by her reserve, and talked to her with the same freedom as to anybody else—Archibald Marshall) (who would not say, with Huxley, "Let me be wound up every day like a watch, to go right fatally, and I ask no..."
better freedom"—James> Liberty is often used interchangeably with freedom, but it often carries one of two implications which are not so marked in the use of freedom. The first of these implications is the power to choose what one wishes to do, say, believe, or support as distinguished from the state of being uninhibited in doing or thinking (had the liberty to come and go as he pleased) (in totalitarian states there is no liberty of expression for writers and no liberty of choice for their readers—Huxley) (in freedom in thought, the liberty to try and err, the right to be his own man—Menciken) The second of these implications is deliverance or release from restraint or compulsion (set a slave at liberty) (the prisoners were willing to fight for their liberty) (from bondage freed, at liberty to serve as you loved best—Baring) License often implies the liberty to disobey the rules or regulations imposed on the many, but not necessarily governing all, when a great advantage is to be gained by disobedience (poetic license) (sometimes, with truly medieval license, singing to the sacred music . . . songs from the street—Peter) (a general must be allowed considerable license in the field) (has little truck with those who have taken literary license—Horner) More often, however, the term implies an abuse of liberty in the sense of the power to do exactly what one pleases (license they mean when they cry Liberty—Milton) (many persons think that freedom of the press and liberty of free speech often degenerate into license) (Caesar's legions . . . were enjoying their victory in the license which is miscalled liberty—Froude) Ana *exemption, immunity: scope, *range, compass, sweep Ant necessity —Con compulsion, constraint, coercion (see corresponding verbs at force) freethinker unbeliever, *atheist, agnostic, deist, infidel freezing adj *cold, frigid, frosty, gelid, icy, glacial, arctic, chilly, cool freight n cargo, *load, burden, lading frenetic adj *furious, frantic, frenzied, wild, delirious, rabid Ana demented, *insane, mad: *irrational, unreasonable: provoked, excited, stimulated (see provoke) frenzied *furious, frantic, wild, frenetic, delirious, rabid Ana demented, deranged, *insane, crazed, mad: distracted, bewildered (see puzzle) frenzy 1 delirium, *mania, hysteria 2 fury, *inspiration, afflatus Ana *ecstasy, rapture, transport frequently *often, oftentimes Ant rarely, seldom fresh novel, *new, new-fashioned, newfangled, modern, modernistic, original Ana gleaming, glistening, sparkling (see flash vb): vernal, *youthful: raw, green, crude, uncouth (see rude): naive, unsophisticated, artless, *natural Ant stale —Con *trite, hackneyed, shopworn, stereotyped, threadbare fret vb *abrade, excoriate, chafe, gall Ana *eat, devour, consume: *worry, harass fretful peevish, *irritable, petulant, querulous, fractious, snappish, waspish, pettish, huffy Ana cross, crabby, touchy, choleric, *irascible: captious, carping, caustic, faultfinding, *critical: *contrary, perverse Con patient, long-suffering, forbearing, resigned (see corresponding nouns at patience): *tame, submissive, subdued friable short, frangible, crisp, brittle, *fragile Ana crumbling or crumbly, disintegrating (see corresponding verbs at decay) friar *religious, monk, nun friend, acquaintance, intimate, confidant are comparable when they designate a person, especially not related by blood, with whom one is on good and, usually, familiar terms. Friend, in its application, ranges from a person who is not hostile or is a well-wisher to a person whose society one seeks or accepts with pleasure because of liking, respect, or affection. Acquaintance is applied to a person with whom one is on speaking terms. However, when these words are used in contrast, both imply a degree of familiarity, friend distinctively connoting close bonds of love and affection and acquaintance, comparative infrequency of contact and less close personal interest (you understand that I am not their friend. I am only a holiday acquaintance —Conrad) (a companion loves some agreeable qualities which a man may possess, but a friend loves the man himself—Boswell) This distinction is not invariably observed, especially when acquaintance is used as a collective plural (he has a wide circle of friends; he has a large acquaintance) (he never speaks much, unless among his intimate acquaintance—Austen) Intimate adds to friend the implications of a deeper affection and a closeness of association that tend to preclude reserve (only his intimates were aware of his plans) Confidant usually designates that intimate who actually is entrusted with one's secrets or is admitted to confidential discussions. Ana comrade, companion, crony, *associate: ally, colleague, *partner Ant foe —Con *enemy: antagonist, *opponent, adversary: rival, competitor (see corresponding verbs at rival) friendly *amicable, neighborly Ana *familiar, intimate, close: *loving, affectionate, devoted: loyal, true, steadfast, *faithful Ant unfriendly: belligerent —Con hostile, antagonistic, antipathetic (see corresponding nouns at enmity) friendship, amity, comity, goodwill are comparable when they denote the relation (or, in the first three instances, the alliance) existing between persons, communities, states, or peoples that are in accord and in sympathy with each other. Friendship is the strongest of these terms in its implications of sentiment in the relation and of closeness of attachment (the friendship between me and you I will not compare to a chain; for that the rains might rust, or the falling tree might break—Penn) Sometimes it suggests an alliance; at other times it excludes that suggestion (peace, commerce, and honest friendship with all nations—entangling alliances with none—Jefferson) (friendship, that exquisite sense of a mutual sympathy of heart and mind which occasionally arises between independent individuals —Cecil) Amity implies the absence of enmity or discord. Positively, it may imply nothing more than amicable relations (the colonists and the Indians seldom lived together in amity) or it may suggest reciprocal friendliness (on his arrival he found amity instead of enmity awaiting him. Father Vaillant had already endeared himself to the people—Cather) Often the term suggests benevolent understanding and mutual tolerance of potentially antagonistic aims or views (the amity that wisdom knits not, folly may easily untie—Shak) (the less we have to do with the amities or enmities of Europe, the better—Jefferson) Comity has come to imply comradeship based either upon an interchange of courtesies or upon a similarity of interests and aims. The word often denotes a group bound together by friendship or by common interests but without implying loss of independence by members of the group or transfers of sovereignty from the members to the group (outside the comity of the empire, beyond the border provinces and client-kings, lay the unknown lands and the
strange peoples—Buchan 〈a Europe which pretends to have founded its comity upon brotherhood—La Barre〉

Goodwill derives its chief implication of a benevolent attitude or of reciprocal good feeling largely from the Authorized Version's translation of the Angelic Hymn 〈glory to God in the highest, and on earth peace, goodwill toward men—Lk 2:14〉. The term is often used in international diplomacy to designate a reciprocal friendliness which constitutes an informal bond between nations and works to the advantage of all concerned 〈goodwill is the mightiest practical force in the universe—Dole〉. To promote the exchange of intellectual ideas and goodwill between Belgium and America—School and Society〈be assured that none of us have anything but goodwill toward you personally—Ellison〉

Ana sympathetic, affinity, *attraction: *sympathy, empathy: accord, concord, consonance, *harmony: *alliance, league, coalition, fusion, federation

Ant animosity — Con 〈enmity, hostility, antagonism, antipathy, rancor: *hate, hatred〉

fright n alarm, consternation, panic, *fear, dread, dismay, terror, horror, trepidation

A frightening or scare, startling, affrighting, frightening 〈see corresponding verbs 〈FRIGHTEN〉; appalling, horrifying, daunting 〈see DISMAY vb〉

fright vb 〈frighten, scare, alarm, terrify, terrorize, startle, affray, affright 〈see those at FRIGHTEN〉

frighten, fright, scare, alarm, terrify, terrorize, startle, affray, affright 〈see those at FRIGHTEN〉

frightened, frightened, frightened, alarmed, terrified, alarmed,startled, alarmed 〈the world of the house . . . frightened Clara—Anderson〉

〈in the world too frightened to be honest—T. S. Eliot〉

Fright is an older and chiefly literary or dialect form of frighten 〈you have death perpetually before your eyes, only so far removed as to compose the mind without frightening it—Gray〉. In informal and conversational use scare is often equivalent to frighten; in more formal use it usually implies fear that causes one to run, shy, or tremble 〈sour visages, enough to sour visages, gray—Gray〉 〈a noise did scare me from the tomb—Shak〉 〈earth shakes beneath them, and heaven roars above; but nothing scares them from the course they love—Cowper〉

Alarm in the relevant sense 〈compare ALARM n 1〉 nearly always stresses apprehension or anxiety 〈they are alarmed for his safety〉

〈the girl was . . . alarmed by the altogether unknown expression in the woman's face—Conrad〉

Frighten is perhaps the most frequent in use; it is the most inclusive, for it may range in implication from a momentary reaction to a stimulus to a state of mind in which fear or dread prevails. Typically, however, it implies a more or less paralyzing fear affecting either the body or the will 〈the silence of the house . . . frightened Clara—Anderson〉

〈in the world too frightened to be honest—T. S. Eliot〉

Fright is an older and chiefly literary or dialect form of frighten 〈you have death perpetually before your eyes, only so far removed as to compose the mind without frightening it—Gray〉. In informal and conversational use scare is often equivalent to frighten; in more formal use it usually implies fear that causes one to run, shy, or tremble 〈sour visages, enough to sour visages, gray—Gray〉 〈a noise did scare me from the tomb—Shak〉 〈earth shakes beneath them, and heaven roars above; but nothing scares them from the course they love—Cowper〉

Alarm in the relevant sense 〈compare ALARM n 1〉 nearly always stresses apprehension or anxiety 〈they are alarmed for his safety〉

〈the girl was . . . alarmed by the altogether unknown expression in the woman's face—Conrad〉

Frighten is perhaps the most frequent in use; it is the most inclusive, for it may range in implication from a momentary reaction to a stimulus to a state of mind in which fear or dread prevails. Typically, however, it implies a more or less paralyzing fear affecting either the body or the will.
gloom—Beckford] the up behind the Sangre de Cristo, gathered great thunderheads, lowering as they came, fringed threateningly with light—Mary Austin] Gloom ordinarily carries a much stronger implication of gloominess or depression and a much weaker (often nonexistent) suggestion of threatening than does lower (they may be wise in not glooming over than is inevitable—Cabell] <<Skiddaw [a mountain] gloomed solemnly overhead—Dowden>>

Ant smile — Con *disapprove, deprecate

frizzly blowzy, *sallowly, dowdy

Ana slovenly, unkempt, disheveled, sloppy, *slipshod: squally, *dirty, filthy: *negligent, neglectful, lax, slack, remiss

Ant trim: smart — Con *neat, tidy, trig, spick-and-span: *clean, cleanly

frugal thrifty, economical, *sparing

Ana *careful, meticulous: provident, prudent, discreet (see under PRUDENCE): saving, preserving, conserving (see SAVE): parsimonious, cheeseparing, penny-pinching (see STINGY)

Ant wasteful — Con extravagant (see EXCESSIVE): prodigal, lavish, *profuse

fruitful fecund, prolific, *fertile

Ana reproducing or reproductive, propagating, breeding (see corresponding verbs at GENERATE): bearing, producing or productive, yielding (see corresponding verbs at BEAR): teeming, abounding (see TEEM): luxuriant, lush, exuberant (see PROFUSE)

Ant unfruitful: fruitless — Con *sterile, barren, impotent, infertile: *fertile, vain, bootless, abortive

fruitfulness prolificacy, fecundity, fertility (see under FERTILE)

fruition enjoyment, delectation *pleasure, delight, joy

Ana realization, actualization, materialization (see corresponding verbs at REALIZE): fulfillment, accomplishment (see corresponding verbs at PERFORM): attainment, achievement (see corresponding verbs at REACH): possession, enjoyment (see corresponding verbs at HAVE)

fruitless *fertile, vain, bootless, abortive

Ana unfruitful, barren, infertile, *sterile: *vain, idle, otiose, nugatory, empty, hollow: frustrated, thwarted, foiled (see FRUSTRATE)

Ant fruitful — Con *effective, effectual, efficacious, efficient: *fertile, fecund, prolific

fruitful, thwart, foil, baffle, balk, circumvent, outwit mean either to defeat a person attempting or hoping to achieve an end or satisfy a desire or, in some cases, to defeat another's desire. To frustrate is to make vain or inefficient all efforts, however feeble or however vigorous, to fulfill one's intention or desire. Whatever nature... purposes to herself, she never suffers any reason, design, or accident to frustrate—Fielding] <<my good intentions towards you... are continually frustrated—Cowper>>

nature... supports as well as frustrates our lofty aspirations—Muller] To thwart is to frustrate especially by crossing or running counter to someone or something making headway <<others had thrust themselves into his life and thwarted his purposes—George Eliot>>

<<public enforcement of hygienic practices is thwarted by a really obstructive neglect of the rules of health by her peasantry—Hobs>on>>

Foil commonly implies a blocking or turning aside that makes further effort difficult or destroys one's inclination to proceed further. This attempt to replace ambition by love had been as fully foiled as his ambition itself—Hardy] <<intelligence as a means to foil brute force—Hear>>

To baffle is to frustrate especially by confusing or puzzling: to balk, by intersecting obstacles or hindrances <<such knotty problems of alleles, such enigmatical entries, and such sphinx's riddles of streets without thoroughfares as must, I conceive, baffle the audacity of porters and confound the intellects of hackney-coachmen—De Quincey>> <<I like reading my Bible without being baffled by unmeaninginess—Arnold>>

<<when an affection as intense as that is balked in its direct path and repressed it usually, as we know, finds an indirect outlet—Brooks>> <<his inclination to dreams, balked by the persistent holding of his mind to definite things—Anderson>>

Circumvent implies frustration by stratagem; outwit, by craft or cunning <<immigration laws had been growing more and more effective... but... the rejected aliens soon learned a method of circumventing them—Heiser>>

<<the skill with which she [Elizabeth I] had hoodwinked and outwitted every statesman in Europe—J. R. Green>>

Ana negative, counteract, *neutralize: defeat, beat, overcome, *conquer: *forbid, prohibit, inhibit: *prevent, preclude, obviate: *hinder, impede, obstruct, block, bar

Ant fulfill — Con effect, accomplish, achieve, *perform: further, forward, promote, *advance: *incite, instigate, abet, foment

Ant frustrate: fail (in)

2 *satisfy, meet, answer

Ana equal, approach, *match, touch, rival

Ant fall short (of)

full, complete, plenary, replete are not interchangeable with each other, but the last three are interchangeable with the most comprehensive term, full, in at least one of its senses. Full implies the presence or inclusion of everything that is wanted or required by something or that can be held, contained, or attained by it: thus, a full year numbers 365 days or, in leap years, 366 days; a full basket is one that can hold nothing more: a full mind is stocked to the point of overflowing with knowledge or ideas; a full moon has reached the height of its illumination by the sun; a full stomach is one that can contain no more food with comfort or is completely satisfied; a full meal is one lacking in none of the courses or sometimes in none of the elements to make a satisfying or balanced meal; a sponge full of water has absorbed all the water it can hold. Complete comes into comparison and close synonymy with full when the latter implies the entirety that is needed to the perfection, consumption, integrity, or realization of a thing; thus, a fire in which the fuel is quite consumed may be described as involving either full or complete combustion; a complete meal is the same as a full meal; a teacher should have complete, or full, control of his class <<if you consider the ritual of the Church during the cycle of the year, you have the complete drama represented. The Mass is a small drama, having all the units; but in the Church year you have represented the full drama of creation—T. S. Eliot>>

<<the panorama of today's events is not an accurate or complete picture, for history will supply posterity with much evidence which is hidden from the eyes of contemporaries—Eliot>>

Plenary comes into comparison with full when full implies the absence of every qualification or even suggestion of qualification as to a thing's completeness. Plenary, however, heightens the force of full in this sense and carries a stronger sug-
fulsome, oily, unctuous, oleaginous, slick, soapy are com-
comprehensive, including:

Once supernatural and so authoritative that it were

often, the term implies fullness to satiety or

Abundant supply or of being filled to the brim with some-

Often, however, the term implies fullness to satiety or

As compared with

Sometimes used

Addition of a mask for evil or dubious ends <an

Either a sugar coating or a smooth, iron-clad varnish

For laughing or for finding a usually genial cause for

And commonplace evasion—

In a manner, but it usually stresses the speciousness of that

To gentle or malicious ridicule <make

Or turned to laughter.

And utterance not to be taken seriously. In such uses, how-

In the phrase

Theקת of something which in proper measure is not displeasing but which in abundance is

Typically the term is applied to praise, flattery, and compliments, with the intent to suggest that they exceed the bounds of good
taste and are lacking in truth and sincerity <fulsome

The bedaubing one of those worthies with the most fulsome praise—Smollett

The fulsome strains of courtly adulation—Edgeworth

He could never be made ridiculous, for he was always ready to laugh at

Himself and to prick the bladder of fulsome praise—

Buchan

Oily and unctuous both suggest the smoothness and blandness of oil. Oily, as applied to persons and their utterances and acts, carries a strong implication of an offensively ingratia
ting quality and sometimes suggests a suavity, a benevolence, or a kindness that is assumed as a mask for evil or dubious ends <an oily

Scoundrel

Oily manners

Oily smugness: *only oily and commonplace evasion—Stevenson

An oily, sycophantic press agent—Rogov

Uncuous, on the other hand, suggests the assumption, often in hypocrisy, of the tone or manner of one who is grave, devout, or spiritual

The uncuous grandiloquence of Dickens' Chad-

band

The look was, perhaps, uncuous, rather than spiritual, and had, so to speak, a kind of fleshy effulgence... He... smiled with more uncuous benignity than ever—Hawthorne

Mark Twain writes those words with an almost uncuous gravity of conviction—Brooks

The devastating portrait of the uncuous literary opportunist—Cordell

Oleaginous is sometimes used in place of oily or uncuous when pomposity is connoted or a mocking note is desired <the lank party who

Sniffs in place of oily

Cockcrow—Farrar

Shall may suggest the assumption of a smooth, ingratiating manner, but it usually stresses the speciousness of that appearance and often implies sly wily trickiness to the

Person who assumes it this slick type of younger anticipates exactly how adults will react to him and plays on their sensibilities—Meyer

A pair of slick operators had given the district a bad name by salting a barren

claim—Oscar Lewis

Soap comes close to unctuous in its extended sense, but it carries almost no suggestion of hypocrisy: rather it connotes an unduly soft, bland, or ingratiating manner <soap supplications for unity—New Republic

Ana lavish, *profuse, exuberant: *excessive, extravagant:
cloying, satiating, sating (see satiate): bombastic, grandiloquent, magniloquent (see rhetorical)

Fumble vb *botch, bungle, miff, cobble

Ana blunder, flounder, *stumble

Fumigate disinfect, sanitize, *sterilize

Fun, jest, sport, game, play are comparable when they denote something (as an activity, an utterance, or a form of expression) that provides diversion or amusement or is intended to arouse laughter. Fun implies amusement or

An engagement in what interests as an end in itself, or it may apply to what provides this amusement or interest and then often additionally implies a propensity for laughing or for finding a usually genial cause for

Laughter or amusement <had such a zest for everything and thought it all such fun—Rölaag

Make living more fun, life more complete—Printers' Ink

A man full of fun: Jest (see also joke) is comparable to fun chiefly in fixed phrases (as in jest) or when applied to activity or utterance not to be taken seriously. In such uses, how-

Ever, jest commonly carries a stronger implication of ridicule or hoaxing <a man given to making his most significant remarks in jest>

Make jest of very serious problems

Sport (see also under play vb 1) is often interchangeable with fun <there is a good deal of sport in many serious activities> or jest

Play a trick on a friend for the sport of it

But its most common use is in certain idiomatic phrases (as make sport and in sport) in which it suggests an intent to induce amusement or provoke laughter by putting someone or something up to gentle or malicious ridicule <make sport of a sug-

Gest <make a good deal of sport out of his friend's misfortune>

Teasing begun in sport ended in an ugly brawl

Game as a close synonym of fun survives chiefly in the phrase to make game of where, like sport in the corresponding idiom, it usually carries a suggestion of

Mischievous or malice and implies a certain ridicule <make game of an unfortunate rival>

In more general related use game (see also games under athletics) may apply to an activity carried on in a spirit of fun <there have been few poets more successful... in having fun with poetry. To Mr. Frost it is a pleasant game—Leary

Play, which stresses in all senses an opposition to earnest,

May replace fun or sport or jest when a thoroughly in-

nocuous implication of lack of earnestness or seriousness is desired <pretend to spank a child in play>

Ana amusement, diversions, recreation, entertainment (see under muse): Merriment, jocundity, blitheness, joviality (see corresponding adjectives at merry): *mirth,

Glee, hilarity, jollity

Function n 1 Function, office, duty, province are com-
parable when they mean the act, acts, activities, or operations expected of a person or thing by virtue of his or its natural

State, status, or position. Function is the most comprehensive of these terms, capable of referring not only to a living thing or to a part or member of a living thing but to anything in nature (as the sun, the stars, or the earth) or in art (as poetry, painting, music, or an example of one of these) or to anything constructed that

Serves a definite end or purpose or is intended to perform a particular kind of work <fulfill one's function as a mother>

The function of the stomach is to digest food sufficiently to enable it to pass into the intestine

Function, office, duty, province are comparable when they mean the act, acts, activities, or operations expected of a person or thing by virtue of his or its nature, structure, status, or position. Function is the most comprehensive of these terms, capable of referring not only to a living thing or to a part or member of a living thing but to anything in nature (as the sun, the stars, or the earth) or in art (as poetry, painting, music, or an example of one of these) or to anything constructed that serves a definite end or purpose or is intended to perform a particular kind of work <fulfill one's function as a mother>
function of language is twofold: to communicate emotion and to give information—Huxley 〈the function of the leaves of a plant〉 〈the function of criticism〉 〈what after all . . . is the true function of religion?—Dickinson〉

Office applies usually to the function of or the work to be performed by a person as a result of his trade, profession, employment, or position with relation to others; in this sense it refers to a service that is expected of one or to a charge that is laid upon one 〈O, pardon me for bringing these ill news, since you did leave it for my office, sir—Shak.〉 〈to suppose she would shrink . . . from the office of a friend—Austen〉 〈they exercise the offices of the judge, the priest, the counsellor—Gladstone〉

Duty (see also TASK) applies not only to the tasks expected or required to be performed in the course of occupation or employment 〈the duties of a cook〉 〈the duties of a hotel porter〉 but to the offices associated with status, rank, or calling and generally regarded as inherent in that status, rank, or calling and as imposing an obligation upon the person so stationed 〈a man and wife fulfill their biological function when they produce children, but they must still perform their duties as parents in rearing, protecting, and educating those children〉 〈the governor regarded it as his duty to warn the citizens of the dangers ahead〉 〈it is not only the right, but it is the judicial duty of the court, to examine the whole case as presented by the record—Taney〉 〈it is in large part because of our failure to discharge our peacetime responsibilities as citizens that we must do our grim duty in war or perish—Lodge〉

Province (see also FIELD) denotes a function, office, or duty which comes within one's range of jurisdiction, powers, competence, or customary practice 〈nursing does not belong to a man; it is not his province—Austen〉 〈it is emphatically the province and duty of the judicial department to say what the law is—John Marshall〉

Ana end, goal, object, objective, purpose (see INTENTION): business, concern, *affair: *task, job 2 *power, faculty

Ana *ability, capacity, capability: action, behavior, operation (see corresponding verbs at ACT)

function vb operate, work, *act, behave, react

fundamental adj 1 Fundamental, basic, basal, underlying, radical are comparable when they mean forming or affecting the groundwork, roots, or lowest part of something. Fundamental is used chiefly in reference to immaterial things or to abstractions, whether they are thought of as built up on a foundation or as having their origins in roots 〈the fundamental rules of poetry〉 〈a fundamental change in his attitude to life〉 〈the fundamental rock in a geological formation〉 〈the fundamental absurdity of the plot . . . remains—FitzGerald〉

But basic is preferred to fundamental when the reference is to a definite or concrete groundwork, bottom, or starting point 〈the basic stone of a pillar〉 〈a basic wage in the electrical industry〉 〈the distinction between basic scientific research and applied research—News Front〉

Basal differs from basic chiefly in not being used as often in reference to immaterial things and is more often implying reference to the bottom or to the lowest point or regions of a thing 〈geologizing the basal parts of the Andes—Darwin〉 〈the basal plane of a crystal〉 〈basal leaves on a stem〉

Underlying may be used to suggest nothing more than extension beneath something else 〈underlying rock strata〉 〈the underlying layer of tissue〉

However, especially when the reference is to something immaterial, the term frequently comes close to fundamental, differing from it chiefly in suggesting a depth that removes the thing from one's range of vision or a remoteness that demands study or research on the part of one who would detect it 〈the underlying motive for his act〉 〈the underlying causes of World War I〉 〈underlying differences between Communism and socialism〉 〈the social transformation now demanded of us by our underlying technical, economic and social development—Strachey〉

Radical (see also LIBERAL 2) implies reference to the root or origin or ultimate source of a thing; thus, a radical change is one that is so thorough-going that it affects the fundamental character of the thing involved; a radical error touches the very center and source of a thing's life 〈actual differences distinguishing the different races of mankind—differences that may be ascribed to radical peculiarities of mind—Bridges〉

Ana *primary, primal, primordial, prime: *elementary, elemental 2 *essential, vital, cardinal

Con *superficial: *subordinate, secondary

fundamental n *principle, axiom, law, theorem

Ana *element, constituent, component, factor: ground, basis, foundation, *base, groundwork

funky *laughable, risible, ludicrous, ridiculous, comic, comical, farcical, droll

Ana humorous, *witty, jocose, jocular, facetious: amusing, diverting, entertaining (see AMUSE): grotesque, bizarre, *fantastic, antic

Con *serious, solemn, grave, sober: *melancholy, plaintive, doleful, dolorous, lugubrious

furious, frantic, frenzied, wild, frenetic, delirious, rabid are comparable when they mean possessed with uncontrollable excitement especially under the stress of a powerful emotion. Furious implies strong excitement or violence that characterizes the movements or activities of one aroused by a powerful emotion; it may be applied to the activities or to the emotion 〈he was in a furious rage〉 〈she worked with furious zeal while the mood lasted〉 〈she was now entering into that stage of furious activity which represented the exalted phase of the mental circular state—Ellis〉

Furious may also mean nothing more than intensely angry with or without an outward display of excitement 〈beneath her calm she was furious against her favorite—Bennett〉

Frantic implies actions or words that indicate temporary mental disturbance under the stress of a powerful emotion (as grief, worry, anxiety, fear, or rage); it usually suggests, especially when applied to actions or behavior, a situation from which it is almost impossible to escape 〈his frantic efforts to free himself resulted only in his becoming worse entangled〉

〈there was a full moon at the time, and . . . every dog near my tent was baying it. The brutes . . . drove me frantic—Kipling〉 〈a frantic beating of wings—Cather〉

My father, frantic with anxiety over my safety—Heiser

Frenzied suggests uncontrollable excitement under the sway of an emotion, often one not explicitly designated, but it differs from frantic in carrying no clear suggestion of a desperate situation 〈a frenzied welcome by the populace〉 〈why do we let these abstractions and implausible dogmatisms take possession of us . . . and fight their futile, frenzied conflicts in our persons?—L. P. Smith〉

〈could hear the prosecutor's frenzied denunciations of the accused—H. W. Carter〉

〈ignoring the frenzied nervous attempts of an unprepared city to make some semblance of defense—Gardner〉

A colon (:) separates groups of words discriminated. An asterisk (*) indicates place of treatment of each group.
Wild comes close to frantic in its meaning but stresses a disturbed rather than a nearly deranged state of mind; it therefore may be used with reference not only to the effect of a violent emotion but to the effect produced by any undue strain on the nerves or the mind (she is wild with grief) wild screams of anguish (the news drove the people wild with joy) these are but wild and whirling words, my lord—Shak. wild with hatred and insane with baffled desire—Thackeray. Frenetic suggests a loss of balance, especially a tendency to be affected by extreme excitement under the stress of religious or partisan emotions (some of the more frenetic of the franc-tireurs of liberalism—Pall Mall Gazette) when inspired, their [the sacred writers'] individuality was intact. They were never ... frenetic—J. P. Newman. Delirious, like frenzied, implies uncontrollable excitement, but it more specifically suggests symptoms (as lightheadedness, incoherence, and wandering) typically associated with delirium—Edmund Wilson. Delirious joy (Edmund Wilson) implies uncontrollable excitement under the stress of religious or partisan emotions (some of the more frenetic of the franc-tireurs of liberalism—Pall Mall Gazette) when inspired, their [the sacred writers'] individuality was intact. They were never ... frenetic—J. P. Newman.

In their extended senses the words in this group retain their respective implications but refer to mental, moral, or physical qualifications rather than to things (such education as the local schools could furnish—Smythe) thus equipped with a philosophy Emerson was prepared to begin his work as a critic—Parrington required ... the judge to outfitted him legally—Hackett. one weeps to see Fowler [Modern English Usage] stripped and reaccoutered by an unskilled hand for ends which he would repudiate—Barzun. he armed himself with patience, as was needful, having so much to endure—Norton.

**further** adv & adj farther

**furthermore** moreover, besides, likewise, also, too

**futile** vain, fruitless, bootless, abortive all denote barren result. Futile and vain parallel each other only when they imply failure to realize an immediate aim (it was equal in vain, and he soon wearied of his futile vigilance—Stevenson) Vain (see also VAIN 1) usually implies little more than simple failure; futile may connote the completeness of the failure or the unawareness of the undertaking (all literature, art, and science are vain ...) if they do not enable you to be glad—Ruskin. Opposition ... had been so futile that surrender seemed the only course open—Jones. Though both vain and futile
may be applied to something contemplated but not yet tried, vain more often suggests a judgment based on previous experience and futile, one based on reasoning from self-evident principles (but it is vain to talk of form and symmetry to the pure expansionist—Babbit) (it is futile to ask which [Shakespeare or Dante] undertook the more difficult job—T. S. Eliot) Fruitless is often interchangeable with vain. But its basic meaning makes it especially applicable to undertakings that entail long, patient, arduous effort and severe disappointment (whom he had long time sought with fruitless suit—Spenser) (he nursed a grievance and, with Scotch persistence, kept up for years his fruitless efforts to reinstatement—Ashley) Bootless, chiefly poetic, is especially applied to petitions or efforts to obtain relief (they would not pity me, yet plead I must; and bootless unto them—Shak) (no guides were to be found, and in the next summer the young man returned from his bootless errand—Parkman) Abortive implies failure before plans are matured or activities begun (an abortive conspiracy) (an abortive attempt to break jail) (he had stirred up the Maronites to attack us . . . had I not brought up unexpectedly so many Arabs as rendered the scheme abortive—Scott) (some of them would play a considerable part in the abortive renaissance of the 1890's—Malcolm Cowley) Ana vain, idle, otiose, nugatory: *ineffective, ineffectual, inefficacious Con effectual, *effective, efficacious: fruitful (see fertile)

gab vb *chat, chatter, patter, prate, prattle, babble, gabble, jabber, gibber

gate *door, portal, gateway, postern, doorway

gateway gate, portal, *door, postern, doorway

gather vb 1 Gather, collect, assemble, congregate mean to gather

2 reap, glean, garner, harvest

**gather** vb 1 Gather, collect, assemble, congregate mean to come or to bring together so as to form a group, a mass, or a unit. The same distinctions in applications and in implications characterize their derivative nouns gathering, collection, assemblage (which see) or assembly, congregation.

**Gather** is the most widely applicable of these words; it may be used in reference not only to persons and objects but to intangible things (a crowd gatherings wherever there is excitement) (gathers the boys and girls of the neighborhood for a picnic) (gathers flowers or crops implies plucking and culling as well as bringing together; gathering a ruffle implies a drawing together or into folds on a thread; gathering one's wits connotes an effort at concentration or at mustering or rallying mental forces. **Collect** is often used in place of gather with no intended difference in meaning (collect leaves) (collect leaves) (collect leaves) (gathering his ideas together before planning his speech).

In certain phrases gather acquires additional specific connotations; thus, gathering flowers or crops implies plucking and culling as well as bringing together; gathering a ruffle implies a drawing together or into folds on a thread; gathering one's wits connotes an effort at concentration or at mustering or rallying mental forces. Collect is often used in place of gather with no intended difference in meaning (collect leaves) (collect leaves) (collect leaves) But collect may convey, as gather does not, the ideas of careful selection or a principle of selection, of orderly arrangement, or of a definitely understood though not always expressed end in view; thus, to collect butterflies implies a selection of specimens and, usually, their cataloguing; to collect books (as in book collector) implies a choice of books with regard to some such principle as rarity, beauty of binding, or authorship. There is a subtle difference between to gather one's thoughts, which often merely implies previous scattering, and to collect one's thoughts, which implies their organization; there is also a difference between to gather money, which may mean merely to accumulate it, and to collect money, which usually suggests either raising a fund by gifts, subscriptions, and contributions or taking action to obtain possession of money due. Collect and collection are often preferred to gather and gathering when various things are brought together; thus, a jumble or an omnium-gatherum is a miscellaneous collection rather than a gathering; collect rather than gather enough chairs for all the guests to sit down. Assemble stresses more emphatically than either gather or collect a close union of individuals and a conscious or a definite end in their coming or in their being brought together. It is used chiefly in reference to persons who gather together, either of their own will or at the call of another, so as to form a group or body that will unite in action or join in counsel or discussion (the democratic rights of free speech and free assembly) (the most renowned experts on the history, geography, economics, and politics of all the nations of the world... assembled under one roof—Allop & Braden) (even after a new crew had... been assembled, I had qualms about setting forth over the treacherous waters of the China Sea—Heiser) In reference to things assemble implies an agent who collects them in order to unite them into a single body or structure or into a distinct and isolated group; thus, the assembly department of an automobile plant is the department in which the workmen build the cars by assembling the component parts made in other departments or in other factories (it took twenty years to assemble this collection of musical instruments) *Congregate* implies a flocking together into a crowd, a huddle, or a mass (a cattle congregate during a storm) (pass laws forbidding persons to congregate on the streets) (congregations of atoms excited and lucent, mingled with free electricity—Darrow) *Congregation* is specifically applied to an assembly meeting for religious worship, but it usually retains the suggestion of a crowd that has flocked together.

**Ana** accumulate, amass, hoard; *heap, pile, stack, mass

2 reap, glean, garner, harvest

**Ana** see those at GATHER 1

3 infer, deduce, conclude, judge

**gathering** collection, assemblage, assembly, congregation (see under GATHER)

**Ana** *crowd, throng, press, horde, mob, rout, crush: accumulation (see corresponding verb ACCUMULATE)

**gaucho** malandro, *awkward, clumsy, inept

gaudy, tawdry, garish, flashy, meretricious are comparable when meaning vulgar or cheap in its showiness. Something is gaudy which uses gay colors and conspicuous ornaments or ornamentation lavishly, ostentatiously, and tastelessly (gaudy floral prints) (false eloquence, like the prismatic glass, its gaudy colors spreads on ev'ry place—Pope) (another attendant, gaudy with jingling chains and brass buttons, led us along a corridor—Kenneth Roberts) Something is tawdry which is not only gaudy but cheap and sleazy (beneath the lamp her tawdry ribbons glare—Gay) (a fancy... fruitful, yet not wanton, and gay without being tawdry—Cowper) (he saw nothing else; the tawdry scenery, the soiled velvet and flimsy crumpled satin, the reck of vulgarity, never touched his innocent mind—Deland) Something is garish which is distressingly or offensively bright (hide me from day's garish eye—Milton) (for this week he would produce a bunch [of flowers] as garish as a gypsy, all blue and purple and orange, but next week a bunch discreet as a pastel, all rose and gray with a dash of yellow—Sackville-West) Something is flashy which dazzles for a moment but then reveals itself as shallow or vulgar display (Tom Paine was considered for the time as a Tom Fool to him, Paley an old woman, Edmund Burke a flashy sophist—Hazlitt) (the flashy rich boy in public school, buying toadyism—the flashy rich boy in public school, buying toadyism—La Farge) ("what the public wants" is being translated into the flashy, the gadgety, the spectacular—Loewy) Something is meretricious which allures by false or deceitful show (as of worth, value, or brilliancy) (the jewels in the crisped hair, the diadem on the polished brow, are thought meretricious, theatrical, vulgar—Hazlitt) (the false taste, the showy and meretricious element... invading the social life of the period and supplanting the severe elegance, the instinctive grace of the eighteenth century—Binyon) (if a writer's attitude toward his characters and his scene is as vulgar as a showman's, as mercenary as an auctioneer's, vulgar and meretricious will his product for ever remain—Cather)

**Ana** *showy, pretentious, ostentatious: vulgar, *coarse, gross: resplendent, gorgeous (see splendiferous)

**Ant** quiet (in taste or style)—*Con* modest, *chaste, decent, pure

gauge n *standard, criterion, yardstick, touchstone

generate

A colon (:) separates groups of words discriminated. An asterisk (*) indicates place of treatment of each group.
extended in its application and has acquired connotations which have little or nothing to do directly with lineage or heraldic rights but suggest only such outward marks of good birth as elegance of person and of manners and a life of leisure (a gentleman . . . . I'll be sworn thou art; thy tongue, thy face, thy limbs, actions and spirit, do give thee five-fold blazon—Shak.) somebody has said that a king may make a nobleman, but he cannot make a gentleman—Burke (the gentleman may be a drunkard, a gambler, a debauchee . . . . he may be a man of spotless life, able and honest; but he must on no account be a man with broad palms, a workman amongst workmen—Tom Collins) Patrician derives its implications from its historical applications but chiefly from its earliest reference to a Roman citizen who belonged to one of the original families of ancient Rome which, after the growth of the plebeian order, kept power and authority in their own hands. In reference to present-day persons the word suggests a distinguished ancestry, superior culture, and aloofness from what is common or vulgar; it is applied chiefly to descendants of established and influential families when they constitute a social caste, especially one marked by exclusiveness and pride in birth (the merchant-patricians [of Florence], like the nobles of Flanders and Flanry in times gone by, wished to perpetuate their names and glorify their capital not only in the elegance of their mansions but also in churches, parks and public buildings—Brooks) Aristocrat carries fewer suggestions of inbred physical characteristics than gentleman or patrician, but it suggests a sympathy with the point of view common to them. In historical use it commonly implies an opposition to democrat and is applicable to a person who believes in government by superior persons or by the class which includes such persons; in more general use it is commonly applied to a person who by reason of birth, breeding, title, wealth, or outlook is accorded recognition as a member of the highest caste and especially to one who holds himself somewhat aloof from the ordinary forms and observances of social life (two kinds of aristocrats: one that assumes the right to govern without the consent of the people; the other that assumes the privilege of an exclusive private life—Charles Beard) (a genuine aristocrat, he was at home in all walks of life—Smelser & Kirwin) Ant boor —Con lout, clown, churl (see book)

gentleman patronian, aristocrat are comparable when they denote a person of good or noble birth. Gentleman basically implies descent from good family, the right to bear a coat of arms, and social rank just below that of the noble and above that of the yeoman. The term has been widely

often refers to sexual acts involved in a mating and their results in the production of children (the time-honored presumption that a child born to a married woman during coverture was procreated by her husband—JAMA) Unlike the foregoing terms, propagate carries no inherent implication of sexual activity but rather stresses the preserving and increasing of a kind of living being, be it plant, animal, or human, whether by generating, by breeding, or by growing (as from seeds, grafts, cuttings, or bulbs) (the rabbit propagates itself with great rapidity) (from cuttings . . . he propagated what he first named the Tokay but later the Catawba grape—Jenkins) In its extended use propagate implies not only giving rise to something or bringing it into existence but often also a continuation of that existence or the widespread dissemination of the thing that is brought into existence (Oh! does patience beget patience?) said Adrian. "I was not aware it was a propagating virtue"—Meredith (the Rights of Man, rights which the French Revolution had propagated—Barr) Reproduce, like propagate, may be used in reference to any living thing capable of bringing into existence one or more of its kind and is applicable whether the means is sexual or asexual (the tribe was dying out: infant mortality was heavy, and the young couples did not reproduce freely—the life-force seemed low—Cather) (the residents of the urban places probably did not reproduce themselves—Oscar Handlin)

gesticulation *gesture

gesture n Gesture, gesticulation are comparable when meaning an expressive movement or motion of the body or limbs or the use of such a movement or motion. Gesture is the more inclusive term; it may imply any such movement or motion intended to express what words cannot, or to increase the effectiveness or poignancy of words that are being uttered, or to take the place of words when for some reason or other they are unnecessary or impossible (<the right hand of Niobe> is drawing up her daughter to her; and with that instinctive gesture ... is encouraging the child to believe that it can give security—Shelley>) (<he had permitted himself his very first and last gesture in all these days, raising a hard-clenched fist above his head—Conrad>) (<the gesture with which he threw away the cigar-end struck her as very distinguished—Bennett>) Gesticulation, on the other hand, is applicable only when there is implication of unrestrained excitement, or the loss or absence of grace or dignity, or a determined effort to attract attention (<his human figures are sometimes "o'er-infomred" with ... feeling. Their actions have too much gesticulation—Hazlitt>) (<making various savage gesticulations—Livingstone>) (<the nineteenth-century reaction against post-Raphaelite painting. ... the twentieth-century exclusive zeal for purely formal elements in pictures, both reflect our lack of sympathy with gesticulation—the word itself is pejorative—Chandler>)

get 1 Get, obtain, procure, secure, acquire, gain, win are comparable and often interchangeable when they mean to come into possession of. Get is very general in its meaning and simple and familiar in its use. Thus, one may get something by fetching (<get a book from the table>, by extracting (<get gold from ore>, by receiving (<get a present), or as a return (<get interest on a loan>) Obtain is likewise rather general. It may suggest that the thing sought has been long desired or that it has come into possession only after the expenditure of considerable effort or the lapse of considerable time (<the satisfaction obtained by the sentiment of communion with others, of the breaking down of barriers—Dewey>) (<in western New York, where her early education was obtained—Knott>) Procure is likely to suggest planning and contriving over a period of time and the use of unspecified or sometimes questionable means (<the Duma laid claim to full power ... and on March 15 procured the abdication of the frightened and despondent Nicholas II—Ogg & Zink>) (<some gifted spirit on our side procured (probably by larceny) a length of mine fuse—H. G. Wells>) Secure may suggest safe lasting possession or control (<the large income and fortune which a prospering business secures, rather than mine fuse—//. G. Wells>) (<some gifted spirit on our side procured (probably by larceny) a length of mine fuse—H. G. Wells>) Get is very general in its meaning and simple and familiar in its use. Thus, one may get something by fetching (<get a book from the table>, by extracting (<get gold from ore>, by receiving (<get a present), or as a return (<get interest on a loan>) Obtain is likewise rather general. It may suggest that the thing sought has been long desired or that it has come into possession only after the expenditure of considerable effort or the lapse of considerable time (<the satisfaction obtained by the sentiment of communion with others, of the breaking down of barriers—Dewey>) (<in western New York, where her early education was obtained—Knott>) Procure is likely to suggest planning and contriving over a period of time and the use of unspecified or sometimes questionable means (<the Duma laid claim to full power ... and on March 15 procured the abdication of the frightened and despondent Nicholas II—Ogg & Zink>) (<some gifted spirit on our side procured (probably by larceny) a length of mine fuse—H. G. Wells>) Secure may suggest safe lasting possession or control (<the large income and fortune which a prospering business secures for him is of his own making—Hobson>) or it may suggest the gaining of what is hard to come by (as by reason of rarity or competition for possession); thus, one secures, rather than gets or acquires, a rare stamp by offering a higher price than other interested persons will pay (<almost absolute safety against infection could be secured by the simple precaution of using safe, potable water—Heiser>) Acquire may suggest devising acquisition (<the destruction of that ship by a Confederate cruiser, although it had acquired a British registry in order to avoid capture—Knott>) It may also indicate continued, sustained, or cumulative acquisition (<the habit of any virtue, moral or intellectual, cannot be assumed at once, but must be acquired by practice—Grandgent>) Gain often implies competition in acquiring something of value (<if a London merchant, however, can buy at Canton for half an ounce of silver, a commodity which he can afterwards sell at London for an ounce, he gains a hundred percent—Smith>) (<few men are placed in such fortunate circumstances as...>
| ghastly | giant adj | huge, vast, immense, enormous, elephantine, mammoth, gigantic, gigantean, colossal, gargantuian, Her- culean, cyclopean, titan, Brobdingnagian |
| ghastly, grisly, gruesome, macabre, grim, lurid | giddy, dizzy, vertiginous, swimming, dazzled | are comparable when meaning affected by or producing a sensation of being whirled about or around and consequently confused. Giddy and dizzy are often used interchangeably with one another but giddy is sometimes preferred for stressing the mental confusion which results and dizzy for emphasizing the physical quality of the sensation. |
uses much of the connotation implicit in its basic relation to vertigo; it may come close to dizzy in its suggestion of lack of steadfastness and constancy (unconstant they are in all their actions, vertiginous, restless, unapt to resolve of any business—Burton) (his vertiginous, and apparently unconscious, changes of subject make heavy going after a few pages—Corke) or may attribute a dizzying effect to the thing qualified (events occur at vertiginous speed, whole civilizations are summed up in a few words, and long processes are reduced to a paragraph if not to a sentence—Krutch) (the delicious vertiginous sense of human destinies hanging by slender threads—R. W. Brown) or it may stress a confusing effect like that of vertigo (that vertiginousbewilderment which comes to creatures of mere routine when they face the unfamiliar—Cohen) (the reader . . . is inspired with the conviction that of these writers only Austin Dobson, James Russell Lowell, and Miss Godden were really sane, that the rest of them were either actually mendacious or possibly vertiginous—Yale Review) (Swimming is applied especially to the head—brain, or eyes of a person suffering from dizziness; when so used, it suggests the physical sensations of swift, unimpeded, yet uncontrollable movement (my head is swimming) (and slowly by his swimming eyes was seen a lovely female face—Byron) (she yielded, and was borne with swimming brain and airy joy, along the mountainside—Bridges) Dazzled applies to the physical, mental, or spiritual vision when overpowered and confused by or as if by a blinding light; it connotes, therefore, an effect suggestive of dizziness but without the sensation of being about to fall (the sun's rays tapered into a luminous cone . . . a hypnotizing focal point for dazzled eyes—Beebe) (one knew that the sun-dazzled summer world would soon open about one again—Edmund Wilson) (the solicitations of the dazzled swains of Cambria for the honor of the two first dances—Peacock) (dazzled by the prospect of a brilliant future)

**Ana** whirling, reeling (see REEL): confusing, adding, fuddling, muddling (see CONFUSE): bewildering, distracting, mystifying (see PUZZLE vb): frivolous, flighty (see corresponding nouns at LIGHTNESS)

**Gift** 1 Gift, present, gratuity, favor, boon, largess are comparable when they denote something, often of value but not necessarily material, given freely to another for his benefit or pleasure. Gift is the most inclusive term, but it is not interchangeable with some of the others, for apart from the context the term carries no hint of remuneration for something done or received and excludes all suggestions of return (a birthday gift) (a gift to a museum) (gifts to the poor) (I fear the Greeks bearing gifts) (every good gift and every perfect gift is from above—Jas 1:17) Present is ordinarily applied to something tangible which is offered as a compliment or expression of goodwill (she used to define a present, "That it was a gift to a friend of something he wanted or was fond of, and which could not be easily gotten for money"—Swift) (flowers and fruits are always fit presents—Emerson) (little odd presents of game, fruits, perhaps wine—Lamb) Gratitude implies voluntary compensation, usually in money, for some service for which there is no fixed charge or for special attention or service over and beyond what is normally included in a charge (he distributed gratuities so generously that he received more attention than any other guest of the hotel) (pays five or six dollars for his dinner in a smart Mayfair club and then distributes another dollar or so in gratuities—Joseph) Favor applies to something given or granted to another as a token of one's affection, regard, or partiality or as an inducement or concession. The term is often intentionally vague, especially when what is given is not a concrete thing (he said he did not deserve so many favors from his party) (queen's favors might be fatal gifts, but they were much more fatal to reject than to accept—Henry Adams) Concretely the term applies to various small things (as a ribbon, a cockade, or a lady's glove) given to a lover or admirer as a token or to some knickknack or other trifle given to guests (as at a wedding, a dance, or a party). Favor, rather than gift, is used in requests for something that can be had only from the person addressed (ask the favor of a prompt reply) (begging the favor of a copy of his beautiful book—Meredith) Boon applies to any gift or favor either as petitioned for or prayed for as something much desired or needed yet not necessarily regarded as a right (high emperor, upon my feeble knee I beg this boon, with tears not lightly shed—Shak.) (if you mean to please any people, you must give them the boon which they ask—Burke) (I ask justice from you, and no boon—Sheridan) or as given gratuitously and bringing with it such benefits or advantages that it is regarded as a blessing or cause for gratitude (our forefathers have given us the boon of freedom) (the boon of free and unboUGHT justice was a boon for all—I. R. Green) (Corinth was given certain boons, since it was a Julian colony, but Athens. . . . was left to academic decay—Buchan) Largess is a somewhat pompous term for a bountiful gift (as of money or of food and drink) or a liberal gratuity; it usually suggests an ostentatious bestowal (the newly consecrated king bestowed largesses on all the heralds and minstrels) (contrasting his [Anthony's] meager bounty with the largess of Octavius—Buchan) (dependent for her livelihood on the largess of a moody Danish lover—Jean Stafford)

**Ana** *donation, benefaction, contribution, alms

2 Gift, faculty, aptitude, genius, talent, knack, bent, turn are comparable when they mean a special ability or a capacity for a definite kind of activity or achievement. Gift applies not only to an ability but also to a quality; it suggests an origin not easily explainable by natural laws and often implies that the recipient is favored by God, by nature, or by fortune. It is, therefore, precisely applied to an innate ability, capacity, or quality, especially to one not commonly found and not possible of acquirement (a gift of humor) (she has a real gift for arranging flowers—Wharton) (men have always reverenced prodigious inborn gifts, and always will—Eliot) (an artist is the sort of artist he is, because he happens to possess certain gifts—Huxley) Faculty (see also POWER 2) applies to either an innate or acquired ability or capacity; it does not apart from the context impute an extraordinary value or rarity to that power, but it does usually imply distinction or distinctiveness in its quality and skill or facility in its exercise (he had not that faculty of extracting the essence from a heap of statements—Dickens) (she seemed to have lost her faculty of discrimination; her power of easily and graciously keeping everyone in his proper place—Cather) Aptitude usually implies a natural liking and taste for a particular activity or pursuit as well as a native capacity for it and the ability to master its details or technique (there are all sorts of people today who write from all sorts of motives other than a genuine aptitude for writing—Ellis) (at fourteen education should begin to be more or less specialized, according to the tastes and aptitudes of the pupil—Russell) Genius, when it applies to ability or capacity rather than to a person who possesses that ability or capacity, suggests an inborn gift of impressive character or a combination of such gifts. Further than this the implications of the term are various and shifting, for the word is tied up in use with psychological, aesthetic, and critical explanations of the nature of genius; however, the

A colon (:) separates groups of words discriminated. An asterisk (*) indicates place of treatment of each group.
word often retains its original implication of a controlling spirit and may denote an inner driving energy which compels utterance or performance, often of a lofty or transcendent quality (the claim to possess a style must be conceded to many writers—Carlyle is one—who take no care to put listeners at their ease, but rely rather on native force of genius to shock and astound—Quiller-Couch) (in the contemporary novel genius is hard to find, talent is abundant—Brit. Book News) The word is often employed in current English in the sense of gift, usually with a connotation of transcendence or of uniqueness (she made her drawing room a sort of meeting place; she had a genius for it—Woolf) (Mr. G. K. Chesterton has a genius for saying new and surprising things about old subjects—Huxley) In ironic use the connotation of transcendence is especially strong, but that of supreme unawareness is also usually evident (he has a genius for incoherence of remark) (the genius for illogicity of the English people—Inge) Talent comes very close in its meaning to gift when the latter term denotes a native capacity or an innate ability. Talent, however, often carries the implication, derived from the Scriptural parable of the servants’ use of the talents (pieces of money) entrusted them by their master, that the gift is a trust and that its possessor has an obligation to develop it and put it to profitable use (it is quite probable that many . . . who would make the best doctors are too poor to take the course. This involves a deplorable waste of talent—Rus sell) (was he to leave such talents lying idle (and that after chafing for eight years to employ them)—Bello) This basic implication in talent has led inevitably to another implication: that the gift is under the control of its possessor because its proper exercise depends on industry and the acquiring of necessary knowledge and skill. Talent is sometimes opposed to genius in the most exalted sense of that word as a lesser kind of power, capable of development through study and industry, completely under the control of the will, and tending to facile, agreeable, and effective, rather than exalted, performance or utterance (while talent gives the notion of power in a man’s performance, genius gives rather the notion of felicity and perfection in it—Arnold) (to achieve conspicuous mundane success in literature, a certain degree of good fortune is almost more important than genius, or even than talent—Benson) Knock stresses ease and dexterity in performance, though it usually implies an aptitude (she has, certainly, something of a knack at characters—Burne) (Can uncommon knack in Latin verse—Eliot) (improvisation was his knack and forte; he wrote rapidly and much—often an entire novel in a month—Van Doren) Bent usually implies a natural inclination or taste; it often carries the same implications as aptitude and is sometimes preferred in general use because of technical use of aptitude in educational psychology (it doesn’t seem to me that you’ve shown any great bent towards a scholastic life—Archibald Marshall) (the bent thus revealed for precise observation and classification—Babbitt) Turn not only implies a bent but its actual proof in performance and often suggests skill or proficiency (he had a turn for mechanics; had invented a plow in his district, had ordered wheelbarrows from England—Woolf) (must possess . . . artistic sensibility and a turn for clear thinking—Clive Bell) Ana endowment, dowry (see corresponding verbs at Dowler): *power, faculty, function: *acquirement, attainment, accomplishment, acquisition gigantic, gigantean *huge, vast, immense, enormous, elephantine, mammoth, giant, colossal, gargantuan, Herculean, cyclopean, titanic, Brobdingnagian Ana prodigious, stupendous, tremendous, *monstrous, monumental gingery fiery, peppery, *spirited, high-spirited, mettle- some, spunky gird vb *surround, envelop, encircle, circle, encompass, compass, hem, girdle, ring Ana *enclose, envelop, wall: confine, circumscribe, *limit gird vb sneer, flout, * scoff, jeer, gibe, fleer Ana deride, mock, taunt, twist, rally, * ridicule girdle vb *surround, envelop, encircle, circle, encompass, compass, hem, gird, ring Ana see those at GIRD (to surround) gist *substance, purport, burden, core, pith Ana *center, heart, nucleus: import, significance (see IMPORTANCE): theme, topic, *subject give, present, donate, bestow, confer, afford are comparable when meaning to convey something or make something over or available to another as his possession. Give is the general term meaning to pass over, deliver, or transmit something which becomes the receiver’s to own, to use, to enjoy, or to dispose of (it is more blessed to give than to receive—Acts 20:35) (give my love to your mother and sisters—Keats) Present is more formal or ceremonious (on Saturday Colonel Bellingham is going to address the lads of the Brigade and present them with six drums—Mackenzie) (pray, present my respects to Lady Scott—Byron) Donate usually implies publicity attending the giving or a public cause or charity as the recipient of the gift (donate a piano to an orphanage) Bestow implies the settling of something on one as a gift (large gifts have I bestowed on learned clerks—Shak.) (what nature wants commodious gold bestows—Pope) To confer is to give graciously or as a favor or honor (the Queen confers her titles and degrees—Pope) To afford is to give or bestow especially as a natural or legitimate consequence of the character of what gives (this fine day affords us some hope—Cowper) (do the laws of his country afford him a remedy?—John Marshall) Ana award, accord, vouchsafe, *grant, concede: assign, * allot, apportion, allocate: *distribute, dispense, deal, dole glacial arctic, icy, gelid, frigid, freezing, frosty, *cold, cool, chilly glad, happy, cheerful, lightedhearted, joyful, joyous are comparable when meaning characterized by or expressing the mood, temper, or state of mind of a person who is pleased or delighted with something or with things in general. Glad may be used in opposition to sorry to convey polite conventional expressions of pleasure or gratification (I am glad to hear of your recovery) (I shall be glad to have the opportunity to meet you) It may also be used in opposition to sad, and then connotes actual delight and a lift of spirits and sometimes elation (wine that maketh glad the heart of man—Ps 104:15) (glad did I live and gladly die—Stevenson) (a child’s kiss set on thy sighing lips shall make thee glad—E. B. Browning) (his entire saintly life was glad with an invincible gaiety of spirit—H. O. Taylor) Happy may also be used in polite conventional phrases in which its content can hardly be distinguished from that of glad. In more meaningful use, however, it distinctively implies a sense of contentment and well-being or a realization either of one’s good fortune or of the fulfillment of one’s desires (he will never be happy until he finds work which utilizes all his talents) (with the tension of an unachieved task no longer felt . . . I can say with truth that the last phase of my life has been the happiest—Ellis) (is my girl happy, that I thought hard to leave, and has she tired of weeping as she lies down at eve?—Housman) Cheerful suggests a strong and, often, a
spontaneous flow of good spirits either as a result of feeling glad or happy or as a result of an equable disposition or of a naturally sanguine temperament (suicidal thoughts . . . could not enter the cheerful, sanguine, courageous scheme of life, which was in part natural to her and in part slowly built up—Ellis) (time went by as we drank and talked in a world that was rosy, cheerful, and full of fellowship and peace on earth—Hammett) lighthearted stresses freedom from care, worry, and discontent. Since it also implies high spirits, vivacity, or gaiety, it commonly suggests in addition youth or an easygoing and somewhat volatile temperament (he-whistles as he goes, lighthearted, wretched, cold and yet cheerful—Cowper) (why, man, I was lighthearted in my prime, I am lighthearted now; what would you have?—Browning) Joyful and joyous imply keen gladness or happiness with resulting elation; they are often used as though they were equivalent terms. However, joyful usually suggests a mood or an emotional reaction to an event or situation, and it implies rejoicing (in the day of prosperity be joyful—Eccles 7:14) (and joyful nations join in leagues of peace—Pope) (a joyful countenance) (a bright and happy Christian, a romping optimist who laughed away sin and doubt, a joyful puritan—Sinclair Lewis) Joyous, on the other hand, applies more to something which by its nature or character is filled with joy or is a cause of joy (all that ever was joyous, and clear, and fresh, thy music doth surpass—Shelley) (the happy and joyous temper, which characterizes a fresh and confident faith—Inge) (that joyous serenity we think belongs to a better world than this—Sir Winston Churchill)

gnaw vb *bite, champ, gnash

A**na** fret, *abrade: *worry, annoy

go vb 1 Go, leave, depart, quit, withdraw, retire are comparable when they mean to move out of or away from the place where one is. Of these terms, go is the most general and the least explicit in its implications; it is often used merely as the opposite of come (he came here yesterday and went this morning before I was up) <go, baffled coward, lest I run upon thee—Milton> (he would not let her go before he had obtained her promise to sell him the property) <the men go and cut bamboos in the jungle and bring them to the beach—Frazier> Leave (see also RELINQUISH, LET 2) so strongly implies a separation from someone or something that the verb in this sense is more often used transitively than intransitively; in its intransitive use the term commonly implies a more formal or a more conspicuous act than go implies and often requires a statement of the means of going (he plans to leave by the noon train) <we shall be sorry to have him leave—Archipenko left Russia to enroll at the Ecole des Beaux Arts in Paris—Current Biog.> Do not leave the place until I return <her servants always leave her after a few days in her employ> Depart (see also SWERVE) is rarely transitive except in a few idiomatic phrases <depart this life> As an intransitive verb it not only carries a stronger implication of separation from a person, place, or status than leave carries, but it is somewhat more formal, especially when it is used as the opposite of arrive <depart on a trip to Europe> (<"You will not leave me yet, Richard?"

. . . . He had no thought of departing—Meredith> <a goddess of gone days, departed long ago—Millay> Quit (see also STOP 1, BEHAVE 1), like leave, is more often transitive than intransitive and carries a strong implication of separation from a person or thing. Unlike leave, it stresses a getting free or being rid of what holds, entangles, or burdens, [the distinction [knighthood] . . . had given him a disgust to his business, and to his residence in a small market town; and, quitting them both, he had removed with his family—Austen> <he quitted London to take refuge among the mountains—Meredith> <he quitted Cambridge in January 1643, before being formally ejected by the Puritans—Bush> Withdraw

stresses more than quit a deliberate removal for reasons that seem justifiable to the person concerned or acceptable to the reader; the term therefore seldom carries (as quit often carries) a suggestion of cowardice, weakness, or instability; thus, one quits a trying job, but one withdraws from an insecure position. Frequently withdraw implies such a motive as courtesy, a sense of propriety, or a grievance (the women withdrew from the room when the men were ready to discuss business) <the visitors withdrew when the doctor entered> <the perfect lyric is a poem from which the author has withdrawn once he has set it in motion—Day Lewis> A hermit withdrawn from a wicked world—Conrad> Retire is often used interchangeably with withdraw, but it is especially appropriate when the removal also implies a renunciation, a permanent relinquishing (as of a position), a retreat, or a recession <retire from the world into a monastery> <when he dies or retires, a new manager must be found—Shaw> (after the Captain's terrible fall . . . which broke him so that he could no longer build railroads, he and his wife retired to the house on the hill—Cather) Often retire carries the specific sense of to withdraw to one's bedroom and to one's bed for the night <retire early>

A**na** *escape, decamp, abscond, flee, fly

A**nt** come —Con arrive (see COME): *stay, remain, abide

2 *resort, refer, apply, turn

goddess ungodly, *irreligious, unreligious, nonreligious

A**nt** atheistic, agnostic, infidel (see corresponding nouns at INDEED)

good adj Good, right are comparable when they mean in accordance with one's standard of what is satisfactory. Good (as opposed to bad) implies full approval or commendation of someone or something in the respect under consideration (as excellence of workmanship, excellence of condition, beneficial properties, competence, agreeableness, purity, or freshness) <and God saw every thing that he had made, and, behold, it was very good—Gen 1:31> <good children> <good news> <a good neighbor> <they are very good men, the monks, very pious men—Joyce>

Good (as opposed to poor) does not imply hearty approval, but it does not suggest dissatisfaction; it implies that the person or thing so described measures up to a point which is regarded as satisfactory or possesses the qualities neces-
sary to a thing of its kind (a good crop) (good soil) (good, but not excellent, work) (the business for the past year was good) (a good return on an investment) (a good play) (the more general history... is less good). Partly, that is because the sources... are too narrow for the weight of the conclusions—Laski (between good workmanship and design and that touch of rareness which makes not merely good but fine and lovely—Alexander). Often the difference in meaning between these two senses of good is apparent only in the inflection or through the medium of a context. Right (see also correct) often implies that the thing so described is fitting, proper, or appropriate with respect to the circumstances; thus, a book one knows to be good may not be the right book to give to a person who is unable to understand it; the right light for a picture may be quite different from a good light for reading (she always does the right thing at the right time) (the scene in Julius Caesar is right because the object of our attention is not the speech of Antony... but the effect of his speech upon the mob—T. S. Eliot). Right may also imply the absence of anything wrong in the person or thing so described (God's in his heaven—T. S. Eliot) (Browning) (marry when she has found the right chap—Reid). Anti bad; poor

---

good-looking comely, pretty, bonny, fair, beau- tuous, pulchritudinous, handsome, beautiful, lovely

---

good-natured amiable, obliging, complaisant

---

goodness, virtue, rectitude, morality are comparable and very general terms denoting moral excellence. Goodness is the broadest of these terms; it suggests an excellence so deeply established that it is often felt as inherent or innate rather than acquired or instilled. Of all these terms it is the only one applied to God (the Lord God, merciful and gracious, long-suffering, and abundant in goodness and truth—Exod 34:6). When applied to persons it usually suggests such appealing qualities as kindness, generosity, helpfulness, and deep sympathy (the need I have of thee thine own goodness hath made—Shak) (she has more goodness in her little finger than he has in his whole body—Swift) (he taught that evil was a transient thing, goodness eternal—Samuel). Virtue (see also excellence), though often coupled with goodness as its close synonym, is distinguishable as suggesting acquired rather than innate moral excellence and, often, a greater consciousness of it as a possession; usually the term implies either close conformity to the moral law or persistent choice of good and persistent rejection of evil (virtue is its own reward) (virtue may be assailed, but never hurt, surprised by unjust force, but not enthrall'd—Milton) (the highest proof of virtue is to possess boundless power without abusing it—Macauley) (virtue is not to be considered in the light of mere innocence, or abstaining from harm, but as the exertion of our faculties in doing good—Bp. Butler). Since virtue often specifically implies chastity or fidelity in marriage, rectitude is frequently employed in its place when moral excellence acquired through obedience to the moral law and persistently this is implied. But rectitude differs from virtue in often having reference to motives, intentions, and habits and not merely to character, and sometimes also in placing greater stress on such stern qualities as uprightness, integrity, and probity (no one can question the rectitude of his purpose) (for various reasons all having to do with the delicate rectitude of his nature, Roderick Anthony... was frightened—Conrad) (society is, after all, a recreation and a delight, and ought to be sought for with pleasurable motives, not with a consciousness of rectitude and justice—Benson). All of the preceding words refer directly or indirectly to the moral excellence involved in character. Morality may come close to virtue and rectitude in denoting a quality of character (the will to be good and to do good—that is the simplest definition of what the world has always meant by morality—Read). In this sense the term often specifically suggests a moral excellence that arises from fidelity to ethical principles as distinguished from one that arises from obedience to the divine law or the moral laws enforced by religious teachings (evil must come upon us headlong, if morality tries to get on without religion—Tennyson). But morality, unlike the other terms, commonly denotes a code of conduct (ethical problems involved in the new morality) (a highly erotic people with a strict morality, which was always violated, a pious people who sinned with passion—Ferguson) (what do we mean by morality? Generally we mean those rules of conduct that appeal to people as generally conducive to a decent human life—Cohen). From this sense derive applications, on the one hand, to behavior, whether morally excellent in terms of ordinary ethical standards or quite the reverse, that accords with such a code (his behavior constituted a new low in political morality) (in Christian love and forgiveness lay some reversal of Saxon morality, for instance of the duty of revenge—H. O. Taylor) and, on the other hand, to the propriety of behavior as weighed by such a code (the point at issue was the morality of Wise's studiously ambiguous use of the term "a few copies" in connection with the issue of... a facsimile edition—Altick) (our chief failure in dealing with the Communist revolution in China has been to underestimate the vigor of Chinese moral sentiment... and to pay too little attention to the morality of our own position in the eyes of the Chinese—Atlantic Monthly).

to the poor—but, after all, we can't let our parents

| gourmand | glutton, gastronome, bon vivant, *epicure, gourmet |
| govern, rule | are comparable when they mean to exercise
govern, rule | power or authority in controlling or directing another or others, often specifically those persons who comprise a state or nation. Govern may imply power, whether despotic or constitutional, or authority, whether assumed by force, acquired by inheritance or through election, or granted by due processes of law, but it usually connotes as its end the keeping of the one or ones directed or controlled in a straight course or in smooth operation, where perils are avoided and the good of the individual or of the whole is achieved (parents who cannot govern their children),
govern one's emotions | every prince should govern as he would desire to be governed if he were a subject—

| Ana | *conduct, direct, control, manage: restrain, curb, inhibit |
| Grant | grasping, clutches, *take, seize, snatch |
| grace | *mercy, clemency, lenity, charity |
| grace | kindness, kindness, benignity, benignancy (see corresponding adjectives at kind): tenderness, compassionateness, responsiveness (see corresponding adjectives at tender): indulgence, forbearance, leniency (see under forbearing) |
| Loveliness, dignity | lovely, most beautiful or beauty, beauty, fairness, comeliness (see corresponding adjectives at beautiful): suppleness, liveness, lissomeness, lissomeness (see corresponding adjectives at supplie): attractiveness, alluringness or allurement, charmingness or charm (see corresponding adjectives under attract) |
| graciously, cordially, affably, genially, sociably | are used to describe persons or their words or acts who or which are标记edly pleasant and easy in social intercourse. Gracious implies kindliness and courtesy especially to inferiors. When it carries the latter implication, it more often suggests kindly consideration than condescension (gracious to everyone, but known to a very few—Cather) | heartened by her gracious reception of a nervous bow—Shaw |
| Cordial stresses warmth and heartiness (a cordial welcome) | (a cordial handclasp) |
| they gave us a cordial reception, and a hearty supper—Melville | Affable implies approachability and readiness to talk in the person conversed with or addressed; when applied to a social superior, it sometimes connotes condescending familiarity but more often a gracious willingness to be friendly (I don't find . . . that his wealth has made him arrogant and inaccessible; on the contrary, he takes great pains to appear affable and gracious—Smollett) | his father was an excellent man . . . his son will be just like him—just as affable to the poor—Austen |
| easy of approach and affable in conversation. They seldom put on airs—Maugham | Genial sometimes emphasizes cheerfulness and even joviality. Often, however, it stresses qualities that make for good cheer among companions (as warm human sympathy and a fine sense of humor) |
| A genus like for the companionship of others and readiness to engage in social intercourse even with strangers or inferiors | was genial and sociable, approachable at all times and fond of social intercourse—Reeves |
| Ana | obliging, complaisant, amiable, benign, kindly, *kind: courteous, courtly, chivalrous (see civil) |
| Ant | ungracious—Con churlish, boorish (see under boor): brusque, curt, crusty, blunt, gruff (see bluff): surly, crabbed, *sullen |
| grade | class, grade, rank, rate, graduate |
| gradation | gradation, shade, nuance are comparable when they mean the difference or variation between two things that are nearly alike. Gradation in the singular implies a small difference or variation of this kind, but the term is used more frequently in the plural, so that it usually implies the successive steps by which a thing passes from one type or kind into something else of a different type or kind; thus, if we take the primary colors of the spectrum as blue, yellow, and red, the gradations between these are not the colors green, orange, purple, which are clearly seen, but all of the intermediate colors by which blue gradually passes into green, and green into yellow, and yellow into orange, and so on; therefore the word is often modified by some adjective (as sensible, apparent, perceptible, or imperceptible) (the gradations between prose and verse are fine but perceptible) (by insensible gradations she becomes slaty) (by imperceptible gradations her love was transformed into pity) Shade implies a minute or barely perceptible degree of difference (as in thought, belief, meaning, or position) (every shade of religious and political opinion—Macaulay) |
| Ana | analogous words |
| Ant | antonyms |
| Con | contrasted words | See also explanatory notes facing page 1
grade vb *class, rank, rate, graduate, graduate

grad...
concession ought to be—Burke> (as an instrument of mind-training, and even of liberal education, it [science] seems to me to have a far higher value than is usually conceded to it by humanists—Inge> (even his harshest critics concede him a rocklike integrity—Time) One vouchsafes something prayed for, begged for, or expected as a courtesy, when one grants it to a person inferior in dignity or station. The word is often found in supplications where it implies humility in the suppliant <vouchsafe, O Lord: to keep us this day without sin—Book of Common Prayer> Often it is ironical and then usually suggests absurd condescension <he vouchsafed no reply to our question> (the occasional answers that Stalin used to vouchsafe to inquiries from American correspondents—Davis> One accords to another something admittedly his due or in keeping with his character or status <he treated bishops with the superficial deference that a sergeant major accords to a junior subaltern—Mackenzie> (children . . . will readily accord to others what others accord to them—Russell> One awards something that is deserved or merited; the word usually implies determination by legal adjudication or by judges in a contest or competition <the plaintiff was awarded heavy damages> (awarded a prize for the best story) <his victory was duly acclaimed by Senate and People; he was given the title of Emperor and awarded a triumph—Buchan> An awards something that is deserved or merited; the word usually implies determination by legal adjudication or by judges in a contest or competition <the plaintiff was awarded heavy damages> (awarded a prize for the best story) <his victory was duly acclaimed by Senate and People; he was given the title of Emperor and awarded a triumph—Buchan> 2 Grant, concede, allow are comparable when they mean One accords to another something admittedly his due or in keeping with his character or status <he treated bishops with the superficial deference that a sergeant major accords to a junior subaltern—Mackenzie> (children . . . will readily accord to others what others accord to them—Russell> One awards something that is deserved or merited; the word usually implies determination by legal adjudication or by judges in a contest or competition <the plaintiff was awarded heavy damages> (awarded a prize for the best story) <his victory was duly acclaimed by Senate and People; he was given the title of Emperor and awarded a triumph—Buchan>

graph

vrb n (chart, map) (see under chart vb) n chart, map (see under chart n) see those at graph n

graphic, vivid, picturesque, pictorial are comparable when they mean having or manifesting a quality or character that produces a strong, clear impression, especially a visual impression. All of these words apply particularly but not exclusively to works of art and especially of literature. Something graphic has the power to evoke a strikingly clear-cut, lifelike picture; the term categorizes such arts as painting, drawing, engraving, and etching (the graphic arts), the object of each of which is to present a picture, but it is also meaningfully applied to a representation of things in words <a graphic description of the face of a young Hindu at the sight of castor oil—Darwin> (it is also one of the best-written works on the subject, enlivened by a keen sense of humor and a witty and graphic style—Ullmann> Something vivid is so vigorously alive that it is felt, seen, heard, or otherwise apprehended with a sense of its intense reality. The term may apply to what actually exists and impresses itself with such sharp force on the imagination that the memory retains the sight, sound, or other impression <a vivid sensation of fear> (figures so vivid that they seem to breathe and speak before us—L. P. Smith> (how sights fix themselves upon the mind! For example, the vivid green moss—Woold> The term may also apply to a mental state or process of which one is oneself intensely aware <Ripon awoke . . . to the vivid consciousness of hunger—Meredith> (my sense of right or wrong—of individual responsibility—was more vivid than at any other period of my life—Hudson> (those for whom the belief in immortality is most vivid—Krutch> or which defines its content clearly and sharply <a man of wide and vivid interests—Russell> (a vivid realization of approaching danger) <all three had kept a vivid . . . conception of the fate of the nation—harrton> Frequently the term applies to whatever represents or one's imaginative conceptions (as a picture, or a play, or a story) or to matters (as style, colors, language, or situations) which are involved in such a representation; then the implication is of a power, either in the representation itself or in the means of representation, to evoke clearly defined pictures and to give a strong sense of their distinct quality and of their living force <moving pictures are only less vivid than reflections from a mirror—Justice Holmes> (in his odes, with their thunder of place-names, he [Horace] makes vivid the territorial immensity of the empire—Buchan> Something picturesque has, in general, the qualities or the character which one believes essential to a striking or effective picture. The term is applicable to a place, a person, or a building or other construction <a picturesque costume> (Scott's Meg Merrilies is a picturesque character) <a picturesque ruin> as well as to a work of graphic, literary, or plastic art <a picturesque landscape> <picturesque details> and to a style or manner (as in writing or painting) the picturesque force of his style—Hawthorne> and it carries in every use an implication that the thing has been observed and judged with regard for its form, color, atmosphere, striking or unfamiliar detail, or sharp contrasts rather than for qualities which are not perceptible to the eye or that do not draw the eye because they are lacking in distinctness and charm. Sometimes picturesque specifically implies a kind of wild, rugged beauty associated with untouched or undiscovered nature or with things being reclaimed by nature <wide prospects of startling beauty, rugged mountains, steep gorges, great falls of water—all the things that are supposed to be picturesque—Benson> (a venerable family mansion, in a highly picturesque state of semidilapidation—Peacock> In still other contexts the term implies a charm arising rather from remoteness, strangeness, quaintness, informality, or diversity <though the upper part of Durnover was mainly composed of a curious congeries of barns and farmsteads, there was a less picturesque side to the parish—Hardy> (the Square is rather picturesque, but it's such a poor, poor little thing!—Bennett> (the most picturesque Mediterranean craft, with colored sails and lazy evolutions—Brownell> Something pictorial presents or aims to present a vivid picture; thus, the pictorial arts are the same as the graphic arts, but the emphasis is upon the objective rather than upon the medium; a pictorial style of poetry uses words as though they were
colors or pigments by which a vivid representation is produced <she has evidently been very anxious to maintain the tradition of picturesqueness in biography that Strachey founded, and in many places is more than picturesque, is in fact pictorial—Times Lit. Sup.> he made pictorial drama out of the most commonplace intimacies of French bourgeois life—Soby>

Ana lucid, perspicuous, *clear: clear-cut, *incisive: telling, convincing, compelling, cogent (see VALID)
grapple vb *wrestle, tussle, scuffle
Ana battle, fight, *contend: vie, compete (see RIVAL): oppose, combat, *resist
grasp vb clutch, grab, seize, *take, snatch
Ana *catch, capture: apprehend, *arrest: apprehend, comprehend
grasp n *hold, grip, clutch
Ana control, *power, sway: comprehension, understanding, appreciation (see corresponding verbs at UNDERSTAND)
grasping greedy, avaricious, acquisitive, *covetous
Ana rapacious, ravening, ravenous (see VORACIOUS): extorting or extortionate (see corresponding verb at EDUCATE)
grate vb *scrape, scratch, rasp, grind
Ana *abrade, chafe, gall: harass, annoy, harry (see WORRY): offend, outrage: exasperate, *irritate
grateful 1 Grateful, thankful both mean feeling or expressing one's gratitude. Grateful is more commonly employed to express a proper sense of favors received from another person or other persons <a grateful child> <a grateful recipient of charity> <the Queen herself, grateful to Prince Gérard for service done—Tennyson> Thankful is often employed by preference to express one's acknowledgment of divine favor or of what is vaguely felt to be providential <for what we are about to receive make us truly thankful> <it was really the Lord's Day, for he made his creatures happy in it, and their hearts were thankful—Landor> (I am endlessly thankful that I was among the last persons to see the original Rheims intact—Ellis)
Ana appreciating or appreciative, valuing, prizing, cherishing (see corresponding verbs at APPRECIATE): gratified, pleased, delighted (see PLEASE): satisfied, contented (see under SATISFY)
Ant ungrateful
2 grateful, gratifying, *pleasant, pleasing, welcome
Ana comforting, consoling, solacing (see COMFORT vb): refreshing, restoring or restorative, renewing, rejuvenating (see corresponding verbs at RENEW): delicious, *delightful, delectable
Ana condescending —Con distasteful, abhorrent, *repugnant, repellent
gratify *please, delight, rejoice, gladden, tickle, regale
Ana content, *satisfy: indulge, humor, pamper
Ant anger: offend, affront (by inattention): disappoint (desires, hopes)
gratifying grateful, agreeable, pleasing, welcome, *pleasant
Ana satisfying, contenting (see SATISFY): delighting, rejoicing, gladdening, regaling (see PLEASE)
Con distasteful, obnoxious, invidious, repellent, *repugnant: offensive, revolting
gratuitous *supererogatory, uncalled-for, wanton
Ana *voluntary, willing: unrecompensed, unremunerated (see corresponding affirmative verbs at PAY): unprompted, unexecuted (see affirmative verbs at PROVOKE): unjustified, unwarranted (see affirmative verbs at JUSTIFY)
gratuity *gift, largess, boon, favor, present
grave adj solemn, somber, sedate, sober, *serious, earnest, staid

Ana austere, stern, ascetic, *severe: saturnine, dour (see SULLEN)
Ant gay —Con light, light-minded, frivolous, light, flippant, volatile (see corresponding nouns at LIGHTNESS): *vain, idle, otiose, nugatory, empty, hollow
graze vb pasture, *feed, nourish
graze vb *brush, glance, shave, skim
Ana touch, contact (see corresponding nouns at CONTACT): *injure, hurt, harm: *damage, disfigure: wound, bruise, contuse (see corresponding nouns at WOUND)
grease vb lubricate, anoint, *oil, cream
great *large, big
Ana enormous, immense, *huge, mammoth: tremendous, prodigious, stupendous, monumental, *monstrous: eminent, illustrious, renowned (see FAMOUS): *supreme, superlative, surpassing, transcendent
Ana little —Con *small, diminutive: *petty, paltry, puny, trivial, trifling, measly
greatly *largely, mostly, chiefly, mainly, principally, generally
greed *cupidity, rapacity, avarice
Ana greediness, covetousness, avariciousness, acquisitiveness (see corresponding adjectives at COVETOUS): voraciousness, ravenousness, rapacity, glutonousness or gluttony (see corresponding adjectives at VORACIOUS)
Con prodigality, lavishness, exuberance (see corresponding adjectives at PROFUSE): bountifulness, bounteousness, openhandedness, munificence, generosity or generosity, liberality (see corresponding adjectives at LIBERAL)
gredy *covetous, acquisitive, grasping, avaricious
Ana rapacious, ravening, ravenous, *voracious, glutonous: *stingy, parsimonious, miserly, close, closefisted
Con bountiful, bounteous, openhanded, generous, *liberal, munificent: prodigal, lavish, exuberant, *profuse
green adj callow, raw, crude, *rude, rough, uncouth
Ana experienced: seasoned —Con grown-up, ripe, matured, *mature: trained, instructed, educated (see TEACH): proficient, skilled, skillful
greet salute, hail, *address, accost
greeting, salutation, salute denote the ceremonial words or acts of one who meets, welcomes, or formally addresses another. Greeting is the ordinary term which carries no suggestion of formality and no implication of inferiority in the one who greets or of superiority in the one who is greeted. On the contrary, the term usually suggests friendliness and goodwill or lack of concern for social or official inequalities <O, to what purpose dost thou hoard thy words, that thou return'st no greeting to thy friends?—Shak.> why meet we on the bridge of Time to 'change one greeting and to part?—?.
Salutation applies to a more or less formal phrase, gesture, or ceremonial act whereby one greets another; specifically it applies to such phrases as the conventional "How do you do" or the familial "Hello," or to the words of a letter with which the writer first directly addresses his correspondent, or to such acts as a kiss, an embrace, or a bow. Salute is the only one of these words that applies only to gestures determined by convention or to ceremonial acts: though it seldom applies to a speech, it may be used when to the gesture or act a word or two is added <waved a salute to the friends awaiting his arrival> <the presidential salute of twenty-one guns> <the officer returned his subordinate's salute> <Sir Austin bent forward, and put his lips to her forehead. Carola received the salute with the stolidity of a naughty doll—Meredith>
gregarious *social, cooperative, convivial, companionable, hospitable
Ant solitary, lonely, *unfriendly, unapproachable, aloof, unfriendly, antagony
grim 1 Grim, implacable, relentless, unrelenting, merciless

Ana mourning, grieving, sorrowing (see GRIEVE): lamenting or lamentation, bewailing, bemoaning, deploiring (see corresponding verbs at DEPLORE)

Con comforting or comfort, solacing or solace, consolation (see corresponding verbs at COMFORT)

grievance wrong, *injustice, injury

Ana hardship, rigor (see DIFFICULTY): *trial, tribulation, affliction, cross

grieve, mourn, sorrow mean to feel or express one's sorrow or grief. Grieve implies actual mental suffering, whether it is shown outwardly or not; the term often also connotes the concentration of one's mind on one's loss, trouble, or cause of distress (after so many years, she still grieves for her dead child) <he grieved, like an honest lad, to see his comrade left to face calamy alone—Meredith>

<my days are passed in work, lest I should grieve for her, and undo habits used to earn her praise—Lowell> Mourn may or may not imply as much sincerity as grieve usually implies, but it does suggest a specific cause (as the death of a relative, friend, sovereign, or national hero) and carries a much stronger implication of the outward expression of grief (as in weeping, lamenting, or the wearing of black garments) <we wept after her hearse, and yet we mourn—Shak.> <fix a period of national mourning for a dead sovereign> <grieve for an hour, perhaps, then forget—Shak.>

<when the true scholar gets thoroughly to grasp a character or an incapacity for yielding or making concessions, and, in this sense, it is applicable not only to persons but to things (when the true scholar gets thoroughly to work, his logic is remorseless, his art is implacable—Henry Adams)>

Relentless or unrelenting differ mainly in that the former suggests a character and the latter a mood governing action; both imply an absence of pity or of any feeling that would cause one to relent and to restrain through compassion the fury or violence of one's rage, hatred, hostility, or vengeance <relentless critics> <woe to thee, rash and unrelenting chief!—Byron>

Both terms often carry so strong an implication of indefinite duration or of unremitting activity that they are frequently used to describe something which promises not the slightest abatement in severity, violence, or intensity as long as life or strength lasts <relentless pursuit> <the relentless vigilance of the secret service men> <the unrelenting fury of a storm> (with unwearied, unscrupulous and unrelenting ambition—Macaulay>

<everywhere I went in town, the people knew about them, and said nothing . . . I found this final, closed, relentless silence everywhere—Wolfe>

Merciless differs from relentless and unrelenting mainly in stressing an innate capacity for inflicting cruelty without qualms or an unparalleled fierceness or savagery; otherwise it carries much the same implications <a merciless whipping> <harder than any man could be—quite merciless—Cloete>

Ana inexcusable, obdurate, adamantly, *inflexible: inevitable, *certain: *fierce, ferocious, cruel, fell: malignant, malevolent (see MALICIOUS)

Ant lenient

2 *ghastly, grisly, gruesomely, macabre, lurid

Con benign, benignant, kindly, *kind

grime vb *soil, dirty, sully, tarnish, foul, befoul, smirch, besmirch, begrime

Ana pollute, defile (see CONTAMINATE)

grin vb *smile, smirk, simper

Con scowl, *frown, lower, lower, gloom

Ana *smirk, smirk, simper (see under SMILE vb)

grind vb *scrape, scratch, grate, rasp

Ana *abrade: sharpen (see corresponding adjective at SHARP): *press, bear, squeeze: gnash, gnaw (see BITE)

grind n drudgery, toil, travail, labor, *work

Ana pains, torture, exertion, *effort

grip n *hold, grasp, clutch

Ana tenaciously, toughness, stoutness (see corresponding adjectives at STRONG): *power, force: duress, coercion, restraint, constraint (see FORCE)

grizzly *ghastly, gruesomely, macabre, grim, lurid

Ana horrific, *terrifying, horrendous, horrid: uncanny, eerie, *weird

ground n 1 *base, basis, foundation, groundwork
Ana *background, backdrop
2 *reason, argument, proof
Ana *evidence, testimony: determinant, *cause, antecedent: demonstration, proof, trial, test (see under PROVE)
3 In plural form grounds *deposit, precipitate, sediment, dregs, lees

ground vb *base, found, bottom, stay, rest
Ana establish, fix, settle, *set: *implant: sustain, *support, buttress

groundless *baseless, unfounded, unwarranted
Ana unsuported, unsupported (see corresponding affirmative verbs at SUPPORT)
groundwork foundation, basis, ground, *base
Ant superstructure
group n Group, cluster, bunch, parcel, lot mean a collection or assemblage of persons or of things. Group implies some unifying relationship, however tenuous (as a similarity of activity, of purpose, or of nature), and ordinarily a degree of physical closeness (a group waiting for the bus) (the group of workers unloading the cargo) (a group of patriots) (a group of soldiers in the picture) (man can only make progress in cooperative groups—Bagchi) (a group of statues in the museum) (an ethnic group) Cluster basically refers to a group of things (as fruits or flowers) growing closely together (a cluster of grapes) (climbing roses producing clusters of flowers) In extended use the term may be applied to persons or things that form distinguishable groups and especially smaller groups within larger masses (the people at the reception gathered in clusters) (clusters of small yachts in the harbor) (cataloging the clusters of stars) (Clem Henry’s house was in a cluster of Negro cabins below Arch’s big house—Caldwell) Bunch (see also BUNDLE) often replaces cluster in referring to natural groups of certain edible fruits (as grapes or bananas). In its extended uses it implies a natural or homogeneous association of like persons or things and carries a weaker implication of a common origin or point of growth than cluster usually does (Claire is by far the best swimmer of the bunch) (a bunch of keys) (girls with bunches of streamers which they flicked in your face as you passed—Bennett) (a piece about a bunch of hillbillies in the South, each one almost precisely as crazy and lovable as the next—Gibbs) Parcel and lot refer to a separate or detached collection of persons or things. Parcel in this sense (see also PART, BUNDLE) usually carries some implication of disapproval of the thing so grouped (a parcel of lies) (became merely a . . . parcel of tricks—Binyon) (lessons to a parcel of young girls thumping out scales with their thick fingers—Galsworthy) (a parcel of giddy young kids—Mark Twain)
Lot applies to persons or things that are associated or should for one reason or another be thought of or treated as a whole (the auctioneer sold the books in lots) (the men in this battalion are an interesting lot) (the future generation of scientists will be a sorry lot if the best teachers leave the academic circles—Rabid) (till you have read a good lot of the Fathers—Keble) (I could ignore the fuzzy doings on the screen, knowing that if you have slept through one you’ve slept through the lot—Malcolm) When the plural is used, the idea of grouping is lost or obscured and the implication of numbers or quantity increases (I have lots of time for that) (there were lots and lots of children there)
Ana *company, party, band, troop, troupe: *set, circle, coterie, clique: *crowd, mob, horde
grovel *wallow, welter
Ana *fawn, cringe, cower, toady, truckle: crawl, *creep:

A colon (:) separates groups of words discriminated. An asterisk (*) indicates place of treatment of each group.
meaning devoted exclusively to clocks, watches, and the telling of time...a museum has a virtual guarantor of popularity—Kirby} modern men have the additional surety of Christ the mediator—Bush Bond implies documentary proof of one's acceptance of an obligation and a legally binding promise to repay the holder of that document a sum of money due him on one's own account or in case of the default of another for whom one serves as surety. Bond, therefore, is used either of the document which is given as a pledge (government bonds) or guide (as proof of one's suretyship) (his word is as good as his bond) or for the person or corporation that serves as a legally bound surety (go bond for another) (the King of England shall be bond for him—Peyps) Bail implies responsibility for the sure reappearance, at the time prescribed by the court, of a prisoner who has been released from jail pending his trial. The term is applicable to the security given and forfeitable if the prisoner does not return (the court asked $5000 as bail) (the prisoner was not released because the bail was not forthcoming) or to the person serving as surety and providing the security (sirrah, call in my sons to be my bail—Shak.) (his bail produced him in court at the appointed time) or to the state of being out of prison and in the custody of a surety (admit to bail) (be out on bail) Ana *pledge, earnest, token: guarantor, surety (see SPONSOR)
guarantor surety, *sponsor, patron, backer, angel Ana *guarantee guaranty *guarantee, surety, security, bond, bail Ana *pledge, earnest, token: *contract, bargain guard vb shield, protect, safeguard, *defend Ana watch, attend, *tend, mind: convoy, escort, chaperon, on, conduct, *company guerdon reward, meed, bounty, award, prize, *premium, bonus guess vb *conjecture, surmise Ana speculate, *think, reason: imagine, fancy (see THINK): gather, *infer, deduce: estimate, reckon (see CALCULATE) guess n conjecture, surmise (see under CONJECTURE vb) Ana *hypothesis, theory: belief, *opinion, view Ant certainty guest *visitor, caller, visitant guide vb Guide, lead, steer, pilot, engineer are comparable when meaning to direct a person or thing in his or its course or to show the way which he or it should follow. Guide usually implies assistance either by means of a person with intimate knowledge of the course or way and of all its difficulties and dangers (some heavenly power guide us out of this fearful country—Shak.) (how shall I tread...the dark descent, and who shall guide the way?—Pope) men who guide the plough—Crabbe (the teacher, the parent, or the friend can often do much...to guide the pupil into an enjoyment of thinking—Eliot) or by means of something (as a light, the stars, a principle, or a device on a machine) which prevents a person or thing from getting off course or going astray the fine taste which has guided the vast expenditure—Disraeli) a vehement gloomy being, who had quitted the ways of vulgar men, without light to guide him on a better way—Hardy) Lead stresses the idea of going in advance to show the way and, often, to keep those that follow in order or under control (a band led each division of the procession) (the flagship led the fleet) (he longed...to lead his men on to victory—Marryat) (this influence should rather lead than drive—Eliot) Often, especially in idiomatic phrases, lead implies the taking of the initiative, the giving of example, or the assumption of the role of leader, director, or guide (he...allured to brighter worlds, and led the way—Goldsmit) (lead people astray by giving them a bad example) (led the van in solving problems "susceptible of certain knowledge"—Sellery) Steer stresses the guidance by one able to control the mechanism which determines the course or direction (as of a boat, an automobile, an airplane); it carries a stronger implication of governing or maneuvering than any of the preceding terms (steer a ship safely through a narrow channel) (fortune brings in some boats that are not steered—Shak.) (I eagerly desire to steer clear of metaphysics—Lowes) (secure in the faith that his reasoned intelligence will steer him correctly at all times—H. N. Maclean) Pilot implies the assistance of a person competent to steer a vessel safely through unknown or difficult waters (as into or out of a port) (pilot a vessel through Ambrose Channel into New York harbor) In its extended use it means guidance over a course where one may easily lose one's way because of its intricacy or may run afloat of various obstacles or dangers (their room steward piloted them to the ship's dining room) (we know not where we go, or what sweet dream may pilot us through caverns strange and fair of far and pathless passion—Shelley) (piloting important bills through the Senate—Current Biog.) Engineer means to lay out and manage the construction of some project (as a tunnel under a river, a highway, or a bridge (a firm of experts was called upon to engineer the irrigation project) but in its more common extended sense it means to serve as a manager in carrying through something which requires contrivance and maneuvering engineer a resolution through the House of Representatives) (engineer an elaborate fraud) (the corner in grain engineered by parties in Chicago—Gould) (the coup d'état was engineered by high-ranking army officers) Ana conduct, convoy, escort, chaperon, *company: direct, manage, control, *conduct Ant misguide —Con distract, bewilder, perplex, mystify, *puzzle: mislead, delude, beguile, *deceive guile n duplicity, dissimulation, cunning, *deceit Ana trickery, double-dealing, chicanery, chicane, *deception: craft, artifice (see ART) Ant ingenuousness: candor guileful *sly, cunning, crafty, tricky, foxy, insidious, wily, artful guilt *blame, culpability, fault Ana sin, crime, *offense: responsibility, answerability, liability (see corresponding adjectives at RESPONSIBLE) Ant innocence: guiltlessness guilty *blameworthy, culpable Ana *responsible, answerable, accountable: indicted, impeached, incriminated (see ACCUSE) Ant innocent gulf, chasm, abyss, abyss basically denote a hollow place of vast width and depth in the earth. Gulf and chasm suggest a depth which, though vast, is still measurable; abyss and abyss suggest immeasurable depth. Gulf is the most general term and may properly be used of any wide and deep hollow place (slippery cliffs arise close to deep gulfs—Bryant) In its extended use gulf suggests separation by a great, often unbridgeable distance (the broad and deep gulf which...divides the living from the dead—Inge) (a mere physical gulf they could bridge...but the gulf of dislike is impassable and eternal—Shaw) Chasm adds the implication of a deep and sometimes wide breach in a formerly solid surface (the chasm of the Grand Canyon, worn by the Colorado river) (the brink of a precipice, of a chasm in the earth over two hundred feet deep, the sides sheer cliffs—Cather) In extended use chasm still stresses a sharp break in continuity (those chasms of
momentary indifference and boredom which gape from time to time between even the most ardent lovers—Huxley>Abysm and abyss may designate the bottomless gulf or cavity of ancient cosmogonies and both have been applied to hell when thought of as a bottomless pit; in other applications they usually connote not only fathomlessness but also darkness and horror. Abyss is somewhat old-fashioned <when my good stars . . . have empty left their orbs, and shot their fires into the abyss of hell—Shak.> <what seest thou else in the dark backward and abyss of time?—Shak.> Abyss is commoner in general modern use <the abyss of Tartarus, fast secured with iron gates—Thirlwall> and, like abyss, it carries over into its extended uses the notion of vast, immeasurable void <the respectability and prosperity of the property and middle classes who grew rich on sweated labor covered an abyss of horror—Shaw> Gull vb: dupe, befoul, trick, hoax, hoodwink, bamboozle A dupe, beguile, deceive, mislead, double-cross, betray Gullibility credulity (see under CREDULOUS) Ant astuteness Gullible *credulous Habit n 1 Habit, habitude, practice, usage, custom, use, wont are comparable when they mean a way of behaving, doing, or proceeding that has become fixed by constant repetition. These words may be used also as collective or abstract nouns denoting habits, usages, or customs, considered as a directing or impelling force. Habit refers more often to the way of an individual than to the way of a community or other group; the term applies to a way of behaving (as in acting or thinking) which has become so natural to one through repetition that it is done unconsciously or without premeditation <he has formed the habit of fingering a coat button when he speaks in public> <break a bad habit> <habits acquired very early feel, in later life, just like instincts; they have the same profound grip—Russell> <it was her habit to write chatty letters to a number of politicians . . . discussing with them the maneuvers of politics—R. P. Randall> <we have two opinions: one private . . . and another one—the one we use— which we force ourselves to wear to please Mrs. Grundy, until habit makes us comfortable in it—Mark Twain> Habitual more often suggests a habitual or usual state of mind or attitude than an habitual response to a given stimulus <I think, Pericles, you who are so sincere with me are never quite sincere with others. You have contracted this bad habit from your custom of addressing the people—Landor> <the sense of fitness and proportion that comes with years of habitude in the practice of an art—Cardozo> Practice (see also practice vb) applies to a habit which is by its nature an act or a method which is followed regularly and often by choice <it is his practice to rise early each morning and take a walk before breakfast> <it is the practice of this surgeon to give local anesthetics wherever possible> <the team made a practice of leaving their scenarios unfinished until actual production—Current Biog.> Usage (see also FORM 3) applies mainly to a practice that has been so long continued and has been adopted so generally that it serves to guide or determine the action or choice of others <it is the usage in certain European countries to breakfast on a roll and a cup of coffee> <the . . . inveterate usages of our country, growing out of the prejudice of ages—Burke> <makes it difficult . . . to earn a living in a business community without yielding to its usages—W. H. Hamilton> Specifically, in reference to the meanings of words, grammatical constructions, and idiomatic forms where there is a difference of opinion, usage implies the long-continued and established practice of the best writers and speakers as the determining factor <all senses of all words are founded upon usage, and nothing else—Paley> Custom applies to a habit, practice, or usage that has come to be associated with an individual or a group by reason of its long continuance, its uniformity of character, and, sometimes, its compulsory nature <it is his custom to smoke each evening after dinner> <in contemporary society it is not a fashion that men wear trousers; it is the custom—Sapir> <is it the custom in your church for the minister to greet each member of his congregation?> <it is not the custom to speak from the floor before being recognized by the presiding officer> Often custom denotes an established practice or usage or the body of established practices and usages of a community or of a people that has the force of unwritten law; thus, the English common law is based upon custom rather than upon legislation <the answer, "It is the custom," is final for the savage, as for the lady of fashion. There is no other reason why they behave in a certain way—Inge> Consequently, custom when used as a collective or abstract noun commonly implies a force as strong, as binding, and as difficult to escape as that exerted by those who enforce the law of the land <and custom lie upon thee with a weight, heavy as frost, and deep almost as life—Wordsworth> Use (see also USE n 1) commonly denotes an action, manner, rite, or practice that is customary to an individual or a particular group and distinguishes him or it from others <more haste than is his use—Shak.> <it had been a family use . . . to make a point of saving for him anything which he might possibly eat—Mary

A colon (:) separates groups of words discriminated. An asterisk (*) indicates place of treatment of each group.
habitation, *body, carcass:* structure, anatomy, framework: figure, *form, shape: *outline, contour

habitat, biotype, range, station are in the pastoral region, and the animals—W. J. Locke
 Dwelling typically refers to a building or shelter for a single family or individual, often as opposed to a building used in business *laboriously dug a cave for his dwelling and built a floating garden of logs upon which he raised vegetables—Amer. Guide Series: Me.*
joy of heav’n, to earth come down; fix in us Thy humble dwelling, all Thy faithful mercy crown—Wesley

habitation, dwelling, abode, residence, domicile, home, house are comparable when they mean the place where one lives. All may apply to an actual structure or part of a structure in which one lives, and all but the last also may apply to the place (as a farm, a village, or a nation) where such a structure is situated. Habitation suggests permanency of occupancy and may apply to a building or to an inhabited place <the properties are much smaller than they are in the pastoral region, and the habitations are scattered—P. E. James> Shakespeare . . . chose Verona for her habitation because of its agreeably sounding name—Bennett>
what did it matter where the body found itself so long as the soul had its serene habitations—W. J. Locke

Dwelling typically refers to a building or shelter for a single family or individual, often as opposed to a building used in business *laboriously dug a cave for his dwelling and built a floating garden of logs upon which he raised vegetables—Amer. Guide Series: Me.*
joy of heav’n, to earth come down; fix in us Thy humble dwelling, all Thy faithful mercy crown—Wesley

Abode may apply to a building, but more often it designates a place as a seat or center of occupancy *the view that other planets may be the abode of life*—Tara, the abode of the high king of Ireland—H. O. Taylor>
her home ever to a certain extent had been an abode of the arts—Osbetri Sitwell>
Distinctively, abode may stress transience *the traveler reached his night abode and was ascending the stairs—Upton Sinclair*>
Residence in reference to a building may be somewhat formal and convey a suggestion of dignity and permanence *the architects . . . devoting their talents to designing homes for the people as well as residences for the rich—Canadian Jour. of Economics & Political Science*>
the houses are too superior to be called villas; the house agents call them residences—Susan Gillespie>

But residence also may refer to an area or place (as a town or state) where one lives and in such use carries specific legal implications (as of actual occupancy or intention to remain) *no one may vote in a given election in more than one place; and this place must be the voter’s legal residence, however little of his time he may actually spend there—Ogg & Ray*>
the term “residence” means the place of general abode; the place of general abode of a person means his principal, actual dwelling place in fact, without regard to intent—U. S. Code>
Domicile in reference to a building carries no special connotations *grandfather’s domicile was considered an architectural curiosity; it was an oversized log cabin with a second story reached by an outside staircase—Burkley*>
In wider reference to a place it may be quite neutral (with the advance of astronomy, the domicile of the Deity had been transposed to the unknown center of the universe—S. F. Mason) or it may have very definite legal implications (as of being the seat of one’s principal and permanent home and therefore the place where one has a settled connection for such important legal purposes as determination of civil status and jurisdiction to impose personal judgments and taxes) in which it is often specifically contrasted with residence *the term “domicile” has been defined by the courts of one state as follows: “The domicile of a person is where he has his permanent home and principal establishment, to which, whenever he is absent, he intends to return—Ackerman*>
Domicile is not to be confused with residence. It is of a far more permanent nature, as where a man establishes a home in a jurisdiction with the intention of remaining there more or less permanently. The six weeks’ residence in Reno, with which we are all familiar, does not establish legal domicile if the residence is solely for the purpose of obtaining a divorce—Payton>
Home, like the foregoing terms, is used either of a structure or a place of residence or sometimes of origin *had lived in New York for years but still thought of Georgia as his home* > built a home in the new section of town> but of all these terms home distintively conveys the notion of one’s dwelling as the seat and center of family life and the focus of domestic affections *without hearts there is no home—Byron*>
some women can make a truer home of a shanty than others can of a mansion) Unlike the other terms house is not used of a place as distinct from a structure; basically it applies to a building used or intended for use as a dwelling place and, especially as compared with home, is a very general and neutral term; thus, a landlord’s house may become the home of a tenant *a speculative builder of houses*>

habitual *usual, customary, wonted, accustom*>

Ana habituated, addicted (see HABITUATE): practiced, drilled (see PRACTICE vb): confirmed, *inveterate, chronic, deep-seated, deep-rooted*>

Ant occasional —Con *infrequent, sporadic, rare, uncommon*

habitate, accustom, addict, inure mean to make used to something. Habituate distinctively implies the formation of habit through repetition *(by constant practice she habituated herself to accurate observation) > (to habituate ourselves, therefore, to approve . . . things that are really excellent, is of the highest importance—Arnold) > *language blunter than the protected executive ears were habituated to—S. H. Adams*>
A generation habituated to regard properly inscribed paper as the principal, if not the only, symbol of wealth—G. W. Johnson>
Accustom implies adjustment to something by frequent or prolonged experience or by constant exposure *accustom oneself to cold*>
accustom students to severe criticism *(this opportunity to accustom the girl to sea life by a comparatively short trip—Conrad)* To accustom oneself to nagging is to become inured to nagging by another person; to habituate oneself to nagging is to form the habit of nagging others. Sometimes accustom also connotes reconciliation by
overcoming one’s resistance or distaste <gradually accus-
tomed> his ears to the din of the factory> Addict, which is
used chiefly in a reflexive construction or in the passive,
adds to habituate the implication of overindulgence or
surrender to inclination <the Japanese as a nation are
addicted to sight-seeing—Faubion Bowers> addicted to
study> he has always . . . been addicted to prefiguring his
poems with quotations and echoing passages from other
poets—Edmund Wilson> and frequently refers to bad
habits addicted to gambling> a man gross . . . and
addicted to low company—Macaulay> Hugh tried to pro-
test and to explain that he was not addicted to the habit
of drinking—Anderson> and specifically to compulsive
use of habit-forming drugs. Inure is a somewhat formal
word that is a close synonym of accustom> a man inured to
hard physical labor—G. W. Johnson> but distinctively it
may suggest a becoming callous or indifferent as a result
of repeated exposure <for men’s minds have been inured to
situations of measurable and surmountable danger—
Romulo> afraid that reality could not be endured unless
the mind had been gradually inured to it—Krutch>
Ana train, discipline, school (see teach)> *harden,
season, acclimatize, acclimate> *practice, exercise, drill
habituate *habit, practice, usage, custom, use, want
Ana attitude, stand, *position: *state, condition, situation
Con *mood, humor, temper: *caprice, whim, freak, vagary
habitue *addict, votary, devotee
hack adj hireling, *mercenary, venal
Ana toiling, drudging, grinding, laboring (see correspond-
ing nouns at work)> hired, employed (see hire vb)> *mean,
abject, sordid
hackneyed *trite, stereotyped, threadbare, shopworn
Ana antiquated, archaic, obsolete, antediluvian, *old:
orn, wasted (see haggard)> attenuated, diluted (see
thin vb)
Con fresh, novel, original, *new
Hadean chthonian, *infernal, Tartarean, stygian, hellish
haggard, worn, careworn, pinched, wasted, cadaverous
are comparable when they mean thin and drawn by or as if by
worry, fatigue, hunger, or illness. Haggard may imply a
wild frightening appearance (as of a person driven dis-
traught by fear, anxiety, privation, or suffering) whose
haggard eyes flash desperation—Cowper> the strong
face to which that haggard expression was returning—
Conrad> she stood at the door, haggard with rage—
Joyce> but it usually also implies an extreme thinness or
gauntness that is normally associated with age but that
comes to younger persons who never know physical or
mental ease <they grow thin and haggard with the constant
toil of getting food and warmth—Anderson> Worn is
the more accurate word for the latter sense of haggard,
for it definitely implies the attrition of flesh characteristic
of senility and induced in younger persons by overwork,
worry, exhaustion, or prolonged ill health <the President . . .
looked somewhat worn and anxious, and well might
Dickens> <it was easy to see from their worn and
anxious faces that it was business of the most pressing
importance which had brought them—Doyle> Careworn
differs from worn chiefly in its implication of a being
overburdened with cares and responsibilities that cause
anxiety <the young mother’s careworn face> years of
heavy responsibility have changed him to an old careworn
man> that lean and careworn look which misery so sorely
produces—Trollope> Pinched and wasted suggest the
effects of privation or of a wasting disease pinched faces
of poorly nourished children> (the wasted body of a con-
sumptive> thought he looked pinched and cold—Carter>
Cadaverous is often used in place of pinched or wasted
when there is the intent to suggest the appearance of a
corpse; it usually implies a deathly paleness and an ex-
treme emaciation so that the skeleton is apparent though
not visible <he has a cadaverous countenance, full of
cavities and projections—Irving> <for a queer second I
did see us all in that . . . mirror . . . cadaverous, palsied—
L. P. Smith>
Ana gaunt, scrawny, skinny, *lean: fatigued, exhausted,
weary, fagged, jaded (see tire vb)> wan, pallid, ashen,
*pale
Con *vigorous, lusty, energetic, strenuous

hamper vb Hamper, trammel, clog, fetter, shackle, manacle,
hog-tie are comparable when meaning to hinder or impede
one so that one cannot move, progress, or act freely. To
hamper is to encumber or embarrass by or as if by an
impediment or restraining influence <the long dress
hampered her freedom of movement> the view is vigor-
ously urged today that rhyme and meter hamper the poet’s
free expression—Lowes> <never . . . had she so desired to
be spontaneous and unrestrained; never . . . had she so felt
hampered by her timidity, her self-criticism, her
depressed and unrestrained habit of never letting herself go—H. G.
Wells> To trammel is more specifically to entangle or con-
fine as if enmeshed in a net <people whose speech and behavior
were trammelled . . . by the usages of polite society—Gibbs> <their
life was at once dangerously trammelled and dangerously free—Buchan>
To clog is to ham-
per the movement, often the ascent, of someone or some-
thing by something extraneous, encumbering, or useless
the wings of birds were clogged with ice and snow—
Dryden> man is ever clogged with his mortality—Brontë> the
Cynic preached abstinence from all common ambi-
tions, rank, possessions, power, the things which
clog man’s feet—Buchan> To fetter is to confine or restrain so
that one’s freedom or power to progress is lost <I refused
to visit Shelley that I might have my own unfettered scope
—Keats> we reverence tradition, but we will not be
fettered by it—Inge> watched a world prepare for war
while he was fettered by the nation’s propensity for isola-
tionism—Kefauver> To shackel and to manacle differ
little in their extended use, both implying such interference
with one’s freedom that one feels that movement, progress,
or action is impossible if the bonds are not broken <he
would not be shackled in his reasoning by the rules of
logic> <grief too can
manacle the mind by the nation’s propensity for isola-
tionism—Kefauver> To shackel and to manacle differ
little in their extended use, both implying such interference
with one’s freedom that one feels that movement, progress,
or action is impossible if the bonds are not broken <he
would not be shackled in his reasoning by the rules of
logic> <grief too can
manacle the mind by the nation’s propensity for isolation-
tionism—Kefauver> To shackel and to manacle differ
little in their extended use, both implying such interference
with one’s freedom that one feels that movement, progress,
or action is impossible if the bonds are not broken <he
would not be shackled in his reasoning by the rules of
logic> <grief too can
manacle the mind by the nation’s propensity for isolation-
tionism—Kefauver> To shackel and to manacle differ
little in their extended use, both implying such interference
with one’s freedom that one feels that movement, progress,

hang 1 Hang, suspend, sling, dangle mean to place or be placed so as to be supported at one point or on one side, usually a point or side at the top. Hang typically implies a fastening to an elevated point or line so as to allow motion to what falls from such a point or line 〈hang the washing on a line〉 〈hundreds of plums hang from the tree's branches〉 〈hang curtains〉 〈carcasses of lamb were hang in the butcher's window〉 〈hang out a flag from a window〉 In extended use hang often implies a position or a relation suggestive of hanging, such as that of something poised or seemingly poised in the air 〈a dim, oblong patch of light hanging slantwise in the darkness— O'Flaherty〉 〈just above its [the poplar's] pointed tip, hang the hollow, silver winter moon— Cat her〉 or of one thing dependent upon another 〈a good deal... hangs on the meaning... of this short word— T. S. Eliot〉 or of something clinging or adhering to something else 〈she hangs on his arm〉 〈thereby hangs a tale—Shak.〉 〈most heavily remorse hang at my heart— Shelley〉 Suspend is preferred to hang (or hang) when support from a point above suggests flexibility, free motion or movement, or a display of skill 〈hams, tongues, and fitches of bacon were suspended from the ceiling—Irving) 〈others [of the rebels] were suspended from the boughs of the oak—Keightley〉 Suspend is also employed more often than hang when a floating in a fluid (as air or water) is suggested (see SUSPENDED) 〈waspflies barred with yellow suspended themselves in the air— Jeffries〉 Sling basically implies the use of a sling for hoisting or lowering heavy or bulky articles with ease. Sometimes the term implies a hanging over the shoulder, or arm, or similar support (as for ease in carrying) 〈sling a basket on her arm〉 〈sling a scaffold from a roof〉 Dangle implies a hanging loosely in such a manner as to swing or sway or twist to and fro 〈dangled his cane from a finger〉 〈the children sat on the high wall, their legs dangling〉 〈for all might see the bottlenecks still swaying at his

Anna unhappy, infelicitous (see unfit): *miserable, wretched

happen vb Happen, chance, occur, befall, betide, transpire are comparable when they mean to come to pass or to come about. Happen is the ordinary and general term and may imply either obvious causation or seeming accident, either design or an absence of design; in its simplest use the term takes the event, situation, or circumstance as its subject (the incident happened two weeks ago) but it may take the impersonal it or the anticipatory there as its subject (it happened that at Dante's time thought was orderly and strong and beautiful—T. S. Eliot) (there happened to be no visitors that day) In still other phrases happen may take a person as the subject, especially when the verb implies a coming upon someone or something, or a coming into a place more or less casually or accidentally, rather than a coming to pass (the miners happened upon a vein of gold) (I go nowhere on purpose: I happen by—Frost) (happened on a cottage almost hidden in elm tree boughs—Times Lit. Sup.) (happened upon a remarkable and neglected volume—Laird) (hoping that no wayfarer would happen along the lane for the next hour or so—Conrad) Chance is closer to happen in its idiomatic uses than any of the other words, and it too is found occasionally with the event as the subject; however, it differs from happen in uniformly implying absence of design or apparent lack of causation (if a bird's nest chance to be before thee—Deut 22:6) (whenever it chanced that the feelings of people were roused—Kinglake) (things they themselves chance to know—Replierry) Occur in distinctive use carries an implication of presenting itself (as to sight, to consciousness, or to one's thoughts); it is, in general, interchangeable with happen only when a definite event or incident or something that actually takes place is the subject (the accident happened yesterday) (the bombing raids on the city occurred early in the war) (it is necessary for the physicist to arrange the situation so that phenomena shall occur in which ... the underlying simplicity will come to light—Darrow) Consequently occur is preferable to happen in negative expressions when the idea of presentation in the realm of fact is uppermost (a naturalistic optimism which regarded an actual event as ... of superior value to an event which did not occur—Inge) (this is possible in theory, but, actually, never seemed to occur—Heiser) This fundamental implication of presentation to sight or mind allows occur, unlike happen, to be used to suggest a coming to one's mind (that characters deteriorate in time of need possibly did not occur to Henchard—Hardy) or a meeting one's eyes or ears (as in print or speech) (the word seldom occurs except in poetry or a turning up or appearing (another instance of this disease may not occur for several years) (corundum occurs in crystals, masses, and grains) Befall and the less common betide are used in preference to any of the preceding words, especially in poetry or in literary prose, when there is an implication of a superior power determining events or of the lack of human power to forecast them (any less misery should befall her—Wordsworth) could detect a conscienceless opening of one's hands for all that may betide under benign sun or watchful arrowy moon—Times Lit. Sup.) (the fate which Beria meted out to so many should now have befallen him—Muggeridge) Transpire, which basically means to leak out or escape in the form of a vapor, retains this notion in much of its extended use, in which it implies a leaking out so as to become known or apparent (it soon transpired that there were two ... conceptions of this problem—Malik) (it had just transpired that he had left gaming debts behind him—Austen) but through a semantic shift the term has developed a value, disapproved by some rigorous purists, in which it is interchangeable with happen or occur (I gave an honest account of what transpired—Michener) (all memorable events ... transpire in morning time and in a morning atmosphere—Thoreau)

happiness, felicity, beatitude, blessedness, bliss all denote the enjoyment or pleasurable satisfaction that goes with well-being. Happiness is the generic term applicable to almost any state of enjoyment or pleasurable satisfaction especially as based on one's well-being, security, effective accomplishments, or satisfied wishes. Felicity, denoting intense happiness is suited chiefly to formal expressions (as of congratulation) or dignified description. Beatitude is supreme felicity (to understand by honorable love romance and beauty and happiness in the possession of beautiful, refined, delicate, affectionate women—Shaw) (I know no one more entitled by unpretending merit, or better prepared by habitual suffering, to receive and enjoy (felicity—Austen) (we may fancy in the happy mother's breast a feeling somewhat akin to that angelic felicity, that joy which angels feel in heaven for a sinner repentant—Thackeray) (about him all the Sanctities of Heaven stood thick as stars, and from his sight received beatitude past utterance—Milton) (a sense of deep beatitude—a strange sweet foretaste of Nirvana—Beetbohm) Blessedness implies a feeling of being highly favored, especially by the Supreme Being, and often, a deep joy arising from the purest domestic, benevolent, or religious affections; bliss adds to blessedness a suggestion of exalted or ecstatic felicity; both blessedness and bliss, like beatitude, often refer to the joys of heaven (thrice blest whose lives are faithful prayers, whose loves in higher love endure; what souls possess themselves so pure, or is there blessedness like theirs?—Tennyson) (bliss was it in that dawn to be alive, but to be young was very Heaven!—Wordsworth)

Ana contentedness or content, satisfaction or satisfac tion (see participial adjectives at satisfy): *pleasure, enjoyment, delight, delectation, joy, fruition

**harbinger**

**Ana** *bait, badger, hound, ride, hector, chivy, heckle; vex, irk, bother* (see ** ANNOY**)

**Con** *comfort, solace, console*; *relieve, assuage, alleviate*

**harbinger** *forerunner, precursor, herald*

**harbor** *Harbor, haven, port* are comparable because they have at one time or another meant a place where ships may ride secure from storms. **Harbor** applies to a portion of a large body of water (as the sea) that is partially or almost wholly enclosed so that ships or boats may enter it for safety from storms or may be anchored or moored there in security *(two promontories whose points come near together enclose the harbor)* *(the great natural harbor at Sydney, Australia)* In extended uses **harbor** carries over the notion of quiet and safety inherent in its basic use *(the beauty and the harbor of a snug house—Le Sueur)* **Haven** is chiefly literary or occurs in names of towns and cities where a natural harbor (as a bay, an inlet, or a river mouth) exists and where boats may go for safety during a storm *(Mifflin Haven in south Wales)* *(a blessed haven into which convoys could slip from the submarine-infested Atlantic—Stewart Beach)* More than the other words here considered, it connotes a refuge or place of quiet in the midst of storms *(my... only haven... is in the arms of death—Carlyle)* *(the Colony acquired an unsavory reputation for providing a friendly haven for pirates—Amer. Guide Series: R.I.)* **Port** denotes both a place of security for ships and one suitable for landing men or goods *(to set me safe ashore in the first port where we arrived—Swift)* Consequently, in extended use, it suggests a destination or goal *(me... always from port withheld, always distressed—Cowper)* In commercial use **port** applies to a place, sometimes a harbor, sometimes, especially in place-names, a city or town and its harbor, but still more often in the case of the great ports of transatlantic and transpacific shipping all the approaches, all the inlets, all the facilities *(as docks, wharves, and offices) involved in the business of loading and unloading ships or of embarking and disembarking passengers*(the ports of New York, Cherbourg, and Southampton)

**harbor** *vb* **Harbor, shelter, entertain, lodge, house, board** are comparable when they mean to provide a place *(as in one's home, quarters, or confines) where someone or something may stay or be kept for a time. **Harbor** usually implies provision of a place of refuge especially for a person or an animal that is evil or hunted or noxious *(harbor thieves)* *(cellars that harbor rats and cockroaches)* *(dep in... is simply a refusal by the Government to harbor persons whom it does not want—Justice Holmes)* *(what good is he? Who else will harbor him at his age for the little he can do?—Frost)* In its extended sense the term suggests the receiving into and cherishing in one's mind of thoughts, wishes, or designs and especially of those that are evil or harmful *(nothing is more astonishing to me than that people... should be capable of harboring such weak superstition— Pope)* *(I did not wish him to know that I had suspected him of harboring any sinister designs—Hudson)* **Shelter** more often than **harbor**, takes for its subject the place or the thing that affords *(as distinguished from the person that supplies) protection or a place of retreat; it also distinctively suggests a threat to one's comfort or safety *(as by the elements, by pursuers or attackers, or by a bombardment)*; the term further suggests, as **harbor** does not, a covering or screening *(in such a season born, when scarce a shed could be obtained to shelter him or me from the bleak air—Milton)* *(in Craven's Wilds is many a den, to shelter persecuted men—Wordsworth)* *(sycamore trees sheltered the old place from the north and west—Gogarty)* *(wouldn't you like to shelter somebody in danger, or attempt a rescue, or do something heroic?—Black)* **Entertain** basically implies the giving of hospitality to a person as a guest at one's table or in one's home. The term often suggests special efforts to provide for his pleasure and comfort *(be not forgetful to entertain strangers: for thereby some have entertained angels unawares—Heb 13:2)* In its extended sense **entertain**, like **harbor**, implies admission into the mind, and consequent consideration, of ideas, notions, and fears, but unlike **harbor**, apart from the context it carries no connotations of their good or evil, benign or noxious, character, or of any prolonged dwelling upon them, or even of deep and serious consideration *(it had been Eudora's idea that jealousy had gone out. It wasn't entertained by smart people; it was bourgeois—Mary Austin)* *(no proposal having for its object the readmission of Master Byron to the academy could be entertained—Shaw)* *(her brothers and sister privately entertained a theory that their mother was rather a simpleton—Sackville-West)* **Lodge** *(see also ** RESIDE**)* implies the supplying or affording a habitation, often a temporary habitation; often it suggests provision merely of a place to sleep and carries no implications of feeding or entertaining *(Mrs. Brown will lodge three of the party for the weekend)* *(every house was proud to lodge a knight—Dryden)* In the extended use of this sense **lodge** may imply reception as if of a guest or denizen, not only, like **harbor**, into the mind but into anything thought of as a receptacle or as a place where a thing may be deposited or imbedded *(the isolated, small family unit of the patriarchal type, with formal authority lodged in the father—Dollard)* *(so fair a form lodged not a mind so ill—Shak.)* *(a song... had lodged in his memory like a cork stuck fast from the tide in the cleft of shore rock—Victor Canning)* **House** usually implies the shelter of a building with a roof and side walls that affords protection from the weather *(he could find no place in the village to house his family suitably)* *(the rich man has fed himself, and dressed himself, and housed himself as sumptuously as possible—Shaw)* *(house gardening implements in a shed)* *(house an art collection in the new library building)* **House** is somewhat rare in extended use, but it usually implies enclosing or confining in a particular place *(the universal does not attract us until housed in an individual—Emerson)* *(so timorous a soul housed in so impressive a body—Long)* **Board** may mean to provide a person with meals at one's table *(we cannot lodge and board a dozen or fourteen gentlewomen—Shak.)* *(the question is, will she board as well as lodge her guest?—Clara Morris)* but often it implies provision of both room and meals for compensation *(Mrs. Jones boards four teachers at her home)* *(four teachers board at Mrs. Jones's)*

**Ana** foster, cherish, nurture, *nurse*; hide, conceal, secrete; protect, shield *(see ** DEFEND**)

**Con** * eject, expel, oust, evict; banish, exile, deport; exclude, eliminate, shut out

**hard** *solid, *firm*

**Ana** compact, dense, *close: consolidated, compacted* *(see ** COMPACT vb**); *hardened, indurated, concentrated*

**Ant** soft—*(see ** SOFTH**)*

**hard** difficult, arduous are comparable when applied to tasks for mind or body to mean demanding great toil or effort in reaching the appointed or the desired end. **Hard** is the simpler, blunter, and more general term; it implies the opposite of all that is implied by easy, but usually suggests nothing more specific *(a hard lesson)* *(a hard job)* *(a hard book to understand)* *(your easy reading.

Sherridan said, "damn. hard writing." —Montague

1 Harden, solidify, indurate, petrify, cake are

are not necessarily implied that what is to be undergone is uncongenial... of Winters' Tale or Coriolanus —Alexander

I do not propose... to enter upon the difficult question of Disestabishment —T. S. Eliot

it was a difficult design and had to be executed exactly right —Roark Bradford

Difficult stresses the need of laborious effort, or perseverance, and persistent exertion; thus, one may find a task difficult, but not arduous, because one has no sense of being kept at against one's inclination; an ascent of a mountain may be arduous, but not especially difficult.

the arduous task of formulating legislation necessary to the country's welfare —Roosevelt

(determined to save him from a life of arduous toil —Cole

Ana *onerous, burdensome, oppressive, exacting: intricate, knotty, complicated, involved, *complex: exhausting, fatiguing, wearying, tiring (see TIRE vb)

Ant easy —Con facile, light, simple, effortless (see EASY)

harden

1 Harden, solidify, indurate, petrify, cake are comparable when they mean to make or to become physically hard or solid. Harden usually expresses an opposition to soften and therefore may be as often used of the process as of the effect. The term suggests a change in degree with an approach toward a state of firm consistency or texture, though it need not imply impenetrability or resistance to efforts to break, cut, pierce, or bend (java as it cools hardens into rock) (harden candy by chilling it)

Solldify, although differing little from harden, usually expresses an opposition to liquefy and places more stress upon the effect produced than upon the process involved; the term, therefore, suggests a change in quality rather than in degree and is more often applied to a mass subject to compacting or consolidation (java becomes rock when it is solidified) (water solidifies into ice) Indurate, which means to make very hard or very compact, implies usually the making of something that is firm in texture still harder (heat indurates clay) (surgeons... spend raptures upon the first to adaptation by human agency, but this distinction is not commonly observed (a race... well seated in a region, fixed to the soil by agriculture, acclimatized by natural selection —Ripley) (I have not been long enough at this table to get well acclimated —Holmes)

Ana *habitude, accustom, inure: *adapt, adjust, accommodate

Ant soften —Con enervate, emasculate (see UNNERVE): weaken, debilitate, enfeeble, sap, undermine

hardened, indurated, callous mean grown or become hard.

These terms are comparable in both literal (compare HARDS 1) and extended use. Hardened is the most inclusive because it is applicable to any substance, whether originally fluid or solid, or loose or firm in texture, or elastic or inelastic, that has become solider and firmer and increasingly resistant to efforts to cut, pierce, or bend (hardened soap) (hardened lava) (hardened steel)

Consequently, in extended use hardened usually implies a fixing or setting with loss of qualities (as flexibility, elasticity, pliancy, susceptibility, and impressionableness) indicative of a capacity for change (hardened beliefs) (hardened distrust) (a hardened criminal) (a hardened heart) (a hardened little reprobate —Thackeray)

Indurated is common in geological and in medical use with the implication of an increase of hardness or compactness usually in something already firm or hard and sometimes to the point of abnormality (indurated clay) (indurated sandstone) (an indurated abscess). In its extended use it usually stresses abnormal or excessive hardness or stoniness that repels all efforts to penetrate or to soften (indurated stoic as I am —Adams) (her husband's indurated conscience —Henry James)

Callous, in its earliest and still common sense, implies a hardening and thickening of the skin by constant pressure or friction and a consequent loss of sensibility in the part affected (a callous foot) (a callous finger tip) In extended use it usually also implies a loss of sensibility or an insensitiveness that results from constant experience (he has grown callous to such appeals) (now callous to criticism) (the tiresome and callous repetition of old motives which marked the decadence of the classic tradition —Binyon) (pity... is made callous and inactive by kneeling too much —Landor) but sometimes callous means simply unmindfulness and carries little implication of the process of hardening (a callous answer)

Ana consolidated, compacted, concentrated (see COMPACT vb)

Ant softened —Con liquefied, melted, thawed, fused (see LIQUEFY): weakened, enfeebled, debilitated (see WEAKEN)

hardihood *temerity, audacity, effrontery, nerve, cheek.

with Roman tradition—Buchan> Accord is often inter- 
changeable with consonance without loss (<it was in accord 
with Roman tradition>) However, it can imply, as con- 
sonance cannot, personal agreement or goodwill or, often, 
absence of ill will or friction (<for your father’s remem- 
brance, be at accord—Shak.) <engineers have reached a 
certain accord in regard to ethical principles—Wagner> 
Hence the phrase “with one accord” suggests unanimity 
(with one accord they gave a cheer) Concord, like accord, 
often stresses agreement between persons but is more 
positive in its implications, for it suggests peace with 
amity rather than absence or suppression of ill will (<how 
comes this gentle concord in the world?—Shak.) <till 
heart with heart in concord beats—Wordsworth> Concord 
also, when applied to sounds, comes close to harmony 
in its implications. However it seldom except in a technical 
sense in music connotes consonance of tones, but usually 
the pleasant succession of tones that is the quality of 
<melody (the man that hath no music in himself, nor is 
not moved with concord of sweet sounds—Shak.) (the usual 
poetic of her gestures and the musical concord of her 
voice—Wylie>

Ana integration, articulation, concatenation (see under 
INTEGRATE): congruous or congruity, consonance, 
compatibility (see corresponding adjectives at CONSO- 
NANT): concurrence, agreement (see corresponding verbs 
at AGREE)

tantalize

Ana torment, torture, rack, *afflict, try: *trouble, distress: 
*bait, badger, bound, ride, *hector: fret, gall, chafe (see 
ABRADE)

Con *comfort, solace, console: *relieve, assuage, allevi-
 ace, ally

harsh *rough, rugged, scabrous, uneven

Ana repellent, *repugnant, distasteful, abhorrent, obno-
xious: * coarse, gross: st rident, * vociferous, blatant: rigor-
ous, strict, stringent, * rigid

Ant pleasant: mild — Con pleasing, agreeable, grateful, 
gratifying (see PLEASANT): * soft, gentle, bland, smooth, 
lenient, balmy

harvest vb * reap, glean, gather, garner

Ana collect, assemble (see GATHER): * accumulate, amass, 
hoard

haste n Haste, hurry, speed, expedition, dispatch are com-
 parable when meaning quickness or swiftness in movement 
or in action. Haste implies quickness or swiftness in per-
sons rather than in machines, vehicles, or methods of 
transportation; thus, a business that requires haste de-
mands that the persons concerned move or act swiftly 
<she came in straightway with haste unto the king—Mk 
he shouted—W. O. Douglas> But haste may imply other 
goads than urgency or pressure for time; it may imply 
intense eagerness <his tongue, all impatient to speak . . . 
did stumble with haste—Shak.> <I feel no haste and no 
reluctance to depart—Millay> or lack of due reflection and 
precipitancy in decision <hurry in haste and repent at leisure—Old Proverb> or the implication of anger <I said 
in my haste, all men are liars—Ps 116:11> Hurry, though 
often used in place of haste as the simpler term, distinc-
tively carries a stronger implication of confusion, agitation, 
and bustle <whoever is in a hurry, shows that the thing he 
is about is too big for him. Haste and hurry are very differ-
ent things—Chesterfield> <the incessant hurry . . . of daily 
life—Eliot> and more frequently refers to the things which 
are operated or the actions which are performed with 
haste than to the persons concerned; thus, one makes 
haste in the preparation of a report needed immediately, 
but the hurry of its preparation may result in several errors 
being overlooked. Also, hurry may imply the state of mind 
or the need of one who demands haste as well as of the one 
who makes haste <I am in a great hurry for the articles 
ordered> <you need not be in a hurry to fill my order>

Speed (see also SPEED n 2) usually implies mere swiftness 
or rapidity, primarily in motion or movement but second-
carily in action, performance, or accomplishment. Unlike 
haste and hurry, the term, which may be used in reference 
to things as well as to persons, carries no connotations of 
punctuality, urgency, or agitation, although it may carry 
a suggestion of success <the more haste the less speed— 
Old Proverb> <five dark abbatrosses . . . clearly took pride 
as well as pleasure in a performance which had the beauty 
of speed uncontaminated by haste—Harper’s> <many an 
adult reader with trained habits of attention and concentra-
tion will absorb the contents of a book with a speed . . . no 
child can approach—Eliot> Expedition and dispatch imply 
both speed and efficiency especially in business or affairs, 
but dispatch carries a stronger suggestion of promptness 
in bringing matters to a conclusion, and expedition more 
often carries a hint of ease or efficiency of performance 
(they made their plans with expedition) <Sophia put her 
thing on with remarkable expedition—Bennett> <serious 
business, craving quick dispatch—Shak.> <there is nothing 
more requisite in business than dispatch—Addison> <to 
do everything when it ought to be done is the soul of 
expedition—Scott> <the soul of dispatch is decision— 
Hazlitt> <to move with reasonable expedition along the 
narrow pavements of Rotting Hill is impossible—Wynd-
ham Lewis>

Ana * celerity, alacrity, legernity: rapidity, swiftness, 
quickness, expeditiousness (see corresponding adjectives 
at FAST): readiness, promptness (see corresponding adjec-
tives at QUICK): agility, briskness (see corresponding adjectives 
at AGILE)

Ant deliberation — Con * slowness, leisureliness, delib-
erateness, dilatoriness (see corresponding adjectives 
at SLOW): procrastination, delaying or delay, dawdling 
(see corresponding verbs at DELAY)

hasten * speed, accelerate, quicken, hurry, precipitate

Ant delay — Con * retard, slow, slacken, detain (see 
DELAY): lag, procrastinate, dawdle (see DELAY)

hasty 1 speedy, quick, expeditious, rapid. * fast, swift, 
fleet

Ana * agile, brisk, nimble: hurried, quickened (see 
SPEED vb)

Con * slow, deliberate, dilatory, leisurely, laggard

2 * precipitate, headlong, abrupt, impetuous, sudden

Con considered, advised, *deliberate, premeditated, 
designed, studied

hate n 1 hatred, abhorrence, detestation, abomination, 
loathing (see under HATE vb)

Ana * antipathy, aversion: animosity, rancor, hostility, 
* enmity: despite, contempt, scorn, disdain (see under 
DESPISE)

Ant love — Con affection, * attachment: admiration, 
respect, esteem, * regard: reverence, veneration (see 
under REVERE)

2 Hate, hatred are not always interchangeable although 
they both denote intense, settled dislike for a person or 
thing that causes one either to avoid him or it scrupulously 
or to be his or its bitter enemy. Hate is the preferable 
term when the emotion is thought of in the abstract as 
the diametrical opposite of love or when the term is
used without reference to particular individuals (love you cannot help, and hate you cannot help; but contempt is—for you—the sovereign idocy—Galsworthy) (it takes a very remarkable poet, like Pope . . . to elevate malice into hate—Day Lewis) In concrete use hate is seldom found outside of poetry except when contrasted with love, also in concrete use; it then denotes the object of one's hate (the scum of men, the hate and scourgery of God—Marlowe) (a generation whose finest hate had been big business—Paxson) Hate is the preferable term when the emotion referred to is actually experienced and is therefore personal and individual in character; hate is definable because men are in agreement concerning its distinguishing marks, but hatred escapes exact definition because its implications, other than that of intense dislike, can be gathered only from the context or with reference to its object. Usually it implies in addition one or more such emotions as antipathy, aversion, rancor, vindictiveness, resentment, or fear (he had a deep-seated hatred of aristocrats) (a violent hatred of restrictions on his freedom) (a healthy hatred of scoundrels— Carlyle) (his special type of satire had its roots not in hatred but in sympathy. His wrath was an inverted love—Henry James) (hated is the coward's revenge for being intimidated—Show) hatred also is often used in reference to its effect on the one who is hated; in such cases the nature of the emotion is not stressed, but its power to harm (he sowed doubtful speeches, and reaped plain, unequivocal hatred—Lamb) (battered by hatred, seared by ridicule—Flecker) In concrete use hatred usually denotes a particular instance (as of obsession by the emotion of hatred or of suffering as a result of another's hatred) (given to violent hatreds) (the victim of human hatreds) (a family famous for its hatreds—Disraeli) (the human race lives in a welter of organized hatreds and threats of mutual extermination—Russell)
or legal right to hold as one's property and under one's full control (own a house) (own several horses) (when a child is old enough, he should... be allowed to own books—Russell) (some parents treat their children as if they owned them) Possess is preferred in law to own as implying one's having full title and right to a particular property to the exclusion of everyone else; thus, a husband and wife might say that they own a piece of land when legally only the husband possesses it. In general use possess differs from own in being referable to other things than property (as a characteristic, a quality, a power, or a faculty) (possess sentiment) (the States possessed the power to exclude or admit them [slaves]—John Marshall) (that astonishingly retentive memory which we possessed as little boys—Inge) (the great medicinal value possessed by this water—Heiser) Enjoy (see also like) implies the having of something as one's own or for one's use with all its benefits and advantages; in this sense there is no necessary connotation of pleasure or delight in having or using, but, except in law, the word often does carry a hint if not a definite suggestion of it (during his lifetime he enjoyed a distinguished reputation for the excellence of his sermons—T. S. Eliot) (while man enjoyed... an unlimited freedom to be wicked—Henry Adams) (classes that enjoy certain rights and privileges) Con want, *lack, need

hazens 396 healthful

haze... a house... a house—Allen Johnson) Mist applies to what can be only dimly apprehended because of its remoteness (its origins are lost in the mists of antiquity—Coulton) or to something which prevents exact knowledge or clear understanding (times... half shrouded in the mist of legend—Freeman) Fog implies an obscuring of the mental or spiritual vision or of whatever can be detected only by such vision (the fog of ignorance in which so many live) (life and its few years—a wisp of fog betwixt us and the sun—Reese) (the subject is wrapped in fogs of vague thinking—Overstreet)

head, headman *chief, leader, chieftain, master

headlong *precipitate, impetuous, abrupt, hasty, sudden

Ana rash, reckless, daring, daredevil, foolhardy (see adventurous)

headstrong ungovernable, *unruly, intractable, refractory, recalcitrant, willful

headway pace, *speed, velocity, momentum, impetus

Ana advance, progress (see under advance vb): *motion, movement

heal *cure, remedy

healthful, healthy, wholesome, salubrious, salutary, hygienic, sanitary are comparable when they mean conducive or beneficial to the health or soundness of body or mind. Healthful is more common than healthy as the term carrying this sense (see also healthy 2), but the two are often interchangeable (a healthy climate) (one of the healthiest climates in England—Bennett) (healthy recreation) (the French boy gets healthy recreation—Grandgent) (sound sleep is healthy) (all mothers wish their children to sleep, because it is... healthy—Russell) (the second fruit of friendship is healthful and sovereign for the understanding—Bacon) Wholesome (see also healthy 2) is a more homely word than healthy that is typically perfectly interchangeable with the latter (provide wholesome, well-balanced meals) (books that are wholesome reading) (mathematics... is a wholesome discipline because it requires a high degree of concentration and because it shows so inexorably the difference between right and wrong—Grandgent) but wholesome is the one of these words that may also be used in a much weakened sense to mean not detrimental to health or well-being (some sausages may contain wholesome filler as well as meat and seasonings) (reexamining our idea of a wholesome food, particularly from the point of view of its freedom from chemical additives which may be harmful to the consumer—JAMA) Salubrious applies chiefly to climate or to air that is pleasantly invigorating yet devoid of harshness or extremes (the salubrious mountain air and water—C. B. Davis) Salutary implies a tonic, corrective, or similarly beneficial effectiveness; often it is applied to something that is itself unpleasant (salutary advice) (idle ladies and gentlemen are treated with salutary contempt—Shaw) (the use of force in education should be very rare. But for the conquest of fear it is, I think, sometimes salutary—Russell) Hygienic suggests reference to the means and the rules of promoting physical or mental health, especially of the public. The term therefore commonly implies use of approved means or obedience to approved rules because they are conducive to health (instruct children in the hygienic care of mouth and teeth) (stuffy schoolrooms are not hygienic) (provision is made... for safe and hygienic working conditions—Amer. Guide Series: Mich.) Sanitary implies reference to measures taken or that can be taken to guard against infections or conditions that promote disease. The term therefore usually implies the promotion of health, especially public health, through interference with causes that bring about disease or epidemics (sanitary plumbing) (sanitary regulations) (the
heap

sanitary care of foods} {drainage of swamps and similar sanitary measures} Sanitary is sometimes used in place of healthful but with a stronger emphasis upon effectiveness} {solitary communion with nature does not seem to have been healthful or sweetening in its influence on Thoreau’s character—J. R. Lowell}

*beneficial, advantageous, profitable: remedying or remedial, correcting or corrective (see corresponding verbs at correct): helping or helpful, aiding (see corresponding verbs at help)

* deleterious, detrimental, noxious, *pernicious

healthy 1 *healthful, wholesome, salubrious, salutary, hygienic, sanitary

* healthy, sound, wholesome, robust, hale, well are comparable when meaning having or manifesting health of mind or body or indicative of such health. Healthy may imply the possession of full vigor and strength of body or mind or it may merely imply freedom from signs of disease or abnormality 2 *healthy body 3 *healthy boy} {during a healthy and active life—Elion} Often the term applies not to one having health but to what manifests one’s health or vigor or serves as a sign of it 4 *health has a healthy color in his cheeks—Dickens} 5 *she has a healthy appetite 6 *healthily craving for the sap and savor of a more personal, national art—Binyon} {in healthy reaction to the romantic fustian of the…nineteenth century—Christopher Fry}

Sound even more strongly implies the possession of perfect health or the absence of all defects and therefore suggests not even the slightest sign of disease or of physical weakness or defect 7 *sound mind in a sound body} {that child is … much too emotional to be ever really sound—Conrad} 8 *his tastes were healthy, his wits sound—Rose Macaulay}

Wholesome (see also healthful) implies a healthiness that impresses others favorably, especially as indicative of a person’s physical, mental, and moral soundness or often more specifically of a person’s balance or equilibrium 9 *thankful … that he had his mother, so sane and wholesome—D. H. Lawrence}

* such studies … promote … a wholesome dislike of sophistry and rhetoric—Inge} {her eyes shining, her face aglow, looking oddy wholesome in a smeared white painter’s smock—Wouk}

Robust implies the antithesis of all that is delicate; it usually connotes manifest vigor of health as shown in muscularity, fresh color, a strong voice, and an ability to work long and hard 10 *exercise tends to develop robust boys and girls} {a hearty, robust man in his middle sixties—Mannix} 11 *he is in robust health} {speak in a robust voice} 12 *Hale, which is a close synonym of sound, is applied chiefly to elderly or aged persons who not only show no signs of infirmity or senility but manifest qualities of men in their prime 13 *he is hale and hearty at 85} {Pete Gurney was a lusty cock turned sixty-three, but bright and hale—Masefield}

Well, which is commoner as a predicative than as an attributive adjective, is a rather noncommittal term; it implies freedom from disease or illness but does not necessarily suggest soundness or robustness 14 *is your father well?} 15 *he is always well} 16 *she has never been a well person} {however ill one has been, he can (usually) get better, and keep getting better—he can get well—Menninger}

* vigorous, lusty, energetic: * strong, sturdy, stalwart, tough, tenacious

* unhealthy — Con infirm, frail, feeble, *weak

heap n pile, stack, shock, cock, mass, bank (see under heap vb)

* aggregate, aggregation, conglomerate, conglomerate: collection, assemblage (see under gather)

heap vb Heap, pile, stack, shock, cock, mass, bank are comparable as verbs when they mean to bring together into a more or less compact group or collection a number of things and as nouns when they denote the group or collection so assembled. Heap is the least definite in its implications; it usually implies a moundlike shape and more or less careless or fortuitous arrangement; it may or may not imply a personal agent, an assemblage of like things, close packing, or a large quantity 17 *throw all the discarded clothes into a heap} {heap the sand in this corner of the lot} {the miser gloated over his heaps of coins} {the wind heaps the leaves under the garden wall} 18 *stacks of firewood were heaped all about the stove—Mason}

Pile distinctively implies the laying of one thing or one layer on top of another in a more or less orderly formation; it usually implies a personal agent and an assembling of like things or things of approximately the same size or shape 19 *pile magazines according to their sizes} {a pile of letters on a desk} 20 *pile logs} {a pile of bricks}

Stack more strongly implies orderly and compact arrangement and the assembling of like things; it almost invariably suggests personal agency and a particular shape or form, and it has a distinctly restricted range of idiomatic references. Thus, one stacks hay, straw, or grain in the sheaf into a cylindrical form or a four-sided, round-cornered form of a compact mass so placed as not to shed rain; one stacks firewood by arranging the pieces neatly into a rectangular pile; one stacks arms when one sets up rifles so that they form a pyramid; one stacks lumber by so arranging it in a pile that air may circulate and warping be minimized 21 *hay curing in the stack} {a stack of lumber} So strongly does stack suggest care in arrangement that it carries specific connotations in some of its applications; thus, to stack cards is to arrange them secretly for cheating; a stack is in Great Britain a measure of stacked coal or firewood equal to four cubic yards. Shock and cock are the narrowest of these terms. Shock is used primarily of sheaves of grain (as wheat, rye, or oats) or of stalks of Indian corn which are stacked upright with butt ends resting on the ground 22 *when the frost is on the pumpkin and the foddler’s in the shock—Riley} Occasionally it, like cock, is used with reference to hay stacked in a conical pile 23 *cock up the hay from the windrow}

Mass (see also mass n under bulk) usually suggests amorphousness; it also implies either a capacity in the things which are brought together for cohering with or adhering to each other so as to form a blended or fused whole or a highly compact or dense agglomerate, or an external process which forces them to cohere or adhere; thus, a pasty substance used in making up pills and troches is called a mass by pharmacists; some flowers (as violets) tend to grow in masses or to set up rifles so that they form a pyramid; one stacks masses of smoke hung amid the darting snakes of fire—Meredith} {a vine, remarkable for its tendency, not to spread and ramble, but to mass and mount—Cather}

Bank (the verb is often followed by up) is used chiefly in reference to substances which when affected by moisture, freezing, or pressure form, or seem to form, into compact masses 24 *bank the snow on each side of the path} 25 *bank up a sandpile} {build a snowbank} {cloud banks} {the wiser heads in Rome, seeing the clouds banking in the North, had clamored for the employment of the ablest of Roman com-
manders—Buchan
Ana *accumulate, amass, hoard: collect, assemble, *gather
Con *scatter, disperse, dissipate, dispel

hearing, audience, audition all mean a formal opportunity to be heard by persons having authority to question or the power of decision. Hearing is not only the general word applicable to such an opportunity not only to be literally heard but to demonstrate worth or qualities in any rational manner (a new trend which is struggling for a hearing—Sapir) but is also a technical term. In legal use it designates a formal listening by a judge or tribunal to the arguments and proofs offered either in interlocutory proceedings or in a preliminary examination in a criminal case; however, only in equity practice is it applicable to a trial. It is also used in government and politics for a formal opportunity offered to citizens to state their views on proposed legislation or administrative action, or to present their objections to assessments on property, or to give evidence in a legislative or other investigation. Audience is more often used of a hearing that is granted as a favor or mark of esteem than of one that can be demanded as a right; therefore it is used particularly in reference to interviews by appointment granted by a sovereign, a high-ranking ecclesiastic (as a pope), or a diplomatic representative of high standing (the French ambassador upon that instant craved audience; and the hour, I think, is come to give him hearing—Shak.) (I had an audience . . . with the Spanish Minister—Disraeli) Audition is applicable to a hearing by expert judges of a performer (as a singer, a musician, a public speaker, an actor, or a dancer) in order to test the merits of his performance with, usually, a view to his possible engagement (operative auditions)

hearsay n *report, rumor, gossip

heart *center, middle, core, hub, nucleus, midst, focus

heartache, heartbreak *sorrow, grief, anguish, woe, regret

hearten *encourage, inspirit, embolden, cheer, nerve, steel
Ana *strengthen, fortify, invigorate, energize: rally, arouse, rouse, *stir
Ant dishearten—Con *discourage, dispirit, deject: *depress, weigh

heartfelt *sincere, hearty, unfagged, wholehearted, whole-souled
Ana genuine, veritable, *authentic, bona fide: profound, *deep

hearty heartfelt, *sincere, unfagged, wholehearted, whole-souled
Ana warm, warmhearted, responsive (see TENDER): *deep, profound: exuberant, *profuse
Ant hollow

heave vb raise, *lift, hoist, elevate, boost, rear

heavily *celestial, empyreal, empyrean
Con hellish, *infernal: earthly, earthy, terrestrial, mundane, worldly, sublunary

heavy, weighty, ponderous, cumbrous, cumbersome, hefty.
Something is heavy which is denser and more compact in substance or larger in size or amount than the average of its kind or class and so weighs more in proportion (lead is a heavy metal) (a heavy stone) (a heavy child for his age) (a heavy silk) (a heavy bread). In extended use what is heavy means down the senses or the spirits or is of such nature that the mind or the body finds difficult to bear or endure (there came through the open door the heavy scent of the lilac—Wilde) (there was the crushing sense . . . of having been put down as a tyresome and heavy young man—Benson) (when a great writer . . . creates a speech of his own which is too clumsy to be flexible and too heavy to be intimate—Ellis) Often, also, heavy is applied to the heart, the mind, or the body to imply a being weighed down (as with grief, worry, weariness, or overwork) (the old minister’s heart was often heavy in his breast—Deland) (when he was not too heavy with fatigue—Mary Austin)

At other times the term merely implies a lack of some quality (as lightness, vivacity, or grace) which enliven and stimulates (compared with her, other women were heavy and dull . . . they had not that something in their glance that made one’s blood tingle—Cather) Something is weighty which is actually and not merely relatively heavy (the larger trucks will carry the heavy packages) (as weighty bodies to the center tend—Pope) In extended use what is weighty is highly important or momentous (weighty matters of state) (weighty questions for consideration) (a work whose weighty theme should give it unity enough—Times Lit. Sup.) or produces a powerful effect or exerts an impressive influence (weighty argument) (a weighty speech) (there were also weighty reasons of statecraft to influence him—Buchan) Something is ponderous which is exceedingly heavy because of its size or its massiveness and cannot move or be moved quickly (a ponderous shield) (a ponderous machine) (the sepulcher . . . hath oped his ponderous and marble jaws—Shak.) (in extended use what is ponderous is unduly intricate, involved, complicated, or labored (his ponderous work on the fairy mythology of Europe—Meredith) (ponderous jests) (I have heard mathematicians groaning over the demonstrations of Kelvin. Ponderous and clumsy, they bludgeon the mind into a reluctant assent—Huxley) Something is cumbrous or cumbersome which is so heavy and so bulky that it is difficult to deal with (as in moving or carrying) (the only currency in circulation was of iron, so cumbrous that it was impossible to accumulate or conceal it—Dickinson) (its space was pretty well occupied with the two beds, and the cumbrous furniture that had been bought for a larger house—Archibald Marshall) (the cumber some old table with twisted legs—Dickens) In extended use both words are applicable to what is both ponderous and unwieldy (he is the Philistine who upholds and aids the heavy, cumbrous, blind, mechanical forces of society—Wilde) (he also uses a cumbersome and high-sounding terminology which has a mystifying effect—Weldon) Something is hefty which one estimates as heavy or weighty (as by holding in one’s hands or by measuring with one’s eyes) (a hefty fellow, in the habit of standing no nonsense—Maugham) (a hefty chair) (she has grown hefty since I saw her last) In extended use the word may imply a generous amount or portion (a hefty boost in wages) (a good, hefty slice of pie)

Ana solid, hard, *firm: oppressing or oppressive, weighing down or upon, depressing (see corresponding verbs at DEPRESS)
Ant light

hobble vb *bait, badger, hector, chivy, hound, ride
Ana plague, pester, harass, harry, *worry, annoy; disconcert, rattle, faze, discomfit, *embarrass: rack, torment (see AFFLICTION)

hecttor vb *bait, badger, chivy, heckle, hound, ride
Ana tease, tauntize, plague, pester, *worry: bother, vex, irk, *annoy: fret, chafe, gall (see ABRADE)

heedless thoughtless, *careless, inadvertent
Ana *forgetful, oblivious, unmindful: *abstracted, absent, absentminded, distraught: frivolous, light-minded, flippant, volatile (see corresponding nouns at LIGHTNESS): remiss, lax, slack, *negligent, neglectful
Ant heedful—Con attentive, *thoughtful, considerate: *watchful, vigilant, alert

hefty *heavy, weighty, ponderous, cumbrous, cumbersome

A colon (:) separates groups of words discriminated. An asterisk (*) indicates place of treatment of each group.
height, altitude, elevation mean the distance a thing rises above the level on which it stands, or the vertical distance between a given level taken as a base and a thing that is above it. Height may be used with reference to whatever can be so measured, whether high or low by a standard of comparison (letters not more than one-twentith of an inch in height) <the tree rises to a height of one hundred feet> It may be used interchangeably with any of the other words, but it is not so specific. While altitude and elevation are often interchangeable, altitude may be preferred in referring to vertical distance above the surface of the earth or above sea level or to the vertical distance above the horizon in angular measurement (an airplane flying at an altitude of 12,000 feet) <(the altitude of a cloud)> <the altitude of a star> Elevation is used especially in reference to vertical height above sea level on the surface of the earth; thus, one would speak of the altitude rather than the elevation of a balloon; a village situated at an elevation, preferable to altitude, of 2000 feet <atmospheric pressure depends on elevation> <(Pike's Peak has an elevation of 14,110 feet)>

heinous *outrageous, atrocious, monstrous Ana *flagrant, glaring, gross, rank: nefarious, flagitious, infamous (see VIGOUR)\textit{Ant} venial —Con trivial, trifling, *petty, paltry hellish *infernal, chthonian, Hadean. \textit{Tartarean, stygian Ana} devilish, diabolical, *fiendish, demoniac help vb 1 \textit{Help, aid, assist} and their corresponding nouns help, aid, assistance are often used with little distinction as meaning (for the verbs) to furnish another person or thing with what is needed (as for the accomplishment of work or the attainment of an end) or (for the nouns) the support so furnished. All usually imply cooperation or a combination of effort. Help, however, carries a stronger implication of assistance toward the end or objective than do the others <every little bit helps> <you are hindering rather than helping> (a drug that helps one to sleep) <please help me over the fence> Aid strongly suggests the need of help or relief and therefore sometimes imputes weakness to the one aided and strength to the one aiding but this is not the case. She knows . . . that saints will aid if men will call —Coleridge <cannonballs may aid the truth but thought's a weapon stronger; we'll win our battles by its aid—Mackay> <his undergraduate work . . . was aided by tuition grants—Current Biog.> \textit{Assist}, which seldom loses its original implication of standing by, distinctively suggests a secondary role in the assistant or a subordinate character in the assistance; thus, a deputy assists rather than aids his superior; a good light assists the eyes in reading (every additional proof that the world is a closely interwoven system . . . assists religious belief—Inge) <moves through the streets at a clip that suggests they have been called to assist at a rather serious fire—Panter-Downes> Ana - *support, uphold, back, champion: *benefit, profit, avail: forward, further, promote, *advance Ant hinder —Con impede, obstruct, block, bar (see HINDER): *frustrate, thwart, foil, baffle, balk: *embarrass, discomfit, harm, hurt, *injure 2 *improve, better, ameliorate Ana *palliate, gloss, extenuate, whiteness, whiten: alleviate, *relieve, mitigate help n aid, assistance (see under HELP vb 1) \textit{Ana} cooperation, uniting or union (see corresponding verbs at UNITE): supporting or support, backing (see SUPPORT vb)

\textit{help} *assistant, coadjutor, aid, aide, aide-de-camp
\textit{hem} vb *surround, environ, encircle, circle, encompass, compass, gird, girdle, ring Ana *enclose, envelop, wall, cage, fence: confine, circumscribe, restrict (see LIMIT) hence consequently, *therefore, then, accordingly, so henchman *follower, adherent, disciple, partisan, satellite, sectary

\textit{herald} n forrunner, harbinger, precursor \textit{Herculean} *huge, vast, immense, enormous, elephantine, mammoth, giant, gigantic, gigantean, colossal, gargantuan, cyclopean, titanic, Brabdingnagian

\textit{hereditary} congenital, inborn, inherited, *inanimate, inbred Ana transmitted, conveyed (see CARRY): *inherent, constitutional, intrinsic, ingrained \textit{heretic} n Heretic, schismatic, sectarian, sectary, dissenter, nonconformist are comparable when denoting a person who from the point of view of a particular church or religious faith is not orthodox in his beliefs. \textit{Heretic} applies to one who teaches and maintains doctrines that are contrary to those which are actually taught by the church or faith to which he belongs or has belonged <the precursors of Luther were for the most part regarded as heretics> <he drew a circle that shut me out—heretic, rebel, a thing to flout—Markham> <to delete from history its heretics and its radicals would be to deprive it of that rare quality known as independence of mind—Neff> Schismatic applies to one who separates from, or escapes from, the establishment of a church or communion usually by differing on a minor point or points of doctrine; thus, from the point of view of the Roman Catholic Church, those Eastern Christians who seceded to form the Orthodox Church are schismatics, whereas Luther, Calvin, Cranmer, and other leaders of the Reformation are heretics: to the Church of England, the early Puritans and Quakers were schismatics <it was difficult to get any bishop to run the risk of ordaining men whom Rome regarded as schismatics—Moss> \textit{Sectarian} may be applied to a member of a religious denomination or sect, often neutrally but sometimes with the implication of a rigorous and bigoted adherence. Sectary, which is chiefly historical, more than sectarian, implies membership in a sect that is relatively small and composed of ardent and often by connotation narrow-minded and bigoted partisans <the passing of the bill by Parliament was advocated both by churchmen and by sectarians> <collectivist movements within Christianity have proceeded almost entirely from the Anabaptists and other sectaries—Inge> \textit{Dissenter}, which basically means one who dissents, in the present connection, applies to a person who separates himself from and worships in a communion other than an established church (as the Church of England); nonconformist is ordinarily synonymous with dissenter, but the term has been specifically applied in England to persons who refused to accept certain religious doctrines or accepted to follow certain religious practices imposed by the established church; thus, many of the 2000 clergymen who refused to subscribe to the Act of Uniformity in 1662 were regarded as nonconformists: Roman Catholics in England (as a class) have been held to be nonconformists rather than dissenters, since they did not accept the Church of England at any time. Nevertheless the terms are often used interchangeably <Wesley was not a schismatic, or even, in the doctrinal sense, a dissenter. He desired, not to secede from the Established Church, but to fill it with new life—Atlantic> <the English and Scotch Nonconformists have a great horror of establishments>
heroism, hermit, hermaphroditic, hermaphrodite

heritage, inheritance, patrimony, heretical

hesitation 401

reached and so usually connotes weakness or treat
<let us hold fast . . . without waving—Heb 10:23>
<the front line which had been advancing rapidly wavered
under the heavy fire> <you waver in your convictions
—Jefferies> 

Vacillate implies prolonged hesitation re-
Sulting from one's inability to reach a fixed or final de-
cision; the term connotes alternate decision and indecision
or a shifting (as in opinions, choices, or loyalties) <he
may pause, but he must not hesitate—and tremble, but
he must not vacillate—Ruskin> <he had vacillated
between various substitutes for Oswald up to the very
moment when he named the four upon whom he decided
finally—H. G. Wells> <I have vacillated when I should
have insisted; temporized when I should have taken
definite action—Marsh> 

Falter suggests a wavering in purpose or action that is evident or is made evident in such signs of fear or nervousness as trembling or the breaking of the voice <with voice that did not falter
though the heart was moved—Wordsworth> <neither to
change, nor falter, nor repent—Shelley> <his eyes did
not flinch and his tongue did not falter—Conrad>

Hide vb Hide, conceal, screen, secrete, cache, bury, en-

sconce are comparable when meaning to withdraw or to
withhold from sight or observation. Hide, the general
term, and conceal are often interchangeable. But hide
may or may not suggest intent <let me go, that I may
hide myself in the field—1 Sam 20:5> <the snow hides all
the ground> or a putting into a place out of the range of
others’ sight <hide the money under a mattress> <he
hid somewhere in his grimy little soul a genuine love for
music—Kipling> 

Conceal, on the other hand, more often implies intention <hidden things that had never been
concealed, that had merely been dropped into forgotten
corners and out-of-the-way places, to be found a long
while afterward—Roberts> or effective hiding <Sophia
had held that telegram concealed in her hand and its
information concealed in her heart—Bennett> or a refusal
to divulge <I am glad to be constrained to utter that which
torments me to conceal—Shak> <Elizabeth was forced to
conceal her lover from her father—Woolf> 

Screen implies a hiding or concealment of someone or some-
thing in danger of being seen or known by interposing
between him or it and others something (as a screen or
curtain) which shelters and prevents discovery <Wildeve
screened himself under a bush and waited—Hardy> <the mere idea of a woman’s appealing to her family
to screen her husband’s business dishonesty—Wharton>

Secrete implies a depositing, often by stealth, in a place
screened from view or unknown to others <secrete
smuggled goods in a cave> <squirrels secrete their winter
supply of nuts> <and in mere sound secrete his inmost
sense—de la Mare> 

Cache implies an even more carefully
chosen hiding place than secrete, for it usually implies
protection from thieves or from the elements; sometimes
the notion of secure storage more or less completely ob-
sures that of concealment <the explorers took only
enough food and ammunition for the three days’ trip, the
rest they cached in pits dug for that purpose> 

Bury implies a covering with or a submerging in something that hides or conceals or serves as a hiding place <buried his face in his
hands> <his intention had been to bury the incident in his
bosom—Wharton> 

Enconce in the relevant sense implies concealment especially in a raised or enclosed place
<bounded into the vehicle and sat on the stool, ensconced
from view—Hardy> <ensconced the boy in a cubbyhole—
Peggy Bacon>

High, tall, lofty mean above the average in height. High, the
general term (opposed to low), implies marked expansion
upward and is applied chiefly to things which rise from a
base or foundation (a high hill) (a high building) or are
placed at a conspicuous height above a lower level (as a
floor or the ground) (a high ceiling) (a high-arched bridge) 

Tall (often opposed to short) applies to what rises
or grows high as compared with others of its kind, especially when its breadth or diameter is small in proportion to its height; thus, in idiomatic use one would ordinarily refer to a high hill but a tall man (a tall tree) Lofty is often poetical for high, but it usually implies even greater and more imposing altitude (a lofty peak) (a lofty perch) (the loftiest star of unascended heaven—Shelley) High alone of these words is used to express degree or intensity (high speed) (high power) (high color) (high seasoning) (a high wind) (a high fever)

In extended use high connotes distinction, elevation, and sometimes pride or arrogance (heaven's high king—Millon's) (she . . . thought him cold, high, self-contained, and passionless—Tennyson) (nobody else could utter those two words as he did, with such gravity and high courtesy—Cather) Lofty suggests moral grandeur or dignity (exultation . . . solemn, serene and lofty—Shelley) (that lofty musing on the ultimate nature of things which constitutes, for Pascal, "the whole dignity and business of man")—Huxley The term may also imply haughtiness or superciliousness (she is greatly disliked because of her lofty airs) (looked down upon him with the loftiest contempt—Dickens) Tall in extended use is usually slangy or informal and often implies exaggeration or departure from the strict truth (indulging in tall talk about the vast mysteries of life—White) (she is given to tall stories) Ana elevated, lifted, raised, reared (see LIFT vb): *deep, profound, abysmal: heightened, enhanced, intensified (see INTENSIFY): increased, augmented (see INCREASE vb) Ant low

high-spirited *spirited, metsomes, spunky, fiery, peppery, gingly Ana gallant, chivalrous, courtly, courteous (see CIVIL): audacious, bold, *brave, intrepid hilarity jollity, *mirth, gle Ana merriment, blitheness, jocundity (see corresponding adjectives at MERRY): cheerfulness, gladness, joyfulness, joyousness, lightheartedness (see corresponding adjectives at GLAD): *fun, play, sport, jest, game

hinder adj hinder, rear, *posterior, after, back Ant fore, front hinder vb Hinder, impede, obstruct, block, bar, dam all mean to put obstacles in the way of a person or thing or of his or its action. To hinder is to check or hold back someone or something in action or about to act, move, or start; the term usually stresses harmful or annoying delay or interference with progress (from your affairs I hinder you too long—Shak.) (the artist's) education is . . . hindered rather than helped by the ordinary processes of society which constitute education for the ordinary man—T. S. Eliot) Sometimes, however, hinder definitely implies prevention (the rain hindered their going) (machines are sometimes hindered by speed from delivering their best performance—Diehl) To impede is to impose upon a person or thing that is moving or in action or in progress something that slows him or it up (as by clogging, hammering, or fettering); the term seldom suggests the stopping of movement or progress, but it commonly implies difficulties so great that movement or action are painfully slow or seriously impaired (around their tattooed limbs they often wore coiled brass rings or bands, which in time became so tight that they impeded the circulation—Heiser) (the teaching of mathematics is . . . impeded by the use of Roman symbols—Grandgent) (he . . . placed his hand on hers, impeding the rapidity of her embroidery needle—Rose Macaulay) To obstruct is to hinder free or easy passage; the word implies interference with something in motion or in progress or obstacles in the path or channel (highways obstructed by fallen trees after a storm) (the tall building obstructed the light from the west) (the view was obstructed by billboards) (the restriction of the power of the House of Lords to obstruct legislation—Plummer)

To block (often with up) is to obstruct so effectively as to close all means of egress or ingress and to prevent all passage (shifting sand blocked the entrance to the channel) (his nose was blocked up by a cold) (in these wild places . . . a snowstorm . . . does not block the King's highways and paralyze traffic as [in] London—Jefferey) To bar is to block or to prohibit passage, ingress, or egress (a long freight train . . . barred the passage along the road—Anderson) (that route is barred to steamers—Kipling) Sometimes the implication of prohibition is so strong that there is no hint of blocking (the law of arms doth bar the use of venomed shot in war—Butler d. 1680) To dam (often with up) is to obstruct with obstacles that prevent a continued flow (as of water, speech, or emotion) and so provide no outlet or exit (felled trees damned up the brook) (the strait pass was damned with dead men—Shak.) (trembling with damned-up emotion) Ana arrest, check, interrupt: *hamper, fetter, clog, trammel, shake, manacle, hog-tie: *restrain, inhibit, curb, check: baffle, balk, *frustrate Ant further —Con *advance, forward, promote: *speed, accelerate, quicken

hire n *wage or wages, pay, salary, stipend, fee, emolument

hire vb Hire, let, lease, rent, charter are comparable when they mean to take or engage something or grant the use of something for a stipulated price or rate. Because some of these words are referable only to the act of the owner and some only to the act of the one who engages, and because they vary in their applications, they are not always true synonyms. In their narrowest use hire and let are complementary terms, hire meaning to engage the use or occupancy of something at a price or rate, and let meaning to grant its use or occupancy for a stipulated return (we hired a house for the summer after having some difficulty in persuading the owner to let it) Nevertheless hire, especially when used of persons or, by implication, their services, may be employed in either sense (hire a servant) (hire oneself (often with out) as a servant) (hire workers by the day) (men willing to hire themselves out at any wage) In distinctive use lease means to let on a contract by which the owner conveys to another for a set term, and usually at a fixed rate, land, buildings, or similar property (the lands in America [in Colonial days] . . . are in general not tenanted nor leased out to farmers—Smith) But lease may also be employed in the sense of to hire on a lease (they have leased the house where they live for three years) Rent implies payment in money (or in kind) for the use of land and the buildings thereon. As long as this idea is stressed, the verb may denote either to hire or to let a property (rent their house from the college) (the college rents these houses only to professors) Rent (in the sense of either hire or let) is also employed in reference to various commodities other than real property (rent books from a circulating library) (rent an automobile for the summer) Charter means to hire by a contract (charter party) similar to a lease whereby the use of a ship is given for a certain time and the safe delivery of its cargo
is promised (it was impossible to charter a ship for the purpose—Irving) The word is often extended to other means of transportation (as buses or airplanes) and then usually implies to reserve by hiring or leasing the exclusive use of a vehicle that is normally available to the general public (charter a bus for a club picnic) 

**Ana** secure, obtain, *get, procure: engage, contract, *promise 

**hireling** adj *mercenary, venal, hack 

**Ana** servile, menial, *subservient: *mean, abject, sordid 

**historic, historical** are sometimes distinguished in meaning. Historic is used when the idea of association with history in the sense of being celebrated, well-known, or deserving to be well-known is stressed (we shall visit many historic spots on our trip) (this is historic ground on which we are standing) (the incident became historic in the Square—Bennett) (the historic conference in 1948, when Lysenko announced his formal endorsement by the Communist Government—Martin Gardner) Historical, on the other hand, implies use of or dependence on or relation to history, especially of facts or events; thus, an historic event is one that is important or famous, while an historical event is one that is supported by the evidence of history (he is conducting an historical investigation of the Pelagian heresy) (an historical novel) (we doubt the historical truth of his conclusions) (a historical phenomenon as deeply rooted as English snobbery is not to be swept away) (in the night—Brogan) (the author examines his own background and the historical accident which caused him to reverse the emigration of his ancestors from England to America—R. B. West) 

**Ana** famed, *famous, celebrated, renowned 

**history, chronicle, annals** mean a written record of events important in the life or career of a race, a nation, an institution, or a region. A history is more than a mere recital of what has occurred; in the modern conception, at least, it requires order and purpose in narration, but not necessarily a strictly chronological order nor a common definitely defined purpose. Usually, also, it is thought of as an interpretation of events especially in their causal relationships. It may exhibit fullness and completeness or, on the other hand, selection of details, especially when a single aspect is considered or a thesis is to be proved. A chronicle is a recital of events in chronological order without interpretation (the Anglo-Saxon Chronicle) (Holinhed's Chronicles of England, Scotland, and Ireland) Annals is not always clearly distinguishable from chronicle except in its emphasis upon the progress or succession of events from year to year. The term need not imply a discursive treatment or a continued narrative, for some of the ancient annals are merely records of important events in each year of the time covered. However, in the selection of titles for modern historical works these distinctions are not always observed, for chronicle and annals are sometimes chosen as less formal or pretentious than history or because chronicle stresses narrative quality and annals the selection of noteworthy events (in the earlier Middle Ages, history was written chiefly in the form of annals, that is, the enumeration of the notable events of each year, or of chronicles, in which happenings were recorded in somewhat more continuous, but still strictly chronological and unanalytical form—R. A. Hall) 

In their extended senses only history and annals are closely comparable. Both of these words designate more or less shifting abstractions. History usually signifies the known past, or the sum total of events that are remembered because recorded by historians or evidenced by documents, monuments, and remains (nothing like this has happened hitherto in the history of man) (a land without ruins is a land without memories—a land without memories is a land without history—Ryan) Annals most often signifies the sum total of events, with their dates, that have become fixed in the mind because of the momentousness, often tragic momentousness, of those events (the short and simple annals of the poor—Gray) (happy the people whose annals are blank—Carlyle) Chronicle, on the other hand, is often applied to something concrete (as a person or thing) that records, relates, or manifests events as they happen (pitch upon the veriest camp follower of the New Poetry as the abstract and brief chronicle of its procedure—Lowes) (the neighborhood . . . was one of those highly favored places which abound with chronicle and great men—Irving)
holders' grip on governmental machinery—A. D. H. Smith
<moreover habits acquired very early feel, in later life, just like instincts; they have the same profound grip—Russell
> Grasp implies the power to reach out and get possession or control of something; in its basic applications it may be distinguished with difficulty from grip (did not expect to feel his hand snatched away from her grasp as if from a burn—Conrad) but in its now more common extended applications especially to what can be possessed by the mind it frequently distinctively connotes remarkable powers of comprehension on the one hand or outstanding range of mastery on the other (ah, but a man's reach should exceed his grasp, or what's a heaven for?—Browning) (his grasp of the singular entirety of medieval civilization—Cram) (what competent person supposes that he understands a grain of sand? That is as much beyond our grasp as man—Justice Holmes) (Gray and Collins were masters, but they had lost that hold on human values, that firm grasp of human experience, which is a formidible achievement of the Elizabethan and Jacobean poets—T. S. Eliot)
> Clutch basically implies a seizing and holding with the avidity or rapacity of or as if of a bird of prey (a rabbit in the clutch of an owl) In its extended use it stresses, far more than any of the preceding nouns, the notion of control as distinguished from possession (fell into a user's clutches) (in the clutch of a great fear) (in the fell clutch of circumstance I have not winced nor cried aloud—Hemley) or that of the act or fact of grasping with violence, with effort, or with frantic determination (as under the impulsion of terror) (in the clutches of a desperate infatuation—Schwartz) (the clutch of a drowning man at a straw) (I can't hold on ten seconds more...my clutch is going now—Marryat) (in the dry, womanless clutch of the army—Irwin Shaw)

Ana possession, ownership (see corresponding verbs at HAVE): control, command, *power, authority

hold back hold, withhold, reserve, detain, retain, *keep, keep back, keep out

hole n Hole, hollow, cavity, pocket, void, vacuum are comparable when they mean an open or unfilled space in a thing. Hole may apply to an opening in a solid body that is or that suggests a depression or an excavation (those holes where eyes did once inhabit—Shak) (a gopher lives in a hole in the ground) or to one that passes through the material from surface to surface (look through a hole in the wall) (a hole in a garment) Hollow, which specifically implies opposition to solid, basically suggests an unfilled space within a solid object, usually one that has a surface opening (a cave is a hollow in a rock) (a nest in the hollow of a tree trunk) The term, however, is often applied to a depression in a surface (the ground was not quite smooth, but had many little heights and hollows) or to a deep and narrow valley (as a gully or ravine) (I hate the dreadful hollow behind the little wood—Tennyson) Cavity is a somewhat more learned word than hollow with much the same implications as the latter in its basic sense (an old cavity excavated by a woodpecker—Burroughs) The words are often used interchangeably, but cavity is preferred in technical use (a cavity in a tooth) (the abdominal cavity) Pocket is often employed in place of cavity for an abnormal or irregular space (as a bubble-like one in a substance or a sacklike one in a body). It is particularly referred to one that is a source of danger, especially in possessing the tendency to hold or to collect a foreign substance (as dirt, air, or pus) (a pus pocket in the lungs) (a pocket in an iron casting) (an air pocket in a pipe carrying a liquid interferes with the flow) (we found many persons at work...searching for veins and pockets of gold—Bayard Taylor) Void applies to an apparently empty space, especially one of marked extent or of conspicuous duration, whether in a thing that is normally continuous (the air-filled voids of the soil—A. M. Bateman) or between things that are normally separate (the American planner will have...to give up his opaque passion for the transparent wall and go back to the alternation of solid and void that is characteristic of the Japanese house—Mumford) (the immense void between the earth and the nearest of the planets) (we suffer when we have time to spare and no printed matter with which to plug the void—Huxley)
> Vacuum basically and especially in technical use applies to space entirely devoid of matter; more often, however, it is applied to the space within an enclosed vessel in which by mechanical means the air has been practically, though seldom completely, exhausted. In its extended use the term applies to a condition or situation which resembles a true vacuum in its emptiness of all that normally should fill it or exert influence on anyone or anything that remains in it (you are not asked, as you are by so many novelists, to concern yourself with the fortunes of two or three people who live in a vacuum...but with the fortunes of all the sorts and conditions of men who make up the world in which we all live—Maughan) (he felt a sort of emptiness, almost like a vacuum in his soul—D. H. Lawrence)

Ana *aperture, oriﬁce, interstice: perforation, puncture, bore, prick (see corresponding verbs at perforate): slit, slash, cut (see cut vb)

holiness, sanctity are often used without distinction to mean either the state or the character of one who is spiritually perfect or of something which is sacred or hallowed.
> Holiness more often implies spiritual perfection, whether intrinsic and essential (the holiness of the Lord) or acquired by effort (the holiness of a saint) than it does sanctity, although the latter implication is not uncommon (and an highway shall be there, and a way, and it shall be called the way of holiness; the unclean shall not pass over it—Isa 35:8) Sanctity may be used either as denoting saintliness or the holiness attained by a saint (die in the odor of sanctity) (men of eminent sanctity—Burke) or the quality of being sacred or by law and especially by natural or divine law immune from violation (the sense of the dignity of human nature is an even more civilized feeling than the sense of the sanctity of human life—Browning) (there is no greater sanctity in the right to combine than in the right to make other contracts—Justice Holmes)

Ana sacredness, divineness or divinity, spirituality, blessedness, religiousness (see corresponding adjectives at holy): devoutness or devotion, piousness or piety (see corresponding adjectives at devout): *goodness, virtue, rectitude

Ana & Con see those at empty adj 2

hollow n cavity, *hole, pocket, void, vacuum

Ana excavation, digging (see corresponding verbs at dig): *gulf, chasm, abyss: oriﬁce, *aperture

ho­lo­caust *fire, conflagration

holy, sacred, divine, spiritual, religious, blessed are comparable chiefly as epithets applied to persons or things associated with religion or worship and therefore either regarded with special reverence or veneration or thought of as having a character apart from what is material or
secular. Their choice is often a matter of idiom rather than of meaning inherent in the term. Holy (compare HOLLINESS) usually implies some quality or some attribute in the thing itself which makes it either suitable for use in worship or an object of veneration. As the strongest of these terms in its suggestion of a claim upon one's reverence, it is the only one directly applied to the Supreme Being in praise or laudation (Holy, holy, holy, Lord God Almighty—Rev 4:8) It also forms a part of some titles of the godhead or of a person of the Trinity (the Holy Spirit) It is also applied to some persons or group of persons as a mark of highest reverence or esteem; thus, the Holy Family consists of Mary, Joseph, and Jesus; the Holy Father is a frequent designation of the Pope; the Holy Synod is the governing body in some Orthodox churches. The term is comparably applied to particular things with a similar implication of reverence and esteem; thus, the central Eucharistic service of Christian churches is often called Holy Communion; Palestine is known as the Holy Land; water blessed for use in religious services is holy water; Holy Week is a week set apart for especially pious observances. In more general use holy is often the word chosen when one wishes to impute to what is so described some inherent character that dissociates it from what is mundane, material, or transitory (so holy and so perfect is my love—Shak.) (all is holy where devotion kneels—Holmes) (some words are considered so holy they must never be spoken aloud, such as the ancient Hebrew word for God—Chase) Sacred (see also SACRED) 2) differs from holy chiefly in implying a character given to a thing by blessing, dedication, consecration to religion or worship or to the uses of religion or worship, or by its being devoted wholly to such ends or uses; the term therefore usually suggests an opposition to what is profane or exists for profane uses; thus, the vessels used in a Eucharistic service are preferably called sacred vessels; sacred as opposed to profane history is biblical history or history dealing with biblical characters or biblical events; sacred as opposed to profane literature may denote any or all of the books of the Bible or sometimes any or all writings (as the Bible, the Talmud, and the Koran) which are regarded by various religions as sources of revealed truth (Sacred Writ) (sacred music) (in its appointed compartment in the synagogue rested the sacred Torah—Time) In more general use sacred applies chiefly to what one treasures as a thing apart, not to be violated or contaminated by being put to vulgar or low uses or associated with vulgar or low ends (when they saw all that was sacred to them laid waste, the Navajos lost heart. They did not surrender; they simply ceased to fight—Cather) (nothing is at last sacred but the integrity of our own mind—Emerson) Divine in its oldest and most definite sense implies either the character of deity or an origin from or an association with deity; thus, "divine being" implies both a difference from "human being" and from "angelic being" and the possession of some nature or essence of deity (the belief that Christ is both human and divine) (a divine right is one that comes from God) (divine service is a service having for its end the worship of God) In its weaker senses divine may suggest a supernatural or a superhuman character or origin or, in hyperbolic use, a perfection that is above that which is found on earth (the great mysteries declare that their experiences have some kind of cosmic and divine significance—Jour. of Religion) (that mighty orb of song, the divine Wordsworth—Wordsworth) (the strains . . . of divinest music—Farrar) (by what magic was it that this divine sweet creature could be allied with that old churl!—Meredith) Spiritual implies an opposition in character or in quality to what is bodily, material, earthy, or mundane; it may suggest incorporeal existence (angels are conceived of as spiritual beings) (the spiritual part of man) or independence from the merely physical or sensible (a spiritual marriage) (the leaders of Islam saw its spiritual foundations endangered by the subtle infidelities of pure rationalism—Gibb) or a definite relation to the soul or spirit in its aspiration toward or dependence on a higher power or in its perception of eternal values (the responsibility of human nature, not merely on the moral side, but equally on the spiritual side—Mackenzie) (the spiritual richness, the subtle emotional qualities, which illumined the great styles of the past—Belluschi) (our Declaration of Independence was written by men whose minds reached the spiritual level of eternal principles—McGranery) Spiritual in some chiefly technical legal and theological uses is more or less equivalent to ecclesiastical and then usually implies an opposition to temporal or civil (a spiritual lord, or lord spiritual, is a bishop or archbishop of the Church of England who has a right to sit in the House of Lords) (the boundary between lay and spiritual authority was never defined in pre-Conquest England—Stenton) Religious (for the application of this term to persons, see DEVOUT) implies an opposition to secular and a relation of some kind to religion; thus, religious history is the history of a religion or religions; religious literature is not the same as sacred literature but has a character that is determined by religion or by religious belief or feeling; religious music, unlike sacred music, is not necessarily suitable for use in services or prayer, for, although it includes sacred music, the term may also apply to music not composed for church use but animated by feeling or prompted by themes associated with religion (he stated that his discourses to people were to be sometimes secular, and sometimes religious, but never dogmatic—Hardy) (except for the nominal subjects of the legends, one sees nothing religious about them; the medallions, when studied . . . turn out to be less religious than decorative—Henry Adams) Blessed basically means consecrated (the Blessed Sacrament) and usually also suggests a supremely sacred character (our Blessed Lord) (the Blessed Virgin) In its derived senses blessed means beatified and supremely happy because enjoying the sight of God in heaven (the blessed spirits in heaven) In general use blessed may mean no more than enjoyable, pleasant, or satisfying (that extra blessed quarter hour in bed—Spectorsky) (we have no green vegetables here in winter, and no one seems ever to have heard of that blessed plant, the lettuce—Cather) (Ana) hallowed, consecrated, dedicated (see DEVOTE) adored, worshiped, venerated, reverenced, revered (see REVERE) devout, pious, religious (Ana) unholy —Con *profane, secular: *impious, blasphemous, sacrilegious, profane homage reverence, deference, obeisance, *honor *adoration, veneration, reverence (see under REVERE) fealty, *fidelity, devotion, loyalty, allegiance: tribute, panegyric, eulogy, *encomium home house, *habitation, dwelling, abode, residence, domicile homely *plain, simple, unpretentious *Ana familiar, intimate, close: *usual, wonted, customary, habitual: ill-favored, *ugly *Ant comely, bonny homily sermon, talk, *speech, address, oration, harangue, lecture homunculus manikin, midget, *dwarf, pygmy, runt honest *upright, just, conscientious, scrupulous, honorable *Ana truthful, veracious (see corresponding nouns at
honesty, honor, integrity, probity are comparable when meaning uprightness as evidenced in character and actions. Honesty implies refusal to lie, steal, defraud, or deceive (you can rely on his honesty) (he is a man of scrupulous honesty) (this crisis will be surmounted if the Church has the faith and courage, and, above all, the common honesty, to face it candidly—Inge) (was not greatly pleased with Lincoln, though admitting his honesty and fair mindedness—W. C. Ford) Honor (see also fame) adds to honesty the implication of high-mindedness or a nice sense of allegiance to the standards of one's profession, calling, or position (business honor is the foundation of trade) (I could not love thee, dear, so much, loved I not honor more—Lovelace) (the fourth generation of Ralstons had nothing left in the way of convictions save an acute sense of honor in private and business matters—Wharton) (a national administration of such integrity that its honor at home will ensure respect abroad—Eisenhower) Integrity implies such rectitude that one is incapable of being false to a trust or a responsibility or to one's own standards (his unimpeachable integrity as treasurer of a widows' and orphans' fund—Hawthorne) (the poet's sense of responsibility to nothing but his own inner voice, is perhaps his only way of preserving poetic integrity against the influences of a perverse generation—Day Lewis) Probity stresses tried or proved honesty or integrity (that sort of probity which such men as Bailey possesses—Keats) (probity in domestic policy and wise judgment in foreign policy—A. E. Stevenson) 

Honor n 1 glory, renown, *fame, celebrity, éclat, reputation, repute, notoriety 

A synonym for honor is fame; and the word is also used to designate the greatness or distinction of a person or thing, especially in death. It is also used to express the appreciation of the public for some act or service. 

Honor is the opposite of disgrace or disrepute, shame, ignominy, infamy, infamy.

2 Honor, homage, reverence, deference, obeisance all mean respect or esteem shown another as his due or claimed by him as a right. Honor may apply to the recognition of one's title to great respect or esteem or to an expression or manifestation of such respect and esteem (hold every good and conscientious man in high honor) (he declined the honor that was offered him) (they feel deeply the honor of belonging to the Senate, and the necessity of protecting the Senate against dishonorable men—New Republic) Homage adds to honor implications of accompanying praise or tributes of esteem especially from those who owe allegiance or service (all these are . . . thy gentle ministers, who come to pay thee homage, and acknowledge thee their Lord—Milton) In its extended use the term carries a stronger implication of a worshipful attitude than honor carries (to the poetry of Byron the world has ardently paid homage—Arnold) ("They say I'm hand-some." "You're lovely, Bella!" She drank in his homage—Meredith) Reverence (see also reverence) implies profound respect mingled with love or devotion (in general those parents have the most reverence who deserve it—Johnson) (it be hooves those of us who cherish the past to study Alfred's life and works with a special reverence—Malone) Defiance implies such respect for the person or his position or such reverence for his personality or such honor for his years or achievements that one courteously yields or submits one's own judgment, opinion, or preference to his (the arrangements for the flower show were altered out of deference to the wishes of the duchess) (a certain deference, not to say servility, to the heads of colleges is perhaps necessary to a physician that means to establish himself here—Gray) (looked like a great man . . . deriving dignity from a carriage which, while it indicated deference to the court, indicated also habitual self-possession and self-respect—Macaulay) (an attitude of hostility to aristocracy because it was aristocracy, was as incomprehensible to him as an attitude of deference—Galsworthy) Obeisance implies a show of honor or reverence by some act or gesture (as bowing or kneeling) that indicates submission, humility, or acknowledgment of defeat (the Spanish prince was welcomed . . . by a goodly company of English lords, assembled to pay him their obeisance—Prescott) Sometimes the term is used in place of one of the other words in this group to suggest abject humiliation on the part of the one who pays honor or reverence (a throne to which conquered nations yielded obeisance—Steel) (continually making humble obeisance to supercilious superiors—Wier) 

A synonym for obeisance is adulation; but this term has some other meanings as well, so the word obeisance is more specific. 

Honor, homage, reverence, deference, obeisance are all more or less respectful terms, but there is no neat line of distinction between them all; they are often used interchangeably. 

A synonym for obeisance is homage.
hop vb *skip, bound, curvet, lope, lollop, ricochet

hopeful, optimistic, roseate, rose-colored are comparable when they mean having or showing confidence that the end or outcome will be favorable or for the best. **Hopeful**, which is often used in distinction from **sanguine** (see **CONFIDENT**), usually implies some ground, and often reasonably good grounds, for one’s having hope; it therefore typically suggests confidence in which there is little or no self-deception or which may be the result of a realistic consideration of the possibilities (*the air of youth, hopeful and cheerful—Milton*) <delivers a final comeuppance (see FRUSTRATE)>

**Ant** despair (of): despond

hopeless, despairing, despondent, forlorn *deceive, mislead: cozen, cheat, overreach: *confuse, muddle, fuddle, befuddle: baffle, outwit, circumvent (see FRUSTRATE)

hop vb *expect, look, await

Ant despair (of): despond

hospitable *robust, hearty, hearty-hearted: hospitable, genial (of): genial, companionable

horrible 1 Horrible, horrid, horrific, horrendous mean inspiring horror or abhorrence. **Horrible** (see also **FEARFUL** 2) is the general term for what inspires horror (*some . . . horrible form, which might deprive your sovereignty of reason—Shak.*) <delivers a final comeuppance (see FRUSTRATE)>

**Ant** good, *pleasant, pleasing, grateful, delightful: agreeable, companionable

horrifying, appalling, dismaying, daunting (see **DISMAY vb**): terrorizing, terrifying, frightening, alarming (see **FRIGHTEN**)

2 horrible, terrible, terrific, shocking, appalling, *fearful, awful, dreadful, frightful, *perilous

hug huge, vast, immense, enormous, elephantine, mammoth, giant, gigantic, gigantean, colossal, gargantuan, Herculean, cyclopean, titanic, Brobdingnagian are comparable when meaning exceedingly or excessively large. Huge is a rather general term indicating extreme largeness, usually in size, bulk, or capacity: an enormous volume of heavy, inky vapor, coiling and pouring upward in a huge and ebony cumulus cloud—H. G. Wells) (the Texan question and Mexican War made huge annexations of Southwestern territory certain—Nevin & Comagger) Vast denotes extreme largeness or broadness, especially of extent or range: the Great Valley of California, a vast elliptical bowl averaging 50 miles in width and more than 400 miles long—Amer. Guide Series: Calif.) (consider the vast varieties of religions ancient and modern—Cohen) Immense suggests size far in excess of ordinary measurements or accustomed concepts: an immense quill, plucked from a distended albatross’ wing—Melville) (found the balloon at an immense height indeed, and the earth’s convexity had now become strikingly manifest—Poe) (the immense waste of war—Brogan) Enormous also indicates a size or degree exceeding accustomed bounds or norms: huge wagons, enormous loads, scarcely any less than three tons—Amer. Guide Series: Calif.) (the princes of the Renaissance lavished upon private luxury and display enormous amounts of money—Mumford) Elephantine suggests the cumbersome or ponderous largeness of the elephant

hypochondriac • melancholic, melancholy, atriabilious
hypocrisy • sanctimony, pharisasm, cant • mean the pretense or affectation of being more virtuous or more religious than one actually is. The same differences in implications and connotations are found in their corresponding adjectives, hypocritical, sanctimonious, pharisical, canting. Hypocrisy and hypocritical, the most inclusive of these terms, imply an assumption of goodness, sincerity, or piety by one who is either not good, sincere, or pious or is actually corrupt, dishonest, or irreligious. I thought where all thy circling wiles would end—in feigned religion, smooth hypocrisy—Milton) (be hypocritical, be cautious, be not what you seem but always what you see—Byron) (Archer's New York tolerated hypocrisy in private relations; but in business matters it exacted a limpid and impeccable honesty—Wharton) (much of the religiosity which unwise parents delight to observe in their children is . . . innocent hypocrisy—Inge) (the passing stranger who took such a vitriolic joy in exposing their pretensions and their hypocrisy—Brooks) Sanctimony and sanctimonious are terms of opprobrium implying an affectation or merely outward pretense of holiness or of piety (he took pleasure in comparing the sanctity of the early Christians with the sanctimony of many modern churchgoers) (the preacher urged his flock to seek holiness but to take care lest they fall into sanctimony) (sanctimonious professions of faith) (a woman who was religious without being...
hypothesis (Stokes) Pharisism and pharisical imply a stern and censorious attitude to the manners and morals of others or a conviction of one’s own moral superiority, or both; the terms frequently suggest sanctimony or, less often, out-and-out hypocrisy (pharisism, stupidity, and despotism reign not in merchants’ houses and prisons alone—Farrell) (the assured, the positive, the pharisical temper, that believes itself to be impregnably in the right and its opponents indubitably in the wrong—Benson)

Cant (see also Dialect) and canting imply the use of religious or pietistic language or phraseology in such a way as to suggest sanctimony or hypocrisy rather than genuine holiness or deep religiousness; often, however, the terms suggest reference not only to such outward indications of sanctimony and hypocrisy but to the state of mind or the attitude of one who is so pharisical, or so deeply convinced of his righteousness or holiness, that he is unaware that he is displaying his religion in a mechanical or perfunctory rather than in a sincere manner and in a spirit of arrogance rather than of humility (a canting moralist)

(a canting assumption of his righteousness) (the whole spiritual atmosphere was saturated with cant...an affectation of high principle which had ceased to touch the conduct, and flowed on in...insincere and unreal speech—Froude) (one of those rare artists...who, by virtue of some inward grace, constantly flowing through the intellect, purge the mind of cant—Brooks)

Ana dissimulation, duplicity, guile, *deceit: *pretense, pretension, make-believe

hypocritical sanctimonious, pharisical, canting (see under HYPOCRISY)

Ana unctuous, oily, slick, *fulsome: feigned, affected, assumed, simulated, shammed, counterfeited, pretended (see Assume)

Con genuine, veritable, bona fide, *authentic: *sincere, heartfelt, wholehearted, whole-souled, unfeigned

hypostatize reify, externalize, materialize, incarnate, *realize, actualize, embody, objectify

hypothesis, theory, law are often interchangeable in general use. In their technical senses they are usually discriminated by the scientists and philosophers who employ them. In general the terms denote an inference from data that is offered as a formula to explain the abstract and general principle that lies behind the data and determines their cause, their method of operation, or their relation to other phenomena. In such usage hypothesis implies tentativeness in the reference because of insufficient evidence and applies to a well-founded conjecture that serves as a point of departure for scientific discussion or as a tentative guide for further investigation or as the most reasonable explanation of an imperfectly comprehended phenomenon (a scientist says in effect—“Observation shows that the following facts are true; I find that a certain hypothesis as to their origin is consistent with them all”—Jeans)

(a resemblance to electric polarization is very close; it is in fact so close that it would not be foolish at all to make the hypothesis that the iron contains not only electrons but also tiny corpuscles of some subtle magnetic fluid—Darrow) (in the last chapter I proposed the hypothesis that a pure poetry exists, employing the term “lyric” to describe poems which “consist of poetry and nothing else”—Day Lewis) Theory, in general use, often means little more than hypothesis or conjecture (“Let us sit quiet, and hear the echoes about which you have your theory.” “Not a theory; it was a fancy”—Dickens) (in the course of my work in Egypt, I had formulated certain theories of my own about plague, and could not reconcile them to the findings of the Commission—Heiser) but in precise technical use it presupposes more supporting evidence than hypothesis does, a wider range of application, and greater likelihood of truth. It is not always obvious when hypothesis and when theory should be used; in comparable applications hypothesis is preferred by some scientists as the more modest in its claims, theory being preferred by others as suggesting such confidence in the reliability of the inference and its supporting evidence as to imply that it deserves acceptance (the Darwinian explanation of the origin of species is regarded by some as a hypothesis, but is more often designated as the theory of evolution) (that exact verbal expression of as much as we know of the facts, and no more, which constitutes a perfect scientific theory—T. H. Huxley) (in 1905 Einstein crystallized these concepts and hypotheses in his theory of light quanta, according to which all radiation consisted of discrete bullet-like units—Jeans) (there was also a nascent theory of sound waves; and out of it there grew...a tremendous mathematical doctrine of waves which nowadays has almost come to dominate the physics of these times—Darrow)

Law (for fuller treatment see PRINCIPLE) emphasizes certainty and proof and therefore applies to a statement of an order or relation in phenomena that has been found to be invariable under the same conditions (in philology, Grimm’s law is a statement of the regular changes which the stops, or mute consonants, of the primitive Indo-European consonant system have undergone in the Germanic languages) However, since such laws are subject to correction or alteration by the discovery of contradictory or additional evidence, the term is often changed in the course of time to theory; thus, what has long been known as Newton’s law of gravitation is currently being revised as a result of Einstein’s discoveries and is sometimes designated as Newton’s mathematical theory of universal gravitation.

Ana conjecture, surmise, guess (see under CONJECTURE vb): inference, deduction, conclusion (see under INFER)

icy  glacial, arctic, gelid,  *cold, frigid, freezing, frosty, cool, chilly

Ant  fiery

idea, concept, conception, thought, notion, impression mean what exists in the mind as a representation of something that it apprehends or comprehends or as a formulation of an opinion, a plan, or a design. Idea is the most compre- hensive and widely applicable of these terms: it may be used of an image of something at one time or another actually perceived through the senses, or of something never perceived but visualized from bits of information described his idea of a penthouse  his idea of heaven does not correspond to that of most persons our ideas of a good time aren't the same, and never will be—Rose Macaulay or of something that is the clearly or vaguely defined product of fancy, imagination, or inventive power he invented a new kind of buoy which was found by the authorities to be excellent in idea, but impracticable—Ellis the idea of holiness has its history, like other religious ideas, and the history is not edifying—Iinge of those accepted ideas, which are always wrong, that China is and was a country of immovable and unchanging traditions—Binion. It may denote a mere suppo- sition I had no idea that the law had been so great a slavery—Austen or a good or practical solution or sug- gestion a very clever point that . . . . You are really full of ideas—Shaw or a ridiculous or preposterous sugges- tion Mr. Elton in love with me! what an idea!—Austen Concept applies in logic to the idea of a thing which the mind conceives after knowing many instances of the cate- gory to which it belongs and which is devoid of all details except those that are typical or generic the concept of “horse,” “table,” “mountain” the author of Mein Kampf has abolished the whole concept of the citizen as we have known it from the days of Pericles—Dorothy Thompson In more general use the term applies to a formulated and widely accepted idea of what a thing should be we find among the Greeks germinal concepts which are a vital part of modern thought—Buchan thus the popular concept of what news was came more and more to be formed upon what news was printed—Mott. Concept is often used in place of concept in this latter sense; in fact it is sometimes preferred by those who wish to keep concept as a technical term of logic. However concept so strongly suggests the activity of the mental power of bringing into existence an idea of something not yet realized or not yet given outward form that it often im- plies not only the exercise of the reflective powers but of the imagination as colored by feeling; the term therefore more often applies to a peculiar or an individual idea than to one held by men as a whole or by an entire class, pro- fession, or group compare Poe’s conception of poetry as “the rhythmical creation of beauty” with the Aristotelian conception of it as the imitation of human actions according to probability and necessity what I needed was . . . some clear conception of the meaning of existence—L. P. Smith. Concept is also, especially in literary and art criticism, the usual term for the idea or design conceived by the writer or artist in advance of or in company with his giving it expression or form Dante’s boldness of conception the dramatist’s power to express his conception with frankness and daring the conception comes through the actual execution—Alexander. Thought applies either to an expressed or to an unexpressed idea, especially one that comes into the mind as a result of medita- tion, reasoning, or contemplation a child’s thoughts about God he had not a thought of disaster have to wait for the occasional genius, or the occasional lucky thought—Whitehead his mind ran over the great cities . . . . Of them all, only New York was as it had always been, and he was angered at the thought—Buck. Notion often adds to idea’s implication of vagueness the suggestion of caprice or whim or of half-formed or tentative purpose or intention her notion of a delta was a lot of channels and islands—Forester one never does form a just idea of anybody beforehand. One takes up a notion, and runs away with it—Austen modest, sober, cured of all her notions hyperbolical—Cowper but notion may also come close to concept in suggesting a general or universal concept arriving at the notion of law—Babbitt or to conception in denoting the meaning content assigned by the mind to a term have no adequate notion of what we mean by causation—Sapir. Impression (see also impression 1) usually suggests an idea which comes into the mind as the result of an external stimulus I should like to know your first impressions of this book. Poetry . . . aims at the transmission . . . of impressions, not facts—Lowes. Looking out over the steep hills, the first impression is of an immense void like the sea—Jefferies. Ana *opinion, view, belief, conviction, sentiment: *hypothesis, theory, law ideal adj  abstract, transcendent, transcendental Ana utopian (see ambitious): surpassing, peerless, supreme Ant  actual ideal n  pattern, exemplar, *model, example, standard, beau ideal, mirror Ana *truth, verity: perfection, *excellence identical 1 also identic selfsame, *same, very, equivalent, equal, tantamount Ana corresponding, correlative, convertible (see reciprocal) Ant diverse —Con  *different, disparate, divergent: *distinct, separate, several 2 *like, alike, similar, analogous, comparable, akin, parallel, uniform Ana matching, equaling (see match): agreeing, squaring, tallying, jibing, corresponding (see agree) Ant *different identification  *recognition, apperception, assimilation Ana perception, *discernment, discrimination: image, percept, sense-datum, sensum, *sensation identify, incorporate, embody, assimilate are comparable when they mean to bring (one or more things) into union with another thing. Identify involves the idea of a union of things that are or are thought of as identical, or the same; it may imply the actual making of a thing or things the same as another every precaution is taken to identify the interests of the people and of the rulers—Ramsay it is the writer’s business to identify words with things, emotion with thought—Muller or it may refer to the mental ap- prehension of a real or imagined identity between things Min was identified with Horus the son of Isis—Mercer should make us wary toward those who . . . have identified Americanism with a partisan policy in behalf of concealed economic aims Dewey. This latter use may analogous words  Ana antonyms  Ant contrasted words  Con See also explanatory notes facing page I
connot confusion in thought or self-deception (it is easy to identify cynicism with honesty and hence with truthfulness—Hamburger) Incorporate implies a union of one or more things with another, or of different things, so that when blended, fused, or otherwise united they constitute a uniform substance, a single body, or an integral whole (fertilizers should, in general, be incorporated with the soil) (what is learned is of no value until it is incorporated into one's store of knowledge) (what he does is to incorporate verbatim a good many of Leonardo's notes into a narrative that is entirely his own—William Murray) Embody (see also realize 1) is more restricted in its range of application than incorporate because it can be used only when one or more things are made part of another thing that is an ordered whole (as an organized structure, a group, or a system) (yet so much of these treaties has been embodied in the general law of Europe—Mackintosh) (a recognized scholar, whose discussion... embodies the finest fruits of contemporary opinion and research—E. H. Swift) Assimilate (see also absorb 1) falls short of identify because it does not always imply the actual fusion or blending or, when self-deception is conned, the actual confusion, of two things. Like identify, however, assimilate implies the making of two or more things exactly alike, either actually or in thought; thus, to assimilate one's beliefs to those of another is to change one's beliefs with those of another to make them one and indistinguishable as well as the same; the d of the Latin prefix ad- is often assimilated to a following consonant as in affectus (our manufacturing class was assimilated in no time to the conservative classes—H. G. Wells)

Idiom

ignorant

Idiom

1 dialect, *language, speech, tongue
Ana jargon, patois, cant, argot (see dialect)
2 expression, locution, *phrase
Idiosyncrasy *eccentricity
Ana peculiarity, individuality, distinctiveness or distinction, characteristic or characteristic (see corresponding adjectives at characteristic): manner, way, *method, mode: mannerism, affectation, *pose
Idiot imbecile, moron, *fool, simpleton, natural
Idiety adj 1 vain, nautygoro, otiose, empty, hollow
Ana fruitless, bootless, *futile, vain: *ineffective, inefficient, ineflicious: trivial, paltry, *petty, trifling
Con significant, pregnant, meaningful (see expressible): profitable, *beneficial, advantageous
2 *inactive, inert, passive, supine
Ana indolent, faineant, *lazy, slothful: dawdling, lagging, procrastinating (see delay)
Ant busy —Con industrious, diligent, assiduous, sedulous (see busy)

Idle vb Idle, loaf, lounge, loll, laze mean to spend time not in work but in idleness. Idle may be used with reference to persons or to things that move lazily or without purpose; it may also be employed to connote either strong censure or a pleasant or justifiable action (why do you idle away all your days?) (it is impossible to enjoin idling thoroughly unless one has plenty of work to do—Jerome) (the brook idles through the pasture) (her fingers idled over the keys) (it is pleasant to saunter out in the morning sun and idle along the summer streets with no purpose—L. P. Smith) Loaf suggests either a resting or a wandering about as though there were nothing to do; it does not necessarily imply contempt, although its agent noun loafer when used seriously nearly always carries that implication and has often affected the meaning of the verb (Tennyson does

The greater part of his literary work... between breakfast and lunch, and loafs the rest of the day—Boston Journal) (I loaf and invite my soul, I lean and loaf at my ease observing a spear of summer grass—Whitman) (the idea of the university as a place of leisure where rich young men loaf for three or four years is dying—Russell) (men who came into the shop to loaf during winter afternoons—Anderson) Lounge, though occasionally used as equal to idle or to loaf, typically conveys an additional implication of lazily resting or reclining against a support or of physical comfort and ease in relaxation (he stood... lounging with his elbow against the bar—Dickens) (against the sunny sides of the houses, men lounged, or played at deck on a rock—Mary Austin) The agent noun lounger is, however, usually derogatory, though slightly less so than loafer (he is not a loafer, but he is a lounger on street corners during his free hours) (the loungers at the bar were beginning to show signs of leaving—MacFall) Loll also carries an implication of a posture similar to that of lounge, but it places greater stress upon an indulent or relaxed attitude (there were not yet any jaded people lolling supine in carriages—Shaw) (on Sunday afternoons... when a crowd was there to loll on the front porch and swap stories—Caldwell) Laze usually implies the relaxation of a busy person enjoying a vacation or his moments of leisure (I had a very pleasant time, sailing, fishing, and lazing about—J. R. Lowell) (it was nice lazing this way. About time she had a holiday—Christie)

Ana rest, relax, repose (see corresponding nouns at rest): *saunter, stroll, amble
Idolize *adore, worship
Ana dote, love, *like: venerate, *revere, reverence
Con *despise, contemn, scorn, disdain: *hate, abhor, detest, loathe, abominate
If, provided are both used to introduce conditional clauses. When merely a possibility which may or may not be true is expressed, if is the usual conjunction (if this counsel... be of men, it will come to naught—Acts 6:38) When the clause which follows names a stipulation or proviso, provided (or sometimes providing) is the usual form (it is not hard to know God, provided one will not force oneself to define him—Arnold) (providing they pay you the fixed rent—Ruskin)

Ignite kindle, *light, fire
Ant stifle: extinguish

Alien

1 mean, sordid, abject
Ana base, low, vile: churlish, boorish, loutish (see under boor)
2 men who have been brought up in a uniform substance, a single body, or an integral whole (was brought up... to be a standard set for the educated or cultivated man... you might read all the books in the British Museum (if you want to know God, you will not force yourself to define him—Christie)

illusion

is dark is made bright or what is complicated, obscure, or vague is made clear (the oblique band of sunlight... illuminated her as her presence illuminated the heat—Hardy) (the greatest truths are perhaps those which being simple in themselves illuminate a large and complex body of knowledge—Alexander) (he longed... to hear more about the life of which her careless words had given him so illuminating a glimpse—Wharton) Illuminate is chiefly literary or poetical for illuminate (what in me is dark illuminate—Milton) (no lurid fire of hell or human passion illuminies their scenes—Eliot) Light, lighten, and enlighten carry a stronger implication of providing with light for clear seeing than of throwing a light upon.

Light is the most consistently literal of these terms, though it often carries a suggestion of brightening the way of one who otherwise might stumble or go astray (the room was brilliantly lighted) (all our yesterdays have lighted fools the way to dusty death—Shak.) (seas roll to waft me, suns to light me rise—Pope) (the old man scratched a match, the spark lit up the keyhole of a door—Lowell) Lighten, like light, basically implies a making brighter or a lessening of darkness, but it has more extended and poetic use (lighten our darkness, we beseech thee, O Lord—Book of Common Prayer) (I would not convey the thought that an opinion is the worse for being lightened by a smile—Cardozo) Enlighten, which has almost wholly lost its basic meaning of to make physically light or bright, is common when filling with intellectual or spiritual light is implied (the Chinese philosopher... needed no discovery of science to enlighten him; that enlightenment was part of his philosophy—Binyon). Sometimes the term implies that one has been supplied with information necessary to the understanding of something (in her simplicity she did not know what it [her mistake] was, till a hint from a nodding acquaintance enlightened her—Hardy) and sometimes it implies sufficient education and experience to enable one to meet all needs and, especially in the adjective enlightened, to remove or overcome superstition, prejudice, or intolerance (the civilized and enlightened portions of the world at the time of the Declaration of Independence—Taney) Illustrate (see also exemplify) is somewhat rare in a sense which approaches that of illuminate and in which it suggests the shedding of luster rather than of light, embellishment rather than elucidation, and distinct exhibition rather than a bringing into view (the poet or philosopher illustrates his age and country by the efforts of a single mind—Gibbon) (narrow of vision but steadfast to principles, they fronted life resolutely, honoring and illustrating the supreme worth of freedom—Replplier) (the latest portrait of the chief justice of the Supreme Court) (the last portrait of the chief justice of the Supreme Court) Photograph applies only to a portrait that is made by means of a camera and sensitive plates or films. Mask applies primarily to a molded copy of a face made in wax or plaster; thus, a death mask is a copy made very soon after a person has died, especially a cast or impression taken directly from the face of the dead person.

A colon (:) separates groups of words discriminated. An asterisk (*) indicates place of treatment of each group.
imaginal  *imaginative, imaginable, imaginary
imaginatory adj  1 Imaginary, fanciful, visionary, fantastic, chimerical, quixotic are comparable when they are applied to conceotions or to the persons who form the conceptions and mean unreal or unbelievable and out of keeping with things as they are or conceiving such unreal or unbelievable things. Something is imaginative which is fictitious and purely the product of an active or an excited imagination (imaginatory) {imaginary} ill and fancied tortures —Addison} {those nervous persons who may be terrified by imaginative} dangers are often courageous in the face of real danger—Ellis} Something is or, less often, one is fanciful which or who indicates a giving rein to the power of conceiving or producing things that have no real counterpart in nature or in fact {in Wales he found a cottage perfectly roofed with fern} . . . Had a painter put this in a picture, many would have exclaimed: “How fanciful!”—Jeffreys} {Rousseau’s fanciful image of primitive man, un contaminated by science or art, undepraved by thought—Grandgent} Something is visionary which, although it seems real and practical to the one who conceives it, is usually the product of a dream or vision of an unreal or fanciful imagination and is incapable of realization {visionary schemes for world conquest} {Goldsmith had long a visionary project, that . . . he would go to Aleppo, in order to acquire a knowledge . . . of any arts peculiar to the East, and introduce them into Britain—Bosswey} {this was a visionary scheme . . . a project far above his skill—Swift} One is visionary who is given to such dreams, visions, and fancies and inspired by the hopes they arouse {if a man happens not to succeed in such an enquiry, he will be thought weak and visionary—Burke} {planning, as his visionary father might have done, to go to Brazil to pick up a fortune—Van Doren} Something is fantastic {see also FANTASTIC 2} which is or, more often, seems extravagantly fanciful or queer and hence incapable of belief or, sometimes, approval {in words, as fashions, the same rule will hold; alike fantastic, if too new, or old—Pope} {his strange coming, his strange story, his devotion, his early death and posthumous fame—it was all fantastic—Cather} {a fantastic world inhabited by monsters of iron and steel—Bromfield} Something is chimerical which is wildly or fantastical visionary or unreal {an universal institutional church is as chimerical an idea as an universal empire—Inge} {the defeat was more complete, more humiliating . . . the hopes of revival more chimerical—Times Lit. Sup.} Something is or one is quixotic which or who is motivated by extravagantly chivalrous devotion to visionary ideals {quixotic as a restoration of medieval knighthood—Cohen} {to insist upon clemency in the circumstances would . . . have required quixotic courage—Buchan} {the economic notion that our present population . . . can live on this island and produce by their work a real income that will give them a rising standard of comfort and leisure, is utterly quixotic—Hobson} Ana *fictitious, fabulous, mythical, legendary, apocryphal: transcendent, transcendental, *abstract: utopian {see AMBITIOUS} {delusory, delusive {see MISTEADING}; illusory, seeming, *apparent
Ant real, actual
2 imaginative, imaginal, imaginable
imagination, fancy, fantasy are comparable when denoting either the power or the function of the mind by which mental images of things are formed or the exercise of that power especially as manifested in poetry or other works of art. The meanings of all of these terms have been greatly influenced by changing psychological and aesthetic theories, with the result that in the past they have often carried implications or connotations and sometimes denotations not observable in modern use. Imagination is not only the most inclusive of these terms but the freest from derogatory connotations. As an inclusive term it may apply either to the power of forming images of things once known but now absent {our simple apprehension of corporeal objects, if present, is sense; if absent, is imagination—Glanvill} or to the power of forming images of things not seen, or actually nonexistent, or incapable of actual existence {one feels that a livelier melodic imagination would serve the needs of classical opera better—Evett} In the first instance the term suggests the use of memory as well as of the image-making power {recall the past in one’s imagination} {her face haunted his imagination} In the second it usually suggests either a new combination of elements found in one’s experience or an ability to conceive of something, seen only fragmentarily or superficially, as a complete, perfected, and integral whole {a man of no imagination is less likely to feel physical fear} {with imagination enough to see the possible consequences} and imagination {bodies for the forms of things unknown, the poet’s pen turns them to shapes and gives to airy nothing a local habitation and a name—Shak} {it is only through imagination that men become aware of what the world might be—Russell} {facts . . . give us wherewithal to think straight and they stimulate the imagination: for imagination, like reason, cannot run without the gasoline of knowledge—Grandgent} Fancy (see also FANCY 3) usually means the power to conceive and give expression to images that are far removed from reality or that represent purely imaginative things {she saw, with the creative eye of fancy, the streets of that gay bathing place covered with officers—Austen} {the world which any consciousness inhabits is a world made up in part of experience and in part of fancy—Krutch} In aesthetic use there is a tendency to make imagination and fancy antithetical. Imagination is often used to designate the power of representing the real or what gives an illusion of reality in its entirety and organic unity and, usually, in its ideal or universal character; fancy, the power of inventing the novel and unreal by recom bining the elements found in reality. So interpreted, imagination represents men not only in their outward but in their inward life, and produces a Hamlet; fancy presents them in alien surroundings, or essentially changed in their natural physical and mental constitution, and produces centaurs and Brobdignagians {the imagination, or shaping or modifying power; the fancy, or the aggregative and associative power—Coleridge} {Martians, the little green men of popular fancy—Mendelssohn’s fancy gives additional soaring power to the poet’s—Kolodin} Fantasy often takes the place of fancy in naming the power of unrestrained and often extravagant or delusive fancy or its exhibition in art {first} . . . live a complete fancy life of fantasy between the lines of print—Huxley} {this mechanical man or robot idea has been decidedly overdone in the writings of fantasy—Furness} Ana invention, creation {see corresponding verbs at INVENT}: conceiving or conception, realizing or realization {see corresponding verbs at THINK}
imaginitive, imaginative, imaginable, imaginary, though not synonymous, are sometimes confused because of their verbal likeness. Imaginative applies to something which is the product of the imagination or has a character indicating the exercise or the power of the imagination; thus, imaginative writings are often distinguished from such factual writings as historical, expository, and argumentative; an imaginative poet is one whose imagination
heightens his perception of people and things (it is a common fallacy that a writer... can achieve this poignant quality by improving upon his subject matter, by using his “imagination” upon it and twisting it to suit his purpose. The truth is that by such a process (which is not imaginative at all!) he can at best produce only a brilliant sham. —Cather) [workaday scientists]... are prone to identify the poetical with the impractical, the imaginative with the imaginary, the fictional with the false... —Muller] Imaginal, meaning of the imagination or within the conceptive powers of the imagination, has been used, especially by psychologists, to fill the need for an adjective which refers to the imagination only as a function of the mind rather than as a creative power or to images as the mental representations which follow a sensation; thus, a person belongs to an imaginal type rather than to another because of his tendency to have sensory images of a particular kind (as visual, tactile, or auditory) (perhaps they owe their imaginal coloration to some childhood experience—Cutsforth) Imaginable often means little more than conceivable, but more precisely it may imply that the thing so qualified can be seen or apprehended in a clear mental image. St. Thomas was perhaps of all the apostles the one most easily imaginable in the present —Mackenzie] Imaginary (for fuller treatment see imaginary) implies existence only in the imagination —Muller] Conversations, a book by Walter Savage Landor giving imaginary dialogues and imaginary letters between famous persons of long ago (the vague unrest of a husband whose infidelities are imaginary—Glasgow) Ana imagining, fancying, realizing, conceiving (see think) creative, inventive (see corresponding verbs at invent) Con *prosical, prosy, matter-of-fact imagine conceive, fancy, realize, envisage, envision, *think Ana *invent, create: fabricate, form, fashion, shape, *make: conjecture, surmise, guess imbicile idiot, moron, *fool, simpleton, natural imbibe *absorb, assimilate Ana *receive, take, admit, accept: *soak, saturate, steep, impregnate: permeate, pervade, penetrate, impenetrable: acquire, obtain, *get Ant ooze, exude imbue inoculate, leaven, ingrain, *infuse, sulphure Ana *inform, inspire, fire, animate: impregnate, saturate, *permeate, pervade imitate *copy, mimic, ape, mock Ana impersonate (see act vb) simulate, feign, counterfeit (see assume) caricature, burlesque, parody, travesty (see under caricature n) immaterial, spiritual, incorporeal are comparable when meaning not composed of matter. Immaterial is the most comprehensive of these terms because it makes the line of cleavage between itself and its opposite, material, not only clear and sharp but not open to confusion. If, therefore, one wishes a word to carry no other possible implication immaterial is the appropriate term; it may then apply to things believed to have real but not actual (compare real) or phenomenal existence or to things that are purely mental or intellectual constructions (material beings) you feel like a disembodied spirit, immaterial —Maugham] immaterial forces (material objects of thought) in making mind purely immaterial... the body ceases to be living—Dewey] Spiritual (see also holy) may imply the absence of the material or tangible (millions of spiritual creatures walk the earth unseen —Milton) The term, however, so often applies to some-thing which has another side or nature variously spoken of as material, animal, physical, or bodily that the word is frequently used, not to describe the character of a whole (a man, all creatures, a belief, or the world), but to distinguish the part which has the nature of a spirit or soul from the part which has not. In distinction from immaterial it frequently, therefore, connotes a supernatural, an intellectual, or a moral character (it is the spiritual always which determines the material—Carlyle) Great men are they who see that spiritual is stronger than any material force, that thoughts rule the world—Emerson] Incorporeal basically denies the possession or presence of a body or material form; in general use it usually suggests invisibility (incorporeal intelligences) the supposed activities and transactions of putative incorporeal beings—Flew] but, especially in legal use, it may imply intangibility or impalpability (the second group of intangibles... are incorporeal rights which do not diminish the rights of others in material things. Such rights as patents, royalties, trademarks, goodwill, and franchises fall into this category—W. H. Anderson] Ant material —Con physical, corporeal, sensible, objective (see material) immaterial, unmatured, unripe, unmellow mean not fully developed. Except for this denial of full development, the terms agree in implications and connotations with the affirmative adjectives mature, matured, ripe, mellow discriminated at mature Ant crude, callow, green, *rude: *premature, precocious, untimely, childish, *childlike Ant mature —Con matured, ripe, mellow, adult, grown-up (see mature adj) immediate *direct Ana *nearest, next: intuitive, *instinctive Ant mediate (knowledge, relation, operation): distant (relatives) immense huge, vast, enormous, elephantine, mammoth, giant, gigantic, gigantean, colossal, gargantuan, Hercules, cyclopean, titan, Brodbergian Ana tremendous, prodigious, stupendous, *monstrous: *large, big, great immeasurable *dip, submerge, duck, source, dump Ana drench, *soak, saturate, sop, impregnate: infuse, imbue, ingrain: engross, absorb (see monopolize) immigrant n 1 *stranger, alien, foreigner, outlaw, outsider, émigré 2 *émigré immigrate emigrate (see under emigrant) immigration emigration (see under emigrant) imminent *impending Ana threatening, menacing (see threaten): likely, *probable, possible: *inevitable, ineluctable, inescapable, unescapable, unavoidable: expected, awaited (see expect) Con *distant, remote, far-off: *doubtful, dubious, questionable, problematic immobile *immovable, immotile Ana mobile immoderate inordinate, *excessive, exorbitant, extreme, extravagant Ana *profuse, lavish, prodigal, exuberant: teeming, over-flowing (see teem) Ant moderate —Con temperate (see moderate adj): restrained, curbed, checked, inhibited (see restrain): reasonable, *rational immoral, un moral, nonmoral, amoral are all briefly definable as not moral, yet they are not often interchangeable and are frequently confused, largely because the implications and connotations of the second element are not the
same in each compound. **Immoral**, which implies an active opposition to what is **moral**, may designate whatever is discordant with accepted ethical principles or the dictates of conscience. **Mortality** cannot be legislated but . . . **Legislation** can be **immoral**—**Gallagher**. In the way in which he concealed the smaller points in order to win the important objectives and mastered the political game without yielding his own integrity, Roosevelt symbolized the moral man confronted by the dilemmas that an **immoral society** creates—**Link** and then indicates that what is so designated is fundamentally wrong, unjustifiable, or sinful. But, like **moral**, **immoral** may often base its values not on principle but on custom and then may imply no more than discordance with accepted social custom or the general practice. **Refusal** to acknowledge the boundaries set by convention is the source of frequent denunciations of objects of art as **immoral**—**Dewey**. For a farm settler to start out with a decent home, efficiently produced, still seems **immoral** in many quarters—**New Republic**. In its frequent specific application to sexual and, especially, irregular sexual matters **immoral** tends to fluctuate between the two extremes of its usage range according to the concurrent rigidity of the social outlook. It may in the former case come close to **licentious or lewd** in pejorative quality and in the second lose most of its pejorality and mean little more than improper or immodest. Lead an **immoral life**? **Immoral** people. **Unmoral**, nonmoral, and **amoral** all, in contrast to **immoral**, imply in one way or another a passive negation of what is moral especially as indicated by absence of or freedom from a code that ought to prevail and the evasion of which constitutes wrongdoing. In its most typical use **unmoral** implies a lack of moral perception and ethical awareness and is appropriately applied to persons or to their behavior when these exhibit such a lack: thus, an infant or an idiot may be described as **unmoral** because in neither case is there a capacity to distinguish right from wrong a man so purely primitive that he was of the type that came into the world before the development of the moral nature. He was not immoral, but merely **unmoral**—**London**. **Gertrude Stein’s** discussions reflect primitiveness also in the attitude taken towards sex, for the characters are depicted as being like savages, innocently **unmoral**—**Braddy**. But **unmoral** may sometimes imply a mere disregard of or failure to be guided by moral principles and is then close to **conscienceless**. The **great un moral power** of the modern industrial revolution—F. L. **Wright** and occasionally it may, along with **nonmoral** and **amoral**, imply that what is so qualified cannot be appraised in terms of morality since it is not a part there are no special benefits for doing good, nor any great penalties for being bad. The supernatural power of **Melanesian religion is simply amoral**—**Nida**. **Ana** *licentious, lewd, lascivious, libertine, libidinous, lecherous, wanton, lustful; *abandoned, profligate, dissolute, reprobate; obscene, gross, ribald (see coarse) **Ant** moral: chaste, pure **Immoral**, **deathless, undying, unfading** mean not subject to death or decay and, hence, everlasting. With the exception of **immoral**, all of these words are chiefly in poetic use and are distinguishable especially in their connotations and applications. Basically **immoral** implies little more than exemption from liability to death and is usually applied to the soul or spirit of man any such harmony is in **immortal** souls; but whilst this muddy vesture of decay doth grossly close it, we cannot hear it—**Shak**. Sometimes **immoral** equals **eternal** {the first to express the belief that the soul was divine and **immortal** in duration—**Heslet**} but more frequently it keeps close to the basic sense in being applied to something comparable to the soul in that it lives on in fullness of vigor after its maker or possessor has died. **Immortal** epics of Homer {this verse that gives **immortal** youth to mortal maids—**Landor**}. **Oh may I join the choir invisible of those immortal dead who live again in minds made better by their presence—George Eliot} the single **immoral** act of John Wilkes Booth in snuffing out the life of a beloved president—**Miery**. **Deathless** also implies incapacity for death; it is seldom applied to the soul but rather to immaterial things that transcend the limitations of mortal existence {art’s deathless dreams—**Shelley**} virtue crowned with glory’s deathless meed—**Wordsworth**. **Undying** is applied chiefly to emotions or passions marked by such intensity or vitality as to be or so to seem incapable of extinction while life lasts. {**undying love**} {**undying hatred**} a patriot’s heart, warm with **undying fire**—**Wordsworth** {Lawrence’s undying conviction of the necessity for . . . harmonization—**Millett**} **Unfading** often comes close to **undying** in meaning but connotes persistence of brightness or bloom rather than of intensity {**unfading** recollections} {true charity . . . thrives against hope, and in the rudest scene, storms but enlivens its unfading green—**Cowper**}. **Ana** *everlasting, endless **Ant** mortal—**Con** transitory, fleeting, fugitive, ephemeral, evanescent, **transient** **Immovable**—**Motive** *immovable, immobile **Immovable**, **immobile, immotive** mean incapable of moving or being moved. Except for this denial of power, the terms otherwise carry the implications and connotations of the affirmative words as discriminated at movable. **Ant** moveable **Immunify** *exemption **Ant** susceptibility **Immure** *imprison, incarcerate, jail, intern **Ana** confine, circumscribe, *limit, restrict **Con** liberate, *free, release **Impact** n. **Impact**, impingement, collision, clash, shock, concussion, percussion, jar, jolt mean a forcible or enforced contact between two or more things, especially a contact so violent as to affect seriously one or the other or all of the persons or things involved. **Impact**, though it often means this and no more, may be used more generally to imply contact between two things, one of which at least is driven or propelled in the direction of the other and produces a definite effect on it, though not necessarily a physical effect or one that results in injury *the impact of a hammer upon a nail* a target constructed to resist the impact of a bullet *live in an age where every mind feels the impact of new ideas* it is not electricity which we see, it is the air rendered incandescent by the vehemence of the impacts of the electrons against its molecules—

See also explanatory notes facing page 1
The document contains a discussion of the use of various words related to collisions, impacts, and concussions. It explains the differences in meaning and usage of terms such as "clash," "impact," "concussion," and "shock." The text also discusses the implications of these terms in different contexts, such as in scientific theories, religious beliefs, and legal or medical contexts.

For example, "clash of beliefs" refers to ideas that are irreconcilable or incompatible, while "impact of sound" refers to the effect of sound on consciousness. The text also notes that "impair" refers to damage or destruction, whereas "impossible" refers to something that cannot be done.

The document is rich with examples and definitions, making it a valuable resource for anyone interested in the nuances of language and the ways in which words are used to express complex ideas.
with the preserve “good form” that we are impervious to the claims and clamor of that ill-bred creature—life!—

Galsworthy.} Impermeable implies impenetrability, whether natural or artificially acquired, by a liquid or a gas and incapacity for becoming soaked or permeated; the term applies chiefly to substances (as some clays) which do not absorb water, to cloths treated so as to be rainproof, or to materials which do not admit the passage of air, light, gas, or water (cosmo-regulation in the eel is achieved by an impermeable outer covering of slime—Dowdeswell) 

(Impermeable rocks) (gas pipes should be made of an impermeable metal) (impermeable roofing) (he was not drunk, since the resilient composition of which his nerves were made was almost impermeable to alcohol—West) 

Ant passable 

impassible insensitive, *insensible, anesthetic 

impassioned, passionate, ardent, fervent, fervid, perfervid mean actuated by or showing intense feeling. Impassioned, though applicable to persons, is more often found in reference to utterance or artistic expression or to the mood or mental state which evokes such utterance or expression. The word usually implies intensity without violence and feeling of such depth, sincerity, and potency that it passes naturally and inevitably from the person into his expression (poetry is the breath and finer spirit of all knowledge; it is the impassioned expression which is in the countenance of all science—Wordsworth) (the letters... are written by this master of impassioned recollection in a style so musical, so magical and moving, that the experiences he recounts become our own—L. P. Smith) (as his impassioned language did its work the multitude rose into fury—Froude) Passionate, on the other hand, implies vehemence and, often, violence of emotion; when the latter idea is suggested, the word also may connote loss of rational guidance or wasteful diffusion or misdirection of emotional power (a passionate denunciation) (a passionate reformer) (passionate partisanship) (passionate feeling is desirable, provided it is not destructive—Russell) (to match mere good, sound reasons, against the passionate conclusions of love is a waste of intellect bordering on the absurd—Con) (the passion of fear and the impassively ruthless war spirit, common to Communists and Fascists—Cohen) Ardent differs from passionate largely in its freedom from derogatory implications and in its connotations of qualities suggestive of flame or fire. It is especially appropriate when vehemenes is implied and the intense feeling expresses itself in eagerness, zeal, enthusiasm, or acts of devotion (an ardent desire for the truth) (an ardent supporter of liberal ideas) (an ardent lover) (heredity in man is hardly the simple thing that many of the ardent eugenists would have us believe—Furnas) (gave constant proofs of his ardent longing for an education—Merriman) 

Fervent also implies a quality of fire, but it suggests a fire that glows rather than one that bursts into flame. Hence, though it implies strength and depth of feeling, it more often suggests steadiness than vehemenes and inward quiet rather than outward activity. It is applicable especially to wishes, prayers, or hopes that are heartfelt or devout, but it is also applied to an emotion, or to a person feeling such an emotion, that is free from turbulence (fervent thanks) (fervent good wishes) (a fervent Christian) (fervent prayers) (Jane’s feelings, though fervent, were little displayed—Austen) (the gods approve the depth and not the tumult, of the soul; a fervent, not ungovernable, love—Wordsworth) 

Fervid, like impassioned, is applied more to moods and expressions than to persons; in contrast to impassioned, however, it sometimes suggests more obvious, more warmly expressed, and, often, more spontaneous emotion (who could help liking her? her generous nature, her gift for appreciation, her wholehearted, fervid enthusiasm?—L. P. Smith) Frequently it carries a strong suggestion of feverishness which distinguishes it sharply from fervent; thus, fervent thanks suggest the depth and sincerity of the emotion which prompts them; fervid thanks suggest profoundness or an overwrought state of mind (his fervid manner of love-making offended her—Bennett) Perfervid carries an implication of too great emotional excitement or of overwrought feelings; more than fervid, it casts doubt upon the sincerity of the emotion that is displayed with vehemence (to court their own discomfiture by love is a common instinct with certain perfervid women—Hardy) (in his perfervid flag-waving moments—S. H. Adams) 

Ana vehement, *intense, fierce, violent: *deep, profound: *sentimental, romantic, maudlin 

Ant unimpassioned —Con dispassionate, uncolored, objective (see fair adj) 

impassive, stojic, phlegmatic, apathetic, stolid are comparable when they mean slightly if at all responsive to something that might be expected to excite emotion or interest or to produce a sensation. The distinctions to be drawn between these adjectives hold true also of their corresponding nouns, impassivity or impassiveness, stojicism, phlegm, apathy, stolidity. One is impassive who feels or shows no emotion or sensation, without necessary implication of insusceptibility (his majestic impassivity contrasting with the overt astonishment with which a row of savagely ugly attendant chiefs grinned and gaped—Shaw) (under their impassive exterior they preserve...emotions of burning intensity—Lathrop) One is stojic who is indifferent to pleasure or pain; the word frequently suggests unfinching fortitude (not only the cataclysm of a world, but also the stojic and impassive temper that endures it—Lowes) (a stojic atmosphere of fortitude in adversity—Orville Prescott) 

Phlegmatic implies a temperament or constitution in which emotion is hard to arouse or, when aroused, is moderate or restrained (cold and phlegmatic must be who is not warmed into admiration by the surrounding scenery—Wortton) (a lofty phlegm, a detachment in the midst of action, a capacity for watching in silence—Edmund Wilson) Apathetic usually implies either a remiss and culpable indifference or such a preoccupation with a particular depressing emotion (as care, grief, or despair) or bodily pain as makes one insensible to other emotion or pain and deficient in or devoid of the usual human interests (there is only one alarming aspect of our national debt...the apathy and ignorance of the American public with regard to it. The common attitude is...why should an ordinary citizen add the national debt to his other workaday worries—Scherman) (the row of stolid, dull, vacant plowboys, ungainly in build, uncomely in face, lifeless, apathetic—Butler d. 1902) (an uncomplaining apathy displaced this anguish; and, indifferent to delight, to aim and purpose, he consumed his days, to private interest dead, and public care—Wordsworth) 

Stolid implies heavy, dull, obtuse impassivity or apathy or utter blankness of countenance mirroring or suggesting such quality; often, specifically, it suggests impassive, mechanical, plodding, unquestioning, unresourceful adherence to routine (stolid Saxon rustics, in whom the temperature of religious zeal was little...above absolute zero—Huxley) (the stolidest mask ever given to man—Meredith) 

Ana *cool, composed, collected, imperturbable; reserved, taciturn, *silent, reticent: callous, *hardened, indurated; *insensible, insensitive 

Ant responsive —Con *tender, compassionate, sympathetic, warm, warmhearted 

impassivity, impassiveness apathy, stolidity, phlegm,
impatient

impatient, nervous, unquiet, restless, restive, uneasy, fidgety, jump, jittery are comparable when they mean manifesting signs of unrest or an inability to keep still or quiet. Impatient implies an inability to bear some trial (as delay, opposition, discomfort, or stupidity) with composure; it therefore connotes, as a rule, not physical but mental or emotional unrest and may suggest unrestrained reactions (as of eagerness, irritability, brusqueness, testiness, or intolerance) so tedious is this day as is the night before some festival to an impatient child that hath new robes—Shak. Cease your contention, which has been too long; I grow impatient—Pope. When we pursue the ultimate significance of the colors into yet wider regions . . . I fear the august common sense of the Occident becomes affronted and impatient—Binyon. The temper of the youth of his country is violent, impatient, and revolutionary—Fischer. Nervous implies unsteadiness of nerves and a proneness to excitability (a nervous, fretful woman) you and I, whose ordinary daily talk maintains its slow or hurried, nervous or phlegmatic . . . but always pedestrian gait—Lowes. Becoming more nervous as the gloom increased—Hudson. Unquiet, though basically meaning no more than not quiet, is usually used with a strong implication of prolonged or conspicuous agitation or of troubling or disturbing distractions that hinder one's peace of mind or spirit or prevent concentration; the word is applicable both to the person and to the thing which troubles him (these unquiet times) unquiet meals make ill digestions—Shak. They have not the restless unquiet temperament associated with the Anglo-Saxon race—Alfred Buchanan. Restless usually implies constant and more or less aimless motion or activity; often, specifically, it connotes mental agitation (our heart is restless until it repose in Thee—Pusey. Indubitably not happy . . . restless and disquieted, his disquietude sometimes amounting to agony—Arnold) or eagerness to change (he was restless and dissatisfied with his life—Anderson) or continuous or unceasing movements to and fro or back and forth (the restless sea) a restless crowd (he was as restless as a hyena—De Quincey). Restive (see also CONTRARY 2), which once meant unwilling to move, has gradually become a synonym of restless. In this sense it implies impatience under attempts to restrain, to control, or, especially, to keep attentive and suggests either inability to keep still or to persist in what one is doing (they were all becoming restive under the monotonous persistence of the missionary—Cather. As restive and dissatisfied as a party of 7 bridge players—Eddington. Uneasy usually implies restlessness born of anxiety, doubt, uncertainty, or insecurity (he is uneasy over business conditions) an uneasy conscience (an uneasy sense that all was not well with his family) uneasy lies the head that wears a crown—Shak. So we come down, uneasy, to look, uneasily pacing the beach. These are the dikes our fathers made: we have never known a breach—Kipling. The first uneasy stir of the sleeper—Mumford. Fidgety implies restless movements resulting from nervousness, boredom, or uneasiness of mind; it usually suggests an inability to keep one's hands, feet, or body still or to settle down to a task or occupation toward the end of the day the pupils become fidgety—He declared if I was fidgety he should have no occasion to bother me perhaps he did not realize . . . that the persons who felt fidgety or disquieted about the matter were not likely to write in about it, lest they appear irreverent—E. B. White. Jumpy and jittery imply extreme nervousness that exhibits itself in tremulous, uncertain movements. Jumpy, however, usually suggests a fearful or apprehensive mood and lack of control over one's temper as well as over one's muscles (if you didn't drink so much, you wouldn't be so jump—Barnaby Conrad) Jittery suggests domination not only by fears but by recollections that destroy one's nervous control and impair one's mental stability the chief factor in making children jittery is jittery parents—Time.

Ana fretful, querulous. *irritable, snappish, waspish: *eager, anxious, avid, keen: impetuous, *precipitate, headlong, hasty, sudden, abrupt

Ant patient —Con composed, imperturbable, unflappable, unruffled, *cool: *calm, serene, tranquil, placid

Impeach indict, incriminate, *accuse, charge, arraign

Con condemn, denounce, blame, censure (see CRITICIZE): try, test, *prove

Impeccable, faultless, flawless, errorless are comparable when they mean absolutely correct and beyond criticism. Impeccable usually applies to something with which no fault can be found or which is irreproachably correct (the only impeccable writers are those that never wrote—Hazlitt) her logical process is impeccable—Grandgent. An impeccable figure in trim dinner jacket and starched shirt—Capote. Faultless is often used in place of impeccable without loss, but it is sometimes preferred when the emphasis is upon the absence of defect or blemish rather than upon technical correctness (whoever thinks a faultless piece to see, thinks what ne'er was, nor is, nor e'er shall be—Pope) in faultless English and with merciless logic, lashed all the miners' socialistic theories—Collins. Its distinctive implication, however, is often that of insipidity or tediousness (faultily faultless, icily regular, splendidly null, dead perfection, no more—Tennyson). Flawless applies especially to natural products in which no cracks, blemishes, or imperfections can be detected (a flawless diamond) or to character or reputation which is admirably excellent (destroyed his flawless reputation by a single act) or to a work of art or its execution when comparably fine (a flawless lyric) the flawless technique of the pianist) a flawless story published in 1895 . . . somewhat forecasts James's final type—Van Doren. Errorless usually implies absence of all mistakes, especially of such mistakes as are technically regarded as errors; thus, an errorless baseball game may not involve flawless playing. Ana inerrant, unerring, *infallible: *correct, accurate, precise, right, nice: perfect, entire, whole, intact Con *deficient, defective: *superficial, shallow, uncritical, cursory: culpable, *blameworthy

Impecunious *poor, indigent, needy, destitute, penniless, poverty-stricken, necessitous

Ant restrain —Con curb, check, inhibit (see RESTRAIN)

Impending, imminent are comparable when they mean very likely to occur soon or without further warning. Both retain in this sense some feeling of now rare or disused
imperceptible, insensible, impalpable, intangible, inappreciable, impermeable

Insensitive, insensible, impalpable, intangible, inappreciable, impermeable all mean incapable of being apprehended by the senses or intellect (as in form, nature, extent, or degree) even though known to be real or existent. Except for this denial of apprehensibility, these terms carry the same implications and connotations as the affirmative antonyms at perceptible: the imperceptible movement of the hour hand; he grew into the very fullness of the tick—Conrad) observed a fault in the daily conduct of the house—Bennett. Anal: analogous words imperceptible, intangible, impermeable, imperceptible, impermeable, impermeable, imperceptible, impermeable.

Ant imperceptible

imperfection, deficiency, shortcoming, fault mean a failure in persons or in things to reach a standard of excellence or perfection. Imperfection is the most general of these words; it usually does not imply a great departure from perfection and is usually replaceable by a more specific term (as flaw, blemish, defect, failing, frailty, or foible) which emphasizes its slightness rather than its enormity. The statue has one imperfection—Replier) the early Christians followed the Stoics: property was a result of man's imperfection. It should be accepted regretfully, and society should take care that too much did not collect in too few hands—Agar) coffee is graded by the number of imperfections in the sample—Ukers')

Deficiency carries a clear implication of lack or of inadequacy, whether moral or mental, physical or spiritual; it applies particularly to persons, but it may refer also to an inadequacy in things which affects the persons involved. Unlike imperfection, it often implies a great departure from a standard of perfection or sufficiency. Mr. Collins was not a sensible man, and the deficiency of nature had been but little assisted by education or society—Austen) the disastrous want and weakness of Shelley...—his utter deficiency in humor—Arnold) another food deficiency was responsible for one of the most debilitating and crippling diseases of the Orient—Heiser) Shortcoming implies deficiency but is seldom used in quite the same sense. Often it implies a standard of perfection or of excellence which is hard to reach and then suggests not so much the degree of imperfection or deficiency as (the doer)’s sense of failure to reach the standard or (the critic’s or judge’s) unwillingness to use a harsher or more direct term the shortcomings of representative government—my book has many shortcomings. I fear) do not let them, as poor people, make everyone else suffer for their shortcomings—Shaw) let him only preach well, and all his shortcomings as a curate would be forgiven—Mackenzie) management shortcomings in one form or another cause most business failures—Nation’s Business) Fault (see also FAULT) is more direct and clear-cut in statement than any of the others; it usually implies personal culpability for the failing in a person or direct blameworthiness for the shortcoming or defect in a thing; often, also, it permits description of the failing or defect (he has... the fault of defective mantelpiece clocks, of suddenly stopping in the very fullness of the tick—Conrad) Sophia observed a fault in the daily conduct of the house—Bennett. Anal: analogous words imperious, impermeable, impermeable, impermeable, impermeable, impermeable, impermeable, impermeable.

Perfeci impermeable impermeable, impermeable, impermeable

ana *close, near, nigh: approaching, nearing (see approach vb): likely, probably: threatening, menacing (see threat vb)

impenetrable imperious, impermeable, *impassable

Ana *close, dense, compact, thick: solid, hard, *firm: compacted, concentrated, consolidated (see compact vb): callous, hardened, indurated: obdurate, adamant, *inflexible

Ant penetrable —Con) *soft, mild, gentle, lenient: indulgent, merciful, clement, *forbearing, tolerant

impenetrate interpenetrate, penetrate, *permeate, permeate, permeate, impregnate: saturate

Ana *enter, probe, penetrate: invade, entrench (see trespass): drench, *soak

imperative 1 peremptory, imperious, *masterful, domineering

Con supplicating or supplicatory, entreaty, imploring, beseeching, begging (see corresponding verbs at beg): mild, gentle, lenient, *soft

2 *pressing, urgent, crying, importunate, insistent, exigent, instant

Ana compelling, constraining (see force vb): critical, crucial, *acute

imperceptible, insensible, impalpable, intangible, inappreciable, impermeable

Ana imperceptible, insensible, impalpable, intangible, inappreciable, impermeable all mean incapable of being apprehended by the senses or intellect (as in form, nature, extent, or degree) even though known to be real or existent. Except for this denial of apprehensibility, these terms carry the same implications and connotations as the affirmative adjectives discriminated at perceptible: the imperceptible movement of the hour hand; he grew into the scheme of things by insensible gradations—H. G. Wells) the almost imperceptible beauty of style and expression—Prescott) we shall consider that more subtle and intangible thing, the soul which he sought to build up in his people—Buchan) that inappreciable particle of an element called an atom—(the imperceptible factors, such as temperament and mental stability, which make or mar a promising career)

Ant perceptible
Adaptability.
implement 423 implicit

and, it stresses the fixedness or permanency of what has been taught (the teacher, the parent, or the friend can often do much to implant this conviction—Eliot) (implanting in their minds doubts of the political realism of their American friends—Brogan) Inculcate implies persistent or repeated endeavor with the intent to impress firmly on the mind (had sedulously inculcated into the mind of her son . . . maxims of worldly wisdom—Edge-worth) (skillful, conscientious schoolmistresses whose lives were spent in trying to inculcate real knowledge—Grandgent) Whatever happened, Newland would continue to inculcate in Dallas the same principles and prejudices which had shaped his parents’ lives—Wharton Instill carries the implication of a gradual and gentle method of imparting knowledge; it usually suggests either a teaching that extends over a long period of time (as from infancy to adolescence) or a pupil that cannot, because of age, lack of background, or the like, take in at once what is taught (those principles my parents instilled into my unwary understanding—Browne) (the Viceroy plumed himself on the way in which he had instilled notions of reticence into his staff—Kipling) (it would be useless, in early years, to attempt to instill a stoic contempt for death—Russell)

Ana *infuse, imbue, inoculate, ingrain, leaven: impregnate, saturate, impenetrate, penetrate, permeate, pervade

implement n Implement, tool, instrument, appliance, utensil mean a relatively simple device for performing a mechanical or manual operation. Nearly all of these words (the distinct exception is appliance) are interchangeable in their general senses, but custom and usage have greatly restricted them in their specific and most common applications. An implement, in general, is anything that is requisite to the effecting the end one has in view or to performing that work or the acquirement and communication of ideas—Eliot (implants of modern warfare consist of all the weapons necessary to a well-equipped army, navy, and air force) (mathematics is still the necessary implement for the manipulation of nature—Russell) In specific use implement is the usual term when the reference is to a contrivance for tilling the soil (as a spade, a plow, a harrow, or a cultivator) (farming implements) (gardening implements) Historically it is the preferred term for any of the articles which are essential to the performance of a religious service (the implements of the Mass include vestments as well as chalice, paten, and altar stone) It is also the usual term for the devices made especially from stone or wood by primitive peoples as weapons or for use in digging, carrying, or lifting or in making clothing and equipment. A tool, in general, is anything that facilitates the accomplishment of the end one has in view; it is therefore something particularly adapted in its nature or by its construction to make possible or relatively easy the work one is doing (it’s difficult to be a good cook without the proper tools) (a scholar needs foreign languages as tools) (comparison and analysis . . . are the chief tools of the critic—T. S. Eliot) In specific use tool is the preferred term when reference is made to the implements used by artisans (as carpenters and mechanics) or craftsmen in accomplishing a particular kind of work (as sawing, boring, piercing, or chipping) (a saw, a gimlet, an awl, a chisel are tools) Ordinarily tool suggests manipulation by the hand, but some machines for doing work that may be accomplished more slowly by manual labor and tools are called machine tools (as the lathe). An instrument (see also mean n 2, paper 1) is in general a delicately constructed device by means of which work (not exclusively a mechanical operation) may be accomplished with precision. Many instruments are by definition tools, but instrument is the preferred term among persons (as surgeons, dentists, draftsmen, surveyors, and artists) whose technique requires delicate tools and expertise and finesse in their manipulation. Some instruments, however, are not tools, but implements in the larger sense, for they are requisite to the achieving of definite purposes but do not necessarily facilitate any manual operations (a thermometer and a barometer are recording instruments essential to the meteorologist) (a telescope is an astronomical instrument) (a piano, a violin, a cello are musical instruments by means of which a performer evokes musical sounds) (language is the essential instrument for the acquirement and communication of ideas—Shehan) An appliance may be a device that adapts a tool or machine to a special purpose usually under the guidance of a hand; thus, a dentist’s drill may be called an appliance when it is attached to a dental engine; in industry an appliance is often distinguished from a tool, though they may both do the same kind of work, in that a tool is manipulated by hand and an appliance is moved and regulated by machinery. Additionally, an appliance may be a device or apparatus designed for a particular use and especially one (as a mechanical refrigerator or a vacuum cleaner) that utilizes an external power supply, especially an electric current. A utensil is in general anything that is useful in accomplishing work (as cooking and cleaning) associated with the household; it may be applied to tools (as egg-beaters, graters, rolling pins, brooms, and mops) used in cookery and other household work, but it is most commonly applied to containers (as pots, pans, pails, and jars), especially those which form part of the kitchen, dairy, or bedroom equipment. Consequently utensil, in other than household use, often means a vessel (sacred utensils of a church)

Ana *machine, mechanism, apparatus: contrivance, devise, contraption, gadget

implement vb *enforce

Ana effect, fulfill, execute, achieve, accomplish, *perform: *realize, actualize, materialize

implicate *involve

Ana *concern, affect: incriminate (see accuse)

Con *exculpate, absolve, acquit, exonerate

implication, inference are often interchangeable, but they may be distinguished when they specifically refer to something that is hinted at but not explicitly stated. Implication applies to what is hinted, whether the writer or speaker is aware of it or not or whether the reader or hearer recognizes it or not (speak of their own language with at least an implication of disparagement—Sampson) When, however, the reader or hearer recognizes what is implied and gathers from it its full significance or makes an explicit statement of it, he has drawn or made an inference (he said no more, waiting for someone to draw the desired inference from this utterance—Wister) (you misunderstood the implications of his speech, so that your inferences misrepresent his point of view) (by implication you are arguing that this is the only possible solution) (by inference from what you leave unsaid, I know you believe this the only possible solution) (he did not perceive the implications of his remark) (the inferences to be drawn from his remark are inescapable)

Ana hinting or hint, suggestion, intimation (see corresponding verbs at suggest): *insinuation, innuendo

implicit, virtual, constructive mean being such by correct or justifiable inference rather than by direct statement or proof. Something is implicit (as opposed to explicit) which is implied (as by the words, acts, appearance, character, or methods of the person or thing concerned) but is not definitely stated or expressed (a good present behavior is an implicit repentance for any miscarriage in what is past—Ana analogous words Ant antonyms Con contrasted words See also explanatory notes facing page 1

imply 1

uncivil, discourteous, rude, ill-mannered, entreat, beseech, supplicate, beg, importune, implore

A colon (:) separates groups of words discriminated. An asterisk (*) indicates place of treatment of each group.
impostor, faker, quack, mountebank, charlatan denote a person who makes pretensions to being someone or something that he is not or of being able to do something he cannot really do. Impostor applies especially to one who passes himself off for someone else (there is an impostor abroad, who takes upon him the name of this young gentleman, and would willingly pass for him—Addison) However the word often serves as a general term for anyone who assumes a title, character, or profession that is not his own (charged that Kim Il Sung was an impostor trading on the name of a legendary Korean resistance leader—Time) Faker applies to one who gives himself the appearance of being what, in character or in profession, he is not (the accused man is not insane, he is merely a clever faker) A hypocrite is a moral or religious faker (he is essentially a faker with a large contempt for the ignorance and gullibility of the American voter—Current History) Quack is the popular and contemptuous term for an ignorant, untrained, or unscrupulous practitioner of medicine or law or seller of remedies or treatments, and usually carries a strong implication of fraud or self-delusion (dishonesty is the raw material of the world, the flesh, and the devil—Book of Common Prayer) they [Indians] held that the basest counterfeit of the world, the flesh, and the devil was the counterfeit of five-dollar bills) The term is also applied to something other than it actually or truly is (his newly purchased painting by Raphael was proved to be a clever counterfeit) What is the difference between a counterfeit and a forgery?—Cowper (its values ... are an imposture) Deceit, however, usually suggests the work of a deceiver or of one that misleads or leads astray (the charlatan—George Eliot) replaced by the charlatans and the rogues—by those without learning, without scruples, or both—Asher Moore

Ana cheat, fraud, fake, humbug (see imposture) Deceiver, beguiler, misleader (see corresponding verbs at deceive)

imposture, cheat, fraud, sham, fake, humbug, deceit, deception, counterfeit all mean something which pretends to be one thing in its nature, character, or quality but is really another. Imposture applies not only to an object but to an act or practice which is passed off to another as genuine, authentic, or bona fide (several of the gallery's paintings reputed to be the work of Rubens and Rembrandt were impostures) (the hero is as gross an imposture as the heroine—Shaw) (its values ... are an imposture: pretending to honor and distinction, it accepts all that is vulgar and base—Edmund Wilson) Cheat applies chiefly to something or sometimes to someone that wins one's belief in its or his genuineness, either because one is deliberately misled or imposed upon by another or is the victim of illusion or delusion (when I consider life, it's all a cheat. Yet fooled with hope, men favor the deceit—Dryden) (what ... man ... shall prove (what argument could never yet) the Bible an imposture and a cheat—Cowper) (hence, pageant history! hence, gilded cheat!—Keats) (if I passed myself off on Miss Carew as a gentleman, I should deserve to be exposed as a cheat—Shaw) Fraud applies to a deliberate, often criminal, perversion of the truth (many persons persisted in believing that his supposed suicide was but another fraud—M'Carthy) (we may take it as undisputed that Swinburne ... did something that had not been done before, and that what he did will not turn out to be a fraud—T. S. Eliot) Applied to a person it may be less condemnatory and suggest pretense and hypocrisy (the pious fraud who freely indulges in the sins against which he eloquently preaches—La Farge) Sham applies to a close copy of a thing, especially to one that is more or less obviously a fraudulent imitation (a strong living soul in him, and sincerity there; a reality, not an artificiality, not a sham!—Carlyle) he smiled, in his worldliest manner. But the smile was a sham—Bennett) Fake applies either to a person that represents himself as someone he is not or, more often, to a worthless thing that is represented as being something that it is not; fake differs from fraud in not necessarily implying dishonesty in these representations, for a fake may be a joke or a theatrical device, or it may be a clear fraud (this testimonial is clearly a fake) one of the great fakes of all time was the Cardiff Giant (actors using fakes instead of real swords on the stage) (he pretends everything is what it is not, he is a fake—K. A. Porter) Humbug applies to a person or sometimes a thing that pretends or is pretended to be other and usually more important than he or it is, not necessarily because of a desire on the part of the person involved to deceive others but often because he is self-deceived (you will take to politics, where you will become ... the henchman of ambitious humbugs—Shaw) what humbugs we are, who pretend to live for beauty, and never see the dawn!—L. P. Smith)

Deceit and deception both apply to something that misleads one or deludes one into taking it for what it is not. Deceit, however, usually suggests the work of a deceiver or of one that misleads or leads astray (the deceits of the world, the flesh, and the devil was the counterfeit of five-dollar bills) The term is also applicable to a thing or, less often, to a person that passes for something other than it actually or truly is (his newly purchased painting by Raphael was proved to be a clever counterfeit) She had the illusion that she was not really a married woman and a housemistress, but only a kind of counterfeit—Bennett) An a trick, ruse, feint, artifice, wile, stratagem, maneuver, gambit, ploy

impotent 1 *powerless

improper 427

improve 1 Improve, better, help, ameliorate are comparable when denoting to mend or correct in part or in some degree. Improve, the general term, and better, more vigorous and homely, apply both to objects and to states or conditions that are not of necessity bad. The faculties of the mind are improved by exercise—Locke.' Striving to better, oft we mar what's well—Shak.) With a reflexive pronoun improve implies a change for the better within oneself, a better a change for the better in one's social or financial status. She had from her youth improved herself by reading—Fordye.) Girls marry merely to 'better themselves,' to borrow a significant vulgar phrase—Wollstonecraft. To help is to improve while still leaving something to be desired. A coat of paint would help that house.

Ameliorate is chiefly used in reference to conditions that are hard to bear or that cause suffering and implies partial relief or changes that make them tolerable. There is no hope whatever of ameliorating his condition—Peacock. (Abolish feudalism or ameliorate its vices—W. O. Douglass.)

Ana  imprint, print, stamp, impress (see corresponding nouns at IMPRESSION): depict, delineate, limn (see REPRESENT)

incisive, trenchant, clear-cut, cutting, biting, crisp  are applied to utterances, thoughts, style, or mentalities and mean having or manifesting the qualities associated with sharpness, keenness, and acuteness, especially of mind. Incisive usually implies not only qualities in the thing so described which give it the power to penetrate, pierce, or cut through but also the production of such an effect upon the person impressed; thus, an incisive voice or tone of voice is one that is not only sharply clear and edged but one that affects the nerves of the ear as though it were cutting into them; an incisive command is so sharply imperative and direct that it can neither be misunderstood nor disobeyed —Bismarck's will had not that incisive, rapidier quality, that quality of highly tempered steel—flexible, unbreakable, of mortal effect, decisive... which had Richelieu's—Bellloc <when finally pushed into a corner, he would be more incisive, more deadly, than any man seated foursquare and full of importance at a governmental desk—Sackville-West> <the clear, incisive genius which could state in a flash the exact point at issue—Whitehead> <Trenchant carries a stronger implication than does incise of cutting so as to define differences, categories, or classes with sharpness and perfect clearness or of probing deeply into the innmost nature of a thing so as to reveal what is hidden or concealed<a trenchant analysis> <when roused by indignation or moral enthusiasm, how trenchant are our reflections!—James> <the trenchant divisions between right and wrong, honest and dishonest, respectable and the reverse, had left so little scope for the unforeseen—Wharton> <no one... was more trenchant than he in his criticism of the popular faith—Dickinson> <a most trenchant defender of civil rights—Chafee> Clear-cut is applied chiefly to the effect of the qualities which make for penetration, incisiveness, trenchancy, or accuracy; it suggests sharp chiseling, clear definition, or distinct outlines, and the absence of all soft edges, hazi-

ness, or confusion in the thing or things so described <clear-cut features> <clear-cut utterance> <clear-cut distinctions> <the demands of Communism are too imperative, too clear-cut for the writer who wants only the cessation of mental pain and a private peace in his own time—Day Lewis> <his description of this condition was so clear-cut that others readily recognized it—Blumer> Cutting is often used in place of incisive when a less pleasant or less agreeable quality or effect is to be connoted; the term frequently suggests sarcasm, acrimony, asperity, or harshness that wounds or hurts, but it sometimes carries a hint, at least, of such mental qualities as penetrating truthfulness and acute discernment <eloquence, smooth and cutting, is like a razor whetted with oil—Swift> <he can say the driest, most cutting things in the quietest of tones—Bronte> <I suppose you’d leave me here without money or anything?” she said in a cold, cutting voice—Benett> Biting, when it is applied to utterances, expressed ideas, or style, suggests a power to grip and deeply impress itself on the mind or memory; it therefore often suggests a caustic or mordant quality <biting epigrams> <her biting words> <domineering and censorious of any that stood in his way, with a biting wit—T. D. Bacon> Crisp (see also FRAGILE 1) suggests not only incisiveness but either vigorous terse-ness of expression or a bracing, invigorating quality <the brittle crispness and tenacity, decisive as a child’s expression of its needs—Pater> <it is a relief to come to a dictation that is frequently crisp, and incisive, and terse—Lowes> <a languorous work, ... with occasional interludes of crisp brilliance—Anthony West>

Ana  terse, succinct, laconic, *concise: poignant, *pungent, piquant

Con  prolix, diffuse, verbose, *wordy: *loose, lax, slack: unctuous, *fusome

incite, instigate, abet, foment  are comparable when they mean to spur on to action or to excite into activity. Incite stresses stirring up and urging on; frequently it implies active prompting <the riot was incited by paid agitators> <it was just like Lady Pinkerton... to have gone round to Hobart inciting him to drag Jane from my office—Rose Macaulay> Instigate, in contrast with incite, unequivocally implies prompting and responsibility for the initiation of the action; it also commonly connotes underhand-ness and evil intention; thus, one may be incited but not instigated to the performance of a good act; one may be incited or instigated to the commission of a crime <the early persecutions were... instigated... by the government as a safety valve for popular discontent—Inge> <his peculiar tastes had instigated him to boldness in some directions—Edmund Wilson> Abet tends to lose its original implication of baiting or hounding on and to emphasize its acquired implications of seconding, supporting, and encouraging <unthinkingly, I have laid myself open to the charge of aiding and abetting the seal cutter in obtaining money under false pretenses—Kipling> <Mr. Howells... seconded him as often as not in these innocuous, infantile ventures, abetting him in the production of... plays of an abysmal foolishness—Brooks> Foment stresses persistence in goading; thus, one who incites rebellion may provide only the initial stimulus; one who foments rebellion keeps the rebellious spirit alive by supplying fresh incitements <the apparent moral certainties of the mid-thirties—such as the notion that wars are fomented by munitions makers—F. L. Allen> 

Ana  stimulate, excite, *provoke, pique, galvanize: arouse, rouse, *stir

Ant  restrain —Con  curb, check, inhibit (see RESTRAIN): frustrate, thwart, foil, circumvent, baffle, balk, outwit

Anna analogous words  Ant antonyms  Con contrasted words  See also explanatory notes facing page 1
incitement *stimulus, stimulant, excitant, impetus

Ana spur, goad, incentive, inducement, impulse, *motive, spring: provoking or provocation, excitement, stimulation, piquing (see corresponding verbs at PROVOKE): motivation, activation, actuation (see corresponding verbs at ACTIVATE)

Ant restraint: inhibition

Incline vb 1 lean, *slant, slope

Ana bend, *curve: *swerve, veer, deviate: deflect, *turn

2 Incline, bias, dispose, predispose mean to influence one to take a stated or implied attitude to something or to someone or to have such an attitude as a result of prior influences. Incline (see also SLANT) implies that the mind or the feelings have been so affected that one is already leaning toward one of two or more possible conclusions, projects, decisions, or objects (as of affection). The word suggests no more than the tipping of the balance toward one and therefore connotes merely a tendency to favor one more than the other or others. <such considerations are not supposed to be entertained by judges, except as inclining them to one of two interpretations—Justice Holmes> (the vast majority of people do not incline to be drunkards—Fisherheim) (Mr. Owen inclines to cover up Lloyd George's odious treatment of King George V—Sykes) (on this visit I found Australia generally inclined to be inimical—Heiser) Bias implies a stronger and more settled leaning than incline; it usually connotes a prejudice for or against it would be mortifying to . . . many ladies could they . . . understand how little the heart of man is affected by what is costly or new in their attire; how little it is biased by the texture of their muslin—Austen (she was unfairly biased towards the Liberal party in the state, and too apt to approve of the measures they passed—Rose Macaulay) Dispose differs from incline in stressing the implication of putting one into a frame of mind that is proper or necessary for the end in view or that makes one ready or willing to do something or to take some stand; therefore it often connotes the sway of one's disposition, mood, temper, or attitude (his open face disposes one to believe him innocent) (the depression disposed many persons to become more thrifty) (a thinker so little disposed to treat the names of these religious philosophers with respect—Inge) (those disposed to violate or evade the decrees of the sovereign—Cohen) Predispose differs from dispose in implying the existence of the frame of mind or of the proper disposition in advance of the opportunity to manifest itself in action (circumstances are predisposing men to accept principles which they attacked a few years ago) (if she is flattered and indulged, she will be predisposed to be favorable to him) (we are much influenced in youth by sleepless nights; they disarm, they predispose us to submit to soft occasion—Meredith) Predispose is also used of a physical tendency or condition which makes one susceptible to a given infection or disease (predisposed to tuberculosis) (the coldness and dampness . . . predispose the miner to rheumatism) (disinclining to cover up Lloyd George's odious treatment of King George V)—Justice Holmes (mum genus under which all things without exception could be eventually subsumed—James)

Ana influence, *affect, sway: *move, drive, impel

Ant disincline, indispose

Include, comprehend, embrace, involve, imply, subsueme are comparable when meaning basically to contain something within as a part or portion of a whole. Include suggests that the thing included forms a constituent, component, or subordinate part (the genus Viola includes the pansy as well as various violets) (the collection will not include any examples of the artist's earlier paintings) (an edition of the Bible which includes the Apocrypha) (it would not be argued today that the power to regulate does not include the power to prohibit—Justice Holmes) (few of the great men of our nation Early national history extended their humanitarianism to include the Indian tribes—Hyman) Comprehend suggests that within the scope or range of the whole under consideration (as the content of a term, a concept, a conception, or a view) the thing comprehended is held or enclosed even though it may or may not be clearly distinguishable or actually distinguishable (it was not tolerance; it was something greater that comprehended tolerance but went far beyond it—G. W. Johnson) (for philosophy's scope comprehends the truth of everything which man may understand—H. O. Taylor) Embrace (see also ADOPT) suggests a reaching out to gather the thing embraced within the whole (as the content of a mind or of a course of study or a construction or interpretation of a law) (the scene before the reedleman's eyes . . . embraced hillocks, pits, ridges, activities, one behind the other—Hardy) (by Baudelaire's time it was no longer necessary for a man to embrace such varied interests in order to have the sense of the age—T. S. Eliot) Whatever disagreement there may be as to the scope of the phrase "due process of law," there can be no doubt that it embraces the fundamental conception of a fair trial—Justice Holmes Involve suggests inclusion by virtue of the nature of the whole, whether by being its natural or inevitable consequence (surrender involves submission) (it is quite probable that many of those who would make the best doctors are too poor to take the course. This involves a deplorable waste of talent—Russell) or one of its antecedent conditions (clerkship did not necessarily involve even minor orders—Quiller-Couch) (I should . . . supply the humanistic elements of education in ways not involving a great apparatus of learning—Russell) or one of the parts or elements which comprise it by necessity or definition (that fusion of public and private life which was involved in the ideal of the Greek citizen—Dickinson) Imply is very close to involve in meaning but stresses a thing's inclusion not, as involve does, by the nature or constitution of the whole but as something which can be inferred because hinted at (see also SUGGEST 1) (the tone of the book was implied by shrewd advertisements featuring the author's open, smiling face—J. D. Hart) or because normally or customarily part of its content especially by definition (embrace implies a reaching out to gather to oneself or within one's grasp) (emergency and crisis imply conflict—Langfield) or because invariably associated with the thing under consideration as its cause or its effect or as its maker or its product (a watch implies a watchmaker). For this reason imply may, in comparison with involve, suggest a degree of uncertainty; thus, silence is often said to imply consent, but it would be rash to say that it involves consent. Subsume, a technical term in logic, philosophy, and the classificatory sciences, implies inclusion within a class or category (as an individual in a species or a species in a genus) or a being comprehended by a general principle or proposition (absolutely generic unity would obtain if there were one sum-
incompatible

**Ana** unrivaled, unmatched, unapproached, unequaled (see affirmative verbs at MATCH)

**Con** ordinary, *common: fair, mediocre, *medium, second-rate, average

incompatible incongruous, *inconsonant, inconsistent, discordant, discrepant, uncongenial, unsym pathetic

**Ana** antagonistic, counter, *adverse: *antipathetic, adverse: contrary, contradictory, antithetical, antipodal, antipodean, *opposite: irreconcilable, unconformable, unadaptable (see corresponding affirmative verbs at ADAPT)

**Ant** compatible —**Con** congruous, *consonant, consistent, congenial: harmonizing or harmonious, corresponding or correspondent, agreeing (see corresponding verbs at AGREE)

incompetent unqualified, *incapable

**Ana** inefficient, *ineffective

**Ant** competent —**Con** *able, capable, qualified: skilled, proficient, expert, masterly

incongruous *inconsonant, uncongenial, incompatible, inconsistent, discordant, discrepant, unsym pathetic

**Ana** alien, foreign, extraneous (see EXTRINSIC): grotesque, bizarre, *fantastic

**Ant** congruous —**Con** fitting, suitable, appropriate, meet, *fit: *consonant, compatible, congenial, consistent

inconsistent *inconsonant, incompatible, incongruous, uncongenial, unsym pathetic, discordant, discrepant

**Ana** divergent, disparate, diverse, *different: irreconcilable (see corresponding affirmative verb at ADAPT)

**Ant** consistent —**Con** *consonant, compatible, congruous: according or accordant, agreeing, tallying, jibing, corresponding or correspondent (see corresponding verbs at AGREE)

inconsonant, inconsistent, incompatible, incongruous, uncongenial, unsym pathetic, discordant, discrepant mean not in agreement with one another or not agreeable one to the other. Except for this denial of reciprocal agreement or agreeableness, the first six words correspond to the affirmative adjectives as discriminated at CONSONANT especially in regard to their specific implications. Discordant is more common than inconsonant when applied, in the sense of devoid of harmony, to things coming into contact or comparison with each other (discordant voices) (the discordant views of cabinet officers) Discrepant is often preferred to inconsistent in attributive use especially when a wide variance between details of two things that should be alike or consistent is to be suggested; thus, “two discrepant accounts of an accident” suggests more obvious differences in details than “their accounts are inconsistent.” Inconsistent is more frequent in predicative use.

**Ant** consonant —**Con** congruous, compatible, consistent, congenial (see CONSONANT): harmonized or harmonious, attuned (see corresponding verbs at HARMONIZE)

inconstant, fickle, capricious, mercurial, unstable mean lacking or showing lack of firmness or steadiness in purpose, attachment, or devotion. Inconstant, usually applied to persons though sometimes to things, suggests an inherent or constitutional tendency to change frequently; it commonly implies an incapacity for fixity or steadiness (as in one’s affections, aspirations, or course) (sweat not by the moon, the inconstant moon, that monthly changes in her circled orb—Shak.) (people seldom know what they would be at, young men especially, they are so amazingly changeable and inconsistent—Austin) (Spanish assistance from the sea was inconstant, almost accidental—Jones) Fickle retains only a hint of its basic implication of deceitfulness or treacherousness, but its basic implications of instability and unreliability are colored by the suggestion of an incapacity for being true, steadfast, or certain (Fortune, Fortune! all men call thee fickle—Shak.) (bitter experience soon taught him that lordly patrons are fickle and their favor not to be relied on—Huxley) (she is fickle! How she turns from one face to another face—and smiles into them all!—Milley) Capricious suggests qualities which manifest or seem to manifest a lack of guidance by a power (as law, authority, or reason) that tends to regularize movements or acts. When used in reference to persons, it suggests guidance by whim, mood, freak, or sudden impulse (Louis XIII . . . a boy of eight at his accession . . . grows up capricious, restricted and cold, hardly normal—Bellocc he judged her to be capricious, and easily wearied of the pleasure of the moment—Wharton) When used in reference to things, it implies an irregularity, an uncertainty, or a variability that seems incompatible with the operation of law (a capricious climate) (the capricious hues of the sea—Lamb) (the capricious uncertain lease on which you and I hold life—Quiller-Couch) (the olive is slow-growing, capricious in its yield—Huxley) Mercurial is a synonym of the other words here discriminated only when it carries a strong implication of resemblance to the metal mercury and its fluctuations when subjected to an external influence. The word, however, also carries implications (as of swiftness, eloquence, cleverness, and volatility) derived from its earthy association with the god Mercury. Consequently when it applies to persons, their temperaments, or their natures, it usually suggests a pleasing even if baffling variability, an amazing succession of gifts capable of being displayed at will or at need, and such other qualities as sprightliness, restlessness, flashing wit, and elusive charm (the gay, gale lant, mercurial Frenchman—Disraeli) (I was ardent in my temperament; quick, mercurial, impetuous—Irving) (it seems impossible that her bright and mercurial figure is no longer among us, that she will delight us no more with the keen precision and stabbing brilliance of that jewelled brain—New Republic) Unstable, which is applicable to persons as well as to things, implies a constitutional incapacity for remaining in a fixed position mentally or emotionally as well as physically; it suggests, therefore, such fluctuations in behavior as frequent and often unjustified changes in occupation or in residence or sudden and startling changes of faith or of interests (unstable as water, thou shalt not excel—Gen 49:4) (his nature, lamentably unstable, was not ignoble—Macaulay) (woman’s love . . . is volatile, insoluble, unstable—M. L. Anderson) (an unstable world economy . . . subjected to periods of wars, inflation, and depression—Farmer’s Weekly)

**Ana** *changeable, changeful, variable, protean, mutable: *faithless, disloyal, false, treacherous, traitorous, perfidious: volatile, frivolous, light, light-minded (see corresponding nouns at LIGHTNESS)

**Ant** constant —**Con** *stable, dependable, trustworthy, trusty: true, loyal, staunch, steadfast, *faithful

inconvenience vb Inconvenience, incommode, discommodate, trouble are comparable when they mean to subject to disturbance or annoyance. Inconvenience usually suggests little more than interference with one’s plans, one’s comfort, or one’s freedom of action; it seldom carries suggestions of more than a temporary or slight disturbance or annoyance (I hope the new arrangement will not inconvenience you) (do not inconvenience him by intruding upon him while he is writing) (she was frequently inconvenienced by the strong scent of tobacco which the fresh breeze conveyed through the porthole—Wylie) Incommod e and, even more, discommod e carry a somewhat heightened suggestion of disturbance or annoyance, but not enough to imply actual suffering or injury; rather, they connote some mental agitation (as embarrassment or
vexation) or more or less disagreeable interference with one's comfort or plans (Lucian was soon incommode by the attention his cousin attracted—Shaw) "passenger disservice"—all the things which go to delay flights or otherwise to incommode the passenger—R. P. Cooke (it could not incommode you to receive any of his Grace's visitors or mine—Scott) (finding herself and the younger children incommode in the boat—Galt) Trouble is often used in polite intercourse in a sense close to that of inconvenience, when it suggests even less effort or disturbance {may I trouble you to pass the salt} (will it trouble you to drop this letter in the box when you are passing?) It is, however, also used to imply serious disturbance or annoyance (as worry, deep concern, or great pains); in this sense and sometimes in the lighter sense, it is frequently reflexive {men troubled themselves about pain and death much as healthy bears did—Henry Adams} {an artist who does not trouble about the philosophy of things, but just obeys the dim promptings of instinct—Montague}.

Ania disturb, *discompose: interfere, intermeddle, *meddle incorporate vb embody, assimilate, *identify Ania merge, blend, fuse, coalesce (see MIX): *unite, combine, conjoin: consolidate, unify, *compact incorporeal *immaterial, spiritual Ant corporeal —Con *material, physical, sensible, objective

increase vb Increase, enlarge, augment, multiply mean to increase {the portion to something else <the darkness increased} or growth in intensity, especially by degrees or in proportion to the loss of face involved in admitting that he didn't incur —Armstrongy —Smithy (incur mental fatigue) In transitive use {increase may or may not imply serious disturbance or annoyance (as worry, deep concern, or great pains)}; in this sense and sometimes in the lighter sense, it is frequently reflexive {men troubled themselves about pain and death much as healthy bears did—Henry Adams} {an artist who does not trouble about the philosophy of things, but just obeys the dim promptings of instinct—Montague}.

Ania disturb, *discompose: interfere, intermeddle, *meddle incorporate vb embody, assimilate, *identify Ania merge, blend, fuse, coalesce (see MIX): *unite, combine, conjoin: consolidate, unify, *compact incorporeal *immaterial, spiritual Ant corporeal —Con *material, physical, sensible, objective

increase vb Increase, enlarge, augment, multiply mean to become or cause to become greater or more numerous. Increase distinctively carries the idea of progressive growth; sometimes it means nothing more than this {Jesus increased in wisdom and stature, and in favor with God and man—Lk 2:52} {Miss Anderson's reputation as an artist increased—Current Biog.} Sometimes it implies growth in numbers by natural propagation {Abou Ben Adhem (may his tribe increase!)—Hunt} or growth in size, amount, or quantity (as by increments or accretions) {their salaries increase annually by one hundred dollars} {his strength will increase when his health improves} or growth in intensity, especially by degrees or in proportion to something else {the darkness increases the further we advance into the forest} {your misery increase with your age!—Shak.} {a series of several situations which progressively increase in humorous possibilities—Kilby} In transitive use increase may or may not imply progressive growth; often it so stresses the operation or the effectiveness of a cause that it loses the connotation of natural or regular progression {the trustees increased all salaries} {a rich diet increased her weight} {the depression increased his misgivings} {the girl's actions increased his suspicions} {good teaching increases one's desire for knowledge} {many facts unearthed by psychical research and abnormal psychology increase the credibility of some of the more miraculous parts of the gospel narratives—Flower} Enlarge stresses expansion or extension so that whatever is affected is greater in some or all of its dimensions or in its size or capacity {he enlarged his farm by the purchase of one hundred adjoining acres} {enlarge a hotel by building a new wing} In extended use enlarge is applicable primarily to what may be thought of as capable of being made larger or smaller in extent or size; thus, one does not enlarge one's interests or one's activities but the field of one's interests, or the scope of one's activities {enlarge the circle of one's acquaintances} {enlarge one's capacity for enjoyment} Nevertheless field, scope, or capacity may be merely implied {its [a constitutional clause's] terms purport to enlarge ... the powers vested in the government—John Marshall} {enlarging our personality by establishing new affinities and sympathies with our fellowmen, with nature, and with God—Ingo} {the abundant opportunities which the aesthetic realm provides to enlarge our experience—Hunter Mead} Augment, like increase, basically implies growth; it rarely, however, carries the implication of progressive growth or growth by degrees, which is often so strong in increase. It differs from increase chiefly in being used in reference to things already well grown or well developed; thus, when one says "the team's confidence increases with every victory" one implies that its confidence was originally not strong; on the other hand, when one says "the team's confidence augments with every victory" one implies that its confidence was never weak. Consequently the distinctive implication of augment is a growing greater, more numerous, larger, or more intense {even an increase of fame served only to augment the industry—Reynolds} {to fete over unavoidable evils, or augment them by anxiety—Austen} Multiply implies an increase in number especially by natural generation {every species of animals naturally multiplies in proportion to the means of their subsistence, and no species can ever multiply beyond it—Smith} Sometimes, however, the word implies increase in numbers by indefinite repetition of things of the same kind {if there were space, we might multiply illustrative citations} {philosophers who propose to solve certain intellectual problems by multiplying abstractions—Holmer} {commerce multiplied wealth and comfort—Barr} Ania *intensify, aggravate, heighten, enhance: *expand, swell, amplify, dilate, distend, inflate: *extend, lengthen, elongate, prolong, protract Ant decrease —Con diminish, lessen, reduce, abate, dwindle (see DECREASE): *shorten, abridge, abbreviate, curtail, retrench: *contract, condense, shrink, deflate incredulity disbelief, *unbelief Ant doubt, dubiety, dubiosity, skepticism, *uncertainty Ant credulity —Con certitude, *certainty, assurance, conviction: positiveness, coarseness, sureness (see corresponding adjectives at SURE)

increment accretion, *addition, accession incrimate impeach, indict, *accuse, charge, arraign Ania *involve, implicate Con *exculpate, exonerate, absolve, acquit, vindicate inculate *implant, instill Ania *infuse, inoculate, imbue, leaven: *teach, instruct, educate: impart, *communicate incur, contract, catch are comparable when they mean to bring upon oneself something unpleasant, onerous, or injurious. Incur may or may not imply foreknowledge of what is to happen {incur a debt} {incur criticism} but it usually implies responsibility for the acts which bring about what is incurred {he simply couldn't bring himself to incur the loss of face involved in admitting that he didn't know enough English—Durdin} {an environment containing all the classic elements for incurring mental fatigue—Armstrongy} Catch carries a stronger implication than incur of acquisition, but it is equally inexplicit in its lack of clear suggestion as to whether the acquisition derives from intention or accident {had contracted considerable debts in granting loans to the king—Cruckshanks} {contract a disease} {contract bad habits} But contract often distinctively implies a meeting between two things that permits either an interchange of qualities {each from each} {from each contract new strength and light—Pope} or a transmission of something from one to the other {they say that sherry ought to live for a while in an old brandy cask, so as to contract a certain convincing quality from the cask's genial timbers—Montague} Catch, the least

A colon (:) separates groups of words discriminated. An asterisk (*) indicates place of treatment of each group.
literary and most ordinary of these terms, usually implies infection or something analogous to it (catch a heavy cold) (religion, in point of fact, is seldom taught at all; it is caught, by contact with someone who has it—Inge)

indescribable *unutterable, inexpressible, ineffable, un-speakable, indefinable
indicate, betoken, attest, bespeak, argue, *prove can all mean to give evidence of or to serve as ground for a valid or reasonable inference. One thing indicates another when the former serves as a symptom or a sign pointing to the latter as a justifiable or necessary conclusion, treatment, or remedy (the facts revealed by the auditor's investigation indicate that the peculations were not confined to one person) (conflicting findings indicate further neurological research—Collier's Yr. Bk.) (such symptoms indicate an operation) (the results ... are believed to be the first to indicate a possible magnetic effect directly attributable to a solar eclipse—Harradon) One thing betokens another when the former serves as visible or sensible evidence or, more narrowly, as a presage or portent of the latter (his appearance betokened complete security—Meredith) (the black clouds betoken a storm) (like a red morn, that ever yet betokened wreck to the field—Shak'y) (towering business buildings, great warehouses, and numerous factories betoken its importance—Amer. Guide Series: N. C.) One thing attests another when the former serves as indisputable evidence of the latter and has the force though not necessarily the character of legal testimony or documentary proof (the great seal ... attests ... the verity of the presidential signature—John Marshall) (their success is attested by the marvelous exactness with which eclipses are foretold—Darrow) One thing bespeaks another when the former leads to the inference that it is the outward manifestation of the latter (to Him whose works bespeak his nature—Cowper) (the large abstention from voting in our elections must certainly bespeak an indifference not without meaning—Frankfurter) (a glint of pride in her eyes that bespoke her new dignity—Lasswell) One thing argues another when the former gives good reason for belief in the existence, the reality, or the presence of the latter (his evasion, of course, was the height of insolence, but it argued unlimited resource and verve—Kipling) (to the grub under the bark the exquisite fitness of the woodpecker's organism to extract him would certainly argue a diabolical designer—James) (a becoming deference argues deficiency in self-respect—Whitehead) One thing proves another when the former serves to demonstrate or manifest the truth of the latter (your language proves you still the child—Tennyson) (to become a writer was, however, in Thoreau's mind; his verses prove it, his journal proves it—Canby)
Anna intimate, hint, *suggest: evince, evidence, demonstrate, manifest, *show: import, signify, denote, *mean
indict incriminate, impeach, charge, arraign, *accuse
Anna blame, denounced, condemn (see CRITICIZE)

Con *exculpate, absolve, exonerate, acquit, vindicate

Indifferent, unconcerned, incurious, aloof, detached, uninterested, disinterested mean not feeling or showing interest, especially natural or normal interest. Indifferent is often used in place of the other and more specific terms. It may imply neutrality of attitude arising either from a lack of bias, prejudice, or predilection when two or more persons or things are considered or from a lack of feeling for or against a particular person or thing (it is impossible to remain indifferent to political parties when great issues are at stake) (he was ... exceedingly difficult to please, not ... because he was hypercritical and exacting, but because he was indifferent—Bennett) (nature had no sympathy with our hopes and fears, and was completely indifferent to our fate—L. P. Smith) Unconcerned implies indifference such as arises from unconsciousness, insensitiveness, or selfishness which prevents one from being moved, worried, or made solicitous (convincing the unconcerned, the apathetic, and the downright hostile—Fine) (readers unconcerned with style and philosophical illumination—Cordell) Incurious implies indifference arising from a lack of intellectual interest or normal curiosity; it often suggests incapacity because of temperament or state of mind (why ... are we, as a race, so incurious, irresponsible and insensitive—Woolf) (the incurious ignorance of the poor about the diseases among which they live—Edmund Wilson) Aloof and especially its derivative aloofness stress indifference that is the natural result of feeling apart or at a distance from someone or something (as from temperamental reserve, a sense of superiority, or an aversion to the inferior) (young people ... tend to become arrogant and hard, ignorant of the problems of adult life, and quite aloof from their parents—Russell) (it nerved him to break through the awe-inspiring aloofness of his captain—Conrad) Detached often implies a commendable aloofness which is the result of freedom from prejudices or of selfish concern for one's personal interests (the ... frigid and detached spirit which leads to success in the study of astronomy or botany—Chesterton) Sometimes it distinctively suggests the lack of any kind of looking at persons or things as though they bear no relation to one's own life (Rome contemplated the spectacle with the detached, intelligent amusement of the ... theatergoer—Rose Macaulay) (he had been detached and impersonal about the great facts of life—Webb) Uninterested is the most neutral of these terms and in itself suggests nothing beyond the fact of a lack of interest (aware of nature as uninterested in him, yet able to feed or crush him—Kelmon) Disinterested though increasingly interchangeable with uninterested, in its more discriminative use suggests a freedom from thought of personal advantage or interest that permits one to detect the truth, to tell the truth, or to judge truly (a disinterested observer) (will teach that one disinterested deed of hope and faith may crown a brief and broken life with deathless fame—Elion) (although there are many things in which I am uninterested, I cannot be disinterested about the things in which I am interested—Lowrie) (a disinterested historian)
Anna impartial, unbiased, dispassionate, *fair: apathetic, *impassive, phlegmatic: *cool, nonchalant

* See also explanatory notes facing page 1
object is to induce the child to lend of his own free will; so long as authority is required, the end aimed at has not been achieved—Russell} (conditions which had induced many persons to emigrate from the old country—Dewey)

Persuade implies a winning over by an appeal, entreaty, or expostulation addressed as much to feelings as to reason; it usually implies that the one persuaded is more or less won over by the one that persuades. It is not very difficult to persuade people to do what they are all longing to do—Huxley} (deputed by the firm of lawyers . . . to persuade her to resume her married life—Powell)

Prevar, usually with on or upon, may be employed in place of either induce or persuade, but it usually carries a stronger implication of opposition to be faced or of good arguments to be overcome (he had never before supposed that, could Wickham be prevailed upon to marry his daughter, it would be done with so little inconvenience to himself as by the present arrangement—Austen) (I will go now and try to prevail on my mother to let me stay with you—Shaw) (prevailed upon the men in the sloop to sail up the river again, to rescue any survivors—M. S. Douglas)

Get in this relation (see also Get 1) is a much more neutral term than the others discriminated and it may replace any of them when the method by which a favorable decision is brought about is irrelevant or, sometimes, is deliberately not stressed (finally got the boy to do his homework) (tried to get the union to accept arbitration) (succeeded in getting the Russians to relinquish certain claims for war damages—Americana Annual)

induct inaugurate, install, *initiate, invest
induction *deduction
Ana *inference, ratiocination
inductive deductive (see under deduction)
Ana roticative, inferential (see under inference)

indulge, pamper, humor, spoil, baby, mollycoddle mean to show undue favor or attention to a person or his desires. Indulge implies weakness or compliance in granting another's wishes or desires, especially those which have no claim to fulfillment or which ought to be kept under control (I would indulge her every whim—Hardy) (pasty-faced languid creatures . . . indulged in food and disciplined in play—Russell) (when schoolboys were less indulged with pocket money—Archibald Marshall)

Pamper carries an implication of inordinate gratification of an appetite or taste especially for what is luxurious or dainty and, therefore, softening in its physical, mental, or moral effects (rich though they were, they refused to pamper their children) (he preserved without an effort the supremacy of character and mind over the flesh he neither starved nor pampered—Dickinson) (no country can afford to pamper snobbery—Shaw)

Humor stresses either attention to or an easy yielding to whim, caprice, or changing desires; it therefore often suggests accommodation to the moods of another (humoring a pet fawn which had a predilection for soap and cigarette butts—Corsini) (the tone of your voice . . . is too gentle, as if you were humoring the vagaries of a blind man's mind—Hecht)

Spoil stresses the injurious effect on the character or disposition of one who is indulged, pampered, humored, or otherwise made the recipient of special attention; however the word is often used to imply attentions that are likely to have this effect (She talks a great deal, sir, Elizabeth apologized. "She's our only little girl, and I'm afraid we spoil her"—Deland)

Baby implies excessive attentions, especially of the kind given to those who are unable to care for themselves and need the constant assistance of a mother or nurse; it also carries a strong implication of humoring or pampering (babying Americans, telling them what they should read and should not read—Sokolsky) (Lydia had two methods of taking men down: babying them and harping on their faults—Edmund Wilson)

Mollycoddle usually implies babying; it distinctively suggests inordinate attention to another's health or physical comfort or undue efforts to relieve another of strain or hardship. It often also connotes, as the effect or danger of such treatment, effeminateness or infantilism (schools where grown boys and girls are mollycoddled) (look here, mother dear: I'm as well as ever I was, and I'm not going to be molly-coddled any more—Braddon)

Ant discipline (others): abstain (with reference to oneself, one's appetite)

Infectious, contagious, communicable, catching

Infectious, contagious, communicable, catching all have extended use in their basic use as applied to diseases are distinguishable though closely similar in meaning. Infectious designates a disease resulting from the invasion of and multiplication in the body by germs (as bacteria, protozoans, or viruses) that produce toxins or destroy or injure tissues. Contagious more precisely designates an infectious disease caused by receiving living germs directly from a person afflicted with it or by contact with a secretion of his or some object he has touched. Communicable in this relation is nearly equivalent to infectious, but it emphasizes the transmissibility of the disease rather than the method by which it is acquired. Catching, a less formal term, is close in meaning to contagious, but it implies even more the danger of contact. Infectious, contagious, and catching all have extended use but in such use the fine distinctions exhibited in their technical senses are not carried over with the result that they are nearly exact synonyms meaning rapidly imparted to others; thus, one may speak of contagious, or infectious, enthusiasm or of enthusiasm that is catching (see CONTAGIOUS, INFECTIOUS). The adjectives contagious and catching may be distinctively applied to matter and means potentially infectious (see CONTAGIOUS, INFECTIOUS).
inferior

subordinate mean one, usu-

ratiocinative (see under INFERENCE 2)

inferential

1 deduction, conclusion, judgment (see under JUDGMENT)

Ant inferior — Con chief, head, master, leader

infernal, chthonian, hellish, Hadean, Tartarean, stygian

mean of or characteristic of the abode of the dead. Infer-

fearl basically denotes of or characteristic of the under-

world regions once held to be inhabited by the earth gods

and spirits of the dead. Through confusion of pagan con-

ceptions of the underworld with Jewish and Christian

conceptions of hell as the abode of devils and a place of

torture for the souls of the damned infernal has acquired

connotations of horror, torturing fiends, and unendurable

suffering through fire, which nearly always blur and some-

times blot out its original subterranean implications.

(from the infernal Gods, 'mid shades forlorn—Words-

worth) (the most abhorred fiend in the infernal regions

is sent to torment me—Scott) When the classical con-

ception of the underworld must be suggested without an

admixture of alien connotations, chthonian is sometimes

used (but the worship of the dead . . . and of the chthonian

gods, was marked off by broad lines from that of the Olym-

pian gods—Hasting) Hellish comes close to the current

meaning of infernal but carriies so strong an implication

of devilishness that it more nearly approaches fiendish in

its meaning (heavenly love shall outdo hellish hate—

Milton) (burned them both with hellish mockery—

Shelley) Hadean, Tartarean, and stygian are used in

poetry in place of infernal, sometimes without any ref-

erence to the conception of Hades, Tartarus, and the Styx

in classic mythology. Very frequently Hadean is a loose

equivalent for chthonian, Tartarean suggests darkness

and remoteness, stygian connotes bounds with no outlet

for escape, but all three are without fixed content.

Ana *fiendish, devilish, diabolical, demoniac: damnable,

accursed, cursed, *execrable: nefarious, flagitious,

iniquitous, villainous, *vicious

Ant supernatural

infertile *sterile, barren, impotent, unfruitful

Ana *dry, arid: impoverished, exhausted, drained, de-

pleted (see DEPLETE)

Ant fertile — Con fecund, fruitful, prolific (see FERT-

ILE): producing or productive, bearing, yielding (see

corresponding verbs at BEAR): reproducing, propagating,

breeding, generating (see GENERATE)

infest, overrun, beset are comparable when they refer to

disagreeable or noxious things and mean to make trouble

because of their presence in swarms. Although infest

carries only by suggestion the idea of annoyance or re-
pugnance, since idiom does not require reference to the

person so affected, the term is always derogatory (wild

pigs invade the airfields. Crocodiles infest the rivers—

Michener) (to poison vermin that infest his plants—

Cowper) (the idle rich who at present infest the older

universities—Russell) (police agents and provocateurs

who infested the revolutionary movement—Rolo) Over-

run is often interchangeable with infest, especially in

the passive, but because it usually retains the implications

of its basic sense it is the precise word when the idea of
running or spreading is to be conveyed (the cellar is overrun with mice) (the garden is overrun with weeds) (heavily wooded and overrun with flowers—Amer. Guide Series: Mich.) (conformity of belief has . . . overrun whole populations like a plague—MacLeish) (he found the East already overrun with refugee conductors—Green Peyton) Beset has usually the meaning to trouble through frequency and persistence, and often connotes assailing or attacking (he was beset by enemies on every side) (she hurried at his words, beset with fears—Keats) (the road is beset with dragons and evil magicians—Costain) (subject to none of the pressures that beset American and English papers—Mott) *teem, swarm, abound: harass, harry, pester, plague, worry, annoy Ant disinfest — Con *exterminate, extirpate, eradicate, wipe: *abolish, annihilate, extinguish, abate indefiel unbeliever, *atheist, freethinker, agnostic, deist infinite, eternal, sempiternal, boundless, illimitable, uncircumscribed mean having neither beginning nor end or being without known limits. Infinite especially as applied to God or his attributes implies immeasurability or an incapacity for being estimated in any conceivable respect (as duration or extent) (great is our Lord, and of great power: his understanding is infinite—Ps 147:5) (great are thy works, Jehovah! infinite thy power! what thought can measure thee, or tongue relate thee—Milton) In mathematical and scientific use the term usually stresses indeterminableness; often it implies that no limits can be set to which a thing does or may extend, or that no point at which it ends can be discerned; thus, the number of positive integers is infinite since no one can set a limit to the number that can be indicated; an infinite decimal is one (as a repeating decimal) that cannot be brought to a termination (the total number of stars is supposed, even by those who reject the idea of infinite extension, to run into thousands of millions—Inge) (in more general use, infinite usually implies not only exceeding greatness or vastness but indefiniteness or seeming endlessness of extent (Chinese landscape [painting] is certainly pre-eminent . . . in suggesting infinite horizons, the look of mountains . . . melting away into remote sky—Binyon) (the Truth . . . is of necessity infinite and so is not for any poor finite creature like man—Babbitt) (the infinite ingenuity of man—Webb) Eternal, in its earliest and still prevailing sense, implies having neither beginning nor end in time; it is therefore applied chiefly to God, in the sense of being uncaused or uncreated and unending (the eternal God is thy refuge—Deut 33:27) But it may be applied with essentially the same meaning to things and especially to abstractions and concepts for which no beginning is known or under present conditions is discoverable, and for which no end can be foreseen or predicted (argue that matter is eternal) (the idea that the world is eternal is now seldom advanced) (the consideration of the general flux of events leads to this analysis into an underlying eternal energy—Whitehead) (the tradition that nature is ruled by hard, eternal, immutable laws—Cohen) In more general use eternal may be indistinguishable in meaning from endless and is then applied to things with a known or evident beginning but no ending or an ending infinitely remote or completely indefinable (the Christian's hope of eternal life) (no eternal historical trend toward economic equality can be discovered—Sorokin) This sense is frequent in hyperbolic use in which it may imply either endless duration or constant recurrence often to the point of weariness or disgust (the eternal effort to discover cheap and agreeable substitutes for hard work—Justice Holmes) (the staircase door opened with its eternal creak—Bennett) but it also applies to something which, though it changes in appearance, form, or method, never dies out (Macaulay, who has a special affinity for the eternal schoolboy—Inge) (princes were mortal, but the commonwealth eternal—Graves) Sempiternal, a bookish word, is an intensive of eternal with somewhat greater emphasis upon the continuity of the thing so described (all truth is from the sempiternal source of Light Divine—Cowper) (he did not really believe that infinity was infinite or that the eternal was also sempiternal—Shaw) but it is chiefly a hyperbolic term (full dinners . . . with the sempiternal saddle of mutton—Jekyll) (the oldest, deepest (and seemingly sempiternal) controversy involves the definition of itself—Hentoff) Boundless implies little more than an apparent lack of restrictions or bounds, or a capacity for extending, expanding, or increasing indefinitely; it often applies to something which so far exceeds in range, measure, or amount what is usual for a thing of its kind that it staggered the mind (boundless wealth) (boundless impudence) (my bounty is as boundless as the sea—Shak) (a boundless command of the rhetoric in which the vulgar express hatred and contempt—Macaulay) (this long and sure-set liking, this boundless will to please—Housman) In mathematical and scientific usage, boundless applies specifically to a surface or a space (as a closed curved line or a spherical surface) which has the property of permitting an object starting from any point in the space and proceeding by one mathematical law to return to the same point without being interrupted (the surface of a sphere is boundless but not infinite) Illimitable also stresses a lack of bounds or limits, and may be used in place of boundless (an illimitable appetite—Stephen) but it is often applied specifically to something (as a distance) that can theoretically be measured in extent but in actuality exceeds the capacity of human ingenuity or of human instruments for measurement or determination of extent (the heavens' illimitable height—Spenser) (the illimitable distances between the earth and the stars) Uncircumscribed implies the lack of a determinable limit in any conceivable direction; it applies to something that extends or expands or seems to extend or expand in all directions in the manner of radii from the center of a circle (uncircumscribed freedom) (so arbitrary and uncircumscribed a Power—Charles I) (the lighthouse symbol penetrates the novel with uncircumscribed power—Robert Humphrey) Ant finite — Con circumscribed, limited, restricted (see LIMIT vb): *dependent, conditional, contingent, relative infirm feeble, decrepit, *weak, frail, fragile Ana debilitated, disabled, crippled (see WEAKEN) Ant hale — Con *strong, sturdy, stalwart, stout: *healthy, robust, sound inflammable *combustible, flammable, incendiary, inflammatory Ana igniting, kindling, firing, lighting (see LIGHT vb): flaring, blazing (see BLAZE vb): infuriating, enraging, incensing (see ANGER vb) Ant extinguishable inflammatory *combustible, inflammable, flammable, incendiary Ana inciting, instigating (see INCITE): stimulating, exciting (see PROVOKE): sensitive, susceptible (see LIABLE) inflate distend, swell, *expand, amplify, dilate Ana enlarge, *increase, augment: magnify, aggrandize, *exalt Ant deflate — Con *contract, compress, shrink, condense, constrict inflated, flatulent, tumid, turgid mean filled with some-
thing insubstantial (as air or vapor). Inflated implies ex-
pansion by the introduction of something (as a gas) lack-
ing in substance to the point where the walls are stretched
taut or tension is evident (an inflated tire) (an inflated
balloon) In its extended use inflated implies a stretching
or expanding, often by artificial or questionable means,
to a point not justified by reality or truth; thus, currency
is said to be inflated when the amount in circulation far
exceeds the amount normally necessary to meet the de-
mands of trade and commerce; one's ego is said to be
inflated when one is puffed up with self-confidence and
pride not warranted by one's ability or achievements;
a style may be described as inflated when it is far more
pretentious or imposing than its subject matter warrants
(a pretentious and inflated tract on feminism—Men-
ninger) (caricaturing the inflated elegance of Eastern
culture as represented in its refined fiction—J. D. Hart)
Flatulent applies basically to persons or their organs when
gases generating in the alimentary canal cause distention
of stomach or bowels. In its extended use flatulent usu-
ally implies emtness with the appearance of fullness or
a lack of pith or substance (flatulent with fumes of self-
appreciation) (to score or two or three, each more
fumble and more flatulent than the last—Swinburne)
(entiasts who read into him all sorts of flatulent bombast—Mencen)
Tumid implies noticeable enlarge-
ment by swelling or bloating, especially as a result of an
abnormal condition (my thighs grow very tumid—John-
son) (his face looked damp, pale under the tan, and
slightly tumid—Cozzens) In its extended use tumid im-
plies an abnormal or conspicuous increase in volume with-
out a proportionate increase in substance and often sug-
gests pretentiousness or bombast (to compare, in thy
mell—Shelley) (an enthusiastic) (using great words on the lowlier subject, contrives to make
them appropriate, with Burke, writing on the loftier sub-
ject, the same or similar words have become tumid—
Quiller-Couch) Turgid is not always distinguishable from
tumid; however, it is more often used when normal
distention as distinct from morbid bloating is implied
(healthy living cells are turgid) (woody tissue turgid
with sap) Consequently, in extended use, especially as
applied to literary expression or style, turgid often adds
to tumid the connotation of unstrained vitality or of
undisciplined emotion, especially as manifest in bom-
bast, rant, or rhapsody (see BOMBAST) (the effects . . .
would have been obscured by a rapid and conversational
delivery—Dickinson) Accent denotes such manner or
quality of utterance or tone as may distinguish a particular
variety of speech (as one peculiar to a person, race,
district, or class) (a Southern accent) (a Parisian accent)
(speak with a refined accent) Like the other terms in
this group, it often suggests, and sometimes indicates,
the speaker's feelings (a different accent was notable in
Joseph's voice when he spoke of Azariah—George
Eliot)

inflection

inflection, intonation, accent are comparable when they
designate a particular manner of employing the tones of
the voice in speech. Inflection implies change in pitch or
tone; it often suggests a variation expressive of emotion
or sentiment, and, usually, a momentary mood (it was not
her words, but her inflection, that hurt) (a slight inflection
made one feel that one had received a great compliment—
Cather) Intonation is often individual but it is seldom
thought of as the result of a mood; it is applied to the rise
and fall in pitch that constitutes what is called "speech
melody" and that distinguishes the utterance of one
individual or group from another (a ministerial intonation)
(we still write . . . for the actors, reckon upon their in-
tonations, their gestures—Quiller-Couch) (that peculiar
and pleasant intonation that marks the speech of the
Hebridean—Black) In some languages (as Chinese),
called "tone languages," fixed pitch, or intonation, dis-
tinguishes the various meanings of single words. In a
more specific sense, intonation often (as intone always)
implies reciting or speaking religious matter (as a psalm
or a prayer) in a singing voice, usually in monotone (in-
tonation of that majestic iambic verse whose measure
would have been obscured by a rapid and conversational
delivery—Dickinson) Accent denotes such manner or
quality of utterance or tone as may distinguish a particular
variety of speech (as one peculiar to a person, race,
district, or class) (a Southern accent) (a Parisian accent)
(speak with a refined accent) Like the other terms in

district, or class) (a Southern accent) (a Parisian accent)
(speak with a refined accent) Like the other terms in
this group, it often suggests, and sometimes indicates,
the speaker's feelings (a different accent was notable in
Joseph's voice when he spoke of Azariah—George
Eliot)

inflexible

inflexible 1 rigid, *stiff, tense, stark, wooden
Ana hard, solid, *firm: *rigid, rigorous, strict, stringent:
tough, tenacious, stout, *strong: immobile, *immovable
Ant flexible —Con *elastic, resilient, supple, springy:
pliable, plant, *plastic, malleable, ductile: fluid, *liquid

2 Inflexible, inexorable, obdurate, adamant, adamantine
mean not to be moved from or changed in a predetermined
course or purpose. All are applicable to persons, decisions,
laws, and principles; otherwise, they vary in their appli-
cations. Inflexible usually implies firmly established prin-
ciples rigidly adhered to; sometimes it connotes resolute
steadfastness, sometimes slavish conformity, sometimes
mire pigheadedness (society's attitude toward drink and
dishonesty was still inflexible—Wharton) (a morality
that is rigid and inflexible and dead—Ellis) (arbitrary and
inflexible rulings of bureaucracy—Shils) Inexorable,
when applied to persons, stresses deafness to entreaty
(more fierce and more inexorable far than empty tigers
or the roaring sea—Shak) (our guide was inexorable,
saying he never spared the life of a rattlesnake, and
killed him—Mark Van Doren) When applied to decisions,
rules, laws, and their enforcement, it often connotes re-
 lentlessness, ruthlessness, and finality beyond question
(nature inexorably ordains that the human race shall
perish of famine if it stops working—Shaw) It is also
often applied to what exists or happens of necessity or
cannot be avoided or evaded (inexorable limitations of
human nature) (inexorable destiny) (you and I must
see the cold inexorable necessity of saying to these in-
human, unrestrained seekers of world conquest . . . "You
shall go no further"—Roosevelt) Obdurate is applicable
chiefly to persons and almost invariably implies hardness
of heart or insensitiveness to such external influences as
divine grace or to appeals for mercy, forgiveness, or
assistance (if when you make your prayers, God should
be so obdurate as yourselves, how would it fare with your
departed souls?—Shak) (the obdurate philistine material-
ism of bourgeois society—Connolly) Adamant and ada-
mantine usually imply extraordinary strength of will or
impenetrability to temptation or entropy (Cromwell's
Adamantine courage was shown on many a field of battle—
Goldwin Smith) (when Eve upon the first of men the
apple pressed with specious cant, O, what a thousand

pities then that Adam was not Adam-ant—Thomas Moore

Ant flexible —Con *elastic, resilient, expansive, volatile, buoyant: amenable, tractable, docile, biddable (see OBEDIENT)

influence n Influence, authority, prestige, weight, credit are comparable when they mean power exerted over the minds or acts of others either without apparent effort or as the result of the qualities, the position, or the reputation of the person or thing that exerts this power. Influence suggests a flowing from one thing into another of something imperceptible or impalpable; this connotation is retained when the word implies the effect or effects which one person or thing insensibly has on another or the ascendency which one person or thing similarly acquires over another (he was not strong enough to resist the influence of bad companions) (we find primitive men thinking that almost everything...can exert influence of some sort—James) (as provost of the Swedish clergymen he exercised a quickening influence over all the Swedish congregations—Genzmer) However influence often loses this implication of insensible or unconscious operation and suggests instead the conscious use of personal power or, sometimes, of underhanded means to determine the acts of another; in this sense it often follows the verb use or one of its synonyms (use undue influence over a person making a will) (used his influence in getting a bill through a legislature) Authority originally was applied to one (as a preacher, teacher, or writer) or to writings or utterances having the power to compel belief or to win acceptance. In such cases the word usually imputed great learning, great wisdom, or divine inspiration to the person or his work (by turning o'er authorities, I have...made familiar to me...the blest infusions that dwell in vegetives, in metals, stones—Shak.) This sense persists and authority is still applicable to a person or publication that is able or qualified to gain credence or to inspire belief in its authoritative ness (do not cite this historian; he is not an authority) (an economist should form an independent judgment on currency questions but an ordinary mortal had better follow authority—Russell) (scholars who held that Cicero was an unchallengeable "authority"—highet) From this use mainly, but also from its other sense (see POWER 3), authority has come to be applied also to the power resident in a person or thing that is able because of its or its inherent qualities to win the devotion or allegiance of men and to gain rather than exact their obedience and belief (a book of manifest authority) (that personal authority, which, far more than any legal or constitutional device, was the true secret of his later power—Buchan) (a doctrine that has acquired authority in our own time—Alexander) (some of the new philosophies undermine the authority of science, as some of the older systems undermined the authority of religion—Inge) (to face a good orchestra with inward and outward authority and assurance—Burk) Prestige, in contrast with authority, implies the power to gain ascendency over the minds of men and to command their admiration for distinguished and superior performance, or for conspicuous excellence in its kind (nothing more affects the prestige of a power than its dramatic and rapid defeat in the field—Belloc) (the almost magical prestige that had belonged to the original humanists—Huxley) (such lustre—or prestige or mana—as individual writers possess—Times Lit. Sup.) Weight denotes measurable influence, especially in deter-

mining the acts of others (Mrs. Hawthorne's authoritative air was beginning to have some weight with him—Archibald Marshall) (men who take the lead, and whose opinions and wishes have great weight with the others—Frazer) Credit (see also BELIEF 1) denotes influence that arises from one's reputation for inspiring confidence or admiration (Buckingham...resolved to employ all his credit in order to prevent the marriage—Hume) (as it [the ballet] declined as an art, so also it declined in credit and in popularity; it became scarcely respectable even to admire dancing—Ellis) Ana driving or drive, impelling or impulsion, actuation (see corresponding verbs at move): *power, control, dominion, sway, authority: ascendancy, *supremacy: dominance (see corresponding adjective at dominant)

influence vb *affect, sway, impress, touch, strike Ana *move, actuate, drive, impel: stimulate, *provoke, excite: *stir, arouse, rouse: *incline, dispose, predispone, bias

inform vb 1 Inform, animate, inspire, fire are comparable when they mean to infuse (a person or thing) with something (as a spirit, a principle, an idea, or a passion) that gives him or it effective power or an urge to action or activity. Sometimes, especially in the last three words, the idea of driving or actuating is so strong that it becomes their common denotation and the idea of infusion is merely a common connotation. To inform is to give character or essence to or to so permeate as to become the characteristic, peculiar, essential, and often abiding, quality of (the inspiration of religion passed on to inform and subtly to perfume an art nominally concerned with the aspects of earth and sky, wild creatures and wild flowers—Binyon) (everything that is made from without and by dead rules, and does not spring from within through some spirit informing it—Wilde) (sentimental, Protestant ethos that has always informed his writing—Fiedler) To animate is to endow with life, a vital principle, or an impulse to action. Although animate is often used where inform is also possible, it suggests, far more than inform, vitality and living energy (religion...which is animated...by faith and hope—Johnson) When what is affected is a person or when motivation of action or transiency of impulse is to be implied, animate is the more precise word (he was animated with love for all men) (when the community is animated with anger against some heinous offence—Alexander) (his hatred of restraint animated his resistance to authority) To inspire is to communicate to a person, as if by breathing into him, power or energy in excess of what he believes to be his own. The word usually implies both the operation of a supernatural power or of some inexplicable agency and such an effect as a spiritual illumination, or a quickening of intellectual or imaginative activity, or an exaltation of feeling (great artists know or believe that they are inspired from something outside themselves—Alexander) (that sublimated language used by the finest minds in their inspired moments—Hudson) (we climb the mountains for their views and the sense of grandeur they inspire—Jefferies) Inspire may also imply indirect rather than inexplicable influence, methods, or source (as in imparting knowledge or arousing a feeling (teachers should inspire their pupils to work hard) (today's editorial on the mayor's policy was certainly inspired; it does not represent the editor's views but those of someone in power) To fire is to animate or inspire so powerfully that one is inflamed with passion, ardor, or enthusiasm (one step beyond the boundary of the laws fires him at once in Freedom's glorious cause—Copper) (O how they fire the heart devout—Burns) Ana *infuse, inoculate, imbue, leaven: instill, *implant,
inordinate: enlighten, *illuminate: fire, kindle (see light vb); endure, endow (see dowery)

2 Inform, acquaint, apprise, advise, notify are comparable when meaning to make (one) aware or cognizant of something. One informs a person of something when one imparts knowledge, particularly of occurrences or of facts necessary to the understanding of a situation (inform a person of his success in a competition) (the radio announcer informed his audience of the accident) (kept the staff informed of Chinese public opinion concerning the American military action there—Current Biog.) Also, one informs oneself when by study or investigation one gathers the pertinent facts (his obligation as a citizen is to inform himself ... regarding the controversial issues—Houston) Inform in one specific use also carries the implication of talebearing or accusation (I shall not inform upon you. It is not my business—Wilde) One acquaints a person with something when by introducing him to the experience of it or by imparting information concerning it one makes him familiar with it (in the first meeting of the class, the teacher acquainted his pupils with the program of study) (to acquaint people with information instead of just telling it to them—Gowers) Familiarity is even more strongly implied in the participial adjective acquainted (the examination) is clear enough to anyone acquainted with the history of Puritan thought—Parrington) (a man of sorrows, and acquainted with grief—Isa 53:3) One apprises a person of something when by a message or sign one communicates it to him (he has apprised his employer of his intention to resign) (I made up my mind to send the waiter to . . . apprise him that I was there—Mary Austin) One advises a person of something when one gives him information about it, especially of a kind that is important to him (as in making a decision, determining a policy, or arranging plans) (the president asked to be kept advised of changes in public sentiment) (consulted the wine card and advised me that the wine I had chosen had no special merit—Lovett) Often there is a suggestion of forewarning or counsel (see also advise under advice) 1) (the passengers were advised of the risk before the vessel left New York) (against which a solemn trespass board advised us—Mary Austin) One notifies a person of something when one sends a notice or formal communication concerning it, usually as a matter requiring his attention (notify students of a change in the date of opening) (the court clerk promised to notify the witnesses when he appeared) In commercial use, advise is used in preference to notify when information is given by letter, telegram, or cable (please advise us when the shipment is made)

**Analogous Words**

**Anomalies**

**Contrasts**

**Infuse**

**Infuse** encroach, entrench, *trespass, invade

**Infraction** breach, violation, transgression, infringement, trespass, contravention

**Infrequent, uncommon, scarce, rare, occasional, sporadic** are comparable when they mean appearing, happening, or met with so seldom as to attract attention. Something is infrequent which does not occur often, especially within a given period of time, or which does not recur except at very wide intervals of time or of space (tornadoes are infrequent in New England) (far from being infrequent, the crystalline state is almost universal among solids—Darrow) (infrequent pines dot the forest) (though it was only a few hundred miles north of Santa Fe, communication with that region was so infrequent that news traveled to Santa Fe from Europe more quickly than from Pikes Peak—Cather) Something is uncommon which does not occur or is not found ordinarily and which therefore is singular, exceptional, or extraordinary (smallpox is now uncommon in most parts of the United States) (in certain country districts in Europe families of fifteen are not uncommon enough to be regarded as extraordinary—Shaw) (such muscular strength is uncommon among girls) (a writer possessing uncommon inventive ability—A. C. Ward) (Mr. Coates’s life has not been especially eventful, but he has enjoyed it with uncommon relish—Richard Findlater) Something is scarce which at the moment in mind is not easily found or which does not exist or is not produced in sufficient quantities (a bad harvest makes wheat scarce) (highly skilled mechanics are now scarce) (the Boones wanted land where deer and buffalo were numerous and men and cabins scarce—J. M. Brown) Something is rare (see also choice, thin) of which but few examples, specimens, or instances are found; also, the term often carries such implications of uncommon as being exceptional or of extraordinary character (rare postage stamps) (rare books and first editions) (a perfect union of wit and judgment is one of the rares things in the world—Burke) (great men are scarce . . . but great biographers are positively rare—Seacome) (I may say again, if only rare, how this butterfly would be prized!—Jeffreys) (reported to give very indifferent wines to the rare guests he received in his grim old house—Wharton) Something is occasional which happens or is met with merely now and then. Occasional more than any of the preceding terms implies irregularity or nonconformity to a rule or law that might govern occurrences or appearances (this was not an occasional outburst of activity; it was Wesley’s routine—Crothers) (Artemus Ward was all fun and sweet reasonableness . . . , with an occasional bart that by its unexpectedness did the more damage—Lucas) Something is sporadic which has no continuous existence or continuity in its manifestations and which comes into existence or occurs only in rare and, usually, isolated instances (sporadic cases of an infectious disease) (sporadic outbursts of opposition to high taxes) (humanism and religion are thus, as historical facts, by no means parallel; humanism has been sporadic, but Christianity continuous—T. S. Eliot)

**engeminate**

444 inhabitant

didst smile, infused with a fortitude from heaven, when I . . . under my burden groaned—Shak. <i>he infused his own intrepid spirit into the troops—Gibbon</i> <i>whose work is for the most part infused with the spirit of scientific materialism—L. A. White</i>

* Suffuse implies an over-spreading of a surface by or a spreading through an extent of something that gives the thing affected a distinctive or unusual color, aspect, texture, or quality <i>a blush suffused her cheek</i> <i>eyes suffused with tears</i> <i>when purple light shall next suffuse the skies—Pope</i> <i>she . . . pulled the chain of the incandescent mantle . . . . the room was suffused with the sickly illumination—Mackenzie</i> <i>the poetic faculty will, in fact, have to deal—not with an abstract idea—but with an idea suffused and molded by emotion—Day Lewis</i>

* Imbue implies the introduction of something that enters so deeply and so extensively into the thing's substance or nature that no part is left untouched or unaffected; unlike infuse, which it otherwise closely resembles, imbue takes as its object the person or thing affected, not the thing that is introduced <i>infuse courage into his soldiers</i> <i>imbue his soldiers with courage</i> <i>infuse grace into the soul</i> <i>imbue the soul with grace</i> 

* Thy words, with grace divine imbued, bring to their sweetness no satiety—Milton  
<i>Virgil] has imbued every object that he touches, with the light and warmth and color absorbed from its contact with life—Lowe</i> <i>individuals or societies whose life is imbued with a cheerful certitude, whose aims are clear—Krutch</i>

* Ingrain is found in the past participial or passive forms only; <i>like imbue, it implies an incorporation of something comparable to a pervading dye with the body, substance, or nature of whatever is affected, but unlike imbue, it takes for its object or, when the verb is passive, as its subject the thing introduced rather than the person or thing affected</i> <i>crueity and jealousy seemed to be ingrained in a man who has these vices at all—Helps</i> 
<i>the idea of absolute financial proibity as the first law of a gentleman's code was . . . deeply ingrained in him—Wharton</i>  
<i>the feeling . . . is so deeply ingrained in human nature—F. M. Miller</i>

* Inoculate implies imbibing a person with something that alters him in a manner suggestive of a disease germ or an antigen. Often, the term implies an introduction of an idea, a doctrine, an emotion, or a taste by highly surreptitious or artificial means, in order to achieve a desired end; less often, it additionally implies an evil and destructive quality in what is introduced <i>students inoculated with dangerous ideas</i> <i>the theory . . . that if the great masses of the plain people could be inoculated with it [a taste for music] they would cease to herd into the moving-picture theaters—Mencken</i>

* Leaven implies a transforming or tempering of a body or mass by the introduction of something which enlivens, elevates, exalts, or, occasionally, causes disturbance, agitation, or corruption <i>knowledge . . . must be leavened with maganimity before it becomes wisdom—A. E. Stevenson</i> <i>there was need of idealism to leaven the materialistic realism of the times—Parrington</i>

* Ana impregnate, saturate, impenetrable, *permeate, pervade: *inform, inspire, animate, fire: instill, inoculate, *implant

**ingeminate**

*repeat, iterate, reiterate

**ingenious**

* cunning, *clever, adroit

* Ana interpenetrate: instill, inoculate, *implant: incorpora-

* Ana *entrance, entry, entrée, access

* Ana *compound, composite, amalgam, *mixture, admixture, blend

**ingress**

*entrance, entry, entrée, access

* Ana egress

**inhabitant**, denizen, resident, citizen are comparable when meaning one whose home or dwelling place is in a definite location. **Inhabitant**, the least specific word, implies nothing more than an abode in a given place <i>in 1940 the city had 243,718 inhabitants</i> <i>certain disagreeable inhabitants of open impounded water supplies, known as algae—Morrison</i>

* Denizen denotes one that belongs by birth or naturalization to a given locality <i>denizens of the deep</i> 
<i>cwinged denizens of the crag—Scott</i> <i>as if the old denizens of the forest had been felled with an axe—Maury</i> When substituted in literary use for inhabitant, denizen retains something of its own flavor of belonging to the locality by birth or naturalization <i>jaded and oversophisticated denizens of towns—Loves</i>

* Resident is not always clearly distinguished from inhabitant, especially when a town or city, as distinguished from a state or country, is in question. Often the term implies nothing more than tenancy of a room, an apartment, a house, or a locality for a considerable length of time <i>the summer residents of Bar Harbor</i> Often, in the case of a person who has several residences or who lives mainly in a place other than the one regarded as his home, the term suggests not permanent inhabitancy but legal recognition of one of these places as his domicile, and as the seat of his fundamental legal rights (as of voting) and responsibilities (as of paying income tax) <i>proof that the multimillionaire was a resident of Massachusetts brought several million dollars in inheritance taxes to that state</i>

* Are the students at this college considered residents of the town and entitled to vote in town matters? In reference to a country, resident is more usual than inhabitant as a designation of an alien living in that country for a time and regarded as subject to certain taxes <i>an alien actually present in the United States who is not a mere transient or sojourner is a resident of the United States for purposes of the income tax—Income Tax Regulations, U. S.</i>

* Citizen when denoting a person that is an inhabitant is rarely wholly free from its political sense (see citizen 2); hence, it usually carries some suggestion of membership in, as distinct from mere presence in, a community and of possession of the privileges and obligations inherent in such membership. It is particularly applicable to an adult and substantial resident of a city or town (no mere pedant, but a leading citizen of the town, serving as justice of the peace and as its first postmaster—Starr)

* The body of citizens or those who were members of the
**city and entitled to take part in its political life—Sabine**

**inherent, ingrained, intrinsic, essential, constitutional mean being a part, element, or quality of a thing's internal character or inmost being. Something is inherent which is so deeply infixed in a thing that it is apparently part of its very nature or essence (certain inherent and indestructible qualities of the human mind—Wardsworth) is the inferiority of the modern to the ancient languages, as a means of mental discipline, inherent in these tongues, or does it arise from causes that can be overcome?—Grandgent) Something is ingrained which seems to be wrought into the fiber or texture of a person's being (ingrained prejudice) attributable rather to the ingrained law-abidingness of the people than to the perfection of the Paris police system—Brownell) her deeply ingrained habit of never letting herself go—H. G. Wells) Something is intrinsic which belongs to or is a property of a thing itself, as considered apart from all the external relations, connections, or conditions that affect its usefulness, value, or significance (when the subject has no intrinsic dignity, it must necessarily owe its attractions to artificial embellishments—Johnson) the knowledge of geographical facts is useful, but without intrinsic intellectual value—Russell) Something is essential (see also ESSENTIAL 2, NEEDED) which is an element of a thing's essence and therefore indissolubly involved in its very nature or being (certain essential differences between verse and prose—Quiller-Couch) (that essential sweetness of the moor, born of the heather roots and the southwest wind—Gaskell) has not shown that the merits of puritan thought are essential and the defects accidental—M. G. White)

Something is constitutional which is inherent in the fundamental makeup of the body or mind (a constitutional infirmity) (his vigor is constitutional) (the thoughtful ones will assure you that happiness and unhappiness are constitutional, and have nothing to do with money—Shaw) (a constitutional optimist, emotionally addicted to the view that any adventure into the unknown is worth the risk—Garvin)

*Ana* innate, inborn, inbred, congenital: *inner, inward, internal: natural, typical, normal, *regular: integrated or integral (see corresponding verb at INTEGRATE)

*Ant* adventitious — Con *accidental, fortuitous, incidental: extraneous, foreign, alien, *extrinsic

**inheritance** *heritage, patrimony, birthright

**hereditary**, inborn, inbred, *innate, congenital

*Ana* transmitted, conveyed (see CARRY): generated, engendered, bred (see GENERATE)

*Con* acquired, gained, obtained, gotten (see GET)

**inhibit** 1 *forbid, prohibit, interdict, ban, enjoin

*Ana* prevent, preclude, obviate, avert, ward: debar, check 2 *restrain, curb, check, bridle

*Ant* suppress, repress: prevent, forestall: *arrest, check

*Ant* animate (sense 2): activate (sense 2)

**inhuman** savage, barbarous, *fierce, cruel, ferocious, fell

*Ana* pitiless, ruthless (see corresponding nouns at SYMPATHY): malign, malignant. *malicious: merciless, relentless, unrelenting, implacable, *grim: fiendish, diabolical, devilish

*Ant* humane — Con benevolent, humanitarian, *charitable, altruistic, philanthropic, eleemosynary: compassionate, *tender

**iniquitous** nefarious, flagitious, *vicious, villainous, infamous, corrupt, degenerate

*Ant* righteous — *Con virtuous, *moral, ethical, noble: just, *upright, honorable, honest

**initial adj** Initial, original, primordial can all mean existing at or constituting the beginning or start of a thing, especially of a thing that gradually assumes shape or form or that manifests itself in many ways. Nevertheless, in spite of this agreement in meaning, the words are rarely interchangeable, usually because of additional and differing implications, but often also because of the determination of their use by idiom. Initial, in general, is used in reference to things seen as a whole, often in fact but sometimes in thought; the term, therefore, usually implies an end or completion <the initial letter of a word> (the initial stage of a disease) (an aggressor nation would always have the initial advantage—Dean) (the great incentive to effort, all through life, is experience of success after initial difficulties—Russell) Original (see also NEW) is used especially with reference to what is the very first in order or constitutes the ultimate beginning or source; in this sense it usually connotes the idea of being underived or uninmitted and implies that there is nothing from which the original thing has sprung. A court that has original jurisdiction has the right to try a cause to determine both the facts and the application of the law to them, as distinguished from a court with appellate jurisdiction. "Original sin" was committed by Adam and Eve as the first human beings but, in theological use, the phrase also means that sin as it leaves its traces upon every human being <great books are original communications. But authors are communicating what they themselves have discovered—Adler) Sometimes, however, original means something more specific; thus, the original owner of a piece of land would strictly be the one who first held it by a natural or legal right, but in legal interpretation the phrase may be used of an earlier owner when successive owners are mentioned; an author's original work may be the work first produced by him, but more often it means (without regard to order of writing) a work independently conceived and executed by him <an original print is not, of course, original in the same sense as a painting. With a painting there is only one true original, whereas there may be as many as 50 or 75 originals of a given print—Cain) Primordial (see also PRIMARY) is comparable with initial and original through its implied reference to what forms the actual beginning or starting point or the earliest form taken by something that follows a course, an evolution, a progression, or an unfolding <speculate on the nature of the primordial universe> (the primordial mind) (the new discoveries . . . strongly support the theory that the universe has been expanding ever since a primordial explosion in which it was born—Walter Sullivan)

*Ana* starting, beginning, commencing (see BEGIN): *primary, primal, primeval, pristine: *elementary

*Ant* final — *Con* last, latest, terminal, concluding

**initiate** vb 1 *begin, commence, start, inaugurate

*Ana* *found, establish, organize, institute

*Ant* consummate — *Con* effect, fulfill, execute, accomplish, achieve, *perform: enforce, implement

2 Initiate, induct, inaugurate, install, invest are comparable when meaning to put one through the processes, ceremonies, or other formalities regarded as essential to one's being admitted to one's duties as a member or an official. Initiate (see also BEGIN) usually implies admission to some organization, cult, or craft and especially to one requiring indoctrination in its mysteries or mysterious rites or ceremonies in the introduction of new members (initiate the newly elected members of a college fraternity) (initiate young people in the elements of physical science

**initiate**
- T. H. Huxley (initiate a new reporter into the secrets of successful news gathering) Induct may often be used in place of initiate, especially when introduction under guidance is also implied (induct a person into the duties of a new position) Induct a draftee into the army But induct, as well as inaugurate, install, and invest, may imply a formal or ceremonious endowing of a person with the powers and prerogatives of an office or post Induct the new governor of a colony Induct is used technically of clergymen who are put in possession of a benefice or living, or of officials who are established in their office with appropriate rites or ceremonies Induct the new rector of a parish The new superintendent of schools was inducted into office at last night's meeting of the board of education Inaugurate (see also BEGIN) usually implies more formal and dignified ceremonies and much more publicity than induct inaugurate the president of the United States Inaugurate the new president of the university Install implies induction into an office associated with a seat Install the officers of a society Install a bishop as the archbishop of his new diocese The term also may be used in reference to persons who are formally or comfortably seated Install the guest of honor in the most comfortable chair Install the tottering old lady in a chair by the fireside It is also the only one of these terms which may be used in reference to things as well as to persons Install new machinery in a factory Install electric light fixtures Invest usually suggests a clothing with the robes or other insignia of an office and, by extension, with the powers of that office. It often also implies a ceremony but it may suggest only the addition of powers that come to one on one's induction into a position or office (by the constitution of the United States the president is invested with certain important political powers—John Marshall) Ana introduce, admit, *enter Con *eject, ousted, expel, dismiss: *exclude, eliminate, Con *eject, ousted, expel, dismiss: *exclude, eliminate, injure 1 Injury, hurt, damage, harm, mischief mean the infliction of pain, suffering, or loss The boy is so gentle that he would not harm a fly The circulation of the rumor greatly harmed his business for none of woman born shall harm Macbeth Shak But bitterness among the elders must not be permitted to harm or wound the innocent children of either race Beverly Smith For every time any one of us fails to make the fullest possible contribution to... justice, he harms himself spiritually—Atlantic Hurt usually implies the infliction of a wound whether to the body or feelings or to a thing capable of sustaining an injury; often, it is used where injure is also possible He was severely hurt by a falling brick Hurt a friend's feelings It's damned to have to hurt the people we love—Rose Macaulay A limitless desire to hurt and humiliate H. G. Wells Damage implies an injury that results in lowered value or involves loss in effectiveness, attractiveness, or efficiency His automobile was damaged in a collision The frost damaged the late crops What ever psychoanalysts may say, the parental instinct is essentially different from the sex instinct, and is damaged by the intrusion of emotions appropriate to sex Russell Like Hemingway, he was permanently damaged because repeatedly inspired by women—Morton Injury, though coming close to damage in its meaning and often interchangeable with it, more frequently suggests deterioration or diminution as in value, strength, or validity A weak piece of evidence often impairs the strength of a good argument His value as a candidate has been impaired by his hysterical attacks on his opponent A weakening as of a function or power of functioning His eye was injured and his vision impaired Kindness that left an impression on my heart not yet impaired—De Quincey His physical prowess of all sorts is in no way impaired by heavy drinking and smoking of course Christopher La Farge Mar implies the infliction of an injury that disfigures or maims or involves the loss of a thing's perfection or well-being Striving to better, oft we mar what's well—Shak A man who had spoiled his constitution with bad living—Shaw When a child persistently interferes with other children or spoils their pleasures, the obvious punishment is banishment Russell A great novel spoiled by hasty and lazy composition—Laski Ana *deface, disfigure: *deform, distort, contort: *afflict, torture, torment: *maim, cripple, mutilate, mangle, batter: *abuse, ill-treat, maltreat, outrage, mistreat, misuse Ant aid Con *help, assist: *benefit, profit, avail: preserve, conserve, *save injury 1 Injury, hurt, damage, harm, mischief mean the act or the result of inflicting on a person or thing something that causes loss or pain Injury is the comprehensive term referable to an act or to a result of that act which involves a violation of a right of or of health, freedom, and soundness of body or mind, or causes a partial or entire loss of something of value An injury to his eyes An injury to his reputation Forgive an injury The very essence of civil liberty... consists in the right of every individual to claim the protection of laws, whenever he receives an injury—John Marshall Mental or emotional
upset is just as truly an injury to the body as a bone fracture, a burn or a bacterial infection—G. W. Gray

A great injury could be done to our nation . . . if this political campaign were to descend to the level of competitive threats and veiled hints—A. E. Stevenson

Hurt applies basically to a physical injury (as a wound, lesion, or contusion) that results from a hit, a stab, or a blow. It can also refer to the emotional pain or distress a person feels when their reputation has been damaged by a false rumor or other form of damage. A hurt can be emotional as well as physical. In extended use, hurt applies to the person's reaction to a hurtful act, to the result of such an act, or the state of being hurt. A hurt can be physical, emotional, or both. It can be a terrible torture, or it can be a minor annoyance. Hurt applies not only to acts that involve pain, suffering, or loss; thus, a person whose rights as an heir have been violated may be said to suffer an injury but not a hurt; a person whose reputation has been damaged by a false rumor may have suffered both an injury to his business and a hurt to his feelings; a dentist in drilling a tooth may cause a hurt, but not commonly an injury (leaving forever to the aggressor the choice of time and place and means to cause the greatest hurt to us—Eisenhower)

Damage applies to an injury that involves loss (as in property, in value, or in usefulness). The fire caused great damage to the house.

Harm (usually without an article) is referable to an evil that injures or may injure: often it suggests a consequent suffering (as grief or shame). I meant no harm in saying what I said.

Injury is the general term applicable not only to an act which involves unfairness to a person or thing that works harm or is capable of inflicting injury; it applies either to the harm or injury that results from an agent or agency (one failure led to another, suspicion became general, and the mischief was done—Todd). That's the mischief of the Modernists . . . . They don't claim that the Divine revelation has been supplanted or even added to, but that it has been amplified—Mackenzie—occasionally to the aspect of a situation that causes harm or vexation (the mischief is that people—especially the young—don't confine themselves to one cocktail—Bennett) (and faith, 'tis pleasant till 'tis past: the mischief is that 'twill not last—Housman)

An article is required before the word for an injury to a person or thing for which the law allows an action to recover compensation or specific property, or both. Every person who suffers damage to his person, his property, or his reputation as a result of an infringement of the law suffers a legal injury—Rubinstein

Wrong is, in law, a more general term than injury for it applies not only to all injuries as just defined (private wrongs) but to all misdemeanors or crimes which affect the community (public wrongs) and which are punishable according to the criminal code. But in general use wrong differs little from injustice, except in carrying a stronger connotation of flagrancy or of seriousness (we are . . . steel to the very back, yet wrong with wrongs more than our backs can bear—Shak).

There were many of the wrongs that were to be righted, the grievances to be redressed—Muggeridge

Grievance applies to a circumstance or condition that, in the opinion of those affected, constitutes a wrong or that gives one just grounds for complaint (they sent to the king a statement of their grievances—Keightley). In an early state of society any kind of taxation is apt to be looked on as a grievance—Freeman

In justice, equity, innate, inborn, inbred, congenital, hereditary, inherited are comparable but not wholly synonymous terms that refer to qualities which either are or seem to be derived from one's inheritance or from conditions attending one's birth or origin. Inmate and inborn are often used without distinction. But innate (opposed to acquired) is frequently synonymous with inherent, essential, or constitutional, and then tends to apply to qualities, characters, or elements that are not inherited but belong as part of the nature or essence to something imbedded with life. Innate ideas exist in the mind as a result of its constitution and are therefore found wherever a mind exists. I do not believe that a sense of justice is innate, but I have been astonished to see how quickly it can be created—Russell

This stubbornness has been explained as being innate in the Germans, as a natural racial cussedness. But some of the stubbornness is not innate but acquired—Woolf

Innate also may apply to elements or qualities (as virtues or defects) which arise out of the very nature or character of a thing that has no life and therefore literally no birth (the innate defect of this plan) (the innate magnetism of the prophet—Davis) (the innate tendency of a dictatorship to overreach itself). On the other hand, inborn, which is frequently synonymous with natural or native, retains more specific reference to what is actually born in one or is so deep-seated as to seem to have been born in one; the term is therefore usually applied to qualities or characters that are peculiar or distinctive, sometimes to the type, often to the individual (inborn aptitudes) (the tendency towards schizophrenia was inborn—N. Y. Times) (his inborn ability to sing) (an inborn love of country life)

Inbred implies reference to breeding, or to the processes concerned with the generation, nourishment, and rearing of offspring; the term therefore is more readily applied to what is deeply rooted or ingrained as a result of one's immediate parentage or the circumstances attending one's earliest education or training than to what is constitutional or merely natural (an inbred love of freedom) (an inbred feeling of superiority) (those inbred sentiments which are . . . the true supporters of all liberal and manly morals—Burke) (a methodical man, an inbred Yankee—White)

Congenital applies chiefly to something which dates from the birth or inception of the individual concerned (congenital hip disease) (congenital blindness) (the theory that what was acquired habit in the ancestor may become congenital tendency in the offspring—James) (yet art for art's sake suffers from a congenital disease: it professes to create subsance out of form, which is physically impossible—Santayana). Both hereditary and inherited apply to a result of natural heredity (an inherited bearing defect) (unless he had the hereditary dispositions which he has, he would not behave the way he does—Pop) or some-

Analogous words: *distress, suffering, agony, misery: *pain, pang: violation, transgression, trespass, infringement (see breach): detriment (see corresponding adjective at pernicious): *evil, ill

Antonyms: 2 wrong, *injustice, grievance

 innate, inborn, inbred, congenital, hereditary, inherited are comparable but not wholly synonymous terms that refer to qualities which either are or seem to be derived from one's inheritance or from conditions attending one's birth or origin. Inmate and inborn are often used without distinction. But innate (opposed to acquired) is frequently synonymous with inherent, essential, or constitutional, and then tends to apply to qualities, characters, or elements that are not inherited but belong as part of the nature or essence to something imbedded with life.

The innate tendency of a dictatorship to overreach itself. On the other hand, inborn, which is frequently synonymous with natural or native, retains more specific reference to what is actually born in one or is so deep-seated as to seem to have been born in one; the term is therefore usually applied to qualities or characters that are peculiar or distinctive, sometimes to the type, often to the individual.

Inbred implies reference to breeding, or to the processes concerned with the generation, nourishment, and rearing of offspring; the term therefore is more readily applied to what is deeply rooted or ingrained as a result of one's immediate parentage or the circumstances attending one's earliest education or training than to what is constitutional or merely natural.

Inherited
defect of this plan) (the innate magnetism of the prophet—Davis) (the innate tendency of a dictatorship to overreach itself). On the other hand, inborn, which is frequently synonymous with natural or native, retains more specific reference to what is actually born in one or is so deep-seated as to seem to have been born in one; the term is therefore usually applied to qualities or characters that are peculiar or distinctive, sometimes to the type, often to the individual (inborn aptitudes) (the tendency towards schizophrenia was inborn—N. Y. Times) (his inborn ability to sing) (an inborn love of country life).
times of social heredity (the reciter who might graft on to an inherited body of literature a few embellishments of his own—Lerner & Mims) (several hereditary enemies of the Olivares brothers—Cather) In technical biological use congenital and hereditary are clearly distinguishable, for congenital implies presence at birth (as of a disease or an organic defect) from whatever cause and hereditary implies transmission (as of a tendency, a weakness, or a quality) from an ancestor through the chromosomal mechanism and DNA (a birthmark is a congenital blemish of the skin) (the color of the eyes is hereditary) Ana constitutional, *inherent, intrinsic, essential, inherent: instinctive, intuitive: natural, typical, *regular, normal: native, indigenous Ant acquired — Con *accidental, adventitious, accidental, fortuitous: assumed, affected, feigned, simulated (see assume): cultivated, fostered, nurtured (see nurse) inner, inward, inside, interior, internal, intestine are comparable when they mean being or placed within something. Although in many cases interchangeable, they are more or less restricted in their applications and therefore clearly distinguished in their implications. Inner typically applies to something far within or near the center (thrust them into the inner prison—Acts 16:24) (an inner room) (the inner bark of a tree) while inward typically applies to something directed within or toward the center (the inward curve of a scroll) Both words apply also to the mental or spiritual, frequently with the added implication of something intimate, secret, or inaccessible (the sense by which thy inner nature was apprised of outward shows—Shelley) (outer events only interest me here insofar as they affected my inner life—Elits) (with an inward smile she remembered Spandrell's summary—Huxley) (the inward struggle of the heroes to find their own truth—Rees) Inside is used chiefly of spatial relations (an inside seat) (the inside track) but it may be used with reference to persons who are so placed in their work or who have such contacts that they may be said to be figuratively inside a place or group; thus, inside work implies a contrast with field or road work; inside knowledge of a negotiation implies participation to some extent in that negotiation (have inside information of what is going on in a club) Interior and internal usually suggest more abstract or technical and less intimate relations than inner and inward. Interior frequently implies contrast with the outer limits of the thing itself; thus, the interior features of a country are by implication opposed to those of the coast or boundaries; interior decoration deals with the decoration and furnishing of the inside of a house or other building rather than with its outside; one's interior life is one's life as expressed in thoughts and aspirations rather than in outward activities. Internal implies contrast with something beyond or outside of the outer limits of a thing; thus, internal evidence of a poem's authorship is gained from a study of the poem itself rather than from outside sources; the internal affairs of a country is its domestic, as opposed to its foreign, affairs; internal medicine is that branch of medicine dealing with the diagnosis and treatment of diseases affecting the internal organs (as the heart, lungs, stomach, and liver). Intestine is a close synonym of internal used specifically of what may other- wise be described as domestic or civil (as opposed to foreign) with, however, the connotation of an evil or mischievous origin or nature (enmity, contempt and foreign and intestine war occasioned the neglect . . . of these works—Lord) (a coalition . . . was paralyzed from the start by intestine quarrels—Current History) Ana central, middle, focal, nuclear (see corresponding nouns at center): intimate, close, *familiar: intrinsic, constitutional, essential, *inherent: instinctive, intuitive: deep-seated, deep-rooted (see inveterate) Ant outer — Con outward, outside, exterior, external (see outer) innocent *harmless, innocuous, inoffensive, unoffending Con harmful, hurtful, injurious, mischievous (see corresponding nouns at injury) innocuous *harmless, innocent, inoffensive, unoffending Ant pernicious — Con *poisonous, venomous, virulent, toxic: injurious, hurtful, harmful (see corresponding nouns at injury) inmmendo *insinuation Ana hinting or hint, intimation, suggestion (see corresponding verbs at suggest): implication, inference: allusion (see corresponding verb at refer) inculcate *infuse, imbue, ingrain, leaven, suffuse Ana impregnate, saturate, impenetrate, interpenetrate, permeate, pervade: introduce, admit, enter: instill, inculcate, implant inoffensive *harmless, innocuous, innocent, unoffending Ant offensive — Con loathsome, repulsive, revolting (see offensive): distasteful, obnoxious, repellent, *repugnant inordinate *excessive, immoderate, exorbitant, extreme, extravagant Ana *irrational, unreasonable: supererogatory, wanton, uncalled-for, gratuitous: superfluous, surplus, extra, superfluous (rare): moderate: restrained, curbed, checked, inhibited (see restrain): due, rightful, condign: fair, just, equitable inquest investigation, probe, *inquiry, inquisition, research Ana examination, inspection, scrutiny, audit (see under scrutinize): questioning, interrogation, catechizing, examining (see corresponding verbs at ask) inquire query, question, *ask, interrogate, catechize, quiz, examine Con reply, *answer, respond, rejoin, retort inquiry, investigation, inquest, inquiry, probe, research all mean a search for truth, knowledge, or information. Inquiry is the most general of these terms, applicable to such search regardless of the means (as questioning, observation, or experimentation) used or of the end in view (make inquiries about a sick friend) (the passion for pure knowledge is to be gratified only through the scientific method of inquiry—Elits) (witnesses convicted of contempt of Congressional inquiries—Current Biog.) (legislative inquiry into the acts of a man or group of men—Thomas) (a primitive but effective police inquiry—T. S. Eliot) Inquisition ordinarily carries heightened implications of searchiness and of penetration far below the surface to uncover what is concealed or withheld (strenuously protested against being subjected to an inquisition into his motives) The term, however, is chiefly applied to a judicial inquiry aiming to unearth facts or conditions to support suspicions or charges; probably from its historical application to the ruthless ferreting out of heretics or heresy especially in the late Middle Ages and in the Reformation period, the term generally connotes relentless pursuit of a clue or of a suspect, and sometimes merciless and rigorous persecution (when, as becomes a man who would prepare for such an arduous work, I through myself make rigorous inquisition, the report is often cheering—Wordsworth) (the whole notion of loyalty inquisitions is a natural characteristic of the police state—New Republic) Investigation applies to an inquiry which has for its aim the uncovering of the facts and the establishment of the truth (by their bullying tactics, by their having turned the needed investigations into regrettable inquisitions—J. M. Brown) In distinctive use it implies a systematic tracking
down of something that one hopes to discover or needs to know (a strong movement to make American universities centers of scholarly work and scientific investigation—Conant) (an investigation of the causes of the prolonged depression) (the bank never employs a clerk or teller without an investigation of his habits and record) Inquest applies chiefly to a judicial or official inquiry or examination especially before a jury, and specifically to one conducted by a coroner and jury in order to determine the cause of a death (when the rumors of murder became rife, the body was exhumed and an inquest held) In more general use, the term usually applies to an investigation that has some of the characteristics of a coroner's inquest (as the exploration of the grounds for an accusation or suspicion in relation to some disastrous or troubling event) (an inquest on the fall of Singapore and the sinking of H. M. S. Repulse and H. M. S. Prince of Wales—New Yorker) Probe applies to an investigation that searches deeply and extensively with the intent to determine the presence or absence of wrongdoing; it suggests methods of exploration comparable to a surgeon's probing for a bullet (a legislative probe of banking activities) (another probe would result merely in a reshuffle in police and political circles—Newsweek) Research applies chiefly to an inquiry or investigation which requires prolonged and careful study, especially of actual conditions or of primary sources of information. It is especially applicable to scholarly and creative inquiries or investigations (as by scientists, historians, or linguists) especially for the sake of uncovering new knowledge, of getting at the facts when these are not known, or of discovering laws of nature (basic research in science is concerned with understanding the laws of nature—Grainger) (research is a creative activity engaged in by talented human beings—Leedy) but it may sometimes be used for a study leading to the writing of a résumé of facts or laws already known (research has shown and practice has established the futurity of the charge that it was a usurpation when this Court undertook to declare an Act of Congress unconstitutional—Justice Holmes) or even for quite casual or trivial investigations (I... managed to get involved in a highway accident. All in the interest of research, you understand—Joseph) Ana questioning, interrogation, catechizing (see corresponding verbs at ask): examination, inspection, scrutiny, audit (see under scrutinize) inquisition inquest, *inquiry, probe, investigation, research Ana see those at inquiry inquisitive *curious, prying, snoopy, nosy Ana *impertinent, intrusive, meddlesome: interfering, meddling, meddling (see meddling) Ant incurious —Con *indifferent, unconcerned, aloof, detached, uninterested, disinterested intrad *invasion, invasion, raid Ana intrusion, butting in (see corresponding verbs at intrude): encroachment, entrenchment, infringement, trespassing, or trespass (see corresponding verbs at trespass): *entrance, entry, ingress insane, mad, crazy, crazed, demented, deranged, lunatic, manic, non compos mentis are comparable in their general or nontechnical senses (for senses of corresponding nouns used technically see insanity) and as meaning afflicted by or manifesting unsoundness of mind or an inability to control one's rational processes. Insane as applied to persons usually implies such unsoundness of mind that one is unable to function safely and competently in ordinary human relations, usually does not recognize one's own condition, and is not responsible for one's actions (adjudged insane after a period of observation) (an extreme antisocial, perverted personality whose reactions differ widely from the normal, but are not necessarily to be classified as insane—Foulkes) In more general use insane implies utter folly or irrationality; the person or the act or utterance so described is, by implication, governed by blind passion or senselessness (the insane ambition and insatiable appetite which have caused this vast... war—Sir Winston Churchill) (dumbfounded by the insane assault—Al Newman) (now that wars... have become far more horrible and... insane—Inge) Mad usually implies more frenzy than insane and therefore carries a stronger suggestion of wildness, rabidity, ravage, or complete loss of self-control (O, let me not be mad, not mad, sweet heaven! Keep me in temper: I would not be mad!—Shak.) (he's mad. He always was. But he's worse than mad now. He's possessed—Graves) (he has fallen in love... with a stupid cocotte who has begun by driving him mad with jealousy—Edmund Wilson) Crazу often suggests such mental breakdown as may result from illness or old age (he has gone crazy) (we will bestow you in some better place, fitter for sickness and for... crazy age—Shak.) ("Stuff!") exploded the Doctor. "You're not crazy and you never were and you're not going to be, unless you keep on making such a commotion about nothing"—Nancy Hale or it may suggest a distraught or wild state of mind induced by some intense emotion (as rage, grief, joy, desire, etc.) Lunacy (a work of art) but goes crazy if she hears Murdoch's voice—just swells and trembles all over—Gerald Beaumont (she was crazy with desire for sleep—Ruth Park) (somebody had shot a squirrel and he took on about it as though he had lost a child. I said then he was crazy—Anderson) As applied to such things as schemes, projects, or notions crazy usually suggests that they are the product of a disordered or ill-balanced mind (no educated Socialist believes such crazy nonsense—Shaw) (who would pay such a crazy price for a book) Crazed is often used in place of crazy when a temporary disorder, usually with a specific cause, is implied (crazed with grief) (they were crazed by the famine and pestilence of that last bitter winter—Amer. Guide Series: Wash.) Demented and deranged are more formal than the preceding words and less rich in connotations; both terms, moreover, imply a change from mental soundness to unsoundness, demented usually suggesting clear signs (as profound apathy or incoherence in thought, speech, or action) which indicate deterioration of the mental powers (there was now no doubt that the sick man was demented) (the great part of the German army in the early stage of the war was really an army of demented civilians—H. G. Wells) (apparently not clearly demented until after 1818, he was for years dangerously near the border of insanity—Amer. Guide Series: Va.) and deranged (compare derangement under aberration 2) suggesting a loss of mental balance or a state of mental disorder resulting from a functional disturbance of the brain or nervous system (he was temporarily deranged by the shock) (in our culture a person who falls sick, hears voices, communicates with shadows, and acquires special abilities from them is inevitably classified as deranged—Kroener) Lunatic is approximately the equivalent of insane but is less frequently applied to persons and may imply no more than extreme folly (consuming with lunatic speed the assets of the earth—Agar) Mania comes closer to mad, for it commonly connotes violence, fury, or raving (the mania rage of the multitude) (the mania dreamer; cruel... is he with fear—Shelley) Non compos mentis (Latin for "not sound of mind") is a legal term which specifies a state, but does not
define the particular condition or kind, of mental unsoundness. It is often used, especially in its shortened form non compos, more generally with similar indefiniteness—<Barron's non compos>. Lean controls him completely—Keneth Roberts

Ana *irrational, unreasonable: distracted, bewildered (see PUZZLE vb)

Ant sane —Con sensible, judicious, *wise, sapient, prudent

**insanity, lunacy, psychosis, mania, dementia** are the leading general terms denoting serious mental disorder. Insanity as a technical term belongs to law rather than to medicine. It is used to cover a wide variety of mental disorders, all of which have in common one characteristic—an unfitness of the afflicted individual to manage his own affairs or perform his social duties. Mental deficiency and delirious conditions are usually excluded, the former as inborn and not acquired, the latter as temporary and not long-lasting. Since in law a person's sanity or insanity becomes an issue when he is charged with a crime or when his legal capacity to make a will or contract or to transfer property is questioned, proof of insanity is tantamount to proof of his inability to act rationally and to understand the nature of his act and its natural consequences in affecting his rights, obligations, and liabilities. In general use, insanity is commonly distinguished from mental deficiency and from neuroses and is applied to disorders involving unsoundness or derangement of mind. Lunacy in general use often applies to insanity manifested in spells of madness and fury or interrupted by intervals of lucidity <Cervantes's hero was led into amiable but disastrous lunacy by a belated obsession with the literature of chivalry—Muggeridge> (it's the tangle of good and badness; it's the lunacy linked with sanity makes up, and mocks, humanity!—Stringer) Lunacy sometimes is used interchangeably with insanity in law (a lunacy commission) <filed a lunacy petition against the attorney general so that a court could pass on his mental condition-Time>

Psychosis is the psychiatric term for a profound disorganization of mind, personality, or behavior resulting from an individual's inability to cope with his environment. Though in content often coextensive with insanity or lunacy it carries none of the special implications of these two terms.

Mania (for fuller treatment see MANIA 2) denotes a phase marked by sustained and exaggerated elation, excessive activity (as in emotional expression or physical action), or delusions of greatness that characterizes certain psychoses. Dementia implies a marked decline from a former level of intellectual capacity often accompanied by emotional apathy and is applicable to most psychoses. Dementia implies a marked decline from a former level of intellectual capacity often accompanied by emotional apathy and is applicable to most psychoses. Dementia implies a marked decline from a former level of intellectual capacity often accompanied by emotional apathy and is applicable to most psychoses. Dementia implies a marked decline from a former level of intellectual capacity often accompanied by emotional apathy and is applicable to most psychoses.

Ana alienation, derangement, *aberration: frenzy, delirium, *mania, hysteria

Ant sanity

**inscription, legend, caption** are comparable when they mean something written, printed, or engraved (as on a coin or a medal or under or over a picture) to indicate or describe the purpose or the nature of the thing. Inscriptions may apply to something written or printed, but it more often applies to something engraved, incised, or impressed on some hard surface (as stone, bronze, or silver); the word often carries an implication of durability or of permanence that is lacking, usually, in the others, and therefore often suggests a statement that has been framed or selected with care <the inscription on a monument> <the bronze tablet has the following inscription> <some god direct my judgment! Let me see; I will survey the inscriptions back again. What says this leaden casket? "Who chooseth me must give and hazard all he hath"—Shak.> A legend (see also MYTH) is basically a very short inscription (as on a coin, a medal, or a heraldic shield) that is a motto or a statement of an aim, an ideal, or a guiding principle <the legend "In God we trust" is found on all coins of the United States of America> <the legend on the Victoria Cross is "For Valour"> The term is also used for the printed statement giving the title or a brief description or explanation of an illustration or diagram (as in a textbook or a work of reference) <according to the legend, this illustration is that of "A Roman legionary"> Caption basically applies to a heading or title (as of a document, an article, a chapter, or a section) <an editorial under the caption "Where are we headed?> <the stories have appeared in a running series under the caption of "The Adventures of Brigadier Gerard"—N. Y. Evening Post> But the implication of a catching or arresting quality in the title is often evident, and caption may refer to a title or name given a story, an article, or an illustration that is designed to seize the attention of the reader <delighting the readers of the Athenaeum with the treasures of his reading, under the caption, "A Budget of Paradoxes"—Grosart> The term caption is also used interchangeably with legend for the printed statement describing or explaining a picture or illustration <a diagram of a motor with all the working parts explained in the caption> <under each [picture] was an appropriate caption, such as Surprise, Grief—S. E. White> Caption is also used in motion pictures for any of the brief statements or bits of dialogue thrown on the screen to explain the scenes of a silent motion picture or of a sound motion picture in which the actors speak in a foreign language.

**inscrutable** *mysterious, arcane

Ana profound, abysmal, *deep: baffling, balking, thwarting, frustrating, foiling (see FRUSTRATE): hidden, concealed, secreted (see HIDE): enigmatic, cryptic, dark, *obscure, vague: mystifying, perplexing, puzzling (see PUZZLE vb)

Ant obvious, plain, clear, manifest, *evident, patent

**insensate** besotted, *fond, infatuated

Ana fatuous, asinine, foolish, silly (see SIMPLE): *stupid, slow, dense, crass, dull, dumb: *irrational, unreasonable

Ant sensible, sane, judicious, *wise, prudent, sapient, sage: *rational, reasonable: *intelligent, quick-witted, knowing, alert

**insensible** 1 Insensible, insensitive, impassive, aesthetic mean unresponsive to stimuli or to external influences. Insensible usually implies total unresponsiveness, and therefore unawareness or unconsciousness such as may result from blunted powers of sensation, obtuseness of mind, apathy, or complete absorption in something else <he also warned me against X, a local professor of history, as a man full of prejudice and quite insensible to evidence —Laski> <so engrossed in his work that he was insensible of the flight of time> <men have a keener relish for privileges and honors than for equality, and are not insensible to rewards—Sédillot> Insensitive implies sluggishness in response or less than normal susceptibility; more specifically, it suggests dullness rather than acuteness of sensation or perception, thickness rather than thinness of skin, callousness rather than sympathy or compassion <an ear insensitive to changes of pitch> <he was insensitive to all kinds of discourtesy—Joyce> Insensitive to the misery of others <many . . . Europeans still think Americans are soulless and insensitive machines, a raw society of mass-produced healthy extroverts—Vierck>

Impassible basically and historically implies absence of response because of incapacity for feeling or suffering,
insensitive

but is often used synonymously with impassive or in reference to persons who by discipline have conquered the normal human susceptibility to pain or suffering. The Hindu striving for Nirvana renders himself impassible or in reference to things in contrast with persons or creatures thought of as beings who through necessity of nature suffer pain or are susceptible to injury. The language of strategy and politics is designed...to make it appear as though wars were not fought by individuals...but either by impersonal and therefore wholly nonmoral and impassible forces, or else by personified abstractions—Huxley. Svenegali was sitting, quite impassible, gazing at Monsieur J...and smiling a ghastly, sardonic smile—du Maurier. Anesthetic implies a deadening of the mind or senses by or as if by such a drug as ether and therefore an induced rather than a natural insensitiveness. The intelligentsia...neither as anesthetic to ideas as the plutocracy on the other—Mencken.—All except the young girls are in a state of possession, blind, deaf and anesthetic—Cary.

An obtuse, dull, blunt: impassive, apathetic, phlegmatic, stolid, stoic: hardened, indurated, callous: engrossed, absorbed, intent, rapt.

Ant sensible (to or of something) — Con conscious, aware, cognizant, alive, awake: impressed, affected, influenced, touched (see affect)

2. Imperceptible, impalpable, intangible, inappreciable, imponderable

An anemous, rare, slight, slender (see thin adj): attenuated, extenuated, diluted, rarefied (see thin vb)

Ant sensible, palpable — Con perceptible, tangible, appreciable, ponderable

insensitive — Insensible, impassible, anesthetic

An hardened, indurated, callous: indifferent, unconcerned, aloof, incurious: impassive, stoic, apathetic, phlegmatic, stolid

Ant sensitive — Con susceptible, subject, prone, open, exposed, liable: responsive, tender, compassionate

Insert vb — introduce, interpolate, intercalate, insinuate, interpose, interject

An intrude, obtrude, interlope: instill, inculcate, imitate, assimilate, substitute

Ant abstract: extract — Con disengage, detach

Inside adj — interior, internal, intestine, inner, inward

Ant outside — Con exterior, external, outer, outward

Insidious — sly, cunning, crafty, tricky, foxy, wily, guileful, artful

An treacherous, perfidious (see faithless): dangerous, perilous: furtive, stealthy, covert, underhand, underhanded (see secret)

Insight penetration, acumen, discernment, discrimination, perception

An intuition, understanding, reason: comprehension, apprehension (see under apprehend): appreciation, understanding (see corresponding verbs at understand): perspicaciousness, sagacity, shrewdness (see corresponding adjectives at shrewd)

Ant obtuseness

Insinuate 1. Introduce, insert, interject, interpose, intercalate, interpose, incorporate

An infuse, inoculate, imbue, leaven: install, inculcate, implant

Ant eliminate, extract, abstract, repress

2. Intimate, hint, suggest, imply, allude, advert, refer: impute, ascribe

Con voice, utter, express, say, announce, declare, assert, affirm, aver, avouch, avow, profess

Insinuation, innuendo mean covert suggestion or a covert allusion to something. Insinuation applies chiefly to a remark, comment, or question which conveys or seems to convey a hint or implication, often one that is discreditable to the person at whom it is aimed. By tacit agreement they ignored the remarks and insinuations of their acquaintances—D. H. Lawrence. We reject any insinuation that one race or another, one people or another is in any sense inferior or expendable—Eisenhower. Innuendo more often applies to the method of covert suggestion than does insinuation, and when it applies to a definite instance, it is referable to meaningful smiles, glances, inflections, as well as to remarks; in both cases the term definitely implies a suggestion of something that is injurious to the reputation of the person concerned. I prefer the most disagreeable certainties to hints and innuendos—Byron. In this play Middleton shows his interest...in innuendo and double meanings—T. S. Eliot. "He—eventually—married her." There were volumes of innuendo in the way the eventually was spaced, and each syllable given its due stress—Wharton. He learned by chance remarks overheard, from innuendo, a dropped word here and there, a sly, meaningful snicker—Harold Sinclair.

An hinting or hint, implying or implication, suggestion, intuition (see corresponding verbs at suggest): anidromous, aspersion, reflection: imputation, ascription (see corresponding verbs as ascribe): allusion (see corresponding verb at refer)

Insipid, vapid, flat, jeune, banal, wishy-washy, inane mean devoid of qualities which give spirit, character, or substance to a thing. Something insipid is without taste, or savory, or pungency; the term is applied not only to food and drink which are so tasteless as to give no pleasure or stimulation to the palate (insipid substitutes for coffee), but also to persons and their utterances and ideas which strike one as thin, weak, and characterless and leave one completely indifferent (the tepid quality of the expatriate American novel, which has escaped vulgarity to become insipid instead—Connolly). Happiness is a wine of the rarest vintage, and seems insipid to a vulgar taste—L. P. Smith. The insipid veracity with which Crabbe used Smith) with reference to physical hunger and is usually employed in the mechanical way—Newsweek. Something banal is so vapid that it seems banal—Mott. Something flat is so vapid that it seems dead or lifeless. The word is applied chiefly to what has lost all savor, sparkle, zest, or capacity for stimulating interest or pleasure (how weary, stale, flat and unprofitable, seem to me all the uses of this world—Shak.) The sonnet became, in the hands of innumerable practitioners, a thing...of artificial sentiment, flat as the lees and dregs of wine—Lowes. The action follows the standard interpretation of Russian history in a flat and mechanical way—Newsweek. Something jeune is so devoid of substance or nutritive quality that it cannot satisfy the appetite; the word is only occasionally used with reference to physical hunger and is usually employed with reference to hunger of the mind or the emotions. It often connotes barrenness, aridity, or meagerness in addition to its basic implications (read through the sermon once more). It seemed more jeune than ever—MacKenzie. The literary history without evaluative criteria becomes jeune and sterile—Glicksberg. Something banal is so commonplace or so trite that it lacks all freshness or power to stimulate or appeal. The term often also
insistent

452

instance

carries one or more of such various connotatons as tastelessness, pedestrianism, triviality, or platitudinousness—a simple person marvelously protected from vulnerability and the banal—T. E. Brown] the "poor working girl" of the banal songs of the period—Farrell] the average man, doomed to some banal and sordid drudgery all his life long—Mencken] Something wishy-washy has the essential or characteristic qualities so weak or diluted that it strikes one as extremely insipid or vapid she is too wishy-washy to attract interesting friends] his courage in expressing opinions that are always judicious but never wishy-washy—W. R. Crawford] they accepted the wishy-washy, almost meaningless, resolution—Spectator] Baudelaire's notion of beatitude certainly tended to the wishy-washy—T. S. Eliot] Something inane is devoid of sense, significance, or point] to us the book seems a very inane, tiresome, and purposeless affair—Manchester Examiner] in order to cover his embarrassment, he made some inane remark on the weather—Conrad

Ant] sapid: zestful—Con] *pungent, piquant, poignant, racy, spicy: *spirited, high-spirited, maddening, spunky, fiery, spirited, saucy, saucy; *tasty, *palatable, appetizing: stimulating, exciting, piquing, provoking or provocative (see corresponding verbs at PROVOKE)

insistent] *pressing, urgent, imperative, crying, impertinent, exigent, instant

Ana] persistent, persevering (see corresponding verbs at PERSEVERE]: pertinacious, dogged (see OBSTINATE): obtrusive, *impertinent

insolent] arrogant, overbearing, supercilious, disdainful, haughty, lordly (see PROUD)

Ana] domineering, *masterful, imperious, peremptory, imperative: pretentious, ostentatious (see SHOWY): *haughty, lordly (see PROUD)

Ant] deferential—Con] submissive (see TAME]: courteous, polite, *civil

inspect] scrutinize, examine, scan, audit

inspection] examination, scrutiny, scanning, auditing (see under SCRUTINIZE vb)

Ana] investigation, probe, inquest, *inquiry, inquisition, research: surveillance, *oversight, supervision

inspiration, afflatus, fury, frenzy, especially when qualified by divine or poetic, all designate the seemingly involuntary element in the arts of expression for which the artist often holds a power outside himself responsible. Inspiration may distinctively imply a preternatural enlightening and quickening of the mind and connotate, especially when used by religious persons, the intervention of or as if of such a supernatural influence as the Holy Spirit among such men there remains a . . . belief in what is vaguely called inspiration. They know by hard experience that there are days when their ideas flow freely and clearly, and days when they are dammed up dammably—Mencken] Often, from its use in connection with the authorship of the Scriptures, inspiration implies supernatural or supranatural communication of knowledge] has the highest aspect of Greek religion ever been better expressed than by Wordsworth himself, to whom . . . it came by inspiration and not from books?—Inge] Afflatus distinctively applies to the inspiring influence rather than to the process or its effects (the artists and poets who but once in their lives had known the divine afflatus, and touched the high level of the best—Henry James] we imagine that a great speech is caused by some mysterious afflatus that descends into a man from on high)—Eastman] but it also may name a quality rather than an influence or an operation] he never again achieved that delicate balance of cold, scientific investigation and imaginative afflatus—Scalia] Fury and frenzy emphasize the emotional excitement that attends artistic creation and the tendency of the artist to be carried out of himself. Fury found most often in the phrases "poetic fury" and "divine fury," does not in ordinary use imply extreme agitation; it characteristically connotes profound ecstasy induced by the poet's vision or conception] they are so beloved of the Gods, that whatsoever they write, proceeds of a divine fury—Sidney] in an age of formalism, poetic fury itself became a formal requirement—Babbitt] Frenzy usually implies agitation rather than rapture, and stresses the imaginative or inventive element in creation, sometimes to the exclusion of any extraneous influence] does he compose in a frenzy of mystical exaltation or does he work out his lines slowly and even laboriously?—Kiby] caught the first fire of the writer's frenzy in the classroom when a long dead poet was being discussed—Dock Leaves] Mencken and his Mercury were anything but cold. They were always in a state of frenzy—Angoff]

Ana] enlightenment, illumination (see corresponding verbs at ILLUMINATE]: *ecstasy, rapture, transport: *revelation, vision, apocalyptic, prophecy

inspire] animate, *inform, fire

inspirit] *encourage, hearten, embolden, cheer, nerve, steel

Ana] enliven, animate, *quicken, vivify: stimulate, excite, galvanize (see PROVOKE)

Ant] dissipate—Con] *discourage, dishearten, deject: *depress, weigh

in spite of] *notwithstanding, despite

install] induct, inaugurate, invest, *initiate

instance n] Instance, case, illustration, example, sample, specimen mean a concrete thing which has or manifests the qualities, characters, or nature of a type, a class, or a group. Instance applies to an individual person or thing brought forth in support or disproof of a general statement] the instance may be rejected, but the principle abides—Cardozo] Herodotus is a shining instance of the strong Greek bent to examine and prove or disprove—Edith Hamilton] or as a means of indicating the character of a class (this novel is a good instance of his best work] the patterns on the breasts are an instance of the formalism of the period—Saunders] Case applies to an act, situation, condition, or event demonstrating the occurrence or the existence of something which is being considered, studied, investigated, or dealt with or exhibiting it in actual operation] the patterns on the breasts are an instance of the formalism of the period—Saunders] Case applies to an act, situation, condition, or event demonstrating the occurrence or the existence of something which is being considered, studied, investigated, or dealt with or exhibiting it in actual operation} cite cases of bribes given as payments for services never performed} students of the effects of poverty now base their conclusions on cases actually investigated} there has been no case of malaria in this section for three years] Illustration applies to an instance adduced or cited as a means of throwing light upon what has been explained or discussed in general terms} give several illustrations of the use of a word in a particular sense} cites indiscriminately . . . materials of such different value that they provide illustration rather than documentation of his points—Dinker] Example} see also MODEL} applies to a typical, representative, or illustrative instance or case} if I were asked to define what this gentlemanliness is, I should say that

Con *obedient, amenable, docile, tractable, biddable: submissive, subdued, *tame

insular, provincial, parochial, local, small-town are comparable when they mean having or indicating the limited or restricted point of view considered characteristic of the geographically isolated. Insular is usually applied to people or the ideas of people who are in one way or another isolated, so that they become or are regarded as self-contained or self-sufficient and disinterested in matters remote from their own concerns. The term implies an aloofness that proceeds from this isolation, but it usually also connotes narrowness of attitude, circumscription of interests, or prejudices in favor of one's own people or one's own kind (as of customs, literature, and art) {much of the impetus for international thinking and planning has come from our schools and our colleges, and the pressures for insular chauvinism have come from self-seeking groups of adults—Brown} {Bradley was fighting for a European and ripened and wise philosophy, against an insular and immature and cranky one—T. S. Eliot} Provincial sometimes applies to what is characteristic of outlying districts as in opposition to what is characteristic of such metropolitan centers as London or New York {a provincial accent} {provincial theaters} {provincial fashions} but the word tends to connote narrowness of view or of interest as opposed to what is cosmopolitan or Catholic he replaced a philosophy which was crude and raw and provincial by one which was, in comparison, catholic, civilized, and universal—T. S. Eliot} {firm commitment to a given ideal is not equivalent to provincial intolerance towards other forms of excellence—Nagel} Stalin, a provincial, Victorian philistine, fancied himself as an infallible connoisseur—Willets Parochial, with its reference to a parish, a local unit of administration in the church or, in some regions, in the state, implies confinement to views and interests of a particular place and connotes extreme narrowness and, often, intolerance of all kinds of human energy. Art is surely the most free, the least parochial; and demands of us an essential tolerance of all its forms—Galsworthy} {even so great a historian as Kim}
...
intelect *mind, soul, psyche, brain, intelligence, wit

Ana *reason, understanding, intuition

intellectual *mental, psychic, cerebral, intelligent

Ant carnal — Con *bodily, physical, corporeal, corporeal, somatic: fleshly, animal, sensual (see CARNAL)

intelligence 1 brain, *mind, intellect, soul, psyche, wit

Ana *sense, judgment, wisdom, gumption; *discernment, penetration, insight, acumen: sagaciousness or sagacity, perspicaciousness or perspicacity, astuteness, shrewdness (see corresponding adjectives at SHREW)

2 *news, tidings, advice

intelligent 1 Intellectual, *mental, psychic, cerebral, intelligent

2 Intelligent, clever, alert, quick-witted, bright, smart, knowing, brilliant are comparable when they mean mentally quick or keen. Intelligent implies greater than average power to use one’s mind successfully when demands are made upon it (as in understanding the new or abstruse or in meeting and solving problems) (see Corresponding Adjectives at SHREW)

News, tidings, advice

smart

syllogism—

or duplicity <a aleck> <given to making smart retorts> <other bright ideas—some showing a superb need of practical feasibility; as well as of the welfare of any unfortunate who might happen to be in the experiment area—include the scattering of concentrated sulfuric acid—The Countryman> (I do not want . . . to be converted by a smart syllogism—Birrell) <the smart work is hidden in the wording of the Monroe doctrine—Emporia Gazette> Knowledge carries a stronger implication than any of the preceding terms of the possession of information or knowledge that is necessary or useful under given circumstances (the knowing collectors of records—Sat. Review) <bipartisanship, as a knowing Republican politician once remarked, is a fine thing—between elections—Collins> Occasionally the term further suggests a less agreeable quality such as sophistication, secretive-ness, or the possession of knowledge of others’ secrets (a knowing wink) (a face so mean, so knowing—Thack-eray) <his work has a distasteful air of pretentious smartness, of being altogether too knowing—Read>

Brilliant adds to intelligent the implication of unusual and outstanding keenness of intellect that manifests itself so openly or effectively as to excite admiration; the term usually suggests an opposition to qualities that characterize one whose mind works more slowly or cautiously (a brilliant mathematician) (John Todhunter was esteemed a shrewd sensible man—only not brilliant—Mere-dith) (Einstein’s brilliant solution of the . . . puzzle—Zinser) <the brilliant anthropologist whom de Gaulle wished to place in charge of a combined intelligence service—Fank>

Ana *sharp, keen, acute: *shrewd, sagacious, perspicacious, astute: cunning, ingenious, adroit, *clever

Ant unintelligent — Con foolish, idiotic, imbecilic, moronic (see Corresponding Adjectives at CON)

2 *smart, slow, dull, dense, crass, dumb: *irrational, unreasonable

intend, mean, design, propose, purpose signify to have in mind as an aim, end, or function. Intend implies that the mind is directed to some definite accomplishment or to the achievement of a definite end (I if one earnestly intends a conspiracy, one does not commence with a series of public readings—Kristol) (intended twenty-four books, sketched fourteen, but left only four—Hight) or is bent upon some person or thing (as an invention or a writing) serving a certain purpose or use, or fulfilling a certain destiny (a play, intended for great Theseus’ nuptial day—Shak.) <a strong suspicion that the new instrument with which Einstein has presented the mathematicians is being put to uses for which it was never intended—Inge> (a man set aside and intended by nature to lead a blameless life—Anderson) Intend often implies an aim to express a definite idea by a given word or phrase (just what the framers of the constitution intended by the phrase “to be twice put in jeopardy” is still a matter of some doubt) <he caught the phrase as it dropped from his lips with a feeling that it said more than he intended—H. G. Wells> Mean often carries a denotation close to that of intend (those organ tones of his were meant to fill cathedrals or the most exalted of tribunals—Cardozo) but it does not convey so clear an implication of determination to effect one’s end as does intend and, sometimes, it implies little more than volition or decision (he always means to work harder) (a book that I mean to get when I reach Beverly—Justice Holmes) (I don’t mean to defend Charles’ errors, but before I form my judgment of either of them I intend to make a trial of their hearts—Sheridan) <he shouldn’t have done it, of course; but he was thoughtless. And he meant to pay the money back—Delaunay Design (see also under PLAN n) usually stresses forethought and deliberation in arriving at an intention (the American people—did not design to make their government dependent on the States—John Marshall) We wanted absolute surrender and we wanted it within a matter of hours, and the bomb of Nagasaki was designed to achieve just that, which it did—Cousins> Often, the term also implies scheming or contriving, especially by underhand means, in an attempt to effect what is designed (your father and sister, in their civilities and invitations, were

A colon (:) separates groups of words discriminated. An asterisk (*) indicates place of treatment of each group.
designing a match between the heir and the young lady—Austen> <ah! Friend! to dazzle let the vain design; to raise the thought, and touch the heart be thine!—Pope>  
Propose implies a declaration of one's intention or a setting it clearly before oneself or others. It therefore usually connotes clear definition or open avowal (<what do you propose to do when your funds run out?> <I propose to describe the circumstances under which Richelieu worked when he produced and realized the centralized nation of today—Bello> <to China, where she proposed to spend some time with her friends—Salisbury> <what is reached in the end may be better or worse than what was proposed—James>  
{1, for one, do not propose to adjust my ethics to the values of a bloodstained despotism—A. E. Stevenson>  
**Purpose** differs little from propose except in carrying a somewhat stronger implication of determination to effect or achieve one's intention (<I purpose to write the history of England from the accession of King James the Second—Macauley> <a promise to send her picture post-cards from the Cathedral cities which he purposed visiting—Hewlett> and in occasionally connoting clearer definition in one's own mind (thy brother Esau, as touching thee, both comfort himself, purposing to kill thee—Gen 27:42>)  
Ana *aim, aspire: *attempt, try, endeavor, strive, es-say: plan, design, scheme, plot (see under PLAN n)  
**intense, vehement, fierce, exquisite, violent** are comparable when meaning extreme in degree, power, or effect. Although several of them often are used interchangeably without clear distinction, they can be employed in ways that reveal many differences in implications and applications. Intense is especially appropriate when the idea of great depth (as in quality, reach, or effect) is to be implied. In such use intense may apply to thoughts or thinking, to feeling or emotion, to such an outstanding quality or characteristic as cleanliness so perfect that it gives joy to the fastidious. In this sense it has been applied indifferently to things and objects, both imply a lift- ing above the ordinary, the trite, or the commonplace, and a consequent increase in sharpness and poignancy, and enhance a lifting above the norm or the average in desirability or attractiveness by the addition of something that increases the value, charm, or prestige of the thing enhanced (<a dramatist heightened the effect of his scenes by rapidity of the action and he enhances his dialogue by the addition of witty repartee> <had heightened his appreciation of the more austere pleasures of the afternoon—Archibald Marshall> <a painter discards many trivial points of exactness, in order to heighten the truthfulness of a few fundamentals—Montague> <Augustus sought ... in every way to enhance its [the Roman Senate's] prestige and dignity—Buchan>)  
Ana accentuate, emphasize, stress, accent (see corresponding nouns at EMPHASIS): magnify, aggravate, *exalt Ant temper: mitigate, ally: abate (sense 2) —Con *moderate, qualify: alleviate, lighten, *relieve: reduce, lessen, diminish, *decrease  
**intent n** *intention, purpose, design, aim, end, object, objective, goal  
Ana will, volition, conation  
Ant accident —Con *chance, hap, luck, fortune, hazard  
**intent adj** Intent, engrossed, absorbed, rapt mean having one's mind or attention deeply fixed on something. Intent implies that one's mind, one's desires, or one's energies are eagerly bent on something; it therefore suggests a directing of the entire attention toward a particular end or thing (<persons whose hearts are wholly bent toward pleasure, or intent upon gain—Spectator> <the wise author intent on getting at truth—Quiller-Couch> for all its hideous scars is no dead city, but one grimly intent on survival—Cassidy> Engrossed implies monopolization of one's
attention either by a driving purpose or emotion or an eager interest or by the force or urgency of circumstances beyond one's control (he appears to have been so engrossed by domestic issues as to have given little attention to foreign problems—W. L. Langer) (Sieveking was naturally engrossed in the musical problem, which was perplexing enough—Hilton) (these constitutional changes . . . were pushed through during and after the war by a group of busybodies who were not too much engaged by the agony of their country to conduct a raging agitation in all parts of England—Inge) Absorbed often differs little from engrossed in this sense (the point is that Broch is never engrossed in, and never permits the reader to become absorbed by, the story itself—Arendt) but it may carry a stronger suggestion of the power of the thing on which the attention is fixed to capture one's attention and to hold it firmly so that there is difficulty in distracting it (wholly absorbed in his preparations for saving souls in the gold camps—blind to everything else—Cather) (human beings are prone to become absorbed in themselves, unable to be interested in what they see and hear or in anything outside their own skins—Russell) (already they had had Farthest North. Imogen, at eight years old, had read it, absorbed, breathless, intent, tongue clenched between teeth—Rose Macaulay) Rapt implies both extreme intentness and complete absorption, as though one were taken out of oneself or were in an ecstatic trance (rapt in adoring contemplation—Farrar) (expounded the ultimate meaning of existence to the white, rapt faces of Humanity—L. P. Smithly (in openmouthed wonder the lama turned to this and that, and finally checked in rapt attention before a large alto-relief representing a coronation or apotheosis of the Lord Buddha—Kipling)

Ana attending or attentive, minding, watching (see corresponding verbs at TEND): *abstracted, preoccupied: concentrated (see COMPACT vb): riveted (see SECURE vb) Ant distracted

intention, intent, purpose, design, aim, end, object, objective, goal are comparable when meaning what one proposes to accomplish or to attain by doing or making something, in distinction from what prompts one (the motive), or from the activity itself (the means), or from the actual or envisioned outcome (the effect). The first four of these words stress the clearly defined will to do or make something. Intention, however, often denotes little more than what one has in mind to do or to bring about (she had not had an intention or a thought of going home—Dickens) (she had divined the intention behind her mother's tolerance—Joyce) (announced its intention to divide its Indian Empire into two dominions—Current Biog.) Intent suggests clearer formulation and greater deliberateness than intention (they become enamored of official declarations of intent, though not much is said about the machinery to translate intent into action—Cousins) (behind my look you saw such unmistakable intent—Millay) Purpose implies more settled determination or more resolution than intention (have a purpose in life (the missionary was here for a purpose, and he pressed his point—Cather) (there lie youth and irresolution: here manhood and purpose—Meredith) Design carries further the notion of deliberateness and purposiveness in formulating an intention; in this sense it is not always clearly distinguishable from design denoting plan (see under PLAN n), for it retains the implications of careful ordering of details, of calculation, and sometimes of scheming (a great man by accident rather than design—Lasky) (I had suspected him of harboring sinister designs—Hudson) (the United States has no ulterior designs against any of its neighbors—Vandenbergh) Aim implies a clear definition of something that one hopes to effect and a direction of one's efforts or energies to its attainment; thus, one who proposes to make the best of his powers and of his opportunities may be said to have a purpose in life: one who has clearly defined the mark he hopes to reach and determines his actions by it may be said to have an aim in life (her steadiness and courage in the pursuit of her aims—J. R. Green) (the aim of the Elizabethans was to attain complete realism—T. S. Eliot) The remaining words of this group, like aim, imply that what one does is affected by what one hopes to accomplish or attain. End in this relation retains some of the suggestion of remoteness and finality inherent in some of its other senses (see LIMIT, END 2) and therefore is appropriately applied to an aim or purpose which takes its nature from principle or logical necessity and of which the attainment requires a definite and planned course of action leading to the modification of existent reality (holding that the good of the end justified all the evil of the means) (the relation between means and ends is clearly bound up with a temporal view. Ends are in the future, means in the present. We do control means, we do not control ends. Hence the foolishness of conceiving ends apart from means. On the contrary, ends must be judged, and evaluated, in the light of the means available for their attainment—Visalberghi) (provide the safeguard we need against the abuse of mankind's scientific genius for destructive ends—Dean) (the end of law was to bring about the widest possible abstract individual liberty—Roscoe Pound) (it is commonly said and commonly believed that science is completely neutral and indifferent as to the ends and values which move men to act: that at most it only provides more efficient means for realization of ends that are and must be due to wants and desires completely independent of science—Dewey) Object and objective apply to an end as being that toward which effort or action or emotion (as hope) is directed (the object is to gather data that can be taken only during a total solar blackout—Cowen) (one of the important objectives of public education has been and will always be to inspire in youth a deep appreciation of the basic spiritual and religious values which give meaning to existence—Current Biog.) Distinctively, object may suggest an end based on more individually determined desires, needs, or intentions (Colonel Belgrave, who is bent on abducting Amanda . . . pursues his object with a pertinacity and ingenuity that does credit to his understanding—Brothers) (the object of a legislator, he declares, is to make not a great but a happy city—Dickinson) (we call a man cruel who takes pleasure in the suffering of others and inflicts it with that object—Bello) while objective may suggest one which is concrete and immediately attainable or at least one which involves no obviously insurmountable problems (the objectives of the Guild are to promote and advance the spiritual, social, educational and recreational welfare of the blind persons in the Diocese—Humrah) (Columbia included among its earliest stated objectives the instruction of youth in surveying, navigation, husbandry, commerce, government, and manufacture—Euriich) Goal often evokes the image of one running a race: usually it implies struggle and endurance of hardships and cessation of effort at attainment (the Goal, which is the goal of all moral endeavor—Inge) (in the average man's mind leisure is a goal to strive for—Furnas) (equality is, of course, a goal or ideal rather than an immediately attainable objective—Gallagher)

Ana

transpose, *reverse

intercourse, commerce, traffic, dealings, communication,
communion, conversation, converse, correspondence are
comparable when meaning the connection established
between persons or peoples through a medium that per-
mits interchange (as of information, of opinions, of ideas,
or of goods). *Intercourse usually means little more than
this and requires a qualifying adjective to indicate the
things interchanged or the medium permitting interchange
(business intercourse) (trade intercourse) (sexual inter-
course) (social intercourse) In ordinary use, when em-
ployed without qualification, intercourse means social
intercourse or the normal interchange of such things as
ideas, opinions, news, and civilizations between one person
or group and another with whom there are more or less
intimate relations (the truth was, he could not be happy
for long without human intercourse —Cather) (the keen
and animated intercourse with its exchange of disputable
convictions —Replplier) (he welcomes extra-class inter-
course with students and encourages them to think criti-
cally —G. H. White) (of nations to cooperate, the first
condition must be that they have social and political inter-
course —E. B. White) Commerce, which applies primarily
to the interchange of goods by buying and selling (for
this sense, see BUSINESS 3) also is used in the more gen-
eral sense of intercourse (commerce with the world has
made him wiser —Macaulay) (I was less and less dis-
posed to commerce with my kind, I who never was given
to social functioning —Weygand) The word tends to be
restricted in its application to intercourse, through the
spirit or mind, that involves an interchange of ideas or
influences without a necessary interchange of words (re-
establish intellectual commerce among them in such a way
as to enable them to get on with the attack against the com-
mon enemy —P. B. Rice) (how is poetry born in us? There
is, I think, some commerce between the outer and an inner
being —E) though it is occasionally used of sexual inter-
course. Traffic (see also BUSINESS 3) is used chiefly when
such connotations derived from its commercial senses are
to be suggested as the interchange of goods, especially of
tangible or material goods, or a rapid passing to and from
the persons or things concerned (years and the traffic of
the mind with men and books did not affect you in the
least —Woolf) (the State can have no traffic or relation-
ship with the Church considered as a purely spiritual soci-
ety —Times Lit. Sup.) Dealings usually implies a closer
connection and one with more familiarity or less formal-
ity or one having for its object mutual or personal gain
(they suspected that he was having dealings with the
enemy) (being a woman is a terribly difficult trade since it
consists principally of dealings with men —Conrad)
(if a kid gets her way, she has to take some advice. That
is part of the unwritten code which governs the dealings
between generations —Roberson Davies) Traditionally
communication is less general than any of the preceding
terms because it implies intercourse based on an exchange
of symbols and especially words (there had been no com-
munication with the island since the storm) (I can try
to get to know Negroes here to establish communication

—Collie) (communication is a process by which a person
refers to something, either by pointing to it or using a
symbol for it, in such a way as to lead another person
to have a more or less similar experience of it. Commu-
nication, in this sense, presupposes frames of reference
which are shared by the communicating persons, so that
similar meanings are shared by them—Newcomb)
but communication suggests, as the preceding terms do
not, mutuality and the shared background of experience
that has given rise to a comprehensible set of symbols;
if therefore is appropriately used of nonhuman interac-
tions (communication is a type of behavior between liv-
ing creatures characterized by mutuality, rooted in bi-
ological heredity, and constituting one of the general mani-
festations of life —Revez) or of the process or art of effec-
tively interchange symbols (in order to develop and
maintain that basic consensus of values, beliefs, and insti-
tutional behavior upon which its existence must rest . . .
a society must maintain effective communication among
its parts . . . Indeed, the effectiveness of the communica-
tion process is a measure of the social integration of a
society —Cottrell) (lily was not expert in communica-
tion, and did not try to draw Mr. Sprockett out although
it would have been easy —Ethel Wilson) or, in the plural,
of the means by which spatially or temporally separated
individuals or groups engage in such exchanges (commu-
nication) were disrupted by the storm) (there is . . . no
conclusive evidence that the organized life of any Roman-
ian-British town survived the severance of its communica-
tions in the troubles of the fifth century —Stenton) (the
poor communications that exist in many factories between
the front office and the men at the workbenches —Partell)
Communion usually implies intercourse between those
who are close in love or sympathy or in mutual under-
standing; it often suggests rather than implies spiritual
intercourse or the absence of words (the consummation
of communion with God coincides with the final resolu-
tion of the sense of estrangement from Him —Ingpe)
(Delia sat down beside her, and their clasped hands lay
upon the coverlet. They did not say much . . . their com-
mutation had no need of words —Wharton) (most of the
time my father was buried in his religious books, and my
mother recognized it as her function to keep this commu-
nuation undisturbed —Behman) Conversation has a use,
chiefly in the phrase criminal conversation, in which it is
equivalent to sexual intercourse, and converse has a poetic
sense in which it approaches communion (to hold fit con-
verse with the spiritual world —Wordsworth) (spend in
pure converse our eternal day —Rupert Brooke) In gen-
eral use, however, both terms usually imply free and often
lively oral interchange of opinions, comments, or news
between two or more persons; conversation often applies
specifically to the act of interchangeing opinions, ideas,
and information in talk, and converse, to the ideas, gossip,
and opinions involved in such conversation (an important
general . . . deep in converse with the wealthiest of all
the astrologers of those war years —Han Suyin) (give a
freedom to resolve difference by converse —Oppen-
heimer) (we had talk enough, but no conversation;
there was nothing discussed —Johnson) (genuine con-
versation —by which I mean something distinguishable
from disputation, lamentation, and joke telling —Krupch)
Correspondence implies intercourse through an inter-
change of letters (there has been no letup in their cor-
respondence for fifty years) (the business was conducted
by correspondence)

See also explanatory notes facing page 1
Interesting, engrossing, absorbing, intriguing mean having a quality or qualities that secure attention and hold it for a length of time. Interesting implies a power in a person or thing to awaken such a mental or emotional reaction involving attention as curiosity, sympathy, a desire to know or understand, or enthusiasm, but unless the adjective is qualified or there is a fuller explanation in the context, the degree or the cause of interest is not clear. After a month of visiting Mark decided that there was not one interesting human creature in the whole parish—Mackenzie. Jane seemed to me to be increasingly interesting—Benson. As applied to a book, a play, or a narrative the word usually means entertaining, diverting (compare verbs at AMUSE), exciting, stimulating, or provocative (compare verbs at PROVOKE), but if the context provides no real clue as to the precise implication, the word may fail to hit the mark. Engrossing (see also MONOPOLIZE) suggests the power to grip the attention so as to exclude everything else, but it may or may not imply a power to please, divert, or entertain, and it refers almost always to things rather than persons; thus, an engrossing book may seize the whole attention from such dissimilar causes as that it requires deep study or serious reflection or that it is challenging or provocative. The enengrossing nature of his task made the time pass quickly. The conditions were ideal—not too much money, engrossing work to be done, and a sense of purpose and progress in the world—Whitehead. Synonymy books in which differences are analyzed, engrossing as they may have been to the active party, the analyst, offer to the passive party, the reader, nothing but boredom—Fowler. Absorbing does not differ materially from engrossing, but its underlying notion is not the same, for it suggests in the thing that holds one's attention a power to draw one in, as if by suction; thus, a power or disposition a power to grip the attention so as to exclude everything else, but it may or may not imply a power to please, divert, or entertain, and it refers almost always to things rather than persons; thus, an engrossing book may seize the whole attention from such dissimilar causes as that it requires deep study or serious reflection or that it is challenging or provocative. The engrossing nature of his task made the time pass quickly. The conditions were ideal—not too much money, engrossing work to be done, and a sense of purpose and progress in the world—Whitehead. Synonymy books in which differences are analyzed, engrossing as they may have been to the active party, the analyst, offer to the passive party, the reader, nothing but boredom—Fowler. Absorbing does not differ materially from engrossing, but its underlying notion is not the same, for it suggests in the thing that holds one's attention a power to draw one in, as if by suction; thus, a power or disposition to make something appear in a way that is thought to be attractive or entertaining, and to lead the attention to it, as by an attraction to it, or by making it appear attractive.

2 Interpose, interfere, intervene, mediate, intercede all basically mean to come or to go between two persons, two things, or a person and thing. Interpose (see also INTRODUCE 2) may be used in place of any of the succeeding words largely because it carries no further implications, except as these are derived from the context (the tops of the trees behind him interposed between him and the sun—Forster) he should not interpose between other engineers and their clients when unsolicited—Wagner (our host . . . interposed and forbade the experiment, pleading at the same time for a change of subject—Shaw) Intereference (see also MEDDLE) implies a getting in the way of a person or thing whether by crossing his or its path or—more often, by creating a condition that hinders his movement, activity, or vision or its free operation or full effectiveness (parliament interfered to protect employers against their laborers—Froude) the atmospheric disturbance interfered with radio reception) (wooden palings that did not interfere with a wide view—Mackenzie) Intervene may be used with reference to something that interposes itself or is interposed between things in space or time a huge and at that time apparently barren waste . . . intervenes between the St. Lawrence basin and the fertile prairie—Sandwell (the events of the intervening years—Dewey) or between persons the interjection of a third party who has a valid interest, or who intervenes between the physician and the patient—W. T. & Barbara Fitts or between a person and his interests, work, or goal (the trained self-consciousness, which . . . intervenes between the poet’s moods and his poetry—Day Lewis) (fortunately, mercy and diplomacy intervened and the vengeful sentence was never carried out—Thruslen) Intervene often specifically implies intervention between those who are hostile, antagonistic, or otherwise opposed to each other, for the sake of reconciling them or settling their difficulties; mediate usually implies, as intervene need not imply, an interest in both sides or freedom from bias toward either side (Bacon attempted to mediate between his friend and the Queen—Macaulay) (I want to mediate between the two of you now, because if this breach continues it will be the ruin of us all—Graves) But mediate may also be used abstractly in reference to something that lies between extremes or contradictions and effects either their union or a transition between them (critics . . . who mediated between extreme points of view—Glicksberg) Intermine implies intervention on another’s and usually an offender’s behalf and the use of one’s good offices in imploiring mercy or forgiveness for him from the one who has been injured or offended (for each at utter need—true comrade and true foeman—Madonna, intercede! Kipling) (the Duchess of Aiguillon interceded for Marie de Médicis with Richelieu) (the conviction that the Western powers would not intercede in favor of the peoples of the satellites—Timashoff) Ana *intrude, butt in, interpose: meddle, intermeddle: interrupt (see ARREST)

by implied threats (a mean, stingy, bulldozing poseur with woodchuck whiskers—Pegler) (through the sheer strength of his reputation and the force of his will bulldozing them into making loans—F. L. Allen) (some irate customer who had come in to bulldoze me... and had tried to bully me with mere words—White) Bully implies intimidation through overtbearing, swaggering threats or insults, and in schoolboy use it usually suggests bulldozing of small boys by those who are larger or more aggressive (suppose the cabman bullies you for double fare—Shaw) I know what you're going to call me... but I am not to be bullied by words—L. P. Smith Browbeat implies a cowering through arrogant, scornful, contemptuous, or insolent treatment (he browbeat the informers against us, and treated their evidence with... little favor—Fielding) (who saw my old kind parents... too much trustful... cheated, browbeaten, stripped and starved, cast out into the kennel—Browning) Ana terrorize, terrify, *frighten: hector, hound, ride, chivy, *bait, badger: coerce, *force, compel, constrain, oblige Con *coax, wheedle, cajole, blandish: persuade, prevail, *induce intolerant *illiberal, narrow-minded, narrow, bigoted, *bigoted, intolerant *obedient, docile, biddable, amenable: forbearing, indulgent, lenient intonation *inflection, accent intone *sing, troll, carol, descent, warble, trill, hymn, chant intoxicated *drunk, drunken, inebriated, tipsy, tight Ana fuddled, befuddled, confused, muddled (see CONFUSE): maudlin, *sentimental Con *sober, temperate intractable *unruly, ungovernable, refractory, recalcitrant, willful, headstrong Ana obstreperous, boisterous (see VOCIIFEROUS): contumacious, rebellious, factious, *insubordinate: froward, perverse, *contrary, wayward, balky Ant tractable —Con *obedient, docile, biddable, amenable: *tame, submissive, subdued: *compliant, acquiescent intrepid *brave, courageous, unafraid, fearless, valiant, valorous, dauntless, undaunted, doughty, bold, audacious Ana daring, venturesome, *adventurous, daredevil: mettlesome, high-spirited, *spirited, fiery: plucky, gritty (see corresponding nouns at FORTITUDE) Con *timid: *fearful, apprehensive, afraid intricate complicated, involved, *complex, knotty Ana perplexing, puzzling, mystifying, bewildering (see PUZZLE vb): tortuous (see WINDING): *hard, *arduous Con *easy, simple, light, smooth, facile: *effortless: obvious, plain, clear, patent, *evident, manifest intrigue n 1 conspiracy, machination, *plot, cabal Ana scheme, design, *plan: stratagem, maneuver, ruse, artifice, *trick, feint, gambit, ploy 2 liaison, affair, *amour intriguing *interesting, engrossing, absorbing Ana provoking or provocative, piquing, exciting (see corresponding verbs at PROVOKE): mystifying, puzzling (see PUZZLE): luring, tempting, enticing, inveigling (see LURE) intrinsic *inherent, ingrained, constitutional, essential Ana *inner, inward, internal, interior, inside, intestine: *innate, inborn, inbred, congenital: natural, normal, typical, *regular Ant extrinsic —Con *outer, outward, external, outside, exterior: adventitious, *accidental, incidental: added, annexed, appended, superadded (see ADD): extraneous, alien, foreign (see EXTRINSIC) introduce 1 *enter, admit Ana induct, install, inaugurate (see INITIATE): instill, inculcate, *implant: *infuse, inculcate, imbue 2 Introduce, insert, insinuate, interpolate, intercalate, interpose, interject mean to put something or someone in a place among or between other things or persons. Introduce (see also ENTER 2) implies a bringing forward of someone or something not already in company with the other persons or things, but it also suggests as the aim of such an act the placing of the person or thing in the midst of that group or collection so as to form a part of it (introduce a new subject into the conversation) (introduce several amendments into a bill before the legislature) (domestic science was introduced into the high school curriculum—Current Biol.) Insert implies a setting of a thing in a fixed place between or among other things; thus, to insert lace in a garment is to put it between two pieces of the material which forms the garment; to insert leaves in a book is to put leaves into their proper places (as by the use of glue) (insert additional words in a statement) (nowhere else, surely, can there be such a compulsion to make plays out of books, musicals out of plays... to insert scenes, delete characters—Kronenberger) Insinuate (see also SUGGEST) implies a slow, careful, often gentle or artful introduction (as into or through a narrow or winding passage) by pushing or worming its or one's way (the dog liked to insinuate his nose into his master's closed hand) (slang... has to insinuate itself into the language; it cannot pressure or push its way in—Sat. Review) (trees which insinuated their roots into the fissures of nearby rocks) (slowly but surely they insinuated themselves through the crowd to the edge of the pavement) (he couldn't quite insinuate the Huntingtonos into American society, but he did pretty well for them in England—Behrman) Interpolate implies the insertion of something that does not belong to and requires to be distinguished from the original, whether because it is extraneous to the subject under discussion or because it is spurious or simply because it is in fact not part of the original (although here and there, I omit some passages, and shorten others and disguise names, I have interpolated nothing—Le Fanu) (he has interpolated editorial and critical comments of his own—Redman) Intercalate primarily implies an insertion in the calendar (as of a day or month) (since the calendar year contained only 355 days, an extra month was occasionally intercalated—R. H. Baker) but in its extended sense it implies insertion into a sequence or series, then often also connoting intrusion (lava beds intercalated between sedimentary layers of rock) (some of these discrepancies... are obviously due to the fact that Chaucer is intercalating stories previously written—H. S. Bennett) Interpose (see also INTERPOSE 2) differs from interpolate mainly in its implication that what is inserted serves as an obstacle, obstruction, or cause of delay or postponement (she actually interposed her body between him and the street door then, as though physically to prevent him from going—Berger) (the early Church fought against the tendency to interpose objects of worship between God and man—Inge) (Professor Murray has simply interposed between Euripides and ourselves a barrier more impenetrable than the Greek language—T. S. Eliot) Of all of these words, interject carries the strongest implication of abrupt or forced introduction (he remained silent for the most part but occasionally interjected a question) (as they chewed on bones and roots, they paused to interject grunts of encouragement for the narrator—Mott) The word is often employed in place of said in introducing a remark, statement, or ques-
tation that comes more or less as an interruption or addition. When he was talking about philosophers, I interjected what I felt confident was a tactful remark—Henderson.

Ant withdraw: abstract — Con eject, oust, evict: eliminate, * exclude

Introduction, prologue, prelude, preface, foreword, exordium, preamble are comparable when denoting something that serves as a preliminary or as an antecedent to an extended treatment, development, discussion, or presentation (as in an exposition, a dramatic or musical work, or a poem). In their extended senses many of these terms are interchangeable, but in the special or technical senses in which they are here chiefly considered they tend to be mutually exclusive. Introduction, the ordinary term of this group, and the comprehensive one, specifically applies to that part of a work (as a discourse, treatise, play, or musical composition) which prepares the reader or auditor for the body of the work, especially by giving him material necessary for his understanding of what follows. He always writes the body of his treatise first and then adds the introduction and conclusion. Prologue applies specifically to the initial and distinct part of a poetic or dramatic work which may serve the purposes of an introduction (as by describing the characters or expounding the situations in which they find themselves). Chaucer’s Prologue to the Canterbury Tales or which may be a discourse preceding the opening of a play, by a character of the play or by an actor who serves as a mouthpiece for the author, and giving a hint of the author’s purposes or methods or attempting to attract the auditors’ attention to or interest in the play to come (the Prologue to Shakespeare’s Troilus and Cressida and to each act of his King Henry V). In his prologue, which contains some of the finest poetry-in-prose writing of the day, Dr. MacIver explores the meaning of time—Donald, H. H. Harrington. In its extended use, therefore, prologue often suggests an action or an event that sets the stage or paves the way for a series of exploits, achievements, or significant events (this as a prologue to her own later dazzling history—Hugh Walpole). Prelude applies in its general sense to something (as a series of events, actions, or natural phenomena) which constitute figuratively a short play or performance and serve as a sign or indication of or a preparation for what is to follow (functional changes in glands often serve as a prelude to structural changes). That was the prelude to a stormy afternoon—H. G. Wells. As a technical term in music prelude applies sometimes to an opening voluntary in a religious service but more often, and more specifically, to an introductory piece forming a section or a movement, especially of a fugue or a suite but sometimes of an oratorio or of an opera, and serving usually to introduce the theme or chief subject of the work. In this sense prelude applies sometimes to musical, or occasionally other, works which have something of the character of an introductory section or movement but are so constructed that they have intrinsic and independent value (Wordsworth’s poem “The Prelude”).

In ecclesiastical use preface applies to the prayer of exhortation to thanksgiving and of divine praise which opens the important part of a solemn Eucharistic service where the consecration of the bread and wine occurs. In its more common general sense preface applies specifically to a short discourse which is distinct from the literary work (as a treatise, a novel, a poem or collection of poems) which follows, is written usually by the author but sometimes by an editor or a friend, and has for its main purpose either to put the reader into the right frame of mind for the understanding or appreciation of the work he is about to read or to supply him with information that may be necessary to his proper understanding or use of it. When, however, a work is preceded by both a preface and an introduction, preface is usually applied to the introductory discourse written, and often also signed, by the author or editor, and introduction to the one which is definitely informative rather than personal in its character and usually carries no signature. In extended use preface may apply to something which serves as an introduction or prelude (as an introductory work on or a more or less tentative treatment of a subject) (Walter Lippmann’s book entitled A Preface to Morals) or to an act or speech, or series of acts or speeches, which has no other purpose than to prepare the way for what is to follow (they walked in the rose garden. “Do you read Utopias?” said Mr. Direck, cutting any preface, in the English manner—H. G. Wells). We fight for lost causes because we know that our defeat and dismay may be the preface to our successor’s victory—T. S. Eliot. Foreword when used in place of preface in reference to front matter of a book may suggest simplicity and brevity of treatment and more often than not applies to material prepared by someone other than the author. Exordium, a technical term of rhetoric, applies to a formal beginning, especially of an oration but sometimes of a written exposition or argument, in which the speaker or writer makes an approach to his subject by remarks intended to awaken the interest of his auditors or readers and to pave the way for their understanding of what he is to say or for their acceptance of his conclusions. Preamble applies to a formal introduction, often only an introductory paragraph (as in a statute, a constitution, a treaty, a deed, or a set of resolutions) which states the grounds, purposes, or guiding principles of what follows. It is sometimes used as a designation of a long monotonous preface.

Introductory adj * preliminary, preparatory, preface
Ant closing, concluding

Intrude, obtrude, interlope, butt in are comparable when meaning to thrust oneself or something in without invitation or authorization. Intrude both transitively and intransitively carries a strong implication of forcing someone or something in without leave, without right, or against the will of others; it often connotes rudeness, officiousness, or invasion of another’s property, time, or personal privacy (this court always had disavowed the right to intrude its judgment upon questions of policy or morals—Justice Holmes). Sergeant Lumley, unfairly intruding his official superiority into this theological discussion (Sayer). I stood there, feeling very abashed at intruding on all these busy people—Mannix. Obtrude in this relation retains much of its basic notion of pushing or extending something into view; it may imply nothing beyond this fact (I intended plain prose, but a rhyme obtruded itself and I became poetical—Cowper) or it may suggest the impropriety and objectionableness of the act or the disagreeableness of the offense (the first sin against style as against good manners is to obtrude or exploit personality—Quiller-Couch). Interloper implies an intersection of oneself in a place or position which has an injurious effect on one or both of the persons or things concerned (he regarded her new acquaintance as an interloping rival for her hand) (he dealt with the Communists as a Groton football coach with a bunch of interloping ruffians who don’t know the rules of the game—Time). Butt in implies an abrupt or offensive intrusion suggestive of the manner in which a horned animal attacks its enemy; in this sense the term usually suggests absence of ceremony, a sense of propriety, or decent restraint (it’s a thankless job to butt in and tell a man that in your important opinion his wife is a vampire bat—Sinclair Lewis).
intrusive 464  

<he left behind a big, white turkey gobbler. It would butt in when we fed the horses and was a nuisance generally—Siberts>

<i>Ant</i> stand off —<i>Con</i> withdraw, retire (see go); retreat, *recede

intrusive *impertinent, officious, meddlesome, obtrusive 
<i>Ant</i> intruding, butting in, interloping, intruding (see INTRUDE): inquisitive, prying, snoopy, nosy, *curious: interfering, meddling, intermeddling (see MEDDLE)

intuitive

intrude, obtrude, butt in, interlope: *enter, penetrate, probe: *permeate, pervade, impenetrable

invalidate *nullify, negate, annul, abrogate

invalidator *enforce, implement

invaluable *priceless, precious, valuable, dear, *costly, *expensive

invasion, incursion, raid, inroad are comparable when meaning an entrance effected by force or strategy. Invasion basically implies entrance upon another's territory with such hostile intentions as conquest, plunder, or use as a basis of operations (the Roman invasion of Britain) (in a well-planned Hitlerian invasion there is at first no shooting save by those who are taking their own lives—New Republic). In nonmilitary use it may imply encroachment, trespass, or an intrusion that involves an aggressive or hostile purpose <i>Ant</i> aggression, *attack, offense, offensive: trespass, violation, transgression, infringement, fraction, *breach: intruding or intrusion, interloping, butting in, obstructing or obstruction (see corresponding verbs at INTRUDE): encroachment, entrenchment (see corresponding verbs at TRESPASS)

invective *abuse, vituperation, obloquy, scurrility, bilingsgate

invent 1 *contrive, devise, frame, concoct

invent 2 *create, discover are comparable terms frequently confused in the sense of to bring into being something new. Invent (see also CONTRIVE) may stress fabrication of something new through the exercise of the imagination (a poet is a maker, as the word signifies: and he who cannot make, that is, invent, hath his name for nothing—Dryden) (this fund of knowledge seemed inexhaustible, for what he didn't know he invented—Alvin Redman) (the little stories she had invented for her two small daughters—Current Bio.) or it may stress the fabrication of something new and often useful as a result of study and thought; the word therefore often presupposes labor and ingenuity rather than inspiration (if the Semitic letters were not derived from Egypt they must have been invented by the Phoenicians—Cloud). However, invent often stresses the finding, as well as the bringing into being, of something new or hitherto unknown as the result of mental effort <physicists had to save the laws of conservation of energy and conservation of angular momentum . . . a new particle had to be invented—Marshall) (she was tired of inventing means for making the days and nights pleasant and capriciously variable for den invasion (as of cavalry or of air forces) may or may not suggest more preparation, more strategy, and more fury in attack than incursion, its close synonym (the raids in the Shenandoah Valley by Forrest's Confederate cavalry during 1863) (nightly bombing raids on London)

In international law, however, raid is applicable specifically to an incursion of armed forces that are unauthorized or unrecognized by any state into a country that is at peace; thus, an incursion of armed persons on one side of a border or boundary line into the adjoining country for a predatory or hostile purpose is technically a raid. In its extended use raid applies to a sudden descent or a flurry of activity intended usually to obtain the use, control, or possession of something; thus, officers of the law conduct a raid upon a gambling resort or a place where liquor is illicitly made or sold to obtain evidence and arrest offenders (the raids of government and industry on college personnel, especially in the fields of science —J. R. Butler) (before the last raid on the railroads by the various unions—Arden) Inroad may apply to a sudden hostile incursion or a forcible entering (aggressive war, as distinguished from mere plundering inroads —Freeman) (protecting their crops of barley from the inroads of sparrows—Frazer) but the term is also applied to an invasion that involves encroachment or advance especially at the expense of someone or something (foil and plastic are making inroads where glass once held undisputed sway—Ericson) (activities that make inroads upon his time and his health). 

<i>Ant</i> aggression, *attack, offense, offensive: trespass, violation, transgression, infringement, fraction, *breach: intruding or intrusion, interloping, butting in, obstructing or obstruction (see corresponding verbs at INTRUDE): encroachment, entrenchment (see corresponding verbs at TRESPASS)
inventory

465

invincible

others—Van Vechten—Create stresses a causing of something to exist; it not only implies previous nonexistence but it often suggests an evoking of something into being out of, or as if out of, nothing (as by fiat, by an act of the will, or by inspiration) (God created the heaven and the earth—Gen 1:1) (the law creates rights) (the king created an earldom for his favorite) (to this strange force within him, to this power that created his works of art, there was nothing to do but submit—Huxley) (I do not believe that a sense of justice is innate, but I have been astonished to see how quickly it can be created—Russell) (modern science, which created this dilemma, is also capable of solving it—Bliven 1889) Discover (see also DISCOVER 2: REVEAL) presupposes both the existence of and a lack of knowledge about something; the term therefore implies the finding of such a thing, often as the result of mental or physical effort (as by exploration, investigation, or experiment) (remains of this Belgic culture have often been discovered—Jacquetta & Christopher Hawkes) (men who were fighting Communism long before McCarthy ever discovered it—Davis) (William Harvey discovered the circulation of the blood)

Thus, in discriminative use one invents processes or ways of doing something, as well as instruments, tools, implements, or machines, but one discovers things which exist but have not yet been known (as lands, stars, or natural laws) (Newton invented the differential and the integral calculus . . . and discovered the laws of motion—Darrow)

inviolable, *sacred, sacrosanct
Ana hallowed, consecrated, dedicated (see DEVOTE): *holy, sacred, blessed, divine, religious: pure, *chaste
inviolate sacrosanct, *sacred, inviolable
Ant violated —Con profaned, desecrated (see corresponding nouns at PROFANATION): polluted, defiled (see CONTAMINATE)

invite, bid, solicit, court, woo are comparable when they mean to request or encourage a person or a thing to come to one or to fall in with one's plans or desires. Invite in its ordinary and usual sense implies a courteous request to go somewhere, do something, or give some assistance which it is assumed will be agreeable or at least not disagreeable to the person invited (invite a few friends to dinner) (invite an acquaintance to spend the night) (invite an audience to express their opinions) (he had invited all the girls, including Miss Tolman, to go out with him on various occasions, but . . . everyone declined his offer—Woodfin) In this sense the word usually implies providing an opening for those who otherwise might hesitate to go, or do, or give without such a request. Consequently, in its extended sense invite implies providing an opening by such means as a seductive manner or a challenging statement or policy that serves as an encouragement or temptation to another (dress so conspicuously as to invite unwelcome attentions) (fairly imminent collisions invited by the Captain's inept conning—Heggen) (the writer who brings a new revelation is not necessarily called upon to invite the execution of the herd—Ellis) Bid (see also COMMAND vb) is increasingly uncommon in the sense of to request the presence of (as at a feast or great occasion) (as many as ye shall find, bid to the marriage—Mt 22:9) but bid (usually with for), from its sense to offer a price for something up for sale, has developed an extended use in which it means to make an effort to win or attract or an appeal (as for sympathy) and in this use sometimes comes close to invite in conveying the notion of offering a tempting opening for something (in his difficult position he could not bid for their affection; he wanted only their obedience—Douglas) (stood for Congress in this virgin district, bidding for the support of labor—Green Peyton) Solicit (see also ASK 2) differs from invite in stressing urgency or need rather than courtesy in requesting or encouraging (we may come to feel a little impatient at having our pity so continually solicited—Edmund Wilson) (moral utterances which solicit the obedience of children—Melden) Court basically implies an endeavor to win the favor of a person (as by flattery, attentions, or making love). Only in its extended sense does it imply a providing of a favorable opportunity by tempting or encouraging something to come to one or to happen to one (he kept himself somewhat aloof, seeming to avoid notice rather than to court it—Arnold) (so long as a scientific textbook is obsolete in a decade or less, to poetize science is to court mortality—Lower) Woo basically implies amorous courting; consequently, in its extended sense it frequently stresses a drawing to or upon one by allurements, blandishments, and extravagant promises (Herodotus in search of a public . . . found a favorable "pitch," as we should say, and wooed an audience to him—Quiller-Couch) (the young author trying to woo his reader, via heavy humor—Keene) Occasionally the word is very close to court and scarcely distinguishable from it (you . . . woo your own destruction—Shak)

Ana *ask, request, solicit: *lure, tempt, entice, inveigle: excite, *provoke, stimulate

involve 1 *entangle, enmesh
Ana complicate (see complicated under COMPLEX): confuse, confound, *mistake: perplex, mystify, nonplus, *puzzle
2 comprehend, embrace, *include, imply, subsume
Ana import, *mean, signify, denote: bespeak, attest, betoken, *indicate, argue, prove
Con eliminate, *exclude, rule out, debar
3 Involve, implicate mean to bring a person or thing into circumstances or a situation from which he or it is not easily freed. Involve (see also INCLUDE) need not impute disgrace to the circumstances or situation but it usually implies complication or entangling and often suggests extreme embarrassment (the war may not end until every nation in Europe is involved in it) (the case of a judge involved by the exigencies of his office in a strong conflict between public duty and private interest or affection—Colvin) (had been involved in some affair that made it uncomfortable for him to return to live in that city—Anderson) (the controversies . . . moved on in all their ugliness to involve others—J. M. Brown) Implicate usually implies a disgraceful connection or one that casts a reflection on a person's reputation; it may even imply definite proof of association with a crime (the detectives discovered that an uncle of the child was implicated in its kidnapping) (they were unable to implicate any of the suspected political leaders in the conspiracy to defraud the city) (all men, even the most virtuous and wise, are implicated in historic evil—Niebuhr)

Ana ensnare, entrap, snare, trap (see CATCH): connect, link, associate, relate (see JOIN): *embarrass: fetter, shackles, *hamper

irate *angry, wrathful, wroth, mad, indignant, acrimonious
Ant pacify

iridescent opalescent, opaline, prismatic
Ant acrimonious

irksome, tiresome, wearisome, tedious, boring mean burdened because tiring or boring or both. A person or thing is irksome that inspires distaste, reluctance, or impatience because of its demand for effort not made easy by interest (the difficulty of grasping abstract statements made learning very irksome to me—Symonds) (I did not feel any longer . . . the restless and irksome desire to contrive whimsy redundant—Edmund Wilson) (he laid down his irksome editorial duties and spent the next fifteen years in farming—F. H. Chase) A person or thing is tiresome that is dull and unenlivening and therefore is either intensely boring or soon productive of fatigue (it is tiresome to be funny for a whole evening—Scott) (the second curate was Chator, who was so good as sometimes to be nearly tiresome—Mackenzie) (we think of rain as tiresome and uncomfortable—Binyon) (the importunity of the little boys was tiresome when one wanted to be alone—Huxley) A person or, especially, a thing is wearisome that exhausts one's strength or patience through long-continued or constant call for effort, exertion, or attention, or through tiresome uniformity of character (these high wild hills and rough uneven ways draws out our miles, and makes them wearisome—Shak) (the same wearisome round of stereotyped habits—Wilde) (the acquisition of exact knowledge is apt to be wearisome, but it is essential to every kind of excellence—Russell) A person or thing is tedious that is tiresomely monotonous, slow, or prolix (life is as tedious as a twice-told tale vexing the dull ear of a drowsy man—Shak) (they had no longer any surprises for me . . . I knew pretty well what they would say; even their love affairs had a tedious banality—Maugham) A person or thing is boring that causes boredom; the term is perhaps the most positive of the group since it implies an active depressing, wearying, or annoying (the story is badly cluttered by unnecessary and boring wordiness—New Yorker) (he's so boring . . . I hate boring people. I'm out for a good time—Lowry)

irritable choleric, splenetic, testy, touchy, cranky, cross mean easily angered or enraged. Irritable implies the possession of a fiery or inflammable temperament or a tendency to flare up at the slightest provocation (the irritable but kindhearted deity who indulges in copious curses to ease his feelings—Cohen) (a peppery and irritable old gentleman—Choleric implies excitability of temper, unreasonable anger, and usually an impatient and uniformly irritable frame of mind (that in the captain's but a choleric word, which in the soldier is flat blasphemy—Shak) (a testy and choleric gentleman easily wrought into passion—Cooper) Splenetic implies a similar temperament, but one especially given to moroseness and fits of bad temper which exhibit themselves in angry, sullen, or intensely peevish moods, words, or acts (that splenetic temper, which seems to grudge brightness to the flames of hell—Landor) (he was not splenetic: nay, he proved in the offending volume he could be civil, courteous, chivalrous—Meredith) Testy implies irascibility occasioned by small annoyances (the testy major was in fume to find no hunter standing waiting—Masefield) (he raged . . . he was ever more autocratic, more testy—Sinclair Lewis) Touchy suggests readiness to take offense; it often connotes undue irritability or oversensitiveness (I am not touchy under criticism—Stevenson) (touchy about their own sacred symbols and alert to interpret any slight as an insult—Blanshard) Cranky and cross often mean little more than irritable and difficult to please. But cranky may carry an implication of the possession of set notions, fixed ideas, or unvarying standards which predispose one to anger or a show of temper when others (as in their speech, conduct, requests, or work) do not conform to these standards (a cranky critic) (a cranky employer) (a cranky teacher) (old age seemed to settle on me; I quarreled with the trader—Rosenfeld) Cross, on the other hand, may imply a being out of sorts that results in irascibility or irritability but only for the duration of one's mood (sometimes, when I am cross and cannot sleep, I engage in angry contests with the opinions I object to—L. P. Smith) (the attempts to persuade the Intelligent Woman that she is having a glorious treat when she is in fact being . . . bored and tired out and sent home cross and miserable—Shaw) (I am irritable, fractious, snappish, waspishly, hungrily, querulous, petulant, peevish: *impatient, restive, jumpy, jittery, nervous: crabbish, surly (see Sullen) Con good-natured, amiable, complaisant, obliging; *calm, placid, serene, tranquil

irate *angry, wrathful, wroth, mad, indignant, acrimonious
Ant provoked, exasperated, nettled, irritated (see irri-
rate); incensed, infuriated, enraged (see anger vb) Con *forbearing, tolerant, element, lenient, indulgent, merciful

irreducible *angry, fury, *anger, indignation, wrath

irrelevant pacific, peaceful, peaceful, pacifist, pacificist
Ant conciliating or conciliatory, placating or placatory, propitiating or propitiatory (see corresponding verbs at
irregular, anomalous, unnatural mean outside the sphere that is regarded as normal, proper, or fitting under the circumstances; an unnatural sentence does not conform to what is regarded as normal or proper; an unnatural law or custom is one that does not conform to what is regarded as normal or proper.

irritable, fractious, peevish, snappish, waspish, petulant imply extreme excitability of temperament, often asso- ciated with or arising from fatigue or physical or mental strain; an irritable child is one that is easily disturbed or distracted.

irrational — Con reasonable (see rational): *wise, judicious, sage, sapient, prudent, sane, sensible: *logical

irregular, anomalous, unnatural mean outside the sphere of what conforms to or is explainable by law, rule, custom, or principle. Irregular implies failure to conform to a rule, a law, or a pattern, especially to one imposed for the sake of uniformity in method, practice, or conduct; thus, an irregular marriage is one that does not conform to the regulations of church or state; an irregular verse does not accord with the practice of civilized nations or conventional military theory; irregular conduct may or may not be morally reprehensible, but it defines the code or standard of the community or class (there are always irregular fluctuations of the seasonal weather—Ellis) — made a strong appeal for the highest standards of medical education in an effort to combat irregular practitioners—Vieits (the chicanery was gross, the forgery patent, the procedure irregular and illegal—Woodward) Anomalous stresses lack of conformity to what might be expected of a thing because of the class or type to which it belongs, the laws which govern its existence, or the environment in which it is found (all seven of us . . . appeared on the show under pseudonyms. Which may sound highly anomalous, considering that we’re the children of vaudevil- lians, a sect not usually antipathetic to publicity—Salinger) Sometimes it specifically implies inconsistency or a conflict of principles (acts so anomalous, in such startling contradiction to all our usual ways and accepted notions of life and its value—L. P. Smith) and sometimes it specifically means unclassifiable or indefinable (anamal- lous literary works such as Holmes’s Autocrat of the Breakfast Table) (anomalous emotions) Again, it sug- gests the absence of the character or of the character- istics essential to a thing of its kind (a few judges find in her last book new support for the anomalous opinion that its author was a great artist, but insignificant—Beck) or it suggests a contradiction between the professed aims or intentions of a person or institution and the conditions in which that person or institution exists or finds himself or itself at a given time (the anomalous position of the free Negro in the slave states—E. T. Price) — President Wilson found himself in an anomalous position when Congress rejected his proposal that the United States enter the League of Nations) Unnatural is the strongest of these words in its implication of censure, especially when it implies a violation of natural law or of principles accepted by all civilized men as based on reason and essential to the well-being of society. In such cases it often specifically connotes moral perversion (an unnatural practice) (she had been vicious and unnatural; she had thriven on hatred—S. S. Van Dine) or abnormal indifference or cruelty (an unnatural parent) Sometimes the word merely means contrary to what is received as natural, either because it is not in accordance with the normal course of nature (snow in May is unnatural in this region) or because it is not in keeping with what one regards as normal, balanced, proper, or fitting under the circum- stances (an unnatural appetite for acid foods) (a poetic language which appears natural to one age will appear unnatural or artificial to another—Day Lewis) (thy deed, inhuman and unnatural provokes this deluge most un- natural—Shak.) (a daughter who left her father was an unnatural daughter; her womanhood was suspect—Woolf) Ana aberrant, *abnormal, atypical: *exceptional: sin- gular, unique, *strange, peculiar, odd, queer

irreligious, unreligious, nonreligious, godless mean not religious or not devoted to the ends of religion. Irreligious is not only the most common of the negative forms of religious but the most clearly defined in meaning, for it implies not merely lack of religion but hostility to religion or courses in opposition to it or in violation of its precepts (that non-churchgoers are not necessarily irreligious—Streit) It may even suggest impiety, immorality, or blasphemy (it is unworthy a religious man to view an irreligious one either with alarm or aversion—Carlyle) (they are so irreligious that they exploit popular religion for professional purposes without delicacy or scruple—Shaw) Unreligious, a somewhat uncommon term, implies nothing more than lack of religion; it therefore applies aptly to men, their utterances, or their works and suggests merely the absence of religion or of religious training or religious ideas (the popular poetry . . . became . . . unreligious . . . in some parts irreligious—Milman) Nonreligious applies not so much to persons as to institu- tions, activities, projects, and themes for art that are out- side the sphere or province of religion or not under the control of a religious body; it therefore comes close in meaning to secular (see under profane 1) (nonre- ligious education) (nonreligious charitable societies) (made it hard for them to trust a nonreligious institu- tion, such as the State University—Amer. Guide Series: Ind.) Ungodly often comes close to irreligious, but it carries a stronger suggestion of disobedience to or defiance of divine law (blessed is the man that walketh not in the counsel of the ungodly—Ps 1:1) (they de- cided to leave so ungodly a land—Usher) Godless commonly implies atheism or agnosticism and often definitely implies rejection of religion (godless philoso- phers) (godless teachings) (here were devout god- less people: their only monument the asphalt road—T. S. Eliot) (fiercely predicting the end of Lorenzo and all his godless court—Moorehead) Ana *impius, profane, blasphemous, sacrilegious; *im- moral, amoral, unmoral

Ant religious —Con pious, *devout

irritable, fractious, peevish, snappish, waspish, petulant, pettyish, fretful, querulous apply to persons or to their moods or dispositions in the sense of showing impa- tience or anger without due or sufficient cause. Irritable implies extreme excitability of temperament, often asso- ciated with or arising from fatigue or physical or mental

A colon (:) separates groups of words discriminated. An asterisk (*) indicates place of treatment of each group.
irritate, exasperate, nettle, provoke, aggravate, rile, peeve are comparable when meaning to excite a feeling of angry annoyance in a person. Something which irritates greatly from momentary impatience to an outburst of rage <the chattering crowd, with their rude jokes ... irritated him sharply—Anderson> <her intensity, which would leave no emotion on a normal plane, irritated the youth into a frenzy—D. H. Lawrence> Something which exasperates arouses bitter or intense irritation. The word, however, sometimes expresses nothing more than keen vexation or annoyance <an opportunity to ... aggravate his poor patient wife, and exasperate his children, and make himself generally obnoxious—Simeon Ford> <though she could exasperate she could never offend—H. G. Wells> Something which nettles irritates sharply but momentarily and stings or pierces more than angers <a touch of light scorn in her voice netted me—W. J. Locke> Something which provokes awaken strong annoyance or vexation and often incites to action <a Tory resident who provoked local animosities and was charged with high treason—Amer. Guide Series: Conn.> <they were definitely provoked to extremity before they did this deed—Ingamells> <he is provoked with me for not talking more—Burney> Something which aggravates (see also intensify) arouses displeasure, irritation, or anger often through prolonged or repeated action <nothing so aggravates an earnest person as a passive resistance—Melville> <it is aggravating to have you talking about so small a business—Shaw> Something which riles disturbs one's serenity or peace and agitates as well as angers <with raucous taunting and ribald remarks to rile up the proprietor—White> Something which peeves excites often petty or querulous fretfulness or a tendency to be easily irritated <he is easily peeved after a restless night> <when she ventured to criticize it, even mildly, he was peeved—Auchincloss> Ana *annoy, vex, irk, bother: incense, *anger, madden, exasperate, nettlesome <angry, exasperate, nettlesome>, *peeved—Auchincloss> Con appease, mollify, conciliate, propitiate, placate, pacify: gratify, *please, gladden, delight isolate, segregate, seclude, insulate, sequester are comparable when they mean to separate from the usual or natural environment, but they are rarely interchangeable because their other and differentiating implications are often stressed. Isolate implies a detachment of someone or something from his or its usual environment so that he or it will not affect or be affected by others. The word is sufficiently general that it may be employed in reference either to an actual separation or to a separation that is merely virtual, arbitrary, or speculative <several villages were isolated by the storm> <find an isolated spot in which to live> <isolate scarlet fever patients> <under present conditions no country can remain isolated> <he was singularly isolated, untouched by the interest or the gossip or the knowledge of the life about him—Deland> <we must remember that religion, like some chemical substance, is never found pure, and it is not at all easy to isolate it in order to learn its properties—Inge>Segregate also applies to both persons and things and usually refers to them as a group separated from the mass or main body; its secondary implication is often, therefore, a collection in one place, one class, or one mass and it may in addition imply a holding incommunicado <segregating lepers, the rest of the population> <segregate hardened criminals from first offenders in prisons> <that innate instinct which ever aimed at uniting, not segregating groups of Christians—D. P. Hughes> Seclude implies a removal or withdrawal from external influences; it is therefore often used reflexively or at least in such a way as to imply acceptance of the protection afforded by such removal or withdrawal <secluded in their childhood from all evil influences> <so she sat hard and close at her writing...
isolation

* solitude, alienation, seclusion

detail, particular are comparable when meaning one issue

jog n poke, prod, nudge (see under POKE vb)

join, conjoin, combine, unite, connect, link, associate, relate are comparable when meaning to attach or fasten one thing to another or several things to each other or to become so attached or fastened. Join stresses the bringing or coming together into contact or conjunction of two or more clearly discrete things (join two pieces of wood by dovetailing them) (join skirt lengths by seams) (join hands) (join a man and woman in matrimony) (where the Mohawk river joins the Hudson) (the opponents of the proposal decided to join forces) Join is the specific term when one becomes a member of a group or enters into the company of others as an equal (join a society) (join a church) (join a group at a reception) (join the army) Conjoin usually emphasizes both the separateness and distinctness of the items to be joined and the unity that results from their being joined (from inborn indolence, conjoined with avarice, pride, and lust of power, has sprung slavery in all its protean forms—Henry Wilson) (Death Valley probably received the discharge of both the Amargosa and Mohave rivers, whose conjoined waters entered from the south—Jour. of Geology) Combine in this relation (see also UNITE 2) adds to join the implications of a mingling or blending and may stress more heavily the idea of a common purpose or end; it is therefore used of two or more, often immaterial, things that may lose or seem to lose their identities and become merged in each other (combine the ingredients for a cake) (a gift for combining, for fusing into a single phrase, two or more diverse impressions—T. S. Eliot) (with this quality of temperance was combined in Socrates a rare measure of independence and moral courage—Dickinson) (combined literary distinction with a high degree of historical objectivity—Van Alstyne) Unite, like combine, implies a blending that effects the loss of individual identity of the elements, but, like conjoin, unite stresses the singleness of the result (unite two pieces of metal by welding) (our peace will, like a broken limb united, grow stronger for the breaking—Shak) (particles which can unite to form a new compound—T. S. Eliot) (in France the whole people saw at once what was upon them; the single word patrie was enough to unite them in a common enthusiasm and stern determination—Inge) Connect implies a loose or, at least, an obvious attachment of things to each other and the preservation not only of each thing’s identity but also of the evidence of its physical or logical separateness; in this way it is distinguishable from join when physical attachment is implied; thus, a wall is built up of bricks joined, rather than connected, together by cement but a chain is made by connecting a succession of steel links; often connect implies an intervening element or medium which permits joint movement and intercommunication (connect two railway coaches by means of a coupler) (connect two islands with a bridge) (ligaments serve to connect bones at a joint) (a minor road which connects highways) When the idea of logical attachment is uppermost, connect usually implies that the ideas, events, or things whether material or immaterial have a bearing on each other (as of cause and effect, generic likeness, or reference to the same person or thing) (the two incidents were connected) (the police have now sufficient evidence to connect the suspect with the bombing) (she could not connect her mother’s meanness with the magnitude of what had happened—Auchincloss) (anything connected with Napoleon is of interest to them) Connect, especially in the passive, is preferable to join when used in reference to organizations or groups and looseness of attachment, impermanence, or subordination is implied (nobody connected with the paper ever makes a public appearance without being challenged—Bliven b. 1889) Link, with its underlying reference to one of the parts of a chain, is usually more emphatic than connect in implying firmness.
of attachment; it is therefore the more precise word when one wishes to preserve the basic implications of connect and yet to avoid its common connotations of a weak or severable attachment; thus, to link a person with a crime is, by implication, to have ample evidence of his involve-
ment with it (Augustus set himself to revive the state religion . . . as part of his policy of linking up past and present, and as an instrument in securing the restoration of the old morality—Buchan) (none of the subjects that linked us together could be talked about in a bar—Nevil Shute) (mobilize civilian science and link it effectively with the war effort—Baxter) Associate primarily implies a joining with another usually in an amiable relationship and on terms of equality (a group of men associated in business) (when bad men combine, good men must associate—Burke) (my father's conviction that they were too lowly to associate with me, when it was so clear that I was too poor to associate with them, may have had some sort of imaginary validity for him; but for me it was snobbish nonsense—Shaw) In its extended use as referred to things, the implication of companionship on equal terms gives way to the implication of a connection in logic or in thought which comes naturally or involun-
tarily to the mind of the observer either because the things traditionally go together, or naturally or rightfully belong together, or for some reason have come to be linked together in one's thoughts (for the artist life is always a discipline, and no discipline can be without pain. That is so even of dancing, which of all the arts is most associated in the popular mind with pleasure—Ellis) (surréalism has been associated with psychological and intellectual atmosphere common to periods of war—Bernard Smith) (a fir tree is not a flower, and yet it is associated in my mind with primroses—Jeffries) Relate implies a connection, or an attempt to show a connection, between two or more persons or things. In reference to persons it implies a connection through a common ancestor or through marriage (John and James are remotely related to each other) In reference to things or to persons objectively regarded, it implies that each has some bearing on the other and often indicates the existence of a real or presumed logical connection (related his misfortunes to events which preceded them) (the two circumstances are not related) (their ability to relate what they observe to what they know or have previously observed—Hilbreth)

**Ant** disjoint: part —Con *separate, sever, Sunder: *detach, disengage: disentangle, untangle, disembarrass (see EXTRICATE)

**Joint, articulation, suture** denote a place where two things are united or the mechanism by which they are united. Joint is the most inclusive of these terms and is freely usable in reference both to anatomical and mechanical structures. In anatomical reference it applies to a junction whether rigidly fixed or capable of more or less complex movements of two skeletal parts (as vertebrate bones or cartilages or molluscan shell valves) and is the one of these terms that is equally applicable to the bodily region or part at which there is such a junction (the knee joint) (the joint at the elbow is flexible) (he aches in every joint) Similarly, in mechanical reference, joint applies to a junction between two parts that serves as a coupling and may be rigid (a dovetail joint at the corner of a drawer) (a joint in a gas pipe) (mortar joints between bricks carefully finished to shed water) or may form a flexible union (a swivel joint) (the ball joints . . . have a lateral as well as up-and-down action, thus cushioning against bumps—Ford Times) or even (as in a universal joint) one through which motion is transmitted from one part to the other. Articulation is chiefly an anatomical term, though it has some extended use (see under INTE-
GRATE). Anatomically articulation is applicable to the same parts of the skeleton as joint but distinctively it implies, as joint does not, the fitting together or adjustment of two parts or bones with relation not only to each other but to the entire structure and its function and is therefore not applicable, as joint is, to the bodily region or part where a joint occurs. It is especially appropriate when the mechanism of a joint or the elements entering into its formation are under consideration (ball-and-socket structure of a movable articulation) (various articulations are supported by ligaments) (the synovial membrane reduces friction at an articulation) The word may also denote the process of joining or the adjustment in joining (in the flat bones the articulations usually take place at the edges—Henry Gray) Suture is used of a joint or articulation that suggests a seam or that has been brought about by sewing (the joints of the two parts of a pea pod are called respectively the ventral and dorsal sutures) (the form of articulation observable in the skull where two flat bones meet in a line is called a suture) Suture is used in surgery of a seam, especially of one whereby two edges of an incision are brought together so that they may ultimately unite.

**Joke. jest, jape, quip, witticism, wisecrack, crack, gag** are comparable when they mean a remark, story, or action intended to evoke laughter. Joke, when applied to a story or remark, suggests something designed to promote good humor and especially an anecdote with a humorous twist at the end; when applied to an action, it often signifies a practical joke, usually suggesting a fooling or deceiving of someone at his expense, generally though not necessarily good humor in intent (everyone knows the old joke, that "black horses eat more than white horses," a puzzling condition which is finally cleared up by the statement that "there are more black horses"—Reilly) (issues had become a hopeless muddle and national politics a biennial joke—Wecter) (a child hiding mother's pocketbook as a joke) (the whole tale turns out to be a monstrous joke, a deception of matchless cruelty—Redman) Jest may connote raillery or ridicule but more generally suggests humor that is light and sportive (continu-
ally . . . making a jest of his ignorance—J. D. Beresford) (won fame by jests at the foibles of his time, but . . . his pen was more playful than caustic—Williams & Pollard) Jape is identical with jest or joke (the merry japes of fundamentally irresponsible young men—Edmund Fuller) (the japes about sex still strike me as being prurient rather than funny—McCarten) Quip suggests a quick, neatly turned, witty remark (full of wise saws and homely illustrations, the epigram, the quip, the jest—Cardozo) (many quips at the expense of individuals and their villages—Med) (enlivened their reviews with quips—Dunham) Witticism, wisecrack, and crack all apply to a clever or witty, especially a biting or sarcastic, remark, generally serving as a retort (all the charming witticisms of English lecturers—Sevareid) (a vicious witticism at the expense of a political opponent) (merely strolls by, makes a goofy wisecrack or screwball suggestion—Hugh Humphreys) (though the gravity of the situation forbade their utterance, I was thinking of at least three priceless cracks I could make—Wodehouse) Gag, which in this relation basically signifies an interpolated joke or laugh-provoking piece of business, more generally applies to a remark, story, or piece of business considered.

**Ana** analogous words  
**Ant** antonyms  
**Con** contrasted words

funny, especially one written into a theatrical, movie, radio, or television script. Sometimes the word has extended its meaning to signify a trick whether funny or not but usually one considered foolish <gags grown venerable in the service of the music halls—Times Lit. Sup.> <the gag was not meant to be entirely funny—Newsweek> <gave a party the other night and pulled a really constructive gag . . . had every guest in the place vaccinated against smallpox—Hollywood Reporter> <a frivolous person, given to gags and foolishness>

Jollity hilarity, glee, *mirth

Jolly adj jovial, jocund, *merry, blithe

Jot n jar, shock, *impact, impingement, collision, clash, concussion, percussion

Journal, periodical, newspaper, magazine, review, organ are comparable when denoting a publication which appears regularly at stated times. Basically, a journal is a publication which is issued daily and gives an account of matters of interest occurring during the preceding twenty-four hours. Continued use, however, has made it an acceptable designation both of a publication that appears less often (as a weekly, a monthly, or a quarterly) (<the Hibbert Journal> appeared every three months and called itself a journal—Mackenzie) and of one that is the official publication of some special group (<the Journal of the American Medical Association> Periodical applies to a publication appearing at regular intervals and especially to weeklies, biweeklies, monthlies, and quarterlies (<the periodicals are assembled in a special room of the library> Newspaper is the usual term for a sheet or group of sheets of which the main function is to provide the news of the day and which is usually issued daily; such a publication is called a journal only in formal speech or writing, although those whose profession is writing for newspapers are often termed journalists and although the language and style believed to be typical of the newspaper is commonly called jounalese. Magazine applies chiefly to a periodical, often illustrated, that offers a miscellaneous collection of articles, fiction, poetry, descriptive sketches, and commentary. Review applies to a periodical that emphasizes critical writings or articles commenting on important events and significant questions of the day. Organ usually applies to a publication by an organization (as a political party, church, business, or institution) that gives news of interest to its members or adherents or presents its particular principles and views authoritatively (<Science is the official organ of the American Association for the Advancement of Science>)

Journey, voyage, tour, trip, jaunt, excursion, cruise, expedition, pilgrimage mean travel or a passage from one place to another. Journey, the most comprehensive term in general use, carries no particular implications of the distance, duration, destination, purpose, or mode of transportation involved (<plans a journey to California> <wished him a happy journey home> <the journey to Italy will not take more than two months> <a journey of twenty-five miles in Britain will often afford . . . much variety of scenery—Stamp> <the sound film took four years to make the journey from Hollywood to Rome—Jarratt> Voyage normally implies a journey of some length over water, especially a sea or ocean (<with a fair sea voyage, and a fair land journey, you will be soon at his dear side—Dickens> <Gordon made the voyage from San Francisco around the Horn on a big fully-rigged Glasgow sailing ship—Current Biog.> but sometimes it may indicate a journey through air or space (<through the long 109-day, 180,000,000 mile voyage, Mariner was precisely controlled—Christian Science Monitor> Tour applies to a somewhat circular journey from place to place that ends when one reaches one’s starting point (<set out on a walking tour> <tour of Western Europe> <penologists made a tour of all the prisons in the state> <my next design was to make a tour round the island—Defoe> <left in September for a seven-week goodwill tour of northern and western Europe—Current Biog.> Trip is the preferable word when referring to a relatively short journey, especially one for business or pleasure (<his new position requires frequent trips to New York> <the English came over in droves on the day trips—A. V. Davis> <surveys revealed that 59 percent of city-driver trips . . . were made for purposes of making a living—American Annual> The term is also used in place of journey to refer to more extensive travels (<conclusions I had reached on my trip around the world—Willkie> <a trip through western Pennsylvania, then down the Ohio—L. M. Sears> Jaunt carries a stronger implication of casualness and informality than any of the others and is especially applicable to a short trip away from one’s home or one’s business, usually for pleasure or recreation (<they are off for a day’s jaunt> <a jaunt to the shore or the hills—F. L. Allen> <lip service is paid . . . to the idea of Congressional travel but the general tone throughout runs: They’re off again on their jaunts at public expense—H. A. Williams> Excursion applies to a brief pleasure trip, usually no more than a day in length (<the rural neighborhood of Sneyd, where they had been making an afternoon excursion—Bennett> Excursion is the preferred term, especially in railroad and steamship use, for a round trip at reduced rates to a point of interest (as a political party, church, business, or institution) that presents its particular principles and views authoritatively (<the Minneapolis, North-Southern Ry. runs excursions to Bush Lake on tournament days—Amer. Guide Series: Minn.> When the excursion involves a voyage of some days or weeks and, often, a sight-seeing tour with frequent stops during which the participants use the ship as their living quarters, cruise is the usual term (<a Mediterranean cruise> <the steamship lines are featuring winter cruises through the Caribbean Sea> <their yacht is off with a partner on an expedition> Expedition applies to a journey intended to further a definite purpose (<he called this trip frankly a begging
Judge, adjudge, adjudicate, arbitrate mean to decide something in dispute or controversy upon its merits and upon evidence. All these words imply the existence of a competent legal tribunal or of its equivalent. Judge and arbiter, arbitrator, referee, umpire are technical terms applied to the official or officials charged with the regulation and supervision of a contest (as by enforcement of rules of a game, making decisions on plays, and determining penalties for faults). In most sports either one term or the other is used; thus, these officials in baseball, cricket, and tennis are designated umpires, while in boxing, basketball, football, and ice hockey they are designated referees. In nontechnical use referee usually is applied to one to whom disputants have recourse when agreement seems impossible, umpire to one who enters in and arbitrarily ends the contest (as by enforcement of rules of a game, making decisions on plays, and determining penalties for faults). In most sports either one term or the other is used; thus, these officials in baseball, cricket, and tennis are designated umpires, while in boxing, basketball, football, and ice hockey they are designated referees. In nontechnical use referee usually is applied to one to whom disputants have recourse when agreement seems impossible, umpire to one who enters in and arbitrarily ends the contest (as by enforcement of rules of a game, making decisions on plays, and determining penalties for faults).
judges who form such a court <a judicial decision> (a judicial duty) (a judicial proceeding) (I am told at times by friends that a judicial opinion has no business to be literature—Cardozo) The term is also used in distinction from executive, legislative when applied to that one of the powers, departments, or functions of the government which is associated with a court (as the United States Supreme Court), which gives definitive decisions on questions of law or interprets the constitution or basic law (the executive, legislative, and judicial branches of the government) (government analyzes into three main functions . . . legislative, executive, and judicial activities —Ogg & Ray) In extended use judicial is applied especially to a type of mind, mental activity, or manner suggestive of that of a judge (as in detachment or fair-mindedness) or appropriate to a judge or court of justice (as in ordeliness and seriousness of procedure) (to a strictly *judicial mind . . . the quality of age or of novelty would carry no necessary implication of value—Grandsen) <The review made an evident effort to be judicial . . . and so exhibiting both the good and bad points of the novel it alternated favorable and unfavorable judgments—McCluskey) *Judiciary is occasionally used in place of judicial, especially when it suggests reference to the courts in and to the administration of justice as a whole (the appointment of more women to higher judiciary positions —Current Biog) In current usage, however, judiciary occurs predominantly as a substantive, with judicial its corresponding adjective. The two words *judicial and *juridical imply a connection with the law, especially as it is administered in the courts, rather than with the judges or those who settle questions of law. Often these terms come close to legal in meaning (ordered . . . to grant *judicial recognition to the Assemblies of God churches in Italy— Time) but in learned use they are more restricted in significance. Both terms, but especially *judicial, imply a reference to the law as it appears to learned lawyers and judges—that is, as a highly complex and involved body of principles, statutes, decisions, and precedents requiring vast knowledge, skill in interpretation, and a keen logical mind in those who put it to use; therefore, the term often means characteristic of, determinable by, or useful to a person with such knowledge and skill (Eden is clearly working for the *juridical separation of Formosa and the Pescadores from the mainland—Healey) *(high time that we act on the *juridical principle that aggressive war-making is illegal and criminal—R. H. Jackson) *Jurisprudence implies rather a reference to the science of law (set forth with all the circumstance of philosophical and *juridical scholarship—Veblen) *(laws and *jurisprudence compilations of the Norman period—Stenton) *(Juris) Holmes had struck in 1905 in his dissent in Lochner v. N. Y. the high pitch of American *jurisprudence thought—New Republic>

*Judicial *judicial, juridical, juristic *judicious *wise, sagacious, prudent, sensible, sane *Ana *rational, reasonable: just, *fair, equitable, dispassionate, objective: sagacious, perspicacious, astute, *shrewd, discreet, prudent (see under PRUDESCENCE) *Ant injudicious: asinine —Con *foolish, silly, absurd, preposterous: *stupid, slow, dull, dumb, crass, dense: rash, reckless, foolhardy (see ADVENTUROUS)

jumble n *confusion, disorder, chaos, disarray, clutter, snarl, muddle

jump vb *Jump, leap, spring, bound, vault are comparable as verbs meaning to move suddenly through space by or as if by muscular action and as nouns designating an instance of such movement through space. All of these terms apply primarily to the movements of men or lower animals, but they also may be used of similar movements of inanimate things. *Jump, the most general term, basically implies a projection of the body that results in reaching a spot which is to some extent distant, whether below, above, or on the same plane *(she jumped from a second-story window) *(jump over a fence) *(jump from the ground to the top of a low wall) *(a jump across a ditch) Since *jump usually implies a rise and descent in a curve and a landing away from the point of origin, it is often applicable to things as well that follow a similar curve or seem to have a similar objective *(the fire) then jumped Essex Street and burned the house of Samuel Prince—J. D. Phillips) *Jump may be extended to various sudden or sharp movements whether physical or not *(his heart jumped with fright) *(prices jumped when war was declared) *(the children jumped with joy) *Leap usually implies greater muscular effort than *jump, though it otherwise often agrees with it in implications; it may or may not suggest suddenness, swiftness, a forward or a backward motion, or an upward or a downward motion, but it usually includes one or more of these connotations in its meaning *(the chamois leaps from crag to crag) *(a leap from a window) *(leapt over a wall) In extended use *leap goes further than *jump in suggesting suddenness or intensity (as of change, response, surprise, or exaltation of thoughts) *(my heart would have leaped at sight of him—Kenneth Roberts) *(ashes am I of all that once I seemed. In me all's sunk that leapt, and all that dreamed is wakeful for alarm—Millay) *Spring implies a jumping or leaping, but both as verb and as noun it additionally suggests ideas not involved in *jump and only occasionally involved in *leap, such as resiliency, elasticity, grace of movement, and emergence by issuing or flowing. The emphasis is often upon the action itself rather than upon the fact of movement to or over *(spring from the bed) *(the spring of a cat on a bird) *(I sprang to my feet, for anger had overtaken me—Edith Morris) *(sprang across the stream, inviting those who shared his views to follow him—Amer. Guide Series: Vt. Bound) *(see also skip) comes very close to *spring in its emphasis upon the action itself, but it carries an implication of vigor and strength not apparent in *spring, so that it often connotes a plunging or a lunging forward *(he bounded forward in order to catch the ball) *(with a bound, he was at her side) *(there were great kangaroos that . . . would descend the hillslopes in large, slow, gracious bounds—Ellis) Although *vault is often used specifically in respect to leaping as a physical exercise with the aid of a long pole as a fulcrum, it may also apply to a leap or a leaping upward with the aid of a support or a leap over an object often with a hand laid on the object *(unperturbed by the tumble he vaulted back into the saddle) *(an acrobat . . . was vaulting over chair backs—Deland) *(put his hand on the counter and vaulted over, landing heavily on the other side—J. W. Johnson) *jump n *leap, spring, bound, vault (see under jump vb) *jumpy jittery, nervous, restless, uneasy, fidgety, *impatient, uneasy, restless

*Ant steady

jigation, confluence, concourse are comparable when meaning the act, state, or place of meeting or uniting. *Junction, the most general of these words, applies to the meeting or uniting usually of material things (as roads, rivers, lines, or railroad tracks) *(at the street junctions along the coronation procession route traffic is slowed—Panter-Downes) *(Brattleboro spreads along the Connecticut from its junction with the West river—Amer. Guide Series: Vt. *(electricity produced by the junction of two dissimilar metals—S. F. Mason) or less often of immaterial things *(the junction of the Senecan influence with the native tradition—T. S. Eliot) *(a fairly close
juncture, pass, exigency, emergency, contingency, pinch, analogous words

juncture of interest between Brady and the so-called Standard Oil group—H. P. Willis—and only occasionally of persons or groups of persons—a smaller force of Frenchmen, reinforced by Ethiopian natives, moved westward, seeking junction with [Major] Marchand—Lengyle—there he proposed to effect his junction with the man who should make all the difference to this new civil war—Belloe—Confluence suggests a flowing movement that brings things together. It is applicable to two or more things or persons viewed as things which flow or seem to flow toward a point where they merge and mingle

the confluence of cowboys, cattle traders, and railroad men gave Dodge City a lively homicidal character—Life It specifically applies to the place at which streams unite, often to form a larger stream or body of water (the Ohio river is formed by the confluence of the Monongahela and Allegheny rivers) (this river, which is formed by the confluence of the historic Tigris and Euphrates rivers—Boschen). Concourse places the emphasis on a running or flocking together of great numbers of persons or things (the . . . frame of the universe was not the product of chance, or fortuitous concourse of particles of matter—Hale) It is commonly used of a place, sometimes out of doors but sometimes in such a great building as a railroad terminal, in which there is an endless flow of persons or things passing through (just off the waiting room is the passenger concourse, a 24 x 1200-foot “bon voyage deck” where passengers of the Lurline arrive and depart and their friends greet them or wave them on their way—Ships and the Sea)

juncture, pass, exigency, emergency, contingency, pinch, analogous words
justify

or to a quality in a thing which never departs from the truth in the slightest degree <he painted a psychological portrait of himself which for its serenely impartial justice, its subtle gradations . . . has all the qualities of the finest Velázquez—Ellis> or to the treatment accorded one who has transgressed a law, whether a divine law, a natural law, or the law of a state, or who seeks relief when wronged or protection when his rights are threatened <at the present time . . . there is more danger that criminals will escape justice than that they will be subjected to tyranny—Justice Holmes> or to the system of courts of law whereby the rights of an individual or his innocence or guilt are determined in accordance with the laws of the state <in the modern state . . . . Justice and administration are directly connected with whatever governs—Bello>. Equity differs from justice chiefly in being more restricted in its denotation, for it usually implies a justice that transcends the strict letter of the law and is in keeping with what is reasonable rather than with what is merely legal. It is in this sense that a court of equity is, theoretically at least, distinguished from a court of law. To the former go for adjudication and settlement the unusual cases where abstract justice might not be dealt out according to the limitations of the written law while to the latter go the vast majority of cases where the determination of facts is of first importance and where the law, once the facts are established, provides the treatment to be accorded the person or parties involved <in informal terms, a law case is one where the courts have only to decide who is right; an equity case is one where the courts have to decide not only who is right, but go on to say what must be done—Science> But equity in nonlegal use implies a justice based upon a strictly impartial meting out of what is due (as rewards and punishments or praise and blame) <that noble word liberal, which in America has become dissociated from its essential humanism and sense of equity—Ustinov> <the union claimed that the lower wages paid to aliens were not in keeping with any principle of equity> justify

1 vindicate, defend, *maintain, assert

Ana *prove, demonstrate: *support, uphold, back

Con *disprove, refute, confute

2 account, rationalize, *explain

Ana lament, bewail, bewoan (see deplore): mourn, sorrow, *grieve

keep vb 1 Keep, observe, celebrate, solemnize, commemorate are comparable when they mean to pay proper attention or honor to something prescribed, obligatory, or demanded (as by one's nationality, religion, or rank), but they vary widely in their range of reference or applica-

tion. Keep and observe are closely synonymous terms, especially when they imply heed of what is prescribed or obligatory, but they differ fundamentally in their connotation. Keep implies opposition to break, and emphasizes the idea of not neglecting or violating; thus, one keeps, rather than observes, a promise <keep the peace> <keep the commandments> Observe carries such positive implications as punctiliousness in performance of required acts and rites and a spirit of respect or reverence for what one holds or honors; when these more appropriate ideas are definitely to be suggested observe is the more appropriate term, even though keep would otherwise be possible; thus, few persons observe, rather than keep, the Sabbath in the manner of the early Puritans (observed Passover with the utmost strictness) <he observes the letter of the law> Celebrate and solemnize are also close synonyms because they may take as their objects not only a day, a season, or an occasion which for religious, political, or

A colon (:) separates groups of words discriminated. An asterisk (*) indicates place of treatment of each group.
other significant reasons is observed with pomp and ceremony but also a ceremony or rite, usually a religious ceremony or rite, that is marked with unusual dignity and splendor. Celebrate, however, except in certain idiomatic phrases (as celebrate the Eucharist, celebrate a marriage, celebrate Mass) in which the gravity and forms of religion are implicit, suggests demonstrations of joy or festivity (as by singing, shouting, speechmaking, and feasting) (celebrate Independence Day) (celebrated their golden wedding) (the family decided to celebrate the occasion by a large dinner party) Solemnize as applied to occasions of joy and festivity stresses their grave, ceremonious, or solemn aspects and usually suggests greater formality in observance and greater dignity and splendor of ceremony than does celebrate (Harvard each June solemnizer the award of degrees to students . . . of the University—Official Register of Harvard Univ.) (solemnize this sorrowing natal day to prove our loyal truth—Burns) The term is often specifically used of the celebrating of marriage especially with the fullest applicable religious ceremonial; thus, in the Roman Catholic Church a marriage is solemnized only when administration of the sacrament of matrimony is followed by a nuptial Mass and a special blessing (Catholics may marry but their marriages may not be solemnized during Lent) Commemorate implies remembrance and suggests observances that tend to call to mind what the occasion (as the day, the season, or the ceremony) stands for; thus, one celebrates Christmas by religious ceremonies that commemorate the birth of Christ; the people of the United States commemorate the birth of their independence on the 4th of July; the French people commemorate the fall of the Bastille on the 14th of July.

Ana regard, respect (see under REGARD n) Ant break —Con *neglect, ignore, forget, disregard, overlook, omit, slight: violate, transgress, contravene, infringe (see corresponding nouns at BREACH) 2 Keep, keep back, keep out, retain, detain, withhold, reserve, hold, hold back are comparable in meaning not to let go from one's possession, custody, or control. Keep is the most general of these terms, often carrying no further implications (keep this until I ask for it) When, however, it positively denotes a holding securely in one's possession, custody, or control, keep, or more often keep back, is synonymous with one or another of the remaining terms. Keep out specifically implies a keeping back of a portion of something (keep out a part of his salary for emergency expenses) Retain implies continued keeping, especially as against threatened seizure or forced loss (Germany was unable to retain her colonies after the first World War) (the conception of one who . . . poor, sickly, and a slave perhaps, or even in prison or on the rack, should nevertheless retain unimpaired the dignity of manhood—Dickinson) Detain (see also ARREST 2) implies a keeping (as in a place, in conversation, or in one's possession) through a delay in letting go that may be based on selfishness or caprice or on entirely acceptable grounds (keep a ship in quarantine) (much consideration has been given to the practice of detaining children away from home for the sole purpose of diagnostic study—Service to Youth) (the cat) let the rat run about his legs, but made no effort to detain him there—Graham) Withhold implies restraint in letting go or a refusal to let go. Sometimes it is interchangeable with keep, or keep back, especially when hindrance is also implied (timidity caused him to withhold the advice he longed to give) Sometimes, keep and withhold are widely different in meaning; thus, to withhold one's promise is to refuse to give one's promise; to keep (see KEEP 1) one's promise is to fulfill what has been promised. Reserve implies either a keeping in store for other or for future use (the runner reserved some of his energy for the final sprint) (reserve some of the milk for breakfast) or a withholding from present or from others' use or enjoyment (the force of will which had enabled her to reserve the fund intact—Bennett) (reserved his judgment) Hold and hold back are often used in place of withhold or keep back and sometimes in place of detain and reserve when restraint in letting go, whether self-imposed or imposed by others, is implied (hold back a portion of each week's wages for group insurance) (held back the truth in giving his testimony) Ana *save, preserve, conserve: hold, *have, enjoy, possess, own: control, direct, manage, *conduct Ant relinquish —Con *discard, cast, junk: refuse, reject, repudiate, spurn (see DECLINE vb): surrender, abandon, resign, yield (see RELINQUISH) keep n *living, livelihood, subsistence, sustenance, maintenance, support, bread keep back, keep out *keep, retain, detain, withhold, reserve, hold, hold back keepsake *remembrance, remembrancer, reminder, memorial, memento, token, souvenir ken n *range, gamut, reach, radius, compass, sweep, scope, orbit, horizon, purview Ana *field, sphere, province, domain: view, sight (see look n) kibitzer onlooker, looker-on, bystander, *spectator, observer, beholder, witness, eyewitness kick vb *object, protest, remonstrate, expostulate Ana oppose, combat, *resist, withstand, fight: *criticize, denounce, condemn: objurgate, *execute, curse, damn, anathematize kid vb chaff, *banter, rag, rib, josh, jolly Ana tease, plague, pester, harry, *worry kidnap *abduct kidney kind, sort, *type, nature, description, character, stripe, ilk kill vb Kill, slay, murder, assassinate, dispatch, execute are comparable when meaning to deprive of life or to put to death. Kill is so general that it merely states the fact and does not, except in special phrases (as "Thou shalt not kill"), suggest human agency or the means of death or the conditions attending the putting to death. Also, the object of the action may be not only a person or other living thing but also an inanimate or immaterial thing with qualities suggestive of life (kill snails in the garden) (a boy killed by a fall) (vegetation killed by frost) (the president killed the project when he vetoed the bill making an appropriation for it) (kill a friend's love by indifference) (he believed at that time that the League of Nations was going to kill war, that the Labour Party were going to kill industrial inequity—Rose Macaulay) Slay implies killing by force or in wantonness; it is rare in spoken English, but it often occurs in written English where it may convey a dramatic quality whether in poetic or elevated writing or in journalaes (though he slay me, yet will I trust in him—Job 13:15) (the slain man has not yet been identified) In its extended uses slay usually suggests wanton or deliberate destruction or annihilation (to slay the reverence living in the minds of men—Shelley) (never had she greatly loved before; never would she greatly love again; and the great love she now had she was slaying—Rose Macaulay) Murder definitely implies a motive and, often, premeditation and imputes to the act a criminal character; it is the exact word to use in reference to one person killing another either in passion or in cold blood (Macbeth murdered Duncan) (Thomas à
Becket, archbishop of Canterbury, was murdered in his own cathedral. It is sometimes used in place of kill as more expressive or in place of slay as more brutally direct and condemnatory, both in literal and extended use

kind

340 kind, adj n
A colon (:) separates groups of words discriminated. An asterisk (*) indicates place of treatment of each group.

amicable, good-natured, complaisant, obliging
Ant unkfind —Con cruel, inhuman, *fierce, savage, fell: harsh, *rough: *grim, implacable, unrelenting, merciless
kindle ignite, fire, *light
Ant *blaze, flame, flare, glow: provoke, excite, stimulate: arouse, rouse, *stir: incite, foment, instigate
Ant smother, stifle
kindly benign, benignant, *kind
Ant *gracious, cordial, genial, affable, sociable: *amicable, good-natured, complaisant, obliging: friendly, neighborly (see AMICABLE): considerate, *thoughtful, attentive
Ant unkindly: acrid (of temper, attitudes, comments)—
Con malevolent, malignant, *malicious, spiteful
kindred *related, cognate, allied, affiliated
Ant alien
kingly, regal, royal, queenly, imperial, princely are comparable when meaning of, relating to, or befitting one who occupies a throne. Kingly, regal, and royal are often interchanged, especially when used in reference to a monarch who is called king; thus, kingly, regal, or royal power are equally appropriate and idiomatic. However, usage shows a degree of preference for kingly when the reference is to the personal or ideal character of a king or to his feelings, disposition, aims, or actions (kingly courtesy) (kingly condescension) (leave kingly backs to cope with kingly cares—Cowper) or for regal when the reference is to the king's office or the state or pomp which accompanies the exercise of his powers (regal ceremonies) (regal splendor) (ascend your throne majestically ... sit regal and erect—Auden) and for royal when the reference is to persons or things associated with the king either as a person or as a monarch, but not necessarily involving magnificence or display (the royal family) (the royal residences) (a royal society is one under the patronage of a king or members of his family)

In extended use kingly carries the strongest implication of dignity and nobility (kingly pride) I am far better born than is the king, more like a king, more kingly in my thoughts—Shak) while regal suggests magnificence or majestic character (a regal feast) (her rather regal conception of the behavior to be expected of a whore-house madam may have a comic value—Gibbs) "Just tell me what you would like to eat; you can have anything you want." ... It had a regal ring—Henry Miller) and royal, fitness or suitability for a king especially in superlative excellence (a royal welcome) (had a royal time) (was treated with the royal acclaim of a visiting statesman—White) Queenly is used in place of kingly when the reference is directly to a person who is a female sovereign in her own right or is the consort of a king (queenly courtesy) (queenly prerogatives) But when the reference is to the office, the family of the queen, or anything to which regal and royal are normally applied, the latter adjectives are used without reference to the sex of the sovereign. Imperial suggests reference to a monarch who is called emperor or empress (His Imperial Majesty) (an imperial court) (the imperial power) In extended use imperial implies fitness or suitability for an emperor or empress and typically suggests a more awe-inspiring quality than kingly and more pomp and grandeur than regal or royal (I have seen New York grow from the little old town of the nineteenth to the imperial city that stands there now—White) (she was imperial rather than rude—Wylie) Princely implies reference to one who is called a prince and especially to one who is so called as the monarch of a principality, as the heir to a royal throne, or as a male member of the immediate royal family (the representative of the princely power—Sarah Austin) (among the princely houses of Western Europe—Free-
**knack** 481  **knowledge**

**knack** bent, turn, *gift, faculty, aptitude, genius, talent**

**Ana** *ability, capacity, capability: aptness, readiness, quickness* (see corresponding adjectives at **QUICK**): facility, dexterity, ease, *readiness

**Ant** ineptitude

**knave** *villain, scoundrel, blackguard, rascal, rogue, scamp, rascal, villain, rogue, scoundrel, blackguard, rascal, rogue, scamp, rascal, villain, rogue, scoundrel, blackguard, rascal, rogue, scamp*

**knit** vb *weave, crochet, braid, plait, tat

**knock** vb *tap, rap, thump, thud

**knock** n tap, rap, thump, thud (see under **TAP** vb)

**knotty** intricate, involved, complicated, *complex

**knowing** alert, bright, smart, *intelligent, clever, quick-witted, brilliant

**Ana** *shrewd, astute, perspicacious, sagacious: *watchful, vigilant, alert: discerning, observing or observant, perceiving or perceptive (see corresponding verbs at **SEE**)

**Con** obtuse, *dull, blunt: dense, crass, *stupid, slow

**knowledge, science, learning, erudition, scholarship, information, lore** are comparable when they mean what is known or can be known, usually by an individual but sometimes by human beings in general. **Knowledge** applies not only to a body of facts gathered by study, investigation, observation, or experience but also to a body of ideas acquired by inference from such facts or accepted on good grounds as truths *(his knowledge is both extensive and accurate)* *(the advantage of gaining a knowledge of French literature)* *(strength and burstle build up a firm. But judgment and knowledge are what keep it established—Hardy)* *(the inventor of the radio... had the advantage of accumulated knowledge—Krutch)* **Science** *(see also **ART** 3) is occasionally employed as a close synonym of knowledge but ordinarily it applies only to a body of systematized knowledge dealing with facts gathered over a long period and by numerous persons as a result of observation and experiment and with the general truths or laws derived by inference from such facts. The term usually connotes more exactness and more rigorous testing of conclusions than knowledge does and therefore is often used to denote knowledge whose certainty cannot be questioned *(the art of feeding preceded the science of nutrition by many centuries—Hadley)* *(the defense of nations have become a science and a calling—Macaulay)* *(perhaps all the science that is not at bottom physical science is only pretentious nescience—Shaw)* **Learning** specifically applies to knowledge gained by long and close study not only in the schools or universities but by individual research and investigation; it may be used of those who are engaged in the study of science, but it is more often employed in reference to those who devote themselves to the study of the humanities (as languages, literature, history, and philosophy) *(he is a man... of deep learning—Burney)* *(a man of good education and learning, of an excellent understanding, and an exact taste—Swift)* *(learning commonly connotes organized lore outside of any scientific area. It is an end in itself, it has been so honored by the world for centuries—H. M. Jones)* **Erudition** carries a stronger implication of the possession of profound, recondite, or bookish knowledge than does **learning** *(all the encyclopedic erudition of the middle ages—Lowes)* but often the terms are employed as if they were equivalent in meaning *(I arrived at Oxford with a stock of erudition, that might have puzzled a doctor—Gibbon)* *(it does not seem to me fitting... that one layman, with no special erudition in that subject, should publicly express his views—T. S. Eliot)* **Scholarship** implies the possession of the learning characteristic of the trained scholar; the term usually suggests mastery in detail of a field of study or investigation, the exhibition of such qualities as accuracy and skill in carrying on research intended to extend knowledge in that field, and the display of powers of critical analysis in the interpretation of the material that is gathered *(never fulfilled the promise of scholarship given by his great and precocious intellectual power and his even greater erudition—Economist)* *(what scholarship represents is a change in the temper of the human mind, in the focus of its attention and in the quality of the things it cherishes—Frankel)* **Information** usually denotes a kind or items of knowledge gathered from various sources (as observation, other persons, or books) and accepted as truth; the term carries no specific implication regarding the extent, character, or soundness of that knowledge; often it suggests no more than a collection of data or facts either discrete or integrated into a body of knowledge *(seeking information about her ancestors)* *(his sources of information are not always reliable)* *(the adult, with trained powers, has an immense advantage over the child in the acquisition of information—Eliot)* *(a full, rich, human book, packed with information lightly dispensed and fortified with learning easily worn—Tracy)* **Lore** is occasionally used in place of **learning**, but ordinarily it applies to a body of special or out-of-the-way knowledge concerning a particular subject possessed by an individual or by a group and is primarily traditional and anecdotal rather than scientific in character *(sacred lore)* *(folk, or popular, etymology does not usually create words, but it provides lore about words which is as pleasant as it is unreliable—Laird)* *(a lore composed of beliefs, customs, crafts, anecdotes... bearing in its content and terminology the unmistakable stamp of the backwoods—Amer. Guide Series: Ind.)*

| vb | label | *mark, brand, stamp, tag, ticket |
| n | labor | *work, toil, drudgery, grind |

**A colon (:) separates groups of words discriminated. An asterisk (*) indicates place of treatment of each group.**

**Con**

- have, hold, possess, own, enjoy
- heighten the implication of urgent necessity <great acts require (see also Breck)}

**Ana**

- heavy, ponderous, weighty: awkward, clumsy, maladroit, inept: stiff, wooden, rigid
- workingman, workman, worker, craftsman, handicraftsman, mechanic, artisan, operative, hand, roustabout

**Lack**

- Lack, want, need, require are comparable when meaning to be without something, especially something essential or greatly to be desired. Lack may imply either an absence or a shortage in the supply or amount of that something <the house lacks a back staircase> (the army lacked tanks and airplanes as well as rifles) <they are not lacking in food or comforts> <good counselors lack no clients—Shak.*> <what he lacks in knowledge he can make up for by talking fast—Chase> Want frequently adds to lack the implication of urgent necessity and may be difficult to distinguish from its sense connoting longing (see under desire vb) <the oldest... showing incipient moustaches and long hairs on the face that wanted a razor—Sacheverell Sitwell> <everything was dingy and wanted paint—Crofts>* For this reason need may be preferred when a clear connotation of urgent necessity is desirable <he cannot get the rest he needs> Need usually throws the emphasis on urgent necessity rather than on absence or shortage, though both implications are often present <that family needs food and clothing> (the country needs the services and support of every citizen) (the letter needs no reply, but it would be courteous to acknowledge it) <that woman needs a lesson, Gideon. She’s a public nuisance—Rose Macaulay> (needs vicarious compensations and manages to find them in the gossip columns—Huxley) <implements sorely needed by the British in the construction of vessels—Breck>* Require (see also demand) is often interchangeable with need but it may heighten the implication of urgent necessity <great acts require great means of enterprise—Millon> (the Doctor... required a few days of complete rest—Dickens)*

**Con**

- have, hold, possess, own, enjoy

**Lack**

- Lack, want, dearth, absence, defect, privation are comparable when denoting the fact or state of being without something. Lack is somewhat ambiguous in scope since it may imply either a total or a partial failure of something that in the circumstances might be expected to be present and often requires qualification to make its intent unequivocal <with a complete lack of bloodshed, the republic was proclaimed—William Tate>* (the comparative lack of simian fossils—R. W. Murray) <there is a slackening, a lack of faith in the pioneer dream that everyone may be rich, free, and powerful—Lord> Want (see also poverty) may imply either a partial or a complete lack but its range of application is far narrower than that of lack since it specifically applies to deficiencies of what is essential or at least needed or desirable; thus, one may exhibit either a want or a lack of tact; there may be a complete lack, rather than want, of pain immediately after some injuries <showed a certain want of courtesy> <war production occasionally suffered from want of hands to tend the machines or harvest the crops—Handlin>* (an utter and radical want of the adapting or constructive power which the drama so imperatively demands—Poe)*

**Dearth** implies an often distressingly inadequate supply rather than a complete lack <her vanity, dearth of brains, and excessive sentimentality were compensated by her kindness—Simmons> <there were six seasons of dearth approaching famine—Van Valkenburg & Huntington>* (there is no dearth of simple violence in San Antonio—Green Peyton)* Absence is perhaps the most unequivocal of these terms; when not qualified it denotes the complete lack of something <the prolonged absence of rain> or that something or occasionally someone is not present <in the absence of his father the boy managed the farm> (the general absence of undergrowth was understood... to have resulted from repeated Indian-set fires—R. H. Brown)* (the confusion resulting from the absence of a critical discriminating attitude in the discussion of religion—Coen>* Defect (see also blemish) implies the absence or lack of something required for completeness (as in form) or effectiveness (as in function) <be mine the privilege to supplement defect, give dumbness voice—Browning>* (defect in a work [of art] is always traceable ultimately to an excess on one side or the other, injuring the integration of matter and form—Dewey>* <there are certain obvious and superficial defects in this poem... But merit easily outweighs defect—Day Lewis)*

**Privation** in the sense pertinent here (see also poverty) is used primarily in certain philosophical definitions of negative qualities or states as absences of the corresponding positives <cold is the privation of heat> (St. Thomas regards evil as privation. In so far as a thing acts according to its nature, which is good, it cannot cause evil—Thilly)> <dialectical terms... are terms standing for concepts, which are defined by their negatives or their privations—R. M. Weaver>* (negative facts or states of affairs... seem clearly to be absences, lacks, or privations, and as such devoid of any properties which could possibly render them apprehensible in experience—Richard Taylor)*

**Ana**

- need, necessity, exigency: deficiency (see corresponding adjective deficient): exhaustion, impoverishment, draining, depletion (see corresponding verbs at deplete)

- Con abundance, amleness, copiousness, plentifulness, plenteousness or plenty (see corresponding adjectives at plenteous): excess, superfluity, surplus

**lackadaisical** listless, spiritless, enervated, *languid, languishing, languorous

**Ana**

- indifferent, unconcerned, incurious: indolent, slothful, faineant, lazy: inert, inactive, passive, supine, idle: *sentimental, romantic: enervated, emasculated (see unnerve)

**Con** energetic, strenuous, *vigorously, lusty: dynamic, live, *active

**lacunastic** succinct, terse, *concise, summary, pithy, copious

**Ana**

- curt, brusque (see bluff): brief, short

**Ant**

- wordy, prolix, diffuse: loquacious, *talkative, voluble, glib, garrulous

**lacuna** gap, hiatus, *break, interruption, interval, interim

**lacustrine** aquatic, fluvial, fluviali, marine, oceanic, thalassic, neritic, pelagic, abyssal
lade vb load, *burden, encumber, cumber, weigh, weight, tax, charge, saddle
Ant unladen
lading freight, cargo, *load, burden
ladle vb scoop, spoon, dish, *dip, bail
lady woman, *female
ladylike feminine, womanly, womanlike, *female, womanish, effeminate
Ana dainty, fastidious, finicky, particular, *nice: fashionable, modish, smart, chic, *stylish: decorous, proper, seemly
lag loiter, dawdle, *delay, procrastinate
Ana slow, slacken, retard, *delay: tarry, linger, wait, *stay
Con hurry, hasten, *speed, quicken, accelerate
laggard adj dilatory, *slow, leisurely, deliberate
Ana dwindling, loitering, delaying, procrastinating (see DELAY): lethargic, sluggish, comatose: phlegmatic, apathetic, *impassive
Ant prompt, quick —Con alert, wide-awake, vigilant, *watchful: fast, swift, rapid, fleet, speedy, expeditious
lambent beaming, luminous, *bright, brilliant, radiant, lus-lag
vb lampoon
n loiter, dawdle, *delay, procrastinate
Ana slow, slacken, retard, *delay: tarry, linger, wait, *stay
Con hurry, hasten, *speed, quicken, accelerate
lament vb *grieve, bewail, bemoan
Ana dawdling, loitering, delaying, procrastinating (see DELAY): loathsome, sluggish, comatose: phlegmatic, apathetic, *impassive
Ant prompt, quick —Con alert, wide-awake, vigilant, *watchful: fast, swift, rapid, fleet, speedy, expeditious
lampant beaming, luminous, *bright, brilliant, radiant, lustrous, effulgent, refulgent, lucent, incandescent
Ana gleaming, glistening (see FLASH vb)
lament vb *deplor, bewail, bemoan
Ana weep, keen, wail, *cry: *grieve, mourn, sorrow
Ant exult: rejoice
lampoon n *libel, skit, squib, pasquinade
land vb *alight, light, perch, roost
Ana arrive, *come: *reach, gain, achieve, attain: *appear, emerge
Con *go, leave, retire
landing field, landing strip *airport, airdrome, airfield, airstrip, flying field

language 1 Language, dialect, tongue, speech, idiom are comparable when they denote a body or system of words and phrases used by a large community (as of a region) or by a people, a nation, or a group of nations. Language may be used as a general term for a body of communicative symbols whether it is made up of words, or of sounds, gestures, and facial expressions, or of visual signals (as a code of lights, smoke, or flags), or of electrical impulses in a computer. However, in its ordinary and specific sense the term refers to a body of words that by long use by the population of a widespread territory has become the means whereby the ideas or feelings of the individual members of that population are communicated or expressed. The term suggests some degree of stability in behavior (as in vocabulary, pronunciation, and grammaticality); it usually connotes the existence of a standard determined by the usage of educated writers and speakers. English and French are languages, that is to say they are systems of habits of speech, exactly like Eskimo or Hottentot or any other language—R. A. Hall
>dead languages such as classical Latin and ancient Greek
But language is also applied to a body of words and phrases that is peculiar to an art, a science, a profession, or a class and that, however well understood by others of the community, is not generally adopted by them. In economic language the “marginal saver” determines the price—Hobson
>it took the three of us, representing economics, sociology, and political science, about six weeks to learn each other’s language—Kerwin
Dialect (see also DIALECT 1) may denote a form of language which is clearly distinguishable from other forms by marked differences and an identity of its own. More often it refers to a variant of a recognized language, restricted to a limited area and not entirely unintelligible to speakers of the language of which it is a phase. <Venetian and Sicilian are equally dialects of Italian, although as far as mutual intelligibility is concerned these two might as well be called independent languages—Sapir
>(the perennial controversy as to whether Scots is a language or a dialect) Tongue and speech both call attention to the spoken rather than written communication. Tongue differs from language chiefly in its being applicable to a dialect, a patois, an argot (for these terms, see DIALECT 1) as well as to the standard form of a language (there is no poet in any tongue—not even in Latin or Greek—who stands so firmly as a model for all poets—T. S. Eliot)
>translated the Bible into an Indian tongue—Eliot

2 Language, vocabulary, phraseology, phrasing, diction, style are comparable rather than synonymous terms when they mean oral or written expression or a quality of such expression that is dependent on the variety, or arrangement, or expressiveness of words. Language applies primarily to verbal expression with reference to the words employed. It may call attention to excellence or ineptness in the use of words, to their dignity or their vulgarity, to their fitness or lack of fitness, to their sonority or their stridency, or to any of the qualities which speech or writing may derive from the choice and arrangement of words (he avoided harsh language in dealing with his children)
>language, grave and majestic, but of vague and uncertain import—Macaulay
>when I read Shakespeare I am struck with wonder that such trivial people should muse and thunder in such lovely language—D. H. Lawrence
Vocabulary calls attention chiefly to the extent or variety of the writer’s or speaker’s stock of words or to the sources from which such a stock is derived (the constant play and contrast in English poetry between the Latin and the Anglo-Saxon vocabularies—Bottrall)
>German, famous for its polysyllabic vocabulary—G. A. Miller
>even the vocabulary of renunciation, and its conventional gestures, were unfamiliar to him—Wharton
Phraseology or phrasing is sometimes used in place of vocabulary when the reader’s attention is called especially to its idiomatic or peculiar character (eccentricities of phraseology—awkward phrasing—The exquisite phrasing in which we feel that every word is in its place—Edmund Wilson)
But phraseology in particular stresses the grouping of words as much as their choice (he can say in the phraseology of the sentimentalist that he “loves nature”) (The phraseology, rather than the vocabulary, of Donne offers difficulty to the inexperienced reader) (the gaundiness and inane phraseology of many modern writers—Wordsworth)
>the gaudiness and inane phraseology of many modern writers—Wordsworth
<this cryptic and involved
phraseology, obscure to the uninitiated, permeates all communist publications—Report of Special Committee on Communist Tactics>  
Diction calls attention to the choice and arrangement of words with reference to their expression of ideas or emotions. The term is used commonly of considered language (as of poetry, literary prose, or oratory) and it usually, therefore, implies selection or arrangement with reference to such ends as impressiveness, elegance, and beauty of sound <he was in a high fever while he was writing, and the blood-and-thunder magazine diction he adopted did not calm him—Kipling>  
<his choice of forceful picturesque diction in speech and writing—Lawrason Brown> <a poet cannot help being of his age, the diction and the idiom see to that—Gogarty>  
Style denotes a mode or manner of expressing one's thoughts or emotions or imaginative conceptions in words, as distinct from or as distinguishable from the thoughts or emotions or conceptions expressed. It is sometimes thought of as a structure and diction peculiar to an age or a literary type and found in each representative work of that time and type <the Renaissance epic style is based upon that of Vergil> <a poem written in the style of the ode but perhaps more often it is thought of as a manner of expression which in structure and diction involves artistry but is individual and characteristic of its author>  
<his then is Style. As technically manifested in literature it is the power to touch with ease, grace, precision, any note in the gamut of human thought or emotion—Quiller-Couch>  
languid, languishing, languorous, lackadaisical, listless, spiritless, enervated are comparable when they mean lacking in vim or energy or, when applied to things, the appearance of it. Languid usually implies an unwillingness or an inability to exert oneself owing to fatigue, exhaustion, or physical weakness <struck by something languid and inelastic in her attitude, and wondered if the deadly monotony of their lives had laid its weight on her also—Basso>  
Languishing may suggest delicate insufficiency <no courage can repel the dire assault; distracted, spiritless, benumbed, and blind, whole legions sink—Wordsworth>  
Enervated implies a destruction of qualities or powers essential to the vigorous exercise of the will and the intellect. Often it suggests the influence of luxury or of sloth but it may imply the operation of other causes, even of those that in themselves are not evil but may have deleterious effects <the enervated and sickly habits of the literary class—Emerson> (society in Rome, enervated as it was by vicious pleasures, creaved continually for new excitements—Froude> <that enervated, run-down condition that is commonly known as Southern gentility—Basso>  
Ana *lath coppia, sluggish, comatose, torpid: phlegmatic, apathetic, *impassive: inert, *inactive, supine  
Ant vivacious: chipper  
languishing *languid, languorous, lackadaisical, listless, spiritless, enervated  
Ant weakened, enfeebled, debilitated (see WEAKEN): indolent, faineant (see LAZY): inert, *inactive, supine: *sentimental, romantic: pining, longing, yearning (see Long vb)  
Ant thriving, flourishing: unaffected —Con robust, *healthy, sound, hale: *vigorouos, energetic, lusty: *natural, artless, unsophisticated, naïve  
languor *lath coppia, lassitude, stupor, torpor, torpidity  
Ant exhaustion, fatigue, weariness (see corresponding verbs at TIRE): ennui, doldrums, *tiredness: depression, blues, dumps (see SADNESS)  
Ant alacrity —Con celerity, legerity: quickness, promptness, readiness (see corresponding adjectives at QUICK): zest, gusto (see TASTE)  
languorous languishing, *languid, lackadaisical, listless, spiritless, enervated  
Ant vigorous: strenuous (<of times, seasons>)  
lank, lanky gaunt, rawboned, *lean, spare, angular, scrappy, skinny  
Ant thin, slim, slender, slight: attenuated, extenuated (see Thin vb)  
lapse  
Ant burly —Con husky, brawny, *muscular, sinewy: plump, portly, rotund, chubby, *fleshy, stout  
Lapse n 1 slip, *error, mistake, blunder, faux pas, bull, howler, boner  
Ant offense, sin, vice, crime: *fault, failing, frailty, foible: transgression, *breach, violation, trespass  
2 relapse, backsliding (see under Lapse vb)  
Ant deterioration, decline, declension, decadence, degeneration, devolution: retrograding or retrogradation, receding or recession (see corresponding verbs at RECEDE): retrogressiveness or retrogression, regressiveness or regression (see corresponding adjectives at BACKWARD)  
Con advance, progress (see under ADVANCE vb): *development, evolution  

A colon (:) separates groups of words discriminated. An asterisk (*) indicates place of treatment of each group.
lapse  vb  Lapse, relapse, backslide and their corresponding nouns, lapse, relapse, backsliding, are comparable when they mean to fall back into a state or condition from which one has raised oneself or has been raised, or the act or state of one who has so fallen back. As distinguished from decline, degenerate, and deteriorate, these verbs do not necessarily imply the reversion of a process or development or the gradual losing and the inevitable loss of a valuable quality (as strength, power, or influence) but they do distinctly imply a failure to continue without break a course of improvement and a return, often quickly effected but not always irreparable, to an earlier bad or lower state or condition. Both lapse and relapse basically imply a sliding or slipping but they are increasingly divergent in their applications and connotations. Lapse usually presupposes reformation in manners, morals, or habits, or the acceptance of a high standard (as of rectitude, accuracy, or accomplishment). It need not imply culpability or weakness, for it often suggests no more than a sudden failure of the memory or the influence of habit or tradition or the pressure of an overwhelming emotion (it is easy for the person who has acquired good manners by effort to lapse into old ways when he is not on guard) (only when she was strongly moved did she lapse into the dialect she spoke in her youth) (the moment his attention is relaxed . . . he will lapse into bad Shakespearean verse—T. S. Eliot) <whatever rhetorical or technical lapses they may contain, the conception is throughout that of a great musician—Edward Sackville-West> When culpability is strongly implied, the word still, in comparison to the other terms in the group, often connotes extenuating circumstances; it is therefore the fitting choice when the context indicates such circumstances (he constantly fought his tendency to lapse into easygoing ways) (the natives lapsed back into accustomed vices—Billington) (in estimating a man's place in the scale of perfection . . . the moral judgment, not withholding condemnation of a particular lapse, may not condemn the man wholly for it—Alexander) Relapse presupposes definite improvement or an advance (as toward health or toward a higher physical, moral, or intellectual state) and it implies a complete and often dangerous reversal of direction; thus, one whose improvement in a serious illness has been marked may be said to relapse, or suffer a relapse, when his condition becomes definitely worse; a reformed thief is said to relapse when he returns to his old life (the Arabs were once the continuators of the Greek tradition; they produced men of science. They have relapsed . . . into pre-scientific fatalism, with its attendant incuriosity and apathy—Huxley) (man's eternal tendency to relapse into apathy and atavism—Stewart) (his firmness of mind soon relapsed into a cankerous intolerance—Cranston) (the corruptions and vices which accompany the horribly swift relapse of a culture into barbarism—Edmund Fuller) Backslide and backsliding also imply a reversal in direction of one who has been going forward, but unlike relapse, which is in many ways their close synonym, they are restricted in their reference largely to moral and religious lapses. They therefore often suggest unfaithfulness to one's duty or allegiance or to principles once professed (did not I . . . backslide into intemperance and folly—Marryat) (this is not to say that backslidings fail to occur; on the contrary backslidings normally follow any strenuous moral experience—G. W. Allport) Ana revert, *return: slip, *slide: deteriorate, degenerate, decline (see corresponding nouns at DETERIORATION): *descend: *recede, retrograde Con progress, *advance: develop, *mature larcener, larcenist thief, robber, burglar (see under THEFT) large, big, great mean above the average of its kind in magnitude, especially physical magnitude. Large may be preferred when the dimensions, or extent, or capacity, or quantity, or amount is being considered (a large lot) (a large hall) (a large basket) (a large meal) (a large allowance) (large cresses and huge tunnels in many of them [icebergs] bore witness to a long voyage—Schuyler) Big, on the other hand, is especially appropriate when the emphasis is on bulk, or mass, or weight, or volume (a big book) (a big pile) (the box is too big to carry) (a big voice) (big already—so enormous in fact—that we named him Monstro, and he paddled about like a furry whale—Atlantic) As applied to material objects, great has been practically displaced by large or big. Where great is used to denote physical magnitude, it now regularly connotes some impression (as of wonder, surprise, amusement, or annoyance) associated with the size (the great head that seemed so weighted down with thought and study—The Nation) (the great size of these figures—the largest man is 167 feet long . . . prevented their character from being recognized—Amer. Guide Series: Calif.) (his eyes were great and hollow, as a famished man forlorn—Morris) Great alone, in standard English, expresses degree (he was listened to with respect and, when aroused, with nearly as great fear—W. C. Ford) (great kindness) (great heat) In extended use, great suggests eminence, distinction, or supremacy (if we win men's hearts throughout the world, it will not be because we are a big country but because we are a great country. Bigness is imposing. But greatness is enduring—A. E. Stevenson) while large suggests breadth, comprehensiveness, or generosity (in intellect and humanity he is the largest type I have come across. Other greater men in my time were great in some one thing, not large in their very texture—Ricketts) and big carries over the implication of mass or bulk but often suggests impressiveness or importance rather than solidity or great worth (so-called big names, which are still big and still have great readership value, command high prices—Baldwin) (he didn't expect to work here all his life . . . pretty soon he'd have a new job and would be a big man—Grirte) Ana vast, immense, enormous, *huge, mammoth, colossal, gigantic: tremendous, prodigious, monumental, stupendous, *monstrous: inordinate, *excessive, exorbitant, extreme, immoderate, extravagant Ant small—Con little, diminutive, tiny, wee, minute (see small): slight, slender, slim, *thin largely, greatly, mostly, chiefly, mainly, principally, generally are often interchanged, but they are capable of being used with explicitness even though they basically agree in meaning. Largely stresses quantity or extent; it usually connotes copiousness or abundance and often suggests an amount exceeding that of other ingredients, components, or constituents (water enters largely into the composition of the bodies both of plants and animals—Geikie) (good country sausage is largely pork) Greatly carries a heightened suggestion of greatness in degree that differentiates it from largely (he is greatly admired) (careless and lazy is he, greatly inferior to me—Kipling) (the sprouting of seed is greatly helped by sun and rain) Mostly usually stresses numbers (the audience was made up mostly of children) (twenty-seven millions mostly fools—Carlyle) Chiefly emphasizes the importance of one thing among other things; it may connote an outstanding or preeminent position or it may connote merely relative importance (the basket contained many fruits, but chiefly apples) (the battle was won chiefly by the aid of
the air force> Mainly is often used interchangeably with chiefly, but not where preeminence is implied; rather it connotes greatest importance among a number of things, but not exclusive value <be sure to take along with you all that you will need, but mainly informal clothes> <the cause depends mainly on the validity of this act—John Marshall> <the Pickwickian Christmas did very little to stimulate consumption; it was mainly a gratuitous festivity —Huxley> Principally carries an idea of primary importance rather than outstanding or relative importance; the difference is not great between it and chiefly or mainly except when the idea of being first or primary is emphasized <they wholly mistake the nature of criticism, who think its business is principally to find fault—Dryden> <his support comes principally from the income of invested money> <the cash crops are principally wheat and rye> Generally stresses reference to the majority of persons, instances, or cases involved <the people, not universally, but generally, were animated by a true spirit of sacrifice —Froude> <the news was generally received with joy> <the land breezes here are generally hot and dry>

largess boon, *gift, present, gratuity, favor
Ana benefaction, *donation, contribution: grant, subvention (see APPROPRIATION)
lascivious lewd, *licentious, libertine, lustful, libidinous, lecherous, wanton
Ana *immoral, unmoral, amoral: sensual, *carnal, fleshly, animal: obscene, gross, *coarse
Con *chaste, pure, modest, decent: virtuous, *moral
lassitude languor, *l殆gy, strop, torpor, torpidity
Ana exhaustion, weariness, fatigue (see corresponding verbs at TIRE): ennu, doldrums, *tedium: blues, depression (see SADNESS): impotence, powerlessness (see corresponding adjectives at POWERLESS)
Ant vigor —Con energy, strength, might, force, *power
last vb endure, *continue, abide, persist
Ana survive, outlast, *outlive: remain, *stay
Ant fleet

last adj Last, latest, final, terminal, concluding, eventual, ultimate are comparable when they mean following all the others in time or order or in importance. What is last comes at the end of a series, especially of things of the same kind or class; the term usually implies that no more will follow or have followed <the last page of a book> <their last child is now ten years of age> <fairest of stars, fairest of maidens, fairest of men> <little newsboys crying their wares in correct Bostonese, down to broad a's and softened terminal t's—Price> What is concluding brings something (as a speech, a book, a program, a celebration) to an end or marks its finish <the concluding address was delivered by the chairman> <pro-voked comparison by making their concluding paragraphs almost identical—R. G. Davis> What is eventual is bound to follow as the final effect of causes already in operation or of causes that will be operative if a given or understood contingency occurs <the silent decay and eventual overthrow of her natural defenses—Gladstone> it is his object to point out the necessity . . . for a deliberate and purposive art of eugenics, if we would prevent the eventual shipwreck of civilization—Ellis> What is ultimate (see also ULTIMATE 2) is the last, final, or terminal element in a series or process <this ultimate book of my autobiography—Osbert Sitwell> <the ultimate stage in a process of descent—Ellis> or is the final outcome or end to which a person or thing is moving or working <the ultimate effect of a drug> <when I think of the earth's refrigeration, and the ultimate collapse of our solar system—L. P. Smith> or is the most remote in time, either past or future, or most important in a scale of values <the ultimate effect of a war> <that word comes into English from French, but its ultimate source is Sanskrit> <its utopian interferes with an interest in proximate, rather than ultimate, goals—Niebuhr>
Ant first

lasting, permanent, perdurable, durable, stable, perpetual mean enduring for so long as to seem fixed or established. Lasting may imply long continuance with no end in sight; in this sense, it may be close in connotation to everlasting <who . . . sings his soul and body to their lasting rest—Shak.> More typically, however, it does not imply endlessness, but rather a surprising capacity to continue indefinitely <the anger of slow, mild, loving people has a lasting quality that mere bad-tempered folk cannot understand—Deland> <an excellent mind, shrewd wit, and an amazing capacity for developing lasting friendships—Douglas>

Permanent applies chiefly to things which are not temporary, tentative, transitory, or fluctuating but which continue or are likely or expected to continue indefinitely or as long as relevant; thus, a permanent position may be expected to continue on the one hand until death or retirement removes the employee holding it or, on the other, until fundamental changes in or termination of the business of the employer renders it superfluous; permanent damage to an object is damage that will remain as long as the object persists <settled down and made a permanent home for his family> <the stimulation of violent emotions may leave permanent traces on the mind—Inge> <much of the current literature on this subject, both ephemeral and of permanent value, comes out of Russia—Sokolsky> Perdurable carries a stronger implication than does lasting in its typical use of endlessness of existence; but it suggests endless or apparently endless existence especially from the point of view of humane remembrance or humane interest <the memorial</span> <ref to it> makes him one of the few perdurable figures of our Civil War and secures him a sainthood that slander has not been able to violate—Cargilly our literature is going to be our most perdurable claim on man's remembrance—Quiller-Couch> Durable implies power of resistance to destructive agencies; it usually suggests a capacity for lasting that exceeds that of other things of the same kind or sort <a durable pavement> <a durable color> <more durable than brass—Junius> (many writers have longed for durable renown—L. P. Smith) Stable applies to what is so firmly or solidly established that it cannot be moved or changed; the term therefore is applicable to things that
are lasting or durable because they are deeply rooted, or finely balanced, or infixed and not subject or likely to be subject to fluctuations <a stable foundation> <a stable form of government> <stable institutions> <the stable earth and the changing day—George Eliot> <men as steady as . . . wheels upon their axles, sane men, obedient men, stable in contentment—Huxley> <a relatively stable society . . . where the individual remains, both physically and socially, in the place in which he was born—Cheek>

Perpetual (see also CONTINUAL) is in many respects closer to permanent than to the remaining terms but it differs from it significantly in the absence of any notion of relevance and may approach everlasting in its suggestion of an endless course or a going on without a prospect of something intervening to bring about an end; thus, the furnace has a permanent not a perpetual place in the cellar since the cellar itself will ultimately crumble away; perpetual, rather than permanent, motion is considered impossible because of the inevitable interference of friction <a dark, a colorless, a tasteless, a perfumeless, as well as a shapeless world: the leden landscape of a perpetual winter—Mumford> <the song of the minstrel moved through a perpetual Maytime—J. R. Green> <a perpetual embargo was the annihilation, and not the regulation of commerce—John Marshall>

Ana enduring, abiding, persisting or persistent, continuing (see corresponding verbs at CONTINUE): *everlasting, endless, unceasing: *continual, continuous, incessant, unremitting, perennial: eternal, sempiternal (see INFINITE)

Ant fleeting —Con fugitive, passing, evanescent, transient, *transient, short-lived

late 1 *tardy, behindhand, overdue

Ana delayed, retarded, detained (see DELAY)

Ant early: punctual, prompt —Con timely, *seasonable, opportune, well-timed

2 departed, deceased, defunct, *dead, lifeless, inanimate

3 modern, recent

latent, dormant, quiescent, potential, abeyant are comparable when meaning not now manifest or not evincing signs of existence or activity. Latent implies concealment and is applied to what is present without showing itself <latent energy> <a latent infection> <his sinister qualities, formerly latent, quickened into life—Hardy> <it remained possible that by further development, latent contradictions might have been revealed—Russell> Dormant usually suggests sleeping and is applied to something which has once been active but now is inactive though not incapable of future activity <a dormant plant> <a dormant volcano> <which power can never be exercised by the people themselves, but must be placed in the hands of agents, or lie dormant—John Marshall> <she pursued him with attention, and when his passion was dormant sought to excite it—Maugham> Quiescent emphasizes the fact of inactivity without necessary implications either of causes or of past or future explosions <a quiescent volcano> <the increase of their wealth, they sank into quiescent Tories—Meredith> Sometimes it connotes immobility <if only we could persuade ourselves to remain quiescent when we are happy—Jefferyes>

Potential applies to something which at a time in question does not possess such being, nature, or effect as is expressed but which is likely to have or capable of having such being, nature, or effect at some future time <potential energy> <disaffected citizens who are a potential danger to the nation> <this eye for a potential and achievable best—Mumford> <it [an infant] must from the very first be viewed seriously, as a potential adult—Russell> Abeyant (more often, predicatively, in abeyance) implies a suspension of activity or active existence <in Mr. Brooke the hereditary strain of Puritan energy was clearly in abeyance—George Eliot> It usually connotes expectancy of revival (nothing seemed left . . . of the former Lewis Raycie, save a lurking and abeyant fear of Mr. Raycie senior—Wharton> <until all danger of counterrevolution should have been removed, personal rights and liberties would have to be kept strictly in abeyance—Ogg & Zink>

Ana hidden, concealed (see HIDE vb): *inactive, inert, idle: unripe, unmarked, *immature

Ant patent —Con *active, operative, live, dynamic: activated, vitalized, energized (see VITALIZE)

latest final, *last, terminal, concluding, eventual, ultimate

Ant earliest

lather suds, froth, *foam, spume, scum, yeast

laud vb extol, eulogize, *praise, acclaim

Ana magnify, aggravate, *exalt: worship, adore, venerate, *revere, reverence: *commend, applaud, compliment

Ant revile —Con *decry, depreciate, disparage, belittle: censure, condemn, denounce, blame, *criticize, reprehend, *execute, curse, damn, anathematize, objurate

Laughable, risible, ludicrous, ridiculous, comical, comical, farcical, droll, funny are comparable when they mean provoking or eliciting laughter or mirth. Laughable is the general term for whatever is fit to provoke laughter <modern audiences do not find Shylock a laughable character> <a laughable incident> <the lower classes aped the rigid decorum of their “betters” with laughable results—Harrison Smith> Risible is a close synonym of laughable and in this sense, like the former, carries special connotations <a risible account of their difficulties—Hatch>

Ludicrous applies to what induces usually scornful laughter because of its absurdity, incongruity, or preposterousness <the ludicrous mistakes called schoolboy howlers> <had friendships, one after another, so violent as to be often ludicrous—Bello> <some of the best public school teachers in the last century were hot-tempered men whose disciplinary performances were ludicrous—Inge> <buildings of different materials and styles . . . thrown together in a way at times fairly ludicrous—A. O. White> Ridiculous applies to what excites decision because of extreme absurdity, foolishness, or contemptibility <good manners at the court are as ridiculous in the country as the behavior of the country is most mockable at the court—Shak> <to be always harping on nationality is to convert what should be a recognition of natural conditions into a ridiculous pride in one's own oddities—Sanatana> Comic and comical are becoming distinct in implications and in applications, although they are sometimes interchangeable. Comic is applicable especially to something that partakes of the spirit of comedy and particularly of the literary form which aims to present life in a way that does not leave a painful impression and that does evoke smiles or laughter, especially thoughtful laughter, or amused reflection <it is comic to see poor little innocents like Frank Potter caught in it [Christianity], tangled up in it, and trying to get free and carry on as though it wasn't there—Rose Macaulay> <has the unerring instinct for things . . . recognized all the world over as comic. Green vegetables are always funny, and bad poets, and winter underwear, and feet—Morley> Comical applies not so much to the character of what induces laughter as to the impression it produces upon the observer; hence, it aptly describes something which arouses spontaneous and unrestrained laughter <the abrupt transition of her features from assured pride to ludicrous astonishment and alarm was comical enough to have sent into wild uncharitable laughter any creature less humane than Constance—Bennett> <I'm just beginning to get along with them so they don't think I'm quite so comical, and my wife comes
sailing in ... and orders me out—Faith McNulty} Farci-
cal is often used interchangeably with comical but it is es-
pecially appropriate when what creates amusement is,
like dramatic farce, dependent upon extravagance, non-
sense, practical jokes, or burlesque for the effect it pro-
duces (boys are like monkeys ... the gravest actors of
farcical nonsense that the world possesses—Meredith)
<almost farcical to suppose that Henry, as a Norman
prince, could not talk his own language to his Norman
bride—Empson> Droll and funny usually impound oddity
or strangeness to what makes a thing laughable, but
droll ordinarily carries a stronger implication of unfamil-
liarity, quaintness, absurdity, or intentional humorlessness
<Thackeray's names, though often ludicrous, are always
happy, and often inimitably droll—Athenaeum> <the
habit of trying to marshal all the facts, weigh them, and
think things through ... is sometimes regarded as droll—
Bunche> and funny of queerness or curiosity <the
night mail set me down at Marwar Junction, where a funny
little happy-go-lucky native-managed railway runs to
Jodhpore—Kipling> <children thought he was a very
funny old Chinaman, as children always think anything old
and strange is funny—Steinbeck> Funny is, however, the
ordinary informal term interchangeable with any other
word of the group <a funny story> he could rarely risk
being funny and lightening his deadly seriousness with
comedy—Anthony West>
Ana amusing, diverting, entertaining (see AMUSE): humor-
ous, *witty, facetious, jocular, jocose
Con solemn, *serious, grave: tedious, tiresome, weari-
some, boring, *irksome: pathetic, poignant, touching,
affecting, *moving, impressive
lavish *profuse, prodigal, luxuriant, lush, exuberant
Ana *liberal, bountiful, bounteous, openhanded, gen-
erous, munificent, handsome: sumptuous, opulent, *lux-
urious: *excessive, inordinate, extravagant
Ant sparing —Con *meager, scanty, scant: econom-
ical, frugal, thrifty (see SPARING): provident, prudent,
discreet (see under PRUDENCE): *stingy, niggardly, par-
simonious, penurious, miserly
law 1 Law, rule, regulation, precept, statute, ordinance,
canon all designate a principle laid down or accepted as
governing conduct, action, or procedure. Law, rule, and
precept are also used as collective nouns to denote a body of
laws, rules, or precepts <obey the law> <work by rule>
<teach by precept> Law and precept are often used
abstractly <the world demanded peace and law, not
liberties and privileges—Buchanan> <the poet's business
is not with precept—Lowes> Law (see also HYPOTHESIS)
primarily implies imposition by a sovereign authority
and the obligation of obedience on the part of those
governed <churches are taking the lead in their own
Communions as being not under the law of states but
under the law of God—Graham> In more restricted
use, however, it implies a will to maintain peace and
justice in the community or group governed and the
expression of that will in concrete injunctions or prohi-
bitions. Laws may be written or unwritten: when un-
written they indicate derivation from established custom;
when written they commonly indicate enactment by a
legislative body or power <the laws of New York State>
-beginning with the definition of law in the lawyer's
sense as a statement of the circumstances in which the
public force will be brought to bear upon a man through
the courts—Justice Holmes> Rule, in contrast with law,
suggests closer relation to individual conduct and method,
or a desire for order and discipline in the group. Sometimes
it implies restriction, whether prescribed or self-imposed,
for the sake of an immediate end (as unity in action, uni-

A colon (:) separates groups of words discriminated. An asterisk (*) indicates place of treatment of each group.
head—Graves) <the Vichy regime he considers as illegiti-
mate, although, at first, it was outwardly legal—
Guérard> **Legitimate**, which basically applies to a child
born of legally married parents, also has been used to
describe the person who has legal title (as to a throne, an
inheritance, or a property) <the legitimate monarch
<the legitimate heir of an estate> The word may also
imply not merely recognition by law but recognition or
acceptance by custom, tradition, or the proper authorities
or logical admissibility (a lie may be considered legitimate
if a patient’s restoration to health depends on it) <Jane’s
mother was making indirect but perfectly legitimate in-
quiries into his prospects—Mary Austin> **Legitimate** to
claim that much of our truly wonderful prodigality of
talent is due to the work of gifted teachers—Michener
<in the light of the parallels which I have added the
hypothesis appears legitimate, if not probable—Frazer>
Licit usually implies strict conformity to the provisions
of the law respecting the way in which something should
be performed or carried on; the term therefore is used
especially of what is regulated by law; thus, a licit mar-
rriage, from the point of view of canon law, is one in which
all prerequisites and all conditions attached to the per-
formance of the ceremony have been attended to; licit
liquor traffic is such traffic as obeys strictly the terms of
the law: since dealings in the stock market have come un-
der the control of the government, many deals once re-
garded as lawful are no longer licit <the state is given its
right to determine what is licit and illicit for property
owners in the use of their possessions—Commonweal>
**Ana** rightful, *due, condign: allowed or allowable, per-
mittted or permissible (see corresponding verbs at LET):
justified or justifiable, warranted or warrantable (see corre-
spnding verbs at JUSTIFY)
**Ant** unlawful — **Con** iniquitous, nefarious, flagitious
(seen Vicious)

lawlessness *anarchy, chaos
**Ana** *discord, strife, dissension, contention, conflict,
difference, variance: *confusion, disorder
**Ant** discipline: order

lawsuit *suit, action, cause, case

lawyer, counselor, barrister, counsel, advocate, attorney,
solicitor. Lawyer is the general term designating a person
versed in the principles of law and authorized to practice
law in the courts or to serve clients in the capacity of legal
agent or adviser. Counselor, barrister, counsel, and advo-
cate name a lawyer who has acquired the right to plead
cases in open court or whose specialty is conducting and
arguing court cases. Counselor is the usual designation in
the United States for a lawyer who accepts court cases and
gives advice on legal problems. The corresponding British
term is barrister, with, however, special emphasis on court
pleading. Counsel may be used as the equivalent of coun-
selor; it, but not counselor, is also used collectively <a
brilliant array of counselors> Advocate in is its implications
the equivalent of barrister and counselor, but it is used as a
designation in countries (as Scotland) in which the legal
system is based on Roman law and in a few special courts.
**Attorney** and solicitor are applied chiefly to a lawyer who
serves as a legal agent for clients, transacting their busi-
ness in specific courts (as probate court). Other powers
vary with the law of the state or country. Attorney is often
used in the United States as equivalent to lawyer, but the
term may be more specifically used to denote a legal agent
who acts for a client (as in conveying property, settling
wills, or defending or prosecuting a case in court) <the
attorney for the executors of the will> <the State’s
attorney> In England, the term attorney has been sup-
planted by solicitor, with, however, emphasis on the trans-
action of legal business for a client and the preparation
of cases for trial as distinct from actual court pleading.
**Lax** relaxed, *loose, slack
**Ana** *limp, floppy, flabby, flacid
**Ant** rigid (sense 2) — **Con** *firm, solid, hard: tense, taut,
*tight: *elastic, resilient, springy
2 slack, remiss, *negligent, neglectful
**Ana** *careless, heedless, thoughtless: *indifferent, un-
concerned: *forgetful, unmindful, oblivious
**Ant** strict, stringent — **Con** *severe, stern, austere:
*rigid, rigorous: conscientious, scrupulous, honest, *up-
right

lay vb *direct, aim, point, level, train

lay adj secular, temporal, *profane

**Con** professional (see corresponding noun at TRADE):
spiritual, religious, sacred (see Holy)

lay analyst see under psychoanalyst at **NEUROLOGIST**

laze *idle, loaf, lounge, lol

**Ana** relax, rest, repose (see corresponding nouns at
REST)

**Con** toil, travail, labor, grind, drudge (see corresponding
nouns at WORK)

lazy, indolent, slothful, fainthearted are comparable primarily
as applied to persons, their powers, movements, and ac-
tions, but also in some degree to things. All mean not easily
roused to action or activity. Lazy especially when applied
to persons suggests a disinclination or aversion to effort or
work and usually connotes idleness or dawdling, even
when one is supposedly at work; the term is commonly
derogatory (rubbing their sleepy eyes with lazy wrists—
Keats) <Una, now twenty-three, grandly beautiful, alter-
nately lazy and amazingly energetic—Rose Macaulay>
<we were too lazy . . . we passed our indolent days
leaving everything to somebody else—H. G. Wells>

**Indolent** implies an habitual love of ease and a settled dis-
like of movement or activity <the stretching, indolent
ease that the flesh and the spirit of this creature invari-
ably seemed to move with—Wister> <he was so good-
natured, and so indolent, that I lost more than I got by
him; for he made me as idle as himself—Cowper>
**Slothful** suggests the temper or indolence of one who is inactive
when he knows he should be active or who moves or acts
with excessive slowness when speed is essential
<be not slothful, but followers of them who through faith
and patience inherit the promises—Heb 6:12> <not de-
pendency, not slothful anguish, is what you now require,
—but effort—Hawthorne> <he would . . . jog a slothful
conscience and marshal its forces—Parrington>
**Fainthearted** implies both a slothful temper and a disposition to remain
irdly indifferent in spite of pressure or urgency <he does
not abandon hope in the masses . . . or see the people
animated only by a fainthearted desire to be ruled—New
Republic> <carpet-knight . . . is used as a term of reproach
for a soldier who stays at home, and avoids active service
and its hardships, with a particular reference to the carpet
of a lady’s chamber, in which such a fainthearted soldier

**Ana** inert, idle, *inactive, supine, passive: torpid, com-
tose, sluggish, *lethargic: *languid, languorous, lacka-
deous, languid, *languid, languorous: *lethargic, *languid,

lead vb *guide, pilot, engineer, steer

**Ana** *conduct, direct, manage, control: *set, fix, estab-
lishments, *command, order, direct: *induce, persuade, prevail,
get

**Ant** follow — **Con** mislead, delude, *deceive: drive,
impel (see move vb): *force, compel, coerce, constrain, oblige

**Leader** head, *chief, chieftain, master

**Ant** follower — **Con** disciple, adherent, henchman.
leading adj *chief, principal, main, foremost, capital
Anna governing, ruling (see govern); conducting, directing, managing, controlling (see conduct vb); prominent, outstanding (see noticeable); eminent (see famous); preeminent, *supreme, superlative
Ant subordinate
league *alliance, coalition, fusion, confederacy, confederation, federation
lean vb *slant, slope, incline
Anna bend, *curve; *turn, deflect, divert, sheer
lean adj Lean, spare, lanky, gaunt, rawboned, angular, scrawny, skinny mean thin because of absence of superfluous flesh. Lean stresses the lack of fat and therefore of rounded contours (lean as a greyhound—Thackeray) (a small, lean, wiry man with sunk cheeks weathered to a tan—Masefield) Sore often suggests stoicism or sinewy strength (he had the spare form ... which became a student—George Eliot) (the spare, alert and jaunty figure that one often finds in army men—Wolfe) Lank suggests tallness or length as well as leanness; often also it implies wasting (meager and lank with fasting grown, and nothing left but skin and bone—Swift) (a pack of lank hounds, sore-footed and sore-eared—H. L. Davis) Lanky adds the suggestions of awkwardness and loose-jointedness (a lanky youth, all arms and legs) (lanky men and women ... so tall and attenuated that they seem at times to approach the one-dimensional—Coates) Gaunt stresses want of sufficient flesh to conceal the bones: it often connotes overwork or undernourishment (her bony visage—gaunt and deadly wan—Wordsworth) (this one with the passing of the years had grown lean and gaunt and the rocklike bones of her face stood forth and her eyes were sunken—Buck) Rawboned often equals gaunt, but it is applied particularly to persons of large, ungainly frame and it seldom implies undernourishment (a long, gawky, rawboned Yorkshireman—Kipling) Angular implies not only absence of curves, but jerkiness or stiffness in movement (sudden retirement of the female in oxydated bombazine—Holmes) Scrawny and skinny imply extreme thinness but scrawny may additionally suggest slightness or a shrunken meager quality (lank scrawny chickens) (a barren slope covered with scrawny vegetation) (the scrawniest, wretchedest horse I had ever seen—Kalischer) while skinny suggests a stringy fleshless condition such as is associated with a deficiency of vitality or strength (skinny children) (the skinniest human being I ever saw. He had not enough flesh on his bones to make a decent-sized chicken—Lynd) Anna slender, slim, *thin, slight: cadaverous, wasted, pinched, *haggard
Ant fleshy —Con brawny, *muscular, sinewy, burly, husky: stout, *strong, sturdy, stalwart: plump, portly, round, fat, obese, corpulent (see Fleshy)
leaning n Leaning, propensity, proclivity, penchant, flair mean a strong instinct or liking for something or sometimes one's self. One has a leaning toward something (as a church, a party, or a school of philosophy) when one definitely inclines to attachment to it or to follow it as a pursuit, a profession, or a course of action. Leaning, however, indicates only the direction in which one is being drawn by the force of attraction; it carries no implication of one's final course or destination (the king was suspected by many of a leaning towards Rome—Macaulay) (he had a leaning toward the law, but his father urged him to study medicine) (a reformer with radical leanings, for years he edited a weekly paper called the Anti-Monopolist—Martin Gardner) One has a propensity (as toward or for something or to do something) when one has an innate or inherent and often uncontrollable longing or is driven by a natural appetite (study the propensities of a group of children) (the invertebrate propensity of their husbands to linger about the village tavern—Irving) (such vehement propensities as drove Romeo, Antony, Coriolanus, to their doom—Bradley) (his propensity for sweeping authoritative statement was so supported by bravura passages of description that the gaps in his knowledge were overlooked—Ferguson) One has a proactivity (as for or towards something or to do something) when one is prone to something not only by natural inclination but also by habitual indulgence or by the peculiarities of one's constitution or temperament (the vesper sparrow, whose special proactivity for singing at twilight gave it its name—W. P. Smith) (curb a proactivity to lying) (the cow pony often maintained the pitching propativities of a bronce—Dobie) Proactivity often implies a tendency toward evil; when it is used without this implication, it still implies a stronger and less controllable urge than the other words here considered (it [the American national genius] is nourished and sustained by ancient traditions and strong racial propativities—Sherman) (the American proactivity for red tape and disoriented activity—W. A. Noyes) One has a penchant usually for something when it has an irresistible attraction for him or when he has a decided taste for it (the Punjabi peasants have a penchant for a strong yellow that leans towards orange—Rand) (authors of medical articles exhibit on occasion an unusual penchant for extravagant terms, inelegant phrasing—Holman) One has a flair for something when one has such an instinct for it as leads one to it as if by the very nature of one's being (he had a flair for finding bargains) (reporters with a flair for news) (that marvellous flair for detecting vital mechanism in every field—Ellis) Often, especially in extended use, flair implies acumen and an innate power of discernment that results in an ability to distinguish the genuine from the counterfeit, the valuable from the valueless, and the significant from the insignificant (a collector with a flair for the genuine antique) (as an editor he had superlative courage, and a flair for new writers—Repliner) Sometimes, the notion of "to do" is substituted for that of "to distinguish" and flair becomes a close synonym of knack, aptitude, or talent (she hasn't a flair for writing)
Anna bias, *predilection, partiality, prepossession, prejudice: inclining or inclination, predisposition (see corresponding verbs at incline): bent, turn, aptitude, faculty, *gift
Ant distaste —Con *antipathy, aversion: repugnance, abhorrence, repellency or repulsion (see corresponding adjectives at repugnant)
leap vb *jump, spring, bound, vault
Anna *rise, arise, mount, soar, ascend
Con *fall, drop, sink, slide, slump
leap n jump, spring, bound, vault (see under JUMP vb)
learn ascertain, *discover, determine, unearth
learned, scholarly, erudite are comparable when they mean possessing or manifesting unusually wide and deep knowledge. Learned implies the possession of knowledge gained by study and research; it usually implies wider and deeper knowledge than do such words as educated, cultivated, and cultured, and is usually applied to those who are conspicuous in their class or profession for learning, to associations composed of such persons, to books or articles written by them, and to periodicals edited by them or publishing articles by them (the learned professions) (learned journals) (colloquialisms which I should not indulge in, were I reading a formal paper before a learned society—Lowes) (he is, in the true sense of the term,
learned. He reads Greek and Latin easily. He can recite poetry in seven languages—Book-of-the-Month Club News—Scholarly also implies learning, but it is applied particularly to persons or to the utterances, ideas, and writings of persons who have attained mastery in a field of study or investigation, who have to a greater or lesser extent advanced knowledge in that field, and who have exhibited consistently high standards in the appraisal of their own and others' discoveries (never academic—still less pedantic—but always scholarly; with the effect of profound learning ever so lightly worn—Storr). Often, more narrowly, the term implies great care for accuracy or exactness (a scholarly study of the causes of the war) (scholarly pursuits) (this biography ... is scholarly to the point of being unreadable, with footnotes covering half the space—New Yorker). Erudite, though often employed as an equivalent of learned or scholarly, usually implies a love of learning for its own sake, a taste for what is out-of-the-way or remote from the interests of the average well-read man, and often an inordinately wide range of knowledge (the point of view of a profound and erudite student, with a deep belief in the efficacy of useless knowledge—Benson) (that excellent critic, Benson) (the point of being unreadable, with footnotes covering half the space—New Yorker). Erudite, though often employed as an equivalent of learned or scholarly, usually implies a love of learning for its own sake, a taste for what is out-of-the-way or remote from the interests of the average well-read man, and often an inordinately wide range of knowledge (the point of view of a profound and erudite student, with a deep belief in the efficacy of useless knowledge—Benson) (that excellent critic, Benson).
benevolence, kindliness, kindness (see corresponding adjectives at kind); compassionateness or compassion, tenderness (see corresponding adjectives at tender); benevolence, humaneness, charitableness (see corresponding adjectives at charitable); laxity (see corresponding adjective at negligent)

Ant severity — con strictness, rigorousness, rigidity, stringency (see corresponding adjectives at rigid); sternness, austerity (see corresponding adjectives at severe)

lesion • wound, trauma, traumatism, bruise, contusion

ana • injury, hurt, damage

less adj less, lesser, smaller, fewer are comparable terms that approach each other in meaning but are not synonyms and are rarely interchangeable. Less means not as much, especially in degree, value, or amount, and its opposite is usually more. It applies chiefly to collective nouns or nouns denoting mass or abstract whole (the moon yields less light than the sun) • John has less money than James

please make less noise • humility has less appeal to men of today than other virtues • lesser means not as great, as important, or as significant as that with which the thing so qualified is compared and implies opposition to greater or major • God made... the lesser light to rule the night — Gen 1:16 • humility is not, in Christian ethics, regarded as a lesser virtue • lesser breaches of the law — Locke

In vernacular names lesser implies that the kind of plant or animal so designated is distinguished from a very similar one carrying the same name chiefly by its comparative smallness of size • the lesser celandine • the lesser snipe

smaller means not as large as that with which the thing so qualified is compared (as in size, dimensions, or quantity) • the smaller of two rooms • give her the smaller table for it will take up less room • fewer means not as many and implies a difference in number of individuals or units; the term therefore modifies a plural noun • he has fewer pupils than he had last year • give her fewer lumps of sugar • no fewer than fifty were present

ant more

lessen • decrease, diminish, reduce, abate, dwindle

ana • shorten, curtail, retrench, abridge, abbreviate; shrink, *contract: lighten, mitigate, alleviate (see relieve): *thin, dilute, attenuate

lesser smaller, *less, fewer

ant major

let 1 lease, rent, *hire, charter

2 let, allow, permit, suffer, leave denote to refrain from preventing, or to fail to prevent, or to indicate an intention not to prevent. Let, allow, and permit, though frequently used with little distinction of meaning, are capable of discrimination. Let is the most informal • her mother wouldn't let her go • she didn't go because her mother wouldn't let her • sometimes let implies failure to prevent through awkwardness, inadver tence, negligence, or inaction • the third baseman let the ball get through him • this dismal sketch of the future of countries that let themselves become dependent on the labor of other countries — Shaw • he is usually very particular not to let his beasts stray — F. D. Smith & Barbara Wilcox and sometimes it implies failure to prevent through lack of power or inclination • he'll have to be a good deal tougher than his dad, who lets himself be pushed around — Medad • allow and permit imply power or authority to prohibit or prevent. But allow may imply little more than acquiescence or lack of prohibition, whereas permit implies express signification of willingness • the freedom of conscience allowed dissenters, the tolerance extended to all creeds — Billington • a business or profession which allows you to get away when you want to — Josephy • i blush for the weakness that allows me to cherish such a passion — Gilbert • he permitted none but Quaker preachers to smoke or drink in his home — Starr • we do not give gifts, throw parties or pay bonuses at Christmas time. We do permit our employees to gather in the lobby and sing carols on Christmas Eve — Wall Street Jour. • suffer (somewhat bookish in this sense) is often a mere synonym for allow in the narrowest implication of that word • suffer little children to come unto me — Lk 18:16 • suffer me to take your hand. Death comes in a day or two — Millay • but it may imply indifference or reluctance • the eagle suffers little birds to sing — Shak. • she suffered herself to be led to the tiny enclosure where... other generations had been buried — S. E. White

perhaps the whole business... of the death penalty will seem... an anachronism too discordant to be suffered, mocking with grim reproach — Cardozo • leave (see also 1) as used with the implication of letting, allowing, or permitting is not clearly distinct from the use discriminated at relinquish, but it tends to stress strongly the implication of noninterference; often it also suggests the departure of the person who might interfere • leave the choice of games to be settled by the guests • the defendant's attorney left him free to tell his story as he wished • we must leave the children to settle their affairs for themselves — Rose Macaulay

ana • sanction, endorse, *approve, accredit, certify; *authorize, license, commission

con • forbid, prohibit, interdict, enjoin, ban, inhibit; *hinder, impede, obstruct, block, bar; thwart; *frustrate, foil, circumvent

lethal • deadly, fatal, mortal

ana • destroying or destructive (see corresponding verb at destroy) • killing, slaying (see kill) • pernicious, bane

ful, noxious; *poisonous, virulent, venomous, toxic

con • salutary, wholesome, hygienic, *healthful; renewing, restoring or restorative (see corresponding verbs at renew)

lethargic, sluggish, torpid, comatose are comparable when they mean being by constitution or condition physically and often mentally inert or inactive. Lethargic usually implies either a constitutional or a temporary or pathological state of sleepiness or drowsiness that makes for slowness in reactions, responses, or movements, or for temperamental apathy • bullfrogs, in a recent shipment, were quite lethargic... and reacted only when they were strongly stimulated — Giese • zone is the lethargic atmosphere of an apathetic people, hopeless and helpless to direct their own destinies — Atlantic • not all the industry of a Hercules will suffice to awaken the lethargic brain — Mencken • but it was no lethargic calm; my brain was more active than ever — Hudson

Sluggish applies not only to persons but to whatever by its nature moves, acts, or functions; the term implies conditions which create stagnation, inertia, indolence, or inability to proceed at a normal or usual pace • sluggish attention • a sluggish pond • a sluggish circulation • a sluggish market for securities • i want no sluggish languor, no bovine complacency. A phlenobritidal philosophy does not appeal to me — War ren Weaver • England has become unenterprising and sluggish because England has been so prosperous and comfortable — H. G. Wells • Torpid suggests the loss of power of feeling and of exertion; basically it implies the numb or benumbed state of a hibernating animal, but in its more common extended sense it implies a lack of the energy, vigor, and responsiveness that one associates with healthy, vital, active beings • memory was not so utterly torpid in Silas that it could not be wakened by these words — George Eliot • still Richard was torpid; could not think or move — Woolf • Oxford was torpid also, dironing along in its eighteenth-century grooves —
lethargy, languor, lassitude, stupor, torpor, torpidity are analogous words

Discriminating powers of the mind, and...reduce it to a physical condition and torpor to a mental state...blunt the torpor—Wordsworth

Employed in reference to persons, usually imply extreme during the winter...which was in a state of profound sluggishness and inertness...a poor will found Steen) Torpor...stupor...basically torpidity—F. C. Lincoln

Lost all power of exertion or of feeling...has collapsed for the moment in Anderson)

Weariness—Con

Almost narcotic in such medieval poetry; one is lulled into...Ellis)

In extended use...comatose implies the stuflfication of extreme lethargy...advt.

Ana inert, idle, *inactive, supine, passive: phlegmatic, stolid, *impassive, apathetic: * languid, languorous, lackadaisical, listless: *slow, dilatory, laggard

Ant energetic, vigorous—Con alert, quick-witted: *intelligent: *quick, ready, prompt, apt: responsive (see TENDER): *spirited, gingery, peppy

lethargy, languor, lassitude, stupor, torpor, torpidity are comparable when meaning physical and mental inertness. Lethargy implies a state marked by an aversion to activity which may be constitutional but is typically induced by disease, extreme fatigue or exhaustion, overeating or overdrinking, or constant frustration and which exhibits itself in drowsiness or apathy—which means this heaviness that hangs upon me? This lethargy that creeps through all my senses? Nature, oppressed and harassed out with care, sinks down to rest—Addison

The state of apathy and lethargy...has been thrust by their stunning...The St. Louis—Political Science Quarterly

Languor (compare LANGUID) has nearly lost its basic application to a condition of weakness, faintness, or deliracy of constitution induced by illness and serving as a bar to exertion or effort

Nearly sank to the ground through languor and extreme weakness—M. W. Shelley

And has come to imply an inertia such as results from soft living, from an enervating climate, or from amorous emotion (intervals of repose, which though agreeable for a moment, yet if prolonged beget a languor and lethargy that destroy all enjoyment—Hume

She is characterized essentially by languor. Her most familiar posture is on a bed or divan—Fowle

Instead of the languor of the tropics, they seem to have acquired...a good deal of our energy and enthusiasm—Eleanor Roosevelt

Lassitude implies such a listless...physical condition as may result from strain, overwork, poor health, or intense worry; it usually connotes an inertia of mind or body which one has not the strength to fight...Her physical lassitude—Hardy

An overpowering lassitude, an extreme desire simply to sit and dream—Moorehead

Stupor implies a state of heaviness when the mind is deadened (as by extreme drowsiness, intoxication, narcotic poisoning, or the coma of illness); the term may imply any state from a dreamy trance-like condition to almost complete unconsciousness (there is...something almost narcotic in such medieval poetry; one is lulled into a pleasing stupor—Lowes

Was in a stupor of mental weariness—Anderson

Had collapsed for the moment in a stupor of pain—Steen

Torpor and torpidity basically suggest the condition of a hibernating animal which has lost all power of exertion or of feeling (a poor will found during the winter...which was in a state of profound torpidity—F. C. Lincoln

Both terms, especially when employed in reference to persons, usually imply extreme sluggishness and inertness (as in some forms of insanity): torpidity, however, probably more often applies to a physical condition and torpor to a mental state (blunt the discriminating powers of the mind, and...reduce it to a state of almost savage torpor—Wordsworth

torpor has succeeded to her former intellectual activity...in a world of torpidities any rapid moving thing is hailed—Birrell

The torpidity which the last solitary tourist, flying with the yellow leaves...left them to enjoy till the returning spring—Peacock

Ana sluggishness, comatoseness (see corresponding adjectives at LETHARGIC): indolence, slothfulness or sloth, laziness (see corresponding adjectives at LAZY): inertness or inertia, inactivity, idleness, passiveness, supineness (see corresponding adjectives at INACTIVE): apathy, phlegm, impassivity (see under IMPASSIVE)

Ant vigor—Con quickness, readiness, promptness, aptness (see corresponding adjectives at QUICK): alertness, quick-wittedness (see corresponding adjectives at INTELLIGENT)

letter, epistle, missive, note, message, dispatch, report, memorandum are comparable when they mean a communication sent or transmitted as distinct from one conveyed directly from source to recipient (as by oral utterance). Letter is the ordinary term for a written, typed, or printed communication sent by one person or group to another most often by mail; the term carries no implications about the nature of the communication and no hint as to whether it deals with personal or business matters or with affairs of public concern (she received a letter from her husband yesterday) (all letters sent out from the belligerent courts are censored) (he addressed an open letter (i.e., one given out for publication) to his constituents)

Epistle applies especially to a letter intended to be made public (as one of the scriptural letters of advice and counsel attributed to the Apostles) (the First Epistle to Timothy) (the Second Epistle to the Corinthians) or to a composition in prose or poetry taking the form of an open letter (Pope's "Epistle to Dr. Arbuthnot") As applied to a private letter, epistle is an over-formal word typically used with some degree of humorous or ironic implication (forced to defend his praise of James Jones's Eternity against a barrage of indignant epistles—Geisma) The amiable epistle of a son-in-law anxious to be a little more than correct—Bennett

Missive, too, is somewhat formal term and as applied to a personal letter may be somewhat ironic or whimsical in implication (many of their missives were illiterate, and the more violent of them were unsigned—Merriman

Note in general use applies to a letter that is brief and pointed, whether it is formal or informal (send a note of condolence) (write a note of acceptance). In diplomatic usage note is applied to a formal communication sent by one government to another (the Porte...acknowledged the validity of the Latin claims in a formal note—Kinglake)

Message differs from the preceding terms in being applicable not only to a written, typed, or printed communication but to one that is orally transmitted (as over the telephone or by a messenger or servant) or is telegraphed, cabled, or radioed (send a message to his mother that he had been called out of town) (but his citizens hated him, and sent a message after him, saying, We will not have this man to reign over us—Lk 19:14)

In official and especially governmental use message applies to a formal communication from the head of a state (as one sent by the president of the United States to Congress or by a governor to the law-making body of his state) (President Wilson broke tradition by delivering his messages to Congress personally) Dispatch applies to a usually brief message that is sent post-haste (as by telegraph, cable, or radiotelegraph). In more technical use dispatch applies to such messages sent by an authorized correspondent to a newspaper or news association; it also specifically applies to an official message, often one in cipher, sent by or to a government to
or by a diplomatic, military, or naval officer in its service. **Report** (see also **account 2**) applies particularly to a communication sent by an official (as a diplomat) to his own government. The term is also applicable to an official communication giving a detailed statement of facts, proceedings, or recommendations (*the committee on foreign affairs is ready to make a report to Congress*). *The school sends a monthly report of each student's work to his parents.* **Memorandum** is used chiefly in business for an informal communication sent to an executive or employee, conveying instructions or directions.

**levée** *wharf, dock, pier, quay, slip, berth, jetty*

**level** vb point, train, direct, aim, lay

**level adj** Level, flat, plane, plain, even, smooth, flush are comparable chiefly as applied to surfaces and as meaning having a surface comparable to that of a perfectly calm body of water with no part higher than another. Something is level whose surface, from every point of view, lies on a line corresponding to or parallel with that of the horizon (*the top of the table is not perfectly level*), (*the prairies are vast stretches of nearly level land*), (*a plot of ground made level by grading*). But **level** is also applicable to an adjacent surface lying in exactly the same plane (*in the spring, the river's surface is often level with its banks*). Buildings whose roofs are level with one another. In extended use **level** implies an equality of parts, or of one thing with another, so that there are no manifest fluctuations or irregularities; thus, to speak in a **level** voice is to speak without the variations in pitch or voice volume that indicate imperfect self-control; to keep a **level** head is to keep free from distracting excitement. Something is **flat** (see also **insipid**) which is marked by absence of noticeable curvatures, prominences, or depressions, whether it lies in a horizontal plane or not (*there is no flat ground hereabouts*). (*the flat face of a cliff*), (*the sides of a pyramid are all flat*). But **flat** may apply to something that lies directly upon or against a flat surface (*flat feet*), (*lay the map flat on the table*), (*the chairs have their backs flat against the wall*). (*lie flat on the ground*). In extended use **flat** applies sometimes to what is so lacking in variation or variety as to be monotonous (*a flat speech delivered by the new president*), (*a flat entertainment*) or to what gives no ground for doubt or for difference in description because direct, pure, complete, or unqualified (*a flat question*), (*a belief that is flat heresy*), (*a flat failure*) or to what is fixed or absolutely exact (*ask a flat price*), (*he ran the race in a flat ten seconds*). Something is **plane** or **plain** which is flat and usually level. **Plane** is more usual in technical and mathematical use and more often applies to angles, curves, or figures (as triangles, rectangles, and pentagons) all points of which lie in the same real or imaginary surface so that if any two points be taken within the boundary lines of the angle, curve, or figure, the straight line joining them lies wholly within that surface; thus, **plane geometry**, which deals with **plane** angles, curves, and figures, is distinguished from **solid** geometry (*the plane sides of a crystal*). **Plain** is much less frequent in adjectival use and applies chiefly to the ground (*I recovered some strength, so as to be able to walk a little on plain ground—John Wesley*). **Something** is **even** (see also **steady**) which exhibits a uniformity of all the points either of a plane surface or of a line so that the surface's flatness or levelness or the line's straightness is observable (*he trimmed the top of the hedge to make it even*), (*the hem of your skirt is not even*). (*the frigate was on an even keel—Marryat*). **Something** is **smooth** that exhibits perfect evenness of surface, as though polished, rolled, or planed free from the slightest traces of roughness or unevenness (*the smooth surface of a rubbed and polished table*), (*a smooth lawn*), (*the tall bamboo and the long moss threw farther shadows . . . over the smooth bayou—Stark Young*). A surface or a line is **flush** that is in the same horizontal or vertical plane or forms a continuous surface or line with another surface or line (*the front of the house is flush with the front boundary line*), (*the river's surface is now flush with that of its banks*), (*a flush panel*). (*in the ordinary printed page, all lines are flush except those in titles or headings or those that are indented for paragraphing*).

**A** parallel, uniform, *like, akin, identical, similar: *same, equivalent, equal**

**Con** undulating, fluctuating, swaying (*see swing vb*): varying, changing (*see change vb*)

**levitate** rise, arise, ascend, tower, rocket, surge

**Ant** gravitate, sink

**levity** *lightness, light-mindedness, frivolity, flippancy, volatility, flightiness*

**Ana** foolishness or folly, silliness, absurdity (see corresponding adjectives at **foolish**); gaiety, liveliness, sprightliness, vivaciousness or vivacity (see corresponding adjectives at **lively**)

**Ant** gravity — **Con** seriousness, soberness or sobriety, earnestness, solemnity, somberness (see corresponding adjectives at **serious**); severity, sternness, austerity, asceticism (see corresponding adjectives at **severe**)

**lewd** lustful, lascivious, libidinous, lecherous, wanton, licentious, libertine

**Ana** immoral, unamoral, amoral: gross, coarse, obscene: indecent, indeclicate (see **indecorous**)

**Ant** chaste — **Con** decent, pure, modest (*see chaste*): moral, virtuous: continent, temperate (*see sober*)

**liability** debt, indebtedness, obligation, debit, arrear

**Ant** asset (or plural assets)

**liable** 1 amenable, answerable, responsible, accountable

**Ana** obliged, constrained, compelled (*see force vb*): bound, tied (*see tie vb*)

**Con** exempt, immune (*see corresponding nouns at exemption*): free, independent

2 **Liable**, open, exposed, subject, prone, susceptible, sensitive are used with reference to persons or things and mean being by nature or situation in a position where something stated or implied may happen. **Liable** (see also **apt 2**: **responsible**) is used particularly when the thing one incurs or may incur is the result of his obligation to authority, of his state in life, or of submission to forces beyond his control (*one of the most horrible diseases to which mankind is liable—Eliot*). **Literature is liable to obsolescence, not only because language changes and gradually becomes less intelligible, but because the ideas, the interests, the conception of life it expresses, the very form of the thought, the experiences which arouse emotion, all become obsolete—Addington*) *liable to be burned at the stake for . . . heresy—Repple*). **Open** suggests lack of barriers or ease of access (*standing thus alone . . . open to all the criticism which descends on the lone operator—Catton*). *Another modern tendency in education . . . somewhat more open to question* (*I mean the tendency to make education useful rather than ornamental—Russell*)

**Exposed** presupposes the same conditions as **open**, but it is more restricted in application because it implies a position or state of peril or a lack of protection or of resistance (*infant mortality is high because the piglets are exposed to diseases the sow carries—Farmer's Weekly*). *Germans never tire of explaining that their exposed position in Central Europe has forced them to follow a policy of expansion—Bullock*.

**Subject and prone** (see also **prone 2**) both suggest greater likelihood

A colon (:) separates groups of words discriminated. An asterisk (*) indicates place of treatment of each group.
of incurring or suffering than liable and even less resistance than exposed; they may both connote the position of being under the sway or control of a superior power, but otherwise they differ in implications. Subject implies openness to something which must be suffered, borne, or undergone for a reason (as a state in life or a social, economic, or political status or a quality of temperament or nature) the French people would have stood permanently weak, open to invasion and subject to continual interference.—Bellloc—both were subject to constant criticism from men and bodies of men whose minds were as acute and whose learning was as great as their own—Henry Adams.—Paul was rather a delicate boy, subject to bronchitis—D. H. Lawrence—The cycles to which all civilizations are subject—Ellis—The constitution was strictly an unknown one, and was avowedly subject to revision in the light of new developments—Buchan—Prime, on the other hand, usually implies that the person, or less often the thing, concerned is more or less governed by a propensity or predisposition to something which makes him or it almost certain to incur or to do that thing when conditions are favorable you may well warn me against such an evil. Human nature is so prone to fall into it—Austen—1. I think that girls are less prone than boys to punish oddity by serious physical cruelty—Russell—In those industries that are most prone to periods of depression and unemployment—Hobson.—Our painters are prone to acquiesce in the colors of nature as they find them, rather than to use colors expressive of the mood evoked in themselves—Binyon—Susceptible carries a stronger implication than the preceding terms, with the exception of prone, of something in the person’s or thing’s nature, character, constitution, or temperament that makes him or it unresistant or liable to a thing and especially to a deleterious thing or a thing that exerts a deleterious influence (wheat tends to be very susceptible to smut—Furnas) a mind enormously more susceptible to tragic impressions than your own—Montague—a natural-born actor, who was, in childhood, susceptible not only to somnambulism but to mesmeric control—Brooks—When used attributively the word often implies a readiness to fall in love a very susceptible young man Sometimes, however, susceptible stresses openness by reason of one’s nature, character, or constitution, rather than liability, and when followed by of is equivalent to admitting or allowing a theory susceptible of proof today’s pedagogical theory asserts that memory cannot be cultivated: it is inborn, full-grown at the start, and not susceptible of increase—Grande'gent—Sensitive differs from susceptible chiefly in implying a physical or emotional condition that predisposes one to certain impressions or certain reactions she was too sensitive to abuse and calumny—Macaulay she discovered that with the clarification of her complexion and the birth of pink cheeks her skin had grown more sensitive to the sun’s rays—Hardy she was extremely sensitive to neglect, to disagreeable impressions, to want of intelligence in her surroundings—Henry Adams—the eye is much more sensitive to light than the hand or the balance to weight—Darrow—

Ant exempt, immune
3 likely, apt
liaison intrigue, *amour, affair
libel n Libel, skit, squib, lampoon, pasquinade mean a public and often satirical presentation of faults or weaknesses, especially those of an individual. Libel (compare libel vb under malign) is the legal term for statement or representation (as a cartoon) published or circulated without just cause or excuse, which tends to expose a person to public contempt, hatred, or ridicule cheap senseless libels were scattered about the city—Clarendon—Skit applies to an amusing satire typically in the form of a dramatic sketch or story that may be more humorous or ironical than satirical and is usually of no very great weight or seriousness; the term seldom connotes malice, bitterness, or abusiveness, but it often suggests the infliction of a sting he did not deserve your skit about his “Finsbury Circus gentility”—FitzGerald—The first of the one-act plays was a skit more or less obviously dealing with the prime minister’s attempt to forestall war Squib applies to a short and clever often malicious piece of satirical writing that makes its point with a sharp thrust and evokes laughter or amusement no one was more faithful to his early friends particularly if they could write a squib—Disraeli—Lampoon suggests more virulence and abusiveness and a coarser humor than squib a lust to misapply, make satire a lampoon, and fiction, lie—Pope—On his master at Twyford he had already exercised his poetry in a lampoon—Johnson—Pasquinade is preferred to lampoon when such circumstances as anonymity, public posting, political character, or extreme scurrility are implied the white walls of the barracks were covered with . . . pasquinades leveled at Cortez—Prescott—Aea scurrility, invective, vituperation, *abuse; burlesque, travesty (see caricature n)

libel vb defame, slander, *malign, traduce, asperse, vilify, calumniate

liberal adj 1 Liberal, generous, bountiful, bounteous, openhanded, munificent, handsome are applied to a person or to his deeds or utterances and mean showing or revealing a spirit of giving freely and without stint. Liberal suggests openhandedness or lack of closeness or meanness in the giver and largeness in the thing that is given make a liberal provision for a son at college a liberal offer for a house liberal in praise about three thousand New Hampshire men were engaged in privateering receiving liberal rewards for the risks they took—Amer. Guide Series: N. H.—Opium smokers included the upper crust of the underworld, as well as liberal representation from the socialite class—Maurer & Vogel—Generous usually emphasizes some positive quality of heart and mind as warmhearted readiness to give, forgetfulness of self, or magnanimity that prompts the giver or the gift more than the size or importance of the gift made a generous provision for his servants in his will (rejected a friend’s generous offer of assistance) she was generous beyond the dreary bounds of common sense—Osbert Sitwell The boys “not manly enough nor brave enough” to do a generous action where there was a chance that it would get them into trouble—Brooks—Bountiful suggests lavish or unremitting generosity in providing or giving he is a worthy gentleman . . . as bountiful as mines of India—Shak (even the bountiful Queen of Berengaria had overlooked him when she distributed honors—Glasgow—Bounteous carries much the same suggestions as bountiful but is less often applied to a person the bounteous yields of [crops] . . . for which the state is noted—Amer. Guide Series: Aiz.—Caused them to . . . be very bounteous in their avowals of interest—Hawthorne—Openhanded emphasizes generosity in giving and may further suggest freedom from all taint of self-interest and sometimes of forethought in the giving (compare closefisted at stingy) he was free and openhanded and grudged her nothing—McCrone a curious mixture of

*Ana* independence, autonomy (see under FREE adj): *exemption, immunity: liberation, emancipation, enfranchisement, delivery (see corresponding verbs at FREE): scope, *range, compass, sweep

*Ant* restraint —*Con* constraint, compulsion, duress, coercion (see FORCE): confinement, restriction, limitation, circumscription (see corresponding verbs at LIMIT)

libidinous lecherous, lustful, lascivious, lewd, wanton, libertine, *lcentious

library *museum, archives, treasury, gallery

license n liberty, *freedom

*Ana* exemption, immunity: looseness, laxity, slackness, relaxedness or relaxation (see corresponding adjectives at LOOSE): privilege, prerogative (see RIGHT)

*Ant* decorum —*Con* obligation, duty: decorum (see DECORUM): restraint, constraint, compulsion (see FORCE): continence, *temperance, sobriety

license vb *authorize, commission, accredit

*Ana* permit, *let, allow, suffer: *approve, endorse, sanction, certify: empower, *enable

*Ant* ban —*Con* interdict, inhibit, enjoin, prohibit, *forbid: *restrain, curb, check

*licentious, libertine, lewd, wanton, lustful, lascivious, libidinous, lecherous* all suggest unchaste habits, especially in being given to or indicative of immorality in sex relations. *Licentious* basically implies disregard of the restraints imposed by law or custom for the enforcement of chastity; the term stresses looseness of life and of habits rather than the impiousseness of one's desires (licentious living) (licentious morals) (the precept that enjoins him abstinence forbids him none but the licentious joy, whose tone, though fair, tempts only to destroy—Cooper) (an irreleligious and *licentious* age had abetted depravity—Glasgow) *Libertine* suggests a more open and a more habitual disregard of moral laws, especially those pertaining to the sex relations of men and women (the frank libertine wit of their old stage—Gibbon) (he castigated the libertine lives of many of his generation) (by merely living together a couple is practicing libertinism—love—and the mere repetition doesn't, in some mysterious way, make it legal—Stone) *Lewd* often carries strong connotations of grossness, vileness, and vulgarity which color its other implications of sensuality, dissoluteness, and unconcern for chastity. As a result it is applied less often than the preceding terms to persons, or to the manners, thoughts, and acts of persons, who retain in their im-

A colon (:) separates groups of words discriminated. An asterisk (*) indicates place of treatment of each group.
morality evidence of breeding, refinement, or gentility
<seen in the company of lewd women> <lewd songs>
<lewd actions in public> <where dowdy women whispered lewd invitations from behind wooden shutters—Baum>
(the whiskey had filled his body with a rosy sense of complete well-being, and vague lewd sensual images stroked his mind—Mailer) Wanton (see also supererogatory) implies moral irresponsibility or a disposition or way of life marked by indifference to moral restraints; it often suggests freedom from restraint comparable to that of animals, thereby connoting lightness, incapacity for faithfulness or seriousness, or a generally unmoral attitude
<wanton little creatures without character or depth of feeling—Nordhoff & Hall> <all this was done with a gay, and, as I said, a wanton disregard of the ill effects—Sir Winston Churchill> <so wanton, light and false, my love, are you, I am most faithless when I most am true—Millay>
Lustful implies the influence or the frequent incitement of desires, especially of strong and often unlawful sexual desires <she took the greatest care of his health and comfort, and was faithful to him, not being naturally lustful except of power—Graves>
Lascivious, like lewd, definitely suggests sensuality, but it carries a clearer implication of an inclination to lustfulness or of a capacity for inciting lust <lascivious desires> <lascivious thoughts> <lascivious glances> <lascivious dress> (tales that ... are Rabelaisian in their coarseness and not ... lascivious—Sellery>) <I have seen a nanny goat repel a lascivious and impatient old billy goat who was making advances—Putnam>
Libidinous and lecherous are the strongest of all these terms in their implications of deeply ingrained lustfulness and of debauchery. Libidinous distinctively suggests a complete surrender to one's sexual desires <a lewd youth ... advances by degrees into a libidinous old man—Addison> <the Gauls indulged in libidinous orgies, in which sodomy played a part—Putnam> Lecherous clearly implies habitual indulgence of one's lust, the term often being used when any of the others would seem too weak to express one's contempt <remorseless, treacherous, lecherous, kindless villain!—Shak.> <boasted of his pornographic publications and his pornographic “library” and his own lecherous fornications—Shirer>
<the whiskey had filled his body with a rosy sense of complete well-being, and vague lewd sensual images stroked his mind—Mailer>
Ant continent —Con *chaste, decent, pure: *moral, virtuous: strict, *rigid: austere, ascetic, *severe
licit *lawful, legitimate, legal
Ana permitted, allowed (see LIE): sanctioned, approved (see APPROVE): authorized, licensed (see AUTHORIZE): regulated (see ADJUST)
Ant illicit —Con forbidden, prohibited, interdicted, inhibited, banned (see FORBID)
lack vb beat, defeat, *conquer, vanquish, subdue, subjugate, reduce, overcome, surmount, overthrow, rout
lissipstle *parasite, sycophant, toady, bootlicker, hanger-on, leech, sponge, sponger, favorite
lie vb lie, prevaricate, equivocate, palter, fib mean to tell an untruth directly or indirectly. Lie is the straightforward word, flatly imputing dishonesty to the speaker <he lies, and he knows he lies—Johnson> <the article ... has deliberately lied and distorted facts—Nation's Business>
Prevaricate is often used in place of lie as a more formal or less offensive term; distinctively, it can imply evasion of the truth (as by quibbling, dodging the real point, or confusing the issue) <he could prevaricate no longer, and, confessing to the gambling, told her the truth—Hardy> “<Even if it was so, which I don’t say it is”—“Don’t prevaricate,” said Mr. Lorry—Dickens> Equivocate implies saying one thing and meaning another; it usually suggests the use of words that carry more than one sense in the hope that the sense which gives the incorrect impression may be the one accepted by the hearer <by equivocating, hesitating, and giving ambiguous answers, she effected her purpose—Martineau> <he was wholly in sympathy with Congregationalism, and had no mind to conceal or equivocate concerning its democratic tendencies—Parrington>
Palter implies a playing fast and loose, not only in statements but in dealings; it often specifically implies prevarication, equivocation, or the making of promises one does not intend to keep <and be these juggling fiends no more believed that palter with us in a double sense—Shak.> <Caroline, don’t go back—don’t palter with us—abide by your own words—Edgeworth> Fib (see also LIE n) may be used as a euphemism for lie; but it more often implies the telling of an untruth that is either trivial in matter or in significance <she was given to fibbing about her admirers> <the child fibs when he thinks he can gain something by it> <he didn’t like Janet. She fibbed, he said, and was a telltale—Glasgow>
Ana *deceive, delude, mislead, beguile
lie n Lie, falsehood, untruth, fib, misrepresentation, story are comparable when they mean a statement or declaration that does not conform to the truth. Lie is usually felt to be a term of extreme opprobrium because it implies a flat and unquestioned contradiction of the truth and deliberate intent to deceive or mislead <you told a lie; an odious, damned lie—Shak.> <his decent reticence is branded as hypocrisy, his circumlocutions are roundly called lies—Maugham> Falsehood may be both less censorious than lie and wider in its range of application. The term need not imply sinfulness or criminality, for it applies not only to lies <told two flat falsehoods about what had happened in secret session—Davis> but to such fictions as literary fictions, polite fictions, and legal fictions and then contrasts most directly with fact (a man’s entire life may be a falsehood, while with his lips he may not once directly falsify—F. N. Scott & J. V. Denney) Like lie, the term implies known nonconformity to the truth, but unlike lie, it does not invariably suggest a desire to pass off as true something known to be untrue <falsehoods which we spurn today were the truths of long ago—Whittier> Untruth is often euphemistic for lie or falsehood and may carry similar derogatory implications <his report was riddled with inaccuracies and untruths> or it may be selected because of mitigating circumstances <tell you untruths yesterday morning merely to cheer you up—Bennett> Sometimes, however, untruth may apply to an untrue statement made as a result of ignorance or a misconception of the truth <so far as he knew he had never told an untruth> <the traditions and the untruths our cultural fathers have sometimes told us—La Barre> Fib is an informal or childish term for a trivial falsehood; it is often applied to one told to save one’s own or another’s face <not that I couldn’t tell a downright fib if I had to ... but a lie is to me just as silly a performance when it is about marriage or work as about the law of gravitation—Mary Austin> <the trade in drama seems to be prosecuted in a world of perfunctory fibs which no one believes—Montague> Misrepresentation applies to a misleading and usually an intentionally or deliberately misleading statement which gives an impression that is contrary to the truth; the term implies glossing over defects or weaknesses (as in something offered for sale) or placing the emphasis upon details that highlight a character, an occurrence, or a train of events rather than on those that in reality marked it <our guides deceived us with misrepresentations—Addison> <his duty to further the in-
terest of his client does not require him to employ any sort of trickery, chicane, deceit, or misrepresentation—

Drinker

Story (see also ACCOUNT 2) in the sense relevant to this discussion is an informal term used chiefly by or with reference to children in place of any of the preceding terms, especially falsehood, untruth, and fib 〈boys who tell stories are likely to be caught〉

Ana

prevarication, equivocation, fibbing or fib (see corresponding verbs at LIE): mendaciousness or mendacity, untruthfulness, dishonesty, deceitfulness (see corresponding adjectives at DISHONEST)

Ant

coordinated verbs at LIE; mendaciousness or mendacity, untruthfulness, dishonesty, deceitfulness (see corresponding adjectives at DISHONEST)

Ant

truth — Con

veracity, verity, verisimilitude (see TRUTH)

light adj easy, simple, facile, effortless, smooth

Ana slight (see THIN): trivial, trifling, *petty, puny

Ant

heavy: arduous; burdensome — Con difficult, *hard:

*onerous, oppressive, exacting; rigorous, stringent
lightness, light-mindedness, levity, frivolity, flippancy, lighthearted

vb alleviate, mitigate, relieve, assuage, allay; lighten

vb lightness, levity, frivolity, flippancy, lighthearted, cheerful, happy, glad, joyous

lightness is often unjustly accused of light-mindedness

Levity suggests a temperamental lack of seriousness or stability

thought of tone with which I uttered such serious words—E. J. Goodman

The term may further imply instability

there is a lightness about the feminine mind—a touch and go—George Eliot

Frivolity adds to lightness the implication of empty or idle speech or conduct; the term often carries a strong connotation of triviality or of pettiness

volatility, lightness, light-mindedness, levity, frivolity, flippancy, buoyancy, resiliency, elasticity, effervescence, expansiveness

graveness or gravity, earnestness, sobriety, sedateness, stiffness, somberness

like vb Love, enjoy, relish, fancy, dote are comparable when meaning to be so attracted to a person or thing as to regard him or it with favor. Like (opposed to dislike), the most general and, especially when unqualified, the most colorless of these words, means merely to regard with favor or without the slightest aversion. Therefore, it is chiefly used in reference to persons or things that are pleasing but evoke no great warmth of feeling or urgency of desire

<Sumner whom I admire and dislike; and Shaw of Dunfermline whom I like but do not admire—Laski>

<Arnold, having been poor, liked money and knew the value of it—Osbter Stilwell>

<Hawthorne liked to sit in barrooms; Thoreau would have enjoyed doing so, and have frequented inns, as farmers, and campers on the river—Canby>

Love (opposed to hate) implies not only pleasing liking but ardent attachment and is therefore used with reference to persons or things that arouse the deeper or higher emotions; thus, one likes his neighbors but loves his family; one likes the open country but loves his native land—{I like a church; I like a cow; I love a prophet of the soul—Emerson>

{this peculiar, brooding woman, who loved best in life the sorrow and high seriousness of things—Ballett>

Love also is often used with reference to trivial objects as an informal intensive of like

{ice cream> (old Sarah Battle . . . loved a good game of whist—Lamb>

Enjoy implies a liking or loving that awakens deep satisfaction and keen delight which may be sensuous or intellectual or often a mingling of the two

<we had written our first stories together . . . and together enjoyed the first sweets of success—Rose Macaulay>

no one but Molny and the Bishop had ever seemed to enjoy the beautiful site of that building,—perhaps no one ever would. But these two had spent many an hour admiring it—Cather>

(it is this specific quality, the power of enjoying things without being reduced to the need of possessing them, which differentiates the aesthetic instinct from other instincts—Ellis>

Rielish implies a liking, or sometimes an enjoyment, that arises because the thing relished meets one's approval, satisfies one's taste, or gives one peculiar gratification

relish him as the most perfect opportunist in prose—Morley>

Fancy (see also THINK 1) implies a liking for something that corresponds to one's imaginative conception or sometimes one's ideal of what it should be—{I never yet beheld that special face which I could fancy more than any other—Shak>

he should have yachts, horses, whatever he fancied—Meredith> for or something that appeals to one's taste or one's eye especially at the moment

while she was ill, she fancied only the most delicate of foods—Dote, with on or upon, implies an infatuation or a foolish excessive liking or fondness—you dote on her that cares not for your love—Shak>

he doted on his daughter Mary; she could do no wrong—Havighurst>

Love it may be used as an informal intensive of like

<two peoples, both of whom love palaver and dote on uproar—Monroe>

he dotes on bland horrors in food—Liebling>

Ana prefer, *choose, select, elect: admire, esteem, respect, regard (see under REGARD n); *approve, endorse:

It is this specific quality, the power of enjoying things without being reduced to the need of possessing them, which differentiates the aesthetic instinct from other instincts. Ellis. Rielish implies a liking, or sometimes an enjoyment, that arises because the thing relished meets one's approval, satisfies one's taste, or gives one peculiar gratification. His fine taste taught him giving one peculiar gratification. His fine taste taught him
like

appreciate, comprehend, *understand

Ant dislike — Con *hate, abhor, detest, abominate, loathe: *despise, contemn, scorn, disdain

like adj Like, alike, similar, analogous, comparable, akin, parallel, uniform, identical are comparable though seldom strictly synonymous terms which describe the relation between things or persons that closely resemble each other. Like is a general word indicating resemblance or similarity ranging from virtual identity in all characteristics to a chance resemblance in only one (the children were very like) this finest intuitions may . . . prove convincing only to himself, or to a limited circle of like minds—Times Lit. Sup.) Alike is similar to like but is less likely to be used for the chance, farfetched resemblance and is generally limited to use in a predicate or postposed situation after a compounded substantive modified (their resemblance as brother and sister . . . they looked utterly alike—Sinclair Lewis) (they were strikingly alike in gifts and tastes—Starr) Similar often stresses the likenesses between different things, implying that differences may be overlooked or ignored for a time (Virginia creeper or the deceptively similar poison ivy—Amer. Guide Series: Md.) (regard the attraction which illusion has for us as similar to that which a flame at night has for a moth—Cohen) (this is not to say that the quarters are all alike. But they are as similar as the generation of young writers who contribute to them—R. B. West) Analogous calls attention to the presence of some likeness which makes it feasible or permissible to draw from it an analogy, a sustained or appropriate comparison (the two new states would have a position analogous to that of British Dominions—Manchester Guardian) (quite analogous to the emotionalizing of Christian art is the example afforded by the evolution of the Latin hymn—H. O. Taylor) Comparable implies a likeness on one point or a limited number of points which permits a limited or casual comparison or matching together (the Syrians . . . with Arabian coffee, served thick and strong in tiny cups, as a national drink comparable to the Englishman's tea—Amer. Guide Series: R.I.) The word is especially likely to be used in connection with considerations of merit, standing, rank, or power (neither in military nor industrial terms is China comparable to the other three great powers—Dean) Akin, limited to use in postpositive situations, indicates an essential likeness, often of the sort of likeness found in kinship or suggestive of common descent from an original ancestor, prototype, or ancestral stock (the Mongols of Outer Mongolia . . . are akin to those of the neighboring Buryat-Mongol A.S.S.R.—Foreign Affairs) (real nursery tales, akin to Brer Rabbit—Times Lit. Sup.) (science . . . is akin to democracy in its faith in human intelligence and cooperative effort—Muller) Parallel stresses the fact of similarities over a course of development throughout a history or account or the fact of resemblances or likenesses permitting a setting or bracketing together as though side by side by side (the almost parallel growth of the Twin Cities—Amer. Guide Series: Minn.) (parallel to the classic and academic Italian school was one with a more distinctive native feeling—Manship) (parallel to the powers of the king were the powers of the father in the individual household—Linton) Uniform suggests a likeness and similarity throughout and a lack of noticeable variation wherever things in question occur or operate (one of the most fundamental social interests is that law shall be uniform and impartial—Cardozo) (schools . . . no longer expect all children to learn to read at a uniform rate—Education Digest) Identical indicates either the fact of being the same person or thing or, in connection with things copied, reproduced, or repeated, an exact correspondence without detectable or significant difference (George Eliot and Mary Ann Evans were identical) (the interests of workers and their employers were not altogether identical—Cohen) (his home life and his life as a man of letters are never identical—Canby)

Ana equivalent, equal, *same, selfsame, identical: cogitate, allied, *related

Ant unlike — Con *different, diverse, divergent, disparate, various: dissimilar, distinct (see corresponding nouns at DISSIMILARITY): discrepant, discordant, *inconsonant, inconsistent

likely 1 *probable, possible

Ana credible, believable, colorable, *plausible: reasonable, *rational

Ant unlikely — Con *doubtful, dubious, questionable, problematic: *certain, inevitable, necessary

2 *apt, liable

likeness, similarity, resemblance, similitude, analogy, affinity are comparable when they denote agreement or correspondence or an instance of agreement or correspondence in details (as of appearance, structure, or qualities) brought out by a comparison of two or more things. Likeness commonly implies closer correspondence than similarity, which often applies to things which are merely somewhat alike (thou shalt not make thee any graven image, or any likeness of any thing that is in heaven above—Deut 5:8) (yes, I should have known you anywhere from your likeness to your father—Archibald Marshall) (Zaza is an old woman, while you, princess, still have youth and beauty. Nevertheless, the likeness is positively amazing—Robert Standish) (certain insects escape danger by their similarity to plants—Lubbock) (great works of art have a decided similarity to great human beings— they are both three-dimensional—Hartford) Resemblance suggests especially similarity in appearance or in superficial or external qualities (it would be as difficult to discover any resemblance between the two situations as between the appearance of the persons concerned—Wharton) Similitude, which is somewhat infrequent and bookish, is occasionally preferred to likeness or similarity when an abstract term is desired (the law which reconciles similitude and dissimilitude, the harmony of contrast—Reed) (all medieval variances of thought show common similitudes—H. O. Taylor) (Analogy distinctively implies comparison of things which are unlike, not only specifically or generally, but often even in substance or essence, and it more often draws attention to likeness or parallelism in relations rather than in appearances or qualities. Philosophically, it suggests such assumptions as that similar causes will produce similar effects or that what is true in one order of existence must be true in another (three principal types of ants) offering a curious analogy to . . . the hunting, pastoral, and agricultural stages in the history of human development—Lubbock) (such senile efforts to penetrate . . . the mystery of religion . . . have a real analogy to that final effort of the emotionally starved to grasp at love which has been called "old maid's insanity"—Ellis) Affinity adds to resemblance the implications of such a relationship as natural kinship, temperamental sympathy, similar experience, or historical influence, which is responsible for the likeness (in Keats, there are . . . phrases and paradoxes that have surprising affinities with Taoist thought—Binyon) (his face . . . had a curious affinity to the faces of old sailors or fishermen who have lived a simple, practical life in the light of an overmastering tradition—Galsworthy)

Ana equivalence, equality, sameness, identicalness or identity (see corresponding adjectives at SAME): agree-
ment, conformity, correspondence (see corresponding verbs at **agree**): analogousness, comparability, uniformity, parallelism (see corresponding adjectives at **like**)  
**Ant** unlikeness —**Con** *dissimilarity, difference, divergence, discrepancy, distinction*  
**likewise** *also, too, besides, moreover, furthermore*  
**limit** bough, branch, *shoot*  
**limber** adj *supple, lithe, litheossome, lissome*  
**Ana** plant, pliable, *plastic: flexible, *elastic, resilient, springy  
**Con** *stiff, inflexible, rigid, tense, stark, wooden*  
**limit** n **Limit, bound, confine, end, term** are comparable when they mean an actual or imaginary line beyond which a thing does not or cannot extend. **Limit** is the most inclusive of these terms because it carries no necessary implication of number, that always being suggested by the context; thus, a thing (as a man's strength, the extent of his authority, or the reach of his arm) may be said to have a **limit**, implying one only; some other thing (as a race course, a lifetime, or a period of time) may be said to have its **limits**, but since linear extent and duration are specifically implied, these limits are by implication two in number *(the **limits** of a room are usually its four walls)* *(nightingales will not pass their **limits**: they seem to have a marked-out range as strictly defined as the lines of a geological map—*Jefferies*)*  
**Also, limit** may be applied to a line which is fixed by nature or inner necessity, established by authority, or determined by agreement *(within the **limits** of human reason)* *(the **limit** of the fisherman's catch is determined by the state game laws)* *(lives within the **limits** of his income)* *(determine the **limits** for the treatment of a topic)* *(the **limit** of Santayana as a poet ... are the restraints of an academic habit—*Edman*)*  
**Bound** and **confine**, on the other hand, are applicable to only one of the limits that comprise the real or imaginary boundaries of a thing. Both terms are used chiefly in the plural, even when the boundary line is continuous and forms a circle or only one side; the same is true of a bounding surface that forms a sphere *(within the **bounds** of the earth)* *(thirty bonfires could be counted within the whole **bounds** of the district—*Hardy*)* *(the western **confines** of China)* *(within the **confines** of our subject)* *(the furthest **confines** of the family property—*Memen*)*  
**The distinctions between these two words are not always apparent; however, **bounds** usually indicates a point of view from within and suggests restriction, and **confines** indicates a point of view either from within or without and suggests enclosure *(the book passes beyond the **bounds** of decency)* *(how they behaved in their spare time, nobody cared, and few knew ... they had no **bounds** to respect—*Forde*)* *(strain the **confines** of formal monogamous marriage—*La Barre*)*  
**End** *(see also **end**: 2; **intention**)* applies usually to one of the two uttermost limits or extremes of a thing; this use is chiefly found in idiomatic phrases *(travel to the **ends** of the earth)* but it occurs also in reference to either extreme in an ascending or descending scale, or in a series that progresses from one extreme to its diametrical opposite *(at one **end** of the social scale there is the outcast or the parish; at the other **end**, the elite)* *(admired from one **end** of Europe to the other—*Andrews*)*  
**Term** applies usually to a limit in duration *(neither history nor archaeology has yet put a **term** to Roman civilization in London—*William Page*)*  
**Ana** limitation, restriction, circumscription, confinement (see corresponding verbs at **limit**): *border, margin, verge, edge, rim, brim, brink*  
**limit** vb **Limit, restrict, confine** mean to set or prescribe the bounds for a person or thing. **Limit** usually implies the predetermination of a point (as in time, in space, in quantity, in capacity, or in production) beyond which the person or thing concerned cannot go or is not permitted to go without suffering a penalty or incuring undesirable consequences *(limit the speed of automobiles to 45 miles an hour outside of towns and cities)* *(the time allowed for the erection of a building to one year from the date of the signing of the contract)* *(limit the acreage planted with potatoes)* *(limit a day's work to five hours)* *(the great point ... on these sacred occasions was for each man to strictly **limit** himself to half-a-pint of liquor—*Hardy*)* *(the Constitution **limits** his functions in the law-making process to the recommending ... and the vetting of laws—*Current History*)*  
**But limit** may also be used with reference to a bound or bounds not predetermined but inherent in a situation or in the nature or constitution of a thing *(the poor soil **limited** their crops)* *(a lonely young girl **limited** ... by the absence of companionship—*Handlin*)* or brought about as desirable by conscious effort or by full choice *(medical science knows how to **limit** these evils—*Eliot*)* *(limit* his aspirations to the search for the attainable)* **Restrict**, in contrast to **limit**, suggests a boundary that encircles and encloses rather than a point that ends; the term therefore often applies to something which can be thought of in the terms of the space, territory, or field that it covers. The word often also connotes a narrowing or tightening *(restrict the powers of a court)* *(restrict the freedom of the press)* *(restricted his diet on orders from his physician)* *(the bureau was dismembered, its staff dispersed, and its appropriations for research restricted almost to the vanishing point—*Heiser*)* *(combinations have arisen which restrict the very freedom that Bentham sought to attain—*Justice Holmes*)*  
**Circumscribe** differs from **restrict** in that its implication of an encircling or enclosing boundary is always clear; consequently, it is often preferred to **restrict** when the idea of being kept within too small an extent or range is to be stressed *(people ... think that the emotional range, and the realistic truth, of drama is limited and circumscribed by verse—*T. S. Eliot*) or when there is the intent to suggest a distinct, complete, but limited whole and its apartness from all that surrounds it *(to undertake here to inquire into the degree of its necessity, would be to pass the line which circumscribes the judicial department—*John Marshall*)* *(the world to which they belonged and for which they worked was strictly circumscribed and complete within itself—*Binyon*)*  
**Confine** may imply limitation, restriction, or circumscription, but it usually emphasizes the bounds which must not or cannot be passed; consequently, it often suggests severe restraint or restraints and carries connotations such as those of cramming, fettering, hampering, or bottling up that are not often present in the other words *(now I am cabined, cribbed, confined, bound in to saucy doubts and fears—*Shak*)* *(the distinction between a government with limited and unlimited powers is abolished, if those limits do not confine the persons on whom they are imposed—*John Marshall*)* *(it is not desirable to confine knowledge to whatever can be put into a useful shape for examinations, drawing rooms, or the still more pretentious modes of publicity—*T. S. Eliot* )* *(we are confined to our senses for perceiving the world—*Darrow*)*  
**Ana** define, *prescribe, assign: restrain, curb, check* *(Ant a wider —**Con** *expand, swell, distend: enlarge, *increase; *extend, lengthen, prolong, protract*  
**limm** vb *represent, depict, portray, delineate, picture*  
**limp, flopply, flaccid, flabby, flimsy, sleazy* mean deficient in firmness of texture, substance, or structure and therefore unable to keep a shape or in shape. **Limp** applies to
something that lacks or has lost the stiffness or firmness necessary to keep it from drooping or losing its original sturdiness or freshness (<collars limp with perspiration> <a limp body that seemed to have been poured into its clothes as if it were sand—Sitwell> <this body was dangling in a most uncomfortable position, all loose and limp, and shapeless—Dickens> <squash-flowers hanging limp as widow's weeds on the stringy stems—Britain> Floppy applies to something that sags or hangs limply (<a dog with floppy ears> <foreigners—fortuitously scarce—wear floppy ties, long hair and beards—Kinross> <an old lady in a ... floppy garden hat—Greene> Flaccid implies a loss or lack of elasticity or resilience and therefore an incapacity to return to an original shape or condition or to keep a desired shape; the term applies primarily to flesh and other living tissues (<flaccid muscles> <a flaccid stem> <now, in swift collapse, he was as flaccid as a sick hound and as disgusting as an aged drunkard—Bennett> In extended use the term implies lack of force or energy or substance (<the style is . . . worthless, slipshod, flaccid—Wildie> <our flaccid culture—T. S. Eliot> <when a writer thinks clearly his prose itself is sharp and fresh, and when his thought becomes flaccid his words too become limp, mechanical and fogged—Krim> Flabby applies to something that is so soft that it yields readily to the touch or is easily shaken (<her breasts had grown flabby and pendulous with many children—Buck> In extended use the term implies the loss or lack of what keeps a thing up or in good sound condition; it often carries suggestions of spinelessness, spiritlessness, or lethargy (<the flabby government which was . . . incapable of defending its own interests—Owen Lattimore> <very few . . . are worth converting. Their minds are intrinsically flabby and parasitical—Mencken> Flimsy applies to something that by its looseness of structure or insubstantiality of texture cannot hold up under use or strain (<a wooden seat put together with nails—a flimsy contrivance, which defies all rules of gravity and adhesion—Jeffries> In extended use the term applies to whatever is so frail or slight as to be without value or endurance (<a flimsy excuse> <the story is fashioned of such flimsy stuff that it almost tears apart in the telling—Krouth> Sleazy applies essentially to flimsy textiles, but it often suggests, as flimsy need not, fraud or carelessness in its manufacture (<a sleazy dress> <thin sleazy woolens> In extended use the term may suggest stress or inferiority of standards (<a sleazy little gold digger—New Republic> <the sleazier forms of competition—Fortune> or inferiority of the resultant product (<sleazy new apartment blocks, their broken, rubber-salvaged bakc unfurint—Flora Lewis> but often its suggestion is one of cheap shabbiness inferiority (<a sleazy piece of the old, tedious reality—Mary McCarthy> <a stammered, sleazy chronicle, told by fits and starts—Time> Ana *loose, slack, relaxed, lax: limber, *supple Con *stiff, rigid, inflexible, stark, wooden, tense; *firm, hard, solid: brittle, crisp (see fragile)

**limpid** clear, transparent, translucent, lucid, pellucid, diaphanous  
Ana *pure, sheer: lucid, perspicuous, *clear  
Ant turbid —Con muddy, roily, (see turbid): *obscure, vague, dark: murky, dusky (see dark)

**line** n Line, row, rank, file, echelon, tier are comparable when meaning a series of things arranged in continuous or uniform order. Line means little more than this, except when it is attached to a specific application that increases its implications; thus, a line of type may equal a line of poetry, but there is a wealth of implication in the second that is absent from the first (<a line of trees> <soldiers fall in line> <the crowd formed a line in front of the ticket office> <there were three lines of enlisted men awaiting examination by physicians> <a line of trading posts from the Mississippi ... across the Rocky Mountains—Irving> Row may suggest one line or one of several parallel lines; it is applicable to lines composed of persons or of things whether they range horizontally or vertically or abreast or away from one (<a row of trees lines the south side of the street> <rows of seats in a theater> <the shrubs are arranged in rows> Rank and file are found chiefly in military use, rank denoting a row of men side by side, file a row of men one behind another (<march in single file> <the front rank was ordered to take one pace forward> The conjoined use of these terms in rank and file is an idiomatic extension meaning the masses of men as distinguished from their leaders or rulers. Echelon usually implies a regular arrangement or formation in which each unit (as one of a series of parallel ranks of troops or one of a fleet of vessels headed in the same direction) is a little to the left or to the right of the unit immediately behind. Tier applies to one of a set of rows arranged one above another; it occasionally refers to persons but usually deals with parts of a structure or framework which are repeated (<the seats rise in tiers in the great Opera House> <three tiers of arches rose on each side of the cathedral's nave> <their mountain-like Sans Philip [a Spanish warship] . . . with her yawning tiers of guns—Tennyson>  
Ana *succession, progress, series, sequence, chain

**line** vb Line, line up, align, range, array mean to arrange in a line or in lines. Line, or more often line up, implies setting in single file or in parallel rows (<line up prisoners for identification> <line up troops for inspection> <four or five men were lined up at the bar—Basso> Align stresses the bringing of points or parts that should be in a straight line into correct adjustment or into correspondence (<align the lenses of a telescope> <align the front and rear wheels of an automobile> <align type in printing> <the tents were aligned in two rows—Mailer> Range stresses orderly or correct disposition, sometimes merely in straight or parallel lines, but more often with the added implication of separation into groups or classes according to some plan or design (<oaken benches ranged in seemly rows—Wordsworth> Array implies actual formation in order, especially battle order, and therefore suggests full equipment and readiness for action (<there is a great Field-Marsh, my friend, who arrays our battalions; let us to Providence trust, and abide and work in our stations—Clough> <scarcely had time to array his men at the townward wall before arrows, stones, and heavy javelins . . . began to fall upon them—A. C. Whitehead>  

These words also are comparable in extended use. Line up stresses organization for unity or singleness of effort (<line up the opponents of a measure to achieve its defeat> <line up public opinion in favor of a proposal> <lined up on the side of those who oppose even attempting to set up peaceful coexistence with Russia is the FBI—New week> Align is commonly used reflexively in this connection and implies falling into line or into a lineup (<at the beginning of World War I France, England, and Belgium aligned themselves with Serbia> <so long as the symptoms failed to align themselves with any known disorder, they were supposed to be amenable to neighborhood advice—Mary Austin> Range implies putting or falling precisely into a group (as a class, party, rank, or category); it may suggest alignment but more often connotes partisanship or alliance or, when used of things, susceptibility of classification (<it's better to be lowly born, and range with humble lives in content—Shak> <they differed violently and ranged themselves into distinct schools of thought—Dinsmore> Array in its extended use retains its implication of
ordinarily; it sometimes also suggests arrangement in logical or chronological order, or as parts of a design. These doubts will be arrayed before their minds—Farrar

More often, however, it stresses the impressive or imposing character of an opposition—several of the best legal minds were arrayed against the prosecution—so much prejudice of one kind or another was arrayed against it that it was not till nearly two hundred years after its discovery that salt peter became the god of war—Encore

Anna marshal, arrange, *order

Con derange, disarrange, *disorder, disturb: disperse, dissipate, *scatter

lineage *ancestry, pedigree

lineal, linear share the basic meaning of or relating to a line or lines, but they are clearly distinguished in their specific senses. Lineal is more often applied to a direct line of succession from or to a common ancestor either physical or spiritual, and is often distinguished from collateral; thus, the lineal descendants of a man would include all his sons and daughters, all his grandsons and granddaughters, all his great-grandsons and great-granddaughters, etc. George Washington had no lineal kinsmen to inherit his property, for he had no children—these men, the lineal descendants of the mystics, found the source of certainty in inner experience, in feeling and instinct—Thilly

Linear tends to lay the stress on a relation to a line other than a line of succession, either in fact or in likeness; often it suggests a relation to something having or felt as having one dimension only, usually length, especially in contrast to what has two or more dimensions—linear measures such as the inch, foot, yard, and rod are used in measuring lengths (as of cloth, rope, poles, wire, and edges or bounds)—from the linear dimensions of a room we can compute the square feet of floor to be covered—a conductor of electricity (as a wire) which is very small or negligible in two of its dimensions, is called a linear conductor—atoms which are so small that it takes one hundred millions of them lying side by side to extend one inch—Darrow

Darrow was measure, the inch, foot, yard, and rod are used in measuring lengths (as of cloth, rope, poles, wire, and edges or bounds) which is very small or negligible in two of its dimensions, is called a linear conductor—atoms which are so small that it takes one hundred millions of them lying side by side to extend one inch—Darrow

line up *line, align, range, array

lineage 503

liquid

Romeo and Juliet the profounder dramatist shows his lovers melting into unconsciousness of their isolated selves—T. S. Eliot

I cannot look up to your face. You melt my strength—Lowell or to tones, colors, and sounds that have a liquid quality and merge imperceptibly with others—snow-light cadences melting to silence—Keats

substrate and shadow melted into each other and into the vastness of space—Glasgow

Deliquesce implies a disappearing by or as if by melting away and applies especially to gradual liquefying through exposure to the air and the absorption of moisture from it (hygroscopic salts that deliquesce in moist air) or to plant structures (as mushrooms) that liquefy in their decay—a great display of specimens of fungi that presently dried up or deliquesced and stank—H. G. Wells

In its extended use deliquesce stresses loss of coherence rather than disappearance—Flaubert's instincts were less epical than lyrical, and drama itself was deliquescent into indeterminate forms—Levin

Their lives tended to deliquesce into a murmuring indeterminateness of language—Matthiessen

Fuse (see also MIX) may sometimes replace liquefy or melt—thunderstorm had fused the electric mains—Finlay

but more often it stresses union (as of two or more metals into an alloy) by or as if by the action of intense heat—foundries which fuse zinc and copper into hard, bright brass—Newweek

In its extended use, too, fuse stresses union (a ship, itself a little community in which people of various backgrounds are temporarily fused—Felix Morley

The strata fused together by heat—Livingstone

Thaw may specifically replace melt in reference to something (as ice or snow) that is frozen or in extended use to something (as a cold heart, a cold disposition, or extreme reserve) equally stiff or rigid—(the midday sun has thawed the ice on the roads)—a lady... whose very looks would thaw a man more frozen than the Alps—Shirley

A native reserve being thawed by this genial consciousness—Hawthorne

liquid adj. Liquid, fluid are comparable both as adjectives meaning composed of particles that move easily and flowingly and change their relative position without any perceptible break in their continuity and as nouns denoting a substance composed of such particles. Both terms imply an opposition to solid, but liquid is the more restricted in its application, for the term implies the flow characteristic of water and refers only to substances which, like water, have a definite volume but no independent form except such as is temporarily given by their container—such potable liquids as water, milk, and wines—are blood that does not remain liquid long after removal from the blood vessels—Fluid, on the other hand, implies flow of any sort and is applicable not only to all liquids but also to gases, which, unlike liquids, have neither independent volume nor shape—air whether in the gaseous or liquid state is a fluid—fluid blood

Fluid is especially appropriate for referring to a substance that is highly viscous—molasses is a fluid substance or to one liquefied (as by melting, dissolving, or saturating with water)—(fluid rock)

Fluid wax (mud is fluid earth).

In extended use fluid is opposed to rigid, fixed, unchangeable—open societies of which the boundaries are fluid or indefinite, such as humanity or even the League of Nations—Alexander

Emotion, formless, chaotic, fluid in itself—Lowes

In London all values and all meanings were fluid—Rose Macaulay

Liquid, on the other hand, often implies an opposition to harshness—liquid tones—thy liquid notes that close the eye of day—Milton but it sometimes implies transparency or extreme softness or both—his liquid glance—Wharton

With what liquid tenderness she turned and looked back—
In financial circles, where both terms are used, fluid may distinctively apply to money or funds that are not permanently invested or that are constantly in circulation (the fluid gold of international trade) but more often the terms are used interchangeably to imply the quality or condition of assets that are in the form of money or are easily convertible into money and are therefore readily available for another use.

list n List, table, catalog, schedule, register, roll, roster, inventory denote a series of names or of items written down or printed as a memorandum, a record, or a source of information, but, because of wide differences in their range of application, they are not freely interchangeable. List is the most comprehensive and the most widely applicable of these terms since it may or may not imply methodical arrangement (as in alphabetical or chronological order) and it may itemize units of various kinds (as persons or objects or facts or words or figures) (a grocery list). A list (price list) (an engagement list) Table is also widely applicable, but it distinctively implies arrangement in an order that will assist the person who makes use of it in quickly finding the information he desires; consequently, it usually suggests presentation of items in columns, often, when the items are related or associated with each other, in parallel columns; thus, a table of weights may give in the first column an alphabetical list of the weights of all countries and add in the following columns, directly on a line with each of these names, the place in which it is used, its equivalent in American or British weights, and its equivalent in metric weight (a table of contents of a book) (a table of logarithms) (annuity tables) (a timetable of trains) Catalog basically applies to a complete list or enumeration of all instances of a kind (a catalog of the Lepidoptera of Michigan) (a catalog of the popes) The term is used more often of an informative itemized descriptive list (as of the books in a library, the works of art in a museum, the courses given in a university or college, or the articles for sale by a company). Because business, educational, and art catalogs often contain much other information of value, the term often loses its essential meaning of list, although these catalogs have usually for their main object the presentation of complete lists. Schedule (see also PROGRAM) applies especially to an itemized statement of particulars, whether it is appended to a document (as a bill or statute) to provide supplementary details (Schedule D of the tariff bill) or is separate (a schedule of a bankrupt's debts) (a schedule of assets and liabilities) Register is applicable primarily to the official book, parchments, or papers in which are entered the names of time names or items of a specified character, together with pertinent details, for the sake of maintaining a record (a register of births) (a register of marriages) (a register of seamen) Since, however, these entries constitute not only a record but also a list or catalog, the term often more strongly suggests an official listing or enumeration than a series of entries (this name is not in the register of voters) Roll is applicable to a list and especially an official list of the names of those who belong to a certain group or force; thus, a muster roll includes the names of all the officers and men of a military body or of a ship's company present or accounted for on the day of muster; a class roll is a list of all students belonging to a class. Roster, which is chiefly a military term, applies basically to a table containing a roll of officers and men or sometimes of units and specifying such matters as the order of their rotation in duties or their special assignments. Inventory is a catalog of the goods and chattels and sometimes the real estate held by a person or a corporation at a particular time (as at the person's death or at the stocktaking of the corporation) (the merchant makes an inventory of his stock annually on January 15th) In extended use the term often refers to a list similar in its details to those of a true inventory (nothing short of an authentic passion for concrete detail ... can give the saving gusto and animation which carry off safely the long inventories of utensils and articles of food and attire in Scott and Defoe—Montague)

lively adj Lively, animated, vivacious, sprightly, gay denote in common keenly alive. Lively suggests especially briskness, alertness, or energy (spent an hour in lively talk about their respective travels in England and France) (she ... was a lively conversationalist, advanced, original—Gore) (the horses ... were lively, and sprang about the street—Thackeray) Animated applies especially to what is also spirited or bright (was not nearly so animated as he had been in his pre-khaki days; there was a quiet exultation in his manner rather than a lively excitement—H. G. Wells) (the animated excitement and hubbub that gives the ... institution its friendly vitality—Saarinen) Vivacious and sprightly suggest greater lightness of spirits or quickness of wit; they apply especially to manner or language (remember her as very pretty and vivacious ... I never met a girl with as much zip—Ring Lardner) (in contrast to the dour, lethargic, and solitary orang, the chim- panzee is highly active, vivacious ... and uninhibited vocal—La Barre) (the was sprightly, vigorous, fiery in his belief in success—Crane) (readers prefer sprightly trash to dull excellence—Canby) Gay implies utter carelessness and exuberant or overflowing spirits (wild with joyful
living

adj
Living, alive, animate, animated, vital mean having life as distinguished from those from which life has departed; they are distinguishable chiefly by the fact that alive follows the noun it modifies either directly or as a prepositional adjective (among living men) (among men still alive) (all living things) (of all it ever was my lot to read, of critics now alive, or long since dead—Cowper) (our appreciations of living or dead writers—T. S. Eliot) 

Animate is opposed to inanimate and is applied to living organic bodies as contrasted with dead organic bodies or, more often, with inorganic bodies having no capacity for life (those who ignore the natural world around, animate and inanimate—Spencer) 

Animated (see also lively; compare animate under quicken vb) is opposed to lifeless or inert, and may apply to something which, once devoid of life, becomes alive (viruses that may behave as animated bodies or as lifeless crystals) or may be used to perfect a comparison of something by its nature lifeless with something living (a large Australian phasmid popularly known as the animated stick) (the moral relativism engendered by the notion that man is nothing more than an animated machine—Nagel) 

Vital is applied chiefly to qualities (as power, force, energy, or motion) which result naturally from or are associated with life in distinction from qualities which result from purely physical or chemical causes (vital functions) (it derived its growth and movement from its internal vital force, not from external sources of energy—S. F. Mason) 

When these words are applied to things which have not life in the sense defined, they form other groupings. All, however, stress qualities suggestive of life. Living usually suggests continued or continuous existence with no diminution of activity or efficacy (a living principle) (a living force) (ballet as an art form was living and not dead—Coleman) Alive and vital are very close in their emphasis on abundance of vigor, on capacity for development, or on powers of endurance; both are applicable to persons as well as to things (we are not sufficiently alive to feel the tang of sense nor yet to be moved by thought—Dewey) (Queen Victoria remains... one of the most absorbing figures of her time. Obviously she is still alive enough to be condemned—Times Lit. Sup.) (the veterans insist that college be made alive, dynamic, vital—Fine) 

Alive and animated often imply the presence of living things in great numbers (the stream is alive with trout) (as animated as water under a microscope—Hardy) Animated also may stress endowment with qualities suggestive of life, especially motion (animated pictures) (an animated doll) (the animated signs that blink, bubble, and bedazzle visitors to Times Square—Fixx) 

Living n
Living, livelihood, subsistence, sustenance, maintenance, support, keep, bread, bread and butter are comparable when they denote the means, especially the amount of money or goods, required to keep one supplied with the necessities of life (as food, housing, and clothing) and sometimes also the nonessentials that with the necessities supply the needs of a full life. Living is perhaps the most general term since it may denote either the necessities and provisions with which one supports life or the income with which these may be obtained (had undertaken to work as a manager in return for a living and a share of the crops—Glasgow) (many of his other customers had gone... so that his own poor living was cut in impossible half—Malamud) (an industrial community, in which livings are insecure, incomes are inadequate—W. H. Hamilton) Typically it is used in a few simple idioms; thus, a man usually earns or makes or gets a or his living; one does something (as writing, spinning, or farming) for a or his living; someone or something owes or provides him a living (I am quite pleased to make my living by what I write, but the attempt to write for my living would be hopeless, for I can write nothing that is not in itself a pleasure to me to write—Ellis) (men who start out with the notion that the world owes them a living—Sumner) 

Livelihood may be indistinguishable in meaning from living (the population derives its livelihood from farming—Americana Annual) (the livelihood of the people of Malaya has always been uncertain because of the narrow base of their economy—Langdon) (the profession is of necessity a means of livelihood or of financial reward—MacIver) but unlike the latter it may apply specifically to the means (as a trade, profession, or craft) by which one earns a living (education is a preparation for life, not merely for a livelihood, for living not for a living—Sampson) (it is their profession and livelihood to get their living by practices for which they deserve to forfeit their lives—South) (had a low opinion of politics as a livelihood—White) 

Subsistence may be a close synonym of living (Harbor Springs relies for its subsistence chiefly on the summer vacationist trade—Amer. Guide Series: Mich.) (between disappointment and expectation, is soon disgusted, and returns to pursue his more legitimate means of subsistence—Burroughs) but often it more specifically denotes means sufficient merely to maintain life and implies an amount of money or supply of goods that provides a person or his family with no more than basic necessities (as of housing, food, and clothing) (the question whether people on relief shall be provided only with subsistence) (only in the meager and most limited sense is subsistence a standard of living—Harper's) 

Sustenance is often used in place of living when the emphasis is upon the food that is necessary not only to one's existence but to one's well-being (he was able to wring only a bare sustenance from his farm) (that thin layer of topsoil that... provides the crops—Glasgow) 

Maintenance usually denotes either a complex of necessities such as food, lodging, and laundry, and sometimes clothing or the amount needed to supply such a complex (advertised... for a general resident doctor at $300 a
month and maintenance—Greer Williams> enough to
give him books, and a moderate maintenance—Cibber>
(at least half of them are living parasitically on the other
half instead of producing maintenance for themselves—
Shaw> Support applies not only to the amount of money
that provides maintenance but to the person who provides
the means by which others are maintained (he is the sole
support of his family) (they look for their support to him—
(C. L. Thompson)> Keep is a less dignified synonym of
maintenance and is applicable not only to men but to ani-
imals (the horse is scarcely worth his keep) (hired men
could no longer be had for ten or fifteen dollars a month
and keep—White)> Bread and bread and butter are synec-
doches for living or sustenance, partly as a result of the
use of the former in the Lord's Prayer “Give us this day
our daily bread” (he is a fine poet, but he makes his
bread and butter selling insurance)

Ana abominable, abhorrent, detestable, odious, *hateful:
repellent, *repugnant, distasteful, obnoxious, invidious
Ant engaging, inviting —Con attractive, alluring, charm-
ing, enchanting, fascinating, bewitching (see under AT-
TRACT)

local adj *insular, provincial, parochial, small-town
Ana narrow, narrow-minded (see ILLIBERAL): circums-
cribed, limited, restricted, confined (see LIMIT vb)
Ant cosmopolitan

locality, district, vicininity, neighborhood denote a more or
less definitely circumscribed place or region, especially
from the point of view of those who live in it. Locality
applies to a region of undefined boundaries, but it usually
suggests an area round a center (as the place where the
water or the flowers lives) (he no longer resides in this lo-
cality) or round a place remarkable for some event or
landmark (the deliverer is to be sought in the locality
nearest to the chief scene of the invasion—Stanley)
District usually applies to a locality that has clearly defined
boundaries determined (as by the nation, state, or town)
for such purposes as for administrative and electoral use
( representative of the Fifth Congressional District)
(federal judicial districts) <police district) <postal
district) In a less specific but in this instance more per-
tinent sense district is often applied to a locality with
reference to some of its most obvious or clearly defined
characteristics rather than to the exact area it covers
( the agricultural districts of the United States) (the Lake
District of England) (the mining district of Pennsylvania)
( the theater district of a city) Vicinity never loses its
basic implication of nearness but, since it suggests a dis-
tinct point of view, it applies only to the locality that is
very near from that point of view (there are no ponds in
this vicinity) Neighborhood usually carries an implied
reference to one's neighbors and it may be preferred to
vicinity, which it closely resembles in denomination, when
the emphasis is on the inhabitants rather than on the
locality referred to (there is no one of that name in this
neighborhood) (lived in a good neighborhood) (she is on
good terms with the entire neighborhood) However, it is
frequently interchangeable with vicinity when the emphasis
is on proximity; thus, a man might live in the
neighborhood or the vicinity of a school (the country must be on guard
against the establishment of hostile bases in its neighbor-
hood)

Ana region, *area, zone, belt, tract: section, sector (see
PART): territory, *field, bailiwick, province, sphere, domain
location *place, position, situation, site, spot, station

1 lonely, lonesome, *alone, forlorn, lorn, solitary, forlorn, lorn, desolate
loll
*idle, loaf, lounge, laze

long vs Long, yearn, hanker, pine, hunger, thirst mean to have a strong and urgent desire for something. One longs when one wishes for something, and especially something remote or not readily attainable, with one's whole heart or with great earnestness (socialists who long to see the world a better place—Woodrow Wyatt) (ever have I longed to slake my thirst for the world's praises—Keats) (wretched sensitive beings like ourselves longing to escape—Powys) (in the midst of the finesse, and the artistry . . . one longs at times, not for less refinement but for more virility—Lowes) One yearns when one regards or desires something with eager, restless, often tender or passionate longing (but Enoch yearned to see her face again—Tennyson) (she gazed into his faded blue eyes as if yearning to be understood—Conrad) (dreamers who yearned for things that are not, for things to come or things that have been—Norman Douglas)

hanker One hankers when one is possessed with or made uneasy by a desire because of the urgency of a physical appetite (hanker for fresh fruit in the wintertime) or because of such a passion as greed, lust, ambition, or covetousness (she . . . still hankedered, with a natural hankering, after her money—Trollope) (hankering from the start after the office of tribune—Buchan) or for something beyond one's reach or one's powers even if only for the moment (to wean your minds from hankering after false Germanic standards—Quiller-Couch) (too long a siege of the familiar . . . sets us hankering after the strange—Lowes)

hankering But often hanker is weakened to the point that it means little if any more than want (although collectors still hanker after the period pieces, the trend is for simplicity—Tomkinson) (one hankers after one's own order of comfort in advancing age—de la Mare) One pines when one languishes or grows weak through longing for something that one wants (filled—Quiller-Couch) or for something beyond the office of tribune—Buchan or for something over one's reach or one's powers even if only for the moment (she gazed into his faded blue eyes as if hankering after false Germanic standards—Quiller-Couch) (too long a siege of the familiar . . . sets us hankering after the strange—Lowes)

hungered One hungered when one wishes for something, and especially something beyond the office of tribune—Buchan or for something over one's reach or one's powers even if only for the moment (she gazed into his faded blue eyes as if hankering after false Germanic standards—Quiller-Couch) (too long a siege of the familiar . . . sets us hankering after the strange—Lowes)

hunger Last, one hungered when one wishes for something, and especially something beyond the office of tribune—Buchan or for something over one's reach or one's powers even if only for the moment (she gazed into his faded blue eyes as if hankering after false Germanic standards—Quiller-Couch) (too long a siege of the familiar . . . sets us hankering after the strange—Lowes)

hankers One hankers when one is possessed with or made uneasy by a desire because of the urgency of a physical appetite (hanker for fresh fruit in the wintertime) or because of such a passion as greed, lust, ambition, or covetousness (she . . . still hankedered, with a natural hankering, after her money—Trollope) (hankering from the start after the office of tribune—Buchan) or for something beyond one's reach or one's powers even if only for the moment (to wean your minds from hankering after false Germanic standards—Quiller-Couch) (too long a siege of the familiar . . . sets us hankering after the strange—Lowes)

hankering But often hanker is weakened to the point that it means little if any more than want (although collectors still hanker after the period pieces, the trend is for simplicity—Tomkinson) (one hankers after one's own order of comfort in advancing age—de la Mare) One pines when one languishes or grows weak through longing for something that one wants (filled—Quiller-Couch) or for something beyond the office of tribune—Buchan or for something over one's reach or one's powers even if only for the moment (she gazed into his faded blue eyes as if hankering after false Germanic standards—Quiller-Couch) (too long a siege of the familiar . . . sets us hankering after the strange—Lowes)

hungered One hungered when one wishes for something, and especially something beyond the office of tribune—Buchan or for something over one's reach or one's powers even if only for the moment (she gazed into his faded blue eyes as if hankering after false Germanic standards—Quiller-Couch) (too long a siege of the familiar . . . sets us hankering after the strange—Lowes)

hankers One hankers when one is possessed with or made uneasy by a desire because of the urgency of a physical appetite (hanker for fresh fruit in the wintertime) or because of such a passion as greed, lust, ambition, or covetousness (she . . . still hankedered, with a natural hankering, after her money—Trollope) (hankering from the start after the office of tribune—Buchan) or for something beyond one's reach or one's powers even if only for the moment (to wean your minds from hankering after false Germanic standards—Quiller-Couch) (too long a siege of the familiar . . . sets us hankering after the strange—Lowes)

hankering But often hanker is weakened to the point that it means little if any more than want (although collectors still hanker after the period pieces, the trend is for simplicity—Tomkinson) (one hankers after one's own order of comfort in advancing age—de la Mare) One pines when one languishes or grows weak through longing for something that one wants (filled—Quiller-Couch) or for something beyond the office of tribune—Buchan or for something over one's reach or one's powers even if only for the moment (she gazed into his faded blue eyes as if hankering after false Germanic standards—Quiller-Couch) (too long a siege of the familiar . . . sets us hankering after the strange—Lowes)

hungered One hungered when one wishes for something, and especially something beyond the office of tribune—Buchan or for something over one's reach or one's powers even if only for the moment (she gazed into his faded blue eyes as if hankering after false Germanic standards—Quiller-Couch) (too long a siege of the familiar . . . sets us hankering after the strange—Lowes)

hankers One hankers when one is possessed with or made uneasy by a desire because of the urgency of a physical appetite (hanker for fresh fruit in the wintertime) or because of such a passion as greed, lust, ambition, or covetousness (she . . . still hankedered, with a natural hankering, after her money—Trollope) (hankering from the start after the office of tribune—Buchan) or for something beyond one's reach or one's powers even if only for the moment (to wean your minds from hankering after false Germanic standards—Quiller-Couch) (too long a siege of the familiar . . . sets us hankering after the strange—Lowes)

hankering But often hanker is weakened to the point that it means little if any more than want (although collectors still hanker after the period pieces, the trend is for simplicity—Tomkinson) (one hankers after one's own order of comfort in advancing age—de la Mare) One pines when one languishes or grows weak through longing for something that one wants (filled—Quiller-Couch) or for something beyond the office of tribune—Buchan or for something over one's reach or one's powers even if only for the moment (she gazed into his faded blue eyes as if hankering after false Germanic standards—Quiller-Couch) (too long a siege of the familiar . . . sets us hankering after the strange—Lowes)
look n 1 Look, sight, view, glance, glimpse, peep, peek are comparable when meaning both the act of seeing something and the thing that is seen. Look implies the directing of one's eyes to a thing or the use of one's power of vision (let me have a look at the patient) (one dying look he upward cast—Scott) (darted a quick look at me—Kenneth Roberts) When applied to the thing seen (see also appearance), the impression produced tends to be stressed (judging by the look of his rash, he has scarlet fever—the look of his face as he spoke was by no means pleasant—Trollope) Sight, on the other hand, so strongly implies reference to the object that is seen that it suggests reception by the visual powers or presentation to the sense of sight rather than a conscious use of that sense. When the term denotes the act or the power of seeing, one takes a look at something which catches his sight; one has far sight which sees things at a great distance (the litter is set down stage in full sight of the audience—Millay) (I was out of sight of the rest of them—L. A. Viereck) When the term denotes the thing that is seen, qualifying words or phrases are usually necessary to suggest its characteristic, appearance, or the effect it produces (there is no sight in the world equal to it) (a disagreeable sight—the blossoming of a cherry orchard... is a sight eagerly awaited—Amer. Guide Series: Mich.) (the earth, and every common sight—Wordsworth) View, especially when it denotes the act of seeing, implies chiefly the exercise of the mental rather than the physical vision or an attempt to comprehend something beyond the range of the physical vision (bring the buried ages back to view—Gray) (the scientific view of the world is not indifferent to quality or value. It seeks to find law, harmony, uniformity in nature—Inge) (Unitarianism with its more cheerful view of human nature—Sperry) Often, when seeing through the eyes is suggested, view takes place of sight in either sense, with, however, a stronger implication of a directed or fixed gaze (thy dales, and hills, are fading from my view—Keats) (a house that affords a view of the ocean) (trees that intercept the view) Glance may denote something which is seen as a sudden flash or gleam, or the presence or movement of which is recognized by a swift sudden flash (with winged expedition swift as the lightning glance—Milton) (each sword's bright glance, seemed summons from their fate—Stirling) It is in this sense that "a glance from the eye" is often to be interpreted, especially in older writings (darst no scornful glances from those eyes, to wound thy lord—Shak.), but the transition in sense from the flash that is seen to the quick look that is given is not clearly marked (lift our heads to heaven, and never more abase our sight unto the ground—Scott) (a glance satisfied him of the hopelessness of the thing and the thing that is seen. Look implies the directing flash or gleam, or the presence or movement of which is seen as a flash or a gleam (no dear glimpse of the sun's lovely face, strikes through the solid darkness that pays scant attention to its consequences or the truth of its statements) (loose habits) (loose living) Loos is also applicable to what is not firmly or tightly held by, attached to, connected with, or fitted to something that supports or guides, or something that it is intended to cover (drive with loose reins) (a loose belt) (a loose coat) (loose joints) (a loose sense of a word) Often the word applies to a substance or fabric having particles or filaments which are not close or compact in arrangement (loose soil) (a loose weave) Relaxed implies a loss of some tightness, tension, strictness, or rigidity, rather than total freedom from restraint or considerable departure from a normal state (as of discipline, fitness, or firmness); not only does it not suggest wildness, lawlessness, or immorality, but it rarely suggests anything worse than an easing up, a mitigation, an alleviation of strain, or a softening (relaxed discipline) (relaxed nerves) (Augustus during these months was suffering from the relaxed and surfeited mood which always attends success—Buchan) (White House family life had been easy and relaxed... but it had maintained the standards of gentlefolk—S. H. Adams) (the relaxed attitude of the British toward the sedition expressed every day in Hyde Park—R. K. Carr) Slack (see also negligent) comes close to relaxed in its limitations and implications but it may stress lack of firmness or steadiness rather than a release from strain or severity; thus, a slack rope is one that is not taut, usually one that is not as taut as is necessary or de-

A colon (:) separates groups of words discriminated. An asterisk (*) indicates place of treatment of each group.
sirable; a slack hold is a weak, unsteady hold (the tired arms lie with every sinew slack —Quiller-Couch) (a pair of sly, keen eyes are dancing in his slack, clown’s face —New Yorker) (the rhythms often are indistinguishable from those of prose and the effect is often flat and slack —Drew) Slack is applied both to business or work that is subject to periods of lessened activity and to the periods or seasons when business is dull or work is hard to find (it’ll be play to me after I’ve done my day’s work, or any odd bits o’ time when the work’s slack —George Eliot) (the slack season for carpenters) Like slack, lax usually stresses lack of steadiness, firmness, and tone (felt the lax droop of her shoulder against his arm —Wylie) (sat there in one of those loose lax poses that came to her naturally —Woolf) In application to nonmaterial things it is not always clearly distinguishable from other senses in which its primary stress is on lack of necessary strictness, severity, or precision (see lax under NEGLIGENCE) (his laws were in advance of general public opinion, an opinion which grew laxer as the years passed —Buchan) (the old unity . . . has been replaced by a new unity based on the principles of chirivialy and courteously love . . . . . This unity is relatively lax and slight —R. A. Hall) *Ana limp, flabby, flaccid, flimsy: *free, independent; disengaged, detached (see DETACH): casual, desultory, hit-or-miss, happy-go-lucky, *random, haphazard: *negligent, remiss, lax, slack: *careless, heedless, thoughtless *Ant tight: strict —Con taut, tense (see TIGHT): *rigid, stringent, rigorous: precise, exact, *correct: tied, bound (see TIE vb): restrained, curbed, checked, inhibited (see RESTRAIN)

beauteous, pulchritudinous, good-looking

An adjective describing someone or something as

An adjective describing someone or something as
lurch
*stumble, trip, blunder, flounder, lumber, lugubrious
doleful, dolorous, *melancholy, rueful, plain-lunacy
* insanity, psychosis, mania, dementia
lumbar
*stumble, trip, blunder, lurch, flounder, galumph, lollop, bumble
luminous
*bright, brilliant, radiant, lustrous, effulgent,lucent, refulgent, beaming, lambent, incandescent
Ant
*pacify, placate, mollify: *moderate, qualify, temper: allay, assuage, alleviate, *relieve
Ant
*agitate
lull
*vb: calm, compose, quiet, quieten, still, soothe, settle, lull
vb: *laughable, risible, ridiculous, comic, comical, *paying, gainful, remunerative, profitable
lucrative
lure
Lure, bait, decoy, snare, luring, jolly, jovial: cheerful, *glad, joyful
lumber
*reel, stagger, totter: *plunge, pitch, dive
lure
*Lure, bait, decoy, snare, trap
Analogous words:
*paying, gainful, remunerative, profitable
*laughable, risible, ridiculous, comic, comical, farcical, droll, funny
absurd, preposterous, *foolish, silly: grotesque, bizarre, antic, *fantastic: amusing, diverting, entertaining
(see AMUSE)
lugubrious
doleful, dolorous, *melancholy, rueful, plain-
lunacy
* insanity, psychosis, mania, dementia
lumbar

Ant
*agitate
lull
*vb: calm, compose, quiet, quieten, still, soothe, settle, lull
vb: *laughable, risible, ridiculous, comic, comical, *paying, gainful, remunerative, profitable
lucrative
lure
Lure, bait, decoy, snare, luring, jolly, jovial: cheerful, *glad, joyful
lump, lollop, bumble
lurid

Distinctively, it may apply to the coaxing of something from someone by such means (although he used the most subtle means to inveigle the author into the office to read the press notices, he never succeeded—Bok) (over gin and water we inveigled him to take a pack of well-worn cards—Beaglehole). Decoy may mean to entrap or lead (as into danger) by artifice and especially by false appearances (the islanders had been living in relative opulence from the wreckages of ships which they had skillfully decoyed to destruction on the reefs—Barbour) (the female bird . . . practiced the same arts upon us to decoy us away—Burroughs). Temp historically meant and still may mean to entice into evil through hope of pleasure or gain (weak . . . nations tempt others to prey upon them—Richards). In more general use it may carry a suggestion of exerting such an attraction as inclines one to act against one's better judgment or higher principles (the receipt of remuneration from patents or copyrights tempts the owners thereof to retard or inhibit research or to restrict the benefits derivable therefrom—W. T. & Barbara Fitts) but more often implies an attracting or inducing that is morally perfectly neutral (the decision to tempt women away from their gray flannel suits . . . with a kaleidoscope of color—American Annual) (had a personality that could tempt a female ichthysologist's interests away from fish—Current Bio). Seduce usually means to lead astray (as from the course of rectitude, propriety, or duty) by overcoming scruples (the hideous beast whose craft had seduced me into murder—Poe) and even in its most favorable senses in which it implies a moving or turning into a new course it commonly suggests some degree of deluding or misleading as the method employed (words when used with the gift of magic can seduce a reader into belief that has no roots in reality—Feld) (knew how to seduce the interest of his pupils; he did not drive, he led—Anspacher).

Ana ensnare, snare, entrap, trap, capture, *catch, bag: bewitch, fascinate, allure, captivate, *attract: blandish, wheedle, cajole (see Coax)

Ant revolt, repel

lurid

*gastly, grisly, gruesome, macabre, grim

Ana livid, *pale, pallid, wan, ashy, ashen: *sinister, ma- lignant, baleful, malefic, maleficient

lurk

Lurk, skulk, slink, sneak do not share a common denotation, but they are comparable because the major implication of each word is furtive action intended to escape the attention of others. To lurk is to lie in wait (as in an ambush); the term sometimes implies only a place of concealment (his faithful Tom . . . with his lurk behind—Mead) (had a personality that could tempt a female ichthysologist's interests away from fish—Current Bio). Seduce usually means to lead astray (as from the course of rectitude, propriety, or duty) by overcoming scruples (the hideous beast whose craft had seduced me into murder—Poe) and even in its most favorable senses in which it implies a moving or turning into a new course it commonly suggests some degree of deluding or misleading as the method employed (words when used with the gift of magic can seduce a reader into belief that has no roots in reality—Feld) (knew how to seduce the interest of his pupils; he did not drive, he led—Anspacher).

Ana ensnare, snare, entrap, trap, capture, *catch, bag: bewitch, fascinate, allure, captivate, *attract: blandish, wheedle, cajole (see Coax)

Ant revolt, repel

luster

512

lust

luxuriant, *profuse, lavish, prodigal, exuberant

Ana abounding or abundant, teeming, swarming (see corresponding verbs at TEEM): sumptuous, opulent, *luxurious

lust

*desire, appetite, passion, urge

Ana *cupidity, greed, avarice, rapacity: yearning, longing, hangking, thirsting or thirst, hungering or hunger (see Long vb): craving, coveting (see Desire vb): gust, zest, *taste

luster, sheen, gloss, glaze are comparable when they denote a smooth shining surface that is the natural property of a thing or is given to it by some such process as polishing, burnishing, or coating. Luster basically and in technical use regularly implies a giving off of often iridescent reflected light (the satiny luster of fine pearls) (the soft gloss of polished wood) (cut a piece of lead or of zinc, and observe the luster of its fresh surface—T. H. Huxley) (the luster of minerals can be divided into two types, metallic and nonmetallic—Hurlbut). In literary and extended use luster is often used to imply radiance or brilliance (see Bright 1) (the sun was shining with uncommon luster—Dickens) Sheen applies to a lustrous surface (as of a textile) or a surface luster (as of a mineral cleavage surface or a dark feather) that may be dull or bright and may be a simple shining or marked by richly iridescent or metallic tones (repeared scrubings have given the wood a silvery sheen—Amer. Guide Series: Mich.) (the flashing sheen on the bird's plume—Sitwell) (the sheen of their spears was like stars on the sea—Byron) (the sheen of his poplin and velvet—Cather). In extended use sheen may stress richness and brilliance (an amazing sheen over the orchestral sound, a definition of textures and effects not to be heard even in the concert hall—Robert Lawrence) or it may stress a superficiality suggestive of a surface luster (daughters with a sheen of drawing-room accomplishments upon them—Bell) Gloss stresses superficiality more than luster or sheen and is appropriately applied to something that shines because coated with a shining substance (the gloss of a newly varnished floor) or because well polished (buffed the leather to a high gloss) or specially finished (the gloss on this chintz will wash off). In extended use, gloss often implies superficial attractiveness or plausibility (Mr. France plans to put the same gloss . . . on the place as he does on the fancy Collins Avenue hotels—Friedlander) (writes with his usual agreeable gloss, but it may be that the ingredients are wearing just a bit thin—New Yorker). Glaze applies particularly to a glasslike coating which provides a smooth impervious lustrous surface on ceramic wares, but it is also applicable to such comparable coatings as one made on cooked meats by pouring over them broth thickened by boiling or by
addition of gelatin, or on baked goods by beaten egg or syrup, or as one formed on terrestrial surfaces (walks covered with a glaze of ice) (a porcelain bowl with a thick bubbly celadon glaze). The term also is sometimes applied to the material from which such a glaze is made (new carrots dressed with a glaze of brown sugar and butter). Glaze is the least common of these terms in extended usage and in such use is typically metaphorical (we whites have a color glaze on our imaginations that makes it hard to feel with the people we have segregated ourselves from—Lillian Smith) (her skin had the healthy glaze that comes from sunshine and ten hours of sleep a night—Brodey).

Ana iridescence, opalescence (see corresponding adjectives at PRISMATIC): brilliancy, radiance, luminosity, effulgence, refulgence (see corresponding adjectives at BRIGHT)

lustful lascivious, libidinous, lecherous, wanton, lewd, *licentious, libertine

Ant ascetic —Con austere, stern, *severe: self-denying, self-abnegating (see corresponding nouns at RENUNCIATION)

2 Luxurious, sumptuous, opulent are comparable when they are applied to things and mean ostentatiously or obviously rich and magnificent. Something luxurious (see also SENSUOUS) is exceedingly choice and costly (luxurious sable coat) (the luxurious appointments of their drawing room) (a luxurious cargo of wine, olive oil, and candied tropic fruits—Wylie) Something sumptuous is extravagantly rich, splendid, gorgeous, or luxurious; the word usually suggests a grandeur or magnificence that almost overwhels the senses (the sumptuous life of the Court provided material for some painters—Binyon) (Venice, soon to be known as the most beautiful and sumptuous city of Europe—Ellis) (a velvet gown, sumptuous and wine-purple, with a white ruff that stood up . . . high and stiff—Edmund Wilson) (for the most sumptuous masques in England, Italian managers, engineers and artists were brought over—T. S. Eliot) Something opulent (see also RICH) flaunts or seems to flaunt its luxuriousness, or luxuriance, and, in some cases costliness (offered the bribe not only of her person but of an opulent and glittering eastern throne—Buchan) (the dictionary of poetry became, with notable exceptions, opulent, sumptuous, lavish, rather than pointed, terse, concrete—Loewy)

Ant ostentatious, pretentious, *showy: magnificent, stately, imposing, majestic, *grand: costly, expensive, valuable, precious

Ant frugal, thrifty, economical, *sparing: *meager, scanty, scanty, skimpy, scrumpy, spare, exiguous

luxury *amenity

Ant *pleasure, joy, delight: agreeableness, gratification, gratefulness (see corresponding adjectives at PLEASANT)

Ant hardship —Con *difficulty, rigor, vicissitude

lying mendacious, untruthful, *dishonest, deceitful

Ant *false, wrong: deceptive, *misleading, delusive, delusory

Ant truth-telling —Con honest, just, *upright, conscientious, scrupulous, honorable: candid, *frank, open, plain: *reliable, dependable, trustworthy

M

macabre gruesome, *ghastly, grisly, grim, lurid

Ana horrifying, daunting, appalling, dismaying (see DISMAY): horrific, horrendous, *horrible, horrid

macerate *crush, mash, smash, bruise, squash

Ana *separate, part, divide: stew, seethe, simmer (see BOIL): soften (see corresponding adjective at SOFT)

machination intrigue, conspiracy, *plot, cabal

Ana *trick, ruse, stratagem, maneuver, gambit, ploy, artifice, feint, wile

machine, machinery, machinist, apparatus, engine, motor are comparable especially when they denote a device or system by which energy can be converted into useful work. Machine is at once the most fundamental of these terms and the most varied in its applications. Basically it denotes an assemblage of parts that transmit forces, motion, and energy from one to another in a predetermined manner and to a desired end (as sewing a seam, hoisting a load, printing a book, or maintaining an electric current) (a drilling machine) (machines that convert rags to paper) (a washing machine) But it also may apply specifically to any of the six simple machines (the lever, the wheel and axle, the pulley, the inclined plane, the wedge, and the screw) that together contain the elements of which all other machines are composed. Again, it may apply to a machine in the basic sense together with its power-generating unit and sometimes with supplementary equipment (as for moving the whole complex) (road-building machines) or it may apply specifically to a conveyance and especially an automobile (the term “machine” as used in the patent statute includes every mechanical device or combination of mechanical powers and devices to perform some function and produce a certain effect or result—Toulmin) (only an organism has its own internal purposches which belong to it intrinsically and . . . a machine, so far as we know, is merely an extension of the specific purpose of organisms, men—La Barre) (gears are modified simple machines such as the lever, pulley, wheel-and-axle, and inclined plane. They all serve to multiply force, change speed, or direction of motion and serve as connecting devices between driving units and driven mecha-
nisms—Heitner) ≡ man uses machines to transform energy, transfer energy, multiply force, multiply speed, or change the direction of a force—C. E. Dull, H. C. Metcalfe, & J. E. Williams> and machine is the only term of this group that is freely used collectively of machines as a class or abstractly of the technology and technological society associated with their use when I use the word machines hereafter I shall refer to specific objects like the printing press or the power loom. When I use the term “the machine” I shall employ it as a shorthand reference to the entire technological complex—Mumford> <the domination of our cultural and collective life by the machine—Glicksberg> <the liberty of choice allowed to the craftsman who worked by hand has almost vanished with the general use of the machine—Dewey> Mechanism may come close to the basic sense of machine when it denotes an assemblage of working parts functioning together to produce an effect, but more often than not it applies to relatively simple straightforward mechanical linkages such as make up a complex machine; thus, a sewing machine is made up of several mechanisms (as one to advance the thread, another to convey the cloth, another to determine the length of the stitch, and still another to wind the bobbins) the real mechanic understands the construction of his machine; he knows the names and uses of the parts and the principles underlying the operation of the mechanisms—Burghardi & Axelrod> <the economic machine that provides for our everyday needs is so intricate that it is hard to see the purpose of particular cogs in its mechanism—W. T. C. King> Sometimes, however, mechanism suggests not merely the physical parts but the various steps that lead to the final result of the process the propeller is the source of an intense sound but the exact mechanism by which this sound is produced is not clearly understood—Armstrong> Machinery (see also EQUIPMENT) may apply to machines collectively <the mill sold its old machinery and bought more efficient machines> machinery for making shoes> <the term machinery is very much more comprehensive in scope than the word machine. . . . Unquestionably, the term is broad enough to include a number of machines and their connecting appurtenances which are operated as a unit for a given purpose—U.S. Treasury Decisions> but it may also replace mechanism to denote an assemblage of working parts performing a function a strange, quiet boy, interested much less in booklearning than in what was to be learned from rusty automobiles on the junkheap or from the thousand machineries all around him—Kerouac> <men who are temperamentally unsuited to fiddling with the adjustment machinery put in the backs of most bow ties—New Yorker> Apparatus (see also EQUIPMENT) basically denotes an assemblage of parts for attaining some end or doing some thing, but in itself it implies nothing about the complexity or simplicity, the efficiency or inefficiency, or the precision or crudity of the assemblage; thus, chimpanzees have been reported to put sticks together into a crude apparatus for reaching fruit that is beyond the reach of their hand modern heating and refrigerating apparatuses raise the temperature during the winter and lower it during the summer—Carrel> <the apparatus which took the photographs and reproduced them . . . are more sensitive and truthful than the human eye—Dow Lewis> Engine and motor in their basic relevant sense both denote a machine for converting energy (as heat, chemical, or nuclear energy) into mechanical force or motion, but in many situations they are not at all interchangeable, choice between them being firmly fixed by idiom. Engine is the more general term in this relation and is applicable to such machines whether large or small, simple or complex <an internal-combustion engine> or it may apply both to a power-generating unit and a working unit that depends upon this <these engines were built to pump out mines—Kettering & Orth> and sometimes specifically designates certain automotive units (as a locomotive or fire engine) <sent engines, hose carts, and ladder trucks to the fire> <a long freight train drawn by two engines> From an earlier general use engine is still specifically applied to a few kinds of machines <rose engine> and it is the idiomatically appropriate term to designate the power plant of an aircraft <with either turbojet or rocket engines these research airplanes would have sufficient power to permit the maximum speed aerodynamically possible—Bonne} Motor is applicable to a small or light engine <an outboard motor> <a spit worked by a small clockwork motor> or to a gasoline-<or other internal-combustion engine; thus, one may speak of the motor or engine of an automobile; diesel engines or motors power many modern locomotives <the finest machine in the world is useless without a motor to drive it—Furnas> Motor is the specific term for a rotating machine that transforms electrical energy into mechanical energy <household appliances run by electric motors> <a motor is a machine for transforming electrical energy into mechanical energy or power—Cloud> Like machine, motor also applies specifically to an automotive vehicle (as an automobile or truck) we want a truck battalion of at least four companies. . . . The vehicles for this unit would be obtained by drawing on excess motors in various division units—Combat Forces Jour.> <the taxpayer did not then provide Ministers with carriages and coachmen as he now provides them with motors and chauffeurs—Collis> Ana contrivance, *device, contraption, gadget: *implement, tool, instrument, utensil, appliance machinery 1 *equipment, apparatus, paraphernalia, outfit, tackle, gear, matériel Ana *mean, instrument, instrumentality, agency, medium, machine, organ, channel, agent: *machine, mechanism, apparatus, engine, motor: *device, contrivance, contraption, gadget: *implement, tool, instrument, utensil, appliance 1 *machine, mechanism, apparatus, engine, motor macromosm cosmos, universe, world, *earth mad 1 *insane, crazy, crazed, demented, deranged, lunatic, maniac, non compos mentis Ana frenzied, hysterical, delirious (see corresponding nouns at MANIA): *irrational, unreasonable 2 *angry, irate, wrathful, wroth, indignant, acrimonious Ana maddened, incensed, infuriated, enraged (see ANGER vb): offended, outraged, affronted (see OFFEND) madden *anger, incense, enrage, infuriate Ana vex, *annoy, irk: exasperate, provoke, rile, aggrivate, *irritate Con pacify, placate, mollify, appease, propitiate, conciliate: assuage, allay, mitigate, *relieve maelstrom eddy, whirlpool, vortex magazine 1 *armory, arsenal 2 *journal, periodical, review, organ, newspaper magic n Magic, sorcery, witchcraft, witchery, wizardry, alchemy, thaumaturgy are comparable rather than synonymous in their basic senses. In extended use they are sometimes employed indifferently without regard to the implications of their primary senses and with little distinction from the most inclusive term, magic, but all are capable of being used discriminately and with quite distinctive implications. Magic primarily denotes one of the arts or the body of arts whose practitioners claim supernatural
magnificent imposing, stately, majestic, august, noble, grandiose, *grand

Ant modest — Con *mean, abject, ignoble, sordid: trifling, trivial, *petty, paltry: *humble, meek, lowly

magnify *extal, aggravize

Ana extol, *praise, laud, acclaim, eulogize: enlarge, *increase, augment: *expand, amplify, distend, swell, inflate, dilate

Ant minimize, belittle — Con *deceit, depreciate, detract, derogate: reduce, lessen, diminish, *decrease: *contract, shrink, deflate

magniloquent grandiloquent, aureate, flowery, *rhetorical, euphuistic, bombastic

Ana turgid, timid, *inflated, flattened: theatrical, histrionic, melodramatic, *dramatic

magnitude volume, *size, extent, dimensions, area

Ana amplitude, *expansive, stretch, spread: *bulk, mass, volume

maiden adj 1 *unmarried, single, celibate, virgin

Ana *youthful, virginal, juvenile

2 *youthful, juvenile, virgin, virginal, puerile, boyish

Ant experienced

maim, cripple, mutilate, batter, mangle are comparable when they mean to injure the body or an object so severely as to leave permanent or long-lasting effects. Maim implies the loss of a limb or member or the destruction of its usefulness usually through violence (as by war, accident, or the deliberate act of oneself or another) <automobiles maim large numbers of persons every year> may—be I wouldn't have to kill you . . . I could just maim you—so you couldn't keep me from turning back—Edison Marshall> seems to have been maimed psychologically by a brutal father—N. Y. Times Book Rev.> Cripple (see also weaken) is more restricted than maim because strictly it implies the loss of or serious impairment of the use of a leg or arm or part of one <he is crippled as a result of an amputation following blood poisoning> crippled by a congenital hip disease >Mutilate (for specific sense of this word, see sterilize 1) implies the cutting off or removal of a part essential to completeness, not only of a person but also of a thing, and to his or its perfection, beauty, entirety, or fulfillment of function <could make little manikins of their enemies and by mutilating these, inflict pains and ills on the persons they represented—Cobban> windows . . . darkened by time and mutilated by willful injury—Henry Adams> the last twelve pages of this codex have been mutilated by fire—Modern Language Notes> Batter and mangle do not suggest loss of limb, member, or part, but they do suggest injuries which excessively disfigure the person or thing. Batter implies a pounding (literal or figurative) that bruises deeply, deforms, or mutilates <he emerged from the fight battered and dazed> the first time he made a helmet, he tested it out of shape—Russell> so rough were the roads that we were battered and pitched about like cargoes in a heavy sea—A. R. Williams> Mangle, on the other hand, implies a tearing or crushing and a covering (literally or figuratively) with deep wounds or lacerations <mangled with gashly wounds through plate and mail—Milton> <reckless people who have disregarded the warnings and been mangled by sharks—Heiser>

Ana *mar, spoil, damage, *injure: *deface, disfigure

magisterial authoritarian, *dictatorial, domatic, doctrinaire, oracular

or occult powers (as in calling spirits to their assistance, in performing miracles, in divining the future, and in fixing the destinies of men). In extended use the word denotes a power or influence that produces effects akin to or suggestive of those of magic. Usually it stresses the power to call forth an image, an emotion, or a response from or as if from a void <his magic was not far to seek—he was so human! . . . where'er he met a stranger, there he left a friend—J. R. Lowell> the faint significance of words . . . for a common dullard, or their evocative magic for a Keats—Montague> Less often it is applied to an art or an artist transcending the natural or explainable <but Shakespeare's magic could not copied be; within that circle none durst walk but he—Dryden> Sorcery is the form of magic practiced by those who use incantations and charms and cast spells in order to work their usually harmful ends. In extended use it is especially appropriate to suggest an attempt to overpower or enthrall by glamour or artful enchantment <to fence my ear against thy sorceries—Milton> (the old evocative themes recur . . . and they are still touched with that verbal and metrical sorcery whose secret his younger contemporaries seem to have lost—New Yorker> Witchcraft, witchery, and wizardry in their primary senses suggest powers derived from evil spirits or the use of human beings as the instruments for the accomplishment of Satanic ends, the only difference being that the first two are chiefly applied to the work of women, and the last to that of men. In extended use, however, they often vary in implications. Witchcraft is sometimes indistinguishable from sorcery, but it more often suggests guile rather than enchantment and wiles rather than spells <there is something more than witchcraft in them [women], that masters even the wisest of us all—Rowe> Witchery, on the other hand, occasionally implies either sorcery or guile <thus has a bit of witchery crept into certain methods of plague control in the past—Hubbs> but usually stresses a winning grace or an alluring loveliness <the soft blue sky did never melt into his heart; he never felt the witchery of the soft blue sky!—Wordsworth> <the witchery of legend and romance—Riker> Wizardry suggests a more virile and compelling power to enchant and usually connotes exceptional skill, talent, or creative power in the person who exerts such an influence <that white-winged legion through whom we had plowed our way were not, could never be, to me just gulls . . . ; there was the wizardry of my past wonder, the enchantment of romance—Galsworthy> his playing had a grandeur that one often misses in the work of younger and more meticulous artists, and there were moments when his wizardry held me spellbound—Sargeant> Alchemy is properly classed with magic only because its practitioners claimed mastery of secret forces in nature and the power to work such miracles as the changing of base into precious metals. In discriminative extended use, therefore, it implies transmutation or sometimes transfiguration <gilding pale streams with heavenly alchemy—Shak.> <by happy alchemy of mind they turn to pleasure all they find—Green> the vast majority of those who write verse are unenamored with the assimilating alchemy of genius—Lovess> Thaumaturgy basically is applied to performing of miracles and wonders or to the art of wonder-workers (as conjurers or those who profess the power to work miracles) <a world of miracles wherein they turn to pleasure—Shak.> Alchemists say that the stylus of nature, or the divine hand, and they are still touched with that verbal and metrical alchemy of genius—Lovess> In extended use it is applied to what mystifies and dazzles or is designed to mislead or confuse.
main adj principal, leading, *chief, foremost, capital

A colon (:) separates groups of words discriminated. An asterisk (*) indicates place of treatment of each group.

mainly *largely, greatly, mostly, chiefly, principally, generally

maintain, assert, defend, vindicate, justify are comparable when they mean to uphold as true, right, just, valid, or worthy of notice or acceptance in the face of opposition or indifference. Maintain implies a firmness of conviction. When this implication is the only one, maintain usually means to argue in the spirit of one who does not admit any weakness in his contention (the artisan, for example, ranks no doubt lower than the professional man; but no one maintains that he is a different kind of being—Dickinson) (there is... a Philosophic Doctrine—. I know that many serious people believe it—which maintains that all men, in spite of appearances and pretensions... live alike for pleasure—L. P. Smith) Often, however, the term additionally implies persistence or insistency in upholding in defiance of all opposition (before this court ought to intervene the case should be of serious magnitude clearly and fully proved, and the principle to be applied should be one which the court is prepared deliberately to maintain against all considerations on the other side—Justice Holmes) Assert (see also assert 1) so strongly implies a determination to make others accept or recognize what one puts forward as the truth, or as a claim, or as a right, that it often suggests aggressiveness or obtrusiveness (the provision of the constitution never has been understood to embrace other contracts, than those which... confer rights which may be asserted in a court of justice—John Marshall) But assert does not always imply the use of argument to force conviction or recognition (anyone... can feel the sustained dignity of the sculptor's work, which is asserted with all the emphasis he could put into it—Henry Adams) (on the whole New Zealand was lavish with money and attention, and used force only to assert her sovereignty—Heiser) Defend implies a maintaining in the face of attack with the intention of demonstrating the truth, rightness, or propriety of what is questioned; thus, one defends a thesis who, as a candidate for a degree, submits himself to examiners who assail the weak or dubious points of his argument (the independence of the Supreme Court of the United States should be defended at all costs—Lippmann) Defend, in this sense, does not imply, as it so often implies in its more common sense (see defend 1), that the defender is in a weak or dubious position; however it seldom suggests as much aggressiveness does assert and often connotes the aim of an apologist (I have not adopted my faith in order to defend my views of conduct—T. S. Eliot) Vindicate (see also exculpate) implies an attempt, usually a successful attempt, at defense or assertion. It presupposes that whatever is being defended or asserted has been or is capable of being challenged, questioned, denied, or contended. When the emphasis is on defense, then argument or something which has the force of argument is usually implied, and an aim not only to make one's point but to confute and confound one's opponents is often connoted (writers who vindicated our hereditary House of Lords against a certain Parliamentary Act—Quiller-Couch) (the view of the informed and disinterested men turned out to be almost completely wrong, while the relatively uninformed... were vindicated on all counts—Rovere) When the emphasis is upon assertion, vindicate usually implies an effort to resist triumphantly the force of encroachment or interference or to overwhelm those who deny or doubt, not so much by argument as by appropriate action (arise, and vindicate Thy Glory; free thy people from their yoke—Milton) (what was it that stood in his way? His unfortunate timidity! He wished to vindicate himself in some way, to assert his manhood—Joyce) Justify (see also explain 2, justify 3) implies that the thing concerned can no longer be opposed or ignored because it has been conclusively shown to be true, valid, or proper by irrefutable arguments or on inescapable grounds, such as its consequences or its successful operation (if the Germans are to justify the high claims they make for Lessing as a critic, they must rest them on other grounds than his intellectual originality—Babbiot) (fate persists in justifying the harsh generalizations of Puritan morals—Bennett) (it isn't by the materials you use that your claim to originality will stand justified or condemned; it is solely by the thing you do with them—Lowes) Affirm, aver, protest, avow, declare, profess, avouch (see assert) (content, fight, battle, war; persist, persevere Oppose, combat, *resist, withstand, fight; *deny, gainsay, contradict, traverse

maintenence sustenance, support, *living, livelihood, subsistence, keep, bread majestic stately, august, noble, magnificent, imposing, *grand, grandiose

mean, abject, sordid, ignoble: lowly, *humble, modest, meek; ordinary, *common

majority, plurality are arbitrarily defined in the United States, especially by statute, when they refer to an excess of votes as determining an election. Both imply an excess of votes over the next highest candidate. The distinction between the two words applies when there are three or more candidates; then the person who is elected by a majority has more votes than the other candidates combined, that is, his vote is in excess of half of the total number of votes cast, and his majority is the number of votes cast for him in excess of one half of the total number of votes. A person is elected by a plurality when he has more votes than any other candidate, whether he has a majority of the total or not. Thus, if a total of 290,000 votes are cast in an election contested by three candidates, with candidate A polling 200,000 votes, candidate B polling 75,000, and candidate C polling 15,000, candidate A wins the election by a majority of 55,000, and by a plurality of 125,000 over candidate B, and by a plurality of 185,000 over candidate C. Sometimes, where the successful candidate has a vote that exceeds the total of votes cast for all opposing candidates, the term plurality is applied to this excess; thus, in the example given, while candidate A's majority is 55,000, his plurality over candidates B and C together is 110,000.

make vb Make, form, shape, fashion, fabricate, manufacture, forge can all mean to cause something to come into being or existence. This is the underlying meaning of make, the most general and the most widely applicable of these terms. Make may imply the operation either of an intelligent agent or of a blind agency, and either material or immaterial existence (make a chair) (make a poem) (make a choice) (this factory makes bicycles) (he is unable to make friends) (God made the world) (the spider makes webs) (the liver makes bile) Form adds to the implication that the thing brought into being has a definite outline, design, or structure (a sculptor who forms hands with exquisite delicacy) (we are ready to form a plan) (form a federation of states) (character
is partly formed by training.} Shape, though often interchangeable with form, is much more restricted in its application because it characteristically connotes an external agent that physically or figuratively impresses a particular form upon something (as by molding, beating, carving, or cutting). (the blacksmith shapes a horseshoe on his anvil) (a hat on a block) (events that shaped his career) (every life is a work of art shaped by the man who lives it—Dickinson) Fashion means to form, but it implies an intelligent and sometimes a purposeful agency and more or less inventive power or ingenuity. (he fashioned a lamp out of an old churn) (legislative committees often fashion strange bills out of miscellaneous suggestions) (intelligent creatures, fashioned by the hand and in the image of an all-wise God—Hambly) Fabricate stresses a making that unites many parts or materials into a whole. (Dr. Hitchens and his associates alone have fabricated more than 500 compounds resembling one or another of the simpler chemicals out of which D. N. A. (an enormously complex substance) is fashioned in the cell—Engel) and it usually connotes either a making according to a preconceived plan (fabricate doors, windows, and other parts of a house) or skillfulness in construction (fabricate a good plot for a novel) (fabricated a creed fitted to meet the sordid misery of real human life—Woolf) Very commonly fabricate implies an imaginative making or inventing of something false (the particulars of that genealogy, embellished with every detail that memory had handed down or fancy fabricated—Stevenson) (his feats of legendarium sounded so improbable that many people considered his experiences fabricated—Heiser) Manufacture emphasizes the making of something by labor, originally by hand but now more often by machinery. The term is applied to a making in which raw materials are used and a definite process or series of processes is followed (manufacture cloth) (manufacture kitchen utensils) (manufacture automobiles) In extended use manufacture often is preferred to the preceding words when laboriousness or the knowledge of the mechanics of a process, rather than skill or ingenuity, is connotated (manufacture paintings by the dozen) (the strain of manufacturing conversation for at least ten minutes—Fenburgh) Forge basically suggests the operation of a smith who heats metal and beats or hammers it into shape (forge a horseshoe) (forge a chain) In its extended sense it carries a strong implication of devising or concocting by physical or mental effort so as to give the appearance of truth or reality (the proud have forged a lie against me: but I will keep thy precepts with my whole heart—Ps 119:69) (whate’er I forge to feed his brain) suits, do you uphold and maintain in your speeches—Shak) (however feeling may render plastic the stuff of poetry, the poet, in his fancy, is the maker of the poem) (he forge the bond—Lowes) In specific use, both legal and ordinary, forge implies the making of a counterfeit, especially by imitating the handwriting of an original or of a supposed maker; thus, one forges a document, such as a will, deed, or check, by making or signing it in imitation of another’s handwriting or by making alterations in a genuine document by the same means. Ana produce, turn out, yield, *be: accomplish, achieve, effect, fulfill (see PERFORM) make-believe *pretense, pretension maker n Maker, creator, author denote one who brings something into being or existence. When written with an initial capital letter, all three terms designate God or the Supreme Being; without the capital they ascribe similar but not equivalent powers or effects to a person. Maker typically implies a close and immediate relationship between the one who makes and the thing that is made. It implies the physical or figurative handling of material and individual or personal responsibility for what is turned out; hence, in religious use (as in hymns and prayers) God is usually called one’s Maker (every soul, insisted Luther, stands in naked confrontation before its Maker—Bainton) Maker in such terms as kingmaker, a maker of men, a maker of phrases, a maker of poems, suggests the use of persons, words, or ideas as instruments by which one brings something into existence through one’s own labor or effort (in every creative writer there is a touch of the poet, the maker, even if his medium is prose—Forster) Creator, on the other hand, seldom suggests either literal or figurative use or handling of materials; its leading implication is that of bringing into existence what the mind conceives and the will, as the mind’s instrument, carries out. As applied to God, the term usually evokes the picture of Creation as presented in Genesis; the term is used, therefore, rather than Maker, when His omnipotence and the greatness of His works are stressed (and touched their golden harps, and hymning praised God and his works: Creator him they sung—Milton) In the same way creator is used of a man who brings into being something new, which has form in his mind or imagination before he gives it objective existence (a conservator, call me, if you please, not a creator nor destroyer—Browning) (they are genuine creators: they do not describe nor interpret reality as much as construct it—Howard Moss) Author is applied to one who originates and who, therefore, is not only the source, or ultimate source, but the one responsible for a person’s or thing’s existence. It is applied to God chiefly in the phrase “the Author of one’s being” when the reference is to the gift of life or its attendant circumstances (then casting up my eyes, thanked the Author of my being for the gift of that wild forest, those green mansions where I had found so great a happiness—Hudson) In reference to persons it is not only applied to a writer (see Writer) but also to one (as a founder, an inventor, or an initiator) who brings something into existence (the policy of which he was principally the author—Bello) (the gay and bewitching . . . coquette Célimène who is the author of all Alceste’s woes—Alexander) makeshift shift, expedient, *resource, resort, stopgap, substitute, surrogate Ana *device, contrivance, contraption, gadget: *mean, instrument, apparatus, instrumentation maladroit clumsy, gauche, inept, *awkward Ant adroit—Con *dexterous, deft, handy: *clever, cunning, ingenious: skilled, skillful, expert, adept, masterly, *proficient: politic, diplomatic, bland, smooth (see SUAVE) malady ailment, disorder, condition, affection, *disease, complaint, distemper, syndrome male adj Male, masculine, manly, manlike, mannish, manful, virile are comparable when meaning of, characteristic of, or like a male, especially of the human species. Male (opposed to female) applies to animals and plants as well as to human beings and stresses the fact of sex (a male tiger) (a male willow tree) (male children) (a male choir) Masculine (opposed to feminine) alone of these words may imply grammatical gender (masculine nouns and pronouns) but it characteristically applies to features, attributes, or qualities which belong to men rather than to women (he was a big, active, masculine creature—DeLand) (the masculine character lying behind the lofty idealism of Sung painting—Binyon) (this poetry is masculine, plain, concentrated, and energetic—Landon) (it’s a masculine sort of town . . . with solidarity rather than
style, dignity rather than sparkle, graciousness rather than grace—Joseph Macaulay is sometimes interchangeable with male (the masculine part of the audience) (although this is largely a masculine disease, about 5 per cent of the patients are women—Fishbein) Manly (often opposed to boyish or, from another point of view, to womanly) is used to qualify whatever evidences the qualities of a fully developed man (manly virtues) It often specifically suggests the finer qualities of a man (as courage, frankness, and independence) or the physical characters and skills which come with maturity; it is applicable not only to men but to boys (his big manly voice, turning again toward childish treble—Shak) (what more manly exercise than hunting—Walton) (it was amusing to watch the manly coolness with which the announcement was taken—Meredith) Manlike (often opposed to womanlike) is more apt to suggest characteristically masculine qualities or, especially, foibles (manlike bluntness) (from long association with men she had learnt a manlike reticence—H. S. Scott) Often manlike suggests reference to man in the more general sense of the word and therefore means little more than human or like human beings (there were a dozen or more of the hairy manlike creatures upon the ground—Blue Book) Mannish (often contrasted with womanish or effeminate) applies chiefly to women or their dress, gait, and manners, when they suggest masculinity rather than femininity (a woman impudent and mannish grown—Shak) (a mannish costume) (those who dislike . . . mannish head-gear, might try his simple but feminine small hats—Lois Long) Manful differs from manly chiefly in its greater stress on sturdiness and resoluteness (a manful effort to gain self-control) (his life has been one manful struggle against poverty—Trollope) Virile (a stronger word than masculine and opposed to puerile or, in specific sense, to impotent) suggests such qualities of fully developed manhood as aggressiveness, masterfulness, forcefulness, and, in a specific sense, procreativeness. It differs from manly and manful in being applied only to mature men (virile style) (ye chiefly, virile both to think and feel, deep-chested Chapman and firm-footed Ben—J. R. Lowell) (the virile story of a little man, his big wife, and his bigger bull—Atlantic) Ant female—Con feminine, womanly, womanlike, womanish, ladylike (see female) malediction *curse, imprecation, anathema Ant benediction malefactor *criminal, felon, convict, culprit, delinquent Ana miscreant, scoundrel, *villain, blackguard Ant benefactor: well-doer malefic, maleficient malign, baleful, *sinner malevolence ill will, malignity, malignancy, *malevolence, spite, despite, spleen, grudge Ana animosity, rancor, animus, antipathy, antagonism, *enmity, hostility: hate, hatred, detestation, abhorrence, abomination (see under hate v⑧) Ant benevolence—Con benignity, benignancy, kindness, kindness (see corresponding adjectives at kind) malevolent malignant, malign, *malicious, spiteful Ana *sinner, baleful, malign, malefic, maleficient Ant benevolent—Con benign, benignant, *kind, kindly: *charitable, humane, altruistic, humanitarian, philanthropic, plebeian, malice, ill will, malevolence, spite, despite, malignity, malignancy, spleen, grudge do denote a feeling or a state of mind which leads one to desire that another or others should suffer pain or injury. Malice usually implies a deep-seated and, often, an unjustified or unexplainable desire; it frequently carries an implication of an innate pleasure in doing evil, in inflicting injury, in seeing others suffer, or in wanting destruction (with malice toward none; with charity for all . . . let us . . . bind up the nation's wounds—Lincoln) (there are people in the world with that degree of . . . malice in them that they can't bear to allow a good man his merits—Shaw) (man, with his usual monkey-like malice, took pleasure in pulling down what he had built up—Henry Adams) (argues that Dreyfus' court-martial and imprisonment . . . were mostly a tragedy of honest errors, not a conspiracy of racial malice—Time) Often, however, it may imply mischievousness or impishness rather than a hardened, vindictive nature (she was clever, witty, brilliant, and sparkling beyond most of her kind; but possessed of many devils of malice and mischievousness—Kipling) (we get far too little good conversation and artistic malice in life or art—Coxe) In law malice applies to the state of mind of one who willfully commits wrong, whether in full deliberation (malice aforethought) or out of hatred and a desire to inflict injury on another (malice in fact) or out of the depravity of his nature (implied malice) Ill will and malevolence both imply an unfriendly attitude or state of mind that is rarely without some basis, real or fancied, and that need not, as malice so often does, lead to overt action. Ill will applies to an attitude or state that is definite but measured and rarely involves any marked upheaval of mind (proposal to defend Formosa for Chiang and invite the ill will of all the rest of Asia—Progressive) (could not believe it possible that any injury or any misfortune could provoke such ill will against a person not connected, or, at least, not supposed to be connected with it—Austen) Malevolence applies primarily to a bitter and rancorous ill will that affects the whole outlook of one possessed by it and that is both more persistent and more likely to seek outlet in malicious conduct than is ill will (their society is organized by a permanent, universal animosity and malevolence; sullen suspicion and resentment are their chief motives—Muller) (the frigid malevolence with which Wilson denied this strong man's plea, made in what Wilson, being sensitive and wise, knew was exasperating abuse—White) Spite suggests petty ill will and mean envy and resentment that often manifests itself in trivial harassments (a man full of the secret spite of dullness, who interrupted from time to time, and always to check or disorder thought—Yeats) (it is, indeed, a little shabby, a little insignificant: not really hate at all, but spite—Day Lewis) Despite (see also under DESPISE) in this sense is a rather uncommon or literary term that may imply more pride and disdain and less pettiness than spite (not in despite but softly, as men smile about the dead—Chesteron) (if you will imagine a glint of moonlight running up the blade of a rapier, you may know the chill flame of spite and despite that bickered in her eyes then as she spoke—Quiller-Couch) Malignity and malignancy imply deep passion and relentless driving force (he is cruel with the cruelty of petrifed feeling, to his poor heroine; he pursues her without pity or pause, as with malignity—Arnold) (blinded by malignancy against the class of manual worker—Sprigge) Spleen implies deep-seated rancor combined with bad temper; it usually suggests wrathful release of latent spite or persistent malice and the wish to harm (his countrymen vented their spleen at his failure . . . by sending the unfortunate naval commander exile—J. R. Lowell) (the unfortunate man was dominated by partisan spleen—Parrington) Grudge applies to cherished ill will against an individual which seeks satisfaction; it usually suggests deep resentment for some real or fancied slight or affront and, often, a determination to get even (I will feed fat the ancient grudge I bear him—Shak).

jealous: baneful,noxious, *pernicious: diabolical,devilish,
*flendish
Ant benignant —Con benign, *kind, kindly: benevo-
 lent, *charitable, altruistic, humane
malignity malignancy, *malice, ill will, malevolence,
spite, despite, spleen, grudge
Ana rancor, animus, animosity, *enmity, hostility:
malignancy, malignousness, spitefulness (see correspond-
ing adjectives at MALICIOUS): hatred, *hate: vindictive-
ness, revengefulness, vengeancefulness (see corresponding
adjectives at VINDICTIVE)*
Ant benignity —Con benignancy, kindliness, kindness
(see corresponding adjectives at KIND)
maligner *dodge, parry, sidestep, duck, shirk, fence
Ana evade, avoid, elude, *escape, shun
malleable *plastic, pliable,pliant,ductile,adaptable
Ana tractable, amenable (see OBEDIENT)*
Ant refractory, —Con intractable, recalcitrant, ungov-
ernable, *unruly
malodorous, stinking, fetid, noisome, putrid, rank, rancid,
*stinking, musty mean having an unpleasant smell. Malodorous
is the general term which is referable to any smell of this
character, from one that is noticeably unpleasant to one
that is distinctly offensive <malodorous flowers> <the flavor
. . . like that of many malodorous cheeses, is delic-
ate—Rowlings>R Stinking, the familiar term, and fetid,
the literary or technical term, describe an odor or a thing
that emits an odor which is peculiarly offensive; the former
more obviously suggests disgusting foulness than the latter
A stinking dungeon <a stinking outhouse> <the cave . . .
was indescribably foul and stinking—Barbour> <exploded
stinking flashlight powder in enclosed rooms—Mott>
A fetid weed <he detected at once a fetid odor, not very
strong but highly disagreeable—Cather>Noisome is ap-
ciable chiefly to what emits a poisonsly or unwhole-
somely offensive odor <four sewers emptied into these
twenty-five acres of swamp and morass—stagnant, no-
some, and crawling with huge snakes—Heiser> Putrid
is applicable primarily to organic matter in such a state
of decomposition that it is loathsomely malodorous <a
bloated, putrid, noisome carcass—Burke> <the whole
was putrid with fish corpses—Semon> Rank (see also
RANK 1: FLAGRANT) applies to an odor or to a thing which
emits an odor that is exceedingly strong and unpleasing
yet not necessarily loathsome <the rank smell of a sun-
flower> <O, my offence is rank, it smells to heaven—
Shak.> <wreathed in smoke from a rank cigar—Ralph
Watson>R Rancid usually suggests an offensive taste as
well as an offensive smell that is indicative of a loss of
freshness: it is used especially of fatty substances (as
oil or butter) that have undergone a chemical change or
decomposition <rancid bacon> Fusty and musty both
suggest lack of ventilation and sunlight, but of the two
words fusty carries the stronger implication of age and
prolonged uncleanness or an accumulation of dust and
dirt, and musty, the stronger implication of moldiness
or of the effects of darkness or dampness <the ill-ven-
tilated schoolroom full of boys smelled . . . fusty—Ellis>
(the department had moved from its fusty old headquar-
ters . . . to a shiny new home—Time) <the musty odor
of a damp cellar> <there was an acrid, musty smell; the
raw air was close with breathing—Rose Macaulay> Ant
odorous —Con fragrant, aromatic, redolent (see
ODOROUS)
maltreatment mistreat, ill-treat, misuse, *abuse, outrage

mammal *huge, vast, immense, enormous, elephantine,
giant, gigantic, gigantean, colossal, gargantuan, Hercu-
lean, cyclopean, titanic, Brobdingnagian
Ana *monstrous, monumental, stupendous, tremendous,
prodigious: ponderous, weighty, cumbrous, cumbersome
(see HEAVY)
manacle vb *hamper, trammel, clog, fetter, shackles, hog-
tie
Ana *hinder, impede, obstruct, bar, block: *tie, bind:
*restrain, inhibit, curb, check
manage *conduct, control, direct
Ana *govern, rule: *guide, lead, steer, pilot, engineer:
*handle, manipulate, wield, swing, ply
mandate n 1 dictate, *command, order, injunction, bidding,
behest
Ana charging or charge, direction, instruction (see corre-
sponding verbs at COMMAND): sanctioning or sanction,
endorsement, approval (see corresponding verbs at AP-
PROVE)
2 Mandate, initiative, referendum, plebiscite are comparable
when meaning a political action or procedure whereby
a constituency instructs or gives information of its desires
to its legislature or legislators. Mandate, the most general
of these terms, applies to instruction delivered by the people
(as by a general vote or by a choice in an election) that
makes their wishes clear not only to their representatives
in a legislature but also to those who hold the execu-
tive power, or, in an extended sense, to those who repre-
sent them in any way or who by the nature of their office
or duties are necessarily responsive to the will of the peo-
ple <the president of the United States, reelected by an
enormous majority, declared that he had a mandate from
the people to continue his policies> Initiative often denota-
a right, but when it denotes a procedure, it implies recog-
nition of the right of a group of voters or, more often,
of a clearly defined number of voters, to propose a new
measure or a constitutional amendment to a legislature
(the initiative, both as a right and as a procedure, is legally
recognized in many of the states of the United States of
America) Referendum applies to the practice, adopted
by some states and cities in the United States, of sending
measures that have been considered by or proposed to
the legislative body to the voters for approval or rejection
or for an expression of their wishes. Plebiscite basically
applies to a vote of the people usually by universal
suffrage on some measure submitted to them by the group
or the body having the initiative. Sometimes plebiscite
implies a vote of the population of a territorial unit that
testifies to their wishes especially as to the form of govern-
ment they will accept, or their choice in a proposed merger
with either of two nations.
maneuver n stratagem, *trick, ruse, gambit, ploy, artifice,
wile, feint
Ana *device, contrivance: expedient, resort, *resource,
shift, makeshift: intrigue, machination, *plot
manful virile, manly, manlike, masculine, *male

Ant

enslave

many

*several, sundry, various, divers, numerous, multifarious mean consisting of a large number or comprising a large group. Many implies a likeness between the individuals or units in class, category, kind, or sort; except that it vaguely implies more than a few, the term gives no explicit suggestion as to how large the number is; of the eleven poets who accepted (representing, in many cases, a second choice on the part of the committee . . .)

—Mary McCarthy

*many inventions which we now see to be precursors of the second industrial revolution—Wiener

* Several (see also DISTINCT 1) is almost as vague as many in its implication of number. In law the term is construed as meaning more than one; thus, the several counts of an indictment may be two or more counts. In more general use it is usually construed as meaning at least three (the journey will take several days) (they saw several strangers on the road) (there are several reasons why you should not go) Sometimes the term means both more than a few and different each from the other; in such use, several is often preceded by a possessive adjective (a review of our denominational theologians . . .). There have been many of them; they have served their several causes well—Sperry (her several thoughts . . . as signaled by the changes on her face—Hardy) (chosen every second year by the people of the several States—U. S. Constitution)

Sundry

also implies an indefinite number, but it carries regularly a stronger implication of the difference of each from the others than does several; thus, there are several, rather than sundry, eggs left; there are sundry, more explicit than several, aspects of the problem that have not been considered (she differed in sundry important features—Quiller-Couch) (all their sundry emotions of a moment ago were one now in a sense of submissive, unquestioning reverence—Tasaki)

*various (see also DIFFERENT) is often used to mean an indefinite number, with a more or less attenuated implication of difference in identity of each from each (various persons spoke to me about it) (the various social layers of the American population—Packard) (Divers (compare diverse under DIFFERENT) also has come to imply a vague number, often meaning little more than many or several, but often retaining some of its originally strong impli—
cation of difference among the individuals \(\text{he told his story to divers persons} \) \(\text{divers styles of musical expression—Virgil Thomson}\) \(\text{Numerous may qualify plural nouns or singular nouns that designate a collection or assembly of units or individuals. In each case the term implies the existence of a noticeably large number of units or individuals; sometimes, in fact, it connotes a crowding or thronging} \(\text{every president has numerous letters from numerous persons} \) \(\text{I have contracted a numerous acquaintance among the best sort of people—Steele} \) \(\text{the commoners who had been summoned . . . formed a numerous assembly—Macauley}\) \(\text{Multifarious adds to the implications of many that of great diversity and often incongruity in the units, individuals, or elements involved} \) \(\text{in many of the multifarious activities he undertook—Ellis} \) \(\text{the multifarious Italian dialects—Heiser} \) \(\text{the large desk on which multifarious files and papers were ranged—Bennett} \) \(\text{the multifarious sufferings of the refugees} \) \(\text{Ant} \) \(\text{few}

\begin{itemize}

\item \text{Marine} \(adj\) \*oceanic, thalassic, neritic, pelagic, abyssal, \*aquatic, lacustrine, fluvial, fluviatile
\item \text{2 Marine, maritime, nautical, naval} are not closely synonymous terms but they are so interrelated that they are sometimes a cause of confusion. \text{Marine and maritime} both imply a connection with the sea. \text{Marine is the appropriate term when what is qualified is produced by or is found in the sea or in a body of salt water (for this sense see \text{aquatic})} \(or is intended for use at sea \text{Marine barometer} \) \(\text{Marine chronometer} \) \(\text{deals with the sea or with vessels that ply the sea or other large bodies of water \text{Marine painting}} \) \(\text{Marine engineers} \) \text{Marine is sometimes used also when there is an actual or implied reference to seamen \(at that time the Marine Board examinations took place at the St. Katherine's Dock House} \) \(\text{on Tower Hill—Conrad} \) \(\text{the Marine hospital system long maintained by the United States for the care of sick and disabled merchant seamen} \) \(\text{and the term commonly applies to soldiers who serve at sea \text{Marine Corps} \text{Maritime} is the appropriate term when the reference is to countries, climates, or peoples on the borders of a sea \text{the Maritime Provinces of Canada are on its eastern coast} \text{maritime races} \) \(or to the navigation of or commerce on the seas} \(\text{maritime} \) \text{pursuits such as fishing or whaling} \text{maritime laws} \text{maritime perils} \text{in the whole of British genius . . . I have estimated the maritime ancestry as 1.9, less than any other class—Ellis} \) \text{but maritime and marine are sometimes used interchangeably, especially in reference to law and insurance}. \text{Nautical and naval, on the other hand, imply a connection with ships and shipping, and therefore only indirectly with the sea}. \text{Nautical, however, is the usual term in applications where a relationship to sailors or seamen or the sailing of ships or boats is distinctly implied} \text{pursuits such as yachting} \text{nautical skill} \text{a man of nautical interests is never satisfied until he owns some sort of boat} \text{nautical clothes} \(\text{no one rows, very few sail} . . . \text{Brighton . . . is the least nautical of seaside places—Jenners} \) \text{Nautical is usually the preferred term when reference to the art or profession of navigation is implied} \text{nautical charts} \text{nautical tables} \text{nautical astronomy} \text{nautical mile} \text{Naval usually implies reference to a navy as distinguished from a merchant marine and as composed not only of ships, but of men, supplies, and armaments; at times, only from the context can a reader be sure whether ship or naval force is referred to} \text{naval stores} \text{a naval architect} \text{a naval engagement} \text{he belongs to the naval reserve} \text{mariner, sailor, seaman, tar, gob, bluejacket} all denote a person engaged in sailing or handling a ship. In non-technical use \text{mariner} generally refers to those directly involved in the navigation and operation of the ship but in legal use it is applicable to a person employed aboard a ship in any capacity and then includes not only the navigators and operators but such persons as those concerned with the ship's business and housekeeping; thus, a ship's master, officers, engineers, and stewards all are in this sense \text{mariners}. \text{Mariner} is not so common as the other terms, but it is very common in literary use \text{ye mariners of England that guard our native seas—Campbell} \text{Sailor} still so strongly retains its original implication of concern with the management of boats or ships that are propelled by sails that it is the appropriate term whenever this idea is specifically suggested. However the term is also applicable to a person engaged in the actual navigation or operation of a vessel regardless of the power which drives it. In ordinary use it applies especially to one more technically called a \text{seaman}, one of the working force sometimes including or sometimes excluding officers employed on a ship. The term \text{seaman} alone is not ordinarily applied to apprentices, for it suggests skill and craft in operation and guidance of a vessel. \text{Tar} is a familiar, often poetic, designation of a sailor; \text{gob} designates informally a sailor belonging to the navy and is not applied to an officer, whether commissioned or noncommissioned. \text{Bluejacket} is commonly applied to an enlisted man in the British or American navy; the term originally referred to the distinguishing uniform of such a seaman; it is often employed in distinguishing a sailor in the \text{navy from a marine or a sailor in the merchant marine}. \text{marital} \*matrimonial, conjugal, connubial, nuptial, hymenal \text{maritime} \*marine, nautical, naval \text{mark} \(n\) \*sign, symptom, note, token, badge \text{Ana} \(vb\) \*stigma, brand, blot, stain; criterion, touchstone, gauge, yardstick, \*standard; \*trace, vestige, track; stamp, print, imprint, impress, \*impression \text{2} \*character, symbol, sign \text{Ana} \(vb\) device, contrivance 

\begin{itemize}
\item \text{3 brand, stamp, label, tag, ticket (see under \text{MARK} \(vb\))}
\item \text{mark} \(vb\) \*Marine, \*brand, \*stamp, label, tag, ticket are comparable both as verbs meaning to affix, attach, or impress something which serves for identification and as nouns meaning the thing affixed, attached, or impressed for such a purpose. \text{Mark,} the comprehensive term of this group, in itself as distinct from context implies nothing about the way of affixing, attaching, or impressing and therefore may take the place of any of the remaining terms to suggest a means by which something may be identified, or
such matters as its ownership, origin, and quality may be established (all her linen was marked by embroidered initials) ⟨English gold and silver articles are marked, to attest their purity, with the official mark of the Goldsmiths' Company⟩ ⟨the marks of old age are appearing in his face⟩ ⟨bringing with him the marks of his rank and privilege, the silver, the linen, and damask, the portraits in peeling gold frames—Warren⟩ Brand basically implies a burning or searing with a hot iron to make a permanent mark that serves to identify (as in respect to status, ownership, quality, or make) ⟨cattle on the open range were branded to show their owner⟩ But brand has been extended to other methods of marking and then commonly stresses the indelibility of the mark and this implication affects its various extended uses much as does the more basic one (see brand n under stigma) ⟨history has once again branded this lesson on the minds of those who choose to see—Beauchamp⟩ In particular the noun often implies a being the identified product of a specified maker ⟨accustomed to ask for goods by brand⟩ ⟨a store that carries only well-known brands⟩ Stamp (see also impression) basically implies an impressing of a mark of identification, authentication, or authorization upon some softer material by means of a machine or instrument that hammers it in; it may imply also any comparable method of affixing a mark, usually with some suggestion of permanence or indelibility ⟨every coin is stamped with a particular design that certifies it as belonging to a certain country and as having such and such a value⟩ ⟨the meat was dark red with uneven white edges of fat⟩ Blue inspection stamps were on the white fat—Wirt Williams ⟨stamp a bill "Paid"⟩ ⟨stamp a letter with the date of arrival at the post office⟩ ⟨put a ten-cent postage stamp on that letter⟩ ⟨this passport now bears all the necessary stamps⟩ ⟨this maternity was stamped so indelibly on his outer shell—Costain⟩ ⟨a poet who has left her stamp on her generation—S. H. Hay⟩ Label implies the affixing of a piece of material (as paper, metal, or cloth) upon something to show its name, description, origin, or the person and address to which it is being sent ⟨label all the minerals in the collection⟩ ⟨she affixed a small paper label to each jar of preserves⟩ ⟨the contents of every bottle should be carefully labeled⟩ In its extended use label usually applies to the applying of an epithet, often rather arbitrarily, to something or someone ⟨when I was at Harvard all the types of narrative were labeled and classified like beetles in a case—Marquand⟩ ⟨hanging the subversive label on their own liberal clergy—Winnett⟩ Tag is applied to a label loosely attached (as to a package or a piece of baggage) giving destination or information; it often implies less permanent attachment than label ⟨a tag pinned to his lapel, bearing his name and destination—Current Biog.⟩ ⟨tag a parcel for shipment⟩ ⟨price tags⟩ ⟨write out tags for all the pieces of baggage⟩ Ticket in the relevant sense is more common as noun than verb and basically denotes a slip (as of paper, cardboard, or metal) usually conveying information or evidencing a right. Often the word is interchangeable with label or tag without loss of meaning (many retailers who attach their own store tags to the merchandise look at the manufacturers' tags and labels as auxiliary tickets supplementing their own—Women's Wear Daily) Ana imprint, impress, print (see corresponding nouns at impression); recognize, identify (see corresponding nouns at recognition) 2 *characterize, distinguish, qualify Ana *indicate, betoken, attest, bespeak, prove, argue: intimate, hint, *suggest marriage, matrimony, wedlock, wedding, nuptial, espousal are comparable though not always synonymous because they all refer directly or indirectly to acts by which a man and woman become husband and wife or to the state of being husband and wife. Marriage is the common term; it may apply to the rite or ceremony ⟨many were present at their marriage⟩ ⟨a civil marriage⟩ but it more often applies to the legal or spiritual relation which is entered upon ⟨joined in marriage⟩ ⟨annul a marriage⟩ or to the state of being married ⟨theirs was a long and happy marriage⟩ or to the institution as an abstraction ⟨nor does he dishonor marriage that praises virginity—Donne⟩ In extended use the term is applicable to any similarly close and intimate union ⟨let me not to the marriage of true minds admit impediments—Shak.⟩ ⟨the same sort of poetic effect as the Romantics obtained by the marriage of fertile words—Day Lewis⟩ Matrimony is in most contexts interchangeable with marriage, but it is the more appropriate term in religious and sometimes in legal use; in many Christian churches it designates one of the seven sacraments ⟨matrimony is the sacrament which unites in holy wedlock a man and a woman, between whom there is no impediment that would render marriage null and void—Currier⟩ The term therefore may be chosen in place of marriage when a religious ceremony or sanction is implied ⟨joined in bonds of holy matrimony⟩ In general the term is more often applied to the relationship which exists between husband and wife than to the ceremony or the state of marriage ⟨so prays the Church, to consecrate a vow “The which would ender matrimony make”—Wordsworth⟩ Wedlock, chiefly legal or archaic, applies especially to marriage as a legally or ecclesiastically sanctioned relationship or state; thus, children born out of wedlock are children of parents who are not legally married ⟨grave authors say, and witty poets sing, that honest wedlock is a glorious thing—Pope⟩ Wedding is the common term for the ceremony that marks a marriage and the festivities that accompany it ⟨a thousand invitations to the wedding were sent out⟩ Nuptial, usually as the plural nuptials, is a more rhetorical term than wedding; it also carries a stronger implication of an elaborate ceremony ⟨I don’t object to married priests, but I do strongly object to their nuptials. . . . When a priest. . . . indulges in an immense artistic wedding, I feel there is something undignified and almost unpleasant about it—MacKenzie⟩ Espousal, often as the plural es-pousals, differs little from nuptial except in its extended application. In the latter it uses it implies a spiritual union, especially one that is dependent upon a vow or pledge ⟨let every act of worship be like our es-pousals, Lord, to thee—John Wesley⟩ marshal vb *order, arrange, organize, systematize, methodize Ana array, range, align, *line, line up Con derange, disarrange, *disorder, disorganize, unsettle, disturb: *scatter, disperse, dissipate martial, warlike, military carry as their basic meaning belonging to, suitable to, or characteristic of war. Martial distinctively implies reference to war in general and to its essential and fundamental characteristics; it often specifically suggests the pomp and circumstance of war ⟨standing in martial array⟩ ⟨the army set out to the martial strains of a fife and drum corps—Amer. Guide Series: Calif.⟩ Warlike, as a rule, implies reference to war as a reality, its actual causes, its actual methods, its actual effects; it therefore applies more often to feelings, acts, or activities that lead to or accompany real war than to those which suggest its thrilling or stirring qualities; thus, a warlike temperament suggests bellicosity or readiness to fight to the bitter end, whereas a martial temperament ...
massive, mass, bulky, monumental, substantial are comparable when they mean impressively large or heavy. Massive distinctively stresses solidity and strength of construction and may imply an imposing appearance (its ceilings...heavy with massive beams—Dickens) (the mainland of Asia, and especially that part of it occupied by the massive bulk of China—Owen Lattimore) (a man whose massive shoulders and determined cast of features ought to have convinced him that such an enterprise was nothing short of desperate—Shaw) Massy, chiefly a literary word, carries a stronger implication of ponderousness than massive, but an equal implication of solidity and strength (your swords are now too massy for your strengths and will not be uplifted—Shak.) (thast thou a goblet for dark sparkling wine? That goblet right heavy, and massy, and gold?—Keats) (it was a castle, steadfast among storms, its side a massy wall—Sinclair Lewis) Bulky stresses size rather than weight, and the excessive amount of space occupied rather than solidity or strength of construction (a bulky parcel) (its front door and steps were wide, presumably in order to permit the passage of bulky objects—Chidsey) (the museum finds it impossible to accept for display a great number of interesting but bulky items such as aircraft, guns or tanks—Report on Nat’l Development (Ottawa)) Monumental implies greatness of size, but it distinctively suggests an imposing massiveness (me, Goddess, bring to arched walks of twilight groves, and shadows brown...of pine, or monumental oak—Milton) (the monumental fourpost bed has been taken down—Daily Telegraph) (a tall red-haired woman of monumental build—Wharton) Substantial stresses solidity and strength of construction but it carries a weak implication of size or outwardly imposing appearance and a strong implication of established quality, worth, and stability (the most substantial buildings in England today are the Old Norman cathedrals—the British Empire crowded in their drab, substantial, gray and brown clothes—Dorothy Canfield) (substantial homes, and substantial relatives of some sort or other, on whom we could fall back—Galsworthy)

A colon (:) separates groups of words discriminated. An asterisk (*) indicates place of treatment of each group.
masterful, domineering, imperious, peremptory, imper- 
imate are comparable when they apply to persons or their 
acts, utterances, and demands and mean governed by, 
or manifesting, a strong tendency to impose one's will 
on another. One is masterful who by the strength and 
virility of his personality is able to enforce his will on 
others or who deals with affairs commandingly and 
compellingly <the major was a masterful man; and I knew 
that he would not give orders for nothing—Kipling> 
the man had such a masterful and magnetic personality 
. . . that it was impossible not to take fire at his ardor 
—Huxley> One is domineering who tries to enforce his 
will or to make a show of his power by an overbearing or 
insolently tyrannical manner <they are . . . not courageous, 
only quarrelsome; not determined, only obstinate: not 
masterful, only domineering—Shaw> the European 
nationality domineering, and rapacious, have done 
delight to recommend the name of Christianity in Asia and 
Africa—Inge> One is imperious who by temperament 
or by position is fitted to command or who assumes the 
air or manner of such a person; the term implies more 
arrogance than masterful and less insolence than domi-
neering <this ancient despotic—this imperious old Louis 
XIV in a black front and a cap and ribbon—Thackeray> 
one could not have passed him on the street without 
feeling his great physical force and his imperious will— 
Cather> One is peremptory who insists, often with curt-
ness, on an immediate response to his commands; the 
term usually implies authoritiveness and a refusal to 
brook disobedience or delay or to entertain objections how-
ever valid <the general issued a peremptory summons> 
two peremptory raps at the door—Shaw> when we say of 
. . . a man that he has a great deal of character, we 
generally mean that he has disciplined his temperament, 
his disposition, into strict obedience to the behests of 
duty; that he has clear and peremptory ideas about right 
and wrong—Brownell> One is imperative who, or whose 
behavior, is peremptory because of the urgency of the 
situation rather than because of a domineering tempera-
tment <'Go back!' cried the old man, with an imperative 
voice at the telephone; he heard her imperative 
voice on the telephone; he heard her summon the 
doctor—Glasgow> 
Ana magisterial, *dictatorial, authoritarian, oracular, 
dogmatic, doctrinaire: arbitrary, *absolute, despotic,

masterly *proficient, adept, skilled, skillful, expert 
Ana *dexterous, deft, adroit: preeminent, superlative, 
transcendent, *supreme 
match vb Match, rival, equal, approach, touch are com- 
parable, especially in negative constructions, when they mean 
to come up to or nearly up to the level or standard of some-
thing else. One thing matches another when it proves to 
be its mate, rather than its duplicate, in power, strength, 
performance, beauty, or interest; it has been said that no 
language can match French in expressing ideas with clarity and 
exactness <the beauty of his person was matched by 
the grace and dignity of his spirit—Buchan> no mortal 
builder's most rare device could match this winter 
whale of pride—J. R. Lowell> we are prone to imitate the 
vices of those whose virtues we cannot match—McC 
Cartney> One thing rivals another when it closely com-
petes with it for superiority or in excellence <but would 
match you sing, and rival Orpheus' strain, the wond'ring 
forests soon should dance again—Pope> work of a beauty 
certainly not rivalled until we come to the Norman builders 
—Quiller-Couch> some of them are furnished with colors 
that rival or exceed the brilliance of the famous Morpho 
botherflies—Curran> while my father could never have 
rivaled the sartorial magnificence of some of his friends, 
his dressed in the ceremonial manner of the time—Brooks> 
One thing equals another when it rises to the same level 
or plane (as in quantity, value, or degree) and there is no 
question concerning a difference, especially a deficiency 
such a striking civility . . . ought to be imitated, though 
it could not be equalled, by some exertion of politeness 
on their side—Austen> no other measure of our work 
equals the sight of the product put to its full uses— 
Suzzallo> its society was formed by religion to an extent 
ever equalled in any other epoch of its history—M. W. 
Baldwin> One thing approaches another when it so nearly 
equals or matches the other that the difference, though 
detectable, is seldom important <an adult reader with 
trained habits of . . . concentration will absorb the contents 
of a book with a speed and retentiveness which no child 
can approach—Eliot> an unlettered speaker may startle 
you with his power of giving to the spoken word an urgent 
aptness that approaches the vivid instance of an invol-
untary cry—Montague> One thing touches another thing 
when it closely approaches the other (as in excellence or 
beauty) <not another woman there to touch her—W. J. 
Locke> Yeats, the last in the aristocratic tradition of 
poets . . . none of us can touch his later work—Day 
Lewis> 
Ana correspond, harmonize, *agree, conform, square, 
accord 
Con *differ: vary, *change, alter, modify 
material adj 1 Material, physical, corporeal, phenomenal, 
sensible, objective are comparable when they mean 
belonging to or having a relation to things that belong to 
the world of actuality or of things apparent to the senses. 
Material applies to whatever is formed of matter or relates 
to things formed of matter; it often implies an opposition 
to spiritual, but it may imply an antithesis to ideal, formal, 
tangible, or impalpable <material objects> transport-
ing his material possessions <believes in no other 
world than the material world> busy with material 
affairs—Conrad> bathrooms . . . motorcars, and other 
matter comforts of which that age was ignorant— 
Russell> these poor Christians are not thrifty like our 
country people at home; they have no veneration for 
property, no sense of material values—Cather> Physical 
(see also bodily) differs from material chiefly in suggest-
ing an opposition to physical, mental, metaphysical, 
imaginary, and, less often, spiritual; it applies especially 
to things perceived by the senses or capable of being dealt 
with in the same manner as objects of sense, and it usually 
implies a contrast to things knowable only through thought 
or intuition or built up by the mind or imagination; thus, 
the material objects and the physical objects within one's 
reach may be exactly the same objects, but material 
suggests their substantial nature and physical suggests 
their susceptibility of perception and identification, or, 
or what is more important in science, of being weighed and 
measured. In scientific use physical is also applicable to 
things that are not objects, but forces, actions, motions, 
or states which are operative in nature or in mechanics 
and which can be measured or calculated, or put to use, 
even though, strictly speaking, they cannot be handled 
<physical properties of light> <physical effect of radiation> 
everything physical is measurable by weight, motion, 
and resistance—De Quincey> Corporeal (see also Bodily)
applies to what not only has physical existence but also is tangible or can be described as a body; thus, energy in itself has no corporeal existence though it is a physical power found usually in corporeal things (in a monistic . . . sense "the mind" may be regarded as a living, growing "structure" even though it lacks corporeal tangibility —Science) (the spiritual life commences where the corporeal existence terminates—Frazier) Phenomenal implies a relation to what is known or knowable through the senses and experience, as distinguished from what is knowable only through thought or intuition because beyond perception by the senses; the term is chiefly used in philosophy and science when there is an intent to mark the line between what is actually perceived and what has been ascertained by the reason, has been accepted by faith, or is theoretical or hypothetical (phenomenal reality is often specifically called actuality) (phenomenal nature is reduced to an array of events in the four-dimensional continuum—Jews) her introspective bent has yielded more and more, in her recent writing, to a determination to capture the phenomenal world—Redman) Sensible which basically applies to what is known or knowable through sense experience and thereby comprehends the specific terms visible, audible, tangible, palpable is sometimes opposed to intelligible, conceptual, or notional (there is no sensible movement of the earth) (is this a dagger which I see before me, the handle toward my hand? Come, let me clutch thee . . . are thou not . . . sensible to feeling as to sight? or art thou but a dagger of the mind, a false creation—Shak.) (the man of science may carry us off into a world of symbols, but his symbols stand for features of the external world and he is bent on verifying them by sensible experience—Alexander) Objective (see also FAIR) implies the same kind of existence as phenomenal and sensible, but it stresses the apartness of the thing known through the senses from the person who perceives it through his senses; the term, therefore, implies not only material existence but an existence which is or is felt as uncolored by the prejudices and preconceptions of the perceiver (the ancient Hebrew . . . saw the rainbow as an objective structure set in the heavens for all men to behold—Jews) (acosmism, the theory which denies the objective existence of the world or universe—Inge) Ana *carnal, fleshly, sensual, animal: actual, true, *real: tangible, *perceptible, appreciable, palpable Ant immaterial 2 *relevant, germane, pertinent, apposite, applicable, apropos *important, significant, consequential, momentous *tangible, *perceptible, appreciable, palpable *material which basically applies to what is known or knowable through sense experience and thereby comprehends the specific terms visible, audible, tangible, palpable is sometimes opposed to intelligible, conceptual, or notional (there is no sensible movement of the earth) (is this a dagger which I see before me, the handle toward my hand? Come, let me clutch thee . . . are thou not . . . sensible to feeling as to sight? or art thou but a dagger of the mind, a false creation—Shak.) (the man of science may carry us off into a world of symbols, but his symbols stand for features of the external world and he is bent on verifying them by sensible experience—Alexander) Objective (see also FAIR) implies the same kind of existence as phenomenal and sensible, but it stresses the apartness of the thing known through the senses from the person who perceives it through his senses; the term, therefore, implies not only material existence but an existence which is or is felt as uncolored by the prejudices and preconceptions of the perceiver (the ancient Hebrew . . . saw the rainbow as an objective structure set in the heavens for all men to behold—Jews) (acosmism, the theory which denies the objective existence of the world or universe—Inge) Ana *carnal, fleshly, sensual, animal: actual, true, *real: tangible, *perceptible, appreciable, palpable Ant immaterial 2 *relevant, germane, pertinent, apposite, applicable, apropos *important, significant, consequential, momentous (see corresponding nouns at IMPORTANCE): vital, cardinal, *essential, fundamental Ant immaterial material n *matter, substance, stuff *element, constituent, ingredient, component materialize externalize, objectify, incarnate, embody, actualize, *realize, hypostatize, reify matériel 1 *equipment, apparatus, machinery, paraphernalia, outfit, tackle, gear 2 *armament, munitions, arms, ordnance, artillery, ammunition matrimonial, marital, conjugal, connubial, nuptial, hymeneal mean of, relating to, or characteristic of marriage. Matrimonial is the most general term applicable to whatever has to do both with matrimony and with marriage in most of its senses (see MARRIAGE) (matrimonial vows) (the matrimonial state) (with close fidelity and love unfigned, to keep the matrimonial bond unstained—Cowper) (matrimonial bliss) Marital which sometimes implies specific reference to the husband and his part in marriage (matrimonial rights) (matrimonial authority) is often used interchangeably with matrimonial (matrimonial vows) (the marital relationship) Conjugal and connubial are frequently used interchangeably. More discriminatively, conjugal refers to persons who are married (they flaut their conjugal felicity in one's face—Wilde) (I count it my good fortune that never once in . . . my childhood was I the witness of any conjugal jar—Ellis) and connubial to the marriage state (of my friends who have been least successful in connubial contracts—Johnson) (enter the connubial state) Nuptial has primary reference to the marriage rites or ceremony (the nuptial torch—Milton) (the nuptial ceremony was then performed by the Superintendent—Motley) Hymeneal is a poetic or literary word, suggestive of the splendors of marriage rites and festivities (hymeneal songs) (chorus hymeneal, or triumphal chant matched with thine would be all but an empty vaunt—Shelley) (one fully expects that . . . the characters will join hands at the conclusion and dance off the stage to hymeneal music—Booth) 

A colon (:) separates groups of words discriminated. An asterisk (*) indicates place of treatment of each group.
mature

critical and especially of made things (a cake made from the best materials) (the material of this dress is silk) (the sculptor, who is limited to a few materials like stone, wood and metal—Read) But often it subordinates physical nature to the fact of being made and then may imply the idea of actuality or a basis in actuality rather than physical substance; thus, raw materials are usually physical substances capable of refinement or manufacture but they also may be events, ideas, or facts capable of further use (as in literary creation) (adventures which would make good raw materials for several novels—J. H. Burton) (a region rich in coal, iron, and other raw materials) (is the whole creative effort of the artist an endeavor to form material so that it will be in actuality the authentic substance of a work of art?—Dewey) Stuff may replace material or substance in reference to constituent materials or substances (the house was built carelessly and of poor stuff) (creating out of raw material a skilled working class ... they are the stuff of which The New Congo is made—Marvel) but more often it refers to all the parts, parcels, objects, or items that make up an aggregate or a whole; in both cases it is likely to imply indeterminateness and suggest vagueness if at all the nature of the constituent materials or parts (pick up the stuff you left on the table) (ambition should be made of sterner stuff—Shak.) Sometimes, distinctively, stuff carries an inherent implication of inferiority (not a line of the volume was ever included by Bryant in his later writings, and he spoke of the pamphlet with testy disgust as stuff—Nevins) (what was the psychological impulse behind the pedantic and elaborate stuff he called in the end Finnegans Wake?—Desmond MacCarthy) 2 a affair, business, concern, thing 3 subject, subject matter, argument, topic, text, theme, motive, motif, leitmotiv

Ana stolid, phlegmatic, *impassive; arid, *dry: downright, *forthright
Con fanciful, *imaginary, fantastic, chimerical, quixotic, visionary: ideal, transcendental (see abstract adj); romantic, *sentimental mature adj Mature, matured, ripe, mellow, adult, grown-up are comparable if not often interchangeable because they all bear the same underlying meaning "fully developed." Mature, in its basic use as applied to living things, stresses fullness of growth and readiness for life or function; as applied specifically to persons, it usually implies attainment of the prime of life, when a person is at the height of his powers, physically and mentally (a great writer of the past is known by the delight and stimulus which he gives to mature spirits in the present—Brooks) (the life has a mature tone, an intellectual alertness, a sense of proportion—Laski) As applied to things, mature usually equals matured, which implies the completion of a course, process, or period; thus, a matured plan is a fully thought-out plan; a matured wine is one that has been allowed to age properly; a matured note is one that has reached the date when payment is due (must be replaced by the matured concept that virtue is its own reward—Davies) A matured poetic intelligence is often happily fused with the creative beat of poetic imagination—Horace Gregory) Ripe, though it implies maturity, stresses readiness for use; in its basic sense it is applied chiefly to such things as fruits ready for eating, grains or vegetables ready for harvesting, or seeds ready to germinate. In extended use it often connotes merely readiness or full preparedness for action, activity, or use (ripe for exploits and mighty enterprises—Shak.) (to be careful, in teaching history, not to obtrude aspects which are interesting to us until the child is ripe for them—Russell) Sometimes, however, ripe connotes one or more of the characteristics of ripe things, especially ripe fruits, such as ruddiness, plumpness, or richness (Greek sculpture, in its ripe perfection—Binyon) Mellow stresses such either agreeable qualities associated with ripe or slightly overripe fruits as softness, tenderness, sweetness, or the loss of their opposites, the signs of immaturity, such as hardness, harshness, or bitterness (mellow cheese) (mellow wine) (the more mellow and cheerful outlook of his second book—Buchan) Adult is the equivalent of mature in its application to the physical characteristics of living things (a rhesus monkey ... is infantile 1.5 years, juvenile 6.5 years, and adult some 20 years—La Barre) It presupposes, however, a clearer line of demarcation, especially when used of human beings. An adult person physiologically is one that has passed beyond adolescence; in law, he is one that has attained his majority (people born in this country who have not been within its borders in all the years of their adult lives—Discovery No. 2) In extended use adult implies the attainment of that point in development where the weaknesses of immaturity or of imperfection are surmounted (the difference between Realism and Classicism) seems to me rather the difference between the complete and the fragmentary, the adult and the immature, the orderly and the chaotic—T. S. Eliot) (people supremely adult and specially schooled to comprehend ideas and employ logic—Flanner) Grown-up is sometimes used in reference to adult when an antithesis to childish is needed (adults incapable of grown-up behavior)

Ant immature: childish—Con *childlike: *youthful, juvenile, boyish, puerile, maiden mature vb Mature, develop, ripen, age are used in reference to living, growing things or to things with latent capacity for betterment and mean to come or cause to come to the state of being fit for use or enjoyment. When employed with reference to living things or their specific characters, mature stresses fullness of growth and readiness for normal functioning (in warm climates human beings are more rapidly than in cold climates) (in his maturing days, young Warren was a cheerful and attractive personality—S. H. Adams) (he was matured by six years' practical experience in a New York militia regiment—Robert Lowell) while develop stresses the unfolding of all that is latent and the attainment of the perfection that is appropriate to the species or is possible to the individual (the kitten's hunting instinct was not yet developed—Russell) and ripen emphasizes the approach to or the attainment of the peak of perfection (the fruits are now sufficiently ripened) (there is nothing here of slow budding, of fruits ripening in stillness—Carlos Baker) (at twenty-three she was still young enough to ripen to a maturer beauty—Glasgow) Age may equal mature when it is applied to the young (hard work ages a boy) but more often and in other contexts, routinely, it implies approach to the period of decline or decay (the leaders of the movement are aging rapidly) (as the individual matures and then ages, he constantly has to unlearn patterns of response which have ceased to be effective—Linton)

In their extended applications to things with latent capacity for improvement all these terms imply a perfecting with time. Mature suggests that something not fully formed undergoes completing changes (mature a plan) (an art that toiling ages have but just matured—Cowper) (his ideas about the novel continued to develop and mature—Cousins) while develop especially applies to the unfolding into full being or effectiveness of something that is potential, latent, or nebulous (the environ-

meager, scanty, scant, skimpy, scrimp, scrimp, exiguous, spare, sparse are comparable when they mean so small (as in amount, number, or size) as to fall short of what is normal, necessary, or desirable. Mean stresses thinness: as applied to persons or animals, it suggests emaciation <ref>{meager were his looks, sharp misery had worn him to the bones—Shak} but as applied to things in general, it implies the absence of elements, qualities, or numbers necessary to a thing’s richness, substance, or potency <ref>{a meager diet} an outline in itself is meager, truly, but it does not necessarily suggest a meager thing—James> his austere and meager life bred too little sensuousness of nature and too few intellectual passions —Parrington> meager appropriations which necessitated the most rigorous economies—Pahlow> Scanty emphasizes insufficiency in amount, quantity, or extent <ref>{a scanty supply of food for the winter} the book . . . is not, like some biographical essays with scanty material, stuffed out with appreciation and conjecture—T. S. Eliot> <ref>{such a scanty portion of light was admitted . . . that it was difficult, on first coming in, to see anything—Dickens} Scant may differ from scanty in suggesting a falling or a cutting short (as in amount or quantity) of what is desired or desirable rather than in what is necessary or essential <ref>{the work of those hours was miserably scant—Hardy} they were held in scant esteem—Grandgent> Scanty and the less common scrimp as applied to things may be quite interchangeable with meager <ref>{sufficiently recovered from her cold to climb out of bed and into a skimpy, strapless blue gown—Capote} a reasonably thoughtful appraisal of the new Russian leader, based on such skimpy evidence as is now available—Ulh> {four acres is scrimp measure for a royal garden, even for a king of the heroic ages, whose daughter did the family washing—Notes & Queries} but often they are more strongly colored by the related verbs, skimp and scrimp, and then usually suggest niggardliness or penury as the cause of the deficiency <ref>{prevents skimpy construction that often leads to airfield shutdowns and aircraft accidents—Livingston} <ref>European art books commonly come out with hundreds of huge, magnificent color plates. American art books, especially those produced by commercial publishers, are often skimpy, starved and inadequate by comparison—Frankenstein> more of their breeding than they were of the scrimp, almost stingy respectability of the menage—White> Exiguous stresses a smallness in size, amount, extent, or capacity that is more or less inherent in the thing under consideration and makes it compare unfavorably with other things of its kind <ref>{brains too exiguous to hold more than half an idea at a time—Amer. Speech} {building ships to supplement his exiguous navy—Buchan} a much larger dominion than the exiguous Dalriada—Times Lit. Sup.> Spare (see also lean, superfluous) implies merely a falling short of what is easily or fully sufficient; unlike scanty and meager, it seldom suggests resulting loss or hardship <ref>{a spare diet} <ref>{a alert, and jaunty figure—Wolfe} the journals . . . are by no means spare and laconic—Dullis> Sparse stresses a lack of normal or desirable thickness or density; the term need not suggest insufficiency or inadequacy in numbers or in quantity, but it always connotes a thin scattering of the units <ref>{the sparse population of the mountainous district} {facing the facts of her defeat and her poverty and by encouraging sparse, stringent living—Anthony West} a sparse congregation of old women scattered over the church—Bruce Marshall> Ant thin, slender, slim, slight, tenuous, rare: thinned, attenuated, extenuated, diluted (see thin vb): jejune, flat, *insipid, inane: penurious, *stingy, parsimonious

Ant ample: copious

mean adj Mean, ignoble, abject, sordid can all be applied to persons, their behavior, or the conditions in which they live with the meaning so low as to be out of keeping with human dignity or generally acceptable standards of human life or character. Mean usually suggests such repellent antisocial characteristics as malevolence or cupidity. It almost invariably connotes small-mindedness <ref>{those who are tempted by the flesh have usually nothing to fear from avarice or the meaner vices—Mackenzie} {her father is a decidedly vulgar person, mean in his ideals and obtuse in his manners—Erskine} Often mean implies conduct or an attitude that is detestable and unworthy of a human being {Delane . . . flung him off like a thing too mean for human handling—Wharton} {now and then in his pages war flashes out in romantic or heroic episodes, but for the most part it is mean and degrading, a thing to be hated—Parrington} Ignoble, like its opposite noble, usually implies qualities of mind or soul. It frequently comes close to mean except that it seldom connotes small-mindedness. Its distinguishing implication is loss or lack of some essential high quality (as spiritual elevation, moral dignity, or intellectual excellence) (to see how those he has converted distort and debase and make ignoble parodies of his teaching—Huxley> {these are . . . as low and ignoble, as gutter-fallen and dispiriting, as can only be found in the gloomier literature of imperial Russia—J. M. Brown}> Abject, in its most inclusive sense, means little more than extremely low in station or in degree {bad not that fear of beautiful and rich things which renders
mean

 vb 1 *intend, design, propose, purpose

 mean

 n 1 *average, median, norm, par

 mean, instrument, instrumentality, agent, agency, medium, organ, vehicle, channel denote a person or thing through or by which work is performed or an end is effected. Mean, usually in the form means which may be either singular or plural in construction, is the general word of these words; it may be applied not only to persons and to such concrete things as implements, tools, and machines, but also to their actions or operations; it may also be applied to methods, policies, devices, and strategies. The habit of regarding the laboring class as a mere means to the maintenance of the rest—Dickinson

〈the manufacturer who doesn't look into every possible way and mean to show . . . where he may practically and economically find new business—Harry Martin 〈the justification of barbarous means by holy ends—Muller〈the principal means of transportation was . . . Afghan camels—Hoover

 Instrument is applied especially to persons who merely carry out another's will or intention, often as tools, sometimes as dupes 〈he . . . turned on me . . . suspecting perhaps that I only wished to make an instrument of him—Hudson〈if they [judges] were to be used as the instruments, and the knowing instruments, for violating what they swear to support—John Marshall

When applied to concrete things, instrument often derives connotations from its musical sense (as susceptibility to manipulation and responsiveness to touch or use) 〈he knew his brain was now a very uncertain instrument, sometimes quite good, sometimes a weary fount of half-formed ideas—H. G. Wells Instrumentality is interchangeable with means but not with instrument because its chief implication is effective action by, or effective use of, the instrument (through the instrumentality of the police he was able to locate his relatives) 〈without the instrumentality of a free press liberty could not be preserved 〈Agent is applied chiefly to persons and only by extension to things; the term usually names the one who does the work as distinguished from the one who wills, plans, or orders. I often think, then, how you were an unconscious agent in the hands of Providence when you recalled me from Tucson—Cather〈ultimately these tattooed devils . . . were turned into effective agents for the maintenance of law and order—Heiser

When applied to a thing, agent names what effects a desired result or serves as a cause producing a definite effect

In their special use in reference to the interpretation of the content of a term, these words are not always distinguishable. Mean, however, is capable of implying reference to the term's full content, that is, to the idea or relation between ideas which it conveys to the mind and the suggestions which it evokes (only a philosophically minded person can grasp what beauty and truth mean in Keats's lines "Beauty is truth, truth beauty,—that is all ye know on earth, and all ye need to know.") Signify can, as mean usually does not, suggest symbolic relationship between the term and the idea it conveys (the phrase "bread and butter" signifies the material needs of life

Denote (see also DENOTE 2) can imply a logical definition in which the idea named or expressed by a term is clearly marked out and its application or range of application accurately determined 〈"design" denotes one of three ideas, the act of adorning, or a thing used in adorning, or the results achieved by one who adorns 〈Import, used with less frequency in relation to terms, is precise in its implications. A term imports not what it denotes, or bears as a definition, but any or all of the implications involved in its interpretation 〈does it [the word "necessary"] always import an absolute physical necessity

〈—John Marshall

meaning, sense, acceptation, signification, significance, import are comparable when they denote the idea which something (as a word, a passage, a facial expression, an action, or a situation) conveys to the mind or is intended to convey to the mind. Meaning, the general term, may be used interchangeably with any of the remaining terms; it may be used of whatever can convey information when properly interpreted and therefore is not only applicable to language and expressions or gestures but to such more cryptic things as symbols and works of art (a dictionary gives the meanings of words) (if human and the words formed from it can have an exact meaning ... that meaning must refer to those qualities, characteristics, and powers which distinguish the human being—Krutch) (to understand a plain man in his plain meaning—Shak.). The sentence has meaning to Sam even if it will not have meaning to you. A great many ruminations, discoveries, and memories contribute their connotation—Mailer Sense (see also sense 2) denotes either the meaning or, more often, one of the specific or particular meanings, of a word or phrase, or sometimes of an allegory (some words have many senses) (the literal and figurative senses of

Pilgrim's Progress) (in the sense usually implied by the word, Minneapolis has no slums, even though it admits to neighborhoods where substandard housing conditions prevail—Amer. Guide Series: Minn.) More abstractly, it refers to intelligibility in general (speaks things ... that carry but half sense—Shak.) (in the first authentic edition ... the words, I believe, ran "and a table of green fields," which has no sense—Newman) (if his work rarely has startling originality ... it always has sense and penetration of judgment—Schesinger b. 1917) Acceptation (see also acceptance) differs from sense as denoting a meaning of a term chiefly in its stress upon the actual use of that sense or upon its acceptance by a large number of writers and speakers (it is necessary first to consider the different acceptations of the word knowledge—Locke) (philosophy) in its common ... acceptance ... signifies the search after wisdom—Fielding) (where German has separate words for each subsidiary meaning, French is content with a general term, leaving it to the context to specify which particular acceptance is relevant—Ullmann) Signification and significance (see signify under MEAN vb 2; significance under IMPORTANCE) are often used interchangeably in spite of the fact that they can be carefully differentiated in their meanings. Signification applies specifically to the established meaning of a term, a symbol, or a character, or to an established sense of a word; it usually implies that when a particular term or symbol or character is used only such an established idea is evoked in the mind of informed persons (the significations of the characters which serve as Roman numerals). I find it very ... interesting to know the signification of names, and had written to ask him whether Jerusalem meant "the vision of peace" or "the foundation of peace"—Arnold) (the counsel for the appellee would ... restrict a general term, applicable to many objects, to one of its significations. Commerce, undoubtedly, is traffic, but it is something more: it is intercourse—John Marshall) Significance, on the other hand, applies specifically to the covert as distinguished from the established or the ostensible meaning of something; it may from its other sense (see importance) carry a connotation of weight or moment (his language is so grandiose that one wonders if his speeches have any significance) (no one knows for a certainty the significance of some early Christian symbols) (for the mathematically illiterate, like myself, these things are ... mere scribblings, without significance—Huxley) (explaining all the minute happenings of the ranch ... as though each of them had a special joyous significance—Mary Austin) Import (see also importance), like significance, may imply momentousness, but in contrast with that term, and like signification, it denotes the idea or the impression conveyed or to be conveyed to the mind by the medium of words (spoke words in her ear that had an awful import to her—Meredith) (Kim gathered the import of the next few sentences—Kipling) Ana suggestion, implication, intimation, hinting (see corresponding verbs at suggest): denotation, connotation (see under denote)

meet vb 1 Meet, face, encounter, confront can all mean to come across or to run into someone or something face-to-face or as if face-to-face. Meet fundamentally implies the action of two or more persons or things which from different directions come across each other by design or by accident; often it implies nothing more (the narrow strip of Syrian seaboard which they occupied when we first meet them in history—Clodd) (where the Mohawk meets the Hudson river) (the little girl ran to meet her father as he came up the hill) Beyond this, the word may suggest such actions or intentions as finding, experiencing, or dealing with successfully (I never met with such kindness before) (it is perhaps only in England that such ideas can be expressed without meeting anger or ridicule—Sykes) (Hobart . . . could talk; he could assert; produce opinions and information, but he couldn’t meet or answer arguments—Rose Macaulay) Face may imply nothing more than a standing or a meeting face-to-face (as of persons or things that merely present their faces or their fronts to each other) (they faced each other across the table) (a very capacious couch faced a generous fire-place—Sidney Lovett) but it more often emphasizes the act or intention of one who with courage or resolution or confidence, or with effrontery, or with desperation, looks upon or meets another person or thing (the government faces a strong storm of protest over its decision—Current History) (the artist must face life and defy it—Bambrick)

melancholic adj Melancholic, melancholy, atrophilous, hypochondriac are comparable when they mean gloomy or depressed, especially as a manifestation of one's temperament or state of health. Melancholic and melancholy are often used interchangeably without additional implications or suggestions (the drawings Thurber has produced . . . calling into being an ineradicable population of fierce-looking women, furtive men, and gently melancholic dogs—Newsweek) (the Cape Colored, a gentle and melancholy people—N. Y. Times) although each can be used discriminately to suggest the differences inherent in their related nouns (see melancholia and melancholy under SADNESS). In such use melancholic describes a person who is afflicted with or inclined to melancholia (those recurring moods of melancholic suspicion which had so tortured me . . . remained absent and she seemed on the road to recovery—Ellis) Melancholy, on the other hand, describes a person, or the mood, disposition, acts, or utterances of a person, who is excessively sad or detached in spirit and, usually, averse to what is cheerful or gay ("They say you are a melancholy fellow."); "I am so; I do love it better than laughing"—Shak) (a changed smile flickered like sunlight over the melancholy countenance—Wylie) (there is noerriment . . . comparable to that of melancholy people escaping from the dark region in which it is their custom to keep themselves imprisoned—Hawthorne) Atribophilous preserves the implication of an
unhealthy physical condition more strongly than the pre-
ceding words; often in modern use it suggests the morose
or choleric disposition of the dyspeptic or the predilec-
tion for gloom of those who have been subjected to severe
strain (neither were those plump rosy-gilled Englishmen
that came hither, but a hard-faced, atrabilious, earnest-
eyed race—J. R. Lowell) (that the American genius was
foredoomed to fail was the atrabilious Ames’s firm con-
viction—Brooks) Hypochondriac comes close to atrabil-
ious in its suggestion of constitutional gloominess but it
implies also an unwelcome anxiety about one’s state of
health (she was rather hypochondriac and was gloating
over the tale of her symptoms—Edmund Wilson) (the
culture just had gone hypochondriac, and all members
of the society, whatever their congenital individual
dispositions, had fear and pessimism pounded into them
from childhood on—Kroeber) Ana *despondent, despairing, hopeless, forlorn, desper-
ate: pessimistic, misanthropic, *cynical, misognic
melancholy n *sadness, melancholia, dejection, gloom,
depression, blues, dumps
Ana miserable, miserable, misery, wretchedness (see corre-
sponding adjectives at MISERABLE): despondency, despair,
helplessness, forlornness, desperation (see under DES-
PONDENT): *tedium, boredom, ennui, doldrums
Ant exhilaration — Con joy, delight, *pleasure, enjoy-
ment, delectation, fruition: hopefulness, optimism (see corre-
sponding adjectives at HOPEFUL)

melancholy adj 1 *melancholic, atrabilious, hypochon-
driac
Ana morose, gloomy, glum, *sullen, dour, saturnine: depres-
sion, oppressed, weighed down (see DEPRESS): *despondent, despairing, hopeless, forlorn, desperate
2 Melancholy, dolorous, doeful,lugubrious, rueful, plain-
tive are comparable when they mean expressing or sug-
gestting sorrow or mourning. All of these words have, to a
greater or less extent, weakened from their original mean-
ing and are often used with a half-humorous connotation.
Melancholy May stress a quality that inspires pensiveness
or sad reflection or awakens mournful thoughts or recol-
lections which are not only not necessarily painful or
disagreeable, but often agreeable, especially to the poetic
or thoughtful mind (sweet bird, that shunneth the noise of
folly, most musical, most melancholy!—Milton) (the ten-
der images we love to trace steal from each year a melan-
choly grace—Rogers) (1 have in the present moment only
the melancholy pleasure of an easy conscience—Warren)
The term more frequently applies to something which
expresses or excites dejection or depression (his mel-
ancholy old house on the hill—Deland) (that melancholy
problem of a money-earning occupation which lay so
heavily on my thoughts—Ellis) Dolorous describes what
is lamentable in its gloom or dismalness or is exaggeratedly
dismal (that dolorous aspect of human nature which in
comedy is best portrayed by Molière—T. S. Eliot) (a
rapid succession of warnings, as dolorous and pessimistic
as the little booklets of possible mishaps that accompany
the sale of English papers—Gallant) Doeful and lugubrious
are also frequently applied to what is exaggeratedly dismal
or dreary, but doeful connotes a weight of woe (a doeful
and luckadaisical air) (the mourners, who are singing
a very doeful dirge—Goodenough) and lugubrious,
an undue, and often an affected, heaviness or solemnity
(dark funereal barges like my own had flitted by, and
the gondoliers had warned each other at every turning with
hoarse, lugubrious cries—Howells) (a lugubrious obituary
quality in the treatment given by the American press
to Sir Winston’s resignation—Reporter) (a lugubrious
place which filled me with dread—Henry Miller)

Rueful implies sorrow and regret but it often suggests a quizzical
attitude (the woebegone heroes . . . eyed each other with
rueful countenances—Irving) (the fleeting glory of Napo-
leon, the rueful memory of Josephine and her somehow
less enviable successor—Cassidy) Plainive applies chiefly
to tones, sounds, utterances, or rhythms that suggest
complaint or mourning or that excite pity or compassion
(the plaintive cries of a child) (he sighed, his voice
became plaintive—Huxley) (the clarinet sings, in its
erie plaintive tone—S. R. Watson)

Ana pathetic, poignant, *moving, touching: hopeless,
forlorn, despairing (see DESPONDENT): pensive, reflective,
thoughtful: discomposing, disquieting, perturbing, dis-
turbing (see DISCOMPOSE)
Con happy, *glad, cheerful, joyous, joyful, lighthearted:
*lively, vivacious, gay

meelee fracas, row, *brawl, broil, rumpus, scrap
Ana altercation, *quarrel, wrangle, squabble: *confusion,
disorder

mellow ripe, matured, *mature, adult, grown-up
Ana *tender, warm, sympathetic, responsive, warm-
hearted
Ant unmellow: green — Con raw, crude, callow, un-
couth, *rude, rough

melodramatic histrionic, theatrical, dramaturgic, *dram-
ic
Ana *showy, pretentious, ostentatious: *sentimental,
romantic, maudlin, mawkish

melody, air, tune all denote a clearly distinguishable
succession of rhythmically ordered tones. Melody stresses
the sweetness or beauty of sound produced by such an
arrangement of tones (sweetest melodies are those that
are by distance made more sweet—Wordsworth) It
also commonly suggests expressiveness or moving power
and a carefully wrought pattern (nerve-dissolving melody
—Tennyson) (tis a rich sobbing melody, with reliefs
full and majestic—Keats) Technically, as applied to
complex musical structure, melody implies a contrast to
harmony: it designates that kind of musical beauty
produced by a continuous series of tones in one or more
of the voice parts, in distinction from that produced by
simultaneously sounded tones in all the voice parts.
Air is applied technically to the dominating melody, usually
carried by the upper voices (as in a chorale or part-song)
and whistle all the airs from . . . Pinareore—Gilbert)
In more general use air is often applied to an easily re-
membered succession of tones which identifies a simple
musical composition (as a song, a ballad, or a waltz) and
which is more commonly and more precisely called tune;
thus, one may refer to the air, or the tune, of a song (hum
the air of the Marseillaise) (left her fancynwork and
played for them some old Scotch airs—Black) (he . . .
can invent a good tune which immediately captivates
one—Dyneley Hussey) Tune is also applied to the
musical setting of a text (as a ballad, psalm, or lyric)
(a hymn tune) and to a simple composition whether
written or harmonized (a dance tune) (many hundred
texts and tunes of English-Canadian folk songs—Report
on Nat’l Development (Ottawa))

melt *liquefy, deliquesce, fuse, thaw
member *part, portion, piece, detail, division, section,
segment, sector, fraction, fragment, parcel

Ana *element, component, constituent: branch, limb,
*shoot, bough

memento *remembrance, remembrancer, reminder, me-
 morial, token, keepsake, souvenir
Ana token, earnest, *pledge: *gift, present, favor

memoir * biography, life, autobiography, confessions

memorable *noteworthy, notable

See also explanatory notes facing page 1
memory, memorandum

memorandum *letter, epistle, missive, note, message, dispatch, report

memorial n *remembrance, remembrancer, reminder, memento, token, keepsake, souvenir

Ana monument, record (see DOCUMENT): *sign, mark, token

memory, remembrance, recollection, reminiscence, mind, souvenir are comparable though not wholly synonymous terms since all involve the ideas of remembering and of being remembered. Memory applies chiefly to the power or function of remembering what has been experienced or learned; in this sense it suggests the power to reproduce images of what is no longer before one, to retain something (as words, ideas, or skills) that has been learned, and to recognize and identify something previously known <he has a remarkably good memory for names> <her memory . . . went slipping back upon the golden days—Tennyson> Memory often occurs in the sense of something remembered either as an aggregate or as a single item. More than the other words memory as used in this sense suggests a keeping in mind rather than a bringing back and often, therefore, a treasuring as something intimate or personal <a present moment of comfortable reality was worth a decade of memories—Hardy> <it was the merest memory now, vague and a little sweet—Galsworthy> <you must have had a charming evening . . . if I may judge from the way you have kept the memory green—Conrad> Remembrance applies primarily to the act or the process, as distinguished from the faculty, power, or function, of remembering <the remembrance of all that made life dear pierced me to the core—Hudson> <Roman soldiers . . . keep the restless Jews in remembrance of their provincial status—Douglas> <as April’s green endures; or will endure like her remembrance of awakened birds—Stevens> Remembrance also denotes the state or fact of being kept in the memory <moments . . . that live again in remembrance—Gibbon> <our literature is going to be our most perdurable claim on man’s remembrance—Quiller-Couch> Recollection often takes the place of remembrance but it may carry a strong suggestion of more voluntary and sometimes even more effortful recalling to mind often of something forgotten or for long unconsidered <he looked . . . alarmed; but with a moment’s recollection and a returning smile, replied—Austen> <half a word fixed upon or near the spot, is a worthy carload of recollection—Gray> <there came to him a slight uneasiness, a movement of the memory, a distant recollection of something, somewhere, he had seen before—Dahl> But recollection is quite as often used of something remembered, especially as the result of conscious effort <vivid indeed is my recollection of our halts before shaded homesteads, our protracted and usually successful parleys with lean housewives, hungry for conversation—Grandgent> <carried away from Casablanca an unpleasant recollection of indignities to which he believed he had been subjected—Funk> Reminiscence carries a stronger implication of recovery through retrospection than any of the other terms. Like remembrance and recollection it denotes either the act or the process of remembering but it further suggests the recollection of what has been long unremembered, especially because it belongs to one’s remote past <the old man spent hour after hour indulging in reminiscence> <after another quarter of an hour of reminiscence they had got around to the things that had happened to each of them since they had last met—Mary Austin> <spurred into reminiscence ... revealed a strange tale told to him years earlier—Rippin> The term is often used in place of recollection in the concrete sense where what is remembered serves as a contribution to biography, an autobiography, or a history <the author’s own reminiscences of childhood and youth—Times Lit. Sup.> or is recalled from the past in conversation or in writing by an aging or aged person <enjoy the reminiscences of the old veterans> or is a phrase, a passage, a thought, or a custom that is so like one found in an earlier writer or people as to be regarded as an unconscious imitation or repetition or a survival <the young poet’s best phrases are reminiscences of Keats> <reminiscences of medieval pageants in modern carnivals> <here and there are to be found the reminiscences of Rimski-Korsakov’s mannerisms—Sargeant> Mind (see also MIND 2) is found in the sense here considered chiefly in certain idiomatic phrases where it means either the entity (as distinct from the function) which stores up what is remembered <I shall keep your need in mind> <out of sight, out of mind> or the power to remember <like . . . assorted autocrats since time out of mind, always referred to himself in the third person—Pynchon> Souvenir, which more commonly denotes a material memento, may sometimes replace memory <then she carefully restored them, her mind full of souvenirs newly awakened—Bennett> Ana *mind, intellect, soul, intelligence, brain, wit—remembering, minding, recalling, reminding (see REMEM BER): awareness, consciousness, cognizance (see CORRESPONDING ADJECTIVES AT AWARE) Ant oblivion menace vb *threaten Ana alarm, terrify, scare, *frighten: *intimidate, cow: pressage, portend, forebode, forecast (see FORETELL) mend vb Mend, repair, patch, rebuild are comparable when they mean to put into good or fitting order something that is injured, damaged, or defective. Mend basically implies a freeing from faults or defects <mend your manners> <the wound mended slowly> but in its most common use it specifically suggests a process of making whole or sound something that has been broken, torn, or injured (as by wear or use). In such use the term is especially applicable when the task calls for no extraordinary skill or unusual equipment; thus, one mends a dress by sewing up tears, darning holes, or reinforcing worn spots <mend a broken dish with glue> <mending the stone wall with cobbles from the field> <over here the roads were never mended unless a few of the farmers agreed to give so much labor—Glasgow> Often, and especially in extended use, mend stresses the resultant putting in order without much regard to the nature of the means of its attainment <he mended the fire while he was speaking and the glow fell over the darkened room—Roberts> <whenever civilization palled upon him, he learned to mend his soul by going to sea—Erskine> Repair is often interchangeable with mend in the sense of to make whole or sound, but typically it implies greater or more professional skill by the performer and usually correspondingly greater complexity both in the task involved and in the equipment used; thus, an old-time cobbler mended shoes so that they were good for further use but a modern specialist may repair them so well that his work cannot be detected; a boy may know how to repair a car but be unable to do so for lack of essential tools <mending refers to minor restoration, not involving the replacement of any material or the separation of book from cover . . . Repairing is the partial rehabilitation of a worn book, the amount of work done being less than the minimum involved in rebinding and more than the maximum involved in
**mendacious**—Library Jour.> In extended use, too, repair may be quite like mend (the plain fact is that peace—or what passed for peace before it was broken—cannot be mended, cannot be repaired, cannot be restored—MacLeish) but often it more specifically implies a making good or making up for something (reminds himself that he had not wept for the death of his mother a year or so earlier, and proceeds to repair the omission—Times Lit. Sup.) (although his range of reading was wide, he could not in some respects repair the lack of early education—Collis) Patch basically implies a mending by covering, filling in, or reinforcing such a defect as a hole, rent, or weak spot, typically with the same or a similar material (patch overalls worn thin at the knee) (patch holes in the road with asphalt) (patch an inner tube) Sometimes, often with up, it implies careless, hurried, clumsy, or temporary mending ($4,800,000 appropriated to start a new prison in New Jersey has been since diverted to patch up the 118-year-old penal slum at Trenton—O'Leary) and in much of its extended use this is the aspect stressed (he hastily tries to patch up his marriage and purify his politics—Beverly) (relations between the two men had to be patched up repeatedly—Ishbel Ross) Sometimes, often with together, patch implies a making from bits and pieces or odds and ends (patch a quilt) (patch a car together from pieces out of the junkyard) (his life must be patched together from scattered references in the contemporary colonial records—J. T. Adams) Rebuild, which normally means to build again something which has been razed or ruined, is often preferred in industry and business to repair because it implies a thoroughgoing repairing with addition of new parts when necessary that makes a thing like new (a rebuilt typewriter) (rebuild a carburetor) Ana *improve, better, ameliorate, help: emend, remedy, redress, *correct, rectify, reform: *renew, restore, reno- vate, rejuvenate, refurbish: fix, *adjust, regulate mendacious *dishonest, lying, untruthful, deceitful Ana *false, wrong: prevaricating, equivocating, paltering, fibbing (see lie vb) Ant veracious—Con *reliable, dependable, trustworthy: honest, *upright, just, scrupulous, conscientious, honorable menial servile, slavish, *subservient, obsequious Ana abject, *mean, sordid, ignoble: *base, low, vile: Ana refer, allude, advert: cite, *quote

**mental, intellectual, psychic, intelligent, cerebral** can mean of, relating to, or characteristic of that sum total of powers or functions called variously mind, intellect, soul, psyche, or brain (compare mind 2). In general mental applies directly to what has to do with the mind as a real or as a purely theoretical entity (his mental life) (a mental state) (mental diseases) (mental processes) (because every experience is constituted by interaction of self and world it is not itself either merely physical nor merely mental—Early) (even if he dreads no physical betrayal, he suffers . . . at every hint of mental estrangement—Sanatana) Intellectual differs from mental not only in its reference to the intellect, and therefore to such higher powers of the mind as the comprehension of the abstract or difficult and the ability to reason, but also because it is directly applicable to persons, their utterances, acts, and qualities (an intellectual person)

It often carries an implied contrast to emotional and suggests an attachment to study and reflection (all the intellectual qualities of the liberal mind—detachment, subtlety, complexity, understatement, irony—Lerner) (the detective story, as created by Poe, is something as specialized and as intellectual as a chess problem—T. S. Eliot) (it was only on her intellectual side that Elizabeth touched the England of her day. All its moral aspects were simply dead to her—J. R. Green) Psychic implies a relation to the inner self or psyche and guides the attention away from notions of the physical, physiological, or organic (you keep talking about maladies of the mind and soul. I don't accept the idea of psychic diseases analogous to mental diseases—Mackenzie) (the humorist was a type that pioneer society required in order to maintain its psychic equilibrium—Brooks) Intelligent (see also intelligent) implies such a degree of mental power in a person or animal as to make possible appraisal of a situation and formulation of sound or reasonable decisions; it is often contrasted with stupid or silly (men are intelligent beings) (some dogs are more intelligent than others) (intelligent self-interest) (friends, who were a little more intelligent and would understand—Hersey) Cerebral basically calls to mind the higher centers of the brain and may suggest intellectual activity or inclination especially as being coolly analytical and withdrawn from the sensuous and emotional aspects of the mental life (the musical expression is sufficiently cerebral not to inflame anyone's libido—Kolodin) (too cerebral a style, too baldly intellectual, to be wholly satisfactory—Brand Blanshard) (doubtful if he ever can become a popular hero. He is too detached, too cerebral, and too rigid—Gunther)

mention vb Mention, name, instance, specify are comparative when they mean to make clear or specific by referring to something explicitly. Mention indicates a calling attention to, usually by name where possible, sometimes by a brief, cursory, or incidental reference (I shall mention the accident which directed my curiosity originally into this channel—Lamb) (intellectuals are such puritanical devils, that they usually recoil with horror when prayer is mentioned—Forster) (usually the class is not directly mentioned in our statement; but there must be an implicit understanding, since otherwise the probability would be indeterminate—Eddington) (mentioning several minor figures in his lecture on Shakespeare) Name implies clear mention of a name and therefore may suggest greater explicitness (naming Doe and Roe in the report and implicating their associates) (he names golf, tennis, and music as his chief means of recreation—Current Biog.) Instant may indicate clear explicit reference or definite emphasis as a typical example or special case (examples can be instanced from the first to the twentieth century—LaTourrette) (is it unfair to instance Marlowe, who died young?—Quiller-Couch) (I have instanced his book because it was flagrant, not unique—Leech) Specify implies statement so explicit, detailed, and specific that misunderstanding is impossible (the standards specify the names under which these five varieties must be sold—Americana Annual) (as changes emerge from the storm of civil commotion, it is often just as hard to specify the exact day on which a government is born or dies—Jessup) (to specify the structure of a skeleton is to specify the bones of which it consists and their interrelations—Clement)

Ana *refer, allude, advert: cite, *quote mephitic toxic, *poisonous, venomous, virulent, pestilent, pestilential, miasmic, miasmatic, miasmal Ana *offensive, loathsome, revolting, repulsive, repugnant: fetid, noisome, putrid, *malodorous: noxious, *pernicious, baneful mercantile *commercial mercenary adj Mercenary, hireling, venal, hack are comparable though not closely synonymous terms when they are applied to persons, or their acts, services, or products with the meaning actuanted or motivated chiefly

method, mode, manner, way, fashion, system are comparable when they denote the means taken or the plan or procedure followed in doing a kind of work or in achieving an end. Method may denote either an abstraction or a concrete procedure, but in both cases it implies orderly, logical, and effective arrangements (as of one's ideas for an exposition or an argument, or of the steps to be followed in teaching, in investigation, in the treatment of a disease, or in any kind or piece of work); often, also, the term connotes regularity or formality in procedure <his teaching is too informal to be said to have method> <the inductive method of reasoning> <the crude methods of trial and error—Sazzalle> <the method of unfolding the course of a plot must in some ways be different in a play meant for acting and in a book meant for reading—Montague> <always committed the vowels in accordance with the Arabian method of orthography—Krutch> <surely not to leave to fitful chances the things that method and system and science should order and adjust—Cardozo>

Mode (see also fashion 2: state) is sometimes used interchangeably with method, but it seldom stresses orderly or logical arrangement; rather, it denotes an order or course pursued as the result of custom, tradition, or personal preference <the reasons given . . . do not seem very plausible to our modes of thought—Binyon> <a man to whom music was a necessary mode of expression—Read> <a study of fictional villains and the mode their villainy assumes—Austin Warren> Manner is often used in place of mode where the reference is to a personal or peculiar course or procedure, or to a method, whether pursued by a number of persons or not, that seems to be individual or distinctive <mark the manner of his teaching—Shak> <the mathematician . . . is not capable of giving a reason in the same manner as the dialectician—Jowett> <it is not consistent with his manner of writing Latin—Selley> Way (see also way 1), the most general of these terms, may be used in place of any of the rest and is found in many familiar idiomatic expressions where theoretically method, mode, or manner might be more explicit <religion implies not only a way of worship but a way of life> <it was the white man's way to assert himself in any landscape, to change it, make it over a little . . . it was the Indian's way to pass through a country . . . and leave no trace—Cather> <the century has brought us not only new things to see but new ways of seeing—Day Lewis> <Sally used to answer Robert's letters, sadly and patiently, and with no reproaches;—that was Sally's way—Deland> Fashion differs from way not so much in denotation as in connotation derived in part from its commoner sense of style or vogue (see fashion 2). The term often suggests an origin or source that is not so deep or a motivation that is not so abiding as those usually connoted by way; often also it is the idiomatic term in prepositional phrases introduced by after or in <he will, after his sour fashion, tell you—Shak> <subjects serious in themselves, but treated after my fashion, nonsensically—Lamb> <I have been faithful to thee, Cynara! in my fashion—Dowson> <we hear them talking . . . in different fashions under different moods—even as you and I—Lowes> But fashion sometimes comes very close to mode when it means the way that is characteristic of

*See also explanatory notes facing page 1
methodical 538

or peculiar to a group or type (swim dog fashion) (a group of boys sprawl, teen-age fashion, on couches and chairs—The Lamp) System suggests a fully developed and often carefully formulated method (the mind can scarcely conceive a system for regulating commerce between nations which shall exclude all laws concerning navigation—John Marshall) (the system of classification used by botanists) (his manners, his speech and habits of thought all seemed so prescribed, so intricately connected to one another that they suggested a system of conduct—Cheever) As an abstraction, however, meaning orderliness or plan in arrangement or procedure, system is often preferred to method (housekeeping without system) (he follows no system in his reading) Ana process, procedure, proceeding: classification (see corresponding verb at assort): disposition, disposal

mind n 1 *memory, remembrance, recollection, reminiscence, souvenir

2 Mind, intellect, soul, psyche, brain, intelligence, wit are comparable when they mean the sum total of powers, often felt as a distinct entity, by means of which each individual knows and understands both his inner life and the external world and establishes effective relations between them and which are commonly felt as the distinctive possession of human beings. Mind indicates the complex of man's faculties involved in perceiving, remembering, considering, evaluating, and deciding; it contrasts variously with body, heart, soul, and spirit (the mind must have its share in deciding these important matters, not merely the emotions and desires—Rose Macaulay) Mind may indicate the peculiar complex of a particular individual as differing from all others (the mind of a dreamer joined to the temperament of a soldier—Buchan) Intellect, sometimes interchangeable with mind, may focus attention on the powers of knowing and thinking by which one may comprehend, consider, and conclude and especially the more coldly analytic powers, independent of and discrete from willing and feeling (the emotionalist sees himself or herself in luxurious feeling and pathetic imagination, which makes no severe call upon either the will or the intellect—Inge) (now the significance of Sir Thomas Browne lies in the fact that he was at once by intellect a force in the forward movement and by temperament a reactionary—More) Soul (see also soul 2), used with considerable variation in meaning and suggestion, may indicate that principle which vitalizes, directs, selects, or inspires in matters emotional and volitional as well as mental (my inner existence, that consciousness which is called the soul—Jeffries) (the soul is an intelligent, sensitive, and vital principle, a trinity which forms and moves the body predisposed to such action, as well as feels, thinks, and wills—Thilby) Psyche may refer to the totality of self composed of all attributes, powers, and activities not purely bodily or somatic but definitely including the unconscious or subconscious (by the psyche I understand the totality of all the psychic processes, both conscious as well as unconscious; whereas by soul, I understand a definitely demarcated function-complex that is best characterized as a "personality"—Baynes) Brain, often as the plural brains, may more forcefully than intellect focus attention on powers of individual comprehension or independent thought (it requires brains and education to follow the argument—Inge) (have I ever even felt inclined to write anything, until my emotions had been unduly excited, my brain immoderately stirred, my senses unusually quickened, or my spirit extravagantly roused?—Galsworthy) Intelligence is likely to imply specific ability to cope with problems and situations and may apply to exhibition of the play of powers of the intellect or comparable ones (had turned capable men into mere machines doing their work without intelligence—Shaw) (wild animals are not automata—they have intelligence if they lack intellect—Clarke) Wit, often as the plural wits, may refer to a mind marked by inborn capacity, strong common sense, bright perception, or ready intelligence (the un-
theatrical wit of savages—Shaw> (everyone had to be a jack-of-all-trades, everyone had to live by his wit—Brooks)

Mirth, glee, jollity, hilarity are comparable when they mean the mood or temper of a person or a group of persons manifesting joy or high spirits especially in laughter, play, or merrymaking. Mirth often implies lightness of heart and a love of gaiety; it may, however, imply great amusement or cause for laughter (Darcy was not of a disposition in any mirth—Au • t en) > Hilarity fundamentally implies the exhilaration of spirits (as by wine, pleasurable excitement, or great amusement) (wine gives not light, gay, ideal h i l a r i t y, but tumultuous, noisy, clamorous merriment—Johnson) > Hilarity fundamentally implies the exhilaration of spirits (as by wine, pleasurable excitement, or great amusement) (wine gives not light, gay, ideal hilarity, but tumultuous, noisy, clamorous merriment—Johnson) > I t is haphazard, heterogeneous, aimless, and unity . . . . It is haphazard, heterogeneous, aimless, and amor phous—just as is nature—5. The best of constitutions will not prevent ambitious politicians from succumbing with glee and gusto to the temptations of power— Huxley > But glee may express the exultation of one who takes more or less malicious delight in another’s misfortunes or predicaments (in great glee over his friend’s embarrassment) > (with malicious glee they quoted a previous boast of the President’s—F. L. Allen) > (it betrayed the glee felt by the mean-spirited when they see people who do not deserve humiliation forced to suffer it—West) Glee, jollity, on the other hand, usually implies mirth in a group, a collection, or a mass, or to a group, collection, or mass. Micc t erial usually implies a mixture of many kinds, showing few signs of selection, and often suggesting dependence on chance (there is always a miscellaneous assemblage at the meetings of the association) > (there are always a miscellaneous lot of books often reveals, on closer inspection, an interesting pattern of interrelationships—Redman) > Assorted (see also assorted) and the related noun assortment also imply a mixture but not a haphazard one; they carry the implications of a selection including various kinds or involving consideration of various tastes or needs (a box of assorted candies) > (there were passable performances of assorted operas—Copland) > (none of these authors has published books of assorted essays—K. B. West) > (a case containing an assortment of tools) > Heterogeneous is applicable chiefly to masses or groups in which the individuals or the elements are in proximity or close relationship to each other by chance; it suggests not only variety or diversity in the individuals or the elements but also absence of uniformity or unity and little evidence of fusion (the task of transforming a heterogeneous selection of mankind into a homogeneous nation—Russell) > (the family is heterogeneous enough to make quite good party in itself—Rose Macaulay) > (the heterogeneous structure of granite) > A photograph lacks organization and unity . . . . It is haphazard, heterogeneous, aimless, and amor phous—just as is nature—S. S. Van Dine) > Motley adds to heterogeneous the suggestion of discordance in the individuals or elements or their striking contrast to each other; perhaps from the notion of discordance it is more deprecative than the foregoing terms and is more likely
to qualify groups made up of elements felt as inferior or undesirable (one would enquire from whence this motley style did first our Roman purity defile—Dryden) (motley support drawn from Tammany Hall Irish, Wall Street bankers, and odds and ends of all factions—Parrington) (that motley aggregation of impudent and flattering crowd followers—Walker) Promiscuous may suggest haphazardness or the appearance of it, but it usually implies selection that is completely devoid of discrimination and that results in disorderly confusion; thus, a miscellaneous acquaintance may imply a catholicity of taste, but a promiscuous acquaintance ship implies an absence of taste and good judgment; from a description of a club's membership as heterogeneous one might infer its interesting diversity but from a description of it as promiscuous one can infer only a diversity that is distasteful and senseless from the point of view of the speaker or writer (a classless, promiscuous world where True Story and London's New Statesman and Nation share the same rickety table—Time) For this reason, promiscuous as applied specifically to people or their acts, emotions, and relations stresses not only lack of discrimination, but lack of restriction within bounds set (as by prudence, good sense, or sound morals); thus, promiscuous charityimplies licentious disregard of normal standards of conduct (safety involves some order and discrimination, rather than a miscellaneous acceptance of all our impulses as good—Cohen) (the dangers to civil freedom of a promiscuous and unprincipled attack on realism—Schlesinger b. 1917) Ana various, diverse, divergent, disparate, different: multifarious, divers, sundry, many Con similar, alike, like, identical, uniform mischance *misfortune, adversity, mishap Ana *accident, casualty, mishap: disaster, calamity, catastrophe, cataclysm mischief *injury, hurt, damage, harm Ana *perniciousness, detrimental or detriment, deleteriousness, noxiousness, banefulness or bane (see corresponding adjectives at PERNICIOUS): evil, ill: impairment, marring, spoiling (see corresponding verbs at INJURE) mischievous roguish, waggish, impish, playful, frolicsome, sportive Ana annoying, bothering or bothersome, vexing or vexatious, irking or irksome (see corresponding verbs at ANNOY): naughty, bad, evil, ill, wicked: tricky, foxy, insidious, artful, sly miscendent *villain, scoundrel, blackguard, knave, rascal, rogue, scamp, raspscallion Ana *criminal, malefactor, culprit, delinquent mise-en-scène *background, setting, environment, milieu, backdrop miserable, wretched both describe something (as a person's state of health or of mind, a state of affairs, a human being with reference to his condition or character, or a thing compared with others of its kind) that is deplorably or contemptibly bad or mean. A person is miserable if in misery or in a state either of extreme or acute distress of body or mind (Plato) would forbid any novelists to represent a good man as ever miserable—Ellis) (Gideon has been absolutely miserable, and gone about like a man half stunned, ever since it happened—Rose Macaulay) or of pitiable poverty or degradation (a miserable creature of a crazed aspect...shattered and made drunk by horror—Dickens) A thing is miserable when it is exceedingly mean or paltry, and provocative only of misery in the person affected or of strong distress or dislike in the observer (a miserable cold) (a miserable dinner) (the squallor of mean and miserable streets—Binyon) A person is wretched who is extremely unhappy or abjectly despondent (as from want, grief, oppression, affliction, or anxiety); a thing that relates closely to the happiness of a person is wretched if it produces such dejection or mental suffering (O cruel death! To those you are more kind than to the wretched mortals be left behind—Waller) (it was her unhappy lot to be made more wretched by the only affection which she could not suspect—Conrad) (she's “poor Ellen” certainly, because she had the bad luck to make a wretched marriage—Wharton) A thing, in general, is wretched if it is extremely or deplorably bad (a wretched French cabaret, smelling vilely—Meredith) (wretched crops) (it was the wretched truth, and not something I had conjured out of imagination—Deasy) Ana forlorn, hopeless, despairing, *despondent: pitiable, pitiful, pitiful, doleful, dolorous, melancholy Ant *comfortable miserly penurious, parsimonious, niggardly, tight, tight- fisted, *stingy, close, closefisted, cheeseeparing, penny-pinning Ana *avaricious, greedy, *covetous, grasping: mean, sor did, abject, ignoble Con *bountiful, bounteous, openhanded, munificent, *liberal, generous: benevolent, *charitable, altruistic misery *distress, suffering, agony, dolor, passion Ana adversity, *misfortune: affliction, visitation, *trial, tribulation: melancholy, dejection, *sadness, depression Ant *felicity, blessedness —Con *happiness, beatitude, bliss: comfort, ease, repose (see REST) misfortune, mischance, adversity, mishap are comparable when they denote bad luck or adverse fortune or an instance of this. Misfortune is both the most common and the most general term; it is applicable equally to the incident or conjunction of events that is the cause of an unhappy change of fortune (by misfortune he lost his job) or the ensuing state of distress (a crass and stupid person who had fallen through luck into losing prosperity). His every good fortune spattered others with misfortune (Malamud) and it may denote a particular unfortunate incident (they could by cooperation brave misfortunes and supplement each other's efforts in bettering the lot of the common man—Middle East Jour.) Mischance rarely applies to a state of distress but is otherwise very close to misfortune from which it differs chiefly in greater objectivity. While sometimes used to imply grave affliction or even death it is especially appropriate when the situation involves no more than slight inconvenience or minor annoyance (I threw a stone and hit a duck in the yard by mischance—Yea) (they proceeded on their journey without any mischance—Austen) Adversity, on the other hand, denotes the state or the instance but not the cause; it is distinctly the strongest of these words and in its typical use implies a state of grave and persistent misfortune (a wretched soul, bruised with adversity—Shak) (what fairy palaces we may build of sanity involves some order and discrimination, rather than a miscellaneous acceptance of all our impulses as good—Cohen) (the dangers to civil freedom of a promiscuous and unprincipled attack on realism—Schlesinger b. 1917)

misleading, deceptive, delusive, delusory all mean having misrepresent, falsely, garble mean to present or represent something in a manner that is contrary to the truth. Misrepresent usually implies an intent to represent or portray falsely, and therefore may take as its subject not only a person or his utterance but also such things as an organization, a political platform, or a cartoon; it often carries a suggestion of deliberate lying, but it may suggest bias or prejudice or a desire to do injustice (misrepresent a candidate’s statement) (misrepresent the value of an article) (the account misrepresents not only his actions but his motives) False implies a perversion of the truth, either by deliberately altering the facts in whole or in part (false bookkeeping records) (falsified her account of the accident) or by giving something an appearance that does not accord with the truth or reality (false the meaning of a document by an incorrect translation) (good breeding has made the tongue false the heart—Steele) (a low-priced sunglass lens said to be completely effective without falsifying the colors seen through it—Newsweek) Belie implies an impression given that contradicts or is at variance with the truth or the facts; it usually takes as its subject an appearance, a manner, or a form of speech and lacks the implication of intent that is usually present in the preceding words (his confident words were belied by his anxious look) (a brusque manner that belies a real kindness of heart) (you are an Englishman . . . unless your physiognomy belies you—Kingsley) Garble implies a mutilation or distortion of statements, testimony, evidence, or messages that need not be deliberate but that creates a wrong impression of the original and frequently gravely alters its tone or implications (the newspapers have sadly garbled the account of his speech) (by the time the story had passed from mouth to mouth until it reached him again, it was so garbled that its original form was barely recognizable) (the manufacture and dissemination of propaganda literature, for the purpose of rousing the passions of the people by garbled statements—Inge)

pound of both—Scott] <rare compound of oddity, frolic, and fun—Goldsmith> In its technical senses compound is definitely restricted in application. In chemistry a compound is a distinct substance formed by a union of two or more elements or radicals in definite proportions by weight <water is a compound of oxygen and hydrogen>. As applied to words, a compound is a word or group of word elements which is formed of recognizable parts but has a distinct sense often not inferable from the meanings of its component parts. A compound may be written solid (as blackboard), hyphenated (as long-distance), or open (as all right). Composite is often interchangeable with compound in its general sense, but there is a tendency to prefer composite when the constituent parts are artificially or fortuitously combined <the American people is a composite of many races >the opinions of America are formed from the composite of the voices of America, official and unofficial, true and false—A. E. Stevenson> An amalgam is basically an alloy made by adding mercury to a metal; the term is particularly applicable to such alloys that are intended for use in dental restoration, usually contain several metals in addition to mercury, and set into a firm mass after a relatively brief period of time. In its extended use amalgam may draw on the notion of complexity of mixture <one's judgment is inevitably an amalgam of impressions of the work and impressions of the man—T. S. Eliot> or it may stress the hardening into final form <a mixture of affection and contempt, which later days hardened into an amalgam of generosity and sadism—Weeter> Ana joining, combining, uniting (see JOIN) moan n groan, sigh, sob (see under SIGH vb) moan vb groan, *sigh, sob Ana mourn, *grieve, sorrow: bemoan, bewailing (see DEPLORE) mob n *crowd, throng, press, crush, rout, horde Ana *multitude, army, host, legion mobile *movable, motive Ana fluid, *liquid: *changeable, changeful, protean, *trend, drift, *tendency, tenor: procedure, *process Ana counterfeit, feign, affect, simulate, *assume mode n 1 *state, condition, situation, posture, status 2 *method, manner, way, fashion, system Ana trend, drift, *tendency, tenor: procedure, *process mode n *fashion, style, vogue, fad, rage, craze, dernier cri, cry model n Model, example, pattern, exemplar, ideal, standard, exemplar, pattern, model is a better model for a child one year old . . . because the things it does are more what the younger child would wish to do—Russell] <served as model for most of the State capitol's built in the ensuing twenty-five years—Amer. Guide Series: Minn.> Often the term applies to a person or thing that is eminently or even preeminently worthy of imitation <there is no poet in any tongue . . . who stands so firmly as a model for all poets—T. S. Eliot> <the Saint whose name is given to a child serves as . . . an ideal model to be imitated—Nurnberg & Rosenblum> Example applies chiefly to a person (or his acts or conduct) that is or may be imitated by others; the term usually implies that the person, or the act, or the conduct, for some good reason is one that is likely to be imitated, whether good or bad, right or wrong <a father should set a good example to his children> <she always followed the example of her mother in her social behavior> <one of the immortal examples of a true man in a world of bounders, cowards, and squeaking specters—Sullivan> Sometimes, however, example applies to what is not intended to be imitated, but rather to serve as a warning <let it profit thee to have heard, by terrible example, the reward of disobedience—Milton> Example is also used in a highly abstract sense in antithesis to precept, then implying the setting of an example, usually but not necessarily a good example <the mistake of thinking that all can be done by precept, when . . . example is no less potent a force—Benson> Pattern applies either to the divine archetype of a thing or to a carefully worked out design or plan (as an architect's drawing) to be followed in fashioning a thing (according to an heavenly pattern . . . which He had fashioned in his wise foresight, He man did make—Spenser> <almost all the common things we use now . . . are made by machinery, and are copies of an original pattern—Jevons> In a more general sense (see also FIGURE 3) pattern applies to what merits or seems to merit imitation; it often differs from model in suggesting a more clearly worked out design, or a fuller presentation of details, or in connoting fixity or compelling power <a housewife in bed, at table a slattern; for all an example, for no one a pattern—Swift> <the ancient pattern of life had been woven continuously for so many centuries that even illiterate farmers knew how to be courtly and dignified—Blofeld> Exemplar often comes closer to pattern than to example because it usually applies to something set before one as worthy of imitation and, therefore, inherently good <Christ is the . . . exemplar that all preachers ought to follow—Latimer> <the reward of disobedience—Thackeray> Sometimes, however, exemplar is specifically applied to a person or thing that exhibits a quality, or sums up all the characteristics that distinguish a type, whether that quality or type be in itself good or bad <Sisyphus, the legendary exemplar of cunning—Thirlwall> <Stendhal's Julian Sorel . . . this exemplar of ruthless individualism—Huxley> Ideal may specifically imply existence not in the actual world but in the mind and therefore may suggest a remoteness from reality and especially perfection exceeding what is possible in reality <traditions grew up around his name, to be interpreted according to the hearers' own ideals of personality and education—D. E. Smith> But ideal also may apply to a real person or thing that is held before one as embodying or representing the perfection one hopes to realize or attain <the boy found his ideal in his father > <Livia] embodied in her life the ideal of the Roman matron—Buchan> Frequently ideal is almost indistinguishable from standard when it applies not to a person or object that serves as a pattern or exemplar, but to something (as a rule, a practice, an aim, or an established level of excellence) by which one seeks to maintain a high quality in a product or of performance <the ideal of general cultivation has been one of the standards in education—Elliot> <accuracy> is still a noble and inspiring ideal. It is the morality of the intellect: it prescribes what it ought to strive for—Ballard> <each generation . . . has its own ideals and its own standards of judgment—Crothers> But standard (see also STANDARD 2) is inter-
changeable with ideal only when it applies to what is
the test of perfection or of human perfection (the very art . . . incommensurable with any standard except that of
pure beauty—I refer of course to the art of music—
Dickinson) (with the spread of impressionism literature has lost standards and discipline, and at the same time
vitality and seriousness—Babbit) Beau ideal applies
to one and especially a person felt to be a fit model or ideal
because of high excellence (the beau ideal of all that was
romantic, exquisite, and passionate—Harrison Smith)
Mirror applies to something so exemplary of its kind
that it may serve as a model (no modern building could
act as a better mirror of functional needs . . . than this
seventeenth-century Spanish mission—Liturgical Arts)
Ana criterion, touchstone, gauge, *standard
modern adj 1 Modern, recent, late, though not close syn-
onyms, are subject to confusion when they are used to
date things or events which have taken place, come into
existence, or developed in times close to the present.
Modern (see also NEW) is the term of widest range of mean-
ing; it may date anything that is not medieval or ancient
(the ancient languages have now been superseded by the
modern languages in popular favor in high schools and
colleges) (the date of the discovery of America, 1492, is
often used arbitrarily as the beginning of modern history)
(the weed-caught wrecks of ancient galleys, medieval
shipwreck, and modern dreadnoughts—Beebe) or anything
that represents the marks of a period nearer in time than another
(modern surgical techniques) (the modern novel) (the
ornate mansions of a bygone era mingled with more modern
concepts of architecture—N. Y. Times) or less clearly
to anything that is new, fresh, or up-to-date (she is very
modern in her clothes and in her manners) (we all have to
remember that what is modern today and up-to-date, what
is efficient and practical, becomes obsolete and outworn to-
morrow—Roosevelt) In all these uses a change or contrast
in character or quality is to some extent implied by the term
modern. Recent is usually without such implication and
may simply indicate a date that approximates that of the
immediate past, though the time to which this term, too, re-er depends upon the thing that is qualified; thus, “recent
geological ages” designates those ages immediately pre-
ceding the present geological age, although, since each
age may represent millions of years, recent is obviously
used relatively; “Shakespeare is a more recent author than Chau-
er” implies only a comparative status, for Shakespeare
was born in the sixteenth century and Chau-
er in the fourteenth; “we have all the recent books”
implies an absolute relation to a time that may be described
as the immediate past (recent news) (recent rains)
(a recent purchase) (a recent issue of a magazine)
Late (see also TARDY, DEAD) implies a series or succession
of which the person or thing so described is the most
recent in time (the late war) (the servant’s late master
 testified as to his honesty) (moose which of late years
have been showing up around Stewartstown—Holbrook)
Sometimes the word carries an implication that is less
definite and equivalent to “not long ago holding the
position of or serving as” (the firm’s new director of
research was the late professor of applied chemistry at the
University)

money
money, cash, currency, legal tender, specie, coin, coinage are comparable when they mean pieces of stamped metal or their equivalents issued by a government, or by an authority recognized by the government, to serve as a medium of exchange in the country or section under the control of that government. Money applies to both coined gold, silver, copper, or other metal issued as a medium of exchange and to certificates or notes, often called specifically paper money, that sometimes promise payment in metal money, are issued by a government or governmentally recognized authority (as a bank), and pass like coined metal as a medium of exchange. Cash applies to money, sometimes specifically called ready money, actually in hand or immediate possession of an individual or a business or institution (the firm's supply of cash was very low because the larger part of the day's accumulation had just been deposited in the bank). Currency may apply to all of the money in circulation, as distinguished from that which is not in circulation for one reason or another (the first panacea for a mismanaged nation is inflation of the currency—Hemingway) but it may also apply to paper money as distinguished from coined metal. Legal tender applies specifically to the type of money which the law authorizes a debtor to offer and requires a creditor to receive as payment of money obligations and may or may not at any given time include all lawful money of a particular jurisdiction. Specie, coin (only in a collective sense), and coinage apply only to minted or coined money; they therefore imply an opposition to all forms of paper money (as treasury notes and bank notes) (payments were de-manded in specie, or in the coin of the realm) (we are far more concerned today with his debasement of the coinage—Shaw)

monopolize, engross, absorb, consume mean to take up completely. Monopolize, the general term, means to possess or control exclusively (monopolize the year's crop of cotton) (a child should not be allowed to monopolize the attention of his family) (every railroad monopolizes, in a popular sense, the trade of some area—Justice Holmes) (the party in power at Washington can organize the two houses of the Congress... but it cannot monopolize the business of lawmaking—Holcombe) (never attempted to monopolize or even dominate the discussion—J. G. Gray) Occasionally engross implies getting a physical control of (as by purchase of the available supply) (the process of engrossing the land which attended the ascent to power of the aristocracy—Becker) and this notion may persist in extended use (the sun engrossed the east, the day controlled the world—Emily Dickinson) but more often the verb takes an immaterial object and implies a preoccupying (political theory has long engrossed the Indian mind—Poleman) (the works manager who... is engrossed chiefly with the engineering problem of securing maximum output with minimum input—Huff) Absorb is frequently interchangeable with engross, but it is less often predicated of persons as conscious agents and more often of things that have an inherent capacity for monopolization (manual occupations do not engage the mind sufficiently... but composition, especially of verse, absorbs it wholly—Cowper) (it is arithmetically impossible for every child to absorb the whole time of an adult tutor—Russell) Consume comes into comparison with engross and absorb chiefly in an extended sense of each, implying monopolization of one's time, attention, or interest (Flané is determined that men and their convictions shall be given a true and proper evaluation. He is consumed with the idea of justice—Boyle) (the consuming anxiety of the ride still held him though the reason for it was gone—Wheelwright) (ana) possess, own, *have, hold; utilize, *use, employ; control, manage (see conduct vb)

monopoly
monopoly, corner, pool, syndicate, trust, cartel are comparable rather than synonymous terms when they apply to a means of controlling prices. Monopoly denotes the exclusive control of a service (as telephone or telegraph service) or traffic (as transportation of goods and passengers by railroad) or of a commodity (as wheat or petroleum) in a given market. Monopoly may imply exclusive control created by the state (as by franchise or patent or copyright). More frequently, however, the term is used to imply exclusive power to buy or sell a commodity or service in a given market, especially as a result of ownership or control of the sources of supply (as mines) or of the available stock of a commodity (in the reign of Edward III [German traders had a practical monopoly of the carrying trade—Pattison) In extended use monopoly also denotes the group or organization having such control (it might be that when a combination reached a certain size it might have attributed to it more of the character of a monopoly merely by virtue of its size than would be attributed to a smaller one—Justice Holmes) A temporary or local monopoly (as of a particular security on a stock exchange or of a particular commodity on a produce exchange)
contributes a corner, so called because it puts all those who are determined to buy into a corner, or position where they must pay the price asked <maintained his corner on wheat for three days> Pool in this relation applies primarily to a combination of property, or of interests of different persons or companies, by means of which a more or less permanent control or monopoly is acquired. Distinctively, however, pool implies a joint undertaking or end which cannot be attained unless the market is managed either by manipulating prices (as of a commodity or security) or by destroying the effects of competition (as through agreements concerning prices or rates, regulation of outputs, or division of earnings of each organization concerned). Syndicate is applied chiefly to a group of individuals, firms, or corporations (as banking houses) which organize for a limited time to accomplish a given purpose or more specifically such a group that is organized to market an issue of a security, makes its profit from the difference between the agreed-upon sum advanced to the issuing corporation for the securities and the fixed sale price at which they are marketed, assumes responsibility for absorbing any surplus securities not marketed, and dissolves when the marketing period is completed. Outside of the field of finance, the use of the term is extended in its application to any combination (as of newspapers, business concerns, or criminals) interested in a common project or enterprise, and often implies relation to a monopoly. Trust specifically applies to a merger in which stockholders in the merged corporations exchange their stock for trust certificates in the new corporation and surrender their rights to trustees who operate the combined corporations, but trust is often extended to any combination of business entities, especially when felt to represent a threat to healthy competition. Cartel implies an international combination for controlling production and sale of a product or group of products.

monotonous 1 Monstrous, prodigious, tremendous, stupendous, monumental are comparable especially in their extended more or less hyperbolical senses in which they mean astonishingly impressive. Monstrous commonly applies to something abnormal, usually in actual or relative size, but often also in shape or character; the term frequently carries suggestions of deformity, extreme ugliness, or fabulousness <the imagination turbid with monstrous fancies and misshapen dreams—Wilde> he seemed of monstrous bulk and significance—G. D. Brown> the monstrous way of living that mankind had made for itself out of the industrial revolution—Connolly> Prodigious usually implies a marvelousness that exceeds belief; it sometimes applies to something entirely out of proportion to what is the usual or usual best, greatest, or largest <the prodigious demand for steel in the First World War> men have always reverenced prodigious inborn gifts, and always will—Eliot> <a mind with such prodigious capacity of development as Shakespeare—T. S. Eliot> Tremendous may come closer to awe-inspiring or terrifying in its immensity than to gigantic or enormous, its common denotations in more literal use <must have made the animal life look very much like a crocodile and the bite must have been tremendous—Swinton> how shall we compare the cramped and limited vision of the universe which spread itself to the imagination of mankind in old time with the tremendous vistas opened out to us by modern science—Inge> the spell and tremendous incantation of the thought of death—L. P. Smith> [he] too, had his appointed or acquired limits. He could never be tremendous—Montague> Stupendous implies the power to stun or astound; it describes something that because of its size, its numbers, its complexity, or its greatness exceeds one's power to describe or explain <all are but parts of one stupendous whole, whose body Nature is, and God the soul—Pope> <a stupendous catastrophe that occurred in the constellation Hercules 1300 years ago—Kaempffert> Monumental in its extended sense (see also MASSIVE) applies to something as conspicuously impressive or as massively framed or constructed as such a monument as a great cathedral or an impressive memorial <his magnum opus...the five monumental volumes of his history of the writer in America—Trilling> the Mexicanpeon has a monumental reserve beside which the Englishman becomes an idle chatterer—Woodcock> 

mood, humor, temper, vein mean a temporary state or frame of mind in which one emotion or desire or one set of emotions gains the ascendancy. Mood is the comprehensive term for any such frame of mind, regardless of its particular cause, its particular character, its effect on others, or its length of existence <he indulged his moods. If he were surly, he did not bother to hide it—Mailer> Mood carries a stronger implication of perversiveness and of compelling power than the other terms; also, it may refer not only to the frame of mind <feel in a mood to work> <a sullen mood> but to its expression in a literary or artistic work (the language, the stresses, the very structure of the sentences are imposed upon the writer by the special mood of the piece—Cather) or to what is seen or heard in such a way as to evoke a mood or to harmonize with one's mood <the mood of the landscape, achieved by the beauty of the evening light—Kenneth Clark> <watching land and water, rocks and trees, and their ever-changing hues and moods—Semon> 

mood, humor, temper, vein mean a temporary state or frame of mind in which one emotion or desire or one set of emotions gains the ascendancy. Mood is the comprehensive term for any such frame of mind, regardless of its particular cause, its particular character, its effect on others, or its length of existence <he indulged his moods. If he were surly, he did not bother to hide it—Mailer> Mood carries a stronger implication of perversiveness and of compelling power than the other terms; also, it may refer not only to the frame of mind <feel in a mood to work> <a sullen mood> but to its expression in a literary or artistic work (the language, the stresses, the very structure of the sentences are imposed upon the writer by the special mood of the piece—Cather) or to what is seen or heard in such a way as to evoke a mood or to harmonize with one's mood <the mood of the landscape, achieved by the beauty of the evening light—Kenneth Clark> <watching land and water, rocks and trees, and their ever-changing hues and moods—Semon> 

Humor (see also WIT 2) applies chiefly to a mood which is the result of one's peculiar temperament or of one's physical or mental condition at the moment; it may be preferable to mood when the idea of capriciousness or of whimsicality is to be suggested <I am not in a humor to hear you further. Leave me, please—Hardy> <the women were horrified or admiring, as their humor moved them—Wharton> <victims of nature's cataclysmic humors—Julian Dana> 

Temper (see also DISPOSITION 2) applies to a mood dominated by a single strong emotion, often specifically that of great anger <"He is in a prodigious temper—Wharton>

"I never knew him so out of patience with them"—Kenneth Clark> "I never knew him so out of patience with them"—Wharton> When qualified by an adjective indicating the controlling emotion, temper may apply to any humor that manifests itself in a display of feeling (that meekness has done me more harm than the bitterest temper—Hardy) she was evidently now in a gay, frolicsome temper—Hudson

Vein (see also TOUCH) is often used in the sense of mood but with a stronger implication of transitoriness and seldom with any suggestion of a temperamentual or physical

moral
adj
Moral, ethical, virtuous, righteous, noble are comparable when they mean conforming to a standard of what is right and good. Moral is the most comprehensive term of the group; in all of its pertinent senses it implies a relationship to character or conduct viewed as good or bad or as right or wrong. Sometimes moral implies relationship to or concern with character or conduct as distinguished especially from intellectual or physical nature (<moral goodness may be distinguished from intellectual goodness or spiritual goodness>) (<the whole tendency of modern thought . . . is to extenuate the responsibility of human nature, not merely on the moral side, but equally on the spiritual side—Mackenzie>) (<we find ourselves confronted with a most disturbing moral problem . . . those situations, now of such frequent occurrence, in which good means have end results which turn out to be bad—Huxley>) Moral also applies to such things as literary works, works of art, and philosophies, or to writers, artists, and philosophers concerned with the determination or teaching of principles of right conduct or good living (<a moral tale> <moral essays> <paintings that convey a moral lesson> <tragedy . . . hath been ever held the gravest, mora lest, and most profitable of all other poems—Milton>) The term also applies to men or communities, to acts, or to conduct in the sense of conforming to the accepted standard of what is right and good, often specifically in sexual conduct, or of conforming to the customs or conventions of a people regarded as binding laws (<lead a moral life> <a man of high moral character> <the moral ideals of the community>) (<I had a character who was ambitious, yet in his own way, moral, and with such a character one could travel deep into the paradoxes of the time—Mailer>) (<his nature was purely sensuous, and she strove to make him moral, religious—D. H. Lawrence>) Ethical primarily implies a relationship to ethics, the branch of philosophy which deals with moral principles, or more specifically with the principles governing ideal human character and with the ideal ends of human action (<an ethical system> <an ethical code> <ethical person>) Although ethical is often used interchangeably with moral, it characteristically gives a slightly different impression owing to certain subtle connotations; thus, ethical principles may, according to the context, convey a strong suggestion of principles derived from a certain school of ethics, or of a formulated code behind them, or of an idealistic quality; an action is often described as ethical rather than moral when it accords with what the writer or speaker believes to be a higher or finer standard of morality than the one generally accepted, or when it is in keeping with the code of ethics governing a profession (especially law and medicine); the phrase "an ethical person" often differs from the phrase "a moral person," in suggesting an assent to ethical principles or an attention to the niceties of ethics or to the ideal ends suggested by a system or code of ethics (<meanwhile we hear . . . the ethical instinct of mankind asserting itself with splendid courage and patience—van Dyke>) Virtuous implies the possession or manifestation of moral excellence in character; in its most general sense it implies rectitude, justice, integrity, and all other virtues, but in more restrictive use and especially as applied to women, it often means little more than chasteness or perfect fidelity in marriage (<poor people . . . whether they be lazy or busy, drunken or sober, virtuous or vicious—Shaw>) (<her life had been virtuous, her dedication to innocence had been unswerving—Cheever>) (<a man might grind the faces of the poor; but so long as he refrained from caressing his neighbors' wives and daughters, he was regarded as virtuous—Huxley>) Righteous differs from virtuous chiefly in its stronger implication of freedom from guilt or blame; as applied to persons, it often implies justification, especially worthiness of salvation in the theological sense (<I came not to call the righteous, but sinners to repentance—Mk 2:17> <what but thy malice moved thee to dismeed of righteous Job—Milton>) As applied to acts, conduct, and even displays of passion, it usually implies justifiability and often consciousness of rectitude (<righteous indignation>) But righteous is the one of these words that is freely used in a worsened sense to imply an invalid and sanctimonious assumption of the appearance of rectitude (<left most of the work to his assistants . . . and when he found that they were doing as they pleased, he was not righteous nor rebuking—Sinclair Lewis>) (<meets the resultant gossip, and the ruin of Lily's reputation, with a righteous indifference to either its unfairness or his share in it—Harper's Bazaar>) Noble (see also grand) applies to persons, their acts, utterances, careers, or lives, and implies the possession and exhibition of a conspicuously high character. Often the word carries no other clear implications and seems little more than a term of high praise implying moral or ethical eminence (<that noble passion for human rights and civil liberties possessed by . . . judicial libertinarians—Gressman>) (<a noble aim, faithfully kept, is as a noble deed—Wordsworth>) At other times the term suggests not only moral eminence but the absence of all taint of any such petty or dubious thing as self-seeking, self-interest, or concern for the world's standards; it then often suggests independence, or magnanimity, or high courage, or some other outstanding moral excellence (<this was the noblest Roman of them all. All the conspirators, save only he, did that they did in envy of great Caesar; he only, in a general honest thought and common good to all—Shak.>) (<the disinterested search for truth is certainly one of the highest and noblest careers that a man can choose—Inge>) And, right, *good: *upright, honest, just, honorable, scrupulous, conscientious: *chaste, pure, modest, decent: ideal, *abstract

self only to relation to others <troops noted for their discipline> <true discipline is intelligent obedience of each for the consequent effectiveness of all—Ageaton> <books . . . written by men who have subjected themselves in a superior degree to intellectual discipline and culture—Dewey> Esprit de corps especially applies to the spirit of loyalty that is manifest in a body (as a profession or a society) by jealous regard for the honor or the interests of the body as a whole or for fellow members as belonging to it; often esprit de corps implies a spirit that distinguishes one body and brings it into opposition to others <among the professions noted for their esprit de corps, that of physician ranks high> <esprit de corps . . . in each specialized part of the body politic, prompts measures to preserve the integrity of that part in opposition to other parts—Spencer> <though the development of a strong esprit de corps is most desirable, within a small and exclusive group it becomes dangerous . . . assumes the form of a closed club, the members of which can, in each other's eyes, do no wrong—Political Science Quarterly> <the inspired and faultless esprit de corps of her flesh and her bones and her blood; never were the features and the colors of a face in such serene and unassailable agreement, never had a skeleton been more singularly honored by the integument it wore—Stafford> Ana *vigor, spirit, drive: self-confidence, self-possession, assurance, *confidence: nerve, steeling (see ENCOURAGE) Con enravement (see corresponding verb at UNNERVE) morality *goodness, virtue, rectitude Ana integrity, probity, honor, *honesty: *excellence, perfection, virtue, merit morally *virtually, practically morbid *unwholesome, sickly, diseased, pathological Ana hypochondriac, atrabilia, *melancholic: gloomy, morose, saturnine (see SULLEN) Ant sound —Con *healthy, wholesome, well, hale, robust: *healthy, healthy, hygienic mordant *caustic, acrid, scathing Ana incisive, trenchant, cutting, biting, clear-cut, crisp: *pungent, poignant, piquant, racy, spicy, snappy: *sharp, keen, acute moreover besides, furthermore, likewise, *also, too moron imbecile, idiot, *fool, simpleton, natural morose glut, gloomy, saturnine, dour, *sullen, surly, sulky, crabbed Ana splenetic, choleric, *irascible, testy, cranky, cross: peevish, snappish, waspish, petulant, *irritable: brusque, gruff (see BLUFF) mortal adj *deadly, fatal, lethal Ana destructive (see corresponding verb destroy): virulent, venomous, *poisonous: implacable, unrelenting, relentless (see GRIM) Ant uninvolved, neutral, passive mortified *ashamed, chagrined Ana harassed, harried, worried, annoyed (see WORRY vb): humiliated, humbled, abused (see ABASE): abashed, embarrassed, discomfited (see EMBARRASS) mortally *largely, greatly, chiefly, mainly, principally, generally

snif n 1 device, design, pattern, *figure 2 *subject, matter, subject matter; argument, topic, text, theme, motive, leitmotiv motion n Motion, movement, move, locomotion, stir mean the act or an instance of moving. Motion is the appropriate term in abstract use for the act or process of moving, without regard to what moves or is moved; in philosophical and aesthetic use it is an especially comprehensive term, for it may apply to manifestation of change or of changing not only from place to place, but from condition to condition, or from step to step in a progression <the laws of motion> <this vicissitude of motion and rest, which we call life—Steele> <in all the arts the principle of motion prevails increasingly over the principle of repose—Babbitt> <movement is always to be preferred to inaction. In motion a man has a chance, his body is warm, his instincts are quick—Mailer> Ordinarily, however, the term implies discernible physical moving <the motion of the planets> <I was lying . . . injured, and incapable of motion—Hudson> <the restful motion of the sea> <every step and every motion in the old dances had meaning—Reginald & Gladys Laubin> Movement usually implies definite regulated motion; the term is used less often than motion to denote an abstraction, although it may be extended to denote a quality of representation in a work of art that suggests motion <movement is one of the most striking characteristics of the Elgin marbles and of the Winged Victory> <the new freedom and variety in the movements of the Apostles in the boat . . . are proofs of Giotto's rare power of invention—Fry> or a quality in literary work (as poetry) that suggests a definite rate of speed or progression (as in the meter, the rhythm, or the action) <no one will so well render Homer's swift flowing motion as he who has himself the swift-moving spirit of Homer—Arnold> In concrete use movement implies a passage, whether self-initiated or under guidance or compulsion, from place to place, from situation to situation, or from condition to condition; it may, in this sense, be used interchangeably with motion in the collective singular or in the plural <the movements of the planets> <the restful movement of the sea> <the movement of troops to the front was then in progress> <severe storms hindered the movement of trucks carrying supplies> <large regions in which, though earth movement has occurred rather recently, this has scarcely anywhere dislocated the land surface—C. A. Cotton> <there may be a complex double rhythm of annual movement; sowing in the north, extensive migration south in later winter, return for the harvest—W. B. Fisher> Movement also is frequently used for an instance of moving <a movement among the ferns attracted Adrian—Meredith> <every movement of the bird was watched by the cat> Move is particularly likely to denote a beginning of a movement <so shocked that no one made a move to leave> or to apply to a definite instance of moving or moving something from one place to another <make a move in a chess game> The word may stress the notion of change and then is particularly applicable to a changing of one's abode <planning a move to a new farm> or to a physical or figurative moving to attain an end or objective <viewed as a move to encourage . . . organized labor's full participation—Current Biog.> <the Turks would not be frightened into submission by any Russian move—Collier's Yr. Bk.> Locomotion usually suggests travel especially by artificial means (as by boat, train, airplane, or automobile) <every improvement of the means of locomotion benefits mankind morally and intellectually—Macaulay> but it may apply to natural means (as wings or legs) <esopodons and cilia are primitive organs of locomotion> Stir applies to a motion or movement, often without an implication of changes of place or condition or of progress, that involves a not necessarily displeasing disturbance especially of what has been quiet or at rest or free from excitement, bustle, or agitation <not a stir of child or mouse—Stevenson> <many persons find stir, and movement, and the presence of a crowd an agreeable stimulus—Benson> <it is an age of stir and change—Galsworthy> Ana impetus, momentum, *speed, velocity, pace, headway
motivate actuate, *activate

motive n 1 Motive, spring, impulse, incentive, inducement, spur, goad all denote a stimulus inciting or prompting a person to act or behave in a definite way. Motive applies chiefly to such an emotion as fear, anger, hatred, or love or to a desire (as for fame, wealth, knowledge, supremacy, or revenge) or to such a physical appetite as hunger or sexual desire which operates on the will and definitely moves it to activity (always seeking the motive of everyone’s speech or behavior—Brownell) whenever a man does a thoroughly stupid thing, it is always from the noblest motives—Wilde 1 could slay no living thing except from motives of hunger—Hudson even where some piece of knowledge is uninteresting in itself, a man can force himself to acquire it if he has an adequate motive for doing so—Russell Spring, often as the plural springs, is used in place of motive without much difference in meaning; however, it may refer to the underlying or basic motive which is often not fully recognized even by the person affected and is especially hidden from all but the most penetrating observers (it is difficult . . . to come at the true springs of action—Forrest) (the love of gold was the sordid spring of the most brilliant enterprises of the republic—Merivale) laying open to his view the springs of action in both parties—Peacock Impulse need not imply as motive and spring regularly imply, actual performance of an act or engagement in an activity; the term stresses impetus, or driving power, rather than its effect; thus, one may check, or restrain, or forgo, or dismiss an impulse. In its more general sense impulse is applicable to a powerful incitement or instigation to activity, especially one arising within oneself as the result of a native propensity, one’s peculiarity of temperament, or one’s intellectual or emotional constitution (he was not a man . . . to yield timidly to the impulses of others—Prescott) (in Brave New World . . . all are permitted to indulge their sexual impulses without let or hindrance—Huxley) men like the elder Cato, Varro, and the elder Pliny liked to record the curiosities of nature, but they had not the systematizing impulse, the restless passion for order, of the Greeks—Buchan) Specifically, impulse is applicable to a spontaneous and often unconsidered and nearly irresistible urge to do something (Dr. Lavendar . . . said to himself, chuckling, “If I’d followed my impulse, I’d have married them then and there, and made no bones of it”—Deland) the first impulse of a child in a garden is to pick every attractive flower—Russell) Gãrd suffered an odd impulse to get up and kick his chair over; but people don’t do those things. He kicked the back log instead—Mary Austin) Incentive applies chiefly to a cause which incites and encourages action or activity and especially to one for which the person affected is not himself responsible or which does not originate within himself (offer a bonus as an incentive to greater speed and efficiency in production) (with some pupils praise is not an incentive to study) money is not the only incentive to work, nor the strongest—Shaw) (the great incentive to effort, all through life, is experience of success after initial difficulties—Russell) people . . . cut off here without the influence of example or emulation, with no incentive but some natural yearning for order and security—Cather Inducement is narrower than incentive, for it consistently suggests an external influence and often an attempt to entice or allure to action or activity (the chief inducements to serve were the pension and the right of citizenship which awaited a soldier on his discharge—Buchan) his method of holding his followers together by culinary and bibulous inducements has often been described—L. M. Sears) Spur applies to an impetus to action which not only incites but stimulates the mind and increases its energy and ardor (fame is the spur that the clear spirit doth raise . . . to scorn delights and live laborious days—Milton) (fear or despair may be a temporary spur to action—Sat. Review) Goad applies to a stimulus to action or activity that keeps one going in spite of one’s will or desire (the daily goad urging him to the daily toil—Macaulay) (insecurity, considered by some management people as the indispensable goad for workers’ efficiency—Dun’s Review) Anza *cause, determinant, antecedent, reason: *desire, appetite, urge, passion, lust: *feeling, emotion, passion: purpose, intent, *intention, aim, end 2 *subject, matter, subject matter, argument, topic, text, theme, motif, leitmotiv motive adj *movable, mobile Anza *active, operative, dynamic: moving, driving, impelling or impulsive (see corresponding verbs at move) motley adj 1 *variegated, parti-colored, checkered, checked, pied, piebald, skewbald, dappled, freaked 2 heterogeneous, *miscellaneous, assorted, promiscuous Anza *different, diverse, divergent, disparate, various: discrepant, incompatible, uncongenial, incongruous (see INCONSONANT) Con uniform, parallel, akin, alike, identical (see LIKE) motor *machine, mechanism, machinery, apparatus, engine motorcade *procession, parade, cortege, cavalcade mottle vb *spot, spatter, sprinkle, fleck, stipple, marble, speckle, spangle, bespangle mottled spotted, spattered, sprinkled, flecked, stippled, marbled, speckled, spangled, bespangled (see under spot vb) motto proverb, adage, *saying, saw, maxim, epigram, aphorism, apostem mount n *mountain, peak, alp, volcano, mesa mount vb 1 ascend, soar, *rise, arise, tower, rocket, levitate, surge Ant drop 2 *ascend, climb, scale Ant dismount mountain, *mount, peak, alp, volcano, mesa denote a relatively steep and high elevation of land. Mountain, the ordinary and inclusive term, varies somewhat in meaning according to locality. In general it designates an elevation higher and steeper than a hill, rising more or less abruptly from its surrounding country, and standing out conspicuously when viewed from a distance. Mount is often used in proper names of mountains. Peak, when applied to a mountain, designates one that rises to a sharp point; it may be isolated or one of a range. Alp suggests a towering, dizzly, or unscaleable height (yet do I sometimes feel a languishment . . . to sit upon an alp as on a throne, and half forget what world or worldling meant—Keats) volcano designates a cone-shaped mountain formed chiefly of ejected molten rock or ash and topped, usually, by a crater. Mesa is used especially in the southwestern part of the United States to designate a flat-topped elevation, usually comparable to a hill in height, but more suggestive of a mountain because of its steep clifflike sides. Anza *height, altitude, elevation mountebank n *impostor, faker, charlatan, quack mourn sorrow, *grieve Anza lament, bewail, bemoan (see DEPLORE): weep, keen, wail, *cry Con rejoice, gladden, delight, *please movable, mobile, motive mean capable of moving or of
being moved. Movable applies not to what has independent power of motion but to what can be moved by men or machines (as by lifting, drawing, pushing, or driving) (a movable stem engine) (one's movable possessions) (some of these cabins were movable, and were carried on sledges from one part of the common to another —Macaulay) or to what is not fixed in position or date (printing from movable type) (a movable attachment for a machine) (movable feasts such as Easter and Whitsunday) Mobile stresses facility or ease in moving or, less often, in being moved. It often describes the quality of flowing which distinguishes a fluid from a solid (the mobile liquid passes into a compact rigid solid—T. H. Huxley) or which characterizes an electric current or charge (long-lasting circulation of the mobile charge, around and around the circuit—Darrow) or the character which distinguishes something or someone that moves or is equipped or able to move quickly and readily, or to go (as from place to place or from one condition to another), from what is slow-moving or unlikely to engage in major moves (a mobile army) (a mobile radio unit) (they attract the more ambitious, the more mobile young people—Amer. Jour. of Sociology) (American society, though highly mobile by European standards, is not classless—Times Lit. Sup.) But equally often mobile describes features, faces, expressions of face, or thoughts which respond quickly and obviously to changing emotions, mental states, or external stimuli, often at the same time connoting either fickleness or instability or flexibility and versatility (the gray restless eye, the thin mobile lips—J. R. Green) (you are as mobile as the veering air, and all your charms more changeful than the tide—Millay) (delicately sniffing the air to the left of him with his mobile nose end—Dahl) Motive implies a moving only in the transitive sense of driving, or causing movement, or impelling to action; the term is used chiefly with reference to power or energy or their sources (as fuel, steam, or electricity) viewed as agent in a process of moving (diesel engines supply the motive power for the new ship) (when horsepower and man power were alone employed, the motive agent was not bound up with the tool moved—Spencer) Even when the reference is to something which constitutes a motive for action, "motive power," "motive force," or "motive energy" is likely to be used (there was no motive power in experience. It was as little of an active cause as conscience itself—Wilde) (this new wave of motive energy began to penetrate the deep absorption in their own affairs of her husband and children—Dorothy Canfield) (his motive force is a blissful and naive faith—Rosten) Ana *changeable, changeful, variable, mutable Ant immovable: stationary —Con fixed, set, settled, established (see SET vb)

move vb 1 Move, actuate, drive, impel are comparable when they mean to set or keep going or in motion. Move is so general that the direction or nature of the motion can be gathered only from the context; it may imply an agent or an agency as the mover (when power or force moves the rotating earth?) (the mechanism that moves the locomotive) (vessels moved by wind, steam, or electricity) Actuate is more restricted in its reference than move, being used chiefly in connection with machinery and mechanisms; it stresses the communication of power to work or to set in action (a turbine is actuated by the force of a current of fluid under pressure) (most of the hydraulically operated items of equipment are actuated by pistons and cylinders—W. R. Sears) Drive implies forward and, usually, continuous rather than current motion; it often emphasizes the effect produced, as of speed, violence, or show of power, rather more than the impetus given (a ship driven by wind and tide) (the washing machine is driven by electricity) (the heart drives the blood through the arteries) (air and petrol vapor . . . produce explosions powerful enough to drive the engine of a motorcar—Toynbee) Impel, when used of physical motion, adds to drive the implication of great force in the impetus (imitated the action of a man's being impelled forward by the butt ends of muskets—Dickens)

These words also are synonymous when they mean to excite or provoke a person to a given act or action or to given conduct or behavior. Move may imply an agent, an external influence, or an inner spring or motive as the mover (if kingdom move thee not, let move thee zeal and duty—Milton) (he was, through the years, a hard man to move—Malamud) Actuate presupposes such an inner stimulus as a desire, a feeling, or a motive (it used to be the thing for parents to represent themselves as Olympians, immune from human passions and always actuated by pure reason—Russell) (would deny with indignation that they are actuated in their esteem for science by its material serviceability—Dewey) Drive presupposes a compelling force, sometimes outer, sometimes inner, which affects the freedom of the will (it was the crass materialism of America . . . that drove him to exasperation—Parrington) (what had I ever done to you that would drive you to such a step?—Mary Austin) Impel, like actuate, implies an inner prompting, but it suggests greater urgency in the desire or motive and more headlong action (a life of adventure . . . was that to which his nature irresistibly impelled him—Arnold) (she was a prey to shoddy, facile emotions . . . none of which had power to impel her to any action—Rose Macaulay) Ana *activate, actuate, motivate: *provoke, excite, quicken, stimulate: *induce, persuade, prevail, get

2 Move, remove, shift, transfer are comparable when they mean to change or to cause to change from one place to another. All of these terms are general in that they do not in themselves and apart from the context imply a definite kind of agent or agency or a definite means of conveyance or transportation or give an indication of the extent of distance covered. Move is by far the most comprehensive term and is chiefly used when nothing more than the motion or activity involved in a change of place is to be indicated (move a table from a corner to the center of the room) (moved his family from New York City to Chicago) (move a house across the street to a larger lot) (he will not move from that chair until he is called to dinner) Remove adds to move the implication that the person or thing that changes or is changed from one place to another is moved from or quits a place which is his or its normal or original location, station, position, or occupation for which there is no new or temporary (remove the cover from a platter) (remove the dishes from the table) When the idea of getting rid or eradicating is stressed, remove is appropriate (remove a person from office) (they removed the cause of the epidemic of typhoid fever when they put the typhoid carrier under close surveil- lance) Shift is reserved for a change in location or direction that the implications of voluntary or guided motion or activity are seldom apparent; therefore the term is often preferred when unrest or uncertainty or instability is to be suggested (the cargo shifted in the storm) (the wind will shift during the night to due east) (shifting his weight from one foot to another) However, shift also is used when a mere change in position is implied (shifted his quid of tobacco to the other side of his mouth before answering) (decided to shift his desk
moving, impressive, poignant, affecting, touching, pathetic

Something deprived of their rights—

I regret that I cannot put into more of admiration, awe, wonder, or conviction) scenery . . .

Moving, impression, poignant, affecting, touching, pathetic are comparable when they mean having the power to excite or the effect of exciting deep and usually saddening and solemn emotion. Moving, the most general of these words, can be used in place of any of the others; the rest, though not mutually exclusive in their implications, can be used very specifically. Something moving stirs one deeply or evokes a strong emotional response (as by thrilling, entrancing, agitating, or saddening) (a moving scene is a play) (a moving appeal for help) (a modern version of the hero who for the good of mankind exposed himself to the agonies of the damned. It is always a moving subject—Maugham) (a moving revelation of child life in an orphanage—MacColl) Something impressive imposes itself forcibly on the mind and compels a response (as of admiration, awe, wonder, or conviction) (scene . . . majestic without severity, impressive without showiness—Hardy) (ordinary men cannot produce really impressive artworks—Shaw) (i regret that I cannot put into more impressive words my belief that . . . the defendants were deprived of their rights—Justice Holmes) Something poignant produces so painfully sharp an impression that it pierces one's heart or keenly affects one's sensitivities (it was warm and yet fresh; blindfold, one could have mistaken it for a morning in early May: but this kind of loveliness in autumn than in spring, because it was a receding footfall, a waning moon—Binyon) (the scenes of disappointment are quite affecting—Whitman) Something touching arouses tenderness or compassion or melts the heart (a clean sober little maid, with a very upright look of trust—Galsworthy) (touching not in the sense of pathos . . . but in the sense of sweetness, warmth, and gaiety—Mannes) (most men's touching illusion as to the fragility of human and their spiritual frailty—Conrad) Something pathetic moves one to pity. Sometimes the word suggests pity induced by compassion for one in sorrow or distress (a lonely old man . . . . Rather pathetic!—Archibald Marshall) (pathetic gropings after the fragments of a shattered faith—Day Lewis) Sometimes it suggests pity mixed with contempt for what is weak, inadequate, or futile 

Binyon) (a pathetic attempt to make a virtue of necessity—Huxley) Something pathetic, stimulating, quickening, provoking (see provoke) (thrilling, electrifying (see thrill): stirring, arousing, rousing, awakening, rallying (see stir)

muddle vb *confuse, addle, fuddle, befuddle

Anu *puzzle, perplex, mystify, bewilder, distract, nonplus, confound, dumbfound: faze, rattle, discomfit, *embarrass: fluster, flurry, upset, agitate, *discompose

Ant enlighten

muddle n *confusion, disorder, chaos, disarray, jumble, clutter, snarl

muddy *turbid, roily

Ana murky, gloomy, obscure, *dark: confused, muddled, addle (see confuse): *dirty, filthy, foul, nasty, squalid

Con *clear, transparent, translucent, lucid, limpid

muff vb *botch, bungle, fumble, cobble

mug n *face, countenance, visage, physiognomy, puss

mulct *penalize, fine, amerce

Ana exact, require, *demand, claim

mulish *obstinate, dogged, stubborn, pertinacious, stiff-necked, pigheaded, bullheaded

Ana headstrong, intrinsically recalcitrant, refractory, ungovernable, *unruly: fixed, set (see set)

multifarious divers, numerous, various, *many, several, sundry

Ana disparate, diverse, divergent, *different: incongruous, incompatible, uncongenial, discrepant, discordant, *inconsonant, inconsistent

multiply *increase, augment, enlarge

Ana propagate, reproduce, breed. *generate: expand, spread, stretch (see corresponding nouns at expande)

Con *decrease, diminish, lessen, reduce, abate

multitude, army, host, legion mean, both in the singular and plural, a very large number of persons or things. They do not (as do the words compared at crowd) necessarily imply assemblage, but all of them can be used with that implication. Multitude stresses numerosness with respect to what is the standard for or the test of numerosness in the thing referred to; thus, in “that child always asks a multitude of questions” and “I never saw such a multitude of books before in one house” multitude obviously refers to a much smaller number in the first than in the second illustration (we must not . . . expect systematic education to produce multitudes of highly cultivated and symptomatically developed persons—Eliot)

When applied to a group of persons taken as a whole, multitude suggests an assemblage of a large number of persons (moved his arms with large pawing gestures, as though he were distributing lay blessings to a kneeling multitude—Wharton) but multitude with a definite article suggests the masses of ordinary people or the populace (speeches that sway the multitude) (a book that appeals to the multitude) (both scorn and seeks the understanding and approbation of the multitude—Knut)

Army usually adds to multitude the implications of orderly arrangement without a suggestion of crowding and often, especially in clearly figurative use, a progressive advance without any suggestion of halting or gathering (they were served by a vast army of waiters) (an army of locusts) (we have considered science as a steadily advancing army of ascertained facts—Ingpe) (he discovered around him . . . a world whose existence he had neither known nor suspected, the army of persons who know no routine labor—Purdy) Host has for its primary implication numerous. It may mean nothing more (she has a host of admirers) (he knows hosts of people) (the burning of hosts of unfortunate old women—and sometimes young ones—as witches—Cobban) but it may suggest more

move 551

multitude
strongly than any of the other words a concentration in
great numbers of the thing referred to; in such cases it
often connotes an impressive or striking array (a clear,
cold night and a host of stars in the sky) (I saw a crowd,
a host, of golden daffodils—Wordsworth) (a host of
equisite creations, the expression of a great artist’s
subtle vision and faultless technique—Read) (a very
uneasy division, giving rise to a host of perplexities whose
consideration has occupied the intervening centuries—
Whitehead) Legion in general use retains little suggestion
of its basic application to the chief unit of the Roman army
and but little more of its scriptural uses; typically it applies
to an indefinitely or incalculably large number (the
windy arguments of this legion of aberrants—McComas) (the
legion of animal owners is also rising fast—Investor’s
Reader) (a legion of friends hastened to his support—
W. B. Parker) (armies of angels that soar, legions of
demons that lurk—Browning)
Ana

museum, library, gallery, archives, treasury are comparable
but not synonymous terms when they mean a place serving
as a repository for monuments (see DOCUMENT 1 for this
sense) of the past. Museum is the most general of these
terms; it usually implies the intention both to preserve and
to exhibit for the education of the public. A museum may
be an institution concerned with the preservation and
exhibition of objects of historical or scientific interest,
especially such as illustrate the development of human
civilization or the evolution of species, or it may be one
providing for the preservation and exhibition of works of
fine art (as paintings and sculptures), or it may combine
both purposes. Consequently, the term is usually qualified
in proper names or in general designation (the Museum of
Fine Arts) (the Museum of Natural History) (an art
museum) Library is applicable to a place (as a room,
buidling, or institution) which houses a collection of
books not for sale but available for use by specified persons
or sometimes the general public. But library is applicable
also to a collection of literary material and as such may
vary in scope from a handful of books making up a personal
collection to a usually public collection consisting of a vast
store of books of all kinds and of all ages, manuscripts,
records, documents, files of journals, and often, in addition,
works of art and serving primarily to preserve works of
literature and of reference and documents in all fields of
research and to make them available to scholars. Gallery
(often art gallery) is used for a room, a suite, or a building
housing and exhibiting works of art and especially paint-
tings and pieces of sculpture. The term is used of a place
housing a private as well as a public collection and (espe-
cially in the plural, galleries) of a place where works of
art are exhibited for sale. Archives, when the term desig-
nates the place where a collection of old records, old
documents, old files, and similar papers are kept rather
than the collection itself (see DOCUMENT 1), may refer
to a building or, as is more common, to a part of a building
(as of a library or museum) where such a collection is
housed (the archives of the city hall) (the archives of
the department of state) (place a manuscript in the
archives of the Royal Society) Treasury is used to desig-
nate a place, often a room, where possessions of intrinsic
value and often historical significance are stored and in
some instances displayed to visitors (in the treasury of
the cathedral . . . there is a fine, whole, uncut chasuble—
Rock) The term is often extended to things or places that
are or are felt to be storehouses of precious things
(forests whose treasury of bird and beast and insect
secrets had been only skimmed by collectors—Beebee)
mushy

- sentimental, romantic, mawkish, maudlin, soppy, slushy

muster

- summon, summons, call, cite, convocate, convene

Analogous words: 
- collect, congregate, assemble, gather: marshal, organize, arrange, 
- order: align, line, line up, range, array

mystic, *malodorous, stinking, fetid, noisome, putrid, rank, rancid

Ana

- dirty, filthy, foul, nasty, squalid: sloppy, slipshod, unkempt, slovenly

mutable

- changeable, changeful, variable, protean

Analogous words: 
- unstable, *inconstant, fickle: fluctuating, wavering, swinging, swaying (see swing)
- immutable: —Con *steady, even, constant, uniform: *stable

Mutation

- *change, permutation, vicissitude, alternation

Analogous words: 
- shifting or shift, moving or move, removing or remove (see move): variation, modification, alteration

musty

- fusty, *malodorous, stinking, fetid, noisome, *dirty, filthy, foul, nasty, squalid: sloppy, slipshod, unstable, *inconstant, fickle: fluctuating, wavering, swinging, swaying (see swing)

mushy

- sentimental, romantic, mawkish, maudlin, soppy, slushy

mysterious

- mysterious, inscrutable, arcane mean beyond one's power to discover, understand, or explain. Something mysterious excites wonder, curiosity, or surmise yet baffles all attempts to explain it (e.g., nature equals produce, in Man they join to some effect his wonders to perform, <God moves in a mysterious way his wonders to perform>)

mystery

- problem, enigma, riddle, puzzle, conundrum are comparable when they denote something which baffles or perplexes and challenges one's power to solve it. Mystery may, especially in theological use, imply the thing's incapacity for comprehension by the human reason, but it is also applicable to any of the facts of the world about us which defy all attempts to explain their cause or nature (e.g., this mystery of growth and life—Jeffries) (we must be humble, for we are compassed by mysteries, and our spiritual faculties are poor and dull—Inge)

The term is also used to denote something which is guarded by secrecy or is in itself or by design mystifying while at the same time so intriguing as to compel speculation (he always makes a mystery of his intentions) (it's a mystery to me how he can keep going?)

Mystery solves the problem, and the labels are employed as a type of rhetorical question to demand of the person on whom the mystery rests how to find healthy, happy leisure for all the working millions who are now being liberated by machines—L. P. Smith (if a great hate and a great determination could solve the problem, Kelley would solve it—Theodore Sturgeon)

Enigma applies to whatever hides its meaning under obscure or ambiguous allusions so that one can only guess at its significance (a metaphor should not be farfetched, for then it becomes an enigma) (the ancient oracles usually spoke in enigmas) The term can be extended to whatever is inscrutable or beyond the range of unaided understanding (Leonardo . . . worked so slowly, he left so much unfinished, he seemed to make it possible and unstable. He was an enigma to which they never secured the key—Ellis) (the enigmas of history, of man's freedom and responsibility and of his guilt, cannot be solved as easily as modern culture assumed—Niebuhr)

The term can be extended to any problem which is difficult because of its inherent contradictions (he tried to read the riddle of this girl's future—Galsworthy) (the riddle of Actium is not in the details of the fighting but in the minds of the combatants—Buchan) Puzzle applies to a problem or enigma which tests one's ingenuity or skill in solution or which is peculiarly baffling (hoary old puzzles of Ethics and Philosophy—L. P. Smith) (there are few things in the world so difficult to explain as real change; it appears to me that most scientists are far from realizing the complexity of this metaphysical puzzle—Inge)

Conundrum specifically applies to a riddle phrased as a question as a question the answer to which involves a paradox or a pun or an equivocal use of words (they roused him with jam and judicious advice: they set him conundrums to guess—Lewis Car-

See also explanatory notes facing page 1
The term can be extended to unsolved or unsolvable problems which provoke speculation rather than serious attempts at solution. "Do you think life is long enough to let me speculate on conundrums like that?—Black"

"To fail to touch on the political conundrums involved, particularly the problem of how the richer areas of the South can be made to subsidize the poorer—Cater"

**mystic** adj *mystical, anagogic, cabalistic*

_Ana_ occult, esoteric, *recondite, abstruse: *mysterious, inscrutable: visionary, quixotic, *imaginary*

**mystical** n *ascetic*

**mystical, mystic, anagogic, cabalistic** are comparable when they denote having a meaning or character hidden from all except those who enjoy profound spiritual insight or are spiritually initiated. _Mystical_ and _mystic_, though often interchangeable, can be distinguished in use. In general, _mystical_ suggests comprehension of something beyond the range of the perceptive or ratiocinative powers; its use therefore often implies belief in the possibility of such comprehension and the word variously connotes penetration into sacred mysteries, holiness of life, idealism, detachment from material concerns, ecstatic contemplation, or spiritual rapture (_the mystical philosophy of Plotinus_, _mystical_ religions such as Buddhism). _The mystical poetry of William Blake_ (there is something _mystical_ in this doctrine, this faith, as of Keats, that "what the Imagination seizes as Beauty must be Truth"

—L. P. Smith_ Mystical_ is appropriately used when one wishes to avoid these special implications of _mystical_ or to suggest others more in keeping with a rationalistic or skeptical point of view. Therefore _mystic_ often imputes to the thing it describes: (1) an occult, esoteric, or visionary character (_mystic ceremonies_), (2) a mysterious, enigmatic, or sometimes nebulous quality (_words of mystical import—Shelley_), (3) a connection with magic or the arts of magic (_mystic numbers_), (4) each silver vase in _mystic_ order laid—Pope_ Often its basic denotation is completely obscured and it means merely unintelligible, unfathomable, or incomprehensible. _The mystic gulf from God to man—Emerson_ _Anagogic_ refers basically to an ultimate underlying meaning, especially in the Bible, perceptible only to those of profound spiritual insight (_when Dante . . . describes his poetry—Barnham_) _Looming in the distance, there was the final or anagogic meaning_ that transformed the symbolic object into a spiritual truth—Malcolm Cowley_ _Cabalistic_ in its primary meaning applies to a secret interpretation of Scriptures (_Cabala_) held to have been revealed to Moses and handed down orally through a line of chosen Jewish rabbis. The system came to be used by medieval magicians and _occult_ analysis before followings and often requiring _confound, dumbfound_ _Anagog_ evil, perplex, *puzzle, distract, nonplus, confound, dumbfound_ _Mysticism_ asceticism (see under _ascetic_ n)

**mystify** bewilder, perplex, *puzzle, distract, nonplus, confound, dumbfound*

**myth** 1 _Myth, legend, saga_ all mean a story which has come down from the past, which ostensibly relates a historical event or legends, and of which the origin has been lost or forgotten. _Myth_ varies considerably in its denotation and connotation depending on the persuasion of the user. Often the word is used to designate a usually fanciful and imaginative story that explains a natural phenomenon or a social practice, institution, or belief (the old _myth_, imported hazily from the East, which represented the cat-moon devouring the gray mice of twilight—Reppplier)

It is also used to designate a story, belief, or notion commonly held to be true but utterly without factual basis (_the doubts that women have about themselves are made, and most women are so enslaved to the myths of their own inferiority they are unable to see the truth for the myths—Ashley Montagu_). The word may be used with wide comprehensiveness in general writing or with narrow exclusiveness and specificity in more limited use ( _myths_ may be subdivided into such classifications as origin _myths_, ritual _myths_, incidents involving the lives of the gods, stories of culture heroes, trickster tales, journeys to the other world, human and animal marriages, adaptations of old world _myths_, and retellings of biblical stories—L. J. Davidson_). _Myths_ are said to be expressions or objectifications of "collective wishes" which are personified in the "leader" who is endowed by a given society with powers of social magic to fulfill the collective wish—Kroeber_ _Legend_ is likewise used with latitude, but in its most typical use it is likely to apply to a story, incident, or notion attached to a particular person or place that purports to be historical and often has or seems to have a basis in historical reality although as a whole it is either incredible or unverifiable ( _the medieval legends of the saints_). _The wrecking of the Palatine which, according to legend, did not sink but rose flaming into the sky—Zimmer_ _The violent deaths of several slaves quartered in them gave rise to a legend that this part of the house is haunted—Amer. Guide Series: Md._ _Saga_ may refer to a long, continued, heroic story that is action-packed but not especially romantic, that deals with a person or group, and that is historical or legendary or both ( _the Saga of Burnt Njål_). _The building of the railroad in the Northwest was one of the great sagas of man's enterprise—Le Sueur_ _Myth_ *fiction, fable, fabrication, figment: invention, creation (see corresponding verbs at _invent_) 2 *allegory, parable, fable_ _Mythical* *fictitious, fabulous, legendary, apocryphal_ _Mystical_ *imaginary, visionary, fanciful, fantastic: invented, created (see _invent_)_

A colon (:) separates groups of words discriminated. An asterisk (*) indicates place of treatment of each group.
naive

naive unsophisticated, artless, ingenuous, *natural, simple

Ana *sincere, unfeigned: *spontaneous, impulsive, instinctive: fresh, original (see NEW)

Ana revealed, disclosed, discovered (see REVEAL): *evident, manifest, palpable, obvious: uncolored, *colorless: *pure, simple, sheer

name n Name, designation, denomination, appellation, title, style mean the word or combination of words by which something is called and by means of which it can be distinguished or identified. Name is so general that it can be used of any such word or combination whether it distinguishes a person or an object, an individual or a class, a particular or a universal, a thing having distinct existence in fact or a thing having distinct existence only in thought (all nouns are names) *love is the name of an emotion (the child's name is John Joseph Brown) Sometimes name is thought of as something apart from the real character of the thing to which it is attached (what's in a name? that which we call a rose by any other name would smell as sweet—Shak.) (for sixty years he had been a name, not a figure—Bennett) More often, however, the term connotes identification of the word with the thing or, especially, the person it names, so that what affects one the other (Oxford) home of lost causes, and forsaken beliefs, and unpopular names, and impossible loyalties!—Arnold *if I discovered the worst, and it had to be exposed, I must see that Jane's name was kept entirely out of it—Rose Macaulay) This common feeling of a mutual and almost inevitable relation between the name and the thing named is what distinguishes name from designation, denomination, appellation, all of which are thought of as given and therefore as having an artificial association with the thing and a utilitarian purpose such as description or identification. A designation is a name given primarily for the sake of distinguishing one thing, whether an individual or a class, from other things of the same general description (the French revolutionists changed the traditional designations of days and months) *recognizing that this parasite was new, [he] . . . gave it the designation Aphytis A.—Jour. of Economic Entomology (Madame Curie chose polonium as the designation of the newly discovered radio element in honor of her native Poland) Denomination (see also RELIGION) is the name given especially to a class, to a category, or to a closely knit group (as of persons); the idea of a class name is so deeply rooted in the word that in extended use it often means the kind or group distinguished by a particular name (most of George Eliot's works come under the denomination of novel) A roll of bills containing notes of every denomination) *in the classic word of antiquity they called outsiders, indiscriminately, barbarians—a denomination which took on an increasingly depreciative sense—Ellis) Appellation is the name by which a thing or person is known or called; the term implies actual use and differs from designation and denomination in precluding the idea, but not necessarily the fact, of self-choice (James Tubbington Brown, a boy better known to his fellows by the appellation Stinky) the government of the United States has been emphatically termed a government of laws, and not of men. It will certainly cease to deserve this high appellation, if the laws furnish no remedy for the violation of a vested right—John Marshall) A title is either a distinctive name given to a work (as a book, a picture, a play, or a musical composition) or an honorary appellation coming to a person by virtue of his rank, office, dignity, or descent or given to him as a mark of respect (the head of the state must have a title—Buchan) When used without reference to a particular work of art or person title is sometimes preferred to denomination because it connotes distinction and dignity (any admixture of logical, of "prose" meaning detracts from the value of a poem, if it does not disqualify it for the title of poetry altogether—Day Lewis) When used abstractly in preference to name or designation it often connotes the lack of an essential relation between the name and the thing it names (things change their titles, as our manners turn—Pope Style is used to emphasize the exact form of a name and is applicable chiefly to such legal and formal titles as the legal name of a firm or corporation or the complete, formal designation of a royal or other exalted personage as used in documents or in ceremonial address (a business incorporated under the style of the Globe Manufacturing Co.) Thrones and Imperial Powers, offsprings of Heaven, ethereal virtues! or these titles now must we renounce, and, changing style, be called Princes of Hell?—Milton) name vb 1 *designate, nominate, elect, appoint

Ana *choose, select, prefer, elect, opt: *declare, announce, publish, advertise 2 *mention, instance, specify

Ana *refer, allude, advert: *designate: identify, recognize (see corresponding nouns at RECOGNITION): cite, *quote

nap vb catnap, doze, drowse, snooze, *sleep, slumber

narcotic *anodyne, opiate, nepenthe

narrate *relate, rehearse, recite, recount, describe, state, report

Ana *coarse, gross, vulgar, obscene, ribald: tainted, contaminated, polluted, defiled (see CONTAMINATE): indiscrete, indecent, unseemly, improper, *indecorous

nation *race, people

national n *citizen, subject

native adj Native, indigenous, endemic, aboriginal, autochthonous all mean belonging to or associated with a particular place by birth or origin. A person or thing is native (opposed to foreign, alien) that has had his or its birth or origin in the place in question (a native American) a native New Yorker a native tradition (native artists left the state and studied abroad—Amer. Guide Series: Mich.) a one-story structure of native stone—S. S. King) A person or thing is indigenous (opposed to naturalized, exotic) that is not only native but also has not been introduced from elsewhere into the place indicated (maize is indigenous to America) Southern Rhodesia at present

See also explanatory notes facing page 1
natural

556

employs about half a million Africans, of whom half are
indigenous and half are migrants from neighboring
territories—Peter Scott) <no written flora anywhere in
the world admits as indigenous that lusty weed . . . called
Good-King-Henry—Peattie) Indigenous is applied usually to kinds (as species or races) rather than to individuals
and often implies reference to a larger area than native
(as to a country, or to a region characterized by a particular type of climate). A thing is endemic (opposed to
exotic and in medicine to pandemic) which not only is
indigenous but is also peculiar to, or in the case of a
disease, prevalent in, a restricted region because of special
conditions favoring its growth or existence <edelweiss
is endemic in the Alps> <that complacency which is an
endemic disease of academic groups—Conant) A person
or thing is aboriginal that belongs to the earliest known
race inhabiting a country or to the people found there (as
by explorers, colonists, and invaders); the term usually
implies the lack of a known predecessor and often connotes a primitive culture <Indians are the aboriginal
Americans) < America must turn again to catch the spirit
of her own dark, aboriginal continent—D. H. Lawrence)
<the Kooboos, a primitive aboriginal race in the southeast of Sumatra—Frazer) Aboriginal is more rarely
applied to the earliest ascertainable native plants and
animals. Something is autochthonous which has its origin
in the place in which it is found (autochthonous rocks)
<an autochthonous flora) When applied to races of men
or their achievements, it implies purity of stock or freedom from all external influences <as long as the States
continue to . . . be dominated by the poetry of the Old
World, and remain unsupplied with autochthonous song
. . . so long will they stop short of first-class nationality
— Whitman)
Ant alien, foreign

natural

thing at all except his collection of modern paintings
—Dahl) <she was so simple and trustful that I always
thought it would be as wicked to hurt her as to hurt a
babe in swaddling clothes— Webb) Ingenuous stresses
inability to disguise or to conceal one's thoughts or
feelings; it usually implies frankness or candor, lack of
reserve, or freedom from dissimulation, often with a hint
of childlike simplicity < Father had set a dog on him. A
less ingenuous character would be silent about such
passages . . . but that is not his quality—H. G. Wells)
<to post-Freudian ears this kind of language seems touchingly quaint and ingenuous—Huxley) Naïve implies freedom from all that is artificial, conventional, or acquired;
in early use and still often, especially in its derivative
noun naivete, it suggests freshness, spontaneity, and
genuine expression of a nature untouched by worldly
influences and without affectation or artifices <by contrast
with the poetry of Vergil, that of Homer seems strikingly
naïve) <a delightfully naïve personality) <he claimed to
himself to be innocent or naïve, but his pretense was the
thinnest—Cheever) But it may sometimes become a term
of derogation and then often implies lack of worldly
wisdom <Sophia, the naïve ninny, had actually supposed
that her walking along a hundred yards of pavement with
a god by her side was not going to excite remark!—
Bennett) <one does not ask favors, if it can be avoided,
of persons one genuinely respects; one puts such burdens
upon the naïve and colorless, upon what are called the
good-natured—Mencken) Equally often, especially in
learned use, it suggests the point of view of the untutored
or unenlightened person or of one whose judgments are
not corrected by advanced scientific or philosophical
knowledge and who therefore supposes that things are
what they seem to be <the naïve science of an earlier
day merely took it for granted that space and time existed
in their own right—Jeans) <that naïve patriotism which
leads every race to regard itself as evidently superior to
every other—Krutch) Unsophisticated also stresses lack
of wisdom, especially worldly wisdom. It does not, however, emphasize native simplicity as strongly as naïve;
rather, it suggests lack of the experience or training necessary for worldly success or, more specifically, for graceful
and adroit social relations <she's not the type of the
moment, not elegant or artificial, too much the unsophisticated child of nature—Rose Macaulay)
<Italian
civilization had, in short, everything to dazzle the imagination of unsophisticated northerners emerging into a period
of prosperity— T. S. Eliot) Artless lays the stress on the
absence of design; it suggests naturalness that is the result
of indifference to, or unawareness of, the effect or impression one is producing (overflowing with . . . artless
maternal gratitude—Austen) <almost every turn in the
artless little maid's prattle touched a new mood in him
—Meredith) <he hated to seem heavy or profound or

Wells) Unaffected centers the attention on the absence
of affectation, but it usually implies both naturalness
and simplicity without any hint of childishness, unworldliness, guilelessness, or indifference <a well-bred, unaffected girl) <he was extremely simple and unaffected
in his attitude, and readily approachable—MacCallum)
<gratified by his young guest's unaffected admiration for
this treasure— Wylie)

natural adj 1 * regular, normal, typical
Ana ordinary, *common, familiar: *usual, customary,
habitual, accustomed, wonted
Ant unnatural: artificial: adventitious
2 Natural, simple, ingenuous, naïve, unsophisticated, artless, unaffected are applied to persons, their acts, and their
utterances, in the sense of wholly free from pretension or
calculation. Natural implies, on the one hand, freedom
from every sign of artificiality, effort, constraint, or
affectation and, on the other hand, an ease, a spontaneousness, or a flexibility that suggests nature rather than
art; the term often implies opposition to whatever is
labored, stiff, formal, or artificial <set him to write poetry,
he is limited, artificial, and impotent; set him to write
prose, he is free, natural, and effective— Arnold) <it is
of the essence of such talk that it should be natural
and attractive, not professional or didactic—Benson)
<she was so friendly and so natural that it was nice to
talk to her about what was interesting him—Archibald
Marshall) <the fact is that a poetic language which
appears natural to one age will appear unnatural or artificial to another—Day Lewis) Simple stresses complete
freedom from everything that might suggest unconscious
or conscious duplicity. It usually implies lack of confusion
of aims, desires, interests, or values and therefore may
carry one or the other of connotations as divergent as
mental immaturity and intellectual ripeness, as the lack
of experience characteristic of the child and the fullness
of wisdom characteristic of the sage, or as the transparency Ana *spontaneous, impulsive, instinctive: ingrained,
of those who do not know how to conceal their nature or constitutional, * inherent
motives and that of those who have nothing to conceal Con formal, conventional, ceremonious, *ceremonial:
<nothing is more simple than greatness; indeed, to be sim- pretentious, ostentatious, *showy: affected, assumed,
ple is to be great—Emerson)
<a man of mild and simple counterfeited, feigned (see ASSUME)
character who up to then had shown no interest in any- natural n *fool, idiot, imbecile, moron, simpleton
A colon (:) separates groups of words discriminated. An asterisk (*) indicates place of treatment of each group.


nearly, almost, approximately, well-nigh are comparable
neat, tidy, trim, snug, shipshape, spick-and-span mean

next, nearest are both superlative forms of near, but they are not always interchangeable. Nearest may be used wherever the intent is merely to indicate the highest degree of propinquity (as in space, time, or kinship) the nearest house is five miles distant their nearest neighbor lives two miles away her nearest relatives are her father and mother

next off a neat place, with its piles of magazines and newspapers stacked in orderly fashion MacInnes or the clearness that is indicated in simplicity and freedom from what clutters, complicates, or confuses or that indicates orderliness, deftness, or adroitness neat workmanship a neat style neat minds, who prefer things in their proper places, ticketed and pigeonholed Dixon a neat rector

Trim commonly suggests a pleasing neatness and order diligently maintained he's always tidy without being smart; his coat is old and his trousers are uncreased, but they're both clean, and nothing's loose or torn Richard Harrison

As distinguished from neat, tidy throws the stress on orderliness, careful arrangement, or a place for everything, rather than on cleanliness or simplicity a tidy desk a tidy sewing basket once upon a time the universe was all tidy, with everything in its proper place, and... ever since then it has been growing more and more disorderly Russell (they have an unfailing instinct for doing things in a tidy way—their busy airports handle passengers with remarkable smoothness Rolo Trim implies both neatness and tidiness; it stresses, however, such smartness or spruceness in appearance as is given by clean line and excellent proportions trim clipper ship a trim figure his shoes and buckles, too, though plain, were trim Dickens a crisscross of trim... paths Lowet Trim, though close to trim, tends to carry a stronger implication of compactness, of neatness, and of jauntiness of appearance and is especially applicable to persons or their clothes she has a trig new tailored suit his hair was hardly even gray, and he stood as straight and trig as a fence post Hersey a wonderfully trig beret, wide and flat New Yorker Snug (see also comfortable) in the present relation applies basically to ships and suggests a fine trimness of line and construction a snug little ship or adequate and orderly preparation for a voyage and especially for riding out a storm soon all was snug aloft, and we were allowed to go below Dana In other applications the term may imply a neat, compact, ordered state that affords security or sheltered ease everything on this snug property was bright, thriving, and well kept Hardy snug little shops that once offered Cornhill the best soups and jellies West Shipshape is often used in place of snug to describe not only ships where tidiness and trimness prevail but whatever depends for its success or well-being upon habits of tidiness and orderliness his affairs are in shipshape condition look to the babes, and till I come again keep everything shipshape Tennyson everything from rifles to shoeboxes got a complete going over. It was my job to see that all was perfect. Finally, I felt confident everything was shipshape H. V. Keltenborn

Spick-and-span, which stresses the brightness and freshness of something new, is applicable also to what by care and cleanliness has been kept new in appearance or made to look like new spick-and-span white shoes the kitchen was spick-and-span spick-and-span machinery no spots came on his clothes. No sloppy habits crept upon him. He was always spick-and-span—White

Ana clean, cleanly fastidious, nice, dainty, finicky exact, precise, correct, accurate Ant filthy —Con unkempt, disheveled, slovenly, slipshod, sloppy slack, lax, remiss, negligent confused, mulled, addled (see confuse)

necessary 1 needful, requisite, indispensable, essential Ana compelling or compulsory, obliging or obligatory, constraining (see corresponding verbs at force) important, significant, momentous (see corresponding nouns at importance) cardinal, vital, essential, fundamental

neat, tidy, trim, trig, snug, shipshape, spick-and-span mean manufacturing care and orderliness. Neat through all its variations in sense keeps as its basic implication clearness, such as the clearness from dirt or soil that is manifest chiefly in perfect cleanliness her house is as neat as a pin the cat is the neatest of domestic animals he was remarkably neat in his dress Johnson it was
need

2 *certain, inevitable
Ana unavoidable, unescapable, inescapable, ineluctable,
*invariably: *infallible, inerrable, inerrant, unerring
necessitous *poor, indigent, needy, destitute, penniless, impecunious, poverty-stricken
Ana impoverished, drained, depleted, exhausted, bankrupt (see DEPRETE)
Con *rich, wealthy, affluent, opulent

necessity *need, exigency
Ana compelling or compulsion, constraining or constraint, obliging or obligation, coercing or coercion (see corresponding verbs at FORCE): indispensables, requisites or requisition, needfulness (see corresponding adjectives at NEEDFUL)

need n
Need, necessity, exigency may all denote either a state or condition requiring something as essential or indispensable or dispensable or the thing required. Need implies pressure and urgency arising either from external or internal causes or forces; it may merely suggest the call of an appetite or demand for emotional or intellectual satisfaction <he is in need of food> <children have a need for affection> <he felt the need of an education> or it may imply circumstances (as a breakdown or interruption of activity, poverty, a storm, or a threat of war) that expose a lack of or create a demand for something indispensable (as to the well-being, protection, security, success, or functioning of those or the one concerned) <the need of a city for an adequate water supply> <provide food and lodging for those in need> <the need of a city for an adequate water supply> <the need of a city for an adequate water supply>
needful <of a city> <for a need of a city for an adequate water supply>

necessity rather than charity was responsible for the United Nations—Fuerer

<necessity> rather than charity was responsible for the United Nations—Fuerer

needful

need vb
*lack, want, require
Ana *demand, require, claim, exact: *long, hanker, pine, yearn, hunger, thirst: crave, covet, *desire, wish
needful, necessary, requisite, indispensable, essential are comparable when meaning urgently required. Needful carries the weakest suggestion of urgency, but it applies to something that is required to supply a want or to fulfill a need (forts, magazines, arsenals, dockyards, and other needful buildings—U. S. Constitution) <tradesmen carrying what was needful to British ports—Reppler> <a sensitive, flexible, resourceful adaptation to objective facts is especially needful—Muller>

Necessary implies more pressing need or urgent constraint but, except where the compulsion of necessity in the sense of an inherent, logically compelling principle <a necessary consequence> <a necessary conclusion> <patience ... is a necessary mark of the liberal mind—Dewey> is suggested, the word need not connote that the thing so qualified cannot be done without but more often indicates it to be infinitely desirable rather than absolutely required; thus, tires are necessary to proper management of an automobile, but in a sufficient emergency one might drive without them <his personal return was most required and necessary—Shak>

(it was nineteen-thirty-five and honeymoon in Europe were not considered necessary by anyone—Flood) <made himself so necessary to the company that by 1849 he was general superintendent of the road—Harlow> <always finding a more necessary article for which a less necessary had to be discarded—Cather> <of all the bitter and heavy things in this old world, the not being necessary is the bitterest and heaviest—Deland>

Requisite differs from necessary chiefly in being applied to something that is specifically required by the nature of a thing, the end that is in view, or the purpose to be fulfilled; usually the adjective suggests an imposed requirement rather than an inner need and so suggests constraint from without or, often, from official sources <complete the subjects requisite for college entrance> <the vigor requisite to success—Grandgent> <the requisite quorum of forty members was not present—Schuyler>

Indispensable not only carries a stronger implication of urgency than the preceding terms, but it also distinctly implies that the thing so qualified cannot be done without, especially if the implied or expressed end cannot be attained <there is no such thing as an indispensable person, though many persons have made themselves virtually indispensable> <the jury is the indispensable element in the popular vindication of the criminal law—Frankfurter> <rigid truthfulness in adults towards children is absolutely indispensable if children are not to learn lying—Russell>

Essential (see also ESSENTIAL 2, INHERENT) is often used in place of indispensable as implying no less urgency but as being less extravagant in its suggestion; it usually also implies inherent necessity from the point of view of what a thing is or must be by its very nature or end <knowledge of one’s subject is essential to successful teaching> <essential raw materials> <you are essential to her perfect happiness—Dickens> <the builders must have begun with the central pier and the choir, because the choir was the essential part of the church—Henry Adams> <the construction of the pier was desirable for the more convenient repair of warships, but it was not essential—Justice Holmes>

Ana wanted, needed, required, lacked (see LACK vb): vital, cardinal, *essential, fundamental

needy adj
*poor, indigent, destitute, penniless, impecunious, poverty-stricken, necessitous

Ana & Con see those at NECESSITOUS

nefarious injurious, flagitious, infamous, corrupt, de-
negate  

*nullify, annul, abrogate, invalidate  

negative *neutral, indifferent  

Ant affirmative  

negative vb 1 *deny, gainsay, traverse, contradict, impugn, contravene  
2 *neutralize, counteract  

Ana *nullify, negate, annul, abrogate, invalidate  

neglect vb *Neglect, omit, disregard, ignore, overlook, slight, Ana usually carries a suggestion of willful ignoring or of a threat, insulted, made ill ... but I am justified—Gather)  
full value—(disregard neglect of good nature to the faults which have already, of care or attention <he was changing into his dress clothes .... He had neglected to hang them up the night before, and for once they were bedraggled—Mailer)  
<a>he asked Mr. Powell with some brusqueness if the chief mate had neglected to instruct him that the captain was to be found on the port side—Conrad  
<neglect his family> <omitting a leaving out of something; <it was—well, until yesterday—all but draggled—Con> (omit two stanzas of a hymn) <got up late and omitted breakfast> or a neglecting entirely through oversight, inattention, or absorption of an important detail, opportunity, or aspect <Constance remembered small possessions of her own which she had omitted remove from the cutting-out room—Bennett>  
Disregard usually implies voluntary, sometimes deliberate, inattention; the term may or may not imply justifiable neglect <disregard petty annoyances> <disregard an unimportant piece of evidence> <she persists in disregarding the wishes of her mother> <nearly all the humane alleviations of brutal violence, introduced and practised in the days when professional armies fought for a dynasty or for a point of honor, were disregarded—inge> <floating convention and disregarding his own clerical position—Handlin>  
Ignore usually implies either an intention to disregard or a failure to regard something more or less obvious; it may even suggest a deliberate closing of the eyes to what one does not wish to recognize <to those who agree with me I am uttering commonplaces and to those who disagree I am ignoring the necessary foundations of thought—Justice Holmes> <its mathematics approaches mysticism and its theory contains certain impossibilities which are ignored in practice—Theodore Sturgeon>  
by tacit agreement they ignored the remarks and insinuations of their acquaintances—D. H. Lawrence  
Overlook implies an omitting or disregarding, sometimes through intention but more often through haste, or lack of care <overlook an item in an account> <it is the practice of good nature to overlook the faults which have already, by the consequences, punished the delinquent—Johnson> <winced when he heard so young a man call him by nickname, but he overlooked this also in light of what had happened—Purdy> Slight may imply neglect, omission, or disregard, but it also usually implies a contemptuous or an arrogant attitude that makes one undervalue a thing's importance, treat a person disdainfully, or be negligent in performance of a task or duty <nothing in the service was slighted, every phrase and gesture had its full value—Cather> <I have been slighted, tricked, threatened, insulted, made ill .... but I am justified—H. G. Wells>  
Forget (compare FORGETFUL) often retains in this relation the implication of losing the memory of something or someone, so that when it implies neglect, it usually carries a suggestion of willful ignoring or of a failure to impress the thing neglected upon one's mind <I shall not be surprised to be neglected and forgot—Nelson> <still, he told Hannah to get the boy better clothes—though he forgot to give her any money for the purpose—Deland> <it was—well, until yesterday—all but forgotten—put out of mind, I mean—de la Mare>  
Ant cherish —Con *appreciate, value, prize, treasure: *nurse, nurture, foster, cultivate  

neglect n 1 *failure, default, miscarriage, dereliction  
Ana omitting or omission, disregarding or disregard, ignoring, slighting, forgetting, overlooking (see corresponding verbs at NEGLECT): forgetfulness, obliviousness (see adjectives at FORGETFUL)  
2 *negligence  

Ana neglecting, omitting or omission, disregarding or disregard, ignoring, slighting, forgetting, overlooking (see corresponding verbs at NEGLECT)  

neglectful *negligent, lax, slack, remiss  
Ana *careless, heedless, thoughtless  
Ant attentive —Con *thoughtful, considerate  

negligence, neglect are not always clearly distinguished in use, even though the lines between them may be drawn with some clearness. Negligence stresses the quality or fact of being negligent or careless either as shown in a lack of care in the performance of a task, a duty, or a piece of work or in the operation or handling of a dangerous machine or mechanism which requires effort or close attention <the amazing negligence of some house-keepers> <an act of criminal negligence> <no one has done more through negligence to corrupt the language—Byron> <most of these are involved in accidents through their own negligence—Theodore Sturgeon> or as shown in a temperamental or assumed indifference to small niceties (as in dress, manners, or style) that gives an impression of casualness, artlessness, or lack of artificiality <spoke with conviction, yet with a gentlemanly lightness, almost a negligence, as though to cancel any tone of dogmatism ... in his words—Wouky> <his companion wore well-cut tweeds with a sort of aggressive negligence, as though he hated them—I. A. R. Wylie>  
Neglect, on the other hand, applies either to the act or fact of leaving undone or carelessly, or imperfectly done something which it is one's business or duty to do <convicted of neglect of duty> <we made a nice tidy cleanup .... If I hadn't done it I ought either to have been shot for neglect or dismissed for incapacity—H. G. Wells>  
<in dealing with the infant ... there is need of a delicate balance between neglect and indulgence—Russell> or to the state or fact of being neglected, slighted, ignored, or forgotten <rescue my poor remains from vile neglect—Prior> <a ... motive for reading it ... [that] ensured poetry against neglect—Day Lewis> <destined either to constantly inadequate execution or to complete neglect—Virgil Thomson>  
For these reasons the phrase "the negligence of a person" always refers to a quality of character of the person as an agent or to its outward manifestation (as in an act, a piece of work, or an accident) while "the neglect of a person" refers to the act of another who neglects, slight, ignores, or forgets the person, thereby making the latter his victim.  
Ana laxness, slackness, remissness (see corresponding adjectives at NEGLIGENCE): indifference, unconcernedness or unconcern, incuriousness (see corresponding adjectives at INDIFFERENT)  

Ant attention: solicitude —Con *care, concern, anxiety, worry: diligence, assiduity, sedulousness (see corresponding adjectives at BUSY)  

negligent, neglectful, lax, slack, remiss are comparable when applied to persons, their ways of working or acting,
and the results of their work or activities with the meaning culpably careless or manifesting such carelessness. Negligent implies such culpable inattentiveness as is likely to result in imperfection, incompleteness, slovenliness, or danger or damage to others (his family knew him to be ... a most negligent and dilatory correspondent—Austen) (so negligent in his poetical style ... so slovenly, slipshod, and infelicitous—Arnold) (a careless workman, negligent of detail—Edith Hamilton) Neglectful is usually more derogatory or censorious than negligent, for it carries a stronger connotation of laziness or deliberate and blameworthy inattention (parents neglectful of their children’s health) (a government at once insatiable and negligent—Mill) (show no trace of shame, and ... are utterly neglectful of what we consider the first requirements of decency—Westermarck) (see also loose) loose implies a usually blameworthy lack of necessary strictness, sharpness, or precision; the term applies chiefly to persons who do not satisfy the rigorous demands made upon them by their work or duties or to work or an activity performed or carried on within the close attention, constant care, or strict adherence to law or custom that is necessary (a lax parent) (a lax discipline) (lax morals) (lax execution^) (scandalously lax in restraining drunkards from annoying the sober—Trevylyan) (we do not intend to leave things so lax that loopholes will be left for cheaters—Roosevelt) slack (see also loose) stresses the want of proper or necessary diligence and expedition as well as of care; the term usually also implies indolence or sluggishness or indifference (a slack worker) (we keep our wits slack—H. G. Wells) When applied to what is accomplished by a slack worker, the term usually suggests neglect of important details necessary to the completeness, finish, or perfection of the work (a three-quarters figure of admirable design, though of rather lax execution—Stobart) (a fine nose for what was slack in the play or insufficiently developed—Mailer) Remiss implies culpable carelessness that shows itself in slackness and forgetfulness or in negligence; it is applied chiefly to something lax in performance or maintenance, but may be applied to a person who is unduly careless or lax in the performance of his duties (remit housekeeping) (a remiss police officer) (it certainly had been very remiss of him, as Mayor ... to call no meeting ere this—Hardy) (so remiss did they become in their attentions that we could no longer rely upon their bringing us the daily supply of food—Melville) Ana careless, heedless, thoughtless, inadvertent: indifferent, unconcerned, incurious; slipshod, slovenly Con rigid, strict, rigorous: thoughtful, considerate, attentive

negotiate 1 parley, treat, confer, commune, consult, advise

2 Negotiate, arrange, concert are comparable when they mean to bring about or accomplish by mutual agreement especially after discussion or parley. Negotiate and arrange both imply prior exchange of views and wishes and, sometimes, settlement by bargaining or compromise. Negotiate, however, is somewhat more formal and is especially appropriate when the dealings are carried on by diplomatic, business, or legal agencies, while arrange (see also order) may retain some notion of its basic idea of putting in order and is especially applicable to dealings tending to the establishment or restoration of order or to those carried on by private persons or their representatives (negotiate a treaty) (arrange a marriage) (negotiate a monetary understanding with the British government—Current Digest) (arrange the settlement of a case out of court) (a peace with the native chiefs was arranged and the crisis passed—McPherson) Concert implies a planning together and especially a settling upon a joint course of action through conference and negotiation (a conference of Commonwealth finance ministers ... to discuss the balance-of-payments crisis in the sterling area and to concert action to deal with it—Americana Annual) (within another generation there will be another world war if the nations of the world do not concert the method by which to prevent it—Woodrow Wilson)

neighborhood *locality, district, vicinity

neighborly friendly, amicable

Ana peaceful, peaceable, pacific: social, hospitable, gregarious, cooperative: cordial, sociable, gracious

Ant unneighborly: ill-disposed—Con antagonistic, adverse

neophyte *novice, novitiate, probationer, postulant, apprentice

neoplasm *tumor, malignancy, cancer

nepenthe *narcotic, opiate, narcotic, abortifacient

neptic *aquatic, marine, oceanic, thalassic, pelagic, abyssal, lacustrine, fluvial, fluvialite

nerve *effrontery, temerity, audacity, hardihood, cheek, gall

Ana boldness, intrepidity (see corresponding adjectives at brave): fortitude, grit, pluck, sand, guts: foolhardiness, recklessness (see corresponding adjectives at aportentous)

nerve vb encourage, inspire, hearten, embolden, cheer, steel

Ana strengthen, invigorate, fortify, energize: rally, stir, rouse, arouse: renew, restore, refresh

Ant unnerve—Con enervate, unman, emasculate (see unnerve): discourage, dishearten, dispirit, deject

nervous 1 vigorous, lusty, energetic, strenuous

Ana forceful, forcible, potent, powerful: spirited, mettlesome: virile, manly (see male) 2 impatient, restless, restive, unquiet, uneasy, fidgety, jumpy, jittery

Ana excited or excitabile, stimulated, provoked or provocative (see corresponding verbs at provoke): inconstant, unstable, mercurial

Ant steady—Con constant, even, equable, uniform (see steady)

nettle provoke, exasperate, irritate, aggravate, rile, peev

Ana annoy, irk, bother, vex: disturb, perturb, agitate, upset, *discompose: fret, chafe, gall (see abrade)

network *system, scheme, complex, organism, economy

neurologist, psychiatrist, alienist, psychopathologist, psychotherapist, psychoanalyst are comparable though not synonymous terms that denote a specialist in mental disorders. A neurologist is a physician skilled in the diagnosis and treatment of diseases of the nervous system, that is, of diseases (as epilepsy or locomotor ataxia) that involve structural or functional disorder of nervous tissue. Psychiatrist, alienist, psychopathologist all designate a physician who devotes himself to the diagnosis and treatment of diseases affecting the mind or emotions and especially, as distinguished from neurologist, of disorders (as neurasthenia, hysteria, and paranoia) not demonstrably of physical origin. Psychiatrist is the general term, applicable to any such physician, while alienist is the preferred term in medical jurisprudence and may especially suggest skill in detection of mental derangements or of insanity, and psychopathologist may specifically apply to a physician specializing in emotional disorders and dealing largely with the dynamic factors (as defects of personality or unfavorable environment) underlying such disorders. A psychotherapist may be either a physician or a layman (as...
a psychologist, social worker, or clergyman) who treats mental or emotional disorder or maladjustment by psychological means and especially those involving verbal communication. A psychoanalyst is a psychotherapist and usually a physician (nonmedical psychoanalysts being often distinguished as lay analysts) who employs a form of psychotherapy, especially in the treatment of psychoneuroses, that is designed to bring unconscious and preconscious material into consciousness and involves largely the analysis of resistance and the establishment and analysis of a transference neurosis.

neutral adj Neutral, negative, indifferent are comparable when they mean lacking decisiveness or distinctiveness in character, quality, action, or effect. Neutral, in one of its earliest and still common senses, applies to states, governments, parties, or persons who refuse to take sides with either of two or any of several contesting parties. The term need not imply an attitude of impartiality, but it usually implies either indecision or a refraining from positive action (his family connections kept him neutral, and the household was never drawn into the war—Buchan) or to states, governments, or parties (neutral with the English—Ghent) or to an alliance with the English—Ghent. Neutral implies an annulling, a contradicting, a making futile, useless, or ineffective, or a vitiating by an opposing force, effect, or result (as if the wind might blow it over, thus negating the idea of solidity—Bennett). It is only in literature that the paradoxical and even mutually negating anecdotes in the history of a human heart can be juxtaposed and annealed by art into verisimilitude and credibility—Faulkner.

Ana offset, countervail, counterbalance, counterpoise (see COMPENSATE): defeat, overcome, subdue, conquer

new adj New, novel, new-fashioned, newfangled, modern, modernistic, original, fresh can all mean having very recently come into existence or use or into a connection, a position, or a state (as of being recognized). A thing is new that has never before the time of its advent been known, thought of, manufactured, or experienced, or that is just ready for use, sale, or circulation, or that has just been acquired (new books) (new ideas) (a new washing machine) (no man putteth new wine into old bottles—Mk 2:22) (a new way of dressing her hair) A person is new if he has just been taken into a military, business, social, or other group (a new soldier) (a new stenographer) (three new members) or if he has received his first experience (he was . . . frightened, being new to the sight—Dickens) or if he has been renewed in spirit or in mind or in body (the quiet hills which I am now seeing again, with a new and contented eye—O'Connor) (the hot food made a new man of him) A thing is novel which is not only new but so out of the ordinary course as to strike one as strange, unusual, or unfamiliar (novel forms of government, like those of Russia and Italy—Frankfurter) (novel schemes of salvation—L. P. Smith) (sermons . . . bold in thought and novel in language—Wharton) A thing is new-fashioned which is so different in form, shape, style, or character from what was previously known that it challenges curiosity or has only recently met general acceptance (new-fashioned modes of painting) (new-fashioned hats for women are regarded as absurd by many men) (the type of old-fashioned scholarship) (the type of new-fashioned criticism—S. E. Hymans) A thing is new-fashioned which strikes one as unnecessarily or as ingeniously novel; often, however, the term differs little from new except in suggesting disparagement (newfangled toys) (newfangled theories of art) (a newfangled nomenclature—Hamilton) quite a modern hostelry for its time. It had such newfangled doodads as mechanical dishwashers and potato peelers

American—A. E. Stevenson
Con biased, disposed, predisposed (see INCLINE vb); positive, *affirmative; *decided, decisive

neutralize, counteract, negative are comparable when they mean to make something inoperative or ineffective usually by means of an opposite force, influence, or effect. Neutralize implies an equalizing, making ineffectual or inoperative, or nullifying by an opposing force, power, agency, or effect (a quinine that can neutralize his venom; it is called courage—Davis) (neutralize the effects of propaganda with counterpropaganda so as to render the international environment favorable—Latham) (our esteem for facts has not neutralized in us all religiousness—James) Counteract may imply merely neutralizing or counterbalancing; it is often used in situations in which the good and bad or the beneficial and deleterious are opposed (these two principles have often sufficed, even when counteracted by great public calamities and by bad institutions, to carry civilization rapidly forward—Macaulay) (frequently visited the Choctaws, in an effort to counteract the influence of the French and to win them to an alliance with the English—Ghent) Negative implies an annulling, a contradicting, a making futile, useless, or ineffective, or a vitiating by an opposing force, effect, or result (as if the wind might blow it over, thus negating the idea of solidity—Bennett) (it is only in literature that the paradoxical and even mutually negating anecdotes in the history of a human heart can be juxtaposed and annealed by art into verisimilitude and credibility—Faulkner).
newfangled  

A person or thing is modern that belongs to the present time or is especially characteristic of it; the term often implies up-to-dateness and novelty or a contrast with what has been long accepted and still is the choice of the conservative: in this special sense modernistic may be preferred to modern, but more often modernistic carries a contumacious suggestion of the ephemeral novel. When I refer to modern music, I do not mean necessarily modernistic music, much of which is a pale afterglow of the great and original modernism of yesteryear—Virgil Thomson

Modern, however, is always preferred to modernistic when contemporaneity only is implied (in modern art atmosphere counts for so much—Wilde) this strange disease of modern life, with its sick hurry, its divided aims, its heads o’ertaxed, its palsied hearts—Arnold

But modern is also applicable to things of more remote origin than any of the other terms; as supposedly ancient and medieval it usually implies reference to the centuries beginning with the full Renaissance up to the present (modern languages) (modern civilizations)

Often, however, the dividing line between what is modern and what is too far distant in time to be called modern has to be supplied by the context (the Victorian era gave way to the modern age of machinery) (most modern well-to-do Englishmen and Americans, if they were transported by magic into the age of Elizabeth, would wish themselves back in the modern world—Russell)

A person or thing is original that is or produces something new or novel and, at the same time, the first of its kind (that he would be successful in an original way, or that he would go to the dogs in an original way, seemed equally probable—Hardy) (they contain no new ideas . . . [he] was anything but an original thinker—R. A. Hall) (some areas were occupied by savages, in others there were brilliant and original civilizations—Poole)

A thing is fresh that is or seems so new that it has not had time to lose the signs of newness, such as liveliness, energy, brightness, or virginal quality (fresh footsteps) (receive a fresh impetus) (make a fresh start) (this was a new voice falling upon the attentive ears of youth—a fresh challenge to its native and impetuous generosity—Repple) (a great shouting at the coal works because a fresh vein of coal had been discovered—Woolf)

Ant

old

newfangled  *new, novel, new-fashioned, modernistic, modern, original, fresh

cornerstones (see also CARTOON) implies the desirability or the practical value of the information rather than its freshness (their visits to Mrs. Philips were now productive of the most interesting intelligence—Austen) In specific military use intelligence suggests clandestine methods of gathering information (as by secret agents). It is therefore applied not only to the information gathered but to the branch of the service commissioned to gather it (an enemy superior in numbers, who possessed also the advantage in armament, position, and more accurate intelligence—Buchan)

In comparison with intelligence, which often suggests the gathering of important information, advice stresses the transmission of information and implies the immediacy of its value. It, or its plural advices, is often applied to the means (as letters, telegrams, or messengers) by which this information is communicated (no doubt he had advices that Casale was sufficiently provisioned to last for many months, perhaps a year—Bulloch) (beginning their advice with the revelation that a rich potential for future prosperity and happiness had been discovered in atomic energy—Burlingame)

newspaper  *journal, periodical, magazine, review, organ

next *nearest

nib *bill, beak, neb

nice 1 Nice, dainty, fastidious, finicky, finicking, finical,

particularly, fussy, squeamish, persnickety, persnickety can all mean exacting or displaying exacting standards (as in selection, judgment, or workmanship). Nice (see also CORRECT, DECOROUS) implies fineness of discrimination and power to distinguish the very good from the merely good; the term may connote more of intellectual quality than the other words can

appetite for knowledge (therefore to be nice—Johnson) (he had a nice taste in literature and had edited Crashaw with conspicuous taste and much perception—Mackenzie)

Nice is also applicable to questions or problems which require such powers of discrimination and subtlety or delicacy in handling if the solution is to be found (a nice experiment) (the situation raises a nice question) (it is a nice point in ethics whether it is dishonest to rob one's own money-box—Lynd)

Dainty (see also CHOICE) usually implies a tendency to select carefully what does, or to reject with more or less disdain what does not, satisfy one's extremely delicate taste or sensibility; it usually connotes chairiness or a tendency to pick and choose, especially in eating (I have been silent—the hunger cannot be dainty—but it is useless to tell a pampered man this—M. W. Shelley) (no shape but his can please your dainty eye—Shak) (it's all right to be dainty about money when you've lots of it as you have—Behrman)

Fastidious implies a strong aversion to something that does not satisfy one's sense of what is right, proper, or in good taste; it may suggest the possession of ethical, artistic, social, or other standards that are so high that they impose a strain upon those who would meet them (it is . . . an advantage for an author to have two or three fastidious readers whom he can imagine sniffing at his pages—L. P. Smith) (he isn't always easy to work for, being fastidious in his standards and uncompromising in his demands—Wechaberg) or that cause suffering to the possessor when they are not satisfied (the disorder was almost more than his fastidious taste could bear—Cather) or that foster extreme care in selection from what is offered or available (why such a desperate orgy of literature? I thought you were of a more fastidious habit—not like Stanley, who insists on reading everything—Rose Macaulay) (he liked people, was . . . not too fastidious to get along with barkeeps and party toughs and sufficiently cultivated to get along with gentlemen—Commager)

Finicky and finicking as well as the less common finical imply an affected or overnice fastidiousness (his reserve,
his delicacy, his distaste for many of the persons and things surrounding him... have produced an impression of Gray as being a man falsely fastidious, finical, effeminate—Arnold> (his voice is too soft, his manners too precise. He is genial, yet he is finicky—Mailer> (finicking fishermen demand almost as many rods as there are varieties of fish—Monsanto Mag.) Particular implies an insistence that all details or circumstances must be exactly as one wishes them or that one's special or peculiar standards must be met. In contrast with fastidious, particular need not imply what others would call a high standard; the term usually suggests standards which the individual regards as high or exacting (she is particular about the way steak should be broiled) (every year it used to get a nice coat of paint—Papa was very particular about the paint—Hellman> (when it came to sharing his walks, Henry was rather particular.) Alcott served for a stroll, but the real art of walking was beyond him—Brooks) (as she approached, George Adams, who had a particular mother, rose, and Niel followed his example—Cather> Fussy is applicable not only to fastidious or particular persons and acts that manifest a disposition to be querulous or fidgety (she was not one of the trivially fussy domesticated women—Ellis> (men who are finicky and a bundle of nerves. Fussy about their food, too—Christie) (in this matter Augustus moved slowly and tactfully. He was no lawyer, and he had not the fussy interest of Claudius in the work of the courts—Buchan> (indenting each paragraph half the width of a page, in a finicky, old-maidish sort of way—Robert Lewis> but also to things that are especially difficult or complicated (he looked like a natural for the finicky bookkeeping routine of an orderly room—Binney> (a finny piece of work.) Squeamish implies a tendency to be easily nauseated by the sight, taste, smell, or hearing of something disagreeable (the starved stomach is not squeamish—Hudson) In its extended use it implies squeamishness or prudishness or scrupulousness (as to the nuditides... they might well have startled a not very squeamish eye—Hawthorne> (our nerves... are unduly delicate, and our tastes too squeamish—Stephen) (she came of vigorous stock, prone to consult its own will and speak its opinions with no squeamish concern for a neighbor's views—Parrington) (since the daughter may fascinate the duke, and he would feel squeamish about incest, the relationship must be kept secret—Times Lit. Sup.) Persnickety and persnickety convey the user's reaction of annoyance, exasperation, or disgust toward persons who are unduly finicky or finical, or tasks or problems that are so delicate or complicated as to impose severe strain on one's patience and good temper (approached native food and drink pretty much like a persnickety peacetime tourist—Pyle> (the grammarian, the purist, the persnickety stickler for trifles—Matthews> (new mechanical devices... may be all right for those persnickety fellows, the exact scientists or the social scientists, but the humanities get along well enough without them—H. M. Jones> 

**Ana** *careless, heedless, inadvertent* 3 proper, seemly, *decorous, decent* Ana fitting, *fit, appropriate, suitable, meet** niggardly parsimonious, penurious, miserly, *stingy, close, closefisted, tight, tightfisted, cheesepearing, penny-pinching* Ana *covetous, avaricious, grasping, greedy: *sparing, economical, frugal, thrifty: *mean, ignoble* Ant bountiful —Con *liberal, generous, bounteous, openhanded, munificent, handsome: *profuse, lavish, prodigal*  

**nightly adj & adv** *close, near, nearby* Ant far **nightly adj** *nightily, nocturnal*  

**nightly, nocturnal, night** all mean of, relating to, or associated with the night. Nightly, opposed to daily, may mean no more than this (all is quiet, no alarms; nothing fear of nightly harms—Housman> (the increase in body size may have been an important factor in releasing the early primates from their nightly or twilight feeding habits, by allowing them better to hold their own against aggressors—LaBarre> But nightly is the one of these terms that usually carries a strong implication of recurrence and is especially appropriate to convey the idea of happening night after night (there is only one novel this writer can recall which delves beneath the surface of the daily and nightly life and death of a great and influential newspaper—Harrison Smith> Nocturnal, opposed to diurnal, is often interchangeable with nightly, especially in its more general sense (the squares of light along the fifteen story story testified until midnight of their nocturnal industry—Auchincloss> (the changing beauty of nocturnal landscapes—Bennett> but distinctively it may mean active at night (shopping, working, theatergoing, and arguing hours in Barcelona never cease to amaze visitors from less nocturnal countries. Some shops stay open until well after midnight, and then are closed until the next noon—Wechsberg> (the eyes of most fish are adapted to the conditions of dim illumination associated with nocturnal feeding—Dowdeswell> Night in much of its use is interchangeable with nocturnal and may be preferred to the latter when a less formal term is required (night noises) (the night train) (a night ape) Distinctively, the term is used to describe persons who work at night (a night nurse) (ask the night clerk) and things that occur or are intended for use at night (night baseball) (a bank with a night depository) **Ant daily**

nonsense, twaddle, drivel, bunk, balderdash, poppycock, gobbledegook, trash, rot, bull are comparable when they mean something said or proposed which is senseless or absurd. Nonsense is the most general of these terms; it may be referred to action or behavior as well as to utterances or to proposals, and it may imply foolery or humbuggery as well as absurdity or senselessness (no throaty oratorical nonsense was there—White) she told them she would stand no more of their nonsense (then let Esther give up this nonsense of hers!—Deland) Twaddle applies to silly empty utterance and suggests the speech of persons who know nothing about a subject yet talk or write about it foolishly, verbosely, or artlessly (weary of the twaddle of theorists) (that reasoning was unadulterated twaddle—Roosevelt) Drivel implies a flow of such idle, inane, or commonplace talk as might befit an imbecile or an idiot; it is a highly contemptuous term for nonsensical spoken or written utterances (phrases which on the face of them may be patently idiotic to a degree approaching drivel—Montague) (writes endless narcissistic drivel in a stream-of-consciousness and disorganized manner—Deutsch) Bunk is an equivalent of nonsense and applies especially to an utterance (as a speech, an opinion, or a doctrine) which, though lacking in real worth or substance, either by intent or by the gullibility of those who listen or accept, hits the popular fancy because it is pretentious, plausible, or high-sounding (they denounced the scheme as bunk) Balderdash and poppycock may apply to confused, trite, complex utterances that lack or seem to lack sense (a vexing combination of high-flown balderdash . . . and threadbare clichés—Gibbs) (the Dissertations are a fascinating farrago of the soundest linguistic common sense and the most egregious poppycock—Pyles) but both words may imply an attempt to mislead or deceive by such utterances (repeats more than once the old and obvious balderdash that the court . . . eschews the deciding of "political questions"—Rodel) (psychology is the youngest of the sciences, and hence chiefly guesswork, empiricism, hocus-pocus, poppycock—Mencken) and both may suggest an unwillingness to see sense on the part of the one that uses them (Uncle William, who thinks your views are all poppycock—Glasgow) (nothing looks stronger or less in need of scrutiny than a commonplace, up to the moment when, having outlived its usefulness, it begins to be called poppycock—Gill) Gobbledygook is used of wordy unintelligible jargon especially when featuring the obscure or technical verbiage of some special field (the current law is a masterpiece of complexity and gobbledygook, and few will contend that the law is successful at all in distinguishing excess profits from ordinary profits—Magill) (the all-too-common passion for pseudo-scientific gobbledygook—one of the ill-begotten offspring of excessive specialization—Odegard) Trash, rot, and bull are applicable to utterances regarded as worthless or confusingly inaccurate or misleading. Trash may stress the empty worthlessness especially of written material (this book is utter trash . . . pure quackery and without scientific standing—Zirkle) and rot, the user's disbelief or disgust (you are just the sort of woman to believe in that kind of rot—Braddon) Bull in its more general use may apply to a grotesque or ludicrous blunder in language (in their most telling appearance they are, to make a bull of it, invisible—Liebling) but often it is a slang term denoting trivial, verbose, and commonly boastful or inaccurate utterance (have no fear of "essay exams," even if they seem to be called essays—an opinion, or a doctrine) which, though lacking in real worth or substance, either by intent or by the gullibility of those who listen or accept, hits the popular fancy because it is pretentious, plausible, or high-sounding (they denounced the scheme as bunk)
notice, remark, observation, comment, commentary, obiter dictum

Anna annotation, gloss (see under annotate): remembering, reminding or reminding, recalling (see corresponding verbs at remember)

notice noteworthy, notable, memorable mean having some quality that attracts one's attention. Noteworthy implies a quality and often a degree of excellence in a person or thing that justifies observation or remark (enough to make a philosopher noteworthy... not enough to make him great—Arnold) (the appearance of a book which formulates a distinct philosophy of life is a rare and noteworthy event—Cohen) Notable too stresses the power of a person or thing to attract attention, but often it distinctively connotes such a special feature as an excellence, a virtue, a value, or a significance that gives rise to its being noted or remembered (the clock kept time with notable accuracy and pertinacity—New Yorker) (it is a symbol of the abnormality of our days that it should be notable when anyone dares stand up and criticize what is happening in America—Bliven b. 1889) Elizabethan and Jacobean poetry... had this and that notable quality, but, when we wish to admit that it had defects, it is rhetorical—T. S. Eliot

Remarkable stresses the power of a person or thing not only of attracting attention but of being worthy to be remembered; it sometimes implies a personal reason for remembrance (a girl with long black hair and a memorable figure—Gibbs) (for the Irresistible Lyovochka this first venture into the great world beyond the towered gates was a memorable event—Simmons) (this extravagant temperament endeared him and his work to the public, and it let him write and draw with memorable vividness—Devoe) (this very occasional compliments, steeped in vinegar though they always were, seem more memorable than those of others—Osbert Sitwell)

Notice *noticeable, remarkable, prominent, conspicuous: patent, manifest, *evident

Notice vb remark, observe, note, perceive, discern, *see, behold, deseryl, esp, view, survey, contemplate

Anna recognize, *acknowledge: *refer, advert, allude

Con ignore, slight, overlook, disregard, *neglect

Noticeable, remarkable, prominent, outstanding, conspicuous, salient, signal, striking, arresting can all mean attracting or compelling notice or attention. Noticeable implies that the thing so described is unlikely to escape observation (a noticeable aversion to his company) (so slight a movement it was barely noticeable—a tiny pushing forward of the hand—Dahl) Remarkable adds to noticeable the further implication of inviting comment or of demanding a call to others' attention; it commonly imputes to the thing so described an extraordinary or exceptional character (he has a remarkable gift for making friends) (far too much has been written and said about ghosts and ghouls... and they're remarkable enough, but have you ever realized that things that are remarkable are by definition rare?—Theodore Sturgeon) Prominent seldom loses its basic implication of protuberance or projection above a level or beyond a surface; it is applied appropriately to things that noticeably protrude from their background (a prominent nose) (fleecle gleams... served to render sufficiently distinct the more prominent objects around—Poe) In extended use it is applied to persons or things that stand out so clearly from their surroundings that they are often in evidence, are generally known or recognized, or are frequently pointed out; in such use it typically attributes superiority or importance to what it describes (the church occupies a prominent position in the community) (the second prominent fault in our reading and thinking is that we have not learned to fix our attention discriminatingly—Mott) (with regard to ill fortune... fate is given the most prominent part—Linton) Outstanding, although it implies prominence, is applicable only to what rises above or beyond others of the same kind and is remarkable by comparison with them (stories of outstanding legislators who had to resign simply because they couldn't afford to serve any longer—Armbrister)

Conspicuous is applicable chiefly to what is so obvious or patent that the eye or the mind cannot miss it (conspicuous merit) (conspicuous bravery) (there was also some Yankee shrewdness here, for to be conspicuous—to be a hero—might entail some untoward financial responsibilities—Cheever) It is also used to describe what strikes the eye or the mind, often unpleasantly, through its singularity (wear conspicuous clothes) (made himself conspicuous by his affectations) (his distinction are conspicuous by their absence) (against spending money for cement sidewalks, which he considered conspicuous waste—E. W. Smith) Salient stresses emphatic quality and is applied to what demands the attention or impresses itself insistently upon the mind; it imputes significance more often than obtrusiveness to the thing so described (there are days rich in salient news and days far rich from it—Montague) (pick the salient details out of dull verbiage—Marquand) Signal suggests such distinction from what is ordinary or usual that the so described is in itself remarkable or memorable (a signal mark of esteem) (such an appointment is a signal distinction though its value is mainly honorific—Manoukian) Emily Dickinson is a signal illustration of this assertion. The imagination of this spinner... was constantly aware that the universe surrounded every detail of life—Thornton Wilder

Striking is applicable to what impresses itself powerfully and deeply upon the observer's mind or vision (one easily remembers the striking scenes in a play) (give a striking example of loyalty) (a woman of striking beauty) (one of the most striking and fearful figures in our early fiction—Parrington) Arresting adds to striking the suggestion of capturing attention or of being of more than passing interest (an arresting personality) (an arresting story) (the slight, steel-colored figure with steel-colored hair, was more arresting in its immobility than all the vociferations and gestures of the mob—Galsworthy)

Anna *evident, manifest, obvious, palpable, patent notify apprise, advise, acquaint, *inform

Anna announce, *declare, proclaim, publish, promulgate, broadcast: *reveal, disclose, discover, divulge, tell

Notion *idea, concept, conception, thought, impression

Anna *opinion, view, belief, conviction, persuasion, sentiment

Notoriety reputation, repute, éclat, *fame, celebrity, renown, honor, glory

Anna *publicity, ballyhoo, promotion, propaganda

Notwithstanding, in spite of, despite are often interchangeable prepositions. Notwithstanding, the least emphatic, merely implies the presence of an obstacle; in spite of, the most emphatic, suggests active opposition or strongly adverse considerations to be encountered; despite is somewhat lighter in its emphasis than in spite of and otherwise is closer to notwithstanding than to in spite of notwithstanding the rain, I shall go (I shall go in spite of all your efforts to prevent me) (despite his assurances, I doubted him)

Nourish *feed, pasture, graze

Anna *nurse, nurture, foster, cultivate

Nourishment *nutrient, sustenance, *food, aliment, pubu-
noxious, baneful, *pernicious, deleterious, detrimental

novice, novitiate, apprentice, probationer, postulant, neophyte are comparable when applied to one who is a beginner, especially in a trade, a profession, a career, or a sphere of life. Novice and the less common novitiate may be applied to anyone who comes under this description, since inexperience is their chief distinguishing implication. A novice in writing, a novice in mountain climbing had better not start with Mount Everest—Guérard (accounts the novice with the manuscripts about which the experts talk—Monaghan). (show the Communist novitiate as a human being with idealistic impulses—Daniel Bell) Novitates to the druidic priesthood required twenty years' training in the mysteries—C. W. Ferguson. Novice is specifically applied to a new member of a religious order who is undergoing training before taking first and usually not the final vows. Apprentice is applicable to a beginner who is serving under another as his master or teacher. A graduate assistant would begin as an apprentice to a full-time staff member—H. R. Bowen. The breathless, the frustrating adoration of a young apprentice in the atelier of some great master of the Renaissance—Brooks. In such applications it emphasizes subjection to supervision and discipline rather than inexperience. It often denotes a young person who is starting his working career as a beginner at a skilled trade under an arrangement involving both work and on-the-job tuition and often a planned schedule of supplementary study or applies to an enlisted man in the United States Navy (usually called in full apprentice seaman) who is receiving instruction in seamanship, gunnery, and the rudiments of a general education. Probationer designates a beginner who is on trial for a period of time and must prove his aptitude for the work or life. The young ones who are seeking recognition and establishment—the graduate students and the instructors—in general, the probationers in the field—R. M. Weaver. The brevity and vanity of this life, in which we are but probationers—Richardson. Postulant implies candidacy for admission (as into a religious order); it may also imply acceptance for a period of probation. The Essenes had books of their own which the postulant for admission to their sect had to swear to preserve—Jeffery. Words... often answering to calls too subtle for analysis, are constantly presenting themselves as postulants for recognition—Fitzedward Hall. Neophyte usually suggests initiation, and is applicable to one who is learning the ways, methods, or principles of something (as an art, a science, a society, a club, or a religious faith) with which he is newly connected. Such an encounter usually perplexes the neophyte at first—M. C. Cooke. It often carries connotations of innocence and youthful eagerness derived from its association with a newly baptized person or convert to Christianity, the old philosopher of Monticello was more than pleased with this ardent neophyte. Not since his own years abroad had Jefferson seen such an eager student—Brooks.

A colon (:) separates groups of words discriminated. An asterisk (*) indicates place of treatment of each group.
nurse

*Nurse, nurture, foster, cherish, cultivate are com-

nuptial

*nmarriage, matrimony, wedlock, wedding, espousal

*nthe numerals on the boys' sweaters indicate their

class by telling the year when they will graduate> Figure

applies to the character representing a numerical value,

and usually suggests use of Arabic notation. The term

is frequently employed in the plural implying the use of

these characters in expressing a number <write all your

numbers in figures> <the cost went into four figures>

<legally, when there is a discrepancy in a document be-

tween numbers written out and expressed in figures,

those written out are accepted> Digit may refer to any of

the whole numbers from one through nine or the numerals

that denote these, or it may expressively refer to any one of

the ten Arabic numerals (0, 1, 2, 3, 4, 5, 6, 7, 8, 9) by which

all numbers can be expressed <the nine digits in arithmetic

—Priestley> <the numbers in arithmetic are expressed by the

. . . ten digits—Charles Hutton> Integer is a mathe-

matical term for a number (whole number) that is not

or does not contain a fraction <11 2/3 is not an integer>

<express your answers in integers, omitting all fractional

parts

number vb *count, tell, enumerate

Ana *calculate, compute, estimate, reckon

numeral n *number, figure, digit, integer

numerous *many, several, sundry, various, divers, multi-

farious

Ana *large, great, big: abundant, *plentiful, plentiful

nuncio legate, internuncio, chargé d'affaires, *ambassador,

minister, envoy

nunnery *cloister, monastery, convent, abbey, priory

nuptial adj *matrimonial, conjugal, connubial, hymeneal,

marital

nuptial n *marriage, matrimony, wedlock, wedding, espousal

nurse vb Nurse, nurture, foster, cherish, cultivate are com-

parable especially when they mean to give the care neces-

sary to the growth, development, or continued welfare

or existence of someone or something. Nurse basically

implies close care of and attention to someone (as an

infant or a sick person) unable to care for himself with the

idea of helping that one to grow strong and self-sufficient

<he was slowly nursed back to health> In extended use

the term implies similar sedulous attentions that feed

or nourish and thereby strengthen what was at first weak,

indefinite, or tentative <when I would muse in boyhood

. . . and nurse resolves and fancies—Housman> (we sat

very quiet, not speaking at all, each nursing his own

fears and anxieties—Dahl> <they sulkily avoid his eye,

and nurse their wrath in silence—Shaw> Nurture

stresses the rearing and training, and so the determination

of the course the person, or by extension the thing, will

follow <by solemn vision, and bright silver dream, his

infancy was nurtured—Shelley> <reverence for age and

authority, even for law, has disappeared; and in the train

of these have gone the virtues they engendered and nur-

tured—Dickinson> Foster implies encouragement or

promotion of the growth or increase of something <age,

I find, fosters the finer feelings—L. P. Smith> <every-

thing . . . had fostered in the princess a like conviction—

Henry James> <the teaching that fosters these ends suc-

ceds; the teaching which neglects them fails—Suzzallo>

<governments have deliberately fostered nationalistic

davior to serve their own political purposes—Huxley>

Cherish stresses loving, protective care (as of a nurse or

a parent for a child, or of a husband for a wife) <to love and

to cherish, till death do us part—Anglican Marriage Ser-

vice: Book of Common Prayer> In its extended use it

is not always distinguishable from nurse, but it may retain

its implications of holding dear or as a thing of value, and

stress prizing and preserving rather than brooding over

or causing to increase in strength <tablecloths and napkins

. . . washed and ironed again and again, mended and cher-

ished—Shirley Jackson> <from the first, separately and

together, she and I had cherished ideals of freedom and

independence . . . and cast contempt on the narrow self-

absorption of domestic love—Ellis> <Julius was a bold

iconoclast about republican forms which had survived

their usefulness; Augustus sought to cherish whatever

of these forms could be made to work—Buchan> Cultivate

basically implies the care and attention given to land in

order to increase its fertility or to plants in order to

improve their condition. In its extended use it implies

comparable and equally sedulous attentions to the im-

provement or growth of some usually desirable thing

<his sense of personal initiative is cultivated instead of

being diminished—Russell> <we shall do well to foster

the studies most conducive to the habits we wish to culti-

vate—Grandgent> <bred to patience—a barmaid since

age thirteen—she had cultivated and perfected a vast

cowlike calm which served her now in good stead—

Pynchon> Ana *feed, nourish: promote, *advance, further, forward:

*indulge, pamper, humor

nurture vb foster, *nurse, cherish, cultivate

Ana raise, rear (see LIFT): train, educate, school, dis-

cipline (see TEACH): *support, uphold, back

**Notes:**
- Submission to the will, guidance, or control of another is implied, whether by compulsion or movement in accordance with natural law.
- *Obedient* implies due compliance with the commands or requests of a person or power whose authority one recognizes or accepts.
- *Obedient* to the law implies compulsion by a superior force or movement in accordance with natural law.
- Applied chiefly to persons; sometimes extended to things.

### Examples:

- *Obedient* child (Maugham): When applied to things, it implies compulsion by a superior force or movement in accordance with natural law.
- *Obedient* to the law: He seemed to have lost all power of will;
- *Obedient* to the stream: If he offers her any more, she would not be able to refuse, since all her instinct at this moment was *comply*.
- *Comply* with their wishes: He often uses this word in the sense of *bequeath*.
- *Comply* with the call of what was felt as "truth": Comply, often with, usually carries a stronger suggestion than obeying without yielding to a person's desires or expressed requests.

### Synonyms:

- Submissive, compliant, acquiescent, resigned (see corresponding nouns at HONOR)
- *Insubordinate*, rebellious
- *Compliance*, servility
- *Obedience*, servitude

### Antonyms:

- Noncompliance, rebellion
- *Nonconformity*, nonconformity
- *Nonobediency*, nonobediency

### Related Words:

- *Tractable*, which is nearly as often applied to things as to persons and animals; sometimes extended to things.

### Definitions:

- *Tractable*, which is nearly as often applied to things as to persons and animals, suggests success or ease in handling or managing.
- *Comply* with, yield, defer, bow, succumb: accede, acquiesce, subscribe, agree, assent

### Etymology:

- From the Latin *obduratus* meaning "hardened screenshot from book page: obdurately: in a stiff, unyielding manner, stubbornly, inflexibly.

### Usage:

- "The obstinate child refused to obey his father's command."
nude; artists do it all the time. But our silly husbands have a way of objecting to that sort of thing—Dahl

Protest (see also ASSERT 1) implies strong opposition and usually the presentation of objections in speech or in writing against the thing to which one objects (the residents of the district unanimously protested against the granting of the license) (swearing and protesting against every delay in the work—Anderson) (she marched with the pickets, protesting atmospheric testing—Kleiner)

Remonstrate implies protestation but it carries so much stronger an implication of an attempt to convince or persuade than protest carries that it is especially appropriate when the objection is to something being done by a child, a friend, or a relative, rather than by an official or an impersonal agent, or when reproof is also implied (now and then a well-meaning friend of Sir Austin’s ventured to remonstrate on the dangerous trial he was making in modelling any new plan of education for a youth—Meredith) (“Father Joseph,” he remonstrated, “you will never be able to take all these things back to Denver”—Cather)

Expostulate differs little from remonstrate, but it usually carries a heightened implication of firmness, earnest, but friendly reasoning or insistence on the merits of one’s arguments (the priestly brotherhood . . . prompt to persuade, expostulate, and warn—Cowper) (lost his temper when reporters at his press conference expostulated against playing favorites—New Republic)

Kick implies strenuous protestation and, usually, an exhibition of recalcitrancy or defiance (wherefore kick ye at my sacrifice and at mine offering—1 Sam 2:29) (when the tax rate was raised for the fourth successive year, everybody kicked) (“I kicked at that and said that Asquith might be limited but he was honest—Laski)

Ana *demur, balk, scruple, jib, boggle, shy, stick, stickle: *criticize, denounce, reprove
Ant acquiesce —Con *assent, consent, agree, accede

Objectify externalize, materialize, incarnate, embody, *realize, actualize, hypostatize, reify

Objective adj 1 *material, physical, corporeal, phenomenal, sensibl
Ana external, outside, *outer, outward: tangible, palpable, *perceptible
Ant subjective

2 impartial, unbiased, dispassionate, uncolored, *fair, just, equitable

Con applaud, *commend, compliment

Obligation 1 Obligation, duty are comparable when they denote what a person is bound to do or refrain from doing or for the performance or nonperformance of which he is held responsible. In ordinary usage obligation typically implies immediate constraint and a specific reference (he is under the obligation of supporting his aged mother) (the place in which folk assembled not only for worship but for the fulfillment of many other social obligations, civic, educational, and recreative—Raven) (it was plain that Greene was carrying out what he regarded as a fixed obligation—Basso) (the Ralstons fulfilled their obligations as rich and respected citizens—Wharton)

Duty, on the other hand, often suggests less compulsion from immediate circumstances but a greater impulse on moral or ethical grounds; thus, a person weighed down by a sense of duty is keenly aware of what in general he ought to do; one has a sense of obligation only in a particular case and for a particular reason (Stern Daughter of the Voice of God! O Duty! if that name thou love who art a light to guide, a rod to check the erring—Wordsworth) (the old statesman was now in a sad frame of mind, torn between duty and self-interest—Buchan) (Russell tries hard to find a place for duty in his system; he suggests that we “ought” to do the act that would through its consequences satisfy the widest range of human desires—Brand Blanshard)

Ana *compulsion, constraint, r-strain (see FORCE n): responsibility, accountability, answerability (see corresponding adjectives at RESPONSIBLE)

2 *debt, indebtedness, liability, debt, arrear

Ana burden, *load: promising or promise, engagement, pledging or pledge (see corresponding verbs at PROMISE)

Oblige 1 *constraint, coerce, compel, *force
Ana *tie, bind

2 Oblige, accommodate, favor mean to do a service or courtesy. To oblige a person is to make him indebted by doing something that is pleasing to him (Punch was always anxious to oblige everybody—Kipling) (most hotels . . . will oblige if on a particular occasion you wish your meal served at a special time—Roetter)

It is commonly used as a conventional acknowledgment of small courtesies or offices (there is an oversight . . . which I shall be much obliged to you to correct—Macaulay)

Accommodate, when it is used of services, is often interchangeable with oblige. Sometimes, especially in the participial adjective, it implies gracious compliance (an accommodating host) or it may connote the intent to be of assistance (I was willing to accommodate you by undertaking to sell the horse—George Eliot)

But accommodate often suggests a business transaction rather than an act of kindness, and an obligation to pay or repay. In such use it usually implies a loan of money or acceptance as a paying guest (see also CONTAIN) (the bank accommodated him with a short-term loan) (the hotel could not accommodate the crowd)

To favor, by contrast, is to render an attention or a service out of goodwill and commonly without imposing an obligation on, or expecting a return from, the person favored (luck favored him in all his enterprises) (it was possible for one favored by the accidents of patronage to pass surreptitiously outside the narrow confines set by the prevailing race conceptions—Handlin)

Sometimes there is a suggestion of gratuitousness or a patronizing character in the action (favor a friend with advice) (the stupidity with which he was favored by nature—Austen)

Ana gratify, *please: *benefit, profit, avail: *help, aid, assist: *support, uphold, back

Ant disoblige —Con *inconvenience, incommodate, discommodate, trouble

Obilging good-natured, compliant, *amiable

Ana helping or helpful, aiding, assisting (see corresponding verbs at HELP): accommodating, favoring (see OBLIGE): *compliant, acquiescent: *thoughtful, considerate

Ant disobliging: incon siderate

Oblique *crooked, devious
Ana *awry, askance, askew: *indirect, circuitous, roundabout

Con *direct, immediate: *straightforward, forthright: downright, *forthright

Obilitrate efface, cancel, expunge, *erase, blot out, delete
Ana *abolish, annihilate, extinguish: *destroy, raze: annul, abrogate, negate, invalidate, *nullify

Oblivious *forgetful, unmindful
Ana disregarding, ignoring, forgetting, neglecting, overlooking (see NEGLECT vb)

Con *aware, conscious, cognizant: *thoughtful, attentive,
obscure

and obscure to a reader who does not bring to it the special theatrical imagination—Montague

<Ps 78:2> 2 dark hints of revenge—<Ps 78:2> 2 ʻPoison!ʻ he whispered. But he pronounced it p ye-zn, making it into a soft, dark, dangerous word—Dahly

Something is vague which is lacking in distinct outlines or in clear definition, either because it is too general or because it is so imperfectly conceived or thought out that it is incapable of clear formulation

〈managed to gain from Judith a vague half-promise that she would be ready as suggested—Gibbons〉 〈we shall never gain power from vague discourse about unknown or unassimilated facts—Grandgent〉

Something is enigmatic which puzzles, mystifies, and, often, baffles one seeking its true meaning or significance (the enigmatic announcement was an appropriate addition to the tangled story of this country’s oddest piece of real estate—Thuelsen) 〈here Shaw’s stage direction . . . has the additional advantage of being so enigmatic that even the reader cannot understand it without aid from other Shaw sources—Nethercot〉

〈puzzling out the threats, the enigmatic promise of a story yet—Pater〉

Something is cryptic which is stated or expressed darkly or enigmatically: the word often implies a definite intention to perplex or to challenge 〈you had to intercede, with your cryptic innuendoes and mysterious head-waggings—S. S. Van Dine〉

〈gave cryptic indications of his doubts but prudently refrained from open statements of them—Davies〉

Something is ambiguous which admits of more than one interpretation, largely because of the use of words having a dual or multiple meaning without giving an indication of which sense is intended (the title of this chapter is ambiguous. It promises a discussion of the end of the world, but it does not say which end—Eddington) 〈we are here not far from the ambiguous doctrine that art is “expression,” for “expression” may be too easily confused with “communication”—Ellis〉

Something is equivocal which permits a wrong or false impression, thereby admitting uncertainty and confusion or fostering error. As applied to use of words, equivocal is distinguishable from ambiguous in that it may suggest intent to deceive or evade 〈nor could he find much pleasure in the subtle, ambiguous utterances of Solomon—Omni-book〉

〈veil the matter with utterances capable of more equivocal meaning—H. O. Taylor〉

In extended use equivocal is applied to something such as an act or a mode of life that admits of two possible or plausible interpretations, one of which may be harmful or discreditable (equivocal conduct) 〈an equivocal gesture〉

Ant distinct, obvious: celebrated (as a person) —Con *clear, perspicuous, lucid: *evident, manifest, obvious: express, *explicit, definite

obscure adj 1 murky, gloomy, *dark, dim, dusky

Ana shady, shadowy, unobtrusive (see corresponding nouns at SHADE)

Con *clear, lucid: *bright, brilliant, luminous

2 Obscure, dark, vague, enigmatic, cryptic, ambiguous, equivocal are applied to language or expression (or less often to causes, motives, or thoughts) with the meaning not sufficiently intelligible or clearly understood. Something is obscure the true meaning of which is hidden or veiled, because of some fault or defect either in the thing itself or in the person trying to understand it (that decorum and orderliness without which all written speech must be indigestible and obscure—Ellis) 〈this sordid, often obscure book, without visible motive or meaning—Purdy〉 〈the mere text of the play will often look scrappy and disjointed

A colon (:) separates groups of words discriminated. An asterisk (*) indicates place of treatment of each group.
obsequious

571

obstinate

austerity of line somewhat obscured by a comfortable porch—Amer. Guide Series: Vt. Dim and bedim stress the diminishing of light or of clarity, intensity, or luster or the consequent diminishing of capacity to see, distinguish, or comprehend <celestial tears bedimmed her large blue eyes—Byron> <the old patriotic glow began to dim its ineffectual fires—H. M. Jones> Darken, although like dim and bedim suggesting a diminishing of illumination, is much richer metaphorically in suggesting strongly the alteration of an object or the impairment of clear or normal vision or mental comprehension by reason of confusion, ignorance, or evil <the yearly migrations of passenger pigeons . . . literally darkening the sky—Amer. Guide Series: Mich.> <his intellect was indeed darkened by many superstitions and prejudices—Macaulay> <evils enough to darken all his goodness—Shak.> Eclipse may stand alone in suggesting the effect of an actual astronomical eclipse, the partial or total darkening or concealment of one object by another and, hence, the overshadowing or supplanting of one object by another <in the English field, Anglo-Saxon never eclipsed the study of Shakespeare or Milton—Guéroul> Cloud, becloud, fog, befog, and obfuscate all suggest the obstruction or impairment of vision by clouds, fog, or vapor or, in extended use, the making of the mental perception or object of that perception murky or confused. Cloud and becloud stress the obscuring of the object, or the murky view of the object, becloud being somewhat more literary than cloud <the beginnings of our physical universe are necessarily beclouded in the swirling mists of countless ages past—F. L. Whipple> <smoke clouding the prospect before us> <the actual issues clouded by prejudice and politics> <reasoning clouded by hysteria> Fog and befog are applied possibly more frequently than cloud and becloud to matters of the understanding or mental comprehension and usually suggest a greater obstruction or impairment of clear vision of eye and mind and, so, a greater and more unnecessary indistinctness, illogicality, or confusion; fog, however, occurs freely in both the basic sense and extended or metaphorical use while befog is uncommon in literal application <their breaths fogged the wind-shield—Hunter> <a time of . . . pressure for him and, if his memory fogged slightly, he was not alone—S. L. A. Marshall> <questions of . . . shaking hands or not befog many people—Miall> <the willfully created misunderstandings that so often befog the American political scene—Sandburg> Obfuscate, a somewhat pompous word, suggests strongly an avoidable, often willful, obscuring of an object or confusing of the mind by darkening or illogicality (the process, not of enlightening, but of obfuscating the mind—Thoreau)

Ana *hide, conceal, screen: *disguise, cloak, mask, camouflage: *misrepresent, belie, falsify

Ant illuminate, illumine

obsequious *subservient, servile, slavish, menial

Ana deferential, obeisant (see corresponding nouns at Ana Ant Ana) respect, esteem, regard (see under REGARD n): *revere, reverence, venerate

Ant violate —Con *neglect, ignore, overlook, disregard, slight

2 survey, view, contemplate, notice, remark, note, perceive, discern, *see, behold, descry, espys

Ana *scrutinize, examine, scan, inspect

observer *spectator, beholder, looker-on, onlooker, witness, eyewitness, bystander, kibitzer

obsolete *old, antiquated, archaic, antique, ancient, venerable, antediluvian

Ant current

obstacle, obstruction, impediment, bar, snag denote something which seriously hampers action or progress. Obstacle, which is used of both material and immaterial things, applies to an object, condition, or situation which stands in one's way and must be removed or surmounted if one is to progress or attain one's ends <love seats especially constructed for ardent couples who find such devices as armrests an obstacle to affectionate hips and hands—Green Peyton> <they smash themselves against the obstacles of circumstance—Cloete> <as to other social advancement, his record was an obstacle—S. H. Adams> Obstruction may be used of immaterial things, but such use is often obviously figurative, for the word suggests a blocking of a way or passage <an intestinal obstruction> <any phrase repeated too often becomes an obstruction to the flow of thought and feeling. It forms a clot—Brothers> <a very much denser obstruction is in the process of being erected now by literary critics—Day Lewis> Impediment is applied to something material or immaterial which serves to hinder or delay action or progress until one is freed from it <the refugee's limited knowledge of English was for a long time an impediment to his progress in his profession> <I have made my way through more impediments than twenty times your stop—Shak.> <legal restriction is a less effective impediment than the general sentiment that respectable people do not discuss birth control—Petersen> Bar applies to something interposed, whether by nature or by man, which serves to prevent admission or escape as effectually as the bars of a cage or prison <long sentences are a bar to easy reading—Mott> Sometimes the word carries a strong suggestion of prohibition, especially when it applies to a law or condition that restrains <under the immigration laws, a criminal record, an infectious disease, and illiteracy are bars to admission to the United States> <he found his infirmity no bar to his success in his profession> <must I new bars to my own joy create?—Dryden> Snag, from its application to a stump of a tree with jagged points which lies hidden under water and proves a hazard to boats, is extended to an obstacle or impediment which is hidden from view and which one encounters suddenly and unexpectedly <might run into a snag on the question of whether federal aid should be extended—W. H. Lawrence> Sometimes snag suggests a mere temporary impediment <after an early snag . . . he was able to proceed with his work—The Irish Digest> Ana barrier, *bar: hindering or hindrance, blocking or block (see corresponding verbs at hinder)

obstinate, dogged, stubborn, pertinacious, mulish, stiff-necked, pigheaded, bullheaded are comparable when they mean fixed or unyielding by temperament or nature. Obstinate implies persistent adherence, especially against persuasion or attack, to an opinion, purpose, or course; when applied to persons or to their ideas or behavior the term often suggests unreasonableess or perversity rather than steadfastness (they will not be resolute and firm, but perverse and obstinate—Burke) <so yielding doubtful points that he can be firm without seeming obstinate in essential ones—J. R. Lowell> she was—is—a damned obstinate old girl, and the more he swore it was Elsie, the more she swore it was Deacon—Sayers>
A colon (:) separates groups of words discriminated. An asterisk (*) indicates place of treatment of each group.
life of named or recognizable living persons—Yeats
Event is frequently regarded as arising from an antecedent state of things and is usually applied to a more or less important or noteworthy occurrence <events of the year> <the sequence of events that followed the declaration of war> <the course of human events—U.S. Declaration of Independence> <events acting upon us in an unexpected, abrupt, and violent way—Dewey> <<the flat, monotonous plains stretch away ... a single tree ... becomes an event—Moorehead> An incident (compare incidental under ACCIDENTAL) is commonly an occurrence of subordinate character or secondary importance, either a mere casual happening having little relation to major events or an occurrence that merely follows because of them <her tone implied that bedroom fires were a quite ordinary incident of daily life in a place like Bursley—Bennett> <very few individuals can be considered as more than occasional incidents in the life histories of the societies to which they belong—Linton> The term may, however, be used of a single event that stands out or is marked off clearly from the other events (as in a story, a play, or a history) in its nature or significance <the book narrates a series of thrilling incidents> <he was delighted and looked upon the incident as an adventure—Anderson> <and beat him she did—in just over 72 days—with only one dangerous incident. A "titled cad" tried to flirt with her—Sat. Review> or applied to a critical event that provokes a break in diplomatic relations between countries or suggests the possibility of war <border incidents> Episode (see also DREGRESSION) is often used in place of incident in the sense of a single or outstanding event, but the term usually carries a stronger implication of distinctiveness or apartness from the main course than does incident <a pretty little domestic episode occurred this morning—Meredith> <Clare would inevitably ... come to regret her passion for Oliver Hobart and its tragic sequel—Mailer> Circumstance is used as a synonym for incident only when the latter is thought of as a specific or significant detail <before closing his door for the night, [he] stood reflecting on the circumstances of the preceding hours—Hardy> The word is also occasionally used as a synonym for event in its more general sense <a life every circumstance of which is regulated after an unchangeable pattern—Wilde>

**ana** appearance, emergence (see corresponding verbs at APPEAR): *juncture, pass, exigency, emergency, contingency: posture, situation, condition, *state

**oceanic** *aquatic, marine, thalassic, neritic, pelagic, abyssal, lacustrine, fluvial, fluvialite

**odd** queer, quaint, *strange, singular, unique, peculiar, eccentric, erratic, outlandish, curious

**odious** hateful, abhorrent, abominable, detestable

**odor** smell, scent, aroma

**odorous** fragrance, perfume, redolence, incense, bouquet

**fragrant, redolent, aromatic, balmy** mean emitting and diffusing scent. Odorous applies to whatever has a strong, distinctive smell, whether it is pleasant or not

**offend, outrage, affront, insult** mean to cause vexation or resentment or damage to self-respect. One offends by displeasing another, by hurting his feelings, or by violating his sense of what is proper or fitting <if the First Amendment means anything, it means that a man cannot be sent to prison merely for distributing publications which offend a judge's esthetic sensibilities—Potter Stewart> <langless perceptions which will please the conservative power and delight the liberal power, offend no one—Mailer> <knew that he had offended his father but guilt would have been too exact a word for the pain and uneasiness he felt—Cheever> One outrages by offending another past endurace, or by offending his pride or his sense of justice or honor <her power to make him do things which outraged all his upbringing—Backville-West> <lead to the beginning of the break-up, to the shrill cries of the ladies and the outraged unbelieving exclamations of the men—Dahl> <"Grief of two years' standing is only a bad habit." Alice started, outraged. Her mother's grief was sacred to her—Shaw> One affronts who, either with an intent to offend or with deliberate indifference to civility or courtesy, humiliates or dishonors a person and arouses his deep resentment <a moral, sensible, and well-bred man will not affront me, and no other can—Cowper> One insults who wantonly and insolently offends another so as to cause him humiliation or shame <you can annoy, you can insult, you cannot move me—Meredith> <he would insult them flagrantly; he would fling his hands in the air

**ana** analogous words **ant** antonyms **con** contrasted words See also explanatory notes facing page 1
and thunder at their ignorance—Auchinloss

* Anony, vex, irk, bother: exasperate, nettle, *irritate: pique, *provoke, excite: chafe, fret, gall (see ABRADE)

** offens* 1 offensive, aggression, *attack

* Ana assault, *attack, onslaught, onset

2 Offense, resentment, umbrage, pique, dudgeon, huff are comparable when they mean a person's emotional reaction to what he regards as a slight, an affront, an insult, or an indignity. Offense implies an often extreme state of displeasure or of wounded feelings (he is so sensitive that he takes offense at any unintentional or seeming slight) <this tiny breath of genuine criticism had given deep offense—Forster>

Resentment implies more indignation than offense, more prolonged dwelling upon what one regards as a personal injury or grievance, and, often, more ill will to the person who has offended <as long as I am free from all resentment . . . I would be able to face the life with much more calm—Wilde> have no right to trifle with their lives merely to gratify an old man's resentment of skepticism—Anthony Boucher>

Umbrage, used chiefly in the phrase "to take umbrage," differs from offense in carrying a clearer implication of being slighted or unfairly ignored; the term therefore generally suggests ruffled pride: resentful suspicion of others' motives, or jealousy of those favored <he took such umbrage at Eliot—who had been delayed at his bank—arriving a few minutes late on the platform, that I doubt he ever forgave him—Osbert Sitwell>

Very often umbrage is not clearly distinguishable from offense <the instance of a Southern defender who took umbrage at our saying that the leader of the Confederacy was wonderfully dumb—N. Y. Herald Tribune Book Rev.>

Pique applies to the reaction of one who has taken offense or umbrage, but it distinctively suggests a petty cause and a transient mood and often connotes wounded vanity <when the wanna heroine chooses to . . . flirt with Sir Harry or the Captain, the hero, in a pique, goes off and makes love to somebody else—Thackeray> <had not for . . . years allowed his young green jealousy to show itself in words or pique—Buck>

Dudgeon applies chiefly to a fit of angry resentment or indignation provoked by opposition to one's views or a refusal of one's request <left the recent meeting in high dudgeon when compulsory purchase powers were eventually granted—Ian MacLennan>

*Sometimes the employer . . . will in a dudgeon refuse to sit in the same room with the union representatives—Bromley>

Huff, like dudgeon, applies to a fit of anger, but it comes closer to pique in suggesting pettiness of cause and transitoriness; distinctively it implies petulance and a sulky refusal to have more to do with those who have offended <at the first hint that we were tired of waiting and that we should like the show to begin, he was off in a huff—Henry James>

half of 'em will be disgusted, and go away in a huff—De Morgan>

Affron, insult, indignity: indignation, wrath, *anger

*Con *pleasure, delight, joy: gratifying or gratification, rejoicing (see corresponding verbs at PLEASE)

3 Offense, sin, vice, crime, scandal are comparable as general terms denoting a more or less serious or conspicuous infraction or transgression of law or custom. Offense is the term of widest application, being referable to a violation of any law, including the law of the state, the law of the church, natural law, moral law, or standards of propriety and taste set up (as by society or the arts). It is also applicable to any transgression regardless of its triviality or gravity or its voluntary or involuntary character, provided it injures or tends to injure the welfare or well-being or happiness of others <my offense is rank, it smells to heaven; it hath the primal eldest curse upon't, a broth-

er's murder—Shak.> <had been a strike leader, which, though not a crime, was certainly an offense in New England in 1920—Stong> <the greater the number of laws, the greater the number of offenses against them—Ellis>

Sin primarily applies to an offense against the moral law especially as laid down in the Ten Commandments and in laws derived from them. Theologically its essential character is disobedience of the divine will and willful opposition to the law of God; in somewhat wider use it implies a failure to live up to the moral ideals of one's time or environment or to the moral ideal one has set as the standard of one's own conduct <regarded stealing and lying as sins> <the sin of sacrilege> nonobservance of the Sabbath was the sin most abhorred by the settlers of that region <sin, remember, is a twofold enormity. It is a base consent to the promptings of our corrupt nature . . . and it is also a turning away from the counsel of our higher nature—Joyce> <it may not have been much of a culture, crude, bloodthirsty, harsh, and worst sin of all, different—Agnew>

Vice (see also FAULT 2), though frequently applied to any of the offenses that from the theological and religious points of view are called sins, often carries little direct suggestion of a violation of divine law: rather, it may uniformly imply that the person against whom it is suggested, has committed a moral depravity, corruption, or degradation; also, the term less often applies to single acts or single transgressions than to habits and practices that debase the character of a person or group of persons <spare then the person, and expose the vice—Pope> <treachery and cruelty, the most pernicious and most odious of all vices—Hume>

Papism smoking was, and still is, considered a gentleman's vice—Maurer & Vogel> 

*Our vices as well as our virtues have been imputed to bodily derangements till character has become identified with a chemical reaction—Cardozo>

Crime in its basic sense applies to an infraction of law, especially of common law or statute law, that is punishable by the state or by any power that constitutes itself as the guardian of such law: it is not a technical legal term, but it is often used in the courts and is sometimes defined in penal codes, usually as a general term applicable to any act or omission forbidden by law and punishable upon conviction. In such use the term comprehends many clearly distinguished types of offenses (as a misdemeanor, a felony, or an act of treason) <the reason for excluding evidence obtained by violating the Constitution seems to me logically to lead to excluding evidence obtained by a crime of the officers of the law—Justice Holmes>

*Offenses against marriage such as adultery, which is a crime punishable by death in Papua and only a sin in civilized society—Social Science Abstracts> <human society may punish us for crimes; human monitors reprove us for vices; but God alone can charge us upon the sin, which He alone is able to forgive—James Martineau>

Crime and, less often, sin may be applied to offenses that are of exceedingly grave nature; in fact, this implication is often found in crime, even in its original legal sense <the betrayal by a people of itself is the ultimate historical crime: the final and the most degrading suicide—MacLeish> <I've not been guilty of anything more than an indiscretion . . . I behaved foolishly, but that's not a crime—Mackenzie>

Scandal (see also DISGRACE) applies to an offense against a law that is also an offense in another sense of that word—that of an act, a condition, or a practice which offends the public conscience or which puts a stumbling block in the way of those who should obey the law or should be trained to obey it; unlike the words sin, vice, and crime, scandal carries no implication of probable or certain punishment or retribution but emphasizes the distressing effect it has on others or the discredit
offensive adj 1 attacking, aggressive (see under ATTACK adj)

Ant 1 repugnant, abhorrent, distasteful, obnoxious

Con 1 analogous words

Ana 1 offensive, nauseating, disgusting

Contrasted words 1 nauseating, disgusting

See also explanatory notes facing page 1.
her hand preferred the bowl—Pope} (I don’t prefer any claim to being the soul of romance—Dickens)

Ana *give, present, bestow, confer: adduce, advance: propose, design, purpose, *intend

Con accept, take, *receive: reject, refuse, *decline

offset *extemporaneous, extempore, extemporary, improvised, impromptu, unpremeditated

Ana casual, desultory, *random: abrupt, hasty, sudden, *precipitate, impetuous: brusque, curt, blunt (see BLUFF)

Con studied, advised, considered, *deliberate

office *function, duty, province

Ana *work, business, calling: task, job, chore, stint

officious meddlesome, intrusive, obtrusive, *impertinent

Ana meddling, interfering, intermeddling, tampering (see MEDDLE): annoying, vexing, irking, bothering (see ANNOY): pushing, assertive, *aggressive

offset countervail, balance, *compensate, counterbalance, counterpoise

Ana *neutralize, negative, counteract: *nullify, negate: redeem, reclaim, save, *rescue

offspring, young, progeny, issue, descendant, posterity are comparable when they mean those who follow in direct parental line. Offspring applies to those who are by birth immediately related to a parent; the term does not necessarily apply to human beings, for it may refer to animals or sometimes to plants {at each farrow the sow produces many offspring} {the son endeavoring to appear the worthy offspring of such a father—Steele} Young is used most often of the offspring of animals {a bear surrounded by its young} {turtles bury their eggs in beaches and the young dig their way out when they hatch} Progeny usually applies to the offspring of a father or a mother or of both; the term more often refers to those of human parentage, but it is used occasionally of the offspring of animals and plants {from this union sprang many offspring} {the son endeavoring to appear the worthy offspring of such a father—Hawthorne} In comparison with offspring, however, it has somewhat extended use, being sometimes applied to those who trace their ancestry more remotely or to those who are the spiritual or intellectual successors of a great man {all the progeny of David} {the intellectual progeny of Plato} Issue, chiefly a legal term, is more abstract than the preceding terms and is used merely to call attention to the fact that a union has or has not reproduced its kind {die without issue} {in the event of issue, the estate will pass to the children who are born of this union} Descendant, on the other hand, applies to anyone who has or, in the plural, to all who have a right to claim relationship with a person as an ancestor in direct line; the degree of nearness does not matter, but the relationship of each as child, grandchild, great-grandchild, and so on must exist {they are descendants of the first settlers of the town} {the claims of certain people to be descendants of George Washington are absurd, since he died without issue} Posternity differs from descendants only in connoting all the descendants of a common ancestor {the unnumbered posterity of William Bradford} The term is also often used of the generations that come after a person, a race, or a people {his fame will live to all posterity} {we are leaving many problems for posterity to solve}

oft *often, frequently, oftentimes

often, frequently, oft, oftentimes may be used with little or no distinction to mean again and again in more or less close succession. But often stresses the number of times a thing occurs, without regard to the interval of recurrence; frequently usually stresses repetition, especially at short intervals {he came often} {he called frequently} {the disease is often fatal} {I frequently examined the color of the snow—Tyndall} {you will often find this to be true}

unless you write me more frequently I shall feel out of touch with you} Oft and oftentimes differ little from often; oft, however, is used chiefly in compound adjectives {the oft-told tale of her hairbreadth escape—Cerf} {an oft quoted statement} or occasionally in formal discourse {seemingly trifling events oft carry in their train great consequences—Coolidge} and oftentimes is occasionally preferred for intonational reasons {a sense of humor which was sometimes loud, oftentimes lewed, but never deliberately unlike—Metalious}

oftentimes *often, frequently, oft

oil vb Oil, grease, lubricate, anoint, cream all mean to smear or treat with an oily, fatty, or greasy substance, but they vary greatly in their implications of the substance used and the purpose for which it is employed and in their idiomatic applications. One oils the parts of a machine or mechanism subject to friction, typically by drops or squirts of a liquid substance, usually a mineral oil. Also, one oils a fabric (as cloth, silk, or paper) when one impregnates it with oil so as to make it waterproof. One greases a thing when one rubs on or in a thick fatty substance, often an animal fat or oil, for some purpose such as to increase speed by reducing friction {grease axles} or as a medicinal application {grease the chest with lard and turpentine} or as a preventive of cohesion {grease a baking dish} One lubricates when one oils, or greases, or provides for the feeding of a lubricant (as oil or grease or graphite or a silicone) to contiguous surfaces in a machine or mechanism to make them slippery, thereby reducing friction, eliminating roughness, and preventing cohesion. Lubricate stresses the effect intended or produced; oil and grease, the substance used or the method of its application. One anoints the body or a part of the body when one smears it with, or rubs into it an oily or fatty substance for some purpose (as a protection from the sun or an aid in massage). Anoint, however, is especially employed in reference to ceremonial uses of oil. In the application of oily or fatty cosmetics, especially those which are called creams, cream is the customary term.

oily unctuous, oleaginous, *foul, sicken, soap

Ana hypocritical, pharsial, sanctimonious (see under HYPOCRISY): bland, politic, diplomatic, smooth (see SUAVE)

old 1 *aged, elderly, superannuated

Ana *weak, feeble, infirm, decrepit

Ant young

2 Old, ancient, venerable, antique, antiquated, antediluvian, archaic, obsolete all denote having come into existence or use in the more or less distant past. Old, opposed to young or new (see also AGED), applies to what has lived or existed long or has been long in use or has stood for a long time in a particular relation to something; ancient, opposed especially to modern, to what lived, existed, or happened long ago or has existed or come down from remote antiquity {old wine} {old friends} {old as the hills} {O heavens, if you do love old men ... if yourselves are old—Shak.} {this new exception condemns an advertising technique as old as history—W. O. Douglas} {from the ancient world those giants came—Milton} {some illustrious line so ancient that it has no beginning—Gibbon}

Venerable suggests the hoariness and dignity of age {venerable as Anglo-Saxon is, and worthy to be studied as the mother of our vernacular speech—Quiller-Couch} {green ropes and leafy ladders hung down from the high limbs of a venerable tree—Bemelmans} {Antique applies to what has come down from former, ancient, or classical times or is in some way related to them; with regard to articles (as furnishings, implements, or bric-a-brac) the term suggests an old-fashioned type characteristic of an earlier period {an antique highboy that had
belonged to his great-grandmother (even a Leonardo
regretted his failure to recover the antique symmetry,
but he at least imitated the ancients vitally—Babbitt
<refreshing our minds with a savoir of the antique, primeval
world and the earliest hopes and victories of mankind—
Binyon> Something antiquated has gone out of vogue or
fashion or has been for some time discredited; the word
often implies some degree of contempt (is it true that
antiquated legal ideas prevent government from respond-
ing effectively to the demands which modern society
makes upon it?—Frankfurter) (this very lack of manner
keeps him from becoming antiquated. His style does not
"date," like that of many of his contemporaries—
Tinker) (cherished still their old rage against the northern
invaders, a stout and defiant loyalty to their antiquated
limitations—Edmund Wilson) Something antediluvian
is so antiquated and outmoded that it might have come
from Noah's ark (the whole system of traveling accommo-
dations was barbarous and antediluvian—De Quincey)
(those were antediluvian times. Unions were weak or
nonexistent; employers were backed by the courts, the
police, and the federal government—Dwight Macdonald)
Something archaic has the characteristics of an earlier,
sometimes of a primitive, period; with regard to words,
specifically, archaic applies to what is not in use in
ordinary modern language but retained in special context
or for special uses (as in biblical, ecclesiastical, and
legal expressions and in poetry) (we visited Medinum, a
town so archaic and unreal in its architecture that it was
difficult to believe that it was actually inhabited by the
human race—Hoffman) (much of the remote past is con-
served in the husk of convention, and archaic usages
govern his conduct toward all the crucial issues of life—
Norman Lewis) (to those who do not learn to read Shake-
speare as a school text his archaic language presents
formidable difficulties—Bottrall) Something obsolete
has gone out of use or has been or needs to be replaced
by something newer, better, or more efficient that has
subsequently come into being (obsolete as the feudal
baron—Snaith) (a scientific textbook is obsolete in a
decade or less—Lowes) (it was she who had raised a fund
for the granite horse trough . . . and who, when the horse
trough became obsolete, had had it planted with geraniums
—Cheever) (charged that United States Navy ships were
equipped with obsolete torpedoes—Current Biog.)

ant new

oleaginous oily, unctuous, *fulsome, slick, soapy
See those at oily

oligarchy, aristocracy, plutocracy are comparable when
they mean government by, or a state governed by, the
few. The terms are often applied to governments or states
that are ostensibly monarchies or republics but are, in
the opinion of the user, actually governed by a clique.
Oligarchy is the most inclusive term referred to a govern-
ment or state where the power is openly or virtually
in the hands of a few men (democracy and oligarchy shade
into each other and are chiefly distinguished by the degree
of the citizens' participation in government—McKeon)
Aristocracy basically and historically suggests the rule
of the best citizens (true aristocracy is just this, the
government of the best, of a ruling class dedicated to the
common well-being—F. G. Wilson) but it retains this
implication chiefly when it is used in distinction from
oligarchy and the latter connotes power seized or held
for selfish or corrupt reasons (it ceased to be, in the
Greek sense, an aristocracy; it became a faction, an
oligarchy—Thirwall) Its more common implication is power
vested in a privileged class, especially in a nobility
that is regarded as superior by birth and breeding and that
by owning or controlling much of the land exercises direct
control over a large portion of the population; in this sense
Great Britain was until recent generations an aristocracy
(Clay was right . . . revolution was abroad among the
people, shifting the basis of our government from aris-
tocracy to democracy without destroying its essential
republicanism—Rossiter) Plutocracy, unlike the other
terms, is usually derogatory; as a rule it implies concen-
tration of power in the hands of the wealthy and, in conse-
quence, a withholding of power from those to whom it
properly belongs, either the people or their representatives
(Ward held that we must differentiate three types of
democracy . . . the second plutocracy, or the control of
the state by organized and predatory wealth—H. E.
Barnes) (Cartilage was a plutocracy and the real power
of the state lay in the hands of a dozen big shipowners
and mineowners and merchants—van Loon)

omen a augury, portent, *foretoken, presage, prognostic
Ana *sign, mark, token, badge, note, symptom: foreboding,
*apprehension, presentiment, misgiving

ominous, portentous, fateful, inauspicious, unpromising
basically mean having a menacing or threatening character
or quality. What is ominous has or seems to have the
character of an omen, especially of an omen forecasting
evil; the term commonly suggests a frightening or alarming
quality that bodes no good, and it may imply impending
disaster (there was something ominous about it, and
in intangible ways one was made to feel that the worst was
about to come—London) (my ears were startled by the
. . . uproar of yelling and shouting. It sounded ominous,
but . . . I had to go on—Heiser) What is portentous
has or seems to have the character of a portent; portentous,
however, less often than ominous suggests a threatening
character; it usually means little more than prodigious,
monstrous, or almost frighteningly marvelous, solemn,
or impressive (his gravity was unusual, portentous, and
immeasurable—Dickens) (the assertion that children of
six are "mighty prophets, seers blessed," . . . seemed to
him portentous nonsense—Babbitt) (it is portentous . . .
that here at midnight, in our little town a mourning figure
walks, and will not rest—Lindsay) What is fateful has
or seems to have the quality, character, or importance
decreed for it by fate or suggests inevitability (the fateful
conference that brought on war) (to meet a Persian, any
Persian, in New York seemed a fateful coincidence—
Mehevi) but the term often means little more than
timorous or appallingly decisive (the great cases that
make the work of the United States Supreme Court of
fateful significance—Cohen) What is inauspicious (com-
pare auspicious under FAVORABLE) is or seems to be
attended by signs that are distinctly unfavorable (an
inauspicious horoscope) But inauspicious usually means
nothing more than unlucky, unfortunate, or unlikely to
succeed (an inauspicious beginning of a great project)
(you come at a singularly inauspicious moment, when I
need all my strength to forget the world—Sabatin) What
is unpromising (compare propitious under FAVORABLE)
carries or seems to carry no sign of favoring one's ends
or intentions (unpromising omens) In its more common
extended sense the term means merely unfavorable, dis-
couraging, or harmful (made a by-election necessary at
a time highly unpromising for the Government—Cockburn)
(sleep and exercise are unpropitious under FAVORABLE)

533
Con *remember, recollect, recall: *tend, attend, mind, watch

omnipresent, ubiquitous mean present or existent everywhere. Though they carry this as a basic meaning, they are often used hyperbolically. Something omnipresent is present everywhere at the same time. Though basically applicable to the Supreme Being (omnipresent Deity) the term is often, especially in a weakened sense, applied to something that is or is felt to be always present or existent (as in a class or a type wherever it may be found or in an area to which it belongs) (can omnipresent sense of social obligation—Elliot) (the creeping, silent atmosphere of omnipresent fear that I have sensed in the capitals of the satellite countries—Wechsberg) (the mechanization of entertainment through . . . the omnipresent radio—Millett) Something ubiquitous is found everywhere and, often, at the time or in the situation specified or implied (electronics being so numerous and so ubiquitous—Darlow) (the big public services will have to be made practically ubiquitous—Shaw) Ubiquitous is applicable to a type or an individual, often with the specific implication that one cannot escape him or it wherever one goes (the ubiquitous American tourist) (the sad, ubiquitous spinster, left behind . . . by the stampede of the young men westward—Brooks)

on 1 *at, in
2 *at, in

onerous, burdensome, oppressive, exacting are comparable

inexorable, burdensome, oppressive, exacting are comparable when they mean imposing severe trouble, labor, or hardships. All of these terms are applicable to a state of life, its duties or obligations, or to conditions imposed upon a person by that life or by another person; oppressive and exacting are applicable also to persons or agents responsible for these difficulties. Onerous stresses laboriousness and heaviness but often also implies irksomeness or distastefulness (the tyranny of a majority might be more onerous than that of a despot—Whitehead) (“What were the conditions?” “Oh, they were not onerous: just to sit at the head of his table now and then”—Wharton) Burdensome usually implies mental as well as physical strain and often emphasizes the former (a burdensome tax) (burdensome Government regulations which are a nuisance to everyone—Roosevelt) (the burdensome and invidious job of a formal application to the Board of Trade—Economist) Oppressive adds to burdensome the implication of extreme harshness or severity; it therefore usually connotes the unendurableness of what is imposed or inflicted, whether by nature or circumstances or by man, or cruelty or tyranny in the one responsible for the impositions or inflictions (oppressive heat) (oppressive rulers) (there are more ways of coercing a man than by pointing a gun at his head. A pacifist society may be unjust and oppressive—Inge) (the women are . . . kind and they mean very well, but sometimes they get very oppressive—Cheever) Exacting, like oppressive, implies severity of demands, but otherwise it differs because it commonly suggests rigor, sternness, or extreme fastidiousness rather than tyranny in the one who demands, or the tremendous care or pains required of the one who satisfies these demands (an exacting technique) (an exacting employer) (the exacting life of the sea has this advantage over the life of the earth, that its claims are simple and cannot be evaded—Conrad) (the pity of it was that even the least exacting husband should so often desire something more piquant than goodness—Glasgow)

Ana *heavy, weighty, ponderous, cumbrous, cumber-some, hefty: arduous, *hard, difficult

only adj & adv Only, alone are often used interchangeably (though alone is not found in the attributive position), but seldom without a slight change in meaning or emphasis. Only is especially appropriate when restriction to what is specified or asserted is implied and the term is equivalent to sole or solely: thus, “I want only this book” implies a wish for one and no more; “of all the family only John and Helen came,” that is, the specified persons and no more (to distinguish . . . that which is established because it is right, from that which is right only because it is established—Johnson) Alone may be chosen when the idea of the elimination of all other possibilities is expressed and the term is the equivalent of exclusive or, more often, exclusively; thus, “I want this book alone” implies a wish for a particular one and no other; “of all the family John alone came,” that is, John and none of the others (man shall not live by bread alone—Mt 4:4)

onset *attack, assault, onslaught

A aggression, offensive, offense, *attack: storming, bombarding, assailing (see attack vb): *invasion, raid, incursion

onslaught *attack, assault, onset

Ana see the other at ONSET

onward, forward, forth are comparable when they mean in the act of advancing or getting ahead (as in a movement, progression, series, or sequence). They are frequently used with little or no distinction, but onward often suggests progress or advance toward a definite goal, end, or place (half a league onward . . . rode the six hundred—Tennyson) (onward into future lives—Hawkrorde) Forward, opposed to backward, has more specific reference to movement or advance with reference to what lies before rather than back in place (see forward under BEFORE) or in time (his skill in reconciling conflicting points of view and his forward-looking spirit—Dean) (from this time forward Webster’s bête noire was party spirit—Warfel) or in a succession (as of incidents in a narrative or of steps in a process) (the center has not yet been rebuilt, though they are . . . getting forward with it—Rowse) Forth is often interchangeable with forward without loss (expeditions went forth into the interior—P. E. James) (from that day forth) but in certain idioms it may be quite distinctive and imply a making known, present, available, or real something previously unknown, lacking, unavailable, or hidden; thus, one brings forth from or as if from a place of concealment (bring forth a precious jewel) and one sets forth by providing (set forth an ample supper) or by making simple and clear (in his charge to the grand jury . . . he set forth the democratic basis of the new state government—Meriwether)

opaque, opalescent, opalin iridescent, *prismatic

open adj 1 exposed, subject, prone, susceptible, sensitive, *liable

operative n mechanic, artisan, hand, workman, working-
opiate

man, *worker, laborer, craftsman, handicraftsman, roust-about
opiate *analogy, narcotic, nepenthe
opinion, view, belief, conviction, persuasion, sentiment are comparable when they mean a more or less clearly formulated idea or judgment which one holds as true or valid. An opinion is a more or less carefully thought-out conclusion concerning something that is or may be questioned. The word not only does not exclude the suggestion of consideration of all the evidence and of arguments on both sides, but it sometimes implies such consideration. <seek an expert opinion on the authenticity of a painting> (the word opinion . . . should be restricted to views entertained on subjects that admit of doubt and are open to controversy . . . Matters that are not debatable are not open to opinion—Corry) (the attending physician said he would like the opinion of a consulting physician) However, the term more consistently suggests even in the preceding instances a personal element in the judgment, the possibility of its being in error, and the strong probability that it will be disputed <books . . . are a public expression of a man's opinions, and consequently they are submitted to the world for criticism—Benson> (the tolerant but untrained . . . will rarely know the difference between their tastes and their opinions—Virgil Thomson) A view is an opinion more or less colored by the feeling, sentiment, or bias of the individual <fond of airing his views in public> (each member was asked to state his views on the proposed change in the constitution) must take the main view, which is that the failure of the western democracies . . . is due to the failings of the democratic peoples—Lippmann> (in the fourth century . . . adopted the view that deceit and lying were virtues if in the interests of the Church—Cohen)> A belief differs from an opinion or view in that it is not necessarily formulated by the individual who holds it, but may have been proposed to him for acceptance (as in the form of a doctrine, a dogma, a proposition, or an authoritative opinion). The emphasis in belief is placed on intellectual assent or assurance of truth (the belief that the whole system of nature is calculable in terms of mathematics and mechanics—Inge) (just one single example of real unreason is enough to shake our belief in everything—Theodore Sturgeon)> A conviction is a belief which one holds firmly and unshakably because one is undisturbed by doubt of its truth (if any one had asked him the reason of this conviction he could not have told them; but convictions do not imply reasons—Deland) (the teacher should learn not to take sides, even if he or she has strong convictions—Russell) (he had overlooked this fact, borne along on his conviction of the abundance of life—Cheever)> A persuasion is usually at once an opinion and a belief. The term often implies that one's assurance of its truth is induced by one's feelings or wishes, rather than by argument or evidence (it was the avowed opinion and persuasion of Calimachus . . . that Homer was very imperfectly understood even in his day—Cowper) (his strong interest in good government and the proper solution of social problems threw him more and more toward the Democratic persuasion—Michener)> Sentiment (see also FEELING 2) is becoming uncommon in this sense except in a few idiomatic phrases (those are my sentiments) The term applies to a more or less settled opinion, often with reference to something which involves one's feelings or which is formulated so as to suggest the stimulus of emotion (there is no expression in the constitution, no sentiment delivered by its contemporaneous exponents, which would justify us—John Marshall) (it is the actions of men and not their sentiments which make history—Mailer)> (he would inform Miss Graves of his sentiments and she would translate them into a polite and brief answer—Bemelmans)> Ana thought, notion, impression, *idea, concept, conception: inference, deduction, conclusion, judgment (see under INFER): deciding or decision, determining or determination, settling or settlement (see corresponding verbs at DECIDE)
opponent, antagonist, adversary all denote one who expresses or manifests opposition. Unlike enemy they do not necessarily imply personal animosity or hostility. An opponent is one who is on the opposite side in a contest (as an argument, disputation, or election) or in a conflict (as of opinion) (since [in France] opposition is never considered to be legitimate, the Government has no opponents—only enemies—Revel) opponents of the desegregation decision have . . . largely founded their dissent on the principle that law cannot move faster than public opinion—Roche & Gordon)> Antagonist implies sharper opposition, especially in a struggle or combat for supremacy or control (where you find your antagonist beginning to grow warm, put an end to the dispute by some genteel badinage—Chesterfield) (a swift voracious fish, a formidable antagonist for the angler—J. L. B. Smith)> Adversary ranges in connotation from the idea of mere opposition to that of active hostility (do as adversaries do in law, strive mightily, but eat and drink as friends—Shak) (your adversary the devil, as a roaring lion, walketh about, seeking whom he may devour—I Pet 5:8)> Ana *enemy, foe: rival, competitor, emulator (see corresponding verbs at RIVAL)
opportunity *seasonable, timely, well-timed, pat Ana happy, felicitous, appropriate, fitting (see FIT adj): propitious, auspicious, *favorable: ready, prompt, *quick, apt Ant inopportune

opportunity, occasion, change, break, time are comparable when they mean a state of affairs or a combination of circumstances favorable to some end. Opportunity is perhaps the most common of these terms; it applies to a situation which provides an opening for doing something, especially in line with one's inclinations, ambitions, purposes, or desires (the suspect had both motive and opportunity for the murder) (to keep in the rear of opportunity in matters of indifference is as valuable a habit as to keep abreast of opportunity in matters of enterprise—Hardy) (on the whole an infant's desire to learn is so strong that parents need only provide opportunity—Russell) (to strike out in search of new opportunities in new surroundings—Truman)> Occasion (see also CAUSE 1) carries the basic denotation characteristic of its leading senses—a definite moment or juncture, but it applies only to a moment that provides an opportunity or that calls for or prompts action of a definite kind or nature (had occasion to prove the seaworthiness of this type of lifeboat in a gale—N. B. Marshall)> (he took the occasion to satisfy his desire for revenge)> Occasion may suggest more strongly than opportunity a juncture that provokes or evokes action (with great things charged he shall not hold aloof till great occasion rise—Kipling)> (so long as a child is with adults, it has no occasion for the exercise of a number of . . . virtues . . . required by the strong in dealing with the weak—Russell)> (it has also produced and spread occasions for diseases and weaknesses—Dewey)> Chance applies chiefly to an opportunity that comes seemingly by luck or accident (they had no chance to escape) (it was war that gave Lenin his chance. He might have died in angry exile in Switzerland—Brogan)>
oppose 580 oppressive

Sometimes the word means little more than a fair or a normal opportunity, especially in negative expressions (the feeling that the system under which we live deprives the majority of the chance of a decent life—Day Lewis).

Break applies to the occasion of a stroke of fortune that is usually good unless the term is qualified (as by an adjective indicating the kind of chance or suggesting its outcome) (had been haunting . . . the tryouts, for two years: and this was her first break—Wouk) (ascribe his fortunes to luck, to getting the breaks—Cozzens) (she always did have a bad break if it was possible to get one—Nevil Shute) (shady folk . . . are generally given a fine break—Lancaster).

Time denotes a juncture that is well-timed or opportune (as for the execution of one’s end or purpose) (the time and tide await no man for no man knows when his hour will come)—Towster y time (time) has come to sift and synthesize the findings (this is the time to buy stocks).

Ana *juncture, pass, contingency, emergency: posture, situation, condition, *state

oppose contest, fight, conflict, antagonize, *resist, withstand

Ana *contend, fight, battle, war: *attack, assail, assault, storm, bombard: *defend, protect, shield, guard, safeguard

opposite n contradictory, contrary, antithesis, antipode, antonym (see under opposite a)

opposite adj Opposite, contradictory, contrary, antithetical, antipodal, antipodean, antonymous are comparable chiefly as applied to abstractions and as meaning so far apart as to be or to seem irreconcilable with each other.

The same differences in applications and implications are found in their corresponding nouns, opposite, contradictory, contrary, antithesis, antipode, antonym, when they mean one of two things which are opposite or contradictory. Opposite is the inclusive term; it may be used interchangeably with any of the others, though few of the others are interchangeable in precise use. Opposite may be used to describe the relation of either of two abstract elements (as ideas, terms, statements, qualities, or forces) to the other when they are set against each other so as to bring out sharply the contrast, conflict, or antagonism between them (opposite views) (attraction and repulsion are opposite forces) (the plant does two opposite things at once. It is making sugar from carbon dioxide . . . and at the same time burning a little sugar—Michael Graham) (his private thesis that correction . . . entails entail to a diatomic opposite rather than any reasonable search for a golden mean—Pynchon) Contradictory, though often used as an equivalent of opposite, may retain its fundamental implication of denial, and therefore, especially when it is applied to terms, propositions, and principles, may further imply that if one of the two opposites be true, the other must be false; or if one be false, the other must be true (contradictory predictions are being made, some gloomy, some optimistic—Farrell) Words, propositions, or principles that are contradictory in this strict sense are mutually exclusive and, therefore, admit no possibilities between; thus, “John is English” and “John is not English” are contradictory statements, one of which must be false if the other is true; alive and dead are contradictory terms because they cannot both be truly applied to the same thing (stamped with the mint of our contradictory popular culture (where sex is sin and yet sex is paradise)—Mailer)

Contrary (see also CONTRARY 2) as applied to intentions, motives, and opinions usually implies extreme divergence with no basis for agreement (take a contrary view of the situation) (from the center of capitalist and imperialistic America he seemed to diffuse a contrary purely humanitarian influence—Santayana)

(he maintained that the contrary was true) But especially as applied to terms and propositions contrary may imply diametrical opposition or the greatest conceivable or possible difference between the things opposed. Contraries are poles apart; unlike contradictories both may be false, for they represent extremes and do not mutually exclude every other possibility; thus, destitute and opulent are contrary terms as applicable to a person’s circumstances, but they may be inapplicable in a vast number of particular cases for they describe only the extremes; “John is parsimonious” and “John is prodigal” are contrary statements, but John in truth may be neither parsimonious nor prodigal, but merely close, or thrifty, or free, or liberal, in the expenditure of money (a theory for which neither physics nor common sense can offer confirmatory or contrary evidence—Clement)

Antithetical and especially antithesis (see also COMPARISON) imply an intent to set the thing under consideration against its opposite, usually its diametrical opposite, in order to emphasize its significance or to reveal or define sharply its true nature. Both words are applicable to persons and things regarded objectively as well as to ideas, qualities, and terms (antithetical symbolism of ice and flame—Rees) (that mystic faith in unseen powers which is the antithesis of materialism—Rose Macaulay) (the essential interests of men and women are eternally antithetical—Mencken) Although antipodal or antipodean and the corresponding noun, antipode, which often occurs as the plural antipodes with singular or plural construction, also imply diametrical opposition, they do not suggest a logical relation but rather emphasize the unlikeliness and the remoteness from each other of the things contrasted. So strong are these implications that often the things contrasted are only figuratively, not generally, opposites, and the contrast constitutes in a sense an inverse simile (the unspannable gulf between the two brothers is widened by their antipodal attitudes toward money—Behrman) (flashy, crude, essentially shallow, but nevertheless at the antipodes from villainy. He is good-hearted and generous—Walcott) (the very antipode of Gropius. Where the American is romantic, the German is rationalistic—Werner)

Antonymous and antonym are applicable only to a word or term which is so opposed to another in meaning that it, in effect, negates or nullifies every implication of it. Antonyms or antonymous words may be contradictory or contrary terms, as defined, or they may be terms which negate other terms by implying the undoing or reversing of what is denoted by them; thus, retain is the contradictory antonym of lose, but recover is the reverse antonym of lose.

order n 1 *association, society, club

2 *command, injunction, bidding, behest, mandate, dictate

**order**

vb 1 Order, arrange, marshal, organize, systematize, methodize

are comparable when they mean to put (a number of persons or things) in proper place especially relatively or to bring about an orderly disposition of individuals, units, or elements that comprise (a thing). Order is somewhat outmoded when the idea of putting in a definite order is to be expressed; it more usually implies a straightening out and may connote either the elimination of friction or confusion, often with resulting peace or harmony, or the imposition of a fixed and rigid discipline ordered his affairs in expectation of death (it was a home strictly ordered, and he would have to conform to its ordering—Archibald Marshall) <the Greek states . . . were not well ordered; on the contrary, they were always on the verge, or in the act, of civil war—Dickinson> <a period of yearly relaxation in London, ordered and increasingly stately—Sackville-West>

**Arrange** is more often used than order where the idea of setting in proper sequence, relationship, or adjustment is uppermost. The word often implies a notion of what is orderly, fit, suitable, or right and a placing of things in accordance with this notion (they are the great organizers . . . the Germans classify, but the French arrange—Whethor) around the furniture in a room >arrange fruit for display (each of us arranges the world according to his own notion of the fitness of things—Conrad)

Often the term implies a determination of the way in which the things are disposed by an end in view and then suggests careful management or manipulation (we shall arrange matters so that you will not be inconvenienced) <arrange the details of a conference> <she arranged leave for a counselor whose mother was ill—Auchincloss> <political and economic life had been arranged in Utopian fashion—Henry Miller>

Marshall usually connotes generalship and implies assemblage and arrangement either for ease or advantage in management (as under stress) or for effectiveness in display or exhibition <marshal troops for battle> <paused to marshal his thoughts before beginning his address> <marshaled like soldiers in gay company, the tulips stand arrayed—Lowell> <thanks to Mr. Dawson’s erudition and his gift of marshaling facts, we begin to have a notion of what it is all about—Huxley>

Organize implies an arrangement in which all persons or things are so related to each other that they work as a unit, each individual having his or its proper function or duty (organize the supporters of a candidate for the presidency) <part of this service is organizing—cataloging, classifying, and arranging on shelves—the collected literature—Bercaw> <the traditional logic was a logic for clarifying and organizing that which was already known—Dewey>

Systematize implies arrangement according to a definite and planned scheme; thus, one systematizes one’s daily work when one reduces it to routine order (if grammar was to become a rational science, it had to systematize itself through principles of logic—H. O. Taylor) <how Philosophy . . . blindly spineth her geometric webs, testing and systematizing even her own disorders—Bridges>

Methodize differs from systematize in suggesting the imposition of orderly procedure rather than of a fixed scheme; thus, one can methodize one’s work without giving it the character of routine (that art of reasoning . . . which methodizes and facilitates our discourse—Shorthouse) <philosophical decisions are nothing but the reflections of common life, methodized and corrected—Thilly>

Anna *adjust, regulate: *line, line up, align, range, array

2 *command, bid, enjoin, direct, instruct, charge

Anna prohibit, *forbid, interdict, inhibit, ban

Con permit, allow, *let: license, *authorize, commission

** orderly adj** Orderly, methodical, systematic, regular are comparable when they mean following closely a set arrangement, design, or pattern. Orderly implies observance of due sequence or proper arrangement especially in the harmonious or careful disposition of persons or things (the guests passed in orderly groups into the ballroom) <an orderly placing of furniture> or in obedience to the rules of conduct or behavior that guide disciplined persons <an orderly group of children> <an orderly assem-

*b hollow of citizens* <an orderly election> or in keeping a place free from litter or confusion <his study is always orderly> <an orderly housekeeper> or in a scheme or system when all details stand in their proper relations, each playing its due part without interfering with that of any of the others <a process calculated to reduce the orderly life of our complicated societies to chaos—Huxley> <the difference seems to me rather the difference between the complete and the fragmentary, the adult and the immature, the orderly and the chaotic—T. S. Eliot> Methodical implies the observance of an order that has been carefully worked out so that the steps to be followed are exactly known or the pattern that is accepted seems logical or inevitable under the circumstances <make a methodical search for evidence> <give methodical instructions to a new employee> <begin a methodical study of the Bible> <a methodical performance of daily duties> Systematic comes close to methodical in ordinary use <needed a systematic brain, and a sympathetic nature—Andrew Buchanan> <composing is self-expression and that is hard and systematic work—Toch> but systematic, which always means some degree of complexity implied by the related noun (compare system), may be preferred when the stress is not upon the order followed but upon the integrated and ordered whole involved; thus, methodical study implies study pursued in regular increments according to a predetermined schedule while systematic study implies study pursued according to a scheme in which each increment leads logically to the next and the end result is exposure to an integrated block of information <the realization that all languages are systematic structures—A. A. Hill> <at the highest level, there stands . . . systematic theory, the conceptual framework within which a whole discipline is cast—Easton> Systematic also may be used to suggest order in occurrence, in progression, and especially in repetition, still with some notion of an underlying system; thus, a systematic error is one that is inherent in a system of measurement or calculation and recurs whenever that system is used <a systematic plan for world conquest> <they were not your gabbling, laughing eaters . . . they were quiet, systematic, devastating; they advanced steadily in good order from the first slice of ham to the last slice of chocolate cake—Priestley> <nowhere else in our literature can such a systematic and chill-blooded series of rendings, gorings, murders, suicides, and executions be found—Aldridge> Regular, with its basic implication of conformance to a rule (see also regular 1), may come very close to orderly <even the most ‘realistic’ work, if it is one of art, is not an imitative reproduction of the things we are so familiar, so regular, and so importunate that we call them real—Dewey> <the umbrageous trees, which rose tall in a regular line from either side—De Quincey> There remains the implied steadiness or uniformity (as in following a schedule) <regular meals> <the gentleness of their morality, their regular and industrious habits—de Tocqueville> or it may suggest occurrence and recurrence (as at fixed or stated intervals or in uniform amount) <the regular ebb and flow of the tides> <the revenue of government from the taxes was not regular but capricious and exceptional—Bellow> Ana tidy, *neat, trim, spick-and-span: formal, conventional, ceremonial (see CEREMONIAL): peaceable, *pacific, peaceful Ant disorderly: chaotic

**ordinance** canon, precept, *law, rule, regulation, statute

**ordinary** adj *common, familiar, popular, vulgar

**An** *usual, customary, habitual, wonted, accustomed

Ant extraordinary —Con *abnormal, atypical, aber-
deep and fundamental and that the thing itself is only an outward manifestation of its influence. Root therefore more often even than source applies to what is regarded as the first or final cause of a thing (the love of money is the root of all evil—1 Tim 6:10) (John Brown has loosened the roots of the slave system; it only breathes—it does not live—Phillips) Provenance and provenience are chiefly used to designate the place or, sometimes, the race or people from which a thing is derived or where by whom or among whom it originated or was invented or constructed (antiquities of doubtful provenance) (he would have some difficulty in guessing its provenance, and naming the race from which it was brought—Lang) (a fragment of a cast copper dagger had been discovered earlier, but its provenance is not certain—Daihoku) In mechanics the term specifically applies to the natural or mechanical power which sets a thing moving or in motion; it has been used in reference to wind (as in driving a sailing ship), steam (as in driving a steamship), a waterwheel, a windmill, or a steam or diesel engine. Ana beginning, commencement, initiation, starting (see corresponding verbs at begin): derivation, origination, rising or rise (see corresponding verbs at spring): *ancestral, lineage

original adj 1 *initial, primordial
Ana beginning,commencing,starting (see begin): *primary, primal, pristine, primeval: basic, *fundamental Con deriving or derived, stemming or stemmed, proceeding or proceeded (see spring): imitated or imitating, copied or copying (see copy): simulated or simulating (see assume)

Ant dependent: banal: trite

originate rise, derive, arise, *spring, flow, issue, emanate, proceed, stem
Ana *begin, commence, start

ornament *adorn, decorate, embellish, beautify, deck, bedeck, garnish
Ana enhance, heighten, *intensify

ornate, rococo, baroque, flamboyant, florid can all mean elaborately and often pretentiously decorated or designed. Ornate is applicable to anything heavily adorned or ornamented or conspicuously embellished (an ornate style of architecture) (the room's communicating door, heavily ornate with late Renaissance panels and tarnished silver handles—Machinnes) (in the fiacre were Gerald and a woman. Gerald... was talking eagerly to his ornate companion—Bennett) (introduced the direct and colloquial manner upon the American public platform, as distinguished from the highly elaborated and often ornate style which had been established—Higgins) Rococo basically applies to a French architectural style originating in the eighteenth century and characterized chiefly by the extravagant and often fantastic use of curves, shellwork, and fanciful excescence. The term therefore implies the ornateness of design characteristic of this decorative style especially as evident in architectural details, in furniture, and in mirror and picture frames.

It is often extended to describe a style (as in painting or writing) that seems tastelessly or meaninglessly ornate or overdressed (decided instead to have the wedding, rococo excess and all—Wouk) (doesn't mind getting caught out with a rococo phrase or an overstuffed image—Los Angeles Times) Baroque, which is sometimes interchanged with rococo, basically applies to a style of art and architecture which prevailed from the latter part of the sixteenth century to nearly the end of the eighteenth century and which emphasized energy in conception, amplitude in design, the use of dynamic contrasts, extremely high relief, and the employment of curved and often contorted forms (I entered this baroque interior, with its twisted columns and volutes and high-piled, hideous tombs, adorned with skeletons and allegorical figures and angels blowing trumpets—L. P. Smith) In its extended sense baroque may suggest more grotesqueness and extravagance and less fancifulness than rococo, although it too may imply tasteless ornamentation (baroque poetry with its frigid vehemence, its exhibitionistic forcefulness and false dynamism, its arbitrary twisting and distortions—H. L. Davis) (their literature, their modern painting and architecture, their music—it's all baroque. It gesticulates rhythmically, it struts across stages, it sobs and bawls in its efforts to show you how passionate it is—Huxley) Flamboyant basically applies to a late French Gothic architectural style characterized by curves that suggest ascending flames (as in the tracery of windows). In its more general application flamboyant can suggest ornateness but more often stresses such elements as excess of color, conspicous vigor and dash, or bold and daring display that suggest the freedom and brilliancy of flames (a flamboyant display of courage) (flamboyant penmanship—Dowden) (the flamboyant period of prose—Saintsbury) (these... flamboyant tricks of virtuosity have gone quite out of fashion—Quiller-Couch) (some [people] are simply present at accidents, without being involved at all—catalysts of death, if you'll pardon a flamboyant phrase—Theodore Sturgeon) Florid implies richness, usually overrichness, in details, shown particularly in the use of color, figures of speech, or flourishes. For their own sake; it implies, therefore, showy and ostentatious embellishment (a florid style of poetry) (a florid musical composition) (the scene was an old one, of gilt Spanish leather, stamped and wrought with a rather florid Louis-Quatorze pattern—Wilde) (unexplainable how a book... can... be banned because of the manner in which it is advertised and sold. However florid its cover, whatever the pitch of its advertisements, the contents remain the same—W. O. Douglas)

Ana adorned, decorated, ornamented, embellished (see adorn): flowery, aureate (see rhetorical): *luxurious, sumptuous, opulent: *showy, ostentatious
Ant chaste: austere

orotund *resonant, sonorous, ringer, resounding, vibrant
Ana *loud, stentorian, strident

oscillate *swing, sway, vibrate, fluctuate, pendulate, wave, undulate
Ana vacillate, waver, *hesitate, falter: *shake, tremble, quiver, quaver

ostensible *apparent, seeming, illusory
Ana specious, *plausible, colorable; pretended, assumed, affected, simulated, feigned (see assume)

ostentatious *showy, pretentious
Ana vainglorious, vain, proud (see under pride): flaunting, parading, displaying (see show vb): boasting, bragging, gasconading (see boast)

ostacize *banish, exile, expatriate, deport, transport, extradite

oust *eject, expel, evict, dismiss
Ana *exclude, eliminate, shut out, rule out, debar, disbar: *dismiss, discharge, fire, cashier, sack

outcast n Outcast, castaway, derelict, reprobate, pariah, untouchable are comparable when they mean one who has lost contact with or has been excluded from association with men in general or with a particular group. Outcast is usually applied to a person who has been rejected by society and is forced to live without its help, its companionship, or its approval; the term need not imply a degraded or abject condition, but it does suggest a loss of the comforts that accrue from one's association with other men. The casual oppressor expiates his offense. . . . and after devastating years is given back an outcast to the society that made him—Cardozo

Ana *unwelcome, outcast, out-and-out, outright, unmitigated, arrant

otiose *vain, nugatory, idle, empty, hollow

outdo excel, outstrip, transcend, surpass, exceed

outer, outward, outside, exterior, mean being or placed without something. Although in many cases interchangeable, they are more or less restricted in their applications and are therefore clearly distinguished in their implications. Outer usually retains its comparative force, then applying to what is farther out from something described as inner. The outer as distinguished from the inner court. The outer layer of skin is called the epidermis or is farther than another thing from the center. (Shed one's outer garments) (The outer covering of a butternut is removed before the nut is cracked)

Out is also applicable to what is definitely without as opposed to what is definitely within something, but in this sense the term rarely suggests spatial relations; thus, the outer man is the man as known in the flesh and as distinguished from the inner man, that is, the man as he really is in mind and soul; one's outer life is the part which is observable to one's fellows; the outer world is the world as known directly through the senses. Outer may be used of spatial relations; when it is so used it commonly implies motion or direction away from, or the reverse of, what is inward. Given to outward display. (Outer voices from New York City is very heavy over the weekends) (The outward curve of a convex lens) Like outer, the term is sometimes used of what is manifest to others in contrast with what is within and especially with what is spiritual or mental (All outward actions, every overt thing we do—Powys) (Obstinate questionings of sense and outward things—Wordsworth) (Give outward and objective form to ideas that bubble inwardly and have a fascinating lure in them—Mencken) Outside usually implies a position on or a reference to the outer parts or surface of a thing (An outside stateroom on a ship) (Outside shutters) (The outside paint is looking shabby) But outside, in extended use, applies especially to a person or thing that is beyond implied borders, bounds, or limits; thus, an outside influence is one not emanating from the particular society, group, or community in mind; the outside world is the world beyond the scope or interest (As of a family group, community, or set) or the confines of a place (As an institution, a town, city, or a state); an outside broker is one who is not a member of an exchange; outside work is work in the open air in contrast with inside work under cover (As in an office, factory, or store) (If it had condemned, Old Chester would not have cared in the very least) It looked down upon the outside world—Deland (External and exterior are often used interchangeably without loss, for both come close in meaning to outside (External appearance of an object) (The exterior form of a body) But external may be preferred when location or situation beyond or away from the thing under consideration is implied (Our desires and wills are directed to some object external to us—Alexander) (The slavery which would be imposed upon her by her external enemies and her internal traitors—Russoevsky) and exterior is often preferred when location or situation on the surface or on the outer limits of a thing is implied (The exterior slope of a fortification) (The exterior parts of the human body) (Thou, whose exterior semblance doth belie thy Soul's immensity—Wordsworth) In addition, external sometimes comes close to superficial in implying mere appearance or semblance that has no relation or little relation to what the thing really is (But under this external

A colon (:) separates groups of words discriminated. An asterisk (*) indicates place of treatment of each group.
appearance of ease she was covered with cold beads of sweat—Wharton} \{beauty that is purely external\} and exterior may, like outer and outward, apply to what shows or is made apparent \{the exterior cold had stolen into the cars, forming lenses of ice on the inside surface of the windowpanes—Capyote\} \{the absence of exterior demonstration of affection for my mother—Wecter\}

**ana** extrinsic, extraneous, foreign, alien

**ant** inner —con inward, inside, internal, interior, in-testine (see inner)

**outfit** n equipment, apparatus, paraphernalia, tackle, machinery, gear, matériel

**outfit** vb furnish, equip, appoint, accouter, arm

**outlander** stranger, foreigner, alien, outsider, immigrant, émigré

**outlandish** strange, singular, unique, peculiar, eccentric, erratic, odd, queer, quaint, curious

**outlast** *survive, outrival, survive* are comparable when they mean to remain in existence longer than another person or thing or after a given experience. Outlive carries a strong implication of a capacity for endurance and is especially appropriate when competition, struggle, or the surmounting of a difficulty is also connoted \{not marble, nor the gilded monuments of princes, shall outlive this powerful rhyme—Shak\} \{the world has outlived much, and will outlive a great deal more—J. R. Lowell\} Outlast differs little from outlive but usually stresses greater length of duration rather than greater capacity for endurance and therefore may be employed when comparison is more important than a suggestion of superiority or when the fact of existing longer is more important than the length of time involved \{customs that have long outlasted their usefulness—Inge\} \{the sweet sensations of returning health made me happy for a time; but such sensations seldom outlast convalescence—Hudson\} Survive may be used as an intransitive as well as a transitive verb; in general it suggests merely a living or existing longer than another person or thing, or after some event (sometimes implied rather than expressed) which might bring about his or its end \{the elder sister survived the younger\} \{he is unlikely to survive the operation\} \{one in a million of these childish talents survives puberty—Huxley\} \{they had at last survived the old year and were alive for the next—Irwin Shaw\} \{all called their host ‘Mr. President.’ That much sense of the proprieties survived the reek of whiskey—S. H. Adams\}

**ana** endure, persist, abide, *continue: withstand, *resist

**out** endure, persist, abide, *continue: surpass, *exceed

**outlook** n prospect, anticipation, foretaste

**ana** forecasting or forecast, predicting or prediction, prophesying or prophecy, presaging or presage (see corresponding verbs at foretell) possibility, probability, like-lihood (see corresponding adjectives at probable)

**outrage** vb *abuse, misuse, maltreat, ill-treat

**ana** *wrong, persecute, oppress, aggrieve: corrupt, pervert, vitiate, deprave, *debase

2 *offend, affront, insult

**ana** vex, *annoy, irk, bother: mortify, chagrin (see corresponding adjectives at ashamed)

**outrageous** monstrous, heinous, atrocious mean enormously or flagrantly bad or horrible. Something outrageous violates even the lowest standard of what is right or decent or exceeds one's power to suffer or tolerate \{an outrageous practical joke\} \{an outrageous cartoon\} \{the thought had already occurred to him, and it seemed outrageous to hear it repeated in what was, after all, the mouth of a prostitute—Hemingway\} although `skyline' may be chosen as more specific when the background is the sky \{the skyline of New York city\} \{gracious towers and spires make up the loveliest man-made skyline in the world—Pollock\} Silhouette in its primary sense applies to a likeness of someone or something made by or as if by tracing the outline of his or its shadow on dark material (as black paper), cutting this out, and mounting it against a contrasting background. In extended use silhouette, even more than outline or profile, eliminates all consideration of such details as color, quality, and expression and implies an outline seen in or as if in a shadow \{from the distance at which we stood and because of the brightness of the sun behind them, we saw the two figures only in silhouette\} \{the silhouette made a blue-black stain on the opposite wall—Lowell\} \{with a little imagination, he could find . . . the face of a dead man in the silhouette of the mountains—Bemelmans\}

overload, superpose, superimpose, appliqué can all mean to add one thing to another by placing the former upon or over the latter. Overlay usually implies covering with another material or substance, sometimes thinly (as with a wash, glaze, or coat) (plated silver is often a white metal overlaid with silver) or sometimes thickly (as by encrusting, veneering, or plastering) (a brick wall overlaid with stucco) In extended use overlay usually implies accritions or additions that conceal or encumber the original thing or smoother and stifle whatever there is of life in it (the ancient world had its own complexities, but it was not, like ours, heavily overlaid with the debris of speculative systems—Buchan) (ages of fierceness have overlaid what is naturally kindly in the dispositions of ordinary men and women—Russell) Superpose and superimpose are not always clearly distinguished, especially when they imply a putting of one thing on top of another, thereby extending the height of the original mass; thus, strata are layers of rock successively built up by sedimentary deposits, each layer being superimposed or superposed on the one previously formed. Superpose, however, is more often chosen when relative position only is indicated, and superimpose when the thing added rests upon or is supported by the original thing; thus, superposed columns do not necessarily have the columns of the lower row for their respective bases, but superimposed columns do; an overtone is strictly a superposed tone. Superpose is also the technical term when dealing with light rays or other energy waves that occupy the same position without destroying each other or losing their identities (upon the large and general motion of the glacier, smaller motions are superposed—Tyn dall) (originally they [two bright spots] were superposed on each other—Darrow) Superimpose often, especially in extended use, carries the implications of imposition or the addition of something extraneous and unintegrated (his symbolism is too often something superimposed—Bentley) Appliqué basically implies an ornamenting with pieces, usually of contrasting material, that are cut or shaped and applied (as by sewing or pasting); the term is used primarily in reference to textile ornamentation (appliqué a satin blouse with wool of the same color) In extended use appliqué suggests overlaying with something obviously added and forming a pattern (never taking his eyes off the pine trees, appliquéd against the blue water—Cather) (footnotes have been appliquéd to books that would have been better off without this factitious decoration—D. C. Smith)

overlook slight, forget, ignore, disregard, *neglect, omit

overplus *excess, superfluity, surplus, surplusage

overreach *cheat, cozen, defraud, swindle

overrun *infect, beset

oversight, supervision, surveillance all denote the function or duty of watching or guarding for the sake of proper control or direction. Oversight applies to the function or duty not only of one who is called an overseer or an inspector but of anyone whose duty it is to watch the progress of a piece of work so that no defects or imperfections may occur or to superintend the labors or efforts of a body of workers (each foreman is charged with the oversight of the work done in his department) (his widow was to have the oversight of the portions left to the younger children—Struder) (legislative oversight of administration is a familiar and well-grounded assumption of responsible government—Macmahon) Supervision carries the strongest implication of authoritative powers, of responsibility, and of superintendence; it usually suggests more rigorous direction or closer management than oversight (the architect had supervision of the construction of the building) (the majority plan advocated supervision of the processing of ores . . . that is, complete control of uranium and
thorium—Current Biol.> Surveillance implies a close watch on persons suspected of being likely to commit misdeeds or offenses against the law or against morals or suffer untoward accidents (The police are maintaining a strict surveillance of the suspect) (keep the inmates of a lunatic asylum under surveillance) (I cannot drink a milk shake or put on a pair of shoes without their friendly but implacable surveillance—A. E. Stevenson) (they subjected her to a pride-breaking foreign surveillance, and refused her even the lip service of recognition as an equal—The Personalist)

**Analogous Words**

**Antonyms**

- **overturn, subvert, upset, capsize**
- **overstatement** *exaggeration, hyperbole
- **overture**
- **throw, cast, fling, hurl, toss**
- **understatement**
- **bid**
- **overture n Overture, approach, advance, tender, bid are words of somewhat indefinite application covering a variety of acts or actions by which one person or party tries to gain the goodwill of another person or party. Overture implies an attempt to begin a relationship. It may designate a formal proposal intended to open negotiations (as for peace; a marriage between persons of royal blood, or for a merger of corporations). It is, however, often applied to an act or speech that may be construed as a search for an opening (as for friendship, for reconciliation, or for cooperation) (she was not one of those backward and delicate ladies, who can die rather than make the first overture—Fielding) ("You are the new second officer, I believe." Mr. Powell answered in the affirmative, wondering if this was a friendly overture—Conrad) Approach, often in the plural, may be used in place of overture when the latter is felt to be too formal (the two girls made timid approaches to each other) (the minister is always tempted to break through ... with intimate approaches to a congregation which are off the record—Sperry) (females who are most often involved in tavern pickups and in street approaches —Kinsey et al) Advance, usually in the plural, may be applied to an attempt to gain love, friendship, or goodwill, whether it serve as an overture or as an effort to establish a closer relationship (she tried to make talk, but Hugh answered all her advances ... briefly—Anderson) and it is the one of these terms that is freely used without qualification to suggest irregularity or impropriety in the overtures made (Frances withstood the advances of the King, but she accepted his gift—Sylvia Gray) (if an officer with a higher rank than my husband's makes advances to me, do I have to submit if I want my husband to get promoted?—Kaderly) Tender retains its primary meaning of offer, but it does not necessarily imply specific acts or a formal proposal. Sometimes it suggests little more than a sign or token ("He hath, my lord, of late made many tenders of his affection to me.")." "Affection! pooh! you speak like a green girl.... Do you believe his tenders, as you call them?"—Shak.) (honored him by the tender of some important appointment—J. D. Hicks) Bid adds to advance the implication of appeal or, sometimes, of invitation; it always requires qualification (a bid for sympathy) (a bid for patronage) Like the other words of this group, the specific nature of the act or action can be inferred only from the context (de Gaulle's speech was generally considered a bid for the presidency—Ehr-
pacify, pacifist, pacifistic
pabulum *food, aliment, nourishment, sustenance, pap
pace
pacific, peaceable, peaceful, irenic, pacifist, pacificstic are sometimes confused because they all involve the idea of affording or promoting peace. But pacific applies chiefly to persons or to utterances, acts, influences, or ideas that tend to make peace or to conciliate strife (they flung out a challenge which even the most pacific Quaker in Philadelphia had to heed—Charles & Mary Beard) (seek the settlement of disputes only by pacific means—R. H. Jackson) (the pacific policy of Walpole was regarded by them as a national humiliation—Plumb) Peaceable also applies to persons or to their actions or words, but it describes their character or quality as peace-loving, as disposed to avoid strife, or as inclined to keep peace, rather than their aims or tendencies (the villagers were quiet, peaceable folk) (our king the good Simonides . . . deserves so to be called for his peaceable reign and good government—Shak) (the Mayans were a traditionally gentle and peaceable people—Bracker) Peaceful applies especially to a life, a condition or state, a period or age, or a country or people in which peace prevails or there is no strife, but it may apply to whatever is indicative of peace, especially of mind, or provides an opportunity for such peace (and may at last my weary age find out the peaceful hermitage—Milton) (the peaceful countenance of the old clergyman (thou shouldst have seemed a treasure-house divine of peaceful years—Wordsworth) (man has laid down his weapons and resumed a peaceful way of life—Bailey) (the peaceful comportment of the seals had quieted my alarm—London) Irenic, which applies primarily to peace in connection with religious controversy, may describe attitudes and measures likely to allay dispute (the political equivalent of the dogfights on the human level is not made more ienic by the capacity of the participants to verbalize their animosities—Murphy) (Piper lived to see his synod adopt a very ienic attitude towards its former antagonists—Rohne) Pacifist and pacificstic apply chiefly to the views, arguments, writings, or attitudes of opponents of war or the use of military force for any purpose but they may also apply to the spirit or utterances of someone who conscientiously objects to wars or who would substitute arbitration for the settlement of any disputes (pacificstic antagonism to conscription) (Grotius' pacificstic attitude is founded on his understanding of the humanitarian and cosmopolitan aspects of natural law—Albert Salomon) (as many pacifist writers argue, international warfare has consequences for the lives of people, in terms of spiritual sickness and the brutalizing of attitudes—Garvin)
Ana *calm, placid, serene, tranquil: conciliating or conciliatory, propitiating or propitiatory, appeasing, pacifying or pacificatory (see corresponding verbs at PACIFY)
Ant bellicose—Con *belligerent, pugnacious, combative, quarrelsome, contentious
pacifist, pacificstic *pacific, peaceable, peaceful, irenic
apacify, appease, placate, mollify, propitiate, conciliate are comparable when they mean to quiet excited, aroused, or disturbed persons. Pacify implies a soothing or calming of anger, grievance, or agitation, or the quelling of insurrection especially by force (seeing his mounting rage, friends did all they could to pacify and restrain him) (second-grade troops, useful mainly to occupy parts of the country that have already been pacified—Crozier) Appease may indicate the quieting of agitation or insistent demand by the making of concessions (open in manner, easy of access, a little quick of temper but readily appeased—Buchan) (he is utterly and absolutely implacable; no prayers, no human sacrifices can ever for one moment appease his cold, malignant rage—L. P. Smith) and it may be used in reference to appetites, desires, and passions as well as persons and to imply a giving of quietening satisfaction (there is always the drive to excel. Work, literacy, food and shelter . . . are minimum requirements of civilization, but they will not appease this ambition—Edmund Wilson) (a frantic effort to appease mounting discontent at home—Wilten) Placate is sometimes interchangeable with appease but may imply a more complete or lasting assuagement of bitter feeling (each and every new route projected was liable to drastic alteration to placate local opposition—O. S. Nock) (federal officials who try to placate witch-hunting Congressmen—New Republic) Mollify stresses softening of anger or abatement of hurt feelings by positive action (as flattery or concession) (the propagandists . . . must be able to mollify and perhaps even convert the hostile—Huxley) (mollified when they heard that the patio, with its famous cottonwood tree will be left intact—Green Peyton) Propitiate may refer to averting the anger or malevolence or winning the favor of a superior or of one possessing the power to injure greatly (propitiate this far-shooting Apollo—Grote) (Aunty Rosa, he argued, had the power to beat him with many stripes . . . it would be discreet in the future to propitiate Aunty Rosa—Kipling) (the unlimited power of trustees to abuse their trust unless they are abjectly propitiated—H. G. Wells) Conciliate may be used of situations in which an estrangement or dispute is settled by arbitration or compromise (policy of conciliating and amalgamating conquered nations—Reppier) (insinctively friendly and wholly free from inflammatory rhetoric, he did much to conciliate more stubborn Northern sentiment concerning the South—Gaines)
Ana assuage, alleviate, allay, mitigate, *relieve: *moderate, qualify, temper
Ant anger
pack n *bundle, bunch, package, packet, bale, parcel
pack vb Pack, crowd, cram, stuff, ram, tamp are comparable when they mean to fill tightly or cause to fill tightly something which holds a limited amount or presents a limited space. Pack, in its basic sense, implies a forming into packs or bundles for convenience in storing or transporting (oranges are packed in crates for shipment) (pack books in cartons before moving them) (in this factory huge quantities of meat are processed, packed, and shipped to all parts of the country) Additionally it may imply close, orderly arrangement in receptacles of determined size, and, as a corollary, compact and complete A colon (:) separates groups of words discriminated. An asterisk (*) indicates place of treatment of each group.
filling. In extended use it may suggest completeness of filling or, frequently, an excessive or uncomfortable filling, without any relation to the ideas of storing or transporting 

(1) packed the theater 
(2) the crowd in the bus was packed in like sardines 
(3) packs an extraordinary amount of information into a few pages—Times Lit. Sup. 

Crowd (see also PRESS) implies the presence of great numbers of persons or things in proportion to the space, area, or time; the term often suggests numbers so great as to press upon or otherwise seriously inconvenience 

(1) the harbor was crowded with ships 
(2) crowd more persons into a hall than it can safely hold 

In revolutions men live fast: the experience of years is crowded into hours—Macaulay 
(1) the road . . . was now crowded with people who had come up the hill for their Sunday afternoon walk—Archibald Marshallly 
(2) his mind was crowded with the detail he observed—Nevil Shute 

Cram carries a similar implication of pressing so as to bruise or squeeze, but the word usually also suggests a forcible and, sometimes, disorderly insertion into a receptacle or space of more than it can easily or comfortably or safely take 

(1) cram a trunk full of clothes 
(2) their storehouses crammed with grain—Shak. 
(3) crammed his head full of knowledge 

(1) cram for an examination 
(2) most of the newcomers arrive with only such means as can be crammed into a bundle or two—Hersey 

Stuff implies the use of such a material as padding, wadding, or straw in expanding or distending 

(1) stuff a pillow with feathers 
(2) stuff a mattress with straw 

From this specific meaning comes the more general meaning of to fill so that a thing bulges or so that the filling protrudes 

(1) staffed his purse with bills 
(2) stuff a turkey with dressing 
(3) I have stuffed too many of the facts of history and science into my intellectual—L. P. Smithy 

Ram nearly always retains some notion of its basic implication of pounding and tamping 

(1) ram home the charge in a muzzle-loading firearm by means of a ramrod 

but this implication is sometimes obscured or subordinated and that of stuffing or cramping as if by pounding in is stressed 

(1) ram tobacco into his pipe 

(2) I always ram my clothes into a box—Bury 

(3) pronging great slices of meat onto his fork and ramming them into his mouth—Bruce Marshallly 

Tamp, which often comes close to ram in meaning, originally meant and still means to plug up a drill hole above a blasting charge with clay, earth, or similar material. In its extended use it implies a series of blows which press something into a confined space or under, over, or about another thing that needs to be supported 

(1) capping the gravel back around the ties—Laird 

(2) into his pipe 

package n packet, *bundle, bunch, bale, parcel, pack 
packet n package, pack, *bundle, bunch, bale, parcel 
pact n compact, *contract, bargain, treaty, entente, convention, cartel, Concordat 

pain n Pain, ache, pang, throe, twinge, stitch are comparable when they mean a bodily sensation that causes acute discomfort or suffering. Pain may range in its application from a sensation that makes one uneasily aware of some discomfort or suffering. Pain may range in its application from 

(1) a sensation that makes one uneasily aware of some discomfort or suffering. Pain may range in its application from 

(2) some underlying disorder 

(3) the ache of an abscessed tooth 
(4) backache that accompanies kidney disease 

A pang is a sharp, sudden, and usually transitory pain of great intensity, especially one that recurs in spasms 

(1) pangs have taken hold upon me, as the pangs of a woman that travaileth—Isa 21:3 

(2) attacking them [feas] was a waste of time, and unless a particularly savage pang forced you into action, you just sat and let yourself be devoured—Stewart 

A throe is a pang characteristic of a process (as of labor in childbirth). Because of its association with labor the term usually designates a violent and convulsive, as well as a recurrent pain 

(1) in the throes of violent retching 
(2) the throes of a mortal and painful disorder—Scott 

A twinge is a momentary shooting or darting pain, especially one causing muscular contraction or twitching; it is sometimes regarded as a premonitory symptom (shrunken off twinges and creaking like mine as something quite to be expected in their early fifties—E. M. Stern) 

(1) feel a twinge in the region of the heart 

(2) Stitch differs from twinge in suggesting something that runs through a part of a body (usually a muscle) as a piercing needle 

(3) ran until he got a stitch in the side 

All of these words except the last designate also mental suffering. Pain commonly suggests sorrow (as for something lost or unattainable) 

(1) my craving to hear from her was at times a gnawing pain—Kenneth Roberts 

(2) Ache usually implies suffering that must be endured or longing not likely to be appeased 

(3) there was an ache in his heart like the farewell to a dear woman—Steinbeck 

(4) know the ache of loneliness 

Pang suggests a sudden sharp access of a painful emotion 

(1) sharp pangs of envy 
(2) pangs of remorse 

(3) the next time I ran away just the same, and suffered the most ghastly pangs of fear—John Reed 

(4) statements . . . made unhesitatingly, with no visible pangs of conscience—Sanders 

A throe presupposes the existence of mental agony and designates one of the recurrent spasms that characterize the state of mind 

(1) fierce maternal passion . . . was now bowing her still lower, in the throes of a bitter renunciation—Wharton 

(2) Twinge suggests less poignancy than pang but often connotes compunction 

(3) twinges of conscience 

(4) too painfully preoccupied to feel a twinge of self-reproach at this undeserved praise—George Eliot 

(5) shot down his victims without shadow of provocation and who probably never felt a twinge of remorse—Ghent 

Ana *agony, distress, suffering, passion: anguish, *sorrow, grief, heartbreak 

(1) 2 in plural form pains *effort, exertion, trouble 

(2) Ana labor, toil, travail, *work: industriousness or industry, diligence, seduluousness, assiduousness (see corresponding adjectives at BUSY) 

pair n *couple, brace, yoke 

palatable, appetizing, savory, sapid, tasty, toothsome, flavorsome, relishing mean agreeable or pleasant to the taste. Palatable is not emphatic in its implication of pleasantness; therefore it seldom suggests deliciousness and is often, on the other hand, implies little more than acceptability 

(1) provide palatable meals for her family 

(2) the root, when properly cooked, was converted into a palatable and nutritious food—Prescott 

The term is used frequently of things which are mentally digested 

(1) the rebus was not palatable 

(2) I'm afraid that my remarks have not been very palatable, but I can assure you that they were sincerely meant—Mackenzie 

Appetizing implies a whetting of the appetite; it is applicable to the smell and appearance as well as to the taste of food 

(1) the appetizing odor of a roasting turkey 

(2) a convalescent requires appetizing meals 

In its extended use the word is applicable to things that stimulate a desire for more or an

See also explanatory notes facing page
palate
eagerness to go further \langle an appetizing introduction to a subject \rangle \langle the journalist with a nose for appetizing front-page tidbits—Zirato \rangle Savory, also, is applied to foods that have an agreeable odor as well as taste, but it conveys definite implications of piquancy; it is therefore applied to highly seasoned dishes as contrasted with sweet or bland dishes \langle a bland meat sometimes needs a savory sauce \rangle \langle a savory stuffing for the turkey \rangle In extended use savory may suggest a pleasantly stimulating and agreeable quality \langle engaging books . . . neither autobiography, nor fiction, nor essays, but a savory mixture of all three—N. Y. Times ⟩ but more often than not it is used in negative construction or with orthonic implications \langle the conquest of the West . . . is not among the more savory chapters in American history—Agnew \rangle Sapid is an uncommon and chiefly technical term that primarily applies to a substance able to stimulate taste receptors \langle assuming that the spaid substance . . . initiates the electrical depolarization of the taste cell \rangle Beiderer \langle In general use it may imply a marked taste or flavor \langle a spaid dish \rangle or in extended use one that is distinctly keen or exhilarating \langle a spaid and antiseptic quality of bright intelligence—Ellis \rangle Tasty implies a marked taste, but it suggests in addition an appetizing quality \langle a tasty morsel \rangle \langle a tasty cheese \rangle \langle many trees, like the cajü, which produce tasty fruits—P. E. James \rangle \langle tasty ingredients for a good, breezy book—Barrett \rangle Toothsome heightens the implication of agreeableness in palatable and may add the suggestion of tenderness or of daintiness \langle a toothsome dessert \rangle \langle one of the most toothsome chicken dinners you'll ever munch—Gelson Hardy \rangle Flavoursome usually suggests richness rather than sharpness of taste, and again implies fragrance as well as savor \langle flavoursome apricots \rangle \langle incredibly flavoursome wild mushrooms from the forests—Davenport \rangle Relishing stresses gusto in enjoyment \langle he found all this praise extremely relishing \rangle \langle find ways in which the soldier's food could be made more relishing—Current Bioq \rangle Ana *delightful, delicious, delectable, luscious: piquant, *pungent, spicy

Ant unpalatable: distasteful

palate *taste, relish, gusto, zest

pale adj 1 Pale, pallid, ashen, ash, wan, livid mean devoid of natural or healthy color as applied to a complexion or deficient in vividness or intensity of hue as applied to a specific color. Pale is the least rich of these words in implications and connotations; it merely implies relative nearness to white and deficiency in depth and brilliance of coloring \langle his face grew pale \rangle \langle the sea is a pale green in this light \rangle Pallid adds to pale the suggestions of deprivations, rather than absence, of color and of an abnormal condition \langle as weakness or faintness, or intense weariness \rangle; thus, one may be naturally pale but a person made pale by illness would usually be called pallid \langle this pallid face reveals the strain he has been under \rangle \langle trembling limbs and pallid lips—Shelley \rangle \langle its little smoke, in pallid moonshine, died—Keats \rangle Ashen and ashly definitely suggest not only the pale gray color of ashes but often, also, extreme pallor \langle as of the skin in death \rangle. A thing described as ash or ashen may therefore be said to be deadly or ghastly pale \langle the skies they were ashren and sober—Poe \rangle \langle the ash hue of age—Scott \rangle \langle oft have I seen a timely-parted ghost, of ash hue and ashly—Shak \rangle \langle Mr. Cruncher, who was all in a tremble, with an ashy and solemn visage—Dickens \rangle Wan suggests the blanching associated with an unhealthy condition or waning vitality; it usually therefore denotes a sickly paleness \langle the blasted stars looked wan—Milton \rangle \langle her poor wan face with its wastful, pitiful little smile—Hewlett \rangle Livid basically means leaden-hued; it is chiefly used of things, especially of human faces that under the influence of something that distorts them have lost their normal coloring and have assumed a dull grayish tinge \langle he grew livid with rage \rangle \langle in the greenish glass her own face looked far off like the livid face of a drowned corpse at the bottom of a pool—Conrad \rangle The word is also applied to various dull or dun colors when the hue is barely apparent \langle the livid red of the sun seen through a heavy fog \rangle \langle the livid yellow of a stormy sky \rangle \langle his trembling lips are livid blue—Scott \rangle Ana *ghastly, macabre: cadaverous, *haggard, worn

2 Pale, anemic, bloodless are comparable in their extended senses when they are applied to things and mean weak and thin in substance or in vital qualities, as though drained of blood. Pale stresses deficiency in qualities necessary to give a thing its true color or character. Sometimes it connotes lack of vigor, force, or energy \langle the French . . . shake in their fear and with pale policy seek to divert the English purposes—Shak \rangle \langle does pale little studies that are as innocuous as his earlier work was adventurous—Coates \rangle but more often it implies inadequacy or failure to measure up to the requirements of a type or standard \langle her whole existence was too pale, too inadequate in some way—too unvital—Farrell \rangle Anemic in its extended applications to things implies deficiency in the elements that make for vigor or richness, especially intellectual or spiritual vigor or richness \langle the African Negro has . . . joy of life, love of color, keen senses, beautiful voice, and ear for music—contributions that . . . might one day prove a tonic to an anemic and artless America—Zangwill \rangle \langle not even a respectable vocabulary of indecency to draw upon in support of our anemic cussing—Whicher \rangle Bloodless stresses the absence of qualities necessary to life or lifelikeness \langle as vitality, warmth, color, and human emotion \rangle \langle now if I make this sound bloodless, I am exaggerating a bit—even an old habit is livened once in a while with color—Mailer \rangle \langle books are good enough in their own way, but they are a mighty bloodless substitute for life—Stevenson \rangle Ana *insipid, wishy-washy, inane, jejune: ineffective, ineffectual

pall clay, surfeit, *satiate, sate, glut, gorge

palliate, extenuate, gloss, gloss, whitewash, whiten are comparable when they mean to give a specifically fine appearance to what is base, evil, or erroneous. Palliate may stress the concealing or cloaking or the condoning of the enormity of a crime or offense \langle retracing thus his frolics ('tis a name that palliates deeds of folly and of shame)—Cowper \rangle \langle we have not endeavored to conceal or even palliate his errors—Lockhart \rangle \langle we cannot . . . explain away this deliberate act as due to the garrulity of age, or accept the other excuses with which his admirers have sought to palliate it—L. P. Smith \rangle The word also is used especially in reference to other than moral evils in the sense of to disguise the true nature or extent of so as to soften the bad effects \langle minds which are keen and wills which are stronger than the average do not rest in “quiet desperation” palliated by illusion—Krutch \rangle \langle resort to coercive force and suppression of civil liberties are readily palliated . . . when the cry is raised that “law and order” are threatened—Dewey \rangle Extenuate (see also THIN) implies the aim to lessen \langle as by excuses or explanations \rangle the seriousness or magnitude of some crime, offense, or guilt \langle when you shall these unlucky deeds relate, speak of me as I am; nothing in what I have done or said is so mean as to deserve extenuate, nor yet so set down aught in malice—Shak \rangle \langle he did not extenuate, he rather emphasized, the criminality of Catiline and his confederates—Froude \rangle But the term is often used in the sense of to make excuses for \langle had never forgiven Cromwell the execution of the martyr Charles; and to extenuate the conduct of the
Great Roundhead captain, was to make Mrs. Doria despire and detest you—Meredith) <he permits himself...costly Havana cigars and an electric typewriter. There are circumstances that extenuate both indulgences—Kahn> Gloze and gloss often followed by over, imply an aim to veil by more or less light dissembling (as by specious comments or by flattering talk) the true harshness, unpleasantness, or disagreeableness of something; often, the words suggest a representation of what is actually disagreeable as more or less agreeable or as not distinctly unpleasant; gloze, however, is usually more derogatory than gloss which is a relatively neutral word (<the explorer has a fondness in glozing over the hardships he endured) <not wish to gloss over the fragmentary state of our present knowledge—Edington> <with the tongue of flattery glozing deeds which God and Truth condemn—Whittier> <we glozed our fraud by conducting their necessary war purely and cheaply—T. E. Lawrence> <believed in youth and did not gloze the unpleasant consequences of age—MacNeice> <Whitewash, and less often white, imply an attempt to cover up (as a crime, a defect or fault, or a person's guilt) by some such means as a superficial investigation, or a perfunctory trial, or a special report that leads to a seeming acquittal or exonerating or that gives the person or persons accused an appearance of innocence or blamelessness (<a poet and an author will go as far in whitewashing a munificent tyrant—Walpole> <by selecting the evidence any society may be relatively blackened, and any other society relatively whitened—Spencer> <his object in attempting to whitewash the evildoers was not so clear—Crofts> Ana mitigate, alleviate, lighten (see RELIEVE): condone; *excuse: *moderate, qualify, temper: cloak, mask, *disguise, dissimile, camouflage palid *pale, ashen, ashy, wan, livid palpable 1 *perceptible, sensible, tangible, appreciable, ponderable Ana *apparent, ostensible, seeming: believable, credible, colorable, *plausible Ant *insensible 2 plain, clear, *evident, apparent, manifest, patent, obvious, distinct Ana *sure, certain, positive: *noticeable, remarkable, striking, arresting Ant impalpable —Con *doubtful, dubious, questionable, problematic palpate vb *touch, feel, handle, paw palpation see under palpate at TOUCH vb palpitate beat, throb, *pulsate, pulse Ana vibrate, oscillate, fluctuate. *swing, sway palpitation beat, throb, pulsation, pulse (see under PULSATIE vb) Ana vibration, oscillation, fluctuation, swinging, swaying (see corresponding verbs at SWING) palter *lie, prevaricate, equivocate, fib Ana evade, elude, *escape: *trifle, daily palpistry trifling, trivial, *petty, puny, mealy, picayune, picayune Ana *contemptible, despicable, sorry, scurry, cheap, beggarly, shabby: abject, ignoble, *mean: *base, low, vile pamper *indulge, humor, spoil, baby, mollycoddle Ana gratify, tickle, regale, *please: fondle, pet, cosset, *caress, dandle Ant chasten pandect *compendium, syllabus, digest, survey, sketch, précis, apécoch pandemonium uproar, *din, hubbub, babble, hubbub, clamor, racket pander *cater, purvey Ana truckle, toady, *fawn, cringe: gratify, tickle, regale, *please panegyr ic tribute, eulogy, *encomium, citation Ana commendation, applauding or applause, complimenting or compliment (see corresponding verbs at COMMEMD): acclaiming or acclaim, laudation, praising or praise, extolling or extollation (see corresponding verbs at PRAISE) pang *pain, ache, throe, twinge, stitch Ana agony, *distress, suffering: anguish, *sorrow, grief, heartache, heartbreak: torturing or torture, tormenting or torment (see AFFLICT) panic terror, horror, trepidation, consternation, dismay, alarm, fright, dread, *fear Ana agitation, upsetting or upset, perturbation, disquieting or disquiet, disrupting or discomposing (see corresponding verbs at DISCOMPOSE) Con *confidence, assurance, self-possession, aplomb: *equanimity, composure, sangfroid pant aspire, *aim Ana thirst, hunger, *long, year, pine: crave, covet, *desire, wish, want pap *food, aliment, pabulum, nutriment, nourishment, sustenance paper n 1 Paper, instrument, document all mean a writing (often typed, sometimes printed) that is of value to its owner or to others who come after him as a source of information or proof of a right, contention, or claim. Paper is the most general term, applicable to such writing (as a letter, deed, certificate, or writ) filed away for future use or reference <state papers> <a peculiar difficulty I have experienced in dealing with Lord Macaulay's private papers—G. O. Trevelyan> <it was not until I was forty that my father put into my hands a few old family papers which furnished clues to an investigation of my more remote ancestry—Ellis> Instrument is a legal term applicable to a paper (as a deed, a writ, a will, or a contract) that is made and executed according to the terms of the law, as concrete evidence of some legally defined action (as a transfer of property, the enforcement of a judgment, one's decisions as to who shall inherit one's property, or the terms of an agreement) <set up a confederacy based upon a written instrument—Nevins> Document (see also DOCUMENT 1) applies to a legal instrument or to an original or authentic copy of a letter, a record, or other paper that may be used as a source of information, evidence, or proof (her letters I sent back except those of the quarreling correspondence, and those, being documents, are placed in the hands of a third person—Byron) <the Declaration of Independence stands out as one of the vital documents of history—Confield & Wilder> 2 article, *essay, theme, composition par n norm, *average, mean, median par adj mean, median, average (see under AVERAGE n) parable *allegory, myth, fable parade n 1 *display, array, pomp Ana showiness, ostentatiousness or ostentation, pretentiousness (see corresponding adjectives at SHOWY) 2 *procession, cavalcade, cortage, motorcade parade vb flaunt, expose, display, exhibit, *show Ana *reveal, disclose, divulge: *declare, proclaim, publish, advertise: vaunt, *brazen, brag, gasconade Con cloak, mask, *disguise, dissimul, camouflage paradox, antimony, anomaly are comparable terms that involve the idea of expressing or revealing an inner or inherent contradiction and are therefore not always clearly distinguished. A paradox is primarily a statement or proposition which contains a contradiction yet which, absurd as it seems to be, may still be true and in accordance with the facts and common sense (the perfectly bred man is
born, not bred, if the paradox may be permitted—Brown- nell> By extension paradox may apply to something which is known to exist, yet which when described or put in words seems incredible because it involves a logical contradiction <the old will perennially become new at the hand of genius. That is the paradox of art—Lowes> <the colonel . . . is a paradox—a well-known secret agent— Koblery> An antinomy, in philosophical use, is a contradiction of two laws, principles, or conclusions, both of which are held on good grounds or are correctly inferred from the same facts or premises; thus, the con- clusions that every material thing can be explained by mechanical causes and that some material things cannot be explained unless a final cause is postulated, present an antinomy, but in the opinion of Kant both can be accepted as rules regulative of experience. In more general use the term is often applied to one thing that contradicts another thing and is irreconcilable with it <form and expression . . . should stand toward one another not as clashing antino- mies but as reconciled opposites—Babbitl> or it may apply to a conflict (as of principles, beliefs, forces, tendencies, or aspirations) that is irresolvable in the light of present knowledge <a mind that is not naturally analytical, and conscious of the antinomies of existence—Amer. Speech> <every dogma is but one side of an inevitable antinomy— Cushing> <the antinomy between contented security and adventure for gain, between equilibrarian justice and the justice of rewards—an antinomy whose resolution calls for a reasonable compromise and not a clear-cut choice— Aron> An anomaly is something that is contrary to what it should be. For example, it may be an exception or a contradiction to a rule; it may be a freak, a monster, a sport, or a contradiction to a type; it may be an anarchy- ronism or solecism, irreconcilable with its surroundings or conditions; it may be an action, a practice, or a mood, that is in effect a denial of what one believes or teaches <there is no greater anomaly in nature than a bird that can- not fly—Darwin> <the anomaly of a war fought to pre- serve freedom by a people enslaved by prejudice— Quentin Anderson> <the political world must keep pace with the scientific world. A security league, in an age of flight, is an anomaly—E. B. White> parallel

---

A colon (:) separates groups of words discriminated. An asterisk (*) indicates place of treatment of each group.
the latter in the points under consideration. Parallels is especially appropriate when the two things compared are so like each other that their lack of divergence suggests two parallel lines; the term is often used in negative expressions (we shall seek in vain a parallel for this situation). It is hard to find a parallel for this mode of procedure; none but thyself can be thy parallel—Pope. Sometimes, especially when actual comparison is implied, the word suggests that the two things follow a similar course, order, or line of development. (Many interesting parallels are drawn with the historical plays of Shakespeare—Times Lit. Sup.) Counterpart often suggests a complementary and sometimes an obverse relationship (the two halves of a globe are counterparts of each other) (not an elaboration of Romanticism, but rather a counterpart to it, a second flood of the same tide—Edmund Wilson). More commonly, however, the word implies a duplication, especially in another sphere, or age, or language. (Synthetic chemistry has produced many a drug or perfume that has no counterpart in nature) (he saw that there was no mood of the mind that had not its counterpart in the sensuous life—Wilde) (French big businessmen and reactionaries politicians have the support of their counterparts in the U.S.—Gorell). Analogue usually implies a more remote likeness than the preceding words and suggests comparison with something familiar and tangible for the sake of clarifying an explanation or enforcing an argument. Like counterpart, it often involves reference to something in another sphere, or order, or genus (the gill in fishes is an analogue of the lung in quadrupeds). (the deepest and simplest reports of man's trouble have always been told in animal analogues—Morley) (civilization is . . . the process by which primitive packs are transformed into an analogue, crude and mechanical, of the social insects' organic communities—Huxley). Correlate retains its primary implication of correspondence, but does not retain that of a complementary relationship. A thing which is a correlate of another is what corresponds to it from another point of view or in a different order of viewing (the scientist asks what is the physical correlate of the rainbow) (words are the mental correlates of direct experience—Weaver) (Fear persisted, and with it persisted an animosity toward the sister. Undoubtedly this is the psychological correlate of the incest taboo—Dollard). Paralyze *daze, stun, bemuse, stupefy, benumb, petrify Ana *dismay, daunt, appall, horrify: disable, cripple, astound, flabbergast (see SURPRISE): Weaken, enfeeble: astound, flabbergast. A colon (:) separates groups of words discriminated. An asterisk (*) indicates place of treatment of each group.
**Modern languages and of political sciences of a college but to the several sections into which a large class of students taking a course is divided (there are twenty sections of freshman English). Except in technical use, the terms carry no explicit suggestions as to size or extent; division, however, is more often used abstractly than section, which tends to be applied to a conspicuously distinct part (as of a writing, a people, a country, a territory, or a city) (it is improper to speak of these different parts of the chemical industry as divisions, for the solidarity of the whole does not permit splitting it—Morrison). (The only important grape-growing section of Pennsylvania—Amer. Guide Series: Pa.) (The sports section of the newspaper) (entertained by all sections of the local community—Moir). Segment is often preferred to section for a part cut off by natural lines of cleavage or necessitated by the nature of the thing's construction or design (a segment of an orange) (a segment of a compound leaf) (invited to address a segment of the war college—Michener) (essential raw materials for a broad segment of American industry—Crops in Peace and War). In mathematical use segment is distinguished from sector in that segment refers to any part of a plane or solid figure cut off from the whole by a line or plane (a segment of a cylinder) (a segment of a circle is bounded by an arc and a chord) while sector refers to any part of a circle bounded by an arc and two radii (divide a circle into six sectors). In more general use sector applies to a section that roughly corresponds to a mathematical sector; thus, a sector assigned to a commander of a division in war has arbitrary bounds on sides and rear but a front that is as extensive as the range of its guns (consider the ... problem as a whole and not in segments—Vandenbergh). Fraction and fragment both apply to a part that is disconnected from a whole, especially by breaking; but fraction, probably by its confusion with the arithmetical sense of that word, often suggests a negligible part (only a small fraction of mankind is capable of enthusiasm for language, for its own sake—Inge) (some little fraction ... of your enjoyment of tragedy—Montague) and fragment applies to a random bit and especially to one of the pieces left after most of the whole has been eaten, used, worn away, or lost (they took up of the fragments ... twelve baskets full—Mt 14:20) (only a fragment of the dramatic literature that once existed—Alick) (if the novel proves to be a novel and not a collage of extraordinary fragments—Mailer). (Parael (see also bundle) is used chiefly in law with reference to land and in such idiomatic phrases as part and parcel; in all its uses it carries an underlying notion of a part having a firm and unbreakable connection with the whole to which it belongs (and I will die a hundred thousand deaths ere break the smallest part of this vow—Shak.) (a land parcel, insofar as it is a described area on the face of the earth, cannot be destroyed—Babcock). *Ant whole* 

**Part vb divide, separate, sever, sunder, divorce**  
Anna *detach, disengage: apportion, *allot, allocate, assign: *tear, rend, cleave

**Particle**  
Anna *separate, divide, part: take, *receive, accept: *have, hold, own, possess, enjoy  
**Particle 1** Particle, bit, mite, smidgen, whit, atom, iota, jot, tittle all mean a very small or insignificant piece or part. Particle is used in reference not only to substances which are actually divisible but to such things as a quality, a state, or a condition which are only theoretically so because they are intangible or ideal; usually it implies an amount within the range of visual or mental perception (a particle of matter) (he hasn't a particle of sense) (her face was ... beaded with small particles of rain—Wolfe) (there is not a particle of truth in any of these statements—Ashley Montagu). Bit usually suggests a relatively minute or the least feasible amount, extent, or degree (own a bit of land) (he doesn't like a bit) (he is a bit of a coward) (distinction on the basis of sex is the only bit of gender we have left—Laird) (little trifling useless bits of deceit—Black) (if one wished to indulge in a bit of sentimentality, one could say that the truths of science become obsolete ... but that the truth of the arts is everlasting—Boas). Mite may stress either diminutiveness in size or minuteness in amount (a mite of a boy) (a mite of a diamond) (he hasn't a mite of suspicion) (only a mite of what it could have taught was seen and learned—Fitzsimmons). Smidgen may replace bit or mite (yearning ... for a smidgen of Broadway glamour—New Yorker) but sometimes and especially in negative constructions it may go even farther in stressing minuteness or scarcity (ate squirrel and rabbit, broiled over hot coals, for there was not a smidgen of grease left—Atlantic). Whit is used chiefly in negative phrases in the sense of the least conceivable amount (it matters not a whit) (he hasn't a whit of knowledge of the subject) (the civilized man is not a whit different from the savage in this respect—Henry Miller). Atom (see also particle 2) implies an amount or a size beyond the possibility of further diminution (not an atom of dust escaped her scrutiny) (it hasn't an atom of seriousness about it—a mere footnote to history—Laski). Iota and jot both imply a minuteness suggestive of the character iota [i], the smallest letter of the Greek alphabet, while tittle, used chiefly in the phrase jot or tittle, implies a minuteness suggestive of a small diacritical mark such as the dot over an i; the three are used interchangeably to mean the smallest or most minute detail or amount (he hasn't added a jot, an iota, or a tittle to our knowledge of the subject) (Iota, however, sometimes denotes an insignificant amount, extent, or degree (of statesmanship he had not an iota—S. H. Adams) (he who adds a jot to such knowledge creates new mind—Shaw) (he meant not to lose one tittle of enjoyment—Churchill).  

**2 Particle, corpuscle, atom, molecule** in technical physical or chemical use can mean a submicroscopic division of matter. Particle, the oldest and most general of these terms, is applied especially to any of certain minute entities which have more specific designations such as ion, molecule, atom, electron, proton, and alpha particle. Particle is often used to emphasize the idea of indivisibility, commonly suggesting the entities (as protons, neutrons, and electrons) of which all matter is believed to be composed. Corpuscle may be interchangeable with particle (they [alpha particles] are corpuscles endowed with charge, with mass, and with velocity—Darrow) but more often it is specifically equivalent to elementary particle and may be applied to energy quanta (as photons or phonons) when these are considered as particulate entities (let us assume that all lighted bodies emit particles of light, or corpuscles, which, falling on our eyes, create the sensation of light—Einstein & Infeld). According to the common
modern concept, an atom is the smallest particle of an element that can exist either alone or in combination with smaller particles of the same or of a different element (an atom of hydrogen). Molecule denotes the smallest particle of an element or of a chemical combination (as a compound) that retains chemical identity with the substance in mass. Molecules are usually composed of two or more atoms, either of the same or of different elements (a molecule of water is composed of two atoms of hydrogen and one atom of oxygen).

parti-colored *variegated, motley, checkered, checked, pied, piebald, skewbald, dappled, freaked

particular adj 1 *single, sole, separate, unique, lone, solitary

Ant general 2 individual, *special, specific, especial

Ant general, universal 3 particularized, detailed, itemized, *circumstantial, minute

Ana scrupulous, meticulous, *careful, punctilious

4 fussy, squeamish, *nice, dainty, fastidious, finicky, finicking, finical, persnickety, persnickety

Ana exacting, demanding, requiring (see DEMAND): strict, *rigid, rigorous

particular n *item, detail

Ant universal: whole: aggregate

particularized particular, detailed, itemized, *circumstantial, minute

Ana accurate, precise, exact, *correct

Ant generalized

partisan *follower, adherent, disciple, sectary, henchman, satellite

Ana supporter, upholder, backer, champion (see corresponding verbs at SUPPORT): helper, aider or aid, assistant (see corresponding verbs at HELP)

Con antagonist, *opponent, adversary

partner, copartner, colleague, ally, confederate all denote an associate but they differ markedly in connotation and are not freely interchangeable. Partner implies especially an associate in a business (partnership) or one of two associates (as in some games, in a dance, or in marriage) (in mind and character Mrs. Adams was a worthy partner throughout his career—W. C. Ford) Since partner alone implies association, the addition of co-, with its implication of association, in copartner sometimes adds little or nothing to partner; thus, one may refer equally to partners or copartners in crime. Copartner, however, can distinctively imply fellow partner (the authority of a partner to bind his copartners—Encyc. Brit.) or equality of share (a copartner in that sovereignty of the people—Spence) Colleague applies typically to an associate in office or in professional or academic relations (like their colleagues elsewhere, Illinois’ lawmakers lack adequate facilities and staffs—Armbriiter) Ally and confederate, though referable to persons, more frequently denote an associated state or government. Ally suggests an often temporary association in a common cause (as the prosecution of a war) or in affairs of policy or statescraft (it is not really the treaty that makes an ally of another nation—Hayes) Confederate (see also CONFEDERATE 2) implies an entering into a confederacy or confederation and usually suggests a closer or more permanent union for strength and solidarity.

Ant rival

party 1 *company, band, troop, troupe

Ana clique, *set, coterie, circle: gathering, collection, assembly, assemblage, congregation (see under GATHER)

2 *combination, combine, bloc, faction, ring

pasquinate lampoon, squib, skit, *libel

pass vb Pass, pass away, elapse, expire mean to move or come to a termination or end. Pass and pass away imply gradual or gentle movement to another state or condition; they often imply a transition from life to death but they may suggest a transition from any one state or time or season to another (all that lives must die, passing through nature to eternity—Shak.) (when those conditions have passed away and history returns to normal—W. P. Webb) (but yet I know, where'er I go, that there has passed away a glory from the earth—Wordsworth) (the strangeness of his life passed, and he began to feel what this city was—Buck) Elapse suggests a movement that seems like the slipping and gliding away of something that moves silently or without notice; the word applies particularly to a period of time, either in reference only to itself or in reference to something that should have been accomplished within that time (became burdensome to him as time elapsed and political conditions changed—Malone) (all prophecies make sad reading when their term has elapsed—Krutch) (the period for the payment of the debt had now elapsed) Expire basically means to breathe one's last breath and hence to die; but it comprehends the extended senses as well as the ordinary sense of die, and is used in reference to many things that come to an end as if by death (the flame of the candle suddenly expired) (the society expired after a single meeting) (in the expiring, diffused twilight—Conrad) (suddenly their whispers expired—Bennett) It is often used with this underlying notion in reference to a period of time (as stated in a bond, a note, a promise, an agreement, a patent, or a lease) which has come to an end (your note, which was due on June 24, has now expired) (the two years of grace which the bank gave the city will soon expire) (when this copyright expires, it cannot be renewed, unless there is a new edition of the book) (Antony regarded the triumvirate as having expired on the last day of 33 B.C. and did not wish it renewed—Buchan)

Ana depart, leave, quit, *go, withdraw: end, terminate (see close)

pass n passage, *way, route, course, artery

pass n *juncture, exigency, emergency, contingency, pinch, strait, crisis

Ana situation, condition, *state, posture: plight, *predicament, quandary

passage 1 pass, *way, route, course, artery 2 Passage, passageway, corridor, hall, hallway, gallery, arcade, cloister, aisle, ambulatory designate a typically long narrow way connecting parts of a building or affording access to a particular room or section in it. Passage (see also WAY 1) and passageway are the comprehensive terms, usually interchangeable with any of the others. A corridor is a passageway flanked on one or both sides by rooms, apartments, compartments, or offices or leading from one part of a building to another. Hall can be applied to a corridor or to a room that serves as an entrance to a house, but hallway is used only of the former. A gallery is a corridor having a continuous row of windows; it may be a part of the building or form an enclosed veranda. An arcade is an arched and covered passageway, usually between rows of shops but, sometimes, between the front of a row of shops and the street or an open court. A cloister is a similar structure in a monastery or in a building imitating monastic architecture, but it runs along one or more sides of an open court or patio, and is arcaded or colonnaded on the outer side. An aisle is, basically, not a passageway but a part of a church or other building divided from the central part, or nave, by a row of columns or piers. The term is also applied to a passage flanked by rows of seats (as in an auditorium, a theater, a railway car,
passageway

or a bus). An ambulatory is a passageway through which one may walk; it is specifically applied to the cloister of a monastery, and to the curved passageway between the choir of a church and the chapels of an apse.

passage adj transient, transitory, ephemeral, momentary, fugitive, fleeting, evanescent, short-lived

pass away pass, elapse, expire

"death, decease, demise

pass, elapse, expire

*transient, transitory, ephemeral, momentary, passing

passage, corridor, hall, hallway, gallery, passageway

passion n suffering, agony, dolor, *distress, misery

Ana trial, tribulation, cross, visitation, affliction

fainting, emotion, affection, sentiment

Ana inspiration, frenzy: ecstasy, rapture, transport

3 lust, appetite, *desire, urge

Ana craving, coveting (see desire vb): longing, yearning, hungering or hunger, thirsting or thirst (see long vb): panting, aspiring, aiming (see aim vb)

4 Passion, fervor, ardor, enthusiasm, zeal denote intense, high-wrought emotion. Passion implies an overwhelming or dominating emotion; it may be either the most abstract or the most concrete of these terms. It may be used without implication of a specific emotion; thus, a poet without passion is a poet incapable of feeling or of displaying vehement, agitating, or soul-stirring emotion; to be in the grip of passion is to be swayed by violent emotion, but without a hint from the context the nature of the emotion remains unknown (Knape also knew that passion was powerful, heady stuff, and must be prudently dispensed—Dahl) Passion (see also feeling, desire) may specifically designate intense erotic love, or often lust, or it may designate violent rage (she flew into a passion) (I am very sorry, good Horatio, that to Laertes I forgot myself . . . but, sure, the bravery of his grief did put me into a towering passion—Shak.) Fervor and ardor both imply the kindling of emotion to a high degree of heat, but fervor more often suggests a steady glow or burning and ardor a restless or leaping flame. Fervor is associated especially with matters (as emotions that express themselves in prayer, contemplation, or devotion) involving persistent warmth; ardor, with those (as emotions that express themselves in eager longings, or zealous efforts) that suggest the violence and sometimes the transitoriness or wavering of flames (the fervor of a nun) (the ardor of a missionary) (exhorts with fervor) (dampened his ardor) (all prayed and hunted quail with equal fervor and died . . . at an advanced age—Styron) (in the prints of Harunobu there is an intense sympathy with youth, with its shyness, its tremulous aradors—Binyon) Enthusiasm often comes very close to ardor, but it may differ in its emphasis on the rational grounds for the emotion, such as thoroughgoing admiration for a person. Enthusiasm, more often than ardor, suggests the quality of a cause or end. Ardor may suggest aspiration without a clearly envisioned goal, but enthusiasm nearly always implies an objective, a cause, or an object of devotion; thus, a teacher may stimulate ardor in a pupil without necessarily directing the latter's emotion into a definite channel, but he stimulates enthusiasm only when he provides the pupil with something concrete to admire, to emulate with something concrete to admire, to emulate with something concrete to admire, to emulate with something concrete to admire, to emulate with something concrete to admire, to emulate with something concrete to admire, to emulate with something concrete to admire, to emulate with something concrete to admire, to emulate with something concrete to admire, to emulate with something concrete to admire, to emulate with something concrete to admire, to emulate with something concrete to admire, to emulate with something concrete to admire, to emulate with something concrete to admire, to emulate with something concrete to admire, to emulate with something concrete to admire, to emulate with something concrete to admire, to emulate with something concrete to admire, to emulate with something concrete to admire, to emulate with something concrete to admire, to emulate with something concrete to admire, to emulate with something concrete to admire, to emulate with something concrete to admire, to emulate with something concrete to admire, to emulate with something concrete to admire, to emulate with something concrete to admire, to emulate with something concrete to admire, to emulate with something concrete to admire, to emulate with something concrete to admire, to emulate with something concrete to admire, to emulate with something concrete to admire, to emulate with something concrete to admire, to emulate with something concrete to admire, to emulate with something concrete to admire, to emulate with something concrete to admire, to emulate with something concrete to admire, to emulate with something concrete to admire, to emulate with something concrete to admire, to emulate with something concrete to admire, to emulate with something concrete to admire, to emulate with something concrete to admire, to emulate with something concrete to admire, to emulate with something concrete to admire, to emulate with something concrete to admire, to emulate with something concrete to admire, to emulate with something concrete to admire, to emulate with something concrete to admire, to emulate with something concrete to admire, to emulate with something concrete to admire, to emulate with something concrete to admire, to emulate with something concrete to admire, to emulate with something concrete to admire, to emulate with something concrete to admire, to emulate with something concrete to admire, to emulate with something concrete to adm...
patience, long-suffering, longanimity, forbearance, resignation can all mean the power to endure or a capacity for enduring without complaint something which is disagreeable or requires effort. Patience stresses calmness or composure, not only under suffering or under provocation, but in awaiting an outcome that seems unduly or inordinately delayed, or in performing a task that makes severe demands upon one. Patience superadds to patience a submissive disposition. paunch *abdomen, belly, stomach, gut

pattern n 1 exemplar, example, *model, ideal, standard, beau ideal, mirror  
   Ana *paragon, apotheosis  
   2 *figure, design, motif, device  
   Ana *form, figure, shape, configuration, configuration

pause n Pause, recess, respite, lull, intermission are comparable when they mean a temporary cessation especially in action, in activity, or in movement. Pause, though it carries an implication of expected resumption, stresses the fact of stopping without indicating, in itself, the duration or the cause of the stop. The term is often applied to such a letup in utterance as that marked in printing by a period or a caesura or as that caused by an interruption, by hesitation, or by awaiting an answer, but it may as readily be applied to a temporary cessation of activity (as for play, for sleep, or for relaxation) (there was a short pause before he resumed speaking) (between the dark and the daylight ... comes a pause in the day's occupations, that is known as the Children's Hour—Longfellow) (there is no pause in the invention of new and appalling weapons—Grenville Clark) Recess implies a temporary cessation of work; usually it applies to an interval granted (as to legislators or students) for the sake of relaxation or diversion (the smaller boys and girls are granted a recess of ten minutes each morning) (Parliament is now in recess) (the justices adjourned for their summer recess—N. Y. Times) Respite implies a time of relief (as from labor, suffering, or war) or of delay (as before sentencing or executing) (there will be no respite for such workers for the duration of the war) (a battle that seemed to be without respite and without end—Rönlgaard) (a body of people ... thrown together for a week or so without the possibility of respite or escape—Lowes)

Lull implies a temporary cessation or marked decline of activity (as in the course of a storm, in business, or in military activity between two offenses) (after a lull the storm turned inland with increased fury) (running full tilt in most of its departments following a summer lull—Ericson) (there was a lull in the noises of insects as if they ... were making a devotional pause—Crane) Intermission basically implies a break in continuity but comes close to lull in stressing one caused by a temporary cessation (as of an action, a process, or a proceeding). However, its application is usually quite different since it usually suggests a pause available for some new or special activity (as for rest or recuperation) (the habit of stern thrift, begun in 1870 and practiced without any intermission till ... 1897—Bennett) (the attack occurred after a few pay's intermission) (the-interruption—Burke) (a break in continuity from such melancholy reflections—Burke) (a body of people ... thrown together for a week or so without the possibility of respite or escape—Lowes)

A colon (:) separates groups of words discriminated. An asterisk (*) indicates place of treatment of each group.
the actual giving of money, the term is often employed purely as a figure of speech (nothing can pay him for his pains) (the hard knowledge of the hipster that you pay for what you get is usually too bitter for the beatnik—Mailer) or it means merely to give as due or deserved (pay a compliment) or to give in the hope of a return in kind (pay attention to a young woman) Compensate is often preferred to pay when no legal obligation is implied or no payment for services is expected, because the term stresses a return, usually in money, that is regarded as an equivalent for a service given or for trouble taken or time spent (compensate a waiter for his cheerful willing service) (compensate a neighbor for taking care of one’s pets during the summer) (an epoch in which the immense costs of a war could never be compensated by any economic gains that came from it—Lerner) In this sense (see also COMPENSATE 1) compensate often does not imply an obligation to another or the passing of money; it often suggests a counterbalancing (as of something unpleasant by something pleasant or of something lost by something gained) (the beauty of the view compensated for the labor of the climb) (compensate for a feeling of loneliness by assertions of superiority—Auden) Remunerate, like pay, usually implies the discharge of an obligation in money and, like compensate, usually suggests the giving of an equivalent for services rendered rather than for goods delivered (goods with which the Cayouá is remunerated for his work for Brazilians—J. B. Watson) but unlike both of these terms it often carries a suggestion, sometimes a mere hint, sometimes a distinct implication, of a reward (he promised to remunerate the searchers handsomely) (the king remunerated them both, the former with an addition of honor, the latter with an accession of estate—Fuller d. 1661) Both compensate and remunerate can replace pay when pay might seem offensive or indelicate (the party always remunerates its faithful workers) Satisfy (see also SATISFY 1 & 3) implies the payment of something that is asked, demanded, or required especially by the terms of the law or the decree of a court (satisfy a claim) (satisfy a judgment) (death duties had been paid and the demands of creditors satisfied—Gibbons) Reimburse implies a return for money that has been expended by oneself in hope of making a profit or by another (as one’s agent or attorney) in doing one’s business (the profits of his business did not reimburse him for the money he had invested in it) (reimbursed his lawyer for earlier expenditures) (a promise of reimbursing . . . what the people should give to the king—Bolingbroke) (only Pennsylvania, of all the states, reimbursed loyalists for confiscated property—Smelser & Kirwin) Indemnify implies promised or actual reimbursement for loss (as by fire), for injury (as by accident), or for damage (as by war or disaster) (the basic purpose for which insurance exists is to indemnify persons subject to loss when such loss occurs—Hedge) (the governments of Louis XVIII and Louis Philippe so far as practicable indemnified the citizens of foreign states for losses caused by . . . Napoleon—J. B. Moore) But indemnify may approach compensate and implies less a reimbursing than a counterbalancing (he flogged them with merciless severity: but he indemnified them by permitting them to sleep on watch, to reel drunk about the streets, to rob, beat, and insult the merchants and the laborers—Macaulay) Repay and recom pense carry a weaker implication of giving or furnishing money than any of the preceding terms and a stronger implication of returning like for like; both therefore stress the demands of justice and usually the compulsion of an obligation. When the passing of money or of an equivalent is implied, repay may be preferred when there is a suggestion of giving something back that has been paid out to one (repay a loan) and recom pense when compensation for voluntary services or for losses or injuries sustained is suggested and a due or adequate return is implied (recompense these people, and especially the priest, for their great kindness—Kipling) But repay and recom pense sometimes imply reciprocation of something given, advanced, or inflicted. Repay usually implies little more than paying back in kind or amount (repay her scorn for scorn—Keats) (we never can repay your kindness) (Peacock’s fidelity as a correspondent . . . was repaid by the magnificent series of letters from Shelley—Garnett) but it is sometimes used when the return is not what might be expected but is its diametrical opposite (repay love with hate) (repaying incredulity with faith—Browning) (these Indians enabled the Pilgrims to replenish their dwindling stores, a friendly act that was later repaid with treachery—Amer. Guide Series: Me.) Recompense often in this extended sense specifically implies a desire to make amends or to atone for a wrong that has been inflicted (in some part to recompense my rash but more not so much my misled—Milton) wage or wages, salary, stipend, fee, hire, emolument Ana *reparation, restitution, indemnity, redress, amen. Daily Recorder 599 pay 599 paying paying adj Paying, gainful, remunerative, lucrative, profitable share the meaning of bringing in a return in money. Paying often implies only such a return, but it may imply a satisfactory return for the labor or effort or expenditure involved (as in a venture, a business, or a trade) (a position as office boy was his first paying job) (oats proved a paying crop) (toolmaking is one of the better paying trades) (a paying investment) (important minerals found in paying quantities in Alabama include asbestos—Willingham) Gainful applies chiefly to an endeavor (as a business or a trade) that leads to a money return whether large or small, but it may apply to persons or their acts that are motivated by a desire for gain (gainful occupations) (the lawyer’s profession is often preferred to government service as the more gainful career) (most girls choose to be gainful workers for at least a few years before marriage—Landis) (the hypocrisy that covers gainful exploitation by the pretext of a civilizing mission—Hobson) Remunerative suggests a rewarding of labor, effort, or expenditure and often implies a profit or recompense that exceeds what is usual or customary (it was a remunerative venture for all concerned) (some British farmers with land beside main lines of railways . . . find big boldly silhouetted advertisements to be the most remunerative of their crops—Montague) (the State has come nearer than usual to a useful and remunerative working partnership with the industry—Macmillan) Lucrative carries a stronger implication of large returns and applies to a business, trade, or profession or to an enterprise or undertaking that succeeds beyond one’s hopes (he made a lucrative deal when he sold his house) (a lucrative speculation in cotton futures) (contributing to the town’s prosperity and wealth was a lucrative smuggling trade—Amer. Guide Series: La.) (our rulers will best promote the improvement of the nation . . . by leaving capital to find its most lucrative course—P. M. Fraser) Profitable also is applied to what is rewarding, but it need not imply a money return (see BENEFICIAL); however it usually suggests such returns, not necessarily in a lucrative manner but in any degree that is consonant with one’s wishes or hopes (he owns a profitable hardware business) (they hoped to make a profitable investment) (follow a profitable trade) (scientific research is the development of new, more profitable products and processes—K. S. Davis) (putting to profitable use his conviction that
the atmosphere of the music should determine its . . .
presentation—Kolodin} (he spoke unreservedly and
plainly . . . ata time when it would have been profitable
to have been, at least, noncommittal—Charles Graves)

peace *true, cease-fire, armistice

peaceable *peaceful, peaceful, pacifist, pacificist, irenic

Ana *amicable, friendly, neighborly: *amiable, complaisant: *calm, placid, serene, tranquil

Ant contentious: acrimonious —Con quarrelsome, bellicose, *belligerent: *martial, warlike

pelagic *aquatic, marine, oceanic, thalassic, neritic, abyssal, lacustrine, fluvial, fluvitile

pellucid *clear, transparent, translucent, lucid, diaphanous, limpid

penchant *leaning, propensity, proclivity, flair

penalize, fine, amerce, multct mean to punish by depriving of something. Penalize usually presupposes a violation of laws or rules intended to maintain discipline or fair treatment for all; it implies exaction by an authority of a pecuniary penalty or a forfeiture of an advantage or, especially in games, the imposition of a handicap (penalize late taxpayers by adding interest to their unpaid taxes) (penalize a football team fifteen yards for holding) Fine and amerce are chiefly found in technical legal use in reference to court cases, but their implications in extended use are not materially different. They and their corresponding nouns fine and amercement are distinguishable in that fine implies that the amount exacted is, within certain limits, prescribed by the law, while amerce and amercement indicate that it has been left to the discretion of the judge (violators of the municipal parking ordinances may be fined from one to ten dollars) (the judge amerced the offender in the sum of fifty dollars) (millions of spirits for his fault amerced of heaven—Milton) Multct implies subjection to a superior power which can legally or illegally exact a penalty (usually in money) for a breach of discipline or for failure to comply with its edicts. Sometimes it merely implies a fine or amercement or a withholding of money due (nonconformists were multcct for attendance at services of their own communion) Often the word suggests forcible imposition or exaction of a heavy or oppressive penalty (the colonizers multcted the natives of their gold whenever the latter showed signs of resistance) Ana *punish, discipline, correct, chasten

pendant *hanging, suspended, suspended, suspended

A colon (:) separates groups of words discriminated. An asterisk (*) indicates place of treatment of each group.
**pervade** 1 *enter, pierce, probe

_Ana_ invade, entrench, encroach, *tresspass: *perforate, puncture, bore, prick

2 pervade, impervade, interpenetrate, *permeate, impregnate, saturate

_Ana_ insert, insinuate, interpolate, *introduce: *soak, saturate, drench, steep

**penetrate** insight, acumen, *discernment, discrimination, perception

_Ana_ sharpness, keenness, acuteness (see corresponding adjectives at SHARP): shrewdness, astuteness, perspicaciousness or perspicacity, sagaciousness or sagacity (see corresponding adjectives at SHREWDED)

**penitence, repentance, contrition, attrition, compunction**

_remonse_ denote sorrow or regret for sin or wrongdoing.

Penitence implies little more than such sorrow or regret _<the outward signs of penitence>_<all calls to penitence fall on deaf ears. Penitence implies admission of guilt and no one wishes to stand accused—Political Science Quarterly>_<the showed his penitence in many ways; the majority . . . took the attitude that no sin is beyond forgiveness if it is followed by true penitence—Latourette>

Repentance is richer in its implications, for it also implies a change of heart, an awareness of one's shortcomings morally or spiritually, or of the evil of one's actions or life as a whole _<I came not to call the righteous, but sinners to repentance—Lk 5:32>_<God of his mercy give you patience to endure, and true repentance—Shak._<there's no repentance in the grave—Watts>_<Contrition and attrition are both theological terms, and as such contrasted; only contrition is found in general use. Both imply deep sorrow for sin and the purpose of amendment, but in theological use contrition implies that one's sorrow arises out of love of God and a realization of one's failure to respond to his graces, and attrition that it arises from a lower motive, such as fear of hell or fear of the loss of heaven—O, that the vain remorse which must chastise crimes done, had but as loud a voice to warn, as its keen sting is mortal to avenge!—Shelley>

_Ana_ regret, *sorrow, anguish: humiliation, humbling, degradation, debasement (see corresponding verbs at ABASE): *qualm, scruple

_Con_ obdurate,ness or obduracy, inexorableness, adamant (see corresponding adjectives at INFLEXIBLE)

_pen name_ *pseudonym, nom de plume, alias, nom de guerre, incognito

_pennant_ *flag, ensign, standard, banner, color, streamer, pendant, pennon, jack

_penurious_ *poor, indigent, needy, destitute, impecunious, poverty-stricken, necessitous

_Ana_ impoverished, bankrupt, drained (see DEPLETE): penurious (see corresponding noun at POVERTY)

_Con_ opulent, affluent, wealthy, *rich

_pennon_ *flag, ensign, standard, banner, color, streamer, pendant, pennant, jack

_penny-pinching_ *stingy, close, close-fisted, tight, tight-fisted, niggardly, parsimonious, penurious, miserly, cheapsparing

_pensive_ thoughtful, reflective, speculative, contemplative, meditative

_Ana_ solemn, somber, *serious, earnest, sober, grave: musing, pondering, ruminating (see PONDER)

_penumbra_ umbra, adumbration, umbrage, shade, shadow

_penurious_ parsimonious, niggardly, stingy, close, close-fisted, tight, tight-fisted, miserly, cheapsparing, penny-pinching

_Ana_ avaricious, grasping, greedy, *covetous: *mercenary, venal: *mean, abject, sordid, ignoble

_penury_ *poverty, indigence, want, destitution, privation

_Ana_ *need, necessity, exigency: pinch, strait, pass, *juncture

_Ant_ luxury

_people_ n *race, nation

_peppery_ fiery, gingery, *spirited, high-spirited, mettle-some, spunky

_Ana_ impetuous, headlong, *precipitate, abrupt: *pugent, piquant, spicy, snappy

_perceive_ discern, note, remark, observe, contemplate, *see, behold, descry, esp, view, survey

_Ana_ grasp, seize, *take: *apprehend, comprehend: *enter, penetrate, pierce, probe

_percept_ sense-datum, sensum, *sensation, image

_Ana_ *idea, concept, notion: recognition, acknowledgment (see corresponding verbs at ACKNOWLEDGE)

_perceptible, sensible, palpable, tangible, appreciable, ponderable_ all mean capable of being apprehended through the senses or intellect as real and existent. _Perceptible_ may be used inclusively to describe whatever comes within the range of one's senses and can be recognized in itself or by certain signs _<perceptible sounds>_ _<the ship is barely perceptible on the horizon>_ _<without argument, without any perceptible stages, the estrangement of almost a year was gone—Wouk>_ _<something strange was in the air, perceptible to a little boy but utterly beyond his understanding—H. G. Wells>_ It may also be used with or without qualification (as by just, scarcely, or barely) to describe something that just passes a borderline (as that between invisibility and visibility or inaudibility and audibility) _<a perceptible change in her tone>_ _<there are perceptible differences between surprise and astonish>_ _<a perceptible flavor of onion>_ _<her remark had no perceptible relevance to the topic of conversation>_ Sensible (see also MATERIAL, AWARE) may be used to describe whatever is clearly apprehended through the bodily senses or which impresses itself strongly on the mind through the medium of sensations _<a rich and thronging world of sen-

_Ant_ antonyms

_Con_ contrasted words

See also explanatory notes facing page 1
sible things—Lowes) your true ideas of sensible things do indeed copy them—James) In contrast with perceptible, however, sensible applies to what is more obvious, even sometimes to what is patent through its effects or signs; thus, a sensible change in tone is one which is immediately recognized; a sensible difference in a person’s expression is one which is quickly detected (the direct, sensible influence of Protestantism has been to isolate and to individualize—Brownell) every owner is entitled to have the water come on to him without sensible diminution as regards quantity and sensible alteration as regards quality—F. D. Smith & Barbara Wilcox) Both palpable and tangible in their primary senses may be used to describe anything which is perceptible through the sense of touch. Palpable, however, although it is used of what is felt by touching with the tips of the fingers (a palpable powder that one feels gritty) (touch beauty as though it were a palpable thing—Maugham) (before the clouded night dropped its mysterious veil, it was the immensity of space made visible—almost palpable—Conrad) as often implies a sensation produced as a sensation sought and therefore may be applied to whatever evokes a response from tactile receptors in any part of the body (there is a palpable chill in the air) Tangible, on the other hand, is applied primarily to things which may be or are handled or grasped (if an infant is not provided with light tangible objects, he will play with a shadowed or shadowed (dots and spots or diversities in tangible form) (a cloud, a pillar of fire, a tangible physical something—London) In their secondary senses these two words diverge widely. Palpable, in one of its most common meanings, implies a high degree of perceptibility (see under EVIDENT); in poetic use, especially when applied to an immaterial thing, it suggests an almost physical awareness of its existence or reality (what happiness to live when every hour brings palpable access of knowledge—Wordsworth) Tangible in its extended senses is applied to things that can be thought of as having real, independent, or objective existence whether they are apparent to the senses or not or whether they can be handled or not; thus, tangible ideas are those that can be grasped by the mind and made objects of thought; tangible advantages are those having a substantial character; tangible assets are those (as equipment and inventory) that can be appraised with reasonable accuracy as distinguished from those (as goodwill) that are intangible (the conquest of a territory meant a tangible advantage to the conqueror—Angell) Appreciable is applicable to whatever is large enough to be measured, weighed, valued, or otherwise estimated; thus, a perceptible change in the temperature may be so slight a change that it almost but not quite escapes notice; a palpable change in temperature may still be slight, but it is great enough to make it definitely felt; an appreciable change in temperature may also be slight, but its extent is determinable by reference to a thermometer (the current . . . generated is small but appreciable—Engel) a satellite must be launched above the appreciable atmosphere—Newell) But appreciable may lose any clear notion of measurability and then often approaches considerable or significant in meaning (there had been an appreciable feeling of strain, and a corresponding rise in your sense of the obligation of meeting it—Mary Austin) There was no appreciable craft tradition in astronomy before modern times—S. F. Mason) Ponderable is applicable to whatever can be weighed either physically or mentally (something ponderable from the outer world—something of which we can say that its weight is so and so—Jeans) The word tends, however, to be applied to what is appreciable in terms of weight or significance as distinguished from what is so intangible as to elude such determination (exert a ponderable influence upon the events of his time) Ana *clear, lucid, perspicuous: *noticeable, conspicuous, signal: discerned or discernible, noted or notable, observed or observable (see corresponding verbs at SEE) Ant imperceptible perception penetration, insight, acumen, *discernment, discrimination Ana appreciation, comprehension, understanding (see corresponding verbs at UNDERSTAND): sharpness, keenness, acuteness (see corresponding adjectives at SHARP) perch vb *alight, light, stand, roost percussion concussion, crash, shock, *impact, impingement, collision, jar, jolt Ana striking, hitting, smiting (see STRIKE): vibration, oscillation, fluctuation (see corresponding verbs at SWING) perdurable durable, permanent, stable, *lasting, perpetual Ana enduring, abiding, persisting, continuing (see CON- TINUE): *everlasting, endless, interminable Ant fleeting peremptory imperative, imperious, *masterful, domineering Ana decisive, *decided: positive, certain (see SURE): *dictatorial, dogmatic, oracular perennial perpetual, incessant, unremitting, constant, *continuous, continual Ana *lasting, perpetual, perdurable, stabled, *everlasting, unceasing perfect adj Perfect, whole, entire, intact are comparable when they mean not deficient, defective, or faulty in any particular. Perfect is the usual term to describe such a condition, for it may imply not only the presence of every part, every element, and every quality necessary to a thing in its finished or fully developed state, but the soundness, the proportionateness, and the excellence of each part, element, or quality (a perfect set of teeth) (a perfect diamond) (a physically perfect infant) (the memory of that night remained intact and perfect—Wylie) The term is also applicable where there is no more definite measure or test than correspondence to a very high standard of excellence (a perfect gentleman) (perfect coloring) (a perfect poem like Lycidas, a perfect fiction like Esmond, a perfect handling of a theory like Newman’s Idea of a University—Pater) (he is the perfect writer of my generation, he writes the best sentences word for word, rhythm upon rhythm—Mailer) or to an archetype, definition, or pattern (a perfect hexagon) (a perfect Greek temple) or to a conception that represents an ideal or personal vision of the highest possible of its kind (perfect virtue) The term is also used in the sense of utter or complete (he is a perfect fool) (that is perfect nonsense) Whole and entire (see also whole 2) are somewhat elevated and often reminiscent of scriptural use. Whole usually implies a perfection, typically a moral or physical perfection, that can be sought and attained or that can be lost and regained; it usually suggests the attainment of or restoration to health, soundness, completeness (here, with one balm for many fevers found, whole of an ancient evil, I sleep sound—Housman) (one silver spider of machine, so intricate and whole as to appear rightly sufficient in itself—Terry Southern) (daughter, be of good comfort; thy faith hath made thee whole—Mt 9:22) Entire usually implies a physical, intellectual, moral, or spiritual perfection that derives from the completeness, integrity, soundness, and often the freedom from admixture of the thing so described; more than whole, it suggests a perfection that is unimpaired or without sign of previous imperfection; thus, a collection is entire when no constituent item is missing; an entire horse is an adult uncastrated male (h
grant me, Phoebus, calm content, strength unimpaired, a mind entire—Conington\> Intact usually implies the re-
tention of the perfection of a thing in its finished or its natural or its original state; often it suggests its passage through some experience that might have destroyed its soundness, integrity, or wholeness (that high courage which enabled Fielding . . . to keep his manly benevolence and love of truth intact—Thackeray) (had seen many storms, and had reached middle age with some illusions intact—Michener) (I am . . . thankfull that I was among the last persons to see the original Rheims intact. The cathedral . . . remains enshrined . . . in my memory forever—Ellis)\>

>Ana* pure, absolute, simple, sheer: *consummate, finished, accomplished: *impeccable, flawless, faultless, errorless

>Ant imperfect —Con* deficient, defective

>perfect vb* unfold, evolve, develop, elaborate

>perfection virtue, merit, *excellence

>failing

>perfervid fervid, *impassioned, passionate, ardent, fervent

>Ana* intense, vehement, fierce, violent: heightened, enhanced, intensified (see INTENSIFY)

>perfidious *faithless, false, disloyal, traitorous, treacherous

>Ana* mercenary, venal: disaffected, alienated, estranged (see ESTRANGE): deceitful, *dishonest: perjured, forsworn (see PERJURE)

>perforate, puncture, punch, prick, bore, drill mean to pierce through so as to leave a hole. Perforate, although it can mean to pierce, is used mainly with reference to the action of a machine or instrument which makes usually small round holes in a line or pattern (as for ready tearing, for ornamentation, or for marking with a symbol, device, or name) (perforate a sheet of postage stamps) (perforate leather for the tips of shoes) (perforate laundry tabs) (a set of pins that perforates an entire sheet at one operation—Al Burns) Puncture suggests the intentional or accidental entrance of a sharp pointed instrument or thing into a tissue, substance, or material (punc-
ture the arm with a hypodermic needle) (the tire was punctured by a sharp tack) (as the rush began, there flashed through my mind a picture of the ignominious fate which awaited me—punctured to death by umbrellas—Heiser) Since puncture is often associated with the sudden release of air from an inflated object (as a balloon or a pneumatic tire) the word frequently connotes the sudden deflation of something inflated, unduly pretentious, or pompous (puncture a scheme) (the effect of Mark Twain's humorous assault on the dignity of General Grant was to reduce him not to the human but to the common level, to puncture the reluctant reverence of the groundlings—Brooks) Punch is often interchangeable with perforate especially when the use of a mechanical device called a punch is implied (punch holes in a piece of brass) (rail-
way conductors are instructed to punch the tickets pre-
sented them) (invented a system of dot-and-dash symbols which could be punched out on thick paper and read by touch at night—Time) Prick implies a piercing with some-
ting that has a sharp fine point and therefore suggests a very small hole or a superficial wound (prick oneself with a needle) (prick out a design on a piece of canvas) In ex-
tended use prick usually stresses either the sharp sting that accompanies the pricking of the skin (at the older man's laughter he felt his pride prude and prick—Buck) or the delicacy and clearness of a pattern or design (the design is pricked out, so to speak, by the rhymes—Lowes) Both bore and drill imply the use of a mechanical means in making a hole. But bore stresses the removal of materials and therefore is employed when there is a sug-
gestion of excavation by hand or machinery (bore a hole in the ground for a fence post) (bore a tunnel through a mountain) or of the use of a rotary tool (as an auger or gimlet) (bore holes in a plank) or of the use of a boring tool designed for the finishing of roughly made holes by enlarging them and by making them exact in size and true with relation to a specified center line (bore the barrel of a gun) Drill commonly implies the use of an instrument or machine equipped with a pointed or sharp rotating tool for boring holes in such hard substances as metal and stone (drill holes in a steel plate) (a dentist drills a tooth to remove decayed material and form a base for a filling) In their extended senses bore and drill (see also PRACTICE) carry differing connotations, bore suggesting the slow or continuous forcing of a passage through (bore one's way through a crowd) (the sound of an airplane bored niously into the ears of the crowd—Wooll) and drill, the forced entrance of something through a succession of efforts or through persistence (is heavily and harshly written, and that is too bad, for the ideas are exciting if the reader can drill through to them—Mailer)\>

>Ana* enter, penetrate, pierce, probe

>perform vb Perform, execute, discharge, accomplish, achieve, effect, fulfill are comparable when they mean to carry out or into effect. Perform, sometimes merely a formal synonym for do, is more often used with reference to processes than to acts. One performs processes that are lengthy or exacting or ceremonial in character (perform a play) (perform a surgical operation) (perform the marriage service) (a solemn sacrifice, performed in state—Pope) One performs acts that are distinguished or striking (perform feats of skill) When the end rather than the means to the end is stressed, what is performed is, usually something undertaken or pledged (lobbyists perform a legitimate, even necessary, function—Armbrister) One executes what exists in design or intent by bringing it into being or by putting it into effect (the heads of departments are . . . political or confidential agents . . . merely to execute the will of the president—John Marshall) (the escape was planned meticulously and executed boldly—Edmond Taylor) Sometimes execute is used in place of perform of a process involving great skill or a highly exacting technique (few dancers can execute an adagio beautifully) One discharges duties or obligations when one goes through a required round of tasks (I had discharged my confidential duties as secretary . . . to the general satisfaction—De Quincey) Accomplish usually stresses the completeness of a process rather than the means bore with which it is carried out. One accomplishes something begun or something which there is reason to expect (it took us twenty-three days to accomplish the return journey—Hudson) (this project was so vast and so quickly accomplished that it has no parallel—Stoumen) Sometimes accomplish implies the fruitfulness of effort or the value of the results obtained (because of his efforts things are accomplished—Anderson) (there's very little to be accomplished by telling men anything. You have to show them—Mary Austin) Achieve adds to accomplish the implication of conquered difficulties. One achieves a work, a task, or an enterprise that is of great importance and that makes unusual demands (as on one's energy, willpower, or resources) (the American public schools achieve . . . the task of transforming a heterogeneous selection of mankind into a homogeneous nation—Russell) Effect implies obstacles to be removed but, unlike achieve, it emphasizes inherent force in the agent rather than such personal qualities as daring and perseverance. Also, it is often pred-

>Ana analogous words Ant antonyms Con contrasted words See also explanatory notes facing page 1
iated things as well as of persons (only two prisoners effected their escape) <taxation as an instrument for effecting a more equal distribution of income—Shaw> <a neurotic general overcome with work may believe he has the power to effect nothing—Mailer> Fulfill implies a full realization of what exists potentially, or hitherto in conception, or is implicit in the nature or the sense of responsibility of the agent (a law that fails to fulfill its intended end) <fulfill a promise> <a sense of the failure of life to fulfill its ultimate expectations—Rees> Ana *reach, gain, compass, achieve, attain: finish, complete, conclude (see close vb)

**performer** *actor, player, mummer, mime, mimic, thes

plan, impersonator, trouser

**perfume** *fragrance, bouquet, redolence, incense

**peril** *danger, jeopardy, hazard, risk

Ana menacing or menace, threatening or threat (see threaten): exposure, subjection, openness, liability (see corresponding adjectives at liable)

**perilous** *dangerous, hazardous, risky, precarious

Ana desperate, forlorn, hopeless (see despondent): chancy, chance, haphazard, *random

**perimeter** *circumference, periphery, circuit, compass

**period** *epoch, era, age, aeon all denote a portion or division of time; epoch and era can also denote an event regarded as the beginning of a portion or division of time. Period is the generic term, designating an extent of time of any length for whatever purpose delimited (request a one-minute period of silence as a tribute to a dead person) <it began in 1915 in one of the darkest periods of the first world war—Pollock> <was returned for eight successive Congresses—a period of seventeen years—W. C. Ford>

**Epoch** can denote the starting point of a new period, especially as marked by striking or remarkable changes or events (this is an epoch . . . the end and the beginning of an age—H. G. Wells) or it may apply to such a new period (a phenomenon of our own special epoch, a man who couldn't . . . be a writer in the only meaning of the term, but who can and probably will write a book—Purdy) <Dante's work . . . initiated a new epoch in literature—R. A. Hall>

**Era** applies to a period characterized especially by some new order of things (a better intellectual era is dawning for the working men—Kingsley) <the Victorian era> <an era of singular crisis and upheaval—Aldridge> Age, usually interchangeable with but possibly more specific than era, is frequently used of a period dominated by some central figure or clearly marked feature (the age of Pericles) <the Bronze Age> <the French Revolution and its age—Arnold> Aeon applies to an immeasurably or indefinitely long period of time (aeons of primeval power have shaped that pillared bulk—Gibson) <during the three terrible hours . . . he had lived centuries of pain, aeon upon aeron of torture—Wilde>

**periodic** *intermittent, recurrent, alternate

Ana *fitive, spasmodic, convulsive: sporadic, occasional (see infrequent)

**periodical** n *journal, magazine, newspaper, review, organ

**peripatetic** *itinerant, ambulatory, ambulant, nomadic, vagrant

**periphery** *circumference, perimeter, circuit, compass

**periphrasis** *verbiage, redundancy, tautology, pleonasm, circumlocution

**peristyle** *colonnade, arcade, arcature, portico

**perjure**, **forswear** are comparable when they mean to violate one's oath or, when used reflexively, to make a false swearer of oneself. In general use perjure is often employed less precisely than in law, where it is a technical term meaning to make a willfully false statement of fact or sometimes of an intention to do something, while under oath or under a solemn affirmation to tell the truth (the judge was convinced that the witness had perjured himself). In general use perjure often implies making a liar of oneself whether one is under oath or not (when a native begins perjury he perjures himself thoroughly. He does not boggle over details—Kipling) (he thanked her, with as much enthusiasm as he could muster without actually perjuring himself—Archibald Marshall> **Forswear** (see also ABJURE) often implies a violation of an oath, promise, or vow (he swore a thing to me on Monday night, which he forswore on Tuesday morning—Shak.) <thou shalt not forswear thyself, but shalt perform unto the Lord thine oaths—Mt 5:33> but it may also suggest untruth or ill faith to something (as one's principles, one's beliefs, or the laws of one's country) as sacred as an oath (Shelley indignantly refused to "forswear his principles" by accepting "a proposal so insultingly hateful"—Arnold> Ana *deceive, delude, mislead, beguile: lie, prevaricate

**permanent** *lasting, perdurable, durable, stable, perpetual

Ana perennial, constant, continuous, *continual

**periwinkle** temporary: ad interim (of persons)

**permeate, pervade, penetrate, interpenetrate, impregnate, saturate** can all mean to pass or cause to pass through every part of a thing. **Permeate** may be used in reference to either a material or an immaterial thing and implies diffusion through all the pores or interstices of some substance or entity (the rain has permeated the soil) (the air is permeated by the pungent scent of flowers—Amer. Guide Series: N. C.) (in . . . the Elizabethan age) English society at large was accessible to ideas, was permeated by them—Arnold> <the sense of beauty had permeated the whole nation—Binyon> <the religious issue permeated every meeting I conducted—Michener>

**Pervade** is a very close synonym of permeate, but it distinctively carries a heightened suggestion of diffusion throughout every part or parcel of the whole and it is more often used in reference to such matters as places, writings, and works of art than to purely material things (a deep and solemn harmony pervades the hollow vase from steep to steep—Wordsworth) (a principle which so entirely pervades the constitution . . . as to be incapable of being separated from it—John Marshall> <a kind of easy morality seems to pervade all levels of the state government—Armbrister> **Penetrate** (see also enter 1) may be preferred to permeate or pervade when there is the intent also to suggest the entrance of something that goes deeply or profoundly into the essence or nature of a thing, thereby giving it its characteristic quality or efficient force (a whole nation . . . penetrated with an enthusiasm for pure reason, and with an ardent zeal for making its prescriptions triumph—Arnold> <a letter penetrated with affection for the old plain edifice and its memories—Quiller-Couch> <a commanding significance, which penetrates the whole, informing and ordering everything—Leavis> **Impenetrable** is an intensive of penetrate implying a more thorough and often a diffusive penetration (power to isolate and impenetrable Poland—Gunther) (the church structure is backed up and impenetrated by the kinship structure—Vogt & O'Dea> **Interpenetrate**, too, may imply more than thorough penetration or penetration into, within, or throughout (Westerners who interpenetrated the East in the nineteenth century—Davis) but distinctively it may imply a mutual penetration (the state and the economy interpenetrate; during slump, war, and boom, the tie-ins tend to become ever closer—Labor and Nation) <had both imagination and a stubborn will, curiously balancing and interpenetrating each other—Cather> Im-
permission

pregnate often carries a stronger implication of the operation of a causative power (as a human agent) than any of the preceding terms; it also suggests a filling of every available part or portion of a whole so that the thing which enters or is entered is diffused throughout the entire substance, structure, work, or group (the water is impregnated with magnesia—Huxley) (any judge who has sat with juries knows that . . . they are extremely likely to be impregnated by the environing atmosphere—Justice Holmes) (a very notable poem impregnated with the pessimism of a time—Lovett) Saturate (see also SOAK) implies impregnation to the point where no more of the thing which enters can be taken up or absorbed; the term is often used in reference to permeate or pervade when what permeates or pervades is highly obvious, deeply ingrained, or overabundant (the smell, sweet and poignant beyond imagining, saturated the air—Wouk) (verse that is saturated with emotion—Lowes) (the air is saturated with golden light—Diamant)

Ana *infuse, imbue, ingrain: drench, steep, *soak, saturate: *inform, animate, inspire, fire

permission, leave, sufferance denote the sanction which enables one to do something that requires the consent of those in authority. Permission is the ordinary term except in some conventional phrases; it commonly implies the power or authority to grant or to refuse what is asked (have the owner's permission to hunt on his estate) (The horses can go in our barn. I'm sure Mr. Forrester would have no objection.) She spoke as if he had asked her permission—Cather Leave differs very little from permission. It occurs chiefly in conventionally courteous phrases such as "by your leave," "to ask leave," and "give me leave," but it may be used elsewhere in place of permission (ask for leave to remove papers from a file) In military, naval, and some official use the term implies official permission to absent oneself from one's duties or from one's station for a fixed period of time, or the furlough or absence so permitted (granted a leave of thirty days) (after being absent without leave for a month, the soldier was arrested as a deserter) (at home on sick leave)

Sufferance usually implies a neglect or refusal to forbid and therefore suggests either a tacit permission withdrawal on cause or, more often, merely allowing a person to be present or to do something (you are here only on sufferance and if you want to stay, you must listen without interrupting) (he comes among us on sufferance, like those concert singers whom mamma treats with so much politeness—Thackeray)

Ana authorization, commissioning or commission, licensing or license (see corresponding verbs at AUTHORIZE): letting, allowing (see LET): sanctioning, approval, endorsement (see corresponding verbs at APPROVE)

Ant prohibition

permit vb *let, allow, suffer, leave

Ana *authorize, license, commission: sanction, endorse, *approve

Ant prohibit, forbid

permutation mutation, *change, vicissitude, alternation

Ana moving or move, shifting or shift, removing or remove (see MOVE): transformation, conversion, metamorphosis (see under TRANSFORM)

pernicious, baneful, noxious, deleterious, detrimental are comparable when they mean exceedingly harmful but they differ as to the kind and extent of the potential for harm. Something is either pernicious or baneful which is irreparably harmful but pernicious is more often applied to things that harm exceedingly or irreparably by evil or by insidious corrupting or enervating and baneful to those that poison or destroy (pernicious anemia) (a pernicious influence) (the effects of false and pernicious propaganda cannot be neutralized—Huxley) (pernicious social institutions which stifle the nobler impulses—Parrington) (the baneful notion that there is no such thing as a high, correct standard in intellectual matters—Arnold) (they were under as little personal restraint as was compatible with their protection from the baneful habit of swallowing one another—Bierce) (the full extent and degree of their baneful psychological influence is quite inadequately realized—Moberly) Something is noxious which is harmful especially to health of body or mind (a cold noxious wind—Haughton) (only when the educator shall have been educated, the air cleared of noxious failancies . . . will the reign of Humbug come to an end—Grandgent) Deleterious is used chiefly of something which causes harm when taken into the body (as into the digestive or respiratory tract) and may suggest obscure or ill-understood effects (many drugs that seem so good in the first trials prove to have deleterious aftereffects—Heiser) (this gas was well known to be deleterious—John Phillips)

Detrimental, like deleterious, generally suggests a much lower degree of harmfulness than the remaining terms; typically it imputes an impairing or hampering quality to the agent or an impaired or hampered condition to the one acted upon (a federal-scholarship program is a project worthy of our united support, provided it can be administered at the state level, free from political or other detrimental influences—L. M. Chamberlain) (they both ran down the theory as highly detrimental to the best interests of man—Peacock) (bismuth is considered to be a detrimental impurity in refined lead—Pasterneck) (although too rich a diet is harmful to calves of both sexes, the detrimental effects are less marked in a bull calf than in a heifer—Farmer's Weekly)

Ana baleful, malignant, *sinister, malefic, maleficient: *poisonous, venomous, toxic, pestilent, miasmatic: injurious, hurtful, harmful, mischievous (see corresponding nouns at INJURY)

Ant innocuous

perrnicky persnickety, fastidious, finicky, finicking, finical, *nice, dainty, particular, fussy, squeamish

Ana exacting, demanding, requiring (see DEMAND): annoyed, vexed, irked (see ANNOY)

perpendicular *vertical, plumb

Ana *steep, abrupt, precipitous, sheer

Ant horizontal

perpetrate *commit

Ana accomplish, achieve, effect (see PERFORM)

perpetual 1 *lasting, permanent, perdurable, durable, stable

Ana *everlasting, endless, unceasing, interminable: eternal, sempiternal. *infinite

2 *continual, continuous, constant, incessant, unremitting, perennial

Ana enduring, persisting, abiding, continuing (see CONTINUE): set, settled, fixed, established (see SET vb)

Ant transitory, transient

perplex *puzzle, mystify, bewilder, distract, nonplus, confound, dumbfound

Ana disturb, perturb, upset, *discompose: baffle, balk, thwart (see FRustrate): astound, amaze, astonish, *surprise

perquisite *right, prerogative, privilege, appanage, birthright

Ana *worry, annoy, harass, harry: torture, torment, rack (see AFFLICT): *bait, badger, hound, ride

Con *indulge, pamper, humor: favor, *oblige, accommodate: *support, uphold, champion, back

See also explanatory notes facing page 1
persevere, persist are both used in reference to persons in the sense of to continue in a given course in the face of difficulty or opposition. Persevere nearly always implies an admirable quality; it suggests both refusal to be discouraged by failure, doubts, or difficulties, and a steadfast or dogged pursuit of an end or an undertaking (I will persevere in my course of loyalty, though the conflict be sore between that and my blood—Shak.) (For, strength to persevere and to support, and energy to conquer and repel — these elements of virtue, that declare the native grandeur of the human soul—Wordsworth) (I do not intend to take that cowardly course, but, on the contrary, to stand to my post and persevere in accordance with my duty—Sir Winston Churchill) Persist (see also CONTINUE) may imply a virtue (this is the poetry within history, this is what causes mankind to persist beyond every defeat—J. S. Untermeyer) but it more often suggests a disagreeable or annoying quality, for it stresses stubbornness or obstinacy more than courage or patience and frequently implies opposition to advice, remonstrance, disapproval, or one's own conscience (persist in working when ill) (it is hard to see how they can have persisted so long in inflicting useless misery—Russell)

Ana *continue, abide, endure, last
Con vary, *change, alter: waver, vacillate, falter, *hesitate

persiflage *badinage, raillery
Ana bantering or banter, chaffing or chaff (see BANTER): ridiculing or ridicule, twitting, deriding or derision (see corresponding verbs at RIDICULE)

persever 1 *persevere
Ant desist — Con continue, cease, *stop, quit
2 *continue, last, endure, abide
Ant desist — Con *stop, cease, discontinue

persnickety *pertinacious, fastidious, finicky, finicking, finical, *nice, dainty, particular, fussy, squeamish
Ana exacting, demanding, requiring (see DEMAND): annoyed, vexed, irked (see ANNOY)

person *entity, being, creature, individual

personality character, individuality, temperament, *disposition, temper, complexion

perspicacious *shrewd, sagacious, astute
Ana *sharp, keen, acute: penetrating, piercing, probing (see ENTER)
Ant dull

perspicuous *clear, lucid
Ana manifest, *evident, plain, distinct: *explicit, express, specific, definite
Con *turbid, muddy: inflated, flatulent, turbid, turgid

persevere *to continue in a given course in the face of difficulty or opposition

pertinent *relevant, germane, material, apposite, applicable, apropos
Ana fitting, apt, happy, felicitous (see FIT): pat, *seasonable, opportune, timely, well-timed
Ant impertinent: foreign

perturb disturb, agitate, upset. *discompose, disquiet, fluster, flurry
Ana *annoy, vex, irk, bother: *confuse, muddle, addle: confound, nonplus, distract, bewilder, dumbfound (see PUZZLE vb)

pervade *permeate, penetrate, impenetrable, interpene-trate, impregnate, saturate
Ana *infuse, imbue, ingrain, leaven: *inform, animate, inspire, fire

perseverse *contrary, restive, balky, froward, wayward
Ana *unruly, ungovernable, recalcitrant, refractory: *ob-stinate, stubborn, mulish, pigheaded, stiff-necked: fractionist: *irritable, peevish

pervert vb deprave, corrupt, *debase, vitiate, debauch
Ana *abuse, misuse, ill-treat, maltreat, mistreat, outrage: contort, distort, warp (see DEFORM)

perverted corrupted, depraved, debased, vitiated, de-bauched (see under DEBASE)
Ana distorted, contorted, warped (see DEFORM): abused, misused, outraged (see ABUSE)

pessimistic *cynical, misanthropic, misogynic
Ana gloomy, morose (see SULLEN): depressed, oppressed, weighed down (see DEPRESS)
Ant optimistic — Con sanguine, *confident, assured

pester plague, tease, tantalize, *worry, annoy, harass, harry
Ana *bait, badger, heckle, chivy, fret, gall, chafe (see ABRADE): perturb, disturb, agitate, upset, *dis-compose

pestilent, pestilential *poisonous, venomous, virulent, toxic, mephitic, miasmic, miasmatic, miasmal
Ana *infectious, contagious, catching: noxious, *per-nicious, baneful, deleterious

pet vb *caress, fondle, cosset, cuddle, dandle
Ana *indulge, humor, pamper, mollycoddle, baby

petite *small, little, diminutive, wee, tiny, teeny, weeny, minute, microscopic, miniature

petition n *prayer, suit, plea, appeal

petition vb pray, sue, plead, appeal (see under PRAYER)

petrify vb deposit, precipitate (see corresponding nouns at DEPOSIT): *compact, consolidate
2 *daze, stun, bemuse, stupefy, benumb, paralyze
Ana terrify, alarm, *frighten, startle: appall, horrify, *dismay

petty vb *irritable, fractious, peevish, petulant, snappish, waspish, huffy, fretful, querulous

petty, puny, trivial, trilling, paltry, measly, picayunish, picayune mean little and insignificant, often contemptibly so. Something is petty which by comparison with other things the same in kind but different in size, importance, gravity, or moment is among the smallest or least important (a petty interest) (a petty prince) (giants beside whom we seem petty—Sinclair Lewis) (Hunt does one harm by making fine things petty and beautiful things hateful—Keats) The word often connotes small-mindedness ( petty gossip) (explaining that only the petty vengeance of men who hated Roosevelt had produced the law that prohibited . . . a third term—Michener) (divine inhabitants of a world apart, for whom nothing sordid, nothing petty, and nothing painful had any existence—Sackville-West) Something is puny which is so small or slight as to seem

resolute, steadfast, staunch (see FAITHFUL): headstrong, willful (see UNRULY)

A colon (:) separates groups of words discriminated. An asterisk (*) indicates place of treatment of each group.
impotent, feeble, or completely without vitality (none of your thin, puny, yellow, hectic figures, exhausted with abstinen-ence and hard study—Smollett) (one no sooner grasps the bigness of the world’s work than one’s own effort seems puny and contemptible—J. R. Green) Something is trivial which seems petty and commonplace and scarcely worthy of special consideration or notice (that strange interest in trivial things that we try to develop when things of high import make us afraid—Wilde) (he regarded no task as too humble for him to undertake, nor so trivial that it was not worth his while to do it well—Huxley) The term is often applied to persons, minds, or activities which reveal engrossment in trivial affairs or a lack of serious or profound interests (she knew him for a philanderer, a trivial taster in love and life—Rose Macaulay) (the incessant hurry and trivial activity of daily life—Elliot) Something is trifling which is so small as to have little if any value or significance (our ordinary distinctions become so trifling, so impalpable—Hawthorne) (a considerable sum was paid to Egmont and a trifling one to the Prince—Motley) Something is paltry which is ridiculously or contemptibly small in comparison especially to what it should be (a paltry allowance) (our little ambitions, our paltry joys—Benson) (the paltry prize is hardly worth the cost—Byron) Something is meagly which is contemptibly small (as in size or quantity) or petty (a measly portion of pie) (snatch at a little measly advantage and miss the big one—Anderson) Something is picayunish or picayune which is insignificant in its possibilities or accomplishments or hopelessly narrow in outlook or interests (a picayunish policy) (a lifetime of picayunish drudgery in the company of louts—H. L. Davis) (the obvious futility, the picayune, question-begging character, of such ethical analyses—Asher Moore) (a picayune congressman) Ana *small, little, diminutive, minute Ant important, momentous: gross petulant *irritable, fractious, peevish, pettish, snappish, waspish, huffy, fretful, querulous Ana cross, cranky, touchy, testy (see irascible): *impatient, restive, fidgety phantasm 1 *apparition, phantom, wraith, ghost, spirit, specter, shade, revenant Ana *delusion, illusion, hallucination 2 *fancy, fantasy, phantasy, vision, dream, daydream, nightmare phantasy *fancy, fantasy, phantasy, vision, dream, daydream, nightmare phantom *apparition, phantom, wraith, ghost, spirit, specter, shade, revenant Ana counterfeit, deception, *imposture: *delusion, illusion, hallucination phrasical hypocrical, sanctimonious, canting (see under hy-poCRisy) phrasism *hypocrisy, sanctimony, cant pharmaceutical n *drug, medicinal, biologic, simple pharmacist *drugist, apothecary, chemist phase, aspect, side, facet, angle are comparable when they denote one of the possible ways in which an object of contemplation may be seen or may be presented. Phase may distinctly imply a change in the appearance of a thing without a change in the observer’s point of view. From its original denotation as one of the four different shapes which the moon apparently assumes during its waxing and waning it often suggests a cyclical change in appearance (the wheel of the world swings through the same phases. . . . Summer passed and winter thereafter, and came and passed again—Kipling) In extended use it is often applied to an outward and passing manifestation of a stage in growth, development, or unfolding (the way children de-velop and the different phases they go through—Barclay) but it also may apply to one of two or more distinctive appearances or values of something with little or no suggestion of cyclical or temporal succession (the red fox occurs in several color phases, of which the silver phase has been found to breed true) (he was a shrewd, smooth political-financier, shady in both phases—S. H. Adams) (the two alternating forces or phases in the rhythm of the universe which Empedocles calls Love and Hate—Tennyson) Aspect sometimes implies a change in appearance without a shifting in point of view, but unlike phase it usually suggests a superficial change, especially one brought about by unpredictable circumstances (every time I look out of the window, the hills present a new aspect) More distinctively it implies a change in appearance that is traceable to a change in the observer’s point of view (the one and only aspect of a rich and complex subject which I mean to treat—Lowes) (an entirely new aspect of the Everest massif filled our northwestern horizon—Shipton) (the two men lay whispering for hours, canvassing every aspect of Monck’s situation—Upton Sinclair) Thus, one who proposes to treat the phases of the depression of the nineteen-thirties implies that he intends to consider its stages as they manifested themselves outwardly; one who proposes to treat all aspects of that depression implies that he intends to consider it from every possible point of view (as the political, the economic, and the sociological). Side, though often used interchangeably with phase and aspect, may retain implications derived from other of its senses and is used chiefly in reference to something that may be thought of as having two or more faces and therefore not fully apprehensible unless it or its observer shifts position (see life only on its pleasant side) (if you get on the wrong side of authority, you are executed or exiled—Edmund Wilson) (the history as a whole is deficient on the economic side—Allen Johnson) But side differs from phase and aspect in less regularly con-noting appearance or referring to physical or intellectual vision (hear both sides of a dispute) (read all sides in a controversy) (on its theoretic and perceptive side, Morality touches Science; on its emotional side, poetic Art—George Elliot) (this kind of discussion went on all the time between the parents. They could take either side with ease—Wouk) Facet differs from side in implying a multiplicity of other faces similar to or like the one singled out for attention (noticed the different shades of green on the planes and facets of each clipped tree—Dahl) (the strength of the lyric lies in the complete statement of a single selected facet of experience—Day Lewis) Angle denotes an aspect which is observable from a point of view restricted in its scope (he knows only one angle of his subject) (it is necessary to consider all angles of the situation) (views these developments from a fresh angle—Dumas Malone) Ana *state, condition, situation, posture: *appearance, look, semblance phenomenal *material, physical, corporeal, sensible, objective Ana actual, *real Ant nounal phenomenon *wonder, marvel, prodigy, miracle Ana abnormality (see corresponding adjective at abnor-mal): anomaly, *paradox: singularity, peculiarity, uniqueness (see corresponding adjectives at strange) philanthropic *charitable, benevolent, humane, humanitarian, eleemosynary, altruistic Ana *liberal, munificent, bountiful, bounteous, open-handed, generous: lavish, *profuse, prodigal Ant misanthropic

phony adj  *counterfeit, spurious, bogus, fake, sham, pseudo, pinchbeck

photograph n  portrait, "image, effigy, statue, icon, mask

phrase, idiom, expression, locution mean a group of words which, taken together, express a notion and may be used as a part of a sentence. Phrase may apply to a group of words which for one reason or another recurs frequently (as in the language of a people, the writings of an author or school of authors, or the speech of a person or a clique of persons). Sometimes the word means little more than this (this phrase, a priori, is in common most grossly misunderstood—SOUTHEY) but more often it suggests a distinctive character, such as triteness (to use the phrase of all who ever wrote upon the state of Europe, the political horizon is dark indeed—Cowper) or pithiness or pointedness (I summed up all systems in a phrase—Wilde) ("You don't understand a young philosopher," said the Baronet. "A young philosopher's an old fool!" returned Hippias, not thinking that his growl had begged a phrase—Meredith)

In the combinations "noun phrase" and "verb phrase" it suggests one of the principal parts of a sentence. Idiom (see also LANGUAGE 1) applies to a combination of word elements which is peculiar to the language in which it occurs either in its grammatical structure or in the meaning which is associated with it but which cannot be derived from it when the elements are interpreted literally; thus, "to keep house," "to catch cold," "to strike a bargain" are examples of idioms. Expression and locution are sometimes used in place of phrase when the idea of a way of expressing oneself is uppermost. Although both terms may be applied to phrases that are generally current, they are perhaps more typically applied to those that are idiosyncratic. Expression is particularly used when accompanied by a characterizing adjective or clause or phrase (he is in the habit of using telling expressions) (that is a very odd expression) (an expression that has gone out of use) Location is somewhat more bookish than expression and is therefore often preferred when the reference is to phrases that are peculiar to a language or a group as an idiom (a pet location of the author) (Carlyle and Carlylese were to leave their traces. Even the style of Thoreau was to be tinged faintly here and there with the rhythms and locations of a writer whom lesser minds could not resist—Brooks)

phraseology, phrasing  *language, vocabulary, diction, style

physic  *remedy, cure, medicine, medication, medication, specific

pique vb 1 *provoke, excite, stimulate, quicken, galvanize

Ana *stir, rouse, arouse: prick, punch (see PERFORATE): kindle, ignite (see LIGHT vb)

2 *pride, plume, preen

pirate, freebooter, buccaneer, privateer, corsair basically mean one who sails in search of plunder. Pirate suggests a person or a ship or its crew that without a commission from an established civilized state cruises about in quest of ships to plunder. Since pirate in this sense is seldom used of contemporary life, the word has been extended to mean one who wanders over a wide territory in search of plunder (a band of 400 desert pirates ... raised the bazaar section and fled back across the river with their loot—Time) or one who infringes upon a right legally restricted to another (English books published by American pirates ... pirates of wavelengths in radio) or one known for predatory business practices (now my grandfather there who made the money ... was a hard-boiled man of business. From your point of view he was a pirate—Edmund Wilson) Freebooter often suggests a maritime plunderer who pursues his occupation without the excuse that his country is at war and then differs from pirate only in its connotations of membership in a less closely organized band and of use of less violent methods (English freebooters who made life merry hell on the high seas for Spanish galleons wadding home from the Americas heavy-laden with gold—Dodge) In extended use freebooter is often applied to one who seizes rights, privileges, and property on a large scale without regard to the restraints of law or of order (many empire builders have been mere freebooters) An era of comparably good feeling and incomparably good pickings. He took things easy, and his fellow freebooters took almost everything easily—Hodding Carter) Buccanneer, primarily applied to early French residents of Haiti, is more generally used of these people and others who preyed, sometimes with the tacit consent of their own governments, on Spanish ships and settlements in the New World (in the reign of Charles II, the buccaneers of the West Indian Islands were in the heyday of their romantic glory, as the unofficial maintainers of England's quarrels along the Spanish Main—Trevelyan)
The term is often extended to an unscrupulous adventurer (as in business or politics); in such use it need not be wholly disparaging but does regularly imply disregard of the rules observed by ordinary men. One of the great building enterprises of the famous buccaneer out of which he is reputed to have made many millions—Stur-ksky—there still exist outright buccaneers, men who will steal anything that isn’t tied down—Sat. Review) Privateer and corsair primarily apply to a ship privately owned but commissioned by its government (as in the 17th and 18th centuries) to prey upon other ships, usually those of an enemy, but in practice either term may designate a ship, its commander, or one of its crew. Corsair is applied chiefly to a ship, a commander, or a sailor of North African origin. Neither term has extensive extended use, but when so used they are quite distinct: privateer then applies to one doing in a private capacity what would normally be undertaken by a public official (illegal [wire] taps by law enforcers and privateers continued unpunished Westin) but corsair attributes fury and rapacious cruelty to the one so-called corsairs among the reptiles—Swin-ton) had lately attacked, in corsair fashion, the Greek philosophers and had disembowelled Plato, Aristotle, and the rest of them, to his complete satisfaction—Norman Douglas

Pirouette vb *turn, revolve, rotate, gyrate, circle, spin, whirl, whirl, wheel, eddy, swirl

Pitch vb 1 hurl, fling, cast *throw, toss, sling

Pitiful, pitiable

Pity *sympathy, compassion, commiseration, condolence, ruth, empathy

Pivotal *central, focal

Place n Place, position, location, situation, site, spot, station

Placate vb *pacify, appease, mollify, propitiate, conciliate

Pitiful when a contemptuous commiseration is implied, but contempt may be weakly or strongly connoted (that pitiable husk of a man who a hundred years ago was a familiar figure in its streets, a shadow of his former insole and splendor—Lucas) felt a tender pity . . . mixed with shame for having made her pitiable—Malamud

3 Plain, homely, simple, unpretentious are comparable when

they mean devoid of whatever embellishes or makes for

superficial beauty. Plain stresses lack of anything (as

ornamentation, complexity, extraneous matter, or strong-

ly marked characteristics) likely to attract attention (had

no eccentricity even to take him out of the common run;

he was just a good, dull, honest, plain man—Maugham)

*a plain two-story frame house* Additionally it may

suggest elegance (his brown stockings . . . were of a fine

texture; his shoes and buckles, too, though plain, were

trim—Dickens) or frugality (a plain skirt of serviceable

gray flannel) or, with reference to personal appearance,

lack of positive characteristics, and then contrasts with

beautiful but without implying positive ugliness (was not

a plain woman, and she might have been very pretty still—

Glasgow) In reference to houses, furniture, food, and

other elements of domesticity, homely sometimes suggests

homey and may indicate comfortable informality without

ostentation (his secluded wife ever smiling and cheerful,

his little comfortable lodgings, snug meals, and homely

evenings, had all the charms of novelty and secrecy—

Thackeray) It may connote warmth and simplicity (a

book-learned language, wholly remote from anything per-

sonal, native, or homely—Cather) With reference to

appearance homely in American but not usually in British

usage often falls between plain and ugly (she was certainly

not bad-looking now and she could never have been so

homely as she imagined—Edmund Wilson) Simple may

occasionally differ slightly from plain in implying choice

rather than compulsive circumstance (what was then

called the simple life . . . is recognizable as the austere

luxury of a very cultivated poet—Reppier) a monk of

Lindisfarne, so simple and lowly in temper that he traveled

on foot on his long mission journeys—J. R. Green

Unpretentious, stressing lack of vanity or affectation, may

praise a person but depreciate a possession (an unpre-
tentious family doctor without the specialist's curt lof-

tiness—*unpretentious and battered old car*

Ana

*ugly, ill-avored, unsightly, hideous: barren, *bare,

pensive, reflective, meditative, *thoughtful: lament-
ing, deploring (see DEPLORATE): *pitiul, piteous

plait

*weave, knit, crochet, braid, tat

plan

*n Plan, design, plot, scheme, project, as nouns, denote

a proposed method of doing or making something or of

achieving a given end, and as verbs, to devise such a

method. Plan, in its widest sense, regularly implies mental

formulation of the method (make plans to travel to Europe)

(make plans for the future of their children) (plans for an

expansion of one's business) (she had her plan clearly in

her head, with every detail . . . distinct—Gibbons) (it

is a basic part of industrial technology that planned oblo-

nescence should be built into every unit—Pohl)

In a narrower sense, the terms may imply a graphic represent-

ation of such a method (as by a mechanical drawing, a

chart, a sketch, or a layout) (an architect's set of plans)

*plans a garden* (the basement of St. Katherine's Dock

House is vast in extent and confusing in its plan—Conrad)

Design (see also INTENTION) adds to plan an emphasis on

intention (as artistic or divine intention) in the disposition

of individual members or details, often thereby suggesting

a definite pattern; since it is used frequently in reference

to a completed work, it often implies reference to the

degree in which order, harmony, or integrity have been

achieved in spite of diversity in the parts, or in which

there is the beauty that results from unity in variety (it . . .

like most architecture erected since the Gothic age, was

a compilation rather than a design—Hardy) (the most

wonderful and delicate design composed entirely of

flowers—Dahl) (knows how to design a part so that it

develops and acquires momentum in performance—Atkin-

son) (a curious woman, whose dresses always looked as

if they had been designed in a rage—Wilde) Plot (see also

plot n 2; Sketch vb) usually connotes a laying out in

clearly distinguished and carefully proportioned sec-

tions or divisions, and attention to proper placing and
due relation of the parts, and to scale. It is found chiefly

in technical use, such as that of surveying, where it sug-

gests a ground plan (plot a tract of land) or in literature,

where it refers to a fundamental design which the action

of a drama or narrative follows (there is plenty of action in
this play, but no plot) (she seldom schemed, but when she
did scheme, her plans showed . . . the comprehensive strategy

of a general—Hardy) The terms often connote, singly or

in combination, self-delusion, craftiness, or self-seeking on the part of the agent (he doesn't scheme and twist things about trying to get the best of someone else—Anderson) (a lurking suspicion that our work was ... a scheme to superimpose American economic control upon ingenuous foreign countries—Heiser) Project comes close to scheme except in its connotations. Sometimes it suggests enterprise; sometimes, imaginative scope or vision; sometimes, mere extensiveness (sanguine schemes, ambitious projects, pleased me less—Wordsworth) (such were my projects for the city's good—Browning) (I projected, and drew up a plan for the union—Franklin) (although his health was rapidly failing, he projected a new plan—Dinsmore) Ana *intention, intent, purpose: *idea, conception, notion: *chart, map, graph: diagram, outline, sketch (see under sketch vb)

plane adj plain, flat, *level, even, smooth, flush

Ant solid

plank *paragraph, verse, article, clause, count

plastic, pliable, pliant, ductile, malleable, adaptable are applied to things and to persons regarded as material susceptible of being modified in form or nature. Something plastic has the quality (as of wax, clay, or plaster) of being soft enough to be molded or to receive an impression yet capable of hardening into a final form (a pill mass should be plastic: that is, it should be capable of being worked—C. O. Lee) (the language at the period during which the Bible was being translated into English was in its most plastic stage—Lowes) (life is plastic: it will assume any shape you choose to put on it—Gogarty) Something pliable or pliant has the quality (as of willow twigs) of being supple enough to be easily bent or manipulated and therefore yielding without resistance. Pliable, in extended use, usually suggests the imposition of or submission to another's will (I flatter myself that I have some influence over her. She is pliable—Hardy) (I've always been a pliable sort of person, and I let the ladies guide me—Upton Sinclair) (he was criticized as being too pliable, too eager to please—Bevery Smith) Pliant, on the other hand, suggests flexibility rather than obedience (art which is alive and pliant in the hands of men—Quiller-Couch) (ready to be used or not used, picked up or cast aside .... pliant to fate like a reed to the wind—Gough) Something ductile has the quality of a tensile metal (as copper) of being tenacious enough to be permanently drawn out or extended, or of water, of being made to flow through channels. In extended use ductile often approaches plastic and pliant but it may have distinctive connotations directly derived from its literal senses, such as quick responsiveness (as distinguished from submissiveness) to influences that would form, guide, or fashion (verse ... is easier to write than prose .... Mr. Shaw would have found his story still more ductile in the meter of Hawwaath—Quiller-Couch) (a vast portion of the public feels rather pliant and ductile in the fiery furnace of domestic tribulation—Irving) (finds a sort of malleable mind in front of him that he can play with as he will—Masefield) Something adaptable is capable of being modified or of modifying itself to suit other conditions, other needs, or other uses. As applied to persons the term implies sometimes a pliant, but more often an accommodating, disposition and a readiness to make one's habits, one's opinions, and one's wishes correspond to those of one's present society or environment (he was an adaptable person. He had yielded to Joyce's training in being quietly instead of noisily disagreeable—Sinclair Lewis) (anarchism has always been an elastic and adaptable faith, and looking round for a suitable machinery to replace state centralization—Connolly) Ana flexible, supple, *elastic, resilient: tractable, amenable (see obedient) Con rigid, *stiff, inflexible

platitude *commonplace, truism, bromide, cliche

Ana banality, inanity, vapidity, insipidity (see corresponding adjectives at INSIPID) mawkishness, sentimentality (see corresponding adjectives at SENTIMENTAL)

plaudits *applause, acclamation, acclaim

Ana cheering (see APPLAUD)

plausible, credible, believable, colorable, specious are comparable when they mean capable of impressing the observer, auditor, or reader as truly or genuinely possessing the quality or character that is set forth or claimed. A thing or sometimes a person is plausible that is capable of winning acceptance, approval, or belief by its or his apparent possession of qualities which make it or him seem pleasing, genuine, or reasonable at first sight or hearing: the word need not definitely imply a false outside, or an intention to deceive, or a lack of soundness, but it usually connotes such a possibility, even though it also clearly suggests an ingratiating or mentally satisfying character (a plausible argument) (the most plausible and persuasive confidence man of his day—S. H. Adams) (that is a perfectly intelligible position, and it is plausible to the last degree—Lowes) (he learns that what is wanted is not an interesting or plausible story, but exact facts—Notes and Queries on Anthropology) A thing or less often a person is credible that seems to be worthy of belief or of being credited, sometimes because of plausibility, but more often because of its or his support by known facts or by sound reasoning (a credible explanation) (a credible witness) (right reason makes that which they say appear credible—Hobbes) (a theory which denies the truth of one of our fundamental convictions about our own minds must have very strong evidence from other quarters to make it credible—Inge) A thing that is credible because it comes within the range of possibility or probability, or because it is in accordance with other facts that are known, is believable (his undergraduate characters ... are all alive and believable. With his older characters he is less convincing—Havighurst) (a down-to-earth, rat-chasing, thoroughly believable wharf cat—Camper) (demand for ... believable explanations—Fear) A thing is colorable which at least on its face or outwardly seems true, just, or valid or which is capable to some extent of being sustained or justified (a colorable evi-
dence has as yet been presented in support of this theory) (the Chinese were given ... a colorable excuse for joining in the fight. The excuse, of course, was much more than colorable: it was morally and practically ideal—Purcell) A thing or, less often, a person is specious that is outwardly or apparently attractive, beautiful, valid, or sincere but that is inwardly or actually the reverse in character. Specious is the only one of these terms that clearly implies dissimulation or fraud or deceit or hypocrisy (specious picturesqueness) (specious piety) (a specious rogue) (they sanctified the worse cause with the specious pretext of zeal for the furtherance of the best—Cowper) (effusions of fine sentiments about brotherly
love that are only a *specious* mask for envy and hatred of riches and success—Babbit

**An**a smooth, bland, politic, diplomatic, *suave*: likely, *probable*, possible: uctuous, *fulsome, slick, oily

**play** *n* 1 sport, disport, frolic, rollick, romp, gambol (see under **play vb 1**)

**An**a enjoyment, declamation, *pleasure, delight*: amuse-

*ment, diversion, recreation, entertainment* (see under **AMUSE**: *athletics, sports, games

**Ant** work

2 *fun, jest, sport, game

3 *room, berth, elbowroom, leeway, margin, clearance

**play** *vb* 1 **Play**, sport, disport, frolic, rollick, romp, gambol can all as verbs mean to engage in exercise or other activity as a pleasure or amusement, and as nouns mean exercise or activities engaged in for the sake of pleasure or amuse-

*ment. Play, the most general of these terms, suggests an opposition to work; like its antithesis it usually implies activity and often vigorous activity of body or mind, but it emphasizes the absence of any end except that of amuse-

*ment, diversion, recreation, or pure enjoyment* (**children** **play** for hours at keeping house) (**play** chess) (**play** tennis) (**no** **play** is interesting to me unless it affects work, and it is possible to me unless it possesses the amusement of **play**—**Ellis**) (they had been . . . transformed from a dejected, downcast, docile, uninterested people, who could not even **play**, into one which was healthy, alert—**Heiser**) (**playing** at one job and then another, too charged with impatience to plug at chores—Mailer)

Sport and disport suggest a complete release not only from work but from seriousness; the terms imply indul-

*gence in something which cheers, makes merry, or serves as a pastime* (if all the year were playing holidays, to **sport** would be as tedious as as to work—Shak.) (**sport** that wrinkled Care derides—**Milton**) (see the **children** **play** upon the shore—Wordsworth) (all the freedom and grace of healthy young animals, **sporting** in the shallows or playing in the warm sands—Beaglehole) (we make ourselves fools, to **disport** ourselves—Shak.) (a tiny fish **disporting** himself with me in the tub—Beebe)

**Frolic** suggests more gaiety, more levity, and more spontaneity than any of the preceding terms; it often is used in reference to the lighthearted, joyous movements of children or animals at play, but it also suggests the pastimes, antics, or pranks of those who have thrown off all care (1 **come** to **frolic** with you, and to cheer your drooping souls—Ford & Dekker) (**children** were allowed to **frolic** around on these piles of material to their heart's con-

*tent—**Talbot**) (their sedateness is as comical as their **frolic**—**Meredith**)

**Rollick**, infrequent as a noun and used chiefly in the form **rollicking**, adds to **frolic** implications of exuberance in gaiety and of reveling and therefore is used especially in reference to youths or young adults (**rollicking** blades) ("Q." appears as a **rollicking** humorist.) . . . He **rollicks**, perhaps, a little too laboriously—**Pall Mall Gazette**). **Romp** suggests the boisterous care-

*free frolicking of children, of rough boys, and of tomboys; it usually connotes running or racing in play** (first-to-sixth-

*graders . . . **romp** on the playground—**Cabell Phillips**)

1 **have** been having a **romp** with my godson—Braddon

**Gambol** suggests the leaping and skipping characteristic of lambs and young children; it comes close to **frolic**, but carries a stronger suggestion of joy in movement ( **Gilda** rose as limber as a 16-year-old, and **gambolled** the full length of the room— **Purdy**) (where be your gibes now? your gambolds? your songs? your flashes of merri-

*ment . . . ?—Shak.) (their pygmy king, and little fairy queen, in circling dances **gambolled** on the green— **Pope**)

**Ana** divert, entertain, recreate, *amuse*: *trifle, toy, daily

2 *act, impersonate

**Ana** feign, simulate, counterfeit, *assume

**player** *actor, performer, mummer, mime, mimic, thespian, impersonator, trouper

**playful**, frolicsome, sporting, roguish, waggish, impish, mischievous mean given to play, jests, or tricks or indica-

*tive of such a disposition or mood. **Playful** stresses either lighthearted gaiety or Merriment (**playful** children) (in a **playful** mood) (a **confiding, playful** little animal, whom one . . . trained to do tricks—Sackville-West) or a lack of seriousness or earnestness (his words were serious, but in his eyes there was a **playful** gleam) (his pen was more **playful** than caustic—Williams & Porrone) **Frolic-

*some** heightens the implications of **playful**; it carries a stronger suggestion of friskiness or prankishness or irre-

*ponsibility (as **frolicsome** as a bird upon a tree, or a breeze that makes merry with the leaves— **Haw-

*thorne**! ( **frolicsome** sailors returning from their cruises . . . paraded through the streets—Nevins & Commager)

**Sportive** carries a stronger implication of jesting or of levity than either of the preceding words; the term some-

*times implies merely excess of animal spirits, but it usually connotes a desire to evoke or provoke laughter (three generations of serious and of **sportive** writers wept and laughed over the **venality** of the senate—Macaulay)

**Roguish** not only heightens the implications of **sportive**; but it suggests an engaging naughtiness or slyness ("I don't think I shall want anything else when we've got a little garden; and I knew Aaron would dig it for us," she went on with **roguish** triumph—George Eliot) (not a pretty girl or a **roguish** buck in the lot—Cooke)

**Waggish** suggests a less engaging sportiveness than **roguish** and one less delicate in its character; usually also the term carries a stronger suggestion of jocoseness or of jocularity (with all his overbearing roughness there was a strong dash of **waggish** good humor at bottom—Irving)

**Impish** adds to **roguish** a hint of elfish, malicious mockery (teasing . . . with **impish** laughter half suppressed—Hardy) (he also displays **impish** ingenuity in picking his examples of error from the most dignified sources—Bret. Book News)

**Mischievous** combines the implications of **frolic-

*some and **impish** (took a secret and **mischievous** pleasure in the bewilderment of her attendants—Stafford) Al-

*though it may imply the doing of mischief (see **mischief** under **INJURY** 1) or the causing of an injury to others it commonly retains some suggestion of mingled playfulness and malice (the three **mischievous**, dark-eyed witches, who lounged in the stern of that comfortable old island gondola, . . . were a parcel of wicked hoydens, bent on mischief, who laughed in your face—Melville) (the little buried eyes still watching . . . in that **mischievous**, canny way, and . . . catching out some further unpleasantness or scandal—Dahl)

Often it suggests little more than thoughtlessness or of the possible effects of one's sports, tricks, or practical jokes (a garden ruined by **mischievous** boys) (she . . . was . . . waked by Meta, standing over her with a sponge, looking very **mischievous**—**Yonge**)

**Ana** gay, sprightly, *lively*: *merry, blithe, jocund, jolly, jovial: mirthful, gleeful, hilarious (see corresponding nouns at **MIRTH**)

**plea** 1 *apology, apologia, excuse, pretext, alibi

**Ana** explanation, justification, rationalization (see corre-

*sponding verbs at **EXPLAIN**): defense, vindication (see corresponding verbs at **MAINTAIN**

2 *prayer, suit, petition, appeal

**Ana** entreaty, supplication, imploring, beseeching, beg-

*ging (see corresponding verbs at **BEG**)

plead vb pray, sue, petition, appeal (see under PRAYER) Ana entreat, implore, supplicate, beseech; *beg: intercede, mediate, intervene; *interpose
Con bestow, confer, present; *give: *grant, vouchsafe, accord
plesant, pleasing, agreeable, grateful, gratifying, welcome are comparable when they mean highly acceptable to or delighting the mind or the senses. Pleasant and pleasing are often indistinguishable; however, pleasant usually imputes a quality to the object to which it is applied, and pleasing suggests merely the effect of the object upon one (a pleasant garden) she liked everything to be tidy and pleasant and comfortable about her—Gibbons a pleasing arrangement of colors (the thought of gazing on life's Evening Star makes of ugly old age a pleasing prospect—L. P. Smith) Agreeable implies harmony with one's tastes or likings (an agreeable taste) if I was obliged to define politeness, I should call it the art of making oneself agreeable—Smollett (replied with an agreeable, cultured throaty intonation—F. M. Ford) Grateful carries the implications of both pleasing and agreeable; in addition it stresses the satisfaction or relief after the sensed need has somewhat less often, the mind (they . . . lay down on the clean grass under the grateful shade of the tall cottenwoods—Cather) only occasional voices from the road outside came to disturb the grateful sense of quiet and seclusion—Archibald Marshallly Gratifying is applied chiefly to what affords mental pleasure to the individual by satisfying his desires, hopes, conscience, or vanity (the reviews of his book were very gratifying) the gratifying feeling that our duty has been done—Gilbert) can satisfy their lust for power in a most gratifying way—Huxley Welcome even more than pleasing stresses the pleasure or satisfaction given by the thing to which it is applied; it often suggests prior need or an answer to one's longings (the explorers found fresh fruit and vegetables a welcome addition to their diet) the news was most welcome (revivals offered welcome interludes in pioneer life—Amer. Guide Series: Minn.) Ana charming, attractive, alluring (see under ATTRACT vb): *soft, gentle, mild, balmy, smooth Ant unpleasant: distasteful: harsh
please vb Please, gratify, delight, rejoice, gladden, tickle, regale mean to make happy or to be a cause of happiness. Please usually implies an agreement with one's wishes, tastes, or aspirations and a happiness which ranges from mere content and the absence of grounds for displeasure to actual elation the family was pleased with the daughter's marriage the aim of poetry is to please the suggestion did not please him he may apply himself . . . to feeding and protecting his family, but he no longer need strain to please—Edmund Wilson) (fangless perceptions which will please the conservative power—Mailer) Gratify (compare gratifying under PLEASANT) suggests an even stronger measure of satisfaction than please and is normally positive in its implication of pleasure it gratifies us to imagine that . . . we have reached a point on the road of progress beyond that vouchsafed to our benighted predecessors—Elliot it gratified him to have his wife wear jewels; it meant something to him—Cather he had a sense of humor in his peculiar quiet way, but he never gratified it by proofs of the obvious—Theodore Sturgeon Delight stresses the emotional rather than the intellectual quality of the reaction, though the latter is often also implied; it suggests intense, lively pleasure that is not only keenly felt but usually vividly expressed in outward signs O, flatter me; for love delights in praises—Shak the girl was embarrassed and delighted by the effusive attention that followed—Hervey she was as delighted as if he had given her a Christmas present all wrapped in shining paper—MacInnes Rejoice implies a happiness that exceeds bounds and reveals itself openly (as in smiles, in song, in festivities, or in enthusiastic effort) (rejoice, you men of Angiers, ring your bells—Shak) Hendrik worked, rejoicing in the strength that God had given him—Cloete Gladden sometimes is indistinguishable from rejoice except in rarely suggesting excess of emotion and in being usually transitive a small pleasantry frankly uttered by a patron, gladdens the heart of the dependent—Irving It often, however, connotes a raising of the spirits, or a cheering or consoling in depression or grief the comrades of the dead girl assemble in the temple on certain days to gladden her spirit with songs and dances—Hearn) Tickle and regale involve the idea of delight, but they are often less dignified in their connotations. Tickling implies such pleasurable sensations as tingles and thrills or suggests an almost physical gratification food that tickles the palate Sometimes, with reference to physical tickling, it suggests provocation of laughter (the mimic court of justice in the orchard tickled him immensely—Deland) the idea of himself as a parson tickles him: he looks down at the black sleeve on his arm, and then smiles shyly—Shaw Regale connotes huge enjoyment or a feasting upon what gives pleasure Mr. Sycamore was regaling himself with the discomfiture of Lady Charlotte—H. G. Wells) would always regale them generously with madeira, sherry or whiskey, rich cake, and richer stories—Chapman-Huston) Ana *satisfy, content: beguile, *while, vile Ant displease: anger: vex
pleasing *pleasant, agreeable, grateful, gratifying, welcome Ana winning (see GET) charming, attractive, alluring enchanting (see under ATTRACT) Ant displeasing: repellent
pleasure, delight, joy, delection, enjoyment, fruition denote the agreeable emotion which accompanies the possession, acquisition, or expectation of something good or greatly desired Pleasure so strongly implies a feeling of satisfaction or gratification that it sometimes carries no implication of visible happiness or actual gladness (faintly unpleasant pleasures being atoned for by the dull unalleviated pain of guilt—Styron) he owned over forty pairs of boots, and he had the same pleasure in handling them that jewels give—Bemelman) Often, however, the term suggests an excitement or exaltation of the senses or of the mind that implies positive happiness or gladness when these wild ecstasies shall be matured into a sober pleasure—Wordsworth a great work of art always gives pleasure she didn't want to ride on the roller coaster . . . her ideas of pleasure were more sophisicated—Cheever) Delight carries a stronger implication of liveliness, intensity, or obviousness in the satisfaction of gratification it induces in pleasure and often suggests a less stable or enduring emotion what pleasure the possession of my money could have afforded him I am unable to say; but . . . as it did give him evident delight I was not sorry that I had parted with it so readily—Kipling) the errors he made in pitch and in language would be so amusing that the geishas would giggle with delight—Mailer) next to their wondrous delight in each other came their delighted wonder at earth itself—Theodore Sturgeon) Joy is often used in place of pleasure and still more often in place of delight. It is, however, especially appropriate when a deep-rooted, rapturous emotion is implied or when the happiness is so great as to be almost painful in its intensity (and all its aching joys are now no more, and all its dizzy raptures—Wordsworth)
plebiscite

It expressed her happiness, relieved the pressure of her joy at being alive—Rose Macaulay—glad to be free, proud too... of stepping this famous pavement, joy of a kind, cheap, tinselly, if you like, but all the same, rapture, flushed their faces—Woolf—Delectation and enjoyment differ in the main from the other words of this group in denoting the state of mind or the sensuous or emotional reactions of one who takes pleasure, delight, or joy in something. But delectation often carries a strong connotation of amusement, diversion, or entertainment that gives occasion for delight. Her oddities afforded him the utmost delectation—a superb eclipse of the sun, providentially arranged for the delectation of the Eastern seaboard cities—F. L. Allen—revived ancient, joyful customs for the delection of islanders and visitors—Gruening—Enjoyment, on the other hand, usually implies an attitude or a circumstance or a favorable response to a stimulus that tends to make one gratified or happy. He gave himself up to the vigorous enjoyment of his pipe for a silent minute or two—Conrad—that ruling, however, has not entirely dimmed lawmakers' enjoyment of a ripped good time—Armbister—just as backbiting and gossip could be a displease: anger: vexation.*happiness, felicity, bliss: amusement, diversion, recreation, entertainment (see under AMUSE)

pledge

Pledge, earnest, token, pawn, hostage are comparable when they denote something that is given or held as a sign of another's faith or intention to do what has been promised. Pledge, originally and still in some applications a technical legal term, applies in general to something handed over to another as a token—bear her this jewel, pledge of my affection—Shak.—or as security for the performance of an obligation or payment of a debt—property of the debtor in the creditor's possession was held as a valid pledge—Harvard Law Review—(the pawnshop, where one waits nervously while the swarthy shrewd-eyed attendant squints contemptuously at the pledges one offers—Donn Byrne)—Earnest, basically the money or other thing of value given by a buyer to a seller to bind a bargain, in its extended sense applies to something which serves as a promise or assurance of more to come or which establishes a strong probability of it (cutting off the heads of Emperor and Dudley as an earnest of the great love he bare his people—Trevelyan)—(it seemed to him a sort of earnest that Providence intended his rescue from worse consequences—George Eliot)—India must be granted her independence, as earnest to the subject peoples of the earth—Griswold—Token (see also SIGN 1) applies to something given as a guaranty or proof of a person's or thing's authority, authenticity, or good faith—I do set my bow in the cloud, and it shall be for a token of a covenant between me and the earth—Gen 9:13)—from time to time said something... as a token of friendship—Stewart—In specific concrete use token is applied to something which serves as a proof of an obligation, a right, a debt, or a payment; thus, a coin-like piece of metal sold by a transportation company for use as a ticket is usually called a token; coins or notes issued by some countries, states, or cities as currency at a nominal or face value above their real value but redeemable at their face value are collectively called tokens.

Pawn retains in anthropological use an earlier broad equivalence to a security pledge and then applies to a person held in servitude pending settlement of a debt—pawns are debtors whose work serves as interest until the loan is repaid—Amer. Anthropologist—In more general use pawn specifically refers to a personal chattel deposited as security for the money loaned on it by another, usually by a person called a pawnbroker whose business is the loaning of money on such security pledge and pawn were synonymous terms in the early common law. Modern usage tends to restrict the term pawn to the pledge of jewels and other personal chattels to pawnbrokers as security for small loans—Restatement of the Law of Security—In extended use pawn often carries a suggestion of something held for a time and liable to redemption or withdrawal by the actual owner—my life I never held but as a pawn to wage against thy enemies—Shak.—I held what I inherited in thee, as pawn for that inheritance of freedom which thou hast sold—Shelley—Hostage basically applies to a person handed over to another or kept by another as a guarantee of one's good or peaceable or submissive intentions or as a pledge until one's agreement or promise has been fulfilled—hostages were taken in very large numbers from the civilian populations—Nazi Conspiracy and Aggression—But sometimes the term is extended to other guarantees and pledges—you know now your hostages: your uncle's word and my firm faith—Shak.—Ana—guarantee, guaranty, security, surety, bond, bail

plunge vb *fathom, sound

plumb vb *plunge, dive, pitch are comparable when they mean to throw or cast oneself or to be thrown or cast forward or downward with force or impetuosity into or as if into deep water. Plunge carries a more obvious implication than the others of the force with which one throws oneself or is thrown, but it does not always suggest a penetration of deep water; it may imply entrance into any penetrable medium, especially one that suggests a being overwhelmed or immersed, or into a course which marks a deep descent, a complete change, or a distinct involvement. Plunge bodily into the water after a forty-foot drop—Forester> <we are plunged once more into the war—Times Lit. Sup.> <he plunged into the crowd and was soon lost to view> <the singer drew breath and plunged into a new stanza—Henry> Dive, though it implies an action very similar to that indicated by plunge, usually suggests deliberation or, at least, consciousness of an aim, more skill in execution, and less heaviness and more grace; thus, "he dived into the sea" usually implies intent where "he plunged headlong into the sea" may suggest either intent, accident, or impulsion by some force.<3 gulls dive into the water for pieces of food) <an enormous water rat dived down from the bank—Powys> <clear out!" He raised his stick as he spoke. Katy shrieked, dived past him, and ran—Deland> <why not let a countable number of particles dive into it, and then weigh the tube—Darrow> <she dove into the red pocket-book and, burrowing among the debris, came up at last with what she was after—Helen Howe> Pitch (see also

A colon (:) separates groups of words discriminated. An asterisk (*) indicates place of treatment of each group.
plurality

**plutocracy**

a government or system of government in which a small, privileged class holds power over the rest of the population, often through wealth and economic control

**poet,** *hole, hollow, cavity, void, vacuum*

**vb** *handle, manipulate, wield, swing ply*

**plurality** *majority*

**plutocracy** *oligarchy, aristocracy*

**ply vb** *handle, manipulate, wield, swing*

**poet,** *versifier, rhymer, rhymester, poetaster, bard, minstrel, troubadour* denote a composer who uses metres or rhythmical language as his medium. *Poet* is used in a generic sense and in several highly specific senses. In its generic sense it applies to any writer or maker of verse; in its specific sense it applies only to a composer of verse who in his composition exhibits qualities regarded as essential or the art or time of the writer or speaker who uses the term. With all its variations in implications in these specific senses, poet usually stresses creative and expressive power as the prime essential, sometimes without clear reference to skill in constructing verses (every man, that writes in verse is not a Poet—Ben Jonson) (the Poet is chiefly distinguished from other men by a greater promptness to think and feel without immediate external excitement, and a greater power in expressing such thoughts and feelings—Wordsworth) Versifier may designate a composer who uses verse as his medium without reference to qualities thought of as essential to poetry. In contrast to poet, it implies the lack of such a quality or qualities (a clever versifier might have written Cowley's lines; only a poet could have made what Dryden made of them—T. S. Eliot) Rhymer and rhymester, once descriptive rather than depreciative, now tend to be even more definitely and consistently depreciatory than versifier in their implications of mediocrity or inferiority. Poetaster is a term of contempt applied to versifiers whose work is regarded as unimportant, trashy, or inane (there are always poetasters enough; but of great poets . . . there are never so many as not to leave room for . . . more—Julian Hawthorne) (indicative of the mistakes of poetasters and would-be poets rather than of real poets—Kiplly)

Bard basically applies to a tribal poet-singer (as among the ancient Celts) who composed verses praising heroes, chiefs, or warriors or recounting historical facts or traditions and who sang or recited them to the accompaniment of the harp or similar musical instrument. In extended use bard is a more or less Roman or florid synonym of poet used especially of one who writes impassioned, lyrical, or epic verse (compile in all the lyrical poetry of the last 150 years a list of half a dozen first-class or even second-class bards who wrote primarily to be sung—Quiller-Couch) Minstrel basically applies to a medieval public entertainer, often a strolling musician and mountebank, who sang songs (sometimes his own) to the accompaniment of a harp or other instrument and performed tricks; among its current extended applications is one in which it is close to bard in its implications, though it may place less emphasis on professional character and more on natural lyrical power (O black and unknown bards of long ago, how came your lips to touch the sacred fire? How, in your darkness, did you come to know the power and beauty of the minstrel's lyre?—J. W. Johnson) Troubadour applies historically to a type of poet-musician found chiefly in southern France and northern Italy, frequently a knightly amateur, who composed lyrics (often also the music) in the Provençal tongue, usually of an amatory character and characteristically in a complicated metrical pattern; in extended use, the word loses its suggestion of artifice and technical skill in versifying and is often employed in place of minstrel in its extended sense (known as a modern troubadour, for he wrote scores of verses for Irish folk tunes—Bridgman & Curtis) or it may specifically denote one who uses his skill in expression for the promotion of some cause (Mr. Bryan is one of the great troubadours . . . troubadouring is the thing he does best—E. G. Lowry) I speak after my fancies, for I am a Troubadour, you know, and won the violet at Toulouse—Tennyson

**Ana** *maker, creator, author:* *writer, author, composer poetaster* *poet, versifier, rhymer, rhymester, bard, minstrel, troubadour* **pogrom** *massacre, slaughter, butchery, carnage* **poignancy** *pathos, bathos, pathos* **poignant** 1 *pungent, piquant, racy, spicy, snappy* **Ana** penetrating, piercing, probing (see ENTER): *sharp, keen, acute: *incisive, trenchant, cutting, biting, crisp Ant dull (reaction, sensation) 2 *moving, touching, pathetic, impressive, affecting **Ana** exciting, stimulating, provoking (see PROVOKE): disturbing, agitating, perturbing (see DISCOMPOSE)

**point vb** *direct, aim, level, train, lay* **Ana** bend (see CURVE vb): *direct, address, devote: steer, pilot, engineer, *guide

**point of view,** *viewpoint, standpoint, angle, slant* denote the position or attitude that determines which aspect of an object of contemplation is seen or presented. Point of view, viewpoint, and standpoint are often interchangeable, but point of view and viewpoint can suggest either a mental or a physical position and may permit the inference that there are other ways of looking at what is considered and therefore usually suggest lack of completeness in the vision, or one-sidedness in the views expressed or presented (great literature enables us to see with another man's eyes . . . but only when we abandon ourselves for the time to his point of view—Kilby) (the general shape of the galaxy and the point of view from which we are looking at it—B. J. Bok) (all will benefit from exposure to the fresh viewpoint which he presents—Harrison Brown) (describes his own method of photographing motor races, and gives hints on the choice of subjects and viewpoints—Kodak Abstract) Standpoint may have connotations which tend to distinguish it from point of view and viewpoint; it is more often restricted to the mental point of view (consider totalitarianism from the German standpoint) and it more often connotes that definitely implies a fixed way of looking justified by one's fundamental principles or one's stock of information and not necessarily resulting in a limited understanding (from the poet-writer's standpoint all this prevalent talk about a New Order is sheer waste of time—Forster) (my criticism of what seems to me one-sided views will be better understood if my general standpoint is known—Inge) Angle (see also PHASE) definitely implies one-sidedness or limitations in the scope of one's vision (every man of genius sees the world at a different angle from his fellows, and there is his tragedy. But it is usually a measurable angle—Ellis) (in the rhetorical speeches from Shake-
speare which have been cited, we have ... a new clue to
the character, in noting the angle from which he views
himself—T. S. Eliot. Slant stresses bias, but it may be
derived from temperament, mental habits, or expe-
rience rather than from prejudice (periodicals, not nor-
mally pro-Democratic in editorial slant—Cater) (no one
sees anything without some personal slant—S.R.L.)

Ana *position, stand, attitude

poise vb *stabilize, steady, balance, ballast, trim

Ana self-possession, aplomb, assurance, *confidence:
calmness, tranquillity, serenity (see corresponding adver-
cates at CALM): grace, dignity, *elegance

poison n Poison, venom, virus, toxin, bane mean matter or
a substance that when present in an organism or intro-
duced into the body produces injurious or deadly effect. Poison
is the most inclusive of these words and is applicable to
any deadly or noxious substance whether introduced into or
produced within the body of an organism (killed by a
poison-barred arrow) <carbon monoxide gas, when in-
hale, is a deadly poison> <keeping poisons out of the
reach of children> <many alkaloids are dangerous poisons>

In extended use poison applies to whatever is felt to have the
destructive effect of a physical poison (<fear un-
controlled is a poison that destroys all self-confidence>) Venom
basically means a fluid containing a poison secreted by an
animal (as a snake, scorpion, or bee) and injected into
another animal during offensive or defensive action, usu-
ally by a bite or sting (<man spurns the worm, but pauses
ere he wake the slumbering venom of the folded snake—
Byron>) The term is occasionally extended to a poisonous
secretion of a plant and in more general extended use
applies especially to states of mind or utterances that are
felt to have the malign quality of an animal venom (<their
belief in venom and jealousy behind the war—Byron>)

spouting angry venom about his neighbors> Virus (see also GERM), once equivalent to venom, retains this value
only in extended use and then applies to something felt
to have a corrupting quality that can poison the mind or
spirit (<the force of this virus of prejudice—V. S. Waters>)

Toxin applies to a complex organic poison that is a product of
the metabolic activities of a living organism, is extremely
poisonous when introduced into the tissues but usually
destroyed by the digestive juices, and is usually able to
induce antibody formation (<bacterial toxins, such as those
of botulism and tetanus>) Bane may apply to any cause of
ruin, destruction, or tribulation (<his wife is the bane of
his life>) and can refer to poison or something (as a plant) containing poison (<ratsbane>) <henbane con-
tains a poison resembling belladonna>

poisonous, venomous, virulent, toxic, mephitic, pestilent,
pestilential, miasmic, miasmatic, miasmal are comparable
when they mean having the properties or effects of the
poisons (see POISON). Basically poisonous implies that the
thing so described will be fatal or exceedingly harmful if
introduced into a living organism in sufficient quantities
(as by eating, drinking, or inhaling) (<the most poisonous
of mushrooms>) <poisonous gases> <(aniline) is also poi-
sinous but by proper chemical manipulation it becomes
the parent of many beneficent medicines—Morrison>
In its extended use the term implies extreme noxiousness or
perniciousness or power to corrode, rankle, or corrupt
(<you might condemn us as poisonous of your honor—
Shak.> <the sentence was pronounced ... in a stifling
poisonous atmosphere—Conrad> <secret spreading of
poisonous propaganda—Roosevelt> Venomous applies
equally to an animal (as a snake, scorpion, or bee) whose
bite or sting introduces a venom (see venom under POISON)
into an organism and to the bites, stings, or wounds in-
flicted by venomous creatures (<venomous insects>) (<a
venomous snake bite>) The term has much extended usage;
in this it implies extreme malevolence or destructive mal-
ignancy (<the most innocent intimacies would not have es-
cape misrepresentation from the venomous tongues of
Roman society—Froude>) (<that many of you are frustrated
in your ambitions, and undernourished in your pleasures,
only makes you more venomous—Mailer>) Virulent im-
plies the destructive or extremely deleterious properties
of or as if of a strong poison; it is applied especially to in-
fected diseases of a particularly malignant or violent
form or, somewhat less often, to notably venomous ani-
mal (poisons produce outbreaks of virulent infectious
disease ... sooner or later—Shaw) > <one of the most
virulent types of the pneumococcus> <those mosquitoes
must have been particularly virulent—Farmer's Weekly>

In extended use the term applies to something particularly
violent in its display of an offensive or noxious nature or
quality (proceedings ... dictated by virulent hatred—
George Eliot) (<the later stages of the campaign when
the rumors became virulent—Michener>) Toxic sometimes
implies the presence of properties or effects of a toxin (<see
toxin under poison>) (<a toxic goiter>) but more often
implies only the character or the properties of a poison and
therefore means little more than poisonous (<the toxic
principle of a drug>) <toxic gases> <over 200,000 fish were
killed by the toxic wastes of one industrial plant—Science>
(<a toxic drug>) In its extended use toxic may imply in-
sidious and destructive activity comparable to that of
some toxins in the human organism (<there are emotionally
toxic situations at work in the environment as manifestly
injurious ... as physical toxins—McLean>) Mephitic is
applicable to something so offensive to the sense of smell
that it is or is believed to be actually poisonous (<mephitic
vapors rising from a swamp>) (<the mephitic air of a disas-
ured mine>) (<the mephitic verdures of the Malay peninsula—
Stafford>) Pestilent and pestilential occasionally come
close to poisonous in meaning, but they are chiefly used in
the extended sense of exceedingly infectious or dangerous
to the health, morals, or mental integrity, especially of the
group distinguishing from the individual (still frequently
espouse the pestilential proposition that the world needs
to be saved in a hurry by their own brand of righteousness
—Rolo) (<a pestilent land where people died like flies—
Maurice Carr>) <grew impatient with such pestilential
hierarchies—Parrington> (<blow up the blind rage of the populace,
with a continued blast of pestilential libels—Burke>) Mias-
mic, miasmatic, and miasmal all imply a reference to
miasma, or supposedly infectious or deadly emanations
from swamps or jungles or from putrescent substances that
float in the air (<the steaming, rain-drenched, miasmic
leech-filled Sumatran jungle—Rex Lardner> (<the mias-
matic northern and northeastern coast—Encyc. Ameri-
cana>) (<the miasmal air of the closed, unventilated room—
C. M. Smith>) Of these words only miasmic is common in
extended use, where it often comes close to pestilential in
implying a power to spread contamination or to poison
the minds or souls of the multitude (<a miasmic little tale of
degeneracy—W. T. Scott>) (<miasmic fear of Communism
... has permeated Houston—Houston Post>)

Ana mortal, fatal, lethal, *deadly: *pernicious, baneful,
nоxious, deleterious, detrimental

poke vb Poke, prod, nudge, jog are comparable when they
mean, as verbs, to thrust something into so as to stir up, urge on, or attract attention and, as nouns, the act or an instance of such thrusting. ** Poke** implies primarily the use of a body part (as a finger or foot) or of some instrument or implement (as a stick, a rod, or a poker), but sometimes, especially in verbal use and in idiomatic phrases, it may imply the operation of something equally effective in stirring up or in rooting out (walked up and down and **poked** among the rocks—Masefield) (he **poked** the man in front of him to attract his attention) **poked** fire in a stove— he handed one to Lonnie, poking it at him until Lonnie's attention was drawn from the hogs—Caldwell) **poked** his head round the corner—Sayers) (to like to **poker** his nose into another person's affairs) **poker** the fire up in a stove—

**POKE** suggests the use of something sharp which can stab or prick or goad into action; it may be a physical thing (as a sharp pointed stick) **probed** and palpated that tortured and self-tortured flesh—Styron) (the cattle needed to be **prodded** along) or it may be something less tangible but equally effective (as sharp words, a threat, or a taunt) (the excitement of trying to... to prod them into action—J. R. Green) **prod** lazy schoolboys (Give Willis a prod on the subject of church attendance—Mackenzie) **Nudge** suggests gentler action than the preceding terms; it may imply the use of an elbow in attracting attention especially under conditions when speech is impossible (he nudged the person sitting next to him to allow him to pass) (Squeers then nudged Mrs. Squeers to bring away the brandy bottle—Dickens) (give him a nudge or he will not see her) or it may imply a mere suggestion or hint (what was not trimmed from our pages by an editor's nudge was given away in the haggles of publisher and author—Mailer) or it may imply repeated gentle action (as in moving or shifting) (impudent little tugboats... nudged our ship out of its slip—J. W. Brown) **Jog** implies a thrust or, often, a touch on or as if on the elbow or arm that to some extent shakes one up (a bored-looking man, with a fashionably-dressed woman jogging his elbow—Jerome) (a jog to one's memory) (almost any idea which jogs you out of your current abstractions may be better than nothing—Whitehead)

**Ana** *push, shove, thrust: *stir, arouse, rouse, awaken: *provoke, excite, stimulate, galvanize, quicken

pool n *monopoly, corner, syndicate, trust, cartel

Poor adj 1 Poor, indigent, needy, destitute, penniless, impecunious, poverty-stricken, necessitous are comparable when they mean having less money or fewer possessions than are required to support a full life. Poor describes a person, a people, or an institution that comes under this description; it is the most general term of the group, applying not only to those who are in actual want or to those in straitened circumstances, but also to those who, as compared to other groups, live below the level of what is regarded as comfortable (despite the death of the breadwinner, his family was not left poor—Wecter) It wasn't only that they were not rich . . . but that they were so poor that they couldn't afford things—Mary Austin) Between indigent and needy there is very little difference in meaning, both implying urgent and pressing want; both, but especially indigent, may be used to express the state of want to which those who are poor are reduced (the depression had left a number of them indigent, without state or federal relief—Green Peyton) will make contributions to needy groups of all races and creeds—Current Bio) (there are many needy persons in this town) needy children are provided with hot luncheons, free of cost
destitute goes further than any of these words in its implication of acute and dire need. It implies a lack of fundamental resources or a deprivation of basic necessities of life (the fire rendered several poor families absolutely destitute) (the death of a destitute widow from starvation—Maclaren-Ross) Penniless may imply a state of destitution or of indigence but it also may suggest an often temporary state of being without money; consequently, the term is susceptible of wider use than any of the others, sometimes connoting poverty or an approach to it and sometimes a mere transitory inconvenience (the bright but penniless youth whose climb to fame rivaled the most incredible of the Alger stories—Amer. Guide Series: Minn) (returned from her shopping trip penniless but triumphant) Impecunious, though it carries practically the same basic suggestion as penniless, is not quite its equivalent; it may imply the deprivation of money but it more often suggests a habitual being without money and, sometimes, connotes also the habit of borrowing or of living upon one's friends (I was, as many young barristers are, an impecunious party—Gilbert) (this eager impecunious young man who had fared so richly in his poverty—Wharton) Poverty-stricken may be chosen as an especially vivid word suggesting the state of one who is extremely indigent or actually destitute; it often connotes the suffering caused by this condition (a wretched, poverty-stricken old couple) (the bulk of the pioneers was formed by poverty-stricken people who migrated from densely populated areas—J. F. Embree & W. L. Thomas)

Necessitous comes close to needy in meaning but often carries a clearer connotation of insistent or persistent demands for relief (it holds out a shadow of present gain to a greedy and necessitous public—Burke) (according to sample surveys . . . six percent are only "moderately in need." The rest are immoderately necessary—Liebling)

A rich—Con wealthy, affluent, opulent (see RICH)

2 *bad, wrong

Ana *deficient, defective: *petty, puny, trivial, trifling, paltry: *base, low, vile Con *good, right: satisfying, fulfilling, meeting, answering (see SATISFY)

(see corresponding nouns at reproduction)
pose vb *propose, propound
Ana *ask, question, query: *puzzle, confound: baffle
(see FRUSTRATE)
pose n 1 Pose, air, affectation, mannerism are comparable when they mean an adopted rather than a natural way of speaking and behaving. Pose implies an attitude deliberately assumed in order to impress others or to call attention to oneself; it may be applied to opinions, policies, declared beliefs, and preferences as well as to manners (his reticence is just a pose) (identified himself with the Great Commoner, and this seemed to me purely a pose, which verged upon demagoguery—Edmund Wilson) Air in its more general related use may come close to demeanor (compare demeanor under bearing), but as compared with pose it, especially in the plural airs, definitely implies artificiality and the intent to give a false appearance, and usually also implies a vulgar pretense of breeding, of grandeur, or of superiority (the red-headed singer dropped her patronizing air, offered her scotch from the bottle—Wouk) (there was no doubt at all that she had acquired insufferable airs—Stafford) Affectation usually designates a specific trick of speech or behavior of one who obviously puts on airs or whose trick impresses others as deliberately assumed and insincere (regarded carrying cigarettes in a case as an affectation—Richard Burke) (agitation for opera in English seems a particular affectation to those who have come to know the works in the original—Dale Warren) Mannerism designates an acquired peculiarity or eccentricity in speech or behavior; it seldom implies insincerity, but it nearly always connotes habit or potential habit. A mannerism consciously assumed becomes thereby also an affectation; what begins as an affectation may become an unconscious and habitual trick of behavior, and so a mannerism (he giggled, and she was surprised she had not noticed this mannerism in him before—Purdy) (those little mannerisms of hers... especially the way she has of pointing a finger at me to emphasize a phrase—Dahl) 2 *posture, attitude
posit vb *presuppose, presume, assume, postulate, premise
posit n presupposition, presumption, assumption, postulate, premise (see under PRESUPPOSE)
position 1 Position, stand, attitude denote a more or less fixed mental point of view or way of regarding something. Position and stand both imply reference to a question at issue or to a matter about which there is difference of opinion. Position, however, is often the milder term, since it, unlike stand, seldom connotes aggressiveness or defiance of a widely held or popular opinion (he was asked to make known his position on disarmament) (he took the stand that disarmament would not accomplish the ends its proponents had in view) (bases his position on a wide and shrewd scrutiny of man and his history—Alain Locke) (he... agreed thoroughly with my stand that no government or private organization could give health; people had to achieve it by their own efforts—Heiser) Attitude suggests a personal or, sometimes, a group or communal point of view, especially one that is colored by personal or party feeling, is influenced by one’s environment or the fashion of the moment, and is, on the whole, more the product of temperament or of emotion than of thought or conviction (a humorous attitude to life) (the Greek attitude toward nature) (it was their attitude of acceptance... their complaisance about themselves and about their life—Wolfe) (their beliefs, attitudes, and prejudices were a crowd of inconsistencies—Farrell) Ana *point of view, viewpoint, standpoint, angle, slant

positive 1 certain, *sure, cocksure
Ana *confident, assured, sanguine, sure: dogmatic, doctrinaire, oracular, *dictatorial
Ant doubtful
2 *affirmative
Ant negative —Con *neutral, indifferent: nugatory, *vain, idle, hollow: nullifying, annulling (see NULLIFY)
possess own, enjoy, hold, *have
Ana control, manage, direct, *conduct: retain, *keep, reserve, withhold
possessions, belongings, effects, means, resources, assets can mean all the items that taken together constitute a person’s or group’s property or wealth. Possessions, belongings, effects stress ownership; means, resources, assets emphasize value and especially pecuniary value of what is owned. Possessions may be applied to the aggregate of things owned, regardless of the individual worth or significance of each thing; thus, one may speak of the possessions of an indigent old woman or of the possessions of a Rothschild, the former referring to a few articles of furniture and clothing, the latter to extensive properties and enormous invested capital. Belongings is applied commonly to an individual’s more intimate personal possessions (as clothes, household goods, and valuables) (left the house and took all his belongings with him) (my belongings were put away in the room—Frank Perry) Effects may be more inclusive than belongings, but usually less so than possessions. It is often applied to personal as distinguished from real property, especially when the reference is to the estate of a deceased person (he died leaving no effects of value) (all his effects were divided among his relatives before an administrator could be appointed) Sometimes it is applied to movable articles as distinguished from those that are stationary (a sale of household effects) (all his personal effects are in his trunk) Means usually applies to all the money that is available, in the form of revenue from capital, income, or ready money, for expenditure (lived beyond his means) (a man of large means) When unqualified means frequently implies some degree of affluence (decked out with furs, gloves and a hat sewn with pearls—one of those middle-aged women of means—Cheever) Resources, on the other hand, is applied to all possessions that have actual or potential, but not necessarily, money, value and that may be depended upon in case of need or of deficiency (a society which gives an increasing share of its resources to military purposes—Lucius Beebe) Often the term refers specifically to possessions held in reserve for emergencies or to sources of supply as yet untapped; thus, the natural resources of a country include its unmined minerals, unfeUed timber, water sources, and wild life. Assets both in law and in accounting implies an opposition to liabilities and therefore suggests the possibility of an inequality between the two and a difference between one’s ostensible and one’s actual wealth. When the term is used in reference to the settlement of the estate of a deceased person or to the legal administration of the property of an insolvent or bankrupt person or concern, the assets include all the possessions of marketable value which may be turned into money to provide for the payment of the liabilities (the assets of the estate were sufficient to cover all liabilities,
possible

including the decedent’s debts and his legacies. When used in reference to general balance sheets of a company or corporation, the term comprehends all items which from one point of view can be called resources having book value. But assets is never exactly the same as resources, because the latter word does not, as assets does, imply a comparison with liabilities.

**possible**

Possible, practicable, feasible can mean capable of being realized. Possible is used to dispel doubt that something may or does occur or exist or may come to exist (the regime of religious toleration has become possible only because we have lost the primal intensity of religious conviction—Cohen) (although he still asserts that community of goods would be the ideal institution, he reluctantly abandons it as a basis for a possible state—Dickinson). Practicable refers to what may be readily effected, executed, practiced, used, or put into operation (trial by jury—an institution in which . . . we have the very abstract and essence of all practicable democratic government—Mallock) (the only practicable tactics to be pursued were those of the routine police procedure—S. S. Van Dine). Feasible may designate what is likely to work out or be put into effect successfully or what in a difficult situation seems the expedient least liable to fail (cheap iron and steel made it feasible to equip larger armies and navies than ever before—Mumford) (only the most simple types of utilization are feasible—Van Valkenburg & Huntingdon).

**posterior**

Posterior, rear, hind, hinder, after, back are comparable when they mean behind in order of arrangement in space. Posterior is the usual technical term for whatever is situated behind and is opposed to anterior (to an anatomical eye the posterior part of the skull is even more striking than the anterior—T. H. Huxley). Rear belongs especially to military usage, but has general application with reference to such things as structures and vehicles (the rear ranks of a column) (the rear wall of a house) (Hind, opposed to front or fore, is used most commonly with reference to related parts and designates the member or pair which is in the rear (the hind wheels of a wagon) and hind legs of a horse). It has sometimes more general application (had a boy-size pair of empty overhalls blowing out of his hind pocket—Faulkner) (Hinder is equivalent to hind or, in nontechnical use, to posterior (a long oval forward part and a taillike hinder portion—Coker) (After is largely confined to nautical usage and applies to whatever is abaft the midship section, or in the rear part of a vessel, or relatively near to this part (the after cabin) (the after hatchway) Back applies to what is thought of as behind, remote from, or inferior or subsidiary to, the main or more important part (back stairs) (back door) (the near woodlands and back pastures afford good hunting—Amer. Guide Series: Tenn.).

**posture**

Posture, attitude, pose denote a position assumed by the body, or the disposition of the parts of the body with relation to one another. Posture applies to the relative arrangement of the different parts of the body. It may apply to a habitual or characteristic arrangement and then specifically means the way in which one holds oneself and refers to one’s physical carriage or bearing (her posture is excellent) (pictures illustrating defects of posture) (examples of correct posture) (an urbane alertness about the face, the posture—Wouk) or it may apply to an arrangement determined with reference to the needs of the mood or the moment and then requires qualification (a sitting posture) (a kneeling posture) (the posture of supplication) (his whole figure had a prowling and half-crouching posture—Wolfe) or the assistance of the context to evoke a picture of how the parts of the body are disposed or to reveal the intention or end (there’s a posture for a man to fight in! His weight isn’t resting on his legs—Shaw) (his pose of head expressed an habitual sense of her own consequence—Shaw) (his pose was easy and graceful. A superb self-confidence radiated from him—Gibbons).

**posture**

Posture, attitude, pose denote a position assumed by the body, or the disposition of the parts of the body with relation to one another. Posture applies to the relative arrangement of the different parts of the body. It may apply to a habitual or characteristic arrangement and then specifically means the way in which one holds oneself and refers to one’s physical carriage or bearing (her posture is excellent) (pictures illustrating defects of posture) (examples of correct posture) (an urbane alertness about the face, the posture—Wouk) or it may apply to an arrangement determined with reference to the needs of the mood or the moment and then requires qualification (a sitting posture) (a kneeling posture) (the posture of supplication) (his whole figure had a prowling and half-crouching posture—Wolfe) or the assistance of the context to evoke a picture of how the parts of the body are disposed or to reveal the intention or end (there’s a posture for a man to fight in! His weight isn’t resting on his legs—Shaw) (his pose of head expressed an habitual sense of her own consequence—Shaw) (his pose was easy and graceful. A superb self-confidence radiated from him—Gibbons).
though it also may connote abundance or continuousness in that flow <the guests streamed past, shaking hands, exchanging greetings—Styron> Gush implies a sudden and copious emission of or as if of something released from confinement; it often connotes a coming in a jet or in spurts <blood gushed from the wound> <he . . . suddenly gushed forth in streams of wondrous eloquence—Stephen> <beer began to gush . . . in a white cascade—Pynchon>

Sluice implies the operation of something like a sluice for the regulation or control of the flow of water; therefore the verb sluice suggests a sending of water or liquid over a surface in an abundant stream <water so fresh . . . never sluiced parched throats before—Thackeray> <Mowgli, with the rain sluicing over his bare shoulders—Kipling>

JUNCTURE) may imply the semblance of poverty <penury—Shaw>

the necessities of existence or having only an insufficient supply of them, it may connote another cause of such a want <penury—Malamud>

of the one who is poor or without enough to live upon. Poverty, the most comprehensive of these terms, typically implies such deficiency of resources that one is deprived of many of the necessities and of all of the comforts of life <in Syria he feathered his nest so successfully that in two years he raised himself from poverty to opulence—Buchan> <complaining of his poverty as if it were a new invention and he its first victim—Malamud>

Indigence, often opposed to affluence, does not suggest dire or absolute poverty, but it does imply reduced or straitened circumstances and therefore usually connotes the endurance of many hardships and the lack of comforts <reduced to indigence in his old age> <our newfound European indigence now makes us more materialistic than we used to rejoice ourselves on being—Times Lit. Sup.>

Penury may or may not imply abject poverty, but it does suggest such a degree of need, especially of money, that one is cramped or oppressed by it <chill Penury repressed their noble rage—Gray> <she has to take anything she can get in the way of a husband rather than face penury—Shaw>

But penury may imply the semblance of poverty that comes from miserliness or penuriousness (compare penurious under STINGY) <her relatives considered that the penury of her table discredited the Mingott name, which had always been associated with good living—Wharton>

Want (see also LACK) and destitution both imply an extreme of poverty that leaves one without the basic necessities of life; both terms, but especially the latter, often imply starvation and homelessness or the urgent need of help <he is in great want > (here to the homeless child of want my door is open still—Goldsmith>

<sinking stage by stage from indigence to squalor, from squalor to grimmest destitution—Mumford>

Privation, though implying a state that is comparable to the one suggested by indigence, does not, as the latter term does, necessarily suggest poverty; although it implies a condition of being without many of the comforts and sometimes of the necessities of existence or having only an insufficient supply of them, it may connote another cause of such a condition than a lack of money or of possessions of value <an explorer must undergo prolonged privations> <months of privation after the crop failure had left them ill-nourished>

Ana necessity, *need, exigency: strait, pass, pinch (see JUNCTURE) Ant riches

poverty-stricken *poor, indigent, needy, destitute, penniless, impucessive, necessitous

power n 1 Power, force, energy, strength, might, puissance mean the ability to exert effort for a purpose. Power is the most general of these terms and denotes an ability to act or be acted upon, to effect something, or to affect or be affected by something <the finest machine in the world is useless without a motor to give it power> <the mechanical power of the internal-combustion engine> <raise the productive power of the nation> <the sound of a great flood moving with majesty and power—Cather> <give an attorney the power to act for one> <in any link between past and present there was potent magic, some power to evoke allegiance—Hervey> <hateful to feel their power over me when I knew that they were nothing but fancies—Hudson>

Force (see also FORCE 2) implies the exhibition or the exercise of power; the term usually carries with it a suggestion of actually overcoming resistance (as by setting a thing in motion or accelerating its motion or driving a person or thing in the desired direction); thus, one having the power to do something exerts force only when he actually does it <a wind gathers force> <accumulated force which drove them as if discharged from a crossbow—Jeffries>

<jealousy> <a hard and rebellious element not to be conquered mainly by skill . . . but mainly by force—Ellis> <the perverse wish to flee . . . not from the laws and customs of the world but from its force and vitality—Cheever> Therefore force is often applied to a person or thing that exerts its power with marked efficacy or efficiency <they believed that the Church was the only force which could consolidate the nation—Inge> <art is but the expression of a harmony of life, a fine balance of all the forces of the human spirit—Binyon>

Energy in general use and especially as applied to persons implies stored-up power releasing itself in work or causing such release <the prodigious energy put forth by industry in time of war—Morrison> <in spite of his small size and fragile build, the man was a dynamo of energy and could perform the labors of a Titan—Wolfe> <it was marvelous . . . that the energy of her spirit could carry through so triumphantly her frail nervous system—Ellis>

Strength applies to the power that resides in a person or thing as a result of qualities or properties that enable him or it to exert force or to manifest energy or to resist pressure, strain, stress, or attack. Physically strength implies soundness (as of health or of construction or design) <the tensile strength of a rope> <I was not delicate, not physically; when it was a matter of strength I had as much as the next man—Mailer> while mentally and morally it may imply capacity for endurance or resolution or intrepidity <show strength in temptation> <strength to surmount the horrors and humiliations . . . defeat—O’Donovan> When applied to military forces it usually implies power manifest in such things as numbers, equipment, and resources <estimate the strength of the enemy> <a fleet incomparable in strength> Mighty and puissance are rather rhetorical or poetical words meaning operative or effective power or force. Might often suggests great or superhuman power; it is therefore appropriate when the reference is to supernatural beings or supranatural forces or to human power that is so strong that it cannot be gainsaid <protect us by thy might, Great God, our King—S. F. Smith> <let us have faith that right makes might—Lincoln> <the pride and might and vivid strength of things—Galsworthy>

Puissance is often indistinguishable from might, but it can also connote an impressive display of power <we should advance ourselves to look with forehead bold and big enough upon the power and puissance of the King—Shak> <the sapience and puissance of the American businessman in general—G. W. Johnson>

Ana *ability, capacity, capability: *gift, genius, talent, faculty: qualification, competence (see corresponding adjectives at ABLE) Ant impotence

2 Power, faculty, function can all mean an ability of a living being to act or perform in a given way or a capacity for a

Ana analogous words Ant antonyms Con contrasted words See also explanatory notes facing page 1
particular kind of action or performance. Power, the comprehensive term of this group, may apply to a capacity for action or performance that does not or apparently does not call the mind into play (the power to digest food) (the power of reflex movement) but it more frequently applies to an ability or capacity that involves either mental activity or mental receptiveness (the power to think clearly) (the human mind is a fearful instrument...in its mysterious powers of resilience, self-protection, and self-healing—Wolfe) Faculty in general, as distinct from technical psychological or metaphysical use, is applicable to those powers which are the possession of every normal human being, though not always manifested in the first months of infancy or the earliest years of childhood (the faculty of hearing) (the faculty of speech) or it may apply to any one of the several specific powers of the mind (as will, memory, and reason) that are often felt as discrete and discoverable (the truth is that memory and imagination, the two most important human faculties, are scarcely cultivated at all—Grandgent) Sometimes faculty means no more than a distinguishable capacity of the functioning mind or soul (once a thing did become pertinent, he had an amazing faculty for absorbing it wholly—Terry Southern) (her faculty for moral perception had withdrawn into that dim neutrality—Hervey) (it is the one occasion when violent grief, disturbing his faculties, appears in his correspondence—Bellow) Function may denote an activity which can be more or less definitely associated with the brain or the central nervous system or a part of either (all mental activities, such as seeing, hearing, perceiving, conceiving, imagining, recalling, etc., are termed functions—Murchison) or it may apply to one (as digestion or respiration) in which the mental component is slight or obscure.

3 Power, authority, jurisdiction, control, command, sway, dominion are comparable when they mean the right or prerogative of determining, ruling, or governing or the exercise of that right or prerogative. Power even in this specific sense never loses its fundamental implication of ability, but in this case it is a capacity for rule that may derive from rank, office, or even character or personality (in an absolute monarchy the king has sole power) (it is a strange desire, to seek power, and to lose liberty; or to seek power over others, and to lose power over a man's self—Bacon) (for thine is the kingdom, and the power, and the glory, for ever—Mt 6:13) Power when used with reference to a definite person or body or office commonly connotes divisibility or strict limitation (the trustees have power of appointment) (the charter gives the city power to tax sales) (he was given power of attorney to act for his brother) (it is not enough that a statute goes to the verge of constitutional power. We must be able to see clearly that it goes beyond that power—Justice Holmes) Authority is often used interchangeably with power; nevertheless, there can be an essential difference in meaning, since authority usually refers to power resident in or exercised by another than oneself; thus, one may have power, rather than authority, to determine one's own actions, but a parent or a master or a ruler has the authority, rather than the power, to determine the actions of those under him; children are obedient to authority rather than to power (they were both getting childish and needed care and yet they resented any loss of authority—Buck) (the object is to induce the child to lend of his own free will; so long as authority is required, the end aimed at has not been achieved—Russell) (authority in the religious sphere generally means absolute or infallible authority, such as Catholics ascribe to the Church—Inge) Power and authority, especially in the plural, often refer to the persons who have or hold power or authority as defined. Powers, however, usually occurs in the phrase “the powers that be” and is either somewhat more comprehensive or less explicit in its reference than “the authorities,” which often means the persons who have authority in the special instance to direct, to decide, or to punish (he is always in instinctive opposition to the powers that be) (he threatened to report the offense to the authorities) Jurisdiction implies possession of legal or actual power to determine, to rule, or to govern within definitely assigned limits, and of the authority to so act in all matters coming within the sphere of that power (the principle of law is too well settled to be disputed, that a court can give no judgment for either party, where it has no jurisdiction—Taney) (this new and populous community must, for the present, the Kansas Banks wrote, be accounted under Father Latour's jurisdiction—Cather) Control stresses possession of the authority to restrain or curb and its effective exercise, or of actual power to regulate or keep responsive to one's will not only persons but things; thus, a teacher who has lost control of his class has reached a point where the pupils no longer recognize his authority; a fire has gone beyond control when those who are fighting it have lost all power to check it (completely out of control, the woman had shrugged off her husband's embarrassed efforts to stop her—Wouk) (he was at last in triumphant control of his destiny—Wolfe) Command implies such control as makes one the master of men, and such authority that obedience to one's order or one's will either inevitably follows or is inexorably enforced; thus, one speaks of the officer in command, rather than in control, of a regiment; a person has command of a situation when he completely dominates it or has all persons or things involved in it under control (how, in one house, should many people, under two commands, hold amnesty?—Shak.) Command is also used in reference to things which one has mastered so thoroughly that one encounters no resistance or interference in using, recalling, or controlling them (his brush did its work with a steady and sure stroke that indicated command of his materials—Jeffries) (something beyond disorderly or careless thinking, something close to a complete loss of emotional command—Anthony West) Sway tends to be slightly rhetorical because its use in this sense was originally figurative and the word still carries a hint of its original implications of swinging or sweeping through an arc or circle; hence, when a word is desired that means power but also connotes extent or scope and such added matters as preponderant influence, compelling authority, or potency, sway is the appropriate choice (the British Empire extended its sway to every quarter of the earth) (primal spirits beneath his sway—Shelley) (the law of compensation rules supreme in art, as it holds sway in life—Lowes) Dominion imparts sovereignty to the power in question or supremacy to the authority in question (God of our fathers, known of old, Lord of our far-flung battle line, beneath whose awful Hand we hold dominion over palm and pine—Kipling) (foreign dominion in any shape would soon become hateful—Freeman) Ana *right, privilege, prerogative, birthright: management, direction (see corresponding verbs at conduct): ascendency, *supremacy

powerful, potent, puissant, forceful, forcible are comparable when they mean having or manifesting power to effect great or striking results. Powerful is applicable to something which stands out from the rest of its kind as exceeding the others in its display of strength or force or in its manifestation of energy; the word also usually implies
powerless

625

practicable

an effectiveness that has been proved rather than attributed (the most powerful ruler of his age) (a powerful fleet) (a powerful influence for good—Walcutt) (a powerful cathartic) Potent, though it implies powerfulness, is applicable chiefly to something which derives or seems to derive that character from some hidden or latent virtue or quality rather than from an observable or measurable power or force (he exercised a potent spell over her imagination) (how potent is this Oriental blood in Napoleon, in Goethe, in Heine, Victor Hugo—J. R. Lowell) (illusions . . . no longer potent because they are no longer really believed—Krutch) Puissant, a bookish word, refers typically to persons, to military or naval forces, or to bodies politic and connotes more the outward attributes of power; it commonly suggests a great and abiding strength (most . . . mighty, and most puissant Caesar—Shak) (one of the nation's most puissant labor leaders—Time) (methinks I see in my mind a noble and puissant nation rousing herself like a strong man after sleep—Milton) The last two words of the group, though somewhat more restrained in their suggestion of power, nevertheless imply an ability to effect impressive results. Forceful stresses the possession or manifestation of force as a quality; it therefore suggests marked vigor or energy or strength regardless of whether it is being exercised or not. The word is applicable even to something which makes no display of effort or violence, provided it impresses its undoubted force on the observer (a forceful personality) (he relied more on a forceful clarity to convince his readers than on the brilliant and exciting ambiguities of propagandist eloquence—Huxley) (physically, he suggests at once a forceful spit-and-polish officer—Knight) Forceible, on the other hand, suggests the actual exertion of power or force; it often implies the use of physical violence in attaining one's ends (forceful disarmament and military occupation can only be temporary—Times Lit. Sup.) (take forceible possession of goods not paid for) (favor forceible measures in treating unruly prisoners) Sometimes it is used in place of forceful to add to that term implications of aggressiveness, militancy, or decided potency (win a chess game with a series of forceble moves) (more than thirty years have passed and I have seen no forceible young man of letters brave the metropolis—Yeats)

Ana *able, capable, competent: efficacious, effectual, *effective, efficient: *vigorou, energetic, strenuous
Ant powerless: inefficacious

powerless, impotent both mean unable to effect one's purpose, intention, or end. Powerless denotes merely lack of power or efficacy which is often temporary or relative to a specific purpose or situation (he suddenly found himself powerless to move) (powerless as an infant—De Quincey) (I hope that the luxuries of this palatial mansion are powerless to corrupt your heart—Shaw) (that mood of hopeless apathy that comes over men powerless to help themselves—Nordhoff & Hall) Impotent (see also sterile) implies not only powerlessness but positive weakness or, especially, complete ineffectiveness (an angry little spitfire sea continually . . . thrares with impotent irascibility—Stevenson) (impotent aristocrats talking about the code of chivalry but unable to bring it to life—Time) (terrible and impotent rage—Wilde)

Ana inert, *inactive, passive, supine: feeble, *weak, infirm, decrepit
Ant powerful: efficacious —Con *effective, efficient

practicable 1 feasible, *possible

Ana operating or operable, working or workable, functioning (see corresponding verbs at ACT)
Ant impracticable

2 Practicable, practicable are not close synonyms and not interchangeable, but they are sometimes confused when they imply a capacity for being used or turned to account. Practicable (see also possible 1) applies chiefly to something immaterial (as a plan, project, scheme, or design) which has not been tested in practice or to something material (as a new machine, a new form of entertainment, or a new implement) which has not been proved successful in operation or use (aviation was his predominant interest. He was one of the first to consider aerial locomotion practicable—W. C. Langdon) (the lovely combes running down to the sea are infested with cars in the summer season wherever there is a practicable road—Brit. Book News) (a serviceable concept on which to base a practicable policy—Hobson) Practical applies not only to things both concrete and material but also as practicable does not, to persons. The term in all of its senses stresses an opposition to what is theoretical, speculative, ideal, unrealistic, or imaginative and implies a relation to the actual life of man, his daily needs, or the conditions which must be met. When the term also implies a capacity for use, it emphasizes actual usefulness rather than highly probable or merely discovered usability; thus, a plan might be practicable in that it could be put into practice though not practical because inefficient, too costly, or superfluous; the modern low-slung high-speed automobile was practicable long before improved roads and fuels made it practical (those most practical machines of our modern life, the dynamo and the telephone—Ellis) Hence, practical may apply to whatever is such in kind, character, amount, or effect that it is definitively useful or serviceable in actual life (to make the gas turbine practical for the ordinary driver, controls would have to be simple and . . . fuel consumption . . . lowered—Modern Industry) (practical sciences, in which knowledge is pursued as a means to conduct rather than as an end in itself—Thilly) (he was eminently practical, seeking a sound, workable system adapted to the conditions of the people—Schaefer) (in everything he undertook he demanded a utilitarian purpose and a practical result—Buchanan)

practical *practicable
practically *virtually, morally

practice vb Practice, exercise, drill are comparable when they mean, as verbs, to perform or cause one to perform an act or series of acts repeatedly and, as nouns, such repeated activity or exertion. Practice fundamentally implies doing, especially doing habitually or regularly, often in contrast to thinking, believing, and professing or to theory and precept (practice what you preach) (the practice of one's religion) (practice a profession) (in theory every citizen votes, but in practice rarely more than half avail themselves of the privilege) (thinking piously of saints and others who practiced mortification—Cheever) Practice also implies a doing over and over again of certain acts for the sake of acquiring proficiency, dexterity, or skill or in the hope of attaining perfection (practice makes perfect) (practice on the piano each day) (rifle practice) (I am not normally a scheming person; I . . . have had no practice in it whatsoever—Dahl)

Exercise fundamentally implies a keeping busy or a setting to work; it usually presupposes the possession of a power or of powers which can be developed or strengthened by activity, especially repeated activity, or can be manifested only in practice (give him plenty of opportunities to exercise his intelligence) (a wise father avoids the exercise of authority except when other means fail) (he had liberality, and he had the means of exercising it—Austen) (so long as a child is with adults, it has no

praise, laud, acclaim, extol, eulogize mean to express appreciation of something or someone.

Practice exercise may differ from it in implying force, strength, or vigor.

A colon (:) separates groups of words discriminated. An asterisk (*) indicates place of treatment of each group.
a deferential and formal solicitation sometimes for help or relief but often for a favor, a grace, or a kindness. Except in legal use (see suit n 2), in reference to the addresses of a man to the lady he hopes to marry, and in some idiomatic phrases such as "sue for peace," the words are somewhat old-fashioned in flavor (this suit to the Muse . . . relies too much on exertions and capacities—The Nation) <she sued year after year . . . for acceptance by a society of dreary dowagers—E. K. Brown> Plea (see also APOLOGY) and plead often suggest a court of law, the status of a defendant or of an accused person, and formal statements in answer to a plaintiff’s allegations or the state’s charge. In general use both terms imply argument or urgent entreaty, of which self-justification, a desire for vindication or support, or strong partisanship is usually the motive <make a plea for forgiveness> <plead for a more tolerant attitude> <she pleaded the arguments, their tear-stained pleas—Malamud> <I plead frankly for the theistic hypothesis as involving fewer difficulties than any other—Inge> Petition and its verb petition imply a formal and specific request, often in writing, presented to the person or body that has power to grant it. The words carry little or no connotation of abject humility or of entreaty; rather, they suggest a right to make a request, as one of the sovereign people or as one who is confident that it will be judged on its merits <the flood of petitions from business interests begging relief from the political crisis—Woodward> <she neither petitioned for her right, nor claimed it—Meredith> Appeal, as noun and verb, basically implies a call for attention to and favorable consideration of one’s plea <appeal for mercy> <appeal to one’s family for help> Often it additionally connotes an insistence on being heard and hence a change of plea from an inferior to a superior power (as a higher court or a higher authority) or to an emotion in an attempt to evoke a favorable response or judgment <appeal to the supreme court for a new trial> <to what sources of information do I appeal for guidance?> <Cardozo> <Mantalinis and Dobbins who pursue women with appeals to their pity or jealousy or vanity—Shaw> Sometimes, used alone, either noun or verb implies a sympathetic or favorable response or a compelling quality <an appealing child> <the song has a human appeal> Ana supplication, entreaty, beseeching, imploring, begging (see corresponding verbs at BEG): worship, adoration (see under REVERSE) preamble *introduction, prologue, prelude, preface, foreword, exordium precarious *dangerous, hazardous, perilous, risky Ana *doubtful, dubious, questionable: distrustful, mistrustful (see corresponding verbs at DISTRUST): chance, chancey, chancy, hazard, random Con *safe, secure: steady, even, equable, constant precedence *priority Ana leading or lead, guiding or guide (see GUIDE): antecedent, foregoing (see corresponding adjectives at PRECEDING) precedent adj *preceding, antecedent, foregoing, previous, prior, former, anterior preceding, antecedent, preceding, foregoing, previous, prior, former, anterior are comparable when they mean being before, especially in time or in order of arrangement. Preceding, opposed to succeeding and following, is restricted to time and place; it usually means immediately before <the preceding day> <the preceding clause> <events preceding the opening of the story> Antecedent, opposed to subsequent and consequent, usually implies order in time, but unlike preceding, it often suggests an indefinite intervening interval <events antecedent to the opening of the story> <Chaucer’s poems were written in a period antecedent to the Elizabethan Age> Very often, also, the word implies a causal or a logical, as well as a temporal, relation <to understand the success of modern dictators we must have a knowledge of antecedent conditions> <a conclusion is based on a chain of antecedent inferences> Precedent often applies to one thing which must precede another thing if the latter is to be valid or become effective; thus, a condition precedent in law is a condition that must be fulfilled before an estate can be vested in one or before a right accrues to one. Forgoing, opposed to following, applies almost exclusively to statements <the foregoing citations> <the foregoing argument> Previous and prior, opposed to subsequent, are often used almost interchangeably <his life previous to his marriage> <this will cancels all prior wills> But prior sometimes implies greater importance than previous; thus, a previous obligation suggests merely an obligation entered into earlier in point of time, whereas a prior obligation is one which surpasses the other in importance and must be fulfilled in advance of any other; a prior preferred stock is one whose claim to dividends or to a specified sum in liquidation comes before other preferred stocks of a company. Former, opposed to latter, even more definitely than prior, implies comparison; thus, there can be a former engagement only when there is also a later one; a previous or prior engagement may prevent one’s making a second. Anterior, opposed to posterior, also comparative in force, applies to position, usually in space, sometimes in order or time <the anterior lobe of the brain> <organization must presuppose life as anterior to it—Coleridge> Ant following precept rule, *law, canon, regulation, statute, ordinance Ana *principle, fundamental, axiom: *doctrine, tenet, dogma: injunction, behest, bidding (see COMMAND n) Ant practice: counsel precious *costly, expensive, dear, valuable, invaluable, priceless Ana *choice, exquisite, recherché, rare: valued, prized, appreciated, cherished (see APPRECIATE) precipitate vb *speed, accelerate, quicken, hasten, hurry Ana drive, impel (see MOVE vb): force, compel, coerce, constrain precipitate n *deposit, sediment, dregs, lees, grounds precipitation adj Precipitate, headlong, abrupt, impetuous, hasty, sudden as applied to persons or their acts or behavior denote characterized by excessive haste and unexpectedness. Precipitate especially stresses lack of due deliberation; sometimes it suggests prematurity and is therefore especially applicable to decisions or to actions based on decisions <she was resolved to lose nothing by precipitate action—Farrell> Hasty stresses quickness of response and often suggests thoughtlessness and hot temper rather than impetuousness. Precipitate especially stresses lack of due deliberation; sometimes it suggests prematurity and is therefore especially applicable to decisions or to actions based on decisions <she was resolved to lose nothing by precipitate action—Farrell> Hasty stresses quickness of response and often suggests thoughtlessness and hot temper rather than impetuousness.
precipitous

siveness (often hasty in her judgment of strangers—Dahl)〈too passionate and hasty to keep pace with the deliberative steps of his leader—Philip Marsh〉 Sudden is distinguishable from sudden meaning unexpected only by its added implications of extreme hastiness or impetuosity〈given to sudden rages〉〈now and then an access of . . . sudden fury . . . would lay hold on a man or woman—Kipling〉

Ana headstrong, willful, refractory (see unruly) Ant deliberate —Con leisurely, *slow

precipitous *steep, abrupt, sheer

Ana soaring, towering, rocketing, ascending, rising (see rise)

précis sketch, aperçu, survey, *compendium, syllabus, digest, pandect

precise exact, accurate, *correct, nice, right

Ana definite, express, *explicit: strict, *rigid, rigorous, stringent

Ant loose —Con lax, slack (see loose): *careless, heedless

preciseness *precision

precision, preciseness both denote the quality or character of what is precise. Precision denotes a quality that is sought for or is attained usually as a highly desirable thing. When used in reference to language it implies expression with such exactitude that neither more nor less than what applies to the thing under consideration is said〈defining words with utmost care, they fashioned their statements〉

précis—Dinsmore〈a vague term of abuse for any style that is . . . so evidently bad or second-rate that we do not recognize the necessity for greater precision in the phrases we apply to it—T. S. Eliot〉 When used in reference to the arts and sciences, the term usually implies such clearness of definition or such sharpness in distinction or in distinguishing that there is no confusion about outlines, boundaries, dividing lines, or movements〈however we may disguise it by veiling words we do not and cannot carry out the distinction between legislative and executive action with mathematical precision—Justice Holmes〉〈acting, singing, and dancing seem to me the best methods of teaching aesthetic precision—Russell〉 Precision is also used in reference to an instrument, a machine, or a part of a machine that must be made with such exactness of measurements that an infinitesimal fraction of an inch would debar it from fulfilling its function〈precision instruments〉〈tiny, Swiss-made replicas, they were precision machined and finely detailed, all scaled to perfection—Terry Southern〉

Preciseness is rarely interchangeable with precision, since it carries so strong an implication of severity or of strictness, or sometimes of overnicety in the observance of religious laws, the code of one’s profession, or the proprieties as dictated by one’s class or social equals that it is deprecative as often as it is laudatory〈savoring of Puritanism and overstrict preciseness—Prynne〉〈the letter . . . had the preciseness of an imperial mandate—Meredith〉〈there was a certain amount of preciseness about the young man, and his approach to Texas was in the best striped-trousers tradition—T. D. Clark〉

preclude *prevent, obviate, avert, ward

Ana *hinder, obstruct, impede, block, bar: *stop, discontinue, quit, cease: *exclude, eliminate, shut out, debar

precocious untimely, forward, *premature, advanced

Ana *immature, unmatured, unripe

Ant backward

precursor *forerunner, harbinger, herald

Ana *sign, mark, token, symptom: antecedent, determinant, *cause, reason

predicament, dilemma, quandary, plight, scrape, fix, jam, pickle can all denote a situation from which one does or can extricate himself only with difficulty. Predicament carries the implication that the situation constitutes a problem for those who are involved in it and may additionally imply lack of freedom to do what one wishes or finds essential for some reason, or it may imply deep perplexity as to ways out of the situation〈advice . . . may be of such nature that it will be painful to reject and yet impossible to follow it; and in this predicament I conceive myself to be placed—Crabbe〉〈the predicament with which our civilization now finds itself confronted—the problem, namely, how to find healthy, happy leisure for all the working millions who are now being liberated by machines—L. P. Smith〉 Dilemma applies to a situation which constitutes a predicament from which one can escape only by a choice of equally unpleasant or unsatisfactory alternatives〈faced with a dilemma: if they discard obsolete, heading, forewarn, cau-

predisposition, partiality, prepossession, prejudice, bias are comparable when they mean an attitude of mind which predisposes one to make a certain choice or judgment or to take a certain view without full consideration or reflection. Predilection implies a strong liking that results from one’s temperament, one’s principles, or one’s previous experience and that predisposes one to prefer certain kinds of things (as friends, books, foods, or methods) or to accept a thing without reference to any other test〈a predilection for the strange and whimsical—Coleridge〉〈one or two authors of fiction for whom I have a predilection—Benson〉 Partiality implies a disposition to favor a particular person or thing because of some predilection or, more often, because of undue fondness or partisanship; it may connote unfairness〈show partiality in appointments to office〉〈a partiality for their own daughters’ performance, and total indifference to any other person’s—

</table>
of the mind) inhibition of precocious germination of seeds—Chronica Botanica (a precocious youth bursting with ideas—Henry Miller) The term is also applied to qualities, conditions, or circumstances which properly belong to maturity but come or belong to one who is otherwise immature (his precocious dignities were hard for youth to support without arrogance—Buchan) (Shaw is dramatically precocious, and poetically less than immature—T. S. Eliot)

**Ant**

- immature, unmatured, unripe, unmellow: abortive, fruitless (see futile)
- precipitate, hasty, sudden, abrupt

**Ant**

- deliberate, considered, advised, designed, studied

**Ant**

- intended, purposed, meant (see intend)
- voluntary, intentional, willful

**Ant**

- unmeditated: casual, accidental—Ant

**premeditated**

- deliberate, considered, advised, designed, studied

**Ant**

- intended, purposed, meant (see under Purposive)
- voluntary, intentional, willful

**Ant**

- unmeditated: casual, accidental—Con

**postulate**

- presuppose, assume

**presupposition**

- presupposition, presumption, assumption (see under Presuppose)

**premise**

- postulate, posit, presupposition, presumption, assumption (see under Presuppose)

**principle**

- reason: proposition, proposal

**postulate**

- presuppose, presume, assume

**prize**

- award, reward, meed, guerdon, bounty

**bonus**

- comparable when they mean something which is striven for or, sometimes, which may be won by chance; it is bestowed upon the winner in a contest or competition or in a lottery (bridge prizes) (a prize for the best composition) (at last the Dodo said, “Everybody has won, and all must have prizes” —Lewis Carroll)

In extended use prize commonly implies effort, struggle, and uncertainty in the seeking and often imputes value or worth to what is sought or competed for (let a man contend to the uttermost for his life’s set prize, be it what it will!—Browning) (he had embarked early upon that desperate game of which the prize was a throne, and the forfeit, life—Reynolds) (the leading chairmanships are regarded as great prizes—Nevins) Award implies both a decision of judges and a bestowal of a prize or an honor; it is therefore often preferred to prize when the recipients have not been competitors in the strict sense but have in their work or performances fulfilled the conditions required by those who offer prizes (receive an award for civic service) (the urge to make the most of ourselves and to get awards along with our success—J. T. Adams) Award is also applicable to the act of awarding a prize or to the decision in a particular competition (the judges may conceivably find themselves . . . unable to make an award—Barkham) Reward strongly involves the idea of recompense for something good or meritorious or ironically for something evil; it may be used in reference to a prize or premium only when that has been earned (as by effort or sacrifice); thus, a winner of a prize for the best novel of the year may feel that he has been given a reward for intense effort; a reward is offered for the return of a lost article (he scorned to take a reward for doing what in justice he ought to do—Steele) (it may come as a shock to the cynical that the mere embrace of wickedness is no guarantee of financial reward—Sat. Review) Meed and guerdon are close synonyms of reward, often employed without distinction, but the former tends to suggest a reward recognizing merit and proportioned to it, and the latter a prize or honor conferred as a reward (he must not float upon his watery bier unawed, and weller to the parching wind, without the meed of some melodious tear—Milton) (finds his guerdon in the consciousness of work done perfectly—Beerbohm) (verse, like the laurel, its immortal meed, should be the guerdon of a noble deed—Cowper) Bounty and bonus are applicable chiefly to a sum of money or its equivalent given as a premium or reward. Bounty is usually applied to a premium promised by a government or governmental agency as an inducement to some act (as enlistment in the army or navy, emigration to a distant colony, or destruction of noxious animals at peril or cost) or to someone (as the State pays a bounty for every wildcat killed) (generous bounties for enlistment were offered by federal, state, and local authorities—T. A. Bailey) Bonus, in contrast, is usually applied to something given over and above what is regularly received or due, either as a reward or encouragement or as a distribution of surplus (a soldier's bonus) (the subsidies became only a bonus for inefficiency—T. W. Arnold) Bonus . . . includes extra payments for night work, hazardous work, regular attendance, and overtime, as well as any annual or regular allotment such as a Christmas bonus—Glossary of Currently-Used Wage Terms (the reader is given a bonus of material not ordinarily found in meteorology texts—Science)

**principle**

- principle, reason: proposition, proposal

**preoccupied**

- abstracted, absent, absentminded, distraught

**prepare**

- fit, qualify, condition, ready are comparable when they mean someone or something ready. Prepare is the most inclusive of these terms; it implies a process, often a complicated process, involving a making ready, a getting ready, or a putting readiness on one or more persons or things (prepare ground for a crop) (prepare a corpse for burial) (prepare a person for bad news) (made a few notes for a paper I was preparing—Dahl) Fit is more limited in its scope than prepare: it suggests a making a person or thing fit for or suitable to a particular end or objective (accomplishments, fitting him to shine both in active and elegant life—Irving) (I had fitted myself to do everything, from sweeping out to writing the editorials—White) (the soldier's efforts to fit himself into the new world made possible by his sweat and blood—Wecter) Qualify (see also moderate) stresses the implication that a person's fitness for a duty, office, function, or status requires the fulfillment of some necessary conditions, such as taking certain courses of study or training, an examination, or an oath (do not let drugists prescribe for you; they are not qualified to treat syphilis—Fishbein) (his extensive knowledge of foreign languages specially qualified him for such service—A. P. Wills) Condition implies a getting into or a bringing to the condition that is proper or necessary for a person or, more often, a thing to satisfy a particular purpose or use (condition air by purification, humidification, and adjustment of temperature) (condition an athletic team by exercise and practice) (condition cattle for show or market) Ready emphasizes a putting a thing into order, especially for use, or a making ready a person for action (ready a bedroom for the use of a guest) (the whole town took part in helping to ready the outdoor
### presider

**preside**

- *dictate, ordain, decree, impose
- *command, enjoin, bid: exact, *demand, require
- 2 Prescribe, assign, define mean to fix arbitrarily or authoritatively for the sake of order or of a clear understanding. Prescribe stresses dictation, especially by one in command, and usually implies that the aim is to give explicit directions or clear guidance to those who accept one's authority or are bound to obey one's injunctions (*the Constitution prescribes the conditions under which it may be amended*; *the attending physician prescribes the medicines for his patient*; *the fixed routine of prescribed duties—Wilde*; *the code of behavior which the culture prescribes for child training—Franz Alexander* Assign (see also ALLOT, ASCRIBE) usually has some suggestion of allotment or ascription; it implies arbitrary but not despotistic determination for the sake of some practical end such as harmony in operation or functioning, the proper distribution of a number of things, or the settlement of a dispute by agreement (*the city charter assigns the duties of each elected official and the limits of his authority*; *the clause, assigning original jurisdiction to the supreme court—John Marshall*  *impersonal words, such as those assigning latitude, longitude, and date—Russell*) Define means to aim an intent to mark boundaries between things so as to prevent confusion, conflict, or overlapping (*the issues here are not too well defined*, but deliberation at this point may be fruitful in that respect—*Terry Southern*) obscure symbolism which define the relation of various age groups to each other—*Sapir* (*The Constitution of the United States prescribes the powers of the government, assigns the limits to each, and defines the functions of each branch*)

- *set, settle, fix: establish: direct, enjoin, instruct, order, *command
- prescription *receipt, recipe
- presence *bearing, deportment, demeanor, mien, port
- *personality, individuality (see DISPOSITION): aspect, *appearance, look
- present n *gift, gratuity, favor, boon, largess

**preponderant, preponderating**

- *dominant, predominant, paramount, sovereign

**prepossession**

- bent, turn, knack, aptitude, *gift: *leaning, penchant: predispension, inclination (see corresponding verbs at INCLINE)

**preposterous**

- absurd, *foolish, silly

**prescriptive**

- *grant, award, accord
- 2 offer, tender, proffer, prefer

**See also explanatory notes facing page 1**
pressing  632  prestige

〈the ceiling bears down upon the columns〉〈misfortune bore heavily upon him〉 Like press, the term has extended use; it and bear down may imply the achievement of any end consistent with the action of pressing down or heavily upon 〈Clan Alpine's best are backward borne—Scott〉〈his activity and zeal bore down all opposition—Macaulay〉 Squeeze usually implies the exertion of pressure on both sides or on all sides strongly enough and for a long enough time to accomplish a flattening, a crushing, a shaping, an emptying, or a compression 〈in washing silk stockings be sure to squeeze them, not wring them〉〈the child had squeezed the wax doll out of shape〉 Usually, however, the term carries an added implication that gives it an extended or specific meaning while often retaining its basic implication. Sometimes it implies nothing more than an expression of affection 〈he squeezed his friend's hand〉 but at other times it implies such a different idea as extraction 〈squeeze the juice from a lemon〉 approximates a laugh formed by . . . squeezing guttural sounds out of the throat—Pynchon〉 or eliciting with difficulty 〈we squeezed out of him an admission that he was leaving〉 or extortion 〈squeezing the people . . . of all the wealth that could be drained out of them—Froude〉 Squeeze is also susceptible to use even when there is no suggestion of exerting force on another but a clear suggestion of forcing someone, often oneself, or something into a space that is extremely small or is very circumscribed 〈squeeze through a half-opened window〉 〈squeezes his hand into the hole and grasps the prize—Stevenson-Hamilton〉 Crowd (see also PACK) implies the exertion of pressure upon and usually suggests such a force as a number of persons or of things closely packed together 〈great numbers of the birds were crowded to death〉〈I hope not too many try to crowd in here at once. It isn't a very big room—Steinbeck〉〈never have more startling twists been crowded into the concluding scene of a melodrama—J. M. Brown〉〈the multitude of weeds crowded out the flowers〉 Sometimes crowd implies pressure exerted by one or more persons in pushing or shoving through a crowd 〈the speakers crowded their way through the throng to the platform〉 Jam in its most frequent meaning carries an implication of being wedged in so that pressure on all sides ensues and movement or escape is made impossible 〈the courts need not be jammed with negligence cases—S. H. Hofstadter〉〈just above McCauslin's, there is a rocky rapid, where logs jammed in the spring—Thoreau〉〈traffic was completely jammed by the crowd〉〈traffic was completely jammed by the crowd〉 (this does not imply pressure upon all sides but (as in reference to a gun, an engine, or a machine) the presence of an obstacle or an obstruction or the displacement of a part which prevents operation 〈her propeller got foul of a rope, so that the shaft was jammed〉, and the engines could not be worked—Herschell) Ana *push, thrust, propel, shove: drive, impel, *move: *pack, cram, stuff, ram

pressing adj Pressing, urgent, imperative, crying, importunate, insistent, exigent, instant are comparable when they mean demanding or claiming attention and especially immediate attention. Pressing often implies directly or indirectly the use of pressure by persons in calling for immediate attention to their wishes 〈managed to pay his most pressing debts〉〈without ever subordinating his high ideals to the pressing demands of popular opinion—Cohen〉 but it may also imply, without reference to personal agents, a claim to quick attention which cannot be denied 〈it was business of the most pressing importance which had brought them—Doyle〉 〈it would be a great mistake for a government to concern themselves only with short-term problems, pressing as these are—Atlee〉 Urgent is stronger than pressing and places greater stress upon the constraint or compulsion of attention (as by a vehement urging), and it also usually connotes the need of promptness (as in replying, considering, or relieving) 〈an urgent telegram〉〈the urgent needs of the war—Costain〉〈the more power the people are given the more urgent becomes the need for some rational and well-informed superpower to dominate them—Buchan〉〈if human ingenuity fails in an urgent task, fate may take a hand—Butler〉 Imperative (see also MASTERCUL) stresses the obligatory nature of a task, need, or duty, but it also usually implies that immediate attention is essential 〈I feel it my imperative duty to warn you〉〈a remonstrance had become imperative—Buchan 1902〉〈military necessity made it imperative that the bridge should be blown up—Forster〉 Crying stresses the demand for attention but adds the implication of the extreme or shocking conspicuousness of the need 〈an organizer of genius in a day when order and discipline were the crying needs—Malone〉〈our crying need is for more blood donors〉 Importunate carries a strong implication of persistency in demanding or claiming attention; often therefore it is applied to persons or to their acts 〈an importunate beggar〉〈an importunate knocking at a door〉〈when people are importunate, and will not go away when asked, they had better come in—Shaw〉 but it is also much used in reference to impersonal matters (as problems or difficulties) which persistently and naggingly make claims upon one's full and immediate attention〈the demands of the dance becoming . . . too importunate for a divided attention—Austen〉〈it is a work which ought to be studied by anyone to whom the relation of Church and State is an actual and importunate problem—T. S. Eliot〉 Like importunate, insistent basically implies a quality of persons, that of insisting or maintaining or asserting persistently 〈how continual and insistent is the cry for characters that can be worshiped—Galsworthy〉〈de Vaca was insistent, and Charles approached the table—Hergesheimer〉 and it too is often used in reference to a quality which enforces attention by its perseverance or compels it by obtruding itself upon one's consciousness 〈an insistent noise〉〈an insistent voice〉〈the insistent odor of fertilizer—Amer. Guide Series: Md.〉〈we who read poetry are ridden and haunted by no such insistent problem—Lowes〉 Exigent implies less a demand for immediate attention than one for action (as by way of giving assistance or settling matters); however, it may carry a wider implication; in general it is close to urgent or pressing in its emphasis on the exacting or the imperative nature of that demand 〈that exigent cry for help—Clarendon〉〈demands upon him had never been exigent before. He had selected a course of life which haunted by no such exigent before〉 Instant may come very close to urgent and like it often implies a temporal pressure; distinctively it may suggest perseverance or the need of perseverance 〈rejoicing in hope; patient in tribulation; continuing in prayer—Rom 12:12〉〈I thought there was not such instant haste—Scott〉〈the single-hearted force of him who sees the instant need—Buchan〉〈the need to study precision in writing has grown far more instant since men of science have abandoned the "universal language"—Quiller-Couch〉 A colon (:) separates groups of words discriminated. An asterisk (*) indicates place of treatment of each group.
presume *presuppose, postulate, premise, posit, assume
Ana surmise, *conjecture: deduce, *infer, judge, gather, conclude

presumption presupposition, assumption, postulate, premise, posit (see under PRESUPPOSE)
Ana view, *opinion, conviction, belief: conjecture, surmise (see under CONJECTURE vb)

presumptuous *confident, assured, sanguine, sure
Ana self-confident, self-assured, self-possessed (see corresponding nouns at CONFIDENCE): presuming, assuming (see PRESUPPOSE): positive, cocksure, certain, *sure: arrogant, insolent, overbearing (see PROUD)

presuppose, presume, assume, postulate, premise, posit are comparable when they mean to take something for granted or as true or existent especially as a basis for action or reasoning. Their corresponding nouns presupposition, presumption, assumption, postulate, premise, posit when they denote something that is taken for granted or is accepted as true or existent are distinguishable in general by the same implications and connotations as the verbs. Presuppose and presupposition, the most inclusive of these words, need not imply dubiousness about what is taken for granted. At the one extreme they may suggest nothing more than a hazy or imperfectly realized belief that something exists or is true or an uncritical acceptance of some hypothesis, in either case casting doubt on what is taken for granted (a lecturer who talks above the heads of his listeners presupposes too extensive a knowledge on their part). A school of theology that presupposed the total depravity of human nature (it presupposes an opposition between the end of the individual and that of the State, such as was entirely foreign to the Greek conception—Dickinson). At the other extreme the terms may be used in reference to something that is taken for granted because it is the logically necessary antecedent of a thing known to be true or the truth of which is not presently in question (an effect presupposes a cause). So deliberate a murder presupposes a motive (belief in the supernatural presupposes a belief in natural law—Inge). Presume and presumption may imply conjecture (I presume they are now in London) but ordinarily they carry the implication that whatever is taken for granted is entitled to belief until it is disproved. Therefore one presumes only something for which there is justification in experience, or which has been shown to be sound in practice or in theory or which is the logical inference from such facts as are known (until a man or an organization has been condemned by due process of law he or it must be presumed innocent—Hutchins). (the fact that a custom is ancient and is still revered creates a presumption in its favor). (It cannot be presumed that any clause in the constitution is intended to be without effect—John Marshall). Assume and assumption stress the arbitrary acceptance as true of something which has not yet been proved or demonstrated or about which there is ground for a difference of opinion (some debaters weaken their case by assuming too much). (for the sake of argument let us assume that the accident occurred as it is contended). (I know of nothing more false in science or more actively poisonous in politics... than the assumption that we belong as a race to the Teutonic family—Quiller-Couch). (1... assume that one purpose of the purchase was to suppress competition—Justice Holmes). (she was amazed and at a loss. She had assumed that Elfine's family would be overjoyed at their offspring's luck—Gibbons). Postulate, either as verb or noun, differs from assume or assumption in being more restricted in its application and more exact in its implications. One can assume or make an assumption at any point in a course of reasoning, but one postulates something or lays down a proposition as a postulate only as the groundwork for a single argument or for a chain of reasoning or for a system of thought. Postulate, therefore, has reference to one of the underlying assumptions, which are accepted as true but acknowledged as indemonstrable and without which thought or action or artistic representation is impossible because of the limitations of human knowledge or of human reason or of art (the ordinary man always postulates the reality of time and of space) (the dramatist postulates certain conventions which it is necessary for the audience to accept). (belief in the uniformity of nature, which is said to be a postulate of science—Russell). (the prevailing theological system is one which postulates the reality of guidance by a personal God—Huxley). (What I'm postulating in all this... is that the unconscious, you see, has an enormous teleological sense—Mailer). Premise is often used as though it were identical in meaning with postulate. Premise, the noun, in logic denotes a proposition, or one of the two propositions in a syllogism, from which an inference is drawn. In more general use it may refer to a proposition which is the starting point in an argument. But a premise is not a proposition that is frankly an assumption, as a postulate often is; it may have been previously demonstrated or it may be admitted as true or axiomatic, but it is always advanced as true and not as assumed (his listeners could not assent to his conclusion because they doubted the truth of his premises). (begin with a simple statement which is the premise for all that I have to say—F. C. James). Premise, the verb, means to lay down as a premise or to base on or introduce by a premise or other pertinent matter and usually refers to the broader rather than to the technical meaning of the noun (he premised his argument on a proposition which all but a few of his readers accept as true). (it was quickly evident that the decision was not premised upon any abhorrence of the test oath technique—New Republic). (these observations are premised solely for the purpose of rendering more intelligible those which apply more directly to the particular case under consideration—John Marshall). Posit, as noun and verb, comes close to postulating in implying the laying down of a proposition as a base for an argument, a line of reasoning, or a system of thought, but it may differ in suggesting subjective and arbitrary grounds rather than, as postulate regularly does, objective and rational grounds for selection of the proposition (if she needs salvation, she will posit a savior—Santayana). (he did not posit a world of wormless apples to set off the fruit he reported in such wonderful detail—Grattan). (materialism at that time posited the premise that character was the product of environment, and this was the basis for Zola's naturalism—Farrell) but even when it connotes actual falsity it remains very close to postulate (such posits or postulated entities are myths from the standpoint of the level below them, the phenomenalistic level—Hofstadter). (kill or be killed, the surgeons cried, discriminating Die from Live, and spoke the truth. And also lied, posited false alternative—Gibson). Ana surmise, *conjecture, guess: *infer, deduce, gather, judge

description
pretension, privilege

2 Pretense, pretension, make-believe are comparable though seldom interchangeable when they involve the idea of offering something false or deceptive as real or true. Pretense may denote false show in general, or the evidence of it (she is utterly devoid of pretense) there is too much pretense in his piety (the pretense that eludes the detection of others and that which deceives the pretender himself—Brownell) (confuse dignity with pomposity and pretense—Cerf) The term may apply also to an act that is performed, an appearance that is assumed, or a statement that is made in the hope that it will convince others of the truth or reality of something that is false or unreal (rushing away from the discussion on the transparent pretense of quieting the dog—Conrad) (my mother's affectionate pretense of his being the head of the family—Mary Austin) Pretension (see also CLAIM, AMBITION) is rarely used in place of pretense as a concrete act, appearance, or statement, but it is often used in the sense of false show or the evidence of it, with, however, somewhat differing implications. Where pretense in this general sense often implies hypocrisy or intentional deceit, pretension suggests rather an unwarranted assumption that one possesses certain desirable qualities or powers, and therefore more often implies overweening conceit or self-deception (his disdain of affectation and prudery was magnificent. He hated all pretension save his own pretension—Mencken) (this mannerism which has become too offensive . . . is Roslyn's social pretension. Perhaps I should say intellectual pretension. She entertains people as if she were conducting a salon—Mailer) (annoyed with . . . the pretensions of simplicity and homelessness in her parlor—Cheever) Make-believe applies usually to pretense or pretenses that arise not so much out of a desire to give others a false impression as out of a strong or vivid imagination (as that of children or poets who like to take what their fancies create as real or as true) (in children, the love of make-believe usually expresses itself in games) The term is occasionally used to denote the acceptance against one's better judgment of something manifestly unreal or untrue because of some power in the thing itself or in its accompaniments (tells us that the make-believe of the stage is a higher reality than life outside—Bentley)

Ana humbug, fake, sham, fraud, deceit, deception, *imposture: affectation, *pose, air, mannerism

pretension 1 *claim, title, pretense
Ana *right, privilege, prerogative: assertion, affirmation, declaration, protestation (see corresponding verbs at ASSERT)

pretext excuse, plea, alibi, *apology, apologia

prevalent 634

A colon (:) separates groups of words discriminated. An asterisk (*) indicates place of treatment of each group.
nating, saturating (see PERMEATE): *usual, wonted, accustomed, customary

prevent *lie, equivocate, palter, fib

prevaricate *frustrate, thwart, foil, baffle, balk: *arrest, check, Ana

prevent 1 Prevent, anticipate, forestall can mean to be or get ahead of or to deal with beforehand, with reference especially to a thing's due time or to its actual occurrence or to the action of another. Prevent implies frustration (as of an intention or plan) or an averting (as of a threatened evil) or a rendering impossible (as by setting up an obstacle or obstacles) (the surest way to prevent aggression is to remain strong enough to overpower and defeat any who might attack—Lawrence) Sometimes the emphasis upon hindrance (see PREVENT 2) is so strong that other implications are nearly lost, but in the sense here considered advance provision or preparation against something possible or probable is clearly implied (medical science knows how to limit these evils and can do much to prevent their destructiveness—Elliot) (steps had therefore to be taken to prevent or impede these unseemly displays—Thornton) (who stands safest? tell me, is it he? . . . whose preventing care in peace provides fit arms against a war?—Pope)

anticipate (see also FORESEE) takes the place of prevent when merely getting ahead of another especially as a precursor or forerunner is implied (most of the great European thinkers of the eighteenth and early nineteenth centuries were in some measure inspired, influenced, or anticipated by Shaftesbury—Ellis) (a "Teacher of Righteousness" who seemed in some ways to anticipate Jesus—Edmund Wilson) Like prevent, anticipate sometimes suggests frustrating another in carrying out an intention or plan, but implies its prior performance or execution rather than interposition of obstacles to its performance (he would probably have died by the hand of the executioner, if the executioner had not been anticipated by the populace—Macaulay) (in October came Commodore T. A. C. Jones, palpitating lest Great Britain anticipate him in seizing California—H. I. Priestley) Distinctively, the word implies dealing with (as by using, paying, or acting) in advance of the due time or proper order but it often involves another implication which can be gathered only from the context; thus, one anticipates a payment on a loan by making a payment before it is due; one anticipates his salary by spending its equivalent before it is earned (anticipate some details in telling a story) Forestall, in what has become perhaps the less common meaning, carries over from its earliest sense so strong an implication of intercepting that it means merely to stop in its course (something you hurried to forestall—Mary Austin) (forestalled by the watchful Jelks who fetched it for him—Dohl) But often the word loses most of its suggestion of intercepting and then implies beforehand action that serves to render a thing, and especially something inevitable, powerless to harm or merely useless (to forestall public opinion and guide its judgment—L. P. Smith) (posterity will still be explaining me, long after I am dead. Why, then, should I forestall their labors?—Rose Macaulay)

2 Prevent, prelude, obviate, avert, ward are comparable when they mean to hinder or stop something that may occur or, in the case of prevent and preclude, to hinder or stop someone from doing something. Prevent usually implies the existence of something which serves as an insurmountable obstacle or an impediment (there is no law to prevent you from erecting a building on this spot) (the authority of his presence and the purposefulness of his manner at least prevent the role becoming a minor one—Bentley) (he prevents an innocent man going to the gallows—New Books) Preclude differs from prevent in stressing the existence of some situation or condition or the taking of anticipatory measures that effectually shuts out every possibility of a thing's occurring or of a person's doing something (he makes everything so clear that all misunderstanding is precluded) (death precluded him from completing his investigation) (the doctrine . . . was adopted, not to promote efficiency but to preclude the exercise of arbitrary power—Brandes) (the roar of the motor precluded further conversation—Gerald Beaumont) Obviate usually implies the use of intelligence or thought; preclude also often implies these but sometimes it suggests the operation of chance. The chief distinction between these words when anticipatory measures are implied is that obviate usually connotes an attempt to forestall disagreeable eventualities by clearing away obstacles or by disposing of difficulties (the use of bills of exchange obviates the risk in transporting money from one country to another) (no care, no art, no organization of society, could obviate the inherent incompatibility of individual perfection with the course of nature—Dickinson) Avert and ward, the latter usually with off, differ from the other words of this group in implying prevention of an approaching or oncoming evil. They suggest therefore immediate and effective measures in the face of what threatens. Avert, however, suggests the use of active measures to force back the evil before it is actually encountered (avert a catastrophe by prompt action) (the satisfaction of averting war—J. R. Green) (it was very doubtful whether the consequences could be averted by sealing my lips—Shaw) Ward, on the other hand, implies a close encounter and the use of defensive measures (ward off an opponent's blow) in order to avoid the evil or to diminish its disastrous effects (ward off a chill with hot drinks) (a magic charm to ward off evil—Herskoviits) (our nation has warded off all enemies—Eisenhower) *hinder, impede, obstruct, block, bar, dam, debar, shut out (see EXCLUDE): prohibit, *forbid, interdict, inhibit

price n *victim, quarry

price n Price, charge, cost, expense can mean what is given or asked for payment for a thing or for its use, or for services. Price and charge in their ordinary nontechnical use commonly designate what is asked or demanded—in the case of price, especially for goods or commodities; in the case of charge, especially for services (what is the price of this book?) (the price of meat has risen greatly) (the market price of wheat) (the charge for haulage) (goods delivered free of charge within a radius of one hundred miles) (there is a small charge for registering a deed) In economics, however, price does not necessarily refer to a fixed sum of money asked by a seller, but to the quantity or number of units of one thing exchangeable in barter or sale for another thing (labor was the first price, the original purchase money that was paid for all things—Smith's Charge, especially in accounting, also applies to what is imposed on one as a financial burden (the fixed charges of a business include rentals, taxes, interest, and liens) Cost and expense in their ordinary nontechnical use apply to what is given or surrendered for something—cost often implying somewhat specifically the payment

Ana analogous words Ant antonyms Con contrasted words See also explanatory notes facing page 1
of the price asked and expense often designating the aggregate amount actually disbursed for something (they found the cost of the piano made too severe a drain on their resources) (the cost of provisions) (traveling expenses) (the heavy expense of a long illness) But cost sometimes replaces price with, however, a difference in connotation. Since cost applies to whatever must be given or sacrificed to obtain something, to produce something, or to attain some end whether it be money, labor, or lives or whether it is actually given or sacrificed, it, when replacing price, tends to suggest what will be taken or accepted from one in exchange rather than what the item is worth (the price of this article is below the cost of its manufacture) (victory will be won only at great cost of life) (he felt that the cost in effort was greater than he could afford) Expense also may denote expenditure especially but not only of money (fresh news is got only by enterprise and expense—Justice Holmes) (a convenient way of producing the maximum amount of "copy" with the minimum expense of intellect—Babbit)

priceless invaluable, precious, *costly, expensive, dear, valuable

Ancher cherished, treasured, prized, valued (see APPRECIATE)

prick vb 1 punch, puncture, *perforate, bore, drill

Ancher *enter, pierce, probe, penetrate: *cut, slit, slash

pride n Pride, vanity, vainglory are comparable when they mean the quality or the feeling of a person who is keenly or exquisitely aware of his own excellence or superiority. The same distinctions in implications and connotations are found in their corresponding adjectives proud, vain, vainglorious. Pride and proud may imply either justified or unjustified self-esteem, insofar as what one regards as a merit or a superiority is real or imagined, and insofar as the feeling manifests itself either in proper self-respect and distaste for what is beneath one's standards or in inordinate and arrogant conceit. In the "unjustified" interpretation, pride is a sin or vice and the antithesis of humility (those that walk in pride he is able to abase—Dan 4:37) (pride in the sense of contemplating others less gifted than herself deserves the two lowest circles of a vulgar woman's Inferno—Holmes) (he had gone on for years deceiving himself—but proud, too self-conscious, maybe just too stupid to realize it—Styron) but in the "justified" interpretation, pride is a virtue or at least a highly pardonable, even commendable, feeling or quality that is the antithesis of shame and that spurs one to equal or better one's best or gives one rightful gratification (take pride in our work) (pride of his skill in fencing) (the solemn pride that must be yours to have laid so costly a sacrifice upon the altar of freedom—Lincoln) (she might grieve . . . but she was gallant, she was proud; she would not whine—Sackville-West) Vanity and vain imply an excessive desire to win the notice, approval, or praise of others; both connote an interest centered on oneself and often suggest a concentration on things of little or no importance relatively (he had . . . not the gay, tail-spreading peacock vanity of his son—Carlyle) (he was conceited and vain, and he was endlessly trying to enjoy what he thought he appeared to be in the eyes of others—Farrell) (looked only at himself; he had nothing but a small and worthless mortification, which was only wounded vanity—Deland) Vainglory and vainglorious imply excessive pride which manifests itself in boastfulness and arrogant display of one's power, skill, or influence (vainglorious boastings—Irving) (American historians . . . with much of the vainglorious pedantry that Irving burlesqued—Brooks) (have blockaded their minds behind . . . walls of nationalistic egoism and vainglory, symptoms of collective paranoia—Yale Review)

Ancher arrogance, haughtiness, superciliousness, disdainfulness or disdain, insolence (see corresponding adjectives at PROUD): complacency, smugness, priggishness (see corresponding adjectives at COMPLACENT): self-esteem, self-love, egotism, egoism, *conceit

Ancher humility: shame

pride vb Pride, plume, pique, preen are all reflexive verbs meaning to congratulate oneself because of something one is, has, or has done or achieved. Pride usually implies a taking credit to oneself on or upon something that redeems to one's honor or gives just cause for pride in oneself (he prides himself on his ancestry) (Mark prided himself upon maintaining outwardly a demeanor that showed not the least trace of overstrung nerves—Mackenzie) (he prided himself on his part in the new century, but he resisted the installation of a telephone—Frank)

Plume adds to pride the implication of a display of vanity or of a more obvious exhibition of one's gratification; the term usually suggests less justification than does pride (the Viceroy plumed himself on the way in which he had instilled notions of reticence into his staff—Kipling) (Cicero plumed himself on flirting with disreputable actresses—Buchan) (authors who plumed themselves on writing history with "popular appeal"—L. B. Wright) Pique (see also PROVOKE 1) differs from plume chiefly in carrying a hint of stirred-up pride or satisfaction; usually the cause of the pride is a special accomplishment (every Italian or Frenchman of any rank piques himself on speaking his own tongue correctly—Walpole) ("Pride," observed Mary, who piqued herself upon the solidity of her reflections, "is a very common failing, I believe—Austen) Preen is occasionally used in place of plume, sometimes with a slight suggestion of adorning oneself with one's virtues (he preened himself upon his sapience—Lowell) (men have admired, in theory, feminine virtue and preened themselves on the fear they aroused in the timid sex—Cunnington)

Ancher *boast, brag, vaunt, crow, gasconade: congratulate, *felicitate

priggish 1 smug, self-complacent, self-satisfied, *complacent

Ancher righteous, ethical, *moral: conceited, egotistic, self-esteeming, self-loving (see corresponding nouns at CONCEIT)

2 *prim, prissy, prudish, puritanical, straitlaced, stuffy

Ancher see those at PRIGGISH 1

prim adj Prim, priggish, prissy, prudish, puritanical, straitlaced, stuffy mean excessively concerned with what one regards as proper or right. Prim and priggish (see also COMPLACENT) both imply an excessive and conscious fastidiousness in manners and morals that often more or less displease an observer. Prim, however, often suggests stiffness and preciseness of manner as well as extreme decorousness, and priggish connotes a more or less offensive, but not necessarily conscious, assumption of moral superiority, so that they are rarely interchangeable. Further, prim is often applied to the dress, words, or actions of persons but priggish is seldom referred to anything but the person or to something that directly reveals his personality (in the reign of James I the conduct of ladies and gentlemen was not marked by the same prim propriety as in the reign of the highly respectable Victoria—Ellis) (Charlotte Lovell was meant to be an old maid . . . . There was something prim about her in spite of her fiery hair—Wharton) (a widower, a man with a prim sour mouth and an expression of eternal disapproval

A colon (:) separates groups of words discriminated. An asterisk (*) indicates place of treatment of each group.
all over his face—Dahl> <there is . . . no moralizing of that offensively priggish kind which the instinct of boys teaches them to despise and mistrust—Pall Mall Gazette> <it was, as you warned me, very expensive. But I have no priggish objections to a little luxury—Ambler> Prissy, though sometimes very close to prim in meaning, is applied to a person who shows, or to a thing that manifests, an exaggerated sense of what is proper or precise; the term connotes sissiness but usually as a feminine concern for niceties of expression, of conduct, or of design and may imply a lack of forcefulness or virility <an outspoken candidate who offended the prissiest members of his party> <shock words may wear out their welcome just as readily as prissy ones—New Republic> (a shockable, narrow, prissy people obeying the rules . . . and protecting their treasured, specialized pruderies—Theodore Sturgeon) Prudish implies a modesty and decorousness so marked as to seem affected or overasserted; the term, however, seldom suggests pretense but rather an undue consciousness of propriety or fear of impropriety or an excessive sense of the importance of modesty and decorum <a verse, not fettered in its movements, or prudish in its expressions—Edinburgh Review> (tried to condemn her own attitude as old-fashioned, prudish. There was no such thing as an adulteress anymore, she told herself—Wouk) <had become so serious, so prudish almost, since she had given up balls and taken to visiting the poor—Wharton> Puritanical, often capitalized, may refer specifically to the religion of the Puritans especially as it showed itself in strict regulation of behavior, but in ordinary uncapitalized use it more often suggests only an excessive narrowness or illiberality in judgment (as of books, plays, or pictures), in regulation (as of manners and morals), or in narrowly determining the boundary between what is good and what is bad <the puritanical suspicion of beauty> <that Fielding in his hatred for humbug should have condemned purity as puritanical, is clearly lamentable—Stephen> <he held old-fashioned and rather puritanical views as to the vice of luxury and the sin of idleness—Wood> <afraid that if it became known he might jeopardize his position in the rather puritanical community, he avoided consulting any of the Coltertown doctors—Elmer Rice> Straitlaced and stuffy are derogatory terms applicable to persons or things that are markedly puritanical or prudish; Straitlaced refers more often to a person or his principles from a less subjective point of view than does stuffy, which is usually a term of contempt expressive of their effect upon the observer <“Stuffy, my lord; it's an expression a good deal used in modern Society.” “What does it mean?” “Straitlaced, my lord”—Galsworthy> <a stuffy book> <abiding by the rather involved, stuffy code of ethics—Riggs> <set himself intently to the business of assailing the straitlaced authorities of Boston—Parrington> Ana precise, *correct, nice: *decorous, proper: *stiff, rigid, wooden primal primordial, primitive, pristine, primeval, *primary, prime Ana *ultimate, absolute, categorical: original, fresh, *new primary, primal, primordial, primitive, pristine, primeval, prime mean first in some respect (as order, character, or importance). Something primary comes first in the order of development or of progression. Sometimes the term means little more than initial (the primary lesion of a disease) but sometimes it acquires the implications of fundamental, elemental, or elementary, and describes the part or element that is first (as in time or in importance) or one of such parts or elements in a complicated structure, substance, or system <the primary yxlem tissue of a tree> <primary schools> <the raw material of music is sound. Sound is a primary, a "pure" medium . . . . It has no meaning except in a context—Day Lewis> and at other times it means original in the sense of not being derived <the primary colors> <the primary qualities of matter> <the primary cause> <the primary end of poetry> (call of us in the news business ought to remember that our primary responsibility is to the man who buys his newspaper, or turns on his radio, expecting . . . . the whole truth—Davis> Primal applies to what is primary in the sense of initial, fundamental, or elemental <some who maintain that the regime of religious toleration has become possible only because we have lost the primal intensity of religious conviction—Cohen> <not philosophy, after all, not humanity, just sheer joyous power of song, is the primal thing in poetry—Beethoven> or to what goes back to the origin or to the beginnings, especially of the human race <it hath the primal eldest curse upon't, a brother's murder—Shak> <the Biblical vocabulary is compact of the primal stuff of our common humanity—Lowes> <ultimate issues, primal springs—Kipling> Primordial applies to what serves as the starting point in a course of development or growth or is the earliest in order or in formation. The term often suggests a rudimentary quality or state; thus, the primordial ooze is thought of as the substance out of which the earth was formed; a primordial cell is in biology the first and least specialized of a line of cells <primordial germ cells> <primordial man> <assuming that the sun, planets, and their satellites had all originated from a primordial mass of gas—S. F. Mason> Something primitive belongs to or is associated with an early stage, often but not necessarily a remote stage, in the development of something (as the human race). Often, when used in reference to art or manufacture, the term suggests lack of knowledge of such modern techniques or conventions as perspective in painting or modes in mensurable music or architecture or industry <primitive potteries> <the symmetry of the body provides the archetype of primitive design in most religious art—Binyon> When used in reference to persons, their ways of living, or their instincts, emotions, or laws, it usually suggests either a connection with a very rudimentary civilization or a retention of a character or quality associated with such a civilization <a primitive but effective police inquiry—T. S. Eliot> <primitive laws to protect inheritance, to safeguard property—Rose Macaulay> <genuinely primitive traits that reveal themselves in the childhood of either the individual or the race—Babbit> <he worked in the seed gardens, learned the primitive pharmacy of roots, barks, and herbs—Genzmer> Often, however, the term merely stresses an opposition to what is highly civilized or sophisticated and therefore unduly complicated, and may suggest naturalness or simplicity <life is very primitive here—which doesn't mean that one is getting down to anything fundamental, but only going back to something immediate and simple—H. G. Wells> <the town band, a very primitive affair, brings up the rear, playing "Yankee Doodle"—Shaw> Pristine applies to something in its earliest and freshest and newest state <an image of the pristine earth—Wordsworth> <the qualities of pristine Christianity> <restored to its pristine freshness—A prine- tine form of air conditioning—Mumford> Primeval in its basic sense applies to something which belongs to
Principal

Mainly, chiefly, mostly, largely, greatly, chief, main, leading, foremost, capital

Kingly, regal, royal, queenly, imperial

Luxurious, sumptuous, opulent: munificent, bountiful, bounteous, openhanded, liberal

Dominant, predominant, paramount: vital, cardinal, fundamental, essential: preeminent, supreme, superior

Mainly, chiefly, mostly, largely, greatly, generally

Prime, axiom, fundamental, law, theorem are comparable when they denote a proposition or other formulation stating a fact or a generalization accepted as true and basic. Principle applies to a generalization that provides a basis for reasoning or a guide for conduct or procedure. The principle of free speech (his remarkable grasp of principle in the remaining field, that of historical geography—Farrington) (the same hankering as their equivalent) (the conquest of nature's procreative forces, through the laws of the rain and of the seasons here are tropic laws—M. S. Douglas) (it is a law that no two electrons may occupy the same orbit—Eddington) Theorem applies to a proposition that admits of rational proof and, usually, is logically necessary to succeeding logical steps in a structure of reasoning (theoretical economics puts the patterns of uniformity in a coherent system [of which] the basic propositions are called assumptions or postulates, the derived propositions are called theorems—Lange) (the error that was to prove most durable of all, the theorem that only a very short land traverse would be found necessary from Missouri to Pacific waters—De Voto) (the superficial commonplaces which pass as fundamentals—Johnson) (the courts established the priority of invention of birth) (they disputed priority of invention of the regenerative electron-tube circuit—C. B. Fisher) When, however, the question concerns a number of things (as debts or cases) which cannot be taken care of or dealt with all at once and must be arranged in order of time, priority suggests a rule of arrangement that determines which shall precede the other. Priority is the usual term in law and the sciences and chiefly concerns an order of time. When there is merely a question concerning the time relations of events, the term implies antecedence in occurrence (the courts established the priority of the wife's death in an accident) (the right to inherit a title is dependent mainly on priority of birth) (they disputed priority of invention of the regenerative electron-tube circuit—C. B. Fisher)

A colon (:) separates groups of words discriminated. An asterisk (*) indicates place of treatment of each group.
priory 639 probable

of seniority or length of service) (the order of precedence was very rigidly observed, for the visiting maids and valets enjoyed the same hierarchy as their mistresses and masters—Sackville-West) In more general use the term often suggests a prior place, chance, or seat accorded to one, often because of age, sex, social position, or as a mere courtesy (no one lost anything by granting precedence to a man so flauslessly urbane—Repplier) (to give organizations precedence over persons is to subordinate ends to means—Huxley)

*Ana ordering or order, arrangement (see corresponding verbs at ORDER): ascendancy, *supremacy: preeminence, transcendence (see corresponding adjectives at SUPREME)

prize n *premium, award, reward, meed, guerdon, bounty, bonus

forfeit

prize vb value, treasure, cherish, *appreciate

*Ana esteem, respect, admire, regard (see under REGARD n): *estimate, evaluate, assess, assay, rate

probable, possible, likely are comparable when they mean not now certain but such as may be, or may become, true, real, or actual. Something probable has so much evidence in its support or seems so reasonable that it commands itself to the mind as worthily of belief, though not to be accepted as a certainty; thus, the most probable conclusion from evidence at hand is the one which the weight of evidence supports even though it does not provide proof; the probable thief is the one at whom so much of the evidence points as to give grounds for a presumption that he is guilty; the "probable life" of a person, in the language of actuaries, is the period during which one half the persons of a given age at a given time will remain alive according to mortality tables (the probable cause of a fire) (the probable expenses of a trip) (far from being a madman's dream... Bur's chance of success was uncomfortably probable—Hervey Allen) (it is not probable that any enemy would... attack us by landing troops in the United States—Roosevelt) Something possible is within the powers of performance, attainment, or conception of an agent or agency, especially a human agent (it is possible to cross the Atlantic in an airplane) (knowledge possible only to God) or which is within the widest limits of a person's ability or a thing's capacity as determined by nature, necessity, or circumstances (it is not possible to carry more than a thousand gallons of gasoline in this airplane) (communication with the stars may never be possible) (the number of possible amusements is small until the child has learned to grasp objects that it sees—Russell) or which, though not probable, may happen by chance or is dependent on a contingency (his election is possible, but not probable) (it is possible that she will come this way) (I think that "so near as to obstruct" means so near as actually to obstruct—and not merely near enough to threaten a possible obstruction—Justice Holmes) Something likely (see also ANT 2) is to all appearances as alleged, suggested, or required; in contrast with probable, likely does not as often or as definitely suggest grounds sufficient to warrant a presumption of truth, but in contrast with possible, it usually implies many more chances in favor of its being true or coming about; thus, the probable murderer is the suspect whose guilt is nearly but not completely established by the evidence: a possible murderer is merely one against whom suspicion is directed for some reason, or one known to have had opportunity; the likely murderer is the one among the possible murderers who, especially from a more or less superficial point of view, has had the strongest motive and the best opportunity, or toward whom the circumstantial evidence most distinctly points as the murderer (no likely heir to the bachelor millionaire's estate has been mentioned) (the likely outcome of the war changes from month to month) (if there is failure in one quarter, no matter which, it is a likely sign of failure in the other—Blackmur) Likely is also often used in the sense of promising because of appearances or ability to win favor (a likely young man) (a likely candidate) and sometimes in that of suitable because of apparent fitness or adaptability.
tion to some end (watching for a likely place to picnic) (chose the eastern part of the island as the more likely district for discovery of prehistoric remains—Clodd) Ana credible, believable, colorable, *plausible: reasonable, *rational
Ant certain: improbable

**proclamation** *novice, novitiate, apprentice, postulant, neophyte*

**probe** n investigation, *inquiry, inquisition, inquest, research

**proceed** vb pierce, penetrate, *enter
Ana examine, inspect, *scrutinize: *prove, try, test

**probfity** *honesty, honor, integrity
Ana uprightness, justness, conscientiousness, scrupulosity (see corresponding adjectives at UPRIGHT): *truth, veracity: rectitude, *goodness, virtue

**problem** *mystery, enigma, riddle, puzzle, conundrum
Ana perplexity, mystification, wilderness, distraction (see corresponding verbs at PUZZLE): *predicament, dilemma, plight, quandary
Ant solution

**problematic** *doubtful, dubious, questionable
Ana ambiguous, equivocal, *obscure, vague, cryptic, enigmatic: uncertain, suspicious, mistrustful (see corresponding nouns at UNCERTAINTY)

**procedure** *process, proceeding
Ana ordering or order, arrangement (see corresponding verbs at ORDER): *method, system, manner, way: conducting or conduct, management (see corresponding verbs at CONDUCT)

**proceed** issue, emanate, stem, flow, derive, *spring, arise, rise, originate
Ana *follow, succeed, ensue: *come, arrive

**proceeding** n *process, procedure
Ana *action, act, deed: *affair, business, concern: operation, functioning, working (see corresponding verbs at ACT)

**process, procedure, proceeding** denote the series of actions, operations, or motions involved in the accomplishment of an end. Process is particularly appropriate when progress from a definite beginning to a definite end is implied and something is thereby made, produced, or changed from one thing into another; the term usually suggests a division of the entire sequence of events into steps or stages (describe the process of making sugar from sugar-cane) (the process of digestion) (perfect knowledge is no mere intellectual process) (I have always liked the process of commuting; every phase of the little journey is a pleasure to me—Dahl) The idiomatic phrase “in process” means in the course of being made, produced, built, constructed, evolved, or attained (for men in practical life perfection is something far off and still in process of achievement—James) Procedure stresses the method followed or the routine to be followed, whether in carrying through an industrial, a chemical, a mental, or other process, or in doing some specific thing (as conducting a meeting, a trial, a conference, or a business, or performing an experiment or an operation, or prosecuting an investigation or a search) (study the rudiments of parliamentary procedure) (knows laboratory procedure thoroughly) (correct legal procedure) (you know what a stickler she is for procedure—"red tape" I called it to her—Terry Southern) (this Byzantine court, which is trying to adapt its procedure to the ideals of its Western education—Edmund Wilson) Proceeding, a much less definite term than the others of this group, applies not only to the sequence of events, actions, or operations directed toward the attainment of an end, but also to any one of such events, acts, or operations. The term throws more stress on the individual or collective items than on their closely knit relation to each other or on the final end which they have in view, and often the term means little more than an instance, sometimes a course, of conduct or behavior (the law... stepped in to prevent a proceeding which it regarded as petty treason to the commonwealth—Froude) (record the proceedings of a meeting of a society) (the precise habits, the incredible proceedings of human insects—L. P. Smith) (legislative proceedings frequently veer off into areas of somewhat less than momentous significance—Armbrister)

**proceed, progress, advance** (see under ADVANCE vb): conducting or conduct, management, controlling or control, direction (see corresponding verbs at CONDUCT): performance, execution, accomplishment, fulfillment (see corresponding verbs at PERFORM)

**procession, parade, cortege, cavalcade, motorcade** mean a body (as of persons and vehicles) moving along in order. Procession stresses the orderly arrangement and smooth procedure; often it suggests formality, solemnity, and pomp (a funeral procession) (and all the priests and friars in my realm shall in procession sing her endless praise—Shak) (and delegate Dead from each past age and race, viewless to man, in large procession pace—Lanier) Parade is used of a usually large and formal procession. The term also implies marching in a more or less military fashion to the accompaniment of a band and often suggests other evidences of pomp and display (see also DISPLAY) (the Fourth of July program includes a parade and fireworks) (the annual parades of both organizations... open-air festivals, with colorful banners, drum and fife bands)—Mogy (there was a parade in honor of the successful candidate for governor) Cortege, sometimes used in the meaning of a retinue or train, usually means a procession of mourners at a funeral; it can refer either to those who follow the casket on foot or to those who follow in vehicles (declared that the cortege of the dead emperor must set forth on the journey homeward—Buck) Cavalcade throws the emphasis upon the moving of men on horseback or in vehicles; often it applies specifically to a dignitary and his retinue (the king's cavalcade through the gates of the city the day before his coronation—Walpole) and only indirectly does it suggest the appeal of a spectacle or spectacular procession. Motorcade may replace cavalcade when the intent is to stress mechanized as distinguished from equine power; otherwise the two terms are similar in values (with a motorcade of more than 2,000 vehicles, New York yesterday celebrated its traffic safety record for the first quarter—N. Y. American) (more than 300 floats will form a brilliant motorcade to the fairgrounds—Brooklyn Daily Eagle) (the three heads of state motored to Arlington Cemetery. It was raw and windy as the motorcade entered the cemetery—Time)

**procrastinate** *succession, sequence, train: pomp, array (see DISPLAY)

**proclaim** *declare, announce, publish, advertise, promulgate, broadcast
Ana *reveal, disclose, discover, divulge, tell: voice, utter, vent, ventilate (see EXPRESS vb): *inform, apprise

**proclamation** declaration, announcement, publication, advertisement, promulgation, broadcasting (see under DECLARE)

**proclivity** propensity, *leaning, penchant, flair
Ana knack, aptitude, *gift, bent, turn: inclination, disposition, predisposition (see corresponding verbs at INCLINE): *predilection, prepossession, prejudice, bias

**procrastinate** *delay, lag, dawdle, loiter
Ana *defer, suspend, stay, postpone: protract, prolong (see EXTEND)

prodigious *monstrous, tremendous, stupendous, monumental
Ana enormous, immense, *huge, vast, gigantic, mammoth, colossal: amazing, astounding, flabbergasting (see SURPRISE)

prodigy *wonder, marvel, miracle, phenomenon
Ana abnormality (see corresponding adjective at ABNORMAL): monstrousity (see corresponding adjective at MONSTROUS): anomaly, *paradox

produce vb *bear, yield, turn out
Ana *generate, breed, propagate: *make, form, shape, fabricate, manufacture: create, *invent

produce n *product, production

product 1 *work, product, opus, artifact
Ana execution, fulfillment, performance (see corresponding verbs at PERFORM): *effort, exertion

2 *product, produce

profanation, desecration, sacrilege, blasphemy can all mean a violation or a misuse of something regarded as sacred. Profanation applies to an irreverent outrage shocking to those who cherish and hold sacred the thing mistreated; although it may suggest base callousness, it often applies to vulgar intrusion or insensitive irreverence (as of vandals) (these sages attribute the calamity to a profanation of the sacred grove)—Frazier
Desecration applies especially to any action whereby sacred character is impaired or lost; often it indicates loss of that character through defilement, often malicious or malign and culpable (desecration of the cathedrals by the invading barbarians)—the last priest, feeling there was no work to be done in such a dreary outpost, burned the chapel in 1706 to prevent its desecration—Amer. Guide Series: Mich.
Sacrilege may refer technically to reception or administration of a religious sacrament by one unworthy; it refers commonly to any outrageous profanation (the execution was not followed by any sacrilege to the church or defiling of holy vessels)—Cather
above all things they dread any contact with the spirits of the dead. Only a sorcerer would dare to commit such a sacrilege, an offense punishable with death.—Frazier
Blasphemy (see also BLASPHEMY; compare blasphemous under IMPIOUS) may refer to any strong irreverence, often one involving or suggesting reviling, defying, mocking, or otherwise treating with indignity something sacred (he cooperated with me in sending the pious elders to unspeakable corners of hell; we arranged a wordless language of blasphemy and signaled to each other across the laps of the godly)—Brace

prodigious monstrosity, monstrous, monstrous, monstrosity, monstrous, monstrous, monstrous, monstrous, monstrous, monstrous, monstrous, monstrous, monstrous, monstrous, monstrous, monstrous, monstrous, monstrous, monstrous, monstrous, monstrous, monstrous, monstrous, monstrous, monstrous, monstrous, monstrous, monstrous, monstrous, monstrous, monstrous, monstrous, monstrous, monstrous, monstrous, monstrous, monstrous, monstrous, monstrous, monstrous, monstrous, monstrous, monstrous, monstrous, monstrous, monstrous, monstrous, monstrous, monstrous, monstrous, monstrous, monstrous, monstrous, monstrous, monstrous, monstrous, monstrous, monstrous, monstrous, monstrous, monstrous, monstrous, monstrous, monstrous, monstrous, monstrous, monstrous, monstrous, monstrous, monstrous, monstrous, monstrous, monstrous, monstrous, monstrous, monstrous, monstrous, monstrous, monstrous, monstrous, monstrous, monstrous, monstrous, monstrous, monstrous, monstrous, monstrous, monstrous, monstrous, monstrous, monstrous, monstrous, monstrous, monstrous, monstrous, monstrous, monstrous, monstrous, monstrous, monstrous, monstrous, monstrous, monstrous, monstrous, monstrous, monstrous, monstrous, monstrous, monstrous, monstrous, monstrous, monstrous, monstrous, monstrous, monstrous, monstrous, monstrous, monstrous, monstrous, monstrous, monstrous, monstrous, monstrous, monstrous, monstrous, monstrous, monstrous, monstrous, monstrous, monstrous, monstrous, monstrous, monstrous, monstrous, monstrous, monstrous, monstrous, monstrous, monstrous, monstrous, monstrous, monstrous, monstrous, monstrous, monstrous, monstrous, monstrous, monstrous, monstrous, monstrous, monstrous, monstrous, monstrous, monstrous, monstrous, monstrous, monstrous, monstrous, monstrous, monstrous, monstrous, monstrous, monstrous, monstrous, monstrous, monstrous, monstrous, monstrous, monstrous, monstrous, monstrous, monstrous, monstrous, monstrous, monstrous, monstrous, monstrous, monstrous, monstrous, monstrous, monstrous, monstrous, monstrous, monstrous, monstrous, monstrous, monstrous, monstrous, monstrous, monstrous, monstrous, monstrous, monstrous, monstrous, monstrous, monstrous, monstrous, monstrous, monstrous, monstrous, monstrous, monstrous, monstrous, monstrous, monstrous, monstrous, monstrous, monstrous, monstrous, monstrous, monstrous, monstrous, monstrous, monstrous, monstrous, monstrous, monstrous, monstrous, monstrous, monstrous, monstrous, monstrous, monstrous, monstrous, monstrous, monstrous, monstrous, monstrous, monstrous, monstrous, monstrous, monstrous, monstrous, monstrous, monstrous, monstrous, monstrous, monstrous, monstrous, monstrous, monstrous, monstrous, monstrous, monstrous, monstrous, monstrous, monstrous, monstrous, monstrous, monstrous, monstrous, monstrous, monstrous, monstrous, monstrous, monstrous, monstrous, monstrous, monstrous, monstrous, monstrous, monstrous, monstrous, monstrous, monstrous, monstrous, monstrous, monstrous, monstrous, monstrous, monstrous, monstrous, monstrous, monstrous, monstrous, monstrous, monstrous, monstrous, monstrous, monstrous, monstrous, monstrous, monstrous, monstrous, monstrous, monstrous, monstrous, monstrous, monstrous, monstrous, monstrous, monstrous, monstrous, monstrous, monstrous, monstrous, monstrous, monstrous, monstrous, monstrous, monstrous, monstrous, monstrous, monstrous, monstrous, monstrous, monstrous, monstrous, monstrous, monstrous, monstrous, monstrous, monstrous, monstrous, monstrous, monstrous, monstrous, monstrous, monstrous, monstrous, monstrous, monstrous, monstrous, monstrous, monstrous, monstrous, monstrous, monstrous, monstrous, monstrous, monstrous, monstrous, monstrous, monstrous, monstrous, monstrous, monstrous, monstrous, monstrous, monstrous, monstrous, monstrous, monstrous, monstrous, monstrous, monstrous, monstrous, monstrous, monstrous, monstrous, monstrous, monstrous, monstrous, monstrous, monstrous, monstrous, monstrous, monstrous, monstrous, monstrous, monstrous, monstrous, monstr
proficiency, adept, skilled, skillful, expert, masterly

art, handicraft, craft, *trade

profanity

A colon (:) separates groups of words discriminated. An asterisk (*) indicates place of treatment of each group.

implies a relation to the world as distinguished from the church or religion or the religious life; it may come close to profane <secular music> (the secular drama) or it may be opposed to regular in the sense of governed by a monastic rule; thus, a secular priest is a priest who does not belong to a religious order; a regular priest is one who does. The term is most often opposed to religious in the sense of belonging to or serving the ends of a religion or church, then coming close to civil or public <secular schools> <secular journals> (the secular authority) (there are peoples in the world who have no secular dances, only religious dances—Ellis) (believing that no creed, religious or secular, can be justified except on the basis of reason and evidence—Times Lit. Sup.) Lay is applied to persons, or sometimes to their activities, interests, or duties, that do not belong to the clergy and particularly the regularly ordained clergy; it therefore usually implies an opposition to clerical or ecclesiastical (laymen and laywomen of the parish) (a lay preacher) (lay sermon) (lay delegates to a diocesan convention) In religious orders the term is applied to a class of religious who are occupied chiefly with domestic and manual work as distinguished from those who are occupied with liturgical observances, teaching, and study (the lay brothers in a monastery)

Lay is often extended to other than the clerical profession (compare lay analyst under NEUROLOGIST) in the sense of nonprofessional or of not having a professional source or character; thus, a lay opinion on a question of law is merely an opinion delivered by one who is neither a lawyer nor a judge (the doctrine of scienter . . . in the lay mind has been converted into the popular half truth that a dog is entitled to his first bite—Field-Fisher)

Temporal implies an opposition to spiritual (in the sense of being concerned not with material or mundane but with immaterial and eternal ends) and is applied chiefly to sovereigns, rulers, or dignitaries having political authority or civil power; thus, lords temporal are those members of the British House of Lords who are not bishops or archbishops (these latter being called lords spiritual) (the Papacy had no temporal power between 1870, the year of the fall of the Papal State, and 1929, the year of the establishment of Vatican City) (persuading the Church to forego its claim to temporal authority and confine its attention to spiritual benefactions—Littlefield)

Ana worldly, mundane, *earthly, terrestrial
Ant sacred —Con *holy, divine, religious, spiritual 2 *impartial, blasphemous, sacrilegious

profanity blasphemy, cursing, swearing

Ana imprecation, *curse, malediction: exegation, objuration, damming (see corresponding verbs at EXECRATE)

profess *assert, declare, affirm, aver, protest, avouch, avow, predicate, warrant

Ana allege, *adduce, advance

profession art, handicraft, craft, *trade

proffer *offer, tender, present, prefer

Ana propose, design, *intend: confer, bestow, present, *give.

Con reject, spurn, refuse, *decline

proficient, adept, skilled, skillful, expert, masterly are comparable when they mean having the knowledge and experience necessary to success in a given line especially of work or endeavor. When applied to things rather than persons, all these terms carry the implication that the quality of the person has been attributed to the thing. Proficient implies training and practice as the source of competency beyond the average (proficient in the art of self-defense—Shaw) (Jane began to type. It bored her, but she was fairly proficient at it—Rosen Macaulay)

Adept implies proficiency but stresses aptitude and often cleverness (adept at leggerdemain) (so adept at the lovely polishing of every grave and lutean phrase—Gibbons)

Skilled, often interchangeable with proficient, may distinctively suggest mastery of the details of a trade or handicraft or of the technique of an art or profession. In modern industrial use skilled simply connotes that one has met a standard set up by employers for a special type of work or job (skilled labor) (the skilled trades) (by long practice, he was skilled in the arts of teaching—Gibbons) (professors, students, and skilled employees make a varied assault upon the mysteries of marine biology—Parshley)

Skillful implies adceptness coupled with dexterity in execution or performance (a skillful operator of an automobile) (a skillful teacher) (in little danger with a skillful hand at the helm—Nordhoff & Hall) (the solution achieved by a skillful minority in face of a hostile majority—Parrington)

Expert applies to one who has attained extraordinary proficiency or is exceptionally adept (an expert accountant) (an expert bridge player) (expert knowledge of engines) (neither of them was expert in the roping of cattle—Mary Austin) (explaining at length, but with an expert lucidity, some basic point of law—Edmund Wilson) (Masterly, applied more often to the thing executed or the quality displayed than to the person who executes or displays, is close to expert in its implication of proficiency and adceptness, but it commonly adds a suggestion of confident control (he compressed into the masterly introductory essays . . . his entire theory of the progress of the United States—Bydwell) (his masterly dissimulation—Motley) (how masterly is he in all the points of his profession—Trollope)

Ana efficient, effectual, *effective: capable, *able, competent, qualified: finished, accomplished, *consummate: practiced, drilled, exercised (see practice vb) Con *awkward, clumsy, maladroit, inept, gauche: *ignorant, untaught

profile *outline, contour, silhouette, skyline

profit n *use, service, advantage, account, avail

Ana reward, award, meed, guerdon (see PREMIUM): gaining or gain, winning (see GET)

profit vb *benefit, avail

Ana *get, gain, win: *advance, progress

profitable 1 *beneficial, advantageous

Ana *favorable, auspicious, propitious: *expedient, advisable, politic

Ant unprofitable —Con detrimental, deleterious (see PERNICIOUS): harming or harmful, injurious, hurting or achieved (see corresponding verbs at INJURE)

2 *paying, gainful, remunerative, lucrative

Ana fruitful (see FERTILE): compensating, recompenising, repaying (see PAY): valuable, precious (see COSTLY)

profligate adj dissolute, reprobate, *abandoned

Ana debauched, corrupted, depraved, debased, perverted (see under DEBASE): degenerate, corrupt, *vicious: *loose, relaxed, slack, lax

profligate n *spendthrift, prodigal, wastrel, waster

Ana debauche, pervert, corrupter (see corresponding verbs at DEBASE): libertine, lecher (see corresponding adjectives at LICENTIOUS)

profound *deep, abysmal

Ana penetrating, probing, piercing (see ENTER): scrutinizing, inspecting, examining (see SCRUTINIZE)

Ani shallow

profuse, lavish, prodigal, luxuriant, lush, exuberant carry as their basic meaning giving out or given out in great abundance. What is profuse seems to pour or be poured forth in abundance, without restraint, or in a stream (profuse...
fuse apologies) (profuse sweating) (pourest thy full heart in profuse strains of unpremeditated art—Shelley) (a land where life was great . . . and beauty lay profuse—Browning)

What is lavish is so exceedingly profuse as to suggest, positively, munificence or extravagance or, negatively, the absence of all stint or moderation (lavish gifts) (a lavish feast) (lavish expenditures) (the lavish attentions of his mother—Meredith) (our lavish use of a bountiful supply of crude oil—Morrison) What is prodigal gives or is given so lavishly and so recklessly as to suggest waste or the ultimate exhaustion of resources (chary of praise and prodigal of counsel—Stevenson) (the prodigal expenditures of the recent war—M. W. Childs) (he had been prodigal with his money and she probably imagined that he was still in funds—Cliff Farrer)

What is luxuriant produces or is produced in great and rich abundance; the term usually connotes not only profusion but gorgeousness or splendor in what is produced (her luxuriant hair) (the luxuriant imagination of Milton) (this damp and mild climate makes possible the most luxuriant forest growth—Forde) (rich and luxuriant beauty; a beauty that {h}one with deep and vivid tints—Hawthorne)

What is luscious is not only luxuriant but has reached the peak of its perfection; the term distinctively connotes richness, fullness of development, or luxuriousness (how lush and lusty the grass looks! how green!—Shak.) (the lush . . . full-blown landscape of the south through which they had set out that morning—Jan Struther) (the fabulous period of the Nineties, that lush, plush, glittering era with all its sentimentality and opulence and ostentation—S. H. Hay)

What is exuberant produces or is produced so abundantly or luxuriantly as to suggest exceedingly great vigor, vitality, or creative power; the term applies chiefly to persons or their words, emotions, or qualities that display a vigor or vitality that is almost rampant (an exuberant fancy) (the exuberant genius of Shakespeare) (to restrain my too exuberant gesture—Mary Austin) (exuberant energy) (actually, in the present context, all our exuberant post-Sputnik talk is irrelevant and even nonsensical—Huxley)

Anna copious, abundant (see plentiful): *excessive, immoderate, extravagant: *liberal, bountiful, bounteous, openhanded, munificent, generous

Ant spare, scanty, scant —Con *meager, skimpy, scrimpy, exiguous, sparse

progenitor *ancestor, forefather, forebear
Ant progeny

progeny *offspring, young, issue, descendant, posterity
Ant progenitor

prognosis *diagnosis

prognostic *foretoken, presage, omen, augury, portent Anna indication, betokening, bespeaking (see corresponding verbs at indicate): symptom, *sign, mark, token

prognosticate *foretell, predict, forecast, prophesy, augur, presage, portend, foretell, foretaste Anna *indicate, betoken, bespeak: *foresee, foreknow, apprehend, divine, anticipate

program, schedule, timetable, agenda denote a formulated plan listing things to be done or to take place, especially in their time order. Program is the term of widest application. It may refer to a mental plan or to one that is written or printed; it may be applied not only to a plan for a meeting, an entertainment, or a service but to one made by an individual in ordering his own day or his own future or to one made by a group that has certain ends in view and proposes their orderly achievement (what is your program for today?) (the program of a concert) (theater programs) (the Five-Year Plan was the name given the industrialization program of the Soviet Union) Schedule and timetable stress the importance of the time element and imply a plan of procedure which establishes not only the chronological order of events or steps but also their time limits (the schedule for a college year) (a schedule of production in a factory) (the timetable life of a New York University student—N. Y. Times) (the timetable for expansion of Soviet power and influence in Asia has been seriously upset—Mosely) Schedule is sometimes used, but timetable distinctly more often, for a tabulated list of regularly recurring events (as arrivals and departures of trains or buses) (a schedule of classes) (it was in October 1839 that George Bradshaw issued the first timetable to show all trains then running in this country—O. S. Nock)

Agenda is applied chiefly to a schedule of the order of business for a meeting. progress n (see under advance vb 1)

Ana improvement, betterment (see corresponding verbs at improve): headway, impetus (see speed n)

2 Progress, progression are not always clearly distinguished, although they can be more or less sharply differentiated. Both denote movement forward. Progress (see also progress n under advance vb 2) usually applies to a movement considered as a whole, stressing such aspects as the distance covered, the change or changes taking place, and the amount of improvement made (we made little progress that day) (note the extent of his progress during the past year) (delightful never-ending progress to perfection—Hazlitt) (the history of educational progress) (the rapid progress of a disease) Progress (see also succession) commonly applies to a movement in itself or in its detail, often implying a continuous series of steps, degrees, or stages toward an objective but sometimes implying little more than a moving on more or less continuously (mode of progression) (that slow progression of things, which naturally makes elegance and refinement the last effect of opulence and power—Reynolds) (every generation . . . adds . . . its own discoveries in a progression to which there seems no limit—Peacock)

progress vb *advance

Ana move, drive, impel: further, forward, promote, *advance: develop, *mature

Ant retrogress

progression 1 *succession, series, sequence, chain, train, string

2 *progress

progressive *liberal, advanced, radical
Ant reactionary

prohibit *forbid, inhibit, enjoin, interdict, ban
Ana *prevent, preclude, obviate: debar, shut out, *exclude: *hinder, impede, obstruct: *restrict, curb, check
Ana permit —Con *let, allow, suffer: tolerate, endure, *bear

project n scheme, design, plot, *plan
Ana sketch, delineation, draft, outline, diagram (see under sketch vb): *device, contrivance

project vb 1 scheme, design, plot, plan (see under plan n) Ana propose, purpose, *intend: *sketch, outline, diagram, delineate

2 *bulge, jut, stick out, protuberate, protrude, overhang, beetle

Ana *extend, prolong, lengthen: swell, distend, *expand

projection, protrusion, protuberance, bulge all denote something which extends beyond a level or a normal outer surface. Projection is applicable to anything that juts out, especially at a sharp angle (buttresses are projections which serve to support a wall or a building at a point of great strain or pressure) (machinery set in motion to keep a level smooth . . . feels the least projection, and
tries to flatten it out—*Hearn* 〈the appendix is a small fingerlike projection from the large bowel—*Fishbein*〉

**Promotion** applies to something which is thrust out or which pushes out so that it seems an excretion or deformity 〈a projection of lava in the form of a thousand-foot pinnacle〉 〈the fantastic gables, pinnacles, and protrusions which intercepted the light—*Samuel Lucas*〉

A protuberance swells or pushes out, often in rounded rather than angular form 〈warty protuberances on a potato〉 〈balconies, bay windows and protuberances which make their fronts look like bemedaled chests—*Hauser*〉 〈a bulge is a protuberance or expansion of a surface caused usually by pressure from within or below 〈a bulge in a wall〉 〈there is a slight bulge in the soil before the first stalk of a plant appears〉

**prolific** fruitful, *fertile, fecund* 〈Ana teeming, swarming, abounding (see *TEEM*): generating, breeding, propagating, reproducing or reproductive (see corresponding verbs at *GENERATE*)〉

**Ant** barren, unfruitful

**prolificacy** fruitfulness, fertility, fecundity (see under *FERTILE*)

**prolix** *wordy, verbose, diffuse, redundant* 〈Ana tedious, *irksome, tiresome, wearisome: prolonged, protracted (see *EXTEND*: pleonastic, circumlocutory, redundant, tautological (see corresponding nouns at *VERBIAGE*)〉

**prologue** *introduction, prelude, preface, foreword, exordium, preamble* 〈prolong, *extend, lengthen, elongate*〉

**prominent** remarkable, conspicuous, salient, outstanding, signal, *noticeable, striking, arresting* 〈Ana *chief, leading, main: principal: important, significant (see corresponding nouns at *IMPORTANT*)〉

**promiscuous** heterogeneous, motley, *miscellaneous* 〈Ana mixed, mingled, blended, merged (see *MIX*: random, haphazard, desultory, casual: *indiscriminate, wholesale, sweeping: *licentious, lewd, wanton, lascivious*〉

**Con** discriminating, perceiving, discerning (see corresponding nouns at *DISCERNMENT*): discreet, prudent, forethoughtful (see under *PRUDENCE*)

**promise vb** Promise, engage, pledge, covenant, contract are comparable when they mean to give one's word that one will act in a specified way (as by doing, making, giving, or accepting) in respect to something stipulated. *Promise* implies a giving assurance either orally or in writing but it suggests no further grounds for expectation of the fulfillment of what is promised 〈he is a man of his word, what he promises he performs〉

**promised** that he would pay his bill 〈promised to do painting, trimming and repairing with all possible expediency—*Riker*〉

**promised to reexamine all royalty cases cleared by the Democrats—*Ginzburg*〉 〈she has promised herself a trip to Bermuda〉 〈Engage implies a more binding agreement or more definite commitment than *promise*. Typically it is used in formal or consequential situations, sometimes specifically implying an agreement to marry and sometimes an agreement to accept as an employee. It ordinarily implies a promise regarded as binding and to be relied on and especially one concerning conduct over a period of time 〈to Him whose truth and faithfulness engage the waiting soul to bless—*Walford*〉

**study material about Gen. Grant, whose biography he had engaged to prepare—*Caffey*〉

**promontory** 〈the United States ... engaged to exclude peddlers from their country—*Foreman*〉

**pledge** (compare *pledge* n), aside from uses in connection with drives and charities 〈pledged a dollar a week to the church building fund〉, may imply the giving of a promise by some act or words that suggest the giving of a solemn assurance or the provision of a formal guarantee 〈pledged their loyalty to their sovereign〉 〈pledge themselves to maintain and uphold the right of the master—*Taney*〉

**promised with excited and angry men pledged to destroy the Church—*Bellco*〉

**plight** implies a solemn promising 〈if for America it is too violent a wrench to plight its fate with Europe's, even ... to prevent war—*Peffer*〉 and persists chiefly in a few stereotyped phrases such as "plight one's troth."

**Covenant** implies at least two parties to the promise, each making a solemn agreement with the other 〈a man cannot grant anything to his wife, or enter into covenant with her: for ... to covenant with her, would be only to covenant with himself—*Blackstone*〉 〈covenanted to defeat the present conspiracy to set up a Home Rule Parliament in Ireland—*Rose Macaulay*〉

**contract** (see also *contract vb 3, incurr*) implies the entry into a solemn and usually legally binding agreement (see *contract n*) 〈contract for a large loan〉 〈the company has contracted to supply the schools of the state with textbooks〉 〈the good wife realizes that in becoming a wife she contracts to forget self and put her husband's happiness above her own—*D. F. Miller*〉

**promote** forward, further, *advance* 〈Ana help, aid, assist: *speed, quicken, hasten, hurry*〉

**Ant** impede—Con *hinder, obstruct, block, bar*

**promotion 1** *advancement, preferment, elevation* 〈Ana *progress, progression: exaltation, magnifying, aggrandizement (see corresponding verbs at *EXALT*)〉

**Ant** demotion—Con *degradation, humiliation, debasement (see corresponding verbs at *ABASE*)* 〈2 *publicity, ballyhoo, propaganda*〉

**Anna advertisement, promulgation, broadcasting (see corresponding verbs at *DECLARE*)**

**prompt adj** *quick, ready, apt* 〈Ana alert, wide-awake, vigilant, *watchful: expeditious, speedy, swift (see *FAST*): trained, disciplined (see *TEACH*): eager, keen, avid* 〈Con remiss, lax, slack (see *NEGLIGENT*): dilatory, *slow*〉

**promulgate** proclaim, announce, *declare, publish, advertise, broadcast* 〈Anna *reveal, disclose, divulge, discover: profess, affirm, aver, avow, avouch (see *ASSERT*): *communicate, impart promulgation proclamation, declaration, announcement, publication, advertisement, broadcasting (see under *DECLARE*)**

**prone 1** subject, exposed, open, *liable, susceptible, sensi-"
propinquity *proportion *proximity
Ana closeness, nearness (see corresponding adjectives at close): relatedness or relationship, kindredness or kindred (see corresponding adjectives at related)
propitiative *pacify, appease, placate, mollify, conciliate
Ana reconcile, conform, adjust, *adapt: *satisfy, content: intercede, mediate (see interpose)
propitious auspicious, *favorable, benign
Ana benignant, *kind, kindly: fortunate, *lucky, providential, happy
Ant unpropitious: adverse — Con *sinister, malefic, malficient, malign, baleful: *ominous, inauspicious, portentous, fateful
proportion *symmetry, balance, harmony
proportional, proportionate, commensurate, commensurable are often used without marked distinction because all mean being duly proportioned to something else. Proportional and proportionate both imply due proportions either to a related thing or things, or of things that are related (as by belonging to the same set, series, design, or construction, or by being the effect of a cause or the response to a stimulus). Proportional is the more usual term when a constant and often mathematically precise ratio between corresponding aspects (as size, amount, number, or length) of related things is under consideration; thus, a proportional tax is one assessed as a constant percentage of the value (as of income or realty) being taxed; a proportional wage is a fixed percentage (as of gross sales or profits) the circumferences of all circles are proportional to the lengths of their radii a detailed plan for proportional . . . disarmament to be achieved by stages — Grenville Clark Proportional may be used, but proportionate is more often used, when the term is intended to imply the adjustment and sometimes the deliberate adjustment of one thing that bears a reciprocal relationship to another thing, so that both are in keeping with each other or not out of keeping with what is just, fair, due, or reasonable (the punishment should be proportionate to the crime) ponderous bodies forced into velocity move with violence proportionate to their weight — Johnson most state taxes produce a yield proportionate only to general economic growth — Armsbrister they rushed into freedom and enjoyment . . . with an energy proportional to their previous restraint — Dickinson Commensurate and commensurable differ from the preceding words chiefly in carrying a stronger implication of equality between related things each of which has a value (as of measure, degree, or intensity) that is intimately related to that of the other the meagerness of the result was commensurate with the crudity of the methods — Buchan the two punishments must be perfectly commensurable — Bentham Sometimes both terms, but especially commensurable, differ from the other words in implying a common scale of values by which outwardly different things can be shown to be equal or proportionate in some significant way (if two magnitudes can both be expressed in whole numbers in terms of a common unit, they are commensurable — W. G. Shute et al) all civilization[s] . . . are commensurable, and . . . are but ramifications (if not historically, at least phenomenologically) of the one idea of civilization — Schrecker the measure of a rancher’s ability to take care of live-stock while not on public land . . . is referred to as his commensurability and the property so used is his commensurate property — Appraisal Terminology & Handbook Ana corresponding, correlative, *reciprocal: relative, contingent, *dependent
proportionate *proportional, commensurate, commensurable
Ana corresponding, correlative, *reciprocal

**proposition, proposition** denote something which is proposed to another for consideration. **Proposal** usually carries a clear suggestion of the act of proposing; thus, one receives a proposal, or entertains a proposal, or listens to a proposal. It also commonly implies an offer (as of oneself as a husband, or of a sum of money in return for the transferring of a piece of property) a proposal of marriage; he offered to sweep the floor of the gymnasium then and there. This proposal convinced the Skenes—Shaw (the steel industry refused to make any wage proposals until it obtained federal clearance for higher steel prices—Current History). But it may imply the suggestion of a scheme, a plan, or a project which may be accepted or rejected at the will of the one to whom it is proposed every proposal for a grant, a subsidy, a loan, is being examined more carefully and less enthusiastically than at any previous time—Harsch. This proposal was distinctly unreasonable, but Burr probably never seriously intended to carry it out—Cox. **Proposition** applies primarily to a usually affirmative statement that is propounded for discussion, argument, proof, or disproof (demonstrate the truth of a proposition) at first sight the proposition seemed absurd. The fanatical and ordered mobs proved, if the proposition needed proof, that in a time of crisis men will act from passion—MacLeish. It is a proposal too plain to be contested, that the constitution controls any legislative act repugnant to it—John Marshall. The term is also applicable to an implied or expressed principle that is or may be questioned or is regarded from the point of view of its truth or its falsity—who still fervently espouse the pestilential proposition that the world needs to be saved in a hurry by their own brand of righteousness—Rolo. **Proposition** has been and to a restricted extent still is used instead of proposal in the sense of a proposal made formally that some course of action be followed, some policy be adopted, or some honor granted—we hold it essential to our success that the proposition of Sir George Clerk should be adopted—Wilberforce. Parking meters for Bakersfield again will be a proposition on the June 3 ballot—Los Angeles Examiner. **Proposition** may replace proposal in implying an act of proposing (if you wish to buy this land, make me a proposition) but in such use it and especially the corresponding verb proposition may carry a hint of irregularity or impropriety that proposal lacks; thus, one offers a proposal of marriage but a proposition of less formal sexual relation propositioned him to work for the Soviets after his return to the United States—Exposé of Soviet Espionage.

**prostaff** 1 purpose, *intend, mean, design

**prospect** 2 **Propose, propound, pose** can all mean to set before the mind for consideration. **Propose** (see also INTEND) fundamentally implies an invitation to consider, discuss, settle, or agree on some question or some proposition clearly stated. In the last chapter I proposed the hypothesis that a pure poetry exists—Day Lewis. Someone proposed that he had really done it the night before by moonlight—Stafford. • or an offering for consideration or acceptance of someone as a candidate or aspirant or of something by way of a suggestion he proposed Mr. Smith for secretary of the club—propose marriage (with a swarm of fantastic reforms being every day suggested...perhaps we may propose one as fantastic as any other—Sullivan). **Propound** implies the stating of a question or proposition for discussion; it usually suggests neither personal bias nor an attempt to prove or disprove on the part of the one setting it forth or in the manner of setting it forth. The term is therefore often used when the writer or speaker wishes to convey no implications of how the one propounding would answer the question or deal with the proposition the query is propounded whether the privilege should be accorded to a physician of putting a patient painlessly out of the world when there is incurable disease—Cardozo. **Propound** the thesis that the great artist is an unconscious artist—T.S.Eliot. • if we may judge from his...facility in the propounding of theories—Huxley. Pose often equals propound, except that it frequently implies that no attempt will be or can be made to seek an immediate answer the problems posed by this situation in the control of cancer and diseases of the heart are receiving the most serious study—Morrison. I shall try at least to pose basic issues that underlie all our political problems—Frankfurter.

**ana** state (see RELATED): *offer, tender, present

**proposition** *propose

**propound** propose, pose

**proposery** decorum, decency, etiquette, dignity

**prorate** apportion, portion, parcel, ration

**prosaic, prosy** matter-of-fact all denote having a plain, practical, unimaginative, unemotional character or quality. **Prosaic** implies an opposition to poetic in the extended sense of that word. Although the term suggests the quality of prose, it seldom refers to literary prose as such but rather to the ordinary language of men in communicating their wants, their ideas, or their experiences, or in rendering intelligible what is difficult to understand or make clear; hence, prosaic usually implies a commonplace, unexciting quality, and the absence of everything that would stimulate feeling or awaken great interest (to make verse speak the language of prose, without being prosaic...is one of the most arduous tasks a poet can undertake—Cowper. A certain irreverent exuberance which prompts him never to choose a prosaic example for his concrete illustrations—Times Lit. Sup. (the eighteenth century, from the religious point of view, is a period of rather cold and prosaic common sense—Inge) (a record of mediocrities, of the airless prosaic world of a small college town—E.K. Brown). **Prosy**, on the other hand, suggests a relation to prose, the verb, rather than to prose, the noun, and heightens the implication in the verb of turning what is poetry or interesting prose into dull plain prose (as by paraphrasing or by translating). Consequently, prosy stresses extreme dullness or tediousness and usually implies a tendency to talk or write at length in a boring or uninviting manner (made me wish that he would be long-winded and prosy instead of twitching me from one thing to another—Sassoon) (call prosy dull society sinners, who chatter and beat and bore—Gilbert). **Matter-of-fact** stresses a lack of interest in the imaginative, speculative, visionary, romantic or ideal; sometimes it connotes accuracy in detail, but often it suggests concern only for the obvious and a neglect of the deeper or spiritual reality or an absence of emotional quality (a matter-of-fact account of his experience—a matter-of-fact historian) (faced with this matter-of-fact skepticism you are driven into pure metaphysics—Shaw). • Lilly, who was matter-of-fact and in whom introspection, poetry or contemplation had no place—Ethel Wilson.

**ana** practical, *practicable: boring, tedious, *irksome

**proscribe** sentence, condemn, damn, doom

**proselyte** convert

**prospect, outlook, anticipation, foretaste** are comparable when they mean an advance realization of something to

Ana swell, distend, *expand

proud 1 Proud, arrogant, haughty, lordly, insolent, overbearing, supercilious, disdainful can mean in common filled with or showing a sense of one's superiority and scorn for what one regards as in some way inferior. Proud (see also proud under PRIDE n) usually connotes a lofty or imposing manner, attitude, or appearance that may be interpreted as dignified, elevated, spirited, imperious, satisfied, contemptuous, or inordinately conceived according to the circumstances. Why should the spirit of mortal be proud? Like a swift-flying meteor, a fast-flying cloud. ... he passeth from life to his rest in the grave—William Knox. <she's a stick-up proud girl, and she hasn't a proper decency—Buck. (A dictator convinced that destiny lies in his own hands is bound to be proud, ruthless and ultimately destructive—Billy Graham.) Arrogant implies a disposition to claim for oneself, often domineeringly or aggressively, more consideration or importance than is warranted or justly due. The Junker developed into a rude, domineering, arrogant type of man, without cultivation or culture—Shirer. (In holidays the atmosphere of home is apt to be dominated by the young people. Consequently they tend to become arrogant and hard—Russell.) Haughty implies a strong consciousness of exalted birth, station, or character, and a more or less obvious scorn of those who are regarded as beneath one. (Pride goeth before destruction, and an haughty spirit before a fall—Prov 16:18.) (His walk, his haughty, indifferent manner spoke his scorn for the two ... men who accompanied him—Hervey). The last four words of this group are more specific than the preceding terms and refer more to the ways in which arrogance or haughtiness is exhibited than to the temperament or attitude. Lordly usually suggests pomposity, stutting, or an arrogant display of power or magnificence. (A lordly indifference to making money by his writings—Stephen.) A lordly foreman in a shoe factory—a man who, in distributing the envelopes, had the manner of a prince doling out favors to a servile group of petitioners—Dreiser. Insolent implies both haughtiness and extreme contemptuousness. It carries a stronger implication than the preceding words of a will to insult or affront the person so treated. (She could not determine whether the silent contempt of the gentlemen, or the insolent smiles of the ladies, were more intolerable—Austen.) (Vile food, vile beyond belief, slapped down before their sunken faces by insolent waiters—K. A. Porter.) Overbearing suggests a bullying or tyrannical disposition, or intolerable insolence (An overbearing employer). (Back country militiamen whose rough overbearing manners sorely tried the Indians' patience—Amer. Guide Series: Tenn.) Supercilious stresses such superficial aspects of haughtiness as a lofty patronizing manner intended to repel advances. It refers to one's behavior to others rather than to one's concept of oneself, though the latter is always implied; often it suggests not only scorn but also incivility, they have no blood these people. Their voices, their supercilious eyes that look you up and down—Galsworthy.) (Supercilious and haughty they [camels] turn this way and that, like the dowagers of very aristocratic families at a plebeian evening party—Huxley.) Disdainful implies a more passionate scorn for what is beneath one
than does supercilious; it as often as not suggests justifiable pride or justifiable scorn (very elegant in velvet and broad-cloth, with delicately cut, disdainful features,—one had only to see him cross the room . . . to feel the electric quality under his cold reserve—Cather) (a democracy smugly disdainful of new ideas would be a sick democracy—Eisenhower)

**Ana** contemptuous, scornful, disdainful (see corresponding adjectives at SPARING): pretentious, ostentatious (see SHOWY): imperious, domineering, *masterful

*Ant* humble: ashamed

2 vain, vainglorious (see under PRIDE n)

**Ana** exalted, magnified, aggrandized (see EXALT): self-satisfied, *complacent, smug: contented, satisfied (see under SATISFY)

*Ant* ashamed: humble

**prove** 1 Prove, try, test, demonstrate are comparable when they mean to establish a given or an implied contention or reach a convincing conclusion by such appropriate means as evidence, argument, or experiment. The same distinctions in implications and connotations are evident in their corresponding nouns **proof, trial, test, demonstration** when they denote the process or the means by which a contention is established or a convincing conclusion is reached. Prove and proof (see also INDICATE, REASON n 1) are the most widely useful of these terms, employable not only in reference to contentions and conclusions, but also in reference to persons or things whose quality (as of strength, genuineness, or fitness) is in question. When used in reference to contentions or to conclusions reached by study, they imply that evidence sufficient in amount and sufficiently reliable in its character has been adduced to bring conviction of the truth of the contentions or conclusions and to make other contentions or other conclusions untenable (this proposition may or may not be true; at present there is certainly no evidence sufficient to prove it true—Russell) (the legislation of the different colonies furnishes positive and indisputable proof of this fact—Taney) But prove and proof when used in reference to persons or things about which there is doubt in some particular imply the settlement of this doubt or the establishing of certainty of his or its quality by subjecting the thing to an experiment or by giving the person a chance to manifest his quality in experience, or by such means as assaying, verifying, or checking (we want to realize our spontaneity and prove our powers, for the joy of it—Justice Holmes) (prove a cannon) (proved his courage in action) (put a man’s loyalty to the proof) (the proof of the pudding is in the eating) Try and trial (see also ATTEMPT vb, TRIAL 2) carry implications from their earliest senses of to separate, or the separation of, the good from the bad in a person or thing, and therefore stress not the conclusion reached but the process by which the guilt or innocence of a person is definitely proved, or a thing’s genuineness or falsity, its worth or worthless, or its degree of strength or validity is definitely established (try a person for theft) (a boy does not like to be called a fool, and is usually ready to try the question with his fists—Meredith) (some other apparently inaccessible peak on which to try their ardor and endurance—Mais) (the new employee is on trial) (a brief trial of the plan would convince the people of its futility—Osg & Ray) Test, both as a verb and as a noun, implies a putting to decisive proof by means of experiment, use, experience, or comparison with a high standard, or through subjection to a thorough examination or trial for the sake of such proof or a determination of the facts (experience is the surest standard by which to test the real tendency of the existing constitution—Washington)

**provident** prudent, foresighted, forethoughtful, discreet
providential (see under PRUDENCE)

*Ana* careful, solicitous, concerned (see under CARE n):
*Ant* improvident

providential *lucky, fortunate, happy

*Ana* benign, auspicious, propitious, *favorable: benignant, kindly, *kind

providing see under provided at IF

province *field, domain, sphere, territory, bailiwick

*Ana* *limit, confine, bound, end

pru...
much as he might have been by the *proximity* of a large dog of doubtful temper—*Shaw*; *Propinquity* may imply proximity, but it then usually distinctively suggests closeness, sometimes even contact (we read a book because it happens to be near us and it looks inviting. It is a case where *propinquity* is everything—*Crothers*). *They are jammed into such propinquity with one another in their new suburbia—Whyte*; but it is more often used as *proximity* is not, to imply nearness in relationship (here I dismiss all my paternal care, *propinquity*, and property of blood—*Shak.*); or closeness in association, in age, or in tastes (*environment and propinquity make for a desire to graduate from marijuana to opiates—Maurer & Vogel*); or even closeness in time (events occurring in close *propinquity* to each other) (thereby was declared the *propinquity of their desolations, and that their tranquility was of no longer duration than those soon decaying fruits of summer—*Browne*).

_An* nearness, closeness (see corresponding adjectives at *CLOSE*): adjacency, contiguousness, juxtaposition (see corresponding adjectives at *ADJACENT*)

_Ant* distance

_proxy* deputy, attorney, *agent, factor

**prudence, providence, foresight, forethought, discretion** are comparable when they denote a quality that enables a person to choose the wise and sensible course, especially in managing his practical affairs. The same differences in implications and connotations are apparent in the corresponding adjectives _prudent, provident, foresighted, forethoughtful, discreet_. *Prudence* and _prudent_ (see also _wise_), the most comprehensive of these words, imply both that one does not act rashly or unadvisedly and that one has thought for its founder—_Eliot_. The same differences in *prudence* or:_prudent_ suggest due consideration of what is at stake and then assigns to each its proper weight—_JAMA_. _Prudence_ and _prudent_ are implied in thoughts of the intellectual *providence_ to acquire . . . vast stores of dry information—_Bagel_. A _provident_, rather thoughtful people, who made their livelihood secure by raising crops and fowl—_Cather_. *Foresight_ and _foresighted_ stress a power, usually the result of a highly developed intelligence, of seeing what is likely to happen and of being prepared for it (the more we study the making of the princepat, the more we shall be impressed with the grasp and foresight of its founder—_Buchan_). *Incapable of the foresighted control and adjustment of action which are the essence of all the higher forms of behavior—McDougall*. _Foresight_ and the less frequent _foresightful_ suggest due consideration of contingencies (in choosing the Yankee dialect, I did not act without _foresight_—_J. R. Lowell_); _every newcomer, be he never so foresightful, finds himself lacking tools_—_Bell_. _Discretion_ and _discreet_ stress qualities (as good judgment, caution, and self-control) which make for _prudence_ or compel _prudent_ action; they often imply the power to restrain oneself when one is tempted to be temerarious, passionate, incensed, or loquacious (encountered an eagerness to talk and a candor of expression among officials that . . . has heavily taxed my _discretion_—_A. E. Stevenson_). _I dare say he will be a discreeter man all his life, for the foolishness of his first choice—Austen_; _Ana* caution, circumspection, calculation (see under _CAUTION*); expediency, advisableness (see corresponding adjectives at _EXPEDITIOUS_): frugality, thriftiness or _thrift_ (see corresponding adjectives at _SPARING_)

**prudent** 1 judicious, sensible, sane, *wise, sage, sapient

_**prudent**_ *intelligent, brilliant, bright, smart, alert*: *shrewd, perspicacious, sagacious, astute*: disciplined, schooled (see _TEACH_)

2 _provident, foresighted, forethoughtful, discreet_ (see _PRUDENCE*_).

_**Ana**_ *cautious, circumspect, calculating, wary*: _political, expedient, advisable_: economical, frugal, thrifty, _sparing_.

3 _Prudent, prudential_ are sometimes confused in use. _Prudent_ applies to persons or their acts or utterances and implies such qualities of mind or character as caution, circumspection, and thrift (see _prudent_ under _PRUDENCE_), or as wisdom in practical affairs (see _wise_). _A prudent man_ (a _prudent_ course) (a _prudent_ way of life) (people who are both dissolve and _prudent_. They want to have their fun, and they want to keep their position—_Socville-West_). _Prudential_, on the other hand, applies not to individuals but either to habits, motives, policies, or considerations which are dictated or prescribed by _prudence_, forethought, business sense, or practical wisdom (in a _prudential_ light it is certainly a very good match for her—_Austen_). _From obvious _prudential_ considerations the Pacific has been principally sailed over in known tracts—_Melville_); or to committees, groups, or associations having charge of practical affairs such as expeditures or exercising discretionary or advisory powers in regard to these (_prudential investment society_). _The _prudential_ committee of a Congregational church_. _Ana* _politic, _expedient, _advisable_: advising, counseling (see corresponding verbs under _ADVICE_)

**prudential** *prudent*

**prudish** *prim, priggish, prissy, puritanical, straitlaced, stuffy

_An* *rigid, strict*: stern, *severe, austere*: formal, conventional, solemn (see _CEREMONIAL_)

**prune** _vb_ trim, top, *shear, poll, clip, snip, crop

_An* enhance, heighten (see _INTENSIFY_); eliminate, exclude

**prying** *curious, inquisitive, snoopy, nosy

_An* _meddlesome, officious, _impertinent, intrusive, _obtrusive

**pseudo** *counterfeit, spurious, bogus, fake, sham, pinchbeck, phony

_An* *false, wrong*: *misleading, deceptive, delusive, delusory

**pseudonym**, alias, _nom de guerre_, _pen name_, _nom de plume_, _incognito_ all denote a name other than one's true or legal name. **Pseudonym** usually implies assumption of a fictitious name as an accepted practice of writers, prizefighters, actors, and entertainers; it does not suggest a discreditable motive for one's attempt to conceal one's identity. _Alias_, in legal use, covers not only assumed names, but those ascribed by others; thus, a boy's true name may be John Potter but he is better known by the _alias_ John Rhoads (Rhoads being his stepfather's name). In more general use _alias_ is associated regularly with offenders against the law and usually connotes an attempt to free oneself by a change of name from the onus of a criminal record. _Nom de guerre_ is a pseudonym assumed by one who seeks anonymity or freedom of scope typically as an adventurer, a critic, or a controversialist; _pen name_ or _nom de plume_ is the pseudonym of a writer. _Incognito_ can denote a name or character adopted especially by a person of rank or eminence from a desire to remain unrecognized or as a polite fiction by which the honors due his rank or eminence may be avoided (the Prince

pulp n *criticism, critique, review, blurb

draw vb *pull, draw, drag, haul, hale, tug, tow mean to cause to move in the direction determined by the person or thing that exerts force. Pull, the general term, is often accompanied by an adverb or adverbial phrase to indicate the direction (two locomotives pull the heavy train up the grade) pull a person toward one pull down goods from a shelf pull out a drawer (he felt pulled this way and that way by duty and by ambition) draw usually implies a pulling forward or toward the person or thing that exerts the force; commonly it implies a steadier and smoother and often gentler motion than pull (draw a chair to the fireside) (the coach was drawn by six horses) draw a sled over the snow (he felt drawn this way and that way by duty and by ambition) pull an armchair to one (the parasol drew him like a magnet) (the drawing power of a play) or a bringing forth or eliciting from a source of supply (draw money from the bank) (a . . . being from whom we draw power and refreshment)

draw vb *pull, draw, drag, haul, hale, tug, tow mean to cause to move in the direction determined by the person or thing that exerts force; usually it suggests active or passive resistance (the horses dragged the overturned carriage half a mile) (the ship dragged her moorings in the storm) (the laden net to the shore) (draw logs to the river) (the attempt which is now being made to drag Anglicanism away from its history and traditions) Haul implies a forcible pulling, sometimes a dragging (when the hawser fell into the water, there was no means of hauling the boat to shore) haul down the sails (that dangling figure hauled him aside and calmed him down) (the horses dragged the overturned carriage half a mile) (the ship dragged her moorings in the storm) (the laden net to the shore) (draw logs to the river) (the attempt which is now being made to drag Anglicanism away from its history and traditions) In extended use draw often specifically implies a result dependent on a drawing by lot (draw a prize) (draw a jury) or by extracting (draw a tooth) or by an inferring (draw a conclusion) or by attracting (the parasol drew him like a magnet) (Wharton) (the drawing power of a play) or a bringing forth or eliciting from a source of supply (draw money from the bank) (a . . . being from whom we draw power and refreshment)

draw vb *pull, draw, drag, haul, hale, tug, tow mean to cause to move in the direction determined by the person or thing that exerts force; usually it suggests active or passive resistance (the horses dragged the overturned carriage half a mile) (the ship dragged her moorings in the storm) (the laden net to the shore) (draw logs to the river) (the attempt which is now being made to drag Anglicanism away from its history and traditions) In extended use draw often specifically implies a result dependent on a drawing by lot (draw a prize) (draw a jury) or by extracting (draw a tooth) or by an inferring (draw a conclusion) or by attracting (the parasol drew him like a magnet) (Wharton) (the drawing power of a play) or a bringing forth or eliciting from a source of supply (draw money from the bank) (a . . . being from whom we draw power and refreshment)

pulsate, pulse, beat, throb, palpitate can mean to manifest the pulsing pulses of blood it may also connote a lively succession of reciprocating movements such as or similar to the one which occurs in the circulatory system when blood is forced along by alternate contractions and relaxations of the ventricles of the heart. The same distinctions in implications and connotations are to be found in the nouns pulsation, pulse, beat, throb, palpitation when they are used of this rhythmical movement or of one distinct step in it. Pulsate and pulsation carry few specific or distinguishing connotations, but they usually imply regularity, continuity, and vigor in the rhythm whether it is apparent in movements or in sounds when the heart no longer pulsates, death occurs. Great effort pulsating from the heart of this small island—Sir Winston Churchill the pulsations of its engine had died away—Bennett long heavy pulsation of airplanes passing over—Thirkell Pulse, the verb, carries a strong implication of impelled movement, in distinction from pulsate it may also connotate a lively succession of spurs, waves, or gushes; thus, the arteries pulsate as the blood pulses through them. The term is more common in general and technical than in ordinary use. It sometimes takes as its subject what flows or moves in this fashion (as the blood) and at other times what evidences the rhythmical movement (as the heart or blood vessels) the pulsing waters of the sea through the tensed veins on his forehead the blood could be seen to pulse in nervous staccato bounds—Donn Byrne Eustacia . . . set inwardly pulsing by his words—Hardy they move and breathe in an environment that pulses and glows—Mencken Pulse, the noun, is chiefly a technical term; even its extended use is affected by or dependent on the term's meaning in physiology. In this sense, pulse usually denotes the number of pulsations of the arteries in a minute as observed commonly by feeling the radial artery of the wrist a normal pulse a patient's pulse an intermittent pulse in his eardrums hammers his heavy pulse—Lowell In extended use pulse, when it does not take the place of pulsation is usually a metaphoric extension of the technical use Rome was the heart and pulse of the empire . . . and on its well-being hung the future of the civilized world—Buchan one felt the pulse of the village in the pub—Mais Beat, both verb and noun, is the ordinary non-technical word often used in place of pulsate and pulsation and sometimes in place of pulse. It stresses rhythmical recurrence of sounds more often than rhythmical and continuous alternation in movement he could hear the beat of his heart this breathing was hard and . . . the blood beat in his ears and eyes—Robertson Davies A question was beating unanswered at the back of his brain—Glasgow It is the more usual designation for something (as the tick of a clock, a stroke on a drum, and the accentuated syllable in verse or note in music) that strikes the ear at regular intervals the beat of a bird's wing against a windscreen the beating of tom-toms. Both the noun and verb throb imply vigorous and often violent or painful pulsation throb of drum and timbal's rattle—Housman the throbbing of an abscessed tooth Either is especially appropriate when there is the intent to imply excitement, strain, or emotional stress the love which fills the letter, which throbs and burns in it—H. O. Taylor here is a captain, let him tell the tale; your hearts will throb and weep to hear him speak—Shak. the throb of their activity is felt throughout the whole body politic—R. M. Dawson Palpitate and palpitation imply rapid, often abnormally rapid and fluttering, pulsation. In medical use the terms commonly imply overexertion, violent emotion, or a diseased condition; in extended use, however, the words more often imply a rapid vibration, quivering, or shaking, without any connotation of something amiss then, delicate and palpitating as a silver reed, she stood up in the soft light of the morning—Hewlett though the book palpitates with its amour, nothing like simple ordinary human love is to be seen anywhere—Barrett Ana vibrate, fluctuate, waver, oscillate (see SWING) quiver, shudder, quaver, tremble (see SHAKE)

push vb Push, shove, thrust, propel mean to use force upon a thing so as to make it move ahead or aside. Push implies the application of force by a body (as a person) already in contact with the body to be moved onward, aside, or out of the way (push a wheelbarrow along the road) (push a door open) (push a man over a cliff) (an extra locomotive was needed at the rear to push the long train up the grade) (push the excited children into another room) Shove often differs from push in carrying a stronger implication of the exercise of muscular strength and of forcing something along a surface (the boys shoved the furniture up against the walls) (I picked him up trying to shove in the front door. There wouldn't been any door in a minute—Helmholtz) Often, when muscular exertion is not strongly implied, haste or roughness or rudeness in pushing is suggested (shove the paper into his pocket) (shove the articles on the desk into a box) (shove a person out of one's way) (I can't say that I took the drink. It got shoved into my hand—Warren) Thrust differs from push in carrying a weaker implication of steadiness or continuance in the application of force and a stronger suggestion of rapidity in the movement effected or of violence in the force that is used; often the use of actual physical force is not clearly implied (Abraham . . . thrust the old man out of his tent—Taylor) (thrust her hands in her coat pockets in a coquettish pose—Wouk) Often, also, it implies the sudden and forcible pushing (as of a weapon, implement, or instrument) so that it enters into the thing aimed at (thrust a spear into an opponent's breast) (thrusting their money into a stranger's hand—Wolfe) Propell implies a driving forward or onward by a force or power that imparts motion. In some use it implies pressure exerted from outside or behind, usually by some power that is not human (the flow of air which propels the slow-sailing clouds—Loves) (she walked—as if she were being propelled from the outside, by a force that she neither knew nor could control—Tate) Additionally, it is the usual term when the use of a mechanical aid or of an actuating power (as steam or electrical power) is implied (ships propelled by steam) (a galley propelled by fifty oars) (automobiles are usually propelled by internal-combustion engines)

In extended uses push implies a pressing or urging forward (as with insistence, with vigor, or with impetuousness) so that one's end may be gained, one's work may be completed, or one's goal be reached (push the nation into war) (push a theory to an extreme) (he directed a year-long probe . . . then pushed through sweeping reforms—Abram BRister) Shove often suggests obstinacy or intransigence or lack of finesse in attaining an end or making a way for oneself or another (shove oneself into society) (shoving the boring tiring jobs off to other people—Ann Bridge) Thrust implies a forcing upon others of something that is not wanted, desired, or sought for (some have greatness thrust upon 'em—Shak) (Amy had a grievance . . . because Sophia had recently thrust upon her a fresh method of cooking green vegetables—Bennett) Propel is sometimes used in place of impel when a strong inner urge or appetite is implied as pushing one on, especially toward what one desires (anxiety is not the only force that propels us, but it is surely one of the most potent—Binger)
Ana *move, drive, impel: *force, compel, constrain, oblige

pushing, pushy *aggressive, militant, assertive, self-assertive
Ana *vigoros, energetic, strenuous: officious, intrusive, obtrusive (see IMPERTINENT): self-confident, confident, self-assured, assured (see corresponding nouns at CONFIDENCE)

puzzle vb *puzzle, perplex, mystify, bewilder, distract, nonplus, confound, dumbfound are comparable when they mean to disturb and baffle mentally or throw into mental confusion. The first three words express various mental reactions to what is intricate, complicated, or involved. Puzzle implies such complication or intricacy that the mind finds it exceedingly, often distressingly, difficult to understand or to solve (a great poet may tax our brains, but he ought not to puzzle our wits—Birrell) (there was much that impressed, puzzled and troubled a foreign observer about the new Germany—Shirer) Perplex adds to puzzle the implications of worry and uncertainty, especially about reaching a decision on a course of action or the right solution of a personal problem (Southerners . . . were terribly perplexed and torn when the conceptions on which

**quality**

1 *Quality, property, character, attribute, accident all denote one of the intelligible marks or indications by means of which a thing may be identified or its constitution be understood. Quality is the term of widest application and may designate any such mark, material or immaterial, individual or generic (distinguishing qualities of iron are tensile strength and corrosiveness) (there was only one quality in a woman that appealed to him—charm—*Galsworthy*). The term may imply a lack of definite knowledge of the thing in question; thus, one can speak of the attributes of God, meaning the qualities men ascribe to him (to endow her with all the attributes of a mythological paragon upon Olympus—*Wylie*). (The term is used especially in scientific and philosophical writing with reference to the properties which distinguish an isolable subgroup (as a species) within a larger group (as a genus)). The properties of cereal grasses but have specific characters that clearly differentiate them (buahynte and noselie show characters like sodaliit, but they differ from it in containing the radical SO)*

**pygmy**

**puzzle**

*n* *mystery, problem, enigma, riddle, conundrum*

Q
a contrast with the substance—or the real, but unapparent, nature—of the thing <waves [on a Japanese artist's screen] such as these, divested of all accident of appearance, in their naked impetus of movement and recoil —Binyon> In more general use accident usually implies fortuitousness or lack of intrinsic value <rhyme is ... an accident rather than an essential of verse—Lowes> Certainly many mystics have been ascetic. But that has been the accident of their philosophy, and not the essence of their religion—Ellis>

**Ana** predication, affirmation (see corresponding verbs at assert): peculiarity, individuality, characteristic (see corresponding adjectives at characteristic)

2 Quality, stature, caliber are often interchangeable as indicating, when used without modifiers, distinctive merit or superiority. Quality implies a complex of qualities (see quality 1) and is therefore always singular in use. The term usually implies a high order of excellence, virtue, strength of character, or worth <splendid writing, of course, but to no purpose ... It's not quality we look for in a novel, but mileage—Purdy> They're all made by machinery now. The quality may be inferior, but that doesn't matter. It's the cost of production that counts —Dahl> This little Tania had quality; she carried her scars without a whimper—Bambrick> Stature implies that the one considered has reached or is in process of reaching the height or greatness possible to one of his kind <probings in the realms of life and matter have seemed to diminish man's stature and to belittle his dignity—Marquand> Every piece of work you do adds something to your stature, increases the power and maturity of your experience—Wolfe> Caliber suggests extent or range especially of one's mind or powers; it may connote unusual but measurable range, scope, or breadth of ability or intellect but often depends on qualification to supply a standard of reference or comparison or to indicate the direction of deviation from the norm <a man of high moral caliber> <the milieu of her youth where the size of the engagement ring determines the caliber of the bridgegroom—Geisman> is at his relaxed best because he is accompanied by musicians of the first caliber—John Hammond> <punctuds of big and little caliber—Craig Thompson>

**Ana** *excellence, virtue: value, *worth

**qualm**, scrupe, compunction, demur can all denote a feeling of doubt or hesitation as to the rightness or wisdom of something one is doing or is about to do. Qualm implies an uneasy, often a sickening, sensation that one is not following the dictates of his conscience or of his better judgment <have no qualms at all in committing adultery —Book-of-the-Month Club News> <how few little girls can squash insects and kill rabbits without a qualm—Rose Macaulay> we go on spreading culture as if it were peanut butter ... but we feel qualms about the result —Barson> Scruple denotes mental disturbance occasioned by doubt of the rightness, the propriety, the fairness, or, sometimes, the outcome of an act; it often implies a principle as the source of the disturbance, and it may imply an overnice conscience or an extremely delicate sense of honor <she has no scruples about carrying away any of my books> <began to have scruples, to feel obligations, to find that veracity and honor were ... compelling principles—Shaw> <he has not pretended an apprehension which he does not feel, but has candidly disclosed his conscientious scruples—Meltzer>

**Compunction** (see also penitence) implies a usually transitory prickle or sting of conscience that warns a person that what he is about to do or is doing is wrong, unfair, unjust, or improper; it may additionally suggest a degree of concern for a potential victim <showed no compunction in planning devilish engines of military destruction—Ellis> <he has to be taught ... to feel compunction when he has wantonly caused tears—Russell> Demur stresses hesitation to such an extent that it carries a stronger implication of delay than any of the other terms; it usually suggests, however, a delay caused by objections or irresolution rather than by an awakened conscience or by a scruple or compunction <he doubts with a persistence of demur and question that might well have surprised Descartes himself—Times Lit. Sup.> <with some misgivings but without demur his committee accepted the decision—Time>

**Ana** misgiving, *apprehension, foreboding, presentiment: doubt, mistrust, suspicion, *uncertainty

**quandary** *predicament, dilemma, plight, scrape, fix, jam, pickle

**Ana** *juncture, pass, exigency, emergency, contingency, crisis: *difficulty, hardship, vicissitude: puzzling or puzzle, mystification, perplexity, bewilderment (see corresponding verbs at puzzle)

**quantity** amount, *sum, aggregate, total, whole, number

**quarrel n** Quarrel, wrangle, altercation, squabble, bicker- ing, spat, tiff are comparable when they mean a dispute marked by anger or discord on both sides. The same distinctions in implications and connotations are found in their corresponding verbs, quarrel, wrangle, altercate, squabbles, bicker, spat, tiff. Quarrel usually implies heated verbal contention, but it stresses strained or severed relations which may persist even after verbal strife has ceased <patch up a quarrel> <she hated any kind of quarrel ... she shuddered at raised voices and quailed before looks of hate—Stafford> The middle class had taken over the reins. It quarreled with James I, beheaded Charles I—Barr> Wrangle implies undignified and often futile disputation with noisy insistence on each person's opinion <a vulgar wrangle was unknown and indeed it was only among the upper servants that ... jealous friction existed—Sackville-West> <makes them wrangle interminably about petty details—Laski> Altercation and the rare verb altercate imply fighting with words as the chief weapons, though blows may also be connotated <i>have an extreme aversion to public altercation on philosophic points—Franklin> <Lydia, foreseeing an altercation, and alarmed by the threatening aspect of the man, attempted to hurry away—Shaw> <it becomes us not ... to altercate on the localities of the battle—Lytton> Squabble stresses childish and unseemly wrangling over a petty matter; it does not necessarily imply anger or bitter feeling <they had always squabbled ... but their scenes, with the shouting, the insults, the threats, and the flare-ups of mutual revulsion had gradually increased—Farrell> a mere squable in the children's schoolroom—Moorehead> Bickering and bicker imply constant and petulant verbal sparring or interchanges of cutting remarks; they suggest an irritable mood or mutual antagonism <the tearing worries of political snarls, of strife between capital and labor, of factional bickering—Salzberger> <though men may bicker with the things they love, they would not make them laughable in all eyes, not while they loved them—Tennyson> Spat also implies an insignificant cause but, unlike squabble and bicker, it suggests an angry outburst and a quick ending without hard feelings <it wasn't a fight, really—more of a spat than anything else—Heggen> <a teen-ager who ... is spattering with her mother over unchaperoned dates—Time> Tiff differs from spat chiefly in implying a disagreement that manifests itself in ill humor or temporarily hurt feelings <at the trial circumstantial evidence piled up against him, including his earlier tiff ... which was offered as a motive—Hilton>
quarrel vb 1 wrangle, altercate, squabble, bicker, spat, tiff (see under QUARREL n)
Ana *brawl, broil, fracas, melee, row, rumpus, scrap; contention, dissention, conflict, difference, variance, strife, *discord

Ant *deaden

quick vb 1 fleet, swift, rapid, *fast, speedy, expeditious, hasty
Ana brisk, nimble, *agile: abrupt, impetuous, *precipitate, headlong

quick, prompt, ready, apt are comparable when they apply to persons, their mental operations, their acts, and their words and mean having or manifesting the ability to respond without delay or hesitation. Quick stresses the immediacy of response to such an extent that it usually connotes native rather than acquired power (quick eyes), *quick in perception (examined the hall and the men who passed, with the same quick, sharp cunning—O’Flaherty)

Very often the word suggests marked capacity for learning or for absorbing what is taught (even as a child she had had a quick mind, a gift of mimicry, an excellent memory—Wouk) Prompt also implies instance of response, but it may or may not imply native quickness. Often it carries a suggestion of preparation (as by training or discipline) that fits one for quick response when the occasion demands

it (prompt service) (prompt eloquence) (prompt insight into the workings of complex apparatus—F. H. Garrison)

Sometimes the word carries so strong an implication of willingness or eagerness that a lack of normal inhibitions is also suggested (they press so eagerly to savor the purity, the heroism, that matches their prompt imaginings—Hackett) Ready, like prompt, implies previous training or a strong predisposition as well as instance of response, but it more often characterizes the person or his powers than his performance or his expression of thought or feeling. It therefore often implies, as prompt does not, skill, facility, fluency, or ease in attainment (reading maketh a full man, conference a ready man—Bacon) (he was not a ready speaker, and so . . . had written out what he had to say—Scudder) The word is often applied to the bodily organ or to the instrument one uses in manifesting skill or fluency (he has a ready tongue) (a pair of ready hands) Apt (see also FIT; APT 2) does not throw the emphasis on the quickness of the response, though that is involved in its meaning, but on the possession of qualities (as a high degree of intelligence, a particular talent or gift, or a strong bent) which make for such quickness. It is therefore especially appropriate when the person in mind responds quickly only to particular stimuli or shows a capacity for a definite kind of work (she is apt at drawing but not at arithmetic) (supple, sinew-corded, apt at arms—Tennyson) (apt as he was in attack or report . . . [he] was readier still to give mercy—Maxwell Anderson)

Ana *intelligent, clever, smart, quick-witted: deft, adroit, *dexterous: *sharp, acute, keen
Ant sluggish

quicken vb 1 Quicken, animate, enliven, vivify can mean to make alive or lively, but the words diverge more or less widely in their implications. Quicken stresses the renewal of life, especially of suspended life or growth, or the rousing of what is inert into fullness of activity. Sometimes the rekindled life is physical but more often it is spiritual, intellectual, or imaginative (it is the Spirit that quickeneth . . . the words that I speak unto you, they are spirit, and they are life—Jn 6:63) its characters never quicken with the life one feels lurks somewhere within them—Jerome Stone) Animate (compare animated under LIVING and LIVELY) emphasizes the imparting of vitality or of motion and activity or the giving of liveliness or of the appearance of life to something previously deficient in or lacking such a quality (that which animates all great art—spiritual ferment—Clive Bell) (vendors and shoppers . . . animate its lanes—W. R. Moore) Enliven suggests a stimulating influence that kindles, exalts, or brightens; it therefore presupposes dullness, depression, or torpidity, in the thing affected (the sun . . . was wonderful and enlivening—D. H. Lawrence) (bought the paint on the canvas begins to enliven his mind; and the mind thus quickened conceives a livelier curiosity about the creature before him—Montague) Vivify sometimes, like quicken, implies the renewal of life and at other times, like animate, implies the giving of the appearance of life. In each case it usually also suggests a freshening or energizing effect and implies vitality more often than activity or motion (in . . . the Elizabethan age, English society at large was accessible to ideas, was permeated by them, was vivified by them—Arnold) (the room was dead. The essence that had vivified it was gone—O. Henry) (that Promethean fire, which animates the canvas and vivifies the marble—Reynolds)

Ana activate, *vitalize, energize: rouse, arouse, *stir

*Ana* *sentimental, romantic: utopian, *ambitious: ideal, transcendental, *abstract

*quiz* vb *ask, question, interrogate, examine, catechize, query, inquire

*quote, cite, repeat* are not close synonyms, though all mean to speak or write again something already said or written by another. *Quote* usually implies a use of another's words, commonly with faithful exactness or an attempt at it, for some special effect like adornment, illustration, close examination *(I will quote a passage which is unfamiliar enough to be regarded with fresh attention—* T. S. Eliot)*. But sometimes *quote* is applied to a more general referral to someone as the author or source of information without implication of precise reproduction of an original statement *(don't quote me as your authority)* *(in one sense we are quoting all the time. To whistle Tin Pan Alley's latest inanity is to quote...)*. To transmit the tired gag of a television comic is to *quote—Fadiman*

Cite is likely to stress the idea of adding, bringing forward, or mentioning for a particular reason, like substantiation or proof, with or without the idea of uttering another's words *(the critic cited in the opening of this chapter—Leavis)* *(ask a senator if he could cite a single piece of legislation enacted solely for the benefit of the public—Armbrister)*. Repeat stresses the fact of a saying or writing over again of someone else's words often with no reference to the source *(repeat a rumor)*. Typically it carries none of the implication of formal or dignified reasons for the procedure that attaches to *quote* and cite *(unrealistic to go on repeating phrases about the connection of industry with personal independence—Dewey)*

*Ana* *adduce, allege, advance

*quotid ian* *daily, diurnal, circadian

**R**

**rabbit** *furious, frantic, frenzied, wild, frenetic, delirious

*Ana* maddened, enraged, infuriated, angered *(see *ANGER* vb): violent, compulsive (see corresponding nouns at *FORCE*): *insane, crazed, crazy, demented, deranged

**race** 1 *Race, nation, people*, even though in technical use they are commonly differentiated, are often used popularly and interchangeably to designate one of a number of great divisions of mankind, each made up of an aggregate of persons who are thought of, or think of themselves, as comprising a distinct unit. In technical discriminations, all more or less controversial and often lending themselves to great popular misunderstanding or misuse, *race* is anthropological and ethnological in force, usually implying a distinct physical type with certain unchanging characteristics (as a particular color of skin or shape of skull) *(the Caucasian race) (the Mongolian race)*. Sometimes, and more controversially, other presumed common factors are chosen, as place of origin *(the Nordic race)* or common root language *(the Aryan race)*. In popular use *race* can apply to any more or less clearly defined group thought of as a unit usually because of a common or presumed common past *(the Anglo-Saxon race) (the Celtic race) (the Hebrew race)*. *Nation*, primarily political in force, usually designates the citizenry as a whole of a sovereign state and implies a certain homogeneity because of common

mon laws, institutions, customs, or loyalty *(the British nation) (the French nation) (the house must have been built before this country was a nation—Tate)* *(what is a nation? A group of human beings recognizing a common history and a common culture, yearning for a common destiny, assuming common habits, and generally attached to something significantly in common <the children of the world are one nation; the very old, another—John Struther>* *(for the two nations that inhabit the earth, the rich and the poor—Sitwell)* *(the Gypsy nation)*. *People*, sometimes interchangeable with *nation* though stressing a cultural or social rather than a national unity, can apply to a body of persons, as a whole or as individuals, who show a consciousness of solidarity or common characteristics suggesting a common culture or common interests or ideals and a sense of kinship *(the Mexican people—Prewett)* *(the British and American peoples—Sir Winston Churchill)* *(we, the people of the United States—U. S. Constitution)* *(we, the peoples of the United Nations—U. N. Charter)*. *(a new government, which, for certain purposes, A colon (:) separates groups of words discriminated. random, haphazard, chance, chance, casual, desultory, hit-or-miss, happy-go-lucky are comparable when they mean having a cause or a character that is determined by accident rather than by design or by method. What is random comes, goes, occurs, or is done or made without a fixed or clearly defined aim, purpose, or evidence of method or system or direction; the term implies an absence of guidance by a governing mind, eye, or objective (a random shot) (a random answer to a question) (my choice was as random as blindman's buff—Burns) (the tail end of the conference was becoming frayed and random—Rand) (the clerks became tired and bored and start making random mistakes—Martin Gardner) What is haphazard is done, made, arranged, used, or said without concern or without sufficient concern for its fitness, its effectiveness, or its possible ill effects, and is more or less at the mercy of chance or whim or of natural or logical necessity (a haphazard policy) (the disorder . . . the haphazard scattering of stray socks, shirts and colsars, old shoes, and unpressed trousers—Wolf) (not a collection of haphazard schemes, but rather the orderly component parts of a connected and logical whole—Roosevelt) What is described as chance comes or happens to one or is done or made by one without prearrangement or preawareness or without preparation; the term is applicable not only to things but to persons with whom one comes into contact more or less by accident (a chance acquaintance) (a chance meeting with an old friend) (found it increasingly difficult to welcome chance visitors with his usual affability—Graves) What is chancy involves uncertainty and risk because its results, actions, responses, or condition cannot be predicted; the term applies more often to situations and things than to persons (a chancy road to take at night) (a chancy appeal, at best, to the shifting and unguessable sympathies of their readers—Morse) (despite recent advances in geophysics, oil drilling is still a chancy business—Kane) What is casual (see also ACCIDENTAL) leaves or seems to leave things to chance, and works, acts, comes, or goes haphazardly or by chance, or without method or deliberation or indication of intent or purpose; the term often also suggests off-handedness (a casual remark) (his treatment of his friends is casual) or lightness or spontaneity (she was constantly referring to dear friends . . . in a casual and familiar way—Ellis) or lack of definiteness in terms or intention (their policy was opportunistic at home and casual abroad—Spectator) (the casual allusion, the chance reference to her—Henry Adams) What is desultory is not governed by method or system but jumps or skips erratically from one thing to another; the term may imply additionally such consequences as irregular or inconsistent performance or lack of continuity or plan or persistence (make reading have a purpose instead of being desultory—Russell) (its growth from 1900 to 1950 had been desultory—Michener) (a dragged-out ordeal of worry,
aimless wandering, and desultory shopping—Wook> What is hit-or-miss is so haphazard in its character or operation as to be or appear so wholly lacking in plan, aim, system, or care that one is indifferent as to how it turns out or as to what pattern or arrangement it makes <hit-or-miss patchwork> <hit-or-miss policy was pursued by the Department of Justice—Ripley> <his . . . training had given him a profound prejudice against inexact work, experimental work, hit-or-miss work—Forester> A person is happy-go-lucky who leaves everything to chance or who accepts with happiness or easy indifference whatever comes; a thing is happy-go-lucky that is governed by such a disposition <a radical pragmatist on the other hand is a happy-go-lucky . . . sort of creature—James> <a funny little happy-go-lucky native-managed railway—Kipling> Ana fortuitous, •accidental, casual: vagrant, vagabond, truant (see corresponding nouns at vagabond) range n 1 *habitat, biotype, station 2 Range, gamut, reach, radius, compass, sweep, scope, orbit, horizon, ken, purview can denote the extent that lies within the powers of something to cover, grasp, control, or traverse. Range is the general term indicating the extent of one's perception or the extent of powers, capacities, or possibilities <safe, well out of the range of the pursuers> <a beautiful voice with a wide range between the high and the low tones—Ellis> <a creative writer can do his best only with what lies within the range and character of his deepest sympathies—Cather> <the whole range of Greek political life—Dickinson> Gamut suggests a graduated series running from one extreme possible to another <types of light each occupying its particular place in that far-reaching roster or gamut which is called the spectrum—Darrow> Reach suggests an extent of perception, knowledge, ability, or activity attained to or exceeded by or as if by stretching out <moving step by step toward the widest generalizations within his reach—L. J. Henderson> <out of reach of the first invading forces> <anything like sustained reasoning was beyond his reach—Stephen> Radius suggests a usually circular area (as of activity) implied by a known or determined center <the town's history has been the history of coal; within a radius of five miles are 12 large mines—Amer. Guide Series: Pa.> Compass implies an extent, sometimes more limited than that suggested by range, of perception, knowledge, or activity; it is likely to connote a bounding circumference <the powers expressly granted to the government are to be contracted . . . into the narrow circumference <the powers expressly granted to the <here we get in the application of such terms as> rank, rank; and implies vigorous, luxuriant, and often unchecked or unbridled growth. Rank, when it is applied to personal or individual range of perception or cognition <they seemed trivial at the time they came into his ken—White> <the bulk of his known reading, until the great Italians swam into his ken, was French—Lowest> Purview may indicate either range of perception or knowledge or range of authority or competence <the inclusion of dependent areas within the purview of Point Four—Rupert Emerson> <the problem of ethnic variation falls very definitely within the purview of the student of the social life of man—Ashley Montagu> Ana extent, area (see size): *field, domain, province, sphere, territory: spread, stretch, *expanse, amplitude range vb 1 *line, line up, align, array Ana arrange, *order, marshal: *assort, sort, classify: *incline, dispose, predispose, bias 2 *wander, rove, ramble, roam, stray, prow, gawl, gallivant, trapeze, meander rank adj 1 Rank, rampant mean growing or increasing at an immoderate rate. Rank applies primarily to vegetation and implies vigorous, luxuriant, and often unchecked or excessive growth; to hold, seven ears of corn came up upon one stalk, rank and good—Gen 41.5> <its garden was rank, too thickly crowded with trees and bushes and plants—West> The term is common in metaphoric extension <weed your better judgments of all opinion that grows rank in them—Shak.> Rampant is more widely applicable than rank; it implies rapid, often unrestrained or wild, spreading and is frequently applicable not only to what literally grows but to what extends or increases by contagion or diffusion <it grieved him to see ignorance and impiety so rampant—Fuller d. 1661> <that curiosity which is so rampant, as a rule, in an Indian village—Kipling> <rumor ran rampant . . . the other day—Breit> Ana *coarse, gross, vulgar: exубerant, *profuse, lavish, luxuriant 2usty, musty, rancid, *malodorous, stinking, fetid, noisome, putrid Ana dank, humid (see wet): *offensive, loathsome, repulsive: decomposed, decayed, spoiled (see decay) Ant balmy 3 *flagrant, glaring, gross Ana conspicuous, outstanding, *noticeable: foul, filthy, squalid, nasty (see dirty): *outrageous, heinous, atrocious, monstrous rank n *line, row, file, echelon, tier vb *class, grade, rate, graduate, gradate Ana *order, arrange: classify, *assort, sort, divide, *separate ransack search, hunt, rummage, *seek, scour, comb, ferret out Ana investigate (see corresponding noun at inquiry): penetrate, pierce, probe (see enter): examine, inspect, scrutinize ransom vb *rescue, deliver, redeem, reclaim, save Ana *free, release, liberate, emancipate, manumit: *expire, atone rant n *bombast, fistian, rodomontade, rhapsody Ana inflatedness or inflation, turgidity, tumidity, flatulence (see corresponding adjectives at inflated) rap n tap, knock, thump, thud (see under tap vb) Ana beating, pummeling, pounding (see beat vb) rap vb *tap, knock, thump, thud Ana *smite, *strike: pummel, *beat rapacious ravenous, ravenous, glutinous, *voracious

rapsomation • inference

rational

ratiocinative inferential (see under INFERENCE)

An intimation

ration ration, allowance, dole, pittance denote the amount of food, supplies, or money allotted to an individual. Ration implies apportionment and, often, equal sharing. Specifically it is applied in military and naval use to the daily supply of provisions given each man, and in stock-breeding to the daily or periodical supply of food for each animal. In these uses it generally implies dietary variety and restricted amounts of each food. When used of a particular food or commodity (as meat or gasoline) it implies a shortage in the supply and a limitation on the amount allowed each person. Allowance, though often interchangeable with ration, is wider in its range of application. Both imply restriction in amount, but allowance stresses granting rather than sharing and is applicable to money and many other things besides food or commodities. A daily allowance of tobacco for the old pensioners; a schoolboy's weekly allowance; The court determines an heir's allowance during his minority; Dole tends to imply a grudging division and needy or sometimes grasping recipients. Cold charity's unwelcome dole—Shelley; No rich man's largess may suffice his soul, nor are the plundered succored by a dole—E. V. Cooke; In current, chiefly British, use dose is applied to a payment to unemployed workers, whether in the form of relief or insurance, by the national government. Pittance is likely to suggest, or even stress, scantiness or meagerness. It is applicable to a ration, an allowance, a dole, or a wage, the context usually making the reference clear (and gained, by spinning hemp, a pittance for herself—Wordsworth; in England, such a dowry would be a pittance, while elsewhere it is a fortune—Byron)

ana apportionment, portioning or portion (see corresponding verbs at APPORTION): sharing or share, participation, partaking, passing (see corresponding verbs at SHARE)

rational, reasonable may be applied to men, their acts, utterances, or policies in the senses of having or manifesting the power to reason, or of being in accordance with what reason dictates as right, wise, or sensible. Rational usually implies a latent or active power to make inferences from the facts and to draw from such inferences conclusions that enable one to understand the world about him and to relate such knowledge to the attainment of personal and common ends; often, in this use, rational is opposed to emotional or animal (we are rational; but we

are animal too—Cowper) (the rational, the intelligent, the orderly processes of behavior—Mumford) (to cure this habit of mind, it is necessary . . . to replace fear by rational prevision of misfortune—Russell) When the term is applied to policies, projects, systems, or to something conceived or formulated, rational is preferred when justification on grounds that are satisfactory to the reason is specifically implied (the advantages of a rational orthography—Grandgent) (let’s just entertain the notion as a rational hypothesis which may or may not be true—Mailer) Reasonable usually carries a much weaker implication than rational of the power to reason in general, or of guidance by conclusions drawn by the reasoning powers; typically it applies to actions, decisions, choices, or proposals that avoid obvious mistakes and that are practical, sensible, just, or fair (if that belief, whether right or wrong, may be held by a reasonable man, it seems to me that it may be enforced by law—Justice Holmes) (asking me some reasonable if openly ignorant questions about the nature of the bullfight—Mailer) (the formation of reasonable habits, of method, of punctuality . . . makes enormously for the happiness and convenience of every one about us—Benson).

Ant irrational: animal (of nature): demented (of state of mind): absurd (of actions, behavior)

rationalize *explain, account, justify

rattle faze, *embarrass, discomfit, disconcert, abash

Ana *confuse, muddle, addle: agitate, upset, perturb, the city Ana *rough, harsh: gruff, brusque (see BLUFF)

raucous *loud, stentorian, earsplitting, hoarse, strident, stertorous

Ana *rough, harsh: gruff, brusque (see BLUFF)

ravage, devastate, waste, sack, pillage, despoil, spoliate are comparable when they mean to lay waste or bare by acts of violence (as plundering or destroying). Ravage implies violent, severe, and often cumulative destruction accomplished typically by depredations, invasions, raids, storms, or floods (four major disasters had ravaged the country—Leakey) (the psychic disease which ravaged the country—Day Lewis) (an Indian hunt was never a slaughter. They ravaged neither the rivers nor the forest—Cather) Devastate stresses the ruin and desolation which follow upon ravaging; it suggests eradication of buildings, of forests, and of crops by or as if by demolition or burning (behind him were the ruins of a city, shattered, devastated, crumbled piles of concrete and stone that glowed—Styron) (a succession of cruel wars had devastated Europe—Macaulay) (had devastated the neighboring county to get timber—Ellis) Waste may be a close synonym for devastate but it tends to suggest a less complete destruction or desolation, produced more gradually or less violently (he fell suddenly on the Nervii with four legions, seized their cattle, wasted their country—Froude) (the broad gray summit is barren and desolate-looking . . . wasted by ages of gnawing storms—Muir) Sack basically suggests the acts of a victorious army entering a town that has been captured and stripping it of all its possessions of value by looting or destruction (we sacked the city after nine months’ siege—Heywood) (the retreating Federals sacked and burned as they went—Amer. Guide Series: La.) The term may be extended to other than military activity but consistently retains the notion of stripping of valuables and usually of destruction (a crowd sympathetic with the employees sacked the newspaper’s offices—Dillard) (men . . . who’ll sack a railroad or lay siege to a corporation with the idea they’re ordained to grab the other fellow’s property—Everybody’s Mag.)

Pillage stresses ruthless plundering such as is characteristic of an invading or victorious army, but it carries a weaker implication of devastation than sack (he pillaged many Spanish towns, and took rich prizes—Fuller d.1661> (the houses, first pillaged, were then fired—Prescott) In nonmilitary use pillage still implies ruthlessness but it carries a stronger implication of appropriation to oneself of something that belongs to another (as by fleecing, plagiarizing, or robbing) (humbled by their doctors, pillaged by their tradesmen—Shaw) (libraries pillaged to supply grocers with paper—Schultz) Despoil, like sack, implies a stripping of valuables (the English buccaneers . . . fell upon their cities and despoiled them—Haskin) but it does not so often refer to a violent ransacking for booty; it more often suggests a pillaging, sometimes under a guise of legality, or a heedless or inadvertent destruction (magnificent stands of pine . . . despoiled by naval-stores operators and loggers—Amer. Guide Series: Fla.) (a law which restored . . . an immense domain of which they had been despoiled—Macaulay) (the despoiling of the English monasteries in the 16th century) (despoiled of innocence, of faith, of bliss—Milton) Spoliate is chiefly a legal term; in its meaning it comes close to despoil and is particularly applicable to destruction inflicted on a neutral, a noncombatant, or a victim of piracy (from the ages, from the barbarians, the land has been burnt and spoliated—Richard Llewellyn) or, in more general use, when the gaining of spoils by means of exactions, graft, or various venal practices is suggested (the Tweed Ring was charged with spoliating the people of New York City) Ana *destroy, demolish, raze: plunder, loot, *rob: *ruin, wreck: invade, *trespass, encroach

rawboned gaunt, angular, *lean, lank, lanky, spare, scrawny, skinny

ray, beam are comparable when they denote a shaft of light. This conception of light as a shaft is fixed in our language but is not always in keeping with modern scientific views of the nature of light. Ray suggests emanation from a center or point in the manner of the spokes of a wheel; its typical application is to one of the apparently thin lines of light that seem to extend from a radiant body (as the sun or a candle) or that are flashed from a reflective surface (as of steel or a mirror glittering in the sun) (the more numerous the facets of a diamond the more numerous the rays of light it reflects) Beam implies not a line but a long bar; it suggests therefore a bar made up of a bundle of rays of light; thus, a beam of white light is split by a prism into rays of light of the various colors of the spectrum (the beam of an automobile headlight) (a searchlight throws a narrow beam) (where a sunbeam enters, every particle of dust becomes visible—Ruskin) (how far that little candle throws his rays—Shak.) A small beam is sometimes called a ray (a tiny hole in the window shade admitted a ray of sunlight into the room)

raze demolish, *destroy

A colon (:) separates groups of words discriminated. An asterisk (*) indicates place of treatment of each group.
reach

**reach** vb Reach, gain, compass, achieve, attain can mean to arrive at a point by effort or work. Reach is the most general term, being capable of reference to whatever can be arrived at by exertion of any degree and applicable to such diverse matters as a point in space, in time, or in a development, or as a destination, a goal, or a position of eminence <φ> they reached the city that night <φ> after a long discussion they reached an understanding In extended use reach may be predicated even of inanimates things <the hour hand has reached two <φ> the depression has reached bottom> Gain usually implies a struggle to reach a contemplated or desired destination or goal <φ> gained the confidence of the mountain people by his sympathetic approach—Persons <φ> I had gained the frontier and slept safe that night—Browning> Compass implies efforts to get around difficulties or to transcend limitations; it often connotes skill or craft in management <φ> a writer who is attempting a higher strain of elevation or pathos than his powers can compass—Montague> <φ> if you can compass it, do cure the younger girls of running after the officers—Austen> Achieve can stress the skill or the endurance as well as the efforts involved in reaching an end <φ> some are born great, some achieve greatness—Shak.> <φ> no government or private organization could give health; people had to achieve it—Heiser> Often it implies accomplishment of something that is in itself a feat or triumph <φ> a complete moral unity such as England achieved—Belloc> Attain connotes more strongly than any of the others the spur of aspiration or ambition <φ> his constant efforts to attain his ends> It is therefore especially referable to ends beyond the vision, the scope, or the powers of most men <φ> this indispensable condition of the safety and civilization of the world is, indeed, very difficult to attain—Hobson> <φ> a fine balance of all the forces of the human spirit such as but once or twice has been attained in the world's history—Binyon> Ana effect, fulfill, execute, accomplish, *perform: *get, obtain, procure, secure

**reach** n *range, gamut, radius, compass, sweep, scope, orbit, horizon, ken, purview Ana extent, area, magnitude (see size): spread, stretch, *expa(nse: capacity, capability, *ability react operate, work, function, *act, behave

**readiness, ease, facility, dexterity** are comparable when they mean the power of doing something without evidence of effort, or the quality of work that manifests such effortlessness. Readiness lays stress on the quickness or promptitude with which something is done <φ> his readiness in repartee> <φ> a happy readiness of conversation—Austen> Ease, which is probably more often used of the quality than of the power, suggests not only a lack of all signs of strain or care but an absence of signs of hesitation or uncertainty, with resulting evenness in performance and, especially in spoken or written discourse, fluency, directness, grace, and simplicity in expression <φ> true ease in writing comes from art, not chance—Pope> <φ> ease and strength, effort and weakness, go together—Shaw> <φ> Constance was surprised at the ease which he displayed in the conduct of practical affairs—Bennett> Facility is sometimes used in a derogatory sense nearly equivalent to shallowness <φ> his facility in language has been fatal only too often to his logic and philosophy—J. C. Van Dyke> More frequently this feeling is lost and facility may be interchangeable with ease, though it tends more often than ease to express the power, proceeding from practice and use, of performing an act or dispatching a task with

lightness and address <φ> by the use of a few English words and the dramatic facility to express complex thoughts in pantomime, she was quite capable of carrying on extended conversations—Mailer> <φ> I loathed algebra at first, although afterwards I had some facility in it—Russell> Dexterity implies both readiness and facility, but it carries a stronger implication than any of the preceding words of previous training or practice and of proficiency or skill <φ> his amazing dexterity in argument> <φ> absorbed in his own dexterity and in the proposition of trying to deceive a fish with a bird's feather and a bit of hair—Cheever>

**Ana** quickness, promptness, aptness (see corresponding adjectives at quick): alacrity, *celerity, legerity: fluency, eloquence, volubility (see corresponding adjectives at vocal)

**ready** adj *quick, prompt, apt Ana expert, adept, skilled, skillful, *proficient, masterly: *active, live, dynamic

**ready** vb *prepare, fit, qualify, condition

real, actual, true, and their derivative nouns reality, actuality, truth are often interchangeable in general, as distinct from technical philosophical or critical language without marked loss when they mean correspondent to or what is correspondent to all the facts known and knowable; thus, one may say the real, or the actual, or the true state of affairs in the foregoing sense without evident and inherent difference in meaning. The terms are also often used interchangeably, but with distinct loss in clearness and precision, when their common implication is merely that of having or constituting substantial objective existence. Real, in this more inclusive sense, implies genuineness, or correspondence between what the thing appears or pretends to be and what it is <φ> this is a real diamond> <φ> the British sovereign has little real power> <φ> he has a real interest in art> <φ> to know the difference between real and sham enjoyment—Shaw> Actual emphasizes occurrence or manifest existence often in contrast with possible or theoretical or expected occurrence or existence; it is applied to what has emerged into the sphere of action or fact and is inapplicable to abstractions <φ> actual events> <φ> give me an actual instance of the workings of this law> <φ> the actual tests of the new airplane are yet to be made> <φ> sculpture and painting are not . . . capable of actual movement, but they suggest movement—Binyon> <φ> I'm no judge of the feelings of actual or prospective parents—Rose Macaulay> <φ> the possible way—I am far from asserting it was the actual way—in which our legendary Socrates arose—Ellis> True implies conformity either to what is real or to what is actual. If the former is intended, the term presupposes a standard, a pattern, a model, a technical definition, or a type by which what is true is determined <φ> a true Christian> <φ> the ladybug is not a true bug, but a beetle> <φ> the whale is not a true fish, but a mammal> <φ> in the seventh and eighth centuries there were no true kings of England—Malone> <φ> the true refinement . . . that in art . . . comes only from strength—Wilde> When true stresses conformity to what is actual, it presupposes the test of correspondence to what exists in nature or to all the facts known and knowable <φ> true sidereal time> <φ> run true to type> <φ> a true story> <φ> the true version of a story> <φ> fiction is truer than history, because it goes beyond the evidence—Forster>

**Ana** being, existing or existent, subsisting or subsistent (see corresponding verbs at be): *certain, necessary, inevitable

**Ant** unreal: apparent (sense 2): imaginary

realize 1 Realize, actualize, embody, incarnate, material-
ize, externalize, objectify, hypostatize, reify are the chief words in English meaning to give concrete or objective existence to something that has existed as an abstraction or a conception or a possibility. They are seldom freely interchangeable, because their implications vary widely and their applications are largely determined by idiom. 

Realize commonly implies emergence into the sphere of actual things (as of something that has been a dream, an ideal, a hope, or a plan) <the project was never realized owing to a lack of funds> <he did not realize his ambition until he was past middle life> The implication of attainment, of achievement, or of fulfillment is at times so strong in realize as to obscure or subordinate this fundamental idea of coming into existence <to achieve a beautiful relation to another human being is to realize a part of perfection—Binyon> <however evolution ... is effected, a divine purpose is being realized in it—Inge> Actualize, though sometimes used interchangeably with realize, is found chiefly in philosophical or technical writings with the implication of emergence (as of something that has existed only in potentiality) either into fullness or perfection of existence <powers of the mind never actualized> or into act or action <potential energy becomes kinetic energy when it is actualized by motion> Embody and incarnate sometimes imply investment with an outward or visible form of something abstract (as a principle, an idea, a trait, or a quality) <the poet cannot embody his conceptions so vividly and completely as the painter—Binyon> <Dickens incarnated hypocrisy in his Uriah Heep>

Materialize stresses emergence into the sphere of what is perceptible or tangible and usually presupposes prior vagueness, haziness, or elusiveness <I had the glimmering of an idea, and endeavored to materialize it in words—Hawthorne> Externalize and objectify emphasize the projection of what is subjective (as a thought, an emotion, or a desire) so that it takes form apart from the mind. Externalize often suggests a conscious or unconscious urge for expression or relief <madness has produced ... valuable art ... ; the artist attempts to rid himself of his abnormality ... by externalizing it into the work of art—Day Lewis> Objectify is more likely to suggest a conscious attempt to overcome the limitations of subjectivity and sometimes to contemplate one's own mental processes <art has always attempted to express, to objectify the dynamic processes of our inner life—Robert Humphrey>

Hypostatize and reify occur chiefly in philosophical and technical writing. They imply conversion by the mind of something apart from the mind. Externalize often suggests a conscious or unconscious urge for expression or relief <the poet cannot embody his conceptions so vividly and completely as the painter—Binyon> <Dickens incarnated hypocrisy in his Uriah Heep>

Materialize stresses emergence into the sphere of what is perceptible or tangible and usually presupposes prior vagueness, haziness, or elusiveness <I had the glimmering of an idea, and endeavored to materialize it in words—Hawthorne> Externalize and objectify emphasize the projection of what is subjective (as a thought, an emotion, or a desire) so that it takes form apart from the mind. Externalize often suggests a conscious or unconscious urge for expression or relief <madness has produced ... valuable art ... ; the artist attempts to rid himself of his abnormality ... by externalizing it into the work of art—Day Lewis> Objectify is more likely to suggest a conscious attempt to overcome the limitations of subjectivity and sometimes to contemplate one's own mental processes <art has always attempted to express, to objectify the dynamic processes of our inner life—Robert Humphrey>

Hypostatize and reify occur chiefly in philosophical and technical writing. They imply conversion by the mind of something apart from the mind. Externalize often suggests a conscious or unconscious urge for expression or relief <the poet cannot embody his conceptions so vividly and completely as the painter—Binyon> <Dickens incarnated hypocrisy in his Uriah Heep>

Materialize stresses emergence into the sphere of what is perceptible or tangible and usually presupposes prior vagueness, haziness, or elusiveness <I had the glimmering of an idea, and endeavored to materialize it in words—Hawthorne> Externalize and objectify emphasize the projection of what is subjective (as a thought, an emotion, or a desire) so that it takes form apart from the mind. Externalize often suggests a conscious or unconscious urge for expression or relief <madness has produced ... valuable art ... ; the artist attempts to rid himself of his abnormality ... by externalizing it into the work of art—Day Lewis> Objectify is more likely to suggest a conscious attempt to overcome the limitations of subjectivity and sometimes to contemplate one's own mental processes <art has always attempted to express, to objectify the dynamic processes of our inner life—Robert Humphrey>

Hypostatize and reify occur chiefly in philosophical and technical writing. They imply conversion by the mind of something apart from the mind. Externalize often suggests a conscious or unconscious urge for expression or relief <the poet cannot embody his conceptions so vividly and completely as the painter—Binyon> <Dickens incarnated hypocrisy in his Uriah Heep>

Externalize often suggests a conscious or unconscious urge for expression or relief <the poet cannot embody his conceptions so vividly and completely as the painter—Binyon> <Dickens incarnated hypocrisy in his Uriah Heep>
the argument which is not an argument but an appeal to the emotions—\textit{Woolf}\rangle  Proof in much of its use (see proof under PROVE) emphasizes not an intent but an effect: that of conclusive demonstration; therefore, a proof is a piece of evidence (as a fact or a document) or of testimony (as of a witness or expert) or an argument that evokes a feeling of certainty in those who are to be convinced \langle these arguments [for the existence of God] are sometimes called proofs, though they are not demonstrations; they are, however, closely inwoven with the texture of rational experience—\textit{Inge}\rangle  Euclid, the author of the Elements, who gave irrefutable proofs of the looser demonstrations of his predecessors—\textit{Farrington}\rangle

\textit{Ana} explanation, justification, rationalization (see corresponding verbs at \textit{EXPLAIN})

2 *cause, determinant, antecedent, occasion

\textit{Ana} *motive, incentive, inducement, impulse: basis, foundation, ground (see \textit{BASE} n)

3 Reason, understanding, intuition can all denote that power of the intellect by which man arrives at truth or knowledge. \textit{Reason} centers attention on the faculty for order, sense, and rationality in thought, inference, and conclusion about perceptions (\langle the maintenance of reason—the establishment of criteria, by which ideas are tested empirically and in logic—\textit{Dorothy Thompson}\rangle  \textit{reason} is logic; its principle is consistency; it requires that conclusions shall contain nothing not already given in their premises—\textit{Kallen}\rangle  \textit{Understanding} may sometimes widen the scope of reason to include both most thought processes leading to comprehension and also the resultant state of knowledge \langle understanding is the entire power of perceiving and conceiving, exclusive of the sensibility; the power of dealing with the impressions of sense, and composing them into wholes—\textit{Coleridge}\rangle  \textit{philosophy} is said to begin in wonder and end in understanding—\textit{Dewey}\rangle

\textit{Intuition} (see under \textit{intuitive} at \textit{INSTINCTIVE}) stresses quick knowledge or comprehension without orderly reason, thought, or cogitation \langle all this . . . I saw, not discursively, or by effort, or by succession, but by one flash of horrid simultaneous intuition—\textit{De Quincey}\rangle  \textit{do we not really trust these faint lights of intuition}, because they are lights, more than reason, which is often too slow a \langle a councillor—\textit{EA} \rangle  Used in connection with 19th century literary and philosophic notions, understanding often suggests the cold analytical order usually associated with reason and reason in turn suggests the spontaneity of intuition \langle the understanding was the faculty that observed, inferred, argued, drew conclusions . . . . the cold, external, practical notion of life . . . . \textit{The reason} was the faculty of intuition, warm, perceptive, immediate, that represented the mind of young New England—\textit{Brooks}\rangle

\textit{Ana} *mind, intellect, intelligence, brain: rationalization, *inference

\textit{reason} \textit{vb} reflect, *think, deliberate, speculate, cogitate

\textit{Ana} *infer, deduce, conclude, judge, gather

\textit{reasonable} *rational

\textit{Ana} sensible, sane, prudent, judicious, *wise: *fair, equitable, just

\textit{Ant} unreasonable

\textit{rebate} *deduction, abatement, discount

\textit{rebel} n Rebel, insurgent, iconoclast are comparable when they denote one who rises up against constituted authority or the established order. Rebel carries the strongest implication of a refusal to obey or to accept dictation and of actual, often armed, resistance to what one opposes; the term does not necessarily imply antagonism to a government but is comprehensive enough to cover one who defies a generally accepted authority (as of a law, a tradition, or a custom) \langle all their friends were protesters and rebels and seceders—\textit{H. G. Wells}\rangle  \langle one is a rebel or one conforms, one is a frontiersman in the Wild West of American night life, or else a Square cell, trapped in the totalitarian tissues of American society—\textit{Mailer}\rangle  \textit{Insurgent} applies chiefly to a rebel who rises in revolt but who is not regarded by the authorities as having the status of an enemy or belligerent; thus, rebels in a colony or dependency of an empire may, from the imperial point of view, be designated as insurgents, even though they call themselves rebels \langle at the beginning of the war Lincoln held the idea that the Southerners were insurgents and that those captured in arms should be punished as traitors—\textit{Muzzey}\rangle  In a more extended use insurgent applies to a rebel (as in a political party, a church, or a group of artists or writers) who rises in revolt not so much in an attempt to destroy the organization or institution or its laws or conventions as in the hope of effecting changes or reforms believed to be necessary \langle the progressives, who favored giving the voters more control over the nation’s political and economic life, were called insurgents—\textit{Canfield \& Wilder}\rangle  \langle the free verse movement was led by a group of insurgents\rangle  \textit{Iconoclast}, historically applicable to one of a party of insurgents in the Eastern Church in the 8th and 9th centuries who opposed the use of images, is applied in an extended sense to a person who, especially in the capacity of a reformer, violently attacks an established belief, custom, tradition, or institution \langle I have become a reformer, and, like all reformers, an iconoclast . . . . I shatter creeds and demolish idols—\textit{Shaw}\rangle  \langle the blundering crudity of the tough-minded iconoclast—\textit{Garvin}\rangle

\textit{Ana} *opponent, antagonist, adversary: assailant, attacker (see corresponding verbs at \textit{ATTACK})

\textit{rebellion}, revolution, uprising, revolt, insurrection, mutiny, putsch, coup can all denote a war or an armed outbreak against a government or against powers in authority. \textit{Rebellion} implies open, organized, and formidable armed resistance to constituted authority or to the government in power; the term is usually applied after the event to an instance of such resistance as has failed to overthrow the powers that be \langle \textit{Jack Straw’s Rebellion}\rangle  \langle the Jacobeite rebellions of 1715 and 1745\rangle  \textit{Revolution} applies to a rebellion that has been successful to the extent that the old government is overthrown and a new one substituted \langle the French Revolution\rangle  \langle the American Revolution\rangle  The term, however, does not invariably imply a war or a warlike outbreak \langle effected a bloodless revolution by a coup d’etat\rangle  The words are often applied to the same event according to the point of view of the user or sometimes according to the time in which it is used; thus, the American Civil War of 1861-1865 was called the “War of the Rebellion” by Northerners, not only during its progress but for a long time after; a \textit{revolution} is often called a \textit{rebellion} by the overthrown government or its supporters until bitterness has faded \langle the English Civil War (1642-1652) was, after the Restoration (1660), and still sometimes is, called the Great Rebellion\rangle  \textit{Uprising} is a somewhat general term applicable to an act of violence that indicates a popular desire to defy or overthrow the government; it is often used in reference to a small and ineffective movement that flares up suddenly and violently among an insurgent class or section of the people but it is applicable also to the first signs of a general or widespread rebellion \langle there was fear of uprisings in different parts of the country\rangle  \langle whenever the whole nation should join together in one sudden and vigorous uprising—\textit{Freeman}\rangle  \textit{Revolt} and \textit{insurrection} apply to an armed uprising which does not attain the extent of a rebellion, either because it is quickly put down or is
immediately effective. Revolt, however, carries a stronger suggestion of a refusal to accept conditions or continue in allegiance than does insurrection, which often suggests such a seditious act as an attempt to seize the governing power or to gain control for one's party (the Reformation . . . was no sudden revolt, but the culmination of a long agitation for national independence in religious matters—Inge) (Baltazar's tyranny grew little by little, and the Acoma people were sometimes at the point of revolt—Cather) (insurrections of base people are more furious in their beginnings—Bacon) (excess of obedience is . . . as bad as insurrection—Meredith) Mutiny applies chiefly to an insurrection against military or especially maritime or naval authority (the ship's master feared mutiny long before it occurred) (the mutiny of a regiment made the situation desperate for the invaders) Putsch may apply to a small popular uprising or demonstration, or a planned attempt to seize power (the Munich beer hall Putsch of Hitler's supporters in 1923) Coup, in full coup d'état, applies to a sudden overthrowing of a government by other than normal constitutional means; typically it implies careful planning on the part of a comparatively small opposition that usually has such backing from the military forces as insures the success of its effort, often without the need for bloodshed (General Naguib's coup, peaceful only because of the lack of resistance on the part of the faltering king . . . well illustrates the old definition of a dictator—one who takes a bankrupt country—Ayteo) (it's not in our usual tradition of coups d'état at all. Normally, nobody is killed in a coup d'état. A certain amount of firing, yes, but over the heads of the crowds, just to show people they are serious—Rama Rao) (Czechoslovakia was absorbed by a coup under the direct threat of nearby Russian military force—Isaacs)

Ant acquiescent, resigned: submissive
rebellious *insubordinate, mutinous, seditious, factious, contumacious
rebound, reverberate, recoil, resile, repercuss are comparable when they mean to spring back to an original position or shape. Rebound basically implies a springing back after a collision or impact (the ball readily rebounds when thrown against a wall) In extended use the term implies a springing back from one extreme to another or from an abnormal condition to one that is normal (literature is rebounding again from the scientific-classical pole to the poetic-romantic one—Edmund Wilson) Reverberate is used chiefly of rays or waves, most typically of sound waves, which are forced back in the manner of an echo or series of echoes or are repelled or reflected from side to side or from one surface to another (the evening gun thundered from the fortress, and was reverberated from the heights—Hawthorne) but it may be extended to other matters giving a similar effect (presents even simple suggestions of a return to the poetic-romantic one—Edmund Wilson) Recoil (see also recoil 1) often implies a springing back after being stretched, strained, or depressed (a spring recoiling after pressure has been removed) or a sudden or violent backward movement (a gun recoils when it is fired) Sometimes it carries the suggestion of a return to the source or point of origin in the manner of a boomerang (that evidence missed the mark at which it was aimed, and recoiled on him from whom it proceeded—Macaulay) But recoil often implies a springing back in the sense of being forced back by or as if by a blow; it then may denote a retreat, a recoiling, or a reeling (ten paces huge he back recoiled—Milton) (as deep recoiling surges foam below—Burns) (commentators recoiled from the spectacle as if it were too loathsome for remark—S. L. A. Marshall) Resile, much less common than its corresponding adjective resilient, like recoil may imply a springing back (as of an elastic body) into the original state or position, but in practice it is largely restricted to an essentially legal use in which it implies a withdrawing from something to which one has previously committed oneself (the suggestion which he had brought . . . meant that India was seeking to resile from its solemn international commitments—Pakistan Affairs) Repercuss, also much less common than its corresponding noun repercussion and adjective repercussive, is a close synonym of reverberate and rebound, for it implies the return of something moving ahead with great force or, in extended use, set in motion or operation, back to or toward the starting point. However it distinctively suggests repulsion upon impact and a return with undiminished force, or sometimes even greater force, and often, when persons are involved, with a marked effect upon the ones who initiated the action (the waves dashed against the rocks and repercussed with a great roar) (sickness produces an abnormally sensitive emotional state . . . and in many cases the emotional state repercussions . . . on the organic disease—Peabody)

Ana bound, *skip, ricochet
rebuild *mend, repair, patch
Ana *renew, restore, renovate, refresh
rebuke *reprove, reproach, admonish, reproach, chide
Ana rate, upbraid, *scold, berate: *criticize, reprehend, reprobrate
rebut *disprove, refute, confute, controvert
recaclitrant refractory, intractable, headstrong, willful, *unruly, ungovernable
Ana rebellious, *insubordinate, factious, contumacious: *obstinate, stubborn: resisting, opposing, withholding (see RESIST)
Ant amenable (sense 2)
recall vb 1 recollect, *remember, remind, reminisce, be-think, mind
Ana evoke, elicit, extract, *educe: *stir, rouse, arouse, waken, awaken
2 *revoke, reverse, repeal, rescind
Ana *annul, abrogate, void: retract, *abjure, recant
recant retract, *abjure, renounce, forswear
Ana withdraw, remove
recede, retreat, retrograde, retract, back can all mean to move or seem to move in a direction that is exactly the opposite of ahead or forward. Recede stresses marked and usually gradually increasing distance from a given point, line, or position, but it implies movement on the part of what recedes only when a fixed point of view is indicated or understood (the tide is receding) (until the flood waters recede) (while I stood gazing, both the children gradually grew fainter to my view, receding, and still receding—Lamb) When the point of view is that of a traveler or the distance is in time rather than in space, the receding thing is perspective and the point of view changes. In such a case either a gradual disappearance (as from view or consciousness) or a change in perspective is implied (he stood at the ship's stern watching the shore recede from view) (past events as they recede appear in truer proportions—L. P. Smith) (the possibility of certain ultimate solutions has rather receded than approached as the years went by—Krutch) When used of persons and their ideas or attitudes, recede suggests departure from a
fixed idea, or determined attitude, or a definite stand \( \langle \text{he was far too self-willed to recede from a position, especially as it would involve humiliation—Hardy} \rangle \) Retrograde implies withdrawal from a point or position reached, usually because of uncertainty, or of imminent defeat or danger, or in obedience to orders (after the failure of the first attack, the army retreated) \( \langle \text{he had retreated inside himself, as into a dense thicket—Hervey} \rangle \) they frequently approached this theme, and always retreated from it—Meredith \( \langle \text{Retrograde implies movement contrary to what is expected, normal, or natural; thus, a planet retrogrades when it moves or seems to move from east to west, or in a direction opposite to that of the usual planetary course. The verb is also used to imply the reverse of progress in the course of development (as of an institution, a species, or an individual) \langle \text{some races have been stationary, or even have retrograded—Lubbock} \rangle \langle \text{in his Latin and Greek he was retrograding—Meredith} \rangle \langle \text{we have no control over the process by which the arts or sciences advance or retrograde—Whitehead} \rangle \rangle \) Occasionally it is used to imply a going backward in time or an inversion of the chronological order (our narrative retrogrades to a period shortly previous to the incidents last mentioned—Scott) \( \langle \text{Retroact suggests a drawing backward or inward from a forward or exposed position, often in reference to those parts of an organism which can be thrust forward or drawn backward \langle \text{a cat retracting its claws} \rangle \langle \text{throwing out and retracting their left fists like pawing horses—Shaw} \rangle \rangle \) Back applies to any retrograde motion and is often qualified by an adverb (as up, out, or down) \( \langle \text{back an automobile} \rangle \langle \text{the water in a drain backs up when a pipe cannot carry it off} \rangle \langle \text{back out of a room} \rangle \langle \text{a wind backs when it shifts to a counterclockwise direction} \rangle \) Often when followed by out or down it implies a receding from a standpoint or attitude, or a retreating from a promise or an engagement \( \langle \text{he will never back down once his word is given} \rangle \langle \text{he is trying to back out now that he sees how much work the project entails} \rangle \langle \text{the opposition forced the governor to back down and to recall his recommendations} \rangle \langle \text{Ana withdraw, retire, depart (see go): *rebound, recoil} \rangle \) proceed: advance (sense 2) receipt

2 Receipt, recipe, prescription are comparable when they mean a formula or set of directions for the compounding of ingredients especially in cookery and medicine. Receipt is often employed as a designation of a formula for making a homemade medicine \( \langle \text{she has an excellent receipt for a cough syrup} \rangle \) Though also often used in reference to cookery formulas, the term in this sense is commonly felt as old-fashioned or dialectal and is being gradually displaced by recipe. Recipe is perhaps the most general of these terms since it can apply not only to a formula or set of instructions for making or doing something but to a method or procedure for attaining some end \( \langle \text{recipes are used in making steel, and each ingredient is measured to a fraction of one percent—Hot-Metal Magic} \rangle \langle \text{reading good books . . . is the recipe for those who would learn to read—Adler} \rangle \) In application to medicinal formulas recipe may come close to receipt or it may suggest an old-fashioned empirical remedy, as distinct from a modern pharmaceutical product \( \langle \text{some of his recipes are printed in pharmacopoeias of today—Norman Douglas} \rangle \) In cookery recipe is the usual and standard English term for a set of directions for preparing a made dish \( \langle \text{a family recipe for plum pudding} \rangle \) The usual term for a physician's direction to a pharmacist for the compounding or dispensing of a medicine is prescription. That term is also applied to a medicine which is compounded or dispensed according to such a direction \( \langle \text{his doctor gave him three prescriptions} \rangle \langle \text{he is still taking the prescription for bronchitis} \rangle \)

receive, accept, admit, take can all mean to permit to come into one's possession, presence, group, mind, or substance. They are seldom interchangeable except within a narrow range and, even then, rarely without modification of the thought expressed. Receive very often implies nothing more than what has been stated in the common definition; it may be predicated of persons or of things \( \langle \text{he did not receive the news gladly} \rangle \langle \text{the barrel receives excess rain water} \rangle \) In general receive implies passiveness in the receiver even when the subject is a person and his response is indicated in the context (an infant merely receives impressions, for he does not understand them) \( \langle \text{soft wax receives the impression of anything that touches it} \rangle \langle \text{Only when it implies welcoming or recognition does receive connote activity in the receiver} \langle \text{after some delay, the king received the ambassador} \rangle \langle \text{the social leaders refused to receive the newcomers} \rangle \langle \text{the indifference and hostility with which his earlier work was received—Day Lewis} \rangle \) Accept adds to receive an implication of some measure of mental consent, even of approval; thus, a person may be received but not necessarily accepted in society; an idea may be received but not accepted by the mind; one may receive an apology without necessarily accepting an apology. Frequently accept suggests tacit acquiescence rather than active assent or approval. Sometimes it connotes an uncritical attitude \( \langle \text{the man who . . . accepted simply, as a matter of course, the tradition—Dickinson} \rangle \) Sometimes it implies a surrender to the inevitable \( \langle \text{it is the business of the sensitive artist in life to accept his own nature as it is, not to try to force it into another shape—Huxley} \rangle \) Admit is synonymous with receive only when the agent (the one that lets in) is the one that receives rather than introduces \( \langle \text{the king admitted the ambassador to his presence} \rangle \langle \text{the heart admits fluid through these apertures} \rangle \) Admit, in this restricted sense, is distinguishable from receive by slight syntactical differences but chiefly by its strong implications of permission, allowance, or sufficiency; thus, a judge admits evidence only after its admissibility has been questioned and he has allowed its entrance. The situation remains the same when the subject is impersonal \( \langle \text{the archway was wide enough to admit ten men abreast} \rangle \) Admit, in contrast with accept, often adds the implication of concession; thus, one who admits the truth of a contention accepts it more or less unwillingly; one can accept a proposition without question, but one admits it only after he has questioned it. Take is a synonym of receive only when it suggests no reaching out on one's own part or of one's own initiative to get hold of something \( \langle \text{see also TAKE 1} \rangle \) or when it suggests an offering, presenting, conferring, or inflicting by another: it then implies merely a letting something be put into one's hands, mind, possession, or control. This gift was meant for you: take it or leave it as you please \( \langle \text{he takes whatever fortune sends him} \rangle \langle \text{the British showed that they can take the German bombing} \rangle \langle \text{what was it that made men follow Oliver Cromwell and take at his hands that which they would not receive from any of his contemporaries?—Crothers} \rangle \langle \text{you don't have to take anything from him, or to stand his bad manners—Cather} \rangle \langle \text{Ana *enter, penetrate: seize, *take, grasp} \rangle \langle \text{recent} \rangle \langle \text{modern, late} \rangle \langle \text{Ana fresh, *new, new-fashioned} \rangle \langle \text{reception, receipt} \rangle \langle \text{both mean a receiving, but they are not often interchangeable, their use being dependent upon accepted idiom. Reception is the more appropriate term when what is received is a person, especially a caller, a visitor, or a guest; the term may then apply to the act,\rangle \langle \text{prescriptions} \rangle \langle \text{he is still taking the prescription for bronchitis} \rangle \rangle \)
fashion, or manner of receiving (she gave all her friends a warm reception) or the manner of being received (much pleased with the reception she had—Pepys) or a ceremonious receiving or entertaining (invite one's circle of friends to a reception) (hold a reception for the out-of-town delegates and their wives) or an admission or entrance (as into a place, a society, or a company) (the house is ready for the reception of its new tenants) (call attention to the reception of several new members into the society) When what is received is a thing, reception is employed when the idea of receiving is added the idea of admitting into or as if into a space or enclosure (the tower is large enough for the reception of several bells) or of apprehension (as by a sense, the senses, or the mind) (their minds are not ready for the reception of such ideas) (the proposal met a favorable reception) (television reception was poor during the storm) Receipt (see also receipt 2) stresses the simple fact of receiving and is the customary term when what is received is a thing (as money, goods, or a letter) given or sent by another and delivered into one's custody or possession (acknowledge the receipt of goods ordered) (I am awaiting the receipt of your answer) (making my decision) (Receipt is also applied to a signed paper or document testifying to the receiving of money due or of goods delivered.

**recess n.** *pause, respite, lull, interruption*  
_Ana_ withdrawal, retirement (see corresponding verbs at go): *break, interruption, interval, gap: relaxation, leisure,* *rest*

**recherché** elegant, *choice, exquisite, delicate, dainty, rare*  
_Ana_ fresh, original, *new, novel: select, exclusive, picked*  
_Ant_ banal

**recipe** *receipt, prescription*

**reciprocal**  
1 Reciprocal, mutual, common mean shared, experienced, or shown by each of the persons or things concerned. Reciprocal has for its distinctive implication the return in due measure by each of two sides of whatever is offered, given, or manifested by the other. Usually therefore it implies not only a quid pro quo but an equivalence in value, though not necessarily in kind, on each side (as of love, hate, understanding, courtesies, concessions, or duties) (the connection between law and political theory has not been one-sided; it has been completely reciprocal—Cairns) (the reciprocal feelings of man and woman towards each other—T. S. Eliot) Mutual is often used in place of reciprocal when the idea of return or interchange is suggested and that of sharing equally or jointly is stressed (mutual affection) (mutual enthusiasm) But mutual is applicable, as reciprocal is not, to two persons who entertain reciprocal feelings toward each other (mutual friends) (mutual foes) When there is little or no suggestion of a reciprocal relation (as between thoughts or feelings) and the emphasis is upon the fact that the two persons or things involved entertain the same feelings toward each other, perform the same actions, or suffer the same results, mutual is more appropriate than reciprocal (their eyes held and the air was eloquent of mutual suspicion—Hervey) (even Shelley sometimes mingles poetry and propaganda to their mutual disaster—Lowes) Both reciprocal and mutual are sometimes used when more than two persons, classes, or things are involved (mutual recriminations, long suppressed, broke out between the Fueler's captains—Shirer) but when there is no implication of reciprocity, common is the more usual term; thus, one says "we (two, three, or more persons) are mutual friends," meaning that all are friends each of the other but "they have common friends," meaning that each has friends who also are friends of the others; the members of a group may have a common purpose. Common (see also common 3; universal 2) implies joint participation or possession by two or more persons, and differs from mutual in not being restricted as to the number involved and in not carrying a suggestion of a reciprocal relation or of an equivalence of feeling, performance, or effort (make common cause against an enemy) (their common fund of intellectual interests and curiosities made their talks exhilarating—Wharton) (death and other incidents of our common fate—Cohen)  
_Ana_ shared, participated, partaken (see Share): interchanged, exchanged (see Exchange): balancing, compensating, counterpoising (see compensate)

2 Reciprocal, corresponding, correlative, complementary, complemental, convertible are not close synonyms, although in some instances they are interchangeable, and all are comparable in meaning like, equivalent, or similarly related to each other (as in kind, quality, or value). Reciprocal (see also reciprocal 1) implies that the likeness or equivalence of two things or of one thing to another rests on the fact of their being returns or its being a return in kind, value, or quality for what one side has given to the other (reciprocal courtesies) (a treaty providing for reciprocal trade privileges) (each flexor muscle which contracts has its reciprocal extensor muscle which operates in the reverse direction—Wier) (public and private systems engage in reciprocal services—Lepawsky) Corresponding implies a likeness or equivalence proceeding from the fact that one answers to the other or conforms to it so that they are fitted to each other, or proportionate to or commensurate with each other, or in perfect accord with each other (corresponding sides of similar triangles are in proportion—G. F. Wilder) (the light, with its corresponding shadow—Kitson) (all rights carry with them corresponding responsibilities—Paepe) Correlative implies a close relationship rather than a likeness and is applicable chiefly to two things, or one of two things, which cannot exist independently of each other either because one logically implies the other (husband and wife, father and child, are correlative terms) or one cannot exist without the other (the "right" of the worker to demand work on reasonable terms, and the correlative obligation of the organized community to provide it—Hobson) In more usual use correlative may imply nothing more than so close a correspondence or relation between two or sometimes more things that they come naturally, necessarily, or logically together (two correlative rules: first, that no one shall be allowed to undertake important work without having acquired the necessary skill; secondly, that this skill shall be taught to the ablest of those who desire it—Russel) (disorder in any one of nature's correlative hierarchies—physical, political, psychological—automatically produces disorder in the others—Bingham) Complementary also implies a close relationship rather than a likeness; the term carries a strong suggestion that one thing is so necessary to another or to others that without it an entire or perfect whole is not possible (it is important to recognize that these two uses of the surplus are complementary and not competitive—Hobson) (the corpuscular and undulatory concepts of light must be regarded as complementary rather than antithetical—Jeans) Complemental has essentially the same meaning, differing only in applying usually to a quantitative completing (revelation is regarded by many theologians as complemental to reason) Convertible implies so strong a likeness that the things, though not identical, are virtually interchangeable (the law, and the opinion of the judge, are not always con-
reckless daring, daredevil, rash, foolhardy, venturesome

reckon vb 1 *calculate, compute, estimate

recluse, hermit, eremite, anchorite, cenobite all designate a person who lives apart from the world usually in order to devote himself to prayer, contemplation, and penance. Recluse and hermit are also applied to persons who avoid intercourse with men for other than religious motives, but even in such extended use they retain their original distinguishing implications, for recluse stresses retirement from the world and the life of the world into seclusion but not necessarily into physical isolation and hermit, a solitary life lived apart from men and usually in a place or under conditions where there is little likelihood of intrusion. Recluse is the broader term; it may be applied to a hermit or to a religious who lives in a cloistered community. Hermit is often applied to a member of one of the very few religious orders (as the Carthusians) whose members dwell alone and meet other members of the community only in church and in the refectory on Sundays. Eremite, archaic as a variant of hermit, is sometimes chosen to unequivocally designate a solitary who is under a religious vow. Anchorite and cenobite are contrasted terms for the two leading types of recluses in the Eastern and in the Western Church. Anchorite designates the type known as hermit or eremite; cenobite, the type that dwells in a community, especially a strictly cloistered community of monks or nuns.

recognition, identification, assimilation, apperception are comparable when they designate a form of cognition which relates a perception of something new to knowledge already acquired. Recognition implies that the thing now perceived (as by seeing, hearing, or smelling) has been previously perceived, if not in itself then in another instance of the same kind, and that the mind is aware that the two things are identical or of the same kind. Identification implies not only recognition, but such previous knowledge as permits one to recognize the thing as an individual member of a class of things. Assimilation implies that the mind responds to new facts, new ideas, or new experiences by interpreting them in the light of what is already known, thereby making them also an integral part of one's body of knowledge. Apperception differs from assimilation in implying that the mind responds to new facts, ideas, or situations when and only when it can relate them to what is already known.

calculate, compute, estimate

recoil vb 1 Recoil, shrink, flinch, wince, flinch, quail can all mean to draw back from something, usually through fear, faintheartedness, or disgust. Recoil more than any of the succeeding terms suggests the physical signs of such drawing back or the sensations that accompany it. The term may imply a start or a sudden movement away <had so great a dread of snakes that he instinctively recoiled at the sight of one—Costain> <she makes a gesture as if to touch him. He recoils impatiently—Shaw> but often the term suggests an inner or not outwardly apparent shaking or stirring that affects one mentally more than physically <she was principally aware of the sentiment of fear. She recoiled from the future—Bennett> <the tendency to recoil from the expression of repressed feelings, such as hate—Garvin> Shrink implies an instinctive recoil (as from something painful or unpleasant or horrible); it often implies cowardice, but it may imply extreme sensitiveness or scrupulousness <guilt and misery shrink, by a natural instinct, from public notice—De Quincey> <she shrank from the words which would have expressed their mutual consciousness, as she would have shrunk from flares of fire—George Eliot> <he might have shrunk from defending himself at the expense of a frightened, unhappy girl—Rose Macaulay> Flinch implies a failure in resolution or an inability to overcome one's desire to avoid or evade something that is painful, difficult, or abhorrent <he looked his fate in the face without flinching—Burroughs> <she read and took notes incessantly, mastering facts with painful laboriousness, but never flinching from
her self-imposed task—Hardy> (the process of purgation is always perilous, though it is . . . still more perilous to flinch from making the attempt—Toynbee> Flinch is sometimes used but wine more often when by some involuntary, often slight, physical movement (as starting or recoiling) one manifests pain, fear, disgust, or acute sensitiveness (cannot bear the slightest touch without flinching—Smollett) > His horse stands wincing at the flies, giving sharp shivers of his skin—Hunt > Old Lady Kew’s tongue was a dreadful thong which made numbers of people wince—Thackeray > Mr. Warburton winced when he heard so young a man call him by nickname—Purdy> Blench may be indistinguishable from flinch; it often, however, carries a stronger suggestion of faint-heartedness or of signs of fear (this painful, heroic task he undertook, and never blenched from its fulfillment—Jeffrey) > Though his death seemed near he did not flinch—Masefield> To quail is to shrink cowardly, as from something, which strikes terror > the most formidable woman I have ever known . . . . eminent men invariably quailed before her—Russell> I am never known to quail at the fury of a gale—Gilbert> Ana waver, falter, *hesitate: shy, balk, stick, stickle (see DEMUR) > Ant confronted: defy > 2 *rebound, reverberate, resile, repercuss Ana retreat, *recede, back, retract: *return, revert > recolect *remember, recall, remind, reminisce, bethink, mind > Ana *stir, raise, arouse, rally, waken, awaken > recollection *memory, remembrance, reminiscence, mind, souvenir > recommend *commend, compliment, applaud Ana *approve, endorse, sanction: *praise, extol, acclaim > recommendation testimonial, *credential, character, reference > Ana approval, endorsement (see corresponding verbs at APPROVE): commendation (see corresponding verb at COMMAND) > recom pense vb reimburse, indemnify, repay, satisfy, remunerate, compensate, *pay Ana award, accord, vouchsafe, *grant: balance, offset, *compensate > reconcile conform, accommodate, adjust, *adapt Ana harmonize, accord, square, *agree: *correct, rectify, amend, revise > recondite, abstruse, occult, esoteric can all mean being beyond the power of the average intelligence to grasp or understand. Recondite stresses difficulty resulting from the profundity of the subject matter or its remoteness from ordinary human interest. It often, especially as applied to persons, implies scholarly research carried beyond the bounds of apparent usefulness (the recondite and occult in human nature alike attract the insurgent temper—Lowes) > profound and scholarly, but often recondite to the point of obscurity—Woodring> Abstruse suggests extreme complexity or abstractness in the material as well as its remoteness from the ordinary range of human experience or interest (the vast army of illiterate or semi- literate people who distrust the learned world, especially the abstruse world of science—Meyer) > the last quartets and piano sonatas of Beethoven, which are some of the most abstruse music ever written—Whitehead> Occult basically implies secret, mysterious knowledge purporting to be attainable only through special and often supernatural or magical agencies and not through ordinary channels of human reason (the occult sciences) > whether it be from natural predisposition or from some occult influence of the time—J. R. Lowell> But often the word is used with much weakened force to mean little more than mysterious (the sense of occult rivalry in suitorship was so much superadded to the palpable rivalry of their business lives—Hardy) > juries selected by some occult procedure satisfactory to the judges—Amer. Guide Series: Nev.> Esoteric basically implies knowledge guarded by, and imparted only to, members of a cult or inner circle of initiates (the esoteric sects, which guard a mystery known only to the initiated—Sperry) > but it is extended in general use to describe knowledge in the possession only of adepts, students, and specialists (as far as the general public was concerned the museum was an esoteric, occult place in which a mystic language was spoken—Saarinen) > Ana scholarly, erudite, *learned: *pedantic, scholastic, academic

record vb Record, register, list, enroll, catalog can mean to commit to writing for the sake of immediate or future use. Record usually implies as its purpose the making of an exact or official entry or statement which gives evidence of the facts involved; the act serves as an aid or a check to memory or as a means of supplying details unlikely to be remembered indefinitely (record the proceedings of a meeting) > (record the events of each day in a diary) > (record a deed in the county clerk’s office) > (in all recorded history, nothing like this has happened before) Register usually implies accurate entry into a formal record of facts or particulars of a certain kind which require or deserve recording (required by law to register all births) > (all purchases are registered in our books) Sometimes register carries a further or a slightly different implication; thus, one registers a letter by payment of a special fee and obtaining a receipt to ensure its safe delivery by requiring a record of each person who handles it; a thermometer registers the temperature when the mercury expands or contracts to a certain mark in degrees. List implies an entering in a list (as of names, figures, needs, or events) > list the achievements of an athlete > list alphabetically the books you have read > list the survivors of an accident > list the food needed for the party > list your expenses carefully > Enroll may add to list the notion of setting apart those entered in a distinctive category (as members of a body or adherents of a person or cause) and therefore may connote a winning over, an enlisting, or an admission to membership (interested persons are invited to enroll themselves as members of the society) > those who are . . . . tempted to enroll themselves as soldiers—Malthus> (as he goes on, he . . . . enrols a following—Montague) Enroll is sometimes also used of things in the sense of record, but in its more usual extended sense, it also includes the connotation of honoring (enroll your triumphs o’er the seas and land—Pope) Catalog commonly implies an enumeration of all items making up a class or group, usually with descriptive or defining details (catalog the books in a library) > (the porcelains in the collection needed to be cataloged) > (allowing time to catalog the items to be sold at auction) Catalog may also imply assignment of an item to its proper place in a list or sometimes in a category (the book has not yet been cataloged) > a specimen impossible to catalog in the existent classification often turns out to be a new species >

recover 1 Recover, regain, retrieve, recoup, recruit can mean to get back something that has been let go or lost. Recover, the most comprehensive of these terms, may imply a finding or obtaining something material or immaterial that has been lost <recovery a lost watch> <recovered his health> <recovered peace of mind> <recovered his balance> or a getting of something in reparation or compensation <recovery damages in a lawsuit> Regain, though often used interchangeably with recover, carries a stronger implication of winning back or getting once more into one's possession something of which one has been deprived <regain a fortune> (regain a person's good will) <regained his sight> <regained freedom> Regain also may imply, as recover seldom implies, success in reaching again a place or point at which one has been before <in his efforts to regain his hotel—Meredith> <the trench allowed the performers, after being thrust down into perdition, to regain the greenroom unobserved—Quiller-Couch> Retrieve implies a recovering or regaining after assiduous effort or search <desperate efforts to retrieve lost territory> <it now seemed impossible to retrieve the foreign trade lost by war> <his desire to retrieve his military reputation—Bello> <marveling at the silent untriniting activity with which her popularity had been retrieved—Wharton> But retrieve sometimes takes for its object such words as loss, error, failure, or disaster, then implying not recovery but a setting right or a making what is bad good, or a reparation by making up for what was wrong or unsuccessful <life is not long enough to retrieve so many mistakes> <one false step is never retrieved—Gray> <he is to retrieve his father's failure, to recover the lost gentility of a family that had once been proud—Brooks> 
Recoup, basically a legal term implying a rightful deduction by a defendant of part of a claim awarded to a successful plaintiff in a lawsuit, can in its general and extended use imply recovery or retrieval, usually in equivalent rather than identical form, of something lost <able to recoup his gambling losses by more careful play> <Elizabeth had lost her venture; but if she was bold, she might recoup herself at Philip's cost—Meredith> —recruit, basically a military term carrying a stronger implication of fresh additions; in military use it can imply an increase in numbers through drafting and enlistment or a filling of vacancies in a force resulting from casualties <it was his custom to recruit his army with conquered people—Newton> In more general use it may imply a regaining of what has been lost (as vigor through illness, or money through extravagance or heavy expenditures) by fresh additions or replenishment of the supply <recruiting his strength with a good plain dinner—Dickens> <(the middle class) is continually recruited from the capitalist families—Shaw>—analogous words

reef vb Reel, whirl, stagger, totter are comparable when they mean to move or seem to move uncertainly or uncontrollably (as in weakness, in giddiness, or in intoxication). Reel usually implies a turning round and round, or a sensation of so turning or being turned (for, while the dagg gleamed on high, reeled soul and sense, reeled brain and eye—Scott) (in these lengthened vigils his brain often reeled—Hawthorne) But it may also imply a being thrown off balance (as an army that recoils before a mighty attack, a ship that has lost its equilibrium, or a person affected by exhaustion, a wound, faintness, or intoxication) *giddy and restless, let them reel like stubble from the wind—(Milton) when Church and State were reeling to their foundations—(Stanley) he . . . placed his open palm gently against the breast of Lucian, who instantly reeled back as if the piston rod of a steam engine had touched him—(Shaw) Whirl (see also TURN) is often used like reel, especially when referred to the head or to the brain (the dim brain whirls dizzy with delight—Shelley) but it more frequently implies swiftness or impetuosity of movement often by someone or something being carried along blindly or furiously (in popular commotions, each man is whirled along with the herd—Lytton) Stagger stresses uncertainty or uncontrollability of movement, typically of a person walking while weak, giddy, intoxicated, or heavily burdened, but sometimes of whatever meets with difficulty or with adverse conditions; thus, a boat that labors, a mind that is perplexed, confused, or bewildered, and a faith, opinion, or purpose that meets heavy opposition can all be said to stagger a porter half my size who . . . staggered through the shallow water under what must have been an almost overwhelming weight—(Heiser) (at whose immensity even soaring fancy staggered—Shelley) Totter (see also SHAKE) implies not only weakness or unsteadiness as a cause of uncertain movement but often also suggests an approaching complete collapse (from the day of Cressy feudalism tottered slowly but surely to its grave—J. R. Green) (the waning moon) like a dying lady, lean and pale, who totters forth, wrath in a gauzy veil—(Shelley)

Ana *contrary, perverse, froward, wayward: *insubordinate, rebellious, contumacious

Ant malleable: amenable (sense 2)

refrain, abstain, forbear are comparable when they mean to keep or withhold oneself voluntarily from something to which one is moved by desire or impulse. Refrain is especially suitable when the checking of a momentary inclination is implied (refrain from laughter) At times, to refrain from an action implies merely its nonperformance (no tolerable parent could refrain from praising a child when it first walks—Russell) Abstain is more emphatic than refrain, because it usually stresses deliberate renunciation or self-denial on principle and often implies permanence of intent (early Christians ... abstained from the responsibilities of office—Acton) I have ... abstained from the use of many expressions, in themselves proper and beautiful, but which have been foolishly repeated by bad poets—Wordsworth) It is used especially in reference to those natural appetites and passions whose control or renunciation are a part of self-discipline (from this personal blow stemmed, I believe, an act of renunciation, his decision to abstain from meat—Shirer)

Forbear usually implies self-restraint rather than self-denial, be it from patience, charity, or clemency, or from discretion, or from stoicism (he was so poison-mean that the marsh mosquitoes forbore to bite him—S. H. Adams) (wherever he has not the power to do or forbear any act according to the determination or thought of the mind, he is not free—Thilly) But often forbear is but vaguely distinguishable from refrain (I cannot forbear quoting what seems to me applicable here—Justice Holmes)

Ana *deny, gainsay: balk, baffle, *frustrate, thwart, foil: debar, *exclude, shut out

refuse n Refer, waste, rubbish, trash, debris, garbage, offal can all mean material that is regarded as worthless and fit only for throwing away. Refuse, ordinarily the most comprehensive term of the group, stresses the rejection of the matter, or its uselessness from the point of view of the owner (as a manufacturer, processor, builder, or housekeeper) and usually implies its being cast aside or thrown away. The term includes anything covered by this description without regard to whether another will find use for it (a stream polluted by refuse from a manufacturing plant) (heaps of refuse left by the former tenant) (arrangements made by the city to collect refuse) (a road surfaced with the hardened refuse from a neighboring tannery) Waste may also be a comprehensive term approaching refuse in meaning, but it typically applies to material that is unused by its producer but can or could be useful in other ways or in other circumstances or to other people (wiped his hands on a wad of cotton waste) Rubbish is likely to mean an accumulation of useless material and worn-out, broken-down, used up, worthless things (throw it in the rubbish barrel) (her closets heaped with rubbish) Trash stresses material of no account (as something worn-out or exhausted of what was good in it or parts discarded in shaping, trimming, or clipping). In general use trash is often employed in place of rubbish as a name for waste materials requiring disposition, but both terms in this sense usually exclude refuse that is animal or vegetable matter. Debris usually applies to what remains from the breaking up, the disintegration, or the destruction of something (as a building, a wall, or a tree); the term usually suggests a loose accumulation of detritus or broken fragments (a pile of debris was the only sign that a house was once there) (the sandstone cliffs ... are battered down and their debris carried out to sea—Geikie) (after the air raid nothing was left of the building but a pile of rubble and debris) Garbage chiefly applies to organic refuse (as from a kitchen, a store, or a market) including waste of animal or vegetable origin or animal or vegetable matter that is or is regarded as unfit for human food. Offal may refer to something (as chips of wood or pieces of leather) cut off in dressing or fitting for use, but the term is usually applied specifically to the parts of a butchered animal that are removed in dressing the carcass, that consist chiefly of viscera (as liver, kidneys, and heart) and of trimmings (as tail, hooves, blood, and head meat), and that include edible meats and raw materials for processing as well as refuse. But offal may also be applied to carrion and other worthless or distasteful refuse and tends then and in extended use to stress offensiveness or disagreeableness.

All these terms except waste also have extended use; refuse refers usually to something left after the available supply has been thoroughly picked over and therefore implies the worst, the meanest, or the least desirable of the lot (the refuse of society) Rubbish may be applied to something (as inferior merchandise or a ridiculous or nonsensical idea, argument, or discussion) that in its worthlessness suggests a heap of trash (much of the goods in bargain sales is mere rubbish) (most of the stuff talked about Nordics and Aryans is simply rubbish—Huysay) Trash retains its implication of relative worthlessness (who steals my purse steals trash—Shak.) (most of these paintings are trash, but there are two or three good things) Debris may be applied to something inanimate or intangible that remains as evidence of what the original thing once was (those eastern lands which were the debris of Alexander’s empire—Buchan) Garbage also may be applied to something that in comparison with other things of the same sort may be described as filthy or foul (she flew with voracious appetite to sate herself on the garbage of any circulating library—Porter) Offal ordinarily applies to persons considered as the lowest or meanest of refuse or as scoffsours (wretches ... whom everybody now believes to have been ... the offal of gaols and brothels—Macaulay)

regard n Regard, respect, esteem, admiration, and their
regard

regard vb 1 respect, esteem, admire (see under regard n)

regard n (regard, respect, esteem, admire) are comparable when they mean a feeling, or to have a feeling, for someone or something which involves recognition of that person's or thing's worth and some degree of liking.

Regard is the most colorless as well as the most formal of these words. It usually requires qualification to reinforce and orient its meaning.

regard vb (regard, respect, esteem, admire) are comparable when they mean a feeling, or to have a feeling, for someone or something which involves recognition of that person's or thing's worth and some degree of liking.

relapse vb *lapse, backslide
Ana revert, *return: degenerate, decline, deteriorate
(relate) (see corresponding nouns at DETERIORATION)
relate vb 1 Relate, rehearse, recite, recount, narrate,
describe, state, report are comparable when they mean to
tell orally or in writing the details or circumstances necessary to
render understanding or knowledge of a real or imagined situation or combination of events. Relate implies the giving of a usually detailed or orderly account of something one has witnessed or experienced <related the story of his life> <then Father Junipero and his companion related fully their adventure—Cather>
Rehearse usually suggests a repetition; it may imply a summary of what is known <let us rehearse the few facts known of the inconspicuous life of Thomas Traherne—Quiller-Couch> or a second or third or oft-repeated telling <designed to fool the easily fooled . . . it rehearsed all the lies with which we are now familiar—Shirer> or a going over and over something in one's mind, or with another person, or in privacy before relating or sometimes performing or presenting it to others or to an audience <Mr. Hynes hesitated a little longer . . . He seemed to be rehearsing the piece in his mind—Joyce>
 felt certain . . . that his smile was as he had rehearsed it, polished and genially satanic—Hervey> Recite and the more common recount imply greater particularity of detail than the preceding terms; in fact, the implication of enumeration or of mention of each particular is so strong that both verbs usually take a plural object; thus, one relates an experience, but he recites or recounts his experiences <recite the events of the day> <as with all mysteries, it describes state and what one means, and be able to relate to each other>
Narrate suggests the employment of devices characteristic of the literary narrative such as plot, creation of suspense, and movement toward a climax <what verse can sing, what prose narrate the butcher deeds of bloody Fate—Burns> <the discovery of Madeira is narrated with all the exaggerations of romance—Southey>
Describe usually implies emphasis upon details that give the hearers or readers an actual or pictorial or that give not only a visual representation but one that appeals to the other senses <bitter sea and glowing light, bright clear air, dry as dry,—that describes the place—Jeffries> described her . . . as "a dear little thing. Rather brainy, but quite a nice little thing"—Gibbons> State stresses particularity, clearness, and definiteness of detail, and suggests the aim of presenting material (as facts, ideas, or feelings) in their naked truth so that they will be distinctly understood or fixed in others' minds <Dryden's words . . . are precise, they state immensely, but their suggestiveness is often nothing—T. S. Eliot> <one should know what one thinks and what one means, and be able to state it in clear terms—Rose Macaulay>
Report implies a recounting and narrating, often after investigation, for the information of others <report the progress on defense projects to the cabinet> <he was assigned to report the murder trial for the local newspaper> <in his letters Thaddeus reported approaching an island in an outrigger one evening—Cheever>
Ana tell, *reveal, disclose, divulge: detail, itemize, particularize (see corresponding adjectives at CIRCUMSTANTIAL)
2 associate, link, connect, *join, conjoin, combine, unite
Ana attach, *fasten, fix: refer, assign, credit, impute, *ascibe
Con disengage, *detach, abstract: divorce, sever, undo, *separate
3 bear, pertain, appertain, belong, apply
related, cognate, kindred, allied, affiliated can all mean connected by or as if by close family ties. Related, when referred to persons, usually implies consanguinity, but sometimes implies connection by marriage <the royal families in Europe are nearly all related to each other> When applied to things, related suggests and often close, particular nature of which is to be gathered from the context <related species> <related activities> <every part of an organism is related to the other parts> <body and soul are contrasted, but related, concepts> Cognate differs from related chiefly in being referable only to things that are genetically alike or that can be shown to have a common ancestor or source or to be derived from the same root or stock <cognate races> <cognate languages> <cognate words in various languages, such as pater, Father, father> <physics and chemistry are cognate sciences> Kindred, in its primary sense, stresses blood relationship <kindred members of a community> In its more common extended sense, it implies such likenesses as common interests, tastes, aims, or qualities that might be characteristic of a family. When the reference is to persons, congeniality is usually connotated <he would never be popular . . . but he might appeal to a little circle of kindred minds—Joyce>
When applied to things, a more obvious connection or a closer likeness is implied than in related kindred qualities in two otherwise alien tongues [Hebrew and English]—Lowes> Allied more often implies connection by union than by origin, and especially by marriage or by voluntary association. It often connotes a more remote family connection than related <the Raycie blood was . . . still to be traced in various allied families: Kents, Huzzards, Cosbys—Wharton> In its extended use it usually stresses relation based on the possession of common characters, qualities, aims, or effects which lead either to union or to inclusion in the same class or category <allied physical types> <allied societies> <allied diseases> Affiliated also stresses connection by union, but it may imply a dependent relation such as that of a child to a parent. Sometimes it implies the adoption of the weaker by the stronger <a small college affiliated to a university> Sometimes it connotes a loose union in which the affiliating units retain their independence, but derive support or strength from the main, central, or parent body, or cooperate in its work <Monte Cassino and affiliated monasteries> <the CIO and its affiliated unions>
Ana associated, connected (see JOIN): *reciprocal, corresponding, correlative, convertible, complementary: akin, identical, alike, analogous (see LIKE): *relevant,
germane, pertinent
relative *dependent, contingent, conditional
Ant absolute
relaxation *rest, repose, leisure, ease, comfort
Ana amusement, diversion, recreation (see under AMUSE vb): relieving or relief, assuagement, alleviation, mitigation (see corresponding verbs at RELIEVE)
relaxed *loose, slack, lax
Ana mitigated, lightened, alleviated, assuaged, relieved (see RELIEVE): flexibleus, sinuous (see WINDING): *soft, mild, gentle, lenient
Ant stiff —Con strict, *rigid, rigorous, stringent: *severe, stern, austere, ascetic

Ana *detach, disengage: *exculpate, exonerate, acquit: surrender, resign, yield, *relinquish
Ant detain (as a prisoner): check (as thoughts, feelings): oblige
relegate vb *commit, entrust, confide, consign
Ana refer, assign, credit, accredite, charge (see ASCRIBE)
reliant *yield, submit, capitulate, succumb, defier, bow, cave
Ana comply, acquiesce (see corresponding adjectives at COMPLIANT): forbear, *refrain, abstain: *abate, subside, wane, ebb
re lentless unrelenting, merciless, implacable, *grim
Ana inexorable, obdurate, adamant, *inflexible: strict, stringent, *rigid, rigorous: *fierce, ferocious, cruel, inhuman
Con *soft, lenient, mild, gentle: *tender, compassionate: yielding, submitting or submissive (see corresponding verbs at YIELD)
relevant, germane, material, pertinent, apposite, applicable, apropos are comparable when they mean having a relation to or a bearing upon the matter in hand or the present circumstances. Something relevant has a traceable connection, especially logical connection, with the thing under consideration and has significance in some degree for those who are engaged in such consideration (the judge decided that the evidence was relevant and therefore admissible) (great books are universally relevant and always contemporary: that is, they deal with the common problems of thought and action that confront men in every age and every clime—Adler) Something germane is so closely related (as in spirit, tone, or quality) to the subject, the matter, the occasion, or the issue that the fitness or appropriateness of their association is beyond question (enliven his lecture by introducing amusing anecdotes germane to his subject) (an interesting point but not germane to the issue) (the passionate cravings which are germane to the hermit life—H. O. Taylor) Something material is so closely related to the matter in hand that it cannot be dispensed with without having an evident and especially a harmful effect (the motion is supported by an affidavit showing that the evidence is material—B. F. Tucker) (certain passages material to his understanding the rest of this important narrative—Scott) Something pertinent is so decisively or significantly relevant that it touches the real point at issue or contributes materially to the understanding of what is under discussion or to the solution of what is in question (once a thing did become pertinent, he had an amazing faculty for absorbing it wholly—Terry Southern) (it is more pertinent to observe that it seems to me that logically and rationally a man cannot be said to be more than once in jeopardy in the same cause, however often he may be tried—Justice Holmes) Something apposite is relevant and germane to such a degree that it strikes one both by its pertinency and by its felicitousness (an apposite illustration) (apposite quotations. . . came easily to his pen to grace the lucid flow of his English—Parrington) (whatever she did, she made her circumstances appear singularly apposite and becoming—Sackville-West) Something applicable may be brought to bear upon or be used fittingly in reference to a particular case, instance, or problem (the word tool is applicable to a plow only when used in a general sense) (the principle is not applicable to the case in question) (although. . . I do not get much help from general propositions in a case of this sort, I cannot forbear quoting what seems to me applicable here—Justice Holmes) Something apropos is both appropriate and opportune (a person who is not aware of an undercurrent of feeling may make remarks that are far from apropos) (we . . . find a new pleasure in the hackneyed words. They are really not quite apropos—Julian Huxley) Sometimes it can suggest relevancy rather than appropriateness or opportuneness (he is not witty but Frenchily apropos—Flanner)
Ana *related, cognate, allied: fitting, appropriate, proper (see FIT): important, significant, weighty (see corresponding nouns at IMPORTANCE)
Ant extraneous —Con alien, foreign, *extrinsic
reliable, dependable, trustworthy, trusty, tried can be applied to persons, their utterances, views, methods, or instruments to mean having or manifesting qualities which merit confidence or trust. Reliable describes what one can count upon not to fail in doing what is expected (she is a very reliable servant) (one of the most reliable of our employees) (a reliable washing machine) or to give or tell the exact truth (a reliable work of reference) (reliable testimony) Dependable is very close to reliable: it may suggest steadiness or trustworthiness in time of need or in an emergency (ask a friend to recommend a dependable physician) (he is the most dependable of our friends) (a dependable source of information) Dependable is also used merely as a descriptive term implying a character that is predictable or that is the antithesis of what is fickle or capricious (Laura wasn't pretty, but . . . healthy-looking and dependable—Mary Austin) A person or occasionally a thing is trustworthy that merits or has earned one's complete confidence in his or its soundness, integrity, veracity, discretion, or reliability (a trustworthy confidant) (a trustworthy witness) (a trustworthy wife) (the most trustworthy comment on the text of the Gospels and the Epistles is to be found in the practice of the primitive Christians-Macaulay) Trusty applies to a person or thing that has been found by experience to be reliable and trustworthy (a trusty guide) (a trusty servant) or that has been found never to have failed one in need or in an emergency or that has been found dependable whenever needed (his trusty sword—Spenser) (he wrapped the trusty garment about him—Cather) Tried also stresses proved reliability, dependability, trustworthiness, or trustiness (a tried and true friend) (a tried remedy) (a tried soldier) (his tried expedients—Bagehot) Ana *safe, secure: *infallible, inerrable, inerrant, unerring: cogent, *valid, sound, convincing, compelling, telling
Ant dubious —Con *doubtful, problematic, questionable
reliance *trust, confidence, dependence, faith
Ana credence, credit, *belief, faith: assurance, conviction, certitude, *certainty
relieve, alleviate, lighten, assuage, mitigate, allay are comparable when they mean to make something tolerable or less grievous. Though they are often used interchangeably, they are clearly distinguishable. Relieve implies

religion

677

relinquish

a lifting of enough of a burden to make it definitely endurable or temporarily forgotten<br>drugs that relieve pain<br>taking steps to control the fire and relieve the suffering it entailed—Milner<br>Occasionally relieve, when used in the passive, implies a release from anxiety or fear<br>they were greatly relieved when her letter came<br>Sometimes it suggests a break in monotony or in routine<br>I’ve had some trouble to get them together to relieve the dullness of your incarceration—Meredith<br>Alleviate stresses the temporary or partial nature of the relief and usually implies a contrast with cure and remedy<br>oil of cloves will alleviate a toothache<br>to help alleviate New York’s chronic traffic problem—Current Biol.<br>Lighten implies a reduction in the weight of what oppresses or depresses; it often connotes a cheering or refreshing influence<br>his interest in his work lightened his labors<br>that blessed mood<br>in which the heavy and the weary weight of all this unintelligible world is lightened—Wordsworth<br>Assuage suggests the moderation of violent emotion by influences that soften or mollify or sometimes sweeten<br>the good gods assuage thy wrath—Shak.<br>the life-giving zephyrs that assuage the torment of the summer heat—Cloete<br>Mitigate suggests a general reduction in the force, violence, or intensity of something painful; it does not, as assuage does, imply something endured but something inflicting or likely to inflict pain<br>mitigate the barbarity of the criminal law—Inge<br>group friction and conflict are generally mitigated when people realize their common interests—Cohen<br>Allay, though it seldom implies complete release from what distresses or disquiets, does suggest an effective calming or quieting<br>the report allayed their fears<br>his suspicions were allayed<br>these . . . words . . . allayed agitation; they composed, and consequently must make her happier—Austen

Ana<br>Comfort, console, solace: moderate, qualify, temper: diminish, reduce, lessen, decrease

Ant<br>Intensify: embarrass: alarm

religion, denomination, sect, cult, communion, faith, creed, persuasion, church can all denote a system of religious belief and worship or the body of persons who accept<br>the beliefs and ritual or to its adherents. It is likely to suggest a great or excessive devotion and a fervent observance by a usually small group of what appear bizarre or spurious or strangely foreign and unseemly rites to persons who follow other beliefs<br>ever since the close of the Punic War foreigners had been thronging to Rome, bringing with them their foreign cults—Buchan<br>the romantic error has been . . . in short, to turn the nature cult into a religion

—Babbitt<br>Communion stresses not difference from others but union in essentials (as of religious belief and discipline); the term can apply not only to a large body<br>the Roman Catholic communion but to one comprising several smaller bodies or organizations (as national churches) which exhibit such union<br>the Anglican communion includes all who are united with the Church of England in matters of faith and order) or to small sects and cults isolated by their special beliefs or practices.

Faith and creed apply to a system of belief and worship that is clearly formulated and definitely accepted<br>men of all faiths were present<br>creeds are often a cause of division

Persuasion may suggest the conviction produced by evangelism and exhortation; it is frequently equivalent to faith or denomination. Church usually has implications that closely relate it to denomination. Distinctively it suggests a clearly defined character, both as a system of beliefs or as a body of persons, and often carries a stronger connotation of organization than denomination carries; it may imply specifically Christian as contrasted with non-Christian worship (to what church does he belong?)<some churches that forbade dancing now countenance it)

religious adj 1 devout, pious, pietistic, sanctimonious<br> devoted, staunch, steadfast, true: virtuous, righteous, noble.<br>faithful, moral, ethical: upright, just, honorable, honest<br>irreligious—Con ungodly, godless (see irreligious)

2 spiritual, holy, sacred, divine, blessed

Ant secular (of schools, journals, authorities): profane (of music, drama)

Religious, monk, friar, nun all mean a member of a religious order whose members are bound by the monastic vows of poverty, chastity, and obedience who lead to a greater or lesser extent a cloistered life. Religious is the comprehensive term applicable either to a man or a woman; it implies a living apart from the world either in a cloistered community formed of members of the same order or as a hermit (see reclusion) under the governance of the superior of an order. Monk in general use may designate a male religious; in precise technical use the term applies to a member of a religious order for men (as the Benedictine or Cistercian order) whose members live an ascetic life in a cloistered community, and devote themselves mainly to contemplation and prayer and liturgical observances, and to some assigned and usually scholarly, artistic, or scientific employment. Friar applies to a member of a mendicant order under whose original regulations neither personal nor community tenure of property was allowed and whose members lived by alms and wandered from place to place preaching the Gospel and administering the sacraments or to a member of an order patterned after them, whether he lives as a mendicant or in a cloistered community and whether he serves as a pastor, a curate, a missionary, a preacher, or a teacher. Nun applies only to a female religious; since there are no terms to distinguish nuns according to the severity of their discipline, the rigor of their cloistered life, and the nature of their duties, the word is generally applied to any member of a religious order of women who devote themselves to prayer, contemplation, and work, and may wear a habit.

relinquish, yield, leave, resign, surrender, cede, abandon, waive are comparable when they mean to let go from one's control or possession or to give up completely. Relinquish in itself seldom carries any added implication, but it often acquires color from the words with which it is associated or from the character of the thing given up <disinclined to relinquish his command>—Relinquished his...
relish

vb fancy, dote, enjoy, *like, love

Ana appreciate, *understand, comprehend; *approve, endorse, sanction

relishing *palatable, appetizing, savory, sapid, tasty, toothsome, flavorsome

Ana pleasing, gratifying, delighting, relishing, tickling, regaling (see PLEASE)

Con flat, *insipid, jejune, banal, inane

reluctant *disinclined, indisposed, hesitant, loath, averse

Ana *cautious, circumspect, chary, wary, calculating; *antipathetic, unsympathetic

Con inclined, disposed, predisposed (see INCLINE vb); *eager, avid, keen

rely, trust, depend, count, reckon, bank can all mean to have or place full confidence. One relies on or upon some- one or something that one believes will never fail in giving or doing what one wishes or expects. Rely usually connotes a judgment based on previous experience and, in the case of persons, actual association. The relays on his father to help him out of trouble. The relays on the opinions of others. A physician upon whom all his patients rely. Bitter experience soon taught him that lordly patrons are fickle and their favor not to be relied on. One is entitled to one or two men whose personal loyalty he can rely upon. One trusts, or trusts in or to, when one is completely assured or wholly confident that another will not fail one in need.

Trust stresses unquestioning faith which need not be based on actual experience. Take short views, hope for the best, and trust in God. Because he trusted his own individual strength, he was hostile to planning. One depends on or upon someone or something when one, with or without previous experience, rests confidently on him or it for support or assistance.

Depend may connote a lack of self-sufficiency or even weakness; it often implies so strong a belief or so confident an assumption that the hoped-for support or assistance is forthcoming that no provision for the contrary is made. His confidence had prevented his depending on his own judgment. But his reliance on mine made everything easy.

Abandon a group of words discriminated. A colon (:) separates groups of words discriminated. An asterisk (*) indicates place of treatment of each group.
remain

remain *stay, wait, abide, tarry, linger

Ant depart

remainder, residue, residuum, remains, leavings, rest, balance, remnant can all mean what is left after the subtraction or removal of a part. Remainer is the technical term for the result in the arithmetical process of subtraction (subtract 8 from 10 and the remainder is 2). It is otherwise a comprehensive term for things that remain after the others of a collection, assemblage, or stock have been taken away, used up, or accounted for, or for any persons that remain after the others of the group have departed (he spent the remainder of his life in seclusion) (it took a week to eat up the remainder of their Thanksgiving feast) (the remainder of the exploring party turned homeward) Residue and residuum are often interchanged with remainder, but they usually imply whatever may be left of a former whole, often a previously intact whole, after it has been subjected to some process which depletes or diminishes it but does not annihilate it. Both terms, but especially residue, have acquired specific meanings; thus, a testator, after making certain bequests and providing for the payment of all his debts and charges, usually leaves the residue of his estate to a legatee, or to legatees, of his choice; water after evaporation often leaves a residue of mineral material; the residue of something destroyed by burning is called ash or ashes. Residuum is frequently used in place of residue, especially when evaporation or combustion is implied, and it may be preferred to residue when what is left after a process, whether physical or chemical or mental, is such that it cannot be ignored or left out of account or may have value as a product or significance as a result (the residuum of the process by which sugar is extracted from cane is called molasses) (there is always a residuum of air in the lungs after the most forcible expiration possible) (one might say that every fine story must leave in the mind of the sensitive reader an intangible residuum of pleasure—Cather) Remains is chiefly used of what is left after death, decay, decline, disintegration, or consumption; the term is specifically applied to a corpse, to the unpublished works of a dead author, and to the ruins of an ancient civilization (they buried Keats's remains in the Protestant cemetery in Rome) (appointed executor of a friend's literary remains) (the remains of Pompeii) (the remains of a meal) Leavings usually implies that the valuable or useful parts or things have been culled out and used up or taken away or that what is left has been rejected or discarded (how like the leavings of some vast overturned scrap basket—Brooks) Rest is seldom distinguishable from remainder (except in the latter's technical arithmetical sense), and the two are commonly used interchangeably without loss. However it may be preferred to remainder when it means simply the persons or things not previously referred to or mentioned (as in an enumeration or list) and carries no implication of subtraction, deduction, or depletion (England, as well as the rest of Europe, awaited the effect of the ultimatum with anxiety) (only two stories in this book are interesting and the rest are uniformly dull) Balance is sometimes used in the simple sense of remainder or rest (answers will be given in the balance of this chapter—R. W. Murray) But balance is more often found in technical and especially commercial use; thus, in reference to a banking account, balance usually is applied only to the amount left after withdrawals and other charges have been deducted from the deposits and accumulated interest; in a mercantile charge account, balance is usually applied to the amount owed after credits have been deducted from the debits (a balance in the bank is a sum of money to the depositor's credit) (a balance of a bill is an amount still owed by the debtor) (a balance in hand is an amount left when all assets are reckoned after all liabilities have been discharged) Remnant and its plural remnants are applied to a remainder that is small in size or numbers or that represents only an insignificant part or piece left from a former whole (the remnant of a once powerful army) (a sale of remnants of cloth) (living in Santa Fe on the remnants of the family fortune—Mary Austin) (sleeping bits of woodlands—remnants of the great forests in which Tom had worked as a boy—Anderson) remains leavings, residue, *remainder, residuum, rest, balance, remnant

remark vb 1 notice, note, observe, perceive, discern, *see, behold, descry, espys, view, survey, contemplate 2 Remark, comment, commentate, animadvert are comparable when they mean to make observations or to pass judgment but they diverge in their implications regarding the motive and the nature of these observations and judgments. Remark usually implies little more than a desire to call attention to something (a bore remarks upon everything he sees) (a metropolitan newspaper remarked that no one today hopes for progress—Bierstedt) Comment stresses interpretation (as by bringing out what is not apparent or by adding details that help to clarify) (the dramatic reader frequently interrupted his performance to comment upon a scene) (neither could be induced to make an oral report on his country or to comment during general discussions—Boesen) Occasionally the word carries some hint of the unfavorable interpretation that is often a feature of the related noun (we cannot help commenting on a certain meaning of culture—T. S. Eliot) Commentate is sometimes used as a substitute for comment to suggest a purely expository or interpretative intent (commentating upon and collating of the works of former times—H. E. Cushman) (emerged from routine commenting to dramatic . . . reporting and interpreting—Life) but the verb is less frequently used than its agent noun, commentator (radio commentators on the news of the day) Animadver (compare animadversion) implies a remarking or commenting on something that may be based on careful judgment (I went to an old-fashioned school. All those who wish to animadver on education ought to be able to begin that way—Calisher) but this basic implication is often obscured by an emphasis on passing an adverse judgment (we talked of gaming, and animadverted on it with severity—Boswell)

remark n Remark, observation, comment, commentary, note, obiter dictum can all denote a brief expression intended to enlighten, clarify, or express an opinion. A remark is a more or less casual expression in speech or writing of an opinion or judgment (as of something seen in passing, something read for the first time, or something to which one's attention has been called); the term usually carries no implication of a final or considered judgment (comments I have to make . . . on the man . . . Brief remarks, absolutely not exhaustive—Mallier) (had a genius for remembering the most telltale gestures as well as the least self-revealing remarks . . . of his master—Krutch) Observation may suggest a reasoned judgment based on more or less careful scrutiny of the evidence (the apparently was impressed by my observation that disease had made it largely impossible for Indians to smile—Heiser) (intimate letters . . . even when containing valuable critical observations, should not be published in the same volume as achieved works—Wyndham Lewis)

rememba...
own recent experience—Menchken—\{I will permit my memory to recall the vision of you, by all my dreams attended—Millay\} But recall may imply, as recollect does not, an agent or an agency other than oneself, and in such use suggests the awaking or evocation of a memory \(\text{forty years later Mr. Wilson recalled this circumstance to my memory—Replier}\) \{that tree always awakened pleasant memories, recalling a garden in the south of France where he used to visit young cousins—Cather\} Remind implies the evocation of something forgotten, or not at the time in one’s mind, by some compelling power or agent. Often also it strongly implies a jogging of one’s memory. Usually the agent or agency is someone or something external that causes one to remember \(he reminded me of my promise\) \{this incident reminded him of another and similar one\} \{he reminded himself that he had made an appointment for eight o’clock\} \{he found it necessary to keep on reminding himself that the time was short and the work must be finished according to schedule\} Reminiscise can imply the process of recollecting or of recalling something \{how do people remember anything? How do they reminisce?—Lang\} but often it suggests a nostalgic dredging up and retelling of events and circumstances of one’s past life \{well, anyhow, we old fellows can reminisce—Garland\} \{he cut me short to reminisce of his schoolmates—Hervey Allen\} Bethink, a commonly reflexive verb little used today, can distinctly imply recollection or recalling after reflection or a reminding oneself by thinking back \{I have behought me of another fault—Shak.\} \{to be-think themselves how little they may owe to their own merit—Helps\} Mind \{see also TEND\} in the sense of remember is sometimes chosen to convey a dialectal feeling of simplicity or quaintness \{I mind him coming down the street—Tennyson\} \{the lads you leave will mind you till Ludlow tower shall fall—Housman\} \{I can mind her well as a nursing mother—a comely woman in her day—Quiller-Couch\} Ant forget—Con ignore, disregard, *neglect, overlook

remembrance 1 *memory, recollection, reminiscence, mind, souvenir

remembrance 2 Remembrance, remembrancer, reminder, memorial, memento, token, keepsake, souvenir denote something that serves to keep a person or thing in mind. Remem-brance and the less common remembrancer are applied to an object which causes one to call back to mind someone or something, especially someone dead or far away or an event or occurrence of the past, often the distant past \{I desire your acceptance of a ring, a small remembrancer of my father—Housman\} \{he had made an appointment for eight o’clock\} \{he found it necessary to keep on reminding himself that the time was short and the work must be finished according to schedule\} Reminiscence can imply the process of recollecting or of recalling something \{how do people remember anything? How do they reminisce?—Lang\} but often it suggests a nostalgic dredging up and retelling of events and circumstances of one’s past life \{well, anyhow, we old fellows can reminisce—Garland\} \{he cut me short to reminisce of his schoolmates—Hervey Allen\} Bethink, a commonly reflexive verb little used today, can distinctly imply recollection or recalling after reflection or a reminding oneself by thinking back \{I have behought me of another fault—Shak.\} \{to be-think themselves how little they may owe to their own merit—Helps\} Mind \{see also TEND\} in the sense of remember is sometimes chosen to convey a dialectal feeling of simplicity or quaintness \{I mind him coming down the street—Tennyson\} \{the lads you leave will mind you till Ludlow tower shall fall—Housman\} \{I can mind her well as a nursing mother—a comely woman in her day—Quiller-Couch\} Ant forget—Con ignore, disregard, *neglect, overlook

remembrance 1 *memory, recollection, reminiscence, mind, souvenir

remembrance 2 Remembrance, remembrancer, reminder, memorial, memento, token, keepsake, souvenir denote something that serves to keep a person or thing in mind. Remem-brance and the less common remembrancer are applied to an object which causes one to call back to mind someone or something, especially someone dead or far away or an event or occurrence of the past, often the distant past \{I desire your acceptance of a ring, a small remembrancer of my father—Housman\} \{he had made an appointment for eight o’clock\} \{he found it necessary to keep on reminding himself that the time was short and the work must be finished according to schedule\} Reminiscence can imply the process of recollecting or of recalling something \{how do people remember anything? How do they reminisce?—Lang\} but often it suggests a nostalgic dredging up and retelling of events and circumstances of one’s past life \{well, anyhow, we old fellows can reminisce—Garland\} \{he cut me short to reminisce of his schoolmates—Hervey Allen\} Bethink, a commonly reflexive verb little used today, can distinctly imply recollection or recalling after reflection or a reminding oneself by thinking back \{I have behought me of another fault—Shak.\} \{to be-think themselves how little they may owe to their own merit—Helps\} Mind \{see also TEND\} in the sense of remember is sometimes chosen to convey a dialectal feeling of simplicity or quaintness \{I mind him coming down the street—Tennyson\} \{the lads you leave will mind you till Ludlow tower shall fall—Housman\} \{I can mind her well as a nursing mother—a comely woman in her day—Quiller-Couch\} Ant forget—Con ignore, disregard, *neglect, overlook
renew, *renovate, *redecorate, *refurbish, rejuvenate: comparable when they mean to give a person or thing that has become old, worn, or exhausted the qualities or a remaking so that it seems like new or fresh or young. Renew implies the supplying of something necessary to restore lost strength, animation, or power (sleep refreshes both body and mind) or to make up for what has been lost through forgetfulness or disuse (he made it his business to see Dr. Lavendar, and be refreshed as to facts—Deland). Equally often the term implies the imparting of freshness to something by or as if by cooling, wetting, or allaying thirst; it then usually connotes an enlivening, invigorating, or exhilarating effect (the springs... under the earth... break forth to refresh and gladden the life of flowers and the life of man—Binyon) (it refreshes me to find a woman so charmingly direct—Bromfield). Renovate and refurbish differ from the preceding terms chiefly in being referred almost exclusively to material things and as a consequence in not having the poetic connotations so often found in renew, restore, and refresh. Renovate is often used in place of renew when cleansing, repairing, or rebuilding is implied (renovate an old colonial house) (drawn into a sequence of violent episodes that cause him to renovate his attitudes toward life and death—Martin Levin) while refurbish implies the restoration of newness or freshness by or as if by scouring or polishing and suggests here little more than a freshening up of the appearance or the external aspects of a thing (refurbish an old table by sandpapering and waxing it) and therefore occasionally is used in depreciation (hoped to reform national conduct... by reforming our vocabulary... but it does seem a good bit to achieve with nothing more tangible than a refurbished vocabulary—Laird) (the refurbishing of trite thoughts is the sole accomplishment of many would-be poets). Rejuvenate implies a restoration of youthful vigor, powers, appearance, or activities; sometimes it merely suggests giving a youthful aspect to something old (he... had the air of an old bachelor trying to rejuvenate himself—Irving) (outworn themes may be rejuvenated by taking on contemporary garb—Lowes). *Ana *mend, repair, rebuild: reform, revise, rectify, correct

Con exhaust, *deplete, drain, impoverish, bankrupt

renunciation 1 *abdicate, resign

Ana sacrifice, abnegate, *forgo, forbear, eschew

Ant arrogance: covet (sense 2)—Con usurp, preempt, appropriate (see ARROGATE)

2 *abjure, forswear, recant, retract

Ana reject, repudiate, spurn (see DECLINE vb): *forgo, forbear, eschew

Ant confess: claim

renovate refurbish, rejuvenate, *renew, restore, refresh

Ana *mend, repair, patch: *clean, cleanse

renew *name, honor, glory, celebrity, reputation, repute, notoriety, éclat

Ana prestige, authority, *influence, weight, credit

Con contempt, despite, disdain, scorn (see under DE-)

spise: disrepute, *disgrace, dishonor, obloquy

renowned *famous, famed, celebrated, eminent, illustrious

Ana praised, acclaimed, lauded, extolled (see PRAISE): outstanding, signal, prominent (see NOTICEABLE)

rent vb *hire, let, lease, charter

rent nbreach, break, split, schism, rupture, rift

Ana separation, severance, division (see corresponding verbs at SEPARATE): tearing or tear, cleaving or cleavage (see corresponding verbs at TEAR): interruption, gap, hiatus (see BREAK)

renunciation, abnegation, self-abnegation, self-denial can all mean voluntary surrender or putting aside of something desired or desirable. Renunciation (see also under renounce at ABDICATE) commonly connotes personal sacrifice for a higher end (as the good of others, or moral

A colon (:) separates groups of words discriminated. An asterisk (*) indicates place of treatment of each group.
repair

683

replace

discipline, or the attainment of the highest good) <she had learnt the lesson of renunciation, and was as familiar with the wreck of each day's wishes as with the diurnal setting of the sun—Hardy> Historically abnegation is scarcely distinguishable from self-abnegation, although the trend is toward preference for the latter or its equivalent abnegation of self. Both words more often denote a quality of character than an act, and both imply a high degree of unselfishness or a capacity for putting aside all personal interests or desires <individuals who are willing to abandon the pleasures of the world for lepers are rare, but, when found, usually exhibit complete abnegation of self—Heiser> <his self-abnegation prevented him from taking credit for the victory—Patrick> Self-denial, unlike abnegation, is usually applied to an act or a practice. Though it means denial of oneself or forbearance from gratifying one's own desires, it does not necessarily connote nobility in the act, its motive, or its end and is therefore applicable to a larger range of instances than either abnegation or renunciation <her still face, with the mouth closed tight from suffering and disillusion and self-denial—D. H. Lawrence>

Ana sacrificing or sacrifice, forgiving, forbearing, eschewing (see FORGO)

repair vb mend, patch, rebuild

Ana remedy, redress, amend, emend, rectify, correct; *renew, renovate, refurbish, restore

reparation, redress, amends, restitution, indemnity are comparable when they mean a return for something lost or suffered, usually through the fault of another. Reparation implies an attempt to restore things to their normal or sound condition. It is chiefly applied to recompense for material losses or damages or reimbursement for repairs <wishes that my father's present flood damages), but it is applied also to atonement for an offense, especially one incurring injury to others <educated . . . at royal expense as reparation for the death of his father—Nixon> <I am sensible of the scandal I have given by my loose writings, and make what reparation I am able—Dryden> Redress heightens the implications of a grievance and therefore connotes compensation or satisfaction, or even, at times, retaliation or vengeance <victims of the swindle sought redress in the courts> <redress is always to be had against oppression, by punishing the immediate agents—Johnson> <the civil law by which contracts are enforced, and redress given for slanders and injuries—Shaw> <particular grievances call not only for redress, but also for the formulation of universally valid reasons why they should be redressed—Huxley> Amends is as strong as redress in its suggestion of due satisfaction but weaker in its implication of a grievance. It often implies a correction or restoration of a just balance (if I did take the kingdom from your sons, to make amends, I'll give it to your daughter—Shak.). <love, freedom, comrades, surely make amends for all these thorns through which we walk to death—Masefield> Restitution implies the restoration in kind or in value of what has been unlawfully taken <a restitution of civil rights> <expressing willingness to offer restitution to those Jews who had been robbed . . . by the Third Reich—Hirsch> indemnity is the specific term for money given (as by an insurance company) in reparation for losses (as from fire, accident, illness, or disaster) or for payments made by a defeated country for losses caused by war <an attempt to make palatable to the country what . . . amounts to imposing a war indemnity upon it—Schumpeter>

Ana expiation, atonement (see under EXPIATE): compensation, remuneration, recompense or recom pense (see corresponding verbs at PAY)

repartee *wit, humor, irony, sarcasm, satire

Ana retort, rejoinder, response (see under ANSWER vb); *badinage, persiflage, raillery

repay *pay, compensate, remunerate, recompense, satisfy, reimburse, indemnify

Ana balance, offset, *compensate: accord, award (see GRANT vb)

repeat vb *revoke, reverse, rescind, recall

Ana abrogate, *annul, void: cancel, expunge (see ERASE)

repeat vb 1 Repeat, iterate, reiterate, ingeminate can all mean to say again. Repeat, the word in ordinary use, may apply to what is said or uttered or done again, whether once or many or an indefinite number of times <repeat a command> <the teacher repeated her question not once but three times> <wondered what would have happened if he had repeated his earlier tantrum—Purdy> <repeat an attempt to swim the river> <repeat a step in a process> <wish to repeat a pleasant experience> Repeat sometimes implies a change in the speaker or doer <please do not repeat what I have told you> <the teacher asked the children to repeat the verses after her> <falsehoods and half-truths . . . uncritically repeated from writer to writer—Alcock> Iterate usually implies one repetition after another, especially of something that is said <the bird in the dust iterating, iterating, his one phrase—Aiken>

There is very little difference between iterate and reiterate, except that iterate occasionally refers to a second saying or uttering or sometimes doing and reiterate carries an even more emphatic implication of manifold repetitions; consequently the two words are often used together when insistence is implied <scientific research iterates and reiterates one moral . . . the greatness of little things—Sat. Review (London)> When only one term is desired to make this point, reiterate is especially appropriate <over and over again, in a somber, bullfrog voice, he reiterates his favorite theme—Armbrister> Ingeminate, a somewhat uncommon term, implies reiteration for special emphasis or impressiveness. It therefore seldom implies indefinite repetition but rather duplication or triplication for the sake of the effect produced <that peace-loving habit of mind . . . which made so many nations, in the years before 1939, ingeminate “Peace” when there was no peace—Ernest Barker> <“He was the tramp,” he ingeminated. “He was the tramp.”—Buchan>

Ana *return, recur, revert, recrudesce: rehearse, recite, recount, *relate

2 *quote, cite

repellent *repugnant, abhorrent, distasteful, obnoxious, invidious

Ana *offensive, loathsome, repulsive, revolting

Ant attractive: pleasing —Con alluring, charming, captivating, bewitching (see under ATTRACTION): enticing, seductive, tempting, luring (see corresponding verbs at LURE)

repetance *penitenice, contrition, attrition, remorse, compunction

Ana regret, sorrow, grief

Con complacency, self-complacency, self-satisfaction (see corresponding adjectives at COMPLACENT)

repercuss reverberate, recoil, *rebound, resile

replace, displace, supplant, supersede are rarely interchangeable terms, but they can carry the same basic meaning—to put a person or thing out of his or its place or into the place of another. Replace implies supplying a substitute for what has been lost, destroyed, used up, worn out, or dismissed (a broken toy should not be immediately replaced if it has been broken by the child's carelessness—Russell) replace a servant> <constant flow of conversation from dawn till dark . . . only to be re-
placed by a night shift of resounding snores—Theodore Sturgeon or it may imply a preferring of one of two or more things that could satisfy a need (nor would I admit that the human actor can be replaced by a marionette— T. S. Eliot) and sometimes it implies a putting back into a proper or assigned place (replace a book on a shelf) (the guard soon replaced his blunderbuss in his arm- chest—Dickens) Displace implies a dislodging, outing, or putting or crowding out followed by a replacing. This dual implication of putting out of place and of replacing is the chief distinction of displace in contrast with replace (the weight of water displaced by a floating body is equal to that of the displacing body) However one of these ideas is sometimes stressed more than the other so that the emphasis is either on outing (American democracy was the response to challenge of Europeans displaced to a continental wilderness and cut loose from many ancient ties—Dorothy Thompson) or on replacing (as he became more conscious of the bar accounts, of the kitchen expenses, the benevolence was displaced by calculation—Gorer) Supplant basically implies a displacing or occupying by craft, fraud, or treachery and a taking or usurping of the place, possessions, or privileges of the one dispossessed or ousted (you three from Milan did supplant good Prospero—Shak) (the pretty young wife finds herself in the humiliating position of having been supplaned by a brisk, unlovely woman—Bullett) (eager to succeed Louis and even to supplant him—Bellocc) But supplant sometimes implies an uprooting and replacing rather than a dispossessing and usurping, in such cases trickery or treachery is no longer implied (his tutor tried to supplant his fears by arousing his sense of curiosity) (don’t claim that the Divine revelation has been supplaned . . . but that it has been amplified—Mackenzie) (the architect, to serve the vogue, uproots and displaces stone thirty stories high on stilts, supplanting walls of stone with sheets of glass—Hillyer) Supersede implies a causing of another to be set aside, abandoned, or rejected as inferior, no longer of use or value, or obsolete (the old-fashioned fishing luggers with their varicolored sails have been superseded by motorboats—Amer. Guide Series: La.) (the worst is the erudition—that the next scholar sucks the few drops of honey that you have accumulated, sets right your blunders, and you are superseded—Benson) Ana restore, *renew: *change, alter: *recover, regain, recoup, retrieve replete *full, complete, plenary Ana abundant, *plentiful: sated, satiated, surfeited (see SATIATE) replica facsimile, *reproduction, duplicate, copy, carbon copy, transcript reply vb *answer, respond, rejoinder, retort Con *ask, question, interrogate, query, inquire, cate chize, examine: *accuse, charge, impeach, indict: salute, greet, *address reply n answer, response, rejoinder, retort (see under ANSWER vb 1) Ana acknowledgment, recognition (see corresponding verbs at ACKNOWLEDGE) Con asking requesting or request, solicitation (see corresponding verbs at Ask) (see corresponding verbs at ACCUSE): *argument, dispute: *greeting, salute report n 1 Report, rumor, gossip, hearsay are comparable when they mean common talk or an instance of it that spreads rapidly. Report is the most general and least explicit of these terms; it need not imply an authentic basis for the common talk, but it often suggests some ground for the belief unless specifically qualified (as by false, untrue, or wild) (my brother Jaques he keeps at school and report speaks goldenly of his profit—Shak) (denies the common report that he ghosted the whole document—Bliven b.1889) (spread a false report) Rumor applies to a report that flies about, often gains in detail as it spreads, but lacks both an evident source and clear-cut evidence of its truth (almost every newspaper issue brought rumors of reduction in their salaries—Heiser) (we make our blunders . . . as rumor has it that you make your own—Cardozo) Gossip applies to idle talk, chiefly about personal affairs and behavior, that is the source of or means of promoting rumors or reports, and is sometimes used in the sense of a rumor or report (neighborhood gossip) (my presence killed the gossip on her tongue—Barrie) (gossip about the party leader and his beautiful blond niece was inevitable—Shirer) (this girl’s . . . intimate gossip about well-known people—Wouk) Hearsay carries a strong implication of the means by which a report or rumor comes to one, that is, by hearing rather than by seeing or knowing directly (the qualifications and doubts that distinguish critical science from hearsay knowledge—Cohen) It is sometimes extended to a report or rumor based upon such hearsay (the hearsays bandied about by the medievalists—Behrman) Ana talking or talk, conversing or conversation, speaking or speech (see corresponding verbs at SPEAK): chatting, chattering or chatter, prating (see CHAT): *news, tidings, intelligence, advice 2 *account, story, chronicle, version 3 dispatch, message, note, *letter, epistle, missive, memorandum report vb *relate, narrate, describe, state, recite, recount, rehearse Ana *communicate, impart: *reveal, disclose, discover, tell, divulge repose n 1 rest, relaxation, leisure, ease, comfort Ana calmness, tranquillity, serenity, placidity, peacefulness (see corresponding adjectives at calm): refreshment, restoration, renewal (see corresponding verbs at renew) Con *work, labor, toil, grind, drudgery: *stress, strain: agitation, perturbation, discomfort (see corresponding verbs at DISCOMPOSE) reprehend *criticize, censure, reprobate, condemn, denounce, blame Ana *reprove, rebuke, reprimand, admonish, reproach, chide: *scold, upbraid, berate, rate represent, depict, portray, delineate, picture, limn can mean to present an image or lifelike imitation of (as in art). Represent implies a placing before the mind as if real or as if living through the medium of one of the arts (as painting, sculpture, or literature); the term may imply either a presentation of reality or of imagined reality or a treatment of an abstraction or a spiritual being in terms of real things (the painting represents a spring scene) (the Holy Ghost is represented as a dove in the Pentecostal window) (there are several classic procedures for representing visual images by means of music—Virgil Thomson) (paintings . . . to produce a specific aesthetic sensation rather than merely to represent nature—Current Biol.) Depict, primarily meaning to represent in terms of painting, may stress the implication of graphic, vivid representation more than the form of art employed; it is applied to such arts as literature or drawing which suggest color and detail in some other way than by pigments (painters are sometimes accused of calling upon their imagination when they are really depicting fact—Jeffries) (a novelist noted especially for his skill in depicting character) (drama may be achieved by action
as well as by speech. Action can tell a story . . . and depict every kind of human emotion, without the aid of a word—Justice Holmes) Portray suggests the making of a detailed representation of individual persons, or of specific characters, emotions, or qualities (as by drawing, engraving, painting, acting, or describing) (in literature they are portrayed all human passions, desires, and aspirations—Elliot) (a star who unquestionably conveyed to audiences the very essence of the character he was portraying—J. F. Wharton) Delineate (see also SKETCH) basically implies representation by an art (as engraving or drawing) that uses lines to gain its effects, but, like portray, it is often used to stress care for accuracy of detail and fullness of outline (his brush did its work with a steady and sure stroke that indicated command of his materials. He could delineate whatever he elected with technical skill—Jeffries) Picture less than any of these terms implies the employment of a particular art; it emphasizes the ability to realize a thing in a pictorial or vivid way and may either imply graphic description (of those villages Mark Twain . . . has pictured for us—Brooks) or sensible representation in any form (her emotions are all pictured in her face) or, sometimes with "to oneself," mere imaginative power (the girl was in his mind a lot . . . he had always had a good imagination. He pictured her as she came down the stairs in the morning—Malamud) (they tried, in their sympathetic grief, to picture to themselves all that she had been through in her life—Bennett) Limn is used chiefly as an equivalent of depict or delineate, often implying the art of painting vividly and with color (since not every ancestral likeness had been limned by the brush of a maestro, dignity . . . sometimes seemed merely bovine—Warren) (had too much taste to bare all these grubby secret details, but she limned a general picture for him—Stafford)

Ana exhibit, display, *show: *suggest, hint: *sketch, outline, draft, delineate: describe, narrate, *relate

representative n *delegate, deputy

repress *suppress

reprimand vb *reprove, rebuke, reproach, admonish, chide

reproach vb chide, admonish, *reprove, rebuke, reprimand

reprehend vb (see CONQUER)

reproach adj *abandoned, profligate, dissolve

reproduction, duplicate, copy, carbon copy, facsimile, replica, transcript are comparable when they mean one thing which closely or essentially resembles something that has already been made, produced, or written. Reproduction may imply identity in material or substance, in size, and in quality, or it may imply differences, provided that the imitation gives a fairly true likeness of the original; thus, a reproduction of an Elizabethan theater may be on a very small scale; a reproduction of a Sheraton chair may be in cherry rather than in the mahogany of the original (the present director, on tour in Western Canada, discovered the need for reproductions of Canadian pictures—Report on Nat'l Development (Ottawa)) (the late works look finer in reproduction than they do in the original—Kitson) A duplicate is a double of something else: the word may be used of something that exactly corresponds to or is the counterpart of any object thatsoever (a duplicate of a bill of sale) (this postage stamp is a duplicate of one in my collection) (make out a receipt in duplicate) (plans a movie of the salvage operations, and will sail a duplicate vessel on the course taken—Current Biog.) A copy is a reproduction of something else, often without the exact correspondence which belongs to a duplicate; however copy, rather than duplicate (which logically implies that there is but a single reproduction), is applicable to any one of a number of things printed from the same type format, struck off from the same die, or made in the same mold (a thousand copies of a magazine) (production costs of popular records vary, of course, but a sales figure of sixty thousand copies is the . . . break-even point—Robert Rice) (modern copies of sixteenth-century chess sets—New Yorker) (mimeographed copies of a letter) Carbon copy stresses the idea of exactness found in duplicate (the full moon rising like an immense red carbon copy of the earth seen from a distance—Peggy Bennett) (the civilians . . . seem well-content to let our foreign policy be a carbon copy of the strategy worked out by the military—Atlantic) A facsimile is a close but usually not exact reproduction; the term may imply differences (as in scale) but it implies as close an imitating in details and material as possible or feasible (the heavy chandeliers were loaded with flattened brass balls, magnified facsimiles of which crowned the uprights of the . . . massively-framed chairs—Shaw) (a screen cast . . . presses hard for emotional impact. What results is less a facsimile than a parody of the original—Hatch) (looking for an intellectual equal, or at least the facsimile of an intellectual equal—Mailer) Replica applies specifically to an exact reproduction of a statue, a painting, or a building made by or under the direction of the same artist, architect, or artisan; thus, one does not speak accurately of a modern replica of the Winged Victory, but of a modern reproduction; one may speak of the confusing tendency of some Renaissance artists to make replicas of their paintings. However the word is often used merely to emphasize very close likeness (collection of miniature sports cars. Tiny, Swiss-made replicas, they were precision machined and finely detailed, all scaled to perfection—Terry Southern) Transcript applies only to a written, typed, or printed copy made directly from an original or from shorthand notes (a stenographer's transcript of a letter) (ask for a transcript of a will)

reprove, rebuke, reprimand, admonish, reproach, chide can all mean to criticize adversely, especially in order to warn of or to correct a fault. To reprove is to blame or censure, often kindly or without harshness and usually in the hope of correcting the fault (his voice sounded so bright and cheerful . . . that she could not find it in her
heart to reprove him—Rölvaag> Rebuke implies sharp or stern reproof <he could not evade the persistent conviction that she was the Church speaking, rebuking him—Hervey> Reprimand suggests reproof that is formal, and often public or official <a word ... which the Duke of Wellington, or Admiral Stopford, would use in reprimanding an officer—Macaulay> Admonish stresses the implication of warning or counsel <count him not as an enemy, but admonish him as a brother—2 Thess 3:15> <a highly sensitive dog, and cannot bear reproof. Perhaps this is because he is not admonished sufficiently at home—Littell> Reproach and chide imply dissatisfaction or displeasure; reproach usually connotes criticism or faultfinding; chide implies mild reproof or a slight scolding <if he came home late, and she reproached him, he frowned and turned on her in an overbearing way—D. H. Lawrence> (it is not fitting for men of dignity to threaten and reproach because women have had a falling out—Shirley Jackson> <the gentle irony with which he chides the overzealousness of modern critics—Joseph Frank> Ana *criticize, reprehend, censure, reprobrate: chasten, correct, discipline, *punish

repudiate 1 spurn, reject, refuse, *decline Ana renounce, *abjure: *forgo, forbear, eschew, sacrifice Ant adopt — Con *acknowledge, own, admit, avow, confess: embrace, espouse (see ADOPT) 2 *disclaim, disavow, disown, disallow Ana *abandon, desert, forsake: *discard, cast Ant own — Con *acknowledge, admit, avow, confess: *grant, concede, allow

repugnant 1 Repugnant, repellent, abhorrent, distasteful, obnoxious, invidious are comparable when they mean so alien or unlikable as to arouse antagonism and aversion. Repugnant is applied to something so incompatible with one's ideas, principles, or tastes as to stir up resistance and loathing <soon the pressures of male eyes, eyes expressing sex ... became repugnant to her—Peggy Bennett> <the nonlegal methods of the magistrates in dispensing judgment, so repugnant to the spirit of the common law—Parrington> Repellent usually implies a forbidding or unlovely character in something that causes one to back away from it <the mediocre was repellent to them; cant and sentiment made them sick—Rose Macaulay> <what he does say is that hanging is barbarous and sickening, that electrocution and the gas chamber are no less brutal and repellent—Rover> Abhorrent (see also HATEFUL) is applied to something that is incapable of association or existence with something else, and it often implies profound antagonism <dictatorial methods abhorrent to American ways of thinking—Forum> Distasteful is applied to something that one instinctively shrinks from not because it in itself is necessarily unlikable but because it is contrary to one's particular taste or inclination <even the partition of the world into the animate and the inanimate is distasteful to science, which dislikes any lines that cannot be crossed—Inge> <she felt it to be rude to think of using their personal belongings of ... previous occupants—Kenneth Roberts> Obnoxious is applied to what is so highly objectionable, usually on personal grounds, that one cannot endure the sight or presence of it or him with equanimity <the nation had sunk itself into a state of tacit rebellion against the obnoxious Volstead Law—S. H. Adams> <an opportunity to ... make himself generally obnoxious—Simeon Ford> Invidious is applied to something that cannot be used as (a word) or made (as a distinction) or undertaken (as a task or project) without arousing or creating ill will, envy, or resentment <the invidious word usage—Hume> <what I would urge, therefore, is that no invidious distinction should be made between the Old Learning and the New—J. R. Lowell> <undertake the invidious task of deciding what is to be approved and what is to be condemned—Daniel Jones> Ana foreign, alien, extraneous, *extrinsic: uncongenial, incompatible, incongruous, *inconsonant: *antiathetic, aversive, unsympathetic Ant congenial 2 repellent, revolting, *offensive, loathsome Ana odious, *hateful, abominable, detestable: foul, nasty (see DIRTY): vile, *base, low repulsive repugnant, revolting, *offensive, loathsome Ana repellent, *repugnant, abhorrent, obnoxious Ant alluring, captivating reputation repute, *fame, renown, honor, glory, celebrity, éclat, notoriety Ana credit, weight, *influence, authority, prestige repute n reputation, *fame, renown, celebrity, notoriety, éclat, honor, glory Ana disrepute reputed *supposed, supposititious, suppositional, putative, purported, portended, hypothetical Ana assumed, presumed (see PREASSUME)

request vb *ask, solicit Ana *beg, entreat, beseech, implore, supplicate, impune: appeal, petition, sue, pray (see under PRAYER) require 1 exact, claim, *demand Ana *prescribe, assign, define: warrant, *justify 2 *lack, want, need

requirement, requisite, prerequisite can all mean something that is regarded as necessary to fulfill the purpose or perfection of a thing. Although requirement, the more general term, may be employed in place of requisite, it is the customary term when the idea to be conveyed is of something more or less arbitrarily demanded or expected, especially by those who lay down conditions (as for admission to college, for enlistment in the army or navy, for membership in a church, or for entrance into a course) <college entrance requirements> <a list of requirements for all campers> (action was instituted ... to compel the school board to revoke the oath requirement—Clinton) Requisite is the customary term when the stress is on the idea of something that is indispensable to the end in view, or is necessitated by a thing's nature or essence or is otherwise essential and not arbitrarily demanded <the first requisite of literary or artistic activity, is that it shall be interesting—T. S. Eliot> <the requisites of our present social economy are capital and labor> <intellectual freedom ... is the prime requisite for a free people—Science> Prerequisite differs from requisite only in a stress on the time when something becomes indispensable; it applies specifically to things which must be known, or accomplished, or acquired as preliminaries (as to the study of a subject, the doing of a kind of work, or the attainment of an end) <answered the questions put to him by the Senators as a prerequisite to his confirmation—Current Biog,> <he possesses the prerequisite of an original poem—a percursor unifying, exact and exhilarating—Day Lewis> requisite adj *needful, necessary, indispensable, essential Ana compelled or compulsory, constrained, obliged or obligatory (see corresponding verbs at FORCE): fundamental, *essential, cardinal, vital requisite n *requirement, prerequisite requisite *reciprocate, retaliate, return Ana repay, recompense, compensate (see PAY): *satisfy, content: revenge (see AVENGE)

rescind *revoke, reverse, repeal, recall Ana cancel, expunge, *erase: abrogate, *annul, void

A colon (:) separates groups of words discriminated. An asterisk (*) indicates place of treatment of each group.
**resemblance**  * likeness, similarity, similitude, analogy
**research**  * investigation, inquiry, inquisition, inquest

*Rescue, deliver, redeem, ransom, reclaim, save* are comparable when they mean to free a person or thing from confinement, danger of death or destruction, or a serious evil. One *rescues* a person who is in imminent danger (as of death, of capture, or of assault) by prompt or vigorous action (we are beset with thieves; *rescue* thy mistress—Shak.) *<rescue the crew of a sinking ship>* *<rescue the perishing, care for the dying, snatch them in pity from sin and the grave—Crosby>* Less often one *rescues* a thing that is in danger of destruction, or that has been forcibly seized, by freeing it from danger or from its captors (*diamonds that I rescued from the tarn—Tennyson*) *<a main object of his teaching to rescue the idea of justice from identification with the special interest of the strong—Dickinson>* One delivers a person by setting him free from something (as prison, confinement, suffering, temptation, or embarrassment) *<lead us not into temptation, but deliver us from evil—Mt 6:13>*  *<to deliver mankind from the paralyzing grip of determinism—Inge>* *<the population of Russia had only just been delivered, nominally at least, from servitude—Ellis>* One *redeems* a person from bondage, from captivity, from suffering the consequences of his sin or crime, or a thing from pawn or from neglect, deterioration, or decay by making some commensurate expenditure (as of money, of effort, or of time) *<let me redeem my brothers both from death—Shak.>* *<a plot of land redeemed from the heath, and after long and laborious years brought into cultivation—Hardy>* *<labored for eighty years, redeeming them to Christianity—Norman Douglas>* One *ransoms* a person who has been captured, enslaved, or kidnapped by paying the amount that is demanded by his captor or owner *<he was back in Quebec with a number of Iroquois captives whom he had ransomed—Wyane>* *<ransom>* is often employed in place of *redeem* in religious use, especially in reference to Christ as the Redeemer, when the emphasis is on the price he paid in accepting crucifixion (*his brethren, ransomed with his own dear life—Millon*) One *reclaims* what has become debased, wild, savage, waste, or desert by bringing it back to its former state of usefulness. Specifically one *reclaims* a person who has wandered from rectitude or has become a sinner, a reprobate, or a degenerate when one reforms him or restores him to moral, decent ways of life *<I fear he is not to be reclaimed; there is scarcely a hope that anything in his character or fortunes is repairable now—Dickens>* or one *reclaims* a thing that has been abandoned or neglected when one works with it so that it becomes productive or finds a new use or is made to give up what is still usable in it *<reclaim long-abandoned farms>* *<filled in valleys, diverted creeks and reclaimed swamps—G. R. Gilbert>* *<reclaim discarded wool>* One *<saves also see SAVE 2>*  *<a person when one rescues, delivers, redeems, ransoms, or reclaims him and enables him not only to be free from the evil that involves or threatens but to continue in existence, to enjoy security or happiness, or to be of future use or service>* *<his life was saved by an operation>* *<the lifeguard saved him from drowning>* *<the book he had written himself, the Navigator, had saved countless lives—Brooks>* *<Ana>* *<free, release, liberate, emancipate, manumit: preserve, conserve (see SAVE): extricate, disentangle, disembarrass>*

**research**  * investigation, inquiry, inquisition, inquest

*Resemblance*  * likeness, similarity, similitude, analogy, affinity

*<correspondence, agreement, harmonizing or harmony, conformity (see corresponding verbs at AGREE)>*

*<comparison, parallel>*

---

**reside**  * live, dwell, sojourn, lodge, stay, put up, stop can all mean to abide in a particular place as one's habitation or domicile. *Reside* and *live* express this idea, often without further implications. Usually, however, when the term is intended to suggest the fixed, settled, or legal abode of a person or group such as a family, *reside* is the more appropriate word; when the idea to be emphasized is the spending of one's time in a given place and the carrying on of the normal activities of one's way of life, *live* is more explicit (*the senator resides in San Francisco but he lives for the better part of the year in Washington*) When the reference is not to persons but to things, *reside* is the term to be used when the thing referred to is a dwelling, an appurtenance, or a condition *<the power of decision resides in the electorate>* *<his peculiar merit as a critic and . . . resided in the combination of this personal gusto and curiosity—T. S. Eliot>* *<when we have in our minds the idea of art as imitation, we are prone to think of beauty as residing in particular objects, particular colors—Binyon>* When the thing is something concrete and the idea of making one's abode or home is suggested, *live* may be used *<they say that sherry ought to live for a while in an old brandy-cask, so as to contract a certain convincing quality from the cask's genial timbers—Montague>* *<Dwell>* is a close synonym of these words (*more people than he could count (and yet, he thought, less than had dwelled in his own town)—Forester*) but it is more frequently found in elevated language (she dwelt among the untrodden ways beside the springs of Dove— *Wordsworth*) In extended use *dwell* carries a stronger implication of abiding (as in thought or in spirit) (*the bad poet dwells partly in a world of objects and partly in a world of words, and he never can get them to fit—T. S. Eliot)* *<these men had dwelt so long in that weariness they called success—R. H. Newman>* *<sojourn>* differs from the preceding terms in usually implying a temporary habitation or abode or a more or less uncertain place or way of living (*for what purpose, it may be asked, was the world created, and immortal spirits sent to sojourn in it—Inge>*  *<Lodge>* (see also *HARBOR*) also implies an abode for a time or for the time being; it typically also implies having restricted accommodations (as in a hotel or rooming house) often without meals (*the lodges at the Y.M.C.A. when he is in town>* *<a convenience to me as well as to him if he would lodge on the cot in the spare room—Davis>* *<stay>* is the term commonly used in language in place of *sojourn* and often of *lodge* (*he is staying at Miami Beach for the winter>* *<whenever he was in Paris he stayed at that hotel>*  *<Put up is also a common equivalent for lodge>*
and usually suggests the status of a guest either in a hotel or in a private home (two seasons ago I put up at a farmhouse—T. H. White) (where does he put up when he is in Chicago?) Stop, which is often used in the sense of stay (he is stopping at the largest hotel in the city) often specifically implies the breaking of a trip or journey by a short stay (where shall we stop for the night?)

Ana remain, abide (see stay): *continue, endure

residence *habitation, dwelling, abode, domicile, home, house

resident n *inhabitant, denizen, citizen

residue residuum, remains, leavings, *remainder, rest, balance, remnant

residuum residue, *remainder, remains, leavings, rest, balance, remnant

resign 1 yield, surrender, leave, abandon, *relinquish, cede, waive

Ana *forgo, eschew, sacrifice, forbear, abnegate: *abjure, renounce, forswear

2 *abdicate, renounce

resignation 1 compliance, acquiescence (see under COMPLY)

Ana submitting or submission, yielding, deferring or deference (see corresponding verbs at yield): meekness, modesty, humbleness or humility, lowliness (see corresponding adjectives at humble)

2 *patience, long-suffering, longanimity, forbearance

Ana endurance, toleration, suffering or sufferance (see corresponding verbs at bear): *fortitude, backbone, pluck

resigned *compliant, acquiescent

Ana submissive, subdued (see tame): reconciled, adjusted, adapted, accommodated, conformed (see adapt)

Ant rebellious

resile recoil, *rebound, reverberate, repercuss

resilient 1 *elastic, springy, flexible, supple

Ana recoiling, resilient, rebounding (see rebound): recovering, regaining, retrieving (see recover)

Con rigid, *stiff, inflexible, tense

2 *elastic, expansive, buoyant, volatile, effervescent

Ana responsive, sympathetic (see tender): *spirited, high-spirited, mettlesome

Ant flaccid

resist, withstand, contest, oppose, fight, combat, conflict, antagonize are comparable when they mean to set one person or thing against another in a hostile or competing way, and they may be roughly distinguished according to the degree to which one of the things or forces takes the initiative against the other. Resist and withstand suggest generally that the initiative lies wholly with the person or force competed against. Resist implies an overt recognition of a hostile or threatening force and a positive effort to counteract it, repel it, or ward it off (the very region which had resisted and finally destroyed the Roman Empire—Malone) (it is hard to resist the thought that metaphor is one of the most important heuristic devices—R. M. Weaver) (resist the pressure of political orthodoxy)

Withstand may suggest a more passive yet often successful resistance in which if nothing is gained, at least nothing is lost (most plants cannot withstand frost) (built to withstand work and worry—Yoder) (having withstood the pressure of her parents—Rose MacAulay)

Contest and oppose suggest a more positive action against a threatening or objectionable force. Contest often stresses the raising of the issue or the bringing into open question of the matter over which there is conflict (the board's power to inspect private welfare agencies was later contested and restricted—Amer. Guide Series: N. Y.) (it is impossible to contest your principle—Meredith)

A colon (:) separates groups of words discriminated. An asterisk (*) indicates place of treatment of each group.
resonant, sonorous, ringing, resounding, vibrant, orotund
