respect

vt.obeisance, deference, reverence [°•](under the new act—Taney) Liable for any of its obligations—John Marshall) One is accountable to someone who, because of something entrusted to him is bound to be called upon to render an account of how that trust has been executed. Accountable is much more positive than responsible or answerable in its suggestion of retributive justice in case of default (if the physicist discovers new sources of energy that may be readily released for destructive purposes, he should not be held accountable for their use—Gauss) (the Russian leaders . . . are not accountable to their people—The Reporter) Amenable and liable especially stress subjection and suggest the contingency rather than the probability or certainty of being called to account. One is amenable, usually to something, whose acts are subject to the control or the censure of a higher authority and who, therefore, is not self-governing or absolute in power (is it to be contended that the heads of departments are not amenable to the laws of their country?—John Marshall) (scholar and teacher alike ranked as clerks . . . only to the rule of the bishop—J. R. Green) One is liable that by the terms of the law may be made answerable in case of default (a surety is liable for the debts of his principal) (the present United States . . . took nothing by succession from the Confederation . . . was not liable for any of its obligations—Taney) Liable does not, however, always imply answerability. **rest n**  Rest, repose, relaxation, leisure, ease, comfort are comparable when they mean freedom from toil or strain. Rest, the most general term, implies withdrawal from all labor or exertion and suggests an opposition to the term work; it does not in itself explicitly imply a particular way of spending one's time, but it does suggest as an aim or as a result the overcoming of physical or mental weariness <there the wicked cease from troubling; and there the weary be at rest—Job 3:17> (night came, and with it but little rest—Hardy) <there was rest now, not disquietude, in the knowledge—Glasgow> Repose implies freedom from motion or movement and suggests not only physical quiet (as in sleeping or slumbering) but also mental quiet and freedom from anything that disturbs, annoys, agitates, or confuses. Typically the term suggests tranquillity or peace or the refreshment that comes from complete quiet or rest <heavily passed the night. Sleep, or repose that deserved the name of sleep, was out of the question—austen> <eighteen years of commotion had made the majority of the people ready to buy repose at any price—Macaulay> <walls . . . that shut out the world and gave repose to the spirit—Cather> Relaxation may imply rest that comes from diversion or recreation but it usually stresses either a releasing of the tension that keeps muscles taut and fit for work or the mind keyed up to the processes of clear and prolonged thinking, or a physical and mental slackening that finally induces repose <those who wish relaxation from analysis . . . the tired scientist, and the fatigued philologist and the weary man of business—Bathurst> <now and then came relaxation and lassitude, but never release. The war towered over him like a vigilant teacher—H. G. Wells> <found relaxation in her unobtrusive company—Shirer> Leisure implies exemption from the labor imposed upon one by a trade or profession or by duties; it may apply to the hours in which one is not engaged in one's daily work, or to the period in which one is on vacation, or to the entire time of a person who is not compelled to earn his living <have little leisure for reading> <he looked forward to the prospect of a full month of leisure> <those who lead lives of leisure—Leisure, therefore, stresses freedom from compulsion, or routine, or continuous work; it usually suggests not freedom from activity but the freedom to determine one's activities <labor is doing what we must; leisure is doing what we like; rest is doing nothing whilst our bodies and minds are recovering from their fatigue—Shaw> Ease (see also READINESS) stresses exemption from toil, but it also implies a freedom from whatever worries or disturbs and from what demands physical or mental activity. In contrast to leisure it implies rest and repose; in addition it suggests either complete relaxation of mind and body or a state of mind that finds no attraction in work or activity <all day I sit in idleness, while to and fro about me thy atmosphere over the whole ship—Wouk> But ease may also imply absence of strain, especially mental or nervous strain, rather than freedom from toil <not only devoted, but resourceful and intelligent, one who would be at his ease with all sorts of men—Cather> Comfort differs from the other words of this group in carrying little if any suggestion of freedom from toil; it applies rather to a state of mind induced by relief from all that strains or inconveniences or causes pain, disquiet, or discontent. Positively it suggests perfect well-being and a feeling of quiet enjoyment or content <he had bought for himself out of all the wealth streaming through his fingers neither adulation nor love, neither splendor nor comfort—Conrad> <this sudden calm and the sense of comfort that it brought created a more genial atmosphere over the whole ship—Dahl> <spent every dollar he earned on the comfort of his family—Wouk> Ana intermitting or intermission, suspending or suspension, deferring <see corresponding verbs at DEFER> stillness, quietness or quiet, silenience or silence (see corresponding adjectives at STILL): calmness or calm, tranquillity, serenity (see corresponding adjectives at CALM)

2 Restore, revive, revivify, resuscitate can all mean to regain or cause to regain signs of life and vigor. Restore (see also RENEW) implies a return to consciousness, to health, or to vigor often through the use of remedies or treatments <it took many months to restore him to health> <gave her aromatic spirits of ammonia to restore her to consciousness> Revive, when used in reference to a person, implies recovery from a deathlike state (as stupor or a faint or shock); it carries a stronger suggestion of apparent death in the victim and a less positive suggestion of restored health and vigor than does restore <slowly revived from the effects of shock> <revived her by throwing water on her face> But the term is often applied to spirits or to feelings that are depressed, to plants that seem withering, to states, arts, industries, or fashions that are not flourishing and implies a return to a prior state (as of animation, freshness, or activity) <the flowers have been revived by the shower> <ambitious hopes which had seemed to be extinguished, had revived in his bosom—Macaulay> Revivify differs from revive in suggesting an adding of new life and in not carrying so strong a suggestion of prior loss or depletion of vital power; hence, it is applicable to normal persons or to their powers <a good night's sleep revives every healthy person> <cessation in his lovemaking had revivified her love—Hardy> The term is also applicable to something that tends to become exhausted of interest through long usage or familiarity and then suggests a freshening or a vitalizing from a new source <being a true poet, he was able . . . to revivify them [old, much-used words] as poetic agents—Day Lewis> (tradition is dead; our task is to revivify life that has passed away—Buchan) Resuscitate implies commonly a restora-

graduate will almost always reveal the differences in their formal education—Joseph. Discover (see also discover 2, invent) implies an exposing to view by or as if by uncovering; the term usually suggests that the thing discovered has been hidden from sight or perception but is not, as often in the case of reveal, in itself beyond the range of human vision or comprehension (go draw aside the curtains and discover the several caskets to this noble prince—Shak.) (it is a test which we may apply to all figure-painters—a test which will often discover the secret of unsatisfactory design—Binyon). Disclose is more often used in this sense than discover (a black dress which disclosed all she decently could of her shoulders and bosom—Wouk) (the stress of passion often discloses an aspect of the personality completely ignored till then by its closest intimates—Conrad). More often disclose implies the making known of something that has not been announced or has previously been kept secret (the court refused to disclose its decision before the proper time) (the confessions of St. Austin and Rousseau disclose the secrets of the human heart—Gibbon) (the Vice that would disclose his objective, and the Vicar asked no questions—Cather). Divulge differs little from disclose in this latter sense except in often carrying a suggestion of impropriety or of a breach of confidence (his voice became secretive and confidential, the voice of a man divulging fabulous professional secrets—Dahl) (he knew of the conspiracy and did not divulge it—Bellow) or in implying a more public disclosure (it seemed to me an occasion to divulge my real ideas and hopes for the Commonwealth—L. P. Smith). Tell (see also count 1) may come very close to divulge in the sense of making known something which should be kept a secret (gentlemen never tell) but more often it implies the giving of necessary or helpful information, especially on request or demand (tell me the news) (why didn’t you tell me that she was thy wife?—Gen 12:18) (she never told her love—Shak). Betray (see also deceive) often implies a divulging of a secret, but it carries either a stronger and more obvious suggestion of a breach of faith (had . . . written no letters that would betray the conspiracy he had entered into—Anderson) or of a disclosure (as through signs or appearances) against one’s will (life moves on, through whatever deserts, and one must compose oneself to meet it, never betraying one’s soul—Rose Macaulay) (the stamp of desire on his face had betrayed him once and he did not want to be betrayed by disappointment or anger—Cheever).

revelation, vision, apocalypse, prophecy are comparable when they mean disclose or something disclosed by or as if by divine or preternatural means. Revelation is often specifically applied to the religious ideas transmitted by writers of books regarded as sacred or divinely inspired, especially the Bible; by extension it has come to mean a body of knowledge distinguishable from that attained by the ordinary human processes of observation, experiment, and reason (this revelation satisfies all doubts, explains all mysteries, except her own—Cowper) (revelation differs from natural knowledge, he says, not by being more divine than natural knowledge, but by being conveyed in a different way—Arnold). Vision implies, as revelation does not, a seeing of something not corporeally present; often, especially in mystical and poetic language, it suggests a profound intuition of something not comprehensible to the ordinary or unaided reason and often implies the operation of some agent (as the Holy Spirit) or the gift or accession of some inexplicable power (as genius or poetic rapture) not attributable to all men. Vision, however, unlike revelation, does not necessarily imply that what is seen or realized is true or of value to oneself or others (and some had visions, as they stood on chairs, and sang of Jacob, and the golden stairs—Lindsay) (the ecstasy of imaginative vision, the sudden insight into the nature of things, are also experiences not confined to the religious—Edmund Wilson) (an age in which men still saw visions . . . seeing visions . . . was once a more significant, interesting, and disciplined kind of dreaming—T. S. Eliot). Apocalypse in religious use denotes a type of sacred book (of which the Book of Revelation is an example) which presents a vision of the future in which the enemies of Israel or of Christianity are defeated and God’s justice and righteousness prevail. In its general application apocalypse usually denotes a vision of the future, when all the mysteries of life shall be explained and good shall magnificently triumph over evil. The noun and still more its adjective apocalyptic often carry one or more connotations as various as those of a spectacular splendor or magnitude suggestive of the Book of Revelation or of wild and extravagant dreams of the visionary or passionate reformer (the apocalyptic imagination of Michelangelo—N. Y. Times) (this allegedly universal religion is challenged today by another secular religion with an alternative apocalypse of history—Niebuhr) (the writers of political apocalypse and other forms of science fiction . . . have dealt in absolutes—Davis). Prophecy has become rare in its original meaning except in learned use and in some religious use. Its occasional connotation of the prediction of future events has been emphasized to such an extent that its historical implications have almost been lost, with the result that the word in older writings is often misinterpreted. Prophecy in this narrow sense implies a commission to speak for another, especially and commonly for God or a god. It therefore further implies that the prophet has been the recipient of divine communications or revelations or that he has been granted a vision or visions (though I have the gift of prophecy, and understand all mysteries, and all knowledge . . . and have not charity, I am nothing—1 Cor 13:2) (prophecy is not prediction, it is not a forecasting of events. revere, reverence, venerate, worship, adore can all mean to regard with profound respect and honor. All imply a recognition of the exalted character of what is so respected and honored, but they can differ in regard to their objects and to the feelings and acts which they connote. Their differences in implication extend to their corresponding nouns, reverence (for both verbs revere and reverence), veneration, worship, and adoration. One reveres with tenderness and deference not only persons or institutions entitled to respect and honor but also their accomplis—
ments or attributes or things associated with or symbolic of such persons or institutions — that makes her loved at home, revered abroad — Burns. (revered for the wisdom of his counsels and the nobility of his character — Collier) — islands and cities which he revered as the cradle of civilization — Buchan (towards Johnson . . . his [Boswell's] feeling was not sycophancy, which is the lowest, but reverence, which is the highest of human feelings — Carlyle) One reverences things more often than persons, especially things (as laws and customs) which have an intrinsic claim to respect or are commonly regarded as inviolable (we reverence tradition, but we will not be fettered by it — Inge) (sincerity and simplicity! if I could only say how I reverence them — Benson) — (pledged to reverence the name of God — Stock) One venerates persons as well as things that are regarded as holy, sacred, or sacrosanct because of character, associations, or age (for veneration and heroes — [for Socrates he had an almost religious veneration — Nichols]) In a narrow sense one worships only a divine being, God, a god, or a thing deified, when one pays homage by word or ceremonial churches are buildings in which God is worshiped — pagans worship idols, the sun, and the stars — In wider use worship implies a kind of veneration that involves the offering of homage or the attribution of an especially exalted character, whether the object is a divine being or not (there is a difference between admiring a poet and worshiping at a shrine — Replier) (in his calm, unexcited way, he worships success — Macaulay) Adore (see also adore 2) is often used for worship in application to divinity; worship, however, usually suggests the group approach, and adore the personal approach, to deity. Adore therefore commonly implies love and the performance of individual acts of worship that express unquestioning love and honor (as by obeisance, prostration, and prayer) (the devil) said to him: all these will I give thee, if falling down thou wilt adore me — Mt 4:9) (quiet as a nun breathless with adoration — Wordsworth) In more general application adore implies an extremely great and usually unquestioning love (his staff adore him, his men worshiped him — White) Ana esteem, respect, regard, admire (see under regard n): cherish, prize, value, treasure, *appreciate Ant florid reverence n 1 *honor, homage, deference, obeisance Ana piety, devotion, fealty, loyalty, *fidelity: esteem, respect, *regard, admiration 2 veneration, worship, adoration (see under reverence) Ana fervor, ardor, zeal, *passion: devoutness, piousness, religiousness (see corresponding adjectives at devout) 3 Reverence, awe, fear are comparable when they denote the emotion inspired by something which arouses one's deep respect or veneration. Reverence distinctively implies a recognition of the sacredness or inviolability of the person or thing which stimulates the emotion (a profound reverence for and fidelity to the truth — Mencken) (Riche- lieu's reverence for the throne was constant — Bellow) (I feel a reverence for this place. Wherever humanity has made that hardest of all starts and lifted itself out of mere brutality, is a sacred spot — Cather) Awe, in all of its shades of meaning, fundamentally implies a sense of being overwhelmed or overcome by great superiority or impressiveness, typically manifested by an inability to speak in its presence or to come near to it. Otherwise, it may suggest any of such widely different reactions as adoration, profound reverence, wonder, terror, submissiveness, or abashment (stood in awe of his teachers) (my heart standeth in awe of thy word — Ps 119:161) (make me as the poorest vassal is that doth with awe and terror kneel — Shak.) (he is a great man of the city, without fear, but with the most abject awe of the aristocracy — T. S. Eliot) Fear (see also fear) occurs, in the sense here considered, chiefly in religious use (the fear of the Lord is the beginning of wisdom — Ps 111:10). In this sense and as referred chiefly to the Supreme Being as its cause, it implies awed recognition of his power and majesty and, usually, reverence for his law (and calm with fear of God's divinity — Wordsworth) reverence vb venerate, worship, adore, *revere Ana love, enjoy (see like): esteem, respect, regard, admire (see under regard n) reverse vb 1 Reverse, transpose, invert can all mean to change to the contrary or opposite side or position. Reverse is the most general of these terms, implying a change to the opposite not only in side or position but also in direction, order, sequence, relation, concept; thus, to reverse a coin is to turn it upside down; to reverse a process is to follow the opposite order of sequence; to reverse a judgment is to change a previous judgment to another that is contrary to it; to reverse a garment or part of a garment is to turn it inside out; to reverse the direction of a locomotive is to make it go backward instead of forward (having his shield reversed — Scott) (half were put on a diet of unpollished rice; half on polished. The latter group came down with beriberi. Then the diets were reversed — Heiser) Transpose implies a change in position, usually by reversing the order of two or more units (as letters or words) or by an exchange of position (the printer was instructed to transpose the letters sr in the word set as vesre) (if the term b in the equation a + b = c is transposed, the result obtained is a = c — b) But transpose often, especially in grammar or anatomy, implies merely a change in the natural order or position (he frequently transposes words for the sake of effect) (a transposed heart) Invert implies a change from one side to another chiefly by turning upside down but occasionally, especially in surgery, by turning inside out or outside in (invert a tumbler) (invert a comma) (invert the uterus) (the photograph of the pond showed the inverted images of the trees on its bank.) In its secondary senses it approaches reverse but applies within narrower limits (invert the order of words in a sentence) (invert the relation of cause and effect) (the custom . . . to invert now and then the order of the class so as to make the highest and lowest boys change places — Moore) Ana *overturn, upset, capsize 2 reverse vb *coast, break, recall Ana upset, *overturn: retract, recant, *abjure, forswear: abrogate, *annul reverse n *converse, obverse Ana back, rear, posterior (see corresponding adjectives at posterior): opposite, contrary (see under opposite adj) reversion 1 return, recurrence, recrudescence (see under return vb) 2 Reversion, atavism, throwback are comparable when they mean return to an ancestral type or an instance of such return. The same distinctions in implications and connotations are evident in the adjetival forms reversionary and atavistic. Reversion and reversionary are the technical terms in the biological sciences for the reappearance of an ancestral character or characters in an individual, or for an organism or individual that manifests such a character (we could not have told, whether these characters in our domestic breeds were reversions or only analogous variations — Darwin) (similar mutations are paired together; divergent or reversionary individuals are eliminated — J. A. Thomson) Atavism and atavistic are widely used

both in general and in technical English. Their implication is of an apparent reversion to a remote rather than to an immediate ancestral type through the reappearance of remote, even primitive, characters after a long period of latency. Often, in general use, this connotation of primiveness carries with it a suggestion of barbarism or even degeneration. A magnificat atavism, a man so purely primitive—London—(those who had made England what it was had done so by sticking where they were, regardless of their own atavistic instincts, which might have led them back to France or Denmark—Brooks) Throwback is preferred to reversion or atavism by those who seek a picturesque or less technical word. It is chiefly applied to the concrete instance and is often extended to other than living things—the racial laws which excluded the Jews from the German community seemed...a shocking throwback to primitive times—Shirer—(an aristocrat of the old line, a throwback to another century—White)

rhetorical, grandiloquent, magniloquent, aureate, flowery, euphustic, bombastic are comparable when they mean emphasizing style often at the expense of thought. Rhetorical describes a style, discourse, passage, phrase, or word which, however skillfully constructed or chosen and however effective, impresses the reader or hearer as not natural or effortless, but the result of conscious endeavor to produce an effect (Burke catches your eye by rhetorical inversions—Quiller-Couch) an essay on friendship, high-flown, rhetorical—Canby) Grandiloquent implies excess (as of elevation or color) and applies to an exaggerated, high-flown, and often pompous manner or style especially in language the grandiloquent advertisement speaks at multitudes of people, and leaves them unmoved—Kleppner (a great stone building like the grandiloquent boast of weak men—Green) Magniloquent is not always distinguishable from grandiloquent, but it more often suggests boastfulness or extravagance than a high-flown eloquence the magniloquent utterances of the drunken Falstaff continues his comicoration...bent on the choice of magniloquent phrase—E. K. Brown) Aureate implies excessive embellishment of style by strained figures of speech and rhetorical flourishes, strange or high-sounding words, and foreign phrases; in ordinary language and in reference to writings which have no pretensions to literature the same quality is described by flowery the aureate prose of the Eliza-

rhythm, rhymer, rhymester

*poet, versifier, poetaster, bard,
elloquent, articulate, vocal, fluent, voluble, glib:
quently is used not only in reference to speech
or notes lie between these, the continuing up and down
intervals of the accented or prolonged syllable in poetry
—Abbotty

Rhythm, meter, cadence can all mean the more or less
regular rise and fall in intensity of sounds that one asso-
ciates chiefly with poetry and music. Rhythm, which
of these three terms is the most inclusive and the widest in its
associates chiefly with poetry and music. Rhythm, which
fundamentally implies the recurrence at fairly regular
intervals of the accented or prolonged syllable in poetry
or of the heavy beat or the accented note in music, so that
no matter how many unaccented or unstressed syllables
or notes lie between these, the continuing up and down
movement is strongly apparent to the senses. Conse-
quentially rhythm is used not only in reference to speech
sounds and musical tones ordered with relation to stress
and time, but also to dancing, games, and various natural
phenomena where a comparable pulsing movement is
apparent, and even to the arts of design, where fluctua-
tions in line or pattern suggest a pulsing movement (the
waving, lovely rhythms of the sea—Rose Macaulay)
(every one learned music, dancing, and song. Therefore
it is natural for them to regard rhythm and grace in all the
actions of life—Ellis) (lost their talent in the deadening
rhythms of war, its boredom, its concussion, and . . . its
injustice—Mailer)

Meter implies the reduction of rhythm to system and measure. Poetry that has meter has a definite
rhythmical pattern which determines the typical foot or
sometimes the arrangement of feet in each line and either
the number of feet in every line or, if a stanzaic pattern is
implied, in each verse of a stanza (the revolt against meter
in poetry in the late nineteenth and early twentieth cen-
turies) (the only strict antithesis to prose is meter—
Wordsworth) In music meter implies the division of the rhythm into measures, all of which are uniform in number
of beats or time units, and each of which begins with the
accented tone. Cadence is the least clearly fixed in mean-
ing of these words. The term has often been used as though
it were equal to rhythm, or sometimes to meter, especially
when the reference is to poetry (golden cadence of poetry
—Shak.) (will it shine through the harsh cadence of a
rugged line—Dryden) (poetry can never again become a
popular art until the poet gives himself wholly to "the
cadence of consenting feet"—Read) Cadence often
strengthens the rise and fall of sound or the rhythm as heard,
whether in prose or in poetry, and as influenced by tone or

modulation, choice of words, and association of sound
and feeling (great music like that of Prospero's speech in
The Tempest or the cadence of Cleopatra's "Give me
my robe"—Alexander) (I could hear the cadence of his
voice and that was all, nothing but the measured rise and
fall of syllables—Marquand) (the singsong cadence
which jarred on her the more because she was still trying
to free her own speech of it—Wouk)

rib vb *banter, chaff, kid, rag, josh, jolly
ribald obscene, gross, *coarse, vulgar

rich, wealthy, affluent, opulent are applied both to persons
and to things. The last three are close synonyms of rich,
the general term, but they are more explicit in their impli-
cations and more limited in their range of application. One
is rich that possesses more than enough to gratify normal
desires and needs. Rich, therefore, may describe anyone or
anything above what is felt as average or normal in pos-
sessions. When used of persons, without qualification, it
implies the possession of money or of property, especially
income-producing property (a rich citizen) (a rich state)
In its extended use one may be rich in friends, in talents,
or in interests; a soil may be rich in nitrogen; a poem may
be rich in meaning, a career in promise, a flower in frag-
rance. Also, something is rich which is above the line
dividing the cheap from the costly or precious or dividing
the stinted in elements or ingredients from the bountifully
supplied (a rich fabric) (a rich tone) (a rich red) (a
rich cake) One is wealthy that possesses money, income-
producing property, or intrinsically valuable things in
great abundance. Wealthy is richer than rich in extended
use and usually connotes material possessions. It also
more often than rich implies a way of living in keeping
with one's income and a commanding position in the com-

some or pestiferous (England had in the meantime ridedd herself of the Stuarts, worried along under the Hanoverians—Reppplier) (a lazy man’s expedient for ridding him-self of the trouble of thinking and deciding—Cardozo) Clear is likely to be used to refer to tangible matters which obstruct progress, clutter an area, or block vision (wars which . . . enabled the United States first to clear its own territory of foreign troops—Bemis) (rose from the food she had barely tasted and began to clear the table—Glasgow) and may be used also in relation to ideas that hinder progress (of service to his fellow Methodists in clearing away obstructions to modern thinking—H. K. Rowe) Unburden typically implies a freeing of oneself from something taxing or something distressing the mind or spirit, in the latter situation often by confessing, revealing, or frankly discussing (insisted that he unburden himself of most of the weighty chores that go with the job of majority leader—Time) (conquers his own submissiveness and unburdens himself, before his domineering wife, of all the accumulated resentment and dislike of years—S. M. Fitzgerald) Disappropriate is appropriately chosen to refer to freeing the mind from an erroneous notion or an attitude or feeling making clear straightforward thought difficult (if men are now sufficiently enlightened to disabuse themselves of artifice, hypocrisy, and superstition—Adams) (neither familiarity with the history and institutions of Old World nations nor contact with them during two wars disabused the average American of his feeling of superiority—Commager) Purge may refer to cleansing out of or purification from whatever is impure or alien or extrinsic (purged of all its unorthodox views—Shaw) (the room had never quite been purged of the bad taste of preceding generations—Edmund Wilson) In political matters it may suggest ruthless elimination (the dictator has purged academic faculties of every savant suspected of being opposed to his regime—H. M. Jones)

*Ana* *free, release, liberate: exterminate, expel, eradicate, uproot: abolish, extinguish

**riddle** *n* puzzle, conundrum, enigma, problem, *mystery

**ride** *vb 1* Ride, drive as verbs (transitive and intransitive) and as nouns may both involve the idea of moving in or being carried along in a vehicle or conveyance or upon the back of something. The basic meaning of ride is a being borne along in or upon something; when this idea is uppermost, it makes little difference who or what controls the animal, the vehicle, or mechanism by which one is borne along; thus, one rides or rides on a horse, a bicycle, or a motorcycle when, mounted upon it, one controls its operation or movements, but a woman seated on a pillow behind the saddle may also be said to ride the horse, and a person in the rear seat of a tandem bicycle may be said to ride the bicycle, but a person in a sidecar of a motorcycle rides in the sidecar (not rides the motorcycle). Sometimes ride, the transitive verb, is preferred when the management of the horse and vehicle is also implied, and ride, the intransitive verb, when merely the being mounted upon a moving horse or vehicle is suggested (when he rides his horse his small daughter usually rides on it with him) The basic meaning of drive (see move 1) is a causing to move along; the term therefore primarily refers to the action of an agent that controls the movement of a vehicle whether it is drawn by an animal or self-propelled (drove a four-horse brewery wagon) (it is usually wise to have your child taught to drive by a professional) There is usually a further distinction between ride and drive when movement in a vehicle or conveyance is implied. Ride usually suggests movement in a vehicle (as a train, a bus, or a stranger’s automobile) which is not in any sense under one’s control (it is a long train ride from New York to Chicago) (he said he preferred riding in a bus to riding in a train) (will you give me a ride to the next town?) Drive often suggests movement in a horse-drawn or motor vehicle the course of which is in some way or in some degree under one’s control, whether one is the actual driver or one (as an employer, patron, or guest) whose wishes the actual driver observes (take a drive along the shore of the lake) (we are going for a short drive)

**ridicule** *vb* Ridicule, deride, mock, taunt, twist, rally are ridicule implies deliberate and often malicious belittling of the person or thing ridiculed (the old State religion which Augustine attacks, ridiculing the innumerable Roman godlings whose names he perhaps found in Varro—Inge) (the man who wants to preserve his personal identity is ridiculed as an eccentric—Harris) Deride implies a bitter or contemptuous spirit (he took his revenge on the fate that had made him sad by fiercely deriding everything—Huxley) (sardonic wisecracks in which supposedly lofty ideals are mercilessly derided—Times Lit. Sup.) Mock stresses scornful derision and usually implies words or gestures or sometimes acts expressive of one’s defiance or contempt (nowhere can men be entirely happy while human nature is still being mocked and tortured on other parts of the globe—Kennan) When used in reference to things, mock often implies a setting at naught that suggests scorn or derision (a perishing that mocks the gladness of the spring!—Wordsworth) (a joke was a good way to mock reality, to dodge an issue, to escape involvement—MacInnes) Taunt implies both mockery and reproach; it often connotes jeering insults (taunted in fun or in earnest with the foibles and shortcomings of their fathers—de Laguna) (he . . . took no part in the revivals and usually teased and taunted those who did—J. M. Hunt) Twit may come close to taunt and imply a mocking or cruel casting something up to someone (the absence of ideas with which Matthew Arnold twits them—Inge) (a British author snooting American food is like the blind twitting the one-eyed—Liebling) but twit, like rally, may imply no more than good-natured raillery or friendly ridicule (the paper delights in twitting new law—Newsweek) (a useful place for getting away from the cheery rallying of . . . the English governess—Nancy Hale)

e specially intellectually, spiritually, or aesthetically {the skylark} singing still dost soar, and soaring ever singest—Shelley

up from the eastern sea soars the delightful day—Housman

young soaring imaginations—John Reed

the soaring melody of the rondo in the Waldstein sonata is Beethoven's...transfiguration of the air of a ribald folk song—Lowes

Tower is used more often in reference to things that attain conspicuous height through growth or thrusting upward, or building than in reference to things that actually move upward; it also frequently connotes extension to a height beyond that of such comparable neighboring objects as buildings, trees, mountains, or, when eminence is suggested, persons {the Empire State Building towers above New York City}

this towering but erratic genius...combined in his tempestuous character so many of the best and the worst qualities—Shirer

When the word does imply movement upward, it usually evokes a picture of something shooting up so as to suggest a tower or steeple {the nimble flames towered, nodded, and swooped through the surrounding air—Hardy}

Rocket suggests the inordinately swift ascent of a projectile; it is used chiefly with reference to things that rise with extraordinary rapidity or wildly and uncontrollably (as under the impetus of events) {prices rocketed sky-high—Kenyon}

cock pheasants rocket from the misty spinneys—Glover

Indian pride was reawakened; Indian hopes rocketed—J. M. Brown

Levitate implies a rising or floating in or as if in air that suggests the intervention of antigravity; the term connotes actual or induced lightness or buoyancy and ease of movement {a 1/2-in. niobium sphere levitated in a liquid helium bath—J. L. Taylor}

we are levitated between acceptance and disbelief—O’Faolain

dwellings...levitated by his imagination into new structural creations—Flannery

The word is sometimes specifically associated with super-normal and especially spiritualistic practices {the levitation of a table at a séance} and with illusory risings {it is asserted that a man or a woman levitated to the ceiling, floated about there, and finally sailed out by the window—T. H. Huxley}

Surge suggests the upward heaving or spurt of waves. It is used often with up, in reference to emotions and thoughts that rise powerfully from the depths of subconsciously {strong emotions surged through him as he strode on—Röivaag}

things half-guessed, obscurely felt, surged up from unsuspected depths in her—Wharton

Quite as often, usually with an adverb of direction, it suggests a rolling movement comparable to that of oncoming waves {the troops surged forward}

rival vb 1 Rival, compete, vie, emulate can all mean to strive to equal or surpass another or his achievements. Rival (see also MATCH) usually suggests an attempt to outdo each other a work . . . which contending sects have rivaled each other in approving—Heber Compete and vie, usually with the opponent explicitly stated after with and the objective after for, may sometimes omit direct reference to one or both of these a modified apple syrup to compete in the . . . market of syrups for infant feeding—Crops in Peace and War Compete stresses a struggle for an objective (as position, favor, profit, or a prize); unlike rival, it need not suggest a conscious attempt to outdo another but may imply a quite impersonal striving athletes competing in track sports) colleges compete with each other, promotionally, for public favor—Hoff the buyer does not compete with the seller. He bargains with him; he competes with other buyers—C. E. Griffin Vie carries less suggestion of arduous struggle to hold one's own or to excel than compete, but it may suggest more conscious awareness of the opponent the calypso singers who . . . vie with one another in duels of lyrical improvisation—The Lamp It sometimes suggests the excitement of contest that is a game rather than a combat the boys vied with each other in showing off they vied with each other in enlivening their cups by lamenting the depravity of this degenerate age—Peacock Emulate implies a conscious effort to equal or surpass someone or something by imitation or by using him or it as a model a simplicity emulated without success by numerous modern poets—T. S. Eliot these young . . . heroes, reared on the immense empty western plains, seek to emulate an eastern sophistication—Geismar emulated the proverbial and sagacious rat; he got off in time S. H. Adams

roar vb Roar, bellow, bluster, bawl, vociferate, clamor, howl, ululate are comparable when they mean to make a very loud and often a continuous or protracted noise. The same distinctions in implications and connotations are to be found in their nouns, all of which are identical in spelling with the corresponding verbs except vociferation and ululation. Roar implies such a heavy, hoarse, and prolonged sound as is made by the booming sea, by thunder that reverberates, by a lion, or by persons when they lose control (as in rage or in boisterous merriment) far away guns roar—Woolf the harsh north wind . . . roared in the piazzas—Osbert Sitwell it's the same to her, whether we coo like turtledoves or roar like twenty lions—Meredith his anecdotes sent the audience into roars of laughter—Bellow suggests the loud, hollow crying of a bull; by extension, it applies to sound that seems to reverberate loudly from a cavity or to come insistently from a distance howling with hoarse merriment—Kenneth Roberts the bellow of crocodiles—Forester Bluster suggests not only the violence or turbulence of a windstorm but the lashing quality of its blasts when autumn blusters and the orchard rocks—Browning It is applicable not only to violent weather but also to something (as loud boastful swaggering or empty but noisy threats or protests) that suggests such weather. The term in extended use often carries a connotation of useless or futile effort do their work without bluster or ostentation—Walker she expressed her opinion gently but firmly, while he blustered for a time and then gave in—Anderson Bawl is sometimes interchangeable with bellow, but typically it suggests less depth and resonance and more persistence cattle bawling for water As applied to human utterance, bawl is more or less derogatory despite all political bawls and bellows about . . . prices—Time Even when applied specifically to unrestrained weeping and wailing it tends to call up an unsympathetic image of dishevelment and disorder collapsed in an armchair in the lobby and bawled . . . uncontrollably—Kahn Vociferate and profervation, like bawl, imply loud and urgent human utterance, but they are far less derogatory, if derogatory at all, more adapted to writing than to speech, and more likely to suggest a reason (as rage or excitement), a call for help, or a protest, than mere temperament an atmosphere of shrieks and moans; prayers vociferated like blasphemies—Conrad the perpetual vociferation of inflammatory opinion—Sampson Clamor implies, usually, loud noises in confusion; it may suggest a mingling of voices or sounds. The term can apply to loud sounds, whatever their source. As applied to human utterances, it commonly gains the suggestion of vehemence (as in insisting, urging, or protesting half-starved men and women clamoring for food—Kenneth Roberts Europe has begun to clamor for political disciplinarians to save her—Shaw clamored their piteous prayer incessantly—Longfellow Howl often stresses such loudness and mournfulness as is characteristic of the protracted cry of dogs and wolves; it may be used not only of animals but also of persons or things that make doleful or agonized and often prolonged sounds a legion of foul fiends . . . howled in my ears—Milton howls of mingled rage and pain the howling of the wind on a stormy night Especially when used of human utterance, howl may suggest not only the quality of the sound but the unrestrained character of the utterance or of its underlying emotion he . . . chortled at their errors, howled at their inconsistencies—Martin Gardner howled at a brother for his low-down ways, his prowling, guzzling, sneak-thief days—Lindsay from faint doubt to uneasy suspicion, from the stirring of resentment to the howl of outraged protest—Lewis & Maude Ululate and ululation are less common and more literary than howl, from which they differ chiefly in carrying less suggestion of unrestrained emotion and a stronger implication of wailing, often giving a hint of the peculiar rhythm of the sounds ululating coyotes an ululating baritone mushy with pumped-up pitty—E. B. White who uttered in public or in private such high-pitched notes of ululation—Swinburne Ana reverberate, repercuss, *rebound: yell, *shout: bay, bark, growl, yelp

rob vb Rob, plunder, rifle, loot, burglarize are comparable when they mean to take unlawfully possessions of a person or from a place. All in this basic use imply both an owner of and value inherent in the thing taken. In its basic and legal use rob implies the taking of personal property or valuables from another or from a place in a felonious manner (as by the exercise of violence, by intimidation, or by trickery or fraud rob a bank) rob a man of his savings by selling him worthless securities In extended use rob implies deprivation by unjust means or by powers

2  Rotate,  alternate  can  both  mean  to  succeed  or  cause  to  succeed  each  other  in  turn.  Rotate  may  be  used  in  reference  to  two  or  more  persons  or  things;  it  implies  indefinite  repetition  of  the  order  of  succession.  Thus,  persons  rotate  in  jobs  or  offices  when  they  periodically  interchange  their  jobs  or  offices  according,  usually,  to  a  predetermined  scheme;  one  rotates  crops  who  grows  different  things  on  the  same  land  in  successive  seasons  in  an  order  calculated  to  maintain  soil  fertility  or  to  enrich  exhausted  soil.  Alternate  differs  from  rotate  in  being  referable  only  to  two  or  more  persons  or  things;  though  it  also  implies  repetition  of  the  order,  it  does  not  convey  so  strong  a  suggestion  of  continuity  <alternate  workers  on  an  exhausting  job>  <alternate  hot  and  cold  applications  in  the  treatment  of  a  bruise>  <the  weather  alternated  between  blinding  sandstorms  and  brilliant  sunlight—Cather>

rough  adj  1  Rough,  harsh,  uneven,  rugged,  scabrous  are  comparable  when  they  mean  not  having  a  smooth  or  even  surface,  exterior,  or  texture.  Rough,  the  usual  and  comprehensive  word,  basically  applies  to  whatever  may  be  said  to  have  a  surface  or  an  exterior  which  to  the  sense  of  touch  or  to  the  sight  is  not  smooth  but  is  covered  with  perceptible  inequalities  (as  points,  bristles,  projections,  or  ridges)  <rough  ground>  <a  rough  block  of  stone>  <the  rough  skin  of  chapped  hands>  <a  rough  tweed>  <a  rough,  unshaved  face>  Often  when  applied  to  materials  and  substances  employed  in  the  arts  and  in  manufacturing,  rough  means  lacking  a  final  finish  (as  of  polishing,  smoothing,  or  dressing)  <a  rough  diamond>  <rough  steel>  <rough  lumber>  By  extension  the  term  applies  also  to  things  which  impress  another  than  the  tactile  sense  or  one's  nerves  or  feelings  as  lacking  in  smoothness  and  evenness  <rough  words>  <rough  winds>  <rough  sounds>  <he  has  had  a  rough  time>  (see  also  rude).  Harsh  suggests  a  more  definitely  disagreeable  sensation  or  impression  than  rough;  when  applied  to  what  is  felt  with  the  hand,  it  implies  a  surface  or  texture  that  is  distinctly  unpleasant  to  the  tactile  sense  <a  harsh  fabric>  <harsh  sand>  or  when  applied  to  something  heard,  it  suggests  a  rasping,  grating  quality  <harsh  voices>  <harsh  din  broke  the  fair  music—Milton>  and  when  applied  to  something  seen,  tasted,  or  smelled,  it  suggests  a  character  or  quality  that  is  offensive  or  repellent  to  a  sensitive  person  <a  harsh  liquor>  <harsh  features>  <a  harsh  combination  of  colors>  Unlike  rough,  harsh  in  its  extended  sense  seldom  implies  lack  of  polish  or  refinement,  but  rather  it  suggests  a  nature  that  is  unfeeling,  cruel,  and  indifferent  to  the  pain  it  inflicts  <a  harsh  critic>  <a  harsh  parent>  or  when  applied  to  things,  effectiveness  in  promoting  discomforts  or  in  imposing  rigors  <a  harsh  rebuke>  <a  harsh  climate>  <a  harsh  sentence>  Uneven  applies  either  to  surfaces  or  to  lines  and  suggests  a  lack  of  uniformity  in  height  through  all  the  points  of  the  surface  <an  uneven  road>  <an  uneven  floor>  or  a  lack  of  straightness  and  the  presence  of  curves  or  angles  <an  uneven  edge>  <an  uneven  hem>  In  extended  use  it  implies  a  lack  of  uniformity  especially  in  excellence  or  agreeableness  in  all  the  parts  (as  of  a  life,  a  performance,  or  a  work  of  art)  <the  artist's  brushwork  in  this  painting  is  uneven>  <the  trio's  playing  of  the  sonata  was  uneven>  Rugged,  more  often  applied  to  persons  so  strong  and  healthy  or  machines  so  strongly  made  that  they  can  survive  great  stress  and  strain,  is  not  uncommonly  employed  in  the  sense  of  rough;  in  such  use  it  applies  chiefly  to  surfaces  broken  by  ridges,  prominences,  gorges,  and  gullies  that  can  offer  serious  difficulty  to  the  traveler  or  worker  <a  rugged  road  up  a  mountain>  or  which  (as  in  the  case  of  faces  or  countenances)  are  gaunt,  seamed,  or  heavy-faced  <what  writer ... has  spoken  more  acutely  on  the  somewhat  rugged-seeming  features)  <a  rugged  road>  <a  rugged  and  uneven  road>  Rugged  2  *rude,  crude,  uncouth,  raw,  callow,  green

Milton)—Wilde>  <his  face  had  already  lost  its  youthful  chubbykins,  and  was  becoming  somewhat  like  William's—rough-featured,  almost-rugged—D.  H.  Lawrence>  Rugged  is  also  applicable  to  writing  which  has  not  been  made  smooth,  flowing,  and  agreeable  to  the  ear,  sometimes,  but  not  necessarily,  through  lack  of  care  or  skill  <the  most  rugged-seeming  of  prose  dialogue,  the  kind  .  .  .  that  people  sometimes  praise  as  "simply  a  page  torn  from  the  book  of  life"—Montague>

Scabrous  applies  basically  to  a  surface  that  is  rough  to  the  touch  though  not  necessarily  uneven;  in  this  sense  it  is  a  generic  term  including  such  species  as  scaly,  scurfy,  scabby,  thorny,  prickly,  knobby,  and  knotty  when  applied  to  surfaces  <a  scabrous  leaf>  <a  scabrous  hide>  In  extended  use  scabrous  applies  chiefly  to  subject  matter  or  to  writings  and  works  of  art  having  subject  matter  that  is  prickly  or  thorny,  or  difficult  to  treat,  often  because  it  is  offensive  to  the  tastes  or  morals  of  the  community  <what  writer  .  .  .  has  spoken  more  acutely  on  the  somewhat  scabrous,  but  none  the  less  important  subject  of  feminine  "temperament"?—Huxley>

rout 1 A rude, rough, crude, raw, callow, green, uncouth
mean deficient in the qualities that make for finish or for
perfection in development or in use. Rude, as applied to
men and their minds, suggests a comparatively low state of
culture or a dearth of learning more often than savagery
or barbarism, although it may suggest the latter (like a
rude and savage man of Ind—Shak.). (A rude, domineering,
arrogant type of man, without cultivation or culture
—Shirer) As applied to the things which men make or do,
rude suggests the makers' ignorance of technique or of
proper material, their inexpertness or inexperience or a
deficiency of materials (rude attempts at verse) (rude
implements) (rude workmanship) (a rude hut) (Our father
Adam sat under the Tree and scratched with a stick in
the mold; and the first rude sketch that the world had
seen was joy to his mighty heart—Kipling). Rough (see
also rough) usually suggests more harshness or violence
than rude and a more culpable ignorance or inexperience.
As applied to men and their manners, the term usually
implies the absence of signs not only of polish and refine-
ment but of gentleness, politeness, and often even civility.
It does not, however, necessarily imply boldness, inso-
ience, boorishness, or other unpleasant qualities (a plain,
rough, honest man, and wise, tho' not learned—Addison)
(Phil was rough and frank . . . she had brought herself
up in a hard school—Sackville-West) (use rough lan-
guage). As applied to men's works and products, rough
suggests less lack of expertise or deficiency of materials
than offhandedness, haste, or indifference to technique;
it is typically applied to things which are not carefully
made because they suffice for the purpose or are not yet
finished, being in an early stage of a process or develop-
ment (make a first rough draft of a speech) (a rough
guess) (the style of the work lost its polish, became rough
—Mailer) Crude may be applied to men and their acts,
words, or products, but it gets its fundamental implications
from its historically earlier application to things which
have not been touched by man (as in processing, refining,
or treating) and are as yet in their natural state or in an
undeveloped state (crude petroleum) (crude rubber)
Consequently when applied to men or their acts, words,
or products, crude implies the far remove of what is so
described from what is perfected, highly developed, or
fully civilized (crude colors) (crude methods) (a crude
philosophy) (the guests . . . made a decorous beeline
for the champagne). There was whisky and gin, too,

A colon (:) separates groups of words discriminated. An asterisk (*) indicates place of treatment of each group.

... for cruder palates—Styron) Raw, which in the ear-
liest of its present senses describes the condition of
uncooked food, is often further applied to natural prod-
ucts which are gathered, mined, or otherwise removed
from their native places but are not yet processed or
are in the earliest stage of manufacture or processing;
thus, raw silk names the fiber from the cocoons of
the silkworm as it is drawn from them and reeled; raw
hides are stripped from the carcasses of animals
but are not yet tanned or dressed; raw milk is as yet
unpasteurized; the raw materials from which the miller
produces flour are various cereal grains (the raw mate-
rial of music is sound—Day Lewis) As applied to men,
their minds, or their product, raw, more than crude,
suggests the elementariness of the untutored and the inex-
perienced (raw recruits) (compared with her, he felt
vague and raw, incapable of coming to terms with life—
Sackville-West) (over and over again he had seen
her take some raw youth, twist him, turn him, wake
him up; set him going—Woolf) Callow is nearly always
applied to youths or to those who retain the signs of imma-
turity in manhood; it usually suggests naïveté, simplicity,
lack of sophistication, but not so strikingly as does
crude, and its suggestions of inexperience or present
unfitness are not so strong as those of raw (souls and
wits which have never got beyond the callow and board-
ing-school stage—Arnold) (an embarrassingly callow
master of ceremonies—New Yorker) (in its callow
days, modern science used to amuse itself by frightening
the rest of us with its bogies—Gauss) Green derives most
of its connotations from green as applied to fruit and imply-
ing unripeness and unfitness for use. The term often comes
close to raw when applied to persons and their abilities
because it suggests inexperience and lack of necessary
training (employ green hands in a factory). Often, how-
ever, it additionally connotes simplicity or gullibility (he had not . . . allowed his young green jealousy to show it-
self in words or pique—Buck) (wasn't so green as to expect
suspicious characters to look suspicious—Ches-
terton) But green is also used of products or sometimes
of the raw materials of manufacture or processing which
are not yet fully seasoned or cured (green liquors) (green
pelts) Uncouth retains from other senses a strong
implication of strangeness (outlandish) meant in the
beginning only what doesn't belong to our own land, and
uncouth was simply "unknown"—Lowes and is appro-
priately applied to what seems strange in comparison to
what is felt as normal or finished or excellent, whether
because crude and clumsy especially in appearance
(though living in as refined a home as could be found in
that part of the world, Breckinridge found conditions
rough and uncouth—Couler) (armed catfish . . .
uncouth creatures, with outrageously long feelers and ten-
tacles, misplaced fins, and mostly enscounced in bony
armor—Beebe) or because lacking in polish and grace (the
inherent courtesy and tenderness of the untutored and
uncouth human being—Harrison Smith) (artists who
were rude and uncouth, yet possessed a high degree of
technical skill and strong powers of imagination—Elliot)
or because deficient in cultivation and refinement (people
who are, though kind, still uncouth or inconsiderate;
uncouthness and inconsiderateness, are, however
tolerable, nowhere agreeable qualities in a positive sense—Browne) (they were unaccustomed, painfully
uncouth in the simplest social intercourse, suffering,
and yet insolent in their superiority—D. H. Lawrence)

2 Rude, ill-mannered, impolite, discourteous, uncivil, ungracious can all mean not observant of the manners or forms required by good breeding. Rude suggests lack of delicacy or consideration for the feelings of others; it does not necessarily suggest lack of breeding, for it is applicable to persons of all stations or conditions. It usually stresses impudence, insolence, or a generally insulting manner (a rude answer) (demanding an explanation of the rude familiarity with which Jim had treated him—Anderson) Ill-mannered is a more general and less explicit term, and it seldom carries a suggestion of an intent to offend or insult such as rude usually carries; it is therefore applicable to a person, act, or utterance that shows ignorance of, indifference to, or a disregard of the proprieties (the tone . . . seems to me as gratuitously ill-mannered as the sentence itself is foolish—Corke) Impolite, discourteous, and uncivil, as the negatives of polite, courteous, civil (for all three, see Civil), imply merely the reverse of the care in observing the proprieties of good or formal society that is suggested by polite (scientists may form schools of thought, but these . . . imply a disregard of the decent consideration expected in social intercourse among civilized persons) (no profanity, Señor. We want nothing from you but to get away from your uncivil tongue—Cather) Ungracious (compare GRACIOUS) stresses the lack of kindliness or courtesy resulting from awkwardness, callowness, suriness, or irritation (an ungracious refusal) (an ungracious answer) (these criticisms of a book that is a labor of love and piety may seem ungracious—Cohen)

Ana brusque, curt, gruff, crusty (see BLUFF): *impertinent, intrusive, meddlesome: surly, crabbed (see SULLEN) Ant civil: urbane rueful dolorous, doleful, lugubrious, plaintive, *melancholy Ana depressed, weighed down, oppressed (see DEPRESS): piteous, *pitiful: despairing, *despondent, hopeless rugged *rough, scraggly, harsh, uneven Ana robust, *healthy: burly, brawny, husky, *muscular: *rank, rampant: arduous, *hard, difficult Ant fragile ruin n Ruin, havoc, devastation, destruction are comparable when they mean the bringing about of a disaster or what is left by a disaster. They are general terms which do not definitely indicate the cause or the effect yet suggest the kind of force operating to produce the kind of disaster involved. Ruin implies generally a falling or tumbling down and is applicable to anything that through decay, corruption, neglect, or loss is unable to maintain its wholeness or soundness and so gives way or falls apart; this idea underlies all of the many uses of the word (the old castle has fallen to ruin) (this carelessness—was to be his ruin—M. A. Hamilton) (cases of hopeless ruin . . . in which the body has never been ruined through neglect or vice—Eliot) (the possessive instinct . . . when pushed too far becomes the cause of the ruin of . . . society—Ellis) Havoc suggests an agent that pillages, despoils, or ravages and brings confusion and disorder with it (appalled by the havoc and loss of life caused by the earthquake—Crowley) (he was now the blockaded . . . for Agrippa had worked havoc with his sea communications—Buchan) (hookworms live a long, long time in the small intestine, creating havoc all the while—Heiser) Devastation basically implies a laying waste, usually of a widespread territory (as by war or a natural catastrophe) (the terrible devastation wrought by the great tidal wave which followed the earthquake at Lima—T. H. Huxley) but it also is applicable to something (as disease) that overthrows the individual or his property or resources like a natural catastrophe (those [letters] . . . made clear the devastation in her health that was soon to be revealed—Ellis) Destruction implies an unbuilding or pulling down or apart, but, since it is used alike of material and of immaterial things, it may suggest not only demolition but a killing, an undoing, or an annihilation; also, although it often connotes a conscious attempt to pull down, it as often suggests rather an inevitableness or an irony in the effect produced (an unjust society wreaks cruel if subtle imprisonments and destructions of personal energy—Maier) (the destruction of a man's edifice [lifework] by his own instruments of construction—Bello) Ana disintegration, crumbling (see corresponding verbs at DECAY)

ruin vb Ruin, wreck, dilapidate can all mean to subject a person or more often a thing to forces that are destructive of soundness, worth, or usefulness. Ruin usually suggests a bringing to an end the structural or mental integrity, the value, beauty, or the well-being of something or of someone through such destructive agencies as weather, age, or neglect, through partial destruction by fire, flood, or collision, or through loss of something vital to happiness or success (as one's fortune, one's good name, or one's chastity) (the storm has ruined the garden) (the firm's reputation was ruined by rumors) (there was in all of them [persons] something ruined, lost or broken—some precious and irretrievable quality which had gone out of them and which they never could get back again—Wolfe) Wreck implies a ruining by or as if by crushing or being shattered. Basically it is used in reference to a ship, a train, a vehicle, or an airplane (the ship was wrecked on the rocky coast) In its extended sense wreck is often used in place of ruin when there is an intent to imply injury, often to something intangible such as one's career, one's credit, or one's prospects, past all hope of repair or of reconstruction (his health was wrecked by dissipation) (their plans were wrecked by the unexpected change in weather) When the pulling down of a building is implied, wreck is often preferred to demolish or destroy because it does not necessarily carry the suggestion implicit in those words of the uselessness of that which is left. Dilapidate historically implies ruin especially of a building, or of developed property, or of one's fortune or financial resources through neglect or through usefulness; the term in such use carries, as the other terms do not, a strong implication of culpability (men bent upon intriguing for places at court, for salaries, and for fragment after fragment of the Royal fortune which they were dilapidating—Bello) (the church . . . was . . . shamefully suffered to dilapidate by deliberate robbery and frigid indifference—Johnson) In more general use dilapidate implies a shabby, run-down, and often tumbledown condition and is used chiefly in the past-participial form as an adjective (negotiating the dilapidated and pubblind vehicle over the curving roads—Cheever) (an aged man, traveling alone, and wearing the dilapidated look of a retired missionary—Glasgow) Ana *destroy, demolish, raze: *deface, disfigure: *maim, mutilate, mangle rule n *law, regulation, precept, statute, ordinance, canon Ana order, mandate, dictate, *command: *principle, axiom, fundamental: etiquette, *decorum, propriety

rural, rustic, pastoral, bucolic are comparable when they  
mean of or characteristic of the country as distinguished  
from city life. Rural is the most comprehensive term; in  
its widest meaning it implies open country whether  
uninhabited or sparsely settled; more narrowly it suggests  
agricultural pursuits or simple community life. In  
distinction from rustic, however, rural suggests the pleasant  
aspects of country life; rustic commonly implies a  
contrast with the refinements of the city or the town and  
often connotes rudeness or lack of polish (*he had no taste for  
rural loveliness, green fields and vineyards . . . but he  
would often have his tongue in his cheek at the simplicity of  
rustic dupes—Stevenson*) Pastoral and bucolic derive some or most of their connotations from the literary treat-  
ment of rural life. Pastoral, when it does not refer directly  
to the life of shepherds, suggests either green pastures  
and grazing sheep or a life primitive in its simplicity or  
idyllic in its peace and apartness from the world (*to past- 
oral dales, thin-set with modest farms—Wordsworth*)  
(no more shall . . . Peace pipe on her pastoral hillock  
a languid note—Tennyson) Bucolic, a curiously dichot-  
omous word, may be a close synonym of pastoral in stressing  
the charm of rural environment and life (*there is here  
a bucolic atmosphere of peculiar beauty and inspiration— 
Sacheverell Sitwell*) or may come close to rustic in em- 
phasizing the crudity and lack of refinement of rural life  
or people (*to give up all the city's life . . . for the bucolic

trains that can make 150 miles an hour . . . and dash across  
an abyss on a steel cable—Kaempffert*) (*dashed on like

defilement, or profanation. Sacred (see also HOLY) implies  
either a setting apart for a special and often exclusive use

safe, secure can both mean free from danger or apprehension of danger. Safe may imply that one has passed through dangers or has run some risk (as of injury or of being lost) without incurring harm or damage <arrived home safe and sound after their long journey> or it can apply to persons or possessions whose situation or position involves neither risk nor exposure to destruction or loss <let the great world rage! We will stay here safe in the quiet dwellings—Shelley> <build shelters where the people might go to be safe from falling bombs> <he felt that his money was safe when it was in a bank> <sat in a niche of the tower where her somewhat faded beauty was safe from the sun—Bellemans> or to things (as highways, bridges, or vehicles, or as policies, actions, or courses) which are so constructed or designed that they expose one to few or no risks <a safe harbor> <a safe fire escape> <a safe investment> <'tis never safe to despise an enemy—Defoe> or to a cautious procedure which keeps one out of danger or free from the risk of making an error or blunder <it is safer to generalize about institutions than individuals—Levin> Secure in a few idiomatic phrases implies being down from anxiety or apprehension of danger <most people like to feel secure> In more general use secure tends to stress freedom from anxiety not as merely a subjective state but as a frame of mind induced by grounds that are or appear to be good and sufficient. Sometimes the grounds are intellectual and imply sufficient evidence to establish the certainty of something that has been doubted <send the author off to other publishers, secure in his belief that only an ugly moneyed attitude separates...

same, selfsame, very, identical, *identical, equivalent, equal,
tantamount can mean either not different from the other
or others or not differing from each other. Same may
imply, and selfsame invariably implies, that the things
under consideration are in reality one and not two or
three different things ⟨this is the selfsame book that John
once owned⟩ ⟨they go to the same summer resort year
after year⟩ ⟨voted out of power . . . by the selfsame
people who had put them into office in the first place—
Fairless⟩ ⟨perhaps the selfsame owl that used to fly
overhead—Eve Langley⟩ But same may also be applied
to things actually distinct but with no appreciable dif-
ference in quality, kind, appearance, amount, or signifi-
cance ⟨say Wheeler riding in state in the great Dewey
parade . . . in 1898, wearing the same uniform that Miles
and Merritt wore—Long⟩ ⟨would be looked upon as one of
the afterguard, and would eat the same rations as the
captain—Chippendale⟩ Very, like selfsame, implies
complete absence of difference and therefore oneness
in the things under consideration ⟨you are the very
man I have been anxious to see⟩ ⟨that is the very
thing that I was saying—Shelley⟩ ⟨here in this very
town there was once a café—McCullers⟩ Identical (see also LIKE)
implies either selfsameness ⟨I found it at the identical
spot where I left it⟩ ⟨the authors of the anonymous
Waverley and of the popular Lady of the Lake were
found to be identical⟩ or absolute agreement in all details
(as of quality, shape, and appearance) ⟨since the sculpt-
ures are identical one must be a replica of the other⟩
(no two leaves from the same tree are identical) ⟨twins
that are identical develop from a single fertilized egg⟩
⟨a thousand identical guant gray houses—Rowečich⟩
⟨the same measures . . . may flow from distinct powers;
but this does not prove that the powers themselves are
identical—John Marshall⟩ Identical occurs chiefly in
diplomatic or governmental use and like identical
implies absolute agreement in all details ⟨the Allies sent identic
answers to the ultimatum⟩ ⟨identic notes utilized by the
powers in making joint representation to a government
—Stuart⟩ Equivalent is used of things that amount to
the same thing or are freely interchangeable in some respect
(as worth, force, significance, or import) ⟨some heirs
received their legacies in cash, some in real estate of
equivalent value⟩ ⟨in economics, the equivalent of a
beautifully composed work of art is the smoothly running
factory in which the workers are perfectly adjusted to
the machines—Huxley⟩ Equal implies complete corre-
spondence (as in number, amount, magnitude, or value)
and therefore equivalence but not selfsameness ⟨equal
salaries⟩ ⟨equal quantities⟩ ⟨equal merit⟩ ⟨divide in
equal shares⟩ ⟨the General . . . greeted Mrs. Churchill
in English, and spoke it throughout the meal. To make
things equal, I spoke French—Sir Winston Churchill⟩
Tantamount, otherwise identical with equivalent, is
restricted in application to one of a pair of usually im-
material things that are in effect equivalent the one to the
other (as in value, significance, or effect) ⟨such a move-
ment . . . would be tantamount to a confession of failure
—Trollope⟩ ⟨refusal to prolong the truce . . . would be
tantamount to a threat—Current Biog⟩

satisfied content (see under SATISFY)
can both mean to appease desires or longings. The same distinctions in implications are also found in their corresponding adjectives satisfied and content or contented. Satisfy implies full appeasement not only of a person's desires or longings but also of his needs or requirements (walks that satisfy a wish for exercise) and of his desires (the bosses are able to maintain the required tension in their followers and at the same time can satisfy their lust for power in a most gratifying way—Huxley) Flora was satisfied. She had done what she had hoped to do—Gibbon Content implies appeasement to the point where one is not disquieted or disturbed by a desire for what he does not have, even though every wish is not fully gratified (she was content with the world, not because he thought reality good . . . but because he possessed immense imaginative resources with which to evade it—Paulding) (when I was at home, I was in a better place: but travelers must be content—Shak) (my own garden must content me this year—Quiller-Couch)

saucey, pert, arch are comparable when they mean flippant and bold rather than serious and respectful in one's manner or attitude. Saucey is rarely strongly derogatory though it implies some degree of lack of proper respect (a saucy pupil) (a saucy retort) Usually it also implies piquancy and levity with a hint of smartness or of amusing effrontery (a little saucy rosebud minx can strike death-damp into the breast of a doughty king—Browning) Sometimes it is applied also to birds and small animals on similar grounds (some saucy puppies on their hind legs—Ruskin) the mistle thrush is very bold and saucy, and has been known to fly in the face of persons who have disturbed the sitting bird—Burroughs) Pert implies a saucy freedom that may suggest presumption or affectation rather than insolence (a pert jackanapes, full of college petulance and self-conceit—Smollett) (a little upstart, vulgar being . . . with all her airs of pretension—Austen) In some contexts the word carries additional implications (as of cleverness or sprightliness) found in its other senses (a little, upright, pert, Burns)

Arch usually implies roguish or coquettish audacity or mischievous mockery sometimes carried to the point that it seems forced or awkward (a simpering expressions and arch posturing—Osbert Lancaster) (Elizabeth . . . turned to him with an arch smile, and said—"You mean to frighten me, Mr. Darcy, by coming in all this state to hear me?"—Austen)

saunter, stroll, amble can all mean to walk slowly and more or less aimlessly, especially in the open air. Saunter suggests a leisurely pace and an idle and carefree mind (sauntering about the streets, loitering in a coffeehouse—Fielding) (he had stepped out into the street well—Burns) While it does not quite imply impatience or boredom (a son seldom fulfills his father's hopes) (the trip fulfilled all the claims made for it) (the objective of our country . . . is to achieve human decency to meet human needs and to fulfill human hopes—A. E. Stevenson) Meet implies exact agreement with the test or measure and therefore usually connotes mathematical equivalence; thus, "the new machine meets expectations" is slightly more tempered praise than "the new machine fulfills expectations" (we must expand the concept of conservation to meet the imperious problems of the new age—Kennedy)

2 Save, preserve, conserve can mean to keep free or secure from injury, decay, destruction, or loss. Save may imply measures taken to protect something from danger of loss, injury, or destruction <they had her in a Sunday-go-to-meeting dress . . . never washed or worn, just saved—Welty> <saved his papers in a vault> <he wavered around an atomistic explanation of the world, yet held fast to the Biblical Creation, to save his orthodoxy—H. O. Taylor> but, more often, it suggests rescue or delivery from a dangerous situation (see under rescue). Preserve stresses the idea of resistance to destructive agencies and hence implies the use of means to keep something in existence or intact <old records are preserved by protecting them from light and moisture> <preserve food for winter use> <constitutions are intended to preserve practical and substantial rights, not to maintain theories—Justice Holmes> <there's nothing like routine and regularity for preserving one's peace of mind—Dahly> Conserve, on the other hand, suggests keeping sound and unimpaired and implies the use of means to prevent unnecessary or excessive change, loss, or depletion <a convalescent must conserve his energy if he is to make rapid progress> <our constitutional rights can be conserved only by an intelligent electorate> <the air is recirculated within the cabin in order to conserve heat—Armstrong> <sipped his coffee, made from his carefully conserved supply brought with him from England—Bambrick>

say n *saying, adage, proverb, maxim, motto, epigram, aphorism, apothegm

saying, saw, adage, proverb, maxim, motto, epigram, aphorism, apothegm can all denote a sententious expression of a general truth. A saying is a brief current or habitual expression that may be anonymous, traditional, or attributable to a specific source <the saying is true, "The empty vessel makes the greatest sound"—Shak.> A saw is an oft-repeated and usually traditional or old saying <full of wise saws and modern instances—Shak.> <the old saw that ignorance is bliss—M. W. Childs> An adage is a saying given credit by long use and general acceptance <if there is verity in wine, according to the old adage—Thackeray> <there's an adage to the effect that a good horse eventually comes back to his best form—Audax Minor> A proverb is an adage couched, usually, in homely and vividly concrete or figurative phrase <accused (in the phrase of a homely proverb) of being "penny-wise and pound-foolish"—Spectator> we hear, that we may speak. The Arabian proverb says, "A fig tree, looking on a fig tree, becometh fruitful"—Emerson> A maxim offers a general truth, fundamental principle, or rule of conduct often in the form of a proverb <the difference between principles as universal laws, and maxims of conduct as prudential rules—Robinson> we have reversed the wise maxim of Theodore Roosevelt: "Speak softly and carry a big stick"—Warburg> A motto is usually a maxim or moral aphorism adopted by a person, a society, or an institution as a guiding principle or as a statement of an aim or ideal <William of Wykeham's old motto that "Manners maketh Man"—Quiller-Couch> he adopted the motto "Nam deo est semper rectum" in addition to his private motto of "I will work harder"—George Orwell> The last three terms, epigram, aphorism, and apothegm, commonly imply known authorship and a conscious literary quality. An epigram gets its effectiveness from its terseness and a witty turn of phrase; it characteristically presents a paradox or a cleverly pointed antithesis <what is an epigram? A dwarfish whole,

Scotch

vb Scold, upbraid, rate, berate, tongue-lash, jaw, bawl, chew out, wig, rail, revile, vituperate can all mean to

reproach, reproof, or censure angrily, harshly, and more or

less abusively. Scotch, the term most common in everyday

use, usually implies a rebuking in a mood of irritation or

ill temper, with or without sufficient justification (*his

father scolded him for staying out late) *our great authors

have scolded the nation more than they praised it. Often

their scolding has been . . . wholly justified, but often too

it has been eccentric or ill-informed—Malcolm Cowley

Upbraid stresses reproaching or censuring on more defi-

nite grounds than scold does and usually suggests justifi-

cation or justifiable anger (*the judge upbraided the parents

for the delinquency of their children) *I think he'd meant to

upbraid me for sneaking off, but he didn't—Cather

*he had so often upbraided her for her superficiality—

Sackville-West)

Rate and the more common berate usually imply more or less prolonged, angry, and some-
times abusive scolding either in censuring or in reprim-

anding (*the voice continued violently rating me

—Hudson) *hearing Ed Hall berate a farmer who doubted

the practicability of the machine—Anderson)

Fairly close synonyms of rate and berate are the expressive
tongue-lash which stresses the punitive effect on the

person berated (*tongue-lashed them in a way that could

be heard blocks off—Fast) *suffer from a fifteen-minute

tongue-lashing) and the crude terms jaw, bawl, usually

with out, chew out, and wig (chiefly British), which

emphasize the noisy prolonged ranting which usually

attends a berating (*I have been jowelled for letting you go

—Marryat) *you'll get bawled out when you pull a boner

—Matheson) *some niggling Quartermaster lieutenant

chewed them out because they were a few hundred cases

short—Liebling) *a subaltern of 1872—Keesing

who presumably had been severely wagged by his chief—The Times)

Rail carries a more definite implication of either abusive or

scoffing language than rate or berate *enemies . . .

rail at him for crimes he is not guilty of—Junius)

the couples raised at the chant and the frown of the witchmen

leam, and laughed them down—Lindsay) *Revile carries a

much stronger implication of abusive, scurrilous language

than rail does but little, if any, suggestion of scoffing;

it often also implies deliberate vilification (*the words

humiliated her, the tone reviled her . . . they were the

clashes of naked hate—Farrell) *her tenants, who have to

earn the money she spends abroad . . . revile her as a

fugitive and an absentee—Shaw)

Vituperate implies more violence in the censure and in the method of attack than
does revile, but otherwise they are close synonyms (*he

vituperated from the pulp the virtues of the court—

Froude) *the last image that crossed his mind was Sir

James with his angry face and his trembling hands vitu-

perating him—Archibald Marshall)

scrape
are comparable when they mean to apply friction to something by rubbing it with or against a thing that is harsh, rough, or sharp. Scrape usually implies the removal of something from a surface with an edged instrument; the term then commonly suggests a purpose (as erasing, smoothing, or freeing from dirt, paint, skin, or peel). Additionally the term commonly implies the making of a distinctive and often unpleasant sound (scrape the dishes before washing) (scrape potatoes) (scrape off paint) (a twig that scraped upon the very parchment of his soul as a lead pencil upon a slate—Pows) (the chairs were scraped along the floor—Anderson) Scratch differs from scrape in its common implication of less purposiveness in the agent and of definite damage to the thing that is scratched; it usually also suggests the use of a pointed rather than an edged instrument which gouges a line or furrow in a surface hard enough to scratch glass (scraped by the thorns of a rose) (scratch a mosquito bite) (this pen scrapes) (his wooden plow scarcely more than scratched the surface of the earth—A. R. Williams) Grate usually stresses the harsh sound or the sensation of harshness made by rubbing something with or against a rough indented or cutting surface (as of a file); the term implies removal of material from a body in particles, and in itself as distinct from context suggests nothing about the aims or effects (as abrasion, wearing or rubbing away, or pulverization) (grate nutmeg) (grate cheese) Often grate implies little more than a harsh or creaking sound made by friction (a key grated in the lock) (till grates her keel upon the shallow sand—Byron) In extended use the term tends to be used in reference to things that irritate, exasperate, or harass with the implication that their effect is like the harsh sound or the sensation of harshness characteristic of a physical grating (an uncanny heartiness . . . which grated upon David's ear—Turnhull) Rasp usually implies a harsher or rougher and more disagreeable effect than either scrape or grate. It may suggest

the use of or as if of a rough instrument (as a coarse file called a rasp) or of something equally effective or as trying to the nerves (thin a stick by rasping) (these rocks are known to have their angles rasped off, and to be fluted and scarred by the ice—Tyn dall) (her hard, metallic voice had rasped the invalid's nerves—Carey) (when you laid a tight hold on your fiddlestick . . . you could do nothing but rasp—Shak.) Grind implies a sharpening of the edge or point of a tool or weapon or the smoothing of a surface (as of glass) by friction; in both uses the sound made in the act of grinding is often stressed (I have ground the axe myself; do you but strike the blow—Shak.) (grind lenses for eyeglasses) In extended use the word often implies a wearing down by friction and also often suggests a particularly harsh or rough method of gaining one's ends or of making one's way (laws grind the poor, and rich men rule the law—Goldsmith) (we went aground—grinding, grinding, till the ship trembled in every timber—Martineau) A colon (:) separates groups of words discriminated. Scan and scanning are usually employed in reference to something that is surveyed from point to point; the terms may imply careful observation or study but sometimes imply the opposite and suggest a cursory glancing from one point to another; thus, to scan the newspaper each morning may admit of either interpretation. Only a context can make the implication clear. The more one scans the later pages of Mark Twain's history the more one is forced to the conclusion that there was something gravely amiss with his inner life—Brooks

secure vb 1 Secure, anchor, moor, rivet can all in extended use mean to fasten or fix firmly or immovably. They are, however, not often interchangeable because of implications derived from their primary senses. One secures something that may get lost, may escape, or permit invasion or intrusion if allowed to remain loose or to work loose; the word usually implies care or protection as the end of the action (secure doors and windows before retiring to keep out intruders) (replace the nut, and tighten it down to secure the capacitor to the panel—J. A. Stanley) (getting intelligence which . . . will secure your own countrymen against brutality and outrages—Kenneth Roberts) One anchors or moors something unstable or subject to tugging or pulling by external forces or influences to another thing strong enough to hold it down or in place or powerful enough to counterbalance or counteract the opposing forces (most schoolrooms had benches and desks lined up in rows and anchored to the floor—Mumford) (anchor the cables of a suspension bridge to towers at either end) (moored to the rock on two sides, the cabin stood firm—Tyndall) But moor, which in its primary sense implies a making fast between two anchors or two or more lines or cables, may in extended use suggest greater steadiness or an even balancing of forces that make for stability (her reticent childhood sweetheart—whose idea of the good life is anchored to his dream of a French version of an American drugstore—N. Y. Times Book Rev.) (some of the tiny cone-shaped hats are attached to chenille snoods . . . which moor them on firmly—P. J. Reynolds) (said a network executive proudly: “While they’re with us they [actors on contract] ‘11 be moored to television—they can’t do any Broadway plays or movies.”—Time) One rivets one thing to another when one joins things normally or actually separate from each other as closely together as though a rivet had been driven through them (fear riveted him to his chair) (why should I write this down, that’s riveted, screwed to my memory—Shakes.) (the head of the state, in whose name he insisted that all his victories were won, to rivet the loyalty of the army to the civil administration—Buchanan) (stood riveted to the earth . . . in the fascination of that dreaded gaze—Le Fanu)

sedition, treason are comparable when they mean an offense against a state to which or a sovereign to whom one owes allegiance. Sedition applies to conduct that is not manifested in an overt act but that incites commotion and resistance to lawful authority without in itself amounting to insurrection (sedition is . . . a matter of expressing opinions, not of committing acts—The Reporter) Treason applies to conduct that is manifested by an overt act or acts, is variously defined by various governments and at various times but typically has for its aim the violent overthrow of the government, the death of the sovereign, or betrayal to or aid and comfort of the enemy (one cannot commit treason simply by talking or conspiring against the government; he must actually do something, and there must be witnesses—Ogg & Ray) (sedition has come to be applied to practices which tend to disturb internal public tranquility by deed, word, or writing but which do not amount to treason and are not accompanied by or conducive to open violence—Chafee) (sedition . . . is traitorous behavior that falls short of treason because it does not actively levy war against the United States or give aid to an enemy of the United States. It stirs up resistance to law or encourages conduct that may become treason—Smelter & Kirwin)

appreciation of what is before one's eyes (they can see) a great deal in Paris, but nothing in an English meadow—Jefferies (if the policeman saw him at all, he probably observed him with misgiving—Wolfe) the look of one who has seen all, borne all, known all—Styron The term may imply the exercise of other powers than the sense of sight, including a vivid imagination (I can see her plainly now, as she looked forty years ago) ("Methinks I see my father." "Where, my lord?" "In my mind's eye, Horatio"—Shak.) or mental insight (he was the only one who saw the truth) or powers of inference (though he appeared calm, I could see he was inwardly agitated) Behold carries a stronger implication of a definite ocular impression and of distinct recognition than see; it also suggests looking at what is seen (we have sailed many weeks, we have sailed many days, (seven days to the week I allow) but a Snark, on the which we might lovingly gaze, we have never beheld till now—Lewis Carroll) a whole tribe living in a craterrike valley, every member of which believes it would be death for him or her to behold the sea—Frazer Descry and esp'y imply a seeing in spite of difficulties (as distance, darkness, or partial concealment). Descry often suggests an effort to discover or a looking out for someone or something (the grass was high in the meadow, and there was no descripting her—George Eliot) (Sir Austin ascended to the roof ...) and described him hastening to the boathouse by the riverside—Meredith but esp'y usually implies skill in detection (as of what is small, or not clearly within the range of vision, or is trying to escape detection) (the seamen espied a rock within half a cable's length of the ship—Swift) (flowers we esp'y beside the torrent growing; flowers that peep forth from many a cleft and chink—Wordsworth) View and survey, on the contrary, imply the seeing of what is spread before one or what one can examine steadily or in detail. Both terms as often imply mental consideration as a physical seeing or looking over. View usually implies or requires a statement of a particular way of looking at a thing or a particular purpose in considering it (view the panorama with delight) viewed a piece of property that he thought of viewing) view a painting from various angles) view the industry of the country, and see how it is affected by inequality of income—Shaw) the effort is an interesting one if you view it in terms of the techniques of political symbolism—Lerner Survey more often implies a detailed scrutiny or inspection by the eyes or the mind so that one has a picture or idea of something as a whole (the captain surveyed him from cap to waistcoat and from waistcoat to leggings for a few moments—Hardy) he surveyed the room from the weathered blue window in later times?—Bennett) (his lightning dashes from image to image, so that we are unable at first to perceive the points of contact—Day Lewis) Discern, like descry, often implies little more than a making out of something by means of the eyes (at length he discerned, a long distance in front of him, a moving spot, which appeared to be a vehicle—Hardy) sometimes we discern the city afar off—Benson) In its more distinctive use the term usually implies the powers of deeply perceiving and of distinguishing or discriminating what the senses perceive (ye can discern the face of the sky; but can ye not discern the signs of the times?—Mt 16:3) (his grave eyes steadily discerned the good in men—Masefield) (he tried quickly to think of something else, lest with her uncanny intuition she discern the cloud of death in his mind—Buck) Ana scrutinize, scan, examine, inspect: pierce, penetrate, probe (see ENTER): consider, study, contemplate 2 See, look, watch can all mean to perceive something by means of the eyes. See (see also SEE) stresses the reception of visual impressions (he is now able to see clearly) (have the power of seeing) Look stresses the directing of the eyes to something or the fixing of the eyes on something in order to see it (if you will only look, you will be able to see what I am doing) he refused to look in the mirror the nurse gave him) Watch (see also TEND) implies a following of something with one's eyes, so as to see every movement, every change, a sign of danger, or a favorable opportunity (watch for a while and tell us what you see) (spend the night watching a sick friend) (watching the clock as closely as a cat watches a mouse)

A colon (:) separates groups of words discriminated. An asterisk (*) indicates place of treatment of each group.
seek, search, scour, hunt, comb, ferret out, ransack, rummage are comparable when they mean to look for or go in quest of in the hope of finding. Seek has become widely extended in application and may take as its object either a person or a concrete thing or something intangible or abstract and may imply either a quest that involves great effort or one that makes slight demands; the term is more often used in the written than in the spoken language (they sought him among their kinsfolk and acquaintance. And when they found him not, they turned back again to Jerusalem, seeking him—Lk 2:44-45) <seek the truth> (a small steadfast streak that caused me to seek a more subtle and painful punishment for my victim—Dahl) <wisdom must be sought for its own sake or we shall not find it—Inge> Search implies both effort and thoroughness. It differs from seek especially in taking as its object the place in which or the person on whom something is sought; it therefore connotes an investigating, an exploring, a penetrating scrutinizing, or a careful examining (search every section of the country for spies) (search the house from top to bottom for a lost ring) (I have searched every nook and cranny) (search all the persons present when the money disappeared) (searched his memory for a name) (the book was edited in a way no editor could ever have time or love to find; it was searched sentence by sentence, word for word—Mailer) Seour, which means in general to run over or to traverse swiftly especially in pursuit or in search, can be used more narrowly to mean to make an exhaustive search of a territory or of something comparable to a territory for a thing that must be found (scour the coast for lurking submarines) (scour the neighborhood for the missing child) (the next morning Archer scoured the town in vain for more yellow roses—Wharton) (scoured the coppices and woods and old quarries, so long as a blackberry was to be found—D. H. Lawrence) Hunt basically comes close to scour in its general sense for it implies a pursuit of and often a search for something, but especially game. In the extended sense in which the term is here considered it implies specifically a vigorous and, often, unavailing search for something as elusive as game (they hunted till darkness came on, but they found not a button, or feather, or mark—Lewis Carroll) <hunt evidence far and wide> (I've hunted for the lost papers everywhere but I can't find them) (in . . . hunting up earlier quotations for recent words—Murray) Comb implies methods of searching as painstaking or thoroughgoing as those involved in going through the hair with a fine comb (comb the countryside for the escaped convicts) (comb the factories for more men for the army) (the Pacific Ocean between San Francisco and Hawaii is being combed today by aircraft and shipping for signs of the two planes—Morning Post) Fret out stresses the finding of something that is difficult to get at and usually suggests a vigorous, arduous, persistent and, often, tricky method of search (fret out a secret) (one of the professor's specialties being to fret out captured . . . political commissars for execution—Shirer) (I have ferreted out evidence—Dickens) Ransack and rummage imply a search usually of a limited area; both tend to stress the manner of going through what is examined and suggest a haphazard and often disorderly or heedless pulling about and turning over of miscellaneous items. Though the two are often interchangeable, ransack is especially appropriate when one wishes to stress careless haste, lack of regard for the rights of others, or improper motives on the part of the searcher, while rummage may be chosen when a more neutral word is needed or when lack of a definite object of search is to be implied; thus, a thoughtless child might ransack the refrigerator to make himself a snack and then go rummage through his toys after a lost ball; a thief ransacks a house in search of loot, but rummages through a drawer with no clear and specific notion of what he may find (pass a rainy day rummaging about in the attic) (the men ransacked the thatched huts, rummaged among the pots, the fishing gear, the shell ornaments—M. S. Douglas) (apparently unlimited search, such as ransacking parts of an office can never be justified—Paul Wilson) (ransacked his father's shelves, dipped into a multitude of books—Macaulay) (stooped and deliberately rummaged in the dust at his feet, as if searching for the squirming threads of death it might contain—Wylie) <the impatience with which a community without tradition rummages through ways of life which other peoples, other cities have worked out for themselves slowly and painfully—Gordimer> Ana inquire, question, *ask, interrogate: pursue, chase, *follow, trail seem, look, appear can mean to be as stated in one's view or judgment, but not necessarily in fact. Often they are used interchangeably with apparently no difference in meaning (he seems tired) (the students look eager) <the orchestra appeared ready to begin> But even in such phrases seem suggests an opinion based on subjective impressions and personal reaction rather than on objective signs (a tiny pebble in the middle of your back seems to grow all night, and by the crack of dawn has grown to boulder size—Boy Scout Handbook) (my other visits to Greece were over twenty years ago. How would it seem after such a long time, and seen in such a different way—Chubb) while look implies that the opinion is based on a general visual impression (her . . . lips looked parched and unnatural—Glasgow) Appear may convey the same implication as look but it sometimes suggests a distorted impression such as can be produced by an optical illusion, a restricted point of view, or another's dissembling (his tongue . . . could make the worse appear the better reason—Milton) <the attempt has been made to make it appear that this conflict is not between religion and science, but between the latter and theology. Select is also often used, with little or no implication of choice or selection, in the sense of superior or exceptional (a select audience) <persecution of that sort which blows down and crushes all but a very few select spirits—Macaulay> Eleet commonly implies careful or discriminating selection and it carries a stronger implication than select of admission to some carefully restricted or inner circle; sometimes it also suggests the award of special privileges <that delicious phantom of being an elect spirit . . . unlike the crowd—Kingsley> <Darwin was one of those elect persons in whose subconscious, if not in their conscious, nature is implanted the realization that "science is poetry"—Ellis> Picked, like select, may or may not imply actual choice; the term commonly applies to what is conspicuously superior or above the average though it may suggest little more than the best available <a picked team> <the candidates are all picked men> <the picked moments of exaltation and vision which great tragedy brings—Montague> Exclusive in its most general sense implies a character in a thing that forces or inclines it to rule out whatever is not congruous or compatible with it or is its opposite or antithesis in constitution or character <mutually exclusive colors when mixed in the right proportions form a neutral gray> <exclusive concepts—animal and vegetable, for instance—Bowen> <didacticism and a sense of humor are mutually exclusive qualities—Lowes> As applied especially to persons, groups, or institutions exclusive implies tendencies or rules which prevent free acceptance or admission of those not conforming to imposed standards or not satisfying the requirements of those who are fastidious, snobbish, or highly critical <a weak, critical, fastidious creature, vain of a little exclusive information or of an uncommon knack in Latin verse—Eliot> <the exclusive caste system of a rigid feudalism—Binyon> Ana *choice, exquisite, rare, delicate, dainty, recherché: superlative, surpassing, peerless, *supreme Ant indiscriminate select vb *choose, elect, prefer, opt, pick, cull, single Ana *assort, sort, classify: discriminate, discern (see corresponding nouns at DISCERNMENT) Ant reject —Con refuse, repudiate, spurn (see DECLINE vb) selection *choice, preference, election, option, alternative Ana choosing, culling, picking (see CHOOSE) discrimination, *discernment, insight, acumen Ant rejection self-abnegation *renunciation, abnegation, self-denial Ana sacrificing or sacrifice, forbearance, forgoing, eschewal (see corresponding verbs at FORGO): surrendering or surrender, resignation, abandonment, relinquishment (see corresponding verbs at RELINQUISH) self-assertive assertive, *aggressive, pushing, pushy, martial Ana obtrusive, intrusive, officious, meddlesome, *impertinent: bold, audacious (see BRAVE): positive, certain, *sure, cocksure self-assurance assurance, *confidence, self-confidence, aplomb, self-possession Ana coolness, collectness, imper turbability (see corresponding adjectives at COOL): compose, sangfroid, *equanimity Con diffidence, shyness, bashfulness, modesty (see corresponding adjectives at SHY) self-complacent *complacent, self-satisfied, smug, priggish Ana & Con see those at COMPLACENT self-confidence *confidence, assurance, self-assurance, self-possession, aplomb Ana composure, *equanimity: sureness, sanguineness (see corresponding adjectives at CONFIDENT) self-denial self-abnegation, abnegation, *renunciation Ana sacrificing or sacrifice, forbearance (see corresponding verbs at FORGO): abstaining, refraining (see REFRAIN): renouncing or restraint, curbing or curb, checking or check (see corresponding verbs at RESTRAIN) self-esteem self-love, *conceit, egotism, egoism, amour propre Ana *pride, vanity, self-respect, self-regard, self-admiration (see base words at REGARD n) Ant self-distrust self-love self-esteem, *conceit, egotism, egoism, amour propre Ana *pride, vanity, vainglory: complacency, self-complacency, smugness, priggishness (see corresponding adjectives at COMPLACENT) Ant self-forgetfulness self-possession *confidence, self-confidence, assurance, self-assurance, aplomb Ana *equanimity, composure: coolness, collectness, imperturbability, nonchalance (see corresponding adjectives at COOL): poise, savoir faire, *tact selfsame *same, very, identical, identic, equivalent, equal, tantamount Ana alike, *like, identical, uniform Ant diverse self-satisfied *complacent, self-complacent, smug, priggish Ana satisfied, content (see under SATISFY): conceited, egotistic, egoistic (see corresponding nouns at CONCEIT) semblance *appearance, look, aspect Ana *likeness, similitude, resemblance, analogy, affinity: *pose, affectation, air: *form, figure, shape semianual *biannual, biennial sempiternal eternal, *infinite, boundless, illimitable, uncircumscribed Ana *everlasting, endless, interminable, unceasing: *immortal, deathless, undying; Send, the most general term, carries a wide range of implications and connotations and is capable of replacing any of the remaining terms especially when joined with a suitable modifying adverb. Basically it implies the action of an agent or sometimes an agency or instrumentality that initiates passage of one to another typically by ordering or directing (sent a messenger to the bank) <if the body is rotated in any dimension of space, certain definite and fixed messages will be sent to the brain by the vestibular sense—Armstrong> or by using force (sent an arrow into target) <there can come a cloudburst, an inch or two or three falling within an hour to wash out fields, send rivers flooding, wreck houses—La Farge> or by employing some available facility or inherent capacity or power (send a letter by airmail) <the burning forest sent smoke over the city> <diseases that rack the human frame and send epidemics of sickness over great tracts of the earth's surface—Swinton> Often the term carries special connotations characteristic of particular idioms; thus, when one sends a child to college, one makes it possible for him to go by providing funds; when a teacher sends her pupils back to their books after recess she leads them to shift their focus from one activity (play) to another (study); when a story sends its hearers into gales of laughter it impels attention and alters mood; when something (as music or a personality) sends one, it induces an intense A colon (:) separates groups of words discriminated. emotional response. Dispatch tends to suggest speed in sending and to heighten notions of specific destination or cause, though the use of a speedy means is as likely to be stated as implied (the police chief dispatched several detectives to the scene of the murder) (two destroyers were dispatched to the aid of the sinking vessel) (dispatch word to them by radio) (a messenger was dispatched with a reprieve but failed to arrive before the soldier had been shot—Amer. Guide Series: Conn.) Forward (see also advance) implies a sending on or forward especially of something that has been delayed or stopped before reaching the person to whom it is to be delivered (the letter had been forwarded from his old address—J. D. Beresford) or, in commercial use, of something that has been asked for or ordered (the goods ordered will be forwarded by parcel post) Transmit (see also carry) fundamentally implies a sending or passing from one place, person, or point to another; it often emphasizes the means rather than the fact of sending (the information can be most rapidly transmitted by radio) (the virus of yellow fever is transmitted by a mosquito) (prophets, who are . . . a vehicle through which to transmit a revelation—W. W. Howells) Remit (see also excuse) especially in reference to money can mean merely to send (profits, dividends, interest, rents and royalties may be remitted to any country—Mikesell) but often implies a sending in response to a demand (please remit the balance due on your account) In more general and in legal use the term is likely to imply a sending or referring back (as for further action or consideration) (where an appellate court . . . reverses an original sentence . . . and remits the record for appropriate action, the lower court may proceed to sentence the defendant anew in proper form and according to law—U. S. v. Keenan) (there may be disputes whether an issue belongs to the side of civil or to that of administrative law. Such conflicts and disputes are remitted . . . to the arbitrating authority—Ernest Barker) Route implies a sending along of something according to a predetermined route, and often suggests the reaching in proper succession of one person or place after another (route a memorandum to the various staff members) (route the films to a chain of motion-picture theaters) Ship applies to the sending especially of heavy goods or articles specifically by ship or more generally by any normal commercial transportation channel (ship coal to distant lands) (ship freight by rail) (kept busy . . . shipping mackerel and cod—C. R. Summer) Ana *speed, quicken: direct, order (see command): *go, leave, depart

sensation 1 Sensation, percep, sense-datum, sensum, image can denote the experience or process which is the result of the activity of a sense organ and its associated neural structures. Sensation (see also sensation 2), the most general of these terms, is applicable to a specific awareness (as of heat, pain, or odor) resulting from adequate stimulation (as sensory receptors receive a stimulus from without or within the body, whether this awareness enters fully into consciousness or not; specifically it means an impression received by a sensory end organ (as the retina of the eye, the taste buds of the tongue, or the tactile corpuscles of the skin) or by a combination of such end organs (the four basic taste sensations, sweet, sour, bitter, and salty) (gave himself up to the enjoyment of the sensations provided by a perfect spring day) (a reptile that appears . . . to squander more than two-thirds of its existence in a joyless stupor, and be lost to all sensation for months together—Gilbert White) Percept, sense-datum, and sensum are technical terms especially of epistemology that are subject to widely varied interpretation, but that typically denote a strictly individual and personal neural event occurring centrally in response to sensory stimulation and constituting an immediate unanalyzable private object of sensation (it makes for a neat little burlesque of the central debate between concept—the large, institutionalized idea, and percept—the irrediculously personal vision which must be coped with in its own terms—Rago) (instead of an irregular mass of pink sensation mixed with blue and red and topped with brown, he recognizes his mother’s face. These emerging organized groups of sensations which cluster together (and soon seem to belong together) and serve to indicate things in the physical environment are called percepts; these may be defined briefly as “sensations plus meaning”—that is, groups of sensations that have become organized into meaningful wholes or patterns. Thus every physical object represents a percept, or at least a potential one—Hunter Mead) (observation of physical objects is primarily the noticing of sense-data; and each person has and observes his own color and sound sensa, just as he has and observes his own twinges, nausea and touch sense-data—A. C. Garnett) (a sense-datum is by definition whatever appears to the senses and in so far as we confine ourselves to a description of our sense-data we cannot possibly be in error—Pap) (our sense organs must select certain predominant forms, if they are to make report of things and not of mere dissolving sensa—Langer) Image (see also image 1) applies to a sensation that results in a mental representation of the thing seen, the sound heard, and the odor smelled and in the retention of that mental representation in the memory (after I had looked long at it, and passed on, the image of that perfect flower remained . . . persistently in my mind—Hudson) (I had never spoken to her, except for a few casual words, and yet her . . . image accompanied me even in places the most hostile to romance—Joyce) Image also refers to a mental representation that can be evoked in the mind in the absence of the thing represented; in this case, the term may apply to a mental representation that is in the memory as a result of previous sense experience or that is a construction of the imagination or fancy out of various bits of sense experience or as a result of a verbal description (when I recall London, Paris, Rome . . . the image that first presents itself is the earliest one—Grandgent) (a succession of efforts to call up before us veracious images of a bedroom, a bed, pillows, a lighted candle, a woman asleep, a man speaking to himself—Montague) Ana *impression, impress, print, stamp: feeling, feel (see atmosphere): consciousness, awareness (see corresponding adjectives at aware)

2 Sensation, sense, feeling, sensibility are comparable when they mean the power to respond or the capacity for or the act of responding to stimuli, especially external physical stimuli. Sensation in technical use often denotes nothing more than the mere seeing, hearing, smelling, tasting, or feeling and does not imply recognition or comprehension (the first step, which most children take at the age of about five months, is to pass beyond mere pleasures of sensation, such as food and warmth, to the pleasure of social approbation—Russell) In more general use the term usually suggests somewhat more than mere receiving of impressions and may imply not only recognition but more or less clearly defined intellectual and emotional

sense 722 sensible

reactions (as pleasure or pain or curiosity). It therefore may apply to responses to other than purely physical stimuli. The sensation of finding a command of no avail is to the mind what sitting down upon a suddenly withdrawn chair is to the body—DeLand. There are sensations you cannot describe. You may know what causes them but you cannot tell what portions of your mind they affect nor yet, possibly, what parts of your physical entity—F. M. Ford. Sense is applied specifically to any one of the perceptual powers associated with the sensory end organs (the sense of taste) (the sense of smell) or in the plural (occasionally in the singular) to the combined powers which enable a sentient being to establish relations between itself and what is external to itself. (The sudden, violent shock almost took away my senses—Hudson.) (My brain immediately stirred, my senses unusually quickened—Galsworthy.) But it differs from sensation, when applied to the power or act of responding to stimuli, in suggesting a less corporeal and a more intellectual reaction and often a less objective stimulus. In fact its most emphatic implication in this sense is often that of intense awareness or of full consciousness (She had no sense at all of any word I said—W. H. Davies) (filled with a sense of pleasure so great that it constantly gave me pins and needles all along the lower parts of my legs—Dahl.) (With a haze suspended all around them so that their sense of direction and their sense of time were obscured—Cheever.) A deep sense of loss . . . a sense of loss and unbelief such as one might feel to discover suddenly that some great force in nature had ceased to operate—Wolfe.

Feeling (see also feeling 2; atmosphere 2) in its most specific meaning denotes the sense that has its end organs in the skin; usually it signifies the sense of touch (Had no feeling in his fingertips) but often it is more inclusive and suggests other sensations (as heat, cold, or pressure) that are typically perceived through stimulation of the skin (A feeling of chill in the air) But feeling is also used to denote a response to a stimulus or a set of stimuli that is a combination of sensation, emotion, and a degree of thought (Judged a situation by his feelings rather than by the facts) (You know her feelings about the vulgarity of these people) Often also, the term denotes not the response, but the power to respond in general or as a characteristic (He complains that she has no feeling) (The delicacy of his feeling makes him sensibly touched—Hume.) In this latter sense feeling is often replaced by sensibility, especially when a keenly impressionable nature and unusually delicate powers of appreciation or its opposite are implied (The extreme sensibility to physical suffering which characterizes modern civilization—Inge) (She was a creature of palpitating sensibility, with feelings so delicate that they responded to every breath—Crothers.) Sometimes sentimental or affected responsiveness is suggested (The nerveless sentimentalist and dreamer, who spends his life in a weltering sea of sensibility—James.)

Ana perceptibleness or perceptibility, tangibleness or tangibility, palpableness or palpability, ponderableness or ponderableness (see corresponding adjectives at perceptible): reaction, action, behavior (see corresponding verbs at act): response, answer (see under answer vb) sense n 1 *sensation, feeling, sensibility Ana awareness, consciousness, cognizance (see corresponding adjectives at aware): perception, *discernment, discrimination, penetration 2 Sense, common sense, good sense, horse sense, gumption, judgment, wisdom can all mean the quality of mind or character which enables one to make intelligent choices or decisions or to reach intelligent conclusions. Sense, because of its numerous significations, is often, when this meaning is intended, called common sense, good sense, or horse sense. All four terms imply a capacity—usually a native capacity—for seeing things as they are and without illusion or emotional bias, for making practical choices or decisions that are sane, prudent, fair, and reasonable and that commend themselves to the normal or average good mind (When it came to taking care of myself, I had little to offer next to the practical sense of an illiterate sharecropper—Mailer.) (Jane is a goose,) said the doctor, irritably. "Maggy is the only one that has any sense in that family"—DeLand. (The common sense of common men . . . has not been seriously affected by these still academic aberrations of our alleged wise men—Niebuhr.) (Women have often more of what is called good sense than men. They have fewer pretensions; are less implicated in theories; and judge of objects . . . more truly and naturally—Hazlitt.) Gumption implies native wit or sound common sense often combined with initiative and drive (There isn't a grain of intelligence in it. Nobody with more gumption than a grasshopper could go and sit and listen—D. H. Lawrence) (In practical talk, a man's common sense means his good judgment, his freedom from eccentricity, his gumption—James.) Judgment seldom applies to a native quality though it usually suggests a foundation in native good sense. But it also suggests intellectual qualities (as discernment of facts or conditions that are not obvious as well as knowledge of those that are ascertainable and an ability to comprehend the significance of those facts and conditions and to draw correct unbiased conclusions from them) which are the result of training, discipline, and experience (Tis true that strength and bustle build up a firm. But judgment and knowledge are what keep it established—Hardy) (The ultimate test of true worth in pleasure, as in everything else, is the trained judgment of the good and sensible man—Dickinson.) Wisdom is of all these terms the one of highest praise. It often suggests great soundness of judgment in practical affairs and unusual sagacity (Common sense in an uncommon degree is what the world calls wisdom—Coleridge) but it is also capable of suggesting an ideal quality of mind or character that is the result of a trained judgment exercised not only in practical affairs but in philosophical speculations, of wide experience in life and thought, of great learning, and of deep understanding (For wisdom is better than rubies; and all the things that may be desired are not to be compared to it—Prov 8:11) (Wisdom is said to be the funded experience which man has gathered by living; but for so many harvests the crop is still a light one. Knowledge he has gained and power, but not goodness and understanding—Repliplier.)

sensuous, sensual, luxurious, voluptuous, sybaritic, epicurean are comparable when they mean having to do with the gratification of the senses or providing pleasure by gratifying the senses. Both sensual and sensuous can imply reference to the sense organs and to perceptions based on the reactions of those organs and then come very close to sensory in meaning, but more typically both apply to things of the senses as opposed to things of the spirit or intellect. In this use sensuous is more likely to imply gratification of the senses for the sake of the aesthetic pleasure or the delight in beauty of color, sound, or form that is induced while sensual (for fuller treatment see CAR

sentence vb Sentence, condemn, damn, doom, proscribe can all mean to decree the fate or punishment of a person or sometimes a thing that has been adjudged guilty, unworthy, or unfit. Sentence is used in reference to the determination and pronouncement of punishment or penalty following an act of judging and an adverse verdict (was tried on the charge of inciting to riot and sentenced to thirty days in jail—E.S.Bates) (he tries and sentences them on their merits, in the swift summary way of boys, as good, bad, interesting, silly—Emerson) Condemn (see also CRITICIZE) implies both an adverse judgment and a sentence which carries with it a penalty (as forfeiture of one’s freedom, one’s rights, or one’s life) (Napoleon was condemned to exile) (cells for condemned prisoners) (was not inexorably condemned, as so many had feared at first, to be a vassal state in Hitler’s unspeakable New Order—Shirer) or, in the case of a thing, a forfeiture of its existence or of some status which has legally protected it from invasion; thus, to condemn an old building is legally to decree its destruction; to condemn a piece of property is to take it over for the uses of the state, on payment of its appraised value. Damn, akin to condemn, is not employed in modern law. In theological use it implies the condemnation of the soul to hell or to eternal punishment (he that believeth and is baptized shall be saved; but he that believeth not shall be damned—Mark 16:16) In general use, when it carries any implication, it is often employed in curses, imprecations, or expressions of strong disapproval (I give thee sixpence! I will see thee damned first—Canning) Otherwise it usually implies a verdict that is destructive or annihilating in its effects (if we fail, then we have damned every man to be the slave of fear—BarUCH) Doom adds to condemn the implication of a punishment or penalty that cannot be evaded or escaped because imposed by an inexorable power (I am thy father’s spirit, doomed for a certain term to walk the night—Shak) (he does certain things that are very brave . . . he gambles that he can be terribly, tragically wrong, and therefore be doomed, you see, doomed to Hell—MaIler) This idea of fate or destiny is so strongly stressed in doom that in some cases the impli

sentient, sensitive, impressionable, impressionable, responsive, responsive, susceptible can all mean readily affected by stimuli, usually external stimuli. Sentient implies a capacity to be affected through the senses; it may describe inclusively the lowest thing in animal life that feels, or the infant aware only of rudimentary sensation, or the man with the most highly developed powers of sensation or perception. The term sentient creature or sentient being may apply to a creature or being within these classes or between them (the flowers in remote forests that no eye has ever seen, the shells of delicate form and rare color hidden forever in the deep waters of the sea—these fulfill the ends of their existence, though they have delighted no sentient being—Binyon)

Whatever fate may have in store for the most sentient ... the most civilized, the most socially developed people of the modern world—Brownell) or it may apply to some-thing animate or inanimate to which similar powers are ascribed (it seemed the sentient earth must feel the summer—Mary Austin) Sensitive (see also LIABLE) applies usually to human beings who are quick or sharp in sensing anything. It may imply senses that respond to the most delicate of stimuli (to enjoy her [style] the reader must have ... a sensitive ear; especially must he have a sense of “pitch” in writing—Cather) or it may imply quick emotional reactions that are the outward signs of one's being easily moved or stirred (of age indeed and of death they had a horror proportional to their acute and sensitive enjoyment of life—Dickinson) or an acuteness of mind that is linked with acuteness of sense and of emotion (France, the most intellectually sensitive of modern nations—Babbit) Sometimes sensitive is applied not only to a part of the body (as a section of skin or an organ) which is abnormally or excessively reactive to stimuli but to inanimate things (as a photographic film, a thermometer, or an explosive) which responds quickly to some specific influencing factor (as light, heat, or shock) (the high vacuum tubes which constitute the sensitive brain of modern radio—Morrison) Impressive implies occasionally and impressionable regularly a readiness to be influenced, not only by a stronger power, but by a power that succeeds in producing an impression. They do not imply, as sensitive usually does, a power to judge accurately and delicately; rather they suggest crudeness or immaturity or indifference to the quality of the thing that impresses (the mind impressionable and soft with ease imbibes and copies what she hears and sees—Cowper) (what he couldn’t think of was David submitting, during his most impressionable years, to the worst superstitions of Capitalism—Mary Austin) Responsive, which implies sensitiveness to stimuli in particular or in general, suggests in addition a readiness to respond or react in the way that is wanted. Since it usually occurs only in a good sense, it is likely to connote alertness, cooperativeness, and enthusiasm (we shall presumably find them most responsive to the language, literature, and history of their own country—Inge) (she took up life, and became alert to the world again, responsive, like a ship in full sail, to every wind that blew—Rose Macaulay) Susceptible (see also LIABLE) suggests a fitness in disposition or in temperament to be affected by certain stimuli. Though it comes close to impressionable or responsive it more often implies weakness than does either of them, the weakness sometimes being stated but more frequently implied or suggested (as by the person considered or the circumstances attending) (in France it is ... bad manners to be too sus- ceptible—Browell) (she is susceptible to flattery) (he is very young and very susceptible to the charms of women) (his temper was not very susceptible of ... enthusiasm—Gibbon)

sentimental, romantic, mawkish, maudlin, soppy, mushy, mushy, sentimental can all mean comparable when they mean unduly or affectedly emotional. Sentimental usually suggests emotion that does not arise from genuine or natural feeling but is evoked by an external cause, by a particular mood, by an excess of sensibility, or for the sake of the thrill, or is merely an affectation that is temperamental, the moment's fashion, or designed to achieve an end (sentimental songs) (his sense of character is nil, and he is as pre-tentious as a rich whore, as sentimental as a lollipop—Mailer) (a sentimental person, interested in pathetic novels and all unhappy attachments—Thackeray) (we are all for tooting on the sentimental flute in literature—Stevenson) (he had an alert and a sentimental mind and worried about the health of Mr. Hiram's cart horse and ... the inmates of the Sailor's Home—Cheever) Romantic implies emotion that has little relation to things as they actually are, but is derived more from one's imagi-nation of what they should be ideally or from one's conceptions of them as formed by literature, art, or daydreams (the process of growing from romantic boyhood into cynical maturity—Shaw) (its premise is romantic, if only because it assumes that every sparrow ... is a warbler, if not a nightingale—J. M. Brown) (it has become the fashion to smile a little at hopes for the world ... But it could be that it is precisely such dreams and visions that are needed—Edman) Mawkish, when it simpering with delight and mawkish with pathos—J. D. Hart) Maudlin stresses a lack of balance or self-restraint

that shows itself in emotional excess (as unrestrained tears and lamentations); usually also it suggests extreme or contemptible silliness (the mob became not only enthusiastic but maudlin—Disraeli) (saying things that were inept, maudlin, unhinged, and knowing then that these very words must drive him on and on toward . . . more helpless depths of drunkenness—Styron) Sappy, mushy, and slushy come close to mawkish in their suggestion of distasteful and disgusting sentimentality. Sappy (chiefly in British use) often carries a strong suggestion of silliness in showing affection (they do not permit themselves to show much family affection, so who are we to object if they go soppy over a few four-footed friends?—Huxley) (a naturally sad but never soppy poet—Fraser) Sappy may suggest softness or wishy-washiness (Stuffy rolled over on her back and paddled the air hysterically, a hypocrite, trading shamelessly on her sex and the mushy hearts of humans—Panter-Downes) (you may . . . be a sharp, cynical sort of person; or you may be a nice, mushy, amiable, good-natured one—Shaw) Slushy applies chiefly to utterances or personalities that are so sentimental or emotionally confused as to seem senseless (slushy stories) (pander to everything that's shoddy and slushy and third-rate in human nature—Buchan)

>Ana emotional, affectionate, feeling, passionate (see corresponding nouns at FEELING): affecting, moving, pathetic, touching: affected, pretended, counterfeited, feigned, simulated (see AFFECT)

**separate** vb Separate, part, divide, sever, Sunder, divorce can all mean to become or cause to become disunited or disjoined. Separate implies a putting or keeping apart; it may suggest a scattering or dispersion of units (forces that separate families) (separate the parts of a watch) or a removal of one from the other (separate a husband from his wife) (the business of government cannot and should not be separated from the day-to-day lives of the human beings who conduct it—T. E. Dewey) (separate the wheat from the chaff) (separated his feelings from his work) or the presence of an intervening thing or things (the Atlantic separates Europe from America) (a thousand miles separate the two branches of the family) ("What separates the men and the girls? A fence or something?" “Just foliage, dear, and upbringence”—Wouk) Part usually suggests the separation of two persons or things in close union or association; often also it suggests a complete or final separation (as by death or violence) (if aught but death part thee and me—Ruth 1:17) (part two combatants) Divide commonly stresses the idea of parts, groups, or sections resulting from literal or figurative cutting, breaking, or branchings (divide a pie into six pieces) (divide the government into the executive, legislative, and judicial branches) (the that will divide a minute into a thousand parts—Shak) Divide often, in addition, carries an implication of apportioning, distributing, or sharing (divide the candy among the children) (divide profits) (the grocer got along well with his assistant. They divided tasks and waited on alternate customers—Malamud) (divided his estate equitably among his heirs) Often divide is used in place of separate, especially when mutual antagonism or wide separation is connoted (united we stand, divided we fall) (the broad and deep gulf which . . . divides the living from the dead, the organic from the inorganic—Inge) (the suspicion which the Citizens' Committee predicted would divide neighbor from neighbor—Clinton) Sever adds the implication of violence by or as if by cutting and frequently applies to the separation of a part from the whole or of persons or things that are joined in affection, close affinity, or natural association (sever a branch from the trunk by one blow of the ax) (sever the head from the body) (severed from thee, can I survive?—Burns) (the hour is ill which severs those it should unite—Shelley) (finding herself severed from formal and religious education, she struggled with a sense of guilt—Hervey) Sunder often implies a violent rending or wrenching apart (even as a splitted bark, so Sunder we—Shak) (the Romans sundered copper-bearing rock by alternately playing fire and water on it—New Yorker) (man's most significant personal relationship is sundered in an atmosphere of chicanery and buffoonery—Cohn) Divorce implies the separation of two or more things so closely associated that they interact upon each other or work well only in union with each other (its academic tendency to divorce form from matter—Day Lewis) (you cannot divorce accurate thought from accurate speech—Quiller-Couch) Divorce can specifically refer to the legal dissolution of a marriage, a use in which it contrasts with separate which implies a mutually agreed ending of cohabitation without actual legal termination of the marital state. set 1. Set, circle, coterie, clique can all denote a more or less carefully selected or exclusive group of persons having a common interest. Set applies to a comparatively large group, especially of society men and women bound together by common tastes (a solid citizen of the fast and fraticial international set—Kenneth Fearing) (I was myself living in several sets that had no connection with one another—Maugham) (her college set had stayed rigidly in a rigid path . . . which they considered smart—Wouk) Circle implies a common center of the group (as a person or a cause that draws persons to him or it) or a common interest, activity, or occupation (the work of the younger writers . . . has even penetrated into academic circles—Day Lewis) (like sex, the word segregation was not mentioned in the best circles—Lillian Smith) (she felt violently the gaps that death made in her circle—Pritchett) (an active figure in Madrid's literary and theatrical circles—Current Biog.) Coterie stresses the notion of selectness or of congeniality within the small circle; clique heightens the implication of an often selfish or arrogant exclusiveness (we three formed a little coterie within the household—Symonds) (the poetry of revolt is apt to become the poetry of a coterie—Lowes) (the best English society—mind, I don't call the London exclusive clique the best English society—Coleridge) (the corruption and debauchery of the homosexual clique—Shirley Jackson) (every hoodlum in every crack gang and clique who fancied himself with the blade—Mailer)

severe, stern, austere, ascetic can all mean given to or characterized by strict discipline and firm restraint.

Severe is applicable to persons and their looks, acts, thoughts, and utterances or to things (as laws, penalties, judgments, and styles) for which persons are responsible. In all these applications it implies rigorous standards of what is just, right, ethical, beautiful, or acceptable and unsparring or exacting adherence to them; it not only excludes every hint of laxity or indulgence but often suggests a preference for what is hard, plain, or meager (a severe teacher) (severe impartiality) (severe in dress) (these bleak and severe Sunday mornings, though they left me with a respect for the Bible, had the effect of antagonizing me against it—Edmund Wilson) Very often the word suggests harshness or even cruelty (a severe penalty) (severe discipline) (severe criticism) (a severe test of his endurance) It is then by extension referable also to things for which persons are not responsible but which similarly impose pain or acute discomfort (a severe attack of lumbago) (I do not think that she anticipated anything so severe as arsenic on her blackberries—Shirley Jackson) (a severe winter) Stern, though it often implies severity when applied to persons or their acts or words, stresses inflexibility or inexorability of temper; thus, a severe judge may appear kindly though dispassionately just, but a stern judge reveals no disposition to be mild or lenient; to be made of stern stuff is to have an unyielding will or an extraordinarily resolute character (he wanted to bang on his desk, arise magnificently, like a good confessor, being purposeful and stern—Styron) In extended use stern is applied to what cannot be escaped or evaded (stern necessity) (the stern compulsion of facts—Buchan) or to what is harsh and forbidding in its appearance or in its external aspects (the stern and rockbound land . . . on which his lot was cast—Faulkner) (a marble bath that made cleanliness a luxury instead of one of the sternest of the virtues, as it seemed at home—Shaw) Austere is chiefly applied to persons, their habits, their modes of life, the environments they create, or the works of art they produce; in these applications austere implies the absence of appealing qualities (as feeling, warmth, color, animation, and ornament) and therefore positively implies dispassionateness, coldness, reserve, or barrenness (my common conversation I do acknowledge austere, my behavior full of rigor—Browne) (secretly, these austere tyrants seized with delight upon so estimable an excuse for censuring the child initiates new processes of thought and styles) for which persons are responsible. And even the seeking of what is painful or disagreeable (for the austere dignity and simplicity of their existence—Pater) (mathematics, rightly viewed, possesses not only truth, but supreme beauty—a beauty cold and austere, like that of sculpture—Russell) (a landscape lightly strewn with snow, and rendered graciously austere by long, converging lines of leafless poplars—Wylie)

Ascetic implies laborious and exacting spiritual training or discipline, self-denial, abstention from what is pleasurable, and even the seeking of what is painful or disagreeable (strong-willed and ascetic, he discovered in discipline the chief end for which the children of Adam are created—Parrington) (a people possessed of the epicurean rather than the ascetic ideal in morals—Brownell) The idea of discipline, especially by abstention from what is pleasurable or easy or self-indulgent for the sake of spiritual or intellectual ends may be emphasized (for science is ascetic. It is a discipline and a control of personal impulse that could arise only in a relatively mature civilization—Baker Brownell) (there was in him a real nobility, an even ascetic firmness and purity of

Shabby

- Ellis

**Shabby**

Shabby, dilapidated, dingy, faded, seedy, threadbare refer to the appearance of persons and of things and mean showing signs of wear and tear. Shabby applies to persons and places and suggests a lack of freshness or newness in those items that contribute to appearance; sometimes the term applies directly to the things, especially clothes, which so contribute. Poverty is often suggested as the cause of this run-down condition but various other causes (as neglect or indifference) may also be suggested. Old Bart, shabby and inconspicuous, dunking pound cake with his dirty fingers — W. S. Burroughs (villages . . . with their shabby, unpainted shacks, dropping with decay — Brooks) 

**Dilapidated** (compare dilapidate under ruin) implies a worse appearance than shabby, usually suggesting a broken-down or tumble-down condition resulting from neglectful lack of repairs or from careless abuse. A dilapidated fence with its gate hanging from one hinge; sat down in a dilapidated easy chair minus a cushion — Purdy

**Dingy** (an old toy is so much better . . . . The very fact — Purdy)

Dingy applies to what implies lack of freshness but it connotes the effects of gradual soiling that dulls the colors or dims the brightness; (out of his dingy retreat, dirty and uncomfortable, he would appear resplendent — Obert Sitwell) 

**Shabby in attire, dingy of linen — Thackeray** (counting another man’s money . . . in a dingy office — Shaw) (he flashed from dingy obscurity into splendor — H. G. Wells)

**Faded** also implies lack of freshness but it connotes the loss of vigor or brightness that shows that a person or thing has passed its prime and is revealing signs of drooping and withering; her slightly stale and faded gush about Chopin and her memories of Paris in the spring — Edmund Wilson (she lives with her mother, a faded tired woman who played Lady Capulet — Wilde) her clothes were always the same and it is hard to remember what she wore.

**Dingy to a feeling of warmth — Henry Miller**

Dingy applies to what is no longer fresh or new in appearance and shows the effects of gradual soiling that dulls the colors or dims the brightness.

**Dingy retreat, dirty and uncomfortable, — Obert Sitwell**

Dingy also implies lack of freshness but it connotes the effects of gradual soiling that dulls the colors or dims the brightness

**Threadbare** (see also TRITE) in its basic use implies such wear of fabric that all nap is worn away and the threads are visible; the curves of hips and breasts already discernible under the too short and often threadbare clothes — Metalious but often this basic notion is lost and the emphasis is on the shabby state typical of or the effect of extreme grinding poverty (the only opportunity . . . to find escape from the grim, drab, threadbare unpicturesque poverty of her inharmonious home — Dorothy Canfield) (England, which has a threadbare Treasury — Sulzberger) (finally got threadbare enough and hungry enough to overlook my scruples — O’Leary)

**Shabby** (see HAGGARD) dowdy, frowzy, slatternly: shopworn, *trite: decrepit (see WEAK)

**Con** trim, spik, spick-and-span, neat, tidy: *new, fresh, new-fashioned

Contemplative, despicable, pitiable, sorry, scurvy, cheap, beggarly — bell, base, vile

**Shadow**

Shade, shadow, umbrage, umbra, penumbra, adumbration can mean the comparative darkness caused by something which intercepts rays of light. Shade carries no implication of a darkness that has a particular form or definite limit but the term often stresses protection from the glare, heat, or other effect of the light that is cut off (the forest, one vast mass of mingling shade — Shelley) (chiaroscuro, by which light reveals [in paintings] the richness of shade and shade heightens the brightness of light — Ellis) (the trees afforded shade and shelter — Carter) Shade usually applies to shade which preserves something of the form of the object which intercepts the light; (it [the garden] . . . has neither arbor, nor alcove, nor other shade, except the shadow of the house — Cowper)

**Shade**

Saw . . . the shadow of some piece of pointed lace, in the Queen’s shadow, vibrate on the walls — Tennyson (the shadowless winter, when it is all shade and therefore no shade — Jefferies)

In extended use shade implies darkness or obscurity; shadow, insubstantiality or unreality (there no shade can last in that deep shadow behind the tomb — Tennyson) (’tis but the shadow of a wife you see, the name and not the thing — Shak)

**Umbrage** (see also OFFENSE) applies chiefly to the shade cast by heavy foliage or trees, though sometimes it refers to the mass of trees or foliage which make for heavy shade.

Shake, the ordinary and the comprehensive term, can apply to any such movement, often with a suggestion of roughness and irregularity (the earth itself seemed to shake beneath my feet—Hudson} (he shook with fear) (his body shook with laughter) Tremble applies specifically to a slight, rapid shaking of the human body, especially when one is agitated or unmanned (as by fear, passion, cold, or fatigue) (she stood with her hand on the doorknob, her whole body trembling—Anderson) (she is so radiant in her pure beauty that the limbs of the young man tremble—Meredith} The term may apply also to things that shake in a manner suggestive of human trembling (not a breath of breeze even yet ruffled the water: but momentarily it trembled of its own accord, shattering the reflections—Richard Hughes} Quake may be used in place of tremble but it commonly carries a stronger implication of violent shaking or of extreme agitation (his name was a terror that made the dead quake in their graves—Ouida} (his accusing hand . . . stiffly extended, quaking in mute condemnation—Terry Southern} Often the term suggests either an internal convulsion (as a heart broken by some unendurable blow) a quivering of the heart (the dead heart of his old hound) a quiver of his nerves (a faint quiver of his mouth) a quiver of his eye (a quiver of his eye) or to a sudden, often seeming, quivering of a thing (his heart quivered, as a ship shivers at the mountainous crash of the waters—Bennett} (when the first star shivers and the last wave pales—Flecker} Shudder usually suggests the effect of something horrible or revolting; physically it implies a sudden sharp quivering that for the moment affects the entire body or mass (the spotted shadow of the heaven tree shuddered and pulsed monstrously in scarce any wind—Faulkner} (I am afraid of it,) she answered, shuddering—Dickens} (it was one of those ills, from which we turn away our eyes, shuddering—Deland} (the chill of an age-old recognition shuddered my spine; a voice was sounding in the dimly lit air—Miller} Quaver sometimes implies irregular vibration or fluctuation, especially as an effect of something that disturbs (the breeze . . . set the flames of the streetlamps quavering—Stevenson} but often it stresses tremulousness especially in reference to voices and utterances affected by weakness or emotion (a reedy, quavering voice—Doyle} (dead returned, and the words quavered as she spoke them—Meredith} (the quavering, envenomed voice of . . . shameless, brazen, barefaced, brash, impudent can apply to persons and their acts that defy the moral code or social decorum when they are characterized by boldness and a lack of a sense of shame. sharp

with another or others. Share implies that one as the original owner or holder grants the part use, enjoyment, or possession to another (willing to share her room at the convention) (sharing lunch with a squirrel) or that one as the receiver accepts the part use, enjoyment, or possession of something that belongs to or comes from another (she asked all to share in the salad) (I shared my sister's room last night when we had a guest) (the employees shared in the profits) (she shared unwillingly the grocer's fate though . . . her dissatisfaction went no farther than nagging—Malamud). But share may also take for its subject a group and imply a community of possession or use (you do not share the great earth among you fairly—Jeffries) (flowers have always been sinister to me when they are lovely—they seem to share the elusive character of a flower—Mailer) Partake implies that one has or takes a part or a share in a thing (as a work, an experience, or an enterprise) (participate in a discussion) (may I ask you whether your wife participates in this undertaking?—Meredith) (the commerce of the United States with foreign nations, is that of the whole United States. Morrison> Snip, like clip, may imply the employment of
scissors, but it may also suggest the use of sharp fingernails
or of any other instrument by which a part may be
pinched or cut off; it differs from clip in emphasizing
suddenness and quickness in movement. It, therefore,
often suggests a cutting off of a small piece at a time or a
cutting into bits <snip off a loose thread> <snip the dead
flowers from a plant> <the child, with its newly found toy,
a pair of scissors, was clipping the newspaper into pieces>
Crop, in most of its meanings, implies the cutting off of
the top (as of a tree or grass), but when it emphasizes that
implication, it usually suggests the cutting off of a piece at
the top (as for identification or punishment) or a cutting
extremely close (as of the hair) <the stiff-necked sectaries
... who had been glad to stand in pillories and suffer their
ears to be cropped rather than put bread in the mouths of
priests—Brooks> <his hair ... had been cropped by the
prison barber—Teats>

to a shallow place, especially one that is difficult to navigate (dangerous shoals in uncharted waters) Bank, often as the plural banks, is applied to one that is formed by a muddy, sandy, or gravelly elevation but is deep enough to make navigation safe for lighter craft (as fishing boats) (the Grand Bank, also called the Banks of Newfoundland, is a noted fishing ground) and reef, to one where rock lies dangerously close to the surface (the reef-bound shores of Bermuda). Technically shoal is applied to elevations which are not rocky and on which the water is not more than 6 fathoms deep, bank to a similar elevation rising from the continental shelf and usually having a broad flat top under deeper water, and reef to a rocky elevation on which the water at low tide is 6 fathoms or less in depth. Bar carries implications found in many senses (as of length, narrowness, and hindrance). It is applied to a ridge of sand or gravel piled up at and often across or nearly across a river's mouth or an entrance to a harbor and obstructing navigation.

**shorten**, curtail, abbreviate, abridge, retrench can all mean to reduce in extent, especially by cutting. Shorten commonly implies reduction in length or duration (shorten a road by eliminating curves) (to shorten a visit). It is also often used of apparent rather than actual length (they shortened the journey by telling stories) (if we really have a murderer in our midst, your easiest method of shortening your own young life would be to let him know how clever you are—Mary Fitt) (the vaccines will not even shorten the course of a cold—Fishbein) Curtail adds to shorten the implication of making cuts that impair completeness or cause deprivation (the interruption curtailed his speech) (the outdoor ceremony was curtailed because of the storm) (curtailed rights) (emergency order drastically curtailing the use of fuel—Current Biog.)

*Abbreviate* implies reducing by omitting some normally present or following part; thus one abbreviates a word by cutting out or cutting off letters; one abbreviates a discussion by bringing it to a close sooner than planned or anticipated (their outing was abbreviated by a sudden drenching downpour) (a stocky square-jawed man of great physical strength and energy, though of abbreviated intelligence—Shirer) Abridge expresses reduction in compass or scope rather than more than in length (I feel you do not fully comprehend the danger of abridging the liberties of the people—Lincoln) but it may imply the retention of all that is essential and the relative completeness of the result (abridge a dictionary) Retrench stresses reduction in extent or costs of something felt to be in excess (retrench expenses) (the lords are retrenching visibly, and are especially careful to avoid any form of ostentation—Nancy Mitford)

showy, pretentious, ostentatious can mean making or presenting an outward display that is by implication greater than what is necessary or justifiable. Showy, the ordinary term, carries less definite implications than the other words. shrewd, sagacious, perspicacious, astute can all mean acute in perception and sound in judgment, especially in reference to practical affairs. Shrewd implies native
closeness, acumen, and an exceptional ability to see below the surface; it often also connotes hardheadedness
(a shrewd bargain)  (a shrewd observer)  (a shrewd remark)  (the shrewd wisdom of an unlettered old woman —Pater)  (the hard mind of a shrewd small-town boy, the kind of boy who knows you have a real cigar only when you are the biggest man in town —Mailer)  (she had had a mania for buying and selling land, and was a shrewd judge of values —Wolfe)  Sagacious is usually applied to persons or their decisions, their judgments, and their methods of pursuing their ends; it stresses penetration, discernment, judiciousness, and often, farsightedness (the auctioneer, a small sagacious individual . . ., was directing his two blue-jowled assistants in the business of displaying to their best advantage the remaining pieces —Wylie)  (he left an estate of approximately $172,000, accumulated through sagacious investments —Dillard)  Perspicacious is applied chiefly to mental sight or insight and suggests unusual power to see through and to understand what is dark, hidden, mysterious, or puzzling (a perspicacious reader of character)  (a perspicacious critic)  (we must make allowance also for those blind spots which are found in the most perspicacious mortals —L. P. Smith)  (some perspicacious manufacturer of another product . . ., beat the rap the same way —Ace)  (it occurred to the perspicacious reddleman that he would have acted more wisely by appearing less unimpressionable —Hardy)  Astute implies a combination of shrewdness and perspicacity and often, in addition, connotes an ability to keep one’s counsel or an incapacity for being fooled, especially where one’s own interests are concerned (savages . . . are often as . . . astute socially as trained diplomats —James)  (the man who can make millions by an astute business deal —Hobson)  Astute, opprobriously used, heightens the suggestion, sometimes present in perspicacious, of artfulness, diplomacy, or craft. Shy implies a shrinking, sometimes constitutional, sometimes the result of inexperience, from unfamiliarity or contact with others; shyness usually manifests itself in a certain reserve of manner or in timidity in approaching others (the savage . . . is a shy person, imbued with the notion that certain things are not to be talked of to strangers —Inge)  (shy in the presence of strangers and bold with people she knew well —Anderson)  Bashful implies an instinctive or constitutional shrinking from public notice that usually expresses itself in awkwardness of demeanor and is especially characteristic of childhood and adolescence; as applied to mature persons it connotes abnormal or excessive shyness and lack of savoir faire (he hesitated, awkward and bashful, shifted his weight from one leg to the other —London)  (as he grew up, he became increasingly bashful, and he never had a close friend of either sex —Donovan)  Diffident implies a distrust, which may or may not be warranted, of one’s own ability, opinions, or powers that gives rise to hesitation in their exercise (he was conservative and diffident by nature, and even after all these years he felt tongue-tied in the presence of those stricken by grief —Styron)  Modest, without implying self-distrust, may denote an absence of all undue confidence in oneself or one’s powers (the most modest, silent, sheepfaced and meek of little men —Thackeray)  but often it stresses not an inner lack of confidence but a manner free from brashness, boldness, and self-assertiveness (stood at ease . . . with the modest air of a man who has given his all and is reasonably assured it is enough —Wolfe)  (entirely natural, modest, and unaffected in manner —Elliot Clark)  Coy suggests assumed or affected shyness, often with the further implication of coquetry (I was vexed, and resolved to be even with her by not visiting the wood for some time. sigh vb Sigh, sob, moan, groan are comparable as verbs
when they mean to emit a sound, commonly an inarticulate
sound, indicative of mental or physical pain or distress
and as nouns, such a sound. Sigh implies a deep audible
respiration that is a usually involuntary expression of grief,
intense longing, regret, discouragement, weariness, or
boredom (sigh no more, ladies, sigh no more, men were
deceivers ever—Shak.) *a sigh uttered from the fullness
of the heart—Hazlitt) *the stranger sometimes seemed
to be under stress, sighed much and muttered inaudibly
to himself—Malamud) Sob implies a sound made by
a convulsive catching of the breath when weeping or when
both speaking and crying or when trying to restrain
tears; the noun, however, more often refers solely to this
sound and does not do the verb, which often implies accompany-
ing tears and speech ("Ah!" It was a long, grievous sound,
like a sigh—almost like a sob—Dickens) *the mother
. . . knelt by his side, and they prayed, and their joint
sobs shook their bodies, but neither of them shed many
tears—Meredith) *she sobbed out her story (like a child
sobbing itself to sleep) Moan implies a low, pro-
longed, usually inarticulate sound, especially one that
is indicative of intense suffering of mind or body (they
are quick to hear the moans of immemorial grief—
Blunden) *Polly moaned, overwhelmed with retro-
spective shame and embarrassment—Huxley) *to hear
the piteous moan that Rutland made—Shak.)
The term, however, is often extended to sounds suggest-
ive of pain, complaint, or murmuring (the moan of the
wind) (the moan of doves in immemorial elms—Tenny-
son) (the rain and the wind splashed and gurgled and
moaned round the house—Kipling) Groan implies a
heavier sound than moan and more often suggests an
unbearable weight of suffering or a strong spirit of re-
belligiousness to pain or discomfort (thy groans did make
wolves howl—Shak.) *the whole creation groaned and
travailed in pain together until now—Rom 8:22) Often
however, in extended use the term carries no hint of
suffering but implies noises made in strong disapproval
or in pretended suffering (greet a speaker with groans)
by or something that moves or swings heavily (trees
groaning in the wind) (the door upon its hinges groans—
Keats) *the groan under the floorboard had changed to

sign 1 Sign, mark, token, badge, note, symptom can
denote a sensible and usually visible indication by means
of which something not outwardly apparent or obvious
is made known or revealed. Sign is the most compre-
sensive of these terms, being referable to a symbol (see
also CHARACTER 1) or a symbolic device or act (the mace
is the sign of authority) (make the sign of the cross)
or to a visible or sensible manifestation of a mood, a
mental or physical state, or a quality of character (good
manners are signs of good breeding) (they are gestures
of exclusion—not snobbery, merely signs of a private
life with all its unique standards—Fadiman) *suicide
is the sign of failure, misery, and despair—Ellis) or to
a trace or vestige of someone or something (the signs
of her fate in a footprint here, a broken twig there, a trillion
dropped by the way—Conrad) or to objective evidence
that serves as a presage or foretoken (signs of an early
spring) (there are signs that poetry is beginning to
occupy itself again with the possibilities of sound—Day
Lewis) (two men that night watched for a sign, listened
for a wonder—Gwyn Jones) and concretely to a placard,
board, tablet, or card that serves to identify, announce,
or direct (watch for a road sign) (a brilliantly lighted bar
sign) (did you see the sign announcing the new play?)
("for rent" signs in the dingy windows) Mark (see
also CHARACTER 1) may be preferred to sign when the
distinguishing or revealing indication is thought of as
something impressed upon a thing or inherently charac-
teristic of it, often in contrast to something outwardly
apparent or displayed (the bitter experience left its
mark on him) (courtesy is the mark of a gentleman)
(the distinguishing marks of Victorian poetry) *what,
then, are the marks of culture and efficiency?—Suz-
allo) (the unrealized schemes of [the past] . . . have usu-
ally left their mark in the shape of some unfinished pier,
half completed parade—Angus Wilson) Concretely also
mark is applied either (1) to some visible trace (as a scar
or a stain or a track) left upon a thing (birthmark) (the
marks of smallpox) (the high-water mark is observable
on the pier's supports) (the marks of an army's passage)
they found not a button, or feather, or mark, by which
they could tell that they stood on the ground where the
Baker had met with the Snark—Lewis Carroll) or (2)
to something that is affixed in order to distinguish, identify,
or label a particular thing or to indicate its ownership
(a trademark) (a laundry mark) Token (see also PLEDGE)
can replace sign and also mark except in their specific
concrete applications when the sensible indication serves
as a proof of or is given as evidence of the actual existence
of something that has no physical existence (how could
he doubt her love when he had had so many tokens of
her affection?) (the savages bore gifts as tokens of their
desire for peace and friendship) (tokens tossed his way—
an occasional salute, a "well done" for the preflights
. . . a tense smile—were hoarded fervently—Pynchon)

Badge designates a piece of metal or a ribbon carrying
an inscription or emblem and worn upon the person as
a token of one's membership in a society or as a sign of
one's office, employment, or function (a policeman's
badge) (each delegate wore a badge) (a gold key is the
badge of membership in Phi Beta Kappa) In extended
use badge often is employed in place of sign, mark, or
token when it is thought of in reference to a class, a group,
a category of persons, or as a distinctive feature of their
dress, their appearance, or their character (for sufferance
is the badge of all our tribe—Shak.) (essentially we were
taught to regard culture as a veneer, a badge) of class dis-

<tolerance, moderation, and pity are the abiding notes which help to keep Chaucer's poetry level with life—H. S. Bennett> Symptom can apply to any of the physical or mental changes from the normal which can be interpreted as evidence of disease, but in medical use it is commonly restricted to the subjective evidences of disease primarily apparent to the sufferer and is then opposed to sign, which is applied to the objective evidences of abnormality that are primarily determined by tests and instruments (symptoms and signs taken together constitute the evidence on which a diagnosis can be based). In extended use the term tends to follow popular rather than professional medical use and is applicable to an outward indication of an inner change (as in an institution, a state, or the body politic) or to an external phenomenon that may be interpreted as the result of some internal condition (as a weakness, defect, or disturbance) (even that . . . is treated lightly as a foible of the age, and not as a symptom of social decay and change—T. S. Eliot).<the belief that a young man's athletic record is a test of his worth is a symptom of our general failure to grasp the need of knowledge and thought in mastering the complex modern world—Russell> (she wanted . . . to be alone so that she could study and afterwards remember each symptom of this excitement that had caught her—Auchincloss).<An indication, betokening, attesting or attestation (see corresponding verbs at indicate): manifestation, evidencing or evidence, demonstration, showing or show (see corresponding verbs at show): intimation, suggestion (see corresponding verbs at suggest)> 2 Sign, signal can both mean a motion, an action, a gesture, or a word by which a command or wish is expressed or a thought is made known. Sign (see also Sign 1; Character 1) is the general term that in itself carries no explicit connotations; it is used in reference to a bodily motion (as a shrug) or a gesture (as a beckoning) or an action (as a pantomime) by which one conveys a thought, a command, a direction, or a need to another with whom one either cannot communicate orally (as by reason of deaf-mutism, or lack of a common language, or distance) or does not wish to communicate orally (as from consideration of others or desire for secrecy) (put a finger to her lips as a sign for quiet) (the explorer made signs to the natives to show his friendly intentions) Signal usually applies to a conventional and recognizable sign that typically conveys a command, a direction, or a warning (she was startled by a ring at the door, the certain signal of a visitor—Austen) (the flying of the first champagne corks gave the signal, and a hum began to spread—Meredith) (at a signal given by the train conductor, the engineer climbed into his engine—Anderson) Signal is also applied to mechanical devices which by operating lights, moving barriers, or sounding an alarm, take the place of a guard, a watchman, or a policeman (traffic signals) (railroad signals) 2 Signification, import, *meaning, sense, acceptance (see under Denote): Signification significance, import, *meaning, sense, acceptance 2 *importance, import, consequence, moment, weight Ana *worth, value, *influence, authority, credit, prestige: merit, *excellence, virtue, perfection Significant *expressive, meaningful, pregnant, eloquent, sentientious Ana cogent, telling, convincing, compelling, *valid, sound: forcible, forceful, *powerful: important, momentous, weighty (see corresponding nouns at Importance) Signification significance, import, *meaning, sense, acceptance Ana signifying, meaning, denoting (see Mean vb): denotation, connotation (see under Denote 2) Signify import, *mean, denote Ana convey, *carry, bear: *denote, connote: imply, *suggest silent 1 Silent, uncommunicative, taciturn, reticent, reserved, secretive, close, close-lipped, closed-mouthed, tight-lipped are comparable when they mean showing restraint in speaking to or with others. Silent and uncommunicative often imply a tendency to say no more than is absolutely necessary as a matter of habit (he had had a rather unhappy boyhood; and it made him a silent man—Conrad) (a stern, silent man, long a widower—Cather) (whose uncommunicative heart will scarce one precious word impart—Swift) or an abstinence from speech on some particular occasion typically because of caution or the stress of emotion (a silent, shaky embrace, each afraid to entrust words to her trembling lips—Styron) (she found the presidential nominee uncommunicative regarding plans to put women in high office—Current Bio.) Taciturn implies a temperamental disinclination to speech; it usually also connotes unsociableness or the nature of one who grudgingly converses when necessary (Benson was . . . a taciturn hater of woman—Meredith) (always taciturn, he now hardly spoke at all—Cete) (the farmer was taciturn and drove them speechlessly to the house—Buck) Reticent implies the disposition to keep one's own counsel or the habit or fact of withholding much that might be said, especially under particular circumstances; the term does not usually connote silence but, rather, sparing speech or an indisposition to discuss one's private affairs (all subsequent autobiographies and confessions seem in comparison reticent, wanting in detail—L. P. Smith) (he had been characteristically reticent regarding the details of his own financial affairs—Marquand) (it was a matter upon which he was reticent, and with persons of his kidney a direct question is never very discreet—Maugham) Reserved implies reticence but it also suggests formality, standoffishness, or a temperamental disposition to the give and take of friendly conversation or familiar intercourse (a reserved and distant demeanor) (grave, though with no formal solemnity, reserved if not exactly repressed . . . she was yet a woman of unmistakable force of character—Ellis) (habitually was reserved in speech, withholding her opinion—Sackville-West) Secretive also implies reticence, but it adds an implication of disparagement that reticent usually lacks, for it suggests an opposition to frank or open and often connotes an attempt to hide or conceal something that might properly be told (a secretive public official is the despair of reporters) (the rapport between this man and his parents was so intense and tacit that it seemed secretive—Cheever) (his voice became secretive and confidential, the voice of a man divulging fabulous professional secrets—Dahl) Close (see also Close 1 & 2) comes near to reticent and secretive in its meaning but it usually denotes a dis-
position rather than an attitude or manner and, therefore, often suggests taciturnity (he was too close to name his circumstances to me—Dickens) Close-lipped and close-mouthed are often used in place of close not only as more picturesque terms but also as more clearly implying a determined refusal to disclose something that another desires to know (he is always close-mouthed about his plans) (she proved a good secretary because she was close-lipped about all matters of a confidential nature) (those few who knew actual combat destination kept close-lipped—Dodson) (the family has been . . . extraordinarily close-mouthed about even the broad outline of its commercial affairs—Freeman Lincoln) Tight-lipped carries a stronger implication of resolute but not necessarily temperamental reticence (infinite caution, tight-lipped, unshakable patience, these must be his rule—Buchan)

human beings it usually implies utterance in words with musical inflections or modulations and often suggests such modulated utterance as an art to be practiced, studied, or learned (sing an aria) (sing the part of Faust) (sing a plaintive song) (she studied singing diligently but lacked the voice to profit from instruction) (grasshoppers chirping, and birds singing—Shaw) (the rigging sang in the wind) Trolley usually suggests the use of full round tones in singing (while mountains were unloosing their hair to the music waterfalls trolled like bells for the wedding—Babette Deutsch) and is especially applicable to the hearty voices of jovial men raised in singing or the resounding celebration in song of great events or deeds (let us be jocund. Will you trolley the catch you taught me but whiere?—Shak) (strange adventure that we're trollying: modest maid and gallant groom—Gilbert) Carol suggests the voices of youthful, lively, or joyous singers, usually of persons, sometimes of birds; it may or may not suggest the singing of cars, but it often implies merriment or effortlessness and spontaneity (used to carol cheerfully in the morning, locked in the single bathroom—Canby) (a wren on a tree stump caroled clear—Masfield) Descant (see also DISCOURSE) implies part singing or, especially, the singing of a higher part in harmony with the plainsong of the tenor in a contrapuntal treatment. Descant often merely implies harmonious singing or singing in harmony with (they will . . . sing so sweetly, and withall descant it so finely and tunably—Topsell) (a device by which several singers appear to be descanting, when in fact only one is doing so—Grove's Dict. of Music) Warble frequently implies singing in a soft and gentle voice but with various modulations (as turns and trills and quavers); often it means no more than to sing melodiously or with sweetness (warble his native woodnotes wild—Milton) (the skylark warbles high his trembling thrilling ecstasy—Gray) Trill basically means to sing with trills or vibrations (as by rapidly alternating two notes a degree apart) (trill like a canary but it is often extended to refer to the making of sounds involving vibration without much thought of musical quality (with a shrill trilling from the countless leaves in between gusts of wind—Idriess) (rilled his soup into his mouth with a swift sucking vibration—The Use of English) (could hear the noise of a telephone trilling—James Helvick) Hyperm implies a lifting of the voice in some sort of worship or praise, especially of God (evening by evening, as they came to the setting sun, they hymned Father, Son, and Holy Ghost—Pusey) (the thrush concourting with the lark that hymned on high—Pollok) Chant may mean little more than sing, but often it is used specifically to imply the method of singing adopted by priests or choristers singing unmetrical verse where the emphasis is upon musical recitation of phrases, measured even tones, and a reverential spirit. Intone also comes very close to the specific sense of chant in meaning but sometimes carries a stronger connotation of reciting in sustained monotone (the Psalms were chanted) (the priest intoned the Gospel of the Mass) (I joined with choirs of monks, intoning their deep sonorous dirges—L. P. Smith) (they would take hands and ring-a-rosy about him, chanting at the tops of their voices, until good humor was restored—Mary Austin)

sincere, wholehearted, whole-souled, heartfelt, hearty, unfeigned can mean genuine in feeling or expression or showing such genuineness. Sincere stresses the absence of hypocrisy, dissimulation, or falsification in any degree; it therefore usually connotes a strict adherence to truth, a revelation of just what one feels, thinks, or sees and no more, and an unwillingness to embellish, exaggerate, or make pretenses of any sort (the loathing with which he describes the sodden Vienna working classes is . . . so sincere that one thinks for a moment that out of it must come a people's rebel—Dorothy Thompson) (in spite of her confusion, something strong and sincere and questing emanated from her—Styron) Wholehearted and whole-souled imply the absence of all reservations and therefore stress not only sincerity, but also qualities (as earnestness or devotion or zealousness) which suggest that one's whole being is stirred or moved (the service they one and all gave . . . was wholehearted and even passionate—Sackville-West) (whole-souled dislike of totalitarianism) (who could help liking her? her generous nature, her gift for appreciation, her wholehearted, fervid enthusiasm?—L. P. Smith) (demonstrated a whole-souled allegiance to the democratic world—Limb) Heartfelt places the emphasis upon the depth and genuineness of the feeling which finds expression in words, in signs of emotion (as tears), or in acts; the term suggests that one is deeply stirred or moved, and it is applied usually to what might, by contrast, be formally or conventionally expressed or outwardly indicated (heartfelt interest in the poor and suffering) (our sympathy for you therefore is heartfelt, for we are sharing the same sufferings—Sir Winston Churchill) Heartily comes closer to wholehearted than to heartfelt, but it carries a stronger implication than wholehearted of vigor or energy in expression or manifestation, and may connote simple honesty, great warmth, or exuberance in the display of feeling (receive a hearty welcome) (a hearty laugh) (in the hearty tones natural when the words demanded by polite-ness coincide with those of deepest feeling—Hardy) (the overwhelming mass of American citizens are in hearty accord with these basic policies—Roosevelt) Unfeigned is often used in place of sincere, especially when the absence of simulation is to be stressed; the term usually emphasizes spontaneity as well as genuineness (I confess to unfeigned delight in the insurgent propaganda—Lowes) (an unfeigned interest in people and scenes—Brann)

Guide Series: Vt.) Something solitary (see also ALONE) stands by itself, either as the sole instance or as a unique thing (her world was the Church, in which she hoped that her solitary child would some day be a polished pillar—Buchan) (began to eat again fiercely, like a great strong animal, tackling the solitary meal of its day—O'Flaherty) Something separate (see also DISTINCT 1) is not only single, but disconnected from or unconnected with any of the others in question (turning over in his thoughts every separate second of their hours together—Wharton) (group consciousness . . . makes the individual think lightly of his own separate interests—Cohen) Something particular (see also SPECIAL; CIRCUMSTANTIAL; NICE 1) is the single or numerically distinct instance, member, or example of the whole or the class considered or under consideration (a special provision for a known and particular territory—Taney) (Richard . . . replied that he had an engagement at a particular hour, up to which he was her servant—Meredith) (reality is a succession of concrete and particular situations—Huxley) Ana individual, particular, *special, especial, specific Ant accompanied: supported: conjugal single vb prefer, *choose, select, elect, opt, pick, cull Ana *take, seize, grasp: grab: accept, *receive, admit: *decide, determine, settle singular *strange, unique, peculiar, eccentric, erratic, odd, queer, quaint, outlandish, curious Ana *different, diverse, divergent, disparate: *exceptional: *abnormal, atypical, aberrant Con ordinary, *common, familiar: *usual, customary, habitual sinister, baleful, malign, malefic, maleficient all mean seriously threatening, portending, or promising evil or disaster, usually imminent or already initiated evil or disaster. Sinister is the most commonly employed of these words and the widest in its range of reference. It may be applied not only to something perceptible (a sinister cloud) (a sinister look) but to something imperceptible (a sinister influence) (a sinister intention) In either case sinister often expresses a judgment based on experience or on an interpretation of outward signs and implies on the part of the observer a resulting fear or apprehension of approaching evil or of lurking dangers; thus, a cloud is describable as sinister when it has the color, shape, or general character of one that the observer believes to precede a tornado; a person's influence may be interpreted as sinister when it is judged in the light of some of its visible effects (she was about half a mile from her residence when she beheld a sinister redness arising from a ravine a little way in advance—Hardy) (some of the customers did look sinister enough—scar-faced thugs in rugged caps—Wouk) (I did not wish him to know that I had suspected him of harboring any sinister designs—Hudson) Sinister is also applied to something that works or operates so covertly, insidiously, or obliquely that it is likely to find those whose well-being it threatens off guard (a sinister disease) (a sinister policy) (the sinister power exercised . . . by the combination in keeping rivals out of the business and ruining those who already were in—Justice Holmes) Baleful carries an even stronger suggestion of menace than sinister for it implies inevitable suffering, misery, or destruction; often it imputes perverseness, noxiousness, or hellishness to the thing so described. It is applicable to something that works openly and without indirection (this dread power . . . can be made a giant help to humanity; but science does not know us how to prevent its baleful use—Baruch) as well as to something that works occultly or obliquely (deceit contrived by art and baleful sorcery—Shak) (culling their potent herbs and baleful drugs—Milton) (the baleful power of fanaticisms and superstitions—Edmund Wilson) (the baleful horoscope of Abdallah had predicted the downfall of Granada—Prescott) Malign (see also MALICIOUS) carries over from its earliest sense a suggestion of an inherently evil or harmful tendency or disposition, even though the term in this sense is characteristically applied to immaterial things (as appearances, aspects, forces, or influences) rather than to persons (the eyes were no longer merely luminous points; they looked into his own with a meaning, a malign significance—Bierce) (believe that lions will only kill humans under a malign human influence—Wyatt) It also carries connotations (as of boding evil or disaster) derived from its reference in astrology to the aspects or the influences of the stars (a struggle between two forces, the one beneficent, the other malign—Bryce) (the spirit of competition, which, according to Rousseau, was one of the earliest of the malign fruits of awakening intelligence—Grandgent) (dense masses of smoke hung amid the darting snakes of fire, and a red malign light was on the neighboring leafage—Meredith) and occasionally suggests a force or power contributory to boded disaster (the prickly topic of symbolism, with its malign power to set the wise by the ears—Montague) Malefic and maleficient carry a stronger suggestion of balefulness than does malign, for both regularly imply not only a tendency toward but an active force productive of evil or disaster; thus, a malign influence bodes disaster; a malefic or maleficient influence is putting the threat of disaster into effect (the malefic arts of sorcery, witchcraft, and diabolism) (conjurations for the expulsion of malefic demons—Norman Douglas) (Saturn . . . represents malefic force. Cold, hostile, merciless . . . he blights all that he gazes on—Evangeline Adams) (like everything that has outlived its usefulness nationalism has changed from a beneficent influence into a maleficient force—C. size n Size, dimensions, area, extent, magnitude, volume are here compared primarily as terms meaning the amount of space occupied or sometimes of time or energy used by a thing and determinable by measuring. Size usually refers to things having length, width, and depth or height; it need not imply accurate mathematical measurements but may suggest a mere estimate of these. The size of this box is 10 inches long, 8 inches wide, and 5 inches deep. Are these not the right size? What is the size of the room? That exceptional mushroom, skull-like in its proportions and bold in size—Muller Size is also referable to things which cannot be measured in themselves, but can be computed in terms of the number of individuals which comprise them or the amount of space occupied by those individuals. The mere complexity and size of a modern state is against the identification of the man with the citizen—Dickinson Since dimension means measurement in a single direction (as the line of length, or breadth, or depth) the plural dimensions, used collectively, is a close synonym of size: in contrast, however, it usually implies accurate measurements that are known or specified: (the window frames must be exactly alike in dimensions) (the dimensions of the universe are not calculable) (the dimensions of the lot are 75 by 100 feet) (no reliable calipers exist long enough to stretch into the next century and measure the dimensions of greatness—Fadiman Area is referable only to things measurable in the two dimensions length and breadth. It is used of plane figures or of plane surfaces (as the ground, a floor, or an arena) and is computed in square measure: (the estate is 200 acres in area) (the forest fire covered an area of ten square miles) (the area of a rectangle is computed by multiplying its length by its breadth) (the major areas of the world are in the throes of revolutionary social change—Geismar) Extent is referable chiefly to things that are measured in one dimension; it may be the length or the breadth, but it is usually thought of as the length: (the driveway's extent is 100 feet) (the wings of the airplane are 75 feet in extent) However it is often used as though it were the equivalent of area (the base of St. Katherine's Dock House is vast in extent and confusing in its plan—Conrad) (the reports . . . constantly express amazement at the extent and severity of Russian attacks and counterattacks—Shirer) The word is also referable to measured time or to space measured in terms of time; thus, the duration of a thing is the extent of its existence (few lives reach the extent of one hundred years) (Germany was . . . a nine days' march from north to south, and of incalculable extent from west to east—Buchan) Magnitude, largely a mathematical and technical term, may be used in reference to size or two-dimensional extent (a queer little isolated point in time, with no magnitude, but only position—Rose Macaulay) It may be used also in reference to something measurable whose exact quantity, extent, or degree may be expressed in mathematical figures; thus, the magnitude of a star is indicated by a number that expresses its relative brightness (an alpha particle bearing a positive charge equal in magnitude to twice the electron charge—Darrow) (the magnitude of the structure as a whole and the massive nature of its details are never obtrusive—O. S. Nock) Volume (see also bulk) is also a technical term; it is used in reference to something that can be measured or considered in terms of cubic measurements; thus, the volume of a solid cylinder is equal to the cubic measure of air it displaces, and that of a hollow one, to the cubic measure of its capacity; two objects that are equal in volume may differ greatly in weight; when a thing expands, it increases in volume (we could readily store a million times as many stars in the present volume of the system—B. J. Bok) (you may say that the waves . . . are not like real waves; but they move, they have force and volume—Binyon) Ana amplitude, *expanse, spread, stretch: *bulk, mass, volume

sketch n 1 outline, diagram, delineation, draft, tracing, plot, blueprint (see under sketch vb)

Ana design, plot, *plan, scheme, project: *chart, map 2 précis, aperçu, *compendium, syllabus, digest, pance, survey

sketch vb Sketch, outline, diagram, delineate, draft, trace, plot, blueprint are comparable when they mean to present or to represent something by or as if by drawing its lines or its features. The same distinctions in implications and connotations are observable in the corresponding nouns sketch, outline, diagram, delineation, draft, tracing, plot, blueprint. Sketch may imply a drawing, a painting, a model, or a verbal presentation (as in a description or exposition) of the main lines, features, or points with the result that a clear, often a vivid, but not a detailed impression or conception of the whole is given (then, in a calm historian's tone, he proceeded to sketch . . . some pictures of the corruption which was rife abroad—Joyce) (this lecture is a humble attempt to sketch out a metaphysics of natural science—Inge) (a sculptor's sketch of his design for a memorial) (in some of Miss Jewett's earlier books . . . one can find first sketches, first impressions, which later crystallized into almost flawless examples of literary art—Cather) Outline (compare outline n 1) differs from sketch in suggesting emphasis upon the contours of a thing that is represented or the main points of a thing expounded and in implying more or less inattention to the details which fill up, amplify, or particularize; the term therefore usually implies a more rigid selection and greater economy in treatment and less consideration for qualities which give pleasure than sketch implies and, often, suggests a presentation of a thing as a simplified whole (outlining a plan for a future investigation—Conant) (the detailed study of history should be supplemented by brilliant outlines, even if they contained questionable generalizations—Russell) (the gist of the books was preserved in a series of small outlines—Southern) Diagram implies presentation by means of a graphic design (as a mechanical drawing, a pattern showing arrangement and distribution of parts,
or a chart, map, or graph) of something which requires explanation rather than representation or portrayal.

He diagrammed his route on the table—Cather

Spread out on the table a number of maps and aerial photographs that diagrammed what the Authority is up to—Robert Rice

There was little or no desire to amend the comprehensive diagram of... constitutional theory—Times Lit. Sup.

Delineate and delineation come close to describe and description and depict and depiction. Though they carry a strong implication of drawing a thing so as to show its lines or features with great distinctness, they tend to stress amplifying details and therefore often imply greater fullness or richness in treatment than the preceding words (his brush did its work with a steady and sure stroke that indicated command of his materials. He could delineate whatever he elected with technical skill—Jefferies)

The culture of beauty and the delineation of ugliness are not in natural opposition—Pound

He had a capacity for delineating emotions he had never felt—Edman

Draft, especially as a verb, implies accurate drawing to scale, especially of an architect's plan for a building to be constructed or of a design (as for a ship, a machine, or an engine) (young architects usually spend their first years in drafting plans rather than in designing buildings)

The term may apply to the drawing up of a preliminary statement which when corrected, polished, and copied will serve as a final statement

Draft me a proper letter to send him—Shaw

I have three or four drafts of each essay or chapter that I have written, and... all of them run to about twice the length of the finished piece—Geismar

The legislature did pass a measure... yet the controls were suggested—some insist drafted—by the industry itself—Armbrister

Trace and tracing in their perhaps most common use refer to redrawing an existing design by following its lines as seen through a superimposed transparent sheet, but they can also apply when a precise and detailed pattern is to be formed by or as if by drawing. The terms are more likely to suggest accuracy in or as if in following or sometimes shakiness resulting from or as if from following a continuous line than they are to imply anything about the qualities of what is to be traced

Trace an outline to be colored with crayons

Make a tracing of a diagram

Continuous blood pressure tracings have been recorded—Armstrong

With my eyes I traced the line of the horizon, thin and fine, straight and... till I was back to where I'd started from—Millay

His fumbling brain had traced the braille of an enduring and bitter truth—Hervey

Plot is often used in place of diagram or draft or, less often, sketch when a map, chart, or graph rather than a design is implied; distinctively it throws emphasis upon the indicating of specific locations (as points, areas, sections, or objectives) so that their relation to each other or the whole is clear; thus, one who diagrammatically represents the condition of business during a given year by means of a graph is said to plot a graph or... the course of a hurricane

Plot... the exact position of the ship—Heaton

Blueprint, from its common application to a photograph in white lines on blue paper of a draftsman's mechanical drawing or of an architect's plan, in extended use implies precise and detailed sketching or delineation; it suggests not the act of drawing or drawing up but the effect produced by what is drawn or drawn up (people engaged in the amusing and innocuous pastime of blueprinting a new social order—The Commonweal)

The political leaders of the two countries are guided by the same political blueprints—Bevan

Skin n Skin, hide, pelt, rind, bark, peel can all denote an outer removable coat which adheres to and protects the inner tissues of a body or organism. Skin, the most general term, applies especially to the outer covering of animals, whether it is as delicate as the one which covers the human body or as tough as the one which covers a rhinoceros; it is used also of the outer coverings of various fruits, plants, and seeds especially when they are thin and tight (the skin of an apple) (the skin of an almond)

Skin applies to this integument whether it covers the living organism or has been stripped from it. Hide applies to the tough skin of large animals (as the rhinoceros or the horse); in commercial use it is applied specifically to the raw or undressed skins of cattle, horses, and other large animals, sometimes in distinction from those of calves, sheep, and goats, which are commonly described merely as skins. Pelt is applied chiefly to the skin of an animal that is covered with hair, fur, or wool; in commerce it usually denotes an undressed skin of any of these animals and especially of a furred animal. It is applied also to the skin of a sheep or goat stripped of wool or hair and ready for tanning. Rind applies chiefly to the thick, tough, and often inelastic outer layer which covers certain fruits (as oranges and melons) or the stems and roots of some woody perennial plants (then usually called bark).

The hardened skin on smoked meats (as bacon) and the hardened crust of molded cheeses are also called rinds. A skin or rind of a fruit or a portion of it that is or may be stripped free is called peel (slip on a banana peel) (can- sied orange peel)

Skin vb Skin, decorticate, peel, pare, flay can mean to strip something of its skin or thin outer covering. Skin is the most general of these terms, being applicable to any animal as well as to any plant or plant part that is covered by or as if by a skin (skin calves slaughtered for the market) (do not skin, but wash the eggplants in iced water—Dione Lucas) (skin the bark off a birch tree)

Decorticate is applicable when an outer layer (as of bark, fiber, or husk) is to be removed by stripping (obviated the necessity of fully decorticating the canna stalks—Edward Samuel) (the decorticated seeds are crushed and pressed—Riegel)

Peel and pare are fre-
quently interchanged but distinctively peel may imply that the skin or outer covering can be removed by stripping or by pulling off while pare tends to be used when it requires to be cut off, usually with some of the adjoining substance; thus, freshly boiled potatoes can be easily peeled, but uncooked ones must be either scraped or pared; one speaks usually of peeling an orange because its rind may be stripped by the hand; one speaks usually of paring an apple since the skin is not easily detached from the flesh; one peels a hard-boiled egg. But pare may also be used of anything that is cut close and so is applicable to many things which do not have a skin or rind

Flay tends to be applied largely to persons often in threats or in descriptions of torture or of cruel punishment (as scourging) he said he would flay the man alive if he again caught him prowling around they killed and flayed a number of slaves and captives—Coon a campaign pledge to ban the medieval practice of flaying unruley convicts—Time the son and his mother flay one another with their words—Fowlie

**skinny** scrawny, rawboned, angular, gaunt, lank, lanky, lean, spare Ant: fleshy

**skip** vb Skip, bound, hop, curvet, lope, lollipop, ricochet can all mean to move or advance with successive springs or leaps. The first three words are commonly referable to persons or animals but they may be used in reference to inanimate things. Skip suggests quick, light, graceful movement and a continuous alternation of touching a surface and springing clear of it; often also when referred to living creatures it denotes suppleness or excess of animal spirits wanton as a child, skipping—Shak. small yachts skipped here and there—Villiers Bound (see also JUMP) implies longer and more vigorous springs than skip and carries a stronger suggestion of elasticity and buoyancy of spirit like a roe I bounded o'er the mountains—Wordsworth I saw her bounding down the rocky slope like some wild, agile creature—Hudson (the ball struck the earth and bounded across the field)

**hop** suggests a less flowing or springy movement than the two preceding words; at times it connotes jerkiness and lack of dignity in movement. It implies a succession of small quick leaps (as of birds, toads, or grasshoppers) he does not walk, he hops and in reference to children he does not waltz, he skips. Hop suggests the tendency of a mountain goat or the man who progresses at an uneven pace, hopping forward almost recklessly for many yards... formerly interchanged but distinctively peel may imply that the skin or outer covering can be removed by stripping or by pulling off while pare tends to be used when it requires to be cut off, usually with some of the adjoining substance; thus, freshly boiled potatoes can be easily peeled, but uncooked ones must be either scraped or pared; one speaks usually of peeling an orange because its rind may be stripped by the hand; one speaks usually of paring an apple since the skin is not easily detached from the flesh; one peels a hard-boiled egg. slovenliness, especially in dress

sleek, slick, glossy, velvety, silken, silky, satiny are com-
parable when they mean having a smooth bright surface

or appearance. Sleek and slick are sometimes interchange-
able with this meaning <dark slick leaves—<Langley> <the
sleek blue plums—<Wylie> but more often sleek connotes

a smoothness or brightness that is the result of close at-
tention or is an indication, especially when the reference

is to a person or animal, of being in excellent physical

condition <let me have men about me that are fat: sleek-
headed men and such as sleep o' nights—<Shak.> <a beau-
tiful panther . . . so bright of eye, so sleek of coat—
<Thackeray> <the metal felt sleek and warm to his touch
—<Cloete> <a child's mind thrills at the touch of fur be-
cause it is sleek—<Montague> and it may also suggest a

smoothness of finish resulting from overattention to or

overrefinement in dress and appearance <curse me the
sleek lords with their plumes and spurs—<Lindsay> some-
thing sleek about him, something that suggested a well-bred
dog—<Anderson> <the poise, assurance, and sophistication

of all these sleek faces—<Wolfe>
Slick, by contrast, is more likely to apply when the intent is to suggest

such an extreme of smoothness as to provide an unsafe or slip-
pery surface <the grass was sleek from the night's dew,

and the men slipped frequently—<Mailer>
In extended use slick is less likely than sleek to suggest desirable

qualities and often carries more than a hint of contempt

<as much a snob surfaced commercial product as a
serious piece of literary art—<Gurko> <new hotels . . . so
sleek and shiny—<Basso> <everything was to be sleek,

which was Marvin's term of approbation; but not too

whether by nature or by art <the glossy leaves of the

beech tree> <downy peaches and the glossy plum—
<Dryden> <glossy as black rocks on a sunny day case in

Velvety implies the extreme

softness associated with the surface or appearance of

velvet. The word is often used of things as they appeal
to the sense of touch or of sight or of both <a velvety

skin> <a velvety flower> <a land of velvety meadows

and lush gardens—<Mumford> <the velvety flanks of the
cattle—<Glasgow> but it is also applicable to sounds that

carest the ear or to tastes or odors that are delightfully

bland <even her high notes are velvety> <the boy reading

in his queer, velvety bass voice—<Galsworthy>
Silken implies the smoothness and luster as well as the softness

of silk <silken hair> <to what green altar . . . lead'st thou

that heifer lowing at the skies, and all her silken flanks

with garlands dressed—<Keats> <the lazy movement of

their bodies beneath their silken doekskins—<O'Meara>

terial things that are softly soothing and pleasant to the spirit or mind (a silken voice) (the silken sonority of the strings—Virgil Thomson) (silken words) Silky is sometimes used in place of silken (fingers, silky and soft—Watts-Dunton) (blue, silky October days—Glover) (his eyes between his silky lashes gone soft—Boyle) but when the reference is to persons or their voices, manners, or productions it, more often than silken, suggests an ingratiating or a specious quality (put his talent for writing silky satire to most profitable utilitarian uses—Derwent May) (Tchaikovsky's Meditation was no silky simper of tone, but something that glowed inside—Cassidy) (there have been many able varmints since, but none quite as silky or loathsome—Perelman) Satiny applies to what is not only soft but smooth and shining (the satiny petals of a flower) (beautiful women with satiny backs were moving through the crowd—Wolfe) Ana *bright, lustrous, brillianit: smooth, even (see LEVEL)

sleep vb Sleep, slumber, drowse, doze, nap, catnap, snooze mean to take rest by a suspension of consciousness. Sleep, the usual term, implies ordinarily the periodical repose of this sort in which men and animals recuperate their powers after activity, but it may indeed such repose indulged in temporarily or at odd times (the young baby sleeps most of the time) (he sleeps fitfully) (they slept soundly all night) (he slept away his fatigue) (sleep off the effects of an opiate) (doped to make him sleep away the hours of travel—Ervine) Sleep can also refer to a condition (as dormancy, indolence, or death) felt to that sweet sleep which thou owdest yesterday—Shak.) (drowsy tinkleings lull the distant folds—Gray) (the leisurely swishing of the water to leeward was like a drowsy comment on her progress—Conrad) Somnolent may be in place of drowsy; usually, however, it connotes the sluggishness or inertness characteristic of one who is sleepy or drowsy or the capacity for inducing such rather than the actual impulse to sleep or doze (a somnolent want of interest—De Quincey) (Eustacia waited, her somnolent manner covering her inner heat and agitation—Hardy) (the somnolent pages of a three-volume novel) Slumberous is often used in the sense of sleep or drowsy or somnolent; occasionally it carries a distinctive connotation in which it usually suggests quiescence or the repose of latent powers (I . . . heard the mountain's slumberous voice—Shelley) (Eustacia's manner was as a rule of a slumberous sort, her passions being of the massive rather than the vivacious kind—Hardy) Ana *lethargic, sluggish, comatose

negligence or carelessness. Slipshod implies an easygoing tolerance of details that are inaccurate, incongruous, or lacking in precision, or careless indifference to the niceties of technique or to qualities that make for perfection (as thoroughness, soundness, and fastidiousness) (a slipshod style) (a slipshod piece of carpentry) (a slipshod performance of a symphony) (was at first a slipshod observer . . . he had a positive distaste for exactitude—Peattie) (had the conscientious craftsman's contempt for slipshod work—Spaeth) Slowly, a stronger term than slipshod, implies laziness and disorderliness which is evident throughout and is not merely a matter of detail. The term may be used of a person or his appearance and imply diametrical opposition to neat or tidy (a slovenly housekeeper) (this person showed marks of habitual neglect; his dress was slovenly—George Eliot) (the beatnik is slovenly—to strike a pose against the middle class you must soil their compulsion to be neat—Mailer) or it may be applied to processes, technique, or workmanship without significant change in value (slovenly thinking) (the slovenly manner in which the dinner was served—Conrad) (a tendency to think that a fine idea excuses slovenly workmanship—Lowell) Unkempt is applied usually to something that requires to be kept in order if a favorable impression is to be produced. It implies extreme negligence amounting to neglect (unkempt hair) (an unkempt garden) (add to this unkempt, untended, this grammatically anachronical Russian tongue the jargon of German Marxism: no simile can cope with the situation—Edmund Wilson) (most of the shops . . . had become petticofigging little holes, unkempt, shabby, poor—Bennett) Disheveled is more likely to describe a temporary state of ruffled disorder or disarray following intense effort (as in doing something or coping with some emergency) (she hoped she appeared calm. She was conscious of a disheveled appearance—Hervey) or in extended application a lack of normal planned orderliness (as of concept or development) (a disheveled movie that charges futilely about—McCarten) Sloppy implies a general effect of looseness and of spilling over. When applied to a person or his appearance it usually suggests loose, ill-fitting, unpressed garments, but it often also carries connotations of slovenliness (his sloppy appearance at breakfast offended her) (her hair was thin and tied in a sloppy knot at the back of her not too clean neck—Metalious) When applied to ideas or their expression, style, or manners or to a work or its workmanship, the word usually suggests a lack of control and precision or of confinement within proper limits, manifested in incoherency, emotional excess, or formlessness (it is a sloppy bit of reporting, poorly organized, loaded with pointless personal details—Sugree) Ana *negligent, neglectful, slack, lax, remiss: *careless, heedless, inadvertent: *indifferent, unconcerned: *slatternly, dowdy, frowzy, blowzy Con *precise, accurate, exact, *correct: fastidious, finicky, *nice slit vb slash, *cut, hew, chop, carve slither *slide, slip, glide, skid, glissade, coast, toboggan slog *strike, hit, smite, punch, slug, swath, clout, slap, cuff, box slogan *catchword, byword, shibboleth Ana *phrase, expression, locution, idiom slope vb *slant, incline, lean sloppy slovenly, unkempt, disheveled, *slipshod Ana *negligent, neglectful, slack, remiss, lax: mawkish, maudlin, soppy, slushy (see SENTIMENTAL): *slatternly, dowdy, frowzy, blowzy Con *careful, meticulous, scrupulous, punctilious: fastidious, finicky, *nice slothful indolent, faineant, *lazy Ana *inactive, inert, supine, passive, idle: slack, remiss, lax, *negligent, neglectful: *slow, leisurely, deliberate, dilatory, laggard slow adj 1 *stupid, dull, dense, crass, dumb 2 Slow, dilatory, laggard, deliberate, leisurely can apply to persons, their movements, or their actions, and mean taking a longer time than is necessary, usual, or sometimes, desirable. Slow (see also STUPID), the term that is the widest in its range of application, may also be used in reference to a thing (as a mechanism, a process, or a drug) that is the opposite of quick or fast in its motion, its performance, or its operation. In its varying applications slow often suggests a reprehensible or discreditable cause (as stupidity, lassitude, indolence, or inaction) (a slow student) (slow wits) (slow movements) (he is as slow as a snail) (slow in getting results) (an unimaginative man, slow of comprehension—Times Lit. Sup.) but it may suggest either extreme care or caution (a slow but capable worker) (slow to take offense) (he is slow making changes) (he spoke with a slow, slightly thick precision, making elegant gestures—Wouk) or a tempo that is required by nature, art, or a plan or schedule (a slow convalescence) (a slow stream) (a slow movement in music) (a slow train) or a falling behind because of structural or mechanical defects or untoward difficulties (a slow watch) (the train is slow tonight because of the snowstorm) Dilatory is relatively a term of restricted application referable to persons or to things for which persons are responsible as their actors, performers, or creators and implying slowness that is the result of inattention, procrastination, or indifference (a dilatory correspondent) (though dilatory in undertaking business, he was quick in its execution—Austen) (he was temporizing, making, with unconscious prudence, a dilatory opposition to an impending catastrophe—Bierce) Laggard is even more censorious a term than dilatory, for it implies a failure to observe a schedule (as for arriving or performing) or to obey a call or demand promptly; it frequently suggests loitering or waste of time (a laggard pupils keep a whole class back) (for Love was laggard, O. Love was slow to come—Millyard) (in its coverage of spot news events, radio has been especially laggard—Rover) (directed him and another general to . . . prod laggard manufacturers into speeding up production—Kahn) Deliberate (see also DELIBERATE 2) applies to persons, usually directly but sometimes indirectly, and then is applied to things for which a person is responsible; the term suggests absence of hurry or agitation and a slowness that is the result of care, forethought, calculation, or self-restraint (deliberate enunciation) (deliberate movements) (he returned with the same easy, deliberate tread—Cather) (she ate her food in the deliberate, constrained way, almost as if she recoiled a little from doing anything so publicly—D. H. Lawrence) Leisurely also implies a lack of hurry or a slowness that suggests that there is no pressure for time; the term applies not only to persons and their acts but to things that have no relation to persons (breakfast was a leisurely meal—Archibald Marshall) (his departure, like all his movements, was leisurely. He did not take the first
available boat or the second—Waugh> (took leisurely leave, with kisses all around, of a half dozen young men—K. A. Porter)

sly, cunning, crafty, tricky, foxy, insidious, wily, guileful, artful are comparable when they mean having or showing a disposition to attain one's ends by devious or indirect means. Sly implies a lack of candor which shows itself in secretiveness, in suggestiveness rather than in frankness, in underhandedness, or in furtiveness or duplicity in one's dealings with others (with knowing leer and words of sly import—Irving) (because the state is hostile, writers have become sly, circumspect and disingenuous—Philip Toynbee) More often than the remaining words, sly is used with weakened force to imply a lightly arch or roguish quality (he was unpretentious, earnest, full of sly humor—Rollo Brown) Cunimg (see also CLEVER 2) stresses the use of intelligence in overreaching or circumventing; nevertheless, it often suggests sly inventiveness rather than a high-grade mentality, and a perverted sense of morality (every man wishes to be wise, and they who cannot be wise are almost always cunning—Johnson) (all gods are cruel, bitter, and to be bribed, but women-gods are mean and cunning as well—Bottomley) (the fellow's eyes were now sly and cunning as a cat's, now hard and black as basalt—Wolfe) Crafty also implies a use of intelligence but it usually suggests a higher order of mentality than cunning: that of one capable of devising stratagems and adroit in deception (he disappointeth the devices of the crafty, so that their hands cannot perform their enterprise—Job 5:12) (as a crafty envoy does his country's business by dint of flinting and conviviality—Montague) (crafty senior tactician for the Republicans and a man with an astonishing record of maintaining political control of his country—Michener) Tricky usually suggests unscrupulousness and chicanery in dealings with others; in general it connotes shiftiness and unreliability rather than skill in deception or in maneuvering (here was Woman, with a capital W, tricky and awful, inconsistent as the weather—Styron) (he avoided the mean and tricky: he was always an honorable foe—W. C. Ford) Foxy implies shrewdness in dodging discovery or in practicing deceptions so that one may follow one's own devices or achieve one's own ends; it usually connotes experience and is rarely applied to the young or to novices (where one was legitimate—and a foxy play—the other was a snide trick—Lieber) (this time the lecherous Alsatian uses a foxier gambit to achieve his ends—Perelman) (a foxey old man) Insidious suggests a lying in wait or a gradualness of effect or approach and applies especially to devious and carefully masked underhandedness (<an insidious tempter> (persuaded that these people . . . are all part of an insidious conspiracy to undermine the world as he knows it—Edmund Wilson) (that form of bias which is most insidious, precisely because it pretends to be unbiased—Moerby) Wily and guileful stress an attempt to ensnare or entrap; they usually imply treacherous astuteness or sagacity and a lack of scruples regarding the means to one's end (nor trust in the guileful heart and the murder-loving hand—Morris) (shun the insidious arts that Rome provides, less dreading from her frown than from her wily praise—Wordsworth) (the headmaster, wily, had not confiscated these articles; he had merely informed the parents concerned—Bennett) Artful implies insinuating or alluring indirectness of dealing; it usually also connotes sophistication or coquetry or clever designs (<being artful, she cajoled him with honey-mouthed flattery until his suspicion was quieted—John Bennett> oddly enough, they stayed sober. The artful Henry had told them that all the wine in Panama was poisoned—Chidsey) (a furtive, clandestine, stealthy, covert (see **SECRET**); devious, oblique, *crooked: astute, *shrewd

small, little, diminutive, petite, wee, tiny, weeny, minute, microscopic, miniature can all mean conspicuously below the average in magnitude, especially physical magnitude. Small (opposed to large) and little (opposed to big, great) are often used without distinction. But small, more frequently than little, applies to things whose magnitude is determined by number, size, capacity, value, or significance (<a small attendance> (<a small boy> (<a small box> (<a small house> (<a small change> (<a small income> (<a small matter> (<a fear of life, memory of hard times, dread of small slights in the community . . . combined to keep the household temperature low—Buck) Small is also preferred when words like quantity, amount, size, and capacity are qualified (give me a small quantity of flour) (they have only a small amount of money) (the small size of the rooms was disappointing) Small also applies to intangible and immeasurable things which, however, may be said to be limited in some pertinent or significant way (he has a small mind) (her sadness at the small prospect of seeing him again—Archibald Marshall) ("I never . . . thought you could be so small about anything," said Selena, who was just angry enough to use the word small—Salinger) Little is usually more absolute in its implications than small, which often connotes less magnitude than is ordinary or is to be expected or is desirable; it may be preferred to small, therefore, when there is the intent to convey a hint of pettiness, of pettness, or of insignificance in size, amount, quantity, or extent (<take little interest in politics> (a foolish consecuity is the hobgoblin of little minds—Emerson) (the bull Bill . . . had picked out was a fierce, waspy little animal—Gipson) (she enjoyed the little violets, currants—coffee, fresh water, women—T. E. Lawrence) (this little man, whose intellectual resources were hardly more than a combination of prejudice and syntax—Sheenan) (how unsubstantial then appear our hopes and dreams, our little ambitions, our paltry joys!—Benson) Little is also appropriate in the sense of a small amount, a small quantity, or a small extent; thus, one asks for a little sugar or a small quantity of sugar; one sees that the garden is little or of small extent (<spading up a little culture along with the history—Schulberg> Little is also appropriate
when the context carries a note of tenderness, pathos, or affection <our little house> <the air turned cold ... so that the littlest kids cried from cold as much as fright—Grau> <her pathetic little smile> <sleep, my little one—Tennyson> Diminutive not only carries a stronger implication of divergence from a normal or usual size or scale than small or little, but it often carries the meaning of extremely or even abnormally small or little <the bedrooms are small but the parlor is diminutive> <in so hot a climate peach trees will produce only diminutive fruits in very small quantities> <the horses are so diminutive that they might be, with propriety, said to be Lilliputian—Cowper> <a diminutive financial wizard, who looked like a Kewpie doll—J. D. Hart> Petite is the usual term to describe a trim, well-shaped woman or girl of diminutive size <a bit incongruous that such a petite woman should write such huge tomes—Fisher> Wee is found especially in dialectal use in place of small or little <a wee lad> <a wee drop of whisky> or in more general use as an equivalent of diminutive <a little wee face, with a little yellow beard—Shak> <the one to the bachelor uncle ... was sweetly girlish, and just a wee bit arch—Gibbons> Tiny goes further than diminutive or wee in suggesting extreme lilleneess or a smallness out of proportion to most things of its kind or in comparison with all other things <they were prominent eyes yellowed with tiny red veins—Avram Davidson> <the behavior of the invisible, intangible, inconceivably tiny electrons and atoms—Darrow> <tiny, Swiss-made replicas ... about the size of a small, oblong wristwatch—Terrry Southern> Teeny and weeny, found chiefly in childish or playful use, occur also in paired or reduplicated forms (as teeny-weeny and teeny-tiny) <one day this teeny-tiny woman put on her teeny-tiny bonnet and went out of her teeny-tiny house to take a teeny-tiny walk—Fairy Tale> <he gave a weeny, weeny yawn—Wiggin> Minute means extremely small on an absolute scale, usually a microscopic or near-microscopic scale <a minute animalcule> <minute grains of sand> <ants that marched their minute columns over the floor—Hervey> <the tremendous forces imprisoned in minute particles of matter—Inge> Microscopic applies to what is so minute that it is literally observable only under a microscope <microscopic organisms> or is of a comparable minuteness in its class <no matter how microscopic his wage, he forced himself to save a dollar or two a year—Irving Stone> <the lady of the dreadnought class with a leash on the microscopic animalcule—Cross> Miniature applies to what is complete in itself but is built, drawn, or made on a very small scale <in circus parades, Tom Thumb and his menage rode together in a miniature red coach, drawn by two small ponies—Green Peyton> <it was one of the miniature Italian cities ... all compact and complete, on the top of a mountain—L. Smell not only is the most general of these terms but tends to be the most colorless. It is the appropriate word when merely the sensation is indicated and no hint of its source, quality, or character is necessary <our horses ... often reared up and snorted violently at smells which we could not perceive—Landor> <the smells of these offices—the smell of dental preparations, floor oil, spittoons and coal gas—Cheever> It is also the preferred term when accompanied by explicitly qualifying words or phrases (the rank smell of weeds—Shak> <the rented coarse black gown ... gave out a musty smell, as though it had been lying long disused—Wouk) A smell of marigold and jasmine stronger even than the reek of the dust—Kipling> and occasionally, even when unqualified, it implies offensiveness <traced the smell to a stopped-up drain—Cobden was much upset when he saw the middle classes leaving the smells of the ... towns for the scents of the countryside—Lewis & Maude> Scent tends to call attention to the physical basis of the sense of smell and is particularly appropriate when the emphasis is on the emanations or exhalations from an external object which reach the olfactory receptors rather than on the impression produced in the olfactory centers of the brain <the scent of the first wood fire upon the keen October air—Pater> <if the air was void of sound, it was full of scent—Galsworthy> <the heavy scent of damp, funereal flowers—Millay> Presently a scent came with it, dank and pervasive. It was the must of the forest—Hervey but scent can apply specifically to emanations evidencing the passing of a body (as an animal) and may suggest a high level of sensory efficiency in a perceiver <the dog caught the scent of a rabbit> or from its use as a synonym of perfume the term may suggest a pleasant quality <the rich, vital scents of the plowed ground—Glasgow> Odor is oftentimes indistinguishable from scent, for it too can be thought of as something diffused and as something by means of which external objects are identified by the sense of smell. But the words are not always interchangeable, for odor usually implies abundance of effluvia and therefore does not suggest, as scent often does, the need of a delicate or highly sensitive sense of smell (the odors of the kitchen clung to her clothes)> <he smelled her perfume, a sweet pungent odor, intimately coquettish—Stryon> <gave off a kind of sweetish rich animal-vegetable odor, such as one associates with the tropics—Purdy> For these reasons odor usually implies general perceptibility and is the normal word in scientific use especially when the classification or description of types is attempted (science, while recognizing the potency of our sense of smell, has not yet satisfactorily classified and catalogued the many varieties of odors that we recognize—Morrison) Aroma usually adds to odor the implication of a penetrating, pervasive, or, sometimes, a pungent quality; it need not imply delicacy or fragrance, but it seldom connotes unpleasance, and it often suggests something to be savored, with the result that it is used of things that appeal both to the sense of smell and taste or by extension to one’s aesthetic sense <the fresh river smell, rank and a little rotten, and spiced among these odors was the sultry aroma of strong boiling coffee—Wolfe> an atmosphere, impalpable as a
perfunctory yet as real, rose above the heads of the laughing guests. It was the aroma of enjoyment and gaiety—Gibbons> the aroma of a wood fire is the significant part of a camper’s delight—Morrison>

smuggled, bootleg, contraband are comparable in meaning transported in defiance of the law but each has implications and applications not shared with the others. Smuggled applies to what is taken out of or brought into an area (as a nation or district) clandestinely, especially to avoid payment of taxes or dues or to contravene the law (smuggled diamonds) the same route that the pirates used in taking their smuggled goods to market—Amer. Guide Series: La.) In extended use it may stress deftly elusive action or surreptitious procedure (make use of local knowledge and smuggled information to sow alarm among Communist officials—Economist) to the ordinary beholder there seem to be so many smuggled assumptions in the literature of social science—R. M. Weaver> Bootleg denotes a material thing (as liquor) made in or imported into a country or district and offered for sale or distribution in defiance of its prohibition in that country or of legal restrictions (as by rationing or licensing) on its use (bootleg whiskey) The term can imply fraud, deceit, and often secretiveness or concealment; thus, bootleg wiring is done by one who is not a legally qualified electrician and who may disregard safety requirements; bootleg prizefights are conducted without legal sanction and often with disregard of the welfare of fighters or patrons Congress arbitrarily said, “We know better than unions what is good for employees.” . . . Today several thousand employers and several million employees are operating under bootleg agreements in flagrant violation of the statute—A. E. Stevenson> Contraband applies to something of which the importation or exportation is declared illegal by law, proclamation, or treaty. Often the term is perfectly interchangeable with smuggled (waterfront resorts were notorious as smuggling centers . . . has been extremely common as a contraband cargo) cargoes were carried aboard motorboats and dories—Amer. Guide Series: Mich.) or it may nearly replace bootleg (Benzedrine . . . has been extremely common as a contraband item for introduction into prisons and correctional institutions—Maurer & Vogel) but it alone is specifically applied to something of which the exportation to bellicose is expressly prohibited and which, therefore, is liable to seizure (eventually Great Britain was seizing almost everything sent to Germany and to the neutral states on Germany’s borders—Roehm et al)

social adj <i>Social</i>, gregarious, cooperative, convivial, companionable, hospitable are comparable rather than synonymous terms that all involve and often stress the idea of having or manifesting a liking for or attraction to the company of others. Social, a broadly inclusive word, is distinctly dichotomous. On the one hand it stresses sociability and the pleasant relation between individuals, singly or in groups (<i>a social club</i>) (<i>spent a social evening with her friends</i>) <i>Adams was known as a man of social talent, a good talker, admired for his richness of recollection and apt illustration—W. C. Ford</i> (<i>of a jovial, social disposition, with a host of friends—Westcott</i>) and may come close to <i>sociable</i> (which see under <i>GRACIOUS</i>) in meaning (<i>having to drive home, and not feeling very social</i>, <i>had very little like Balchin</i> <i>Pickney</i> is one of the most <i>social</i> of beings . . . Her hospitality is famous—<i>Stoney</i>). On the other hand it can stress relation to society and the community and approach <i>societal</i> in meaning; when applied with this notion to the individual or kind of individual it implies membership in or adherence to a more or less definitely organized society; thus, the common reference to man as a <i>social</i> animal implies that human beings as a result of qualities inherent in their fundamental animal nature tend to live in societies rather than in solitude (<i>there is every reason to believe that the origin of culture derives from the fact that man is a social animal</i>). <i>Social</i> species are those whose very existence depends on interaction among their members. It is important to repeat that these <i>social</i> essentials are not peculiarly human but are a basic fact in the existence of all mammalian species—Kimbll Young) In relation to immaterial things <i>social</i> may imply no more than relation to society (<i>established social custom</i>) (<i>the social aspects of cultures are the material traces of ideas and ideals in the habits and associations of men—McKeon</i>) but more often it stresses the consideration and responsibility of society for its members and especially its weaker members (<i>legislation which is enacted to protect and aid those who cannot help themselves is often called social legislation—W. H. Wilson & E. S. Oyster</i>) (<i>social rights—the right to work, to rest and leisure, to education, to material security in old age and in case of illness or disability—Mendel</i>) As applied to lower animals, <i>social</i> heightens the notion of <i>societal</i> and implies not mere physical association but association in a community with specialization of function and often of form (<i>the honeybee is a common social insect with the colony members specialized for reproduction or for work</i>) Gregarious sometimes approaches the first aspect of <i>social</i> (<i>a cheery, relaxed, fun-loving young man who enjoyed his own humor but enjoyed it all the more if it were shared by an appreciative audience. He was therefore gregarious, friendly, outgoing and extroverted—C. W. M. Hart</i>) (<i>always gregarious and eager for companionship, Tony tried twice to draw abreast of the men plodding along the unmarked trail—Herron</i>) but in its commoner societal applications it tends, in distinction to <i>social</i>, to imply a need or desire for contiguity (<i>he renounced . . . a life of solitude, and became a gregarious creature—Cowper</i>) (<i>impelled by gregarious instincts, Peter followed the crowd—H. G. Wells</i>) (<i>the gregarious bustle goes on as a matter of routine. Streets intersect, shops advertise, homes have party walls, and fellow citizens depend upon the same water supply; but there is no cooperation between human beings—Joyce</i>) or a living continguously rather than an active participation in the life of an integrated society (<i>the ordinary gregarious human life, led by us in contact with others and in the stress of our normal pursuits—Powy</i>) (<i>many solitary insects are gregarious, that is, they share certain common needs or react in the same way to certain external stimuli so that dense populations assemble locally—O. W. Richards</i>) (<i>it is at least plausible that the domestication of animals—which are almost exclusively gregarious animals—is based on the relation of the hunter to the wild herd—Franz Boas</i>) The remaining terms describe particular aspects of being social. Cooperative implies the existence of common ends which serve as the objectives of a group, a community, or society at large and of the need of mutual assistance in the attainment of those ends; the term therefore usually suggests shared effort, helpfulness, and a willingness to work for the welfare or well-being of the entire group (<i>leadership of a cooperative rather than of a competitive type—Sellers</i>) (<i>capacity for cooperative industrial effort—Mumford</i>) (<i>with regard to a young English statesman, we want to know two things mainly—his intrinsic value, and his cooperative capacity—Pull Mall Gazette</i>) (<i>if we are to develop a cooperative foreign policy, we shall have to learn to consult continuously with other nations—Dean</i>) Convivial is applied chiefly to persons, groups, or activities that manifest enjoyment of the company of others especially in festive joviality and eating and drinking (<i>at the insistence of a convivial uncle . . . she permits herself to drink three glasses of champagne—Edmund Wilson</i>) (<i>has a convivial temperament . . . gets on a first-name basis quickly—Dwight Macdonald</i>) (<i>dinners convivial</i>)

**soft adj** Soft, bland, mild, gentle, smooth, lenient, balmy are applied to things with respect to the sensations they evoke or the impressions they produce and mean pleasantly agreeable because devoid of all harshness or roughness. Soft is applied chiefly to what soothes, calms, or induces a sensation of delicious quiet (as sweet as balm, as soft as air, as gentle—Shak] a soft answer turneth away wrath—Prov 15:1] ever, against eating cares, lap me in soft Lydian airs—Milton] to feel forever its soft fall and smell—Keats] This positive connotation is often apparent in the use of soft even when its major implication is the absence or the subdued quality (as pungency, vividness, intensity, or force); thus, a soft fragrance is lacking in richness but is quietly agreeable and not overpowering; a soft color is lacking in vividness, but it is mellow rather than dull; a soft voice though lacking in resonance is not faint or feeble but is pleasantly low and without harshness or stridency (the far shore of the river’s mouth was just soft dusk—Galsworthy] the soft shock of wizened apples falling from an old tree—Millay] listen to Yuriko’s voice as it floated, breathlike and soft, through the frail partitions—Mailer] Bland (see also suave) may be interchangeable with soft, but it generally suggests smoothness and suavity and stresses the absence of whatever might disturb, excite, stimulate, or irritate; thus, foods and beverages which are not unpleasant to the taste yet tend toward the insipid or are lacking in pungency, tang, or richness of flavor or ingredients may be described as bland; a bland climate not only is free from extremes but is neither stimulating nor depressing (bland fruits such as bananas] the doctor prescribed a bland diet] there was an unusual softness to the dark air and the bland starlight and an unusual density to the darkness—Cheever] the whole shabby performance . . . the bland reassurances instead of the hard sachromies—Michener] full, clear, with something bland and suave, each note floated through the air like a globe of silver—Cather] Both mild and gentle stress moderation; they are applied chiefly to things that are not, as they might be or often are, harsh, rough, strong, violent, unduly stimulating, or irritating and are therefore pleasant or agreeable by contrast (a mild cigar] mild weather] a man of mild and simple character who

. . . had shown no interest in anything at all except his collection of modern paintings—Dahl] a gentle breeze] a gentle heat] However, both words are capable of connoting positively pleasurable sensations, mild often being applied to what induces a feeling of quiet measured beauty or of serenity and gentle to what evokes a mood of placidity or tranquillity, or a sense of restrained power or force [a mild, rosy spring evening in which blackbirds sang on the budding boughs of the elms—Gibbons] some did shed a clear mild beam like Hesperus, while the sea yet glows with facing sunlight—Shelley] (O gentle sleep, nature’s soft nurse—Shak] he was gentle, waiting for whatever he awaited with a grace she respected—Malamud] she had a gentle face, and her eyes were fixed with compassion—Theodora Sturgeon] Smoo and (see also easy, level) in most of its senses suggests the absence or removal of all unevennesses or obstacles (as to use or enjoyment); often it comes close to mild in stressing the pleasant quality of what might be harsh or irritating, but unlike mild and bland it rarely if ever hints at weakness or insipidness. Distinctively it may approach mellow (which see under mature) and suggest qualities of excellence that come with time (as through ripening or aging) or are the result of careful and skilled handling that eliminates all harshness (a smooth whiskey] dancing every night to the island’s smoothest orchestra—N. Y. Times] In reference to persons or their works and accomplishments (as in the arts) smooth may carry further the notion of care and skill in handling and suggest a polished finish stemming from experienced knowledgeability or craftsmanship (Gottfried’s style is urbane and smooth and full of understatement, but the story he tells is one of wild passion—Artz] behind the smooth performance of choir, organ and minister were hours of preparation and careful timing—Dawson & Wilson] they themselves were smooth in manner, and they saw to it that in their presence life had no rough edges—Webb] or, in a less complimentary sense, a slick sophistication or meretricious attractiveness (he may be an authentic worker— but he’s also a smooth customer—Gilmoran] a smooth little blonde glides out of the bedroom—Time] a smooth wolf which has a highly polished technique in sidestepping marriage—Tilden] Lenient (see also forbearance) is applicable chiefly to things that are grateful to the senses or to the mind because they exert an emollient, relaxing, softening, or assuasive influence [earthly sounds, though sweet and well combined, and lenient as soft opiates to the mind—Cowper] in the lenient hush, strong torpid rhythms somehow flowed—E. P. O’Donnell] I poured her a lenient rum and water—Morley] Balm) also implies a soothing influence on the senses or mind, but beyond this it suggests refreshment and sometimes exhilaration. Coupled with one or another of these implications there is also frequently a suggestion of fragrance, especially the aromatic fragrance of balm-producing trees (all balm from the groves of Tahiti, came an indolent air—Melville] a lovely soft spring morning at the end of March, and unusually balm for the time of year—Butler d. 1902] in the balm atmosphere of that second victory she basks today—Fishwick]

but in much of its use it applies to a making or becoming superficially and literally unclean (as by spotting or staining or smudging) <dressed in gray shirt and trousers appropriately soiled and wrinkled from a day's work—MacInnes>

In this sense the word is very close to the corresponding sense of dirty, which is slightly stronger in its implication of uncleanliness and especially of disagreeable uncleanliness; thus, "to soil one's clothes" may merely imply that the freshness of a clean or new thing is lost, but "to dirty one's clothes" usually implies some activity which has plainly left its unclean traces upon the garments.

In its extended use, too, dirty tends to stress the unpleasant effect and typically suggests a making squalid or nasty of something that in itself is normal, wholesome, or clean (their religion took most of the rural whites' pleasures away from them, dirtying sex and the human body until it was a nasty thing—Lillian Smith> <a burlesque idea of chivalry—Canyby>

Sully implies the staining or soiling of something that is pure, fresh, limp, or innocent <they would not sully their fingers when eating human flesh—Ellisofon>

It is used more often in reference to immaterial or spiritual than to physical soiling <if it is bounderish to traduce one's host, it is an even worse breach of etiquette to sully one's own nest—Guérard> <those sins of the body which smear and sully, debase and degrade, destroy and ruin, condemn to the deepest pits of Hell—Farrell> <a merciless massacre sullied the fame of his earlier exploits—J. R. Green>

Tarnish basically implies the dulling or dimming of the luster of a thing by chemical action (as of air, dust, or dirt) <silver tarnished by the sulfur in egg yolks> In extended use it suggests a dimming rather than a total sullying of something of value <with similar scandals . . . it is not surprising that the image of state government is woefully tarnished—Armbrister>

Sullies her tawdry, shoddy, garish components are exposed as never before; yet her overall beauty is scarcely tarnished—Temple Fielding>

Foul and the intensive form befoul stress a making filthy or nasty and apply either to a material or an immaterial thing. They often suggest pollution or defiling by something highly offensive or disagreeable <earth was scarred by mining pits and railway tracks; air was fouled and darkened by factory soot—J. D. Hart> <it is senseless to foul our municipal personnel with unproved charges of general corruption—Moses> <having befouled their own minds for hire, they made their living by befouling the minds of others—Anderson> <Milton was . . . virtuous after befouling himself; once smeared with the sluttish filth of an evil woman, he had finally been won over—Styron>

Smirch and the intensive form besmirch may emphasize a discoloring by or as if by soot, smoke, or mud; usually they come close to sully in implying a destruction of immaculateness <now, with the singular ratification of the politician besmirched, he sought to go before the electorate and be washed whiter than snow by their votes—S. H. Adams> <the parson's well-practiced and spellbinding condemnation of the besmirching, degrading, befouling, hideous, and bestial sins of the flesh—Farrell> but they seldom carry as clear an implication of an effect on real virtue or purity as they do of a darkening or blackening of appearance, reputation, honor, or good name <their infamy spreads abroad, smirching the whole class to which they belong—Jeffries> <as black-hearted a brigand as ever smirched a page of Highland history—Joseph> <her reputation . . . was not smirched by gossip, for she was known to love her husband and to be virtuous—Bowers>

Grime and the more usual begrime intensify the meaning of dirty and typically suggest deeply imbedded dirt often accumulated over a prolonged period <a rudely cut inscription grimed with dust of many a year—Henry Phillips> <she was always filthy, her legs grimed, her hair bedraggled, her face anything but clean—W. C. Williams> <wearing a dress that virtually swept the street; that would in fact actually sweep it from time to time, battering and begriming the hem—F. L. Since her marriage she had never spoken to a woman in . . . intimacy—Bennett {aye, solitude, black solitude indeed, to meet a million souls and know not one—W. H. P. Smith} {create a difficulty rather than solve one—A. M. Young} Resolve (see also ANALYZE), as contrasted with solve, is likely to indicate analytic arrangement and consideration of the various phases or items of a problem or situation rather than finding a final solution or answer and is likely to suggest dispensing of confusion or perplexity by a clear formulation of questions or issues {you may find it of some interest to be told that the law has had to struggle with these problems and to know how it has resolved them—Cardozo} In some situations this process may achieve an answer, especially a ready or summary one {the was at the same time resolving successive tangles of intrigue against himself and his policy—Bello} {it was realized that the method of resolving apparent contradictions by liquidating one of the contradictions is not the way to arrive at true solutions—Times Lit. Sophisticated may be a term of reproach or of commendation according to the point of view of the speaker or writer, but it regularly implies a loss of naturalness, simplicity, or spontaneity through experience. From one point of view the term connotes
artificiality of manner, overrefinement, and absence of enthusiasm as the price paid for experience that brings knowledge of men and their ways (the Negro . . . could rarely afford the sophisticated inhibitions of civilization, and so he kept for his survival the art of the primitive, he lived in the enormous present—Mailer) From another point of view it implies a type of mentality marked by distinction, urbanity, cleverness, together with an indifference to all that is simple or banal in life (she didn't want to ride on the roller coaster and he guessed that her ideas of pleasure were more sophisticated—Cheever) From still another it may imply a cultivation that enables a man to rise above the ordinary or usual (the lack of a body of sophisticated and civilized public opinion, independent of plutocratic control and superior to the infan- tant philosophies of the mob—Mencken) Photographs realistic enough to catch the quality of the milieu which produced Pope John, surely the world's simplest and most sophisticated of men—Casey) Worldly-wise and worldly imply a wisdom gained by attention to the things and ways of the world. Often they stress alienation from true spiritual interests and, as a result, devotion to aims that will make one happy in this world, typically suggesting a concentration upon material ends or aims or upon a wealth of worldly experience (we apply the term "worldly-wise" to a man who skillfully chooses the best means to the end of ambition; but we should not call such a man "wise" without qualification—Sidgwick) (religion has been leading man toward a nobler vision, a better day, a higher hope, and a fuller life. The church, on the other hand, has been worldly, obscurantist, arrogant and predatory—Pfeffer) Blase implies a lack of responsiveness to things which have once been a joy or delight. It usually suggests sattety, but also it tends to suggest such real or affected overexperience and overcultivation as leads to disdain for all that arouses the average person's interest (the blase indifference of both the authorities and the people to the war was like cold water . . . on my spirits—Belden) (I was going through a period of adolescent awfulness in which I was trying to appear pale, interesting, and world-weary (the popular term . . . was "blase"), and incapable of any real experience of sentiment—Skinner) Disillusioned implies having had experiences that have completely destroyed a person's illusions, with resulting hopelessness; it applies to a person who from experience is no longer capable of enthusiasm or of idealistic motives and who has grown not only realistic but scornful of the sentimental, the visionary, the emotional (in a few years the young [newspaper] man will become a cynic, appraising the world and his fellows with disillusioned eyes, even with bitterness—Walker) the world, grown disillusioned and afraid, has neglected the one source that answers every problem, fills every need—Oursler) Ana cultivated, cultured (see corresponding nouns at culture): intellectualized (see corresponding adjective at mental): knowing, brilliant, *intelligent, clever, alert Ant unsophisticated —Con natural, simple, ingenuous, naive, artless: crude, uncouth, callow, raw (see rude)

Sorrow is the most general term, implying a sense of loss or of guilt (when you depart from me, sorrow abides and happiness takes his leave—Shak.) (virginity she thought she had parted with without sorrow, yet was surprised by torments of conscience—Malamud) Grief denotes intense emotional suffering or poignant sorrow especially for some real and definite cause (compare grieve) (a stilled, drowsy, unimpassioned grief, which finds no natural outlet—Coleridge) (I have lain in prison . . . Out of my nature has come wild despair: an abandonment to grief that was piteous even to look at; terrible and impotent rage; bitterness and scorn—Wilde) but grief may also denote a more mundane distress of mind that is representative of the distress and trials of day-to-day life or often of a particular situation in life (he had a thankless job which gave him all of the grief of running a war and none of the glory—Time) Heartache is used especially of persistent and deep sorrow that is slow to heal but that often gives little or no outward indication (the heartaches of a would-be author) (the heartache of a hunted race—Zangwill) (the dumb heartaches of those days—Churchill) Heartbreak can imply a yet deeper and more crushing grief (the sorrow and the heartbreak which . . . abide in the homes of so many of our neighbors—Truman) Anguish implies a distress of mind that is ex cruciating or torturing almost beyond bearing (anguish so great that human nature is driven by it from cover to cover, seeking refuge and finding none—Rose Macaulay) (a mild perturbation . . . as if to say that anguish as three little eruptions on your arm are like confluent smallpox—Montague) (then came another sob, more violent than the first—a strangled gasp of anguish—Rolvaag) Woe implies a deep or incom- solable misery or distress usually induced by grief (the suffering people whose woes he has not alleviated—W. P. Webb) (outcast from God . . . condemned to waste eternal days in woe—Milton) Regret seldom implies a sorrow that shows itself in tears or sobs or moans; usually it connotes such pain of mind as deep disappointment, fruitless longing, heartache, or spiritual anguish; consequently the term is applicable within a wide range that begins with the disappointment one feels, sometimes sincerely but sometimes merely as suggested by the language required by convention, in declining an invitation and ends with the pangs of remorse for something done or left undone or of hopeless repining for what can never be restored (with a sigh that might have been either of regret or relief—Wharton) (in moments of regret we recognize that some of our judgments have been mistaken—Cohen) (that expression of mildly cynical regret and acceptance that one often notices in people who have seen much of life, and experienced its hard and seamy side—Wolfe) Ana mourning, grieving (see grieve): *distress, suffering, misery, agony: melancholy, dejection, *sadness, depression Ant joy sorrow vb mourn, *grieve Ana *cry, weep, wail, keen: sob, moan, groan (see sigh vb) sorry pitiable, *contemptible, despicable, scurvv, cheap, beggarly, shabby Ana *mean, ignoble, sordid, abject: *miserable, wretched: paltry, *petty, trifling, trivial

Ana powers, faculties, functions (see singular nouns at POWER)

2 Soul, spirit can both denote an immaterial entity that is held to be distinguishable from and felt as superior to the body with which it is associated during the life of the individual and that in most religious beliefs is regarded as immortal, surviving the death of the body. Soul (see also MIND 2) may be preferred when the emphasis is upon the thing considered as an entity having specific functions, responsibilities, aspects, or destiny, while spirit (see also COURAGE, APPARITION) may be preferred when the stress is upon the quality, the constitution, the movement, or the activity of that entity (hoped to save his soul) <will to sell his soul> <pray for the souls of the dead> <do the right thing for your soul’s sake> <come close to God in spirit> <a man fervent in spirit> <the spirit indeed is willing, but the flesh is weak—Mt 26:41> Soul, both in its sense here meant here, and in the extended meanings derived from that sense, usually suggests a relation to or a connection with a body or with a physical or material entity to which it gives life or power; spirit in both its restricted and extended senses suggests an opposition or even an antithesis to what is physical, corporeal, or material and often a repugnance to the latter (it often takes a war to lay bare the soul of a people) <obey the spirit rather than the letter of a law> <Gibbon’s magnificent saying, that the Greek language gave a soul to the objects of sense and to a body to the abstractions of metaphysics—Quiller-Couch> <those who believe in the reality of a world of the spirit—the poet, the artist, the mystic—are at one in believing that there are other domains than that of physics—Jeans> Spirit only, and not soul, is used of incorporeal beings (as angels or devils) <I can call spirits from the vastly deep—Shak.>

sound n  Sound, noise both mean a sensation or effect produced by the stimulation of the auditory receptors of the ear and the auditory centers of the brain. Sound is the general term applicable to anything that is heard regardless of its loudness or softness, its pleasantness or unpleasantness, or its meaningfulness or meaningless- ness (he waited a good half hour after the last sounds of the departing enemy came down the wind—Mason) <it is impossible, words being what they are, to read the sound without reading the sense at the same time—MacLeish> <heard a sound, rather shrill and tentative, swell into hoarse, high clamor, and suddenly die out—Galsworthy> <approximates a laugh formed by . . . squeezing guttural sound out of the throat—Pynchon> Noise basically applies to confused sounds emanating from many persons and usually suggests a clamor made by mingled outcries or shouts; in more general use, it may apply to a disagreeably loud or harsh sound, whatever its source <the terrific noise of an explosion> <a noise like that from just one stringy throat must be an impossibility, and yet, there it was—Theodore Sturgeon> <dense jungle, restless with the shrill noise of wild life—Shipton> <he could not endure the noise of the machine shop> <the hell of distracting noises made by the carts, the cabs, the carriages—Mallock> Although the connotations of unpleasantness and discordance typically distinguish noise from sound, noise may sometimes be applied to a sound that merely engages the attention <still the sails made on a pleasant noise till noon, a noise like of a hidden brook—Coleridge> <the wetted earth gave out a cool delicious fragrance; there was a noise of birds—Huxley>

sour, acid, acridulous, tart, dry mean having a taste devoid of sweetness. All but dry suggest the taste of lemons, vinegar, or of most unripe fruits. Sour and acid are often interchangeable, but sour is more likely to be chosen to describe something that through fermentation has lost its natural sweet or neutral taste or, sometimes, smell <sour milk> <sour wine> and the term may additionally suggest a spoiled or rancid state <sour garbage> Acid, on the other hand, is appropriately used to describe something having a sharp sweetless taste in its natural state usually due to the presence of chemical acids <acid fruits> <acid drinks> Acidulous and tart are applied, as a rule, to things which may be described as acid, acridulous implying a modest degree of acidity and tart, a sharp but often agreeable acidulousness or, sometimes, acidity <some mineral waters are pleasantly acidulous> <most cooks prefer tart apples for pies and puddings> Dry is usually applied to wines which, although without any sweetness, are bland and therefore neither definitely acid nor definitely sour.

In their extended senses sour applies especially to what is crabbed or morose <a man with a prim sour mouth and an expression of eternal disapproval—Dahl> and acridulous and tart to what is characterized by asperity, punc- tuality, or sharpness <tart temper never mellowes with age—Irving> <what has been dull and dead in your years is now tart to the taste—Mailer> <said in acidulous jest that in Congress the South takes a recurrent and unending revenge in behalf of the long-dead Lee—W. S. White> Acid, partly by allusion to the corrosive powers of some acids, is likely to describe what is biting or caustic <his wit became acid; his letters are filled with caustic comment to sharpen the temper of those on the fighting line—Parrington> while dry may suggest matter-of-fact impersonal presentation of what is humorous, ironic, or sarcastic <there seemed to be a faint tinge of appeal in his eyes, curiously contrasted with the dry tone and the mocking words—Wouk> <a story . . . dry and ironical in its beginning—Prichett>

spacious, commodious, capacious, ample are comparable when they mean larger in extent than the average. Spacious implies great length and breadth and, sometimes, height; primarily, it is applied to things that have bounds or walls (spacious rooms) (spacious gardens) (the whole interior . . . a dim, spacious, fragrant place, aloft with golden lights—Pater) (none of them were mansions but they were spacious and faced on neat lawns—Styron) In its extended use, though it usually implies limits, it suggests largeness, sweep, and freedom within those limits (the spacious times of great Elizabeth—Tennyson) (one great spacious golden morning followed another—Powsys)

**Spacious** stresses roominess and freedom from hampering constriction along with convenience and comfortableness (my mother's room is very commodious, is it not? Large and cheerful looking—Austen) (the commodious first-class grandstand . . . is built not only for comfort but for pleasant living—Dobie) Capacious stresses the ability to hold, contain, and, sometimes, receive or retain, more than the ordinary thing of its kind (the dull girls, with their slow but capacious memories—Gallant) (provides a capacious rack in its clubrooms which is daily filled with press releases—Mott) (lumbled in a capacious pocket of the old-fashioned sort—Sayers) (the capacious soul of Shakespeare—Hazlitt)

**speak, talk, converse** can all mean to articulate words so as to express one's thoughts. **Speak** is, in general, the broad term and may refer to utterances of any kind, however coherent or however broken or disconnected, and with or without reference to a hearer or hearers (not able to **speak above a whisper**) 

"I shall **speak to him about it** (let him **speak for the organization**) (most of the material in this book was **spoken** before it was printed, as may perhaps be inferred from the style—Davis) (she repeated them, angered . . . but once the words were spoken she was sorry—McCullers) (the Bellman looked scared, and was almost too frightened to **speak—Lewis Carroll**) **Talk**, on the other hand, usually implies an auditor or auditors and connected colloquy or discourse (he left the room because he did not care to **talk**) (we **talk in the bosom of our family** in a way different from that in which we discourse on state occasions—Lowes) (she talked and talked and talked, yet it seemed to Marjorie that she could never hear enough of this girl's worldly wisdom—Wouk) But **speak** is also used of relatively weighty or formal speech (often public speech), and **talk**, of what is more or less empty or frivolous (a fool may **talk**, but a wise man **speaks—Ben Jonson**) (a good old man, sir; he will be **talking—Shak.**) (yet there happened in my time one noble speaker who was full of gravity in his **speaking . . . . **special**

adj Special, especial, specific, particular, individual are closely related terms because all carry the meaning relating to or belonging to one thing or one class especially as distinguished from all the others. Both **special** and **especial** imply differences which distinguish the thing so described from others of its kind, and the two can often be interchanged without significant loss. However special may be preferred when the differences give the thing concerned a quality, character, identity, or use of its own (the mistress of the boardinghouse refused to serve **special** food to any of her guests) (the baby requires a **special** soap because of his sensitive skin) (if the whole of nature is purposive, it is not likely that we can discern **special** purposes operating—Inge) (a **special** aspect of a more general malady—Babbitt)

Often, in addition, special implies being out of the ordinary or being conspicuously unusual and therefore comes close to uncommon or exceptional (it's not like ordinary photographs. There's something special about it—Bennett) (Mom was drunk most of the time and sometimes used to tear up the whole neighborhood, but all the same she had very special ideas about being respectable—Theodore Sturgeon) (preventing the perpetuation of an hereditary upper class with **special** privileges and better education—Edmund Wilson)

**Special** is also applicable to something added (as to a schedule, a series, or a sequence) for an exceptional or extra-ordinary purpose, reason, or occasion (**special** trains will be run to Washington for the inauguration) (a **special** dividend) **Especial** is more likely to be chosen when there is the intent to convey the idea of preeminence or of being such as is described over and above all the others (his **especial** friend) (a matter of **especial** importance) (this has no **special** reference to any one person)

(Egypt, as the granary of the ancient world, had **especial** need for Pussy's services—Repplier) (an elegantly written piece in the author's own **especial** version of the neoclassic manner—Virgil Thomson)

**Specific** (see also **EXPLICIT**) basically implies unique and peculiar relationship to a kind or category or individual (**specific** evidence of disease) (the **specific** virtue of a drug) (**specific** nutritive needs of the aged) In some (as philosophical, biological, or critical) uses it can suggest opposition to generic and imply a relation to a particular species as distinguished from a more comprehensive category to which that species belongs (**specific** characters by which members of the genus Rosa can be differentiated) (**groups** of **specific** rank) but in more general use it tends to stress unicity and to imply a relation to one thing or one individual as distinguished from all others that can be felt to fall into a category with that one (whether the **specific** freedoms we know and cherish . . . . can be maintained—Sidey Hook) (make it possible for the imaginative talent to develop along those lines that reward with **specific** fruition—Hudson Review) (the binding of some ions is **highly specific** with respect to the protein involved—Cannan & Levy) However, **specific** also may mean no more than explicitly mentioned, or called into or brought forward for consideration (if such injuries . . . . result in any of the following **specific** losses—insurance policy) (would be glad to hear of **specific** cases of scholars having difficulty with either passports or visas—ACLS Newsletter) (interested in any **specific** field only for its contribution to a view of the world as a totality—Cohen) In this last sense of **specific** **particular** is sometimes preferred on the ground that the term is clearly opposed to **general** and that it is a close synonym of **single** (for fuller treatment see **SINGLE**). The differences between the two words in this sense are not easily discoverable, but **specific** seems to be chosen more often when the ideas of specification or of illustration are involved, and **particular**, when the distinctness of the thing as an individual is to be suggested; thus, one gives a **specific** illustration to indicate a word's normal use but describes the **particular** uses of the word (in this connection, one of Don Quixote's adventures deserves **particular** mention—Muggeridge) (we get a sense for **particular** beauties of nature, rather than a sense for Nature herself—Binyon) **Particular** is often used also in the sense of **special** and **especial** (some half-dozen **particular** friends—Dickens) (the Debussy selection was the **particular** gem of the evening—Watt) In logic **particular** is opposed to universal and applies to matters (as propositions, judgments, and conceptions) which have reference to a single member or to some members of a class rather than to all; thus, "some men are highly intelligent" is a particular proposition, but "all men make mistakes" is a universal proposition. Often, in less technical use, **particular** implies an opposition to **general** as well as to universal (one is apt to amplify a **particular** judgment into a general opinion—Mackenzie) (we shall venture beyond the **particular** book in search of qualities that group books together—Woolf) **Individual** unequivocally im-
plies reference to one of the class or group as clearly distinguished from all the others (the aspect of every individual stone or brick—Conrad) (one could hardly maintain the courage to be individual, to speak with one's own voice—Maier) (it was not the magnitude or multiplicity of burdens that created martyrs and saints; it was the individual capacity to bear suffering—Hervey).

**spectator, observer, beholder, looker-on, onlooker, witness, eyewitness, bystander, kibitzer** are comparable when they mean one who sees or looks upon something. Spectator can be used precisely in place of bare witness—Conrad) (I had once been a cool observer because some part of me knew that I had more emotion than most and so must protect myself with a cold eye—Maier). Beholder sometimes carries a stronger implication of watching or regarding intently than either of the preceding terms, but it may mean little more than one who sees all the beholders take his part with weeping—Shak. The term is often applicable to one who has been privileged to look intently upon or, sometimes, consider deeply a person or thing with the result that he obtains a clear and accurate impression of that person or thing and is moved by the qualities (as beauty, power, tenderness, or pathos) of what is seen (to what extent is beauty subjective, existing only in the mind of the beholder—Hunter Mead) (what the beholder must realize as he looks and ponders is that history is not something in books—Duffus). Looker-on and onlooker differ from beholder chiefly in their suggestions of casualness or detachment and in their definite implication of lack of participation (there was a great crowd of lookers-on at the fire) (the surgeon refused to operate in the presence of onlookers). Either term is sometimes used in place of spectator when the distinction between the one who sees and what he sees is stressed (the onlookers, not the participants, see most of the game) (lookers-on often see what familiarity obscures for the participants—Moberly) (they dropped, panting, while the onlookers repeated that it was a shame and somebody ought to stop them—Davis). Witness specifically denotes one who has firsthand knowledge and therefore is competent to give testimony (no person shall be convicted of treason, unless on the testimony of two witnesses to the same overt act—U. S. Constitution) The term sometimes applies to a person who knows because he has seen (standing there, I was witness of a little incident that seemed to escape the rest—Quiller-Couch) but since witness does not necessarily imply seeing, eyewitness is often preferred as more explicitly implying actual sight (there were no eyewitnesses of the collision) (incontrovertible evidence, with occasional corroboration from the eyewitness accounts of the few survivors—Shirer). Bystander primarily denotes one who stands by when something is happening; sometimes it carries the implication of onlooker (the policeman took the names of all the bystanders) (men have been haunted recurrently by the question “Am I my brother’s keeper?”... It is what makes being a bystander more and more impossible—Rothman) but at other times it suggests little more than presence at a place (difficult for each member of the society really to participate...) He begins to be an onlooker at most of it, then a bystander, and may end up with indifference to the welfare of his society—Kroebel) (a bystander was injured by the explosion) Kibitzer specifically applies to one who watches a card game by looking over the shoulders of the players and who may annoy them by offering advice; in extended use the word denotes an onlooker who meddles or makes unwelcome suggestions.

Speech can apply to a public discourse irrespective of its quality or its degree of preparation, of its aim (as to influence, instruct, or entertain), or of the caliber of its speaker or audience (the senator was called upon to make a speech) (after-dinner speeches) ("The rest of my speech" (he exclaimed to his men) "you shall hear when I’ve leisure to speak it")—Lewis Carroll

Address implies formality and usually careful preparation; it often connotes distinctiveness in the speaker or gives emphasis to the importance of the speech (commencement address) (the president is scheduled to deliver three addresses on his trip) (an article developed from his address to friends and admirers at a recent testimonial dinner—Sat. Review) Oration suggests eloquence, rhetorical style, and usually a dignified but sometimes a high-flown or long-winded appeal to the emotions of a large audience or assembly (a Fourth of July oration) (the oration of Mr. Webster was worthy of his fame, and what is much more, was worthy of the occasion—Emerson) Harangue, once nearly equivalent to oration except for its added implications of vehemence and passion, commonly retains only these distinctive implications and connotes either length and tediousness of speech or an impassioned appeal to the audience (if you do not believe that emotion ... is the basic social force, listen to the harangue of any successful politician—Furnas) Lecture often implies reading; it commonly designates a carefully prepared speech on a special topic intended to give information and instruction to a group of students or studious persons (they are still using lectures to pass out information which could be got by the student more rapidly and accurately from ... books—Lynn White) Talk stresses informality; it may be used to designate either a lecture or an address when the speaker wishes to emphasize his desire to speak directly and simply to his auditors as individuals (this is a talk rather than an oration ... It is surely unnecessary to say how well, and with what an individual attitude and selectiveness Mr. Forster talks—Times Lit. Sup.) Sermon and homily both commonly imply religious instruction by an ordained preacher and a church congregation as the listeners; in such use sermon usually connotes a theme drawn from a scriptural text, while homily suggests practical moral counsel rather than doctrinal discussion. But both terms have extended use in which they denote a usual speech or talk on a moral theme (copious drafts of exhortation and homily administered ... by reformers—Cardozo) (going around the country, preaching sermons on the need of defending the freedom of the mind—Davis)

spell n Spell, shift, tour, trick, turn, stint, bout, go can mean a limited period or amount of some activity that often follows a schedule. Spell is ordinarily used in reference to very heavy or trying work which must be interrupted by a period of rest; the period may vary according to the laboriousness of the activity and the need of relief from it <each spell of work was followed by a brief rest>

Shift suggests a change in time or hours of duty and therefore a change in the workers employed; it is used es-

in special reference to an industrial plant which is in contin-

uous operation, and is applied variously to the period of work or to the body of workers engaged to work during that period <the third shift begins work at midnight>

The factory works on a schedule of three shifts each day

Tour occurs chiefly in the phrase tour of duty; it usually suggests a change in the character of the work and in its typical use (as of military or naval personnel) im-

plies assignment for a definite term (as of weeks, months,

or years) to a particular type of duty or to duty in a par-

cular place <his next tour of duty will be in Ceylon>

after a year at sea the commander was given a tour of

shore duty>

Trick, like spell, usually implies the time allotted to one for working at or as if at the helm of a ship, and it may differ little from shift as applied to a period of work <to take his trick at the wheel—Marryat> (the night trick in a newspaper office) Turn in general use

suggests an opportunity of a specified kind (as for work or play) or for a particular period that comes in alternation, rotation, or at more or less regular intervals <I'll take a turn at that job now> <the boys lined up, each waiting for his turn at bat> <if we each took our turn and did our bit in peace as we had to do during the war—Shaw>

Stint (see also TASK) implies either an assigned amount of work or an assigned amount of time in which to accom-

plish it. The term is used widely in reference to one's own occupation, to the work of running a home, a farm, or a business, or to work in an industrial field especially where regular hours for a day's work are not or cannot be easily established (the author assigned himself a daily stint

of three pages) <Spinoza was forced to grind his stint

of lenses before he could gratify his love for philosophy>

in some countries miners' wages are regulated not by days but by stints> Bout, which has many specific applica-

tions and is perhaps more widely employed than any of the preceding terms, in general suggests an activity or con-

dition that is marked by a definite beginning and end in time; specifically it may refer to a fight, an attack of

illness and especially of a recurrent illness, or a spell (as of drinking, of work, or of exercise), but in every case it

implies a beginning or end that marks it off from what precedes and follows <a wrestling bout> <a bout of malaria>

he had been given to bouts only, and was not a habitual drunkard—Hardy> <copious eating and still more copious drinking, interrupted by bouts of . . . domes-
tic horseplay—Huxley> <showing the effect of his past in . . . bouts of neurotic excitement—Buchan>

Go is often not clearly defined in meaning, but it comes close to bout, spell, and turn, in suggesting a restricted period <a go with the gloves> <have a go at farming>

Ana

*period: allotment, assignment, apportionment (see corresponding verbs at ALLOT)

spend, expend, disburse can mean to pay out money or an equivalent of money for something or in expectation of some return. Spend is the ordinary term; it may be used regardless of the amount dealt out in the purchase of some-

thing <spend a nickel for candy> <spend fifty dollars for a dress> <the government durante the first year of the war spent billions of dollars>

In intransitive use it requires usually an adverb or adverbial phrase to indicate the ex-

tent to which money or, by extension, its equivalent, is paid out <he has never known how it feels to spend freely> <the Pentagon spends so wastefully that we could cut our military budget at least 25 percent—Caiton>

this world in arms is not spending money alone. It is spend-

ing the sweat of its laborers, the genius of its scient-

ists, the hopes of its children—Eisenhower> However the word is often used with so little implication of an immedi-

ate or direct or commensurate return and with objects so remotely equivalent to money that it comes to imply a using in such a manner as to exhaust, drain, or deplete <spend six months searching for the home they wished to buy> <spend her small store of energy with caution>

*man after man spends himself in this cause—Carlyle>

decided on a whim to spend the day like a yo-yo shuttling on the subway back and forth underneath 42nd Street—

Pynchon> <spend his life and his blood in the service of the king> Expend comes very close to spend in meaning, but it tends to be used more in reference to business, industry, finance, or governmental than in reference to private persons and therefore to imply larger sums or more determinate ends <the social services upon which public revenue is expended—Hobson>

In its extended use, too, expend tends to imply largeness of outgo and often, like spend, suggests a depleting or exhausting of what is being used <we have expended our resources—both human and natural—without stint—Truman> <youth is always giving itself, expending itself—Yeats> but it not infrequently carries an added suggestion of futility that is not ap-

parent in spend <much thought had been expended, but little accomplished—Dawson & Wilson> <the tons of

printer's ink and newsprint expended during the course of the hearings—Wall Street Jour.> <all the social feeling and intellectual effort . . . seemed to have expended themselves—John Morley>

Disburse basically implies the paying out of money (as from public revenues, a huge fortune, an institutional income, or a society's funds), but it also may imply distribution (as to pensioners or among heirs) and often stresses an acting under authority in such paying or distributing <the treasurer has disbursed nearly five thousand dollars of emergency funds for re-

pair of the clubhouse> <our time and our money, even though disbursed by governmental authority—Hambly>

waiting for the teller to disburse those complex payroll accounts—Morley> When extended to nonmonetary mat-

ters, disburse is likely to stress distribution <the hundred kilograms of uranium . . . was designated for research only, and was to be disbursted under strictly bilateral agreements—Lear>

spendthrift, prodigal, profligate, waster, wastrel are
comparable when they denote a person who dissipates his resources foolishly and wastefully. All are more or less pejorative terms but they may differ significantly in emphasis and application. Spendthrift and prodigal are the most nearly neutral terms and in themselves, as apart from context, carry little suggestion of moral obliquity; they are, however, the members of the group with specific legal applications and are generally applicable when the basic notion is one of unwise and wasteful expenditure usually of material resources (as wages, wealth, or property). Spendthrift stresses lack of prudence in spending and usually implies imbalance between income and outgo rather than lavishness (<to spendthrifts . . . there is only one limit to their fortune,—that of time; and a spendthrift with only a few crowns is the Emperor of Rome until they are spent—Stevenson> <a spendthrift is a man . . . who saves nothing, spends fifty-eight cents of every dollar on living expenses, forty cents on recreation and one cent each on education and alms—Brooklyn Daily Eagle> In legal and quasi-legal use the term implies such expenditure in relation to income and resources as are likely to leave the spendthrift and his dependents public charges. Prodigal (compare prodigal adj used in prose) is more likely to suggest such lavish expenditure as can deplete the most abundant resources (<this royal prodigal, lavishing the nation's wealth on palaces and parks while the people starved—<the Irish produce great writers because they're temperamentally prodigals—they're willing to squander their lives on the gratuitous work that great art demands—Edmund Wilson> In legal and quasi-legal use the term applies specifically to one held legally incompetent to manage his property or to incur debts because of demonstrated incapacity to avoid foolish dissipation of property. While profligate may imply the habits of a spendthrift, it is more likely to stress such extravagant, even vicious expenditure of one's personal powers (as of mind and body) that mere economic waste becomes a secondary matter; characteristically it suggests the utmost of debauchery and dissoluteness (<the were not cautious stewards, husbanding their resources. Julius Caesar was a notorious profligate, who piled up enormous debts—<Inge> <the wretched profligate found himself again plunged into excesses—J. R. Green> Waster often comes very close to spendthrift in meaning, but it carries a stronger implication of worthlessness than does the former word. It often suggests the habits of a loafer or ne'er-do-well but it is sometimes applied to men of inherited wealth who spend their lives in idleness or in frivolities (<he who will not work, must . . . leave the town, as they will not sweat themselves for an healthy, idle waster—Adair> <the palaces and pleasure seats of the plutocrats are used for the recreation of workers instead of for the enervation of wastrels—Skaw> <they're a bunch of wasters. All they do . . . is just dance and chatter and show off their clothes—Sinclair Lewis> Wastrel, though it often implies the wasting of money and other resources, more often is applied to a good-for-nothing, whether young or old, especially to one who is a drain upon the community; the prevailing implication is that of disreputableness (<if we are to avoid the danger of so shaping them that they shall be mere mechanisms in working hours and mere wastrels in the rest—Grantgent> <even allowing for a large element of intentional exaggeration . . . there remains the basic fact that . . . we have the expression of the twisted psyche of an embittered, penniless wastrel—R. splendid resplendent, gorgeous, glorious, sublime, superb

can mean having or displaying outstanding or transcendingly impressive qualities. Although, like most adjectives implying transcendence, they are often used interchangeably in hyperbole or in general expressions of great admiration or satisfaction, they are capable of being used more precisely in ways that convey quite distinctive images and impressions. Splendid implies an outshining of the usual or customary (as in brilliance, luster, grandeur, or magnificence) or an impressing of the observer (as by surpassing brilliance, luster, or grandeur) "a fine—yes even a splendid room—of great height, and covered grandeur—Galworthy") "the splendid efflorescence of genius in Russia during...the last century—Ellis") (blocks set there like markers of a splendid city yet unbuilt which would rise grandly from the hills—Wolf") (there was a majestic quality about this woman, something splendid, almost stately—Dahl") Resplendent implies a glowing or blazing splendor "girls, resplendent in fine red or green cloth coats with big fur collars framing the flashing vivacity of their faces—Ferber") "Juliet died, but not before she had shown how great and resplendent a thing love could be—Krutch") Gorgeous is likely to apply to the sumptuously splendid in color or display of colors "the July sun shone over Egdon and fired its crimson heather to scarlet. It was the one season of the year, and the one weather of the season, in which the heath was gorgeous—Hardy") The term sometimes stresses showiness or elaborateness rather than splendor of coloring "a gorgeous feast") "quite gorgeous archway with gates at the head of the staircase, covered and festooned with pink roses—Wouk") Glorious implies a being radiant with light or beauty or a standing out as eminently worthy of admiration, renown, or distinction "now is the winter of our discontent made glorious summer by this sun of York—Shak.") "he soon saw within ken a glorious Angel stood...his back was turned, but not his brightness hid—Milton") "as often happens after a gray daybreak the sun had risen in a warm and glorious splendor—Conrad") (this glorious vision of manly strength and beauty—Shaw") Sublime applies distinctively to what is so elevated or exalted that the mind in contemplating or picturing it cannot reach full comprehension of it and must, in part at least, feel or imagine the vastness of its extent, power, beauty, or nobility "the main force of Buddhist art was spent in the creation of sublime figures, the images of those enlightened ones who in the clear beam of their purified vision beheld and understood the sorrows, the struggles, the vain angers and hatreds of imperfect mortality—Binyon") "the thunderstorm when it is felt to be sublime has lost in part at least the terrors it possesses as a natural event—Alexander") (he ran the gamut of denunciation, rising to heights of wrath that were sublime and almost Godlike—London"

sponsor n Sponsor, patron, surety, guarantor, backer, angel are comparable when they denote a person who in a greater or less degree accepts responsibility for another person or for a particular venture or undertaking. Sponsor usually implies public acceptance of a responsibility and a definite engagement to perform what is promised: the word implies making a pledge in behalf of another and thereby accepting responsibility for its fulfillment; thus, the sponsor of an infant in baptism makes the promises in the child's name and pledges himself to be responsible for the child's religious training if the latter is deprived of his natural guardians. In a wider sense sponsor suggests assumption of the role of promoter or supporter and may imply acceptance of any degree of responsibility from one that is complete (it is my way, when I have finished a book, to let it drop with a resigned shrug . . .). The charm it once possessed for me, its sponsor, has long since vanished—Thomas Mann] to one that is indirect or remote and often purely economic (the major sponsors of scientific research, governments and business corporations—Flew] for every person whose passage was paid to Virginia, the sponsor received fifty acres of land—Smelser & Kirwin] Patron stresses the acceptance of the relation as a protector or benefactor especially in return for service, honors, or devotion; it often implies the obligation to assist, support, or defend; thus, a patron of an artist or of a poet is a wealthy or influential person who makes him a protégé presumably in return for honors paid him; the patron of an institution, a cause, or a charity is one whose generous and regular contributions to its support are publicly recognized. Surety and guarantor imply answerability for another's debt or performance of duty in case of default because of prior acceptance of responsibility. Backer, less specific in denotation than the other terms, is used chiefly in relation to enterprises (as of sports, politics, and the theater); it often implies the giving of financial support, sometimes merely moral support or encouragement, but it carries no implication that responsibility for debts is assumed (the success of a publication is the success of its editors, and not of its business managers and its backers—Hendrick] Angel is a somewhat derogatory or contemptuous term for a financial backer, especially of a theatrical enterprise. spoil n Spoil, plunder, booty, prize, loot, swag can mean something of value that is taken from another by force or craft. Spoil applies to the movable property of a defeated enemy, which by the custom of old-time warfare belongs to the victor and of which he strips a captured city or place (fire the palace, the fort, and the keep—leave to the foe man no spoil at all—Kipling> With changes in methods and customs of warfare spoil, and especially its plural spoils, tends to be applied not only to property or land taken over by conquering forces in actual warfare or demanded by them from the conquered as a condition of making peace but also to whatever by custom and often unethical custom belongs to a victor whether in warlike endeavor or more peaceful pursuits; thus, in political use spoils applies chiefly to appointive public offices and their emoluments which the successful party in an election regards as its peculiar property to be bestowed as its leaders wish. But spoil may also apply to something gained by skill or effort (the spoils of a conservative industrial life—Brooks> or sometimes acquired as casually as if by looting (the car filled with country spoils) brought back all sorts of frivolous spoils from her trip> Plunder implies open violence (as of marauders) and is a more inclusive term than spoil because not restricted to warfare; it consistently implies robbery, whether as incidental to war or as dissociated from it and is applicable to what has been seized not only by spoilers, pillagers, and sackers but by such riffraff as bandits, brigands, and highwaymen (often the pirates were glad to accept money instead of plunder, and ransom for the slaves—Forester> (a useless compiler, who fills letters and sermons with the plunder of the ancients and Holy Writ—H. O. Taylor> Booty, like plunder, is applicable to spoilable goods as well as to what is seized by or as if by robbery or theft (birds like the berries. Sponsor usually implies public acceptance of a responsibility and a definite engagement to perform what is promised; the word implies making a pledge in behalf of another and thereby accepting responsibility for its fulfillment; thus, the sponsor of an infant in baptism makes the promises in the child's name and pledges himself to be responsible for the child's religious training if the latter is deprived of his natural guardians. In a wider sense sponsor suggests assumption of the role of promoter or supporter and may imply acceptance of any degree of responsibility from one that is complete (it is my way, when I have finished a book, to let it drop with a resigned shrug . . .). The charm it once possessed for me, its sponsor, has long since vanished—Thomas Mann] to one that is indirect or remote and often purely economic (the major sponsors of scientific research, governments and business corporations—Flew] for every person whose passage was paid to Virginia, the sponsor received fifty acres of land—Smelser & Kirwin] Patron stresses the acceptance of the relation as a protector or benefactor especially in return for service, honors, or devotion; it often implies the obligation to assist, support, or defend; thus, a patron of an artist or of a poet is a wealthy or influential person who makes him a protégé presumably in return for honors paid him; the patron of an institution, a cause, or a charity is one whose generous and regular contributions to its support are publicly recognized. Surety and guarantor imply answerability for another's debt or performance of duty in case of default because of prior acceptance of responsibility. Backer, less specific in denotation than the other terms, is used chiefly in relation to enterprises (as of sports, politics, and the theater); it often implies the giving of financial support, sometimes merely moral support or encouragement, but it carries no implication that responsibility for debts is assumed (the success of a publication is the success of its editors, and not of its business managers and its backers—Hendrick] Angel is a somewhat derogatory or contemptuous term for a financial backer, especially of a theatrical enterprise. *Spontaneous, impulsive, instinctive, automatic, mechanical in application to persons or their movements, acts, and utterances mean acting or activated without apparent thought or deliberation. Spontaneous can describe whatever is not affected or effected by an external or internal compulsion of the will and comes about so naturally that it seems unpremeditated as well as unprompted (<a spontaneous burst of applause> <a spontaneous expression of feeling> <the spontaneous wish to learn, which every normal child possesses> should be the driving-force in education—Russell) <the witticisms are never planted: they are spontaneous and over in a flash, like the quick striking of a match—Edmund Wilson> Impulsive applies to someone or something actuated suddenly and impetuously under the stress of the feeling or spirit of the moment and seeming to be involuntary and forced by emotion rather than voluntary and natural (<an impulsive act of generosity> <my heart, impulsive and wayward—Longfellow> <he made an impulsive gesture, and opened his lips; but he dared not speak—Deland> <to promote the carefree, impulsive purchasing of new items—Packard> Instinctive implies the guiding influence of instinct and a native and unreasoned prompting to actions characteristic of the species and presumably contributing to its life and well-being: when referred to human beings, the term is applied to actions, movements, or feelings which are instantaneous, unwilled, and often unconscious (as reflex movements, habitual actions, or specific responses to stimuli) <the most prolonged and difficult operations of our minds may yet become instantaneous, or, as we call it, instinctive—Shaw> <her attitude was not a matter of reason. It was as instinctive as the humping-up of a cat at a dog—Wouk> Automatic and mechanical apply to what at least to outward appearances seems to engage neither the mind nor the emotions and to suggest the operation of a machine. But automatic, like instinctive, stresses promptness in the response. It differs from instinctive, however, in implying adaptability to changing circumstances and readiness to react or to respond immediately and unvaryingly each time a given situation or stimulus recurs (<the responses of a well-trained soldier to commands are automatic> <he pulled the hall door open, and he held it, in automatic and habitual caution, scarcely ajar—Boyle> <in fact, voting is so nearly automatic that a cynic might ask why we have election campaigns at all—Bliven b.1889> Mechanical, on the other hand, stresses the lifeless and, often, the perfunctory character of the response. It does not, as automatic often does, suggest perfect discipline; rather, it suggests a mind dulled by repetition of the act, motion, or operation and capable only of routine performance (<he would deal you out facts in a dry automatic way> <in fact, voting is so nearly automatic that a cynic might ask why we have election campaigns at all—Bliven b.1889> Mechanical, on the other hand, stresses the lifeless and, often, the perfunctory character of the response. It does not, as automatic often does, suggest perfect discipline; rather, it suggests a mind dulled by repetition of the act, motion, or operation and capable only of routine performance (<he would deal you out facts in a dry mechanical way> <as if reading them in a book—Hudson> <engaged in futile and mechanical lovemaking, compulsive drinking, and considerations of suicide—Aldridge>)

**spot** vb *Spot, spatter, sprinkle, mottle, fleck, stipple, marble, speckle, spangle, bespangle can mean to cover or to mark or to become covered or marked with spots or streaks. The same distinctions in implications or connotations are found in their participial adjectives (often used as simple adjectives) spotted, spattered, sprinkled, motbled, flecked, stippled, marbled, speckled, spangled, bespangled. Spot usually suggests either accident or a result of nature. When accident or carelessness is suggested, a staining or smirching is often connoted (<spot a dress with mud> <spot a cloth with iodine> <the book was spotted with grease> <spotted her stockings in the rain>) but, when the agency of art or nature is suggested, some design is usually implied that decorates, covers, or distinguishes; this use occurs mainly in the participial adjective (<spotted muslin> <no spotted pony is ever pure Shetland—Riker> <a spotted leopard> <a spotted orchid> Spatter (see also sprinkle) essentially implies a dispersing or scattering in fragments; in general it presupposes an action (as of boiling grease, of dashing rain, or of a person washing) that causes something to fly out in drops or bits upon something or someone (<do not get the lard too hot, for it will spatter all over you> <spray from one of the hoses spattered over the longshoremen—Pizer> <his very good fortune spattered others with misfortune—Malamud> <do ye wait for the spattered shrimpnel ere ye learn how a gun is laid?—Kipling> Sprinkle (see also sprinkle) implies an effect of or as if of scattering a liquid in small drops; the term may emphasize the numbers or frequency of tiny spots or the thin strewwing of larger ones (<his ill-fitting clothes were usually sprinkled with cigarette ashes—Lubel> <the masses covered with slacksknaps and white prayer shawls, sprinkled here and there with the frilly hats . . . of women—Wouk> <a heavily wooded section, sprinkled with small lakes—Amer. Guide Series: Pa.) Mottle stresses an irregular spotting (as in streaks or blobs or patches) usually with another color; therefore what is mottled tends to present a clouded or a broken appearance or a surface covered with unevenly placed spots (<drifting clouds mottled the sea—Michener> <books bound in mottled calf> <his eyes were opaque as paviug stones, and his cheeks a mottled gray—Kenneth Roberts> Fleck may imply a spot or blemish (as of the skin); usually, however, it suggests a light spotting by specks (as of snow, of color, of light, or of clouds) <overhead the still snow is scarcely flecked by a cloud—Black> <one hillside is flecked by a herd of black goats—Edmund Wilson> <immature birds . . . recognizable by their dark, flecked

plumage—E. A. Armstrong> Stipple basically refers to a technique in engraving, painting, or drawing in which dots or short touches rather than lines are used, especially to depict masses or to indicate shadows. The term is often extended to other things that suggest this technique or its effect (<accidentally jiggled his arm in such wise as to make the stipple ink over the coat—Perelman> <sunlight that fell through the trees and stippled the sidewalks—Basso> <the quail that spins out of the stippled corn to windy air—Southerly> <a play stippled alternately with tenderness and dynamite—Nathan> Marble comes close to motile, but it is specifically used when by intent or by nature the irregularly streaked effect of variegated marble is reproduced (<for the endpapers we use handmade paper marbled by hand—Notes on The Art of Book-binding> <well-marbled beef> <his uneven eyes, one blind, marbled and sunken in his skull—Malcolm Cowley> Speckle suggests a covering with small and often crowded spots (as of color); the term is sometimes used with a suggestion of the cause or nature of the marks (<a few drops of unenthusiastic rain . . . speckled the shoulders of his coat—Charteris> <his arms were speckled from wrists to biceps with the punctures of a hypodermic needle—Koble> <bright stars speckled the sky—Mansfield> Spangle and spangle suggest a thick swirling with tiny sparkling bits (as of shiny metal) or with something giving a similar effect (<an evening sheath . . . spangled with black sequins—Lois Long> <the spangled palaces of sin and fancy dancing in the false West of the movies—Steinbeck> <grass . . . all bespangled with dewdrops—Cowper> <a cold perspiration bespangled his brow—Gilbert> Ana splash, bespatter, besprinkle, aspirce (see sprinkler): <soil, sully, dirty, smirch, besmirch: variegate, checker, dapple, freak (see corresponding adjectives at VARIO-GATED> spotted spattered, sprinkled, mottled, flecked, stippled, marbled, speckled, spangled, bespangled (see under SPOT vb) sprain n *strain sprain vb strain (see under STRAIN n) spread vb Spread, circulate, disseminate, diffuse, propagate, radiate can all mean to extend or cause to extend over an area or space. Spread basically implies a drawing or stretching out to the limit (<spread a net> <spread a cloth on the ground> <the bird spreads its wings> <spread a sail>) and in the sense here considered emphasizes distribution or dispersion (as by stirring or scattering or being strewed or scattered) over an extent of space that may be large or small or incalculable or calculable (<spread fertilizer over a field> <this troublesome weed has spread over a large section of the country> Often it suggests an applying in or a taking the form of a thin layer (<spread butter on bread> <the paint spreads thinly and evenly> <the clouds shifted, spread against the sky . . . and enveloped everything below—Styron>) or a making or becoming more prevalent or more widely known or felt (<don’t go on spreading that nonsense—Rose Macaulay> <the heretic should be crushed before his heresy can spread—Fitzroy Maclean> <news of us might spread far beyond that town—Shipton> Circulate may imply in its primary and largely technical use a continuous or repeated movement over the same course from starting point to starting point (<the blood circulates from the heart through the arteries and veins back to the heart again> <steam circulating through a heating system>) In its more general applications the term tends to stress a moving about or a causing to move about freely and continuously, often to the more or less complete loss of the notion of going over the same course again and again (<the seats were being filled up rapidly and a pleasant noise circulated in the auditorium—Joyce> <the satire, circulating in manuscript copies, had a great local vogue—Lucas> <all of us circulating ominously, and incognito, throughout the city, sizing up elevator operators—Salinger> Disseminate implies much the same as spread when that word suggests distribution here and there (<disseminate information> <the London ladies were indignant, and naturally they started disseminating a vast amount of fruity gossip about the new Lady Turton—Dahl> In those days the Boy Scout movement was already in existence, but it had still to disseminate sound views about knot-tying among the rising generation—H. G. Wells> Diffuse suggests a spreading throughout a space; it is applied primarily to things (as sound, light, odor, or vapor) that in moving permeate the medium through which they move and in its extended sense to things (as education, knowledge, fame, and spirit) that have or are felt to have a similar pervasive quality in their dissemination (<the colors of the sky are due to minute particles diffused through the atmosphere—Tyndall> It would surely be hard to find any country . . . where instruction is more widely diffused—Ellis> <a State in which power is concentrated will . . . be more bellicose than one in which power is diffused—Russell> <the so-called "correct speech" is being diffused to the mass of the populace through migration, mass education, and mass communication media—Amer. Sociological Review> Propagate (see also GENERATE; compare propaganda under PUBLICITY) implies extension for the sake of increase (as of believers or members or of activity or operation) (<propagate the faith> <propagate a false rumor>) <I am bound by my own definition of criticism: a disinterested endeavor to learn and propagate the best that is known and thought in the world—Arnold> extraordinary plebeians who rise sharply . . . and so propagate the delusion that all other plebeians would do the same thing if they had the chance—Mencken> Radiate implies a spreading from a center outward in or as if in rays; in general use it is often applied to the spreading of something material or immaterial from a fixed center (<soul-searching Freedom! here assume thy stand, and radiate hence to every distant land—Barlow> <her face . . . was still pretty, even with the web of little wrinkles that radiated from the corners of her eyes—Basso>) A superb self-confidence radiated from him, as it does from any healthy animal—Gibbons> but in its common technical use the term is largely restricted in reference to diffusion in the form of rays (as of heat or light) (<the sun radiates both light and heat> Ana *distribute, dispense, deal: *scatter, dissipate spread n *expansion, amplitude, stretch Ana extent, area, magnitude, *size: *range, reach, scope, compass sprightly *lively, animated, vivacious, gay Ana *active, live, dynamic: *agile, nimble, brisk, sry: *merry, blithe, jocund spring vb 1 Spring, arise, rise, originate, derive, flow, issue, emanate, proceed, stem can mean to come up out of or into something into existence. It had sprung from a necessity of his nature—Brooks> <freedom of the mind, the basic freedom from which all other freedoms spring—Davis> Arise emphasizes the fact of coming into existence or into notice more than the conditions attending the event; often it conveys no clear suggestion of a prior state (<a rumor arose and was widely circulated> <after Alfed no rival native

house arose to dispute the throne with Alfred's heirs—Malone> When used with from, however, it usually implies a causal connection between what is the object of the preposition and what is the subject of the verb; in such cases it is synonymous with result, though it neither loses nor obscures its primary implication of coming into existence $\langle$mistakes often arise from ignorance$\rangle$ $\langle$the mischief arose from careless gossip$\rangle$ $\langle$the depression, the shock arising from what had happened abovestairs, left him almost at once—Bromfield$\rangle$ Sometimes, when the context suggests a cause, the from phrase is omitted $\langle$where there is continued discontent, trouble is certain to arise$\rangle$ $\langle$the right never existed, and the question whether it has been surrendered cannot arise—John Marshall$\rangle$ Rise and arise (see also under rise 2) are often used interchangeably, but usage usually favors arise except where, in addition to the implication of beginning, there is either in the word or the context a strong suggestion of ascent $\langle$new nations rise only to fall$\rangle$ $\langle$mighty forces rise from small beginnings$\rangle$ $\langle$the Gothic cathedrals rose in England in the first half of the thirteenth century—Saunders$\rangle$ $\langle$great regimes rose, based upon the irrational and negative in man's nature—Straight$\rangle$ Originate suggests a definite source or starting point which may be specified or located $\langle$the theory of evolution did not originate with Darwin$\rangle$ $\langle$the fire originated in the basement$\rangle$ $\langle$the newsreel, originated . . . in France, was introduced in the United States in 1910—Mott$\rangle$ $\langle$its founding originated in the Puritans' conviction that learning was essential for godliness—Murdock$\rangle$ Derive also suggests a source; usually it does not imply, as originate implies, actual inception but presupposes a prior existence in another form or in another person or thing and connotes descent (as by inheritance, endowment, transference, or deduction) $\langle$the power of the executive derives from the people$\rangle$ $\langle$our thoughts often derive from our wishes$\rangle$ $\langle$the principle of symmetry derives, I suppose, from contemplation of the human form—Binyon$\rangle$ $\langle$much of our thinking about the rights and duties of the citizen derives directly from Greco-Roman thought—Highet$\rangle$ Flow, issue, emanate in common imply a passing from one thing to another, the former being the source from which the latter is derived. fused articulation or an involuntary repetition of sounds or words (the eloquent tongue forgot its office. Cicero stammered, blundered, and sat down—Froude) ("Why—why—") stammered the youth struggling with his balking tongue—Crane> Stutter usually stresses the involuntary repetition of sounds, especially of consonantal or syllabic sounds. It is less likely than stammer to imply a proximate cause and typically, especially in medical use, implies a constitutional defect (as a nervous affliction or a speech defect) which results in a habitual and persistent speech problem (no two persons stutter alike ... a stutterer who stumbles over the initial of "Peter" may have no trouble with any other p in ... “Peter Piper’s peppers”—Scripture) (this gentleman has ... a small natural infirmity; he stutters a little—Foot) In nontechnical use the terms are often used interchangeably especially in their extended senses, in which both terms are freely employed either in reference to a fluctuating repetitive sound or to something that halts or progresses by fits and starts like the speech of a stammerer or stutterer (climbed into his Ford and stuttered down the hill—Steinbeck) (her pen sometimes stutters with the intensity of the emotion that she controlled—Woolf) (a brilliant idea stands still and stuttering—Pritchett)

2 Standard, criterion, gauge, yardstick, touchstone can all mean a measure by which one judges a thing as authentic, good, or adequate or the degree to which it is authentic, good, or adequate. Standard applies to an authoritative rule, principle, or measure used to determine the quantity, weight, or extent or especially the value, quality, level, or degree of a thing (each generation ... has its own ideals and its own standards of judgment—Crothers) (the ideal of general cultivation has been one of the standards in education— Eliot) (the building ... by all the standards of St. Botolph's ... would be condemned as expensive, pretentious, noisy and unsafe—Cheever)

Criterion denotes the thing, whether formulated into a rule or principle or not, by appeal to which one arrives at or confirms a given judgment (as of value, quality, fitness, or correctness) (the sole criterion of the truth of illusion is its inner congruity—Lowes) (the size of sunspots is a meaningless criterion in predicting the havoc which may occur to radio transmission—Dawes) (no exact criterion for a just and fruitful apportionment of the surplus wealth—Hobson) (these laws ... did establish useful criteria of conduct—Handlin) Gauge, concretely a standard measure or scale or an instrument for measuring something that fluctuates (as in size or height), can in extension apply to a standard measure whether tangible or not (a piece of 1/8 inch thickness fiber or wood makes a convenient gauge in setting brush holders—Mill & Factory) (the inarticulate, whose ferocity was a gauge of the injustices they had suffered—Bruce Marshall) (the degree of public acceptance of the opinions of leaders is the ultimate gauge of the importance and validity of those opinions—Rafferty) Yardstick, basically a measuring stick a yard long and subdivided into inches and fractions of inches, is often extended to standards or criteria especially for something intangible or immaterial (no absolute or universal yardstick about what constitutes a frustration—Kardiner) (the consumption of petroleum products, an accurate yardstick of economic growth—The Lamp) Touchstone can apply to a simple device by which authenticity or value may be determined and especially to an authentic or superior instance of a class of things by comparison with which another thing may be judged authentic or superior (consistency is a touchstone by which the basic doctrine can often be distinguished from the propaganda line—L. C. Stevens) (a Marxist critic using economic determinants, social perspectives, and class consciousness as his touchstones—Glicksberg) (the chief touchstone to folklore is the manner in which it is transmitted: one man tells another, one man shows another—Emrich)

starry, stellar, astral, sidereal can mean of, referring to, or suggestive of a star or group of stars. Starry is the ordinary nontechnical term, capable of being used in reference to stars of various kinds (as the celestial bodies known as stars or the geometrical figure with five, six, or more points that is the conventionalized star) (a starry night) (a starry banner) (a starry eyes) (here are the skies, the planets seven, and all the stars—Housman) (the starry towers of Babylon Noah's freshest never reached—Yeats) Stellar has the same range of reference as starry, but, since the connotations of the words are not the same, they are rarely interchangeable; starry gathers its connotations (as of brilliancy, remoteness, and beauty) chiefly from the appearance of the celestial stars to the ordinary observer; stellar derives its suggestions chiefly from astronomical lore of the stars as influencing all things and as shaping human destinies or from astronomical knowledge of the constitution, arrangement, and classification of stars; thus, one tends to speak of a stellar, rather than a starry, influence or aspect; of a stellar, rather than starry, eclipse or nebula (these soft fires ... shed down their stellar virtue on all kinds that grow on Earth—Milton) (Kaptyn worked nearly alone in the field of stellar astronomy—G. W. Gray) Stellar is also used more often than starry of theatrical or cinematic stars (stellar roles in operas and musical festivals—Current Biog.) and it alone is freely used to imply outstanding quality or position in other relations (a dependable working staff, and a stellar panel of consultants—Hartwell) (he just wasn't a stellar naval officer in the eyes of his subordinates—Lois & Don Thorburn)

Astral is in much of its use a technical term in theosophy and similar cults, and in more general use it is likely to bear connotations of spirituality, mysticism, and remoteness from the fleshly that derive largely from mythological
and other conceptions of the stars as the abode of celestial spirits or of supersensible beings whose nature and constitution are rarer and finer than that of earthy human beings. <enchantments that unlock a crystal cage; an alphabet with astral fire seasoned—Wylie> (an astral thinker with disturbing, visionary thoughts of helping the whole world—Newsweek) (an astral myth) (a state of mind which may resemble that of a soul in its astral body looking back upon its corporeal one—Beebe) Sidereal is sometimes interchangeable with the other terms <walls of interlocked magnolias, sidereal with white, fragrant blossoms—Nat'l Geog. Mag.> I felt that he was an Intelligences which had borrowed form and substance in deference to the requirements of sidereal politeness—Henry Miller but distinctively it is used in opposition to solar, especially as applied to periods of time measured by the rotation of the earth with reference to a given star; thus, the sidereal day, determined by reference to Aries, is 3 minutes and 55.91 seconds shorter, as measured in solar time, than the mean solar day.

**state** n *State, condition, mode, situation, posture, status* can all mean the way in which a person or thing manifests his or its existence or the circumstances under which he or it exists or by which he or it is given a definite character. *State* may be used so generally that it denotes merely a form of existence which has little or no relation to material being (as in space or time or as substance) but is purely immaterial and typically mental or spiritual. (Dante's Inferno) reminds us that Hell is not a place but a state—T. S. Eliot The term may also be used specifically to name the combination of circumstances affecting a person or thing at a given time or the sum of the relations, qualities, or characteristics involved in his or its existence at the time under consideration. (Dante's Inferno) fifteen years happily in the state of matrimony—Farrington (the present state of industry) (the historian . . . visited Alexandria during the reign of this king. He was disgusted with its state—Farrington) (parents have probably gone too far in one direction and nature's reacting, trying to get back to the state of equilibrium—Huxley) *Condition* is interchangeable with state only when the effect or influence of present circumstances on actual or concrete existence is implied (the present condition of the country) (it is a condition which confronts us, not a theory—Cleveland) It regularly carries a stronger implication than state of a relation to the causes or circumstances which produced or are producing the effect and a weaker suggestion of the duration of that effect; also, condition may be used in the plural in the sense of combination of circumstances and of qualities or characteristics, as state may not (his physical condition improved with rest and sufficient exercise) (under the best conditions, a voyage is one of the severest tests to try a man—Emerson) (I probably had been hoping . . . the book would not change my life too much. I wished at that time to protect a modest condition—Mailer) (there is no possible method of compelling a child to feel sympathy or affection; the only possible method is to observe the conditions under which these feelings arise spontaneously, and then endeavor to produce the conditions—Russell) This suggestion of a relation to an external cause or causes is often so strong that the word frequently denotes a circumstance that serves as a causative influence or prerequisite rather than a combination of circumstances that form a state of being (see under condition 1) *Mode* (see also method; fashion 2) is basically a philosophical term; typically it implies an opposition to the underlying reality which can be known only from its external manifestations (as color, form, and texture), and it usually applies to the combination of characters by which substance is manifested in a particular individual or instance (no mode . . . can exist except as the mode or modification of a substance; the substance is the abiding principle, the mode is transitory. The particular mode . . . is but a temporal expression of the substance—Thilly) (nearly all [painters] use color as a mode of form. They design in color, that is in colored shapes—Clive Bell) In somewhat less restricted use the term can apply to something that expresses or exemplifies a typical form or value of a larger class; thus, the mathematical mode is the most frequent value in a statistical array; the mode of a rock is its specific mineral composition as distinguished from the norm of its kind (Rouse's mode unit is the smallest isolated item pertaining to a prehistoric manufacture . . . This mode, or attribute, is a concept many archaeologists work with in pottery classification—Willey) *Situation* applies to a state or condition that represents a combination of definite concrete circumstances, often such a conjunction of particular circumstances that the whole has a peculiarly interesting character; more than state or condition, situation implies an arrangement of these circumstances not only with reference to each other but also with respect to the character or circumstances of the persons involved so as to make for a particular resulting condition (as of difficulty or advantage, embarrassment or elation, or uncertainty or security) (such views of life were to some extent the natural begettings of her situation upon her nature—Hardy) (there was a dizzy succession of events and of constantly changing situations for a politician to watch—Shirer) (that slender, unrigid erectness, and the fine carriage of head, which always made him seem master of the situation—Cather) The term is also applied to a comparatively striking and interesting combination of events in a narrative, especially one whose outcome involves uncertainty or suspense (one knows the situation in fiction—the desperate girl appealing out of her misery to the Christian priest for help. So many women have this touch of melodrama, this sense of a situation—Rose Macaulay) (a master of plot and situation, of those elements of drama which are most essential to melodrama—T. S. Eliot) *Posture* (see also posture 1) may be used in the sense of condition when that represents a state into which one is forced by need of preparation for something to come (put a warship in a posture of defense) (Christ) insisted upon a certain . . . posture of the soul as proper to man's reception of this revelation—Liddon) (Spanish chasts have no solemnity: . . . which doesn't preclude a general devout posture of mind—Santayana) The term is often a closer synonym of situation than of condition (a virgin of thirty-two, already lapsing, though naturally attractive and sprightly, into the mental posture of old maidhood—Follett) (production which will permit us to maintain both a strong economy and a strong military posture—Truman) *Status* may indicate an individual's state or condition as determined with some definiteness for legal administrative purposes or by social or economic considerations (the change in the status of the Negro, under the Thirteenth Amendment, from three fifths of a person to a whole person in computing state apportionment—C. L. Thompson) (married woman's status was determined entirely by that of her husband—Ogg & Ray)

stay

State is often used interchangeably with stay but distinctively means to stay behind or to be left after others have gone {few remained in the building after the alarm was given} {a little verse my all that shall remain—Gray} {she remembered her decision to send the young people of the village into the woods. There would have been many more casualties had they remained—Linklater} Wait implies a staying in expectation or in readiness {at his request no one waited for him at the pier} {the taxi waited while they were shopping} {the lights in the window had a leering, waiting look, like that on the faces of old pimps who sit in the cafés—Gibbons} Abide implies prolonged staying or remaining after at length and usually connotes either stable residence or patient waiting for an outcome {she hated the change; she felt like one banished; but here she was forced to abide—Hardy} Tarry implies staying when it is time to depart or to proceed {do not tarry if you wish to catch the noon train} {some children like to tarry on the way to school} {the celebrated trade winds...ceased to blow, and over the island a horrid stillness tarried—Stafford} Linger, like tarry, usually implies outstaying one’s appointed or allotted time; frequently, however, it also implies either deliberate delay or disinclination to depart {strange, that now she was released she should linger by him—Meredith} {she shouldn’t have come to the hotel suite. She shouldn’t have lingered—this was fatal—after the others had left—Wouk} {after the guests had tarried long over their tea and had done with their jokes, the woman still lingered—Buck}

Steady adj Steady, uniform, even, equal, constant are comparable when they mean neither markedly varying nor variable but much the same throughout its course or extent. Steady is the most widely applicable of these terms; in general it suggests regularity and lack of deviation, especially in movement, but it may imply such fixity in position as to be immovable or unshakable {steady as a rock} {a steady pole} or such consistency in character or conduct as to be perfectly reliable {a steady workman} {maybe she’d marry the first nice and good steady fellow with a steady job who’d be a steady provider—Farrell} When movement, motion, or direction is implied, the term may connote lack of fluctuation {a steady market} {steady prices} {a steady flame} {you can’t make millions on books, but it’s a steady respectable business—Buck} or lack of nervousness {with hinged knees and steady hand to dress wounds—Whitman} {a steady voice} or a constant uninterrupted flow or pursuit {a steady stream} {a steady rain} {steady work} Uniform stresses the sameness or likeness of the elements, parts, units, or instances that comprise a whole (as an aggregate, a series, a combination of instances, a course, or a texture) {the cells of the human organism are not uniform in structure and function} {the progress of civilization is not wholly a uniform drift towards better things—Whitehead} {one of the most fundamental social interests is that law shall be uniform and impartial—Cardozo}

various tackle blocks and planks of the wooden ships were cut to uniform measure—Mumford. Even stresses steadiness more than uniformity; it often connotes a dead level (as in quality or in character) which is unvaryingly maintained or which is incapable of alteration or disturbance (her monotonous even voice) (the even flow of his verse) (I mean to . . . support with an even temper, and without any violent transpots of mind, a sudden gust of prosperity—Fielding) Equable usually implies some inherent quality which makes for invariability, such as uniformity (an equable stride) (an equable pulse) or freedom from extremes or sudden marked changes (there is an equable climate in the most populated parts, warm and tempting to leisure—Pefferson) (an equable temper) or a temperamental calmness (low equable tones, curiously in contrast to the strident babble—Kipling) (she won and lost, with the same equable sang-froid—Rose Macaulay) Constant (see also FAITHFUL, CONTINUOUS) implies fixity in character, quality, or condition or persistence in kind or type under the same conditions (the sand is frequently yellow . . . but this color is by no means constant—Lyell) (science has to deal . . . with sources of chemical energies which it knows little about except that they always seem to be constant to the same conditions—Henry Adams)

steal, pilfer, filch, purloin, lift, pinch, snitch, swipe, cop are comparable when they mean to take another's possession without right and without his knowledge or permission. Steal, the commonest and most general of the group, can refer to any act of taking without right, although it suggests strongly a furtiveness or secrecy in the act (steal a pocketbook) (steal jewels) (steal a kiss) (steal a glance at someone) suggests stealing in small amounts or with cautious stealth and often bit by bit (the pantry mouse that pilfers our food—Gustafson et al) (the ladies of unexceptionable position who are caught pilfering furs in shops—L. P. Smith) (pilfer the secret files of the foreign office—Morgenthau) Filch is close to pilfer but may suggest more strongly the use of active though surreptitious means, especially quick snatching (in pursuit of a thief who had filched an overcoat—McKenzie Porter) (a lot of fellows were too hungry to wait, and so some of the rations were filched—Autry) (a bulky, dark youth in spectacles . . . filching biscuits from a large tin—Sayers) Purloin usually shifts the stress onto the idea of removal or making away with for one's own use, often becoming generalized to include such acts as plundering or plagiarism (had purloined $386,920 from the New York realty management firm for which he worked, then absconded—Time) (had added theft to her other sin, and having found your watch in your bedroom had purloined it—Butler d. 1902) (to quote him is not to purloin—Dryden) Lift, when it does not mean specifically to steal by surreptitiously taking from counters or displays in stores, is used frequently in spoken English in the sense of purloin (women shoplifters often work in gangs of three. Two act as shields while the third does the lifting—The Irish Digest) Lift money from the cash register (imitators who lifted everything except the shirt off his back—F. S. Fitzgerald) Pinch, swipe, snitch, and cop are virtually interchangeable with filch. Pinch and swipe are often used in place of steal to suggest an act morally less reprehensible (loot having been pinched by him from the British ship Mary Dyer—Sydney Bulletin) or sometimes more dashing (well-dressed crooks really did steal the Gold Cup at Ascot . . . drove up in a handsome car . . . and pinched the cup out of the Royal Enclosure—J. D. Carr) (the bloke who pinched my photographs—Richard Llewellyn) and occasionally to suggest a petty meanness (hovering outside the dying butcher's bedroom waiting to . . . pop in and swipe the old man's private notebooks—Time) Snitch possibly stresses more the removal by quick, furtive snatching (while he was bathing, somebody snitched his uniform—Wodehouse) (snitched people's ideas without telling them—Sayers)

Cop usually lays stress upon quick, often spur-of-the-moment filching or purloining (some woman put on a dinner gown, mingled with guests, copped fifty thousand bucks in jewelry—Gardner) (ran home and copped a piece of beefsteak from his old lady—Farrell)

steep adj Steep, abrupt, precipitous, sheer mean having an incline approaching the perpendicular. The words are here arranged in ascending order of degree of perpendicularity. Steep implies so sharp a slope or pitch that ascent or descent is difficult (a military road, which rises . . . by an acclivity not dangerously steep, but sufficiently laborious—Johnson) (the trail . . . then struck up the side of the mountain, growing steeper every foot of the way—Quillin) Abrupt adds to steep the suggestion of a sharper pitch or angle of ascent or descent and usually of a sudden break in a level (high abrupt banks in places become hanging cliffs with a drop of 100 feet or more—Amer. Guide Series: N. C.) Precipitous suggests extreme steepness and an abruptness like that of a precipice (a precipitous height) (a deep gorge, with precipitous, volcanic walls which no man could scale—London) Sheer implies precipitously approaching the perpendicular and showing no break in its line (sheer cliffs that fell from the summit to the plain, more than a thousand feet—Cather)

Ant changeful

sterile, barren, impotent, unfruitful, infertile mean not...
having or not manifesting the power to produce offspring or to bear literal or figurative fruit. Sterile, opposed to fertile, in its basic application to living things implies an inability to reproduce. Sterile hyphae that protect the fruiting body of a fungus is a sterility marriage. The workers among ants and bees are sterile. The attempt will be made to distinguish between those who are childless from choice and those who are sterile—Jour. of Heredity. But sterile is widely extendible to things that might reasonably be expected to be fruitful but that in fact are not so; thus, poor worthless land in which plants will not grow is described as sterile; minds deficient in ideas are sterile; funds left in a safe-deposit box and drawing no interest are sterile; whatever offers no return (as of pleasure, profit, value, or use) is sterile (beneath his fun lurked the sterile bitterness of the still young man who has tried and given up—Wharton) his unsatisfactory relations with women; and his impulses toward a sterile and infantile perversity—Edmund Wilson. Barren (see also Bare 1) applies especially to a female who has borne no offspring or who is or is believed to be incapable of bearing any. A barren heifer is a she has also conceived a son in her old age: and this is the sixth month with her, who was called barren—Lk 1:36. In extended use the term can imply a lack of return or profit. A barren conquest which brought him no special repute—Buchan. Impotent (see also POWERLESS) applies to the male and implies a lack of the ability to copulate and a corresponding inability to reproduce his kind (a pink Sultan with his pale harem maidens and a yellow slob of eunuch lolling impotent in the background—Murchie). Only rarely is the term in this sense used of other than the male animal, and in such use it approaches the aspect of impotent discriminated at powerless (whole groups of animals and plants are rendered impotent by the most unnatural conditions—Darwin). Unfruitful is sometimes used in place of barren not only as applied to the female but as applied to land, vegetation, or efforts which bear no fruit (an unfruitful tree) (an unfruitful soil) (this unsavory and unfruitful piece of research—Cater). Infertile is often interchanged with sterile (an infertility egg) (infertile matings) but it is as likely to imply deficiency as absence of fertility and is appropriately used when a relative rather than an absolute sterility is to be implied (the infertility grazings of those hills—Allan Fraser) (an infertility strain of beef cattle) (has our history shown that liberty is so infertility a principle that with it we are unable to compete in the world struggle . . . ?—Chenery). Animals and plants, when removed from their natural conditions, are often rendered in some degree infertile—Darwin. Ana *bare, barren, bald, naked; arid, *dry; *meager, exiguous: empty, hollow, nugatory, *vain. Ant fertile: exuberant—Con bearing, yielding, producing, turning out (see BEAR): fecund, fruitful, prolific (see FERTILE). sterilize 1 Sterilize, castrate, spay,emasculate, alter, mutilate, geld, caponize mean to make incapable of producing offspring. Sterilize, the most general of these terms, is applicable to both human beings and animals and is used whether the end is attained accidentally (as by undue exposure to X rays which kill germ cells) or deliberately (as by a surgical operation which prevents the germ cells from reaching the site where fertilization can occur or by removal of the gonads). Sterilize often suggests a legalized procedure undertaken to prevent the reproduction of undesirables (as imbeciles and habitual criminals); the term does not imply physical disfigurement and does not in itself necessarily imply interference with the capacity for copulation. Castrate, a narrower term than sterilize, means to deprive of the testes, the male reproductive glands. It is used of both human beings and animals and usually implies a surgical procedure and a loss of libido as well as of procreative power. By extension castrate may also mean to deprive of the ovaries, the female reproductive glands, and therefore is often used in place of spay, the specific term for this operation. Emasculate is often preferred to castrate when the reference is to human males and especially when there is the intent to stress the loss of virile or masculine qualities. Alter may replace castrate especially in reference to domestic pets and when an ambiguous or euphemistic term is appropriate. Mutilate (see also MAIM) is sometimes substituted for castrate especially when the intent is to convey strongly the idea of physical disfigurement or violence or when a euphemism is desired. Geld, meaning to castrate, is used chiefly in reference to domestic animals, especially the horse, and eaponize, also meaning to castrate, most commonly has reference to the male domestic fowl, but both are sometimes used contemptuously of human beings. Ant fertilize 2 Sterilize, disinfect, sanitize, fumigate can mean to subject to a process or treatment for the destruction of living organisms, especially microorganisms. Sterilize suggests drastic methods (as the application of intense heat, boiling, or the use of strong chemicals) with the intent of destroying all microorganisms whether they are disease-producing or not. The term usually suggests means taken to avoid infection. Disinfect also suggests vigorous methods (as exposure to strong sunlight and fresh air, thorough washing, and the use of special chemicals) with the intent of destroying all infective agents; the term usually suggests an intent to free from germs something that is known or feared to be infected. Sanitize, which basically means to make sanitary, is often preferred by public health officials when the reference is to preventive measures affecting the health of a community (as the treatment of drinking water or the cleansing of food processing facilities) and when neither sterilize (because it suggests complete destruction of microorganisms and often implies the taking of measures too drastic for general use) nor disinfect (because it suggests the actual presence of disease germs) exactly fits their needs or makes clear their intention. Fumigate is associated with these terms only because fumigation was once the usual method of disinfection; it implies the use of fumes (as smoke or gas) that are destructive not only of microorganisms but of such pests as cockroaches, beetles, and bedbugs. stern adj *severe, austere, ascetic Ana strict, *rigid, rigorous, stringent; *grim, implacable, unrelenting: *flexible, inexorable: disciplined, trained, schooled (see TEACH). Silent usually carries more positive suggestions of stillness or quietness (the Earth . . . from West her silent course advance[s]—Milton) (three mountaintops, three silent pinnacles of aged snow—Tennyson) whereas noiseless usually connotes absence of commotion or of sounds of activity or movement (along the cool sequestered vale of life they kept the noiseless tenor of their way—Gray) (this quiet sail is as a noiseless wing to waft me from distraction—Byron) (I looked out on a thoroughly crowded with traffic, but yet a noiseless one—Fairchild)

stimulus, stimulant, excitant, incitement, impetus can all mean an agent that arouses a person or a lower organism or a particular organ or tissue to activity. Only the first three words have definite and common technical use. Stimulus, in this use chiefly a physiological or psychological term, applies basically to something (as a change in temperature, light, sound, or pressure) that occurs in the internal or external environment of an organism, is perceived by sense organs, and if sufficiently intense induces a neural or equivalent (as tropistic) response *any physical energy that acts upon a receptor of a living organism. A stimulus causes a reaction in an organism, but not necessarily a response (a reaction of a muscle or gland)—Charles Morris) (so long as a system recognizes stimuli, and reacts to them with fitting responses, it exercises control. And it may then remain intact and functioning, despite stresses which would otherwise upset its internal coordination—Weiss) Stimulant, typically a medical term, applies chiefly to a chemical substance —and especially to a medication that does or is intended to vitalize bodily activity, either generally or in respect to a particular system or organ or function (tea, coffee, and cocoa are true stimulants to the heart, nervous system, and kidneys; coffee is more stimulating to the brain, cocoa to the kidneys, while tea occupies a happy position between the two, being mildly stimulating to most of our

bodily functions—Ukers (drugs which speed up cell activity are called stimulants—Clemensen et al) (alcohol produces a false sense of well-being and efficiency, but actually it is a depressant rather than a stimulant—T. L. Engle) Exci tant can come very close to stimulant in some of its uses; thus, one may speak of a substance as a stimulant or an excitant of intestinal motility. But distinctively excitant can apply to either a sought or an unwanted reaction and it can imply, as stimulus often but stimulant rarely does, either the initiating or the vitalizing of a process or activity (these amines, being excitants of the central nervous system, increase intellectual and motor activity, produce insomnia, nervousness, and tremors and have the property of antagonizing mild drug depression—Thienes) (a great many allergists believed that pine pollen contained little or no excitant of allergy. That is to say, the element within the pollen which stimulates antibody production was absent in pine pollen—Swartz)

In their more general use these three terms are seldom as clearly differentiable as in their basic use. Stimulus and stimulant are usually interchangeably applicable to whatever exerts an impelling or invigorating effect (as on a process, an activity, or a mind) (whenever an idea loses its immediate felt quality, it ceases to be an idea and becomes, like an algebraic symbol, a mere stimulus to execute an operation without the need of thinking—Dewey) (to borrow from commercial banks increases the money supply and is a business stimulant—F. M. Knight) (the colonial-development money is the extra stimulus to generate development faster than would otherwise be possible—Lewis) but excitant, here too, is more likely to suggest an initiating (we hold that ethical statements are expressions and excitants of feeling which do not necessarily involve any assertions—Ayer) and it is applicable when unwanted or undesirable ends result (the desire to gain vast and lucrative readership and audiences is the major excitant to the excesses of which so many are aware—Newsweek) Incitement applies to something that moves or impels usually a course of action; the term tends to emphasize an urging or pressing intended to drive one into moving or acting quickly rather than the result attained (to issue a solemn public condemnation and warning that this attack against the Jewish people and its master induce the beast again to move forward—James) (nor could all the incitements of its master induce the beast again to move forward—Galsworthy) Impetus (see also SPEED 2) usually stresses the stimulation of an increase in the momentum of activity already initiated (what also gave an unusual impetus to the mind of men at this period was the discovery of the New World—Hazlitt) (in estimating the social importance of this movement, we must be careful to discount the temporary . . . impetus it received from the economic slump of this period—Day Lewis) But the term sometimes applies also to a stimulus that initiates action (it is the impetus that I ask of you: the will to try—Quiller-Couch) Ana spur, goad, incentive, *motive, inducement: excitation, piping, provocation (see corresponding verbs at PROVOKE); irri tation, net ting (see corresponding verbs at irrat icate)

stingy, close, closefisted, tight, tightfisted, niggardly, parsimonious, penurious, miserly, cheeseparing, penny-pinching can mean unwilling or manifesting unwillingness to share one's goods with others or to give to another a part of one's possessions. Stingy implies mainly a lack of generosity; the term is applicable whenever there is a suggestion of a mean or illiberal spirit (if I want anything, he says that it cannot be afforded. I never thought before that he was stingy, but I am sure now that he must be a miser at heart—Trollope (stingy at heart, Cabot, refusing to plunk down what they were asking for movies and plays, began browsing in a . . . public library—Purdy) Close and close fisted and tight and tight fisted usually imply stinginess of nature, but they also ordinarily suggest the power to keep a tight grip upon whatever one has acquired (closefisted in all his expenditures) (men and women who are closefisted and make a gift do not want their next week's mail loaded with appeals—William Lawrence) (he wasn't as tight as you . . . but he was a little bit close. So the bargain hung fire—Hammert) (must be eagle eyed and tight fisted about these expenditures—A. E. Stevenson) Niggardly implies the character of one who is so stingy and so closefisted that he grudgingly gives the smallest portion or amount possible; the term may refer not only to the giving or spending of money or the giving of material goods but to the provision of what would add to the comfort, happiness, or well-being of oneself or of others (as poor and niggardly as it would be to set down no more meat than your company will be sure to eat up—Swift) (his niggardly allowance for rent and food) (they were not niggardly, these tramps, and he who had money did not hesitate to share it among the rest—Maugham) (literature is so lavish with wealth and titles . . . the real world is so niggardly of these things—Huxley) Parsimonious stresses frugality, but it suggests also niggardliness; because of this double connotation the term usually suggests not a virtue but a fault or, often, a vice (a lonely bachelor in caring for his property and in adding to it by parsimonious living—Long) Penurious adds to parsimonious the suggestion of a niggardliness so great as to give the appearance of extreme poverty or of excessive closefistedness (a grudging master . . . a penurious niggard of his wealth—Milton) (I had a rich uncle . . . a penurious accumulating curmudgeon—Irving) Misery implies penuriousness but it stresses obsessive avariciousness as the motive (her expenditure was parsimonious and even miserly—J. R. Green) (a miserly man who hoards money out of avarice—Emerson) Cheeseparing and penny-pinching suggest frugality and parsimoniousness carried to the extreme (the cheeseparing guardians of the city's finances) (a campaign of administrative cheeseparing—Alan) (a penny-pinching appropriation for relief)

**stir vb** Stir, rouse, arouse, awaken, wake, rally can all mean to cause to shift from quiescence or torpor into activity. Stir, often followed by up, usually presupposes excitement to activity by something which disturbs or agitates and so brings to the surface or into outward expression what is latent or dormant (a dreamy, faraway look came into Mr. Bohlen's eyes, and he smiled. Then he stirred himself and began leafing through the plans—Dahl) (if the . . . teacher longs to stir the sluggish mind of one of her scholars, she must first find out what the sluggishness is due to—Elliot) (she wants stirring up. She's got into a rut—Bennett) Sometimes the word suggests the evoking of rebellion or revolt (movements that begin by stirring up hostility against a group of people—Dewey) More often it implies the evocation of profound, agitating, but usually agreeable emotion (peace has no drums and trumpets to stir the pulse—Love-man) (men lacking an arm or leg stirred universal pity—Wechtert) Rouse, arouse, awaken, waken, all presuppose a state of rest or repose, often that of sleep. Rouse derives its implications from its application to the starting of game from coverts or lairs by the cries of hunters or by beating of bushes and often suggests incitement to activity by startling, frightening, or upsetting. In addition it commonly implies intense or vigorous activity and often ensuing commotion or turbulence (every tent roused by that clamor dread—Shelley) (roused out of sleep by a heavy pounding on the door—Wechsberg) (Antony . . . had spoken words which roused the mob to fury—Buchan) Arouse, though frequently used interchangeably with rouse, tends to be weaker in its implications and often means little more than to start into activity and conveys no hint of what follows; thus, a noise in the night arouses a sleeping soldier if he merely wakes up into consciousness of it, but it arouses him when he also makes determined efforts to trace its source or hastily arms himself; a fear may be aroused and immediately dispelled; passions are roused when they are so stirred up that they exert a compelling influence (now I had to guard against arousing the emotions of others—Mallor) (the new force stirred and aroused the people—Anderson) Awaken and waken, like arouse, frequently imply an ending of sleep; in extended use they are employed chiefly in reference to mental or spiritual powers or faculties which need only the proper stimulation to be called forth into activity or to be elicited (waken love)(the conscience of the nation was awakened) (her eyes brightened, her features appeared gradually to awaken, and life flowed back into her face—Farrell) (had wakened and heard the lion—Hemingway) (waken to the point about seven minutes after—Laski) (that tree always awakened pleasant memories, recalling a garden in the south of France—Cathey) Rally (see also RIDICULE) presupposes a diffusion of forces or a lack of concentration that promotes lethargy or inaction; it therefore implies a gathering together that stirs up or rouses (he rallied his strength for a final blow—Prescott) (as if his memory were impaired . . . [he] made an effort to rally his attention—Dickens) (they stirred and rallied a divided, defeated people—Shirer)

2 Stir, bustle, flurry, pother, fuss, ado all denote the signs of excitement or hurry that accompany an act, action, or an event. Stir suggests brisk or restless movement and ordinarily implies a crowd (he liked to hear the paper talked about. He liked to have a stir and rumpus going on—White) (as some messenger arrived . . . a stir would pass through the throng so full of swagger and of youth—Osbert Sitwell) Bustle adds the implication of a noisy, obtrusive, or self-important display of energy, especially when used in reference to an individual (she needs the bustle of life in a good hotel—Bennett) (tis true that strength and bustle build up a firm. But judgment and knowledge are what keep it established—Hardy) (the meaningless and vulgar bustle of newspaper offices—Gibbons) Flurry stresses nervous agitation and undue haste (so now began a great flurry . . . . There is no part of the world where there doesn't have to be excitement over a wedding—Upton Sinclair) (the resilience and strength of purpose that persist like deeply banked fires beneath a surface that is frequently all flurry and crepitation—Times Lit. Sup.) Pother and fuss both imply flurry and fidgety activity; pother often distinctively stresses commotion or confusion and fuss needlessly worry or effort (he is always in a pother about something or other) (she had invited her parents to come on the fiesta weekend, calculating that the excitement and fuss would distract their attention from herself—Wouk) (it had made a dreadful pother and was still remembered uneasily—Menchken) (even this pother about gods reminds one that something is worthwhile—Pound) Ado usually suggests fussiness or waste of energy (go to work without any more ado) It also often implies trouble or difficulty (there was much ado before their affairs were straightened out)

**stocky** quadruped, mammal, animal, organism, life, being

**stocky** thickset, thick, chunky, stubby, squat, dumpy are comparable when they apply to build of the human body and mean being relatively compact in form. Stocky implies a short and wide or thick build and is likely to be complimentary in suggesting compact sturdiness (thickset legs) (thickset body) (too thickset for jockeying—Masefield) Thick may be used for bodily parts (thick lips) (thick legs) more often than for body build. Chunky may indicate a body type ample but robust and solid (short and chunky, not quite fat—Harold Sinclair) (a well-fed, chunky, healthy boy) Stubby, less apt than others in this set to describe human body types, indicates noteworthy lack of height or length and corresponding shortness (outfielders' gloves have longer fingers . . . infielders' gloves have relatively stubby fingers—New Yorker) Squat and dumpy are usually uncomplimentary. Squat may indicate unshapely lack of height as though suggesting a person squatting (the squat misshapen figure that flattened itself into the shadow—Wilde) (anchored vessels of every sort from squat Baltic timber carriers—Wheel-

stranger, foreigner, alien, outlander, outsider, immigrant, émigré can all designate a person who comes into a community from the outside and is not recognized as a member of that community. This is the primary denotation of some of the words, but the secondary sense of the others, especially the last three. Stranger and foreigner may both apply to one who comes from another country or sometimes from another section as a resident or visitor. They have somewhat different implications, however, stranger stressing the person's unfamiliarity with the language and customs and foreigner the fact that he speaks a different language, follows different customs, or bears allegiance to another government *the time came when I was the observant foreigner, examining education in France. To tell the truth, I was not a stranger to it, having lived in France as a child and again as a youth—Grandgent Alien emphasizes allegiance to another sovereign or government and is often opposed to citizen; thus, one may be called a foreigner after naturalization, but not with accuracy an alien. In extended use alien can imply either exclusion from full privileges of or inability to identify oneself with a group *the older I grow, the more of an alien I find myself in the world; I cannot get used to it, cannot believe that it is real—L. P. Smith *he is anesthetized to their theological and political enthusiasms. strategy, tactics, logistics as used in relation to warfare
are not always clearly distinguished. Strategy is the art
or science involved in the direction of the forces at his
disposal by the commander in chief of a belligerent nation
or by those assisting him. The term usually implies the
planning of major operations intended to gain the ob-
jectives of the war, and often, but not necessarily, connotes
the effective presence of these officers at home or behind
the lines. Tactics is the art or science of handling forces
in the field or in action; the term implies not only the pres-
ence of the enemy as affecting the disposition or maneu-
vering of troops, ships, planes, and matériel but the direc-
tion of a commanding officer upon the scenes (the
theater of war is the province of strategy, the field of battle
is the province of tactics—Hamley)

Logistics is the art
or science of military supply and transportation; the term
usually implies both planning and implementation and
covers such varied matters as design and development,
acquisition, stockpiling, shipping and distribution, up-
keep, and ultimate evacuation and disposal of matériel;
acquisition, preparation, assignment, distribution, and
physical care of personnel; preparation, operation, up-
keep, and disposal of facilities; and provision of services.
Broadly logistics constitutes the theory and practice of
military housekeeping (generals and admirals and their
staffs plan campaigns. That is strategy. They fight battles
and these combat operations are known as tactics. A
third element determines the success or failure of strategy
and tactics. This is called logistics. A large part of an
army, a fleet, or an air force, and nearly the entire civilian
population today play a role in logistics. What they ac-
complish in producing and distributing the resources
needed to implement strategy and tactics controls the
outcome of war—Donald Armstrong

strengthen, invigorate, fortify, energize, reinforce can
mean to make strong or stronger. Strengthen is the most
general term, applicable not only to persons or their phys-
ical or mental vitality, but also to things material or immaterial
(as a structure, a system, an aggregation, or an influence); the word can connote increase either in
force, energy, vigor, and power of resistance, or in inten-
sity, authority, or effectiveness (their friendship strengthened
as they grew older) (exercise is necessary to strengthen
the body) (opposition will only strengthen their belief)
(his case was greatly strengthened by the newly
discovered evidence) (the handle of the tool had been
bound by ordinary picture wire, apparently to
strengthen a fracture in the wood—Hynd) (impulses to
submission strengthened by habits of obedience bred
in the past—Dewey) (after a period of hoarse whispering,
his voice changes its tone and strengthens—Hearn)

Invigorate is commonly used in reference to living things
or of some power or activity of a living thing and is some-
times extended to things that have powers suggestive
of life; it implies an increase in vigor or vitality or active
or effective strength or force (their minds and bodies were
invigorated by exercise—Gibbon) (the series of Mid-
western novels that followed shocked and invigorated
American thought—S. R. L.) (the general run of Cana-
dians are invigorated when our athletes win recognition
in the United States—D. M. Fisher) (a passing priest
heard of Kaldi’s discovery and thought that he would
try these invigorating berries since he was inclined to
fall asleep during his prayers—Charles Cooper) (in-
vigorating sea breezes) Fortify, which primarily means
to strengthen a town or city by defensive structures,
in a more general sense means to strengthen against
attack or stress of any sort (a certain uneasiness had
come upon her, and even fortified by food she could not
bring herself to go—Boyle) (fortified himself with a
stiff drink) (I have been fortified in my belief by the
utterances of this Court from the time of Chief Justice
Taney to the present day—Justice Holmes) (set up on
a pedestal, fortified by the strongest bulwark in executive
acts, those principles which we would abandon at our
peril—Vannevar Bush) (the old-fashioned polemical
sermon followed, fortified with texts and garnished with
quotations in Greek—Brooks) Energize implies a
strengthening in the form of supplying the active power
for working or for being ready for work and, therefore,
is used of whatever can be roused into strong activity
or infused with a desire to act (the office of Inspector
General was greatly improved, and energized, during
the first administration of Mr. Pitt—Chalmers) (as between husband and wife, hers was definitely the stronger spirit. She was more highly energized, more industrious, more ambitious—S. H. Adams) (he energized the Garden-Suburb ethos with a certain original talent and the vigor of a prolonged adolescence—Leavis) Reinforce implies the making of what is weak stronger or of what is strong still stronger by or as if by an addition that stiffens and supports, and thereby adds effectiveness, powers of resistance, cogency, or durability (reinforce concrete by embedding steel bars or mesh in it) (reinforce an argument by additional evidence) (reinforce a stocking at heel and toe) (the stimulus given by his dialectics to their keen and eager minds was supplemented and reinforced by the appeal to their admiration and love of his sweet and virile personality—Dickinson) (Maria’s distrust returned, reinforced by resentment. Yet she said nothing—Hervey) (experience in Brazil seems to show that in mixed marriages the black element, if not reinforced, is absorbed by the white within a few generations—William Tate)

**stress**

1 Stress, strain, pressure, tension are comparable terms when they apply to the action or effect of force exerted within or upon a thing. Stress and strain are the comparative terms of this group and are sometimes used interchangeably (put stresses and strains on parts of the body that were not constructed to bear that burden—Fishbein) (if sufficiently large stresses are applied to any crystal, it remains at least partly deformed when the stresses are removed—Seitz) (the wrench is an instrument for exerting a twisting strain, as in turning bolts and nuts—Burghardt & Axelrod) (by a powerful strain upon the reins, raising his horse’s forefeet from the ground—De Quincey) (the breakup due to tremendous strains experienced in bad weather have time and again proven the fatal power of squalls over dirigibles—Furnas)

Although stress is frequently used in technical contexts in the above sense of a force applied to deform a body, it is also used, especially in physics, of the equal and opposite forces that cause elongation of an elastic body or to the stress resulting from the elongation of such a body (a steel bar can safely bear a pull or tension of 16,000 lb. for each square inch of its cross-section—Samuel Slade & Louis Margolis)

Strew and the less common straw usually imply a spreading at intervals, but the intervals may be so fine as not to be obvious or so great that each thing may be separately identified (ground sown with beets) (strew a path with gravel) (as he sits in the armchair, the Sunday papers are sown around him—Mailer) (he looked . . . over the great mesa-strewn plain far below—Cather) (petty ordinances . . . of no more weight than dandelion fluff strewn by the wind—Clement Wood) (the tent of night in tatters strewn the sky-pavilioned land—Housman)

Scatter (see also SCATTER) implies a separation of parts or pieces, but it distinctively implies a throwing that lets the things fall where they will (scatter pennies) (scatter bread crumbs) (no railroad scatters its soil over the neat white frame houses—Corey Ford) (a story . . . attacking tuberculards for coming to San Antonio and scattering their deadly germs about this innocent city—Green Peyton) Sow basically implies the sowing of seeds where they will sprout and develop (surrounding fields have been sown . . . with squash, pumpkin, and maize—Science) or in its extended use the sowing of something comparable to seed that can be disseminated (as throughout a group, a community, or an organization) (sow discord among the club members) (sow seeds of reason and understanding throughout the world—A. E. Stevenson) Broadcast (see also DECLARE) implies a scattering widely or in all directions (it is best to broadcast very fine seed) (early in April, just before a rain begins, broadcast 3 pounds of white clover seed—H. S. Pearson) Ana spread: disseminate: disperse, dissipate (see SCATTER)

**strike** vb 1 Strike, hit, smite, punch, slap, slog, swat, clout, slug, cuff, box are comparable when they mean to come or bring into contact with or as if with a sharp blow. Strike, hit, and smite are the more general terms. Strike, the most general of the words, may indicate the motion of aiming or dealing the blow, the motion prior to contact with the hand, fist, instrument, weapon, or missile (strike at the enemy and miss) (strike out at random) It may

indicate various types of contact from a light, often stroking contact (the light breeze struck the ship on the north side) to a forcible collision or blasting contact (the car struck a post and overturned) (the lightning struck the house) (strike a man down with a heavy blow) (the enemy struck with full force) It may suggest several types of physical or emotional effect or impression (strike someone dead) (strike a line on paper) (strike out a name from a list) (to be struck by the beauty of the scenery) (grief-striken) (conscience-striken) or it may be used to indicate any of the types of contact suggested by the other words in this group. Hit, although it is used in most of the situations in which strike occurs, emphasizes more than the latter the physical or figurative contact with or impact upon an object, usually one aimed at; it tends to stress forcefulness (hit a child on the wrist) (the shell hit the tank and tore through the side) (the direct hit...hit him hard—H. G. Wells) (hit the right road home) (hit the winning number in a lottery). Hit, likely to appear in rhetorical or bookish contexts, commonly stresses the injuriousness or destructiveness of the contact and often suggests a motivation of anger or desire for vengeance (with the hammer she smote Sisera, she smote off his head—Judg 5:26) (conscience-smitten) (smitten with grief) Punch, slug, slog, swat, and clout are generally used to suggest the giving of various kinds of usually sharp or heavy blows. Punch suggests a quick blow with or as if with the fist (would handcuff everybody rather than face the risk of having their noses punched by somebody—Shaw) Slug emphasizes the heaviness of the impact and may suggest a certain viciousness in the delivery of the blow (was attacked by an assault suspect, who slammed him with a 5-ft. iron pipe—Time) Slog emphasizes the heavy and typically haphazard quality of the blows (“Slog them on the head with your club...” shouted Tammers. And as the twisted knot of men reeled conveniently towards me I did what execution I could—Strand Mag.) and in sports (as cricket or golf) it may stress power as opposed to finesse (hit hayfields fringed the very putting greens...and a man had to slog and slog again before he got out of them—Bernard Darwin) Swat suggests a forceful, slapping blow, usually with an instrument (as a bat, weapon, or flyswatter) (in off moments he would swat the regiments of cockroaches—de Kruijff) (swat flies) (swat a baseball out of the ball park) Clout suggests a heavy careless blow (as with the hand or fist) (a shoe clouted his skull and inflicted a fracture—McCrae) They clout our heads the moment our conclusions differ from theirs—Shaw) Slap, cuff, and box all denote blows of varying force with the open hand. Slap is the most general and indicates a sharp, stingy blow with or as if with the palm of the hand (slap a person in the face) (slapped the coverlet angrily—Kenneth Roberts) Cuff suggests a blow often forcible enough to dizzy or throw off balance and often dealt with the back of the hand (I swear I'll cuff you, if you strike again—Shaw) Box suggests the delivery of an openhanded blow but is ordinarily limited to one against the ears (the mother boxed her child's ears in a fit of temper) Ana *beat, pummel, buffet, pound, baste, belabor, thrash 2 impress, touch, influence, *affect, sway striking arresting, signal, salient, conspicuous, outstanding, *noticeable, remarkable, prominent Ana *effective, effectual, efficacious: telling, convincing, compelling, cogent (see valid): forceful, powerful; impressive, *moving string n 1 *succession, progression, series, sequence, chain, train 2 in plural form strings *condition, stipulation, terms, provision, proviso, reservation stringent strict, *rigid, rigorous Ana *severe, austere, stern: limiting, restricting, circumlocuting, confining (see limit vb): restraining, curbing (see restrain vb): exacting, oppressive, *onerous strip vb Strip, divest, denude, bare, dismantle can mean to deprive a person or thing of what clothes, furnishes, or invests him or it. Strip stresses a pulling or tearing off rather than a laying bare, though the latter implication is frequent; it often connotes more or less violent action or complete depri
tion (strip the bark from a tree) (he was quickly stripped of his clothes) (where pasturing cattle stripped the ground) Once start stripping poetry of what you imagine are inessentials and you will find...the anatomy is made visible but the life will have gone—Day Lewis) (I had stripped a few of my habits, second and benzedrine at any rate, but I was...tense and brain-deadened—Mailer) Divest, in contrast to strip, does not suggest violence; it usually implies a taking away of what a person or thing has been clothed or equipped with especially as a sign of power, rank, influence, or prestige (divesting capitalists of further increments of power—Cohen) Therefore it often connotes an undoing or a dispossession or a degrading (divest an officer of all authority) (naturalism divests life, whether physical or spiritual, of all that separates it from the inanimate and inorganic—Inge) (the king is thus divested of his kingship and now becomes merely a corpse—Frazer) Denude implies a stripping or divesting, but distinctively it implies a resulting bareness or nakedness (striped of its vines and denuded of its shrubbery, the house would probably have been ugly enough—Cather) (a ghostly lunar rainbow—the spectrum cleansed and denuded of all the garish colors of day—Beebe) (modern agriculture...denudes the land of the protective cover and food that wild creatures need—G. S. Perry) Bare, although it suggests a removal of what covers or clothes, seldom carries implications of violent or complete stripping; it is chiefly used in idiomatic phrases which imply more than the mere act; thus, to bare one's head is to take off one's hat usually as a sign of respect or reverence; to bare one's sword is to unsheathe it and to have it ready for action; to bare one's heart to another is to reveal feelings one has concealed; to bare the secrets of the grave is to disclose, often as a result of a discovery of documents, something which had been known only to persons now dead (no hidden secrets are bare in this biography—Lubell) (bared her teeth at the audience with comic ferocity—Wouk) Dismantle is used chiefly with reference to the act of stripping a house, a building, a ship, or a complex installation (as of machinery) of its entire equipment and furnishings (dismantle a factory) (the cottage itself was built of old stones from the long dismantled Priory—Hardy) (hurriedly dismantled a second bomb that he had brought along—Shirer) Ana despoil, spoliate, devastate, waste, *ravage: rifle, loot, plunder, *rob Ant furnish: invest
a surface referred to and the sections bordering upon it  
<each white petal had a stripe of red> <gray cloth with alternate stripes of blue and red> <when one or more stripes of braid have been sewn on a soldier's sleeve to indicate his rank or his length of service, they are called stripes>  
If actual separation is not implied stripe may be employed when the difference between the portion of surface referred to and its neighboring portions is a matter of use, ownership, or physical character <the strip between sidewalk and curb belongs to the city> <each man on relief was allotted a strip of land for raising vegetables>  
However stripe may be used in such cases in preference to strip when the division is made evident by a contrast in appearance <narrow stripes of ice separated from each other by parallel moraines—Tndall> <stripes of cultivated land in various shades of green>  
Band (see also bond) may mean either a strip or stripe but often also connotes either an encircling with or without a suggestion of confining or unifying or a horizontal position rather than the vertical position so often connoted by stripe <the lower parts of the sleeves and of the skirt were adorned with bands of blue silk> <bands of colored light in the sky at dawn> <at closer range, the mountain showed three bands, the lowest green, the middle gray, and the highest white>  
Ribbon designates concretely a length of narrow woven material with selvage edges, usually one that is fine and firm in texture and is used for ornamental bands, ties, and bows. In extended use ribbon is often used in place of strip when the strips are very long, very narrow, and very thin and when the material is flexible enough to appear like ribbon or to be handled like ribbon <steel ribbon for use in springs> <ribbons of red, green, and gold paper for tying Christmas packages> <the sails were torn by the hurricane into ribbons> <the road was a ribbon of moonlight over the purple moor—Noyes>  
Fillet, which basically denotes a narrow strip of ornamental material (as a band of ribbon for restraining the hair or a narrow molding or beading that forms the inner part of a picture frame), is often extended to various things that have no inherent ornamental quality and are otherwise describable as strips, ribbons, or bands (as a metal strip or ribbon from which coins are punched, a very thin molding, one of certain bands of white matter in the brain, or a long narrow piece of meat or fish without bone).

strong

a wavering minority along the road of rectitude—Replier—or to a spiritual or mental power or faculty that acts with force and vigor <a strong mind> <a strong will> <a strong current> <a strong battery> <the memorandum was couched in strong language and the Russians replied to it . . . with equally stern words—Shirer> or to something (as color or light or emotion or sentiment) that is particularly intense or violent <a strong purple> <the strong light of the setting sun> <a strong love> <a strong attachment> <the impulse to fight is something so strong, so deep-seated, so uncontrollable by . . . reason—Edmund Wilson>  
Stout (see also fleshy) carries a stronger implication than does strong of an ability to resist aggression or destructive forces or of an ability to endure hard use, severe pain, or great temptation without giving way. When applied to persons, it often suggests resolution, doggedness, or fearlessness <a stouter champion never handled sword—Shak> <and let our hearts be stout, to wait out the long travail . . . to impart our courage unto our sons—Roosevelt>  
When applied to things, stout usually also suggests solid, substantial construction <a stout cane> <a stout ship> or a texture that resists stress or strain <a stout canvas> <a stout paper> <their feet were protected by stout boots—Mason>  
In fact the term is generally applicable when the suggestion of power to resist or endure is more emphatic than that of a power to do or to effect. Sturdy implies qualities in inanimate as well as in animate things that suggest the possession of rugged health; the term carries no suggestion of powers derived from such qualities as size, intensity, or vehemence but connotes rather an inner strength typically derived from healthy vigorous growth, close solid construction, or a determined spirit that gives it staying power and stoutness <the little fellow has sturdy legs> <was a sturdy, handsome, high-colored woman—Van Doren> <it is the sturdiest of creepers, facing the ferocious winds of the hills, the tremendous rains that blow up from the sea, and bitter frost—Jefferyes> <our people are . . . conspicuous for a sturdy independence—Inge>  
Stalwart usually implies strength derived from what is so deeply established or firmly rooted that it is unassailable or imprangible or is completely dependable <William Law . . . was a stalwart Churchman, and showed no sympathy with the sectaries—Inge> <Dryden brings his stalwart common sense to bear upon the problem, and clarifies the issue—Lowes> <what is best in our society will have to be saved by the advocates of some older and more stalwart system of thought—Kirk>  
When applied to persons with reference to their physique or prowess, stalwart regularly suggests great strength, but it often throws the emphasis upon heroic build or largeness of frame <a stalwart man, limbed like the old heroic breeds—J. R. Lowell>  
Tough suggests the strength that comes from a texture or a spirit that is firm and unyielding and effectually resists attempts to pierce, destroy, or overcome; it stresses hardness rather than vigor, resistant elasticity or wiriness rather than hardness or solidity, or a capacity for yielding that is just sufficient to increase rather than to destroy a person's or thing's strength or stoutness <a tough membrane> <a tough opponent> <the tough resistance> <any type who reached the age of six . . . was a pint of iron man, so tough, so ferocious, so sharp in the teeth that the wildest alley cat would have surrendered a freshly caught rat rather than contest the meal—Mailer> <physically fragile, she was spiritually tough—Sackville-West>  
Tenacious comes very close to tough in its most general implications, but it places greater emphasis upon
retentiveness of what has been gained or of adherence to a support, position, or idea; it carries a strong suggestion of holding on, of adhesiveness, or of maintaining strength or position in spite of all opposing forces that would dislodge, dispossess, thwart, or weaken. He had always held with tenacious devotion to one of the ancient traditions of his race—Wolfe. He seemed to hold on to life by a single thread only, but that single thread was very tenacious—Arnold. When applied to material things and especially to substances it may suggest a powerful clinging quality and extraordinary resistance to forces that tend to effect separation or pulling apart (tenacious mud). Bold and tenacious as the bamboo shooting up through the hard ground of winter—Binyon. When applied to persons it suggests a stubborn hold upon something (as a possession or an opinion) that defies the efforts of others to break. Italians in possession are probably as tenacious of their rights as any one else—Lucas.

Framework

Framework is frequently used in reference to a rigid framework, especially in the building trades for a rigid framework, especially of the heart. Its use, in a broad sense, is analogous to the word skeleton in reference to literary constructions, in which case the skeleton is an organ of the heart, to which reference is made in the following section.

**Structure**  
Building, edifice, pile  
2 Structure, anatomy, framework, skeleton are often used interchangeably. Structure is by far the richest in implications and the widest in its range of application. In general it denotes the formation, arrangement, and articulation of parts in something built up by nature or made by man. Often the word implies reference to everything that enters into the makeup of a particular body, organism, edifice, fabric, or substance; thus, a study of the structure of a brain involves attention to the two kinds of matter (gray and white) of which it is composed, to the three parts (forebrain, midbrain, hindbrain) into which it is divided, to the subdivisions of each of these parts, to the connections and interrelations between all these divisions, and to any peculiarities in form or arrangement of parts. Sometimes, however, structure implies a reference to certain features only, as for example: the parts or elements which distinguish kinds rather than individuals (crocodiles and alligators exhibit certain differences in structure) or the parts or features which are essential or necessary to a thing’s existence as distinguished from those that are removable, detachable, or dispensable (in Gothic architecture the pointed arch is part of the structure and is not a decorative addition) or the parts or features that reveal the underlying design as opposed to those that complete the work or bring it into fullness of being (study the structure of a poem).

**Anatomy** may be preferred when the typical structure of an organism or of an organ is to be denoted (the anatomy of an ape) (the anatomy of the heart). Framework and skeleton are applied to the underlying or supporting structure. Framework is used chiefly in reference to an artificial construction which serves as a prop and a guide in building but which is not visible in the completed thing (the framework of a sofa). The carpenters are now working on the framework for the house. Skeleton is frequently used in the building trades for a rigid framework, especially one made of steel; it is often used in place of structure, design, outline in reference to literary constructions, sometimes to imply that the design is carefully developed and its parts definitely articulated (the skeleton of his argument is now finished) but more often, probably, to indicate a sketchy conception of the whole which serves as a starting point (he has the skeleton of his plot in mind).

In either case it is usually further implied that the writing out in literary form and the elaboration of atmosphere, details, characters remain to be accomplished.

stumble, trip, blunder, lurch, flounder, lumber, galumph, bumble can mean to move unsteadily, clumsily, or with defective equilibrium (as in walking, in doing, or in proceeding). Stumble, trip, blunder, lurch, and flounder as applied to physical movement or gait usually suggest a departure from the normal and imply some extraneous influence to be responsible for such departure. Stumble characteristically implies striking an obstacle or impediment which hinders free movement or direct progress and therefore usually suggests a fall or a check or a cause of embarrassment or perplexity (the horse stumbled over a stone and threw its rider) (he found himself running from tree to tree . . . stumbling wildly towards the cleared ground—Caldwell) (his thought staggers, and reels, and stumbles—Martin Gardner) (the classic instance of the second-rate man who is offered a first-rate destiny, and who, in stumbling after it, loses his way in the world—Buchan) Occasionally stumble implies nothing more than accidental discovery or a coming upon without design (she tried to rationalize his death as we will, stumbling onto such conclusions as that it was time for him to go; he was meant to die young—Cheever) Trip definitely implies a loss of footing or of something comparable to a loss of footing, often on account of the interposition of an unseen obstacle; therefore in extended use trip often connotes a falling into a trap, a laping in speech, or making a wrong move (his plum hands wavering uncertainly away from his body as he tripped, and caught up and tripped, trying desperately not to fall behind the men running—Mailer) (how I rejoiced when I found an author tripping—Tyn dall) (his tongue tripped over the word) (any military man familiar with firearms could trip you up, and if you were found out, you'd be hanged—Kenneth Roberts) Blunder stresses awkward confusion in movement or in proceeding that may suggest blindness, aimlessness, clumsiness, ignorance, or a failure to perceive where one is going or what is to be accomplished (unsteady on his feet and taken completely by surprise, he blundered headlong through the open doorway . . . and fell sprawling—Isherwood) (there was the constant danger of blundering into a house at a time when it was being ransacked by the Gestapo—Valtin) (the van . . . blundered away down the cart track like a drunken bee—Jan Struther) (various blundering attempts were made at alliance between various branches of thought—T. S. Eliot) Lurch suggests the heavy, ungainly rolling or swaying movement of a ship in a storm or of a drunken man; when applied more generally to persons, it usually implies loss of muscular control or extreme clumsiness (the distraught and frightened man . . . raised himself on his hands and lurched forward—Anderson) (sometimes, down the trough of darkness formed by the path under the hedges, men came lurching home—D. H. Lawrence) (the conductor . . . lurched through the car asking for tickets—Styron) Flounder stresses stumbling, struggling, or sprawling rather than rolling and usually implies an effort to proceed when one is out of one's element (as a fish out of water or a horse in the mire) or when one does not know the road or the way (went swiftly into the forest, leaping with sure feet over logs and brush. Pilon floundered behind him—Steinbeck) (they floundered on foot some eight miles— a squalid cabin—Cather) (In its extended use flounder usually implies the confusion of mind and the uncertainty of one who is completely muddled or at a loss but nevertheless proceeds <individuals who can't get a foothold in life, who flounder about in bewildered desperation—Deutsch> (nature has been floundering along for a great many millions of years to get things as they are—Furnas) Lum ber, galumph, lumber, and bumble by contrast with the foregoing terms tend to suggest clumsiness, irregularity, or heaviness as a natural or usual manner of movement or gait. Lumber implies a ponderous- ness or clumsiness in movement (as of one heavily burdened or of great weight) (the jeep, opening its siren at a column of Quartermaster's trucks that lumbered along half a mile ahead, summoned them with stentorian wails to move over—Coozens) (a veritable mountain of a man, [he] deeply resented the attention he invariably attracted when he lumbered down a Manhattan thoroughfare—Cerf) In extended use it implies comparable ponderousness or clumsiness in proceeding or accomplishing (wide spread exasperation with the union leadership and at the lumbering slowness of the machinery of negotiation—New Statesman) (where so many other historical novels lumber along beneath their load of conscientious detail, Mr. Graves's imagination is invariably stimulated by what he finds—Strong) Galumph adds to lumber the suggestion of a thumping, bumping, weighty gait (Frankie lived by day beside the ceaseless, dumping shuffle of the three-legged elephant which was the laundry's sheet-rolling machine. When he ploped onto his narrow pad in the long dim-lit dorm at night and turned his face to the white-washed wall, the three-legged elephant of the mangle roller followed, galumphing, through dreams—Algren) (doors banged, voices rose shrilly, several pairs of feet galumphed down the passage—Monica Stirling) The notion of thumping or of heavy, lurching irregularity is often prominent in extended use (I was sweating in the cool air, my heart galumphing as I stood up—McHugh) (the mornings are enlivened by the spectacle of high-ranking naval and Air Force officers, who will be horse- borne in the procession, uneasily galumphing along the bridle path on their mounts—Panter-Downes) but sometimes it retains an earlier implication of gaily clumsy prancing <to a country that liked to think of its leaders as . . . mad but never without their dignity, Low brought the manhandling democratic touch. He made rank and office commonplace, turned politics into a galumphing merry-go-round—Pritchett) LopPOL more likely to suggest bounding irregularity than clumsiness or heaviness (calves lolloped in long grass—Patrick White) (the lioness . . . started to charge and seemed to come on in great bounds. She appeared to be lolloping along with a lot of up-and-down motion—F. G. Stewart) (an interurban trolley line (which terrified me the way it went lolloping around curves)—Palmer) (the breeze went lolloping along the corridors, blowing the blinds out—Woolf) Bumble suggests a blundering, haphazard progress (the hot auditorium where the June bugs bumbled foolishly against the window screens—Stafford) (plane . . . hit the ground, her tail wheel exploded, and she came leaping like a grasshopper up the runway on a flat tail wheel . . . She bumped and bumbled up to the line—Steinbeck) and, especially in its extended use, may carry more than a suggestion of floundering and blundering (this novel describes a whole small town as it bumbles its way towards an acceptable life under conditions it never made—Graham Bates) (so long as we continue pursuing so shortsighted and blind a policy, so long, I believe, will we bumble and stumble into error—Cherin) AnA stagger, totter, *reel: *plunge, pitch, dive: falter, *hesitate, waver, vacillate: chance, *venture: encounter, *meet, confront

stupid adj Stupid, slow, dull, dense, crass, dumb are comparable when they mean conspicuously lacking in intelligence or power to absorb ideas or impressions or exhibiting such a lack. Stupid can apply to a sluggish slow-witted lack of intelligence, typically congenital or habitual, or it can apply to a usually more or less transitory benumbed or dazed state of mind that is typically the result of drunkenness, shock, or illness; although the term seldom is applied to the insane or the imbecile, it often also suggests senselessness <stupid with age—Shak.> <stupid with drink> <he could not stand stupid people, especially those who are made stupid by education—Wilde> <there emerged gradually a picture of stupid chicanery and petty corruption for stupid and petty ends—Faulkner> <he had gone on for years deceiving himself—Shak.> <there was a hollow look in his eyes—Kingsley> <offers slow or retarded boys an adjusted program of education—adv.> <Dull (see also DULL 2) suggests a lackluster slowness or sluggishness of mind that may be constitutional, or the result of lack of mental exercise, or of overwork, or of a physical condition, and is unresolved by any hint of quickness, brightness, or liveliness> <there were cows and they looked at him dully with their great dull eyes—James Baldwin> <had a warm spot in his heart for this dull, stupid, fumbling man—Shirer> <find the book long-winded, incredibly boring . . . and deadly dull—John O'London's Weekly> Dense implies a quality of mind that makes it impervious to ideas. Additionally it may imply qualities (as obtuseness or solidity) that reveal lack of perception, sensitiveness, or subtlety (a woman may be a fool, a sleepy fool, an agitated fool, a too awfully noxious fool, and she may even be simply stupid. But she is never dense—Conrad> <never offered to take me over the house, though I gave her the broadest hints. She's very dense—Clive Arden> Crass suggests a gross unfthinking quality that makes the mind incapable of delicate mental processes (as analysis, discrimination, and evaluation) or impervious to refined or spiritual ideas <crass ignorance> <those dedicated guardians of man's aspirations who somehow redeem their crass society by being simultaneously its exiles, queer ducks and catalysts—Viereck> <the new business buildings in the City of London represent British philistinism in its most crass and shortsighted form—Mumford> <he represented him as a crass and stupid person who had fallen through lack into flowing prosperity—Malamud> Dumb (see also DUMB 1) is a term of contempt that may be used in place of any of the preceding terms especially when obtuseness and inartculateness are also implied <how dumb do you think people are? or how obtuse are you, actually?—Wouk> <too dumb to do things in the right way—Reilly>

**style** n 1 diction, phraseology, phrasing, *language, vocabulary

**stylish, fashionable, modish, smart, chic, dashing** can mean conforming to the choice and usage of those who set the vogue (as persons of wealth and taste or often the avant-garde). **Stylish** is likely to stress currency and, correspondingly, transitoriness (a stylish address in the new part of the city) <recently it has been more stylish to assume that the author of a story is a complete victim and tool, either of his purse and social position or of his parents' neuroses and theories about child-raising—Smart> <a former college classmate of mine. . . . he had been a big wheel under the elms, a miracle of scholarship and coordination, and classified, in the jargon then stylish, as a snake, or suave operator—Perelman> <she has restored delight . . . to poetry, has written her poems with the completest possible clarity (here you will find no stylish obscurantism, so dear to the avant-garde)—Charles Jackson>

**Fashionable** is often interchangeable with **stylish** (a fashionable neighborhood) <it has become . . . fashionable to sneer at economics and emphasize "the human dilemma"—Mailer> but **fashionable** is distinctly more likely to imply conformance to what is established and generally accepted than to a transitory or restricted vogue <the Episcopal church—that's kind of fashionable in Paterson, where the nicest people go, or at least the ones with the most money—Chidsey> <one of the rare French intellectuals who has the courage to be publicly and outspokenly pro-American in France, a country where it is nowadays fashionable to ridicule the United States—Padover> **Modish** stresses conformity to the latest styles <all the ornaments deemed essential to a modish Victorian drawing room—New Yorker> but sometimes it suggests a step beyond what is describable as **stylish** or **fashionable** and may apply to what from another point of view might be called daring, extreme, or startling <tend to regard the pursuit of the new as necessarily silly and modish—Bentley> <nothing is so transitory as the modish. It is on the way out at the very moment that it comes in—J. M. Brown> <he was English enough to feel a contempt for modish philosophers who went about preaching a profitable brand of nihilism, blandly informing their fellow creatures that they were already in hell and there was no point in struggling against it—Wain> **Smart** comes close to **modish** in suggesting the height of what is stylish or fashionable, but it implies a position in the forefront of what is acceptably stylish
or fashionable rather than one beyond this point (he was handsome, he was rich, he was a sportsman and he was good company. . . . he had been long established as one of the smartest men in London—Maughan) <her college set had stayed rigidly in a zigzag path through the town, traversing a few hotel bars, nightclubs, and eating places which they considered smart—Wouk> <black is often used in smart, sophisticated interiors—Hazel & Julius Rockow> Chic is sometimes used simply as an equivalent to modish or smart <the good corporation wife does not make her friends uncomfortable by clothes too blatantly chic—Whye> or even of fashionable <whether or not he the artist liked it, he became chic—Harper's> However it may not imply conformity to the latest style so much as an effectiveness in style which suggests the exercise of a knack or skill and the achievement of distinction <the natural elegance which enables her to look chic in camouflaged parachutist's overalls—Edmond Taylor> <decided to put her culinary tricks into book form for other women who want to whip up a chic meal—Butcher> <achieved so great a virtuosity that now he not only can do anything but does everything, fluctuating between a wishful religiosity and a chic diablerie—Untermeyer> Dashing applies to people or to things which they wear or use; it implies not only stylishness or, more often, modishness but a bold, shining quality that enables one to cut a figure in any group or assemblage <you're willing to be a dashing but a bold, shining quality that enables one to cut a figure—Gardner> <he was a tall, handsome, dashing chap . . . whose magnificent disregard for money cut a wide swath in the social life of the town—Amer. Guide Series: N. J.> <a pair of dashing young brokers>

**Ana** *new, novel, new-fashioned, newfangled, modernist: *showy, ostentatious, pretentious

**Suave, urbane, diplomatic, bland, smooth, politic** as applied to persons, their demeanor, and their utterances can mean conspicuously and ingratiatingly tactful and well-mannered. These words at times can convey so strong a suggestion of insincerity or of a surface manner that their distinctive implications are obscured. It is chiefly in their nonderogatory use that essential differences in meaning are apparent. Suave suggests qualities that are or have the appearance of being acquired through discipline and training and that encourage or are intended to encourage easy and frictionless intercourse with others. Negatively, it suggests the absence of everything that may offend or repel; positively, it suggests such qualities as affability without fulsomeness, politeness without stiffness, and persuasiveness without evident desire to force one's opinion on others <what gentle, suave, courteous tones!—Jackson> <a slight disturbance of his ordinary suave and well-bred equanimity—Lyton> <they could be as suave in advancing their bromides as we could be gauche in establishing our originalities—J. M. Brown> Urbane implies a high degree of cultivation, poise, and wide social experience; it also commonly suggests an ingrained or inbred courtesy which makes for pleasant and agreeable intercourse among all kinds of men regardless of social or intellectual standing <writs with fluent charm, in the easy, urbane, richly allusive manner of an Oxford and Cambridge savant—Wecter> <men of delicate fancy, urbane instinct and aristocratic manner—in brief, superior men—in brief, gentry—Menschen> Since urbanity and an ability to deal with difficult or ticklish situations with great tact are theoretically the qualities of the typical diplomat, the adjective diplomatic, when used in reference to nondiplomats, carries these implications, often adding in addition a hint of artfulness in gaining one's own ends <Gabrielle's busy, active, diplomatic managing of the party—E. E. Hale> <the diplomatic manner . . . of a government official whose career depended on politeness to his equals and deference to his superiors—MacInnes> <I have grown to believe that the one thing worth aiming at is simplicity of heart and life; that one's relations with others should be direct and not diplomatic—Benson> Bland is negative as well as positive in its implications, for it usually implies the absence of irritating qualities as strongly as it suggests serenity, mildness, and gentility. Nevertheless, in spite of this vagueness, the term often carries a hint of benignity or the appearance of it and usually directly implies an ingratiating pleasantness <his manners were gentle, complying, and bland—Goldsmit> <he's simply a distinguished-looking old cleric with a sweet smile and a white tie: he's just honorable and bland and as cold as ice—Sanatana> <most of the time he sat behind a look of bland absorption, now and then permitting himself an inscrutable smile—Hervey> Smooth differs from bland chiefly in being more positive in its implications and in being more consistently derogatory. Sometimes it stresses suavity, often an assumed suavity <the words of his mouth were smoother than butter, but war was in his heart—Ps 55:21> At other times it carries even a stronger implication of tactfulness and craft than diplomatic <I was not even my parents' son in 1928 but a devilishly smooth imposter, awaiting their slightest blunder . . . to assert my true identity—Salinger> <the sales talk of our government for the second one was a smooth and professional job—Edmund Wilson> Politic (see also EXPEDIENT) when applied to persons implies both shrewdness and tact; the term usually suggests the ability to gain one's ends or to avoid friction through ingratiating means or diplomatic methods. It varies considerably, however, in its implication of artfulness, sometimes connoting cunning or craft and sometimes little more than just the right degree of suavity <I . . . am an attendant lord . . . deferential, glad to be of use, politic, cautious, and meticulous—T. S. Eliot> <the mayors and corporations as a rule guided their cities through difficult times with politic shrewdness—Edwin Benson> **Ana** *gracious, cordial, affable, genial, sociable: courteous, courteously, politely (see CIVIL): *fulous, uncouth, slick

**Subdued** *tame, submissive

**Ant** intense: barbaric (of taste): bizarre (of effects): effervescent (of character and temperament)

**Subject** n 1 *citizen, national

**Ant** sovereign

**Subject** n 1 *subject, matter, argument, topic, text, theme, motive, motif, leitmotiv can mean the basic idea or the principal object of thought or attention in a discourse or artistic composition. Subject is the most widely applicable as well as the least definite in denotation of these words; it implies merely some restriction in one's field of choice and a governing principle determining the selection of one's material and demanding some concentration in the treatment of it (as in a discourse or work of art) <what is the subject of his painting?> <your subject is too comprehensive to be treated adequately in so short an article> <it was the first of the . . . major mistakes in World War II and became a subject of violent controversy

A colon (:) separates groups of words discriminated. An asterisk (*) indicates place of treatment of each group.
—Shirer> Matter and the more usual subject matter are often used as close synonyms of subject (Chail, Son of God, Saviour of men! Thy name shall be the copious matter of my song—Milton) <Mr. Lytton Strachey . . . chose, as subject matter of a book, four people of whom the world had heard little but good—Repliery> As often, however, these terms refer not to the idea, object, or situation selected for treatment but to a restricted field or range of material from which one selects the specific subject he intends to treat <Alexander's Bridge was my first novel, and does not deal with the kind of subject matter in which I now find myself most at home—Cather> Argument (see also reason, argument 2) can denote the subject, especially the carefully delimited subject, for a particular discourse (as a poem or a part of a poem) that is planned in advance of execution <the argument of the book is as simple as you could wish for—Parris> The word sometimes implies explicit statement of the leading idea or a summarizing of its development <Pope prefaced each epistle of his Essay on Man with an argument of it> Topic applies to a subject, usually of general interest, chosen because of its possibilities for individual or original treatment or for discussion by different persons holding diverse views <the students were asked to write an essay on one of the assigned topics> <I can’t remember in a prolonged conversation what topic’s been covered and what haven’t—Purdy> Text can mean a verse or passage, usually from Scripture, chosen as providing or suggesting a subject for a sermon or similar discourse <the excellency of this text is that it will suit any sermon; and of this sermon, that it will suit any text—Sterne> In extended use it is often applied to whatever suggests itself as a good starting point for a discourse the subject of which is yet to be defined or which lacks a definite subject <my text for this chapter is . . . any good daily newspaper—La Barre> Theme denotes a subject which one selects for literary or artistic treatment; it is applicable to something (as an idea, proposition, text, melodic phrase, or mood) which a writer, composer, or artist proposes to develop (as in a poem), to elaborate upon (as in a movement of a symphony), or to illustrate (as in a mural or series of murals) or which can be detected in a completed work as the dominant object of his concern <tools are my theme, let satire be my song—Byron> <waterfalls are from very early times a favorite theme for the painter—Binyon> Theme does not necessarily suggest a clearer definition than subject or topic, but, in distinction from them, it invites comparison with the treatment and calls attention to the quality, the form, the design, or the execution of the completed work; thus, an overworked theme implies a lack of freshness in the thought or design; a compelling theme suggests force and enthusiasm in its treatment <to produce a mighty book you must choose a mighty theme—Melville> Motive and motif are restricted in reference to works of art to those in which design or execution of the completed work; thus, an overworked motive is much favored by decorative artists <don’t speak. Don’t think. This is, of course, a familiar refrain . . . . . > It is the motif of the great dark stories of the 1930’s—Geismar> Leitmotive designates a specific melodic phrase that is associated with a particular person, mood, or situation (as in an opera) and that is repeated each time this person, mood, or situation reappears. The word has considerable extended use and is often applied to an insistent or recurrent idea that becomes the dominant theme of an author or of a work (“Fate went its way uncompromisingly to the terrible end.” This is the leitmotiv of this interesting, dignified apologia of one of Austria’s Elder Statesmen—S. Subordinate applies to a person or thing that is lower than another in some such essential respect as by being under his or its authority <all officers of an independent army below the rank of general are subordinate officers> <Montholon, up to that moment subordinate to the Grand Marshal, was entrusted with the management of the Emperor's household—Maurois> or by having a less important or less conspicuous place, position, or status in the scheme of a whole than some other member, part, or element <the relation of dominating to subordinate features —Binyon> <ceremony is subordinate in the scheme of life, as color is in a painting—Ellis> or by loss of independence and reduction to a lower or inferior position <at that time considered as a subordinate and inferior class of beings . . . . . subjugated by the dominant race—Taney> <it does tell us . . . why a complex of beliefs is dominant at one time and subordinate at another—Hose> Secondary differs from subordinate mainly in suggesting a much narrower range of difference, for it implies a position...
or an importance that is just below what may be described as primary, main, chief, or leading. (what they actually believe is of secondary consequence; the main thing is what they say—Mencken) (the valuation of an object is thus secondary to the apprehension of it—Alexander) (each stage of the climb from valley to intermediate shoulders and crags, to a secondary and thence to the highest point—W. O. Douglas) In reference to order of development or derivation secondary is opposed to original or first and carries no necessary implication of inferiority in importance (the secondary meaning of a word) (his primary tools, the fundamental cutting tools with which he makes his secondary tools—R. W. Murray) Dependent (see also dependent 1) implies subordination to someone or something, but it also connotes the position or the status of one that hangs on, leans on, or relies on the other for support or for the provision of what is lacking in itself; thus, a dependent clause in a sentence is not completely intelligible apart from the main clause; a dependent child is not old enough to support himself and therefore must rely upon his parents or guardians. In its more common use dependent implies a loss, through subjugation or through weakness, of one’s independence; it therefore frequently stresses powerlessness or debasement more than subordination (England, long dependent and degraded, was again a power of the first rank—Mackay) (Maggie is not dependent on Honora—she could get a better job tomorrow—Cheever) Subject definitely implies subordination to a dominant power but never carries, as subordinate sometimes carries, an implication of relative importance within a scheme of the whole; it often tends to suggest loss of those powers which imply a degree of freedom, responsibility, self-discipline, and self-sufficiency (a subject race) (aristocracy is out of date, and subject populations will no longer obey even the most wise and virtuous rulers—Russell) Tributary basically applies to peoples, races, or nations that have been conquered and made subject to another people, race, or nation and that are forced to pay tribute to their conquerors, but in more general use it is often interchangeable with subject (no conquering race ever lived or could live . . . among a tributary one without begetting children on it—Quiller-Couch) In another sense it is also applicable to whatever has an outlet into another and larger thing of the same kind and thereby yields supplies (as a flow of water or material) which increase the size or importance of the latter (the tributary streams of the Mississippi river) (the lane, receiving two tributary lanes from who should say what remote hamlets, widened out with this accession—Mackenzie) Collateral implies a being side by side, but it suggests not equivalence in value but subordination of one through or as if through an indirect relation to or a loose connection with the other; thus, a collateral cause of a war, though by implication operative at the same time as the most important or primary cause, is subordinate to the latter; a collateral issue is not the main issue; a collateral descendant is not a direct or lineal descendant but one in a different line (as of a brother or sister) (the union had engaged successfully in many collateral activities such as banking and cooperative housing—Soule) (the limiting of inquiry to the immediate, with total disregard of the collateral or circumstantial events—Poe)

**subservient** n. *auxiliary, subsidiary, contributory, ancillary, adjuvant, accessory

**Ana** subordinate, secondary, dependent, subject

**2 Subservient, servile, slavish, menial, obsequious** can mean showing or characterized by extreme compliance or abject obedience. **Subservient** (see also auxiliary) applies directly or indirectly to those who occupy a subordinate or dependent condition or who manifest the state of mind of one in such a position; the term stresses subordination and may connote cringing or truckling (editors and journalists who express opinions in print that are opposed to the interests of the rich are dismissed and replaced by subservient ones—Shaw) (a certainty that she would always worship him and be nice and subservient—Farrell) Servile suggests a lowly status and a mean or cringing submissiveness (servile labors) (mean, servile compliance—Burns) (in no country . . . did the clergy become by truckling (why completely servile to the political authority—Shirer) (they are not loyal, they are only servile—Shaw) Slavish suggests the status or attitude of a slave and typically implies an abject or debased servility unbecoming to a free man (a slavish yes-man to the party bosses—S. H. Adams) (Oriental literature . . . is based on a slavish acceptance by the pupil of the authority of the master—Cohen) (fear took hold on me from head to foot—slavish superstitious fear—Stevenson) (she also became increasingly assiduous in her slavish attentions, until . . . one would almost have thought that her duty toward him was her very life—Wolfe) Both servile and slavish are used of unduly close dependence upon an original or model (it is the business of art to imitate nature, but not with a servile pencil—Goldsmith) (a slavish devotion to tradition) Menial in its typical extended reference applies to occupations requiring no special skill or intellectual attainment or ranked low in economic or social status and stressing the humbleness and degradation of or like that of one bound to such an occupation (niggers were ineducable and would therefore always be menial—Mayer) (competing against a mass of unemployed, they accepted the most menial and worst paid jobs—Handlin) (encouraged to rise from the menial and mechanical operations of his craft—Mumford) (most menial of stations in that aristocratic old Boston world—Parrington) Obsequious may apply to persons who are actual inferiors or to the words, actions, or manners by which they reveal their sense of inferiority in the presence of their superiors (a duteous and knee-crooking knave . . . doting on his own mediocrity—Shak.) (be civil, but not obsequious—Meredith) The word may imply a servile, often a sycophantic, attitude (brutal and arrogant when winning, they are bootlicking and servilely obsequious when losing—Cohn) (on the second Saturday evening after he got his new position, the tobacconist, a rather obsequious man, called him Mr. Hall—Anderson) or extreme attentiveness in service or to the niceties of service (following him out, with obsequious politeness—Dickens)

Substitute is the general term interchangeable with any of the others; specifically it is often applied to a teacher not appointed to a full-time position but held in reserve for service when needed. A supply is a clergyman who substitutes for the regular preacher. A <em>locum tenens</em> is often a substitute for a professional man with a practice or clientele which needs to be cared for while he is away for a length of time; the term is used especially with respect to physicians and clergymen. | 2 Succeed, prosper, thrive, flourish can mean to attain or to be attaining a desired end. Succeed (see also FOLLOW) implies little more than this. Both persons and things succeed when they are effective in gaining their purposes or ends, in particular or in general; the term implies an antithesis to fail (the teaching that fosters these ends succeeds; the teaching which negates them fails—Suszallo) (the little man had succeeded in disturbing the boy with his absurd proposal—Dahl) (the revolt against the tyranny of mathematics and physics is justified by the fact that these sciences have not succeeded in explaining the phenomena of life—Inge) Prosper carries an implication of continued or long-continuing success; it usually also suggests increasing success. Only through the context is it clear whether the success is in the continuation or the increase of health, of wealth, or of well-being (prosper in business) (Milenkova was soon prospering. His coat came in soft and shining; his purr cleared and his eyes lost the milkiness that had clouded them—
succession, progression, series, sequence, chain, train, string

Succession, progression, series, sequence, chain, train, string are comparable when they mean a number of things that follow each other in some order. Succession implies that the units, whether things or persons, follow each other, typically in order of time or, less often, of place and usually without break or interruption (a succession of disasters) (a succession of mild winters) (there was a dizzy succession of events and of constantly changing situations—Shirer) (a succession of rooms, one after the other, extending over a great length—Amer. Guide Series: La.) (reality is a succession of concrete and particular situations—Huxley) Progression (see also progress 2) applies to a succession in which there is movement and flow, and often change, so that a pattern is formed or an advance is indicated. The word is most frequent in mathematics and in music; in the former it denotes a succession of quantities between every two of which there is a particular but an unvarying relation (arithmetical progression) (all the following systems are based on a progression by which the amount of a bet is increased after a loss—Morehead & Mott-Smith) In music it denotes a succession of chords which constitute a harmony (a short melodic line without addition of simultaneous harmony, containing mostly stepwise progressions, moderately interspersed with leaps—Hindemith) Series applies to a number of things of similar or uniform character that stand in the same relation to each other or achieve the same end; often the term is indistinguishable from succession, but the combined or total effect of the units is rather more stressed than the fact that they follow each other (a series of notes) (a series of visits) (a series of payments) (it all came together in my understanding, as a series of experiments do when you begin to see where they are leading—Cather) (some so-called series are nothing more than miscellaneous collections of books published at the same price and in the same style—McColvin) Sequence is more restricted in meaning than series and implies a closer causal or logical connection between the things involved (as a numerical or chronological order or a settled recurrence in the same order) (the sequence of the seasons) (his thoughts flow in logical sequence) (preferring rather to get the news in weekly retrospective, from the periodicals—for these organs treated events of a preceding week as an understandable sequence and gave them discernible pattern—Terry Southern) (our presidents have run in sequences, and . . . have tended to be classifiable under three main types—Edmund Wilson) Chain applies to a succession or series which forms a logical or causal sequence (a chain of arguments) (a chain of effects) (the long chain of development which makes the very language of the English Bible what it is—Lowes) (there is no climactic choice in the story; it moves evenly on a chain of circumstances—Walcutt) Train applies to a number of persons, animals, or concrete things or of effects or ideas that follow as attendants or as consequences or sometimes (as in the case of causes) that precede (she always has a train of admirers) (I invite your Highness and your train to my poor cell—Shak.) (a long train of causes) (the August afternoon that the little train of silent people carried her out of her own door up to the family burying ground—Deland) (somebody who wrote and wrote and never finished even one train of thought to the very end—Purdy) String applies to a series or succession so uniform (as in character, size, or quality) that its units are or seem to be strung on a thread; usually there is little implication of chronological, logical, or causal connection (a string of victories) (this long string of single-handed successes made rich fare for . . . crime reporters—Sipers) (launched at once into a string of stories—Dawson & Wilson) Ana consecutiveness, successiveness (see corresponding adjectives at consecutive): articulation, concatenation, integration (see under integrate) Successful *consecutive, sequent, sequential, serial Ana continuous, *continual, constant, incessant: rotating, alternating (see rotate) Succinct terse, *concise, laconic, summary, pithy, comprehensive Ana *brief, short: compressed, condensed, contracted (see contract vb): compact, *close: curt, brusque, blunt (see bluff) Ana discursive succumb *yield, submit, capitulate, relent, defer, bow, cave Ana surrender, abandon, resign, *relinquish sudden hasty, *precipitate, headlong, abrupt, impetuous Ana quickened, hurried, speeded, accelerated (see speed vb): fast, rapid, swift, fleet, expeditious Suds *foam, froth, spume, lather, scum, yeast Sue pray, plead, petition (see under prayer) Ana entreat, beseech, *beg, importune, implore, supplicate: sollicit, request, *ask: *demand, claim, exact, require Suffer 1 *bear, endure, abide, tolerate, stand, brook Ana accept, *receive, admit: *yield, submit, bow 2 *experience, undergo, sustain Ana submit, succumb, defer, *yield 3 permit, allow, *let, leave Suffrance *permission, leave Ana toleration, endurance (see corresponding verbs at bear): acquiescence, resignation, compliance (see under compliant) Suffering *distress, misery, agony, dolor, passion Ana affliction, tribulation, *trial, visitation: adversity, *misfortune: *sorrow, grief, anguish, woe, heartache, heartbreak Suffocate, asphyxiate, stifle, smother, choke, strangle,
throttle can all mean to interrupt the normal course of breathing. Suffocate commonly refers to conditions in which breathing is impossible through lack of available oxygen or through presence of noxious or poisonous gas

Suffrage, franchise, vote, ballot mean the right, analogous words 

on the expressed will of the majority, or on the ethical

Ballot, which specifically implies some method of secret withheld from British citizens who were not householders (franchise) Smother is likely to be used in situations in which the supply of oxygen is inadequate for life; it often suggests a deadly pall of smoke, dust, or impurity in the air (smothered by the dust after the explosion) (a smell of soot which smothered the scent of wistaria and iris—Bromfield)

Power to vote freely, effectively, and without coercion, on the expressed will of the majority, or on the ethical use of the vote (the ballot is the citizens’ means of getting the power to assert its rights) <every American citizen has a vote in choosing those who will make the laws>

Ballot, which specifically implies some method of secret voting, is likely to be used when the emphasis is on the power to vote freely, effectively, and without coercion, on the expressed will of the majority, or on the ethical use of the vote (the ballot is the citizens’ means of getting the kind of government they want) <among free men there can be no successful appeal from the ballot to the bullet, and . . . they who take such appeal are sure to lose their case and pay the cost—Lincoln>

suggest

1 Suggest, imply, hint, intimate, insinuate can all mean to convey an idea or the thought of something by indirect means. Suggest emphasizes a putting into the mind as the result of an association of ideas, an awakening of a desire, or an initiating of a train of thought (the militant severity of his judgments, and the caustic wit of his comments, suggest . . . how long and bitter would be the struggle—Parrington) (suggesting attractive books (with jackets that truly suggest their contents)—Malcolm Cowley) (he can suggest in his work the immobility of a plain or the extreme action of a bolt of lightning, without showing either—Nichols)

Imply (see also include) is in general opposed to express; the term stresses a suggesting, or putting into the mind, of an idea, a thought, or a meaning that is involved in a statement, an action, a situation, or a word and forms a part, but not necessarily an obvious part, of its full signification or significance (the philosophy of Nature which is implied in Chinese art—Binyon) (dislikes intensely to say this; in chapter after chapter he approaches it and implies it, only to draw back from saying it quite baldly—Brand Blanchard) Very often the difference between suggest and imply is not clear, though suggest often connotes the necessity of delicate perception and imply connotes the need of inference (a competent portraitist knows how to imply the profile in the full face—Huxley) (the “sayings” of a community, its proverbs, are its characteristic comment upon life; they imply its history, suggest its attitude toward the world and its way of accepting life—Cather)

Hint implies the use of a remote or covert suggestion and often also connotes lack of candor, frankness, or straightforwardness (by looking for a minute at the soft hinted green in the branches against the sky—Shirley Jackson) (he was not candid with her about his feelings; for once, when he had merely hinted at them to her, she had laughed—Dell) (the Star Route frauds, hinted at while Hayes was president, were uncovered before the death of Garfield—Paxson)

Intimate frequently implies a lighter or more elusive suggestion than hint but it connotes delicacy of approach rather than lack of candor or frankness (he said that he had to be prudent or might not be able to say all that he thought, thus intimating to his hearers that they might infer that he meant more—Justice Holmes)

Insinuate (see also introduce 2) implies an artful hinting or a conveying, especially of an unpleasant or deprecative suggestion, in an underhanded or devious manner (by his tone and expression, rather than by his words, he suggested lack of candor, frankness, or straightforwardness; the difference between saying it quite baldly—Brand Blanchard)

Insinuate (see also introduce 2) implies an artful hinting or a conveying, especially of an unpleasant or deprecative suggestion, in an underhanded or devious manner (by his tone and expression, rather than by his words, he insinuated that the boy was not to be trusted) (he could quietly insinuate the most scandalously hilarious things about the Joneses—Theodore Sturgeon) (the voice that insinuates that Jews and Negroes and Catholicks are inferior excrescences on our body politic—Lerner)

Con
that suggests may be an outward sign which prompts an inference (a certain well-do-to air about the man sug- gested that he was not poor for his degree—Hardy) It may be a symbol, which calls to mind whatever it conventionally represents (the fleur-de-lis suggests the royal power of France) It may be a fragment which evokes an image of a whole or a concrete detail that gives an inkling of something abstract or incapable of representation (the curve of the greyhound is not only the line of beauty, but a line which suggests—Jeffries) It may be a word or a phrase that calls up a train of associations and reveals more than it actually denotes (phrases flat and precise on the surface yet suggesting mystery below—Day Lewis) (the business of words in prose is primarily to state; in poetry, not only to state, but also (and sometimes primarily) to suggest—Lowes) One thing adumbrates another when the former faintly or darkly or sketchily suggests the latter. Adumbrate seldom takes a material object and is especially appro- priate for use with one that is or is felt as beyond the present level or sometimes the reach of human comprehen- sion or imagination (the Saxon demands, flatly presented or delicately adumbrated at Potsdam—Mostly) (this concept is adumbrated, but not yet distinctly conceived—Lowie) (both in the vastness and the richness of the visible universe the invisible God is adumbrated—Isaac Taylor) When one things shows (or shadows forth) another thing, it represents that thing obscurely (as by a symbol or other indirect means). Sometimes the word comes close to prefigure or foreshadow, but as a rule precedence is not implied (to the Chinese painters this world of nature seemed a more effective way of shadowing forth the manifold moods of man than by representing human figures animated by these moods—Binyon)

**Ant** manifest

**suggestion** touch, suspicion, soupçon, tincture, tinge, shade, smack, spice, dash, vein, strain, streak

**suit** 1. prayer, plea, petition, appeal

**suggestion** 2. lawsuit, lawsuit, action, cause, case are all used to designate legal proceedings instituted for the sake of demanding justice or enforcing a right. Though often used inter- changeably in the sense of lawsuit, they may have certain differences in their connotations and their applications. Suit stresses the attempt of a complainant through litiga- tion to gain an end (as redress for a wrong, recognition of a claim, or the enforcement of law); it therefore may be used of the proceedings from the time of formal appli- cation through the prosecution (win a suit) (withdraw a suit) (a suit in equity) Lawsuit can add to suit the implication of actual trial in court and often of that of judicial decision; it may therefore refer to the entire proceedings (the lawsuit of Brown versus Jones ended in victory for the defendant) Action comes very close to suit, but it is relatively colorless and throws the emphasis on actual proceedings rather than on petition (bring an action in Court) In technical legal use, however, it is a proceeding in a court of law which is distinguished from a suit in equity and which has for its end the ascertainment of facts. If the complainant’s position is found correct in such an action, an appropriate legal remedy may then be applied. Cause emphasizes the grounds on which one institutes a suit; consequently, like suit, it implies the plaintiff’s point of view, but it suggests even more strongly his sense of the justice of his demand (the customary arts of the pleader, the appeal to the sympathies of the public . . . he rejected as unworthy of himself and of his cause—Dickinson) Case, like cause, may imply rather the grounds of action than the actual proceedings but, unlike cause, may view or present these grounds from either or both points of view (the plaintiff has a good case) (the defendant’s attorney stated his case) However case often is applied to the entire proceedings in a law- suit including the judicial decision (one of the famous cases in legal history) (a study of historic capital cases)

**sulky** surly, morose, glum, *sullen, crabbed, saturnine, dour, gloomy

**suit** cranky, cross, testy, touchy (see IRASCIBLE); peevish, petulant, fretful, querulous, *irritable

**sullen** glu, morose, surly, sulky, crabbed, saturnine, dour, gloomy can mean governed by or showing, especially in one’s aspect, a forbidding or disagreeable mood or disposition. One is sullen who is, often by disposition, gloomy, silent, and ill-humored and who refuses to be sociable, cooperative, or responsive (Sheridan was generally very dull in society, and sat sullen and silent—Scott) (he made them go back to the fields immediately after supper and work until midnight. They went in sullen silence—Anderson) (the furious quarrels, and always, always the bitter sullen face of the boy brooding over his work—Dahl) One is glum who is dizzily silent either because of low spirits or depressing circumstances (we have of course good reason to look glum and little reason to laugh . . . now deprived of most of the things that make for gaiety and high spirits—Main) (the two of you . . . sitting there as glum as a pair of saints in hell—Dshkep) One is morose who is austere or sour and inclined to gloinness (a morose ill-conditioned, ill-natured person—South) (should there be any cold-blooded and morose mortals who really dislike this book—Boswell) One is sullen who adds churlishness or gruffness of speech and manner to sulleness or moroseness (he indulged his moods. If he were surly, he did not bother to hide it; if he were aggressive, he would swear at her—Mailer) (“Sam, put it out of your mind,” I snapped in a rather surly rebuff—Michener) (the somewhat surly goodness, the hard and unattractive pieties into which she cannot really enter—Pater) One is sulky who manifests dis- pleasure, discontent, or resentment by giving way child-ishly to a fit of peevish sullenness (though he had come in sulky unwillingness, he was impressed by the supper—Sinclair Lewis) (we were a precious pair: I sulky and obstinate, she changeable and hot-tempered—Shaw) One is crabbed who is actually or seemingly ill-natured, harsh, and forbidding. The term often refers to one’s aspect and manner of speaking and usually implies a sour or morose disposition or a settled crossness (divine Philoso- phy! Not harsh and crabbed, as dull fools suppose—Mil- ton) (the querulous, exacting father could not help . . . exasperating the children whom, in his own crabbed way, he yet genuinely loved—Woolf) One is saturnine who presents a heavy, forbidding, taciturn gloom (driven to saturnine and scornful silence by Gerald’s godless con- versation—Wylie) (Sheridan’s humor, or rather wit, was always saturnine, and sometimes savage; he never laughed —Byron) but saturnine may come close to sardonic (which see under SARCASM) and then suggests less a depressing heaviness and gloom than —is characterized by a skepticism that is often at least superficially attractive (novels . . . in which evil is personified by saturnine persons who

sum n

Sum, amount, number, aggregate, total, whole.

quantity

denote a result obtained by putting or taking together all in a given group or mass. Sum denotes the result of simple addition, usually of figures, sometimes of particulars (four is the sum of two and two).

Amount denotes the result reached by combining all the sums or weights or measures that form a whole (the amount of his purchases).

The amount of cotton raised in one year.

Number, with its strong suggestion of enumerating, is usually applied to a countable aggregate of persons or things and is clearly distinct from amount, which ordinarily applies to things in bulk or mass; thus, one may pick a large number of apples to make a large amount of applesauce.

Aggregate denotes the result reached by counting and considering together all the distinct individuals or particulars in a group or collection (though his errors are individually insignificant, their aggregate is so large as to destroy confidence in his accuracy). It is not true that a social force or effort is the mere aggregate of individual forces and efforts—Hobson.

Total and whole suggest the completeness or inclusiveness of the result; total often further implies magnitude in the result, and whole, unity in what is summed up (a grand total of ten millions).

The whole is the sum of its parts.

Quantity in general use is employed chiefly of things which are measured in bulk, even though they can be counted (a quantity of apples). In technical and scientific use quantity is not limited to an aggregate or bulk but may be used of anything that is measurable in extent, duration, volume, magnitude, intensity, or value (systematic quantity).

Quantity of a word performed by a machine.

summit, peak, pinnacle, climax, apex, acme, culmination, meridian, zenith, apogee.

meridian, apogee can mean the highest point attained or attainable. Summit is applied to what represents the topmost level attainable by effort or to what is the highest in its type or kind of attainable things (this scaleless monster, eight or nine feet long, sprawling in the shade by the side of the mud pools... was the summit of labyrin-thodont evolution—Swinton).

The Bar's outstanding figure by acclaim... in the fullness of his powers and at the summit of his fame—Lustgarten.

Peak usually implies a point rather than a level (the peak of enthusiasm). It is frequently applied to something that is or can be represented in a graph; used absolutely it designates the highest point reached in a course or during a stated or implied length of time (security prices reached new peaks this year).

His vocal control was at its peak when he did the recording—Paul Hume.

Pinnacle is applied chiefly to what has reached a dizzy and, often, insecure height (the word theater means different things to different groups. To some its very pinnacle is South Pacific, which is despised by the aesthetes—Miller). A pinnacle of happiness—Brooks.

Never achieved the pinnacle of public life, the presidency, when lesser men did—Vanseveld.

Climax implies a scale of ascending values; it is applied to the highest point in force, in intensity, in interest, or in impressiveness in an ascending movement or series. The word often suggests an end or close (reserve your strongest argument for the climax of your speech).

The quarrel had been only the climax of a long period of increasing strain—Davis.

The Marxist version of history, according to which the seeming harmonies of our society would blow up in a catastrophic climax—Niebuhr.

Apex is applied to the highest or culminating point (as in time or of accomplishment) to which everything in a career, a system of thought, or a cultural development ascends and in which everything is concentrated (if terrestrial culture were a pyramid, at the apex (where the power is) would sit a blind man, for... by blinding ourselves, bit by bit, may we rise above our fellows—Theodore Sturgeon).

The British people, who look upon the king as the apex of their national and social aspirations—Bolitho.

The argument is that Wordsworth's economic, political, religious, and "sexual" unorthodoxies dawned gradually, reaching an apex about 1793—Carlos Baker.

Acme is applied to what embodies or represents the perfection or pure essence of a thing (Sir Philip Sidney was the acme of courtesy).

To say "mither" instead of "mother" seems to many the acme of romance—Wilde.

Seemed to consider this the very acme of humor, for he fairly hooted at us—R. H. Davis.

Culmination can denote an apex that is the outcome of a movement, a growth, a development, or a progress and that represents its natural end or attained objective (this joint effort of church and crown... found its culmination under the auspices of President Roosevelt).

When the nobles were definitely conquered by the crown and the Reformation by the church—Brownell.

The recent use of the atomic bomb... is the culmination of years of Herculean effort—Stimson.

But often culmination suggests a coming to a head or issue rather than to a high point (war is a culmination of evils, a sudden attack on the very existence of the body politic—Roosevelt).

The Reforma... was... the culmination of a long agitation for national independence in religious matters—Inge.

Meridian is applied to the prime or period of fullest development or vigor in a life (as of a person, a race, or an institution); it connotes not only prior ascent but ensuing decline (I have touched the highest point of all my greatness: and, from that full meridian of my glory, I haste now to my setting—Shak).

The past eighteen years have constituted one of the great historical meridians of the presidency—Rossiter. Zenith adds to meridian the implications of lust and distinction (he had reached the zenith of his powers).

Classical studies reached their zenith in the twelfth century—H. O. Taylor.

Apogee, like meridian, is applied to the highest point (as in a course, a career, or a
movement), but it seldom connotes being at the prime or height of glory (the French Revolution reached its apogee in the Reign of Terror) (a range man whose deeply burned, granular face reached an apogee of redness in his beard—Hervey)

**summon, summons, summon, cite, convok, convene, muster**

mean to demand the presence of persons or, by extension, things. **Summon** implies the exercise of authority or of power; it usually suggests a mandate, an imperative order or bidding, or urgency (the king summoned his privy councilors to the palace) <summoned his secretary>

<summon a person to appear in court> I summon your Grace to his Majesty's parliament—Shak.> (a confiding, playful little animal, whom one alternately trained to do tricks and then summoned to jump snuggling upon one's knee—Sackville-West) she could summon tears and delights an one summons servants—H. G. Wells> Summons, sometimes interchangeable with summon, usually implies the actual serving with a legal writ to appear in court.

**Call** is often used in place of summon, especially when less formality is implied or the imperativeness of the bidding is not stressed, or when actual shouting is suggested <call men to arms> call witnesses to court> (call a servant) > (the president called congress together for an extra session) (I can call spirits from the vastly deep—Shak.)

Often, however, there is a suggestion of an impulse of God, of Nature, or of necessity (the young man felt that he was called to the ministry) <America is called to greatness—A. E. Stevenson> he felt called upon to speak

**Cite** (see also ADDUCE) may occasionally replace summon or summons, especially in legal use <Andrew was cited to appear and testify—W. B. Parker> he hath cited me to Rome, for heresy—Tennyson>

**Convok** implies a summons to assemble, especially for legislative or deliberative purposes <the king convoked parliament> <the Italian government convoked great congresses of physicists and engineers—Darrow> he convoked the chiefs of the three armed services . . . and laid down the law—Shirer>

**Convene** is related to convok somewhat as call is to summon; it is weaker in its suggestions of the exercise of authority and of imperativeness, but otherwise it is often not distinguishable <convene the students in the school auditorium> <the Senate was convened by the tribunes—Plut.> (the court-martial, perhaps fortunately, was never convened—Powell>

**Muster** implies the summoning of an army or other body of troops or of a ship's company (as for military action, inspection, parade, or exercise). In extended use, it implies in the assembling of a number of things that form a collection or a group in order that they may be exhibited, displayed, or utilized as a whole (a dow that had a mind to be sparkish, tricked himself up with all the gay feathers he could muster together—LeStrange>

before the residents could muster a fighting force, the marauders had filled their boats with plunder and were gone—Laird>

Muster is used in place of summon with such objects as courage or strength, especially when the context implies the previous dissipation of the quality mentioned <at length you have mustered heart to visit the old place—Dickens>

**Ana** vain, vainglorious (see under PRIDE: contemptuous, scornful (see corresponding nouns under DESPISE vb)

**supererogatory, gratuitous, uncalled-for, wanton** are comparable when they mean given or done freely and without compulsion or provocation or without warrant or justification. **Supererogatory** basically implies a giving above or beyond what is required or is laid down in the laws or rules; the word then suggests a devotion or loyalty that is not satisfied merely with the doing of what is required and that finds expression in the performance of additional labors, works, or services beyond those expected or demanded <the supererogatory services of representatives in Congress> In other usage the term is definitely defective in that it implies not a giving freely over and above what is required but a giving or adding of what is not needed or wanted and is therefore an embarrassment or encumbrance (for a mind like his, education seemed supererogatory. Training would only have destroyed his natural aptitudes—Huxley) (the virtual unity of language, laws, general race-ideals would seem to render protection of frontiers supererogatory—Angell>

**Gratuitous** may apply to a giving voluntarily without expectation of recompense, reward, or compensation <the gratuitous education provided by the public schools of the United States> but it often stresses a giving without provocation of something disagreeable, offensive, troublesome, or painful (a gratuitous insult) (a gratuitous . . . imposition of labor—Mann>

Gratuitous often means little more than uncalled-for, which suggests not only a lack of provocation but a lack of need or justification and therefore implies impertinence or absurdity, often logical absurdity (the gratuitous assumption that the new must surpass the old—Grandgent) (uncalled-for interference) (uncalled-for advice) Wanton (see also LICENTIOUS) also implies want of provocation, but it stresses capriciousness and the absence of a motive except recklessness of purpose or simply an impatience of purpose <Shelley> believing the deed [the burning of a haystack] to have been unprovoked and wanton—Meredith>

**tyranny consists in the wanton and improper use of strength by the stronger—Bryce>

**Ana** *free, independent, autonomous: *excessive, extreme, exorbitant: *superfluous, supernumerary, extra, spare

**superficial, shallow, cursory, uncritical** can mean lacking in depth, solidity, and comprehensiveness. **Superficial** applies chiefly to persons, their minds, their emotions, their attainments, or their utterances or writings, but it is also applicable to things (as circumstances, factors, conditions, or qualities). The term usually implies a concern with surface aspects or obvious features or an avoidance of all but these aspects or features (he had time for no more than a superficial examination of the report) <multiple superficial wounds of the left and right thigh . . . Profound wounds of right knee—Hemingway> (the tendency . . . of prose drama
is to emphasize the ephemeral and superficial; if we want to get at the permanent and universal we tend to express ourselves in verse—T. S. Eliot> Often the term is definitely depreciative and adds implications of unpleasing qualities (as pretense, ostentation, slightness, lack of thoroughness, insignificance, or insincerity) (the lecture was very superficial) (our political theory is hopelessly sophomoric and superficial—Mencken) (its treatment of what is one of the important themes of our day seems generally too slick and superficial to be taken seriously—Merle Miller) Shallow regularly implies a lack of depth (a shallow stream) (shallow breathing) and when applied to persons, their knowledge, their reasoning, or their emotions, is almost invariably derogatory and differs little from superficial used derogatorily except in its freedom from implication of outward show or of apparent but not genuine significance (do you suppose this eternal shallow cynicism of yours has any real bearing on a nature like hers?—Shaw) (he continued to prop up this utterly muddled man, this confused and shallow "philosopher," as the intellectual mentor of the Nazi movement—Shukman) people who are proprietors—shallow and callous egotists . . . are not capable of so noble and selfless a feeling as love—Salisbury) Curiosity stresses a lack of thoroughness or of care for details rather than a concentration on the obvious; it often also suggests haste and casualness (even from a cursory reading of the book, I judge that it is a very fine piece of work) (knowing the nature of women, your curious observations might prove to be more exacting . . . than my own—Terry Southern) (the coffeehouse must not be dismissed with a cursory mention—Macaulay) (as they worked, they cursed us—not with a common cursory curse, but with long, carefully thought-out, comprehensive curses—Jerome)

Uncritical implies a superficiality or shallowness unbecoming to a critic or sound judge, whether of literature or the arts or of more general matters (as data, statements, or events) which must be evaluated, related, estimated, or judged (an uncritical judgment of a book) (she was absolutely uncritical, she believed everything—Audrey Barker) (I would not have you so uncritical as to blame the Church or its clergy for what happened—Quiller-Couch)

Ant radical (sense 1)

Superfluity *excess, surplus, surplusage, overplus

Ana overflowing or overflow, teeming, swelling (see teem): exuberance, profusion, lavishness, prodigality (see corresponding adjectives at profuse)

Superfluous, surplus, supernumerary, extra, spare all describe what is above or beyond what is needed or dispensable. Superfluous implies a superabundance or excess that requires elimination or pruning (many people . . . found themselves superfluous and, in their turn, were compelled to emigrate—Handlin) (artists . . . not tempted, as are those who work direct from nature, to transcribe superfluous detail because it happens to be before their eyes—Binoy) all-sometimes the term either loses its implication of richness of supply or places no emphasis on that idea and comes to mean little more than nonessential or dispensable, if circumstances require its sacrifice (art, music, literature, and the like—in short . . . superfluous things—Sherman) (gradually the heat, the exhaustion had consumed all superfluous energy—Hervey) or unnecessary, useless, or needless (authority, like a good educator, ought to aim at making itself superfluous—Inge) Surplus applies to what remains over when what is needed or required for all present purposes has been used (there will be no surplus wheat this year) (each year the surplus funds of the institution were invested) (the task of reducing those with surplus land to part with it voluntarily to the landless—Masani) (transporting its troops to Manchuria, giving it surplus airplanes—Richard Watts)

Surplusary implies something added to a number that is normal, adequate, or prescribed; it need not necessarily suggest that there is no need or no use for what is added, though in reference to a physical condition it often implies a departure from the normal (extra ribs, as well as other supernumerary internal parts—Science News Letter) (a supernumerary member of a cast used for mob scenes) (offered the supernumerary position of inspector general—Roucek) Extra is often used in place of supernumerary (buy a few extra Christmas presents in case someone has been forgotten) (was looking at Kitty as if she had suddenly sprouted an extra head—Rolf) but it may also apply to an addition not in number but in amount (he was subjected to extra work as acting chairman of the House Committee—C. H. Lincoln) or in price (there is an extra charge for coffee) Spare is often used in place of surplus but it carries a stronger suggestion of being held for future use, often a special use (a spare suit of clothes) (the spare room is the guest room) (a pouch for carrying tobacco, tinder, and spare arrow-poison—Huntingford) (carry a spare tire for an automobile) or of not having any demands on it for a particular use (he never has any spare cash) (bring along a little spare time, too, and some extra patience, to work these fast . . . streams of New England—Corey Ford) or of being easily spared (have you a spare cigarette on you?)

Supernatural, supranatural, preternatural, miraculous, superhuman are overlapping rather than strictly synony-

mous terms whose meanings all involve a contrast with what is natural or, sometimes, normal or predictable.

All, with the possible exception of the uncommon supranatural, are used hyperbolically to mean exceeding usual or likely human standards and then are generally equivalent to such terms as extraordinary, exceptional, or wonderful; thus, in an emergency a man may exhibit supernatural strength; one may show preternatural awareness of small sounds when alone at night; a scholar may decipher a manuscript with miraculous accuracy; a player may win against odds by a superhuman effort. Supernatural stresses deviation from the natural that is felt as above or beyond what is observable and capable of being experienced by ordinary means; in much of its use it suggests spirituality and implies a relation to God or to divine powers (a supernatural religion) (the gods in Homer do exert supernatural effects; for when Zeus nods, all Olympus shakes—Noss) (medieval theologians who did so much to establish and define the terminology of Christianity spoke of man's supernatural life, the life of the soul above the natural life of the body—M. W. Baldwin) (the belief in a supernatural power, in God, was natural to him who felt that he could plow and plant, but that only God made his work produce grain and fruit—

senses and in the range of their applicability. Support suggests the presence of a foundation or base and is applicable in diverse uses with the general meaning or suggestion of carrying from or as if from below, of maintaining or holding up the weight or pressure of, and of forestalling sinking or falling back, or sometimes, merely, of enduring the difficulties or rigors of without yielding and without undue distress (pillars supporting the balcony) (he supports the greater muscular tension involved with less evident fatigue—Brownell) (support the Constitution) (found the Roman winter ... too poignant for his anatomy to support without pain—Wylie) Sustain may center attention on the fact of constantly holding up or of maintaining undiminished (sustain the weight of office) (found it difficult to sustain an interest in their talk—Douglas) or it may more specifically imply an upholding by aiding or backing up (for nine years, Napoleon has been sustained by the people of France with a unanimity such as the United States never knew—Aguecheek) or by supplying the physical or mental nutriments needed for strength (this intellectual interest is great enough to sustain the reader through the analytical labyrinths we must search together—Hunter Mead) Prop may imply a weakness, a tendency to fall, sink, or recede, or a need for strengthening or reinforcing on the part of the thing being treated (propping up the table with a packing case) (trying to prop up the decaying structures of last-century imperialism—G. L. Kirk) (the plot, a slim tale of vengeance, is psychologically shallow and propped up by unpardonable coincidences—Anthony Boucher) Bolster blends the suggestions of sustain and prop: it may suggest a supporting comparable to that afforded an invalid by pillows (bolster up the falling fortunes of the East India Company—Parrington) (bolster the diminishing lumber trade within the next 75 years—Amer. Guide Series: N. J.) (assign some extra instruments to bolster the choir’s volume of sound—P. H. Lang) Buttress tends to suggest strengthening, reinforcing, or stabilizing, sometimes massive, at a stress point in the manner of an architectural buttress (combat business slumps and to buttress the economy so that danger of another depression will be reduced to a minimum—Newsweek) (a code of laws buttressed by divine sanctions which should be unshakable—Farrington) (the popular success formula is buttressed by evidence from the careers of an impressive minority—R. B. Morris) Brace may suggest supporting or strengthening so that the thing treated is made firm, unyielding, or rigid against pressure (brace the shelf with an angle iron) (then he braced himself against a giant oak on his front lawn and experienced a savage kind of exaltation as the elements raged around him—Cerf) (the shoring up of a tottering political system, which is precisely the problem that we face in trying to brace the western democracies—G. W. Johnson) Ana *carry, bear, convey; endure, *bear, suffer, stand: evidence, evince, *show; *indicate, attest, argue, betoken; uphold, advocate, back, champion (see SUPPORT 2) 2 Support, uphold, advocate, back, champion are comparable when they mean to favor actively and in some concrete manner a person or thing that meets opposition. Support is general and comparatively colorless. One supports a candidate for election whether one merely votes for him or takes a leading part in his campaign; one supports a cause whether one merely announces one’s stand in favor of it or contributes money and time to furthering its interests (any politician who supported her husband was regarded with favor by Mrs. Lincoln—R. P. Randall) (it is not enough to support the capitalist system; to escape abuse as an iconoclast, you must publicly venerate it as well—Bliven b. 1889) Uphold carries an implication of keeping erect or from falling or breaking down; it is appropriately used in reference to something that already exists but is attacked or challenged (those who uphold the ideal of pure poetry—Day Lewis) (tried to uphold the morale of the occupied capital—Paxson) (he is the Philistine who upholds and aids the heavy, cumbrous, blind, mechanical forces of society—Wilde) Advocate implies vocal support either in speeches or in writings; often it connotes urging or pleading (I believe that our political leaders should live by faith ... but I doubt that they should advocate faith, if only because such advocacy renders a few people uncomfortable—E. B. White) (the few local believers in world government brought to town a play that advocated it—Davis) Back often implies strong support from the rear to be used whenever assistance is needed to prevent the failure of a person or of his ventures or efforts. Sometimes it connotes reserve forces or the use of force; sometimes it implies money reserves or the promise of financial assistance (his father said he would back him in business) (states, large and small, with ... their very practical traders pushing for foreign markets, and their navies and armies to back the traders and annex these markets—Shaw) (there would be more talk, but talk backed by armed force—Cloete) Often back derives its implications from its use in betting and suggests a willingness to hazard something and especially money on a person’s or thing’s chance for success (I back you to hold your own against them all—Wharton) (the wife of a Dublin civil servant prohibited her husband from backing horses, but he continued to gamble secretly—The Irish Digest) Champion implies public defense of a person or thing believed to be unjustly attacked or too weak to advocate its own cause and may therefore connote distinction or gallantry in the one who champions (who ... championed every cause I called my heart’s cause, loving as I loved, hating my hates, spurned falsehood, championed truth—Browning) Ana *approve, endorse, sanction: espouse, embrace, *adopt: *defend, protect, shield support n maintenance, sustenance, *living, livelihood, subsistence, keep, bread Ant adversary, antagonist supposed, suppositional, supposititious, reputed, putative, purported, conjectural, hypothetical can mean accepted or advanced as true, real, or in accordance with the facts on the basis of less than conclusive evidence. All imply a measure of doubt of what is asserted and may serve as a disclaimer of responsibility for the assertion. Supposed is likely to imply rather general or common acceptance of what is asserted, though suggesting the presence of uncertainty or conflicting evidence or the likelihood of error (the identity thus asserted with its supposed though sometimes debated poetic essence—Kolodin) (there has not been a reputable student of grammar for a long time who believed the grammar books which are in common use. But we, the people, are loyal to our supposed grammar—Laird) (have we not in the present censorship an ineffective check on certain supposed evils which perhaps are not very real evils?—Walkley) Suppositional occasionally comes close to supposed (we have no reason to conclude that my idea of the absent thing has only such meaning as can be expressed in anticipatory terms —whether the anticipation be mine or that of a suppositional observer—Victor Lowe) but usually it carries distinct and positive suggestions of fraudulentness or spuriousness (ready to lend his last cent to a man in distress or suppositional distress—Herzberg) (dispatched a lawyer ... to enlarge upon the theme of his father’s supposi-
Suppositious

Suppositious is used chiefly to imply that a belief or assertion is based on theory or on a postulate or hypothesis, and lacks factual support. This was no suppositious contract between ruler and ruled in prehistoric times—Parrington. It [magic] comes down to a suppositious, misguided philosophy, a pseudo science—Howells. Reputed, putative, and purported imply a basis in tradition or in popular belief. Reputed in itself is usually a thoroughly neutral word. Ferdinand Latizai, reputed to have been a Mexican—Amer. Guide Series: La. Ross's goose, which was reputed to be near extinction—Times Lit. Sup. can be strongly colored by context. Naturally, no lady would willingly admit that she had been ignored; so that the reputed prowess of Danny may be somewhat overstated—Steinbeck. Putative describes something that is commonly or generally accepted to be true. Now that the man, too, was saved from a frightened away is a fact which diminished the putative efficiency of the new regime—Mumford. Supposed to the U. S. Fascists met... its slapstick Waterpolo, when a small detachment of Philadelphia cops stormed headquarters and captured the entire putative army, all of them generals—C. W. Ferguson. In its common legal use it applies to a thing or person that may be subject to proof that it is not what it is generally accepted to be; thus, a putative marriage is one duly formalized but to a greater or less degree invalid because of some impediment (as consanguinity). Proceedings to establish paternity and provide for the support of a child born out of wedlock may be instituted... within one year after the putative father has ceased making contributions for the support of such child—U. S. Code. Supposed head of the family is an ancient and garrulous hush; his helpmate is a domineering crone—McCarten. But especially in its common journalistic use the word tends to stress the writer's disclaimer of responsibility for the matter asserted (compare alleged under ADDUCE) and may approach rumored in meaning. The weekly reproduced a purported letter from De Gasperi, apparently addressed to a British officer in 1944—Time. A list containing the names of 380 purported Communists in the United States—Current Biol. Conjectural implies inference from incomplete or defective evidence, and what is so described is offered as a possibility or likelihood but not as a fact. A conjectural etymology of a word (conjectural emendations in a faulty text). Conjectural or conjectural (something) hypothetical describes someone or something (as a principle, a situation, or a question) that is invented or put forward as possibly true or as likely to be true in the main if not in detail, or as the tentative basis for continuing an argument or investigation (a hypothetical explanation of nebluae). This land claimed by the Spaniards—a hypothetical claim, all the interiors being still in the hands of the Indians—Amer. Guide Series: Texas. My French visitor—who was a real, flesh-and-blood visitor, and not, like most of his kind, a hypothetical foreigner invented to point a moral—Grandgent. This study is hypothetical—that is, tentative propositions derived from the existing body of social theory and empirical knowledge, but not yet refined into tested theoretical generalizations—A. K. Davis.

Supposititious, suppositious

Supposititious, suppositious is supposed, reputed, putative, purported, conjectural, hypothetical.

Suppress

2 Suppress, repress both mean to hold back by the use of more or less force someone or something that seeks an outlet (as by expression or activity). Suppress carries a strong implication of putting down or keeping back completely. It usually implies the exercise of great or oppressive power or even of violence. It often is a synonym of such words as overpower, crush, abolish, destroy, eliminate, or stifle, but in each case it tends strongly to suggest the prompt use of effective methods (suppress an insurrection). Ungovernable passions are suppressed by the very same means which keep the rest of us in order—Conrad. The bishop was purple with suppressed wrath—Sherman. A regime of terror designed to brutally suppress... freedom, culture and national life—Shirer.

Repress, on the other hand, implies little more than a checking or restraining sometimes by an external force, sometimes by the power of the will or mind. It often suggests that the thing so held back may break out again or in a different way and so comes close to inhibit, bridge, or curb (repressed his curiosity) (repressed her desire to weep). His breathing was a little quickened; but he repressed all other signs of agitation—Dickens. Money and religion: yes, those are the two repressed subjects in the modern novel upon which furtively we open the door—Pritchett. It is necessary to repress a natural scorn of the master of the glad hand and the soft soap—H. A. Burton. As she passed the elm tree... a thrill of recollected fear would run through her; but she repressed the temptation to talk about it—Mary Fitt.

In psychology suppress is commonly used with reference to desires, instincts, and emotions which are consciously and forcibly inhibited by the mind from seeking expression or overt activity; repress usually suggests an unconscious or subconscious process by which a desire or an impulse that is regarded as unacceptable because of one's religious, moral, or social training is inhibited by a refusal to recognize it or to permit consideration of it and so is left to operate in the unconscious.

Supranatural

Supranatural, miraculous, preternatural, superhuman.

Supremacy

Supremacy, ascendancy denote the position of being first (as in rank, power, or influence). Supremacy implies superiority over all others (as in utility, in quality, in efficiency, in desirability, or in prestige) (in the Sahara, the automobile has begun to challenge the supremacy of the camel). Supremacy is commonly used with reference to power or authority of the home... was so deep and so great that not even the Crown could enter the home—Wayne Morse. Last summer American atomic supremacy gave place to something like atomic equality between 'the two great colossi'—New Statesman. Ascendancy may or may not imply supremacy, but it always involves the idea of domination or of autocratic power (an idea has ascendancy over his imagination when it has the latter completely under its sway) (the whole system of oppression and cruelty by which dominant castes seek to retain their ascendancy—Russell). A speaker can get an ascendancy over the House, if he has a strong personality and the...
ability to regain the thread of his speech—Woodrow Wyatt) (the rays of the gas lamps, feeble at first in their struggle with the dying day, had now at length gained ascendency—Poe)

**Ana** preeminence, transcendence, superlativeness, peerlessness, incomparability (see corresponding adjectives at **supreme**): *power, authority, dominion, control, sway

**supreme adj** Supreme, superlative, transcendent, surpassing, preeminent, peerless, incomparable can all mean highest in a scale of values. All of these words may be interchangeable when used rhetorically or bombastically with the resulting loss in definiteness, but all are capable of discriminative use in which they carry distinctive implications and connotations. **Supreme** is applicable to what is not only the highest in rank, power, or quality but has no equals in that status, all others of the same class or kind being inferior in varying degrees (the Supreme Court of the United States) (Shakespeare is generally regarded as the **dramatic poet** I (did not detect in his playing the fire and dash that I look for in the work of a **genius of Goethe** (Sargent) (he smiled upon with an air of supreme contempt—"It's the first time I've ever done what I wanted to do"—Bromfield)

**Superlative** is applicable to whatever, by comparison with all other things of the same kind or with all other manifestations of the same quality, admits of no superior especially in commendatory qualities, for superlative may admit equals but it excludes superiors (the **superlative genius of Goethe** (his superlative rudeness) (what makes him a great artist is a high fervor of spirit, which produces a superlative, instead of a comparative, clarity of vision—Galsworthy) (there is a smaller proportion than usual of superior books and a minuscule number of superlative ones—Kinkead) (enhanced with a superlative commentary . . . it is commendable in all respects—McCarten)

**Transcendent** and surpassing are applicable to whatever goes beyond everything else of its kind or in its quality; both can connote an exceeding even of the superlative, but transcendent suggests realization of the ideal, and surpassing suggests almost inconceivable attainment (the transcendent acting of Duse) (Cleopatra's reputation for transcendent beauty) (his surpassing skill in surgery) (the geometric pattern is of a surpassing intricacy—Rovere) (his) native gifts are perhaps not of a transcendent kind; they have their roots in a quality of mind that ought to be as frequent as it is modest—Trilling

**Preeminent** is applicable to what goes beyond all others in achieving distinction or eminence; it implies both superlativeness and uniqueness within the limits indicated, but it seldom carries a suggestion of direct supremacy or transcendency (the preeminent general in that war) (the preeminent film of the year) (the preeminent example of magnanimity) (although his case is preeminent in the number of others—J. D. Adams) (Peerless and incomparable both imply the absence of equals but, commonly, peerless connotes the absence of superiors and incomparable connotes the impossibility of being equaled; while both normally refer to commendatory qualities, incomparable is also freely referable to qualities that merit condemnation (a peerless performance of Hamlet) (Philip Sidney, called the peerless one of his age—Quiller-Couch) (the incomparable refinement with which he has drawn this interior with its two youthful figures—Binyon) (nothing—simply nothing at all—transcends a cat's incomparable insincerity—Theodore Sturgeon) (peerless among women; perfect in beauty, perfect in courtliness—H. O. Taylor)

**Ana** relying, trusting, depending, counting, banking (see RELY): inerrant, unerring, *infallible: *safe, secure

2 Sure, certain, positive, **cousure** mean having or showing no doubt. Sure and certain are often interchangeable. But sure frequently emphasizes the mere subjective state of assurance; certain often suggests more strongly a conviction that is based on definite grounds or on indubitable evidence ("I know my hour is come." "Not so, my lord." "Nay, I am sure it is."—Shak.) (be out of hope, of question, of doubt; be certain—Shak.) (in the library he too seemed surer of himself—though once they were on their way home he became almost remote, strangely watchful—Malamud) (they were sure and certain, forever wrong, but always confident. They had no hesitation, they confessed no ignorance or error—Wolfe) Positive often suggests overconfidence or dogmatism, but it implies conviction or full confidence in the rightness or correctness of one's statement or conclusion (an assertive positive man . . . had his own notion of what a young man should be—Anderson) (so much more positive than most of his customers, and he impressed his own convictions on them so determinedly, that he had his own way—Scudder) (an easy and elegant skepticism was the attitude expected of an educated adult: anything might be discussed, but it was a trifle vulgar to reach very positive conclusions—Russell)

**Cousure** tends to carry a strong implication of presumption or overconfidence in positiveness (certitude is not the test of certainty. We have been cousure of many things that were not so—Justice Holmes) (people . . . regarded as brash to the point of arrogance, cousure to the verge of folly—MacLeish)

**surprise** vb 1 *Surprise, waylay, ambush* are comparable when they mean to attack unawares. *Surprise* is in military as well as in general use. As a technical term it implies strategy in the disposition and movement of troops and equipment and secrecy in the operations; it need not suggest that the attack has been successful (an army suddenly attacked within the lines which it had reckoned upon to ward off its enemy is in a military sense *surprised—Maurice*) <R.A.F. bombers surprised a large invasion training exercise and inflicted heavy losses—Shirer> In more general use one may *surprise* a person or something he is concealing by coming on him when he is off guard (the servants must vanish silently if *surprised* at their tasks—Sackville-West) <high instincts before which our mortal nature did tremble like a guilty thing *surprised—Wordsworth*> *Waylay* commonly suggests a lying in wait on a road or highway. Sometimes it implies concealment by the roadside and an often evil intent to distress or interfere with (as by robbery or assault) (he was waylaid on his way home from the bank) <I am waylaid by Beauty—Oh, savage Beauty, suffer me to pass—Millay> Sometimes it carries no suggestion of hostility or evil intent but implies intercepting a person in his progress and detaining him (unable any longer to bear not seeing her, he waylaid her in the street. She would not speak to him, but he insisted on speaking to her—Maugham) <riding in the park...> Carola beheld her intended galloping furiously down the Row, and left her sister Clementina's side to waylay him—Meredith> *Ambush* tends to evoke the image of would-be attackers concealed in a thicket; it is often used in reference to guerrilla warfare (his body was brought after he had been *ambushed* by Indians on nearby Wolf Run—Amer. Guide Series: Pa.) but it can be extended to other situations in which one is caught as if by an ambush (see *ambush n*) (the same kind of feeling *ambushed* me a few weeks ago—Jan Struther) <the woman clasped her hands together; the butterfly sleeves fluttered as though *ambushed—Harriet La Barre>*

**Ana** *catch, capture: *take, seize, grasp, grab

2 *Surprise, astonish, astound, amaze, flabbergast* can mean to impress one forcibly because unexpected or startling or unusual. *Surprise* can mean to come upon another suddenly and with startling effect, or, more broadly, it can apply to an unexpected or unanticipated development that tends to arouse some degree of surprise, amazement, or astonishment. *Astonish* implies a state of war and present domination by a victor (as a technical term it implies surrender, but it suggests a conditional one on the power or authority of another and often suggests loss of independence; it is used especially of those who rebel or of those whose weak condition leaves them at the mercy of a stronger power or subject to its threats. Unlike *surrender*, *submission* often implies surrender (as of an army, its supplies, and its fortifications), but it stresses the acknowledgment of the power or authority of another and often suggests loss of independence; it is used especially of those who rebel or of those whose weak condition leaves them at the mercy of a stronger power or subject to its threats. Unlike *surrender*, *submission* often implies not a previous state of war but a threat of disasterous warfare <departure of the forces concerned (in Greece to offer earth and water was the sign of capitulation—Newman) after Lee's surrender at Appomattox Buckner... negotiated terms of capitulation... for the trans-Mississippi armies—Coulter>*

**surreptitious** underhand, underhanded, *secret, covert, stealthy, furtive, clandestine

**Ana** sneaking, slinking, skulking, lurking (see lurk); hidden, concealed, screened (see hide)

**surrogate** substitute, shift, makeshift, expedient, *resource, respite, stopgap

**surround, environ, encircle, circle, encompass, compass, hem, gird, girdle, ring** can mean to close in or as if in a ring about something. *Surround* is a general term without specific connotations; it implies enclosure as if by a circle or a ring <the town was once surrounded by a wall> <a crowd surrounded the victim of the accident> <the ships

A colon (:) separates groups of words discriminated. An asterisk (*) indicates place of treatment of each group.
are surrounded by a veil of smoke} <whole divisions were frequently overrun or surrounded and cut to pieces when a timely withdrawal would have saved them—Shirer>

Often the term denotes not a literal enclosure but something which forms the circumstances, the environment, or the border of something <surrounded by luxury> <a pleasant white-haired widow surrounded by many potted plants—Cheever> <those mental and moral barriers with which the average Englishman surrounds himself—Bagot>

Environs also implies enclosure as if by a circle or a ring, but it often differs somewhat from surround in carrying a clearer implication of the permanent or continuing existence of what surrounds; thus, "a nation environed by foes" does not clearly imply as immediate danger as "an army surrounded by foes" does, but the former does suggest a persistent or ever-present danger in a way that the latter cannot.

The difference is often slight but usually perceptible <the passions and motives of the savage world which underlies as well as environs civilization—Howells> <persuading the doubter that our human spirits are environed by other and vaster spiritual powers—Whiteley> <there are old buildings still ... but they are usually overshadowed by an environing swarm of new stucco—H. L. Davis>

Encircle is not quite the equal of surround though very like it in meaning and often interchangeable with it; it more definitely suggests an enclosing circle and therefore often is suited to a more concrete use; in this sense it is often equal to circle <I found myself encircled in the arms of my ... Father—Richardson> <a wreath encircles the brow of Apollo> <the close which encircles the venerable cathedral—Macaulay> <its frame residences—many of them aged—circle a small business district—Amer. Guide Series: Texas>

Also, encircle and circle may denote to proceed in a circle about something, a meaning unknown to surround <circled the house in his search> <as a hungry wolf might have encircled ... the firelit camp encircled its frame residences—Macaulay>

Encompass suggests something that closes in or shuts off a place or person; it often also suggests a motive (as protection or defense) <as a hungry wolf might have encircled ... the firelit camp encircled its frame residences—Macaulay>

The close which encircles the venerable cathedral—Macaulay> <its frame residences—many of them aged—circle a small business district—Amer. Guide Series: Texas> Also, encircle and circle may denote to proceed in a circle about something, a meaning unknown to surround <circled the house in his search> <as a hungry wolf might have encircled ... the firelit camp encircled its frame residences—Macaulay>'

**suspended**, **pendent**, **pendulous** can mean hanging from or remaining in place as if hanging from a support. Suspended may imply attachment from a point or points above so that a thing swings freely or is held steady in its proper place or position. <suspended from his neck was a medalion—R. H. Brown> <chimes are a set of metal tubes suspended from a frame and struck by wooden mallets—McConathy et al.> <suspended ceiling> or it may suggest a being poised or a being upheld (as by buoyancy) <they neither float nor fly, they are suspended—Jeffries> <water free from suspended silt> Pendent usually describes something which hangs downward from a support or from one point of attachment; it seldom carries any further implication and so is applicable both to what is motionless and to what swings or moves or is in danger of falling (a trailing creeper with curving leaf and twining
tendril, and pendent bud and blossom—Hudson> (the smokehouse, its sooty rafters jeweled with fat hams like eardrops and pendent strips of cured meddling meat—Cobb) Pendulous adds to pendent the specific implication of swaying or swinging, sometimes carrying a suggestion of actual floating in space > (a pendulous nest) > (breasts ... grown flabby and pendulous with many children—Buck) > (the steep cliffs ... hung with pendulous vines, swinging blossoms in the air—Melville) > (so blend the turrets and shadows there that all seems pendulous in air—Poe)

sweet, engaging, winning, winsome, dulcet are comparable when they are applied to persons or things with respect to the sensations they evoke or the impressions they produce and mean distinctly pleasing or charming because devoid of all that irritates, annoys, or embitters. Sweet when extended beyond its primary application to one of the basic taste sensations, whether to things that produce other sensory impressions or to persons or things that induce emotional or intellectual response, is ordinarily a term of mild general approbation for what pleases, attracts, or charms without stirring deeply or arousing a profound response <what a sweet little cottage> <twilight, sweet with the smell of lilac and freshly turned earth—Corey Ford> <flower motifs and emblems, all printed in sweet colors—Rosen> has been very sweet. He wants to help, but of course there's nothing he can do—Auchincloss> but in this as in its primary application sweet may also imply an excess of what in more moderate quantity is pleasing and then comes close to surfeiting or cloying (compare satiate) > (the flaw in her book is the sweet side, the Pollyanna note, that fatal emphasis on the happy ending—Rosemary Benét> Engaging and winning come very close to one another, both implying a power to attract favorable attention and strongly suggesting a power to please or delight; engaging, however, more often stresses the power of a thing to attract such attention, whereas winning usually emphasizes the power of a person to please or delight <an engaging story> <an engaging manner> <she has winning ways> <a winning smile> <affectionate, cheerful, happy, his sweet and engaging personality drew all men's love—H. O. Taylor> <simple as a child, with his gentle, winning voice and grave smile—Brooks> Winsome is chiefly applied to persons or to their attractions; the term is somewhat more inclusive in meaning than the others, for it usually implies an engaging quality, a cheerful disposition, pleasing though not striking looks, and often a childlike quality <tears came to his eyes as he remembered her childlike look, and winsome fanciful ways—Wilde> Dulcet suggests an appealing and gratifying or soothing quality whether to the senses (as of some, especially musical, sounds) or to the feelings or emotions <the voice was ... dulcet as the hum of heavy honeybees amid orange blossoms—Wouk> <could not ... expect such dulcet weather to last—Sackville-West> <the classic, dulcet, but difficult art of architecture—R. swerve, veer, deviate, depart, digress, diverge mean to turn aside from a straight line or a defined course. Swerve may refer to a turning aside, usually somewhat abruptly, by a person or material thing <at that point the road swerves to the left> <the great roots of a tree swerves to the left) <[the ship] plunged and tacked and veered—Coleridge> <the wind veered round, and the Aurora was now able to lay up clear of the island of Maritimo—Marryat> In extended use the term commonly implies a change or series of changes of direction or course under an external influence comparable to the wind <his thought, veering and tacking as the winds blew—Parrington> or a turning aside for a tactical reason (as to avoid an undue influence) <the plan has worked. ...
the state... has not only veered away from bankruptcy; it has also improved its services—Armbrister. Deviate implies a turning aside from a customary, chosen, allotted, or prescribed course (finding it no easy matter to make my way without constantly deviating to this side or that from the course I wished to keep—Hudson). It is commonly used in reference to persons, or their minds, their morals, and their actions, with the suggestion of a swerving from a norm or standard or from a right or lawful procedure or course (when the aesthetic sense deviates from its proper ends to burden itself with moral intentions... it ceases to realize morality—Ellis) (had told him the story many times and... never deviated in the telling—Costain) (from a fundamental sincerity he could not deviate—T. S. Eliot). The next three words of this group usually imply a turning aside from a literal or figurative way (as a path, course, track, or standard) which still continues. Depart stresses the turning away from and leaving an old path, a customary course, or an accepted type or standard; it may further imply a forsaking of the antiquated, conventional, or traditional (books) which depart widely from the usual type—Grandgent; or a deviation from what is right, true, or normal (forced by circumstance to depart from the principles of his own logic—W. P. Webb). Digress commonly implies a departure from the subject of one's discourse that may be voluntary and made with the intent to return (let me digress for a few minutes to indicate the possible results of this condition) or involuntary and the result of an inability to think coherently or to stick to the point to be developed (I shall not pursue these points further for fear of digressing too far from my main theme—Spilsbury). Diverge is sometimes used in the sense of depart (let them [professors] diverge in the slightest from what is the current official doctrine, and they are turned out of their chairs—Mencken) but more typically it suggests a separation of a main, old, or original course or path into two or more courses or paths that lead away from each other (they proceeded along the road together till... their paths diverged—Hardy) (two roads diverging like the branches of a Y—Bellloc). Brit.) in one plane—American attitudes oscillate between the poles of escape and revolt—Levin). (American attitudes oscillate between such poles as withdrawal and intervention, optimism and pessimism, idealism and cynicism—Bundy). Vibrate is sometimes used in the sense of oscillate (the double complex pendulum, when it vibrates in one plane—Encyc. Brit.) but it more typically implies rapid periodic oscillations usually over an arc of small amplitude and may suggest the rapid pulsations of the string of a musical instrument (as the piano or violin) when touched by a hammer or bow or
the rapid beating of some wings (as of a hawkmoth or hummingbird) you know that if you strike a note of music, all the octave notes will vibrate—Manning* (ultrasonic . . . waves vibrate so fast they can’t be heard by the human ear—Boyd Wright) In a more extended sense vibrate may imply a trembling, a quavering, or a throbbing suggestive of the movements of musical strings when an instrument is being played (on summer evenings when the air vibrated with the song of insects—Anderson) nerve and bone of that poor man’s body vibrated to those words—Stowe* Fluctuate occasionally implies a tossing up and down restlessly like the waves of the sea or like something floating on such waves, but is chiefly used in an extended sense implying constant irregular alternations suggestive of the movement of waves (stock prices that fluctuate from day to day) (the old unquiet breast, which neither deadens into rest, nor ever feels the fiery glow that whirs the spirit from itself away, but fluctuates to and fro—Arnold) the respiration, pulse, and blood pressure of the test subject to fluctuate widely from the normal—Armstrong* (there are about seven hundred and fifty of them . . . but the number fluctuates rapidly with the demands of the situation—Hahn* Pendulate, a somewhat uncommon word, is a near synonym of oscillate in implying a swinging between two extremes, but it often comes close to fluctuate in its strong suggestion of constant change (the ill-starred scoundrel pendulates between Heaven and Earth—Carlyle) he pendulated between extremes, between adding to his poetic masterpieces and to his notorious "Don Juan list"—Cournos* saw the Colonel pendulating between Perkins' room and Pinchot's room. He would toddle out of one room . . . and enter another—White* Waver (see also HESITATE) carries a stronger implication of unsteadiness or of uncertainty in swinging than does sway or oscillate (banners and pennons wavering with the wind—Barners) his assuredness, his plump hands wavering uncertainly away from his body—Mailer* a great misery spoke from the hold. It waved eerily about the fringes of her consciousness—Hervey* Undulate is more often used than fluctuate when a wavelike motion is implied; especially in its extended use it seldom suggests violent changes, but rather the continuous rolling or rippling that is associated with the steady flow of waves (the ripe corn under the undulating air undulates like an ocean—Shelley) the . . . flame . . . made the jades undulate like green pools—Lowell* the great serpent drew back like a flash, and turning, undulated slowly away—Beebe* Ana* turn, spin, whirl, wheel, revolve, rotate, gyrate:*shake, shakeable, quiver, quaver, quake 3 wield, manipulate, *handle, ply Ana control, manage, direct, *conduct swipe vb* steal, pilfer, filch, purloin, lift, pinch, snatch, cop swirL vb circle, spin, twirl, whirl, wheel, eddy, *turn, revolve, rotate, gyrate, pirouette sybaritic* sensuous, sensual, luxurious, voluptuous, epicurean sycophant* parasite, favorite, toady, licksptille, bootlicker, hanger-on, leech, sponge, sponger Ana blandisher, cajoler, wheedler (see corresponding verbs at COAX): fawner, truckler (see corresponding verbs at FAWN) syllabus* compendium, digest, pandect, survey, sketch, précis, aperçu Ana conspectus, synopsis, epitome,* abridgment, brief, abstract symbol 1 Symbol, emblem, attribute, type can all denote a perceptible thing that stands for or suggests something invisible or intangible. Symbol and emblem are often used interchangeably but they can be so used as to convey clearly distinguishable notions. Symbol is applicable to whatever serves as an outward sign of something spiritual or immaterial; thus, the cross is to Christians the symbol of salvation because of its connection with the Crucifixion; the circle, in medieval thought, was the symbol of eternity because it, like eternity, has neither beginning nor end. This close and natural connection between the symbol and what it makes visible or partly intelligible is not always so strongly implied; it may be a traditional, conventional, or even an arbitrary association of one thing with another that is suggested (a king's crown is the symbol of his sovereignty and his scepter the symbol of his authority) (upstairs suites and private dining rooms whose symbol became a hot bird and a cold bottle served by a gray-waiter in sideburns—Lucius Beebe) a flock of sheep is not the symbol of a free people—New Republic* Emblem, as distinguished from symbol, implies representation of an abstraction or use in representation; it is applicable chiefly to a pictorial device or a representation of an object or a combination of objects (as on a shield, a banner, or a flag) intended to serve as an arbitrary or chosen symbol of the character or history of one (as a family, a nation, a royal line, or an office) that has adopted it; thus, the spread eagle, the usual emblem of the United States, is found in its coat of arms and on some of its coins and postage stamps; the emblem of Turkey, a crescent and a star, appears on its flag (the emblem of the school is a dolphin, token of the marine source of the founder's wealth—Thoroogood) remembering this flower . . . as the feminine emblem of the big college football games—Edmund Wilson* Emblem is also applied to what is technically known in painting and sculpture as an attribute, some object that is conventionally associated with the representation either of a character (as a Greek divinity or a Christian saint) or of a personified abstraction, and is the means by which the character or abstraction is identified; thus, in fine art the balance is the emblem, or attribute, of Justice; the turning wheel, of Fortune; the club, of Hercules; and the spiked wheel, of St. Catherine of Alexandria (Saint Helena is always painted with a cross beside her, or holding one, as a reminder that it was she who found the original cross. In this instance the cross is an attribute, not a symbol—G. W. Benson) Type, especially in theological use, is applied to a person or thing that prefigures or foreshadows someone or something to come and that stands therefore as his or its symbol until the reality appears. In theology, biblical interpretation, and religious poetry, it usually also implies a divine dispensation whereby the spiritual or immaterial reality is prefigured by a living person, event, experience, or the like; thus, in medieval religious poetry Jerusalem is the type of heaven (the heavenly Jerusalem); in allegorical interpretation of Scriptures, the paschal lamb is the type of Christ, the victim on the Cross (spiritual wisdom . . . is unchanging and eternal; it is communicated to us in types and shadows dim—in symbols—till we grow up into the power of understanding it—Inge) concludes that the whole of the Old Testament is one great prophecy, one great type of what was to come—Maas* Ana* sign, mark, token, badge: device, motif, design, *figure, pattern 2 *character, sign, mark Ana* device, contrivance: diagram, delineation, outline, sketch (see under SKETCH vb) symbolism* allegory symmetry, proportion, balance, harmony are comparable chiefly as used in the arts of design and decoration to
mean a quality which gives aesthetic pleasure and which depends upon the proper relating of details and parts to each other (as in magnitude, or arrangement) and to the consequent effect produced by the whole. Symmetry implies a median line or an axis on either side of which the details correspond (as in size, form, and placing). Often it implies such mathematical precision especially in arrangement of elements or parts as is observable in the corresponding halves of a perfect crystal, in a geometrically regular star, or in the conventionalized leaf or flower of decorative design (symmetry is the keynote of most formal gardens) (the symmetry of a Greek temple) (abandoned the decent gown for a short coat and jacket and displayed the symmetry of their legs—Trevelyan) but, in its stress of mechanical precision, symmetry may sometimes suggest an arid sterile quality, lacking in true artistic expression (symmetry is a condition of perfect but inert balance; it will be entirely useless in a composition—Taubes) Proportion implies a grace or beauty, independent of a thing's actual magnitude, duration, or intensity, that stems from the measured fitness of every one of its details and the consequent perfection of the whole (we care for size, but inartistically; we care nothing for proportion, which is what makes size count—Brownell) (an impressive structure of Greek design, notable for its beauty of proportion and simplicity of detail—Amer. Guide Series: Minn.) Balance is sometimes employed as an equivalent of symmetry, but it can be used distinctively to imply equality of values rather than repetition of details or parts and a massing of different things (as light and shade, sharply contrasted colors, or figures and background) so that each one tends to offset the other or to reduce the other's emphasis without loss of significance on either side. Balance implies as its aesthetic object an inducing of a pleasant satisfaction in the thing's quiet beauty or of a delight in the unified yet varied effect of the whole (it is a similar principle of unsymmetrical balance which the Taoist artists sought in design. Space therefore, empty space, becomes a positive factor, no longer something not filled and left over, but something exerting an attractive power to the eye, and balancing the attractive power of forms and masses—Binyon) (every good statue is marked by a certain air of repose; every fine picture exists in a state of stable equilibrium brought about by the balance of its masses—Krutch) (balance is a subtler quality than symmetry. Symmetry means repetition . . . Balance, which is a free, almost irregular extension of the concept of symmetry, implies, unlike symmetry, the element of risk—Charles Johnson) Harmony, when used specifically in reference to the arts of design and decoration, retains as its leading implication the same idea as is involved in its general sense (symmetry) (harmony) that of beauty resulting from a perfect interrelation of details and their fusion into an agreeable whole. However it often denotes specifically the aesthetic impression produced by something which manifests symmetry, proportion, or balance, or these qualities in combination (a coloring harmony obtained by the aid of a long experience in the effects of light on translucent surfaces—Henry Adams) (we hear harmonious tones; but . . . the pleasure they give us . . . [is] the pleasure of their relational form which makes us attribute to them and their physical combination a quality which we call harmony—Alexander) (choosing with care and with a good eye for harmony the shoes, socks, and necktie he would wear—Wolfe)

2 Sympathy, pity, compassion, commiseration, condolence, ruth, empathy are comparable though often not interchangeable when they mean a feeling for the suffering or distress of another. Sympathy is the most general term, ranging in meaning from friendly interest or agreement in taste or opinion to emotional identification, often accompanied by deep tenderness (sympathy with my desire to increase my . . . knowledge—Fairchild) (sympathies were . . . with the Roman Stoics—Ellis) (satire had its roots not in hatred but in sympathy—Perry) Pity has the strongest emotional connotation; the emotion may be one of tenderness, love, or respect induced by the magnitude of another's suffering or of fellowship with the sufferer (pity is the feeling which arrests the mind in the presence of whatsoever is grave and constant in human sufferings and unites it with the human sufferer—Joyce) (pity that made you cry . . . not for this person or that person who is suffering, but . . . for the very nature of things. . . . out of pity comes the balm which heals—Saroyan) Pity sometimes may suggest a tinge of contempt for one who is inferior whether because of suffering or from inherent weakness; there is also a frequent suggestion that the effect if not the purpose of pity is to keep the object in a weak or inferior state (pity for the man who could think of nothing better—T. S. Eliot) (the parents of a crippled child should give him understanding and challenge rather than pity) Compassion, which originally meant fellowship in suffering between equals, has come to denote imaginative or emotional sharing of the distress or misfortune of another or others who are considered or treated as equals; it implies tenderness and understanding as well as an urgent desire to aid and spare (one of his neighbor women cooked a chicken and brought it in to him out of pure compassion—Cather) (with understanding, with compassion (so different from pity) she shows the sordid impact . . . on the lives of the natives—Campion) (when Jesus came in his gentleness with his divine compassion—Bridges) but while compassion suggests a greater dignity in the object than pity often does, it also implies a greater detachment in the subject (as a priest he regards all history from that eminence of spiritual objectivity which is called compassion—Albright) Commiseration and condolence agree in placing the emphasis on expression of a feeling for another's affliction, rather than on the feeling itself. Commiseration denotes a spontaneous and vocal expression, often one made in public or by a crowd (there was a murmur of commiseration as Charles Darnay crossed the room . . . the soft and compassionate voices of women—Dickens) Condolence denotes a formal expression of sympathy especially for the loss of a relative through death and refers strictly to an observance of etiquette without an implication as to the underlying feeling (a condolence call) (they received many condolences) Ruth denotes softening of a stern or indifferent disposition (look homeward, Angel, now, and melt with ruth—Milton) Empathy, of all the terms here discussed, has the least emotional content; it describes a gift, often a cultivated gift, for vicarious feeling, but the feeling need not be one of sorrow; thus empathy is often used as a synonym for
some senses of sympathy as well as in distinction from sympathy (what he lacks is not sympathy but empathy, the ability to put himself in the other fellow's place—G. W. Johnson) Empathy is frequently employed with reference to a nonhuman object (as a literary character or an idea, culture, or work of art) (a fundamental component of the aesthetic attitude is sympathy, or—more accurately—empathy). In the presence of any work of art... the recipient... must surrender his independent and outstanding personality, to identify himself with the form or action presented by the artist—Read

Take is not only the most general but also the only colorless term in this group. In ordinary use, especially with reference to physical things, it may imply nothing more than a movement of the hand to get hold of something (take the lamp from the table) (take meat from a platter) or it may imply, with reference not only to physical but to immaterial or intangible things, numerous and often difficult operations by means of which one gets possession of or control over something (take a city) Between these two extremes take may imply, in innumerable idiomatic applications, a very wide range of methods of getting hold of something or possessing it in some way; thus, one takes a prize by winning it in a competition; one takes a cottage by renting it; one takes the temperature of a room by observing the thermometter (take a bath) (take the air) (take a rest) Seize usually suggests a sudden and forcible taking or getting hold of, and it therefore is interchangeable with take only when emphasis is placed upon these qualities (the hungry children seized the food that was offered them) (the policeman seized the thief in the act of escaping) (the fort was seized before its defenders had time to repel the assault) (seizing between his teeth the cartilage of the trainer's ear—Shaw) In extended use, especially when the thing seized or the thing seizing is something immaterial or intangible, the term usually suggests a catching of something fleeting or elusive (seize an opportunity) (seize the attention of the crowd) or the capture of something by force and, usually, surprise (seize the throne) (the Breton seized more than he could hold; the Norman took less than he would have liked—Henry Adams) or the nearly understanding of something difficult to apprehend or analyze (the character of Louis XIII is difficult to seize, for it comprised qualities hardly ever combined in one man—Bello) Grasp basically implies a laying hold of with the hands, teeth, or claws so as to hold firmly (thy hand is made to grasp a palmer's staff—Shak.) In extended use the term implies a comparable ability to comprehend fully or adequately something difficult to comprehend either inherently or by reason of circumstances (understood the words I heard, but couldn't seem to grasp their meaning—Kenneth Roberts) (the evil of the corruption and falsification of law, religion, education, and public opinion is so enormous that the minds of ordinary people are unable to grasp it—Shaw) Clutch in its basic use implies more haste, more avidity, more urgency, and often less success in getting hold of the thing desired than grasp (1 . . . clutched desperately at the twigs as I fell—Hudson) Only when success is clearly indicated is a tight hold or a clenching suggested (I gave him all the money in my possession . . . Gunga Dass clutched the coins, and hid them at once in his ragged loincloth—Kipling) (he clutched Father Joseph's hand with a grip surprisingly strong—Cather) In extended use the term usually suggests a mental or emotional grasping at or seizing that is comparable to a physical clutching (they clutched childishly at straws of optimism—Wouk) (can you never like things without clutching them as if you wanted to pull the heart out of them?—D. H. Lawrence) Snatch carries the strongest implication of a sudden, hurried movement, but it seldom carries as strong a suggestion of the use of force as does its closest synonym, seize; rather, it often implies stealth (snatch a purse) (snatch a kiss) or promptness in rescuing (snatch a child from the flames) (snatched from the jaws of death) or rudeness or roughness (snatched the book from her hand) Consequently in extended use one snatch only what one can get by chance, surreptitiously, or by prompt action (snatch a free moment for writing a letter) (youngsters snatching at fun while they chased the dream of a happy marriage—Wouk) Grab commonly implies more rudeness or roughness than snatch, and it also usually implies as much force or violence as seize; distinctively it often suggests vulgarity and indifference to the rights of others or to the standards of the community, or a more or less open unscrupulousness in getting what one wants for oneself (grab all the meat from the platter) (grabbed his hat and ran) (grab power) (Hitler had been helpless to prevent the Russians from grabbing the Baltic States—Shirer) Ana *have, hold, own, possess: *catch, capture: confiscate, appropriate, preempt (see ARROGATE) 2 *receive, accept, admit Ana acquiesce, accede, *assent, consent, subscribe 3 *bring, fetch Ana *carry, convey, bear tale *story, narrative, anecdote, yarn Ana *fiction, fable: *myth, legend, saga talent genius, *gift, faculty, aptitude, knack, bent, turn Ana capacity, *ability, capability: *art, skill, craft, cunning: endowment (see corresponding verb at DOWER) talisman *fetish, charm, amulet talk vb *speak, converse Ana *discuss, dispute, argue: *discourse, expatiate, dilate, descend: chant, chatter, prate talk n *speech, address, oration, harangue, lecture, sermon, homily talkative, loquacious, garrulous, voluble, glib are comparable chiefly as applied to persons and their moods and as meaning given to talk or talking. The same distinctions in implications and connotations are also seen in their corresponding nouns talkativeness, loquacity or loquaciousness, garrulity or garrulosity, volubility or volubleness, and glibness. Talkative and talkativeness, the least explicit of these terms, may imply nothing more than a readiness to engage in talk, or they may suggest fluency and ease in talking or a disposition to enjoy conversation (a talkative boy learns French sooner in France than a silent
boy—Sydney Smith (he was talkative, he had a natural curiosity—Styron) (among them they noticed a beautiful, slim, talkative old man, with bright black eyes and snow-white hair—L. P. tame adj Tame, subdued, submissive are comparable when tame implies opposition to wild and in its basic sense applies chiefly to animals that have been domesticated and therefore accustomed to control by men (tame horses) In extended use it also applies to persons, or less directly to the acts and words of persons, whose wills have been broken or who have allowed themselves to be dominated by the will of another (the tribunal lately so insolent, became on a suddenly strangely tame—Macaulay) Often the term implies little more than a temperamental lack of proper spirit or independence, or undue docility or timidity (a tame reply) (tame acquiescence in tradition and routine—Babbitt) Subdued stresses quietness and in its most general sense implies a toning down with a loss or veiling of all vehemence or intensity (a subdued, passionate, desperate voice—Styron) (subdued colors) In reference to persons, their acts, words, or characters, it implies a real or apparent domination by or subjection to another, or a similar response to circumstances, and a resulting quietness or meekness that suggests a broken will, complete dependence, or excessive timorousness (Zeke's natural manner with his mother was well-trained deception, a subdued mockery—Farrell) (she had a mild, subdued, expiring look—Crabbe) (in such a man, so gentle and subdued . . . a race illustrous for heroic deeds, humbled, but not degraded, may expire—Wordsworth) Submissive implies the state of mind of one who has yielded his will to control by another and who unquestioningly or humbly obeys what is ordered or accepts what is given (meek, humble, timid persons . . . who are cautious, prudent, and submissive, leave things very much as they find them—Benson) (the bigot is conventional, rigid . . . is submissive to authority, suppressive of the weak —Ernst) (the perverse, negative will . . . has to be made submissive before it can become positive and integrated with the heart and mind—Henry Miller) Ana tractable, amenable, docile, biddable, *obedient: *timid, timorous: pliant, pliable (see PLASTIC) Ant fierce

tap vb Tap, knock, rap, thump, thud can mean, as verbs, to strike or hit audibly or, as nouns, the sound or effect produced by such striking or hitting. Tap implies a light blow usually repeated (as to attract attention to one's presence, needs, or wishes) (tap at her door) (tapping on the window) (she tapped her pencil on the desk for order) Knock implies a more forcible blow than tap, often a pounding or hammering (as on a door to call attention to one's need for admittance or on a person's body or head in an attack or a collision) (there came a heavy knock on the door) (the messenger knocked loudly to awaken us) In extended use knock may imply a sound or an effect that suggests a knocking (an automobile engine may knock because of uneven combustion) Rap suggests a smart, vigorous striking (as with the knuckles) on a hard surface so as to produce a sharp, quick sound or succession of sounds (the chairman rapped sharply for order) (a rap at the door) In extended use rap implies utterance that comes as quick and as sharp as rapping (rap out a series of commands) (the tired businessman . . . wants his poems snapped at him, rapped at him—Lowes) Thump implies the dull, heavy, yet resonant sound made by something that pounds or beats (as the fist upon a table or heavy feet upon the ground) or by something that pulsates forcibly and noisily
When they mean a piece of work which one is asked to do and is expected to accomplish. Task refers to a specific piece of work or service usually imposed by authority or circumstance but sometimes undertaken voluntarily (some person or some organization whose task it is to realize the daydreams of the masses—Huxley) (the spirit in which judge or advocate is to look upon his task—Cardozo) Duty is likely to indicate work, service, or conduct enjoined on a person because of his rank, status, occupation, or affiliation; it is more likely in most uses to suggest obligation, often moral, than specific imposition by a taskmaster (it is emphatically the province and duty of the judicial department to say what the law is—John Marshall) (some of the military branches having a preferred status...had higher pay scales for less dangerous duties—Kingsley Davis) Assignment suggests a specific amount of work or sort of service assigned authoritatively (it is not our assignment to settle specific questions of territories—Truman) Job is a general term wide in suggestion ranging from voluntary undertaking of some signal service down to an assigned bit of menial work (a job that suits me from some relative's charm would mean getting up endless small sums at a desk or feeding coal in at the door of a furnace—Montague) Stint stresses carefully or equitably measured or timed apportionment of work (took to doing "German Romance" as my daily work, ten pages daily my stint—Carlyle) Chore is likely to suggest minor routine activity necessary for continuing satisfactory operating (as of farm or office) (leisure after the chores and happy meeting places where the farmer and his family might play—Burlingame)

**taste**

### 1 Taste, flavor, savor, tang, relish, smack can all mean the property of a substance which makes it perceptible to the gustatory sense. Taste not only is the most inclusive of these terms but it gives no suggestion of a specific character or quality (dislike the taste of olives) (the fundamental tases are acid, sweet, bitter, and salt) Flavor applies to the property of a thing which is recognized by the cooperation of the olfactory and gustatory and to some extent tactile senses. The term therefore usually denotes the combination of tastes and smells perceived when eating or drinking a thing. Usually, also, it suggests the blend of tastes and odors and textures that give a substance a distinctive or peculiar character (this peach has a particularly fine flavor) (the flavor of a fine tea has been described as "a bouquet which can be tasted") Savor stresses sensitiveness of palate or of nose and may refer to the odor of something cooking as well as to the flavor of something eaten (caught the rich savor of roasting meat as they passed the window) (sipping slowly to enjoy the full savor of the wine) Tang applies chiefly to a sharp penetrating savor, flavor, or odor; it usually implies a live, pungent quality (prefer apples with a tang) (the tang of dry champagne) (the tang of a salt breeze) Relish and smack are comparatively rare in this sense; relish (see also TASTE 2) comes close to savor and usually suggests enjoyment of the taste (a Laplander...has no notion of the relish of wine—Hume) (my first endeavor must be to distinguish the true taste of fruits, refine my palate, and establish a just relish in the kind—Shafesbury) Smack comes close to flavor but applies usually to one that is added to or is different from the typical flavor of a substance (ale with a burnt musty smack) (a good smack of pepper in this stew)

In extended use these words usually call up one or more suggestions from their basic senses. Tastes usually denote a strong impression or a heightened sense of the quality of
something <the book leaves a bad taste in the mouth> <the first taste of sudden death and destruction from the skies —Shirer> Flavor implies a predominant or distinctive and pervasive quality <impacted an unwonted lachrymose flavor to his tone—Purdy> <the passing hour's supporting joys have lost the keen-edged flavor—Meredith> <flavor, in fine, is the spirit of the dramatist projected into his work—Galsworthy> Savor differs from flavor largely in suggesting a stimulating or enlivening character or quality that, like salt, spice, or other seasoning, gives life or pungency to a thing <an odd blend of bitter naturalism and quiet humor ... gives it a savor quite its own —Anthony Boucher> <no one treats me like a child now, and the savor has gone out of my life—Ellis> Tang, relish, and smack come still closer to their basic senses <the language has a tang of Shakespeare—Gray> <Yankeeisms ... whose salt-sea flavor has its own peculiar tang in it —J. R. Lowell> <the full flavor, the whole relish of delight—Beecher> <your lordship ... hath yet some smack of age in you, some relish of the saltiness of time—Shak.> <the Saxon names of places, with the pleasant, wholesome smack of the soil in them—Arnold>

2 Taste, palate, relish, gusto, zest are comparable when they mean a liking for or an enjoyment of something because of qualities that give the sense of taste a pleasurable sensation or that produce comparably pleasant mental or aesthetic impressions. Taste (see also TASTE 1) may imply a liking that is either natural or acquired; the term is often used to designate a deep-seated or ingrained longing for something that lies behind one's predilection for it, one's bent to it, one's aptitude for it, or a predisposition to enjoy one thing more than another <cultivate a taste for olives> <he had no taste for the study of law> <she had a taste for melancholy—for the smell of orange rinds and woodsmoke—that was extraordinary—Cheever> More often taste refers to a liking that is based upon an understanding of peculiar excellences, especially aesthetic excellences, and that gives one a more or less discerning appreciation of a thing's beauty or perfection (as of form, design, and color) or grace and dignity and consequently greater enjoyment of it <a connoisseur, possessing above all things an exquisite taste—Dahly> <all tastes are legitimate, and it is not necessary to account for them—Virgil Thomson> <without any technical knowledge she had acquired a good taste in music—Ellis> In this sense taste is often so close to another sense of taste, namely, the power of discriminating aesthetic judgment, that the two meanings tend to overlap. In the first case, however, taste is not an abstraction but a concrete thing referable to an individual or a group of individuals <we have our tastes in painting as in confectionery. Some of us prefer Tintoretto to Rembrandt, as we do chocolate to coconut—Brownell> In the latter sense taste is an abstraction used commonly without reference to individuals. In general it implies a capacity for discerning true excellence and the setting up of standards whereby all may be taught to appreciate the excellence they discern; sometimes it denotes the body of standards so set up <you do have talent, but you're pitifully ignorant of the first principles of taste—Wouk> Palate may imply either the literal physical sensation or sense of taste <a wine taster must have a discriminating palate> <people who considered cider was just like champagne. It was a matter of palate—Hilton> or a corresponding intellectual reaction and then suggest pleasure afforded the mind <in the midst of such beauty ... one's body is all one tingling palate—Muir> <had no philosophy, but things distressed his palate, and two of those things were International propaganda and the Organized State—Yeats> Relish often suggests a more distinct or a more exciting flavor in the thing that evokes enjoyment or liking; but especially it tends to imply a keener or more personal gratification than taste <a man of ... a quick relish for pleasure—Macauley> <seemed to speak all his words with an immense wet-licked relish, as though they tasted good on the tongue—Dahl> <the artist's brain can go further and build up, always with a passionate relish for what it is producing—Montague>

Gusto can imply either the hearty relish with which one sometimes may attack a meal, execute a piece of work, or go about the performance of an act (as a task or duty), or a quality in the thing which is executed or in the act which is performed that indicates vital or enthusiastic interest, keen delight, and intense imaginative or emotional energy <the act of making ambiguous politicians succumb with glee and gusto to the temptations of power—Huxley> <this dramatic sense ... gives Rostand's characters—Cyrano at least—a gusto which is uncommon on the modern stage—T. S. Elliot> Zest, like gusto, applies either to the spirit in which one approaches something one likes to do, make, or encounter or the quality imparted to the thing done, made, or envisioned as a result of this spirit. In contrast with gusto it suggests eagerness, avidity, or a perception of a thing's piquancy or peculiar flavor rather than a hearty appetite indicative of abounding energy <the Elizabethan theater had its cause in an ardent zest for life and living—Arnold> <his robustiousness, his zest for malicious humor—Hervey>

**tare** vb

Tear, rip, rend, split, cleave, rive can all mean to separate forcibly one part of a continuous material or substance from another, or one object from another with which it is closely and firmly associated. Tear implies pulling apart or away by or as if by main force; it often suggests jagged rough edges or laceration <tore his coat on a nail> *tear a piece of paper lengthwise> <he took hold of it with his powerful hands and tore it out by the roots—Anderson> *flood tore a... gorge through the township—Amer. Guide Series: Vt.> *grief tears her heart> Rip usually implies a forcible pulling or breaking apart typically along a line or juncture (as a seam, a joint, or a connection) <Macduff was from his mother's womb torn asunder by flashes of lightning—Shak.> *rip the shingles from a roof> |

**rend** implies greater violence than tear and either heightens the implication of a lacerating effect or adds that of severing or sundering <rend your heart, and not your garments—Joel 2:13> *the black volume of clouds... rent asunder by flashes of lightning—Irving> *his pride and vanity had been rent by her ultimate rejection—H. G. Wells> Split implies a cutting or breaking apart in a continuous, straight, and usually lengthwise direction or in the direction of grain or layers <split a log with a wedge> *great rocks split by an earthquake> In extended use the term implies force or intensity sufficient to split something <split their sides with laughter> *pain that seemed about to split his head, but sorrow split my heart, if ever I did hate thee—Shak.> *ear-splitting outrages> Cleave, a somewhat rhetorical word, may come close to split, but more often it conveys the notion of laying open by or as by a stroke of an edged weapon <struck the final blow, cleaving the Archbishop's skull—Lucas> *his acumen cleave clean to the heart of a piece of writing—Mendelbaum> *Rive is elevated for split <blunt wedges rive hard knots—Shak.> *all thoughts to rive the heart are here, and all are vain—Housman> |

temerity, audacity, hardihood, effrontery, nerve, cheek, gall are comparable when they mean conspicuous or flagrant boldness (as in speech, behavior, or action). Temerity usually implies contempt of danger and consequent rashness; often it suggests, especially when a proposal or project is under discussion, a failure to estimate one's chances of success (impetuously brushed aside the legalistic twaddle of the lawyers . . . and they frowned on such temerity—Bowers) (tenth-rate critics and compilers, for whom any violent shock to the public taste would be a temerity not to be risked—Arnold)

Audacity implies either a bold and open disregard of the restraints imposed by prudence, convention, decorum, or authority or undue presumption in making advances (he had committed the supreme audacity of looking into her soul—Sackville-West) (the moral audacity, the sense of spiritual freedom, that one gets from certain scenes in the Gospels—Edmund Wilson)

Hardihood stresses firmness of purpose and often additionally implies considered defiance (as of conventions or decorum). It may be used without depreciative intent, but it is frequently employed as a term of contempt almost equivalent to insolence or impudence (no historian or astronomer will have the hardihood to maintain that he commands this God's-eye view—Toynbee) (the reviewers . . . were staggered by my hardihood in offering a woman of forty as a subject of serious interest to the public—Bennett) Effrontery is definitely derogatory; it is used in place of any of the three preceding words when one wishes to impute flagrant disregard of the laws of courtesy, propriety, or fair dealing or an arrogant assumption of a privilege (had the damnable effrontery to tell me my father's delay was occasioned . . . by his addiction to immoral practices—Cheever) (she had won her way to success by strength of will and hardiness of heart, and a kind of haughty effrontery—Wharton) Nerve, cheek, and gall are close to effrontery, nerve, however, often carrying a strong suggestion of hardihood, cheek of impudent self-assurance, and gall of outrageous insolence (had the haughtily nerve to tell you . . . that you were being vulgar—Wouk) (the cheek of him . . . imagine a miserable-looking leprechaun like Pat Dolan to be having notions of a fine girl like Maria—Laverty) (the small stockholder who . . . has the gall to ask questions about the management—Cohn)

temperance, sobriety, abstinence, abstemiousness, continence can all mean self-restraint in the gratification of appetites or passions. In its more general sense temperance implies simply habitual moderation and the exercise of judgment (temperance in eating and drinking) (exaggeration, exaltation, the fanatic spirit, are extremely rare. Temperance is the almost universal rule in speech, demeanor, taste, and habits—Brownell) But temperance may be used specifically in reference to the use of intoxicating beverages and then tends to imply not merely moderation but abstinence; thus, a temperance hotel is one where no intoxicating liquors are sold or served. Sobriety, like temperance, suggests avoidance of excess not only in drinking (what would be sobriety for a billiard player would be ruinous drunkenness for a . . . billiard player—Shaw) but also in thought or action. Often it connotes the idea of seriousness or of avoidance of ostentation (sobriety in dress) (admired him for his cleanliness, sobriety and industry—Cheever) Abstinence implies voluntary deprivation (the Cynics preached abstinence from all common ambitions, rank, possessions, power, the things which clog man's feet—Buchan) (the man who has made a virtue of abstinence secretly regrets, when he grows old, the discretions of his youth—Abel)

Abstemiousness and its much commoner adjective abstemious suggest habitual self-restraint, moderation, or frugality especially in eating or drinking (the most abstemious of men . . . he held old-fashioned and rather puritanical views—Wooll) Continence emphasizes self-restraint in regard to one's impulses or desires (he knew what to say, so he knows also when to leave off, a continence which is practiced by few writers—Dryden)

In its specific sense it stresses self-restraint in sexual indulgence. Sometimes it implies chastity or complete abstinence; often, when referred to husband and wife, it implies avoidance of undue indulgence (chastity is either abstinence or continence. Abstinence is that of virgins or widows; continence, of married persons—Taylor)

temporary, provisional, ad interim, acting, supply can all be applied to a person holding a post for a limited time, to the post held by that person, or to his appointment. Antonyms: Tenor, trend, drift, tenor can mean a movement or course having a particular direction and character or the direction and character which such a movement or course takes. Tendency usually implies an inherent or acquired inclination in a person or thing that causes him or it to move in a definite direction so long as no one or nothing interferes. Often, when used in reference to persons, the word means little more than leaning, propensity, or disposition (a growing tendency to disarmingly underestimate the potential strength of the United States—Shirer) (he worked to destroy the tendency to dreams in himself—Anderson) More often, especially when used in reference to groups or communities or their activities or the course or direction they take with or without consciousness or intent, the term implies a driving force behind the direction or course taken and an insusceptibility to its being controlled or changed (gave the King a policy at once plausible and insidious, temporizing and yet thick with tendency—Hackett) (the whole tendency of evolution is towards a diminishing birthrate—Ellis) (the tendencies which Lycurgus had endeavored to repress by external regulation reasserted themselves—Dickinson) Trend is used primarily in reference to something that follows an irregular or winding course and denotes the general direction maintained in spite of these irregularities (jagged ranges of mountains with a north and south trend) In its extended use trend may differ from tendency in implying a direction subject to change through the interposition of a sufficiently strong force or agency, in implying a course taken at a given time by something subject to change and fluctuation, or in implying the general direction followed by a changing or fluctuating thing throughout its entire course or within given limits of space or of time (the current trends toward intolerance and the garrison state—Mower) (Aristotle, the most balanced of all the Greek thinkers and the best exponent of the normal trend of their ideas—Dickinson) Drift may apply to a tendency whose direction or course is determined by such external influences as a wind or the movement of flowing water or a fashion or a state of feeling (the drift of public opinion went steadily against him—Parrington) (stoutly opposed the drift toward national prohibition and equal suffrage—Sam Acheson) but it may apply also to the direction or course taken by something (as speech, writing, or teaching) that has a meaning, a purpose, or an objective which is not definitely stated or made clear but which is inferable; in this sense the word is scarcely distinguishable from intention, purport, or import (for the drift of the Maker is dark, an Isis hid by a veil—Tennyson) (write it down . . . and then maybe I can get the drift of it—Stafford) (I see the whole drift of your argument—Goldsmith) Tenor is a very close synonym of drift in this latter sense but it more often refers to utterances or documents and carries a much stronger implication of clearness of meaning or purport (the general tenor . . . of the talks—Bernard Smith) Both in this sense and in its more common sense of a course or movement having a particular clearly observable direction tenor carries a strong implication of continuity in that course and of absence of fluctuation in its direction; therefore it frequently suggests unaltered, often unalterable, procedure (along the cool sequestered vale of life they kept to dreams—Dickinson) (the village . . . was away from the main road and the tenor of its simple agricultural economy had not been disturbed—Lengar) (even a foible is forgiven so long as it ruffles not the calm tenor of respectability—Gogarty)

thief, larceny, robbery, burglary mean the act or crime of stealing, though they have differences in legal application. The same differences in implications and applications are observable in the agent nouns thief, larcener or larcenist, robber, burglar, denoting one who steals. Theft and thief are the most general and the least technical of these terms; they imply the taking and removing of another's property usually by stealth or without his knowledge and always without his consent. The terms are often so broad that they may include reference to any taking of another's property without his consent (as by pilfering, purloining, swindling, embezzling, or plagiarizing) (the theft of a purse) (the theft of the city's money by grafters) (a thief removed his watch from his pocket) Larceny and the less common agent nouns larcener and larcenist are legal terms implying direct theft but excluding such specialized forms as swindling, embezzlement, and plagiarizing. The terms connote an unlawful or felonious act, a removal of another's property from the place where it belongs, and complete possession, even for a moment, by the thief (the shoplifter was not apprehended until she had left the store, so that there would be proof of larceny) (the maid was found guilty of larceny) Grand larceny and petty larceny are common in ordinary use as indicating respectively a theft of an appreciable amount and a theft of a negligible amount.

Robbery and robber in their precise legal use imply the taking of another's property from his person or in his presence by means of violence or intimidation (highway robbery) (the paymaster was attacked and the payroll money was seized by armed robbers) Burglary and burglar in legal use imply a breaking and entering with an intent to commit a felony, usually that of larceny or robbery. In the laws of different states and nations the detailed specifications of the crime, for example, the time of occurrence (nighttime often being stipulated) or the actual commission of the felony, may or may not be considered material to the charge (the burglary of their home was committed during their absence for the evening) (she lived in constant fear of burglars)

theoretical, speculative, academic can be applied to minds, types of reasoning or philosophizing, or branches of learning as meaning concerned principally with abstractions and theories, sometimes at the expense of practical basis or application. Theoretical in its most usual and nonderogatory sense applies to branches of learning (as sciences) which deal with the inferences drawn from observed facts and from the results of experiments and with the laws or theories that explain them (the distinguishing feature of theoretical science is the anticipation of facts from experience—Georg von Wright).

In this sense the term is often opposed to applied, which describes branches of learning which have to do with the putting of such laws and theories into use (as in mechanics, in industry, or in social reform) (theoretical versus applied chemistry) (applied ethics is grounded upon theoretical ethics) (a purely theoretical definition would be that a person is emotionally sensitive when many stimuli produce emotions in him—Russell). But theoretical often implies a divorce from actuality or reality that makes one unable to see things as they are and usually makes him see them only in the terms of preexistent ideas or theories. In this sense it is opposed to practical (seems compelled to establish that . . . the book does have great practical importance in spite of its predominantly theoretical character—M. G. Whitey) (things that had seemed drearily theoretical, dry, axiomatic, platitudinous, showed themselves to be great generalizations from a torrent of human effort and mortal endeavor—Benson).

Speculative (see also thoughtful) 1 may go further than theoretical in suggesting a deep interest in theorizing or in forming theories or hypotheses and often additionally implies a daring use of the imagination (the rights of man . . . were necessarily more abstract, more detached from usage and concrete applicability, more open to speculative interpretation—Sabine) (so vaguely speculative are they that the author would try to explain them by lengthy prefaces—W. J. Fisher). Often, however, there is very little difference evident in the use of these terms (was a great inventor and builder, but in the speculative and theoretic side of science he had little interest—Buchan).

tenuous—Eddington) (tenuous evening mists—Darow) or something which is so finespun or so fine-drawn as to be exceedingly subtle, abstruse, or visionary (a tenuous idealism—Binyon) (poetry . . . so tenuous in thought and feeling that only the most exquisite diction can justify its perpetuation in cold print—Grandgent) (I did not despise the golden, tenuous imaginings . . . in my own spirit—Galsworthy) Rare in the sense of rarefied (see also INFREQUENT, CHOICE) is applied chiefly to gases and especially to air (he was high . . . nearly slumping in the rare air—Cozens) In its uncommon extended use it suggests tenuity or sometimes extreme exaltation or elevation (reared in the rarest air of German intellectualism—Time) (if we try to express almost any poems of his in prose, we find it impossible; its rare spirit evaporates in the process—Day Lewis)

think vb Thin, attenuate, extenuate, dilute, rarely. Thin is the most inclusive of these terms and is interchangeable with any of the others, though not without some loss of precision or of specific connotations. Basically it implies reduction in thickness or in density; in extended use it implies a comparable diminution (as of strength, depth, or intensity) (thin a forest by removing surplus trees) (thin wine by adding water) (the voice thins when one raises its pitch) (thin paint with turpentine) (constant use thins silver) Attenuate implies thinning as the result of some such process as drawing out, spinning fine, or culturing (as a strain of bacteria) repeatedly or as the effect of conditions (as disease or starvation) which emaciate (attenuate wire by drawing it through successively smaller holes) (hammer brass in order to attenuate it) (a wave of current attenuates in magnitude and phase as it travels along a transmission line) (attenuate a virus by heating it) (the powerful frame attenuated by spare living—Dickens) In its frequent extended use attenuate implies the loss of properties that are necessary to a thing's strength, richness, effectiveness, or vitality, and it often connotes overrefining, oversubtilizing, or overemphasis of an opposing quality (we may reject and reject till we attenuate history into sapless meagerness—Palgrave) (if she had had a little more self-control she would have attenuated the emotion to nothing by sheer reasoning—Hardy) (illusions which science can attenuate or destroy, but which it is powerless to enrich—Krutch) Extenuate in a somewhat learned use can suggest attrition either by literally evacuating and exhausting (see also palliate) (peasants . . . so extenuated by hunger that they could scarcely hold the spade—Lecky) or by a gradual diminishing of a thing's importance or significance (the . . . tendency . . . to extenuate the responsibility of human nature, not merely on the moral side, but equally on the spiritual side—Mackenzie) Dilute implies a thinning of what is concentrated by the addition or, in extended use, sometimes by the influence of something that weakens it, neutralizes it, or destroys its vigor or intensity (dilute peppermint oil with alcohol) (dilute hydrochloric acid with water) (the pioneer spirit has been diluted by new race mixtures, its confidence shaken by new social trends—Amer. Guide Series: Minn.) (the rough, spontaneous conversation of men they [clergymen] do not hear, but only a mincing and diluted speech—Emerson) Rarely implies a thinning in density and usually an expansion in volume or a decrease in weight or pressure (the rarefied air of mountainous regions) (the expansive power of moisture rarefied by heat—Mackay)

The word occurs in extended use chiefly with reference to ideas, emotions, and intellectual powers, sometimes suggesting their spiritualization or refinement and the elimination of all grossness and impurity and sometimes impeding to them a vaporous or tenuous quality (plain truths lose much of their weight when they are rarefied into subtleties—Cudworth) (love is a gentle flame that rarefies and expands her whole being—Hazlitt)

2 Thing, object, article are comprehensive terms applicable to whatever is apprehended as having actual, distinct, and demonstrable existence. They vary, however, in their range of application. Thing is the term of widest reference. In its most inclusive sense it need not imply direct knowledge through the senses but is equally applicable to something so known and to something the existence of which is inferred from its signs or its effects; thus, one thinks of the state, the church, literature, and the law as things rather than as ideas or abstractions; a friend's affection is as real a thing as is his house or his hand; one distinguishes a word from the thing it names (name the things that are on this table) (wanted to do the right thing) (a blind person recognizes things through such qualities as shape, texture, smell, taste, and sound) In somewhat more restricted use thing can denote specifically an entity having existence in space or time and distinguished from one existing only in thought (virtue is not a thing but an attribute of a thing) or in still more restricted use an inanimate entity and especially a material possession as distinguished from living beings and especially persons (more interested in things than in human beings) Often the word is used idiomatically to mention without specifically identifying an item that cannot or need not be further identified or whose nature is implicit in the context; thus, in "be sure to wear warm things," clothing is implied; in "bring in the tea things," the necessary collection of dishes, implements, and foods is implied (what's that thing in your hand?) Occasionally thing may be used in reference to persons when contempt is expressed or derogation intended (do you call that thing a man?) Object has for its primary implications externality to the mind or existence outside the observer. In philosophic and scientific use it is applied to something that is put before one as an entity capable of being seen, observed, or contemplated (a thinker may make an abstraction, such as love, art, or justice, an object of thought) (modern physicists are concentrating on the atom as an object of study) This basic implication of object is its chief distinction from thing when either word is used to denote something that can be perceived by one or more of the senses. For object in this, its ordinary sense, is applied chiefly to what has body and usually substance and shape (he grooped his way in the darkness with hands outstretched to detect any objects in his path) (in the glare of the torch they saw moving objects in the distance) Article is the most limited in its range of application, being used chiefly of objects that are thought of as members of a group, kind, or class (meat is an important article of food) (articles of a man's clothing) (a chair is an article of furniture) (articles of apparel)

think 1 Think, conceive, imagine, fancy, realize, envisage, envision are comparable when they mean to form an idea or notion of something in the mind. stress on the process than upon the results of thinking; it is often used to suggest the appearance or the atmosphere of profound but not necessarily productive thinking. <still cogitating and looking for an explanation in the fire—Dickens> Mrs. Berry had not cogitated long ere she pronounced distinctly and without a shadow of dubiosity: "My opinion is ..."—Meredith. Reflect usually implies a turning of one's thoughts back upon or back to something that exists, has occurred, or needs reexamining; it implies quiet, unhurried, and serious consideration or study. <stood reflecting on the circumstances of the preceding hours—Hardy> all the most important things in his life, [he] sometimes reflected, had been determined by chance—Cather. <began to ... study its organization, reflect on its psychology and political techniques and ponder the reasons—Shirer> Reason implies consecutive logical thought, beginning with a postulate, a premise, or definite data or evidence and proceeding through inferences drawn from these to a conclusion or judgment. <since, where all is uncertain, we must reason from what is probable of human nature—Quiller-Couch> no man as near death as I was feeling, could, I reasoned, be absorbed by such trifles—Lucas. Speculate implies the processes of reasoning but stresses either the uncertainty of the premises or the incompleteness of the data and therefore usually imputes a hypothetical or theoretical character to the conclusions reached. <the two women speculated with deep anxiety on whether or not little Pamela had died of exposure—Cheever> it is interesting to speculate whether it is not a misfortune that two of the greatest masters of diction in our language, Milton and Dryden, triumph with a dazzling disregard of the soul—T. S. Eliot. Deliberate suggests slow and careful thought or reasoning and fair consideration of various aspects in an attempt to reach a conclusion often on a matter of public interest <lawmakers ... can—and do—spend huge amounts of time deliberating matters of absolute insignificance—Armbrister> please you, deliberate a day or two—Shak. <the future relations of the two countries could now be deliberated on with a hope of settlement—Froude> Ana *ponder, meditate, muse, ruminate: *infer, deduce, conclude, judge

though, although, albeit introduce subordinate clauses stating something that is or may be true in spite of what is asserted in the main clause. Though, the most widely used of these words, can introduce a clause that states an established fact or one that offers only a supposition, either a hypothesis or an admission of possibility or probability. <though philosophy was Bede's chief interest and concern, he by no means stopped there—Malone> remembered a great deal of classical literature, badly taught though it was—Higher. <let us not defer our trip, though it rain tomorrow> Although, which is freely interchangeable with though, is often preferred when it introduces an assertion of fact and when the subordinate clause precedes the main clause. <although they worked hard ... their movements seemed painfully slow—Forester> although the war was still on, the diamond trade began to show signs of recovery—Hahn. Albeit is especially appropriate when the idea of admitting something that seems a contradiction is stressed (a worthy fellow, albeit he comes on angry purpose now—Shak.) <passages of moving, albeit restrained, eloquence—N. thoughtful

1 Thoughtful, reflective, speculative, contemplative, meditative, pensive can be applied to persons or their moods, attitudes, expressions, and utterances as meaning characterized by or showing the power to engage in thought, especially in concentrated thinking. Thoughtful may imply either the act of thinking concentratedly or the disposition to apply oneself to the careful and serious consideration of problems or questions at issue (he has a shrewd rather than a thoughtful face) (Marlowe—not excepting Shakespeare or Chapman, the most thoughtful and philosophical mind, though immature, among the Elizabethan dramatists—T. S. Eliot) (a thoughtful book on a serious subject—Selzer) Reflective differs from thoughtful in its stronger implication of orderly processes of thought, such as analysis and logical reasoning, and in its suggestion of a definite aim, such as the understanding of a thing’s nature or of its relation to other things or the reaching of a definite conclusion (men of reflective and analytical habit, eager to rationalize its [plutocracy’s] instincts and to bring it into some sort of relationship to the main streams of human thought—Mencken) Speculative implies a tendency or inclination to think about things of which direct knowledge is either impossible or so limited that any conclusions are bound to be uncertain (economics is regarded by many persons as a speculative science) (speculative writing about the state—Frankfurter) Hence the term often implies theorizing or conjecturing without consideration of the evidence or with little attention to the evidence (about a thousand practical and positive topics the Frenchman, who speaks from experience and examination, finds our views speculative and immature—Brownell) (the philosophical background of Chinese culture has always tended to create reflective rather than speculative thinkers—Hart) Contemplative carries a stronger implication than the other words of an attention fixed on the object of one’s thoughts; it may imply as its object something perceivable by the senses or something abstract yet comprehensible by the mind, or it may suggest a habit of mind (a contemplative thinker, withdrawn from active life—Theodore Spencer) (practical curiosity becomes contemplative and examines things for their own sake when . . . man . . . having arrived at the stage of ideas and thought, applies them to the data presented by sensible experience—Alexander) (the contemplative life which is concerned with human feeling and thought and beauty—Ruskin) (Meditative, except in religious use, where it comes very close to contemplative, usually implies a tendency to ponder or muse over something without necessarily implying any such intellectual purpose as understanding a thing or reaching a conclusion regarding it. The term therefore often comes close to thoughtful, though it usually implies some consecutive reasoning and sometimes suggests pleasure rather than seriousness in the exercise of thought (indulge in many a meditative walk) (a meditative temperament) (sympathies . . . that steal upon the contemplative mind, and grow with thought—Wordsworth) Pensive is not always clearly distinguishable from meditative, though at times it carries a stronger suggestion of dreaminess, of wistfulness, or of melancholy (for oft, when on my couch I lie in vacant or in pensive mood—Wordsworth) (silent and pensive, idle, restless, slow—Byron)

2 Thoughtful, considerate, attentive are applied to persons and their acts in the sense of being mindful of the comfort or happiness of others. Thoughtful usually implies unselfish concern for others or the capacity for anticipating another’s needs (in his thoughtful wish of escorting them through the streets of the rough, riotous town—Gaskell) Considerate stresses concern for the feelings of others or thoughtfulness in preventing or in relieving pain, suffering, or distress (the French poor people are very considerate where they see suffering—Meredith) (too courteous and considerate to make stubborn subordinates bend properly to his will—Nevins & Commager) Attentive emphasizes continuous thoughtfulness or implies repeated acts of kindness or courtesy (Emmy had always been good and attentive to him. why should not mind be able to pass on to mind its thrilled sense of a storm or a flower . . . ?—Montague

Electrify differs from thrill in suggesting effects comparable to those produced by an electric current that shocks rather than stuns; it implies a sudden, startling, and violent stimulation by a power that for the time being holds one obedient to its will or under its sway (the blue-eyed girl whose silvery tones and immense vitality had electrified audiences—Tomkins) she was not eating anything, she was using up all her vitality to electrify these heavy lads into speech—Cather

Enthuse can be used effectively in respect to an arousing of enthusiasm in someone or an experiencing of enthusiasm about something (Lubichov, enthused by the music of his native land, beat his baton with more and more zest—Brambrick) as a dogmatic theologian, the Bishop did not enthuse himself and he did not understand other people’s enthusiasms—Frank O’Connor

Tie, however, specifically suggests a being held down by something stronger than oneself and an inability to get away or free oneself <tied to a job> <tied to an unsympathetic wife> Bind, on the other hand, either suggests a being held together in a close union, for the sake of strength or mutual support <the common danger bound all classes together> <and vows of faith each to the other bind—Shelley> or a being held down by such a bond, as a pledge, a compact, a duty, or an obligation, or by a bond of blood, marriage, or friendship <and vows, that bind the will, in silence made—Wordsworth> "Are you engaged?" . . . tight 1 Tight, taut, tense are comparable chiefly in their basic senses in which they mean drawn or stretched to the point where there is no looseness or slackness. Tight implies a drawing around or about something in a way that constricts or binds it or a drawing of the edges of something firmly together <a tight belt> <a tight coat> <Tom has eaten . . . till his little skin is as tight as a drum—Hughes> When applied to a structure, tight more often suggests a drawing together of all parts so that nothing can enter or escape <a tightly built house> <if the granary can enter or escape <a tightly

When there is an implication of tightness or tauntness that involves severe physical or, more often, nervous strain or that manifests itself in signs of such strain, tense may be preferred <a cat crouched for a spring, with muscles tense> <help him to unbend his too tense thought—Arnold> <just as a bicycle chain may be too tight, so may one's carefulness and conscientiousness be so tense as to hinder the running of one's mind—James> <the rat was crouching, very tense, sensing extreme danger, but not yet frightened—Dahl>

tire vb Tire, weary, fatigued, exhaust, jade, tucker can
all mean to make or in some cases to become disinclined
or unable to continue because of loss of strength or en-
durance. Tire is the general and ordinary word and usually
implies the draining of one's strength or patience; it may
suggest such causes as overexertion, long continuance at
a task, boredom, or a sense of futility and usually it re-
quires textual amplification to indicate the cause and the
degree of the effect (it tires me to death to read how many
ways the warrior is like the moon, or the sun, or a rock,
or a lion, or the ocean—Walpole) (music that gentler
on the spirit lies, than tired eyelids upon tired eyes—
Tennyson) (spoke exclusively from the larynx, as if he
were altogether too tired to put any diaphragm breath
into his words—Salinger) (we shall not fail or falter; we shall
not weaken or tire—Sir Winston Churchill) Weary as
often suggests an incapacity for enduring more of the same
thing or an unwillingness to continue one's effort or one's
interest as a depletion of that strength or that interest
the others would never even raise their eyes when this
happened, as men too well aware of the futility of their
fellows' attempts and wearied with their useless repetition
—Kipling) (ah, I am worn out—I am wearied out— it is
too much—I am but flesh and blood, and I must sleep—
Milroy) (I have only one prayer—that I weary of you
before you tire of me—Mailer) (wearied of her husband's
infidelities, and could not bear them any more—Rose
Macaulay) Fatigue is stronger than tire and implies
great lassitude brought on by overstrain or undue effort.
It usually implies an incapacity for further strain or effort
without damaging effects (I rested ... in a shrubbery,
being, in my enfeebled condition, too fatigued to push on
—H. G. Wells) (she flung herself upon a sofa, protesting
... that she was fatigued to death—Burney) Exhaust
(see also DEPLETE) heightens fatigue's implications of
drained strength or a worn-out condition of mind or of
body (she is too exhausted to sleep) (exhausted and
added by the frustration of their failures—Mailer) Jade
implies weariness or fatigue that makes one lose all
freshness, spirit, animation, or interest and become dull
and languid. The term seldom carries as clear a suggestion
of physical or mental overexertion as fatigue and often
implies sateyn even more clearly than weary; it is es-
specially useful when the implication of overindulgence in
something or the overworking of a particular sense or
faculty is to be conveyed (to minds jaded with debauches
of overemphasis it does contrive to give a thrill—Monta-
gue) (to the jaded... eye it is all dead and common...
flatness and disgust—James) Fag implies work until
one droops with weariness or fatigue (I worked ... at
correcting manuscript, which fags me excessively—Scott)
(with a gasp for breath said, "Lord, what a run. I'm
fagged to death")—Masefield) Tucker closely approaches
fatigue or exhaust in meaning but sometimes carries the
additional suggestion of loss of breath (too tuckered
to finish a job—Leavitt) (seemed tuckered out from listening
to long speeches—Dorothy Canfield)

totalitarian adj Totalitarian, authoritarian, as applied to a government or state, require discrimination, for, although applicable to the same states, they actually carry a different emphasis. Totalitarian implies as an objective an undivided state in which all power, whether political, economic, commercial, cultural, or religious, is vested in the government and in which the people as a unit sanction and support this government and obey its orders. Practically, it implies toleration of but one political party, the one which supports the government, and the concentration of authority in the hands of one person or group, theoretically the mouthpiece of the people. Authoritarian implies a type of governmental organization in which professedly as well as actually all political power is ultimately concentrated in the hands of an individual head (as a sovereign, a leader, or a dictator) and not (as in democratic countries) in the people or in a representative body. No matter how the various powers vested in the government may be distributed for practical purposes, an authoritarian state is so organized that the final and determining authority is its head. Practically an authoritarian government, though professing political power, often extends its control over the economic and cultural life of the people; thus, Italy, with the rise of Mussolini and the Fascists to power in 1922, became an authoritarian state; Germany, with the election of Hitler as Chancellor in 1933, became a totalitarian state.
contact with another, but in general it implies little more than an appreciable trace (in the air was a touch of frost—Galsworthy) (he was a very active lad, fair-haired, with a touch of the Dane or Norwegian about him—D. H. Lawrence) (occasionally the wrinkled serenity of her face became a touch grim—Styron) Suggestion implies an outward sign that is just enough to give one a hint or an inkling of the presence or existence of something (his voice conveyed a suggestion of fear) (the taste of the fowl delicately dominant over the tart suggestion of Burgundy—Wouk) Suspicion and soupçon differ little from suggestion, but they tend to imply a fainter trace requiring more delicate perception or evoking less certainty (tea with a suspicion of brandy) (add a soupçon of red pepper) (just a suspicion . . . of saturnine or sarcastic humor—A. W. Ward) (a soupçon of army rank had slipped . . . insidiously into his voice—Salinger) Tincture, tinge, and shade are terms used primarily in describing color. Tincture and tinge usually imply an admixture with something that gives the thing affected a faint or an appearance suggestive of a slightly suffused coloring (what he said had plausibility and perhaps a tincture of sincerity—Hackett) (both young men were Whigs of a radical tincture—Current History) (a subjective tinge entered into the nineteen-century description of nature—Jean) (eyes that . . . had some tinge of the oriental—Edmund Wilson) Shade implies enough of a trace to suggest the smallest possible degree of some quality; it usually derives its implications from the meaning of shade as a gradation in the darkening of a color (he smiled; in that smile there was a shade of patronage—Galsworthy) (eyes that were too small and a shade too close together—Dahl) (the distinction between French plums and stewed prunes is . . . not to be overlooked by those sensitive to these nice shades—Sackville-West) Smack, spice, and dash are used primarily in relation to the stimulation of the sense of taste. Smack suggests a trace which is pronounced enough or decided enough for one to savor it (the Saxon names of places, with the pleasant, wholesome smack of the soil in them—Arnold) Spice and dash suggest a slight admixture or infusion, especially such as gives zest, relish, or pungency (there was a spice of obstinacy about Miss of obstinacy about Miss George Elioty) (a king of England should have a spice of the devil in his composition—Smollett) (he is a man with a dash of genius in him—Arnold) (his ancestry was chiefly English, with some Scotch and a dash of both French and Dutch—Kellogg) Vein, strain, and streak all suggest linearity and imply continuity though not necessarily evident continuity to the thing, usually a quality or condition, so designated. Vein applies to a trace that runs through a personality, a work, or a movement in the manner of a vein so that it lies below or within the substance or character of the thing as a whole and occasionally shows on the surface or crops out (in Swift he discovered an inimitable vein of irony—Johnson) (he had always had a vein of childish obstinacy—M. E. Freeman) Strain and streak can both denote a distinctive characteristic that runs through and modifies the whole of which it is a part (throughout the speech . . . ran a curious strain, as though he himself were dazed at the fix he had got himself into—Shirley) They are used especially of a personal characteristic that is clearly distinguishable from or even contrasts sharply with the rest of one's qualities (a strain of eccentricity, amounting in some cases almost to insanity—L. P. Smith) (the streak of extreme stubbornness . . . was both his strength and his misfortune—Galsworthy) (a streak of Indian blood in him—Long) Ana *trace, vestige: contamination, pollution, defilement, tainting (see corresponding verbs at CONTAMINATE): *impression, impress, imprint, stamp, print touching affecting, *moving, impressive, poignant, pathetic Ana *tender, responsive, sympathetic, compassionate: *pitiful, pitious, pitiable touchstone criterion, *standard, gauge, yardstick Ana test, proof, trial, demonstration (see under PROVE) touchy *irascible, choleric, splenetic, testy, cranky, cross Ana *irritable, fractious, snappish, wapish, peevish: captious, cauliving, faultfinding, carping (see CRITICAL) Ant imperturbable tough tenacious, stout, sturdy, *strong, stalwart Ana resisting or resistant, withstanding, opposing (see corresponding verbs at RESIST): *firm, hard: intrac- table, refractory, recalcitrant, headstrong (see UNRULY): dogged, pertinacious, *obstinate, stubborn Ant fragile tour n 1 shift, trick, turn, *spell, stint, bout, go 2 *journey, voyage, trip, cruise, expedition, jaunt, excursion, pilgrimage tow vb tug, haul, hale, *pull, draw, drag tower vb mount, ascend, soar, rocket, *rise, arise, levitate, surge toxic *poisonous, venomous, virulent, mephitic, pestilent, pestential, misamiasic, miastic, misamial toxin *poison, venom, virus, bane toy vb *trifle, dally, flirt, coquet Ana *play, sport, disport, frolic: fondle, *caress, pet, cosset, cuddle, dandle trace n Trace, vestige, track can all mean a visible or otherwise sensible sign left by something that has passed or has taken place. Trace basically applies to a line (as of footprints) or a rut made by someone or something that has passed (follow the traces of a deer through the snow) (the clear trace of a sleigh) (when the hounds of spring are on winter's traces—Swinburne) The term is often extended to suggest a mark, whether material or immaterial, that is evidence of something that has happened or has influenced a person or thing (the child carefully removed the traces of jam from his mouth) (would tell him they had detected in the book some slight traces of a talent which . . . could be schooled to produce, in time, a publishable book—Wolfe) (the stimulation of violent emotions may leave permanent traces on the mind—Inge) Vestige may be preferred to trace when the reference is to something that remains or still exists to give evidence of or testimony to the existence of something in the past; it often applies to remains (as a fragment, a remnant, or a relic) that constitutes a tangible or sensible reminder of what has gone before (of this ancient custom no vestige remained—Gibbon) (the vestiges of some knowledge of Latin still appear . . . in his sentences—The Nation) (some embryonic organs neither disappear nor take on permanent function, but rather persist throughout life as vestiges—Arey) (a remote outpost, with only a vestige of its former commerce in livestock—P. E. James) Track has come to be used more often than trace in the sense of a line of perceptible marks, especially in hunting, where it also may mean the scent followed by the hounds, and in geology, where it usually means a line of fossilized footprints (the hounds are on the track of the fox) (the track of a dinosaur) (he could just discern the marks made by the little feet on the virgin snow, and he followed their track to the furze bushes—George Eliot) Ana *sign, mark, token trace vb *sketch, outline, diagram, delineate, draft, plot, blueprint Ana copy, duplicate, reproduce (see corresponding nouns at REPRODUCTION): map, chart, graph (see under CHART n)

trade n 1 Trade, craft, handicraft, art, profession are general terms which designate a pursuit followed as an occupation or means of livelihood and requiring technical knowledge and skill. Trade is applied chiefly to pursuits involving skilled manual or mechanical labor and the management of machinery or tools (the trade of a carpenter) (a blacksmith’s trade) (he is a plumber by trade) Craft is not always clearly distinguished from trade, but it tends to be used of those pursuits that involve not only manual or mechanical labor but allow more or less freedom for the exercise of taste, skill, and ingenuity; many of the crafts were once or are still carried on independently in the small shop or home; thus, weaving, tailoring, and goldsmithing are often spoken of as crafts; the village shoemaker practised a craft, but the later in a modern shoe factory follows a trade. Handicraft implies handwork or usually suggests dexterity in manipulation of instruments or of materials; in comparison with craft it tends to imply more definite independence from machinery and it more often applies to an activity carried on for other than purely economic reasons; thus, basketmaking, embroidery, lacemaking, and bookbinding are handicrafts when carried out with the use of simple hand tools whether the products are primarily a source of livelihood or not. Art as applied to an occupation (compare ART 1) implies the use of knowledge and skill by the practitioner and often comes very close to craft in such phrases as the manual arts, industrial arts, household arts, practical arts. But art, when unqualified, usually designates one of the creative pursuits (as painting or sculpture) that, whether practised as an occupation or an avocation, involve an elaborate technique, great skill, definite ends to be achieved, and the possession and exercise of highly personal creative judgment and taste. Further, art is so freely applicable to the general principles or underlying system of rules, methods, and procedures on which a trade or craft, or a creative pursuit, or a branch of learning or doing, or an aspect of human affairs is based, that it is often difficult, apart from the context, to determine whether the word denotes a pursuit or a technique (the art of navigation) (the art of interior decorating) (dancing as an art, a profession, an amusement—Ellis) (proficient in the art of self-defense—Shaw) (literature is an art and therefore not to be pondered only, but practiced—Quiller-Couch) Profession is, in general, applied only to a pursuit that requires prolonged study and training before one is ready to follow it as a means of livelihood; the term also often implies that one has undergone tests of one’s fitness and has won a degree or has given proof of one’s qualifications and has been licensed to practice; it often also implies devotion to an end other than that of personal profit or the earning of a livelihood (law, medicine, architecture, and teaching are professional)

writing or deed plays an essential part in the transfer and is used chiefly of the transfer of real property and of ships. 

Alienate is not always clearly distinguished from transfer or convey; in precise legal use, however, it implies the passing of a title by the act of the owner as distinguished from its passing by the operation of the law (as in the case of inheritance by descent) (entailed property cannot be alienated) Alienate, however, may be used when the sale of property is not voluntary but is ordered or enforced by a court (as in foreclosure or in condemnation proceedings). In ordinary nonlegal use alienate often implies diversion (as by force or by a sovereign power or an imperative need) (he pleaded for the resumption by clerics of Church revenues alienated into lay hands—Bellow) Deed, a popular rather than a technical legal term, is equivalent to convey.

transform, metamorphose, transmute, convert, transmogrify can all mean to turn or change one thing into another or a different thing or from one form into another and different form. In general, the same differences in implications and connotations are observable in the corresponding nouns transformation, metamorphosis, transmutation, conversion, transmogrification, transfiguration. Transform may imply a mere changing of outward form or appearance (a Hunter senior transformed into a bride floating in a white brilliant mist, on the arm of an awkward trapped-looking young man—Wouk) (the placid sunshine ... seems to have been transformed in a moment into impetuous angry fire—Pater) or it may imply a basic changing of character, nature, or function (transform electrical energy into light) (to Samarcand ... we owe the art of transforming linen into paper—Newman) (the task of transforming a heterogeneous selection of mankind into a homogeneous nation—Russell) (too much organization transforms men and women into automatata—Huxley) Metamorphose may add implications not often present in transform such as that of a supernaturally or magically induced change (men were by the force of that herb metamorphosed into swine—Steele) or of a fundamental change in structure and habits that characterizes the development of some forms of animal life (the caterpillar is a larva which finally metamorphoses into a butterfly or moth) or of a transformation specifically induced by chemical or physical agencies (rocks metamorphosed by heat) In more general use the term carries a much stronger implication than transform of an abrupt, startling, or violent change (the little song ... later metamorphosed into one of the noblest chorales—P. L. Miller) (a convention of maidenly modesty has metamorphosed many a fine woman into an embittered, disillusioned old maid—Kyne) (if you deny man his intelligence, you metamorphose him into a machine) Transmute usually suggests a fundamental change, especially one involving a metamorphosis of a lower element or thing into a higher one (a simple romantic narrative transmuted by sheer glow or beauty into a prose poem—Galsworthy) (Shakespeare, too, was occupied with the struggle—which alone constitutes life for a poet—to transmute his personal and private agonies into something rich and strange, something universal and impersonal—T. S. Eliot) (in order to transmute energy to higher and more subtle levels one must first conserve it—Henry Miller) Convert carries a slighter suggestion of change in kind, nature, or structure than the preceding terms but a stronger one of such changes in details or properties as fit something for a given use or function or for a new use or function (convert iron into steel) (nature converts the fallen trunks of trees into coal) (having conducted their lame guest to a room in the Georgian corridor hastily converted to a bedroom—Galsworthy) (every possible industry was converted to produce war goods—Morris Sayre) (that a new seam of richest material has been opened up and that poets are learning how to convert that raw material to their own uses—Day Lewis) Transmogrify implies a thorough-going metamorphosism that is often grotesque, bewildering, or even preposterous (see Social life and Glee sit down, all joyous and unthinking, till, quite transmogrified, they're grown Debauchery and Drinking—Burns) (wondering how the caricatured capitalism of his forebears can be transmogrified into a harmonious ... way of life—Current Biog.) (the classical heroes and heroines were transmogrified into medieval knights and ladies—Lowes) Transfigure is often interchangeable with transform or metamorphose (her face was transfigured by uncontrollable passion—Bennett) but more typically it suggests an exaltation or glorification of the outward appearance (Jesus ... was transfigured before them: and his face did shine as the sun—Mr 17:1-2) (if she be guilty, 'twill transform her to manifest deformity ... if innocent, she will become transfigured into an angel—Shelley) (the moment when good verse ... is transfigured into a thing that takes the breath away—Day Lewis)

transient adj Transient, transitory, passing, ephemeral, momentary, fugitive, fleeting, evanescent, short-lived are comparable when they mean lasting or staying only for a short time. Transient and transitory are often used as if they were interchangeable; but transient more frequently applies to what is actually short in its duration or stay (the summer hotel does not take transient guests) (transient sorrows—Wordsworth) (an ancient folk tradition whose resting-place was the Bronx—Geismar) and transitory, like its close synonym passing, to what is by its nature or essence bound to change, pass, or come to an end sooner or later (objects of sense ... are transitory and ephemeral—Thilly) (wise men will apply their remedies to ... the causes of evil which are permanent, not to ... the transitory modes in which they appear—Burke) (a passing fancy) (the confounding of the Passing with the Permanent—Austin) Ephemeral may imply existence for only a day (ephemeral insects) (ephemeral flowers) In extended use, it implies marked shortness of life or of duration (as of influence or appeal) (jazz is perishable, ephemeral, elusive—Balliett) Momentary implies duration for a moment or a similar very short time (a momentary irritation—Hardy) Fugitive and fleeting apply to what passes swiftly, and is gone; but fugitive carries a stronger implication of the difficulty of catching or fixing (oh joy! ... that nature yet remembers what was so fu—

translation, version, paraphrase, metathesis can all denote a restating in intelligible language of the meaning or sense of a passage or work or the passage or work that is the product of such a restatement. Translation implies a turning from one language into another (English translations of the Bible) (a literal translation) (translation is an art that involves the re-creation of a work in another language, for readers with a different background—Malcolm Cowley) Version (see also ACCOUNT 2) may be used in place of translation especially to imply a rendering that adheres rather to the spirit than to a literal translating of the original (the year 1632 saw a complete version of the Aeneid by Vicars—Conington) but often it is used to denote one of the translations of a given work, and especially of the Bible (the Authorized or King James Version) (the Douay Version is used by English-speaking Roman Catholics) Paraphrase may apply to a very free translation the purpose of which is to present the meaning rather than the phrasing of a passage or work (a translation must be a paraphrase to be readable—FitzGerald) It may apply also to an imitation with enough changes to obscure its indebtedness to an original in another tongue (L'atome) plays which were not paraphrases from the Greek—Buchan) Commonly, however, the term denotes a free, amplified, and often, interpretative rendering of the sense of a difficult passage in the same language (write a paraphrase of Milton's Lycidas) (paraphrases of the Psalms in the Authorized Version) Metaphrase is occasionally used by learned writers to denote a translation that is almost slavishly faithful to the original (what is often called a literal translation) to distinguish it from a paraphrase or free translation (the way I have taken [in a translation of the Aeneid] is not so straight as metaphrase, nor so loose as paraphrase—Dryden)

ment, fear, or wonder) strong enough to exceed ordinary limits; usually, the term implies excessive agitation or excitement (the test of greatness in a work of art is . . . that it transports us—Read) (transported with rage)
Ravish can imply a seizure by emotion and in this use is typically an emphatic term for a being filled with joy or delight (his eye was ravished by a thin sunshine of daffodils spread over a meadow—Clementine Dane) (a sound of angelic chimes infinitely ravishing to my senses—Sabatini) (I was given my first taste of music in the high sense, and never, surely, could a youth from a small country town have been more ravished by such an experience—Hall) Enrapture basically implies a putting into a state of rapture and typically suggests an intense, even ecstatic, delight, often in one of the arts (he is enrapturing us with his extraordinary powers to make us see and feel beauty—Weldy) (he may never achieve a full understanding of the middle of the art that enraptures him—Tassovin) But sometimes enrapture stresses the bemping aspect of rapture and then tends to suggest a bedazzling and often a suppressing of the powers of clear thinking (gives him a weary skepticism before the enraptured claims—Schlesinger b. 1917) (his} personality simply has not enraptured the voters—Rowland Evans & Robert Novak) Entrance implies a throwing into a state of mind resembling a trance; it usually suggests a being held spellbound by something that awakens an overwhelming emotion (as joy, fear, or wonder) (entranced with this reverent gesture . . . her tentative approval of her cousin settled into awed respect—Hervey) (he felt his head whirl. 2 Trial, tribulation, affliction, visitation, cross are comparable when they denote suffering, misery, or unhappiness regarded as an infliction which cannot be escaped or avoided. Trial implies a trying (as of one's endurance, patience, self-control, courage, or power to resist temptation). The word is applicable not only to distressing situations or conditions but to persons or things that cause distress or annoyance (<the trials and tribulations of traveling over desert—T. D. Clark) he has always been a trial to his parents) <hotels are a trial of both spirit and flesh—Peffer> Tribulation, when not completely interchangeable with trial, heightens the emphasis on the suffering or anguish involved in trial (<out of this time of trial and tribulation will be born a new freedom and glory for all mankind—Sir Winston Churchill>) and often connotes divinely permitted suffering as a test of virtue (<the just shall . . . after all their tribulations long, see golden days—Milton>) Affliction stresses the implication of imposed suffering that challenges one's powers of endurance; the term need not suggest a relation between suffering and deserts (<if severe afflictions borne with patience merit the reward of peace, peace ye desire—Wordsworth>) <the dark and senseless afflictions of a night—Kenneth Roberts> Visitation heightens the implications of affliction by stressing the severity of suffering and by suggesting an ordeal; distinctively it often connotes retribution or retributive justice (<many people regarded the disastrous flood as a visitation> woe unto them! for their day is come, the time of their visiting—Jer 1:27) Cross in its applications closely parallels trial and tribulation but it may differ from them in its implications of suffering accepted and borne for the sake of a larger, unselfish good rather than as a test of character (<leaving her . . . solemnly elate at the recognition of the cross on which she must agonize for the happiness of some other soul—Deland>) The word often directly alludes to the words of Jesus to the rich young man: “Come, take up the cross, and follow me” as recorded in the Gospel according to Mark, or to his own carrying of the cross to the place of his crucifixion.

trick n 1 Trick, ruse, stratagem, maneuver, gambit, ploy, artifice, wile, deceit are comparable when they mean an act or an expedient whereby one seeks to gain one's ends by indirectness, craftiness, and cunning. Trick implies cheating or deceiving and often evil intention (<tricks and devices to conceal evasions and violations of ethical principles—Wagner> <she could not be entirely sure that . . . he was not after all merely using a trick to get rid of her—Bennett>) The word may, however, imply nothing more than roguishness or playfulness and be used to designate an antic, a prank, a practical joke, or a harmless hoax (the brothers surprised their sisters with a few play tricks on their sisters) <the tricks of the clowns in the circus> It may also be applied to a dexterous device or contrivance that pleases, persuades, deludes, or evokes surprise or wonder (<an auctioneer who knows all the tricks of his trade> <illusion in the theater is often accomplished by tricks of lighting> <that idle trick of making words jingle which men of Nufo's class in my country so greatly admire—Hudson>) Ruse implies an attempt to give a false impression (as by diverting others' attention from one's real purposes or by making what is untrue seem true) (<her "falling" through the glass sunlight . . . must be construed by him as a form of reckless intrepidity, the hardened ruse of a dyed-in-the-wool newspaper woman—Purdy>) <a favorite ruse of the opium smugglers was to insert a hypodermic needle into an egg, withdraw carefully all the albumen and then refill the cavity with opium—Heiser> Stratagem, though commonly applied to a ruse by which an advantage is gained over an enemy (as by outwitting or surprising him), is not restricted to military operations; in extended use it implies a clear objective such as entrapping or circumventing and a more or less elaborate plan for achieving one's end (<on our guard against the stratagems of evil rhetoric—R. M. Weaver>) <some women . . . are driven to every possible trick and stratagem to entrap some man into marriage—Shaw>) Maneuver usually suggests tactics or handling and moving of troops or ships for the accomplishment of definite ends. In extended use it commonly implies adroit or dexterous manipulation of persons or things (<the Longbourn party were the last of all the company to depart, and, by a maneuver of Mrs. Bennet, had to wait for their carriage a quarter of an hour after everybody else was gone—Austen>) It may, however, be applied to a single strategic move comparable to one in a game of chess (unless indeed, all her talk of flight had been a blind, and her departure no more than a maneuver—Wharton>) Gambit in chess denotes an opening that risks a pawn or minor piece to gain an advantage in position; in extended use it can apply to a device that is intended or serves to launch a conversation (<opened, safely as I thought, with the gambit of inquiring whether present conditions were satisfactory—Jeremy Potter>) <he could not, if he had pondered conversational gambits for an hour, have hit on a more successful one—Day Lewis>) <always carried turtle eggs in his pockets and bounced them on bars as a conversational gambit—Bergen Evans>) Perhaps more often the advantage-gaining aspect of the basic meaning of gambit is stressed, and the term is applied to a trick or tactic designed to gain its user a competitive advantage often by harassing or embarrassing an opponent (<from the Russian point of view it is no mere diplomatic gambit to keep Germany weak and disunited: it is a doctrine of self-preservation—Harold Nicolson>) (<if a stranger just ahead drops a rosemary, don't be opening gambit of the oldest trick in the world—Aldor>) <to avoid the multitude of taxes and assessments, the standard gambit of the peasant was to "dress poor" and "talk poor"—Idzerda>) Nobody could be sure whether his anti-market talk was real, or simply a Gaullist gambit designed to enhance the French bargaining position—Scheingold Ploy carries a suggestion of finesse and often of roguishness and can very close to come the last-mentioned value of gambit (<this summer's ploy in the game of onepalmanship, is to holiday in Europe without doing the great museums. . . little out-of-the-way museums and provincial churches are admissible. Truce, cease-fire, armistice, peace are comparable when they mean a state of suspension of hostilities or an agreement for suspending hostilities. The first three terms are commonly interchangeable and each of them can sometimes replace peace, yet all four terms can so differ in emphasis and in connotation as to permit them to be used distinctively and with a degree of precision. Truce is the most general term and can apply to an understanding or agreement for the suspension of hostilities or to a resulting suspension, not only on the part of military forces and nations but equally in the case of disputes (as between labor and management) and of individuals engaged in disputing (<a volume of essays . . . where the parts of his complex and tortured spirit come together in a truce—F. H. Bullock>) Historically truce denotes an interruption of hostilities for a predetermined and specified period, and it remains the most appropriate term when this notion is prominent (<on Christmas Eve the Communist high command called a truce for the holidays—Collier's Yr. Bk.>) (<wants a two or three year truce on tariffs—Vernon>) Truce also is appropriately used when the agreement is local rather than general (<agree to a truce to bury the dead>) or when there is a clear indication that no general or permanent termination of hostilities is proposed (<in international law, [truce is] an agreement between belligerent parties by which they mutually engage to forbear all acts of hostility against each other for some time, the war still continuing—Collegiate Law Dict.>)

Cease-fire is the most recent of these terms and is rarely used except in relation to actual military engagement. cease-fire permanent—U. N. Bulletin) but more often it implies a cessation of hostilities for an indefinite period of time with the warring parties, typically in a state of military readiness, remaining in the positions they held at the time hostilities ceased or withdrawing a short distance to create a demilitarized zone and without the implication of a permanent peaceful settlement (the fighting should be stopped by an armistice agreement. A cease-fire leaving opposing forces where they now are would be unsatisfactory—Tillman Durdin) <press for a reduction in the military strength of the parties holding the cease-fire line—U. N. Background Papers> Cease-fire may additionally suggest the intercession of a neutral party in securing the cessation of hostilities <had two weeks in which to persuade Nationalists and Communists to quit shooting at each other before sitting down together; he arranged a cease-fire just 30 minutes before the conference began—Time> <cease-fire arrangements by the United Nations—Landis> and in supervising its observance <contribute contingents to the United Nations for . . . the supervision of agreed cease-fires—Munro> Armistice (in full, general armistice) basically applies to a formal agreement at the highest level for the laying down of arms and a suspension of military operations; though it does not ordinarily suggest a permanent state, it does commonly imply one that persists either indefinitely or until termination of hostilities by a peace treaty (an armistice is a written agreement, usually between the highest authorities of the warring powers, which suspends military operations for a definite or indefinite period of time. . . . A General Armistice is broader in scope, embodying both military and political principles and usually precedes peace negotiations—Coast Artillery Jour.) <no treaty followed the armistice, which was never more than an imperfect cease-fire—Liebling> But sometimes armistice (in full, local armistice) applies to a merely local or temporary suspension and is then indistinguishable from truce in a similar sense (an armistice is an agreement for the general cessation of active hostilities between two or more belligerents. Distinguished from general armistices are arrangements for a short-term or partial suspension of arms called local armistice or truce which may be made between commanders in the field, for a variety of purposes such as burying the dead. General armistices are made by commanders in chief, usually pursuant to political decision of the governments concerned. An armistice does not put an end to the state of war—Gross) In its occasional extended use armistice usually stresses the temporariness and uncertainty of the state (he had learned to live in the land and had established an uneasy armistice between himself and the hostility of rocks and elements—Mowat> Peace (compare peaceable and peaceful under Pacific) can denote a state of mutual concord between governments or more specifically the state resulting from the termination of hostilities (if ever there is to be a peace which is not an armistice, men must learn to live at least as well as they now know how to die—J. M. Brown) <today there is a truce in Korea. After 3 years of hostilities, we are now in the first year of an armed peace—Eisenhower> or it can apply to an agreement by which such a state is attained <the purpose of some overtures, it could be foreseen, would be to test out Allied solidarity by offering a tempting separate peace to one or the other—Feis> (the severely punitive peace ... which the Allies attempted to impose upon Turkey—Kennan) Unlike the other terms to truce imputes permanence or an intention of permanence to the state of or the agreement for suspension of hostilities <Adler says flatterly that there can be no peace between sovereign states; at best there can be nothing more than an uneasy "truce," a period of jockeying and diplomatic cheating preliminary to the next outbreak of armed conflict—Time> truckle *fawn, toady, cringe, cower Ana defer, succumb, bow, cave, *yield, submit: *follow, tag, trail, tail truculent *fierce, ferocious, barbarous, savage, inhuman, cruel, fell Ana intimidating, cowing, bulldozing, browbeating, bullying—(see INTIMIDATE): terrorizing, terrifying, frightening (see FRIGHTEN): threatening, menacing (see THREATEN) true 1 *faithful, loyal, constant, staunch, steadfast, resolute Ana *reliable, dependable, trustworthy, tried: persevering, persisting (see PERSEVERE): *sincere, whole-hearted, whole-souled, unfeigned Ant false (sense 2): fickle 2 *real, actual Ana genuine, *authentic, veritable, bona fide: exact, precise, *correct, right: typical, natural, *regular Ant false truism *commonspeak, platitudinous, bromide, cliché Ana triteness, threadbareness (see corresponding adjectives at TRITE): banality, jejune, inanity (see corresponding adjectives at INSIPID) trust n 1 Trust, confidence, reliance, dependence, faith can all mean the fact of feeling sure or the state of mind of one who feels sure that a person or thing will not fail him. Trust implies an absolute and assured resting on something or someone; it often suggests a basis upon other grounds than experience or sensible proofs. It is the most frequent term in religious use <O God . . . in thee is my trust—Ps 141:8> but it occurs also in secular use, especially when an intimate knowledge of or a deep affection for someone is implied <he was a gentleman on whom I built an absolute trust—Shak.> or when there has been no cause for changing an instinctive or intuitive judgment respecting a person's or thing's reliability <the ways in which some of the most highly placed and powerful figures in the state have betrayed the public trust—Armbrister> Confidence need not imply such definite grounds for one's assurances as the support of experience or of convincing evidence; when it does, it carries less suggestion of emotional factors than trust and a stronger implication of an assurance based upon the evidence of one's senses (those in whom we had no confidence, and who reposed no confidence in us—Burke) When it does not imply such grounds, it usually suggests less reliable grounds for that feeling than does trust <he had a . . . an unquenchable confidence in himself and a deep, burning sense of mission—Shirer> Reliance implies not only an attitude or feeling but also an objective expression of it in act or action <he had such reliance on the doctor's skill that he allowed himself to be operated upon at once> <his diffidence had prevented his depending on his own judgment in so anxious a case, but his reliance on mine made everything easy—Austen> <Mark had written out his Christmas sermon with a good deal of care and an excessive reliance on what other preachers had said before him—Mackenzie> Dependence differs from reliance chiefly in suggesting greater subordination of self <affectionate dependence on the Creator—Thomas Erskine> (he had a . . . mixture of conceit and terrible self-doubt, and . . . he shifted between extremes of emotional dependence and independence—Wouk> Faith (see also BELIEF 1) implies confidence, but it often suggests a degree of credulity or an unquestioning acceptance of something capable of being objectively tested and proved or disproved; it is often used when the person or thing in which one has faith is open to question or suspicion <he has great faith in a popular patent medi-

truth, veracity, verity, verisimilitude are comparable when they mean the quality or property of keeping close to the facts or to things as they are and avoiding such distortions as lies, fictions, or misrepresentations. Truth is a general term ranging in meaning from a transcendent idea to an indication of conformity with fact and of avoidance of error, misrepresentation, or falsehood (the truths of religion are more like the truths of poetry than like the truths of science: that is, they are vision and insight, apprehended by the whole man, and not merely by the analyzing mind—Times Lit. Sup.) (truth as the opposite of error and of falsehood—Eliot) Veracity usually implies rigid and unfailing adherence to, observance of, or respect for truth (question an opponent's veracity) his passion for veracity always kept him from taking any unfair rhetorical advantages of an opponent—Huxley) (I cannot, indeed, guarantee the absolute veracity of any of my apparently authentic law reports—Sutherland) Verity typically designates the quality of a state or thing in being true or entirely in accordance with factual reality or with what should be so regarded; sometimes the word designates what is marked by lasting, ultimate, or transcendent value (most primitive and national religions have also started out, naturally enough, with the assumption of their own verity and importance—Kroeger) (the old verities and truths of the heart, the old universal truths lacking which any story is ephemeral and doomed—love and honor and pity and pride and compassion and sacrifice—Faulkner)

Verisimilitude describes the quality of a representation that causes one to accept it as true (to convey human nature in fiction requires the highest degree of verisimilitude: events that seem just like those of life as the reader's experience has led him to conceive of life must happen to people who seem just like human beings in a succession which seems just like the course of human affairs—E. K. Brown) (the mathematical picture . . . so far as we know . . . depicts the phenomena of nature with complete verisimilitude—Jeans)

tumor, neoplasm, malignancy, cancer can all denote an abnormal growth or mass of tissue. Tumor, the most general term, is applicable to any such growth or mass in or on the surface of the body of a human being, animal, or plant (the term tumor literally means a swelling, and thus has been applied to the prominence caused by an overdistended bladder, to the enlargement of pregnancy, to the swelling produced by an abscess, to the overgrowth of tissue (hyperplasia) associated with injury and consequent inflammation, and to numerous other phases of true enlargement directly connected with recognized disease processes—Mohler) Neoplasm often replaces tumor in technical use when the reference is specifically to a more or less unrestrained new growth of cells that serves no physiological purpose or to a mass formed by such growth (a neoplasm is an uncontrolled new growth of tissue—Shields Warren) Malignancy in application to a neoplasm denotes a growth that because of unrestrained proliferation and tendency to spread and invade other tissues constitutes a danger to life. This use, though deplored by some purists, is common in technical literature and often used euphemistically in discussion with a patient or his associates. Cancer is the usual popular and technical term for a malignant neoplasm, though sometimes it is applied specifically to such neoplasms arising in epithelial tissues (as skin or membrane) which are more often distinguished as carcinomas from the other great class of cancers, the sarcomas, that originate in non-epithelial tissues (as bone, muscle, or connective tissue).

turbid, muddy, roily are comparable when they mean not clear or translucent but clouded with or as if with sediment. Turbid describes something (as a liquid or, in extended use, an idea, affair, or feeling) which is stirred up and disturbed so that it is made opaque or becomes obscured or confused (the turbid water of a river in flood) (careless handling of a bottle makes wine turbid) (the turbid ebb and flow of human misery—Arnold) (the air without had the turbid yellow light of sandstorms—Cather) (turbid feelings, arising from ideas not fully mastered, had to clarify . . . themselves—H. O. Taylor)

Muddy describes something which is turbid or opaque as a result of being mixed with mud or with something suggestive of mud or which is merely mud-colored (muddy coffee) (a muddy pond) In extended use the term carries a stronger suggestion than turbid of a dull, heavy, or muddled character (a muddy complexion) (a muddy

vb turn, revolve, rotate, gyrate, circle, spin, twirl, whirl, wheel, eddy, swirl, pirouette can all mean to go or move or cause to go or move in a circle. Turn is a general rather colorless word implying movement in circle after circle or in a single full circle or through an arc of a circle. It is interchangeable with most of the other terms in their less specific uses [a wheel turning on its axle] [turned to speak to his friend] Revolve may suggest regular circular motion on an orbit around something exterior to the item in question [the earth revolves around the sun] It may refer to the dependence of the less important, the secondary, on something cardinal or pivotal which resolves or determines [though local questions, such as the State Bank and state aid to railroads, gave rise to sharp contests, politics usually revolved around national questions—A. B. Moore] [everything in that house revolved upon Aunt Mary—Deland] Rotate is likely to suggest a circular motion on an interior axis within the thing under consideration which may be not moving otherwise [the earth rotates on its axis while it revolves in its orbit] Gyrate may suggest the regularity of revolve, but it is more likely to be used to indicate a fluctuating or swinging back and forth which describes circular or spiral patterns [stocks gyrated dizzyly on uncertainty over the foreign situation—Wall Street Jour.] [a low cloud of dust raised by the dog gyrating madly about—Conrad] Circle basically applies to a movement around in a more or less circular pattern, but it can also be used with reference to a lack of straight directness in a winding course [a flock of black ibises circled high overhead wheeling endlessly on the ascending air currents—Dillon Ripley] [the essayist's license to circle and meander—Wooll] or, specifically, to a curved or arched course followed in avoiding something [the soldiers were circling homewards in high spirits at a safe distance from the war area—Walt]  

Spin implies rapid sustained rotation on an inner axis or fast circling around an exterior point [he who but ventures into the outer circle of the whirlpool is spinning, ere he has time for thought, in its dizzy vortex—Bayard Taylor] Twirl can add to the ideas of spin those of dexterity, lightness, or easy grace [this . . . book . . . I toss i t the air, and catch again, and twirl about—Browning] Whirl stresses force, power, speed, and impetus of rotary or circular motion [and collections of opaque particles whirled to shore by the eddies—Bartram] [the withered leaves had gathered violence in pursuit, and were whirling after her like a bevy of witches—Glasgow] Wheel may suggest either going in a circular or twisted course or turning on an arc or curve to a new course [a familiar sight is the turkey vulture wheeling against the skies to the north—Amer. Guide Series: Ariz.] [she had crossed the threshold to the porch, when, wheeling abruptly, she went back into the hall—Glasgow] Eddy suggests the circular movement, sometimes fast, sometimes slow, of an eddy; it may be used in situations involving indirectness, futility, or isolation from main currents [as the smoke slowly eddied away—Crane] [the dead leaves which eddied slowly down through the windless calm—West] [waves of friends and reporters eddied through the . . . apartment—Time] Swirl suggests more rapidity, flow, or graceful attractiveness than eddy [further than ever comet flared or vaprant star dust swirled—Kipling] [the black water was running like a millicre and raising a turbulent coil as it swirled and tossed over the ugly heads of jutting rocks—Costain] [her dark hair swirled about her face—Helen Howe] Pirouette suggests the light graceful turning of a ballet dancer [ashes pirouetted down, coquetting with young beeches—Tennyson]

2 Turn, divert, deflect, avert, shee are comparable when they mean to change or cause to change course or direction. Turn is the most comprehensive of these words and the widest in its range of application. It may be used in reference to any change in course or direction of something movable, no matter how small or how large an arc is traversed, but it usually requires qualification [here the river turns slightly to the north] [the turn of the car just in time to avoid a collision] the force of the impact turned the boat completely around] It may also be used in reference to something (as things that show a drift, a bent, or a tendency or persons or things that can respond to an influence) which follows a figurative course or proceeds in a definite direction [turn the conversation to livelier topics] [turn public opinion against a person] [turn an enemy into a friend] [even the younger men had turned against me—Yeats] [in his need his thoughts turned to the sea which had given him so much . . . congenial solitude—Conrad] Divert may be preferred to turn when there is an implication of an imposed change in an existing or a natural course or direction [divert a river by providing a new channel] [the unfounded belief that a lightning rod is capable of diverting lightning from a building it is about to strike] [the machinery of our economic life has been diverted from peace to war—Attlee]  

When used in reference to a person's concerns (as thoughts, interests, attention, or intentions) it often presupposes mental concentration, fixation of attention, or resoluteness of purpose; therefore, when an attempt to alter the situation (as by distracting, dissuading, or sidetracking) is to be suggested, divert is the appropriate word [hard to divert his attention when he is engrossed in study] [had I spoke with her, I could have well diverted her intent—Shak.] [could France or Rome divert our brave designs, with all their brandies or with all their wines?—Pope] Deflect, in contrast to divert, implies a turning (as by bouncing, refracting, or ricocheting) from a straight course or a fixed direction [deflect a ray of light by passing it through a prism] [deflect a magnetic needle] In its technical use, deflect is used to suggest purpose or interests that pursue a rigid or clearly defined course or direction; consequently the word sometimes connotes deviation or aberration ( he underwent all those things— but none of them deflected his purpose—Bello] [after
all, she had perhaps purposely deflected the conversation away from her own affairs—Wharton. Avert implies a turning away from what is before one physically or mentally; it is used chiefly in reference to something at which one has been looking or of which one has been thinking and carries commonly a strong implication of avoidance and, often, a further suggestion of repugnance (tried to avert her eyes; but like a child irresistibly drawn to peek at the monster in a horror movie... kept glancing at Mr. Greech—Wouk).

Sheer is used basically in reference to the turning of a boat or ship from its course especially in an emergency (the yachts sheered to so that their captains could speak to each other) (sheer off the boat just in time to avoid collision with a rock). In its extended use the word commonly implies a sudden or conspicuous turning aside from a path or course that has been followed (an age when the interests of popular liberty and of intellectual freedom had sheered off from the church—J. R. Green).

Ana uncertainty, doubt, dubiety, dubiosity, skepticism, suspicion, mistrust can all mean a feeling of uncer- tainty about someone or something. Uncertainty stresses the lack of certainty or certitude that may range from a mere falling short of these to an almost complete lack of knowledge or conviction especially about the result or outcome of something <suffered an agonizing uncertainty concerning his son’s fate> <she drove without any uncertainty or hesitation as to her route—Deland> <if you are really in love, there is no uncertainty: there must not be, or else your marriage would always be... a gamble—MacInnes>
<waited in eagerness and impatience, and then in uncertainty, in anxiety, in hurt pride, in anger—Farrell>
Doubt implies both an uncertainty about the truth or reality or status of something and an inability to make a decision, often even after study or investigation; frequently the term implies such a feeling or state of mind in respect to religious beliefs or doctrines <he never felt a doubt of God’s existence> <there crept into the diary... signs of doubt and then of despair—Shirer> <longed for some reassurance in the midst of the dismay and doubt which possessed her—Gibbons>
<no man likes to have his intelligence or good faith questioned, especially if he has doubts about it himself—Henry Adams>
Dubity (compare dubious under DUBTFUL) comes closer to uncertainty than to doubt, for it stresses a lack of sureness rather than an inability to reach a decision as to where the truth lies. But it regularly carries, as uncertainty does not, a strong implication of wavering or of fluctuations between one conclusion and another <faith free from all dubity> <the twilight of dubity never falls upon him—Lamb> <cannot escape the dubieties and problems of his day... finds himself swerved from his certainties and confronted with the tenuousness of his preconceptions—Sat. Review>
Dubiosity is not always distinguishable from dubity <men... swallow falsities for truths, dubiosities for certainties—Bowrce>
Sometimes, however, it suggests not uncertainty, but vagueness, indistinctness, or mental confusion <had not cogitated long ere she pronounced distinctly and without a shadow of dubiosity: "My opinion is...”—Meredith>
Skepticism suggests in this, its general sense, an unwillingness to believe without demonstration or an incredulity while any plausible evidence to the contrary exists; it usually refers to a habitual or temperamental state of mind or to a customary reaction to something proposed for belief <an easy and elegant skepticism was the attitude expected of an educated adult; anything might be discussed, but it was a trifle vulgar to reach very positive conclusions—Russell> <has found that skepticism rather than dogmatism is the key to human freedom—New Republic>
Suspicion stresses conjecture or apprehension that someone or something is not true, real, or right or that he or it has worked or is working evil or injury, but it also implies that the conjecture or apprehension is accompanied by uncertainty or doubt, often to the extent that the term comes close to doubt <seized with unwonted suspicion of his own wisdom—Meredith> <a glance of defiant nonchalance which... became a look of suspicion, and, finally, of rude disdain—Terry Southern>
The most ordinary actions became... entangled in complicated webs of apprehension and suspicion—Gibbons>
<a stranger... regarded with suspicion, if not actual hostility—Hudson>
Mistrust (see also DISTRUST) implies doubt that is based upon suspicion and that therefore precludes the possibility of one’s having faith or confidence or trust in a person or thing <intracommunity bickering, conflict, and mistrust obscure the steady vision of extracommunity danger—A. E. Stevenson> <man is only weak through his mistrust and want of hope—Wordsworth>

Unconstraint, abandon, spontaneity can all denote the free and uninhibited expression of one’s thoughts or feelings or the quality of mood or style resulting from a free yielding to impulse. Unconstraint is the most general term and may be used in place of either of the others, though it is less positive in its implication <the old red blood and stainless gentility of great poets will be proved by their unconstraint—Whitman>
Abandon adds to unconstraint the implication either of entire loss of self-control <weep with abandon> or of the absence or impotence of any influence hampering free, full, or natural expression of feeling <had the fire and abandon that alone
can arouse audiences to fever pitch—Copland) <jazz
is the passion of movement, excitement, abandon, sex—Overstreet> Spontaneity suggests an unstudied naturalness
and agreeable freshness of expression or manner; sometimes it connotes lack of deliberation and obedience
to the impulse of the moment (Keats' letters . . . have a
deceptive spontaneity which invites the mind to pass
over them . . . without pausing to penetrate below the

understand, comprehend, appreciate mean to have a clear
idea or conception or full and exact knowledge of some-
thing. Understand and comprehend both imply an obtain-
ing of a mental grasp of something and in much of their
use are freely interchangeable ("You begin to com-
prehend me, do you?" cried he . . . "Oh! Yes—I under-
stand you perfectly!"—Austen) <the artist, it seemed . . .
had thoughts so subtle that the average man could com-
prehend them no more than a mongrel could understand
the moon he bayed at—Wolfe> But understand may stress
the fact of attained grasp, and comprehend may stress the
process by which it is attained; thus, one understands a
decision when he knows what it involves even though he
fails to comprehend the reasoning process on which it
was based: a person may understand a foreign language
without comprehending exactly how he learned it <for
well on a thousand years there have been universities
in the Western world; to understand the present institu-
tions, we must therefore comprehend something of their
history—Conant> Sometimes the difference is more sub-
tle, for understand can imply the power to receive and
register a clear and exact impression, and comprehend
can imply the mental act of grasping clearly and fully;
thus, the concept of infinity can be understood theo-
retically though scarcely comprehended as a verity (in order
fully to understand America, it is helpful to have some
grasp of the origins, culture and problems of the racial
and religious groups which are gradually being fused into
one people—Current History) (the average layman—or
Congressman—is deemed unable to comprehend the
mystic intricacies and intrigues of foreign affairs—K-
ennedy) <felt in Russia the presence of elements he

value; therefore the word is used in reference to persons
or things which may be misjudged (as by underestimating
or overestimating or by undervaluing or overvaluing)
<you are of an age now to appreciate his character—

unfold 1 Unfold, evolve, develop, elaborate, perfect can all mean to cause something to emerge from a state where its potentialities are not apparent or not realized into a state where they are apparent or fully realized. Unfold suggests usually a natural process by which is unveiled or disclosed the true character, the real beauty or ugliness, or the significance or insignificance of someone or something (the bud unfolds itself into the flower) (I see thy beauty gradually unfold, daily and hourly, more and more—Tennyson) (they were theater people, and the unfolding of a new creative work was a solemnity—Wouk) Evolve implies an unfolding or unveiling itself gradually and in orderly process; the term is particularly applicable when the slowness of the process and the complications involved in it are to be suggested (the Protozoa . . . evolved the types that were transitional to higher animals—Miner) (societies are evolved in structure and function as in growth—Spencer) (life has evolved according to a Creator’s plan—Marquand) However evolve is often used with weakened emphasis on the implications of slowness and complexity to imply specifically the production of a result (as an idea, a theory, or an aesthetic effect) from within or as if from within (with combined with the scenery of Egdon Heath to evolve a thing majestic without severity, impressive without showiness—Hardy) (this novel and intensely exacting technique, evolved . . . by the critical genius of a few . . . Frenchmen and of Henry James—Montague) Develop (see also mature) implies a passing through several stages and stresses the coming out or unfolding of latent possibilities in a thing, whether by a natural process or through human means (compare development) (there were different ideas of how the paper should develop. They wanted it to be successful; I wanted it to be outrageous—Mailer) (shorter than his wife—a jolly pink-faced man with a quietness that might have been developed to complete the unassuming noisemaker—Cheever) (one of the great European thinkers of the eighteenth and early nineteenth centuries . . . helped to develop the conception Shaftesbury first formulated—Ellis) Elaborate distinctively stresses attention to detail and increasing complication by means of which the latent possibilities of a thing are more fully or completely developed (the sun, under whose influence one plant elaborates nutrient for man and another poison—Southey) (the constitutional system which was in course of being gradually elaborated—Gladstone) (the Negro discovered and elaborated a morality . . . an ethical differentiation between the good and the bad in every human activity—Mailer) Perfect stresses a freeing from faults, defects, or blemishes, and it can additionally imply an unfolding or development of something so that it stands as a complete or finished product (she had cultivated and perfected a vast cowlike limb which served her now in good stead—Pynchon) (he first conceives, then perfects his design, as a mere instrument in hands divine—Cowper) (a new determination to complete and perfect his plant-setting machine had taken possession of him—Anderson)

Ant divide: alienate

2 Unite, combine, conjoin, cooperate, concur are comparable especially when they are applied to people or groups or categories of people or to human institutions and when they mean to join forces so as to act together or to form a larger unit. Unite may suggest either of these ends (to unite their strength to maintain international peace and security—Dean) (states which would be politically independent but economically united—Current Biog.) but it more commonly suggests the formation of a new or larger unit (as by merging) (slowly uniting the Middle Eastern peoples in a strong emotional, religious nationalism—Atyeo) Combine (see also JOIN) is often used interchangeably with unite, but it may be preferred when a somewhat looser or more temporary association is to be suggested (several citizens combined to lead the campaign for the adoption of the city-manager form of government) (it is not so difficult to combine matrimony and a career such a small city—Hobby) Combine also is the one of these words that is at all likely to carry derogatory connotations (compare combine under COMBINATION) (no man is at liberty to combine, conspire and unlawfully agree to regulate the whole body of workingmen—J. N. Welch & Richard Hofstadter) Conjoin (see also JOIN) stresses firmness of the combination (the English army, that divided was into two parties, is now conjoined in one—Shak.) (despotism, priesthood, and proletariat have ever been good friends; a kind of freemasonry . . . has conjoined them from time immemorial against the honest and educated classes—Norman Douglas) Cooperate implies a combining for the sake of action or mutual support or assistance (it is . . . difficult to induce a number of free beings to cooperate for their mutual benefit—Goldsmith) (because the states can so seldom cooperate on common problems, federal intervention is inevitable—Armbrister) Concur in this relation retains the notion of agreement from another of its senses (which see under AGREE 2) and specifically implies a joining in agreement (was also a member of the Senate Finance Committee, with which he concurred in a recommendation of lowered income taxes—Current Biog.) (the Scotch philosopher believed that there was a moral discipline in nature . . . Bryant and Cole concurred in this opinion—Ringe)

An mingle, commingle, coalesce, fuse (see MIX): adhere, cohere, *stick, cling, cleave

Ant part

unity, solidarity, integrity, union can all denote a combining of all the parts, elements, or individuals into an effective whole, or the property or character of the whole achieved by such a combining. Unity is the comprehensive term applicable to wholes formed either of persons or of things: it may characterize such diverse things as a people, a nation, a church, an association, or a natural or artificial structure (as the human body or a cathedral) or a work of art (as a drama, an epic, a painting, or a bas-relief). In every case it implies oneness, especially of what is varied or diverse rather than uniform in its elements, that is gained by the interdependence of parts or individuals and by the cooperation of all so that each within its proper limits helps in effecting the end of the whole (the indispensable unity of a beautiful design—Alexander) (the wish to impose order upon confusion, to bring harmony out of dissonance and unity out of multiplicity is a kind of intellectual instinct, a primary and fundamental urge of the mind—Huxley) Unity often implies a oneness of spirit that results in a group of persons when there is harmony and concord (what he sought was unity of sentiment, not an unfeathered uniformity, and he attained it—Buchan) Solidarity denotes a kind of unity in a group (as a class, a community, or an institution) which enables it to show its strength, express its opinion, or exert its influence both through individuals and through the whole with the force of an undivided mass; the term implies unwillingness in individuals or in subgroups to go counter to the interests, aspirations, or will of the group as a whole (one secret of their power is their mutual good understanding . . . They have solidarity; or, responsibility, and trust in each other—Emerson) (instead of national solidarity following the war, we have only a revival of Know-Nothingism; one faction of hyphenates tries to exterminate another faction—Mencken) (the Mingotts had not proclaimed their disapproval aloud: their sense of solidarity was too strong—Wharton) Integrity is used chiefly in reference to wholes that have been built up so that each stands as a thing marked by completeness and a unity dependent on the perfection of its parts and their mutual interdependence; the term usually stresses soundness, undividedness, or freedom from impairment (guarantee the integrity of the British Empire forever—Upton Sinclair) (the integrity, the clean drive and the unforced power that distinguishes the good “primitive” novel—Morton) Union is the general term for the act of uniting several things to form a whole or for the body or organization which results from such a uniting (the union of thirteen states to form the United States) However the term can carry the deeper implications of a thorough integration of parts and of their harmonious cooperation (such harmony alone could hold all Heaven and Earth in happier union—Milton) (the union, peace and plenty of the kingdom—Clarendon) (thanks to . . . God, who has restored union to my family—Scott)

An identification, incorporation, embodiment, assimilation (see corresponding verbs at IDENTIFY); cooperation, concurrence, uniting, combining (see corresponding verbs at UNITE): integration, concatenation, articulation (see under INTEGRATE)

universal 1 Universal, cosmic, ecumenical, catholic, cosmicopolitan can all mean worldwide or at least extremely widespread (as in extent, range, influence, appeal, or use). Universal is likely to suggest what is worldwide rather than pertinent to or characteristic of the whole universe; it is often further narrowed to refer to the world of men and human affairs or to important or significant parts of this world. It is likely to indicate a unanimity or conformity of practice or belief or a broad comprehensiveness (no other theory which has won universal acceptance—Binyon) (the universal favor with which the New Testament is outwardly received—Thoreau) (replaced a philosophy which was crude and raw and provincial by one which was, in comparison, catholic, civilized, and universal—T. S. Eliot) Cosmic is used to suggest matters pertinent to the whole universe as opposed to the earth, especially in suggestions of infinite vastness, distance, or force (sardonic phantoms, whose vision is cosmic, not terrestrial—Lowes) (the great cosmic rhythm of the spirit which sets the currents of life in motion—Binyon) Ecu-

E. Davis) disastrous is not infrequently used in a much weakened sense without a hint of inevitability or, often, an implication of consequences more serious than that of a turning of the tables upon one or the other of the participants or contenders (a . . . denial of poetic possibilities . . . is liable to disastrous refutation by a triumphant instance of the “poetizing” . . . of that very word—Lowe) ill-starred, on the other hand, is close to ill-fated in meaning in that both imply an evil and unavoidable destiny awaiting a person or an action (the holiday was ill-starred from the outset, and a series of minor catastrophes culminated in a blowout on a lonely road—Curt) (the ill-fated attempt to collect the old war debts—Soule) (served as a wagoner with General Braddock’s ill-fated army—J. M. Brown) Unfortunate, though often interchangeable with unlucky, carries a much weaker implication of the intervention of chance (had an unfortunate day at the races) and a much stronger suggestion of misfortune, misery, unhappiness, or desolation, often to the extent of eliminating all suggestions of luck or of chance; occasionally it means nothing much more than regrettable or disastrous in its weakened sense (a most unfortunate family) (an unfortunate choice of words) (expecting some unfortunate woman to instruct simultaneously a crowd of fiftyurchins of all degrees of ignorance—Grandgent) Calamitous, which is used of events rather than persons, resembles unfortunate in its frequent elimination of all suggestion of luck or chance and in sometimes meaning little more than regrettable or upsetting (mother was afraid to leave the house in case something calamitous would happen, so we had a little extra time for dressing—Molly Weir) but it, like the noun calamity (which see under disaster) often suggests dire misery or the utmost of woeful distress typically stemming from some grave and extraordinary event (in that calamitous year of 1893 a total of 277,952 foreclosures forced people out of their homes—O’Brien) (men naturally admire Hannibal though the success of his cause might have been calamitous to the progress of civilization—Cohen) (there was more news than ever before, practically all of it calamitous—Catton) Luckless and hapless are more or less rhetorical terms implying that the person or thing so described has or reveals less than average good luck or good fortune (as in his undertakings or in their outcome); usually these words mean nothing more than unhappy, miserable, or wretched (she had disobeyed— and at the wrong time. unmarried, single, celibate, virgin, maiden are comparable as adjectives when they mean not united in bonds of marriage. Unmarried merely states the fact; it is usually applied to those who have not yet married, but in law, it is applicable to a person who has been divorced and has not remarried and, sometimes, to one who has been widowed (an unmarried woman) (he said he would remain unmarried) (the question of being both unchaste and unmarried apparently never arises—Marcuse) Single is applied to those who are not yet married but is commonly used of those who remain unmarried through life (housing problems of single men and women) has to take anything she can get in the way of a husband rather than face penury as a single woman—Shaw) Celibate may be applied to the state of one having no expectation of marrying and it is especially applicable to that of one who is bound by a solemn vow to abstain from taking a mate. It is used chiefly of priests, monks, and nuns, of others who have dedicated their lives to religion, or of men or women who have accepted a way of life incompatible with having a spouse. For children (the masses of [Orthodox] believers preferred to confess to the celibate holy men . . . in the distant monastary—Bards) (the dandy must be celibate, cloistral; is, indeed, but a monk with a mirror for beards and breviary—an anchorite, mortifying his soul that his body may be perfect—Beerbohm) Virgin tends to stress a pure unassiled state of chastity. It usually applies to the unmarried but it may also be referred to the married when the marital relation has not been consummated, usually on grounds of choice (Saint Ursula and her virgin companions) (the young chief could not be told . . . for he was married, and the secret could be given only to a virgin youth—Conr) Maiden holds much the same implications as virgin, but it often differs in its heightened implication of not having married and in its subdued suggestion of purity and freedom from sexual intercourse (he has two maiden sisters) (his mind partly on a slit-skirted maiden cyclist—Birney) unmatured *immature, unripe, unmellow Ant matured —Con *mature, adult, grown-up unmellow *immature, unripe, unripe Ant mellow, mellowed —Con developed, ripened, matured (see mature vb) unmindful *forgetful, oblivious Ant heedless, thoughtless, *careless, inadvertent: *negligent, neglectful, remiss Ant mindful: solicitous —Con careful, concerned, anxious, worried (see under care): *thoughtful, considerate, attentive unmitigated *outright, out-and-out, arrant unnormal *imnormal, amoral, nonnormal unnatural anomalous, *irregular Ant *abnormal, aberrant, atypical: *monstrous, prodigious: *fantastic, grotesque, bizarre Ant natural unnerve, enervate, unman, emasculate can all mean to deprive of strength or vigor and of the capacity for endurance, overcoming difficulties, or making progress. Unnerve implies marked loss of courage, steadiness, and self-control or of power to act or fight usually as a result of some calamity or sudden shock (government was unnerved, confounded, and in a manner suspended—Burke) (that beloved name unnerved my arm—Arnold) Unnerved, hesitantly, unnerved and bewildered—Styron (the narcotic and unnerving property of these stimulants has been thoroughly established—Day Lewis) Enervate implies a more gradual physical or moral weakening or dissipation of one’s strength until one is too feeble
to make effort; usually the term implies a weakening of moral fiber under the influence of such debilitating factors as luxury, indolence, or effeminacy (those unhappy people whose tender minds a long course of felicity has enervated—Bolingbroke) (Plato asserts that a life of drudgery disfigures the body and . . . enervates the soul—Dickinson) Unman implies loss of manly fortitude or spirit; it often suggests a shameful reduction to tears, tremors, extreme timidity, or other state regarded as womanish (what, quite unmanned in folly? . . . Fie, for shame!)—Shak.) (the strangeness of the night . . . the dead man they had left in the field had unsettled them all and had unmanned at least one of them—Cheever) Emasculate (see also Sterilize 1) implies a loss of essential or effective power especially by the removal of something (as a factor or a condition) which has made for strength (as of a person, a group, or a law) (Hellenism . . . was not destroyed, though it was emasculated, by the loss of political freedom—Inge) (many states emasculated such civil rights statutes as exist—Swindler) An unoffending *harmless, innocuous, innocent, inoffensive unpremeditated *extemporaneous, extempore, extem- unpropitious *grim, implacable, relentless, merciless impatient, nervous, restless, restive, uneasy, unquiet constant, incessant, *continual, continuous, unremitting unreligious ^irreligious, ungodly, godless, nonreligious unremitting constant, incessant, *continual, continuous, perpetual, perennial unripe *immature, unmatured, unmellow Ana crude, raw, green, callow, *rude: *premature, un-

unruly, ungovernable, intractable, refractory, recalcitrant, willful, headstrong are comparable when they mean not submissive to government or control. Unruly stresses a lack of discipline or an incapacity for discipline; in addition it often connotes such qualities as turbulence, disorderliness, waywardness, or obstreperousness (unruly children) (whatever my unruly tongue may say—J. R. Green) (the unruly passions—T. S. Eliot) (cleared the land, dug ditches and dammed unruly streams—Amer. Guide Series: Ariz.) Ungovernable implies either an incapacity for or an escape from guidance or control. When applied directly or indirectly to persons, it usually suggests either no previous submission to restrictions or a state of having thrown off previous restrictions (the fiercest and most ungovernable part of the . . . population —Macaulay) or the loss of all power to control oneself or to be controlled by others (he fell into an ungovernable rage) When used in reference to things, it usually suggests their incapacity for human direction or control (that . . . ungovernable wonder the wind—Hawthorne) Genius was as valuable and as unpredictable, perhaps as ungovernable, as the waves of the sea—Buck) Intractable and refractory both imply resistance to all attempts to bring under one's control, management, or direction. When applied to persons, intractable suggests a disposition to resist guidance or control (an intractable child) (an intractable temper) (his rough, intractable spirit—John Wesley) (a young man who resisted his mistress' wishes was an intractable young man indeed—Sackville-West) When applied to things, it suggests a more or less marked resistance to working, manipulation, treatment, or management (intractable soil) (an intractable metal) (Shakespeare was unable to impose this motive successfully upon the intractable material of the old play—T. S. Eliot) Refractory, on the other hand, often implies active resistance indicated by manifest disobedience, open protest, or rebelliousness (it becomes my duty to struggle against my refractory feelings—Burney) (there is no use in making the refractory child feel guilty; it is much more to the purpose to make him feel that he is missing pleasures which the others are enjoying—Russell) or, when the reference is to an inanimate thing, a degree of intractability that offers especially great resistance or presents unusual difficulties (bricks and other refractory substances are used to line furnaces) (cheerfulness is in ethics what fluor spar is in metallurgy. It is a flux absolutely necessary in dealing with refractory moral elements—Crothers) Recalcitrant carries an even stronger implication of active and violent resistance or of obstinate rebellion; it usually suggests defiance of another's will, order, or authority (his father became recalcitrant and cut off the supplies—Stevenson) (in Russia a minority of devoted Marxists maintain by sheer force such government as is possible in the teeth of an intensely recalcitrant peasantry—Shaw) The term is less often applied to things than intractable and refractory, but there is some use when seemingly insuperable difficulties are implied (he discovers poetry in the most unlikely places and wrings it out of the most recalcitrant material—Day Lewis) Willful usually implies intractability because of an overweening desire or an obstinate determination to

vagabond, vagrant, truant, tramp, bum, hobo mean a person who wanders at will or as a habit. Vagabond may apply to a homeless wanderer lacking visible means of support (apprehend all nightwalkers . . . vagabonds and disorderly persons—Philadelphia Ordinances) but more often it lacks derogatory implications and emphasizes the mere fact of wandering and implies a carefree fondness for a roaming life <Rousseau . . . that young vagabond of genius—L. P. Smith> (an exquisite defense of the fine art of irresponsible travel, and an encomium on the "cultured vagabond"—Nock> Vagrant is more likely to imply disreputableness and in its common legal use it denotes a person without fixed or known residence whose habits or acts are such that he is likely to become a public menace or a public charge (arrested as a vagrant) (the jail is the winter home of many vagrants) Even in more general use the term tends to carry stronger implications of disreputableness and waywardness than vagabond (every beggar, vagrant, exile-by-choice and peregrine-at-large . . . This whole hard-up population—Pynchon) (a chronic vagrant from the spirit's home—Sapir)

Truant carries its strongest implication the habit of wandering away from where one ought to be or of loitering when one ought to be elsewhere and especially at school (I have a truant been to chivalry—Shak)> (by truant we mean a boy of school age who intentionally stays away from school for no other reason than that he does not wish to go—Powers & Witmer) Tramp is the ordinary and generally derogatory word for one who leads a wandering life; it can apply to any such person whether

(a distinct class of these gentlemen tramps, young men no longer young, who wouldn't settle down, who disliked polite society and the genteel conventions—Sanctuary) Bum basically applies to a lazy, idle, and often drunken, good-for-nothing, who will not work but habitually sponges on others (dwell in a black-and-white world where a guy is either your pal or probably a bum—Hal Boyle) (the local ne'er-do-well, the traditional village bum) But bum, especially when qualified, may denote one who wanders in pursuit of a particular occupation or activity (fruit bums who follow the harvests north) (a ski bum) Hobo is often distinguished from tramp, sometimes in terms of willingness to work, sometimes in terms of methods of travel, the tramp being then taken as one who typically tramps the roads, the hobo as one who typically rides surreptitiously on freight trains. A common application of hobo is to the migratory worker who roves about following such seasonal occupations as harvesting and crop picking (hobo) are traveling workers, tramps are traveling shirkers and bums are stationary shirkers—Cleveland Plain Dealer (in Western parlance a hobo is not a tramp. valid, sound, cogent, convincing, compelling, telling can all be applied directly or indirectly to arguments, reasons, principles, or processes of thought or to their presentation and mean having or manifesting the power to impress themselves on others as right and well-grounded. Valid and sound both imply that the power is inherent in the rationality or logicality of the thought apart from its presentation. Something is valid against which no objections can be maintained, because it conforms strictly to the laws or regulations (as of the state or the church) (holds a valid title to a piece of property) (a valid ordination) (a valid marriage) or because it is supported or justified by facts and correct reasoning (a valid argument) (valid evidence) (universally valid principles—Inge) or, less often, because it is fully in accordance with claims

vanish, evanesce, evaporate, disappear, fade can all mean to pass from view or out of existence. Vanish implies a complete, often mysterious, and usually sudden passing; it commonly suggests absence of all trace or of any clue that would permit following until found (no facts on the mother's disappearance. Died in childbirth, ran off with someone, committed suicide: some way of vanishing painful enough to keep Sidney from ever referring to it—Pynchon) (all those emotions of fear and abhorrence . . . vanished instantly from my mind—Hudson) (Addison complained that in his time the very appearances of Christianity had vanished—Huxley) Evanesce differs from vanish in its greater stress on the process (as effacement or dissipation) by which a thing passes from visibility or thought; sometimes the term distinctly suggests a gradual process (1 touch a scarf and it falls into air and light and seems to evanesce—Goyen) (the sun-streaming clarity of checkered beach parasols, of friendly boys digging castles in the sand, faded in outline, evanesced from the bright precision of reality to vagueness of storm and fog—Joseph Bennett) Evaporate suggests a vanishing as silently and inconspicuously as water does into vapor (because of future expenses already mandated by the legislature, that surplus will evaporate soon—Armbrister) The term is often used in respect to tenuous qualities, but it may be employed to describe stealthy or prudent or sudden departures or withdrawals of persons (people whose faith, so tenuous anyway, had evaporated upon the threatening winds of a “cosmic cataclysm”—Styron) (looking at the high gray-green grass. A man could evaporate in that stuff in a second—R. O. Bowen) (if we try to express almost any poem of his in prose, we find it impossible; its rare spirit evaporates in the process—Day Lewis) Disappear stresses only the passing from sight or thought; the passing implied may be sudden or gradual, permanent or temporary, but such suggestions are mostly contextual and not in the word (the traditional view, that the world was made up of a vertical scale of creatures, gradually disappeared—S. F. Mason) (some say, let us go back to Palestine, else Judaism will disappear—Cohen) (seldom have other writers been able to disappear from their narrative as completely as Faulkner does—Robert Humphrey) Fade, often with out or away, implies a gradual diminution in clearness and distinctness until the thing becomes invisible (the ship gradually faded from sight) (all other certainties had faded or eroded away in growing up—Wouk) (this story seems to have faded out of the popular mind—Norman Douglas)

variety 1 Variety, diversity are comparable when they are used in reference to a group, class, or complex whole and imply the presence of two or more colors but stresses deviation from a type; 

2 Variety, subspecies, race, breed, cultivar, strain, clone, stock are comparable when they mean a group of related plants or animals narrower in scope than a species. These terms tend to be variable in application and subject to confusing overlap in use, but all can carry distinctive implications. Variety stresses deviation from a type; historically, it denotes an infraspecific category differing from the typical form of the species in characters that are too trivial or too inconstant to justify its separation as a distinct species. In modern use it is appropriately selected when it is desirable to call attention to such deviation without making any specific taxonomic suggestion or it may be used specifically of any such divergent group developed under human control (as by selective breeding, hybridization, and cultivation) (an early variety of peach) <developing new varieties to meet special conditions>

Subspecies, which stresses subordinate status, is primarily a taxonomic term applicable to a morphologically distinguishable subdivision of a species that is geographically isolated but physiologically capable of interbreeding with other comparable subdivisions of the same species. Race stresses common ancestry and differentiation based on relatively discernible hereditary characters (a race of albino mice) As applied to the human species (Homo sapiens), race is a highly controversial term that basically denotes any of the primary subdivisions of recent man historically native to distinct parts of the world and distinguished by relatively fixed characters in physical type (as skin color, hair form, and skull shape) (the Caucasian race) (the Mongolid race) In more general use race may apply to either large or small groups within a species. Though often used as if interchangeable race and variety are not exactly correspondent; while they sometimes agree, they more often overlap in their reference, for race emphasizes a common descent, while variety stresses divergence from a type. Breed can refer to a group within a species of animals or occasionally of plants the members of which presumably share a common ancestry and are visibly different from that of the background (tall, shiny, and lustrous—Ertz) Breeding may stress bold streaks of contrasting color (tall, barred, and white—straw) (the woods were streaked and pied with fresh transparent leaves and flowers—Wylie) 

varied, variegated, parti-colored, motley, checkered, checked, pied, peibald, skewbald, dappled, freaked; all mean having a pattern involving different colors or shades of color Variegated implies variation in the color (as of a single piece, object, or specimen) without indication of what colors or what forms spots, streaks, blotches are involved (disliked the variegated hues of the buildings they reminded him of the garish brilliance in the lower town—Norman Douglas) Variegated tulips Particolored implies the presence of two or more colors but stresses not so much the presence of different colors as their clear demarcation and distinct presentation. Motley in most uses is likely to suggest presence of colors of very noticeable diversity in a chance, haphazard, or very capricious arrangement (birds of motley colors and varied cries—Chesterton) (the motley dress of a court jester) Checkered indicates a regular alternation of rectangular shapes different in color or shade like a checkerboard, especially an alternation between black and white or dark and light (the checkered fabric of Constable's pictures, their deep undertones overlaid with variegated passages) their clear demarcation and distinct presentation. Motley and checkers are comparable when they mean a group of related plants or animals narrower in scope than a species. These terms tend to be variable in application and subject to confusing overlap in use, but all can carry distinctive implications. Variety stresses deviation from a type; historically, it denotes an infraspecific category differing from the typical form of the species in characters that are too trivial or too inconstant to justify its separation as a distinct species. In modern use it is appropriately selected when it is desirable to call attention to such deviation without making any specific taxonomic suggestion or it may be used specifically of any such divergent group developed under human control (as by selective breeding, hybridization, and cultivation) (an early variety of peach) (developing new varieties to meet special conditions) Subspecies, which stresses subordinate status, is primarily a taxonomic term applicable to a morphologically distinguishable subdivision of a species that is geographically isolated but physiologically capable of interbreeding with other comparable subdivisions of the same species. The things which differ, whether they are fundamentally similar or completely dissimilar, are related because they contribute to the same end or play a part in the formation of the same whole (his variety is to be praised . . . what is distressing . . . is his style—Mailer) (most workers would prefer some variety in their work, but they cannot get it—Hobson) Diversity, though often used interchangeably with variety, distinctively stresses the marked difference or divergence of the individuals, parts, or elements, and seldom suggests even a class or categorical likeness (the practical reduction of human diversity to subhuman uniformity, of freedom to servitude—Huxley) (the moral and intellectual explosion needed . . . to reestablish tolerance of qualitative diversity and intellectual freedom as the true basis of democracy—Julian Huxley) (the great diversity among human beings) Variety *dissimilarity, unlikeness, difference, divergence, divergency; multifariousness, variousness (see corresponding adjectives at MANY): miscellaneousness or miscellany, heterogeneousness or heterogeneity, assort edness or assortment (see corresponding adjectives at INCONSONANT)
primary subdivisions of the species. It is especially applicable when the distinguishing character is a physiological quality (as vigor, or yield, or virulence); the term may imply human control as a means of gaining this result (as through crossing or inbreeding) or it may imply chance variation (the appearance of virulent and antibiotic-resistant bacterial strains) or controlled conditions (an improved strain of Golden Bantam corn) (superior milking strains have been developed in most dual-purpose breeds of cattle). Clone is the most precisely delimited term of this set; it denotes all the individuals that constitute the asexually produced progeny of a single parent and are therefore genetically identical. Though applicable to organisms (as bacteria and protozoans) that reproduce asexually in nature, it is used typically of economic plants that are propagated by such means as dividing, budding, or grafting and in such use may come close to variety, race, or strain; thus, one can speak of the Baldwin variety of apple or the Baldwin clone. Stock places emphasis upon community of origin and genetically close relationship in the group but its range of reference is not clearly defined. Often also it carries over from other senses of the word the notion of being a source or original (culled out a vigorous stock from which he selected several clones) (the several stocks developed by inbreeding were crossed to gain hybrid vigor).

for the cause of freedom  you have deeply ventured; but all must do so who would greatly win—Byron
But venture is often used in a weakened sense to mean little more than dare or, sometimes, attempt imagine the fate of a university don of 1860, or 1870, or 1880, or even 1890 who had ventured to commend Leaves of Grass to the young gentlemen—Mencken
this class fellows were were rather gloomily polite to him, and one or two ventured awkward words of condolence—Archibald Marshall

Hazard usually implies the putting of something to the chance of losing it; the term suggests more uncertainty or precariousness than venture and less hope of a favorable outcome and is often used in place of venture because of this implication men that hazard all do it in hope of fair advantages—Shak.

his own possessions, safety, life, he would have hazarded for Lucie and her child, without a moment's demur—Dickens

Like venture, hazard is also often used in a much weaker sense but it comes closer to dare than to attempt sometimes as he hunted he got a glimpse of the giraffe moving through the bush, but was never near enough to hazard a shot—Cloete

(no Elizabethan dramatist offers greater temptation: to the scholar, to hazard conjecture of fact; and to the critic, to hazard conjecture of significance—T. S. Eliot)

Risk carries a still stronger still stronger implication of exposure to real dangers and of taking actual chances Captain Cook had sailed straight through the middle of the group, not risking a landing because of the fierce aspect of the natives—Heiser

Chance may suggest a trusting to luck and a sometimes irresponsible disregarding of the risks involved in an action or procedure decided to withdraw from Kentucky rather than chance defeat in enemy territory—Hay

I'll chance it, if it kills me—Jeopardize carries furthers the implication of exposure to dangers; it implies not only that they are a constant threat but that the odds in one's favor are equally or even unfavorably balanced with those against one found it difficult to steer a course that should not jeopardize either his loyalty or his honesty—Sidney Lee

(no traveler from abroad, however fair-minded, could tell the truth about us without jeopardizing his life, liberty, and reputation—Brooks

Endanger and peril both stress exposure to dangers or perils, and do not in themselves throw emphasis upon a taking of chances. Imperil may imply more certainty or more imminence to the predicted risk than endanger but the two words are often used interchangeably without significant loss (not so great a wind as to endanger us—Defoe)

verbal oral

verbiage, redundancy, tautology, pleonasm, circumlocution, periphrasis are comparable when they denote a fault of style or a form or mode of expression involving the use of too many words. Verbiage may imply delight in words for their own sake (as for their sound, their color, or their suggestions) and overindulgence in their use for these reasons; the term, however, often suggests a pointless or habitual wordiness that tends to make what is written dull, meaningless, obscure, or unduly heavy reading this concise and well-informed speeches were welcomed amid the common verbiage of debate—Buchan

the almost luxurious richness of Aunt Phoebe's imagination, her florid verbiage, her note of sensuous defiance—H. G. Wells

Redundancy does not in general carry the implications of expansiveness, floridity, or heaviness so often apparent in verbiage; but the term sometimes implies the use of more words than are required by idiom or syntax and so suggests a fault of style redundancies result . . . when the writer fails to perceive the scope of a word—Wesley

the . . . florid redundancy of Italian prose—Ellis

Tautology is needless or useless repetition of the same idea in different words he cautioned his students to beware of such tautologies as visible to the eye and audible to the ear

Pleonasm implies the use of syntactically unnecessary words as in the man he said. Sometimes pleonastic expressions are acceptable means of emphasis and are thought of as figures of speech it is a pleonasm, a figure usual in Scripture, by a multiplicity of expressions to signify one notable thing—South

Circumlocution and periphrasis denote a roundabout or indirect way of saying a thing (the gift of the pamphleteer, who cuts through academic circumlocution—Dean)

versatile, many-sided, all-around can all mean marked by or showing skill or ability or capacity or usefulness of many different kinds. When applied to persons, versatile stresses aptitude and facility in many different activities requiring skill or ability, especially the ability to turn with no diminution in skill from one activity to another without a hitch; applied to things, it stresses their multiple and diverse qualities, uses, or possibilities a versatile student the most versatile soprano now active Koledin a versatile interests a versatile combat weapon a versatile building material

**Verse** 1 Verse, stanza both mean a unit of metrical writing. Verse is both wider and more varied in its popular usage since it can denote a single line of such writing, such writing as a class, or, along with stanza, a group of lines forming a division of a poem and typically following a fixed metrical and sometimes rhythmic pattern. Verse may also specifically denote the part of a song preceding the refrain or chorus or a comparable part of an anthem or hymn. But in technical use and in discussion of prosody verse is restricted to the single line of metrical writing and stanza is regularly employed for the group of lines that forms a division of a poem.

**Vertebrae** *spine, backbone, back, chine

**Vertebral apex**

**Vertical, Perpendicular, Plumb** can mean situated at right angles to the plane of the horizon or extending from that plane at such an angle. Vertical suggests a relation to the vertex or topmost point (see Apex 1); it is used most often when the thing so described actually extends upward from the plane of the horizon or from its base or support in such a direction that if its direction line were produced, it would reach the zenith (vertical threads in a tapestry) (a vertical piston) (walls not quite vertical) Vertical is, of these terms, the most frequently applied to abstractions and the most common in extended use (the vertical organization of society) Perpendicular differs from vertical in being normally applied to things that extend upward or downward from the horizontal or both upward and downward; thus, one looks up or down the perpendicular face of a cliff (a perpendicular fall of water) Consequently, perpendicular is used more often than vertical to suggest little more than preciosity or extreme steepness or stiffness and straightness of line (a perpendicular descent) (a stiff perpendicular old maid—Milford) Plumb is largely a builder's term used particularly in judging the exact verticality or perpendicularity of something by its conformity to the direction of a plumb line (the wall was plumb)

means extremely or flagrantly wicked 〈the nefarious neglect of their aged parents〉 〈race prejudice is most nefarious on its politer levels—Clurman〉 Flagrant and infamous both imply shameful and scandalous badness or wickedness, but the former is somewhat less rhetorical and more closely descriptive than the latter 〈in the beginning, the common law applied only to acts that all men, everywhere, admitted were flagitious—G. W. Johnson〉 〈forced and flagitious bombard—T. S. Eliot〉 〈else, perhaps, I might have been entangled among deeds, which, now, as infamous, I should abhor—Wordsworth〉 〈Alice . . . would have scouted as infamous any suggestion that her parent was more selfish than saintly—Shaw〉 Corrupt (see also DEBASE 1) may be applied to persons in an official capacity or to their acts, then implying a loss or lack of moral integrity or probity that makes one accessible to bribes or other inducements to go contrary to sworn duties or obligations 〈control of municipal government in . . . many . . . American cities had fallen into the clutches of corrupt political machines—Armbrister〉 〈bent only on turning each to his own personal advantage the now corrupt machinery of administration and law—Dickinson〉 or the term may be more generally applied, and then suggests degradation or depravity 〈those moral wildnesses of civilized life which the Square automatically condemns as delinquent or evil or immature or morbid or self-destructive or corrupt—Mailer〉 〈humanity they knew to be corrupt and incompetent—Henry Adams〉 Degenerate stresses a descent and deterioration from a presumed original or earlier high type or condition to one that is very low in the scale morally, intellectually, physically, or artistically. However it additionally carries so strong an implication of corruption, and so often suggests extreme viciousness that it is generally used to describe what is especially reprehensible and offensive from the historical point of view or in comparison to other members of its class or other instances of the type 〈preferred to prop up an effete and degenerate dynasty rather than face a vigorous reformed China—G. F. Hudson〉 〈what he has to say is inspired by revolt against the degenerate practice of his times—Binyon〉 〈we are solemnly warned that in the hands of modern writers language has fallen into a morbid state. Victim primarily applies to a living creature, usually an animal, sometimes a person, that is killed and offered as a sacrifice to a divinity; in more general use it applies to one who has been destroyed, ruined, seriously injured, or badly treated by some ruthless person or impersonal power before which he has been helpless 〈the victims of a pestilence〉 〈spent much time in the back of the grocery, complaining of his poverty as if it were a new invention and he its first victim—Malamud〉 〈was the girl born to be a victim; to be always disliked and crushed as if she were too fine for this world—Conrad〉 〈all are victims of circumstances; all have had characters warped in infancy and intelligence stunted at school—Russell〉 Prey applies to animals hunted and killed for food by more powerful carnivorous animals 〈the hungry family flew like vultures on their prey—Johnson〉 In extended sense prey applies to a vic- tim of something that seizes or captures or kills in a manner suggestive of the action of a predatory animal 〈Hitler, having taken his plunge, and with such reckless bravado, now suddenly was prey to doubts—Shirer〉 〈people who make solemn talk about art and are the natural prey of the artists of Punch—Montague〉 Quarry is predominantly a hunting term referable to a victim of the chase, especially one taken with hounds or hawks; it may be applied to the animal as pursued as well as the animal as taken after pursuit 〈the startled quarry bounds amain, as fast the gal- lant greyhounds strain—Scott〉 In extended use quarry usually applies to a person or thing determined upon as a victim and vigorously and relentlessly pursued 〈you think . . . you are the pursuer and she the pursued. . . . Fool: it is you who are the pursued, the marked-down quarry, the destined prey—Shaw〉 〈sometimes a man has to stalk his quarry with great caution, waiting patiently for the right moment to reveal himself—Dahl〉 victor, winner, conqueror, champion, vanquisher can all denote one who gains the mastery in a contest, conflict, or competition. Victor, the more literary term, and winner, the ordinary term, usually stress the fact of defeating one’s opponents; additionally victor can connote a triumph or a glorious proof of one’s powers. The terms are applicable when the test is one of strength, strategy, skill, or endurance 〈the winner in the oratorical contest〉 〈he who battles on her [Justice’s] side, God, though he were ten times slain, crowns him victor glorified, victor over death and pain—Emerson〉 〈life is a contest between people in which the victor generally recuperates quickly and the loser takes long to mend—Mailer〉 〈he undoubtedly was going to be a very rich man. So her boss said. And her boss picked winners—Donn Byrne〉 Conqueror stresses the defeat and subjugation of an enemy or opposing force; the term is seldom used appropriately in respect to friendly games or competitions where winner is the regular term, for it usually presupposes a warlike struggle or an attempt to crush by getting the upper hand 〈England never did, nor never shall, lie at the proud foot of a conqueror—Shak.〉 〈there was also in it . . . a note of the triumphant conqueror, the defier of the world—Shirer〉 Champion applies to the one who gains an acknowledged supremacy through a contest or in a field of competition (as in an athletic contest or a given sport). The term does not apply to a winner of any test, but only of a test in which one meets all of those of highest rank in the field or meets the one who holds the title of champion or one who challenges one’s own right to hold that title 〈the heavyweight champion of the world〉 〈he could end up being champion for a while. But I doubt if he could hold the title in a strong field—Mailer〉 Van- quisher is often used in place of conqueror and, often iron- ically or somewhat hyperbolically, in place of victor or winner, when there is an intent to imply an overpowering or an overwhelming or crushing defeat (but I shall rise victorious, and subdue thy vanquisher—Milton) 〈realized that gold is not always the vanquisher of every obstacle—Cable〉 victory, conquest, triumph can mean the result achieved by one who gains the mastery in a contest or struggle. Victory and conquest in their basic use carry the same implications and suggestions as the corresponding agent nouns (see VICTOR) 〈"Victory," said Nelson, "is not a name strong enough for such a scene"; he called it a con- quest—Southey〉 〈in their common extended use, victory Wick}

vigor, vim, spirit, dash, esprit, verve, punch, élan, drive

can all denote a quality of force, forcefulness, or energy. Vigor implies a strength that proceeds from a fundamental soundness or robustness or a display of energy or forcefulness deriving from this or befitting it (the physical and intellectual vigor and toughness which the trial lawyer needs—Robert Hale) (the tendency . . . to mistake gush for vigor and substitute rhetoric for imagination—Duy Lewis) Vim stresses the display of usually enthusiastic energy put into the work of doing or making something (the two sisters . . . were not beautiful. . . but they had the dash . . . that a later generation came to call sex appeal—Shaplen) Esprit is not quite equivalent to spirit; like spirit it implies a quality which has its basis in nature and is manifested in mood or temperament; unlike it, it suggests the force displayed by an exceedingly active and subtle mind and so comes close to meaning cleverness, brains, or wit usually with an added suggestion of vivacity (as in conversation) (one man who is a little too literal can spoil the talk of a whole tableau of men of esprit—Holmes) (the industrial esprit that could spark general economic advancement—Riesman) Verve also comes close to spirit, but it often carries a clearer implication of a characteristic or peculiar force or energy, the exact description of which only the context can supply or suggest (writing with the verve and gusto dear to the mid-nineteenth century—Mary Ross) (the spirit of their times is in them. There is the same tremendous energy and verve and vitality—Edith Hamilton) (his manly verve for the enlivening of that gray court—Bello) Punch suggests a quality that carries with it the power to gain its aim; it may imply a convincing or commanding quality, but it stresses forcefulness and immediate effectiveness (the searing punch of cloud to ground lightning—Dillon) (verbs that have punch—Westley) Élan approaches dash in meaning, but it carries a stronger connotation of impetuosity and assurance or of ardor in the display of force and energy (his stories . . . are told in a formal style and exhibit the attempt to recapture a certain note of urbanity, wit, and, and élan—Mailer) (performed with great élan in a sophisticated style—Dance Observer) Drive also, like dash and élan, suggests a quality that affects others, but it carries a richer implication than either of the display of power to force through to the ends in view and to carry the observers, especially the readers, along with it (the city had lost . . . the surging drive that supposedly was so characteristically American—Harold Sinclair) (the dynamic core of a society, its central impulse and drive—Maughan) (this titan's spirit which gave such drive and strength to the mightiest of his plays—J.M. Brown)\n
Ana strength, force, *power, might, energy: soundness, healthiness (see corresponding adjectives at HEALTHY): virility (see corresponding adjectives at MALE)

vigorous, energetic, strenuous, lusty, nervous can all mean having or manifesting great vitality and force. A person or thing is vigorous that has or manifests active strength or force and exhibits no signs of a depletion of the powers associated with freshness or robustness of body or mind (seemed as vigorous as a youth half his age—A vigorous, fast-growing tree—The vigorous mother of a large family) (a vigorous argument—Edmund Wilson) (Kate was a bold, vigorous thinker—Anderson) A person or thing is energetic that displays abundant force or a capacity for great activity; the term does not necessarily connote the reserve vitality and force that vigorous implies and it sometimes even suggests an expenditure of energy and Williams activity that has little to do with inherent physical or mental strength; therefore the term may be used to suggest compliment or, less often, slight deprecation (to be counted among the strong, and not the merely energetic—J. R. Lowell) (capable and energetic women, as fit to intimidate local government boards as to control the domestic economy of their own homes—Sackville-

**visit** *visit, visitation, call are comparable when they mean a coming to stay with another, usually for a brief time, as a courtesy, an act of friendship, or a business or professional duty. Visit applies not only to such a stay with
another (pay a visit to a friend) (a physician's bill for visits) (a welfare worker's visit) but also, to a more protracted stay as a house guest or in a place where one goes for rest, entertainment, or sightseeing (a week's visit in a friend's summer home) (off for a visit to Washington) (plan a visit to Europe) Visitation (see also trial) 2) is chiefly employed in reference to a formal or official visit (as to a church, a college, or a ship) made by one in authority (as an ecclesiastical superior, a school superintendent, or a medical inspector) (parochial visitations of a bishop) (a visitation and search of a merchant ship can be made only by an authorized official) The term may also be used of something that visits one, often by or as if by the will of a superior power (see gentle visitations of calm thought—Shelley) or that is visited upon one and that is usually regarded as an affliction (an illness, a maiming accident or some other visitation of blind fate—Conrad) Call applies only to a brief visit, such as one makes upon a person who is not a friend, but with whom one has social or official relations (a society woman must give a portion of her time to formal calls) or by a person in quest of business or of a business order (the morning call of the grocer's boy) The term, however, may be used in place of visit for a short social visit.

vitalize, energize, activate can all mean to arouse to activity, animation, or life something inactive, inert, latent, or arrested (as in development). Vitalize may stress the arousal of something more or less inert or lifeless to vital activity, often by communicating an impetus or force, or an impairing of significance or interest to (something) or a making one aware of its inherent significance or interest; the term usually suggests a vigor, freshness, or health in the
effect (a force which can vitalize or destroy men—Cunnington) (a power of description that vitalizes his words—Christian Science Monitor) (a resurgent democracy vitalized . . . through a mobilization of the total resources of the community—Melby) Energize implies an arousing to activity by an imparting of strength or a source of power that increases capacity for activity or an acting with a vitality presumably induced by such power (oats are, without doubt, the best energizing food for horses—Wynmnalden) (storage batteries energize railroad block signal circuits—Orsino & Lynes) (it is Christianity which energized the special genius that made the West what it is—Cogley) (when a man and woman are successfully in love, their whole activity is energized and victorious. They walk better . . . they think more clearly—Lippmann) Activate implies a passing from an inactive to an active state; though the process involved can be equivalent to that implied by energize the stress is quite different and is consistently upon an arousing to activity by the influence of an external agent (breaks contact with the photoelectric cell and activates an alarm—Hynd) (the report has done much to crystallize and activate official and private opinion—Walter White) (vitamin D activated by sunlight) (political and legal hacks whose function it was to supply the docile social machinery for cleverer men to activate and guide—Mattingly)

vocal 1 Vocal, articulate, oral can all mean uttered by the voice or having to do with utterance. Vocal implies the use of voice, but not necessarily of speech or language; thus, vocal sounds are sounds produced by a creature that has vocal organs; vocal music is contrasted with instrumental music because the musical tones are produced by the voice rather than by a musical instrument. Articulate implies the use of distinct intelligible language; thus, speech is the uttering of articulate sounds; articulate cries are those that are expressed in meaningful words rather than in meaningless sounds (Constance nodded her head in thorough agreement. She did not trouble to go into articulate apologies—Bennett) Oral implies the use of the voice rather than the hand (as in writing or typing) in communicating (as thoughts, wishes, orders, questions, or answers) (an oral examination) (an oral command) (the oral transmission of tradition)

2 Vocal, articulate, fluent, eloquent, voluble, glib can mean being able to express oneself clearly or easily, or showing such ability. Vocal usually implies ready responsiveness to an occasion for expression or free and usually forceful, insistent, or emphatic voicing of one’s ideas or feelings (earth’s millions daily fed, a world employed in gathering plenty yet to be enjoyed, till gratitude grew vocal in the praise of God—Cowper) (this instantaneous indignation of the most impulsive and vocal of men was diligently concealed for at least six weeks, with reporters camping upon his doorstep day and night—Mencken) Articulate is as often applied to thoughts and emotions with reference to their capacity for expression as to persons or their utterances. It implies the use of language which exactly and distinctly reveals or conveys what seeks expression (the deepest intuitions of a race are deposited in its art; the primitive poet . . . was used by the community to communicate (as thoughts, wishes, orders, questions, or answers) (at ROAR) (an oral examination) (an oral command) (the oral transmission of tradition)

vociferate *roar, bellow, bluster, bawl, clamor, howl, ululate

Ana *shout, yell, shriek, scream, screech, holler

vociferous *roar, bellow, bluster, bawl, clamor, howl, ululate

vociferous, clamorous, blatant, strident, boisterous, obstreperous are comparable when they mean so loud and noisy, especially vocally, as to compel attention, often unwillingly voicing. Vociferous implies both loud and vehement cries or shouts; it often suggests also a deafening quality (watermen, fishwomen, oysterwomen, and . . . all the vociferous inhabitants of both shores—Fielding) (vociferous vindications of their innocence—Irving) (vociferous protests) Clamorous can imply insistency as well as vociferousness in demanding or protesting (it was impossible to yield to her clamorous demands—Replier) but as often it stresses the notion of sustained din or confused turbulence (the district had been clamorous with trucks arriving, backing in and out . . . the drivers bawling and cursing—Peggy Bacon) Blatant implies a tendency to bellow or be conspicuously, offensively, or vulgarly noisy or clamorous (they were heretics of the blatant sort, loudmouthed and shallow-minded—Expositor) (building against our blatant, restless time an unseen, skillful, medieval wall—Lindsay) Strident basically implies a harsh and discordant quality characteristic of some noises that are peculiarly distressing to the ear; it is applied not only to loud, harsh sounds but also to things which, like these, irresistibly and against one’s will force themselves upon the attention (the colors are too strident—Anna) (the strident yellow note of the cockerel shot up into the sunshine—Gibbons) (there was no strident old voice to bid him do this or that; no orders to obey, no fierce and insane faultfinding—Deland) Boisterous has usually an implication of rowdy high spirits andflouting of customary order and is applied to persons or things that are extremely noisy and turbulent, as though left loose from all restraint (from the distant halls the boisterous revelry floated in broken bursts of faint-heard din and tumult—Jerome) (boisterous spring winds—Cather) Obstreperous suggests unruly and aggressive noisiness, typically occurring in resistance to or defiance of authority or restraining influences (the most care less and obstreperous merriment—Johnson) (disrespectful of Parliamentary decorum, they are so obstreperous that sittings sometimes have to be suspended to stop their hubbub—Flanner)

voluntary, intentional, deliberate, willful, willing can mean constituting or proceeding from an exercise of free will. Voluntary, the most widely applicable of these terms, often implies not only freedom from constraint but freedom from the control of an influence that might suggest, prompt, or incite action; it does not necessarily imply that these influences have not been operative, but it usually suggests that the decision is the result of one’s free choice (a voluntary renunciation of his inheritance) (a voluntary confession) (a voluntary system . . . which possessed a certain pleasant dignity denied to the systems of a more compulsory sort—Sackville-West). Often the term carries another, sometimes a different, implication, such as that of spontaneity (voluntary contributions) (our voluntary service he requires not—Milton) or, especially when the opposition is to involuntary, that of subjection to or regulation by the will (voluntary movements of the eyes) (voluntary muscles) or that of prior consideration and clear choice (voluntary manslaughter) or that of absence of any legal obligation or compulsion (as to do or make) (voluntary bankruptcy) or of any valuable consideration in return for doing or making (voluntary conveyance of property)

Intentional applies chiefly to acts or processes entered into in order to achieve a desired end or purpose or to the end or purpose so willed or effected; the use of the word eliminates all suggestion of the possibility of accident or inadvertence (an intentional insult) (not one in a thousand). It perpetrates any intentional damage to fish, food, or flowers—Jefferies

Deliberate (see also DELIBERATE 2, SLOW) adds the implication of full knowledge or full consciousness of the nature of one’s intended act and a decision to go ahead in spite of such knowledge or consciousness (a deliberate falsehood) (deliberate murder) (an organized and deliberate attack—carefully planned and calculated—N.Y. Times). Willful (see also UNRULY) adds to deliberate the implications of a refusal to be taught, counselled, or commanded, and of an obstinate determination to follow one’s own will or choice in full consciousness of the influences or arguments opposed to the attitude adopted or the action or deed contemplated (willful murder) (willful ignorance) (his willful abuse of his children) (willful blindness to ascertained truth—Inge)

Willing carries, in contrast, an implication of characteristics (as agreeableness, openness of mind, or absence of reluctance) that makes one ready or eager, without suggestion or without coercion, to accede to the wishes or instructions of others or to do something or effect some end pleasing to them (how curious is that instinct which makes each sex, in different ways, the willing slave of the other!—Jefferies) (willing service) (where ears are willing, talk tends to be loud and long—Huxley)

voracious, glutinous, ravenous, ravenging, rapacious can all mean excessively greedy and can all apply to persons, their appetites and reactions, or their behavior. Voracious implies habitual gorging with food or drink, or with whatever satisfies an excessive appetite (a voracious eater) (a voracious reader) (voracious birds, that hotly bill and breed, and largely drink—Dryden). Gluttonous differs from voracious chiefly in its common suggestions of covetous delight (as in food) and of acquiring or eating past need or to the point of satiety (he was gluttonous for jewels—Gunther) (though a Norman was not gluttonous, he was epicurean—Lynton) (his gluttonous appetite for food, praise, pleasure—Guerard). Ravenous implies excessive hunger and suggests violent or brutal methods of dealing with food or with whatever satisfies an appetite (he contracted a habit of eating with ravenous greediness. . . . The sight of food affected him as it affects wild beasts and birds of prey—Macaulay) (he had mad hungers that grew more ravenous as he fed them—Wilde)

Ravenous is sometimes employed in place of ravenous (the hordes of ravenging ants—Beebe) but more often it comes close to rapacious in suggesting a violent tendency to seize or appropriate to oneself in the manner of a bird of prey or a predatory animal (beast of false prophets, which come to you in sheep’s clothing, but inwardly they are ravenging wolves—Mt 7:15). Rapacious may imply the seizure of food (rapacious animals we hate: kites, hawks, and wolves, deserve their fate—Parkman) but more often it suggests extreme and utterly selfish acquisitiveness or cupidity (the Indians, who, though often rapacious, are devoid of avarice—Parkman) (the European nations, arrogant, domineering, and rapacious, have done little to recommend the name of Christianity in Asia and Africa—Inge)

wage or wages, salary, stipend, fee, pay, hire, emolument
can all mean the price paid a person for his labor or services. Wage or wages applies chiefly to an amount paid on
daily, hourly, or piecework basis and typically at weekly
intervals for labor, especially labor that involves more
physical than mental effort <a gardener’s wages> (a steel-
worker’s daily wage) Salary and stipend both usually
apply to compensation at a fixed, often annual, rate that
is paid in regular (as weekly or monthly) installments but
stipend is more likely to apply to the compensation of a
teacher, a clergyman, or a magistrate, or it may denote
money received from a scholarship or a pension <many a
person has brought up a family on a stipend of seventy
pounds a year—Shaw> Fee applies to the price usually
in the form of a fixed charge, asked or paid for the service
of a professional (as a physician, lawyer, musician, or
artist) when such service is requested or required <pay
the surgeon’s fee for a major operation> <a lawyer’s retain-
ing fee> (a pianist’s fee for a concert) Pay can replace
wages, salary, or stipend <fired and told to draw his pay>
<a teacher’s pay> <even a preacher needs adequate pay>
and is the one of these four terms freely used in combina-
tion and attributively <waiting for payday> <paycheck>
<crumpled his empty pay envelope> Hire, which basically
denotes payment made for the temporary use of something
(as the property or money of another), is occasionally and
especially in legal use applied to compensation for labor
or services and is then equivalent to wages or salary <the
laborer is worthy of his hire—Lk 10:7> <lends his pen

from point to point. Most of these verbs may imply walking, but most are not restricted in their reference to human beings or to any particular means of locomotion. **Wander** implies the absence of a fixed course or more or less indifference to a course that has been fixed or otherwise indicated; the term may imply the movement of a walker whether human or animal or of any traveler, but it may be used of anything capable of direction or control that is permitted to move aimlessly (wandering thoughtfully in the silent wood—*Pope*) (his eyes wandered over the landscape) (his mind wandered and he was unsure of himself—*Shirer*) (she wandered frequently from her subject). **Stray** carries a stronger suggestion of deviation from a fixed, true, or proper course, and often connotes a being lost or a danger of being lost (fallows grey, where the nibbling flocks do stray—*Milton*) (we have erred, and strayed from thy ways like lost sheep—*Book of Common Prayer*) (though we stumbled and we strayed, we were led by evil counsellors—*Kipling*) **Roam** carries a stronger suggestion of freedom and of scope than **wander**; it usually carries no implication of a definite object or goal, but it seldom suggests futility or fruitlessness and often connotes delight or enjoyment (like us, the Libyan wind delights to roam at large—*Arnold*) (let the winged Fancy roam—*Keats*) (type of the wise who soar, but never roam—*Wordsworth*) (the charm of a quiet watch on deck when one may let one’s thoughts roam in space and time—*Conrad*) **Ramble**, in contrast, suggests carelessness in wandering and more or less indifference to one’s path or goal (to ramble through the country and to talk about books—*Marquand*) It often, especially in its extended uses, implies a straying beyond bounds, an inattention to details that ought to serve as guides, or an inability to proceed directly or under proper restrictions (a vine, remarkable for its tendency, not to spread and ramble, but to mass and mount—*Cather*) (great temptation . . . to ramble on interminably in praise of the delights of sailing—*Schoettle*) **Rove** comes close to roam in its implication of wandering over extensive territory, but it usually carries a suggestion of zest in the activity, and does not preclude the possibility of a definite end or purpose (invaders roved through the country burning and pillaging homes in their pathway) (ravenous beasts freely roving up and down the country—*Fuller d. 1661*) (to see thee did I often rove through woods and on the green—*Wordsworth*) **Range** is often used in place of rove without loss; it may be preferred when literal wandering is not implied or when the speaker is in the sweep of territory covered rather than on the form of locomotion involved (earth ships had ranged the cosmos far and wide—*Theodore Sturgeon*) (her imperious and hoarse voice ranged over a complete octave of requited social ambitions—*Cheever*) (his thoughts always ranged far afield—*Mencken*) **Prowl** implies a stealthy or furtive roving, about, may suggest a bustling from place to place idly or for the most trivial ends and often to the detriment of one’s actual duties (her upper housemaid and laundry maid, instead of being in their business, are gadding about the village all day long—*Austen*) (he disapproved of her gadding about by herself—*Galsworthy*) **Gallivant** adds to gad the implication of a search for pleasure or amusement or the use of an opportunity to display one’s finery (her father refused to allow her to go gallivanting around with any of her suitors) (young girls dressed in their Sunday best gallivanting along the highways—*Traipe*) which commonly suggests more vigor in movement and less aimlessness in intent than the remaining terms, may come close to come, go, or travel in meaning (in her late sixties she traipsed over Europe with a crony of equal years—*Leavitt*) (how old . . . does he think a man should be before he is barred from traipsing around making political speeches—*N.Y. Times*) (here traipsed into town a little thing from away off down in the country—*Weltly*) Even when used with reference to an erratic course **traipse** ordinarily implies a positive purpose (they lacked the time and energy to traipse around looking for the sort of thing they had in mind—*Kahn*) or stresses a bustling activity (other crowds like this: the yellow-faced swarm that pours out of shipyards, say, at five o’clock, the swarm that traipses Oxford Street, the mad swarms at the greyhound tracks—*Pritchett*) or a wearying expenditure of energy (she traipsed around the provinces playing small parts in second-rate companies at a miserable salary—*Maugham*) (kings . . . traipsed here and there with frenetic energy—*J. E. M. White*) Sometimes the term loses most of its reference to a course and then stresses a dashing or flaunting manner of going (people . . . who traipsed about in trite monotonous flipper—*Peggy Bennett*) (I got a job . . . as a model. I’d *traipse* around stepping through lace hems and gabbing to the customers—*New Yorker*) **Meander** may be used in reference to persons and animals but more characteristically in reference to things (as streams, paths, or roads) that follow a winding or intricate course in such a way as to suggest aimless or listless wandering (rivers that . . . meandered across the vast plains—*Haggard*) (across the ceiling meandered a long crack—*Galsworthy*) (the gray gelding meandered along through the hills—*Anderson*)

watchful, vigilant, wide-awake, alert are comparable when they mean on the lookout especially for danger or for opportunities. Watchful is the general word (the five watchful senses—Milton) (became almost remote, strangely watchful, looking back from time to time as though they were being followed—Malamud) Vigilant implies keen, courageous, often wary, watchfulness (be sober, be vigilant) because your adversary is a roaring lion, walkketh about, seeking whom he may devour—I Pet 5:8) (we should be eternally vigilant against attempts to check the expression of opinions that we loathe—James Holmes) Wide-awake stresses keen awareness, more often of opportunities and relevant developments than of dangers (merchants who . . . were . . . wide-awake and full of energy—van Loo) Alert stresses readiness or promptness in apprehending and meeting a danger, an opportunity, or an emergency (not only watchful in the night, but alert in the drowsy after-

way n 1 Way, route, course, passage, path, mean, in common, a track or path traversed in going from one place to another. Way is general and inclusive of any track or path; it can specifically signify a thoroughfare especially in combinations and in fixed phrases (highway) (live across the way) (the city accepted the new street as a public way) (long inclined ways, paved with cobblestones, leading down between great warehouses to the water's edge—Sanary) or a direction or track that is, or can or should be, followed (lose his way) (the short way to town) (the only other village was one day's mule trip farther into the interior, but the way was so steep and slippery in places that we walked almost as much as we rode—Hitchcock) (the water continues its way down the valley for 5 kilometers—Heiden) The term also can be extended to what leads in a specified or implied nonspatial direction or toward a specified or implied end (clear the way for a more purely rational interpretation of the world—Ashley Montagu) (the way was now open for the final act—W. C. Ford) Route signifies a way, often circuitous, followed with regularity by a person or animal or laid out to be followed (as by a tourist or army) (a paper route) (a milk truck following a morning delivery route) (the dog team trails and canoe routes of trader, trapper and missionary in the bush country—Granberg) (a much traveled main route from Boston to Albany) Course may be interchangeable with route but more often implies a path followed by or as if by a stream, star, or other moving natural object impelled by or in a path determined by natural forces (the course of a river) (a meteor's course) (a ship's course) (the course of the seasons) or a predetermined or more or less compulsory way or route followed in human activities or enterprises (a course of study for an academic degree) (a golf course) (a racecourse) Passage stresses a crossing over or a passing through, often designating the thing passed through, usually something narrow where transit might be restricted (a rough passage to America by boat) (a narrow passage from kitchen to basement) (restrict the passage into the stomach) Pass usually designates a passage through or over something that presents an obstacle (as a mountain or river) (a narrow pass over the Alpes) (a shallow ford constituted the only pass across the river) Artery is applied to one of the great continuous traffic channels (as a central rail route, river, or highway) from which branch off smaller or shorter channels (the Congo river would remain the main traffic artery—Weigend) (the main artery between Buffalo and Niagara Falls—Retailing Daily) (the need for improvement of main arteries interconnecting cities and for express highways in cities—

weak, feeble, frail, fragile, infirm, decrepit can mean not strong enough to bear, resist, or endure strain or pressure or to withstand difficulty, effort, or use. Weak is by far the widest in its range of application, being not only inter-changeable with all of the succeeding words but also capable of being applied where they are not. Funda-mentally it implies deficiency or inferiority in strength; it may apply to the body, the will, the mind, or the spirit (a character too weak to resist temptation) she wasn't a weak and silly creature . . . She didn't swoon and give way to feelings and emotions—Farrell (though strong in love, art all too weak in reason—Wordsworth)

Often it implies a lack of power, skill, efficiency or ability to control (a weak government) (a weak team) (a weak influence) It may also suggest a sign of impairment of a thing's strength (as a defect, a fault, or a dilution) (a weak thread in a stairway) (weak tea) (a weak argument) (weak facetious echoes of a style . . . ten years outmoded—Woolf) Feeble only is not more restricted than weak in its range of application but also carries a stronger impli-cation of lamentableness or pitiableness in that weakness. It is chiefly applied to human beings and their acts and utterances, then usually implying a manifest lack or impair-ment of physical, mental, or moral strength (a feeble, tottering old man) (a feeble attempt to resist the enemy's advance) (rigid principles often do for feeble minds what stays do for feeble bodies—Macaulay) As applied to things, feeble implies faintness, indistinctness, impotency, or inadequacy (a feeble light) (a feeble sound) (a sense of feeble lust, of desire that mumbled incoherently as in a restless dream—Hervey) Frail, when it implies physical weakness, suggests not so much the impairment of strength as natural delicacy of constitution or slightness of build (a small, frail man, all heart and will—Masefield) (it was marvelous that . . . the energy of her spirit could carry through so triumphantly her frail nervous system and her delicate constitution—Ellis) As applied to things the term usually implies liability to failure or destruction if the thing has physical existence (shoot the rapids in a frail canoe) (I would lie there and listen to Yuriko's voice as it floated . . . through the frail partitions—Mailer) or, if immaterial, an incapacity for dealing with forces or powers opposed to it, or tending to destroy it (beauty, frail flow'r that ev'ry season fears—Pope) When frail is applied to the will, the conscience, the moral nature of man, it carries an even stronger implication of lack of power to resist than weak (if he prove unkind, (as who can say but being man, and therefore frail, he may)—Cowper) Frangible (see also FRAGILE 1) is frequently used in place of frail, but it usually carries even a stronger suggestion of delicacy and of likelihood of destruction (physically fragile, she was spiritually tough—Sackville-West) (passionately realizing the moment, its fleeting exquisiteness, its still, fragile beauty—Rose Macaulay) Infirm usually implies a loss of strength, especially of physical strength, with con-sequent instability, unsoundness, or insecurity (elevators in loft buildings . . . that, infirm and dolorous to hear, seem to touch on our concepts of damnation—Cheever) As referred to human beings, it implies illness or more often old age (a poor, infirm, weak, and despised old man—Shak) As referred, however, to the temperament, the designs, or the intentions of men, it often implies wavering or serious vacillation (infirm of purpose! Give me the daggers—Shak) Decrepit is as applicable to things as to persons that are worn out or broken down by use or age (such is its misery and wretchedness, that it resembles a man in the last decrepit stages of life—Fielding) (the bus is decrepit and the seats and several of the windows are held together with friction tape—Cheever)

Ana debilitated, weakened, enfeebled (see WEAKEN) (powerless, impotent Ant strong —Con stout, sturdy, tough, stalwart, tena-cious (see STRONG)

Weaken, enfeebled, debilitate, undermine, sap, cripple, dis-able can mean to lose or cause to lose, strength, vigor, or energy. Weaken, the most general term of this group, most frequently implies loss of the physical strength or func-tional efficiency characteristic of a healthy living thing or of any of its parts or loss of the soundness or stability characteristic of a strong material structure (overexercise has weakened his heart) (unfertilized plants weaken and die) (the illness has weakened him considerably) (decay has weakened the wooden supports of the bridge) but it may imply a loss in quality, intensity, or effective power in something material or immaterial (as by a natural or forced reduction in resources, numbers, means of support or strengthening principle) (wearing down the weakening defenders in battles of attrition—Shirer) (the growing power of Parliament weakened the authority of the sov-ereign) (weaken tea with water) (the spirit of adventure is not stimulated but weakened by poverty—Cohen)

Enfeebled implies a more obvious and a more pitiable condition than weaken; it suggests the state of a person greatly weakened by old age, by severe or prolonged illness, or by a state comparable to it and usually implies helplessness or powerlessness more strongly than weaken does (so enfeebled by illness that he will probably never walk again) (a country crushed and enfeebled by war) Debilitate may be used in place of enfeebled but it tends to suggest a somewhat less marked and often more gradually developed impairment of strength or vitality (her frail nervous system and her delicate constitution, still further debilitated by the slow progress of disease—Ellis) (a debilitating climate) Undermine and sap imply a weaken-ning by something or someone working surreptitiously or insidiously and may further suggest a draining of strength or a caving in or breaking down (her health has been undermined by lack of rest and proper food) (some of the new philosophies undermine the authority of science, as some of the older systems undermined the authority of religion—Inge) (but sloth had sapped the prophet's strength—Newman) (his moral energy is sapped by a kind of skepticism—Dowden) Cripple basically means to deprive of the use of a limb; in extended use it suggests a deprivation of something causing a loss of strength or effectiveness comparable to that resulting from the loss of a limb (crippled diseases) (crippled by arthritis) (the obstacles which stilt and cripple the man—Inge) (the war economy which marries full production to a neces-sarily crippled market—Mailer) (a writer possessing a sense of style only partially crippled by his reckless fecundity—A. C. weave, knit, crochet, braid, plait, tat mean to make a fabric or textile or to form an article by interlacing threads or strands of material. Weave usually implies crossing rows of threads or strands interlaced into a web, irrespective of method, material, or pattern (weave baskets). Specifically the term means to interface warp and weft yarns, by means of a loom, into a textile fabric, the yarns being passed over and under each other according to a predetermined pattern.

Knit implies the use of a single strand, commonly of yarn, to produce an elastic fabric and, in its specific sense, the use of two smooth-pointed needles alternately holding the material and forming a new row of interlacing loops (knit a sweater) (knit stockings) (knitted fabrics). Crochet specifically differs from knit by implying the use of a single hooked needle and in not necessarily suggesting a building up by successive rows (crochet an afghan) (crochet lace). Braid implies the entwining of three or more strands (as of hair, cord, or cloth strips) by passing one strand over another in such a manner that each strand winds a sinuous course through the ribbonlike or ropelike contexture that is thus produced (braid rag strips to make a rug) (a whip of braided rawhide). Plait is sometimes identical in meaning with braid, but it tends to be used especially of the braiding of strands of hair or of the interlacing of straw or reeds (as in hatmaking or basketmaking) whether the method approaches that of braiding or weaving. Tat implies the making of lace by the use of a single thread and of one or more shuttles by means of which a series of sliding knots and, usually, loops is formed in that thread.

weird, eerie, uncanny can all mean fearfully and mysteriously strange or fantastic. Weird may be used in the sense of unearthly or preternaturally mysterious (when night makes a weird sound of its own stillness—Shelley) (weird whispers, bells that rang without a hand—Tennyson) or it may mean little more than strangely or absurdly queer (had somehow absorbed . . . a weird mixture of the irresponsible, megalomaniacal ideas which erupted from German thinkers during the nineteenth century—Shirer)

Eerie does not connote ordinary justifiable or explainable fear but rather a vague consciousness that unearthly or mysterious and often malign powers or influences are at work; the term is used chiefly to create atmosphere rather than to define the character of the thing so described (found awe creeping over her as her brother's voice filled the vault of the temple, chanting words thousands of years old, in an eerie melody from a dim lost time—Wouk)

Uncanny has in general use an implication of uncomfortable strangeness or of unpleasant mysteriousness that makes it applicable not only to persons or concrete things but to abstractions (as sensations, feelings, or thoughts) (the alien elements of the Soviet Union affect him as disquieting, uncanny, because they turn up in fusion with pretenses at Western discipline, Western logic—Edmund Wilson)

wet, damp, dank, moist, humid are comparable when they mean covered or more or less soaked with liquid. Wet may be used with no further implications or it may specifically imply saturation (wet clothes) (the rain lies in puddles on the wet ground). Often, however, the term refers to a surface covered with liquid (wet pavements) (wet hands) (cheeks wet with tears). But wet often means
merely not dry, or not yet dry, especially when used in reference to something (as paint, ink, or glue) which has been applied to or used on a surface. Damp differs from wet chiefly in implying a slight or moderate absorption or covering and often in connoting the presence of unpleasant or disagreeable wetness (damp shoes) (the sheets on the bed are damp) (a damp house) However damp usually implies less wetness than is commonly suggested by the adjective wet (sheets should be damp when they are ironed) Dank unequivocally applies to what is disagreeably, penetratingly or, from the point of view of health or comfort, dangerously, wet (a cool dank mist) (a dank cellar) Moist often suggests little more than the absence of dryness or a not unpleasant dampness (moist eyes) (moist air) (moist heat) Humid is chiefly used to imply an oppressive degree of moisture in warm air (the humid atmosphere of early August) (the humid prairie heat), so nourishing to wheat and corn, so exhausting to human beings—(Cather) (a firefly . . . on a humid summer's night) (Furnas) Ana soaked, saturated, drenched, waterlogged (see SOAK vb) Ant dry

Whirlwind is applied to a small windstorm which begins with an inward and upward spiral motion of the lower air and is followed by an outward and upward spiral motion until, usually, there is a progressive motion at all levels. Cyclone, in technical use, is applicable to a system of winds that rotate, counterclockwise in the northern hemisphere, about a center of low atmospheric pressure; such a system of winds originating in the tropics (a tropical cyclone) may rotate at the rate of 75 miles per hour or more, sometimes exceeding 200 miles per hour. Typhoon is used of a severe tropical cyclone in the region of the western Pacific ocean. A tropical cyclone in the tropical north Atlantic and tropical western Pacific, with winds rarely exceeding 150 miles an hour, occasionally moving into temperate latitudes, is called a hurricane. whiten vb 1 Whitening, bleach, dechlorinate, etiolate can
all mean to change from an original color to white or almost
to white. To whiten is to make white usually by the applica-
tion or addition of something from without. To bleach is to
bleach by the removal or withdrawal of color. Blanch almonds by scalding which removes the brown skin or by preventing it from developing
(blanche celery by covering the stalks with earth, so as
to exclude the sunlight). To bleach is to whiten or
lighten in color, especially by exposure to sun and air or
by chemical processes (bleach linen by spreading it on
the grass in the sun) (bleach hair by use of peroxide)
Decolorize implies the deprivation of color (as by pro-
cesses of bleaching or blanching) but does not carry as
strong an implication of whitening as do bleach and blanch
(decolorize a colored fabric by the use of chloride of lime)
Etiolate is a scientific term used in reference chiefly to
plants from which sunlight has been excluded with the
result that the natural coloring of chlorophyll is not
formed (etiolated plants look sickly)

(have devoted his whole energy to the task) (the whole
congregation approved the pastor's policy) (the whole
army will be mobilized) (the whole country was affected)
Entire may be used in place of whole in any of these illus-
trations; it also can, as whole cannot, imply actual com-
pleteness or perfection from which not only nothing has
been taken but to which nothing can be added (an entire
stallion) (whom to obey is happiness—Milton)
(Granting entire liberty of conscience—Macaulay) Total
implies that everything without exception has been
counted, measured, weighed, or somehow included (the
total amount expended for welfare payments) (the total
output of the factory last year) Sometimes especially
when applied to something that is often incomplete, total
is used as an indication that no reservation is made (total
eclipse) (total blindness) (a total silence) All sometimes
equals whole (all the city was in an uproar), sometimes
it comes closer to entire (all their affection was centered
on their children), and sometimes it equals total (all their
earnings were insufficient for their needs) Gross is used
especially in financial statements in place of total to in-

will n Will: volition, conation can all refer to the power
or act of making or effecting a choice or decision. Will
applies only to this power or act but also to the com-
plex of rational and irrational, conscious and unconscious
forces within a person that is the agent of this power and
to the process by which one makes his choice, resolves
it into an intention, and puts that intention into effect. In
all of these senses will may vary greatly in its specific
meaning; it may denote a dominant desire or inclination
which determines one's choice (when he was confronted
by accidental extinction, he had felt no will to resist—
Cather) or it may denote a power that derives from one's
conception of what is good or right and that tests and
accepts or rejects one's desires or inclinations (appetite
is the will's solicitor, and the will is appetite's controller;
what we covet according to the one, by the other, we often
reject—Hooker) Will often denotes mainly the deter-
mination that is inseparable from action or the effecting
of one's decisions (in the government of self, Bismarck's

will broke down from time to time, as Richelieu's never did; and, after all, the government of self is the supreme test of will—Bellcol—but it may be used when frustration or impossibility of action is suggested (spirits disillusioned, who still pathetically preserve the will to conquer, even when life no longer presents them with anything worth winning—Binyon). Further will may designate a subjective power, act, or process (luxurious feeling and pathetic imagination, which make no severe call upon...the will—Inge) or an objective force which must be encountered, challenged, or obeyed (submit oneself to the will of God). This method of consulting the popular will—Bryce. Volition, in contrast to will, is a comparatively simple term. In its ordinary and most sharply distinguished sense, it designates merely the act of making a choice or decision; it usually carries an implication of deliberation, but it rarely suggests struggle or determination to put one's decision or choice into effect. Therefore it may be preferred when no other implications are desirable or important (surrendered his authority of his own volition) (our children do not seek school of their own volition—Grandgent) (the primal necessity for the faithful is that by an act of the will, not necessarily an emotional act, but an act of pure and definite volition,—they should associate themselves with the true and perfect sacrifice—Benson). Conation usually implies a striving to get or achieve what is desired or willed. The term need not imply a conscious goal; it may suggest clearly directed striving or it may connote the restless aimless strivings which the mind cannot interpret or explain, but it stresses effort rather than choice (Religion or the desire for the salvation of our souls, Art or the desire for beautification, Science or the search for the reasons of things—these conations of the mind...are really three aspects of the same profound impulse—Ellis).

\textit{wind vb} Will, bequeath, devise, leave, legate all mean to give a part or the whole of one's possessions to another by one's last will and testament. Will implies the provision or the existence of a legal instrument (a will) disposing of one's property after one's death (he has willed that his property be divided among his wife and children) (he willed his money to various charities). Bequeath is much used in wills by the testator (I bequeath all my property to my wife) and is frequent in legal, historical, and literary use; it may imply nothing more than a proved intention (as by a will or a definite oral or written statement) (William had bequeathed Normandy to his eldest son, Robert—J. R. Green). In legal use bequest is commonly distinguished from devise, the one implying a gift of personally, the other a gift of realty (every article she possessed...every pot and pan, every garment, is separately bequeathed as an affectation remembrance—Ellis) (I had never imagined rings as things one bought for oneself...they were things given, or bequeathed by grandaunts—Reppler) (was the son of a white man by one of his slaves, and his father executed certain instruments to manumit him, and devised to him some landed property—Tanner). Leave is the common and ordinary unspacific term for any of the preceding terms (he left a legacy to his nephew) (he left his land, money, books, pictures to Harvard University) Legate is not manifestly different from bequeath except that it invariably implies a formal will (the oval inlaid table I legate to—Law Reports, House of Lords).

\textbf{wind}, breeze, gale, hurricane, zephyr are comparable rather than synonymous terms that can all basically mean air in motion. Wind is the general term referable to any sort of natural motion whatever its degree of velocity or of force (a strong wind) (there is no wind tonight). Breeze in general use is applied to relatively light but fresh wind, usually a pleasant or welcome one (the fair breeze blew, the white foam flew, the furrow followed free—Coleridge). In technical meteorological use the term specifically notes a wind with a velocity of from 4 to 31 miles an hour. Breezes are sometimes further described as light (4–7 miles an hour), gentle (8–12), moderate (13–18), fresh (19–24), strong (25–31). Gale in ordinary use is applied to a high, destructive wind of considerable velocity and force; technically the term is applied specifically to a wind between 32 and 63 miles an hour; a whole gale is one having a velocity between 55 and 63 miles an hour. Hurricane is sometimes applied popularly to an exceedingly violent or devastating windstorm but technically the term denotes a rotating windstorm with winds of particular velocities (see also whirlwind). Zephyr is a poetical term for a very light gentle breeze that delicately touches objects (fair laughs the morn, and soft the zephyr blows—Gray)

\textbf{wind vb} Wind, coil, curl, twist, twine, wreath, entwine mean to follow a circular, spiral, or whirling course or to make or form a corresponding figure. Wind fundamentally implies an axis or something suggestive of an axis around which another thing is turned so as to encircle, enclose, or enfold (wind thread on a spool) (wind a bandage around his arm). Often the word is extended in meaning to imply a motion performed (as tightening, tensing, or lifting) by or as if by winding (wind a watch) (wind the strings of a mandolin) (her nerves are all wound up) (wind up his affairs). At other times the word implies movement or direction in a curving, sinuous, or devious manner (compare winding) (the road...wound on between low, quick-set hedges or wooden palings—Mackenzie) (a wagon...light enough and narrow enough to wind through the mountain gorges beyond Pueblo—Cather). Tortuous, like sinuous, suggests lack of straightness and directness, but in contrast it stresses the number and intricacy of bendings, twistings, and turnings rather than the constant flow of curves <the course of the river became more tortuous as we neared its source> <there remained but a tortuous defile for carriages down the center of the street—Hardy> Flexuous, commoner in technical than general use, basically suggests alternation of gentle opposite curves or an easy zigzag course <a flexuous leaf margin> flexuous stems> In extended use it implies a lack of rigidity in action, and so comes very close to flexible <(a bacterium that) appears to move by changing the shape of its body which is not rigid but very flexuous and elastic—Biological Abstracts> <René's comings and goings, and each of his flexuous moods—E. window, casement, dormer, oriel can mean an opening in the wall of a building that is usually covered with glass and serves to admit light and air. Window is the ordinary general term for the entire structure, including both its framework and the glass or the movable sashes which that framework encloses <come to the window, sweet is the night air—Arnold> Casement basically denotes a window sash attached to one of the upright sides of the frame by hinges; in ordinary use, however, the term is applied to a window or a series of windows (sometimes called casement window) with sashes of this character <magic casements, opening on the foam of perilous seas, in faery lands forlorn—Keats> Dormer denotes a window which stands out from a sloping roof and is typically enclosed by a gable-topped structure. An oriel differs from a dormer in projecting from a wall of a building rather than from a roof, in being at least three-sided and usually either semihexagonal or semisquare in shape, and in being supported by a corbel or bracket rather than by a rafter.

wise, sage, sapient, judicious, prudent, sensible, sane are comparable when they mean having or manifesting the power to recognize the best ends and the best means to attain those ends. Wise applies to one or the acts or views of one who is so discerning in his understanding of persons, conditions, or situations that he knows how to deal with them, how to correct what is wrong in them, how to get the best out of them considering their limitations or difficulties, or how to estimate them fairly and accurately; often also the term implies a wide range of experience or of knowledge or learning (prudent and conservative, Edward was wise enough to know that these two qualities...were not enough—Buck) (knowing himself wise in a mad world—Meredith) (it is wise to be cautious in condemning views and systems which are now out of fashion—Inge) Sage characterizes one who is eminently wise and typically philosophical by temperament and experience. The term can suggest a habit of profound reflection upon men and events and an ability to reach conclusions of universal as well as immediate value, and has been applied chiefly to persons and utterances that are venerated for their wisdom and good counsel (what the sage poets, taught by the heavenly Muse, storied of old in high immortal glory—by the Milton) (for I, who hold sage Homer’s rule the best—Pope) (the natural crown that wise Experience wears—Wordsworth) In somewhat lighter use sage often suggests the affection or the appearance of great wisdom or knowledge, whether the matters concerned be of significance or not (the older women seemed to have a kind of secret among themselves, a reason for sage smiles and glances—Sackville-West) Sapient describes one exhibiting the utmost sagacity (contain valuable insights and sapient advice to educators—Larrabee) (the sapient leader who shall bring order out of the wild misuse—Parrington) but often the term is used ironically to imply a mere hollow sham of such sagacity (the generals...turned attractive profiles in their [photographers'] direction and put on expressions of sapient authority—Linklater) (a sapient, instructed, shrewdly ascertaining ignorance—Pater) Judicious applies to one who is capable of arriving at wise decisions or just conclusions; the term usually suggests the ability to distinguish fact from falsehood and to eliminate all bias so that one’s judgments are fair, well-balanced, and level-headed as well as sound (I am perfectly indifferent to the judgment of all, except the few who are indeed judicious—Cowper) (I really think that, for wise men, this is not judicious—Burke) (the love of knowledge is not perhaps as insatiable as with us, but it is infinitely more judicious—Brownell) Prudent (see also under PRUDENCE; PRUDENT 3) applies to one who is so rich in practical wisdom that he can keep himself, his passions, and his actions under control and obedient to what he knows as right and necessary. In this sense prudent implies the use of one’s reason in the attainment of the moral virtue that leads to right living, as distinguished from its use in the attainment of knowledge of things which transcend experience (the prudent man looketh well to his going—Pro 14:15) Sensible (see also AWARE, PERCEPTIBLE, MATERIAL) describes one who in speech or action does not exceed the bounds of common sense or of good sense; the term suggests a display of intelligence rather than of wisdom and of natural reasonableness rather than the exercise of the reason (to discuss the ultimate career of a child nine years old would not be the act of a sensible parent—Bennett) (whatever he took up he did in the same matter-of-fact sensible way; without a touch of imagination, without a spark of brilliancy—Woolf) Sapient characterizes one who shows healthy-mindedness and level-headedness in prudent, judicious, or sensible acts and words (sane...persons who are so well balanced that they can adjust themselves to the conditions of every civilization—Ellis) (thankful in his heart and soul that he had his mother, so sane and wholesome—D. 2 Wit, humor, irony, sarcasm, satire, repartee are comparable when they denote a mode of expression which has for its aim the arousing of sudden sharp interest that is accompanied by amusement or laughter or a quality of mind which leads or predisposes to such expression. Wit which can denote reasoning power or mental capacity more typically implies intellectual brilliance and quickness in perception combined with the talent for expressing one’s ideas in a sparkling effective manner; in this sense wit need not imply the evocation of laughter, but it suggests a delighting and entertaining (they never meet but there’s a skirmish of wit between them—Shak.) (true wit is nature to advantage dressed, what oft was thought, but ne'er so well expressed—Pope) Sometimes the implication of a power to evoke laughter or smiles becomes prominent and the term without any loss of its earlier suggestions of mental acuteness and swift perception, especially of the incongruous, adds notions of verbal felicity, especially as shown in the expression’s unexpectedness of turn and aptness of application (if thou hast wit, and fun, and fire, and ne'er good wine did fear—Burns) Humor is often contrasted with wit, especially as one of two similar yet strikingly different modes of expression in literature. Humor may designate the peculiar disposition that leads one to perceive the ludicrous, the comical, or the ridiculous, and to express one’s perceptions so as to make others see or feel the same thing (she was always saved by her crisp sense of humor, her shrewd and mischievous wit—Ellis) or it may imply more human sympathy, more tolerance, more kindness than wit, a deeper sense of the inherent incongruities in human nature and human life, and a feeling for the not readily perceived pathos as well as for the not readily perceived absurdness of characters, of situations, or of consequences (writers distinguish the humor of Chaucer and Shakespeare from the wit of Dryden and Pope; the wit of Molière’s comedies from the humor of Don Quixote) (you expect wit from every man of any eminence in the eighteenth century. Sarcasm need not imply the use of verbal irony, sometimes suggesting no more than plain speaking, but it regularly implies as its aim the intent to make the victim an object of ridicule (in the intercourse of familiar life, he indulged his disposition to petulance and sarcasm—Johnson> The arrows of sarcasm are barbed with contempt—Gladden) Satire primarily designates writing intended to hold up vices or follies (as of a people or an age) for ridicule and reprehension (Johnson's drama is only incidentally satire, because it is only incidentally a criticism upon the actual world . . . that is, it does not find its source in any precise emotional attitude or precise intellectual criticism of the actual world—T. wither, shrivel, wizen mean to lose or cause to lose freshness and smoothness of appearance. Wither implies a loss of vital moisture (as sap or body fluids) with consequent fading or drying up and ultimate decay or death (withered leaves) (blossoms) which fall before they wither—Binyon> The term is often used in an extended sense implying a similar loss of vitality, vigor, or animation (age cannot wither her, nor custom steal her infinite variety—Shak> Art, he thought, should flower from an immediate impulse towards self-expression or communication, and should wither with the passing of the impulse—Huxley> Shrivel carries a stronger implication of becoming wrinkled or crinkled or shrunk in size than wither; usually also it implies a cause (as a blasting or blighting by or as by intense heat) or a lack of invigorating influences (as rain or, in extended use, encouragement, stimulation, or variety of employments) (the leaves shrivel in the hot sun) (age has shriveled her skin) (the man whose . . . practical life [is] shriveled to an insignifi- cant routine—Ellis) Wizen, especially in the past participle, is often preferred to wither or shrivel when the ideas of shrinking in size, and the wrinkling of the face or other surface especially through age, lack of nourishment, or failing vitality are especially stressed (a wizened old man) (the wizened face of a poorly nourished boy) (a wizened shrub, a staving bough—Browning> Ana *dry, parch, desiccate: shrink, *contract, constrict withhold detain, keep back, keep out, retain, hold, hold back, reserve, *keep Ana *restrain, curb, check, bridle, inhibit: refuse, *decline Con accord, *grant, concede, award, vouchsafe withstand *resist, contest, oppose, fight, combat, conflict, antagonize Ana *bear, endure, stand, tolerate, suffer: thwart, baffle, balk, foil, *frustrate: assail, *attack, assault Con submit, *yield, capitulate witness n *spector, observer, beholder, looker-on, onlooker, eyewitness, bystander, kibitzer witness vb *certify, attest, vouch witticism *joke, jest, jape, quip, wisecrack, crack, gag Ana wit, humor, sarcasm, satire, irony, repartee witty, humorous, facetious, jocose are comparable when they apply to persons and their urgings and provoking or intended to provoke laughter or smiles. Witty (compare wit) suggests a high degree of cleverness and quickness in discerning amusing congruities or incongruities; it may connote sparkling pleasantry, especially in repartee, but it often suggests sarcasm or causticity (her tongue was as sharp and witty as ever—Sackville-West> There's no possibility of being witty without a little ill-nature; the malice of a good thing is the barb that makes it stick—Sheridan> Humorous is a generic term applied to whoever or whatever provokes laughter (a humorous account of a picnic) (a humorous lecture) (the humorous characters of Shakespeare's plays) As opposed to witty, humorous often suggests sensibility rather than intellect, sympathy rather than aloofness in criticism, and sometimes, whimsicality rather than direct insight; thus, Pope is often described as a witty, Burns as a humorous, poet (whose humorous vein, strong sense, and simple style may teach the gayest, make the bravest smile—Cowper> The genius of the Italians is acute . . . but not subtle; hence, what they think to be humorous is merely witty—Coleridge> facetious usually applies to clumsy or inappropriate jesting or, somewhat derogatorily, to attempts at witiness or humorousness that please their maker more than others (probably the most tedious bore on earth is the man who feels it incumbent upon him always to be facetious and to turn everything into a joke—Pike> (her lines were weak facetious echoes of a style of college slang ten years outmoded—Wouk) Jocular also implies a fondness for jesting and joking but suggests as its motive the desire to make others laugh or to keep them amused. It need not imply loquaciousness but it tends to suggest a sustained jolly mood or habit of temperament (his more solemn and stately brother, at whom he laughed in his jocular way—Thackeray> The watercolor lesson enlivened by the jocular conversation of the kindly, humorous old man was always great fun—Conrad> Jocose suggests waggishness or sportiveness in jesting and joking; it often comes close to facetious in suggesting clumsy inappropriate jesting (sundry jocose proposals that the ladies should sit in the gentlemen's laps—Dickens>

**wonder n** 1 Wonder, marvel, prodigy, miracle, phenomenon can all mean something that causes astonishment or admiration. Wonder applies specifically to whatever excites surprise, astonishment, or amazement (as by its perfection, its greatness, or its inexplicableness) the hotels were wonders of comfort — White  the real wonder of jujitsu is . . . in the uniquely Oriental idea which the whole art expresses — Hearne  Chinese painters are not . . . absorbed in expressing their sensuous delight in the wonder and glory of the world — Binyon  Marvel applies to something that excites surprise or astonishment especially by its extraordinary nature, its strangeness, or its curiosity All I ask from them is discretion. — A., said Adrian, whose discretion was a marvel — Meredith  had never believed that such marvels of the cooking art really existed — Wouk  for the Roman army was still strong, and was to remain for centuries one of the marvels of the world — Buchan  Prodigy may name some extraordinary or abnormal fact or circumstance in nature seen as an omen or portent were not comets formerly dreaded, as awful prodigies intended to alarm the world? — Jeremiah Joyce or apply to something that makes one marvel because of its oddness or unusualness especially in degree of some quality (as skill, endurance, size, or achievement) wondering whether her husband, a despot, and pitiless pedant, would have tried to turn their boy into a prodigy — Edmund Wilson  women performing prodigies of endurance, bravery, and hope — Newsweek  Miracle applies to something that is accomplished or occurs which seems to those who are witnesses or have undergone the experience to exceed human powers and to require a supernatural or superhuman explanation wonders ye have done; miracles ye cannot — Tennison  In its nonreligious sense miracle retains its implication of wonder in its insistence on the fact that the person or thing so designated is beyond ordinary human comprehension or capacity to do or produce; only occasionally does it suggest a supernatural or superhuman agent or agency clung to their candles with an instinctive feeling that these primitive instruments were . . . more to be trusted than the miracles of science — Wolfe  the miracle which we call genius — Lowes  it was a miracle that the two men survived so many days exposure in an open boat  it was a miracle of rare device, a sunny pleasure dome with caves of ice! — Coleridge

Phenomenon in its more popular sense, which is somewhat contrary in meaning to phenomenon as used by scientists and philosophers (compare phenomenal under MATERIAL), implies something exceptional or extraordinary; it applies to a person, animal, or thing that is regarded as a prodigy or marvel or occasionally merely as an oddity the captain — a phenomenon during prohibition because he was honest — Dinneen  The Beat . . . the first phenomenon in years to come out of the Great Unwashed which Madison Avenue hadn't rigged, manipulated or foreseen — Mailer

2 Wonder, wonderment, amazement, admiration can denote the complex emotion aroused by something that is inexplicable or incomprehensible and, often, awe-inspiring. Wonder and wonderment commonly suggest novelty or strangeness in what excites the emotion and astonishment or perplexity in the person affected still the wonder grew that one small head could carry all he knew — Goldsmith  showed no great zest . . . a quiet wonderment rather, faintly tinged with pleasure — Cather  In its richest use wonder often implies rapturous awe nor any power above or under ever made us mute with wonder — Shute  Amazement stresses bewilderment or loss of power to collect one's thoughts; it rarely gives an indication of like or dislike for the object exciting the emotion reports . . . which constantly express amazement at the extent and severity of Russian attacks . . . and despair at the German setbacks — Shirer  Admiration, which in its most general sense implies an often enthusiastic recognition of superiority (see REGARD /z), can add an implication of absorbed or ecstatic attention (as to the rare, the beautiful, or the sublime) that approaches awe in its elevation and intensity respect which in the lay mind may well mount to admiration and even to awe — More  considered the emotion of reverence to be very complex. Into it enters awe which itself is a blend of fear and admiration. Admiration, in turn, represents a fusion of negative self-feeling and wonder G. W. Allport  a Kioto painter . . . who burnt a hole in his roof to admire a moonlight effect, and in his rapt reverence to be very complex. Wordy, verbose, prolix, diffuse, redundant can all mean 
word or a sound or a combination of sounds that forms 
an indelible whole constituting one of the ultimate units 
of a language. Vocabularies throw emphasis upon a word as 
pronounced or spelled rather than as a unit of meaning; 
a flat denial of poetic possibilities, in the case of any 
vocabularies, is liable to disastrous refutation—Lowes. 
Acustomed to songs in which the words are often merely 
convenient vocabularies with the melody usually more important 
than the text—Scholl. Term applies both to words and 
to phrases that express a whole idea and form one of the 
units of expression in a language, applying especially 
to units with a more or less precise technical use or meaning 
(the term communism is used today to describe both 
a political philosophy and its translation into reality— 
Gaytke). "The most important woman in Finland" is a 
term which has been applied—Current Biography. (All professions 
are likely to develop innumerable terms that constitute 
an almost private jargon.)

Ana expression, idiom, *phrase, locution 
Wordy, verbose, prolix, diffuse, redundant can all mean 
using or marked by the use of more words than are necessary 
to express the thought. Wordy often carries no further 
implications, though it may suggest garrulousness or lo-
quacity when the reference is to speech; went into consid-
erable detail about the Fuehrer's thoughts and policies on 
almost every conceivable subject, being more wordy than 
any previous letter . . . to his Italian partner—Shirer. (A wordy, prelogomenon babble—Stevenson) Verbose 
suggests overabundance of words as a literary fault char-
acteristic especially of a writer or public speaker or of 
a work or speech; it often implies resulting dullness or 
obscurity of expression or a lack of incisiveness, con-
fusion of ideas, or grandiloquence (a verbose style). (A dull verbose narrative) (His letters are full of interesting 
details but they are never verbose.) Prolix implies such 
attention to minute details as to extend what is written 
or told beyond due bounds; the term carries a stronger impli-
cation of tediousness or wearisomeness than verbose 
(the belief, so prevalent abroad, that it is typical of Russian 
literature to be formless, prolix and hysteric—Edmund Wilson) This, then, was Nuflo's story, told not in Nuflo's 
manner, which was infinitely prolix—Hudson. Diffuse 
usually implies verbosity, but it throws the emphasis upon 
the lack of organization and of the compactness and con-
densation needed for pointedness and for strength of style; 
it often attributes flabbiness, looseness, or desultoriness 
to what is written (The one can be profuse on occasion; 
the other is diffuse whether he will or no—J. R. Lowell). 
(Though Seneca is long-winded, he is not diffuse—he is 
capable of great concision—T. S. Eliot) Redundant 
can apply to whatever is superfluous (Older . . . occupations 
are becoming redundant and obsolete—Barkin) but in its 
specific application to words and phrases the term implies a 
superfluity that results from being repetitious or un-
needed for clarity and accuracy of expression (Revision 
of technical prose requires word by word scrutiny and 
elmination of whatever is redundant.) In its correspond-
ing application to writers, speakers, or utterances redu-
undant implies the use of redundancies (see redundancy under 
Verbiage) (The naturally copious and flowing style of the 
author is generally redundant—Mackintosh) (She had 
been, like nearly all very young writers, superfluous of 
phrase, redundant—Rose Macaulay) (In sharp comment . . .
quite demolished the emptiness and the pretentious-
ness of this redundant plan—Michener)

Work n 1 Work, labor, travail, toil, drudgery, grind are 
comparable when they mean effort or exertion directed 
to the accomplishment of an end, or an employment or 
activity which involves such expenditure of effort or exer-
tion. Work is the most comprehensive of these terms, for 
it may imply activity of body, mind, or machine or, in its 
largest sense, of a natural force. It is applicable not only to 
the exertion and to the employment which involves such 
exertion (Six days shalt thou labor, and do all thy work— 
Exod 20:9) but also to what is accomplished or produced 
by such exertion (This statue is the work of a gifted but 
unknown sculptor) (You have done a day's work in three 
hours) and to the material upon which one is employed 
(put your work away) Labor differs from work not so 
much in its specific denotations as in its implications; as 
a rule it implies human work and therefore suggests physi-
ocnal or intellectual exertion only, but it may suggest work 
of strenuous, onerous, or fatiguing kind (Labor is doing 
what we must; leisure is doing what we like—Shaw) The 
larger part of the labor of an author in composing his work 
is critical labor; the labor of writing, combining, construct-
ing, expunging, correcting, testing—T. S. Eliot) Sir William Meredith, anticipating the labors of Romilly, 
protested against the barbarity and the inefficacy of a 
criminal code—G. O. Trevelyan) Travail carries a 
stronger implication of painful effort or exertion than does 
labor; that connotation is often so strong that the term 
tends to denote suffering rather than labor (The sentiment-
alist escapes the stern travail of thought—Lowes) It 
breaks his heart . . . that all his hours of travail here for 
men seem yet in vain—Lindsay) Toil suggests labor that 
is prolonged and highly fatiguing but not necessarily 
physical (For years he led a life of unremitting physical 
toil—Buchan) Drudgery implies dull, irksome, and dis-
tasteful labor (thereafter, through . . . all the days she 
served in the store, the job was nothing but exasperating 
drudgery—Wouk) (Labor of the hands . . . pursued to 
the verge of drudgery—Thoreau) Grind applies to labor that 
one finds toilsome and trying or exhausting to mind or 
body (The long grind of teaching the promiscuous and 
preoccupied young—Henry James)

2 Work, employment, occupation, calling, pursuit, business 
can all denote the specific kind of labor or activity in which 
a person engages seriously especially as a means of earn-
ing a livelihood. Work is the most general of these terms; 
It applies to any kind of labor, whether physical or intel-
lectual, whether carried on by the hour, day, week, month, 
or longer period, and whether done for pay or not and, if 
the former, whether compensated for by an employer or 
out of fees for services or the profits of a business (Be out 
of work) (His work is that of a railroad engineer) (He is 
at work on his book) Employment implies work for which 
one has been engaged and is being paid by an employer 
(He is unable to find employment) (His employment is 
that of a bookbinder) (1 . . . went from town to town, work-
ing when I could get employment—Goldsmith) Occupa-
tion, though often used interchangeably with employ-
ment, can be more inclusive, for it does not necessarily 
connotate service under an employer and may be referred 
to the work of a kind in which one engages habitually or 
for which one has been trained; thus, one seeks employ-
ment but follows a particular occupation (Unable to find 
employment in his old occupation, he turned to common 
labor) (He is by occupation a teacher) (These are the chief 
questions which a man would ask . . . whom circumstances 
allowed to choose his occupation—Inge) Calling is
sometimes used in place of occupation but is typically used of occupations which can be described as vocations or professions and to which one is likely to have been called by one’s nature or special tastes (his calling is that of a preacher) (the learned callings) (Miss Jekyll had received that luckiest of fairy gifts, a calling . . . something that she loved to do—L. P. Smith) Pursuit, too, may be used in place of occupation but more specifically in the sense of a trade, craft, profession, business, or art that is followed often as a means of earning one’s living (they never have to learn to adjust themselves to people whose tastes and pursuits are different from their own—Russell) (though it was supposed to be proper for them to have an occupation, the crude fact of moneymaking was still regarded as derogatory, and the law, being a profession, was accounted a more gentlemanly pursuit than business—Wharton) Business is often used in the sense of work or sometimes of occupation (the business of keeping a lunatic asylum—Denman) (I hated, and still hate, the awful business of research—Bennett)

Ana *trade, craft, handicraft, art, profession

3 Work, product, production, opus, artifact can all denote a concrete thing that is made or brought into being by the exertion of effort and the exercise of skill. Work is applied to what comes under this general definition (as something that is manufactured or that is constructed or built) only when used without reference to a particular thing (the work reveals the workman) or when used with a possessive (the cabinetmaker is proud of his work) (every church that is known as Christopher Wren’s work) or in certain combinations (fireworks) (waxworks) Otherwise it is applied to a thing that results from mental labor, especially one involving composition and artistry in execution and specifically called a work of art (the works of Keats include his poems and usually his prefaces) (the works of Beethoven are all his musical compositions) (The Thinker is one of Rodin’s works) (the new history of literature promises to be a monumental work) Product (see also product 2) is applied chiefly to articles of manufacture whether they are made by hand or with the aid of machinery (the factory seeks a market for its products) (she was unwilling to part with the embroideries and laces that were the products of her handiwork) (synthetic materials impart their special properties to perfumes and flavors and when properly used, increase rather than diminish the value of the product—Morrison) When product rather than work is used of a poem, novel, statue, or painting, it is often either depreciative in its connotations or definitely noncommittal (this dull product of a scroffer’s pen—Wordsworth) (shall a literary product reveal the spirit of its age and be silent as to the spirit of its author—Matheson) Production is sometimes used where work would be the commoner and more idiomatic term, but it has a formal or slightly bombastic effect except when qualified by a superlative (the noblest productions of literary genius) (the finest productions of Michelangelo) (so one {Pygmalion} whose story serves at least to show men loved their own productions long ago, wooed an unfeeling statue {Galatea} for his wife—Cowper) The term also is specifically applied to a theatrical or similar performance viewed as the work of a producer or director who is responsible for all the technical, artistic, and dramaturgical aspects of a production. Opus is applied chiefly to a musical composition or group of compositions and in this use it is commonly followed by a number designating the order of publication or, sometimes, execution (Beethoven’s opus 27) The term also has some specific application (as to work in mosaic or embroidery) and is used in light criticism of a work of art or literature often with a suggestion of facetious pomposity (British books on statistics are ever so much sprightlier and clearer than American opera on the subject—Forbes) (an instance of misplaced creativity, perhaps the first but not the last in Wright’s prodigious opus—Mumford) Artifact basically denotes an artificial as distinguished from a natural product; it usually implies human workmanship, largely as a general designation for primitive weapons and implements as well as works of art (flints, arrowheads, and other artifacts of stone)

worker, workman, workingman, laborer, craftsman, handcraftsman, mechanic, artisan, hand, operative, roustabout can all mean one who earns his living by labor, especially by manual labor. Worker, the most comprehensive and least specific of these terms, applies to someone who earns his living by work of hand or brain (office workers) (factory workers) Workman does not imply a specific kind of work, but in all but its extended senses it commonly implies manual labor. It may be applied to one engaged to do a specified piece of work or to help in the construction of something requiring many workers; it may also be applied to a skilled or to an unskilled worker. Usually it implies opposition to employer, or manager, or foreman (there were 30 workmen on the job) In extended use the term is applicable to a worker whether he works with his hands or with his mind provided he makes, constructs, invents, or creates something (high-minded) and purifying workmen, they have spared no pains to produce a poetry finer than that of any other country in our time—Lowell) Workingman is more restricted in its range of application than workman, and is, in spite of varying legal definitions, applied commonly to a wage earner who at an hourly, daily, or weekly rate pursues a trade (as carpentry, masonry, or plumbing) or is similarly employed in a mercantile, manufacturing, or industrial establishment as distinguished especially from an industrialist, a merchant, and a professional man. Laborer commonly designates one whose work demands more strength and physical exertion than skill (as on a construction or excavation job) (day laborers) (farm laborers) Craftsman and handcraftsman basically apply to one who is a skilled workman in a craft or handicraft (see craft, handicraft under TRADE 1). Unlike the foregoing terms these two are common in general use and may apply as freely with reference to an avocation as to an employment. But the former may apply distinctively to a worker who is a competent technician or who is versed in the technique of his art, profession, or trade. It is especially used of artists, writers, playwrights, or skilled artisans (Pope . . . one of the most consummate craftsmen who ever dealt in words—Lowes) (the good craftsman constructs his product as perfectly as he can . . . He becomes an artist in so far as he treats his materials also for themselves—Alexander) Mechanic applies specifically to a workman skilled in the repair or adjustment of machines (an automobile mechanic) (an aviation mechanic) Artisan is more often opposed to artist (for this sense see under ARTIST 1) than employed as a designation of a particular type of workman. When applied to workmen as such and without thought of opposition to artist, the term comes very close to craftsman and is commonly applied to one who is skilled in a trade (as carpentry, weaving, or shoemaking) that involves learned skills and their appropriate application as well as physical labor (we pass from the weavers of cloth to a different class of artisans—Macaulay) Hand is applied to one of a crew, a force, or a gang of workmen or some-
times to an owner's or proprietor's helper or assistant

Worry stresses incessant attacking or goading and an intention or sometimes an effect of driving the victim to desperation or defeat (pursue a policy of worrying the enemy) (worry him out till he gives his consent—Swift) (brother should not war with brother, and worry and devour each other—Cowper) Annoy (see also annoy 1) implies continued molesting, interfering with, intruding on, or bedeviling until the victim is angry or upset (wilt thou then serve the Philistines with that gift which was expressly given thee to annoy them?—Milton) (clouds of flies . . . annoyed our horses—Borrow) (my movements are all along a regular beat, which enables me to avoid things that bore or annoy me—Edmund Wilson) Harass usually implies persecution, especially continued petty persecutions, or burdensome demands or exactations that drive one to distraction or exhaust one's nervous or mental power (it is good for boys and girls to know that their father can be harassed by worst and their mother worn out by a multiplicity of details—Russell) (securing air and naval bases from which he could harass and blockade the British Isles—Shirer) Harry, though often used interchangeably with harass, more vividly suggests maltreatment and oppression (Button and Miss Wace had been harried and chivied ... the latter getting visibly flustered, for tears came into her eyes—Sackville-West) (how on earth can you rack and harry and post a man for his losings, when you . . . live in the same station with him?—Kipling) Plague basically implies an affliction or infliction comparable to that of a devastating epidemic disease and even with greatly weakened implications tends to suggest a tormentor and an agonized or suffering victim (the gods are just, and of our pleasant vices make instruments to plague us—Shak.) (the kind of unhappy phrase that could plague a candidate right down to the wire—Michener) (misfortune plagued the plotters at every turn—Shirer) Pester implies the power to annoy past endurance (as by numbers or by repetition of attacks suggestive of the discomforts of an infestation of vermin) (pester the authorities with complaints) (Adrian . . . would accept him entirely as he seemed, and not pester him . . . by trying to unlock his heart—Meredith) Tease may imply repeated attempts to break down resistance by successive appeals or importunities (the children were teasing to be taken to the circus) (I have not been to the Rooms this age . . . except . . . last night with the Hodges's . . . they teased me into it—Austen) or it may imply an attempt to provoke or upset by railillery or tormenting (gets me mad when my ana

wrestle, tussle, grapple, scuffle

mean to struggle with an opponent at close quarters. Wrestle basically implies a struggle for mastery by gripping with hands, arms, and legs, often in ways governed by fixed rules; the term connotes the exercise of skill and ingenuity as well as strength. In its extended use wrestle also implies a struggle for mastery, but it may suggest either a striving for superiority or for a particular advantage or a laborious effort (as in understanding, in seeking, or in overcoming) (compelled to wrestle with the increasing difficulties of his office) (the perfectionist’s instinct for wrestling with a problem until he had shaped it to his mental image—Kolodin) (the man who has never wrestled with his early faith . . . has missed not only a moral but an intellectual discipline—Ellis)

Tussle also suggests a struggle for mastery, but it implies determination rather than skill or ingenuity and willingness to accept the rough-and-tumble conditions of such a struggle (the boys tussled long and hard) (tussle with a problem in mathematics) (a strong man who could tussle with evil and conquer—Caspy)

Grapple stresses the action of taking hold of or coming to grips with; the term carries a stronger implication of being in a position to gain the mastery and, usually, of a successful struggle (grappled with his assailant, pinning one of his arms behind him) (the architect has grappled with more problems than one needs to see solved in any single church—Henry Adams) (it has been mainly the academicians who have attempted to grapple with the . . . intricacies of Joyce’s mysticism of the flesh—Mailer)

Scuffle may imply brief, confused, usually not very serious fighting involving much scrumbling and noise (boys scuffled with each other in the schoolyard) It may suggest hurried or superficiality in overcoming difficulties (you go to school and scuffle on the best way you can—Runciman)

writer, author, composer

can all denote a person who gives expression to his ideas or feelings, but they are not as a rule synonyms. Writer is a comprehensive term applied to someone whose occupation or chief employment is the specific term for the author of a musical composition (the composer of the Peer Gynt suite) but, although this is its commonest application, it is also applicable to poets, painters, designers, and others when composition rather than creation or representation is the end (Shakespeare was not only a dramatist but a composer of lyrics and sonnets)

writhe, agonize, squirm

are comparable when they mean to twist or turn in physical or mental distress. Writhe regularly carries vivid suggestions of convulsive contortions (as of one in the throes of death, in a paroxysm, in an instrument of torture, or in a trap) and of fruitless struggling to escape. When used in reference to physical distress, it commonly implies also great pain (childhood and youth agoing in savage pains—Shelley)

When extended to refer to mental distress, it usually implies a torturing sense of shame, of bafflement, or of frustration (thus, at every march, the hidden enemy became bolder and the regiment writhe . . . under attacks it could not avenge—Kipling) (corrupt men in the machines write in the presence of his obvious integrity—Helen Fuller)

Agonize sometimes evokes the image of one in the pangs of death, struggling and in anguish; sometimes it evokes the picture of one wrestling or straining arduously to achieve a difficult victory (bled, groaned, and agonized, and died in vain—Cowper) (pages which cost a week of unremitting and agonizing labor—Huxley)

Squirm evokes images of a less dignified or a more familiar character; it usually does not imply profound distress, but great unease (as in aversion to restraint or discipline) or a shrinking or wincing (as under sarcasm or criticism) (sleek-haired subalterns who squirmed painfully in their chairs when they came to call—Kipling) (a grueling cross-examination . . . in which he is going to make me squirm in front of the grand jury—Gardner)

3 Yield, submit, capitulate, succumb, relent, defer, bow, cave can all mean to give way to someone or something that one cannot further resist. Yield (see also RELINQUISH; BEAR 2), when the reference is to a person implies being overcome (as by force, argument, or entreaty) (yield to persuasion) (yield to temptation) (he never yields except when the matter under discussion is of no significance to him) (he has no right to give way on this subject—Russell) but when the reference is to a thing, the word implies elasticity, or lack of firmness, strength, or endurance in the thing that gives way (the door suddenly yields to her hand—Austen) (the house they went to was . . . a human burrow or habitation that had yielded at every point to the crotchets and meanderings of a growing family—Cheever) Submit carries a more definite implication of contumacy or conflict than yield and, therefore, suggests more strongly a surrender after resistance to another’s will, or because of a thing’s strength or inevitability (all is lost—the unconquerable will . . . and courage never to submit—Milton) (the Indian summer of her heart, which was slow to submit to age—Stevenson) (a long diatribe against Pitt for having tamely submitted to the rebuffs of the French Directory—Quiller-Couch) (submitted to their joking with the best grace she could—Wouk) Capitulate can mean to surrender on terms definitely agreed upon, but in its common extended use, it more often centers attention on a definite submission to a force or power that one has not the strength, the skill, or the will to overcome (I always tip for special services rendered but I will not capitulate before sheer impertinence—Weichberg) (the universities would capitulate to a young, vigorous and revolutionary creed—Moherly) Succumb carries a stronger implication than any of the preceding terms of weakness or helplessness in the person or thing that gives way or of strength or irresistibility in the person or more often the thing that causes the giving way. The suggestion of sinking under that force or power is usually so strong in succumb that the word frequently implies a disastrous outcome (as death, destruction, or subjugation) (succumb to pneumonia) (the best of constitutions will not prevent ambitious politicians from succumbing . . . to the temptations of power—Huxley) (true passion . . . must be crushed before it will succumb—Meredith) All of the preceding terms usually imply a giving way on the part of a person or sometimes a thing that has not or cannot maintain the upper hand; they therefore often imply a weakening of the one that gives way. Relent, by contrast, implies a yielding on the part of the one who has the upper hand and who has been severe or harsh in his attitude to another person or fixed in his determination (as to punish, to interfere, or to frustrate). The term therefore implies a softening or mollifying that turns him from his previous course (can you hear a good man groan, and not relent?—Shak.) (when a second appeal, couched in more urgent terms, was dispatched to him, he relented—Cerf) Defer implies a yielding or submitting to because of respect or reverence for another or in recognition of another’s authority or superior knowledge (everybody must defer . . . a nation must wait upon her decision, a dean and chapter truckle to her wishes—Sackville-West) (clearly conscious of her success and of the way these Londoners were deferring to her—Dahl) Bow is a picturesque equivalent of defer or submit; it may suggest a yielding through courtesy or through subjugation (bow to the inevitable) (bow to established authority) (he admired the tribal discipline which made May bow to this decision—Wharton) Cave, usually with in, can be a close synonym of succumb, but it often suggests resistance to pressure to the point of exhaustion and sudden collapse (in the end government caved in, and unconditionally agreed to inquiry—Punch)

youth, adolescence, puberty, pubescence  are sometimes used interchangeably to denote the period in life when one passes from childhood to maturity. Youth is the most general of these terms, being applied sometimes to the whole early part of life from childhood or infancy to maturity (youth, maturity, senility). More often, however, youth is applied to the period between the maturing of the sexual organs and the attaining of full maturity. Youth often connotes the freshness, vigor, inexperience, or impetuousity characteristic of the young. Adolescence designates the same period as youth in the restricted sense, but it carries a stronger connotation of immaturity. Adolescence suggests the awkwardness resulting from the rapid growth during this period and also the mental and emotional instability resulting from the physiological changes. In legal use adolescence designates the period extending from puberty to the attainment of full legal age or majority. Basically puberty designates the age at which the signs of the maturing of the sexual organs appear (as the beard and changed voice in boys and the development of the breasts in girls); in law this age is commonly fixed at fourteen for boys and twelve for girls. In broader use puberty often designates the period covering the earlier years of adolescence during which the secondary sex characteristics are unfolding. Pubescence is sometimes used as equivalent to puberty, but often it applies distinctively to the condition of attaining the characteristics (as genital hair) of developing sexuality.

Ant  age (sense 1)
youthful, juvenile, puerile, boyish, virgin, virginal, maiden are comparable when they mean relating to or characteristic of one who is between childhood and adulthood; although their basic meaning is the same, they are seldom interchangeable because of widely differing implications and applications. Youthful suggests the possession or the appearance of youth, or of qualities appropriate to youth; it can be employed laudatorily or in extenuation (youthful aspirations) (youthful indiscretions) Juvenile often suggests immaturity of mind or body or lack of experience; it is applied especially to what is suited to or designed for boys and girls in their early teens (juvenile dances) (juvenile fiction) Puerile is applied especially to acts and utterances which, though excusable in a boy or girl or characteristic of immaturity, would be unpardonable or out of character in an adult; the word finds its commonest use in depreciatory reference to acts or utterances of the mature (what seemed sapient discourse in 1940 is rather puerile chatter now—G. W. Johnson) (time and again the suspicion wounds us that we are puerile people, fatal minds, illegible tapestries—Ferry Bennett) Boyish (compare mannish under male), though referred commonly to boys, is sometimes used in reference to girls or their clothes, appearance, or qualities. The term often suggests some of the engaging qualities or the physical attractiveness of normal, vigorous boys (a boyish smile) (boyish charm) (boyish enthusiasm) Virgin and virginal, though referable usually to girls, in the extended use in which they suggest the freshness, innocence, purity, and inexperience that are associated with youthful virginity are applicable also to boys (that beautiful mixture of manly courage and virginal modesty—Farrar) (he smiled like a girl, or like clear winter skies, a virginal light making stars of his eyes—Lindsay) Maiden in its extended sense carries an even stronger suggestion than virgin or virginal of youthful lack of experience; it also implies that one's qualities (as virtue, worth, competence, or strength) have not been tried or tested (a maiden speech) (his maiden effort at authorship)

### LIST OF AUTHORS QUOTED

The entries in italic type in the left-hand column are the actual forms used in citations in the Vocabulary of this Dictionary. These entries are arranged in the alphabetical order of surnames or titles. The right-hand column supplies an identification for each author or source cited. Only readily understood abbreviations (such as Amer. for American and Eng. for English) are used in this column.

As the names of books of the Bible are given wherever cited in the Vocabulary, all biblical quotations are from the Authorized Version (or King James Bible). Quotations from other versions are indicated by the addition of the abbreviations R. V. for Revised Version (of 1885), D. V. for Douay Version (or Douay Bible).
