Introduction to MyGrammarLab

Welcome to MyGrammarLab – a three-level grammar series that teaches and practises grammar through a unique blend of book, online and mobile resources. We recommend that you read this introduction along with the guide on the inside front cover to find out how to get the most out of your course.

What level is MyGrammarLab?
The MyGrammarLab series takes learners from elementary to advanced grammar, each level benchmarked against the Common European Framework and providing grammar practice for Cambridge ESOL exams:

<table>
<thead>
<tr>
<th>Level description</th>
<th>CEFR level</th>
<th>Grammar practice for exams</th>

<td>B1/B2</td>
<td>PET FCE</td>
</tr>
<tr>
<td>Advanced</td>
<td>C1/C2</td>
<td>CAE IELTS</td>
</tr>
</tbody>
</table>

What is unique about MyGrammarLab?
MyGrammarLab offers every learner of English the opportunity to study grammar in the way that best suits their needs – and provides as much practice as necessary to ensure that each grammar point is learnt and can be used in the context of real communication.

At each level, learners have access to a variety of materials:

**book**
- clear explanations to ensure full understanding of the grammar
- natural examples to illustrate the grammar points, based on the Longman Corpus Network
- a topic-based approach that presents grammar in context
- a variety of exercise types – from drills to contextualised practice
- a review section at the end of each module to revise the key grammar points
- information on the pronunciation of grammar items
- information on common errors and how to avoid making them
- a grammar check section for quickly checking specific grammar points
- a glossary of grammar terms used in the explanations

**online**
- a grammar teacher who explains key grammar points through short video presentations
- a full diagnostic test to identify the grammar points that need to be learnt
- more practice for every unit of the book
- regular progress tests to check that the grammar has been understood
- catch-up exercises for learners who fail the progress tests – to ensure that every learner has the opportunity to master the grammar
- a full exit test at the end of each module
- automatic marking and feedback
- pronunciation practice of grammar items
- the option to listen and check the answers for practice exercises from the book
- additional grammar practice for exams

**mobile**
- downloadable exercises for practice anywhere, any time
- the ability to create exercises from a bank of practice questions
- automatic marking and feedback for wrong answers
What is a MyLab?
A MyLab is a Learning Management System – an online platform that enables learners and teachers to manage the learning process via a number of online tools such as automatic marking, the recording of grades in a gradebook and the ability to customise a course.

How can I get the most out of MyGrammarLab?

To the Student:
If you are using MyGrammarLab in class, your teacher will tell you which units to study and which exercises to do.
If you are using MyGrammarLab for self-study, you can work through the book from Module 1 to Module 18. Or you can choose a grammar point that you want to study and go to a specific unit. Here is a good way to study a complete module:

Each module in the book starts with a summary of intermediate grammar points that you should already know. On the facing page there is a short text which illustrates examples of the module grammar, followed by a short diagnostic test. This shows you the units you need to study in order to learn more about the main grammar points.

Look for this instruction at the bottom of the first page of each module. Take the online diagnostic test then click on the feedback button to see which unit to go to for more information and practice.

Each unit starts with one or two pages of grammar explanations. Where there is one page, the practice exercises are on the facing page. Where there are two, the practice exercises are on the following two pages.

For more information about the grammar, go online to watch the grammar videos in each unit and listen to your grammar teacher.

If you would like more grammar and listening practice, you can listen to the correct answers for some of the practice exercises in the book. Look for this symbol: [2.10] Listen and check. If you have the book with answer key, you can check all the answers at the back of the book.

Look for this instruction at the end of the practice exercises in the book. All the online exercises are different to the exercises in the book. They are marked automatically. Your grades are recorded in your own gradebook.

Look for this symbol on the grammar information pages in the book: [1.10]. This means that there is some information on a pronunciation point. Go online to hear the information and practise the pronunciation.

Look for this instruction at the end of the practice exercises in the book. The online progress tests show you if you have understood the grammar points in the units that you have studied. If your grade is low, do the catch-up exercises online. If your grade is good, you probably don’t need to do these.

For practice away from your computer, download the catch-up exercises to your mobile phone. You can create your own practice tests. Go to www.mygrammarlab.com to download.

At the end of each module there is a two-page review section. The review exercises bring together all the grammar points in the module.

Look for this instruction at the end of each module. This takes you to an online exit test that will show you how much you know and if you need more practice.
To the Teacher:
If you are using MyGrammarLab with a class of students, you can either work through the book from the first to the last module, or you can select the areas that you would like your students to focus on.
You can work through a module as outlined on the previous page – but as a teacher, you are able to assign tests and view all the scores from your class in one gradebook. This will enable you to see at a glance which areas are difficult for your students – both as a group and individually.

For pronunciation and listening practice in class, audio CDs are available. The disk and track number for each pronunciation explanation and each recorded answer to a practice exercise are given in the book. Look for these symbols:

- Pronunciation ➤ 1.02
- ❌ 2.10 Listen and check.

All tests (diagnostic, progress and exit) are hidden from students. Assign these when you want your class to take the test. Marking is automatic – as is the reporting of grades into the class gradebook.

Some practice exercises – such as written tasks – require teacher marking. These are hidden from your students so you should only assign these if you want them to submit their answers to you for marking. The grades are reported automatically into the gradebook.

ACADEMIC ENGLISH

These notes will help you to express your ideas in a style that is appropriate to formal written English.

FORMALITY CHECK

This introduces information about the formality or informality of a particular grammar point or item of vocabulary.

GRAMMAR IN USE

This indicates an exercise which practises grammar in a typical context, often a longer passage or dialogue.

- Pronunciation ➤ 1.02

This indicates where you will find pronunciation practice on the audio CDs and in the MyLab.

- 2.10 Listen and check.

This indicates that there is a recorded answer online. You can check your answer by listening to the recording or, if you are using the edition with answer key, by looking in the key at the back of the book.

adverbial

Some words in the explanations are shown in purple. This indicates that they are included in the glossary on p. 11. Look in the glossary to find out what these words mean.
Glossary

adverbial a word or phrase used as an adverb to answer questions such as How? and When? or to link two sentences, e.g. After that, However
agent the person/thing that does the action of a passive verb, e.g. The cars are produced by machines.
attributive position when an adjective comes before the noun it describes, e.g. an expensive meal → predicative position
backshift changing the tense in reported speech to go one step back, i.e. present to past, past to past perfect, e.g. He's really nice. I told you he was really nice.
classifying adjective an adjective which describes what type something is, e.g. a medical emergency, an industrial estate.
cleft sentence one simple sentence that has been 'split' into two clauses to focus on one part of it, e.g. The book was written in 2008.
→ It was in 2008 that the book was written.
collocation words that often go together, e.g. to take a photo, a strong swimmer
complement a word or phrase that follows a linking verb and describes the subject or object of the verb, e.g. Jane seems nervous.
compound adjective an adjective formed from two words, e.g. slow-growing, air-conditioned.
compound noun a noun formed from two words which are related to each other, e.g. dishwasher, sports car, mobile phone.
coordinating conjunction a linking word (and, but, or), which joins two clauses of equal value, i.e. two main clauses or two subordinate clauses, e.g. She laughed but she cried. → subordinating conjunction
determiner a word which comes before a noun and specifies the noun in some way, e.g. the food, (article) our food (possessive), some food (quantifier), that food (demonstrative).
direct object a noun (phrase) or pronoun that usually follows a verb and shows who or what is affected by the action, e.g. They sold their old car last week. → indirect object
ellipsis leaving out a word or phrase completely; in this example, coming is ellipsed in the answer: 'Who’s coming this evening? I am.'
end-weight principle the principle in writing and formal speech that means we prefer to put long phrases after the verb and will manipulate the grammar to do so.
fronting moving an element of a sentence to the beginning for emphasis, particularly an element that does not usually appear at the beginning, e.g. On the right of the doorway is the most magnificent bay tree.
gradable adjective an adjective which can be made stronger or weaker, e.g. very expensive, slightly small and has a comparative form, e.g. more expensive, smaller → ungradable adjective
indirect object a noun (phrase) or pronoun that follows a verb and is usually linked to it with a preposition. It shows who or what receives the action, e.g. They sold their old car to my brother. → direct object
infinitive clause a subordinate clause that contains an infinitive form of a verb. It can act as the subject or complement of the verb be or identify a noun, e.g. To win the competition was his aim. The first person to answer correctly gets the point.
information principle the principle in writing and formal speech that means we prefer to start a clause with known or familiar information, often from the previous clause.
inversion reversing the position of two elements of the clause for emphasis, e.g. Never had he heard such rubbish.
nominalisation using a noun rather than a verb either to make the clause more formal, or to enable two clauses to be expressed as one, e.g. The committee decided to reject the plans, and everyone was delighted. → The committee’s decision to reject the plans delighted everyone.
noun clause a clause that replaces or acts like a noun, e.g. I was near where you live yesterday. (= I was near your house.)
participle clause a subordinate clause which begins with a present or past participle, e.g. Lying in the sun, I fell asleep. Treated gently, the fabric should last for years.
particle a preposition or adverb which combines with a verb to form a prepositional or phrasal verb, often with a new meaning, e.g. up → give up, off → take off
performative verb a verb that actually performs the action it describes when used in the first person present, e.g. I apologise means I’m sorry, so saying it performs the action of apologising.
predicative position when an adjective comes after the noun it describes (usually after a linking verb), e.g. that meal was expensive; I find that news surprising. → attributive position
question tag a short tag at the end of a statement which turns it into a question.
relative clause a clause that gives information about a noun or pronoun in a main clause. In a reduced relative clause we use a participle to replace the relative pronoun and verb in a defining relative clause, e.g. She doesn’t like the man who lives next door. → She doesn’t like the man living next door.
sense verb a verb that describes a sense or perception, e.g. see, hear, smell.
sentence adverb an adverb that refers to a whole sentence rather than one word, e.g. Generally, the children were well behaved. Includes comment adverbs, which express our attitude to the information in a statement, e.g. Understandably, he was disappointed with the results.
state verb a verb that describes a state such as being, thinking, possessing or feeling, rather than an action, e.g. be, believe, have, feel.
stranded preposition a preposition at the end of a clause, not followed by a noun or pronoun, e.g. What are you going to do for? These often appear in questions and relative clauses.
subjunctive a form of a verb which is the same as the infinitive without to, used after certain verbs/adjectives and in some that clauses to convey necessity/importance, e.g. The judge insisted that each client pay his own costs.
subordinating conjunction a linking word such as while, although, if, which links a subordinate clause and a main clause, e.g. She cried because she was happy. → coordinating conjunction
substitution replacing one word or phrase with another to avoid repetition, for example replacing a noun with a pronoun, e.g. I've already met Janes. He's very pleasant. Ungradable adjective an adjective which represents the limit of a scale and cannot be made stronger with very, e.g. priceless, boiling.
Before you start

1 Review these intermediate grammar points and check you know them.

Types of noun
- concrete e.g. artist, table, child, station, food, storm
- abstract e.g. art, responsibility, anger, efficiency, perception, photography
- proper (the names of people, places, events, etc.) e.g. Jane, London, August

COUNTABLE NOUNS  a car, three cars
UNCOUNTABLE NOUNS  oil, beauty, fruit

We do not use a/an with uncountable nouns, and we do not usually make them plural.

Possessive forms
1 noun + 's or ' (usually with people and animals): One of Sam's vehicles has been damaged.
   noun + of + noun (usually with things): There's a scratch on the paintwork of his car.
2 If the meaning is clear from the context, we can omit the following noun:
   That isn't my handwriting. It's Selina's. (= Selina's handwriting)

Indefinite pronouns

- someone/body¹  something  somewhere  somehow
- anyone/body     anything  anywhere  anyhow²
- everyone/body   everything  everywhere
- no one/body³    nothing  nowhere

¹ We use -one and -body interchangeably.
² anyhow is informal and is similar to anyway: Anyhow, as I was saying ...
³ We usually write no one as two words, and nobody as one word.
2 Read the text and identify examples of nouns, pronouns and possessive forms.

Since the invention of photography, art has been creating a new identity for itself. Movements from impressionism to abstract expressionism have widened the boundaries of what one might describe as ‘art’. People's perceptions have changed and nowadays we no longer define a great work of art by its beauty but by its ability to show us something in a new way, or to challenge our perception of what it is to be human.

1 Nouns

Plural forms of nouns and irregular noun plurals ➤ page 366
Differences between British and American English ➤ page 368

1 Gender

Nouns do not have grammatical gender in English. To show gender in job nouns we have to say a female/woman doctor, a male doctor, etc. A few nouns show gender by their suffix, usually masculine gender, such as businessman. A lot of people avoid these nouns now, especially if referring to a woman, and prefer a form with no obvious gender, e.g. chair, or to match the suffix to the person, e.g. chairwoman:
That's the view of Sheila Davison, chair(woman) of the Institute of Public Relations.

2 Nouns ending in -s

Some uncountable nouns end in -s but take a singular verb, for example
- some illnesses: measles, mumps
- sport and games: aerobics, gymnastics, darts
- study/abstract ideas/ emotions: mathematics, politics, news, thanks, happiness
  Politics is a topic best avoided with people you don't know well.

A plural subject describing a specific measurement usually takes a singular verb:
× Two metres aren't particularly tall these days.
✓ Two metres isn't particularly tall these days.

Twenty-four hours is a long time in politics. Ten miles is too far to walk.

A few nouns are more common in the plural form and take a plural verb, e.g. goods, whereabouts, remains, stairs, proceeds:
The auction raised a lot of money and the proceeds were given to a children's charity.

Some nouns refer to one object divided into two parts and take a plural verb, e.g. glasses, jeans, pyjamas, scales, scissors, spectacles, trousers:
Special scissors are used to cut this fabric.

3 Noun–verb agreement

The verb usually agrees with the subject noun even if it is separated by prepositional phrases, relative clauses, brackets or commas:
The petrol station across the road from the new shops has just cut its prices.

However, if the verb is a long way from the subject and closer to a complement (➤ Unit 42.1/2), the verb can agree with the complement. Compare:
The most exciting event was the rowing finals.
The most exciting event in the Sydney Olympics for most British viewers was/were the rowing finals.

The same can apply after what used to introduce a noun clause:
What the Board needs to finalise now is/are the terms of the redundancies.

4 Two subjects/plural subject–verb agreement

We usually use a plural verb with two subjects linked by and or both ... and:
Mum and Dad were hoping that you'd join them this evening.
Both the doctor and the surgeon have advised me to have the operation.

However, we use a singular verb if we consider the two items as one single concept:
× Fish and chips are one of the most common English dishes.
✓ Fish and chips is one of the most common English dishes.

Titles of books, films, etc. take a singular verb, even if they are plural nouns:
Hitchcock's film 'The Birds' is based on a story by Daphne du Maurier.
5 Collective noun–verb agreement

Collective nouns refer to a group of people, animals or things, e.g. family, government, group, staff, team, band, class. A large number of proper nouns fall into this category, e.g. the United Nations, British Airways, Microsoft Corporation. We can usually use a singular or plural verb after these nouns. The choice can depend on how we think of the noun:

<table>
<thead>
<tr>
<th>SINGULAR VERB</th>
<th>PLURAL VERB</th>
</tr>
</thead>
<tbody>
<tr>
<td>collective noun seen as a whole entity</td>
<td>The family has a monthly income of $2,000.</td>
</tr>
<tr>
<td>collective noun seen as a group of individuals</td>
<td>The family are all gathering here for New Year.</td>
</tr>
<tr>
<td>a + collective noun</td>
<td>A team of inspectors is visiting the prison tomorrow.</td>
</tr>
</tbody>
</table>

We always use a plural verb for

- certain collective nouns, e.g. police, people, cattle:
  The police are investigating his accusation of fraud.
- an adjective used as a collective noun (Unit 12.5):
  The middle-aged have a lot to offer employers.
- nouns such as the majority/a number/a couple + of + plural noun:
  The majority of the people were pleased to see the government fall.

6 Countable and uncountable nouns

Some nouns can be countable or uncountable, but have different meanings:

<table>
<thead>
<tr>
<th>COUNTABLE MEANING</th>
<th>UNCOUNTABLE MEANING</th>
</tr>
</thead>
<tbody>
<tr>
<td>I’d love a coffee, please. (= a cup)</td>
<td>Do you drink coffee? (= the liquid)</td>
</tr>
<tr>
<td>I’ll buy a chicken for dinner tonight. (= the whole bird)</td>
<td>Would you like some chicken for dinner? (= a part/the dish)</td>
</tr>
<tr>
<td>This is an amazing drawing by Leonardo. (= a picture)</td>
<td>My son is very good at drawing. (= the activity)</td>
</tr>
<tr>
<td>Someone threw a stone at our window. (= one item)</td>
<td>The road crosses a flat landscape of scrub and stone. (= the material)</td>
</tr>
</tbody>
</table>

1 This applies to all drinks: tea/a tea, cola/a cola, lemonade/a lemonade
2 Not all nouns of these types can be both countable and uncountable:
   X a beef, a mutton ✓ a duck/duck, a fish/fish, a lamb/lamb
   X an art, a poetry ✓ a painting/painting, a sculpture/sculpture
   X a wool, a cotton ✓ a paper/paper, a rock/rock

7 Quantifying uncountable nouns

We can use words like piece and bit to make some uncountable nouns countable:
The Council will remove two pieces of unwanted furniture if desired.

Other common nouns used in this way are: a slice of bread/meat/cheese/cake; an item of news/furniture/clothing; a lump of sugar/coal; a cup of coffee/tea, a pair of trousers/jeans.

We can sometimes make an uncountable noun countable to express ‘different types’ of the noun:
Our new skincare cream contains several essential oils.
This is a soft cheese from the Pyrenees.

We can use articles with uncountable abstract nouns to refer to a specific feeling:
distrust → a deep distrust, a distrust of lawyers  love → an everlasting love, the love of music

When we use nouns in this way, we use a singular verb:
A love of fashion and music is common amongst teenagers.

Adult Education Centre

ART CLASSES FOR ADULTS

Is art your passion?
Are you interested in a drawing, painting or the sculpture?
Would you like to improve your knowledge and skills?
Would you like to experience deep sense of satisfaction you get from creating your own original work?

At East Hamley College a team of highly qualified tutors are available to help you improve your technique. We run art classes on Tuesday and Thursday evenings from 6.30 to 9.00. Each session costs £15 and lasts for two hours with a 30-minute break. We think you’ll agree that £15 aren’t a lot to pay for over two hours with the personal attention of our art teachers!
Both the painting and the sculpture classes takes place in the new annexe on Becton Road. This also has a relaxing café selling a coffee and a range of snacks where you can take a break and socialise with your fellow students.
You won’t need to bring anything with you – we supply paint, papers and any other materials you need. But wear something that you don’t mind covering in paint – a jeans and an old shirt is fine.
Every year, the work of our students are exhibited in a local gallery. So, if you’re lucky, your work might get spotted – you could be the next Damien Hirst!

2 Possessive ’s

Form rules for possessive ’s, e.g. boy’s/boys’
➤ page 367

1 Special rules with possessive ’s

We can have two possessive ’s forms together:
We’re fed up with our neighbour’s tenant’s loud music.
If the possessive form consists of a compound noun
(➤ Unit 70.1) or two or more nouns which form a
single team or group, we add the ’s to the last
noun only:
Are you coming to my brother-in-law’s party?
(compound noun)
I’m a great fan of Lerner and Lowe’s musicals.
(They both wrote as a single team.)
When the nouns do not form a single group we
must use ’s with both nouns:
Schrodinger’s and Heisenberg’s versions of
quantum mechanics had seemed different.
(two versions of the theory)
If the possessive noun is part of a prepositional
phrase, we usually put the ’s at the end of the phrase:
× The woman’s in the corner baby began to cry.
✓ The woman in the corner’s baby began to cry.
(= The baby belonging to the woman in the corner ...)

2 Double possessives

We can use a double possessive – noun + of + noun (with possessive ’s) – to show that the
first noun means ‘one of several’. We usually use the indefinite article with this pattern:
I heard the story from a friend of my brother’s. (= one of my brother’s friends)
We do not always include the possessive ’s with the second noun:
They got the information from a friend of the owner.

The double possessive is common with pronouns. We always use the possessive pronoun:
× She’s a friend of us. She’s a friend of our.
✓ She’s a friend of ours. (= We have several friends. She is one of them.)

3 Specifying and classifying possessives

Specifying possessives show a relationship with something specific such as a person or
place. They usually answer the question ‘Whose ... ?’:
Marion washes the children’s clothes on Thursdays. (= the clothes belonging to the children)

An adjective in front of a specifying possessive only describes the noun immediately
following it:
Marion washed the older children’s clothes in the machine. (= the children are older)
Marion washed the children’s older clothes in the machine. (= the clothes are older)

Classifying possessives describe the type of thing something is. They answer the question
“What kind of...?” and are similar to compound nouns (➤ Unit 70):
Janice has opened a shop specialising in children’s clothes. (= clothes any children can wear)

An adjective in front of a classifying possessive describes the whole phrase:
Janice’s shop had a large selection of expensive children’s clothes.
(= The children’s clothes are expensive, not the children.)
Practice

1 Choose the correct meaning, A or B.

1 Stephanie loved her beautiful daughter’s sports car.
   A Stephanie’s daughter was beautiful.  B The sports car was beautiful.
2 She inherited a wonderful wooden dolls’ house.
   A The dolls are made of wood.  B The house is made of wood.
3 The company manufactures low-cost nurses’ uniforms.
   A The nurses earn low wages.  B The uniforms aren’t expensive.
4 Gary didn’t think much of his new boss’s management techniques.
   A Gary has a new boss.  B Gary’s boss has some new management techniques.
5 Bill and Suzy found hiring a well-educated children’s nanny was worth every penny.
   A Their nanny was well-educated.  B Their children were well-educated.
6 I managed to find a place in the 24-hour supermarket’s parking lot.
   A The supermarket is open 24 hours.  B The parking lot is open 24 hours.
7 Dave was often embarrassed by his aggressive flatmate’s comments.
   A Dave’s flatmate was aggressive.  B His flatmate’s comments were aggressive.
8 My uncle is restoring a redundant tax-inspectors’ office in Newcastle.
   A Some tax inspectors have been made redundant in Newcastle.
   B The office in Newcastle is no longer required by the tax inspectors.

MAREK Well, apart from me and Kylie, there’s Mike and Sandra, my brother-in-law’s nephews, Paul, and Harry.
SOPHIE Harry? Is he a friend of you?
MAREK No, he’s coming with Paul – he’s a cousin of him.
SOPHIE What’s the exhibition about, anyway?
MAREK It’s an exhibition by the art’s gallery’s new discovery – Stephen Brewer.
SOPHIE Oh yes, I’ve just read an article about him in the local’s paper culture section.
MAREK Yes, it was written by our next-door’s neighbour’s wife – she’s a well-known art critic, apparently.
SOPHIE OK. It sounds like it might be interesting.
MAREK Great. I thought we might all meet up for lunch first.
SOPHIE Good idea. That French place’s in Green Street reputation is excellent – a colleague mine told me about it, although I haven’t been there myself.
MAREK Right, let’s try that place then. By the way, will you be coming by car?
SOPHIE Why?
MAREK Well Mike’s and Sandra’s car is in the garage so they need a lift. Could you take them? They’re neighbours of your, aren’t they?
SOPHIE Yes, they are. OK, I suppose so. Shall we meet at one?
MAREK Fine. I’ll tell the others.

3 Possessive with ‘s or of?

1 Possessive ‘s
We usually use the possessive ‘s (and not the of structure):

<table>
<thead>
<tr>
<th>USE</th>
<th>EXAMPLES</th>
</tr>
</thead>
<tbody>
<tr>
<td>to refer to people and animals (especially with proper nouns), and to personal/professional relationships and human qualities</td>
<td>Sheila is Harold's youngest daughter. Do you like Snap's new collar? Have you met the boss's new secretary? John's intransigence is a pain.</td>
</tr>
<tr>
<td>to refer to general ownership, or possession of somebody's home</td>
<td>Have you seen Sheila's new car? We'll be at Mum's soon. (= Mum's house)</td>
</tr>
<tr>
<td>to refer to location in time (but not with dates)</td>
<td>Have you seen the poem in today's 'Observer'? It was in 19th December's paper.</td>
</tr>
<tr>
<td>to refer to the origin of something, for example where it comes from or who made it</td>
<td>Oil is Saudi Arabia's biggest export. 'Hamlet' is Shakespeare's most famous play. Have you read the committee's report yet?</td>
</tr>
<tr>
<td>to refer to a quantity or measure, for example of duration, distance or value</td>
<td>There will be an hour's delay. The hotel was ten minutes' drive from the beach.</td>
</tr>
<tr>
<td>in expressions for value/quantity with worth</td>
<td>Could you give me a pound's worth of chips?</td>
</tr>
<tr>
<td>with the names of shops, companies and people/places that provide a service</td>
<td>I'm getting the Thanksgiving shopping at Macy's. (= Macy's department store) Was there anything nice at the butcher's this morning? (= the butcher's shop)</td>
</tr>
<tr>
<td>in certain fixed expressions</td>
<td>She was at death's door. For pity's sake! For goodness' sake!</td>
</tr>
</tbody>
</table>

2 Noun + of + noun
We usually use the of structure (and not the possessive ‘s) in the following situations:

<table>
<thead>
<tr>
<th>USE</th>
<th>EXAMPLES</th>
</tr>
</thead>
<tbody>
<tr>
<td>when we refer to inanimate things and with abstract nouns (e.g. science)</td>
<td>We set up our base camp at the bottom of the mountain. I've been studying the philosophy of science.</td>
</tr>
<tr>
<td>when the noun is followed by a prepositional phrase or clause which defines it</td>
<td>The players ignored the jeers of the people standing in the front row.</td>
</tr>
<tr>
<td>when we refer to a specific year or date</td>
<td>It was destroyed in the fire of 1666.</td>
</tr>
<tr>
<td>with long or complex phrases, even when we are referring to people</td>
<td>A man was sentenced to life imprisonment for the murder of an English tourist, Monica Cantwell.</td>
</tr>
<tr>
<td>in certain fixed expressions and titles</td>
<td>He's the President of the United States. The Prince of Wales is to visit Iceland.</td>
</tr>
</tbody>
</table>
3 Either 's or of structure

We can usually use either the possessive 's or the of structure:

<table>
<thead>
<tr>
<th>USE</th>
<th>EXAMPLES</th>
</tr>
</thead>
<tbody>
<tr>
<td>with human creations such as countries, organisations, cities, institutions, machines, vehicles, buildings, etc. (The possessive 's is more common.)</td>
<td>Plane trees are a common sight on London’s streets. Plane trees are a common sight on the streets of London.</td>
</tr>
<tr>
<td>to refer to a quality that something possesses or displays (BUT we prefer to use the possessive 's with human qualities)</td>
<td>We were amazed by the ship’s sheer size. We were amazed by the sheer size of the ship.</td>
</tr>
<tr>
<td>to refer to the subject of something, its topic or theme (see 3.4)</td>
<td>The Queen’s portrait has caused much discussion and debate. The portrait of the Queen has caused much discussion and debate.</td>
</tr>
<tr>
<td>to express a reason or purpose with sake (but note exceptions in 3.1)</td>
<td>We agreed to stay together for the sake of the children for the children’s sake.</td>
</tr>
</tbody>
</table>

**ACADEMIC ENGLISH** The of structure is much more common than the possessive 's in academic and formal writing.

4 Combining different possessive patterns

The possessive 's and the of structure can describe different types of relationships between nouns:

<table>
<thead>
<tr>
<th>FORM</th>
<th>RELATIONSHIP</th>
</tr>
</thead>
<tbody>
<tr>
<td>possessive 's</td>
<td>origin, owner or creator</td>
</tr>
<tr>
<td>of + noun</td>
<td>subject or topic</td>
</tr>
</tbody>
</table>

We can use them together to give several pieces of information in the same sentence:

*One of our most popular exhibits is Van Dyck’s portrait of King Charles.*

(Van Dyck = the creator of the portrait → possessive 's)
(King Charles = the subject/topic of the portrait → of structure)

⚠️ We don’t use the possessive 's to describe the topic of something:

* X I wasn’t convinced by the quarrel’s description of the witness.
* ✓ I wasn’t convinced by the witness’s description of the quarrel.

(the witness = the person who made the description;
the quarrel = the topic of the description)

We can also use possessive forms with prepositions to describe a number of different relationships:

* Have you seen the National Gallery’s portrait of King Charles by Van Dyck?

5 New information with the of form

We can use the of form to put new information at the end of a sentence.

Compare:

* Nobel Peace Prize winner Aung San Suu Kyi was under house arrest for many years.
* [She is assassinated politician Aung San's daughter.]

* ✓ She is the daughter of assassinated politician Aung San.

(The new information is the reference to Aung San.)

4 Personal pronouns

Raphael’s painting of the School of Athens includes a portrait of the artist himself.

1 Subject and object pronouns

We do not usually omit pronouns, especially subject pronouns. Equally, we usually don’t use a noun + pronoun together as the subject of a verb:

✗ junk emails they have become a nuisance.
✓ Junk emails have become a nuisance.

Exceptions in spoken and informal English ➤ Unit 83.2/4

We do not use object pronouns in relative clauses or infinitive phrases if the object has already appeared in the same sentence:

✗ That’s the play I told you about it. ✓ That’s the play I told you about.
✗ Those plastic cakes look good enough to eat them.
✓ Those plastic cakes look good enough to eat.

After as and than, we use a subject pronoun with an auxiliary or modal verb:

The instructor didn’t ski as well as I do/did/can.

If there is no auxiliary or modal verb, we usually use object pronouns:

The instructor didn’t actually ski any better than me. They aren’t as old as us.

You may hear subject pronouns in this situation, but this can sound very formal or old-fashioned: [The instructor didn’t ski any better than I.]

FORMALITY CHECK After it is we use the subject pronoun in formal language, and the object pronoun in informal language and short responses:

It is they who asked for the music to be turned down. (formal)
It’s them who asked for the music to be turned down. (informal)
‘Who’s there?’ ‘It’s me.’ (informal)

When we have a noun and pronoun, or two pronouns together, we tend to put the speaker last (possibly out of politeness):

You and I are both invited to the pro-celebrity golf match, if you fancy it.

However, if we have a noun and pronoun where the pronoun does not refer to the speaker, we usually put the pronoun first:

Don’t you think we should let him and his wife decide when to come?

We usually use object pronouns after a preposition. In informal English you may hear the subject pronoun, although many people consider this incorrect:

[They’re sending the new consignment over for Tom and I to check.]
✓ They’re sending the new consignment over for Tom and me to check.

In some exclamations we modify object pronouns, usually with an adjective, e.g. Silly me!

We can use a noun after a pronoun to clarify who or what we are referring to:

I want you boys to report to the Principal after this class!

2 Pronouns he, she, it and one

We use he and she to refer to people and often also to animals, especially domestic pets:

We had to take our cat, Rusty, to the vet yesterday. He’s got ear mites.

Use of impersonal pronoun they ➤ Unit 5.1

We use it to refer to animals, things, ideas or actions, and not usually to people unless to refer to an unborn or young baby (if the sex is unknown):

Mary brought her new baby into the shop yesterday – it’s very cute.

We can use one or ones to avoid repeating countable nouns:

Do you prefer the dark chocolates or the white ones?
We do not use one to replace uncountable nouns:
× Do you prefer white rice or brown one? ✓ Do you prefer white rice or brown?

We can use one/ones after the and adjectives, but not immediately after a/an:
× I'd like a loaf of bread. Can you pass me a one from the top shelf?
✓ I'd like a loaf of bread. Can you pass me one from the top shelf?

These are interesting fossil specimens. This is an amazing one.

We use it/them, not one/ones when we refer to an item that has previously been defined.
Compare:
I need a cup of coffee, a large one. (= any cup of coffee)
Where's my coffee? Oh, there it is. (= my particular cup of coffee)

3 Reflexive pronouns

We use reflexive pronouns to refer to the subject after many verbs, including verbs with dependent prepositions (Unit 66):
Politicians have to believe in themselves if they want to convince voters.
(= Politicians have to believe in politicians.)

We can use either the object pronoun or the reflexive to refer to the subject after as (for), like, but (for) and except (for):
Howard found out that everyone except him/himself had read the report.

Some verbs are followed by the reflexive in English where it may not seem logical, and where similar verbs in other languages are not followed by the reflexive, e.g. acquaint yourself (with), avail yourself (of), behave yourself, commit yourself (to sth), enjoy yourself, help yourself:
Did the children behave themselves while we were out? (= behave well)
Help yourself to the food, won't you? (= take as much as you want)

There are many verbs which take a reflexive in other languages but do not usually do so in English, e.g. wash, dress, feel, get up, relax, remember, stand up, hurry:
× I don't feel myself very well today. ✓ I don't feel very well today.

We can also use reflexive pronouns to emphasise the subject or object of a sentence. The pronoun can come in any one of these positions in the sentence:

I have used this technique frequently.

We can use myself either at the beginning or the end of a sentence and separated by a comma to mean 'as far as I'm concerned/in my personal opinion':
Myself, I don't like the new fashion for flared trousers.
I don't like the new fashion for flared trousers, myself.

We use (all) by myself/yourself, etc. to emphasise 'without any help' or 'completely alone':
The garden looks amazing. Did you do it (all) by yourself?
We've decided to go on holiday by ourselves next year.

4 Reciprocal pronouns

Compare the use of reciprocal pronouns (each other/one another) and reflexive pronouns:
Our cats Fluff and Bangle spend a lot of time licking themselves.
(Fluff licks Fluff and Bangle licks Bangle.)
Fluff and Bangle sometimes lick each other. (Fluff licks Bangle and Bangle licks Fluff.)

Each other usually refers to two subjects, one another to more than two, though we tend to use the two forms interchangeably in informal English:
He spoke fast and his words tumbled out, tripping over each other/one another.

We don't use a reflexive or an object pronoun where a reciprocal pronoun is needed:
× So, we'll see ourselves/us at the fountain at half past one tomorrow.
✓ So, we'll see each other at the fountain at half past one tomorrow.

1 GRAMMAR IN USE Read the article below and replace the underlined words with a suitable pronoun. 2.07 Listen and check.

The Albino Lobster

BERNARD WARNER is a fishmonger. Mr Warner sells fish – lots of fish (1) …………… sometimes sells lobsters. When the lobster arrived in his shop, the lobster (2) …………… didn’t strike Mr Warner (3) …………… as being particularly odd. The lobster (4) …………… was a little paler than most others of its species, but perhaps it was just a bit old. Mr Warner left his shop to go on holiday as planned. Mr Warner’s shop (5) …………… was a family shop and he knew the shop (6) …………… was in good hands.

En route to Majorca, Mr Warner picked up the in-flight magazine. The magazine (7) …………… fell open at an article about albino lobsters. These very rare lobsters are just paler versions of a normal lobster. Albino lobsters (8) …………… are also very valuable: an albino lobster (9) …………… caught off the American coast was sold for £15,000; another, bigger albino lobster (10) …………… was insured for £20,000.

As soon as he reached his destination, Mr Warner raced to a phone. 'Don’t sell that lobster!' he told his family firm. But it was too late. The lobster (11) …………… had already been sold. Mr Warner couldn’t believe his bad luck. A diner somewhere had eaten the prize catch and the diner (12) …………… had had no idea at all of its value. After forty years as a fishmonger Mr Warner had thought that no one knew the business better than Mr Warner (13) ……………, but he had never come across an example (14) …………… of those lobsters before! He said that he now knew what it felt like to gain and lose a fortune in a single day.

12 A Oh, it was nothing. It is we who should thank you.
    B Oh, it was nothing. It is us who should thank you.
5 Impersonal and indefinite pronouns

1 Impersonal pronouns you, we, they, one

When we wish to express general feelings and opinions (i.e. of people in general, not necessarily those of the speaker), we can use impersonal pronouns you, we or they:

You can wear whatever you like to go to the theatre these days.
You never know! You bet!

• If we wish to include ourselves, it is better to use we:
  We can wear whatever we like to go to the theatre these days.
• If we wish to exclude ourselves, it is better to use they:
  They behave really badly at football matches nowadays.

We can also use they

• to refer to people in authority:
  Did you know they’ve put the parking charges up again?
• if we do not know a person’s gender, or do not wish to specify it:
  ‘Someone called you from Grant’s Garage.’ ‘Oh, did they leave their name?’
• in written English, when we can make the subject plural:
  A doctor always makes decisions according to the best of his/her knowledge.
  Doctors always make decisions according to the best of their knowledge.

Although we usually use we or you, we can use one in formal language to mean ‘people in general’, including ourselves. We very rarely use one in speech, especially in American English:

One can sympathise with the sentiments behind the actions of the strikers.

We can use one as a subject or object pronoun, and oneself as a reflexive pronoun:

One tends to learn to fend for oneself if one lives alone.

Fормality Check The use of one to mean ‘I’ is usually considered to be unnecessarily formal: [One would like to attend the ceremony, but one is too busy.]

Impersonal it ➔ Unit 44.2

2 Indefinite pronouns someone, anything, etc.

We use some compounds when we are thinking of a particular, but unspecified, person, place or thing. We use any compounds when we are thinking of people, places or things in general:

There’s something I would really like for my birthday. (= a particular present)
You need someone to witness your signature. Anyone will do. (= any person is suitable)

We use any + one/thing/place to mean ‘it doesn’t matter who/what/where’:
‘Where shall I sign the card?’ ‘Oh, anywhere you like.’

If we use these pronouns and adverbs as subjects, they take a singular verb:

Everything is going smoothly and NASA expects to launch the shuttle as scheduled.

We can use indefinite pronouns with adjectives, or with else, or with a to-clause:
Tony decided to do something positive about his problems.
Something else you become aware of all over the Basque country is the bracken.
We need somewhere cheap to stay for the night.

I liked its small scale and cosy air, and the way everyone said ‘Good morning’, and ‘Hello’, and ‘Dreadful weather – but it must brighten up’, to (2) ............ , and the sense that this was just (3) ............ more in a very long series of fundamentally cheerful, well-ordered, pleasantly uneventful days. (4) ............ in the whole of Dover would have any particular reasons to remember 21 March 1973, except for (5) ............ , and a handful of children born that day.

I didn’t know how early (6) ............ could decently begin asking for a room in England, so I thought (7) ............ would leave (8) ............ till mid-morning. With time on my hands, I made a thorough search for a guesthouse that looked attractive and quiet, but friendly and not too expensive, and at the stroke of ten o’clock presented (9) ............ on the doorstep of the (10) ............ I had carefully selected, taking care not to decompose the milk bottles. (11) ............ was a small hotel that was really a guesthouse, indeed, was really a boarding-house.

I don’t remember its name, but I well recall the proprietress, who showed (12) ............ to a room, then gave (13) ............ a tour of the facilities and outlined the many complicated rules for residing there. This was all bewilderingly new to me. Where I came from, (14) ............ got a room in a motel, spent ten hours making a lavish and possibly irredeemable mess of (15) ............ , and left early the next morning. This was like joining the army.
The da Vinci Mystery

Is this picture the work of an unknown artist or (1) .......... painting by Leonardo da Vinci?

A TEAM OF ART HISTORIANS (2) ............ been examining the picture at a laboratory in Paris. Tests have revealed a fingerprint near the top (3) ............ the painting which is remarkably similar to (4) ............ found on a da Vinci work in the Vatican. If the team (5) ............ correct, the painting could be worth many millions of dollars.

The (6) ............ was previously believed to be an early nineteenth-century work by an unknown German artist. (7) ............ was sold at Christie's in New York in 1988 for $19,000. In 2007 (8) ............ was sold again for a similar sum to Canadian-born collector, Peter Silverman. Mr Silverman knew there was (9) ............ special about the painting. (10) ............ wasn't convinced (11) ............ was a nineteenth-century work and so, last year, (12) ............ discussed (13) ............ painting with Dr Nicholas Turner of the British Museum. As a result of these discussions, Mr Silverman decided to begin a thorough investigation (14) ............ the picture.

Professor Martin Kemp of Oxford University, an expert on da (15) ............ work, believes the picture may be a portrait (16) ............ Bianca Sforza, daughter of the Duke of Milan. The (17) ............ daughter was only a teenager at the time, and the picture clearly shows a teenage girl. The costume and hairstyle (18) ............ those popular with the nobility (19) ............ late fifteenth-century Milan. Carbon dating analysis (20) ............ confirmed this date. Further scientific evidence (21) ............ been provided by infra-red photography. This indicates that the picture was painted by a left-handed artist. Leonardo da Vinci, as is well known, was left-handed.

Perhaps the most convincing (22) ............ of evidence is the fingerprint found on the painting. (23) ............ is from the top of the middle or index finger. The matching fingerprint is on da (24) ............ painting of Jerome in the Vatican collection. This is undisputedly (25) ............ work by da Vinci and was painted at a time when we believe he worked by (26) ............ without assistants. There is therefore a strong probability that this is Leonardo's own fingerprint.

If it is proved that this is a painting by Leonardo then (27) ............ can only speculate as to its potential value on the open market. We all know that (28) ............ works by da Vinci are incredibly rare and, as (29) ............ is the world's most famous old master, any work of (30) ............ which does come up for sale is likely to reach a phenomenal sum.
Articles, demonstratives and quantifiers

Before you start

1 Review these intermediate grammar points and check you know them.

Articles

1 We use the indefinite article a before consonant sounds (b, d, k, t, s, etc.) and before u/eu when pronounced /j/: a brainwave, a doctor, a university, a euphemism

We use an before vowel sounds (a, e, i, o, u) and words that start with silent h: an article, an engineer, an umbrella, an hour, an honest mistake, an R

• We use a/an with singular countable nouns: a garage, an opinion
• We use a/an to introduce a concept:
  They're building a new block of luxury apartments at the end of our street.
• We use a/an to refer to something indefinite, i.e. any one of many, not a specific one:
  I'd love to live in a luxury apartment one day.

2 We use the definite article the with singular countable nouns (the garage), plural nouns (the latest computers) and uncountable nouns (the purest water).

We can omit the with uncountable and plural nouns: peace, efforts

Quantifiers

1 Quantifiers are used before a noun to specify the amount or quantity.
They are words such as some, any, much, many and a lot of.

2 We use some and any for indefinite quantities, i.e. when we don’t specify how much or how many of something. We usually use some in positive sentences, any in questions and negatives:
I’ve got some money, so you don’t need to bring your wallet.
‘Have you got any coins for the meter?’ ‘Well, I’ve got some 10p and 20p coins, if that’s OK.’
You’ve got some interesting ideas, but you haven’t got any money to back them.

3 We use much and many in questions and negatives, but we prefer to use a lot of in positive statements:
‘I haven’t got much time. Can you hurry?’
‘Don’t hurry. I’ve got a lot of spare time today.’

Demonstratives

1 We use the demonstratives this/these to refer to someone or something known or close to the speaker, and that/those for someone/something further away:
‘I think these shoes are lovely.’ ‘Really? I prefer those in the window.’

2 Demonstratives can express closeness or distance in time as well as space:

<table>
<thead>
<tr>
<th>CLOSE</th>
<th>DISTANT</th>

<tbody>
<tr>
<td>space</td>
<td>Look at this MP3 player – it’s tiny.</td>

In 1907 an English soldier set up an organisation to educate boys, particularly in outdoor pursuits. The soldier was Robert Baden-Powell, who became Lord Baden-Powell, and the organisation was the beginning of the World Scout Movement.

1 Form

Articles (a/an, the) precede nouns and some other words (e.g. few, little and adjectives) in a noun phrase:

*Can I have a few small paper clips? I managed to get the last gold charm bracelet in the sale.*

The article is usually the first word in a noun phrase, but note

- *all/both/half + the:*
  - *Have you received all the information? You've only paid half the outstanding amount.*
- *quite/rather/such/what/half + a/an:*
  - *I've got quite a difficult problem to sort out in my maths course.*

2 Naming, describing and classifying

We use *a/an* when we name or describe something:

*That's a scarab beetle.*

*What's that? 'It's an enormous ant hill.'*

*We've just seen a really interesting film.*

Although *a/an* is similar in meaning to *one*, it is not identical:

*There's a room available at the Marriott on Friday night.*

(*= at least one room, and maybe more than one. The exact number isn't important.)*

*There's one room available at the Marriott on Friday night.*

(*= There is only one room available.)*

We use *a/an* when we refer to one example of a group, e.g. a profession or a species:

*Judith's daughter is studying to become a solicitor.*

*African elephant has larger ears than an Indian elephant.*

We usually refer to the whole group with the plural, without the definite article (Unit 6.4):

✗ *The African elephants have larger ears than the Indian elephants.*

✓ *African elephants have larger ears than Indian elephants.*

**FORMALITY CHECK** In more formal contexts we use *the* with a singular noun to generalise about a whole group or species:

*The African elephant has larger ears than the Indian elephant.*

We only use *a/an* when we talk about one example in a group or species:

*An elephant walked right past our hut yesterday evening.* (= an individual elephant)

We do NOT use *a/an* when we refer to the whole group, i.e. all members of the group:

✗ *Ruthless poachers hunt an elephant for the valuable ivory of its tusks.*

✓ *Ruthless poachers hunt the elephant for the valuable ivory of its tusks.*

✓ *Ruthless poachers hunt elephants for the valuable ivory of their tusks.*

We can also use *the* with an adjective to refer to a group of people (Unit 12.5):

*The homeless will be removed from the streets and placed in hostels.*

This is possible with nationality adjectives that end in -ch, -sh, -ese and -s, e.g. the French, the Welsh, the Chinese, the Swiss. For other nationalities, we have to use a plural noun:

*The French are known for their cuisine, but in my opinion Italians know better how to combine good food with a healthy diet.*
3 Known or unknown information

We use *a/an* to introduce information (i.e. a noun) that is not known to our listener/reader; but we use *the* when the information is known. Therefore, we usually use *a/an* for the first reference to something in a text, but *the* for subsequent references:

*In 1907 an English soldier set up an organisation to educate boys ... the organisation was the beginning of the World Scout Movement.*

We do not always have to mention something for it to be known to the listener. We consider that it is known in the following situations:

<table>
<thead>
<tr>
<th>SITUATION</th>
<th>EXAMPLE</th>
</tr>
</thead>
<tbody>
<tr>
<td>something is unique, i.e. there is only one of it</td>
<td>The organisation was the beginning of the World Scout Movement. The BBC's funding is under threat again.</td>
</tr>
<tr>
<td>superlatives</td>
<td>Is Michael Schumacher the greatest motor racing driver ever?</td>
</tr>
<tr>
<td>the context makes it 'known'</td>
<td>'Has the last candidate arrived yet?' 'Yes, she's in the boardroom.' (= the only boardroom in the office)</td>
</tr>
<tr>
<td>the speaker's and listener's shared knowledge makes it 'known'</td>
<td>Mum's out - she's gone to the dentist. (we both know which dentist she goes to)</td>
</tr>
<tr>
<td>a defining relative clause makes it 'known'</td>
<td>Zadie Smith is the writer who shot to fame with the publication of her first novel 'White Teeth'.</td>
</tr>
<tr>
<td>a prepositional phrase makes it 'known'</td>
<td>Croatia today is like the Greece of thirty years ago - unspoilt and not overrun by tourists. Meet me in the café next to the bus stop.</td>
</tr>
</tbody>
</table>

4 General and specific

With plural nouns and uncountable nouns we use either *the* or no article. We don't use an article when we want to refer to a group or class in general. Compare:

*Tourists are often blamed for changing the character of a town.* (= all tourists)

*Did you notice what the tourists in the castle were doing?* (= specific tourists)

*It is commonly accepted today that brown bread is good for you.*

*Did you remember to get the brown bread out of the freezer?*

⚠️ We only use an article before an abstract noun if we wish to talk about a specific type of the noun:

*× It is impossible to live in a world without the hope.*

*✓ It is impossible to live in a world without hope.* (hope in general)

*The hope of finding a cure for cancer drives a lot of medical research.* (the specific hope of finding a cure for cancer)

We do not use an article in front of nouns such as *hospital, prison, school* if we are focusing on their function, i.e. school as a place of learning or prison as a place of punishment/correction:

*Can children leave school at fourteen in your country?*

*Rick's son is in prison for burglary.*

If we focus on the physical place or building, we do use an article:

*Is there a school in the village or do the children have to go to the town?*

*Joanne is an administrative officer at the prison.*

**ACADEMIC ENGLISH** The definite article is very common in academic English, particularly with a prepositional phrase that identifies the noun:

*Motorised boats harm the ecology of waterways, unless their use is kept at a low level ...*

I first experienced terror when I was seven. My parents were living in wartime London when I was born, but my father died when I was one and my mother decided to leave (1) city and move to (2) countryside. A great-aunt of hers lived in (3) cottage in North Wales, and there she brought me up in (4) relative peace and security. (5) locals were all very friendly to us and accepted us without question, and I had (6) blissful childhood.

One day I arrived home from (7) school to find my mother clutching (8) telegram, in floods of tears. (9) telegram informed her that her father – my grandfather – had died. His funeral would be in three days and we had to go to London. I had never been outside (10) village and I was really excited at the thought of going to (11) capital city. So, two days later, we boarded (12) train to London. It was (13) first time I had been on a train and I was overwhelmed by (14) excitement of such an adventure. Several hours later we arrived. I clutched my mother’s hand as we stepped down from (15) train. (16) station was full of people rushing home from (17) work and it was quite dark. Now (18) fear was starting to creep into my mind. Then, suddenly, we were in (19) street outside the station. I had never seen so many people, buses and cars, nor heard so much noise. I was terrified. I opened my mouth and the wail that I let escape was one of (20) sheer terror.

4 GRAMMAR IN USE Read the following information about the Scout Movement. Write eleven more missing articles in the correct places. [2:11] Listen and check.

The World Scout Movement

The Scout Movement has rich and exciting history which has led to it becoming leading global youth movement of today. Here you can find information about founder of movement, Lord Baden-Powell, and other interesting facts about scouting.

There are more than 28 million Scouts, young people and adults, male and female, in 160 countries and territories. Some 300 million people have been Scouts, including prominent people in every field.

This is impressive, considering that scouting began with twenty boys and experimental camp in 1907. It was held during first nine days of August in 1907 on Brownsea Island, near Poole in Dorset, England.

Camp was a great success and proved to its organiser, Robert Baden-Powell, that his training and methods appealed to young people and really worked.

In January 1908, he published first Scouting for Boys, a book issued in fortnightly parts at four pence each. It was immediate success. Baden-Powell had only intended to provide method of training boys, something that existing youth organisations could adopt. To his surprise, youngsters started to organise themselves into what was destined to become – and is today – world’s largest voluntary youth movement.

\(^1\) For no + singular noun ➤ Unit 47.1
\(^2\) With both, all and half we can omit of before the: Both/All (of) the candidates believed they had won.
\(^3\) We can use some + singular noun: ‘Has John paid you?’ ‘Some chance of that! He never pays on time.’

2 Quantifiers: use

With most quantifiers, using of the before a plural or uncountable noun changes the meaning of the noun from general to specific:
I’d like some jewellery. (general, we don’t know which jewellery)
I’d like some of the jewellery. (specific, a particular set of jewellery)

A little/a few mean ‘a small amount/number of’:
There’s a little juice left in the fridge. A few people are interested in the new course.

However, without the article little and few have the meaning of ‘not enough’. Compare:
A few people are interested in the new course. (This is positive – enough to start planning it.)
Few people are interested in the new course. (This is negative – not enough interest.)

When we use few or little with a noun that has a negative meaning, e.g. problems, difficulty, the overall sense becomes positive:
There were few problems with the implementation of the new laws.

FORMALITY CHECK In informal and spoken English we prefer to use very before little and few:
There’s very little petrol in the car – we’d better get some more.
‘Are there many people in the office today?’ ‘No, very few. It’s the holiday season.’

Each and every have similar meanings. Both describe ‘more than one’, but each focuses more on separate individuals, while every focuses on individuals as members of a group:
The contract was signed by each director in turn. (= individuals, one by one)
When every director had signed the contract, it was sent off. (= the whole group)

Each refers to two or more things, every to more than two:
✗ She was wearing a fine gold chain on every ankle.
✓ She was wearing a fine gold chain on each ankle.
But: She was wearing a ring on each/every finger.
It is possible to use any + a singular countable noun, but meaning ‘it doesn’t matter which’:
Two trucks were parked on the airstrip, making it impossible for any plane to land.
Some can be used in a similar way, but the meaning is more derogatory:
She probably had a row with some kid at school. (≠ I don’t know which kid and I don’t care.)
Some can be positive in exclamations:
That’s some car! It must have cost a fortune.

Note that some has the strong pronunciation /sʌm/ when used in these ways.

Pronunciation ➤ 1.02

We can use quantifiers (except no and every) without a noun when the meaning is obvious:
The travel agent came up with two possible holidays, but we weren’t keen on either.
The vote was split: half were in favour of the motion, half were against it.

When used as subjects, some quantifiers take a singular verb, and some take a plural verb:

<table>
<thead>
<tr>
<th>Always singular: each</th>
<th>either</th>
<th>much</th>
</tr>
</thead>
<tbody>
<tr>
<td>Much of the research has already been completed.</td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>Always plural: both</th>
<th>several</th>
<th>a few</th>
<th>many</th>
</tr>
</thead>
<tbody>
<tr>
<td>Some visitors to the new gallery are enthusiastic but many have expressed their disappointment.</td>
<td></td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

Others take a singular or plural verb, depending on the noun they replace or modify:

<table>
<thead>
<tr>
<th>Singular or plural: any</th>
<th>half</th>
<th>some</th>
<th>a lot</th>
<th>all</th>
</tr>
</thead>
<tbody>
<tr>
<td>Some of the information is considered top secret.</td>
<td></td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td>Some of us are hiring a minibus to go to the match.</td>
<td></td>
<td></td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

FORMALITY CHECK: Neither and none take a singular or plural verb with plural nouns; a plural verb is more informal:
None of the students is/are willing to accept the increase in coursework.

3 Demonstratives this, that, these, those

We can use that/those when we want to suggest that there is some emotional distance
between ourselves and the person/thing we’re talking about. We may even dislike or
disapprove of the person/thing:
Are you still teaching that Martin Bates? I never liked the way he behaved in class.
‘Do you want to keep the local newspaper?’ ‘What? That old rag? No, there’s nothing in it.’

Note that that has the strong pronunciation /ðæt/ when used in these ways.

Pronunciation ➤ 1.03

We also use demonstratives as pronouns to refer to a noun, a thing or idea:
This is a really nice cup of tea. What kind is it?
Alan says he’s giving up his job to travel the world. I think that’s stupid.

We can use demonstratives with a relative clause or one/ones or those + of you/us/them, etc.
as an alternative to the one(s):
Hundreds of Brixton residents turned out to welcome Tyson to their borough. Those who had
bothered were rewarded by a 40-minute walkabout.
For those of you interested in learning more about Picasso, I’ve got a list of web addresses.

FORMALITY CHECK: In informal speech we can use this or these to introduce a topic or start
telling a story:
This woman came up to me in the bank and asked if she could borrow …

In certain expressions, we can use this or that instead of so to intensify an adjective:
I’ve never known a winter this cold before. So you think you’re that clever, do you?
We use this/that when starting a phone call: Is that Mr Oliver? – No, this is Mr Reynolds.

MAGNUM past and present

MAGNUM IS A COOPERATIVE OF NEARLY SIXTY PHOTOGRAPHERS WITH OFFICES IN NEW YORK, LONDON, PARIS AND TOKYO.

The cooperative was founded in 1947 by photographers Robert Capa, Henri Cartier-Bresson, George Rodger and David Seymour. All four had been involved in the Second World War. Rodger had walked hundreds of miles to escape Japanese in Burma. And Seymour received a medal for his work in American intelligence.

However, all of founders of Magnum had been photographers for some time. Photographic work they were famous for dated back further. Capa’s photos of the Spanish Civil War were called ‘finest pictures of front-line action ever taken’.

They all appreciated an importance of showing the world what really happens during this major conflicts and world crises, so they decided to produce the best documentary photography at this time. Cartier-Bresson once commented, ‘Some photographers tell the news step by step as if making an accountant’s statement.’ He and Magnum, on the other hand, felt that the news had to be shown in that way that would engage most the people who are unable to experience world-changing events at first-hand. Tragically, within a decade of the start of Magnum, the half of its original founders died while covering other wars. However, agency had started to employ other top-class photographers and its work was sure to continue.

Today, Magnum is some goal for many young photographers. It still produces the finest documentary photographs of world events. Recent coverage has included events in Caribbean and civil wars in Africa, and while Magnum photographers cover these events, we will all be able to appreciate both best and worst of humanity.

"Some photographers tell the news step by step as if making an accountant’s statement."

The Eiffel Tower

The Eiffel Tower was designed by Gustave Eiffel, constructed during 1887–9 and opened in 1889 for the World Fair held in Paris that year. It is located on the Champs de Mars in the west of Paris and was for many years the tallest building in the city. Many Parisians hated the structure at first but now it is a national symbol.

Visitors can go up to the top of the Tower by means of a series of lifts. There are visitor attractions and cafés/restaurants on the first two floors, and an amazing view from the third.

The Tower is open every day of the year from 9.30 in the morning until 11.00 or 12.00 at night, when it is illuminated with over 20,000 light bulbs!

9 Prepositions and prepositional phrases

1 Prepositions and adverbs
Prepositions and adverbs are very similar, but a preposition is usually followed by an object.
Compare:
Did you ever travel before the war, Dad?
(preposition + object)
I have a strange feeling that I’ve been here before.
(adverb)
We can modify prepositions by putting adverbs before them:
The bookshop is almost at the end of the street, just before the traffic lights.

2 Prepositional phrases
A prepositional phrase consists of a preposition and the word(s) that follow it, i.e. a noun, pronoun or noun phrase:
People are already drawing comparisons between Obama and Kennedy.
I’ll answer the phone . . . it’s for you. You should try to sleep on a firm mattress.
We can also use -ing forms or wh- clauses after prepositions:
As well as helping us to move into the house, John bought us a great present.
Please don’t interfere in any way with what I have written in the report.
A prepositional phrase can include nouns, pronouns or determiners before the object:
The head teacher doesn’t approve of our/ these arrangements with a local band.
The director insisted on Ben and Chris/ them/ their staying for the rehearsal.

⚠️ We don’t use that- clauses after prepositions:
✗ The government managed to pass the bill through Parliament, despite that it had a low majority.
✓ The government managed to pass the bill through Parliament, despite its low majority/
    despite having a low majority/despite the fact that it had a low majority.
We can use an infinitive phrase after the prepositions except, but and other than, when they follow a phrase with a negative meaning:
As you’re a captive audience, you have no choice except to pay their inflated prices.
I’m afraid your action has left us no alternative but to terminate your contract.

3 Stranded prepositions
A stranded preposition comes on its own at the end of a clause or sentence; its object comes earlier in the sentence. We commonly use stranded prepositions in:
• questions: Who are you coming to the party with? (object who)
• relative clauses: I’ve been offered the job in London that I applied for! (object the job)
• infinitive clauses: That man is impossible to work with! (object that man)
• the passive: What is your coat made from? (object what)

FORMALITY CHECK We sometimes keep the preposition and object together in more formal language:
We are unable to offer you the position for which you applied.

⚠️ When we use a preposition + relative clause, we use which or whom, not that:
✗ We are unable to offer you the position for that you applied.

Pompeii

In 79 CE Pompeii was a bustling town, the main hub (1) of which / which was its busy port, (2) where from / from where ships sailed all over the known world. The massive eruption of Mount Vesuvius in that year devastated the town, but also preserved a snapshot of Roman-era life for those who came after. Despite (3) having / that it had a population of about 20,000 people, (4) about only / only about 2,000 died in the eruption, the majority having fled because they had lived with the volcano for years and were only too aware of (5) it / its growling and what this meant.

Today’s visitors can walk through the town’s ancient streets, marvelling at the colourful frescoes (6) with which the houses were decorated / which the houses were decorated with; in some places it is still possible to see plaster casts of those killed in (7) go / going about their daily activities.

Although Vesuvius is still an active volcano, modern monitoring techniques mean that visitors can roam the ancient site with no reason to look up to the huge mountain other than (8) enjoying / to enjoy the view.

1 Place above, below, down, over, under, underneath, up

Above and over have similar meanings, as do below and under(neath):
The refuge is in the hills over/above the town.
Oncology departments in hospitals are often under(neath) the ground/below ground level.
Over and under are more common. We use them
- when one thing covers or touches another:
The clouds were hanging low over the hills. The wreck lay six metres under the water.
- when movement is suggested: Are we going to fly over the Alps?
- with prices, ages, speeds, distances and quantities, where we mean more than or fewer/less than: The conference was very badly attended: under two hundred people came.
Up and down can refer to position: John lives a few houses further up/down the road from us.

2 Place at, in

We usually use in with places that ‘surround’ us, such as countries, cities or towns, and
with names of streets and squares, but we use at with specific addresses:
The trees in Leicester Square don’t look very healthy.
Sandra lives in Bramble Road. Sarah lives at 36 Bramble Road.
We use at when we refer to gatherings of people: at a party, at a conference.
We use different prepositions depending on how we see a place. Compare:
The group will meet at 7.30 at the sports centre. (= either inside or outside)
The group will meet at 7.30 in the sports centre. (= inside)

3 Place against, alongside, beside, by, near, next to

By, near, next to and against all express proximity; by and next to express closer proximity,
and against suggests that something is so close that it’s touching:
Stella’s bought a house next to/by the sea – she’s got a wonderful view.
Stella’s bought a house near the sea. It’s only a five-minute walk to the beach.
Don’t lean against the wall – I’ve only just painted it!
We can use right by to make the proximity even closer: She lives right by the sea.
We use beside and alongside to express proximity along a line:
Warehouses were built beside/alongside the motorway.

4 Place across, after, before, behind, in front of, opposite, over

We use in front of to mean ‘further forward than’ and behind to mean ‘further back than’:
A is in front of B. B is behind A.
Before and after can refer to position in some contexts:
Karen’s nephew appears before/in front of the magistrates today.
You’ll be called first as my name is after yours on the list.
Opposite, across and over mean ‘on the other side of’, e.g. a road, a river:
I’ll meet you in the café opposite the theatre. (= on the other side of the road)
With across and over we have to say on the other side of what, e.g. the road:
I’ll meet you in the café across/over the road from the theatre.
The difference between opposite and in front of is that the items on the ‘line’ are not facing in the same direction, as in the diagram on page 50, but are facing each other, as in the diagram on the right:
A is opposite B. A and B are opposite each other.

5 Movement down, into, off, on, out of, over, up
We use these prepositions for movement up or down:
Look at Johnny’s knee – he’s just fallen off his bike.
The climb up the mountain was incredibly strenuous.
We get on or off a bus, plane, train, boat and bike but into and out of a car.
We also often use up and down with roads and rivers to mean ‘along’:
You walk down the high street and turn left at the library.
We can use over for a movement across an obstacle:
The burglar leapt over the garden fence as he ran away from us.

6 Movement across, along, over, past, through
We use across for movement from one side to the other of something on a ‘surface’, e.g. across the river/road/field.
We use through for movement inside something, e.g. through a room/tunnel:
Walk across the playing field to the sports centre, then go through the main hall ...
Over is similar to across (one side to the other) but it incorporates the idea of ‘above’:
Are we going to fly over the Alps on the way to Italy?
We use along for movement in a line, e.g. along a river/road:
You can spend a pleasant afternoon strolling along the canals in Amsterdam.
We use past for a movement from one side to the other of something, close to it:
I was startled by a huge bird that flew past my window this afternoon.

7 Movement around, at, down (to), to, towards, up (to)
We can use up to or towards when we approach someone or something, but we use only (right) up to if we actually reach the person/thing:
X Do you think I can go towards him and ask for his autograph?
✓ Do you think I can go up to him and ask for his autograph?
The scientist moved quietly towards the group of grazing animals.
We can use up (to) and down (to) for movement north or south within a country, and up to with a major or capital city: Are you driving up to London this weekend?
We can express a circular movement with (a)round:
We drove (around) the roundabout three times before we took the correct exit.
We can use both to and at after certain verbs, e.g. throw, shout. To suggests that the recipient is happy with the action but at that the recipient is not happy:
Can you throw that book to me, please? Don’t throw stones at the cat!

8 Metaphorical uses
We often also use prepositions of place in a less literal way. We use above or below metaphorically to talk about ‘level’ or ‘rank’, or when we measure things on a vertical scale:
Is the position of Managing Editor above or below that of Editorial Director?
His temperature rose above 100°.
Similarly, we can use prepositions of movement in a less literal way:
A system of charges has been introduced into the Health Service.
I was halfway through the book when my friend told me the ending!
We’re saving all of this extra income towards a round-the-world trip next year.
A Quick Guide to Paris

The beauty of Paris is that it's a very compact city, easy to get around, and to see the sights in a relatively short time. Start your tour in the very centre of the city, on the island in the Seine (the Île de la Cité). Here you will find the impressive Palais de Justice (law courts), and north-east across the river is the City Hall of Paris. Going west from this, facing the west end of the island, you'll see the imposing east façade of the Louvre – the huge museum that sprawls alongside the river. After your visit to the Louvre, take a leisurely stroll through the lovely Tuileries Gardens to the Place de la Concorde. From there you could either go back south-east across the river and visit the stunning Musée d'Orsay, or stroll along the bustling Champs-Elysées to the magnificent Arc de Triomphe at its western end. A short distance south of this across the river you'll find the Eiffel Tower, possibly the most famous sight in Paris, and opposite this, over the river the stark Chaillot Palace (also known as Trocadéro), which houses several interesting museums. Two more sights that shouldn't be missed even on a short visit to Paris are the old Bastille prison to the east of the city, now an opera house, and to the north, on Montmartre Hill, the fascinating Place du Tertre, where artists gather to this day and will paint your portrait for a modest sum.

Choose the correct preposition. 2.11 Listen and check.

1 After submitting your complaint, you will be informed of a date when you will be invited to appear after / before the employment tribunal.
2 'Look at that man, Mum! ' 'Don't point at / to people, Lucy. It's very rude!'

4 We need to limit the number of participants in each workshop to beneath / under 25 to ensure that everyone is able to join in.
5 Most of the restaurants in the town can be found in / at Lavender Road.
6 In 218 BCE Hannibal took his army of men and elephants through / across the Alps in order to fight the Roman forces in Italy.
7 There was a fire alarm while we were in / at the main auditorium at the theatre.
8 At the end of the match the contestants are expected to go towards / up to each other and shake hands.
9 The missing children were found hiding in the small park opposite / across the river from the school.
10 We were really late and only just managed to get into / on the ferry before it sailed.
11 In this cold weather we always sleep with at least two extra blankets over / above us.
12 You can put the packaging in the rubbish bin in front of / opposite the entrance – it's just outside.
END OF THE ROAD

A tourist's tale by SUSAN HUNTER

IT WAS LATE afternoon when we drove into the little town. We had driven for (1) .......... 400 kilometres that day and most of it had been (2) .......... thick fog. We were tired and decided to find a hotel – we didn’t know how far it might be to the next town. We parked, got (3) .......... the car and stretched – a walk would be very welcome, we thought. We left our luggage (4) .......... the car boot and walked (5) .......... the already empty car park to a narrow but fast-flowing stream. A five-minute stroll (6) .......... a tree-lined avenue (7) .......... the stream took us (8) .......... the town square. It was a beautiful old square with a fountain (9) .......... the middle and arcades (10) .......... three sides. We looked up at terraces of interesting-looking restaurants (11) .......... the arcades and then back down at entrances to fascinating little shops (12) .......... them.

We had no idea where to look for a hotel or a pension in this sleepy town, so we walked (13) .......... an old man sitting (14) .......... a bench by the fountain. He pointed us in the direction of a narrow alleyway and told us we’d find the best hotel (15) .......... the little road. It seemed unlikely, but we followed his advice and sure enough, (16) .......... the other end of the alleyway, (17) .......... two picturesque old houses, was a sign saying ‘hotel’. Just (18) .......... the hotel, (19) .......... the other side of the street, was a house covered in the most colourful flowers, and I immediately hoped that we might be able to see the house from our bedroom window. (20) .......... the hotel reception, a cool, dark room with a coffee lounge (21) .......... one corner, we asked about a room. Our satisfaction was complete when we realised that even the best room in the hotel was (22) .......... $80.

We looked at the room, decided to take it and went down to the lounge, where we stopped for a delicious cappuccino. Soon dusk was falling, so we handed the room key (23) .......... the receptionist and told him we’d be back with our luggage in ten minutes. As we walked (24) .......... the narrow streets, we discussed what we would do the next day and how long we’d stay in the little town. Imagine our horror when we arrived (25) .......... the car park to find it completely empty – our car and all of our luggage had been stolen!
11 Prepositions of time; other meanings

1 Time after, at, before, by, in, on, past

These prepositions precede a specific point in time.

We can use about or around with at to be less specific, and in informal speech, we can omit at before these:

*Let’s meet at the station (at) about six.*

**Formality Check** In informal English, American English and news reports, we can also omit on before days:

*Great news! The travel agent has found us a flight that leaves Wednesday.*

⚠️ We do not use the prepositions at, on or in immediately before adverbs or adverbial phrases such as today, tomorrow, last/this/next week:

❌ Our holiday starts on next week. ✓ Our holiday starts next week.

We use:

- after or past to mean ‘later than’: Where have you been? It’s after/past eleven o’clock.
- before to mean ‘before a time’, and by to mean ‘before or at a time’:

  Applications must be submitted **before** 30th November. (= on the 29th or earlier).
  Applications must be submitted **by** 30th November. (= on the 30th or earlier)

The adverbial phrases *in time* and *(right) on time* have different meanings:

*The wedding car arrived **in time** but the bride wasn’t ready.* (= with time to spare)

*The bride arrived **right on time** for the ceremony.* (= at precisely the right time)

2 Time during, for, from ... till/until/to, since, through(out), until/till

These prepositions precede a period of time, or point in time (since):

*From next Monday, we will have to suspend flexible working arrangements until further notice.*

Long hair for men was fashionable during/through(out) much of the seventies.

This volcano hasn’t erupted **since** 1935. The volcano hasn’t erupted **for** more than 75 years.

The motorway widening was successfully completed **within/in** four months.

*I’ll be staying at the Hilton from Friday to Monday.*

Note the difference between *during* and *while*:

*Please refrain from talking during the performance.* (during + noun/-ing form)

*Please refrain from talking while the actors are performing.* (while + clause)

Prepositions of time in American English ➤ page 368

3 Reason, means and purpose

We use the prepositions because of, due to and owing to to express a reason:

*The District Line is closed due to/owing to/because of engineering works.*

We use

- *from* and *out of* for cause or motive:

  *Huge numbers of people in the Third World die from starvation every day.*

  *They obeyed him out of fear rather than respect.*

- *through* to mean ‘by means of’:

  *He achieves success through patience and hard work.*

- *for* to show the purpose of an item, action, etc:

  *I want a knife that can be used for cutting bread.*

  *Our uncle’s company manufactures lubricants for ball bearings.*
• by or with to introduce an instrument, i.e. what we use to do something:
  Negotiations were held by phone between the client and his solicitor.
  The victim was killed by a bullet to the head/with a sawn-off shotgun.
• by for the agent (or creator) of something: It’s one of the later paintings by Van Gogh.

4 Comparison
We use
• against, beside and contrary to to make a contrast:
  Look at this year’s sales figures against last year’s; they’re so much better.
  Beside her sister, Laura was positively plain.
  The Davis Cup final was won by the Croatian team, contrary to expectations.
• between to differentiate: I can’t tell the difference between butter and this spread.
• like to make a comparison: She behaves like a director, but she’s really only a secretary.
• as to express a role: Speaking as a director of the company, I believe we should sell the shares.

5 Inclusion and exception
We usually use among or between to show that something is part of a pair/group.
Among usually refers to more than two:
For women, the distinction between work and leisure is less clear-cut.
Princes William and Harry were among the spectators at yesterday’s match.
When we talk about one thing in addition to others, we can use besides:
Are there any issues remaining besides that of the roof repairs?
To say that something is not within certain limits, we can use beyond, outside or out of:
I’m afraid that changes to the curriculum are beyond/outside/out of our control.
We can use apart from, but for and except (for) to say that something is excluded:
Everyone is invited to the conference dinner, except (for)/apart from/but for those who have bought ‘day’ tickets only.
• Except and except for can both be used after phrases containing determiners such as all, every, no: Julian did very well in all his exams except (for) geography.
• To contradict the main idea of the sentence, we only use except for:
  Glock emerged from the wreckage of the car uninjured except for a minor leg injury.
• We can also use but for to mean ‘if not for’ (Unit 38.3).

6 Material
We use
• of when the original material is still visible: a dress (made) of Thai silk
• of in metaphorical phrases: a man of iron, a heart of gold
• from when the original material has been transformed: ice cream made from strawberries
• with when we refer to a filling or an ingredient: vine leaves stuffed with rice

7 Other
We use
• on behalf of to express ‘representing’ someone or something:
  On behalf of our shareholders, I’d like to thank all of you who voted in favour of the merger.
• for the sake of when we do something in order to benefit someone/something else:
  I think we should move to the country for the sake of the children.
• according to to report opinions or feelings:
  The peak skiing period will be 24–25 February, according to Chamonix tourist office.

⚠️ We do not use according to to report our own opinions and feelings:
✗ Holograms aren’t a real art form, according to me.
✓ According to many art critics, holograms aren’t a real art form.

Dear Dr Anderson

I would like to be considered for the post of resident photographer with your magazine Nature.

My degree is in media studies, specialising in photography. I completed it in 2002 and I have been working for that time for various companies, including magazines, [a freelance photographer. All my work experience so far has been in the UK, a three-month project in Poland, where I took photos of birds on the Baltic coast, family commitments at the present time, I am seeking to move from freelance into more secure employment, and I would be very interested in working for Nature magazine. I have a long-standing interest in the natural world and many of my best photographs have been wildlife and the scenery of the British Isles. my previous employers is a small local wildlife charity, for whom I took many photos, three short-term contracts, some of which I enclose with this application. I had hoped to find a permanent position with them, but their expectations, funding for the position was not forthcoming.]

If you require further information, I am always contactable by email or phone.

**Adjectives**

1. Adjectives are words which give extra information about nouns. They do not change their form to show number or gender:

   *The hero was played by a young boy. Several young girls took the secondary roles.*

2. Many adjectives are formed from other words:

   - *history* → *historic*
   - *beauty* → *beautiful*
   - *depend* → *dependent*
   - *effect* → *effective*

3. We often use the past (-ed) and present (-ing) participles as adjectives to describe feelings or emotions.

   - We use the *-ing* form to describe a feeling that something causes:
     
     *It was a frightening film.* (= It frightened us/made us feel afraid.)

   - We use the *-ed* form to describe a feeling that someone experiences:
     
     *I felt frightened when I watched that film.* (= I was frightened/experienced fear.)

   - Inanimate objects cannot have feelings so we don’t usually use *-ed* adjectives about feelings to describe them:
     
     *✗ The report into police behaviour during the demonstration was rather worried.*
     
     *✓ The report was rather worrying.* (= The report made readers feel anxious.)

4. We can also combine words to make compound adjectives, e.g. *home-made*, *Spanish-speaking*.

---

**Adverbs**

1. Adverbs are words which modify or give extra information about verbs, adjectives, other words or whole clauses. Here are some common examples:

<table>
<thead>
<tr>
<th>not formed from other words</th>
<th>here</th>
<th>just</th>
<th>never</th>
<th>quite</th>
<th>soon</th>
<th>still</th>
<th>tomorrow</th>
<th>too well</th>

</tbody>
</table>

2. The most common use of adverbs is to modify adjectives; the adverb usually comes before the adjective:

   *I thought his answers were pretty good on the whole.*

   *Those cars are terribly expensive.*

   Some adverbs, e.g. *really, almost, quite, pretty*, can modify another adverb:

   *The French team did quite well in the first round.*
The Brink’s-MAT Robbery
The biggest robbery in British history took place on 26 November 1983 when six men broke into the Brink’s-MAT warehouse at Heathrow Airport, London. They stole £3 million in cash and three tonnes of gold bullion, worth around £26 million. The armed robbers poured petrol over the terrified security guards and threatened to set them alight. The British police pursued the gang tirelessly, and in 1984 Brian Robinson and gang leader Michael McAvoy were caught and found guilty of armed robbery, receiving sentences of 25 years in prison. However, the other members of the gang are still at large, and the bulk of the gold has never been found.

Adjective patterns

1 Adjectives before nouns (attributive position)
Most adjectives can be used before a noun (attributive position), or after a linking verb, e.g. be, become, etc. (predicative position):
ATTRIBUTIVE We’ve just seen an exciting film.
PREDICATIVE That film was exciting.
But classifying adjectives (which describe what type of thing something is) and emphasising adjectives are normally only used BEFORE a noun:
X The plant they are building here is chemical. ✓ They’re building a chemical plant here.
X The chance that they met was mere. ✓ It was mere chance that they met.

<table>
<thead>
<tr>
<th>ATTRIBUTIVE POSITION</th>
</tr>
</thead>
<tbody>
<tr>
<td>classifying (examples)</td>
</tr>
<tr>
<td>emphasising</td>
</tr>
</tbody>
</table>

ACADEMIC ENGLISH In academic writing we usually prefer adjectives in attributive position, e.g. basic processes, experimental physics, appropriate conditions, principal causes, etc.

2 Adjectives after verbs (predicative position)
Adjectives in predicative position are usually the complement of a linking verb, e.g. be, become, feel, seem (► Unit 42.1): When she heard the noise Mary became very uneasy.
However, after certain verbs of thinking and feeling (i.e. consider, find, think) we can omit the linking verb: I consider/find him (to be) very reliable.
Many adjectives beginning with the letter a and adjectives describing health and feelings are not usually used before nouns; instead, we use them in predicative position:
X Try not to disturb the asleep children. ✓ Try not to disturb the children; they are asleep.

<table>
<thead>
<tr>
<th>PREDICATIVE POSITION</th>
</tr>
</thead>
<tbody>
<tr>
<td>beginning with a ablaze afame afloat afoot afraid alike alive alone aloof ashamed askew asleep awake aware</td>
</tr>
<tr>
<td>health and feelings content fine glad ill* pleased poorly ready* sorry* sure* upset* (un)well</td>
</tr>
</tbody>
</table>

* There are some fixed phrases/idioms in which we use normally predicative adjectives before a noun with a special meaning, e.g. a sure grasp, ill health, a ready wit, a sorry state, an upset stomach.

Some predicative adjectives have equivalent words which can be used before a noun:

<table>
<thead>
<tr>
<th>PREDICATIVE</th>
<th>alive</th>
<th>afraid</th>
<th>alike</th>
<th>asleep</th>
<th>ill</th>
</tr>
</thead>
<tbody>
<tr>
<td>ATTRIBUTIVE</td>
<td>live/living</td>
<td>frightened</td>
<td>similar</td>
<td>sleeping</td>
<td>sick</td>
</tr>
</tbody>
</table>

They are doing experiments on live animals/animals which are alive.
3 Adjectives after pronouns, nouns, etc.
Adjectives always come AFTER indefinite pronouns, e.g. something, anyone (► Unit 5.2):
× I'm looking for cheap something. ✓ I'm looking for something cheap.
Some adjectives, including many that end in -able and -ible, can follow a noun after a
superlative adjective or after the first/last/next/only:
✓ The only seat available is in the back row. ✓ The only available seat is in the back row.
Adjectives that are followed by a prepositional phrase, e.g. interested in something,
suitable for somebody, go after, not before, a noun:
× The project will appeal to interested in ecology students.
✓ The project will appeal to students interested in ecology.
This is similar to a reduced relative clause (► Unit 55.5). We can also use a full relative
clause with the adjective in predicative position:
The project will appeal to students who are interested in ecology.
Some adjectives have a different meaning when used before or after a noun:
The meeting was full of concerned residents. (= worried)
The students concerned were a small minority. (= who took part/were involved)
I'm afraid we have opposite points of view. (= contrasting)
We used to live in the house opposite. (= physically facing/across from us)
The present director is American. (= current/existing now)
We took a vote of all members present. (= physically there)
Responsible parents have been outraged by this show. (= caring/conscientious)
The person responsible will be caught and punished. (= who did the action)
He gave us a ridiculously involved excuse. (= complicated)
The president gave medals to all those involved. (= who took part)

4 Verbs acting as adjectives
Participle forms of verbs (usually ending in -ed or -ing) can often act as adjectives. Some of
these can be used on their own before or after a noun:
Please provide me with a list of the selected candidates/candidates selected.
Some participle forms can only be used AFTER a noun:
× Please dispose of your rubbish in the provided bins. ✓ ... rubbish in the bins provided.

<td>caused</td>
<td>discussed</td>
<td>found</td>
<td>provided</td>
<td>questioned</td>
<td>taken</td>
</tr>
</tbody>

When we use participles as adjectives, present (-ing) participles have an active meaning and
past participles have a passive meaning:
I always seem to play for the losing team. (= the team which is losing)
She found the lost ring under the sofa. (= the ring which had been lost)
Participle forms after a noun can be part of a reduced relative clause:
I feel sorry for the people left behind. (= the people that are left behind)
More on the use of participles in clauses ► Unit 55

5 Adjectives acting as nouns
Adjectives can sometimes act as nouns when they describe a particular group or
characteristic (► Unit 1.5). We usually use the definite article and a plural verb:
Old people are becoming more numerous. = The old are becoming more numerous.
We cannot use the possessive 's with adjectives used as nouns or make them plural:
× The government is looking at the disabled's problems.
✓ The government is looking at the problems of the disabled.
× The Japanese enjoy a high standard of living.
✓ The Japanese (or Japanese people) enjoy a high standard of living.

AIRPORT MISERY

RESULTS OF a recent survey of international air travellers have revealed huge discrepancies in the levels of (1) comfort and service provided / provided comfort and service at many leading airports around the world.

A (2) staggered / staggering 75 percent of those interviewed felt that airports were failing to provide a (3) relaxed / relaxing and efficient environment. Airports in the UK and the United States came in for particular criticism. Fewer than one in ten people were fully (4) satisfied / satisfying with the service at leading airports in these countries. Airports in continental Europe received (5) alike / similar negative feedback. Perhaps the enormous growth in passenger numbers in recent years is the (6) underlying problem / problem which is underlying.

By contrast, airports in the growing economies of south-east Asia and the Pacific have received far higher satisfaction ratings. Many of the (7) involved researchers / researchers involved noted that these airports, which are generally more modern than their equivalents in the West, offered (8) enhanced / enhancing check-in facilities and (9) pleasant somewhere / somewhere pleasant in which to wait for flights.

With regard to the issues which most annoyed people, the lack of children's facilities and wireless Internet access were two of the (10) concerns which were main / main concerns. Another was the way in which airports deal with flight delays. The better airports have found ways to cope with this, ranging from television lounges to children's activity areas. (11) Delayed / Delaying passengers seem to appreciate small details such as comfortable seating and the availability of a wide range of refreshments – anything to relieve the (12) bored / utter boredom of waiting for a delayed flight. (13) Affected passengers / Passengers affected were less likely to complain if their children were (14) amused / amusing and they were able to find inexpensive cafés and restaurants. More violent crime

Crime is on the rise according to a (1) worried report issued this week by the government’s national statistics office.

(2) Concerned citizens are likely to be alarmed by the report’s conclusions. Despite promises that the government was tackling serious crime, the report indicates a 6% rise in serious offences over the last year. The largest increase has been in assaults, especially those involving knives or other weapons. The (3) factor main in these crimes appears to be the growth of gangs in our inner cities, and many of the crimes are drug-related.

Burglaries and theft have also increased, although by a smaller percentage. The (4) publishing figures show a 3% growth since last year. Government sources claim that the (5) underlying reason for this increase is the economic situation. An opposition spokesman said there was (6) nothing surprising in the figures. He pointed at (7) causes which are social and blamed the rise in crime on the (8) present government’s lack of investment in education and training. The chair of the Police Officers’ Association placed responsibility for the situation on the shoulders of the Minister of Justice, the (9) responsible politician for policing. Reductions in police numbers have been a (10) factor which is principal in the growth of crime, he contends.

As usual, it is (11) old and vulnerable who are most likely to be the victims of crime. More than 38% of the (12) victims identified in the report were over the age of 65. It is certainly true that there is a fear of crime amongst the elderly, and lobbying groups are calling for (13) radical something to be done about the problem. They are asking for (14) sentences which are maximum to be given to those criminals that target (15) the elderly or disabled. They feel the (16) involved criminals should be punished more severely than others.

13 Groups of adjectives

In cartoons and movies prisoners are often shown wearing rough grey and white striped uniforms. In fact, these days most prisoners wear blue or grey boiler suits or overalls.

1 Adjective order
We often use more than one adjective to describe a noun. We put opinion adjectives, e.g. fantastic, beautiful, useful, charming before all others:
$\times$ I’ve bought a new fantastic MP3 player.  $\checkmark$ I’ve bought a fantastic new MP3 player.
We put the category which is most permanent or important (usually ‘type’ or ‘purpose’) next to the noun; these are often part of the noun, e.g. mobile phone:
$\times$ We removed the gas heating old system.  $\checkmark$ We removed the old gas heating system.

More on compound nouns ➤ Unit 70.1
If there are other adjectives, we usually put them in this order:

$\text{a large well-preserved eighteenth-century farmhouse}$

$\text{a square black box a grey Italian leather sofa}$

⚠️ We don’t usually use more than three or four adjectives before a noun. If we want to give more information, we can use additional clauses:

[Elaine’s just bought a beautiful well-preserved eighteenth-century French stone farmhouse.]  

Elaine’s just bought a beautiful French stone farmhouse which is well-preserved and dates from the eighteenth century.

2 Paired adjectives
If two adjectives describe different parts of the same thing, we put and between them:

$\times$ The chrome and steel door glinted in the sun.  $\checkmark$ The chrome and steel door glinted in the sun. (Some parts were chrome, some were steel.)
We always use and between two colours:

$\times$ They are wearing grey-white uniforms.  $\checkmark$ They are wearing grey and white uniforms.
We can use and between two adjectives which describe similar aspects of something:

The protesters are calling for more political and economic freedom.

When two adjectives describe contrasting aspects of the same thing (i.e. it might seem surprising that they go together) we put but, yet or though between them:

The flat was located in a rundown but central part of town.

Group therapy can be a simple yet effective solution to this sort of problem.

3 Using commas or and
When there are several adjectives in predicative position we usually put and before the last one: I’m afraid the hotel was ancient, dirty and overpriced.

With longer lists of adjectives of the same category before a noun we can use commas and put and before the last adjective, or we can simply list the adjectives:

I found him a friendly, knowledgeable and dedicated guide.

I found him a friendly, knowledgeable, dedicated guide.

⚠️ We don’t use and before the last adjective when the adjectives are of different categories:

$\times$ We enjoyed sitting in the fantastic soft grey and leather seats.

$\checkmark$ We enjoyed sitting in the fantastic, soft, grey leather seats.

 Thief caught by text message
The thief of a (0) priceless Renaissance (Renaissance / priceless) salt cellar has been caught after a three-year hunt. The (1) encrusted enamel / gold salt cellar, known as the Saliera, is one of the most (2) beautiful / famous works of the (3) sixteenth-century / Florentine / celebrated sculptor, Benvenuto Cellini. The salt cellar, which is worth at least 50 million euros, was stolen from the Kunsthistorisches Museum in Vienna. The theft was (4) simple / daring. In the middle of the night the thief climbed up some scaffolding, walked through an empty gallery and smashed the (5) glass / heavy display case containing the salt cellar. The alarm went off but the security guards assumed it was faulty and ignored it. It wasn’t until four hours later that the cleaners noticed the (6) shattered / glass display case and raised the alarm.

Some time later the police received a ransom demand of 10 million euros for the return of the (7) priceless / missing sculpture. In a modern twist on a very traditional crime the thief sent his demand by text message. It was a (8) stupid / fatal mistake. The police were able to trace the mobile phone which sent the text message and the shop which had sold that particular phone. By an (9) amazing / fortuitous coincidence the shop had a surveillance camera and still had the tapes from the day on which the phone had been sold. The (10) grainy / distinct pictures of the man who had bought the phone were broadcast on TV and within days several people had phoned in with a positive identification. The suspect gave himself up to the police and led them to a forest north of Vienna. There they found the (11) complete / undamaged sculpture hidden in a (12) wooden / small box.

Comparative and superlative adjectives

1 Form and use

We use comparative adjectives to compare two (or more) things or people, and superlative adjectives to distinguish one thing or person from a number of others.

* For exceptions ➤ 14.3 below

Spelling rules for these forms ➤ page 367

We use than to introduce a noun or a clause after a comparative adjective: Los Angeles is larger than San Francisco. Los Angeles is larger than I expected it to be.

We can use other phrases between a comparative adjective and a than clause: The prisoners were more violent in this prison than in the others we visited.

If the object of the comparison is a pronoun without a verb we usually use an object pronoun (➤ Unit 4.1). If there is a verb we use a subject pronoun: [I’m taller than he.] ✔ I’m taller than him. ✔ I’m taller than he is.

When we have two or more adjectives with more in a list, we usually only use more once: [Lester and Graves were more hardworking and more determined than the others.]

✔ Lester and Graves were more hardworking and determined than the others.

After superlatives we use in before singular nouns (i.e. the name of a place or group), but we use of before plural nouns:

✗ The Twin Towers Correctional Facility is the largest prison of the world.

✔ The Twin Towers Correctional Facility is the largest prison in the world.

Mallorca is the largest of the Balearic islands.

In formal English we can add an of phrase at the beginning of the sentence: Of the candidates interviewed, David Slater was the most suitable for the post.

2 less and least

We use less and least as the opposite of more and most. We use these words with all adjectives including one-syllable adjectives:

I prefer the paisley pattern; it’s less bold than the others.
The tuna salad is the least expensive dish on the menu.

FORMALITY CHECK In informal English we usually prefer to use not as ... as:
I prefer the paisley pattern; it isn’t as bold as the others.

more/most/less/least with nouns ➤ Unit 57.2

3 Special rules

One-syllable adjectives ending in -ed and the adjectives real, right and wrong form the comparative and superlative with more and most (we do not add -er or -est):

✗ I was bored than I was on the flight to Sydney.

✔ I was more bored than I was on the flight to Sydney.
Many two-syllable adjectives ending in -ly, -y, -ow, -r and -l, and the adjectives common, handsome, mature, pleasant, polite, simple and stupid can have either more/most or -er/-est: The photographer wanted something more lively (or livelier). The staff couldn’t have been more friendly (or friendlier).

Are people in the country more polite (or politer) than those in the city?

When we add a negative prefix to two-syllable adjectives ending in -y (e.g. happy – unhappy) they can also take more/most or -er and -est:

She was the unlikeliest candidate to succeed. He’s the most unhappy man I’ve ever met.

We sometimes omit the before superlatives describing titles, award, prizes, etc:

This year’s prize for most promising newcomer goes to Lizzie Gordon.

**FORMALITY CHECK** In informal spoken English we sometimes use a superlative adjective when we are only comparing two things, especially if the two things make a set:

I’ve got two cars but the Mercedes is the best.

4 Irregular adjectives

We can use elder and eldest (instead of older and oldest) to talk about people’s ages, especially people in the same family, but we can’t use elder immediately after a verb:

Their eldest/oldest son went to Harvard. Mary is the eldest/the oldest.

× My sister is elder (than me).

Note that we don’t use elder and eldest to talk about the age of things:

× This is the eldest house in the street.

We use further or farther to talk about a ‘greater distance’:

John’s house is the farther one.

I’ve moved further away from my parents. (= a greater distance away)

We use further (not farther) with the meaning of ‘extra’ or ‘more’:

Let me know if you have any further questions. (= extra/more)

5 Intensifying and weakening; emphasis

Comparatives and superlatives can be made stronger or weaker by adding the following:

<table>

<tr>
<td>somewhat darker</td>

<tr>
<td>his contemporaries.</td>

We don’t use a little/a bit when a noun follows the comparative adjective:

× It’s a little higher price than I expected. ✓ The price is a little higher than I expected.

TOBY Well of course she does, she's elder than the other two.
KAREN Yes, and she's maturer.
TOBY True. But don't you think she's a bit set in her ways? Would she really fit in here?
KAREN I don't see why not. Let's face it, the other two are very young – significantly more younger than most of our staff.
TOBY That could be a good thing. I mean younger people are adaptabler than older ones.
KAREN OK. What about Ahmed? He was the best qualified in the candidates.
TOBY I'm not sure. He seemed the less promising of the three. He was too laid-back.
KAREN Yes, he was the easily most relaxed – people are usually more nervouser at interviews.
TOBY So we come back to Steven. He was one the most ambitious candidates I've ever interviewed. I thought that was a positive thing ...
KAREN Yes. But he's very distant. Aren't we looking for someone more friendlier and approachable? Let's look at their CVs again.

1 (not) as ... as

We can say that two things are equal by using as + adjective + as:
The Spanish omelette is as expensive as the chicken salad. They both cost €7.99.

We make this comparison more emphatic with just:
In the American legal system, juries are just as important as in the UK.

To say that things are almost equal we use just about, about, almost, more or less or nearly + as:
Let’s not eat here. This café’s just about as bad as the last one.

My niece is nearly as old as me!

We make a negative comparison with not as/so + adjective + as:
Warsaw isn’t as large as London. (= London is larger.)

We can modify this type of comparison with nearly or quite:
Motor bikes aren’t nearly so expensive as cars. (= Motor bikes are much cheaper.)

My mobile phone isn’t quite as good as Sunil’s. (= Sunil’s phone is slightly better.)

FORMALITY CHECK In informal spoken English we can use not anything like, nothing like or nowhere near + as + adjective:
That dress isn’t anything like as nice as the red one.

This outfit’s nothing like nowhere near as fashionable as the one in the magazine.
similar to, different than/from/to ➤ pages 370–1

2 no/not any + comparative adjective

We can use comparative adjectives to say that two things are equal.
We use is + no + comparative adjective or is not + any + comparative adjective:
That Nokia phone is no more expensive than/no dearer than the Samsung.
(= They are the same price.)

The Nokia isn’t any cheaper than/ isn’t any less expensive than the Samsung.
(= They are the same price.)

3 Progressive comparison

We can describe how something increases or decreases in intensity by repeating more or the same comparative adjective, with and between the forms:
As they travelled, Bonnie and Clyde became more and more daring.
Her visits to the country to see her son became rarer and rarer.
4 Combined comparison
To describe how a change in one thing causes a change in another, we can use two comparative forms with the. Note the use of the comma after the first clause:
The longer you leave it, the worse it'll get.
We sometimes omit the verb be in the clauses:
The more sophisticated the product, the more substantial the potential profit.

5 Contrastive comparison
When we contrast two related qualities, we always use more (not -er):
✓ I'm sad to be disappointed. ☑ I'm more sad than disappointed.
Her eyes are more green than grey.
We can also use not so much ... as or rather than:
I'm not so much disappointed as sad. Her eyes are green rather than grey.

6 like and as; similes and metaphors
We often describe something by comparing it to something else which has similar qualities. These comparisons are known as ‘similes’. There are two forms:
• as + adjective + as: Listening to her was as interesting as watching paint dry.
  (In informal English we sometimes omit the first as: She looks white as a sheet.)
• like + noun or verb phrase: The cruise ship was like a skyscraper lying on its side.
There are many idioms in which we use these two patterns:
You're as white as a sheet; I think you'd better see a doctor.
I feel full of energy today – I slept like a log last night.

⚠️ We use like (not as) before a noun to compare two things which SEEM similar:
X Although they looked as an innocent young couple, they were ruthless criminals.
✓ Although they looked like an innocent young couple, they were ruthless criminals.
  (They appeared to be innocent, but they weren't.)
When Mike puts on his dark suit he looks like a waiter. (= He resembles a waiter.)
Sometimes my boss acts like a dictator. (= He behaves in a similar way to a dictator.)
This fabric is so soft it feels like silk. (= Similar to silk)

⚠️ We use as (not like) before a noun when we are describing someone's actual job, role or identity, or something's function:
X Simon's working like a waiter during the summer vacation.
✓ Simon's working as a waiter during the summer vacation. (This is his job.)
Use your payroll number as a password for the computer. (This is its function.)
Jude Law appeared as Hamlet in a recent production of the play. (This was his role.)
The SAT tests are used as an entry test by many American universities. (This is its function.)
We can also describe something by comparing it with something similar without using like or as; this is known as a 'metaphor':
The new treaty will form a bridge between our two nations. (a bridge = metaphor for 'a link')
Metaphors are common in poetry and literary English:
I fall upon the thorns of life! I bleed! (thorns of life = bad experiences)

7 as and such
We can use as and not such to introduce a comparison with nouns. There are two patterns:
• as + adjective + a + noun + as:
  It wasn't as bad a result as I'd expected. (= Better than expected)
• not such a + adjective + noun + as:
  It wasn't such a bad result as I'd expected.

**Teenage girls cause mayhem in California street races**

FOR YEARS illegal street races have been the scourge of Los Angeles. Weaving through the busy city streets in souped-up cars, amateur drivers race to win prizes of up to $3,000. Crashes and fatalities are commonplace and the police seem unable to stop the menace because (1) faster they chase the criminals, the (2) they drive, causing even more damage. The drivers call these races 'cutting up' contests and their aim is to drive (3) fast as possible through crowded streets, overtaking and 'cutting up' ordinary drivers. The criminals use special cars - they look (4) ordinary family cars to the naked eye, but in fact they have been fitted with fuel boosters. Although (5) nearly as powerful (6) professional racing cars, these vehicles can still reach high speeds and be extremely dangerous.

Ten years ago about ten people a year were killed in street races in the Los Angeles area. Now the figure is more than a hundred. As street races have grown more and (7) dangerous, the police have been forced to take stronger action. The crackdown has resulted in a surprising discovery - most of the racers are teenage girls rather than teenage boys, and some are as young (8) sixteen. But to many members of the public this isn't (9) a surprising revelation. Especially as many of these girls seem to be from the Asian community, perhaps modelling themselves on Nadine Toyoda, a Scottish-Japanese former street racer who has changed her ways and now works (10) a legitimate racing driver.

Psychologists have blamed the crime wave on the influence of computer games, many of which feature street races. Teenagers want to be (11) the drivers in these games. But driving in a game is fictional (12) than real. When you crash a car in a computer game you simply start again. In real life the consequences are rather more serious.

4 Complete the second sentence so it has a similar meaning to the first. Use the word(s) in brackets, as in the example.

16 Gradable and ungradable adjectives

Gradable adjectives represent a point on a scale. For example, cheap and expensive are adjectives on the scale of ‘how much something costs’.

Ungradable adjectives represent the limits of a scale. For example, free (= it costs nothing) and priceless (= its cost is too great to be counted) are the limits on the scale of ‘how much something costs’.

Most English adjectives are gradable. We can make comparative and superlative forms from all gradable adjectives (► Unit 14). We don’t usually make comparisons with ungradable adjectives, although there are some patterns we use in spoken English:

That was the most delicious meal! Her house is even more enormous than his!

Some adjectives can have both gradable and ungradable meanings, depending on whether the speaker is describing an absolute quality or one which is relative to something else:

I’m afraid there are no rooms – the hotel is full. (ungradable = completely full)

The hotel’s very full but I think I can get you a single room for tonight.

(gradable = has many guests but there is still some space)

Other adjectives like this are: empty, beautiful, black, delicious, new, possible.

2 Intensifying gradable adjectives

We can make gradable adjectives stronger with very, but not with the adverb absolutely:

× That new jacket looks absolutely expensive. ✔ That new jacket looks very expensive.

There are other words we use to strengthen the meaning of these adjectives:

extremely most (formal) pretty (informal) rather really so terribly

Last night’s match was terribly exciting. I felt pretty upset after the accident. (informal)

The chapter on the early sonnets was most instructive. (formal)

We usually use rather with negative adjectives or when describing something unexpected:

There was a rather unpleasant smell in the flat. Surprisingly, the film was rather good.

More examples in spoken English ► Unit 81.1
We often use less common adverbs to intensify certain gradable adjectives:
*I was bitterly disappointed at my exam results.* *My brother is painfully shy.*
*The students in this school are highly intelligent.*
But note that we can often only use certain adverbs with certain adjectives.
Common adverb + adjective collocations ➞ page 369

3 Weakening gradable adjectives

Gradable adjectives can usually be made weaker by the words *fairly,* *slightly,* *a (little) bit* (informal) and *somewhat* (formal):
*I've been feeling slightly dizzy all morning.*
*My friend was a bit upset.* (informal)
*The police reported that the man was somewhat aggressive.* (formal)

We can use *not very* and *not at all* to weaken gradable adjectives after the verb be:
*The end of term test wasn't very long and it wasn't at all difficult.*

With gradable adjectives *quite* usually means ‘fairly’ but can have other meanings, depending on stress and intonation:
*The lecture was quite interesting.* (unmarked: fairly interesting)
*The lecture was quite interesting.* (stressed adjective: more interesting than the speaker expected)
*The lecture was quite interesting.* (stressed adverb: less interesting than the speaker expected)

声响 (Pronunciation ➞ 1.04)

4 Intensifying ungradable adjectives

A common way to intensify the meaning of ungradable adjectives is with the adverb *absolutely.* We often use this device to add emphasis in informal English:
*I couldn't swim in the sea; the water was absolutely freezing.*
*The show was absolutely fabulous.*

We do not usually use *very* with ungradable adjectives:
*× Entrance to the museum is very free.* ✓ Entrance to the museum is absolutely free.

When we use *quite* with ungradable adjectives, it has a similar meaning to ‘completely’, emphasising the strength of the adjective. In speech the stress is usually on *quite*:
*The tenor's performance was quite amazing.* *You're quite correct.*

We can also use *a most* before an ungradable adjective + noun:
*Hilary has a most amazing hairstyle.* (= Her hairstyle is completely amazing.)

Although we use *absolutely* with many ungradable adjectives, there are some adjectives where we prefer to use other intensifying adverbs such as *completely,* *totally* and *utterly.*
There are no grammar rules which explain these combinations so it is best to learn them as vocabulary items ➞ page 369.
*I'm afraid your answer is completely wrong.*
*Since the accident Henry has been totally deaf in one ear.*
*Susan was utterly appalled by her husband's dishonesty.*

5 Weakening ungradable adjectives (*almost,* *nearly,* etc.)

We use *almost,* *nearly,* *practically* or *virtually* to indicate a point close to the absolute meaning of ungradable adjectives:
*He never turns the heating on – it's practically freezing in there.*
*The battery in my calculator is almost dead.*

*After six months with the disease he was nearly deaf and virtually blind.*

We do not usually use the modifiers *fairly,* *slightly,* *a (little) bit,* *somewhat* or *not very* with ungradable adjectives:
*× Their favourite possession is a slightly priceless Satsuma vase.*
*× I wouldn't recommend the show; it's not very fabulous.*

2 Use the words in the box below to make the adjectives in each sentence either stronger or weaker, as in the example. Use each word once only. Listen and check.

| a bit | absolutely | fabulously | fairly | highly | slightly | somewhat | very | virtually |

Make these sentences weaker:

0 The dress I bought yesterday is damaged. 
1 These days mobile phones are inexpensive.
2 Take care when you change gear; the gearstick's stiff.
3 The inscription on the tomb was indecipherable.
4 Many of the Inca ceremonies were bloodthirsty.

Make these sentences stronger:

5 Jane's flat was freezing last night.
6 This new computer game sounds interesting.
7 Hilary's husband is rich.
8 Victory in our next game seems unlikely.

3 Six of these sentences contain mistakes. Tick (✓) the correct sentences, then find the mistakes and correct them.

1 We thought the state rooms in the White House were very impressive!
2 I'm afraid there's nothing to eat; the fridge is very empty.
3 The tour bus is completely full so I've only got six seats left to offer you.
4 Come on, Lizzie. Let's get some of those Italian ice creams – I'm very famished.
5 We chose the hotel because it was very recommended by our neighbours.
6 If you were really serious about your studies, you would have given up that evening job.
7 Everyone in our class likes Jackie – she's pretty friendly.
8 Jack was a very built man with massive shoulders and a menacing stare.
9 I found the funeral ceremony absolutely moving.
10 The Ambassador would be highly delighted to accept this honour on behalf of the President.
Fakes found in major museums

OSCAR WHITE MUSCARELLA, a (0) ..... respected archeologist at New York’s Metropolitan Museum, claims that more than 1,250 forgeries are on display in the world’s leading museums and art galleries. In his latest book Muscarella specifically names 37 forgeries in the Louvre, 16 in the British Museum and 45 in his own museum in New York. Muscarella’s earlier claims have been heavily (1) ..... by some museum officials who are (2) ..... opposed to his arguments. But he has (3) ..... good scientific evidence for his claims, showing that over 40 percent of the objects examined by the Oxford thermoluminescence laboratory are fakes.

The reason for the quantity of forgeries is (4) ..... simple. Because many of the objects in our museums were found by amateurs and illegally exported from their countries of origin they have no official provenance or documented history. Museums are painfully (5) ..... of this embarrassing problem and as a result they have been known to overlook the lack of written records before accepting or buying antiquities.

This practice makes it (6) ..... impossible to detect forgeries, especially if they are accurate copies. But in fact many forgeries are (7) ..... obvious as they are often copied from a photograph which only shows the front of an object. When examining the back of the forgery they can look (8) ..... different from the original. But museum officials tend to be (9) ..... conservative and hate to question objects which have been sitting in their collections for many years.

Muscarella specialises in the ancient Middle East, and this is the area of archaeology in which he has found so many forgeries. But his research has had the effect of undermining the reputation of some of our most (10) ..... regarded institutions, and this should be of concern to anyone who values our cultural heritage.

⚠️ There are a few adjectives which look like adverbs, e.g. friendly, lonely, cowardly.
We cannot make these adjectives into adverbs in the usual way:
X He left cowardly, sneaking out the back door. ✓ He left in a cowardly way/manner ...

Adjectives as adverbs in spoken English ➤ Unit 81.2 American English ➤ page 368

2 Adding information; modifying
We use adverbs to add information about the time, manner or place of an action or state:

- adverb of manner
  He hit the ball hard and this time it flew into the back of the net.
- prepositional phrase as adverb of place
- noun phrase as adverb of time

Certain adverbs, e.g. quite (a), roughly, rather (a), about, approximately, can be used to modify noun phrases, prepositional phrases and numbers: Her news came as quite a shock.
In our college roughly fifty students have motorbikes. She made rather a fuss about the results.

More on rather and quite ➤ Unit 16.2/4

We can use adverbs with as, so, too, enough, etc:
She performed so enthusiastically that the judges overlooked her inexperience.
We missed the bargains because we didn’t get to the shops soon enough.

3 Using adverbs in comparisons
We can use adverbs in comparatives and superlatives, usually with more and most:
This car seems to need servicing more frequently than our old one.
Of all the relatives at Gran’s funeral, I think Uncle Ralph felt her loss most deeply.
Adverbs which do not end in -ly take the same comparative and superlative forms as adjectives (➤ Unit 14):
If you tuned the engine more often the car would go faster. Do the best you can.
Prison or holiday camp?

IN A RECENT (1) high / highly contentious move the Prison Service has announced a decision to build three more open prisons and to close two existing ‘closed’ prisons. The Service says the move is prompted by the increasing numbers of low-risk prisoners. Critics are (2) right / rightly concerned about this move and believe it is (3) serious / seriously flawed. They argue the decision is a cynical cost-cutting measure which may put the public at risk.

At present open prisons are restricted to prisoners who have committed non-violent crimes and to those who are getting (4) close / closely to the end of their prison term. (5) Rough / Roughly 20% of prisoners are held in these facilities at the current time. Many open prisons are more like country hotels; prisoners can wander (6) free / freely around the grounds and there are no high walls or barbed wire fences. Inmates can (7) easy / easily walk out into the surrounding areas. And as most are positioned (8) deep / deeply in the countryside it would be (9) easy / easily for absconding offenders to disappear with little hope of recapture.

Critics of open prisons say that they do not provide the deterrent effect of traditional prisons in which prisoners have to work (10) hard / hardly and have few luxuries. The problem for the prison authorities is that traditional jails are (11) high / highly expensive to run and offer few opportunities for the rehabilitation and re-education of offenders. In open prisons offenders have the chance to experience something closer to everyday life, and this helps to prepare them for their eventual release. Whoever is (12) right / rightly, the public is bound to be concerned about this new development in prison policy.

18 Adverb position

The thief entered the room silently and carefully opened the safe door.

1 The three positions
Adverbs which modify a verb or add information about how, when or where something happens can take several positions in a sentence:

<table>
<thead>
<tr>
<th>front position (before subject)</th>
<th>end position (after object or complement)</th>
<th>mid position (next to verb)</th>
</tr>
</thead>
<tbody>
<tr>
<td><em>These days</em> I <em>probably</em> take my health <em>much more seriously.</em></td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

If the object or complement of a verb is very long, we can put an end-position adverb before it:

*These days I take *much more seriously* all those things I used to take for granted.*

2 Front position
We usually put time and place adverbs at the end of the sentence, e.g. *I worked more than twelve hours yesterday*, but we can put them at the front to form a link or contrast with information in the previous sentence:

*I've been incredibly busy this week. *Yesterday* I worked more than twelve hours.*

After negative adverbs (e.g. *never*), or after adverbs of time and place followed by a verb of movement or position, we can put the verb before the subject. We usually only do this in formal written English:

*Never* had he seen such a disturbing sight. *Here* lies the body of our late sovereign.

Inversion ➤ Unit 76.2/3

⚠️ We do not use adverbs of definite frequency, e.g. *daily, weekly*, in front position:

*✗ Monthly I get paid. ✓ I get paid monthly.*

3 Mid position
This is the usual position for the following adverbs, and for *even* and *only*.

<table>
<thead>
<tr>
<th>adverbs of indefinite frequency</th>
<th>always frequently generally hardly ever never normally occasionally often rarely seldom sometimes usually</th>
</tr>
</thead>
<tbody>
<tr>
<td>adverbs of degree</td>
<td>absolutely almost completely entirely just hardly partly quite rather really slightly totally</td>
</tr>
<tr>
<td>adverbs of certainty</td>
<td>certainly definitely probably</td>
</tr>
<tr>
<td>most short adverbs of time</td>
<td>already finally immediately no longer soon still then (but not today, yesterday, tomorrow, etc.)</td>
</tr>
</tbody>
</table>

⚠️ With the present and past simple we put the adverb between the subject and the verb, but with simple forms of *be* the adverb goes after the verb:

*✗ She arrives *always* by taxi and she *always* is on time.*

*✓ She *always arrives* by taxi and she is *always* on time.*

If there is a modal or auxiliary verb we put the adverb after the (first) auxiliary (+ not):

*We've *never* been to the Greek islands. You *can just* see the coast.*

*Sea eagles have *occasionally* been seen around Loch Lomond.*

*They *don't really* understand my point of view.*

⚠️ We put *sometimes, still, certainly, definitely and probably* BEFORE a negative auxiliary:

*✗ I sometimes *don't sometimes* understand his arguments. He hasn't *still* convinced me.*

*✓ I *sometimes don't* understand his arguments. He *still hasn't* convinced me.*
FORMALITY CHECK  In spoken British English, if we want to emphasise an auxiliary verb or a simple form of be, we can put some mid-position adverbs before it. The auxiliary/verb is usually stressed:

'But I thought you liked him!' ‘Oh, you really don’t understand me at all!’
'Joe’s late. That’s strange’ ‘Not really, he never is on time!’

Compare:
I don’t really like him. (unmarked: I slightly dislike him.)
I really don’t like him. (emphatic: I strongly dislike him.)

We do not use other time adverbs (definite time or frequency) in mid position:
X We yesterday bought our lunch at Joe’s sandwich bar.  X I once a month pay my rent.

But we can do this in news reports:
The Federal Reserve today announced an immediate rise in interest rates.

4 End position
This is the most frequent position for adverbs. It is the usual position for yet, a lot, any more, any longer, too, as well:
X They aren’t any more selling it.  ✓ They aren’t selling it any more.

We usually put adverbs of manner (which describe how something is done) and adverbs of definite frequency in this position:
X He well plays the guitar.  ✓ He plays the guitar well.  ✓ The magazine is published monthly.

Adverbs of manner which end in -ly (except badly) can go in end or mid position:
Harry painstakingly counted out the coins and arranged them neatly into piles.
The thief entered the room silently and carefully opened the safe door.

We don’t use hardly ever or never in end position:
X They watch television hardly ever.  ✓ They hardly ever watch television.

If we put often, rarely and seldom in end position, we use a modifier, e.g. very, extremely:
X These days I eat desserts rarely.  ✓ These days I eat desserts very rarely.

We usually avoid having too many adverbs in end position, but when this occurs we often follow this sequence:

The statue was lifted carefully onto the platform before the ceremony.

5 Sentence adverbs
Sentence adverbs refer to the whole sentence, not just part of it. We usually put these adverbs at the beginning of a sentence, separated by a comma:
Economically, the current government has been a resounding success.
(= The government has successfully managed the economy.)

Generally, the employer pays for travel expenses. (= This is true in most cases.)

Comment adverbs are sentence adverbs such as admittedly, frankly, indeed, understandably, which we use to express our attitude towards the information in a statement:
Admittedly, these results are only preliminary. (= This may contradict previous information.)

Pronunciation ➤ 1.05
Use of these adverbs in writing ➤ Unit 78.4, in speech ➤ Unit 81.3
Other linking adverbs, e.g. additionally, however, therefore ➤ Unit 61

Some adverbs, e.g. naturally and clearly, can be used as sentence adverbs and also as adverbs of manner. Note the different meanings:

Despite being in a zoo, the animals behaved quite naturally. (= in a natural way)
Naturally, wild animals behave quite differently in captivity. (= of course)
The teacher answered the question clearly and precisely. (= in a clear way)
Clearly, the teacher didn’t answer the question. (= This is obvious.)

Tenses

Before you start

1 Review these intermediate grammar points and check you know them.

Auxiliary verbs
Auxiliary verbs are be, have and do.
We use them with main verbs to form tenses, questions and negatives. We don’t use them with modal verbs:
× Do we must pay excess baggage on this?

Forming present and past simple tenses
1 For the present simple this is the same as the infinitive, except after he, she or it:
   I read → he reads  they carry → it carries
2 For the past simple we add -ed to the infinitive (regular verbs). The form is the same for all persons except with be: I/he/she/it was, we/you/they were
3 We form the negative and questions of the present and past simple with the auxiliary do:
Japanese cooking doesn’t use a lot of dairy food.
Do interest rates usually go up in order to reduce inflation?
‘Did you see anything suspicious?’ ‘No, I didn’t see anything.’

Spelling rules of present simple -s endings ➤ page 366  Past tense -ed endings ➤ page 367

Forming other tenses
1 present continuous  am/is/are + -ing form of main verb  James and Sally are spending the evening together. What are the children doing?
past continuous  was/were + -ing form of main verb  What were the children doing while you were travelling? It wasn’t raining when we woke up this morning.
present perfect simple  has/have + past participle, e.g. walked, had, done  The printers haven’t finished the new brochure yet. There has been a decline in applicants to the profession.
present perfect continuous  has/have been + -ing form of main verb  Bob Geldof has been doing a lot of work for charities since the mid-eighties. How long have you been studying architecture?
past perfect  had + past participle  By the end of the fundraising week we had raised $5,000. Had you already seen that film?
past perfect continuous  had been + -ing form of main verb  The lake was near bursting point as it had been raining heavily for weeks.

2 Be careful not to omit have with the present perfect:
× I never been to Madame Tussaud’s.  ✓ I’ve never been to Madame Tussaud’s.

3 Used to is followed by an infinitive. Notice the possible spellings in questions and negatives:
It used to take me over an hour to get to work. Did you use(d) to get free milk at school?
Supermarkets didn’t use(d) to be open on Sundays in the UK.

Spelling rules of -ing forms ➤ page 367
2 Read the information and identify examples of auxiliary verbs and different tenses.

CINEMA AUDIENCES have jumped this year, as consumers flock to escape the recession, according to figures from the Cinema Advertising Association.

While many other entertainment venues are struggling to survive during the downturn, film fans are refusing to give up their regular trip to the cinema.

After a long period where audience figures had been falling, last year cinemas enjoyed their best summer since 1969. In the first four months of this year, 55 million tickets were sold, a 14 percent increase on the same period last year.

19 Auxiliaries and have got

The first ‘megaplex’ in the world, Kineopolis Brussels has got 25 screens and over 8,000 seats. It is part of the international Kineopolis group.

1 Uses of auxiliary verbs
We use have and be to make perfect, continuous and passive forms of tenses:
I haven’t seen her for ages. John is working very hard these days.
The flat is watched by the surveillance team twenty-four hours a day.
We use do (does/did) to form questions and negatives in the present and past simple:
Do you enjoy going to the theatre? We didn’t go to Corfu after all.
Doesn’t the thermostat control the heating?
It is possible to omit the auxiliary, and sometimes the subject, in very informal English (e.g. speech, notes, postcards ➤ Unit 83.2) and in headlines: Terrorists arrested in dawn raid. (= Terrorists were arrested …)
do as a substitute verb ➤ Unit 73.1/2  do in inversion ➤ Unit 76.2

2 Use of contractions (short forms) with auxiliaries
We usually use contracted auxiliaries in speech and informal writing, either with the subject or with not: she’s, they’ve, we don’t.
Note the following exceptions and special cases.
• In spoken English (and when representing speech in writing), we can combine contracted not and contracted auxiliaries, e.g. ‘ve, with modal verbs:
  He shouldn’t’ve done it.
• We don’t contract was:
  ✗ He’s watching television when she arrived. ✓ He was watching television when she arrived.
• In formal English we don’t use contractions when there is more than one subject:
  ✗ The army and the navy’ve launched a recruitment drive.
  ✓ The army and the navy have launched a recruitment drive.
Has and is have the same contracted form, ‘s. Similarly, had and would are both contracted to ‘d:
He’s taken a long lease. (= has taken) He’s taking a holiday. (= is taking)
He’d known her for ages. (= had known) He’d know what to do. (= would know)
You can work out the full form by looking at the main verb or from the context.

Pronunciation ➤ 1.06

FORMALITY CHECK We usually avoid using contractions in very formal English:
[Clauses 10–15 don’t apply in the case of valuables stolen from vehicles.]
✓ Clauses 10–15 do not apply in the case of valuables stolen from vehicles.
Also, ain’t (instead of am/is/are not) is used informally in some dialects and in popular songs. This is considered incorrect by many English speakers:
[I ain’t going to the party.] (= I’m not going …)

3 be, have and do as main verbs
Be, have and do can function as main verbs as well as auxiliaries.
be = exist, located in, behave: They’re here! It’s in the bag. Now you’re being silly.
do = perform an action or complete a task: When do you do the washing?
I did my assignment yesterday evening. What do you do? (= What’s your job?)
We use *have* to talk about
- possession: *The chairman of the board has* a Gulfstream executive jet.
- inclusion: *Our latest computer will have* a number of upgradeable components.
- relationships: *I have* two older brothers.
- experiences, e.g. illnesses/disabilities and dreams:
  *This patient has* a slight limp as a result of his accident.
  *The children often have* nightmares after thunderstorms.
- actions, e.g. eating, drinking, playing sport:
  *We're having* chicken with cashew nuts for dinner tonight. (= We're eating chicken ...)
  *The second team has an important match on Wednesday evening.*

Sometimes we use *have* + noun when there is no single appropriate verb in English:
*You have an appointment* with the accountants at four.

In British English we can use *have* without auxiliary *do* in questions and negatives:
*Has the government any real intention of addressing the crime problem head on?*
*I haven't a clue what they're talking about.*

⚠️ We don't usually use the passive of main verb *have*. When we do, it has the meaning 'be tricked or cheated': *You paid $100 for a T-shirt! You've been had!* (= You've been cheated.)

*have* + noun, e.g. *have a race*  ➤ *Unit 68.5*

### 4 have got

We use *have got* as an alternative to *have* for possession and other states in the present. It is generally preferred to *have* in informal British English, especially in the negative:

*He has a car but he hasn't a licence.*  ✓  *He has/’s got a car but he hasn't got a licence.*

**FORMALITY CHECK**  In formal written English *have* is more usual:

*Our tutors have the highest qualifications.*

⚠️ We usually use a form of *have*, not *have got*, to talk about past or future possession:

*× I had got a pet rabbit when I was a child.*  ✓  *I had a pet rabbit when I was a child.*

*Have got* and *have* do not have continuous or passive forms when they mean 'possess':

*× He is having (got) a car.*  ✓  *He has got a car.*

*have (got) to* to express obligation  ➤ *Unit 33.1*

We also use *have/has/had got* as the present/past perfect form of the verb *get*. Compare:

*She’s got a degree in chemistry and works at the lab.* (= holds/possesses)
*She’s just got a degree and hopes to find a job in a lab.* (= has just received)
*He’d got a certificate from the doctor so he could claim sick pay.* (= had obtained)

We can use *have got* as a perfect infinitive (past form of the infinitive) with these meanings:

**OBTAIN**  *I hope to have got* the results by March.  *We expect to have got* the keys by next week.

**RECEIVE**  He’s likely to *have got* the letter by now.

We don’t use *have got* in these ways:

<table>
<thead>
<tr>
<th>to describe actions</th>
<th>✗ Can you answer the phone? I’ve got a shower.  ✓ Can you answer the phone? I’m having a shower.</th>
</tr>
</thead>
<tbody>
<tr>
<td>in short answers</td>
<td>‘Do you have/Have you got anything vegetarian?’  ✗ ‘Yes, we have got.’  ✓ ‘Yes, we do have.’</td>
</tr>
<tr>
<td>in question tags</td>
<td>✗ You’ve got two brothers, haven’t you got?  ✓ You’ve got two brothers, haven’t you?</td>
</tr>
<tr>
<td>(➤ Unit 79.2)</td>
<td></td>
</tr>
<tr>
<td>with used to</td>
<td>✗ We used to have got a place in the country.  ✓ We used to have a place in the country.</td>
</tr>
<tr>
<td>as a perfect infinitive expressing ‘possess’</td>
<td>✗ She has always wanted to have got a car.  ✓ She has always wanted to have a car.</td>

Practice

1 Rewrite the sentences correctly, using a suitable auxiliary verb. Whenever appropriate, use contracted forms. If two contracted forms are possible, in conversational speech for instance, write both, as in the example.

0 He could not seen them do it.
   He couldn’t have seen them do it. He couldn’t’ve seen them do it.

1 I been waiting here for hours.

2 She will not returned by the time the show starts.

3 Protection under this policy not include items exceeding a value of $500.

4 He might not known that it was you at the door.

5 their boss not realise that they are under a lot of pressure?

6 James got better despite the fact that he not been taking his medication for weeks.

7 They really should told you about their decision.

8 The documents requested from your solicitor have not received and we are therefore obliged to cancel your contract forthwith.

2 Complete the sentences with a form of be, do or have. [2:34] Listen and check.

1 Sorry we .......... late for the ceremony. Jason was .......... really difficult and wouldn’t get ready in time. Teenagers!

2 It is advisable to request a visit to a consultant if you .......... severe stomach pain for more than two weeks.

8 That evening, instead of .......... dinner at home, we decided to go to the little French restaurant in the next village.

9 The weather was truly awful – freezing with driving rain – but I had to go out as I .......... an appointment to keep.

10 Montague felt very depressed when the firm went bankrupt and he lost his job in Accounts. It was what he had .......... all his life; he didn’t know anything else.
3 **GRAMMAR IN USE** Read the conversation and underline all the examples of have.
Decide which ones can be replaced with have got and write the correct form of have got.

Listen and check.

**BETH** Do you fancy going to the cinema at the weekend? The local Odeon has a good film on.

**SUE** I don’t really like going to the cinema. I prefer to watch movies at home.

**BETH** Really?

**SUE** Yes, we have a fantastic new 3D home cinema system, so the sound and vision are both excellent.

**BETH** I thought you already had a state-of-the-art TV.

**SUE** We used to have quite a good one, yes, but our new system has much better sound than that had. Why don’t you come round on Saturday evening and see it?

**BETH** I’m having dinner with my parents on Saturday evening. How about Friday?

**SUE** That’s OK, but I’ve actually ordered the new James Bond film on DVD, and I hope to have it by Saturday. Let’s make it Sunday evening, shall we?

**BETH** Yes, that’s fine, but I need to leave a bit early as I have an interview on Monday morning.

**SUE** OK, come round about seven. We’ll have a snack first, then watch the movie.

4 **GRAMMAR IN USE** Rewrite the underlined words in the hotel brochure with forms of be, do or have.

Present simple or continuous?

The Third Man is one of the most famous post-war films. In it, writer Holly Martins is searching for his friend Harry Lime in Vienna shortly after the end of World War II. When he is told that his friend has died in an accident, Martins begins to suspect that there is something suspicious about the death ...

1 Permanent and temporary situations

We often use the present simple to describe

- permanent situations: A colony of Antarctic penguins lives in Marwell Zoo.
- facts: Broken bones in adults don't heal as fast as they do in children.
- things which are generally true: British people drink a lot of tea, while the French drink more coffee.
- opinions: Why don't you come with me? It seems silly to take two cars.

The present continuous describes a temporary situation or action in progress at or around the time of speaking. The action is likely to continue after the time of speaking:

I'll be with you in a minute. I'm just finishing something in the kitchen.
My niece from Ireland is spending the summer with us. She's really enjoying city life!

Common adverbs with this form are now, just, still, at the moment and currently:
The students are currently studying the writings of Günter Grass on the German course.

We use live, work, study and stay in the continuous if the action is temporary:
X She stays in the Waldorf Astoria on this visit to New York, doesn't she?
✓ She's staying in the Waldorf Astoria on this visit to New York, isn't she?

We can use the present simple to draw attention to someone arriving or leaving, with here comes and there goes. These are always present simple and appear before the subject:
X Here is coming the postman. ✓ Here comes the postman.
X There is going the last bus. ✓ There goes the last bus.

More on inversion ➞ Unit 76.3 State verbs and present simple ➞ Unit 25.1

2 Regular or repeated actions

We use the present simple to describe things that happen on a regular basis:
As temperatures fall with the approach of winter, the soil freezes and contracts ...

Many people from the north of Europe take their summer holiday in the warmer south.

We often use the present simple with adverbs of frequency, e.g. always, sometimes, and expressions of frequency, e.g. every day, once a week:
Share prices usually change on a daily basis – but often by very little.
Our two chefs provide an excellent choice of hot meals every day.

It is possible to use the present continuous to talk about repeated events or actions, usually if they happen within a temporary period: I'm feeding the neighbour's cat while she's away.

Compare:
Alan loves sweet things. He eats a dessert most days. (habit over a long time)
Alan's on a diet. He isn't eating desserts at the moment.
(repeated action within a temporary period)
We can use the present continuous for a series of actions that are more frequent than we would normally expect: Now that I’ve bought a Toyota Prius, I’m seeing them everywhere!

We can use the present continuous with an adverb such as always, forever or continually for frequently repeated actions: The baby’s always making cute little gurgling noises.

This use is more emphatic than using the present simple for repeated actions, and, with a stressed adverb, expresses annoyance with the person who is doing the action: The neighbours are continually slamming doors and shouting during the night. I’m always forgetting people’s birthdays. It’s so annoying.

3 Series of events/actions

We use the present simple to give directions or instructions, often with impersonal you: From here you cross the road, go through an iron gate and follow the path west ...

This is similar to the imperative, but the imperative can sound more abrupt: Cross the road, go through an iron gate and follow the path west ...

We use the present simple to express the immediacy of an event, e.g. in sports commentaries, particularly when the action is over before the description finishes: France kicks off, Vieira passes to Henry, Henry cuts inside ... and it’s a goal!

Compare the use of the present continuous used in sports commentaries, when the action is in progress throughout the time of speaking: They’re now entering the back straight and Bekele is starting to pull away from the other runners ... he crosses the line two seconds ahead of his closest rival ...

4 Describing pictures, plots and telling anecdotes

We use the present continuous to describe pictures: Our head of our department is the one who’s standing slightly apart in the college photo.

We can use the present continuous with the present simple to give more immediacy to an anecdote. We use the continuous for actions which form a background and the simple for the actions that make up the narrative: There’s an old woman with thick glasses who’s serving the hot drinks, so I go up to her and ask ...

(She started serving before the action of the narrative.)

This is often the way that we describe the beginning of books, films or plays: At the start of the play, Hamlet is walking along the castle walls when he hears a strange voice.

Newspaper headlines often use the present simple to express a past event, which again gives more immediacy to the event: UK jobless total climbs to 2.4 million.

5 Other uses

We use the present continuous to describe things which are in the process of changing, i.e. trends:

✗ British summers get hotter and winters get wetter.
✓ British summers are getting hotter and winters are getting wetter.

The cost of bringing up children is increasing all the time.

**ACADEMIC ENGLISH** The use of the present continuous for trends is common in academic English:

While it is often assumed that violent crime is increasing, statistics show that it is actually decreasing in most areas.

**FORMALITY CHECK** We use the present simple in formal speech or writing for certain actions:

I note that you referred to the National Curriculum in your speech ...

The Day after Tomorrow

Climate change? (1) (you / believe) in it? This film from 2004 (2) (examine) the potential aftermath of a sudden and catastrophic global warming.

At the start of the film, the world (3) (generally / get) warmer, as is the case in reality, but climatologist Jack Hall (4) (discover) that a huge chunk of the Antarctic ice sheet has broken off, and realises the inevitable consequences. At the same time, his son is with some friends in New York, where it (5) (continually / rain), and weather-related disasters (6) (happen) all over the world. It soon (7) (become) clear that the world is about to enter a new ice age.

Implausible, perhaps, but this is above all an action film, and (8) (not purport) to inform its viewers about climate change.

Indeed, many of the best scenes in the film (9) (revolve) around Jack’s attempt to rescue his son from a New York that (10) (slowly / freeze) over. The acting is also good, though it’s clear that the actors (11) (continually / struggle) with stilted dialogue.

SARAH Welcome to the programme. This afternoon I stand in the middle of the northern Black Forest, Germany, with Rainer Sanger, from Friends of the Forest, a pressure group which is representing people worried about the natural habitat in Europe. Rainer, you’re very concerned about this area of the forest. Can you tell us why?

RAINER Yes. Much of the forest was wiped out in the storms last winter, as you can see. Many of the trees are dead, and more die because of the irreversible damage. We at Friends of the Forest believe that the authorities don’t do enough right now to restore this beautiful forest to its former state.

SARAH But they clear the dead trees away today. I saw some men on the way here ...

RAINER Of course, but they are doing that every year. It’s the normal procedure. We need more trees now, but they aren’t planting any.

SARAH I see. But you have approached the authorities about this, I understand.

RAINER We have tried but they’re always making excuses – usually to do with money. It gets more and more frustrating all the time! Each time, they’re telling us that they haven’t got enough money to restore the forest as quickly as we’d like.

SARAH But it’s not just an excuse, is it? They clearly don’t have enough money for everything, and the current situation is quite extraordinary.

RAINER Of course, we appreciate that, and the point is that actually, we don’t ask for much money. We would just like their guidance – we have plenty of volunteers ...

Past simple and continuous; used to and would

The earliest films were made by the Lumière brothers in France in the late nineteenth century, but they were very different from most films today: they all used to be very short, black and white only, and they didn’t use to have any sound.

1 Completed actions and situations (past simple)
We use this for completed actions in the past: Julius Caesar invaded Britain in 55 BCE. If the context is clear, it is not necessary to give a past time reference: But Caesar’s troops failed to defeat the indigenous tribes. (in 55 BCE)
We use the past simple for
• actions happening at the same time: At the junction I took the left turn while Micky took the right.
• repeated actions: My brother applied for a visa six times before he got one.
• sequences of actions: Silverman ran to the car, jumped in and raced off into the night.
• one action resulting in another: Wall Street traders lost a fortune when the Asian markets collapsed.
(The markets collapsed with the result that the traders lost a fortune.)
• states in the past: We lived just outside Oxford for several years, but we didn’t like it much.
Common time expressions used with the past simple are ago, last (week/month), (the day before) yesterday, the other day/week and conjunctions such as when, (just) as, while and after:
I heard the news hours ago. Mum called me just after you left this morning.
The door opened and the director came in (just) as I finished my presentation.

Differences between past simple and present perfect ► Unit 23.6

2 Past actions and situations in progress (past continuous)
The past continuous describes an action in progress at a point of time in the past; the action began before this point of time and continued after it:
We didn’t hear the intruder because we were sleeping on the top floor that night.
At the time of our arrival the city was going through a period of rapid expansion.
We often use the past continuous to show that a past action was
• temporary: During my training I was earning a lot less than my wife.
• changing or developing: His symptoms were becoming more pronounced each day.
• providing a background to completed past actions:
  Darkness was falling over the city as James hurried back to college …
We can use the past continuous for two actions in progress at the same time:
We were watching the sky and listening for the first sounds of the dawn chorus …
We usually use the past simple for repeated actions in the past, but we can use the past continuous if we want to emphasise that the repeated actions took place over a temporary period:
She received chemotherapy on a weekly basis. (repeated action)
For the first three months she was receiving chemotherapy on a weekly basis.
(repeated action, but only for three months)
As with the present continuous, we can use the past continuous (with always and other adverbs) to talk about repeated actions that happened very often, or to express annoyance (► Unit 20.2):
The track was so rough that we were continually mending punctures.
They never saved their money. They were always borrowing cash from us.
3 Interrupted actions

We use the past continuous to contrast an ongoing action with a single (past simple) event which interrupts it:

*Seventy cars were crossing the bridge when the supports collapsed into the river.*

We can put either clause first, and we can use *when*, *while* or *as* to introduce the interrupted action:

*Messengers arrived with the news of Mary’s plot when/while/as Queen Elizabeth was hunting.*

We use *when* (not *while*) to introduce the interrupting (past simple) action:

*× Queen Elizabeth was hunting while messengers arrived with the news of Mary’s plot.*

*√ Queen Elizabeth was hunting when messengers arrived with the news of Mary’s plot.*

If the background action finishes just before the event which interrupts it, we prefer to use the past perfect continuous (➔ Unit 22.1).

4 Other uses of the past continuous

We can use the past continuous to describe past arrangements that may or may not have taken place:

*Nancy was taking the next flight to Paris so she had to cut short the interview.*

(Nancy had an existing arrangement to take a flight to Paris.)

We often use verbs such as *plan, expect, hope* for unfulfilled arrangements:

*Were you expecting to have a meeting this morning? I’m afraid I’m too busy today.*

Future in the past and unfulfilled pasts ➔ Unit 29

We can make requests, suggestions and questions more tentative and polite by using the past continuous. We often use the verbs *think* and *wonder*:

*We were wondering if you would like to join us.* (➔ Would you like to join us ...?)

*Were you planning on going somewhere else later?* (➔ Are you planning on ...?)

5 used to and would

Both *used to* and *would* describe actions which happened regularly in the past but no longer happen or now happen with more or less frequency:

*They used to get paid every three months.* (Now they get paid weekly.)

*We would get up early every Thursday to go to the market.* (We don’t now.)

To avoid confusion with other uses of *would*, we usually mention the past time or situation:

*He would give her a lift to work in the days before she passed her test.*

We often continue with *would* after a past narrative has started with *used to*:

*Dad used to travel a lot on business. He would be away for weeks at a time, and he'd always bring presents back with him.*

*We use *used to*, but not *would*, to describe past states which have changed: Lithuania used to be part of the Soviet Union. (It isn’t now.)

*× The capital of Nigeria would be Lagos but now it’s Abuja.*

*√ The capital of Nigeria used to be Lagos but now it’s Abuja.*

We use the past simple, NOT *used to*, for:

* • periods of time: They lived in Darwin for six years. (➔ They used to live ... for six years.)*

* • a number of times: We visited them there three times. (➔ We used to visit them ... three times.)*

Don’t confuse *used to + infinitive* with *be/get used to* which means ‘be/become accustomed to’:

*I used to live alone.* (➔ I lived alone at a time in the past.)

*He wasn’t used to living on his own.* (➔ He wasn’t accustomed to it.)

* Many people now use *didn’t use to* and *did (you) used to* in negatives and questions, although this was considered to be non-standard in the past.

Saturday morning cinema

One of the highlights of life when I was a child (1) was / would Saturday morning cinema, or the pictures, as we called it then. I remember the first time my mother (2) allowed / used to allow me to go, when I was about ten. It (3) was / would be so exciting! That was with my big brother, of course; she didn’t (4) use to allow / allow me to go on my own at that age. From then on, I (5) would / used to go every Saturday morning, as long as Dad (6) earned / was earning money at the time – his work (7) was / used to be a bit erratic.

My brother and I (8) would always / always used to meet up with a big group of friends and (9) we’d go / we were going to the local flea pit – it (10) was / would be a really old cinema, which was probably why the Saturday kids’ pictures (11) were / used to be held there! We (12) would always / always used to get there about half an hour before the doors opened so we could get the best seats, and while we

(13) were queueing / used to queueing some of the older children would go and buy sweets.

It’s amazing to think now what a bargain it (14) was / would be – I can’t remember how much we paid, but we (15) used to get / were getting about three films of different types. There’d often be a couple of parts of serials, and then a main feature. It (16) would / used to be really good value. Then we’d all leave the cinema hungry, despite the sweets, and troop back home for the lunch that our mothers had spent the morning making. That was the main point of course – to get us out of the house for a few hours!
3 Past reasons
We often use the past perfect to describe the reason for a past action or situation:
*David didn’t join the agency as he’d signed up with a rival firm.*
The survivors looked painfully thin. They *had been living* on emergency rations since the accident.

4 Sequence of past actions
We can use the past perfect with the past simple to make a sequence of events clear.
We use the past perfect for the earlier action and the past simple for the later one:
*When we got back, the babysitter had put the children to bed.*

8:30 9:30

The babysitter had put the children to bed. We got back.

Notice the difference if both verbs are in the past simple:
*When we got back, the babysitter put the children to bed.*

9:00 9:10

We got back. The babysitter put the children to bed.

We can use just with the past perfect to show that the earlier action was very recent:
*We wanted to talk to the manager in charge but she’d just left.*

Or we can use already to show that the action happened sooner than we expected:
*When we got back, we were shocked to find that the babysitter had already gone home.*

We don’t usually use the past perfect if the sequence is obvious and the first action makes the second happen:
*[I had opened the door and let him in.]*
✓ I opened the door and let him in. (He was able to come in because I opened the door.)

We can use either the past perfect or the past simple with time conjunctions, e.g. after, before, as soon as, when:
*She ushered me out of the room as soon as I paid/had paid my subscription.*

With before + past perfect the action in the past simple happens first:
*I left university before I’d finished the course I was taking.*

We can use this pattern for a past action which prevented a later action from happening:
*She sacked him before he’d had a chance to explain his behaviour.*

5 Other uses
We can use the past perfect with superlatives, ordinals (*the first, second, last, etc.*), the only, etc. + ever:
*I remember seeing ‘Nightmare on Elm Street’ when I was only eighteen. It was the most frightening film I’d ever seen.*

They wanted us to go on the higher slopes but it was only the second time we’d ever done any skiing.

We use the past perfect with verbs such as hope, expect, want, plan, think about, wish to describe past intentions which were unfulfilled:
*They had hoped to get to the summit, but Travers fell ill at base camp.*

*We’d been planning the merger for weeks when we received the news that it was all off.*

Remember that we don’t usually use the continuous form with state verbs:
*Suzie had wanted to leave her job and start her own business, but then she was offered a fantastic promotion and decided to stay.*

State verbs ➤ Unit 25.1
22 Past perfect simple and continuous

Award-winning film star Grace Kelly had been acting on stage and in television for three years before she made her first Hollywood movie. But by the age of twenty-six, she had given up her film career to live as a royal princess in Monaco.

1 Actions and situations before a time in the past

We use the past perfect simple to describe a single action, or repeated actions, completed before a time in the past:
* The new owners found that the timbers had been patched up several times.

We often include a specific time reference, such as a clause with when or by the time:
* By the age of twenty-six, Grace Kelly had given up her film career.

We also use this form to describe a situation which existed before a past event:
* At the time of her trial last year, Hinkley had been in prison for eight months.

We use the past perfect continuous to describe an ongoing situation or action which continued up to, or stopped just before, a time in the past, often with before or by the time:
* Grace Kelly had been acting for three years before she made her first movie.

We often use the continuous with for or since when we want to focus on the duration of an action:
* Kubrick had been trying to get the film made for more than twenty years.
* The eager fans had been waiting in line for over six hours since the early hours of the morning.

We don’t usually use the past perfect continuous for actions and background situations still continuing at the same time as the past simple narrative. We prefer to use the past continuous:
* We were living in New York when John was made redundant.

(an ongoing situation at the time of the redundancy)

Compare these examples:

- Jane called the boys in for lunch.
  - They were playing in the garden.

- Jane called the boys in for lunch.
  - They had been playing in the garden.

2 Completed and ongoing actions

The past perfect simple often refers to a completed action, whereas the past perfect continuous may refer to an action that was still ongoing at the time of the statement:
* The leaves had fallen from the trees early that year and they were completely bare.
* The leaves had been falling from the trees and the ground underfoot was very slippery.

We do not mention the number of times that we have done an action when we use the past perfect continuous:
* X Jill had only been watching TV twice that week.
* ✓ Jill had only watched TV twice that week. (repeated action: past perfect simple)

1 Ongoing situations and actions

We use the present perfect simple to talk about situations that started in the past and are still continuing in the present:

*The manor house has stood on this spot for over two hundred years.* (It is still here.)

We often use the prepositions for and since with this use:

*The centre of the island has not been inhabited for fifty years.* (for + period of time)

*The island has not been inhabited since the earthquake of 1952.* (since + point in time)

When we use since to introduce a new clause, we usually use the past simple after it:

× *You’ve been really moody ever since that letter has arrived. What’s wrong?*

✔ *You’ve been really moody ever since that letter arrived. What’s wrong?*

⚠ The present continuous + for expresses a present situation continuing into the future, NOT a situation that began in the past:

*We’re staying here for three months. We’re going back to Chile in September.*

But note the use of either the present perfect or past simple after *It’s (weeks/years/ages)* since ..., to express a period of time when we haven’t done something:

*It’s ages since I’ve been/I went to the theatre. It’s weeks since we’ve seen/we saw each other.*

2 Unfinished time periods

We can use the present perfect for completed actions in the past if they may happen again, i.e. if the time period in which the actions took place has not ended:

*I’ve only been to Hong Kong once. (My life is still continuing, so I may go there again.)*

*NASA has sent probes to various planets. (NASA still exists so may send more.)*

Sometimes we know the time is not ‘finished’ because of the time expression:

*This channel has shown four wildlife documentaries this week and it’s only Thursday!*

Compare these two sentences:

*Jack Nicholson has won three Oscars. (He is still alive and may win some more.)*

*Katharine Hepburn won four Oscars during her life. (She is dead and can’t win any more.)*

British English uses the present perfect after superlatives, e.g. *the best/worst, the greatest,* ordinal numbers, e.g. *the first (second, third), the only,* often followed by ever:

*It’s the worst sports show I have ever seen and the first I have ever complained about!*

Past simple with the superlative in American English ➤ page 368
3 Adverbs often used with the present perfect

These adverbs are very common with the present perfect use described in 23.2:

already always ever never often recently seldom so far still to now yet

*The Prime Minister has seldom been put in such a difficult position.*

*I have never experienced any racism in athletics.*

*We've received over 20,000 entries for the competition so far.*

*'Have they decided on the wedding date yet?' 'No, they still haven't made up their minds.'*

We use *already* with the affirmative but *yet* with the negative and in questions:

*×* We've yet seen the film but they haven't seen it already.

*✓ We've already seen the film but they haven't seen it yet.*

Past simple with these adverbs in American English ➤ page 368

4 Present results

We can use the present perfect simple to talk about an action completed in the past which has a present result:

*The avalanche has devastated the skiing industry in the area.*

(result: The skiing industry is still having big problems.)

*We can start the interviews now, as all the candidates have arrived.*

Common adverbs with this use of the present perfect are *just, recently and lately:*

*Has the sports centre increased its membership fees lately?*

*John Barry, the composer of numerous famous film scores, has just died.* (= very recently)

5 Other uses

As the present perfect simple expresses relevance to the present, news reports often start with this tense, before moving into past tenses:

*The largest car plant in Detroit has shut down. It closed its doors for the last time yesterday.*

Similarly, we often use it to introduce a new topic of conversation:

*I've heard from Maurice – he's been in Australia for the last two months.*

In time clauses (e.g. beginning with *after, when*) we can use the present perfect with future reference (➤ Unit 28.1):

*We'll make a move as soon as the rain has stopped.*

Present perfect continuous

1 Ongoing situations and actions
We use the present perfect continuous, often with since or for, to talk about an ongoing situation or action which began in the past and is still continuing, or has just finished:
Women have been speaking out on this issue for some time, with mixed results.
I've been looking into the possibility of early retirement since the reorganisation.

⚠️ We do not usually use the present perfect continuous in the passive:
X The patient's heart rate has been monitored continuously.
✓ The nurses have been monitoring the patient's heart rate continuously.
The present perfect simple often (but not always) refers to a completed action, while the continuous usually refers to an action that is still ongoing:
I've read that book by Dan Brown if you want to borrow it. (I've finished reading it.)
I've been reading that book by Dan Brown – it's really exciting! (I'm still reading it.)

When we use the continuous we focus on duration, so we do not mention the number of times that we have done an action: I've been calling you all morning.
If we give a number of times, we use the present perfect simple:
X I've been calling you five times this morning. ✓ I've called you five times this morning.

2 Temporary situations
The present perfect continuous can suggest a temporary situation or action:
We've been subscribing to one of the satellite TV companies. (not fixed – we may change)
With lately or recently, it often refers to new developments which may be temporary:
Helen's been spending a lot of time at the club lately. (She didn't use to do this.)

⚠️ We use the present perfect continuous + for, not the present continuous, to specify the duration of an activity which started in the past and is still continuing:
X I am learning how to play chess for three years now.
✓ I have been learning how to play chess for three years now.

Verbs like live, work, study, teach can be used in either the simple or continuous with little difference except that the present perfect simple is seen as more permanent:
The Montague family has lived in the manor house for as long as I can remember.
Our daughter has been living with us for a few weeks as she's been ill.

3 Present result
We can use the present perfect continuous to explain a present result. The focus is on the activity rather than the result. In this case, we don't usually use time adverbs:
I'm sorry the hall is in such a mess. We've been decorating.

25 State verbs

Do you like Ingmar Bergman's films?

I don't know. I've been meaning to watch one of his films for ages, but just haven't managed it.

Oh, really? They're interesting, but very strange. I don't understand what they mean at all.

1 State verbs believe, have, like, etc.

There are a number of state verbs in English; we rarely use them in a continuous tense:

X The solicitor is doubting the credibility of his client's explanation.
✓ The solicitor doubts the credibility of his client's explanation.

They often describe states of being, thinking, possessing or feeling:

<table>
<thead>
<tr>
<th>existing or being</th>
<th>be consist of contain exist</th>
</tr>
</thead>
<tbody>
<tr>
<td>possessing</td>
<td>belong to have (= own)</td>
</tr>
<tr>
<td>feeling or wanting</td>

<td>thinking or believing</td>
<td>believe doubt expect feel (= think) forget imagine intend know realise recognise remember see (= understand) suppose think understand</td>
</tr>
<tr>
<td>appearance</td>
<td>appear resemble seem</td>
</tr>
<tr>
<td>other verbs</td>
<td>concern cost depend deserve fit matter mean measure mind weigh</td>
</tr>
</tbody>
</table>

2 Using these verbs in the continuous

It is possible to use many of the above verbs in the continuous, but the verb either has a different meaning or expresses a temporary action:

*I'm having a really good time, thanks.* (= am experiencing)

*Santos is thinking of getting a new Internet connection.* (= is considering now)

Here are some of the common differences in use:

<td>Your son was a very obedient child, wasn't he?</td>

<td>I'm weighing the ingredients for the cake. (= action of weighing)</td>
</tr>
</tbody>
</table>
3 Sense verbs see, hear, feel, etc.

We do not usually use the continuous form with verbs which describe a sense or a form of perception, e.g. hear, notice, see, smell, taste:

X I'm noticing that your wife never comes to the matches. Doesn't she like cricket?
✓ I notice that your wife never comes to the matches. Doesn't she like cricket?
X I'm hearing that you're not too happy with the management's proposal.
✓ I hear that you're not too happy with the management's proposal.

We usually use the simple form or can/could + sense verb when we experience something without intentionally using the sense, i.e. the action is involuntary:

I (can) smell the fertiliser on the fields every time I open the back door!

We also use the simple form when the verb is intransitive:
The fertiliser on the fields smells really horrible!

With smell and taste, we can use the continuous for a deliberate action:

I (can) taste cream in this. (there is cream in the dish; involuntary action)

I'm tasting the cream. (the cream might be bad; intentional action of checking)

We usually use the verbs see and hear only in the involuntary sense; we use look at, watch or listen to for an intentional action:

X Can you keep the noise down? I'm hearing something on the radio.
✓ Can you keep the noise down? I'm listening to something on the radio.

If they have a different meaning, we can use the continuous:

I'm seeing a new doctor now. (= visiting as a patient)

Some verbs of feeling can be used in both the simple and the continuous with no change in meaning:

My wrist hurts/is hurting again – I must go to the physiotherapist.

I think those mussels may have been bad. Do you feel/are you feeling OK today?

4 Performative verbs thank, apologise, etc.

Performatives are verbs which can actually perform the action they describe when they are used in the first person and the present tense; they address the listener/reader directly:

On behalf of the company, I apologise for any inconvenience caused.

Common examples are:

accept agree apologise congratulate declare deny disagree forbid forgive guarantee insist invite order predict promise recommend refuse request suggest thank warn

When we use these verbs in the present, they are usually in the simple form:

Railtrack apologises for the disruption to services this weekend.

We recommend the new tapas restaurant in the town centre.

If we use these verbs to refer to the past or future, we can use them in the continuous form.

Compare:

PRESENT  X I'm thanking you all for joining us today.
         ✓ I thank you all for joining us today.

PAST   ✓ He warned the children not to swim too far from the beach.
         ✓ When we arrived, he was warning the children not to swim too far from the beach.

FUTURE ✓ I'm inviting about sixty people to Jenna's party – OK?

12 February 2012

Dear Ms Travis,

Please forgive me for contacting you out of the blue. I am writing in connection with the film apprenticeships your studio offers. I (1) noticed / was noticing an advertisement about these in the Guardian some months ago and I have (2) meant / been meaning to write to you since then. My request (3) concerns / is concerning the film editing apprenticeship in particular.

I completed a university degree in film studies last June and I have been trying to find a position in film since then. To be honest, I (4) have / am having great difficulty and I (5) feel / am feeling rather despondent at present. My course (6) consisted / was consisting of most aspects of film and television production, and I specialised in film editing in my final year. I have always (7) wanted / been wanting to pursue a career in film and I took the degree to facilitate that, although it (8) appears / is appearing not to have been successful to date.

I (9) realise / am realising that the advert for the apprenticeships was placed some months ago and you may not have any places available now. However, I am perfectly willing to work in any capacity without payment for a few weeks in order for you to see my level of commitment, in the hope that I may qualify for an apprenticeship in the future. I (10) promise / am promising that I won’t disappoint you if you decide to employ me in any capacity.

I look forward to hearing from you.

Yours sincerely

Celia Roberts

Using shall, shan’t

1 The use of shall/shan’t with I and we in the future simple is becoming dated and is rare now:

   Having learnt on an automatic car, I shall never get the hang of this manual gearbox.

2 Shall is common in the question form as an offer or a suggestion:

   'I can't get this tin open.' ‘Shall I do it for you?’

   Shall we go out tonight?

We do not use shall/shan’t with he, she, it, you, they for predictions:

   X He shall like the idea, I'm sure.  ✓ He will like the idea, I'm sure.
2 Read the commentary and find examples of different future forms.

'So, who will win the election? Will the Government have done enough to calm people's fears about the economy? Is the nation going to endorse the current administration or send it into oblivion? As usual, we will be bringing you all the results and details as soon as they happen, and this year we're teaming up with Sky to bring you the best coverage ever. Our election broadcast starts tomorrow evening at 11:00 p.m. Don't miss it!'

26 Predictions

1 Future simple will/won’t + infinitive

We use this to talk about predictions based on opinion, analysis or judgement:
This investment from all sectors will bring economic prosperity and continued success.

We often use will/won’t to predict an event which we think will happen because similar events have happened in the past:
He’ll be in prison for a long time. (Similar crimes have attracted long sentences.)
The battery won’t last forever, so you should buy a spare. (Previous batteries haven’t lasted.)

We can also use will/won’t for future events that are certain to happen:
Aunt Charlotte will be ninety on Thursday. It won’t be light before 6 a.m.

2 be going to + infinitive

When there is evidence in the present to justify the prediction, we use be going to + infinitive:
Howard’s wife is going to have a baby! Isn’t it marvellous!
With his criminal record, there isn’t a jury in the world that’s going to believe him.

With be going to the prediction is often about the immediate future:
Sssh! The bride’s father has just got up. He’s going to make a speech now.

This use of be going to for the immediate future often has an element of warning:
Look out! You’re going to spill your coffee!
It’s 8.30. You’re not going to get to school on time.

We can use will for a prediction with present evidence, usually when we are giving an opinion. We often use introductory phrases such as I think. Compare:
That’s a bad dent in the car. I think it’ll cost a lot to repair.
(This is my opinion, maybe based on past experience.)
The mechanic has phoned. I was right – that dent is going to cost us a lot of money!
(This is based on present evidence given by the mechanic.)

There is often little difference between these two uses.

3 Future continuous will/won’t be + -ing form

We use this form for a temporary action in progress at or around a particular point in the future:
This time next Tuesday afternoon I’ll be lying on the beach!

Compare this with the present continuous for a temporary action in the present:
It’s Tuesday afternoon and I’m lying on the beach. Aren’t smartphones wonderful!

We use this form to talk about an action that will be in progress in the future; it may have a result or make another action possible:
My mother will be looking after the children, so we’ll be able to talk.
I won’t be going to the staff meeting tomorrow, so I’ll answer the phone for you.
We do not usually use the passive with this form, nor the verb be:

- The proposal will be being presented at the next meeting.
- The chairman will be presenting the proposal at the next meeting.
- Shelley will be being in Morocco this time tomorrow.
- Shelley will be in Morocco this time tomorrow.

We can also use will/won’t be + -ing form (and will/won’t + infinitive) to describe something we believe to be the case now:

You can’t interrupt her now. She’ll be getting ready to go on stage.
(I think she’s getting ready now.)
‘What’s that noise?’ It’ll be Ron upstairs. He’s learning to play the trumpet.’
(I think it must be him.)

**4 Future perfect simple and continuous**

We use the future perfect simple (will/won’t have + past participle) to make predictions about actions which we expect to be completed before a particular time in the future: He’ll have had the operation by July and should be a lot fitter then.

<table>
<thead>
<tr>
<th>NOW</th>
<th>MAY</th>
<th>JULY</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td>the operation</td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

We usually use a time adverb/phrase (e.g. soon, by then, within the next week) with this kind of prediction. The times can be very close to ‘now’:

I’ll have finished my report within the next hour, so you’ll have a printout by lunchtime.

We use the future perfect continuous (will/won’t have + been + -ing form) to talk about an action which will still be in progress at a point in the future. It focuses on the duration of the action:

By 2040, people will have been using mobile phones for over half a century.

We’ll have been living in this house for twenty years in December.

With verbs such as live, work, stay, which contain the idea of continuity, we can also use will/won’t have + past participle:

We’ll have lived in this house for twenty years in December.

We rarely use this form in the passive:

[By July the house will have been being built for a year.]

✓ By July they will have been building the house for a year.

**5 Making predictions stronger or weaker**

We can make predictions, intentions or decisions stronger or weaker by using certain adverbs, e.g. definitely, certainly, probably, possibly:

She’ll definitely give a fantastic presentation at the conference – she always does.

I certainly won’t give you a lift to the station – it’s only down the road!

Call me at about 8.00. I’ll probably have got home by then.

Note the position of the adverb:

- between will and the infinitive in positive sentences
- before won’t in negative sentences.

We can show how sure we are about a future event by using an introductory verb, e.g. think, expect, hope, doubt, suppose, promise, guarantee:

I hope she’ll call us from the airport.

The Club guarantees that tickets will be sold on the day.

With verbs like think and believe we usually show negative meaning at the beginning of the sentence (Unit 47.4):

[I think I won’t pass the exam.] ✓ I don’t think I’ll pass the exam.

1 GRAMMAR IN USE  Choose the correct words in *italics* in the conversation. If both options are possible, choose both. 

DAVID  Who (1) *will* / *is going to* win the local election, do you think?

HANNAH  Oh, it’ll (2) *probably* / *definitely* be the Social Democrats, I’ve got no doubt.

DAVID  How can you be so sure?

HANNAH  Come on, by May the Conservatives will (3) *be* / *have been* running the local council for over twelve years, and they’ve made so many mistakes.

DAVID  Quite – they’ve been in power for over twelve years. This area always votes Conservative. Why do you think it (4) *will* / *is going to* be any different this time?

HANNAH  Well, it’s perfectly clear that they (5) *will* / *are going to* go ahead with the new railway line, so high-speed trains will soon (6) *run* / *be running* through the area every twenty minutes. That (7) *’s going to* / *will* change the landscape completely and destroy the atmosphere.

DAVID  You’re right, but that was more of a national government decision, wasn’t it? In fact, our local politicians opposed the decision, so I (8) *don’t think that will* / *think that won’t* influence people much.

HANNAH  You may be right. People (9) *probably will* / *will probably* vote the same way as always. It’s so depressing.

DAVID  It isn’t so bad. Look on the bright side. You’ll (10) *have* / *have had* plenty to complain about for the next four years!

2 Write the second sentence so it has a similar meaning to the first, using the word in brackets. The sentence must include a future form, as in the example.

0  We are certain of a high level of customer satisfaction with this product.
   (guarantee)  *We guarantee that customers will be satisfied with this product.*

1  Let’s stop playing soon – our opponents have so many more points than we do.
   (going) ........................................................................................................

2  My great-grandmother celebrates her hundredth birthday next year.
   (old) ........................................................................................................

3  It’s impossible that humans will ever be able to live on the moon, in my opinion.
   (think) ........................................................................................................

4  It’s my parents’ twenty-fifth wedding anniversary next Saturday.
   (married) ...................................................................................................

5  Come along next Monday – the band always practises on Monday afternoons.
   (will) ........................................................................................................

6  We are one hundred percent certain of the success of our proposal.
   (certainly) ..................................................................................................

7  Do you have any idea of your arrival time on Friday?

8  That skier is going far too fast, and those trees are very close.

Solving Japan’s old-age problem

Japan is ageing faster than any other nation. By the end of this decade there (0) **will be** (be) three pensioners for every child under 15 and one in six people (1) ......................... (celebrate) their 80th birthday already.

Unlike other countries, Japan has not turned to immigration to solve its problem, but to technology – manufacturers are currently working on a number of innovations, many of which (2) ........................................ (soon be) available. Here are just a few:

**Cars**
The over-75s in Japan account for more than 25 percent of fatal accidents on the road. Toyota is working with Nintendo to create cars that can monitor brain activity. The car (3) ........................................ (learn) its user’s driving pattern, so when Mrs Watanabe suddenly puts her foot on the accelerator for no reason, it will know she (4) ................................. (have) an accident and will slow the car down automatically.

**Intelligent Kettles**
In the future, much of the care of the elderly (5) ........................................ (fall) on the younger members of the family, who may live a distance away. Appliance-maker Zojirushi has developed an internet-connected kettle which can send remote signals, so when you leave for work in the morning you will know that granny is OK because her kettle (6) ................................. (send) you a signal earlier that morning.

**Robot Pets**
Animals are known to be good for the elderly, but real animals are difficult to look after as their owners age. This furry white baby seal robot is being used in nursing homes to stimulate dementia sufferers, but its manufacturers hope that soon many less infirm pensioners (7) ................................. (care for) robot pets in their own homes.

**Easy-Swallow Food**
Some diseases of the elderly, such as Parkinson’s, can make swallowing difficult, so the idea is that easy-swallow food, i.e. liquidised food, (8) ................................. (help) those people. President of Synovate Healthcare, Bill Hall, says, ‘I think this (9) ................................. (take) the world by storm.’

**Supermarket Aisles**
Even supermarkets are becoming more age-aware. As the population ages, more and more people (10) ................................. (use) motorised wheelchairs, so supermarkets are making their aisles wider to accommodate such vehicles.

What happens in Japan now (11) ......................... (almost certainly come) to the west as the baby-boomer generation from the 1950s and 60s reaches old age; people here will benefit from these innovations as they (12) ................................. (be) tried and tested in Japan.
Decisions, intentions and arrangements

Local student Shona Johnson is leaving college in June to start a career in politics. Shona is to start an internship at the Senate in September, where she will be working with the Senator for Wisconsin. Shona says she is going to carve out a big career for herself!

1 Future simple will/won’t + infinitive

We can talk about spontaneous decisions with this form:
You look tired. I’ll cook dinner tonight.

To ask questions about decisions, we can use shall I/we: Shall I see you next week, then?

We can use will/won’t + infinitive to strengthen meaning, and to express determination:
I will join you all at the festival at the weekend, whatever my parents say!

If you insist on lying, I certainly won’t help you.

In speech we usually stress will/won’t when we use this form to express determination.

We do not usually contract will to ’ll with this use, except with a stressed adverb:
He’ll never agree to that!

FORMALITY CHECK It is possible to use this form for very formal arrangements:
Cabinet will meet tomorrow to discuss the issue of identity cards.

FORMALITY CHECK We can also use shall/shall not with I and we to express determination, especially in a formal context:
The purpose of this interview is to give my views on the economy. I shall therefore not be drawn into discussing my personal life.

Pronunciation ➤ 1.07

2 be going to + infinitive

We use be going to + infinitive for actions that we have already decided to do:
My nephew is going to study environmental law next year. (This is his plan/intention.)
The police aren’t going to prosecute those youths after all. (They have decided against it.)

We stress auxiliary be or not to express determination about something we have already decided on:
I am going to leave. I’m not going to stay here any longer, so don’t try to make me!

Pronunciation ➤ 1.08

We usually avoid be going to with the verbs go and come:
[I’m going to go home now. Are you going to come?]
✓ I’m going home now. Are you coming?

3 Present continuous and be going to

We use the present continuous to describe an event in the future which has already been arranged by the time of speaking:
We’re seeing a musical at the theatre next week. (We’ve got the tickets.)

Compare this with the use of be going to:
We’re going to see a musical at the theatre sometime next week.
(It may or may not be arranged yet; the emphasis is on our intention.)
When we have made some form of commitment to an arrangement, e.g. by buying tickets or organising something with other people, we tend to use the present continuous:  
*I'm staying in tonight. I promised my flatmates I'd cook lasagne for them.*  
The emphasis here is on the ‘arrangement’, rather than the speaker’s own intention. These two forms are often interchangeable with little difference in meaning, but the present continuous tends to ‘distance’ the action from the speaker and his/her choice. We also use the present continuous for impersonal plans:  
*Computer City has announced that it is opening four new shops next month.*  

**Formality Check.** With impersonal uses like this, the present continuous is seen as a little more formal than *be going to*, and is more likely to be used:  
*[Computer City has announced that it *is going to open* four new shops next month.]*  

We cannot use this form with events which are beyond human control, e.g. the weather, because these events are predictions, not intentions or arrangements:  
*× It's snowing tomorrow.* ✓ *It's going to snow tomorrow.* ✓ *It will snow tomorrow.*

**4 Future continuous will/won’t be + -ing form**

We can use the future continuous to talk about events that are a result of or part of an arrangement made in the past:  
*Trains *won't be running* to Upminster this weekend due to essential track repairs.*  
With this structure the future event is seen as arranged, so we use this as a tactful way of refusing an invitation or asking about someone’s plans:  
*I’m sorry, I can’t come to your wedding as I’ll be working on that day.*  

**Will you be staying long?**

Compare:  
*Are you staying long?* (more direct, less polite than *Will you be staying long?*)

There is, in fact, little difference between this and the use of the present/future continuous for arrangements. The future continuous distances the arrangement a little, making it more fixed and less open to change.

**5 be to + infinitive**

We use *be to + infinitive* in formal English to talk about official arrangements in the future:  
*The President is to hold an official reception for the visitors.*  
This construction is common in writing, especially in news articles:  
*Crash investigators are to release their findings to the press later today.*

The verb *be* is often omitted in headlines, both for ‘formal’ and ‘informal’ topics:  

*PRESIDENT TO HOLD OFFICIAL RECEPTION*  
*EastEnders stars to marry*

We often use *be to* in *if* clauses (► Unit 37) when the event in the *if* clause is dependent on the event in the main clause:  
*If tennis in this country is to improve, more money and commitment will be necessary.*  
(= More money and commitment must be given first for tennis to improve.)

**Formality Check.** We can also use *be (not) to + infinitive* for formal commands and instructions:  
*You are not to disturb the head teacher while the inspectors are here next week.*  
It is quite common to use the passive for instructions with *be to* (without referring to the future):  
*These pills are not to be taken with any other form of medicine.*

MY FELLOW STUDENTS

Many thanks to those of you who voted for me in the student representative elections of 15 October.

I am now looking forward to our first meeting with the university council, which (0) …… in ten days’ time.

I feel that my interest in politics and my knowledge of the subject (1) …… important factors in my representation. I am used to debating and I (2) …… your views across clearly and firmly.

I believe strongly that student representatives should be involved in making academic decisions, and I (3) …… for that to happen. Next year the university (4) …… its number of degree courses to include law and medicine, which will put a strain on the existing infrastructure, i.e. buildings and facilities. I (5) …… the authorities to ignore the problems this will bring.

My other main cause for concern is the escalating cost of transport. I can obviously do nothing about that, but I (6) …… the university to delay the start of formal lectures and tutorials until after 10.00 a.m., to allow students to take advantage of cheaper off-peak fares.

Finally, let me remind you that all the elected student representatives (7) …… their views in the main lecture theatre next Thursday evening at 7.00 p.m.

28 Other ways of expressing the future

‘The G8 summit is about to finish any moment now. We are expecting the ministers to go straight to the press conference in the media centre, where they are due to make a joint statement at 2.00 p.m. The lack of agreement on environmental issues is bound to disappoint many people who believed this summit would deliver change.’

1 Present simple, be due to, for timetabled events
We use the present simple to talk about timetabled events, usually with a time or date:
Carriageway repairs on this stretch of the motorway start on 26th May.
We also use be due to for timetabled events, usually with a time or date:
Carriageway repairs on this stretch of the motorway are due to start on 26th May.
‘The Mousetrap’ is due to celebrate its 25,000th performance later this month.
The present simple suggests that the timetabled event is totally fixed, but be due to suggests possible change, i.e. the event may change:
New measures to contain asylum seekers are due to come into force on 1st August but a case currently before the European court may delay this until the autumn.

⚠️ When we refer to the future in subordinate clauses (starting with after, as, before, by the time, as soon as, if, immediately, once, the moment, unless, until and when), we use a present form, NOT will/won’t:

× Won’t the park look good once the new trees will reach maturity?
✓ Won’t the park look good once the new trees reach/have reached maturity?

Conditionals: we use will/won’t...(present) + if first part, will/won’t... (past) + if second part:

× Will the park look good once the new trees will reach maturity?
✓ Will the park look good once the new trees reach/have reached maturity?

✓ Effective penal reform will not be achieved unless the government will take it seriously.
✓ Effective penal reform will not be achieved unless the government takes it seriously.

2 Future continuous for routine events
We can use will/won’t be + -ing form to emphasise the routine nature of an event:
We’ll be having our weekly meeting tomorrow so I’ll present your proposal then.
(future continuous: emphasis on the routine nature of the weekly meeting)
Compare this with the use of other future forms:
We’re having our weekly meeting tomorrow instead of Friday this week.
(present continuous: emphasis on the arrangement rather than the routine)
We have our weekly meeting on Friday so I’ll present your proposal then.
(present simple: presents the meeting as part of a timetable)
This future continuous form can also suggest that an event is inevitable:
I’ll be seeing Mr Kennedy at the court tomorrow – he’s always there on Thursdays – so we can discuss your case briefly then.

3 Expressions for near future events
We use be about to talk about an event that we intend or expect to happen in the near future. The event may or may not be planned, but evidence in the present indicates that it will happen (be going to ➤ Unit 26.2):
Ladies and gentlemen. Please take your seats. The performance is about to start.
Hurry up! The driver says he can’t wait any longer. He’s about to leave without us.
We can stress that the future event is very imminent by adding just:
Come on! The check-in desk is just about to close.
We also use be on the point of and be on the verge of to talk about the near future. These both mean that something is very close to happening. They can be followed by either an -ing form or a noun:

Don’t provoke your little brother. You can see he’s on the point of losing his temper. Because of the erosion of their habitats, some species are on the verge of extinction.

Some adjectives contain the idea of ‘in the near future’, e.g. imminent, forthcoming, impending. We tend to use these adjectives in more formal, often written, English: A decision from the judges is imminent and we expect further news within the hour.

We use impending only in attributive position, i.e. before the noun:

✗ The sensation of doom was impending.
✓ No one could shake off the sensation of impending doom.

We do not usually use time adverbials (e.g. in an hour) with the expressions above:

✗ The President is on the point of signing an historic deal in just one hour.
✓ The President is on the point of signing an historic deal.

4 Expressions of probability and certainty

We use be likely/unlikely to + infinitive to say that something in the future is probable/improbable:

The payment is likely to take ten days. Please contact us if it does not arrive within that time. They’re unlikely to arrive before six. The traffic is always awful on Fridays.

We can use be sure (bound/certain) to + infinitive to say that something is going to happen or should have been expected:

The new timetable is sure to annoy some of the teachers when they see it. Your application is bound to fail if you don’t get the divisional director’s approval.

FORMALITY CHECK

In the negative we can put not after the adjective, but this can sound quite formal, so in casual speech we sometimes reformulate it:

The electrification of the west coast rail line is certain not to be completed before 2025. [Don’t worry about Dad – he’s sure not to find out about the party.]

✓ Don’t worry about Dad – I’m sure he won’t find out about the party.

We can use be sure to and be certain to as imperatives but NOT be bound to:

✗ Be bound to give me a call when you arrive at the hotel.
✓ Be sure/certain to give me a call when you arrive at the hotel.

5 Verbs with future meaning

Some verbs contain an implied future in their meaning; we understand that they relate to the future, even though we do not use a future form:

<table>
<thead>
<tr>

<th>EXAMPLES</th>
</tr>
</thead>
<tbody>
<tr>
<td>decide</td>
<td>hope</td>
<td>I hope to see everyone at the next Open Day.</td>
</tr>
<tr>
<td>promise</td>
<td>intend (also + -ing)</td>
<td>Do you swear never to reveal this secret?</td>
</tr>
<tr>
<td>swear</td>
<td></td>
<td>He intends to retire/retiring next year.</td>
</tr>
<tr>
<td>anticipate</td>
<td>predict</td>
<td>We anticipate congestion on all routes this weekend.</td>
</tr>
<tr>

<td>We’re planning a break to get a bit of sun this winter.</td>
</tr>
<tr>
<td></td>
<td>(+ noun) + to + infinitive</td>
<td>We expect to promote trainees within three years.</td>
</tr>
</tbody>
</table>

1 The infinitive is more common after intend than the -ing form.
2 We use predict with a noun or a that clause: We predict that it will rain tomorrow.

Some modal verbs usually express a degree of possibility in the future (► Units 31, 32):

Such financing opportunities may not be so readily available in the future.

Rankin’s latest blockbuster might win the Golden Dagger award for crime fiction.

Given their expertise and experience, the Swiss team should triumph in tomorrow’s final.
**Practice**

1. Read the sentences A and B and decide whether both are correct, one is correct, or both are incorrect. Tick (✓) the correct sentences and cross (✗) the incorrect ones.

   5. A. Renovations to the roof are about to begin on 2nd January.
      B. Renovations to the roof are to begin on 2nd January.
   6. A. Will you promise taking care when you’re travelling alone?
      B. Be bound to take care when you’re travelling alone.

2. **Grammar in Use** Complete the conversation with words from the box. Use each word or phrase once only. 

   anticipate begin due to expect guarantee to hopes to intend is likely to is sure to plans to should will be

   **MARY** When do Brian’s exams start, then?
   **ANNA** Well, they (1) ____________ tomorrow, actually.
   **MARY** Do you (2) ____________ him to do well?
   **ANNA** We think he will. He’s taking nine subjects, and he’s quite optimistic. He (3) ____________ pass at least six of them – he’s very good at those six subjects. We think that he (4) ____________ pass two of the others: French and art – he’s studied very hard, but he’s not naturally gifted in those subjects! We’ve got no hopes at all for music. He (5) ____________ fail it. I don’t know why the school entered him for it.

   **MARY** What does he want to do next year?
   **ANNA** That depends. If he does well, he (6) ____________ stay on at school for two years and study politics.
   **MARY** Politics? That’s unusual. Can he study that at his school?
   **ANNA** Well, that’s the problem. No, he can’t, his school doesn’t have a very good range of subjects. But we’ve just heard that they (7) ____________ opening the new sixth form college in Fareham very soon. We (8) ____________ being able to send him there, but we don’t know for certain.

   **MARY** Does he (9) ____________ to go to university afterwards then?
   **ANNA** Yes, if everything goes OK.
   **MARY** I see. And if he doesn’t pass enough of the exams?
   **ANNA** Well, he might leave and look for a job. Sandy – you know, my elder sister – says she (10) ____________ have a vacancy for a trainee in her business, but obviously she can’t (11) ____________ take him. And he’s (12) ____________ see the careers advisor next week anyway. We’ll just have to see.
3 Write the second sentence so it has a similar meaning to the first. Use the word in brackets, as in the example.  
0 The result of our appeal against the parking fine will probably arrive in the post tomorrow. (likely) The result of our appeal against the parking fine is likely to arrive tomorrow. 
1 We expect the peace talks to take place in Helsinki on 28–29th July. (due)

10 The team meeting is to take place in Meeting Room 4 as usual. (be) 
11 Mr Cooper was very close to dying of hypothermia when the paramedics arrived. (verge) 
12 Given the current media frenzy, first-class travel for the ministers will not be approved for the foreseeable future. (travelling) 

4 Find and correct six mistakes in these sentences, as in the example. Tick (✓) the correct sentences. 

0 We’ll give you a call when we will finish repairing your car. finish/have finished 
1 Letters sent second class are not likely to arrive the following day. 
2 Because of repairs to the sports hall, this week’s football practice takes place outside. 
3 Be certain to lock your doors at night when you’re alone in the house. 
4 This week’s rubbish collection is about to take place on Tuesday because of the public holiday on Monday. 
5 You shouldn’t take these pills on an empty stomach so you’d better take them after you’ll eat. 
6 We’ve got no special plans for the summer. We spend it as usual with our parents. 
7 The two parties are on the verge to sign the contract. (travelling) 
8 Quick! That child is due to fall out of the tree – try to catch him!
Future in the past

1 was/were going to + infinitive
Sometimes we need to describe the future from a viewpoint in the past. We often use was/were going to to do this:

I was going to get up early this morning but the alarm didn’t go off!

11.30 p.m. yesterday 6.00 a.m. today 9.00 a.m. today

I intend to get up early tomorrow. The alarm doesn’t go off. I wake up late.
(this is a future plan) (my plan to get up early is now in the past)

When we use was/were going to, the plan is not usually fulfilled (i.e. it did not happen):
The fitness club was going to increase its annual subscription but so many members protested that it backed down. (It didn’t increase the subscription.)

We also use this form to make excuses for things we have not done:
I was going to buy you a birthday present but I couldn’t find anything you’d like.

We can use the negative to talk about things we have done but did not intend to do:
We weren’t going to disturb you but we thought you should hear the news from us.

However, it is possible to describe a past intention that is fulfilled. This is made clear in the context:
‘Thanks for posting my letters.’
‘That’s OK. I was going to post mine anyway.’ (I did post them.)

2 Other ways of expressing the future in the past
Was/were going to is a very common way of expressing the future in the past. But it is possible to transfer any form with future meaning to the past:

<table>
<thead>
<tr>
<th>PRESENT/FUTURE FORM</th>
<th>PAST FORM</th>
<th>EXAMPLES</th>
</tr>
</thead>
<tbody>
<tr>
<td>present continuous</td>
<td>past continuous</td>
<td>They were coming for dinner, but in the end they didn’t arrive until after midnight.</td>
</tr>
<tr>
<td>will/shall</td>
<td>would</td>
<td>The heating wasn’t working so we hoped the engineer wouldn’t take long.</td>
</tr>
<tr>
<td>will be + -ing form</td>
<td>would be + -ing form</td>
<td>Little did we know that we would still be waiting in the lounge in three hours’ time!</td>
</tr>
<tr>
<td>will have</td>
<td>would have</td>
<td>The Cabinet thought the oil crisis would have ended before the election.</td>
</tr>
<tr>
<td>is/are about to/due to</td>
<td>was/were to</td>
<td>As she raised her arm, she realised she was about to hail a taxi.</td>
</tr>
<tr>
<td>is/are to</td>
<td>was/were to</td>
<td>He was to arrive at the airport at nine. We were to have been met by the tour guide.</td>
</tr>
</tbody>
</table>

When we transfer these forms to the past, they keep the same meaning, e.g. we use the present continuous to talk about arrangements, so the past continuous also refers to arrangements:

We were meeting them at the concert hall, but we didn’t know which entrance they were waiting at.

⚠️ With was/were (due) to + present infinitive, we don’t know if the event happened or not:
The exam results were (due) to arrive at the school today. We can phone to find out whether they have arrived.

However, was/were (due) to + perfect infinitive (e.g. to have done) tells us that the event did not occur:
The exam results were (due) to have arrived at the school today but apparently they haven’t been released yet.

   **Subject**: Changes to the Broadbank Hotel

   **THE BROADBANK HOTEL**

   Dear Guest

   The Management of Broadbank Hotel wishes to remind you that the hotel might close on 5 December for the usual year-end vacation. It is about to reopen early next year, but as part of the Value4U chain of hotels.

   As you know, the Lister family has been involved in Broadbank Hotel for over twenty years now and the closure impending is a blow to all of us. We had recently started to look at ways of finding extra financial support: we anticipated to work with an investment company to upgrade the hotel with the addition of a gym, swimming pool and sauna complex. We were on the verge of sign a contract, which will allow us to retain control of the hotel, but we were unable to complete the deal on time. We were bound to send our annual newsletter as usual to all our regular clients, with information about offers for the spring, but of course, that is now not possible. Unfortunately, we are likely to be not able to set up another hotel in the near future.

   The Value4U chain envisages reopen the hotel by 1 March; you will be advised of the exact date. It just remains for us to thank you for all your support in the past.
Historic bill passed

US PRESIDENT Barack Obama last night secured a victory for social welfare in the United States that no other administration has managed to do.

The Clinton administration of 1992–2000 (0).......................... introduced healthcare reform, but failed in its aim. Obama cited this as a major objective when he took office, and last night the bill to introduce reform was passed by only seven votes.

The President (1).......................... sign the bill into law shortly, but Republicans (2).......................... prevent this, on the basis that the bill is unconstitutional. Moments before the vote, House Speaker Nancy Pelosi said, referring to previous reforms, "We (3).......................... those who established Social Security, Medicare, and now, tonight, healthcare for all Americans."

Once the President’s (4).......................... endorsement of the bill (5).........................., the new legislation (6).......................... healthcare to nearly all Americans. It will also (7).......................... end restrictive insurance practices such as refusing to cover people with pre-existing medical conditions. The bill contains some unpopular measures that Republican senators (8).......................... to change, and the estimated cost of $940 billion over the next ten years is (9).......................... cause controversy in many quarters.

Public opinion on the bill is divided. Corinne Murphy, a single mother of three children with severe asthma, told our reporter, “This is just amazing. I haven’t been able to get reasonable insurance cover until now because of my condition, and my healthcare costs have been crippling. By the end of this year, I (10).......................... over 15,000 dollars on emergency treatment. Now I (11).......................... insure the family at a fraction of the cost! I (12).......................... celebrate this evening.” Larry Aristides, a Republican farmer, gave the opposite view: “You know, I thought Obama was great, and I (13).......................... vote for him until I heard what he was planning with healthcare, so I voted for McCain instead. This is just the tip of the iceberg – the government (14).......................... people to stay at home rather than work soon, like in most socialist states.”
Modal verbs

Before you start

1 Review these intermediate grammar points and check you know them.

Modal forms

1 The modal verbs are can, could, may, might, must, should, will, shall and would. They differ from main verbs in several ways.
   • They have the same form for all subjects: I can, he can, they can.
   • The negative is just not; we do not use do/does not: You shouldn’t say that.
   • The modal verb goes before the subject in questions: Could you come here?
   • They do not have infinitive forms (to ...), so to make an infinitive, we use a different verb: I want to be able to sing perfectly.
   • They do not have participle forms (-ed, -ing), so to make continuous or perfect tenses, we change the main verb: I must be going soon. She might have had the results by now.
   • They are followed by the infinitive without to: They would visit you if you asked them.

2 The verbs need (to) and dare (to) are occasionally used in two forms:

Has to (obligation) is not a modal verb: it is grammatically the same as a main verb:

You don’t have to do that.

The Modern Olympic Games
The Modern Olympic Games were established by Baron de Coubertin in 1894. Athletes from countries all over the world can compete to try to prove who the best is in their sport. Until the 1970s only amateur athletes could compete, but since then the rules have been relaxed and now the governing bodies of individual sports must decide who is eligible. Only boxers have to be amateur now. In football (soccer), only three players over 23 are allowed to participate in each team – to maintain a level of amateurism.

1 Present and future ability

We use *can* or *be able to* for ability in the present. If the ability is surprising or involves overcoming some difficulty, we often use *is/are able to*:

*Despite his handicap he *can*/*is able to* drive a car.*

⚠️ We do not usually use *be able to* with a passive:

*This book *is able to* be used by beginners.* ✓ *This book can be used by beginners.*

To emphasise difficulty or to suggest effort, we use *manage to* or *succeed in* + -ing:

*Do you think she’ll *manage to* get a visa?* (informal)

*She succeeds in creating a positive atmosphere in every meeting.* (more formal)

We use *be able to* where *can/could* is grammatically impossible:

*We love *being able to converse* with the local people, so I’d like to *be able to speak* the language better.* (-ing forms and infinitives)

*I haven’t been able to drive* since I dislocated my wrist. (present perfect)

FORMALITY CHECK We can also use *be unable to* if we want to sound more formal:

*The claimant has been *unable to* drive* since the date of the accident.*

⚠️ To describe a future ability we use *will be able to*, NOT *can*:

*Can I speak fluently by the end of the course?*

✓ *Will I be able to speak fluently by the end of the course?*

However, we can use both *can* or *will be able to* for future arrangements:

*The doctor *can’t/won’t be able to* see you before six as he’s busy till then.*

If the arrangement is less certain we use *could*, *may* or *might* (*be able to*):

*The dentist *might be able to* see you later today; I’ll have to check the diary.*

2 Past ability

We usually use *could* to express past ability:

*Hannah loves the water. She *could swim* before she *could walk.*

⚠️ But to talk about a specific occasion in the affirmative we use *was/were able to*, NOT *could*:

*Mike’s car broke down yesterday but fortunately he *could repair it.*

✓ *Mike’s car broke down yesterday but fortunately he was able to repair it.*

It is possible to use *could*, or *was/were able to*, in questions, superlatives, and in sentences with limiting adverbs such as *only* or *hardly*:

*‘Could you/Were you able to fix the computer yourself?’ ‘No, I *could only/was only able to back up the important files.*’*

*Sorry, but this is the cheapest hotel I *could/was able to find.*

*She was so exhausted she *could hardly/was hardly able to speak.*

We use *couldn’t* or *was/were not able to* to describe a lack of ability/success:

*Mozart *couldn’t/wasn’t able to speak* French.*

*I couldn’t/wasn’t able to find those shoes in my size.*

We use *could* + *have* + past participle to describe a past ability which wasn’t used or a past opportunity which wasn’t taken. The meaning is similar to *‘would have been able to’* (▶ Unit 38.3):

*She *could have paid* by credit card but she preferred to use cash.*

(= She had the ability to pay by credit card but she didn’t use it.)

We can use *couldn’t have been* + comparative adjective when we want to emphasise a past action or feeling:

*I *couldn’t have been more pleased* when I heard your results – congratulations!*

(= I was very pleased about your results.)
Practice

1 Choose a suitable form of can, could, be able to, manage to or succeed in to complete the
sentences. Sometimes more than one form is possible. Listen and check.

1 The manager was a bit reluctant but in the end I get a refund.
2 It was really annoying; I get on to any of the websites you recommended.
3 When does the next match start? I hardly hear the last announcement.
4 The new road opens next month so we get to the coast more quickly.
5 Most of the big hotels were full, but we find a room in a small guesthouse near the station.

Q Do athletes really run faster these days?
A Yes. Long-distance runners these days can complete marathons in the time that fifty years ago their predecessors ran 10,000 metres. 

Q Why should this be?
A Well, technology is a factor: athletes today use the most aerodynamic materials in their running shoes or swimsuits. But even if earlier athletes had had these innovations, they improved their results significantly, for various other reasons. For example, athletes these days are professional; in the past they were unpaid amateurs. They had to combine their sport with paid work, so they find enough time to train. Athletes’ careers these days also last longer; they compete until they are older. Facilities also make a difference: in the 1950s and 60s, swimmers from the US to dominate their sport because few other nations had Olympic-sized pools. Now it’s easy for swimmers everywhere train more efficiently as they have the correct pools.

Q Given these conditions today, there’s no reason to believe that athletes continue to smash records.

Possibility

1 Present possibility

We use can to talk about things which are generally possible:
*Health insurance can be very expensive.* (= It is sometimes expensive.)

**ACADEMIC ENGLISH** We commonly use may in academic and scientific English:
*Over-prescribing of antibiotics may lead to the rapid development of resistant strains.*

We usually use may, might and could to talk about specific possibilities:
*This rash may/might/could be a symptom of something more serious.*
*Mark isn’t home yet – he may/might/could be working late at the office.*
*There can be life on Mars.* ✓ *There may be life on Mars.*

When we ask about possibility, we often start the question with *Do you think:*
*Do you think the shops might be open today?*

We use may well, might well and could well when we talk about a strong possibility:
*Don’t worry, the payment could well be in the post.* (= It is probably in the post.)

To describe possibilities which depend on certain conditions we use could or might
(► Unit 38.1): *She could learn much more quickly if she paid attention.*

When we think that something is POSSIBLY NOT the case we use might not or may not:
*The shops may not/might not be open today; it’s a public holiday.*

When we are certain something is DEFINITELY NOT the case, we use can’t:
*You really can’t drive to Oxford in under an hour.* (I’m sure about this, it’s impossible.)

2 Future possibility

We use will/won’t be able to to talk about future possibility or impossibility:
*We’ll be able to get a coffee at the theatre but we won’t be able to eat until after the show.*

We use may, might or could to talk about future actions which are less certain:
*The directors may call a stockholders’ meeting.* (= Perhaps they will call a meeting.)

We usually use could for a weaker possibility than may or might:
*You never know, she could find a perfect job tomorrow.* (It’s possible, but unlikely.)

!!! We do not use could not/couldn’t to say something is definitely impossible in the present or future:
*The shops couldn’t be open today.* ✓ *The optician couldn’t see you tomorrow.*
*The optician won’t be able to see you tomorrow.* ✓ *The optician can’t see you tomorrow.*

(for future arrangements that are not possible)

We sometimes use may/might + have + past participle to talk about a possible completed action by a time in the future:
*Call me next Tuesday; I might have finished the project by then.*

3 Past possibility

We use could to talk about general possibility in the past (things which sometimes happened):
*Teachers could be very strict at my old school.* (= Sometimes they were strict.)

**ACADEMIC ENGLISH** We use might in the same way in academic and scientific English:
*Wealthy Victorian families might employ as many as a dozen indoor servants.*

We use could/might + have + past participle to talk about a specific past possibility:
*She might have done it; she had the opportunity and the motive.* (= Perhaps she did it …)
*John could have posted the letter.* (I’m not sure whether he did or not.)

We also use might have for a past opportunity which we know was not taken:
*I might have finished the project by then.*

(= I had the opportunity but I didn’t go.)
1 **GRAMMAR IN USE** Choose the correct words in *italics*. If both are correct, choose both.

Listen and check.

MIKE Hi, Rob. I haven’t seen you for ages! What are you doing in the gym?

ROB Trying to get fitter, of course. How are you?

MIKE I’m fine. I always thought you were super-fit because of all your cycling.

ROB Oh that. Well, you know how it is, you get a job, get married ...

MIKE But you (1) *could be / could have been* an Olympic cyclist – you used to be fantastic!

ROB Maybe not that good! Well, I was in a good club, and anyone (2) *could / may* apply to join the teams, but there were people there a lot better than me, and you know, cycling (3) *can / might* be very competitive.

MIKE I’m sure, but it’s still a pity. Aren’t you cycling at all now?

ROB Oh yeah, just not so intensively. I’m still in a club and I was thinking ... I (4) *might / could* try the Tour de France in a couple of years’ time.

MIKE Wow! That would be awesome! It’s such a long ...

ROB No, no, I certainly (5) *can’t / won’t* be able to do it all. I (6) *might / could* not even be able to do more than a couple of stages. It’s difficult with work and everything.

MIKE Yes, but what an opportunity!

ROB Mmm, if I felt I was fit enough, then I (7) *could / might* ask for some unpaid leave. Anyway, why don’t you come along to the club?

MIKE Really? (8) *Do you think they might / Might they* let me in?

ROB It’s worth a try. How about next Saturday ...?

2 Complete the second sentence so it has a similar meaning to the first. Use a suitable form of *can, could, may or might*, as in the example.

0 Given some luck, our team has a good chance of winning the final next month.

With any luck, *our team might win the final next month*.

Speculation and expectation

1 Present speculation

When we speculate (or make deductions), we make informed guesses about an action or situation. We use a modal followed by the infinitive of a main verb in the simple or continuous form.

If we strongly believe that something is true, usually because we have evidence, we use must or have got to:

This must be the place – it’s the only restaurant in the street.
You must be feeling tired after your flight. Why don’t you rest for a while?

We use have (got) to when we want to add emphasis:

There has (got) to be some mistake. I didn’t order this furniture.
You have got to be joking! That was not a fool!

If we strongly believe that something is NOT true, or is impossible, we use can’t or couldn’t:

He can’t/couldn’t be the senior doctor, he’s far too young. (= I’m certain he isn’t ...)
Sarah can’t be working at the moment – I see her in the garden every morning.

We do not use mustn’t in this sense:

X This mustn’t be the place – there’s no one inside and there are no lights on.
✓ This can’t be the place – there’s no one inside and there are no lights on.

We also use can and could in wh- questions or with adverbs such as only or hardly:

X Who may that be at this time of night?
✓ Who can/could that be at this time of night?

It can/could hardly be the postman. He only comes in the morning.

(= I don’t think it is the postman.)

It can/could only be Steve. He’s the only one with a key. (= I’m sure it is Steve.)

If we believe that something is possible or probable, we use could, may and might

(▷ Unit 31.1):

He always wears smart suits. He could be a businessman.

‘Why isn’t she here yet?’ ‘I don’t know. The train may be running late.’

We use might for tentative (less direct) questions:

Might the losses be due to currency fluctuations?

In informal speech we can make the speculation stronger by adding well:

Let’s call the hospital. There may well be some news now.

We also use couldn’t to say that something is unimaginable because we are unwilling to do it: I couldn’t pick up a spider; they terrify me.
2 Present and future expectation

We use should/shall/ought to/ought not to to express an expectation - we expect an action to happen now or in the future because of our prior knowledge or the current circumstances:

*The plane took off on time so it should/ought to be landing about now and there shouldn’t/ought not to be any delays.*

*There shouldn’t/ought not to be problems with traffic at that time of the evening.*

We rarely use should to ‘predict’ a negative (unpleasant) situation. We use will (Unit 26.1):

*There should be problems with traffic at that time. The roads should be awful.*

✓ There’ll be problems with traffic at that time. The roads will be awful.

3 Past speculation

We can make informed guesses about an action or situation in the past, using a modal:

*I’m not sure where Susie is. She could have left early.*

Someone might have been taking money from the till.

If we strongly believe that something was true because we have evidence, we use must + have + past participle (simple or continuous form):

*There was a terrific noise last night. It must have been an explosion.*

I couldn’t wake you this morning. You must have been sleeping really soundly.

Note the difference between the two past forms must + have + past participle and had to:

[Deduction] But Lawrence is such a well-known author. You must have read something by him!

[Obligation] Yes, I have. Unfortunately, we had to read several of his books on my university course.

If we strongly believe that something was not true because of evidence, we use can’t or couldn’t + have + past participle:

*She can’t have fixed the computer, it’s still not working properly. (= I’m sure she didn’t fix it.)*

*They couldn’t have been expecting such a huge turnout at the funeral.*

We often use can’t + have or couldn’t + have to express surprise or disbelief:

*She couldn’t have done it; she’s such a nice woman.*

You can’t have been waiting for long - I only went out five minutes ago!

We do not use mustn’t + have + past participle:

✘ Susie mustn’t have left yet, her bag is on the chair.

✓ Susie can’t/couldn’t have left yet; her bag is on the chair.

If we believe that something possibly or probably happened, we use may (not) or might (not) + have + past participle:

*We’d better hurry – the hotel might have given our room away by now!*

*Students applying for this course may have studied maths at degree level.*

In informal speech we can make the speculation stronger by adding well:

*We’d better phone them, they might well have had some news by now.*

(= They’ve probably had some news.)

We didn’t interrupt because they may well have been having a serious conversation.

4 Past expectation

We use should (not)/ought (not) to + have + past participle to talk about an action that we expected to happen in the past:

*I don’t know where our main speaker can be. He should/ought to have arrived hours ago.*

(= We expected him to arrive hours ago.)

*After a long illness, his father’s death shouldn’t/ought not to have come as a surprise.*

(= The death was expected.)

We can also use this pattern with the continuous form:

*The keys should have been hanging outside the apartment – we couldn’t get in.*

1. **GRAMMAR IN USE** Write one word (or a contraction) in each gap. Do not use the same word more than once. Listen and check.

   1. A: Is that Ayrton Senna, the racing driver, in the car over there?
      B: It (1) ...... be. He died in 1994. It (2) ...... be his nephew, Bruno. He’s driving racing cars now.

   2. A: Excuse me. Is that the train to York?
      B: It (3) ...... be, I’ll check. Yes, it says ‘York’ on the window!
      A: How stupid! I didn’t notice that. Do you know what time it leaves?
      B: It (4) ...... be leaving any minute now.

   3. A: Have you seen my car keys?
      B: No. (5) ...... they still be in the car?
      A: I haven’t used the car today, but I need to now. I’m going into town.
      B: You’re kidding! On a Saturday afternoon? The town centre (6) ...... be heaving with people!

   4. A: Is that the phone? At this time of night? Who is it?
      B: It could (7) ...... Steve in Australia. It’s the middle of the day there. Hello, Steve?

   5. A: I’m phoning from CTC News. Would it be possible to interview the ambassador this afternoon?
      B: I’m afraid the ambassador (8) ...... be available at such short notice, but I’ll ask his secretary.

   6. A: Can you record the football match for me? I’m not sure when my meeting’s going to end and I (9) ...... not be home in time.
      B: Of course. Do you know when you’ll be back?
      A: Not really. But I (10) ...... be back later than nine.

2. Write four statements making deductions about each picture. Use the words and phrases in brackets, as in the example.

   Mr and Mrs Hopkins are waiting for their daughter.

   0. (on/train) She can’t ... have been on the train ...
   1. (miss/it) She must ...
   2. (baby/mother) She ...

SPORTING DISASTERS

Heysel Stadium

ONE OF THE WORST disasters in the history of football took place in May 1985 at the Heysel Stadium in Brussels. It was the European Cup Final between Liverpool, UK and Juventus, Italy, and in many ways it was a disaster waiting to happen: the stadium was over fifty years old and in quite bad condition; some parts of it were said to be ‘crumbling’. The Liverpool manager had wanted the Cup Final to be moved to another stadium. In addition, there was a history of violence between Liverpool and Italian teams, though not Juventus. The stadium was crowded, and although the Liverpool and Juventus fans were seated in different parts of the stadium, the ‘neutral’ section, where tickets were allocated to Belgian supporters, actually contained a lot of Juventus fans.

As the match was about to start, Liverpool fans charged the ‘neutral’ section, causing a large number of mainly Juventus supporters to flee to the back of the stand, against a wall. The wall collapsed, killing 39 fans and injuring hundreds more. Despite the awful disaster, the match went ahead after the captains appealed for calm, and Juventus won 1–0.

As a result of the disaster, twenty-seven fans were arrested, most of whom were from Liverpool, and fourteen were given three-year suspended sentences for involuntary manslaughter. English football clubs were banned from playing in Europe for five years, and Liverpool was banned for six. Measures were taken to stop football hooliganism in England and make football a safer game to watch; these measures were successful and football is now a spectator sport for families again. No more football matches took place at Heysel Stadium, although it continued to host athletics events, and it was demolished in 1994.

0. The owners of the stadium ..... its maintenance.
   A. should have neglected  B. must have neglected  C. had to neglect
1. The wall at the back of the stand ..... have been strong enough.
   A. can’t  B. couldn’t  C. shouldn’t
2. The organisers ..... that there would be only Belgian fans in the neutral section.
   A. might think  B. could think  C. might have thought
3. The Juventus fans ..... terrified.
   A. must have been  B. could be  C. might well have been
4. The football teams ..... very brave to continue with the match.
   A. should have been  B. must have been  C. should be
5. Some of the fans who were arrested ..... from Liverpool.
   A. couldn’t have been  B. didn’t have to be  C. can’t have been
6. Liverpool Football Club ..... out of European competition for a long time.
   A. had to stay  B. must have stayed  C. should have stayed
7. Football matches in England ..... a lot more pleasant now.
   A. can be  B. must be  C. should have been
8. They ..... have expected trouble at athletics meetings.
   A. mustn’t  B. shouldn’t  C. can’t
1 Present and future obligation

We usually express obligation in English with must or have to:
You must arrive in good time for the meeting tomorrow. The Chairman will be there.
Everyone has to register their name and address in order to be able to vote.
We often use must and have to with a passive verb:
Democracy must/has to be seen to work.
We use have to when it is grammatically impossible to use must, i.e.
• with an infinitive: It’s difficult to have to stand by and watch your child in pain.
• with a participle: Having to listen to garage music all evening is my idea of misery!
We usually use don’t have to/don’t need to when there is no obligation:
You don’t have to/need to pay to visit most museums in the UK. (Entrance is free.)
The difference in meaning between have to and must can be small. We usually use have to for obligations we see as outside our control, e.g. rules imposed by an authority:
We have to pay if we want to put luggage in the hold. (It’s a rule of the airline.)
We often use must to express an obligation imposed by the speaker:
I must get up earlier – I waste so much time in the mornings.
Must is commonly used
• to give a strong personal opinion: I believe people must vote at elections.
• to impose an obligation on oneself: I really must try to get fitter.
• to give instructions, often in writing and often with a passive verb:
The electricity must always be switched off before repairs are attempted.
We do not often use you must for obligation in face-to-face conversation as it can seem impolite:
[You must listen to what I’m saying.] ✔ Please listen to what I’m saying.
It is more commonly used in talking to children or by people in authority:
You must always look both ways before you cross the road. You must focus more.
You must in recommendations ➤ Unit 36.4
We use have got to for external obligation like have to, but it is more informal than have to and more common in speech than in writing. (It is rare in American English):
What time have we got to be at the airport tomorrow?
[Claim forms have got to be date-stamped before payment will be made.]
✔ Claim forms have to be date-stamped before payment will be made.
We often use should and ought to as they express a subjective (often moral) obligation felt by the speaker, but the obligation is weaker than with must:
You should treat your neighbours with more respect.

FORMALITY CHECK | Questions with ought to are rare and formal. We prefer to use should:
[Ought we to leave a tip?] ✔ Should we leave a tip?
We can use *must* and *should* to express obligation in the future:
*I really must get to the dentist next week. You should pay the amount due by 25th October.*

If the obligation is external, we use will have to or will need to:
*The children will have to stay at home next week while the school is closed for building work.*

We'll need to get our visas sorted out or we won't be able to stop over in the States.

We use won't have to, won't need to or needn't when there is no future obligation:
*With this food processor, you won't have to/won't need to/needn't peel or chop any more.*

2 Present and future necessity

We can use *need* to, *must* and *have to* to express a necessity that results from things other than just commands, rules or laws, or to show that something is very important:

All living beings need to/must/have to take in sustenance in order to live.

*I really need to/must/have to be going now. I'm meeting John in half an hour.*

We'll need to set up a more intensive training regime.

If we want to express a necessity without suggesting who should deal with it, we can use need + -ing form:
*That poor bird – his cage really needs cleaning.*

This use has a passive meaning and is similar to the passive infinitive (Unit 62.3):
*That poor bird – his cage really needs to be cleaned.*

We use don't need to/needn't for absence of necessity felt by the speaker:
*We needn't/don't need to put the heating on yet; it's not cold enough.*

3 Past obligation and necessity

We use *had to* when we talk about an obligation or necessity in the past:
*The staff and students at the university had to evacuate the campus.*

Because of Steve's career we've had to move twice in the last year.

We use *should/ought to* + have + past participle for an unfulfilled obligation in the past:
*You really should/ought to have registered before the term started.* (But you didn't …)

⚠️ We do not use *must* to express this type of obligation *(must + have Unit 32.3):*

*The record was finally released eighteen months later than it must have been.*

*The record was finally released eighteen months later than it should have been.*

We use didn't have to/didn't need to when there is no obligation in the past:
*You didn't have to/didn't need to finish the washing-up. I could have done it.*

Notice these two past forms of *need*; they have different meanings:
*We didn't need to take warm sweaters, as the weather was so good.*

(We don't know if the speaker took warm sweaters or not.)

*We needn't have taken* warm sweaters. We could have used the space in our luggage for more books! *(We know that the speaker took warm sweaters.)*

4 Other ways of expressing obligation

We can use be to for an order from a person in authority (Unit 27.5):
*The members of the jury are to report to the judge's chambers immediately.*

We use *be supposed to* for a lesser obligation and one that is frequently ignored:
*We're supposed to leave our textbooks at school, but we often take them home.*

We use *be liable to* for obligation (often in a legal context):
*Anyone causing damage will be liable to pay for all necessary repairs.*

**FORMALITY CHECK** We use be obliged to (be obligated to in American English) or be required to in formal contexts:
*We're obliged to contribute twenty-five percent of the costs of the repairs.*

*Motorists are required by law to wear seat belts in the European Union.*

BETH Hello. Reception said that you wanted a word with me.

LISA That's right. I'm interested in joining your gym. What (1) ____________ do?

BETH Take a seat. First, you (2) ______________ fill in this form. It asks for details about you and your state of health. We want to be sure that you’re fit enough to use the gym.

LISA OK ... I have a slight problem with one knee. I twisted it a few weeks ago.

BETH Well, you really (3) ______________ tell the instructor about that, then he’ll make sure that your fitness programme takes account of it.

LISA Fitness programme?

BETH Yes. If you join, you (4) ______________ have an induction session with one of our fitness instructors. He’ll design a programme suited to your level of fitness.

LISA Oh, that’s good. Now, it’s £50 a month, isn’t it?

BETH Well, yes, but that’s the special rate if you take out an annual subscription, so you’re (5) ______________ join for the whole year to get that rate. Otherwise it’s £60 a month.

LISA I see. Yes, I think I’ll join for the year. Is there anything else I should know?

BETH Let’s see ... There are some rules, but they’re pretty obvious. Of course, everyone (6) ______________ wear appropriate clothes and footwear. There are lockers outside the gym, as you’re not (7) ______________ take anything in with you, but we don’t apply that rule very strictly. You’ll probably want to take a towel and a bottle of water in with you anyway: you (8) ______________ drink plenty of water while you’re exercising, to prevent dehydration.

LISA Yes ... Are there any restrictions, like (9) ______________ book time ahead?

BETH No. You can use the gym whenever it’s open. Obviously, if you think a piece of equipment isn’t working properly and (10) ______________ repairing, tell an instructor. Also, for your own good, you (11) ______________ tell us if you feel unsure about how to use a particular machine.

LISA Of course. Now, the receptionist said I (12) ______________ provide proof of my address, but I’m afraid I don’t have anything on me at the moment.

BETH That’s OK. Bring it next time you come.

4 Rewrite the underlined sections in the dialogues to use an appropriate modal verb or other way of expressing obligation. Sometimes more than one answer is possible.

1 A Is it advisable to carry identification with me here?
   B ______________ to carry identification. The police insist on it.

2 A What time is it necessary for me to arrive for the exam?
   B ______________ to get there by 9.45.

3 A Was it necessary to learn the language when you were in China?
   B Yes, ______________ to learn some as English wasn’t widespread.

4 A Was the holiday apartment in France well-equipped?
   B Yes, it was. ______________ took our own towels and things but it wasn’t necessary.
Prohibition and criticism

1 Present and future prohibition
We use must not (usually mustn’t) to express a prohibition (something not allowed) imposed by the speaker or writer. Because you mustn’t is so strong, it is mainly used by people in authority:
Remember that you mustn’t remove patient files from the surgery; they’re confidential.
Stop it! You mustn’t pull on people’s skirts like that. (adult to child)
To express a less strong, often moral prohibition, we use shouldn’t or oughtn’t to.
The negative of ought to is oughtn’t to or ought not to, but we prefer to use shouldn’t:
You really shouldn’t/oughtn’t to speak to your mother like that!
To express prohibition by an external authority we often use other modal verbs or non-modal expressions. Mustn’t may appear too strong in these situations.

GENERAL  Doctors can’t/aren’t allowed to give drugs to shorten life.
          Smoking is prohibited/forbidden on the premises.
          It is prohibited/forbidden to smoke here.

FORMAL  Hotel guests may not use the pool after 11 p.m.
This is similar to refusing permission (➤ Unit 36.1).

It is possible, though not common, to use must not + have + past participle for a prohibition in the present which relates to an action or situation in the past:
This mortgage is for first-time buyers only. Applicants must not have owned a property previously. (The owning of property is in the past, but the prohibition is in the present.)

We usually use won’t be allowed to or can’t to express prohibition in the future:
Let’s eat before we go. We won’t be allowed to/can’t take food into the auditorium.

2 Past prohibition and criticism
We use couldn’t or wasn’t/weren’t allowed to for prohibition in the past:
They couldn’t watch the film because they were too young.
Journalists were shown the disused buildings but they weren’t allowed to enter them.

These forms are often used for laws in the past:
In those days, women and criminals couldn’t/weren’t allowed to vote.

We use shouldn’t/ought not to + have + past participle to criticise a past action, or the affirmative form for the fact that something did not happen:
You shouldn’t have driven through that red light. You could have caused an accident.
You’re late! You should have been here half an hour ago!

⚠️ We don’t use must to express criticism, as this form expresses logical deduction
(➤ Unit 32.3): [You must have been here half an hour ago.]

We can use might/could + have + past participle to make a weaker criticism:
You might/could have told me about the party!
(= You had the chance to tell me but you didn’t.)

Note that we stress the past participle when we criticise. Compare:
You might have told me about it!
(= You didn’t tell me and I would have liked to know about it.)
You might have told me about it. (= Perhaps you told me; I’m not sure.)

   **MOUNT PLEASANT TENNIS CLUB**

   Dear New Member
   We are delighted to welcome you to Mount Pleasant Tennis Club. Attached are the rules and conditions of membership. Please sign and date the final page to indicate your acceptance of the rules.

   In addition to the rules above, we would like to draw your attention to the following:
   - We are open all year round, though members (1) may not / forbidden to use the courts on tournament weekends.
   - Members (2) should / could not normally bring guests without prior permission, but this is acceptable from November to March, when the club is less busy.
   - Please remember to wear the correct footwear – you (3) can’t / won’t be allowed to play in unsuitable shoes.
   - We provide lockers for personal belongings – the club (4) must not / cannot accept responsibility for valuables left outside the lockers.
   - Members (5) ought / may not play competitive tennis for another club without written permission. Please note also that members who represent the club in competitions (6) must not compete / must not have competed for another club within the previous six months.
   - Finally, may we remind you that any member who holds or has held professional status (7) may not / must not represent the club in a tournament. Until recently ex-professionals (8) couldn’t have joined / were not allowed to join the club, and while we have relaxed that rule, tournaments are still for amateur players only.

2. Complete the second sentence so it has a similar meaning to the first. Use three to six words, including the word in brackets, as in the example.

0. We advise passengers to keep all their belongings with them at all times. (should)
   Passengers ............... should . keep all their belongings .................. with them at all times.

1. We expected our host to pay for everyone’s drinks, but he didn’t. (should)
   Our host ................ ................... everyone’s drinks.

2. It was illegal for women to own property in many societies 100 years ago. (were)
   Women .................. property in many societies 100 years ago.

3. I wish you had asked me before you borrowed my camera. (might)
   You .................. before you borrowed my camera.

4. You are not allowed to use mobile phones in the intensive care ward. (is)
   The use of ...................... in the intensive care ward.

5. It isn’t right for people to be punished for something they can’t avoid doing. (ought)
   People ....................... for something they can’t avoid doing.

6. It is essential that candidates have not applied for the same post previously. (have)
   Candidates ...................... the same post previously.

7. The visitors weren’t allowed to leave the building until the panic had subsided. (could)
   The visitors ...................... the building until the panic had subsided.

8. It was wrong of you to leave the matches within reach of the children. (not)
   You .................. the matches within reach of the children.
1 Present and future certainty

When we believe something is certain, but we don’t know it as a fact, we use will/won’t:
Jim’s coming. He’ll be on his way now.
‘It’s five o’clock. Janet’ll be in Moscow now.’ (based on our experience of travel times)
‘I hope she’s taken some winter clothes because it won’t be warm at this time of year.’

For something ongoing, we use will/won’t + be + -ing form:
Jason knows his successor will be having a hard time in the job. (based on Jason’s experience)

If we know something as a fact, i.e. we have independent proof, we use the present simple, or, for something ongoing, the present continuous:
Janet’s in Moscow. She called us from her hotel.
Jason has heard from his successor. He knows she’s having a hard time in the job.

Sometimes we wish to make a prediction about the future that someone made in the past.
For this we often use would/wouldn’t as the past form of will:
We had to hurry to get him to the hospital. It would be too late otherwise.

This is similar to the use of would in reported speech (► Unit 51.5):
I’m sure the Lions will win the rugby series.’ — She was sure the Lions would win the series.

2 Past certainty

To refer to something which we feel certain has happened (but do not actually know), we use will + have + past participle:
We sent the invitation on Monday, so they will have received it by now.

This is similar to must + have + past participle (► Unit 32.3):
We sent the invitation on Monday, so they must have received it by now.

We use won’t + have + past participle to refer to something which we feel certain has not happened:
We sent the invitations by second-class post. They won’t have received them yet.

We do not use mustn’t in this way, but we can use can’t:
× We sent the invitations by second-class post. They mustn’t have received them yet.
✓ We sent the invitations by second-class post. They can’t have received them yet.

3 Present habits and routines

We often use will/won’t to talk about habits and routines that have become predictable:
Every lesson is the same: he’ll sit down, get his books out and then he’ll start giving us instructions. He won’t greet us or show any interest in us.

We can extend this use of will to talk about attitudes and characteristics:
The public will always side with the nurses in any dispute. (The adverb is often stressed.)
The dominant male in this species will not tolerate the presence of other males.

But when we state a simple fact, we prefer to use the present simple:
The public always sides with the nurses in any dispute.
The dominant male in this species does not tolerate the presence of other males.
We can use will, or the present simple, to talk about aspects of capacity or ability:
*The Olympic stadium in London will hold/holds 80,000 people.*
*This model will do/does 0 to 100 kilometres per hour in eight seconds.*

In speech, we use will (not the present simple) to describe an annoying habit or to make a criticism: *We enjoy going out with Frank and Carol, but they will argue in public!*

We do not contract will when we use it in this way – we stress it:

× Geoff’ll leave the lights on when he’s last out of the office.
✓ Geoff will leave the lights on when he’s last out of the office!

Similar use of present continuous ➤ Unit 20.2

Pronunciation ➤ 1.10
We often use will/won’t to talk about inanimate objects:
*Whatever I do, my car won’t start first time on cold mornings.*

4 Past habits and routines
We use would/wouldn’t to talk about habits in the past (➤ Unit 21.5):

Every lesson was the same: he’d sit down and get his books out, then he’d start giving us instructions. He wouldn’t greet us or show any interest in us.

In speech, we also use stressed would/wouldn’t to criticise or talk about annoying habits in the past:

*When Alan was a toddler he would cling on to me whenever a stranger came into the room.*

However, if *would* is followed by an adverb, we often stress the adverb instead

*I miss Dad, even though he’d always tell me how to run my life!*

*My boss was awful: he’d invariably find something for me to do at five o’clock.*

Similar use of past continuous ➤ Unit 21.2

We can use would/wouldn’t to talk about inanimate objects:
*The car would never start on winter mornings when we were in Sweden.*

5 Present and future willingness
We use will to express our agreement to do something. It means ‘be willing to’:

Jim will act as referee today since Martin can’t make it.

We can use will/won’t in the if clause of a first conditional to make a polite request:

*If you’ll take a seat for a moment, Mr Franks will be with you soon.*

(= If you are willing to take a seat ...)

Requests ➤ Unit 36.3

We use won’t/shan’t to express refusal to do something:

*The Director’s secretary won’t book my flights. She says it isn’t in her job description.*

6 Past willingness
We use would/wouldn’t to show willingness or refusal in the past. We use would (positive only) to refer to general willingness (i.e. a habit):

Dad would always help us with our maths homework.

We don’t use would to express willingness to do something on a single occasion in the past but we can use would not for refusal on a single occasion in the past:

× The tour guide was very helpful. She would contact the Consulate for me when I lost my passport.
✓ The tour guide was very helpful. She contacted/offered to contact/was willing to contact the Consulate for me when I lost my passport.
✓ The shop assistant wouldn’t change this jumper for me, even though I hadn’t worn it.

3 **GRAMMAR IN USE** Rewrite the underlined parts of this phone conversation, using will, won’t, would and wouldn’t, as in the example. ♦3.15 Listen and check.

**JAKE** Hi, Alice, how nice to hear from you!

**ALICE** Actually, Jake, I’m phoning to ask you for some advice.

**JAKE** I’ll help you if I can, of course.

**ALICE** Your mother receives help from the Council, doesn’t she? Can you tell me what 
(1) they agree to do and what (2) they don’t agree to do for older people?

**JAKE** Yes, of course. Mum has a home help. She comes three times a week.

(3) She’s perfectly happy to do light cleaning and (4) she’s willing to get the 
shopping, but (5) she refuses to do anything heavy.

**ALICE** That’s fair enough. What about cooking?

**JAKE** Well, when she first started (6) she was happy to prepare supper when she came, 
but she stopped that after a few weeks.

**ALICE** Why was that?

**JAKE** You know my mum. (7) She insists on saying exactly what she thinks. 
Apparently, the home help used to make vegetarian food and Mum didn’t like it, 
so (8) she refused to eat it. Why are you asking, anyway?

**ALICE** It’s Dad. He can’t move around very easily now. The neighbours are great, 
(9) they make a habit of popping in but (10) he’s unwilling to ask them for help.

**JAKE** Mmm. You can understand that.

**ALICE** Oh, but he’s so impatient. I take him to the shops once a week, but yesterday 
(11) the car refused to start and I was about half an hour late. (12) Was he willing 
to wait for me? No, (13) he insists on trying to cope by himself!

He went to the shops and collapsed on the way there.

**JAKE** Oh dear. It’s a worry, isn’t it? Look, if (14) you don’t mind waiting for a moment, 
I’ll look up the phone number for the right person at social services.
36 Other uses of modals

1 Asking for and giving/refusing permission

The choice of modal verb for permission depends on the formality of the situation and how tentative or unsure the speaker is about the response.

- We use can’t to refuse permission that is subject to external authority (► Unit 34.1): You *can’t smoke in any public buildings*. (The law doesn’t allow it.)
- To describe general permission in the past we use *could/couldn’t*: *In the 1950s British children could leave school at the age of fourteen.*
- But we use *was allowed to* for permission on a specific occasion in the past: *I could bring a friend with me.* ✓ *I was allowed to bring a friend with me.*

2 Suggestions

We can make suggestions in several ways:

- *We can* try that new café. *Shall* we try that new café?
- *Let’s* try that new café, (shall we?) *We could* try that new café.

- We can use can/could always for an alternative, or more tentative suggestion: *We could always go to the Italian place.*
- We use *would* if we want to be more tentative or distant: *It would be a good idea to get together one evening.*
- ‘Why don’t you come to dinner on Sunday?’ ‘That *would* be nice. I’ll let you know.’
- We can use *could* to make a tentative suggestion that another person does something: *You could lose a little weight, perhaps.* (tentative)

To mean ‘there is no better choice available’, we can use the phrase *might as well*: *Now the children have left, we might as well sell the house and get something smaller.*

To ask for suggestions (or advice), we can use *shall* with a question word (► Module 6 Before you start):

*What shall we do about Tom if he doesn’t get into university?*
3 Offers and requests

</tr>
</tbody>
</table>

We can use will or won't when we offer something to another person:

*Will you have some more cake?* (neutral)

*Won’t you have some more cake?* (more encouraging)

We use the question forms of *would* or *could* to make requests tentative or polite, and *You might* ... to request things of people we do not know so well:

*Would you lend me the car tomorrow night, Dad?* (tentative)

*Could you fill in this form, please, sir?* (polite)  *You might ask Mr Salmon to call me later.*

We can make a request more insistent by using *will you* as a question tag (► Unit 79.2):

Come and look at this, *will you?* (We do not expect the answer to be ‘no’.)

4 Recommendation and advice

We use *must/mustn’t* for strong recommendations and advice:

*You really must read* Michael Connelly’s latest book. *It’s stunning!*

*You mustn’t blame* yourself. *It wasn’t your fault.*

*Should* or *ought to* are less emphatic:

*Children ought not to spend* long periods in front of a computer screen.

The underlying shift in public opinion *ought not to be exaggerated.*

*Had better (not)* expresses the best thing to do in a particular situation. It often has a sense of urgency: *Your dog had better not dig up my rose bush again!* (threat)

*If the burglars took your keys, you’d better change* the locks. (warning)

5 Orders, instructions and promises

We use *will* and *shall* for orders, formal instructions and written rules:

*The judges’ decision will/shall be final. The secretary shall minute the proceedings.*

We use *will* to make promises:

*My government will reduce unemployment.*

We also use *will* when we make a spontaneous decision (► Unit 27.1):

*That’ll be Josie – I can’t take her call now.* ‘Don’t worry, I’ll tell her you’ll call back.’

6 Expressing desires, preferences and disagreements

We often use *would* + infinitive with *to* with verbs of liking and preference (like, love, prefer, etc.) to express desires and preferences:

*We’d love to come* to your wedding on 6th September. *Thank you for the invitation.*

*I’d prefer to lose* weight by a tried and tested method than by a new trendy diet.

*I would like you* to listen to me when I’m talking! (use with an object)

We can use *would* with rather/sooner to express a preference (► Unit 40.4):

*Our delegates would rather not stay* at the conference centre.

We can use *would/wouldn’t* to show disagreement in a polite way:

*I wouldn’t say that. I wouldn’t go that far.*

ALAN OK, let’s discuss next week’s national championships. I can only send three reporters, so (1) we must / we’d better discuss who does what. Yes, James?
JAMES I’d (2) love / rather to cover the diving. I’m fascinated by diving.
ALAN OK, if no one else objects? Right, well, I think you (3) should / ought to cover the synchronised swimming as well, as it’s in the pool next to the diving.
JAMES Oh, OK, if I have to. Would anyone else like to, though?
ALAN Bad luck, James, it’s yours. And (4) you hadn’t better / you’d better not let your lack of enthusiasm show when you’re there! Now, I’d like one of you (5) focus / to focus on the individual events in the main pool. Any takers?
EMILY I’m happy to do that, but I was going to ask, (6) could / may I have the Friday off? My cousin’s getting married.
ALAN Probably, but let’s sort out the championships first. That leaves the third reporter to cover the team events and to act as anchor for us.
KIERAN (7) I would / I’ll do that. It sounds interesting, but there aren’t many team events, are there?
EMILY We (8) should / could always share the main pool reporting, Kieran.
DEBBIE Er, Alan, before we go on ... I was wondering, I’m not sure, but (9) can / might suggest something?
ALAN Yes, what is it, Debbie?
DEBBIE Well, shouldn’t we check what the Daily Herald is doing? We don’t want them to get better coverage. They seem to be doing better than us at the moment.
ALAN I (10) won’t / wouldn’t say that, but they do have more money than us, I’m afraid. Debbie, call your friend on the Herald, (11) will / won’t you, and see if you can get any information? Right, we’ll go with those suggestions. (12) Can / Shall we go on to tomorrow’s front page now?

I'LL NEVER FORGET the day my life changed. It was a normal day – in those days I (1) would / should do my homework straight after school so that I could go and listen to music at Janice's after dinner.

'(2) May / Can I go to Janice's now, Mum? I've finished my homework.'

'No, not yet, love. Wait till your Dad's home. Remember, it's Thursday,' said Mum.

Of course. (3) He'd / He'll be visiting my grandmother. He did that every Thursday after work. She lived in a cold, draughty cottage on the moors. Mum and Dad wanted her to move in with us, but our house was very small, and she (4) wouldn't / won't. They knew that the cold winter months (5) would have hastened / would hasten her end, but she was a stubborn old woman who (6) might / would insist on her independence.

'(7) Wouldn't / Won't it be nice if we had some money? We could buy a big house and Granny could have a flat of her own in it. I hate being poor.'

'Oh, pet, I (8) shan't / wouldn't say we're poor. We've got a roof over our heads. Anyway, you (9) might / could as well get used to it; it isn't going to change.'

Mum (10) won't / wouldn't even daydream about Dad's chance of success with his inventions. It really annoyed me! But I thought I (11) should / better be nice, as she seemed a bit upset. '(12) Shall / Will I make a nice cup of tea?'

At that moment, the door opened and Dad walked in, waving a letter. 'Put on your coats, we're all going out tonight. They've bought my idea, Mary. We're rich!'

Twins left high and dry

IF YOU WATCHED the recent Oxford and Cambridge boat race, you (1) noticed the Winklevoss twins, Cameron and Tyler, in the Oxford boat. The two have always rowed together, and competed in the Beijing Olympics but (2) manage only sixth in their class on that occasion.

The Winklevoss brothers are very rich, as the result of a lawsuit settled out of court, but in reality they (3) be billionaires now. In the early 2000s, when the twins were studying at Harvard, they (4) often talk about setting up a social networking website for students. They (5) starting one, named ConnectU, but as the pair were busy studying and rowing, they (6) devote the time necessary to developing the site, so they decided they (7) employ someone else to help them. After three months Mark Zuckerberg stopped working with the twins and launched his own social networking site – Facebook – which is now worth over $4 billion.

Understandably, the twins were convinced Zuckerberg (8) created the site without their initial input. Although the twins have settled out of court, there are still some messy arguments going on which (9) continue for some time.

Did it affect their performance in the boat race? Well, the Oxford team started well but (10) hold out against a battling Cambridge team, who sealed an exciting victory.

Conditionals

1 Conditional sentences usually consist of two clauses: a conditional clause (or if clause) and a main clause (or result clause) which is dependent on the conditional.

2 We usually form conditional sentences in one of two ways:

   if clause main clause main clause if clause

   If I had a car, I would take you. I would take you if I had a car.

If we put the if clause first, we usually separate the clauses with a comma.

3 There are four basic conditional sentence patterns where our choice of tense depends on
   • the time of the condition (past, present or future)
   • how possible or impossible we think the event is.

| zero      | possible at any time, but most commonly in the present | If your car is old, it probably needs a road test. If she made a new dish, she tried it out on friends straight away. |
| condition |                        | |
| first     | possible in the future | If we don't water those plants, they'll die. |
| second    | impossible in the present | If my eyesight was perfect, I wouldn't need to wear these glasses. |
| conditional | possible (but unlikely) in the future | If we were rich, we'd buy a house in the Caribbean. |
| third     | impossible in the past | If you had answered the door, she wouldn't have gone away again. |

4 We can make questions: If you lost your passport, what would you do?

5 In conversation we often use only the main clause; the if clause is implied: Actually, it would be pretty difficult. (if we did as you asked)

wish/if only

1 We use wish/if only + past simple to express a desire for something to be different in the present. The desire can be for something which is actually impossible:
   I wish I knew more about art. (= I don’t know much about it, but I would like to.)
   If only we were young again. (= We want to be young, but we know this is impossible.)

2 We use wish/if only + past perfect to express a regret about the past:
   If only I hadn't left the car unlocked.

The 'unreal' past

The 'unreal' past describes the use of past tenses after certain expressions, e.g. if only, it’s time, to describe things in the present, past or future which are imagined or unreal:
   If only I was thin. (= I am not thin but I would like to be thin.)
   It's time you went to the doctor about that cough.
2 Read the article and identify the conditional and the unreal past.

MANY PEOPLE believe that the world’s climate has started changing due to the increased carbon in the atmosphere. Some scientists estimate that levels of carbon are rising by 2.5 percent a year. If we don’t do something about it now, there may be catastrophic changes in global weather patterns, leading to rises in sea level, severe storms and droughts.

If only we hadn’t spent the last two hundred years chopping down forests, burning fossil fuels and filling our atmosphere with carbon from factories, power stations and cars!

If and alternatives; present and future conditions

1 if and alternatives to if

There are several conjunctions we can use instead of if:

<table>
<thead>
<tr>
<th>Conjunction</th>
<th>Use</th>
<th>Example</th>
</tr>
</thead>
<tbody>
<tr>
<td>provided/providing (that) so/as long as only if on (the) condition (that)</td>
<td>to emphasise that the condition is necessary to the result.</td>
<td>Expenses will be reimbursed on the condition that receipts are supplied. Provided you pay the extra fee, we guarantee a sea-view room.</td>
</tr>
<tr>
<td>even if</td>
<td>to express a condition that is unexpected in the circumstances</td>
<td>Even if they do go down with flu after they've had the vaccination, it's likely to be less serious.</td>
</tr>
<tr>
<td>whether ... or not</td>
<td>to express alternative conditions</td>
<td>They'll deliver the furniture whether there's someone to receive it or not.</td>
</tr>
<tr>
<td>In case of (+ noun)</td>
<td>to describe what you should do in a particular situation (usually formal, e.g. written notices)</td>
<td>In case of an emergency, pull the cord above the bath. In case of fire, do not use the elevator.</td>
</tr>
</tbody>
</table>

1 These conjunctions only refer to present or future conditions; we do not use them with the third conditional:
   ✗ We would've had the party there so long as they'd arranged the catering.

2 We can also say: They'll deliver the furniture whether or not there's someone to receive it.

We use in case to imagine a precaution necessary for a possible future situation. It is not the same as if. Compare:
I'll pop round later in case you're there. (I don't know if you'll be there, but I'll come anyway.)
I'll pop round later if you're there. (I'll only come if you're there.)

In conditional sentences that start with the if clause we can use then in the main clause to emphasise that the result depends on the condition being fulfilled:
If the bill is passed by both parliamentary houses, then it becomes law.

What if, suppose/supposing (that), imagine, say..., etc. ➤ Unit 82.1 but for... ➤ Unit 38.3

2 unless and negative conditions

We often use unless to express a negative condition. It means ‘except if’ and it is similar to if ... not or only if:
Unless you've got a doctor's note to say you've passed the medical, they won't allow you to go on the activity holiday. (= If you don't have a doctor's note, they won't allow you to go.)
I wouldn't go there unless I had to. (= I would go there only if I had to.)

⚠️ Unless is not always an alternative to if not, especially when the negative condition after if is contrary to known facts, and in most questions:
✗ You'd be happier unless you had such high expectations. (an unreal situation)
✓ You'd be happier if you didn't have such high expectations.
✗ What time shall we leave for the theatre unless he turns up? (a question)
We can use unless with not:
The college will offer you a place, unless your school-leaving grade is not as predicted.
(= They'll offer you a place if your grade is as predicted.)
'Are they going to sell?' Not unless they receive $1 million.'
(= They won't sell if they don't receive $1 million.)

3 Zero conditional
We use the zero conditional to talk about events or situations that can occur at any time (often regularly), and their results. We often use it for actions that always have the same result, and we can replace if with when if we are referring to a regular activity:
If you use a hot iron on nylon, it melts.
When I eat dairy products, I get red spots on my skin.
If/When you press this key, the game starts, and when you click here, it stops.
We can use modal verbs (especially can and may), the present simple, present perfect or present continuous in both clauses:
If you can read this, you're driving too close to me!
Prawns can be risky to eat if they haven't been kept at the right temperature.
If/When she's travelling abroad on business, she always phones me every evening.
We can use a similar pattern to refer to the past. We use the past simple or continuous in the if clause and the past simple in the result clause:
When they went to the movies, they always sat at the back. (when for regular activity)
Karen got a lot more done if/when she was working from home.
When we give a general instruction, we use an imperative in the result clause:
If a chip pan is on fire, throw a fire blanket on it.

4 First conditional
We use the first conditional to describe possible future events or situations and their results:
The result of the test is negative, you'll receive notification through the post.
We often use it for offers, suggestions and warnings:
I'll call the hotel if you don't have time.
Shall we go out tomorrow if the weather's good?
I'll call the police if you don't leave right now!
We can also use it for commands, but note that we use an imperative in the main clause:
If you get home late, be quiet!
Don't forget to lock the doors if you go out.
We can use the present simple, present continuous or present perfect in the if clause, and will/shall or be going to in the main clause:
If you've decided to come on the motorway, you're going to need change for the tolls.
If they're leaving early, we'll go home with Jake.
We can use modal verbs in either clause, especially can, could and may:
If the regime can keep the loyalty of the army, they may retain power.
If global warming continues, there could be an increase in extreme weather conditions.
It is usually incorrect to use a future form in the if clause:
X If the weather will be good tomorrow, we'll have a picnic.
✓ If the weather is good tomorrow, we'll have a picnic.
However, it is appropriate if will/won't refers to willingness or refusal (► Unit 35.5):
The company will impose sanctions if the workers won't abandon the strike.

FORMALITY CHECK To make the first conditional more formal and the condition a little less likely, we can use happen to, or we can omit if and use should before the subject:
If/Should you happen to be in the neighbourhood, feel free to visit our showroom.
Should you be less than delighted with our product, we will refund your money immediately.
Practice

1 Tick (√) the possible conditions and cross (×) the incorrect ones. Think about the meaning as well as the grammar.

1 We'll be able to go out tomorrow evening ...
   A if the babysitter will be available.  B so long as the babysitter can come.
   C provided the babysitter hasn't got any other plans.

2 Before we leave, we'd better turn on the automatic watering system ...
   A in case it doesn't rain while we're away.
   B if it doesn't rain while we're away.
   C provided it doesn't rain while we're away.

3 When the weather's really hot ...
   A I get a lot of headaches.  B I would get a lot of headaches.
   C I sometimes get a headache.

4 I'm sure you'd get a lot more business ...
   A unless you charged so much.  B if you didn't charge so much.
   C unless you didn't charge so much.

5 Frozen chicken isn't safe to eat ...
   A if it hasn't been thoroughly defrosted.  B if it isn't thoroughly cooked.
   C unless it has been defrosted and cooked correctly.

6 We used to walk to school ...
   A when the weather was good.  B whether it was hot or cold.
   C even if it was raining.

2 **GRAMMAR IN USE** Choose the correct words in italics. If both options are correct, choose both. [3.19 Listen and check.]

INVASION OF GIANT GRASS

There's little doubt that (1) provided / if we want to combat global warming and the effects of climate change, we (2) have / would have to find more sustainable sources of energy. Oil and gas produce harmful greenhouse gases and, of course, there is only a limited supply available. So, (3) in case / unless we act soon, we (4) run out / will run out of energy supplies. Recently, scientists have been looking at the use of fast-growing grasses as an alternative to traditional fossil fuels. These grasses can be burnt in power stations to provide a renewable source of energy. (5) So long as / if it is grown properly, grass (6) will be / is carbon neutral – that is, it does not give off more carbon than it absorbs. The idea is that farmers will grow crops for energy rather than for food. Scientists believe that if we (7) provide / provided sufficient subsidies, farmers will be happy to start growing these new crops.

There are several trial schemes under way at present, including two in the north of England. Local farmers are growing a variety known as elephant grass. (8) Whether / When it is grown in its native tropics, the grass (9) reaches / can reach a height of over 4 metres. It is a grass that grows happily in the cooler climates of northern Europe, forming thick forests that provide a welcome habitat for wildlife. One scheme is at the Drax power station in Yorkshire, Britain's biggest power plant. If all (10) goes / will go to plan, the station (11) is / will be able to cut its emissions of greenhouse gases by five percent. But not everyone is happy with the scheme. Local conservationists are worried about the impact of the giant grass on the countryside. (12) Whether / If elephant grass solves our energy needs or not, they feel it is an ugly and unwelcome blot on the landscape.
3 Write the second sentence so it has a similar meaning to the first. Use the word(s) in brackets, as in the example. Make any other changes necessary. \(\text{ Listen and check.}\)

If the sea defences hadn’t collapsed in August 2005, New Orleans wouldn’t have been flooded.

1 Forming the second conditional
We can use the past simple, past continuous or was going to in the if clause:
*If* they wanted to make her an offer, she would listen and think it over.
*If* a celebrity was staying in the hotel, security arrangements would be tightened.
We use would or a modal verb (often might or could), in the main clause:
*More research funding could be secured* if people were more aware of the disease.
We can use should + infinitive or were to + infinitive in the second conditional to emphasise that the condition is unlikely to happen:
*If the printer should break down* within the first year, we would repair it at our expense.
*If you were to listen* more carefully, you might understand a little more.

**FORMALITY CHECK** We can make this condition more formal in two ways:
• by using were, not was, after I/he/she/it in the if clause (► Unit 40.2):
  *If the programmer were familiar with this language, it would be an easy job.*
• by placing was/were (to) or should (► Unit 37.4) before the subject:
  *Were you to accept our offer, we could avoid the costs of a court case.*
  *Were it not for the sea walls, the city would be at risk of flooding.*
  *Should the tickets fail to arrive, we would arrange to have duplicates waiting at the airport.*

2 Uses of the second conditional
The second conditional has two main uses:
• to talk about an unlikely future event or situation:
  *If the result of the test were positive, we would call you within two days.*
  (We expect the results to be negative.)
  *I wouldn’t work there unless they paid me at least double.* (They’re unlikely to double my pay.)
The choice between this pattern and the first conditional (► Unit 37) often depends on how possible we believe an event to be:
**FIRST CONDITIONAL**
  *If Mike rings the travel agent tomorrow, he might get a cancellation.*
  (We believe it is likely that Mike will ring the travel agent.)
**SECOND CONDITIONAL**
  *If Mike rang the travel agent tomorrow, he might get a cancellation.*
  (We believe it is unlikely that Mike will ring the travel agent.)
• to talk about an unreal current event or situation, i.e. one which is contrary to known facts. It is therefore impossible to fulfil the condition:
  *If the police were confident of their case against Sykes, surely they would take him into custody?* 
  (The police aren’t confident of their case.)

⚠️ We don’t use unless with these unreal conditions (► Unit 37.2).
We can also use the second conditional for:
- giving advice (with were): If I were you, I would take her out of that school.
- polite requests: If you could deal with this matter, I'd be very grateful.
- desires/regrets: If we didn't have to work so hard, we could spend more time together.

3 Forming the third conditional
We use the past perfect in the if clause and would/wouldn't have or modal verbs (usually might have or could have) in the main clause:
- If we had paid our cleaner more, she wouldn't have left us.
- It might have been easier to break the news if I had known her a bit better.
- If the spy had intercepted the message, he could have averted the crisis.

We can use continuous forms in both clauses:
- If that taxi hadn't come along, you would have been waiting there for hours.
- You wouldn't have missed the turning if you'd been paying attention.

We can use a prepositional phrase (Unit 9.2) instead of an if clause:
- Don't worry, I wouldn't have done it without asking for permission first.
- But for its lack of a garden, we might have bought that house.

**FORMALITY CHECK** For a more formal or literary style, we can put had before the subject:
- Had the film been released in the summer, it might have been more successful.
- Had it not been for his quick thinking, we would have fallen into the river.

4 Uses of the third conditional
The third conditional describes an unreal or imagined situation or event in the past:
- If the sea defences hadn't collapsed, New Orleans wouldn't have been flooded.
  (But the known facts are: the sea defences did collapse and New Orleans was flooded.)
- I would have used your builder if I had managed to contact him.
  (But the known facts are: I didn't manage to contact him so I didn't use him.)

We can use the third conditional to express criticism or regret, often with could have:
- If you'd been driving more slowly, you could have stopped in time.
- I could have got the job if I'd performed better in the interview.

5 Mixed conditionals
There are several less common conditional patterns:

1. **PAST CONDITION** ➔ **FUTURE RESULT**
   - If + past simple ➔ will + infinitive/be going to
   - If they left at midnight yesterday, they will be here by lunchtime tomorrow.

2. **PAST CONDITION** ➔ **PAST/PRESENT RESULT**
   - If + past simple ➔ present perfect
   - If you gave them all your money, you've made a big mistake.

3. **PAST UNREAL CONDITION** ➔ **PRESENT RESULT**
   - If + past perfect (third conditional) ➔ would/could/might + infinitive (second conditional)
   - If your brother hadn't had that promotion, he would still be working here.
     (He did have the promotion so he no longer works here.)

4. **PRESENT UNREAL CONDITION** ➔ **PAST RESULT**
   - If + past simple (second conditional) ➔ would/could/might have + past participle (third conditional)
   - If the island were still a tourist attraction, more people would have died in the earthquake.
     (The island is no longer a tourist attraction so fewer people died.)

Practice

1 Read the statements carefully and think about the meaning. Then choose the correct words in *italics* in the explanations.

1 'If we’d missed that flight, we wouldn’t be on the beach now.'
   *We are / aren’t* on the beach now. *We missed / didn’t miss* the flight.

2 'If she wanted to see you again, she would have phoned by now.'
   *She has / hasn’t* phoned. She probably *does / doesn’t* want to see you again.

3 'If we’d taken out the warranty, we wouldn’t need to pay for these repairs.'
   *We took / didn’t take* out a warranty so we *have to / don’t have to* pay for these repairs.

4 'I’d ask for a refund if I were you.'
   I’m *talking about the past / giving advice*.

5 'We’d get a lot more light if there wasn’t a huge tree in our back garden.'
   *There is / used to be* a big tree in our garden.

6 'You’d be able to spend more time with the children if you changed to a part-time job.'
   I think you are *likely / unlikely* to change your job.

7 'If we knew more about computers, we wouldn’t have had to call the technical helpline.'
   *We had to / didn’t have to* call the helpline because we *didn’t / don’t* know much
   about computers.

8 'We’d have a less stressful life if we didn’t live so far from the office.'
   I’m expressing a regret about a *past / present* situation.

2 **GRAMMAR IN USE** Read each short text and the conditional sentences that follow it. Tick (√) the correct conditional sentences. (One or two may be correct in each case.) Put a cross (x) by the incorrect ones. Think about the meaning as well as the grammar.

**Concorde crash**

The report into the crash of the Air France Concorde attributed the disaster to a piece of metal on the runway, apparently from a Continental Airlines DC10 which had taken off minutes before.

The metal caused one of Concorde’s tyres to burst, which in turn ruptured the fuel tank on the left-hand side of the plane.

A If the runway were swept after each take-off, the disaster might have been averted.
B If the runway had been swept after the DC10 take-off, the disaster could have been averted.
C If the runway hadn’t been swept after the DC10 take-off, the disaster might have been averted.

**In last week’s** peaceful demonstrations in Burma, one demonstrator was seriously injured when she fell and was trampled by the crowd trying to flee from the water cannons. She is still in hospital in a critical condition.

A If the demonstrator didn’t fall, she might not be in hospital now.
B If the demonstrator hadn’t fallen, she might not be in hospital now.
C If the demonstrator hadn’t fallen, she might not have been seriously injured.

Over ninety-five percent of people who successfully complete our course find that they recover the course fees within a few months through income from having their work published.

A Should you not recover the fees within a year of completing the course, we would give you a full refund.
B Did you not recover the fees within a year of completing the course, we would give you a full refund.
C If you hadn’t recovered the fees within a year of completing the course, we would give you a full refund.
3 Match each if clause with two main clauses from A–L below. Then complete the main clauses, using the words in brackets, as in the example. Use modal verbs if appropriate.

South-East Asia faces new smog crisis

FOREST FIRES are breaking out all over south-east Asia. (0) Governments are not taking the problem seriously because of a lack of international pressure.

(1) Only heavy rain can avert the crisis. Unfortunately, the forecast is for the weather to remain hot and dry for the foreseeable future.

(2) The government stopped releasing pollution levels in June because it didn't want to frighten off tourists. The tourist industry has not yet suffered.

(3) The governments involved didn't take positive action after the previous disaster. Environmentalists think this is why the current crisis has happened.

(4) One of the problems is that few of the countries affected have a Ministry of the Environment, so there is no serious environmental protection.

(5) The failure of governments to build reliable water supply networks in rural areas is a major reason why current attempts to fight the fires have been so ineffective.
1 wish/if only + past simple and past perfect

We use I/we wish or if only:

- + past simple to express a desire for something to be different in the present:
  *I wish I had lots of money.* (I want lots of money but I don't have it.)
  *We wish you didn't have to leave so soon.*
  (We don't want you to leave, but we know you have to.)

- + past perfect to express a wish that something different had happened in the past:
  *I feel sick. If only I hadn't eaten all those cakes!* (I ate them and now I regret it.)
  *I wish I could see the situation through his eyes.* (We can’t.)
  *I wish I could swim but I'm terrified of water!*

We can use could + have + past participle (Unit 34.3) for a regret about the past:
*I wish your father could have been there.* (Unfortunately, he wasn't able to be there.)

2 wish/if only + would

*I/we wish/if only + would usually expresses a desire for someone to change their behaviour in the present or future. We often use it to criticise or complain about something:

*I wish you’d stop looking at me like that. It's terribly distracting.*
*I wish people would recycle their rubbish!*

We can also use this pattern with inanimate subjects for emphasis:
*I wish the sun would come out so we could take the photos.*
(The sun ‘refuses’ to come out. I want it to come out.)

We cannot use this form for an impossible change, or a change to the past. For these meanings we use the past simple (for present/future time) or the past perfect (for past time):

*If only nuclear bombs wouldn't have been invented.* (a change to the past)
*If only nuclear bombs hadn’t been invented.*

We can’t use would when the subject of the wish and the subject of the change are the same. Instead we use a past tense or could:

*If only I was more energetic.* (Subject of wish and would are the same.)
*If only I could be more energetic.*

3 Differences between wish and if only

*If only* is often more emphatic than *I wish*. Compare these examples:

*If only we'd seen you coming. We might have braked in time.* (a regret)
*I wish we'd seen you coming. We would have put out the red carpet!* (a wish)

For greater emphasis we can put a subject between *if and only* in informal English:

*If you only knew how much trouble you've caused!*

*Wish* can be followed by *that, but if only* cannot:

*If only that you'd told me about it earlier. I wish that you’d told me about it earlier.*
Practice

1 Write the second sentence so it has a similar meaning to the first. Use the word in brackets, as in the example.

0 I regret the fact that we didn’t see the band play.
   (could) I wish we could have seen the band play.

1 It’s a pity that you didn’t tell us that you were leaving.
   (wish)

2 Unfortunately, I’m not as agile as I used to be.
   (only)

3 Her constant criticism of me really gets on my nerves.
   (stop)

4 I regret not going to university when I was younger.
   (gone)

5 She would love to have a more responsible post.
   (had)

6 I’ve always wanted to have the ability to speak a foreign language really well.
   (could)

7 It’s a real shame we didn’t take any photos at that amazing party.
   (only)

8 I hate having straight hair; curly hair is so much nicer.
   (didn’t)

ALAN No, I can’t say I’ve seen any. Anyway, I (9) ……… I (10) ……… stay longer to chat but I’ve got to get back home.

MARCIE OK. Well, see you soon.
1 Subjunctives

The **subjunctive** form is the same as the infinitive (without to). It does not show any marking for tense and can be used to refer to events in the past, present or future: *The judge insisted (that) Mr Grant give evidence despite his relationship to the accused.*

We use it most often in **that** clauses after certain verbs (e.g. advise, ask, demand, insist, propose, recommend, require, request, suggest), and after adjectives (e.g. advisable, anxious, desirable, eager, essential, important, necessary, preferable, urgent, vital, willing), to express the idea that something is necessary or important: *In future cases it will be vital that each party give full disclosure prior to trial.*

We can use passive and negative forms of the subjunctive:

*Members of the committee suggested England **be excluded** from future tournaments.*

*Regulations require that officers **not enter** the crime scene without protective clothing.*

We use subjunctives

- in reported speech: *She insisted that she **pay** her own way.*

- in very formal language (e.g. legal documents):

  *We require that all receipts **be submitted** to the committee for approval.*

- in poetry: *I know not whether laws **be** right or whether laws **be** wrong.* (Oscar Wilde)

As the subjunctive is seen as rather formal or literary (it is less formal and more common in American English), British English speakers often prefer alternative forms:

<table>
<thead>
<tr>
<th>Subjunctive</th>
<th>It is essential that every applicant <strong>complete</strong> the form in triplicate.</th>
</tr>
</thead>
<tbody>
<tr>
<td>should + infinitive</td>
<td>It is essential that every applicant <strong>should complete</strong> the form in triplicate.</td>
</tr>
<tr>
<td>present simple</td>
<td>It is essential that every applicant <strong>completes</strong> the form in triplicate.</td>
</tr>
<tr>
<td>for + subject + to + infinitive</td>
<td>It is essential for every applicant to <strong>complete</strong> the form in triplicate.</td>
</tr>
</tbody>
</table>

There are some fixed expressions which use subjunctive forms:

*If he doesn’t want to see us, then so be it.* (= then let it happen)

*I’ll take it all the way to the Supreme Court if need be.* (= if this is necessary)

Long live the republic!

2 The ‘unreal’ past

After a number of expressions such as if only, it's time, what if, assuming, say, suppose/supposing, would rather/sooner, as if/though and I wish we use past tenses (active and passive) to describe things in the present, past or future which are imagined. We sometimes refer to this use of past tenses as the ‘unreal’ past.

We can use the past simple or the past continuous after these expressions to talk about the imaginary present and future:

**Present**  
*It’s time they **were** forced to clear up the mess.*   
(They aren’t being forced to clear up at the moment.)

*These kids act as if they **owned** the place.* (They don’t own it.)

**Future**  
*I wish I **was coming** with you tomorrow.* (I am not coming with you.)

We use the past perfect to refer to something unreal in the past:  
*I wish I’d never **started** this course.* (I have started it.)
Many speakers prefer to use *were* for all persons when talking about the imagined present or future, especially in more formal situations and in American English. This form is sometimes called the past subjunctive and is also used in second conditional sentences:

*If I were you, I'd think twice before refusing that offer.* (► Unit 38.2)
*If only he were a little more convincing on the economic issues.*

**Formality Check** In the above examples we can also use *was* but this is more informal.

*what if, suppose + past tense* ► Unit 82.1

3 **It's (about) time/high time (that)**

We use *it's (about) time + past tense* to say that something should be happening and isn't:

*It's time we left.* (We aren't leaving and we should be.)

*It's about time you paid a visit to your grandparents.* (You should visit them.)

*It's high time* is slightly more emphatic:

*It's high time that the voice of the people was heard in this House.*

(Their voice isn't being heard and it should be.)

We cannot use a negative after *it's (high/about) time*:

\[ \text{x It's time we didn't stay.} \checkmark \text{It's time we left.} \]

We can also use *it's time for + object + to + infinitive*:

We'd better open the gates now. *It's time for the guests to arrive.*

If we are referring to ourselves or the person we are speaking to we can also use *it's time + to + infinitive*:

*It's time to leave. I'm afraid it's time to put your books away now, children.*

4 **would rather and would sooner**

We use *would rather/sooner* with the past simple to describe preferences:

*I'd sooner you gave me a cash refund.* A credit note's no use to me.

(= I would prefer a refund. / I wish you would give me a refund.)

They are often used as a polite way to refuse permission, or make suggestions:

*I'd rather you didn't use the best china.* (= Please don't use the best china.)

*I'm not keen on the idea of staying in. I'd sooner we went out bowling or something.*

(= Let's go bowling.)

If the person expressing a preference and the subject of the preference are the same, we use an infinitive (without *to*) instead of the past tense. Compare:

*We'd sooner you spent your bonus on something useful.*

(past tense: speaker and subject are not the same)

*I'd rather spend it on something frivolous.* (infinitive: speaker and subject are the same)

*would prefer* ► Unit 36.6

5 **as if and as though**

We use a past tense after *as if or as though* to say that how something appears now does not match with reality:

*He talks to the children as though they were imbeciles.* (We know they aren't imbeciles.)

*They are acting as if nothing had happened.* (We know something has happened.)

But we use a present tense (including the present perfect) after *as if or as though* when we don't know if the appearance reflects reality or not. Compare:

*You talk about her as if you knew her.* (present tense: Perhaps you know her.)

*You talk about that film star as if you knew her!* (past tense: I'm sure you don't know her.)

We can use these expressions to be critical, ironic or sarcastic:

*It isn't as if he's in any position to pass judgement!* (= He probably isn't in a position to do this.)

Subject: Problems with other tenants

Dear Mrs Grenfell,

I am writing to you in your position as secretary of Herriot Mansions Residents’ Association in connection with the problem of residents leaving rubbish bags and bicycles in the common entrance hallway.

My wife and I have yet again been having a lot of trouble with Steve and David Brown, the tenants of flat 16 on the first floor, and we feel it is high time this persistent source of dispute (1) .................. (finally/resolve). These tenants own two bicycles which they insist on leaving in the entrance corridor. They are also in the habit of leaving rubbish bags inside the front door in the evenings. No doubt you are aware that the leases of all the flats in our building require that the entrance (2) .................. (keep clear) of obstruction at all times. The local fire officer has pointed out to me that under the building regulations the common entrance corridors to flats must be treated as if they (3) .................. (be) exits of a public building, and are therefore subject to the same restrictions as those in force in theatres, cinemas, etc. In addition, we feel the rubbish bags present a health hazard and we are anxious that this nuisance (4) .................. (stop) immediately. It’s not as though the hallway (5) .................. (be) particularly wide – in fact it is quite narrow and can be very easily blocked. Imagine the situation in a fire – we might all be trapped in our flats.

Apparently last month you told the Browns that they could keep their bicycles there for a temporary period. Well, I certainly wish you (6) .................. (not/agree) to that, because they continually use this as an excuse when we ask them to remove the bikes. I have pointed out to them that there is space to store bicycles in the back yard, although I would sooner they (7) .................. (keep) the bikes in their own flat as the presence of two mountain bikes might attract thieves. They say that there isn’t any space in their flat and I wish I (8) .................. (able) to offer them somewhere else. But, as you know, all the space in the bicycle shed is now allocated. Unfortunately, they still seem unwilling to move their bikes, and their intransigence is beginning to seem deliberate. It isn’t as though we (9) .................. (not/tell) them about this on numerous occasions. In fact it has now reached a stage where I feel I must insist that the chairman of the residents’ association (10) .................. (demand) they remove the bicycles forthwith.

As far as the rubbish bags are concerned, the local council has recommended that all rubbish (11) .................. (put) into sealed bins and left on the pavement the night before collection. There is therefore no reason why the Browns have to leave their rubbish inside the entrance. We would rather (12) .................. (not/have to/refer) this matter to our solicitors but we feel that if the residents’ association is unable to resolve the matter, we will have no alternative.

Yours sincerely,

Howard Blenkinsop

SAM Did you watch that documentary on global warming last night?
CARL Yes, it was terrifying. I almost wish I didn’t see it.
SAM If we would go on destroying the atmosphere like this, the effects will be catastrophic.
CARL You’re right. It’s high time the government does something about it.
SAM Well, they have set targets for reducing carbon emissions, haven’t they?
CARL Yes, but they’re pretty feeble. I think the government should insist that each person to take responsibility for their own carbon footprint.
SAM That’s a bit sweeping. I don’t see what individual people can do.
CARL What about turning down the central heating by a few degrees?
SAM A good idea – if only the winters aren’t so cold in this country!
CARL Well, what about cars, then? If everybody used smaller cars, there was a huge reduction in carbon emissions. Take your car, for instance – don’t you think it’s time you sell that big four-wheel-drive thing?
SAM No, absolutely not! If I won’t have that car, I wouldn’t be able to take all the kids to school. And it’s useful to have a big car in case of some of their friends need a lift.
CARL I guess so. Things must be pretty tough with four children ...
SAM Yes. Life would be a lot easier unless I had so many kids!

Sentence word order

1 Normal word order is

subject  verb  object

Pete’s dog  bit  Mike.

This has a different meaning from: Mike bit Pete’s dog.

2 In questions and after certain adverbs we usually place a verb (be, auxiliary or modal) before the subject.

Did Pete’s dog  bite Mike? Rarely have I seen such an aggressive dog!

Introductory there

1 We can use all forms of the verb be after there, including modal forms:

There were just a few customers in the store at that hour of the morning.
There must have been a thousand applicants for the post.

2 The form of be agrees with the following noun. If there is more than one noun, the form of be agrees with the first noun in the list:

There was a table and two chairs in the room. There were two chairs and a table in the room.

In informal speech we sometimes use there is with a plural noun:

There’s two ways we can do this.

Introductory it

1 It is always singular: It’s Alan and Margaret at the door.

2 We use it + be to introduce information about

- weather/environment: It’ll be cold at this time of year. It’s a nice day today.
- time/dates: It’s nearly eight o’clock. It’s Friday today.
- conditions/situations: It’s peaceful there. It was getting dark as I drove home.
- distance: It’s a long way from here. It’s about twenty miles away.

-ing forms

1 We can use -ing forms of verbs in the same way that we use nouns – as the subject, object or complement of a verb. We sometimes refer to -ing forms used in this way as ‘gerunds’:

Flying is sometimes cheaper than land travel. The whole family has taken up cycling.

Her worst habit is lying.

2 We can make a negative with not + -ing:

Not getting a refund on faulty goods is what really annoys me.

But we use no + -ing to explain that something is impossible or not allowed:

✗ There’s not smoking in this office. / There isn’t smoking in this office.
✓ Could you go outside? There’s no smoking in this office.

There’s no skiing here in the summer season. (Skiing is impossible.)
No parking. (Parking is not allowed here.)
How International Travel has Changed

ONCE THE preserve of the wealthy and privileged, flying is now available to almost anyone. The emergence of budget airlines has made international travel affordable to the masses. There were just a few hundred thousand flights per year in the 1950s, now there are something like 25 million. As a result, mass tourism has become a major economic factor for many countries. Wealth has been brought to a number of poorer nations, but there has been a downside. It has become increasingly common to see coastlines disfigured with concrete hotels, to see ancient monuments damaged by the sheer weight of visitor numbers, and to witness the destruction of natural environments.

41 Verb patterns (1)

1 Transitive and intransitive verbs
Transitive verbs need a direct object:
We spent all our money.
Intransitive verbs do not have a direct object:
They’ve arrived! The children are sleeping.
Some common intransitive verbs are arrive, come, fall, go, happen, lie, sleep, swim, wait.
Some verbs can be intransitive or transitive, for example:

Only the most skilled pilots are allowed to steer large passenger ships into Venice’s small harbour.

begin break change close continue dry finish hang
hurt move separate stand start stop tear turn

Compare:
The door opened. (intransitive) He opened the door. (transitive)
The meat burnt. (intransitive) The cook burnt the meat. (transitive)
Sometimes the two uses of a verb can have very different meanings:
He ran to catch the bus. (intransitive = moved quickly)
He ran the new software to show us how it worked. (transitive = operated)
In modern usage, some transitive verbs are used as intransitive verbs:
I don’t know why you’re bothering with those brands – they won’t sell.
And some intransitive verbs are used as transitive verbs:
In order to survive we need to grow the business by fifty percent within two years.

2 Verb + object patterns
Transitive verbs have a direct object, which can be a noun phrase or an -ing form
(with or without a prepositional phrase):

<table>
<thead>
<tr>
<th>subject</th>
<th>verb</th>
<th>object</th>
</tr>
</thead>
</table>

We discussed the problem/it (at great length).
Karl suggested practising (on the nursery slopes first).

We can omit the object after some transitive verbs if the context is clear:
Geoff was disappointed to find that he had failed (the test) again.
Some common verbs that can be used like this are: answer, ask, drink, eat, enter, fail, leave, pass, play, practise, sing, study, wash, win and write.

3 Verb + prepositional phrase
We can use a prepositional phrase after intransitive verbs:

The train departed from platform 9 – but we were waiting on platform 5.

We can also use prepositional phrases after a transitive verb + object:

<table>
<thead>
<tr>
<th>subject</th>
<th>verb</th>
<th>object</th>
<th>prepositional phrase</th>
</tr>
</thead>
</table>

He carefully removed the egg from the nest.
Pilots are allowed to steer large passenger ships into Venice’s small harbour.

We do not usually change the order of transitive verb + object + prepositional phrase, unless the object is very long:

X He carefully removed from the nest the egg.
✓ He carefully removed from the nest the three fragile blue-speckled eggs and the one chick that had already hatched.

Ash cloud disrupts European travel

FOR THE LAST WEEK a cloud of volcanic ash has been causing havoc with Europe’s aviation industry. Flights have been grounded, leaving thousands of passengers stranded. This couldn’t have happened it at a worse time as this is the final week of the Easter holidays and holidaymakers across the continent have been trying to fly them home.

The source of the cloud of ash is the Eyjafjallajökull volcano in Iceland. A few days after the eruption started it, the ash cloud arrived Europe. At first the cloud was confined to the skies over the British Isles and Scandinavia, but it over the European mainland has now spread. The fine particles of ash can enter jet engines and damage the internal parts, leading to catastrophic results.

Fortunately, flights to airports in southern Europe are continuing them. Some intercontinental flights originally destined for London, Amsterdam or Frankfurt have been re-routed to Madrid, which is still open the airport. Passengers arriving them there will be able to travel on to their final destination by road or rail.

The aviation industry is hoping that the wind direction will change it, taking the ash away from Europe. In the meantime, scientists are running test flights to assess the density of ash in the clouds. Depending on their findings, certain flight routes in the next few days may be reopened.
42 Verb patterns (2)

With its policy of affordable flights, JetBlue quickly became one of North America’s most popular airlines.

1 Verb + complement

Some verbs are followed by complements (not objects). A complement is usually a noun phrase or an adjective that identifies, describes or gives information about the subject:

- **subject** | **verb** | **complement**
- Alexander Grant is our new head of marketing.
- JetBlue quickly became one of North America’s favourite airlines.

Verbs which introduce complements often describe states, e.g. be, appear, feel, look, keep, remain, seem, sound, taste, make, or changing states, e.g. become, get, grow.

We can usually use an adjective or a noun phrase to describe the subject after these verbs:

- The **whole group** seemed very keen. Marie’s **new outfit** looked fantastic!
- That sounds a wonderful idea! Your suggestion seems the best solution.

You don’t want to remain a shop assistant all your life, do you?

However, there are some differences in the way we use complements with these verbs:

- We only use an adjective after _make_ if there is an object: **Shellfish make me ill.**
- If we use a noun phrase after _taste_ and _smell_ it describes an action, not a state. Compare: I _tasted the food_. (= an action)
  _The food tasted delicious_. (= information about the subject)
- If we use a noun phrase after _keep_ it is an object, not a complement. Compare:
  He _kept quiet_. (complement = information about the subject)
  He keeps his money under the bed. (= object)
- When we use a noun phrase after _seem_ or _appear_ to identify (rather than describe) the subject, we have to use _to be_ to introduce the noun phrase:
  ❌ Surprisingly, the young fresh-faced boy seemed the managing director.
  ✓ Surprisingly, the young fresh-faced boy _seemed to be_ the managing director. (identifying)

2 Verb + object + complement

A complement can also describe the object of a verb. In this case, the object comes before the complement:

- **subject** | **verb** | **object** | **complement**
- The journey made the children irritable. ❌ The journey _made_ irritable the children.

We often use verbs of naming, e.g. name, call, elect, with this pattern:

- The members _elected_ Geraldo treasurer of the society.
- My nephew finally decided to _call_ his new rabbit Snowy.

We can use a noun or an adjective as the complement after verbs such as think, keep, consider, prove, call, find:

- Although he was twenty, Katherine still _considered_ him a child/childish.
- The judge _found_ Sam’s evidence unreliable. The judge _found_ Sam an unreliable witness.

We can use an adjective as a complement in the same pattern in a number of idiomatic phrases after verbs such as drive and turn:

- The noise of the planes flying over us at night _drives_ me crazy!
- Did you see his expression? It could _turn_ milk sour!
3 Verbs with two objects

Some verbs can take two objects, e.g. give, bring, buy, show. These verbs take a direct object and an indirect object (often a person or thing that receives something). There are two possible patterns. The first pattern is more common:

1. The judges gave Jason’s painting to first prize.

2. The judges gave first prize to Jason’s painting.

If we put the direct object first, we put a preposition in front of the indirect object. The preposition depends on the verb. Here are some common examples:

<table>
<thead>
<tr>
<th>to + indirect object</th>
<th>award  give  hand  lend  offer  owe  pass  show  teach</th>
</tr>
</thead>
<tbody>
<tr>
<td>You should offer your seat to that old lady.</td>
<td></td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>for + indirect object</th>
<th>book  build  buy  catch  choose  cook  fetch  find  make  order  save</th>
</tr>
</thead>
<tbody>
<tr>
<td>Lauren cooked supper for her grandfather.</td>
<td></td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>to and/or for + indirect object</th>
<th>bring  leave  pay  play  post  read  sing  take  write</th>
</tr>
</thead>
<tbody>
<tr>
<td>The sales manager brought the latest figures to the meeting.</td>
<td></td>
</tr>
<tr>
<td>Dave bought a present for his host.</td>
<td></td>
</tr>
</tbody>
</table>

We prefer to put a pronoun before a noun phrase object:

[The advertising campaign brought a huge increase in sales to us.]
✓ The advertising campaign brought us a huge increase in sales.

If both objects are pronouns we prefer to put the direct object first:

[He gave me it.] ✓ He gave it to me.

4 Verb + verb

Many verbs can be followed by either an -ing form or an infinitive (➤ Units 45, 46):

Can you really imagine lying on a beach all day?

The consultant refused to take responsibility for the decision.

With some verbs we can use a direct object between the two verbs:

Can you imagine your father lying on a beach all day?

We require all students to attend the pre-sessional English course.

5 Verb + clause

We often use that clauses after verbs of speaking and thinking. (We can omit that after these verbs):

The staff agreed (that) redundancies were the only course of action.

Some verbs of speaking and thinking can be followed by wh- clauses (those which start with a question word), e.g. indirect questions (➤ Unit 79.1):

I couldn’t meet you. You didn’t tell me when you were arriving.

Wh- words can be followed by (object) + to + infinitive after verbs such as show, explain, teach: Is it common for people to teach their children how to drive here?

**Children at risk from mental illness**

A recent study has shown that levels of mental illness in children are rising.

THE STUDY claims (0) ... are affecting one in five youngsters. One of the reasons given for this is the current obsessive preoccupation of parents with their children's safety. Parents today consider (1) ..., so children are driven to school and back, and their parents rarely let them go out on their own, keeping (2) ... under parental supervision. This preoccupation has two causes: fear of traffic accidents and anxiety about child molesters and murderers on the streets. Parents' fears make (3) ... about the outside world and children in turn miss the normal adventures of everyday life. In addition, nobody teaches (4) ... with other children. Over-anxious children often become (5) ... and their fears are therefore realised and even increased. It is a vicious circle. It (6) ..., however, that children are experiencing these fears unnecessarily. While parents may think a child molester lurks round every corner, this is not supported by statistics: very few children are attacked by people they don't know.

There are, however, critics of this study. Many child psychologists believe (7) ... is not enough to cause mental problems. They consider (8) ... a result of family breakdown in modern society.

43 Introductory 
there and it

1 Introductory there and it
We use there and it as 'empty' subjects. They have no real meaning but we use them as grammatical devices to introduce or identify things.
We use there + a form of be to introduce new information and/or to say that something exists or happens:

* If you're looking for a café; there's one opposite the station. (new information)*
* There are fifty-one states in the USA. (= Fifty-one states exist in the USA.)*

We often use this form to introduce or describe a character or place, or to 'set the scene':

* At the top of the hill there's a small café with wonderful views over the bay.*
* There's an Englishman, an Irishman and a Scotsman who are on a boat ...*

We don't use the after there + be when we are introducing NEW information:

* X in the hotel lobby there is the cash machine.
* ✓ In the hotel lobby there is a cash machine.*

We use it to introduce or identify something or someone later in the phrase:

* 'Who's that?' 'It's Alan.' 'Hello, it's Steve here. Could I speak to Jane?'
* 'What's worrying you?' 'It's the children.'*

We don't use introductory it to say that something exists or happens:

* X In the centre of town it's a nice restaurant where it's a great choice of dishes.
* ✓ In the centre of town there's a nice restaurant where there's a great choice of dishes.*

2 Patterns after there + be
There + be can be followed by a noun + participle clause (Unit 55):

* There's a man sitting in the corner. There are two scales of temperature used in science.*

FORMALITY CHECK In formal English, verbs with future meaning, e.g. anticipate, expect, envisage, intend can be followed by there + to be/being (verbs + infinitive or -ing (Unit 46):

* The organisers didn't expect (there to be) quite such an overwhelming response.
* We don't anticipate (there being) any resistance from the anti-hunting lobby.*

3 Common words and expressions after there (+ be)

| quantifiers (Unit 8.1/2) any, some, much, many, several, etc. |
| Are there any more issues outstanding? |
| There are several ways we can tackle this. |

| indefinite pronouns (Unit 5.2) somebody, nothing, etc. |
| I've had a good look and there's nothing to report. |
| Isn't there somebody here who can help us? |

As well as forms of be, we can use the following verbs after there:

| there + appear(s)/happen(s)/seem(s)/tend(s)/used + to be |
| There used to be a house at the end of the common. |
| Researchers noticed that there tends to be a higher number of influenza cases in warm winters. |

FORMALITY CHECK In formal written English we can use there + arise/arrive/come/enter/exist/follow/live/occur/remain/result/sit/stand/take place:

* Deep inside her there arose a desperate hope.*
* At the crime scene there remained little in the way of physical evidence.*
* There follows a full list of our current terms and conditions of trading.*
ACADEMIC ENGLISH We can use there + a passive reporting verb (e.g. is/are said to be, is/are thought to be) + an indefinite noun phrase to describe a general feeling or belief. There are thought to be several contributory factors in genetic mutation. According to reliable sources, there are believed to be a million sufferers of the disease.

4 it as an empty object
We use it as an ‘empty’ object after certain verbs to introduce a following clause:

<table>
<thead>
<tr>
<th>verb + object + + when/that clause (This is used to describe likes and dislikes)</th>
<th>I hate it when people stare at me. We love it when the grandchildren come over.</th>
</tr>
</thead>
<tbody>
<tr>
<td>would appreciate + if clause (This is used to make a polite request.)</td>
<td>I would appreciate it if you would keep your seat belts fastened until I switch off the seat belt signs.</td>
</tr>
<tr>
<td>owe/leave it to somebody + infinite clause</td>
<td>We owe it to him to try and find a resolution. We leave it to you to suggest a suitable date.</td>
</tr>
<tr>
<td>think/find/consider/feel + it + adjective/noun/preposition phrase + that clause*</td>
<td>I find it intolerable that we have no recourse in law. He thought it a pity that they hadn’t qualified.</td>
</tr>
<tr>
<td>accept/regard/see/take/view + + as + noun/adjective + clause</td>
<td>We regard it as inevitable that some participants will not complete the course.</td>
</tr>
</tbody>
</table>

* We don’t usually use it as an ‘empty’ object when the main verb is not followed by an adjective or by a noun or preposition phrase:

X She thought that he had resigned. ✓ She thought that he had resigned.

5 Impersonal it
We can use it + be with adjectives and nouns that describe our attitudes, feelings and opinions, e.g. a pity, wonderful, surprising. This allows us to describe our feelings and opinions in an impersonal way. Compare:
I’m not surprised (that) she left you. (speaker’s opinion)
It isn’t surprising that she left you. (impersonal statement)

There are several patterns we use:

<table>
<thead>
<tr>
<th>it + be + adjective + -ing form (We use this in informal English.)</th>
<th>It was lovely meeting you at last. It’s wonderful sitting out here in the sun.</th>
</tr>
</thead>
<tbody>
<tr>
<td>it + be + adjective/noun + infinite clause</td>
<td>It’s lovely to meet you. It’s wonderful to sit out here in the sun. It would be a shame to miss this opportunity.</td>
</tr>
<tr>
<td>it + be + adjective + that clause</td>
<td>It isn’t surprising that she left you.</td>
</tr>
<tr>
<td>it + be + adjective + wh-clause</td>
<td>It was amazing how she recovered so quickly.</td>
</tr>
</tbody>
</table>

ACADEMIC ENGLISH The following patterns with it are common in academic and scientific English because they allow us to present information in an impersonal way.

- it + be + adjective/noun + infinitive clause:
  It was possible to recognise regularities in the patterns of soil distribution.
  It is difficult not to be influenced by the work of these early philosophers.

- it + be + adjective + that/wh-clause:
  It is significant that so few of the patients suffered side effects.
  It isn’t clear how this process begins.

- it + verb phrase (usually passive) + that clause:
  It has been shown that most of the patients improved noticeably.
  It should be noted that the majority of the responses were positive.
  It is said that economic factors were significant in a majority of the cases.
  It has been argued that many of the cases are the result of faulty diagnosis.

0 It is said that somewhere in the tropical waters of Asia lies an uninhabited island with a perfect beach.

1 People say that somewhere in the tropical waters of Asia lies an uninhabited island with a perfect beach. Rich in animal and plant life, surrounded by virgin jungle and watered by sweet underground springs, the beach could be the setting for an idyllic and easy life.

2 The Beach is the story of a young man who yearns for, seeks out and eventually finds just such a place. But to discover that, far from being the source of contentment and inner fulfilment that he expects, the beach turns out to be a place of savage violence, terror and death, comes as a shock.

3 Alex Garland takes the reader on an exotic journey from the steamy tourist-packed hostels of the Khao San Road in Bangkok to the laid-back islands of the remote seas around Thailand. Not to be impressed by the author's skill in describing the unfamiliar oriental locations and his ability to empathise with the obsessions of today's young backpacking 'new-age' travellers is difficult.

4 Taking in personal memories of the Vietnam war, jealousy, shark-infested waters, the psychological dynamics of communal living and the clash of cultures, Garland spins a tale which both enchants and shocks the reader. What gives the novel its haunting sense of unease and horror is the author's unique blend of these disparate elements.

5 It contains all the traditional ingredients that make up a successful thriller: an exotic location, a central mystery, good versus evil, and dangers around every corner. In the book is a strong sense of good and evil, but to decide who is right and who is wrong Garland leaves to the reader.

6 Few moral certainties exist in this exotic corner of the world.

7 Events unfold at great speed, and be warned, to put this book down once you have started it is impossible. With an international cast of well-observed characters Garland creates a nail-biting narrative that keeps the reader hooked until the final bloody climax.
Common expressions with *there* and *it*

1 Common words and expressions after *there* (+ *be*)

We use *there* to introduce a number of phrases connected with certainty and expectation, followed by *to be*:

<table>
<thead>
<tr>
<th>Common words</th>
<th>Example</th>
</tr>
</thead>
<tbody>
<tr>
<td>bound</td>
<td>If the government goes ahead <em>there's sure to be</em> an outcry from the miners.</td>

<tr>
<td>certain</td>
<td>Hang on, <em>there was supposed to be</em> a television in the room.</td>
</tr>
<tr>
<td>likely</td>
<td></td>
</tr>
<tr>
<td>expected</td>
<td></td>
</tr>
</tbody>
</table>

*There* also introduces a number of negative phrases, followed by the infinitive with *to*:

<table>
<thead>
<tr>
<th>Common words</th>
<th>Example</th>
</tr>
</thead>
<tbody>
<tr>
<td>no alternative</td>
<td><em>There's no alternative but to call</em> for a vote and face the consequences.</td>
</tr>
<tr>
<td>no choice</td>
<td><em>There wasn't any reason to doubt</em> the evidence.</td>
</tr>
<tr>
<td>no need</td>
<td></td>
</tr>
<tr>
<td>no reason</td>
<td></td>
</tr>

<td></td>
</tr>
<tr>
<td>no point in</td>
<td></td>
</tr>
<tr>
<td>no question of</td>
<td></td>
</tr>
<tr>
<td>no chance of</td>
<td></td>
</tr>
</tbody>
</table>

We can use *no knowing* followed by wh- words or *if/whether*:

*There's no knowing what* she'll do now her husband's left her.

The tests were inconclusive so *there's no knowing whether* he'll survive the operation.

Some phrases are followed by a *that* clause:

<table>
<thead>
<tr>
<th>Common words</th>
<th>Example</th>
</tr>
</thead>
<tbody>
<tr>
<td>no denying</td>
<td><em>There's no denying that</em> he's lost the company several contracts due to his incompetence.</td>
</tr>
<tr>
<td>no/any doubt</td>
<td><em>There really isn't any doubt that</em> she's guilty.</td>
</tr>
</tbody>
</table>

2 Common expressions after *it*

We use *it* + *seems as if/though* to describe our impressions:

*It seems as if* we've known each other for years.

We use *it* + *looks as if/though* to talk about probability:

*It looks as though* I'm going to fail the test.

We use *it* to introduce a number of negative phrases followed by a *that* clause:

<table>
<thead>
<tr>
<th>Common words</th>
<th>Example</th>
</tr>
</thead>
<tbody>
<tr>
<td>no secret</td>
<td><em>It isn't any secret</em> that she's leaving the city to start a new career.</td>
</tr>
<tr>
<td>no surprise</td>
<td><em>Clara didn't do any revision – it's no surprise (that) she failed the exam.</em></td>
</tr>
<tr>
<td>no wonder</td>
<td></td>
</tr>
<tr>
<td>no coincidence</td>
<td></td>
</tr>
<tr>
<td>no accident</td>
<td></td>
</tr>
</tbody>
</table>

After *it's no use* and *it's no good* we use an -ing form:

*It's no good phoning* – the office is closed today.

*I've made up my mind so it's no use nagging* me about it.

We can use *it's no longer + adjective + to infinitive*:

*In the UK it's no longer necessary to get* a licence to keep a dog.

*They've closed the caves permanently so it's no longer possible to see* the prehistoric paintings.
Practice

1 Rewrite the sentences, using *it* or *there*. Sometimes more than one answer is possible.

0 1 think I’m probably going to get a promotion.

   *It looks as if I’m going to get a promotion.*

1 People are bound to react badly to the news.

45 Infinitive patterns

In the 1960s Spain decided to promote itself as the world's first mass-market tourist destination. To cater for tourists, the government invested huge sums in new airports and roads.

1 Infinitive forms

Infinitives with to can be the subject, object or complement of a verb:
To give is better than to receive. Everyone loves to win.

There are also perfect (e.g. to have given), continuous (e.g. to be giving) and passive (e.g. to have been given) forms.

Infinitive clauses ➤ Unit 56  Passive infinitives ➤ Unit 62.3

FORMALITY CHECK  -ing forms (➤ Unit 46.1/2) can often be used in similar ways, but they tend to be less formal than infinitive forms:

Giving is better than receiving. Everyone loves winning!

⚠ We make a negative with not + infinitive:
X I tried to not look at the accident. ✓ I tried not to look at the accident.

An infinitive can have its own subject, introduced with for:
For evil to succeed it is only necessary for the good to do nothing.

FORMALITY CHECK  In informal English we sometimes put an adverb between to and the infinitive. This is known as a 'split infinitive' and can give emphasis to the adverb:
Not only am I going to win – I'm going to totally destroy the opposition!

We usually avoid split infinitives in formal English by moving the adverb:
[The doctor started to carefully remove the bandages.]
✓ The doctor started to remove the bandages carefully.

2 Verb + infinitive without to

After some verbs we use the infinitive without to, for example, modal verbs, auxiliary verbs, semi-modals need and dare (➤ Module 7 Before you start), and make and let:
He daresn't leave early without my permission.

Let the dish stand for at least a minute after removing it from the microwave.

We can use the verb help with or without to:
The volunteers helped (to) provide support and comfort to the refugees.

More on infinitives after let, make, see, hear, know and help ➤ Unit 63.3

3 Verb + infinitive with to

Certain verbs can be followed by an infinitive with to, but not by an -ing form:

afford agree aim appear arrange ask beg campaign care choose claim consent dare decide demand deserve expect fail fight forget guarantee happen help hope long manage need neglect offer pause plan prepare pretend promise propose prove refuse seem swear tend threaten trouble undertake vow wait want wish yearn

1 With these verbs we use for before the object + infinitive: We spent ages waiting for them to arrive.

2 These verbs can also have an object before the infinitive:
I begged Alison not to leave. He doesn't really expect her to pass the exam.

X She's decided applying for the job. ✓ She's decided to apply for the job.
Some verbs are followed by an infinitive only when they have an object (Unit 46.4):

advise allow cause command compel encourage forbid force get instruct invite leave
oblige order permit persuade recommend remind request teach tell tempt urge warn

X They forced to open our suitcases. ✓ They forced us to open our suitcases.

We use to + infinitive after would like, would love and would hate:
X When we arrive, I'd like taking a nap. ✓ When we arrive, I'd like to take a nap.

4 Infinitives of purpose and result

We can use an infinitive to describe the purpose or reason for an action:
Cover the turkey in silver foil to keep the meat moist.

To cater for tourists, the government invested huge sums in new airports and roads.

We use for before the infinitive only when the subject of the infinitive is DIFFERENT from the subject of the sentence:
X She went to Walmart for to get some groceries.
✓ She went to Walmart to get some groceries. (same subjects)
We bought a cage for John to keep his hamster in. (different subjects)

FORMALITY CHECK To make the meaning clear and in more formal English we can use in order or so as + infinitive of purpose:
Interest rates have been raised in order to reduce inflationary pressures.
We have removed the warning signs so as not to alarm members of the public.
The infinitive can also describe a result or something surprising, especially with only and verbs such as find, discover, realise, etc:
They queued for hours at the box office only to discover that the show was sold out.

We also use infinitives after too and enough (Unit 59.4) to talk about results:
That blue outfit was too informal to wear to the reception.
There isn't enough (food) to go around, I'm afraid.

5 Infinitives after adjectives and nouns

Many adjectives, especially those describing feelings, can be followed by to + infinitive.

able/unable afraid anxious ashamed bound careful certain crazy
curious due eager fit happy impossible likely lucky pleased prepared
right shocked stupid sure surprised thrilled welcome wrong

We're thrilled to welcome this year's prizewinner onto the podium.
The Bensons are lucky to be having such good weather.

We also use to + infinitive after some nouns:

attempt bid decision desire fool incentive need nuisance
opportunity place pleasure reason time willingness wish

She's finally made a decision to leave. Clare would be a fool to marry him.

We can use a noun + to + infinitive after there is/are and have (got) to express an obligation:
Don't disturb me – I've got a report to write this evening. There are some bills to pay.
Practice

1 Write sentences from the prompts, as in the example.
   Listen and check.
   0 they / decide / change / hotels / when / see / room
     They decided to change hotels when they saw the room.
   1 tourists / not permit / take photos / museum

     (anxious not) He wasn’t anxious to arrive late.
   4 Right now I’m afraid I can’t give you an answer.
     (able) Right now I can’t answer you.
   5 The government closed the borders with the aim of catching the criminals.
     (order) The government ordered the borders to be closed.
   6 Closing the office was something the manager decided this morning.
     (decision) The manager decided to close the office.
   7 I learnt that Amanda was going to marry Ronald, which was surprising.
     (surprised) I was surprised to hear that Amanda is going to marry Ronald.
   8 They didn’t publish the news because they didn’t want to frighten the public.
     (so as) They didn’t publish the news so as not to frighten the public.
   9 Checking the balance on my account was my reason for visiting the bank this morning.
     (to check) I visited the bank to check the balance on my account.
   10 When we got there they had already closed the store for stocktaking!
     (only) When we got there they had already closed the store.
THE DEATH of Emma Christofferson from deep-vein thrombosis allegedly caused by a twenty-hour plane journey has led to calls for an enquiry into so-called 'economy class syndrome'. The cabin crew were shocked to find the previously healthy 28-year-old in a state of collapse at the end of a long-haul flight from Australia to London. A blood clot had spread from her legs to her lungs with fatal results. Experts believe her death is just the latest example of the growing danger posed by sitting for extended periods of time in cramped aircraft seats.

Farol Khan, director of the Aviation Health Institute, claims have evidence that more than 6,000 passengers a year die of deep-vein thrombosis (DVT) as a result of long-haul flights. Unfortunately, as symptoms often take some time to appear, the link between the condition and flying is not always apparent. But there seems to be a clear relationship between the occurrence of DVT and the steady reduction in the amount of leg room between seats in economy-class cabins. In a bid increase the number of passengers carried and their consequent profitability, many airlines have squeezed more and more seats into their planes, at the cost of comfort and leg room. And our willingness put up with these uncomfortable conditions is simply based on the fact that we know more seats means lower prices. But with limited opportunities to stretch or move around, the blood circulation in passengers' legs tends slow down, and blood clots can easily develop. Most at risk are elderly people, sufferers from heart conditions and smokers. But as Emma Christofferson's case shows, even the young and healthy can do little prevent blood clots occurring under these circumstances.

Promoting a 'caring, sharing' image is something many airlines are keen on, and some of these have finally promised to take the problem more seriously, for instance by issuing health advice to passengers 'trapped' on their long-haul flights. They usually recommend moving the legs and feet regularly, and advise taking walks up and down the aisle at least once an hour.

...recommend moving the legs and feet regularly, and advise taking walks up and down the aisle at least once an hour.

The truth is that until we are all prepared to give up paying rock-bottom prices for long-distance travel, the airlines will have no incentive improve conditions. And a return to exclusive and expensive air travel is something nobody would contemplate advocating.
Verb -ing forms; verb + -ing form or infinitive?

Flying to another continent usually means spending hours trapped in a plane, bored stiff. But this is their first long-haul flight and they mean to enjoy it.

1 Verb -ing forms

Sometimes -ing forms can have their own subjects and objects:

- subject + -ing form: I'm looking forward to my wife returning.
- -ing form + object: Meeting new people is one benefit of taking evening classes.

We can use determiners, possessives, possessive adjectives or object pronouns before -ing forms:

All this complaining won't get you anywhere, you know. (determiner)
Peter's complaining didn't do him any good. (possessive)
Exorbitant tax rates led to him leaving the country. (object pronoun)

[FORMALITY CHECK] In formal English we prefer to use possessive adjectives rather than object pronouns before -ing forms: Exorbitant tax rates led to his leaving the country.

⚠️ When we use the + -ing form and we want to link it with an object, we use of:

X The giving presents is a traditional part of the naming ceremony.
✓ The giving of presents is a traditional part of the naming ceremony.

Many adjectives and nouns are followed by a preposition + -ing form (▶ Unit 65):

Lara isn't capable of lying and she has no reason for not telling the truth.

💡 Verb + -ing form

The verbs below can be followed by an -ing form, but NOT by an infinitive:

admit appreciate* avoid* burst out can't help* consider contemplate defer delay deny
detest* dislike* endure* enjoy* escape excuse* face* fancy* feel like finish give up imagine*
involve* justify* keep (on) leave off mention* mind* miss* postpone practise prevent*
pot off put sb off recall* recommend resent* resist* risk* save suggest tolerate* understand*

* With these verbs we can also put an object before the -ing form. Compare:
Can you imagine wearing that dress! (verb + -ing form)
Can you imagine Jemima wearing that dress! (verb + object + -ing form)

X I avoid to travel in the rush hour. ✓ I avoid travelling in the rush hour.

Certain verbs (particularly sense verbs) are only followed by an -ing form when they have an object:

catch discover feel find hear leave notice observe see spot watch

X In 'Hamlet' the prince discovers hiding behind the curtains.
✓ In 'Hamlet' the prince discovers Polonius hiding behind the curtains.

2 Verb + -ing form/infinitive

Some verbs can be followed by an -ing form or an infinitive, with no difference in meaning:

attempt begin bother can't bear can't stand cease continue
deserve fear hate intend like (= enjoy) love prefer start

I can't stand to see/seeing animals in pain.

⚠️ We usually avoid putting two infinitives or two -ing forms together:
[He intended starting taking lessons.] ✓ He intended to start taking lessons.
4 Verb + -ing form or infinitive?

Some verbs can be followed by an -ing form or by to + infinitive, but there is a difference in meaning:

⚠️ The verbs advise, allow, forbid and permit are followed by an -ing form when they have no object, but by an infinitive when they have an object:

❌ The doctor advised him taking a course of antibiotics.

✔️ The doctor advised taking a course of antibiotics.

✔️ The doctor advised him to take a course of antibiotics.

5 Sense verbs

Sense verbs (➔ Unit 25.3) can be followed by an object + -ing form when we are describing an action in progress or an action that is repeated:

As I walked past the house I heard someone playing Brahms' Lullaby on the piano.
(The person was in the middle of playing when I walked past.)

I saw a young mother slapping her child. (She slapped him several times.)

However, when we are describing a single action or the action is complete, we use an object + infinitive (without to) after sense verbs:

We saw a young mother slap her child in the supermarket. (She slapped once.)

Last week I heard them play the fifth symphony. (I heard the complete symphony.)

With this meaning we use to + infinitive if the sense verb is passive:

The young mother was seen to slap her child.

Note we use an object pronoun, not a possessive adjective, after sense verbs:

❌ Have you seen our performing yet?  ✔️ Have you seen us performing yet?

**JELLYFISH INVADE TOURIST BEACHES**

**IF YOU FEEL LIKE (0) going... FOR A SWIM IN THE MEDITERRANEAN THESE DAYS**
**YOU MIGHT BE IN FOR A SHOCK – IN MORE WAYS THAN ONE!**

Beaches from the Costa del Sol to the French Riviera have been invaded by shoals of stinging jellyfish. The main culprit is *Pelagia noctiluca*, or the 'mauve stinger'. Its sting can cause painful injuries even to healthy humans. And, if anyone suffering from an allergy is stung, they will probably need (1) ................. a doctor immediately. Medical experts advise (2) ................. the usual basic precautions such as only swimming at beaches with lifeguards on duty. Those who wish to swim in more remote locations should remember (3) ................. a wetsuit, as this offers considerable protection.

One tourist who was stung said, 'I don't regret (4) here but I think they should have warned us about the jellyfish. I (5) our holiday rep saying something about it but I wasn't really listening. I mean, you don't expect jellyfish in the Med, do you? It's something you associate with the tropics.'

Some scientists blame the problem on global warming. Rising sea temperatures mean jellyfish can live in parts of the sea that were previously too cold. (6) of tuna and turtles, which are natural predators of jellyfish, is thought to be another major cause. As the numbers of these predators have declined, so the number of jellyfish has increased. Environmentalists believe that until we stop (7) the limited stocks of tuna the problem will only get worse.

Tourism authorities have promised to take action against the problem, even if it means (8) huge nets around popular beaches. They certainly want to avoid (9) any beaches to the public, as this would be disastrous for the tourist industry. In some areas authorities are trying (10) the jellyfish before they approach the coast by sending out fishing boats to hunt for the creatures in deeper water.

* We don’t use does/do/did with modal verbs:
Children shouldn’t be allowed to watch violent films. Could you lay the table before dinner?

Negatives

1 We use not/n’t with verbs to make the meaning of a sentence negative. We usually contract subject + be (I’m not, they’re not) but with have and do/did, we contract the auxiliary verb + not (I haven’t, they didn’t).

2 In short answers with verbs of thinking and believing, e.g. think, hope, believe, imagine, we can put not after the verb. This use is quite formal and rare, except with hope:
‘Has Susannah decided to call her daughter Brittany after all?’
\[x\] ‘I don’t hope!’ ✓ ‘I hope not!’

Questions

1 Closed questions start with a form of main verb be, an auxiliary verb or a modal auxiliary verb, e.g. can, may, will. We use them when we want a simple yes/no answer:
‘Does your sister still live in Canada?’ ‘Yes, she does./No, not any more.’

2 Open questions start with a question word, e.g. who, what, where, how. We use them when we want to find out more information:
‘Why did she leave Canada then?’ ‘She couldn’t stand the cold winters.’

3 When we use more than one auxiliary verb in a sentence, e.g. We’ve been waiting for ages, we put not after the first auxiliary:
\[x\] We’ve been not waiting long. ✓ We haven’t been waiting long.

4 In questions, only the first auxiliary comes before the subject:
\[x\] Have been you waiting long? ✓ Have you been waiting long?

1 Uses of no and not

We use no to introduce negative replies: ‘Have you been here before?’ ‘No, I haven’t.’
We do not combine no with a verb to make a negative statement; we use not:
X I have no been here before. ✓ I have not been here before.

We can use not + any with a noun to express an absence or lack of something:
They won’t get any help from Janice.

However, we can use no in front of nouns, instead of not ... any or not ... a/an:
They’ll get no help from Janice.

We can usually use either no + noun or not ... a/any + noun, although no can be more emphatic:
There isn’t any reason to change policy at this stage. (neutral statement)
There’s no reason to change policy at this stage. (more formal/emphatic statement)

While not ... a/any is neutral, using no can sometimes express the speaker’s attitude:
She’s not an artist. (statement of fact about her job)
She’s no artist! (statement of opinion about her ability to paint/draw)

We use no + noun in a number of set phrases, e.g. no idea, no point, no good, no use, no harm:
I’ve got no idea what he was talking about!
There’s no point in trying to persuade me; my mind is made up.
There’s no harm in calling her.

It’s no use/no good repeating yourself more loudly. She can’t understand you.

We can use no with different and with comparatives:
River fishing is basically no different from lake fishing. (= very similar to)
Next-day courier is no faster than first-class post. (= isn’t [any] faster than)
Come on! This café is no more expensive than the one down the road. Let’s eat!
(= This café charges the same prices as the café down the road.)

2 Uses of not with quantifiers and adjectives

We can use not in front of positive quantifiers (e.g. much, many, a lot of) to make the meaning of a clause or phrase negative:
Not many people want to be referees – it’s a lot of hassle and not much money.

We can use not (+ adverb) with adjectives to make the meaning negative:
Those new ferries aren’t as basic as they used to be, but they aren’t exactly luxurious either.
Putting *not* before an adjective weakens the adjective, but it does not have the same strength as an adjective with the opposite meaning, e.g. *not difficult* is weaker than *easy*, particularly if we add an adverb after *not* like *too* or *particularly*:

*The maths exam was easy.* (I am confident that I passed it.)

*The maths exam wasn't too difficult.* (I am less confident that I passed it.)

We can also use *not* before an adjective with a negative prefix (▶ Unit 48.4):

*Spanish has a tense system not dissimilar to that of English.* (= a bit similar to)

*The people here aren't unfriendly, but they're so busy that it's difficult to get to know them.*

The descriptions above are much less definite than these:

*Spanish has a tense system similar to that of English. The people here are friendly.*

### 3 Other negative expressions

There are a number of adverbs and expressions which we use to give negative meaning to a sentence, e.g. *never, neither ... nor, none, not only, not ... for, no sooner ... than:*

*The English village is neither as pleasant nor as unchanging as it is believed to be.*

*The infantry assault would have lasted longer if it hadn't been for the harsh winter conditions.*

English rarely uses a double negative, i.e. two words with a negative meaning in the same clause, as most people consider this to be incorrect:

*Sorry, but I don't know nothing about that!*

*Sorry, but I don't know anything about that! / I know nothing about that!*

But double negatives are possible if we intend to make a positive statement:

*It wasn't very expensive, but it certainly didn't cost nothing.* (= it cost something)

*When I said I didn't want a lot of fuss for my birthday, I didn't mean no effort at all!* (= I meant some effort.)

In these examples, the meaning is positive, but the double negative emphasises it.

In spoken English, *nothing/no* (or other negative) is stressed in this kind of sentence.

#### Pronunciation ▶ 1.14

In formal English, we can put *not only* at the beginning of sentences for emphasis. Notice that we change the word order when we use *not only* in this way.

*Not only did they monitor the landings, they also recorded all their dates and times.*

*not only ... (but also), no sooner ... than ▶ Unit 76.2*

### 4 Negative introductory verbs

When we use verbs like *think, suppose and believe* to introduce a negative idea, we prefer to make the introductory verb negative, not the verb in the *that* clause:

*If I think the later train won't be cancelled.*

*If I don't think the later train will be cancelled.*

If we make the verb in the *that* clause negative, it can express surprise or appear emphatic:

*I thought that you didn't eat meat! When did you start?*

We do NOT use *hope* and *wish* in this way:

*We don't hope that the reunion will be too painful for you.*

*We hope that the reunion won't be too painful for you.*

*We don't wish I ate meat. / I wish I didn't eat meat.*

With verbs such as *seem, expect, appear*, we use either of these patterns; the meaning does not change:

*He doesn't appear to be interested. He appears not to be interested.*

With introductory verbs such as *ask, beg, persuade, tell, urge + infinitive*, we change the meaning when we make the introductory verb negative:

*The doctor told me not to take the pills.* (= He said I must not take the pills.)

*The doctor didn't tell me to take the pills.* (= He didn't mention taking the pills.)

1 Negative questions

Negative questions are formed by adding n’t to a form of be or to the auxiliary, or using a negative adverb:

Wasn’t Kate at the meeting last week?
Haven’t you seen Owen Wilson’s new film yet?
Why hasn’t Stella contacted her solicitor yet?
Why will you never give me a straight answer?

FORMATION CHECK: To be more formal, we can use not. We put this after the subject:

Why has Ms Gibbons not contacted the duty solicitor yet?

We often use negative questions to check or confirm that something we believe or expect is correct; we expect a positive (yes) answer:

I’d like to volunteer for a wildlife charity. ’Aren’t you a member of a wildlife organisation?’
(I believe that you are.)

We also use negative questions if we suspect that something we believed is not correct; in this case we expect a negative (no) answer:

I didn’t expect to see you here this evening. Didn’t your visitors come after all?
(I don’t think they came.)

We can answer negative questions with yes or no:

‘Hasn’t the weather been dreadful recently?’ ‘Yes, (it has) it has been dreadful.’
‘Wasn’t the hairdresser busy?’ ‘No, (she wasn’t she wasn’t busy).’

We can also give the opposite response to what the speaker expects, but we would then soften the response with an explanation:

‘Hasn’t the weather been dreadful recently?’ ‘Well, no, I think it’s been OK.’
‘Wasn’t the hairdresser busy?’ ‘Yes, she was actually, but she’s very fast!’

We use negative questions

• to try to persuade someone to do something:
  Won’t you come with us to the beach tomorrow? It’ll be fun.

• to give an opinion which expects agreement:
  Don’t you think that the new shopping centre is really ugly?

• to express surprise that something isn’t correct:
  Haven’t astronomers discovered a tenth planet? (= I thought that they had.)

• to express criticism or complaint, often with why:
  Didn’t you remember to post the letter? Honestly, I can’t trust you to do anything!
  Why haven’t you finished your homework?
  Why didn’t you tell me you’d taken up golf?
2 Restrictive adverbs and quantifiers

Many English words, such as few, little or rarely, have a negative or restrictive meaning (i.e. they reduce the amount, frequency or degree of the word they qualify):

<table>
<thead>
<tr>
<th>TYPE</th>
<th>EXAMPLES</th>
<th>EXAMPLE SENTENCES</th>
</tr>
</thead>
<tbody>
<tr>
<td>quantifiers</td>
<td>few, little</td>
<td>There are few people who believe you. Teachers have little time to watch TV.</td>
</tr>
<tr>
<td>adverbs of frequency</td>
<td>rarely, seldom, hardly ever</td>
<td>The urban fox seldom ventures out during the day.</td>
</tr>
<tr>
<td>adverbs of degree</td>
<td>hardly, scarcely, barely</td>
<td>It is hardly likely that a criminal will wait politely for the police to arrive!</td>
</tr>
</tbody>
</table>

The meaning of few and little is restrictive only without *a/an*. Compare:
- Water the fruit frequently as little rain falls at this time of year. (almost none)
- Take an umbrella with you; there’s always a little rain at this time of year. (a small amount)

As these restrictive words are negative in meaning, we use a positive verb with them:

- Many managers don’t hardly prepare for meetings at all.
- Many managers hardly prepare for meetings at all.

We also use a positive question tag with these words (Unit 79.2):

Higher-ranking police officers rarely meet the public these days, do they?

We can put restrictive adverbs of frequency before the verb for emphasis, usually in writing (Unit 76.2):

Rarely did the old man come down the mountain to the village …

3 Verbs with negative meaning

Some verbs contain a negative meaning, e.g. fail, deny, avoid:

I fail to understand your motivation for doing this. (= I don’t understand …)

Joe denied copying the essay from his best friend. (= He said he hadn’t copied it …)

These verbs can be made negative and they can take a negative question tag:

The boy didn’t deny copying the homework. (= He didn’t say that he hadn’t copied it.)

Fran failed her driving test again, didn’t she?

4 Negative prefixes

We can make verbs, nouns and adjectives negative, with a negative prefix:

Incomplete information will delay payment of any benefit due.

<table>
<thead>
<tr>
<th>PART OF SPEECH</th>

<tbody>

</tbody>
</table>

We can use verbs, noun and adjectives with a negative prefix with verbs in the negative form:

- Negative verb: He reached down to the window, but didn’t unlock it when he heard the cry from outside. (= didn’t open it)
- Negative noun: It isn’t anti-freeze, it’s anti-perspirant!
- Negative adjective: Salaries here are not unlike those in the United Kingdom. (Unit 47.2)

Questions and question words

1 Question types
Most questions are closed (yes/no questions) or open (with a question word). There is a third type of question: an alternative question asks the listener to make a choice between two or more options:
‘Would you prefer to see the doctor on Thursday or Friday?’ ‘Friday, please.’
‘I’m sorry. Did you ask for French fries, steamed potatoes or rice?’ ‘Rice, please.’

Pronunciation ➤ 1.15
In conversation, we can use statement word order with closed questions, but not with open questions, to check something we think we know or to express surprise. We usually give them a rising intonation:
You’ve sent the tickets (✔)?
X You haven’t sent the tickets (✘)?
Why not (✔)?
X Why you haven’t sent the tickets?
✔ Why haven’t you sent the tickets?
When we ask questions about opinions and feelings, we often omit that:
Do you think (that) the nursery will give me a refund for when Elly was ill?

2 Subject questions
Who, what, which and whose can be the subject of a verb, as well as the object:

Who invited Jack? (Meryl did.) Who did Meryl invite? (She invited Jack.)

If the question word is the subject, the word order is the same as in a statement:
Who made these two vases?
What happened at the end of the film?
Whose mobile phone is ringing?

Be careful not to confuse subject and object questions:
X What said she? ✔ What did she say?

We use question word order with a subject question word when we are keen to return to a topic earlier in the conversation and want to get an answer:
Well, what did happen at the end of the film?

When we use who, what and which as subjects, we use a singular verb in the question, even if they refer to a plural subject:
‘Who lives in that amazing chateau?’ ‘The old Count and Countess live there.’

3 how (+ adjective/adverb)
How asks about manner (the way something is done), progress, health or opinion:
How are things going with the building? (= How is it progressing?)

Note the difference between How’s X? and What’s X like?:
How’s Christine? (asks about Christine’s health)
What’s Christine like? (asks about Christine’s appearance/personality)
We do not use like with how:

- How's Neil like? ✓ What's Neil like?
- How's the weather like at the moment?
- ✓ What's the weather like at the moment? ✓ How's the weather at the moment?

When we form questions with how + adjective/adverb, we don't usually repeat the adjective/adverb in the answer: How far is it from the station?

- ✓ It's 500 metres far from the station. ✓ It's 500 metres from the station.

But with adjectives describing how big/large/wide/high/tall/deep/long, etc. we do repeat it:
The new bed is 1.8 metres wide. The pool is only 1.5 metres deep. The track is 10 km long.

4 what and which

We use what to ask about one (or more) of many things:
What languages is it best to learn if you want to be an interpreter?

We usually use which when the answer is one of a limited number of alternatives:
Which cake do you want to try first? (limited choice of cakes)

Compare with what:
What cakes do you like best? (of all cakes; unlimited choice)

We can use what and which without a noun if it is clear what we are talking about:
‘What's for dinner this evening?’ ‘Well, we've got a chicken or burgers. Which do you fancy?’

There are several common expressions in questions with what:
What else did the police officer say? Are they going to prosecute? (What = what other things)
What's the point in arguing with Maisie? She's always right.

(= This course of action is pointless.)
What's the use of saving money when interest rates are so low?

(= This course of action is pointless.)
The conference dinner is at the Central Hotel. What about staying overnight? (suggestion)

5 wh- words + prepositions

We usually put the preposition at the end of a wh- question:
Who are you buying the bracelet for? Which station will you be arriving at?

FORMALITY CHECK In more formal speech and writing, we put the preposition before the question word, and change who to whom (► Unit 9.3):
To which letter are you referring? From whom did the defendant accept the payment?

6 Rhetorical questions

A rhetorical question has the form of a question but it does not require an answer.
We use these
- to make an assertion about someone/something: Haven't you grown?
- to draw attention to something, usually negative:
  What is your bag doing in the hall? Put it away.
- to introduce a new topic: Do you remember my friend Elena from Paraguay? Well, it turns out that she's going back there in a few weeks.

ACADEMIC ENGLISH In formal writing and speeches, rhetorical questions are often used to draw the audience's attention to something, and the writer/speaker usually answers the question:
What does the public want from their government? They want openness and fairness, obviously, but also the ability to manage the economy ...

Practice

1 Complete B's questions with suitable verbs and/or question words, and any other words necessary. The questions should ask about the underlined parts of A's statements.

0 A Come on! I've been waiting out in the cold for ages!
B Oh, really? How long... exactly have you been waiting...?
1 A Someone told me that you've decided to give up the course.
B Oh, that?
2 A I've just been offered two jobs!
B That's great! to take?
3 A We could just paint the walls or we could put wallpaper up - what do you think?
B that thick soundproofing paper up? Then we won't hear next door's music!
4 A The roads round here are in a terrible state. I'm going to complain to someone.
B Good idea, but see?
5 A We went to a comedy night yesterday, and saw some really good comedians.
B Oh, see?
6 A Jenna's decided to stop eating breakfast because she's putting on weight.
B Really! What's giving up breakfast when she spends all her evenings in front of the TV with crisps and chocolates?

2 Grammar in Use Find seven more mistakes in the conversation and correct them.

SEAN I've just joined the local wildlife trust.
GILL Is that some kind of club or is it a society?
SEAN Well, neither, really. It's a charity. The idea is that it protects local wildlife.
GILL What's the point to join that?
SEAN What's the point? Honestly! What a crazy question!
GILL Why you think it's crazy?
SEAN Well, we're in danger of losing a lot of our wildlife as the area becomes more built-up. So we need to create safe spaces for local species.
GILL Oh, I see. And who create the spaces?
SEAN The people who run the charity.
GILL How much does it cost to join?
SEAN Oh, it only costs a few pounds much.
GILL To who do you pay that, then?
SEAN To the charity, of course.
GILL Can you visit the safe spaces they create?
SEAN Yes, we went to their main one last weekend.
GILL How was it like?
SEAN Interesting, very peaceful, just a nice, large wooded area. In fact, they held an introductory barbecue for new members.
GILL Who did organise that?
SEAN The people who run the charity. It was great, a lot of people came.

4 Write the question for each reply, as in the example. Use the prompts in brackets and add a question word where necessary.

0 (own / white Cadillac / drive / around here)

‘Who owns the white Cadillac that drives around here?’
‘Oh, I think the Americans from Harding Road own it.’

1 (applicant / think / be / suitable?)
‘Well, I think they’re both reasonable, but Stephen Wrigley seems to be the best for this post.’

2 (give / cattle / that type of feed?)
‘We’d only been giving them that particular type of feed for about two months.’

3 (tell / you / the divorce?)
‘I think it was Susan who told me about it, but most people at college seem to know.’

4 (else / do / holiday?)
‘We didn’t really do much else on the holiday – it was a really small resort.’

5 (persuade / David / stay / team?)
‘No, I don’t think we could have persuaded him to stay. The counter-offer was far too attractive.’

6 (be / point / complain / faulty goods?)
‘There’s every point in complaining! How else will shops know that their goods are faulty?’

7 (watch / be / better / scuba-diving?)
‘Both of the watches are suitable for scuba-diving, but I think you’ll find that the Timepiece is more reliable at greater depths.’

8 (the accused / steal / getaway car?)
‘Your honour, we believe that he stole the getaway car on behalf of Seamus Presley, the leader of the Presley gang.’
1 **UNITS 47 AND 48** Find twelve more mistakes in the conversation and correct them, as in the example.

**LOUISA** Hi, Martin. What’s wrong? You look awful.

**MARTIN** Oh, I’ve had that horrible flu. It lasted for ages.

**LOUISA** Didn’t you go to the doctor?

**MARTIN** Yes, I did. I went last week, but my doctor doesn’t know nothing. I asked for that new flu drug – what’s it called?

**LOUISA** You mean Defrenol?

**MARTIN** That’s it. I asked but he wouldn’t give me none.

**LOUISA** Why?

**MARTIN** He said that the tests haven’t hardly proved that it works. Not for did he refuse
to give me Defrenol, but he wouldn’t give me none other medicine. I think it’s because the surgery is over-budget and he doesn’t want to spend any more money!

**LOUISA** If that’s the case, it’s really dishonest! Have you thought about complaining?

**MARTIN** No, what’s the use? Complaints about doctors rarely have an effect, don’t they? Anyway, I suppose there’s not much you can do about a virus. He said I should drink plenty of fluids and he didn’t tell me to go out until I felt better.

**LOUISA** How are you feeling now?

**MARTIN** Well, I’ve still got chest problems. It might be from the fumes at the factory, though they’re meant to be no-toxic.

**LOUISA** Have you left that place? I thought you’d moved to a different job.

**MARTIN** No, not till next month.

**LOUISA** I see. Anyway, it lasts a long time, this flu. Not many people don’t appreciate that.

You think it’s gone and you try to get back to normal, then it hits you again.

**MARTIN** Yes, you’re right. I still can’t taste anything ...

**LOUISA** Look, I must be going. I don’t hope it lasts much longer. Bye!

2 **UNITS 48 AND 49** Complete each sentence with a suitable word or phrase.

1 What’s ................. in arguing with people who hold very strong opinions?

2 ‘Mmm, ................. makes your pastry so tasty?’ ‘I use different herbs in it, that’s all.’

3 ................. you finished the quarterly accounts yet? I need them for the board meeting later.

4 I’ve got a couple of paint samples here. ................. colour do you prefer?

5 What’s ................. of buying all this expensive equipment when you don’t know if you’ll enjoy the sport?

6 These sitcoms are so formulaic. This one is ................. any different from that one we watched yesterday, is it?

7 By ................. of the available methods did your client pay for her purchases?

8 ................. you join us on the school committee? You’d be a real asset with your background.

PRES Good morning. This morning I’m talking to Professor Andrew Lyons, a Fellow of the Royal Society. Professor Lyons is going to tell me something about the Royal Society. First of all, welcome.

PROF Thank you. It’s good to be here.

PRES Let’s start straightaway. (A) A lot of people don’t know much about the Royal Society. (0) What exactly is it?...

PROF Well, basically, the Royal Society is an academy of the sciences, (B) like the American National Academy of Science. It’s a charitable institution whose aim is to promote excellence in science, and to make it accessible to lay people.

PRES I see. (1) .......................................................?

PROF It’s the oldest scientific academy in the world. It started in 1660, but (C) it received its royal status two years after that.

PRES So (2) .......................................................?

PROF It was started by the eminent scientists of the day. A group met to listen to a lecture on astronomy by Sir Christopher Wren, and it grew from that.

PRES Oh, it was started by someone as famous as Christopher Wren?

PROF Indeed, and most other well-known British scientists have belonged to it. Newton, naturally, Faraday, and (D) as well as British scientists, others such as Einstein.

PRES And (3) .......................................................?

PROF Well, the membership is made up of Fellows – 44 are elected each year and eight others from outside Britain are invited to join. Current members include Stephen Hawking, Tim Berners-Lee and Richard Dawkins. But, of course, the majority aren’t famous.

PRES No, of course. (4) .......................................................?

PROF Mmm, in a lot of respects it is no different from many funding agencies that support young scientists with grants, but we also have an education programme to encourage schoolchildren to take up science and to support science teachers.

PRES (5) .......................................................? Anything in the community for example?

PROF Well, yes. We organise (E) a significant number of lectures and activities for people who aren’t involved in the scientific world. We want to encourage (F) lay people to get involved with science, and to understand the importance of science in all of our lives.

Rewrite the underlined sections A–F from Exercise 3 using a negative structure, word or phrase with a similar meaning. In some cases more than one answer is possible.

A Not many people know ....................................................... D .......................................................

Reporting speech directly

1 We report speech directly in writing by using the exact words between inverted commas, i.e. we quote the original words. We do not use that to introduce direct speech:
   *He leaned towards them and whispered, 'Be sure to lock your door tonight.'*

2 The reporting verb (said, replied, etc.) can go in any of these positions:
   *Lovell said, 'Houston, we have a problem.'*  
   *'Houston, we have a problem,' Lovell said.*  
   *'Houston,' said Lovell/Lovell said, 'we have a problem.'*

3 When we put the reporting verb after direct speech, it can go before the subject, unless the subject is a pronoun:
   *X 'The operation was a success,' said she.*  
   *✓ 'The operation was a success,' she said.*  
   *✓ 'The operation was a success,' said the surgeon.*

Reporting questions, commands, etc.

1 The most common verbs for reporting questions are ask and want to know:
   *She asked what piracy was.*
   *Laura wanted to know if anybody had seen the incident.*
   We do not use a question mark in reported questions.

2 We also use enquire for formal questions and wonder for 'ask ourselves':
   *The receptionist enquired whether we would be requiring breakfast.*
   *The concert was boring and Karl wondered when he could leave.*

3 To report commands, requests, advice, etc., we use a reporting verb + to + infinitive:
   *The guard told us to hand over our cameras.*
   *My boss advised me not to apply for the job.*
2 Read the information and identify examples of reported speech.

IN ONE OF the most famous speeches ever made, Martin Luther King urged his audience not to lose hope. He told them that he had a dream that day, August 28th, 1963. He said he had a dream that the sons of former slaves and the sons of former slave owners would be able to sit down together at the table of brotherhood; and that his four little children would one day live in a nation where they would not be judged by the colour of their skin.

Patterns in reported speech

'We understand it still that there is no easy road to freedom. We know it well that none of us acting alone can achieve success. We must therefore act together as a united people …'

1 Direct and reported speech

It is possible, though rare, to quote words directly in speech. We may do this if we want to focus on the exact words spoken: *But did he actually say 'I miss you'?*

We usually report words using indirect speech in conversations as we do not have punctuation to clearly signal what is the reported speech: *But did he actually tell you that he missed you?*

2 Common reporting verbs

There are a number of common verbs (reporting verbs) used to report statements. They are often followed by *that*, e.g. say, tell, add, answer, reply, mention, remark, shout:

*For the third time that day, the minister replied that it was out of the question.*

We can omit *that* after most reporting verbs, especially in conversation, but we prefer not to after reply, respond and answer, and we rarely omit it after shout:

*X* I shouted they were barred from the club.

✓ I shouted that they were barred from the club.

✓ I said they were barred from the club.

There are differences in use between say and tell:

*X* He said us that his phone wasn’t working.

✓ He said that his phone wasn’t working.

✓ He said to us that his phone wasn’t working.

*X* He told us that his phone wasn’t working.

✓ He told us that his phone wasn’t working.

When we are reporting more than one sentence, it is not necessary to repeat the reporting verb:

*Tom insisted that he hadn’t been there. He had worked late, and had then gone straight home.*

We can also report our thoughts using verbs such as think, decide, dream or imagine:

*She never imagined that it would be so difficult to run for the Senate.*

When we report a negative statement we usually make the verbs within the statement negative: ‘He hasn’t arrived yet.’ → *She said that he hadn’t arrived yet.*

But with some verbs, e.g. think, expect, plan, intend, the reporting verb itself is usually negative: ‘She won’t be on time.’ → *I didn’t expect that she’d be on time.*

3 Using different reporting verbs

A large number of reporting verbs are ‘functional’; they indicate the purpose of the original speech:

*You should stop smoking.* → *He advised her to stop smoking.* *(advice)*

*If you do that again, I’ll call the police.* → *He threatened to call the police.* *(warning)*

**Formality check** In informal conversation we usually report speech with the verbs say and tell. In more formal speech and in writing, we use a greater variety of reporting verbs:

*I think you should inform the judge.* → *Dad told me he thought I should inform the judge.*

The lawyer *advised* me to inform the judge.
4 Reporting verbs (+ clause)

VERB ONLY (+ PRONOUN)
‘I’m really sorry.’ → She apologised.

EXAMPLES: agree, apologise, refuse

VERB + (that) CLAUSE
‘I hacked into the accounts system.’ → He admitted (that) he had hacked into the system.

EXAMPLES: accept, acknowledge, add, admit, agree, announce, answer*, argue, assert, assume, believe, boast, comment, complain, concede, conclude, confess, continue*, decide, declare, deny, doubt, exclaim, expect, explain, feel, foresee, imagine, imply, insist, know, mention, notice, observe, point out, predict, promise, propose*, protest, recommend, remark, repeat, reply*, report, respond, reveal, say, shout*, state, suggest, suppose, vow, whisper

* that is obligatory

Some of these verbs can be followed by an infinitive or -ing form. (See the charts below.)

Some of these verbs can be followed by the subjunctive (Unit 40.1).

VERB + OBJECT + that CLAUSE
‘Don’t worry. You’ll arrive on time.’ → She reassured me that I would arrive on time.

EXAMPLES: advise, assure, inform, reassure, remind, tell, warn

5 Reporting verbs + infinitive

VERB + to INFINITIVE
‘We’ll collect the children, if you like.’ → They offered to collect the children.

EXAMPLES: agree, demand, guarantee, offer, promise, propose, refuse, swear, threaten, volunteer, vow

VERB (+ OBJECT) (+ not) + to INFINITIVE
‘Please can I use the car?’ → She asked to use the car.
‘Please let me stay.’ → She begged us to let her stay.

EXAMPLES: ask (somebody), beg (somebody), expect (somebody), want (somebody)

VERB + OBJECT (+ not) + to INFINITIVE
‘You shouldn’t say anything.’ → I advised him not to say anything.

EXAMPLES: advise, allow, challenge, command, compel, encourage, forbid, force, implore, instruct, invite, order, permit, persuade, remind, request, tell, urge, warn

VERB + OBJECT + (to INFINITIVE) + COMPLEMENT
‘Michael Schumacher is the greatest racing driver ever.’ → She considers Michael Schumacher (to be) the greatest racing driver ever.

EXAMPLES: acknowledge, assume, believe, consider, declare, expect, feel, find, presume, suppose, think, understand

6 Reporting verbs + -ing form

VERB + -ing FORM
‘I didn’t do it.’ → He denied doing it.
He denied having done it.

EXAMPLES: admit, apologise for, decide on, deny, mention, promise, propose, recommend, regret, report, suggest

VERB + OBJECT + PREPOSITION + -ing FORM
‘You forged the cheques, didn’t you?’ → They accused me of forging the cheques.

EXAMPLES: accuse somebody of, blame somebody for, congratulate somebody on, thank somebody for
Practice

1 Use the words to write reported statements. Start with the underlined word or phrase.
1 that informed she was ill the photographer us
2 assumed Gemma’s brother be the young man everyone to
3 justice to the guilty person to vowed Inspector Stanford bring
4 on Thursday the leaflet that the collection be would said
5 Sally having from the cupboard the biscuits taken admitted
6 did extra tell have to the guide for lunch not we’d us pay
7 closed the museum not imagine we today that did be would
8 our director through a difficult year us working for thanked so hard

2 Report each of these statements, using a suitable verb from the box, as in the example. There are five extra verbs. 

0 Lily: ‘I will not take part in the new play.’
Lily refused to take part in the new play.
1 My friend Tina: ‘Don’t you ever tell anyone about my problems again!’
2 My manager: ‘It was your fault that we lost the Siemens contract.’
3 The art critic: ‘Picasso was definitely the most exciting artist of the twentieth century.’
4 The reporter: ‘I’m terribly sorry about getting the Minister’s name wrong.’
5 The police officer: ‘We believe that you have been making threatening phone calls.’
6 My friends: ‘Come on – you can do the marathon with us. You’re just as good as us.’
7 The team manager: ‘I feel terrible now about contradicting Julie in front of the team.’
8 My wife: ‘Don’t worry about the arrangements. They’re all under control.’
9 My mother: ‘You had your tonsils taken out at the age of nine, remember?’

4 Eight of these sentences contain mistakes in grammar or punctuation. Find and correct the mistakes, as in the example. Tick (/) the correct sentences.

1 'These traffic-calming measures have been put into place for a very good reason,' the said he.
2 The doctor reminded me to not take the tablets before meals.
3 Delia commented that fresh coriander could be found in any good supermarket now.
4 The child shouted he wanted to go home to his mother.
5 And then the interviewer actually said that's a lie, Minister.
6 My accountant advised to me keep all my receipts and give them to him.
7 A lot of older people regret not to have gone to university when they were younger and had the opportunity.
8 Alicia implored her eldest son not to join the army.
9 The doorman at the entrance demanded being shown proof of my age.
10 When Jason asked about the source of the meat at the restaurant, the waiter answered "it was all sourced locally".
11 The runner-up congratulated the new champion winning the most prestigious tournament of the year.
51 Changes in reported speech

'Friends and Comrades, the light has gone out of our lives and there is darkness everywhere. I do not know what to tell you and how to say it. ... And so the cremation will take place on Saturday in Delhi city by the side of the Jamuna river ...'

NEHRU SPOKE eloquently earlier today about the assassination of Mahatma Gandhi. He started by telling his people that the light had gone out of their lives. He added that there is darkness everywhere. He said he didn't know what to tell the people and how to say it. He finished by announcing that the cremation will take place on Saturday in Delhi ...

1 No backshift

Although we often change the tense of the original words in reported speech (backshift), we do not when

- the reporting verb is in a present tense:
  He says that these fish do not survive in salt water.
- the reported verb is in the past perfect:
  'They'd arrived an hour early.' → I said they'd arrived an hour early.
- the direct speech includes an 'unreal' past (Unit 40):
  'I wish I were younger.' → Janice said that she wished she had been younger.
  ✓ Janice said that she wished she were younger.

2 Obligatory backshift

We always change the tense if we no longer believe the direct speech statement is true:

✗ 'Where's Tom this evening?'  'He said he's going to join us, but I don't think he will.'
✓ 'He said he was going to join us, but I don't think he will.'

Kim just called. She said she's going on holiday with Paula. (still true)
She said she was going with Paula, but Paula can't get time off work. (no longer true)

3 Optional backshift

In some cases we can choose to change the tense or not. This often depends on the relationship of the reported event to the time of reporting it. For example, if we report 'I'm going to Rome tomorrow morning' on the day it is said, we are likely to say:
Susanna said she's going to Rome tomorrow morning.

But reported a few days later, we are more likely to say:
Susanna said she was going to Rome the next morning.

We don't usually change the tense when

- the reported action is still happening or going to happen:
  'I am working on a tentative settlement.'
  → The negotiator said he is working on a tentative settlement. (still working on it)
- the reported verb expresses a fact or situation that cannot or is unlikely to change:
  He explained that these animals roamed the earth millions of years ago.
  He told us that counselling is not the answer for everyone.
- the verb comes after a time conjunction, e.g. when, after:
  Martin replied that he had started the job immediately after he left school.

Note that in all of these cases, it is also possible, and correct, to change the tense:
The negotiator said he was working on a tentative settlement.
Martin replied that he had started the job immediately after he had left school.
4 Changes and additions with adverbs

If the place or time of reporting is significantly different from that in the original speech, we often need to make changes to adverbs of place and time:

now → then  here → there  today → that day  tomorrow → the next day
yesterday → the day before  ago → before  last Monday → the last/previous Monday

Alex said, 'I'll meet you here again tomorrow at 3.30.'

Alex said she would meet us there again the next day at 3.30.

But if the statement is reported on the same day and in the same place, we would say:

Alex said she will/would meet us here again tomorrow at 3.30.

He finished by announcing that the cremation will take place on Saturday in Delhi ...

We often use adverbs in reported speech to indicate HOW the original words were said:

'Jewellery is not allowed!' → She told us very sharply that jewellery wasn't allowed.

'Oh, add my name if you must.' → Dad reluctantly agreed that we could add his name.

5 Modal verbs

Ought to, used to, could, might, would, need and should do not change in reported speech:

'You ought to listen to your father.' → Mum told me that I ought to listen to my father.

'You needn't stay if you don't want to.' → My boss said I needn't stay if I didn't want to.

But we need to make changes to other modal verbs:

'The new law will be in place soon.' → She said the new law would be in place soon.

'Publication may be delayed.' → The editor said that publication might be delayed.

'Julian can't have written the letter.' → I told them Julian couldn't have written the letter.

' Shall becomes would when it refers to the future, but should when it is a suggestion:

'I shall tell them everything.' → I decided I would tell them everything.

'Shall we tell the manager?' → She suggested that they should tell the manager.

We can use both must and had to in reported speech:

'You must lose twenty kilos!' → The doctor said that I must/had to lose twenty kilos.

'They must have finished.' → We thought that they must/had to have finished.

6 Reporting with nouns

As well as reporting speech with a reporting verb, we can use a noun + that to report someone's words when we want to add more information:

PRIME MINISTER The recession will soon be over.

→ The Prime Minister said that the recession would soon be over.

→ The Prime Minister's statement that the recession would soon be over was ridiculed by the Opposition.

KENNY You should try the new Chinese restaurant. It's excellent.

→ Kenny recommended that we try the new Chinese restaurant.

→ What did you think of Kenny's recommendation that we try the new Chinese restaurant?

We do not usually leave out that after reporting nouns:
Practice

1 **GRAMMAR IN USE** Read the conversation and choose the correct words in *italics*. If both options are possible, choose both. *Listen and check.*

**SUE** Sorry I’m late – I got held up in traffic. Have I missed Len?

**MIA** Yes, he left after lunch. He made a lovely speech. It was short, but very good. He started by saying that he (1) *has* / *had* really enjoyed his twenty years in the firm, and he wished he (2) *can* / *could* stay longer, but that his health (3) *isn’t* / *wasn’t* really good enough any more.

**SUE** Mmm, I think his heart is the main reason he’s retiring.

**MIA** Yes, that’s right. He said he’d never forget the day he started. He said he thought (4) *he’d made* / *he’s made* a terrible mistake when he (5) *left* / *had left* at five – his boss called him back and told him that he (6) *must* / *had* to work to five thirty. Nobody had told him that in the interview – stupid, isn’t it?

**SUE** Yes, awful! But he (7) *can* / *could* have asked someone to be sure, really. Did he say what he (8) *intends* / *intended* to do in the future?

**MIA** Well, he let us into a little secret. He explained that he (9) *came* / *had come* into quite a lot of money recently, and that he and his wife are going to Australia for six months to see their son, and that they (10) *may* / *might* decide to stay there.

**SUE** Really? So that’s the real reason he’s leaving.

**MIA** He says no. He insisted that he (11) *will* / *would* stay at the company if it weren’t for his health, but I don’t believe him. Anyway, he finished by thanking all of (12) *him* / *us* for being such good colleagues for the last twenty years.

2 **GRAMMAR IN USE** Report these voicemail messages, as in the example. Change the tenses, pronouns and adverbs as necessary.

“Hi, Mum. It’s Lucy here, just phoning to say Happy Birthday. I’m going to be out all afternoon but I’ll try you again later.”

1 Lucy phoned to say *Happy Birthday*. She said she’s going to be out all afternoon but ..........................................................

   “Elaine, hi. It’s Rosemary here. I didn’t get to Spanish last night as I’d been out all day and I got home late. I’ll ring again to find out what the homework is.”

   Georgia was really depressed last night. She told me that

5 'The house is in a very pleasant cul-de-sac, and there aren't many children there.'
   Here's the road. Oh no – it's awful! But the estate agent insisted that

6 'The accused first met the Wilsons when he decorated their living room.'
   In court, the lawyer claimed that

7 'Shall we switch to an online banking system?'
   My husband suggested that

8 'You mustn't leave your car in these parking bays for more than twenty minutes.'
   The traffic warden explained

4 Use the verbs in brackets to complete each sentence. Change one verb into a reporting noun and use the other to complete the statement, as in the example.

0 We were all astonished by the pilot's **announced** that the smooth landing **had been** entirely on autopilot. (be / announce)

1 The official's.................. that he ...................... the documents on the train created a stir in the Department of Defence. (admit / leave)

2 Frankly, at this newspaper no one believes Riley's ...................... that he ...................... money to allow his opponent to win the snooker championship. (accept / deny)

3 The defendant's...................... that the accused ...................... her over a period of twenty months needs to be carefully considered. (allege / stalk)

4 What about Amanda's lack of concentration at work? Did you believe her ...................... that she ...................... from stress-induced headaches? (suffer / explain)

5 'Did you query the solicitor's bill?' 'Yes, I did, but I wasn't impressed by his
   ...................... that the extra charges ...................... because we had withheld information!' (be applied / respond)
52 Reported questions, commands and requests

'Today I want to talk about piracy and music. What is piracy? Piracy is the act of stealing an artist's work without any intention of paying for it.'

1 Reported questions

Reported question word order is the same as in statements:

*if/whether* + *wh-word* + *subject* + *verb* (+ *object/complement*)

- **He asked if** we were feeling hungry.
- **She asked what piracy was**.

⚠️ The word order above is fixed:
- x She asked what was piracy.
- x They asked the driver where did the bus stop. ✔ They asked the driver *where the bus stopped*.
- We introduce indirect closed (yes/no) questions with *if* or *whether*:
- Lester wondered if/whether there was anything better in life.
- We can present alternatives with *whether/if ... or not*. We can put or *not* immediately after *whether* but NOT immediately after *if*:
- Deborah asked whether or not there was a lift in the apartment block.
- Deborah asked whether/if there was a lift in the apartment block or not.
- In indirect open questions we use a question word:
- The nurse asked *when* exactly the pain had started.

⚠️ We report negative questions which express surprise or criticism with a 'functional' verb (➤ Unit 50.4):
- 'Wasn't the play fantastic?' → x She asked if the play hadn't been fantastic.
- ✔ She exclaimed that the play had been fantastic.
- 'Isn't the rule stupid?' → x He asked if the rule wasn't stupid.
- ✔ He complained that the rule was stupid.

2 Reported commands, requests, etc.

In indirect commands we use a reporting verb, e.g. *tell, order, command, forbid* + *to* + infinitive:
- When the vet had finished, he told them to let the animal sleep.
- He forbade us to pass on any of the information to the authorities.
- We use *ask* for reporting requests, and *beg* or *urge* with urgent requests:
- 'Please come back later.' ➔ His secretary asked me to come back later.
- We can use *ask for* + passive infinitive if *ask* has no object:
- The cinema manager asked for the culprit to be brought to his office.

⚠️ Note that to report a negative command or request, we put *not* to before the verb (except with *forbid*, which already has a negative meaning):
- Several members of the royal family urged Edward VIII *not to abdicate*.
- I asked you *not to bring* a present. (= I said 'Please don't bring a present.')
- This is different from: I didn't ask you to bring a present. (no request made)
- We can report statements that fulfil other functions in the same way:
- 'Come on. I'll give you a lift.' ➔ Geoff offered to give me a lift.

Relative, participle and other clauses

Before you start

1 Review these intermediate grammar points and check you know them.

Relative clauses

1 Relative clauses identify or give information about someone or something in the main clause. They are introduced by relative pronouns, such as that, which or who:

Garibaldi was the statesman who united Italy in the nineteenth century.

The Risorgimento is the name which historians give to the movement led by Garibaldi.

2 The relative pronoun is the subject or object of the relative clause, so we don’t repeat the noun from the main clause or introduce a personal pronoun to replace it:

X Garibaldi was the statesman who he united Italy in the nineteenth century.
✓ Garibaldi was the statesman who united Italy in the nineteenth century.

Participle clauses

1 Participle clauses use participle forms e.g. living, broken to give more information about someone or something in the main clause. We usually use a comma to separate the participle clause from the main clause:

Living in isolated villages, peasants in Tsarist Russia rarely learned to read or write.
Broken by years of warfare, Britain was almost bankrupt in the late 1940s.

2 Participle clauses have active and passive forms but they do not have a tense. Their time reference is usually clear from the verb in the main clause:

Not having a ticket, I won’t be able to go to the concert tomorrow. (present/future)
Not having a ticket, I wasn’t able to go to the concert yesterday. (past)

Infinitive clauses

1 An infinitive clause can act as the subject or complement of the verb be or identify a noun:

To win the championship is our aim. Our aim is to win the championship.
The first person to finish the race will be the winner.

2 Infinitives can be active or passive, but they do not have a tense. Their time reference is shown by the context or by the tense of the verb in the main clause:

The tax bill will be the first item to be debated in the next parliament. (future)
Their proposal was the first one to be debated at yesterday’s planning meeting. (past)

3 We make infinitives negative by putting not in front of them:

Not to be selected for the team was Trudi’s greatest disappointment.

Noun (wh-) clauses

1 A wh- clause can replace a noun or noun phrase:

Their actions were inexcusable → What they did was inexcusable.
I don’t remember his clothing. → I don’t remember what he was wearing.

2 We usually use these clauses more often in spoken and informal English.
2 Read the information and identify examples of relative and other clauses.

SIMON BOLIVAR
Born in 1783, Simon Bolivar grew up in the city of Caracas, Venezuela. As a young man from a wealthy family, he had a series of private tutors, several of whom were admirers of the new revolutionary ideas sweeping Europe and the Americas. What Bolivar learnt from these men was to have a profound effect on his political views.

Joining a prestigious military academy in 1797, Bolivar developed a love and mastery of military tactics and in 1813 he joined the campaign to restore the Venezuelan Republic. He led a series of nationalist rebellions, which liberated many of the countries that had previously been under Spanish rule. He is one of the very few people to have a country named after him – Bolivia.

53 Relative clauses

Napoleon Bonaparte, who was born in Corsica, was France's greatest military leader.

1 Relative clauses and alternatives
A relative pronoun can be the subject or object of a relative clause:
Last week I saw that film which won all the Oscars. (subject = the film won the Oscars)
Last week I saw the film which you made at college. (object = you made the film)
To make the meaning clear, we usually put the relative clause as close as possible to the noun it refers to:
X You can buy this dish from your local supermarket, which is made from organic wheat.
✓ You can buy this dish, which is made from organic wheat, from your local supermarket.
Relative clauses are not the only way to define or add information. Alternatives include:
People who have a complaint → people with a complaint (prepositional phrase ➤ Unit 54.4)
The man who lives downstairs → The man living downstairs (participle clause ➤ Unit 55.1/2)
The first person who helped me → The first person to help me (infinitive clause ➤ Unit 56.1)

2 Defining relative clauses
A defining relative clause identifies or classifies a noun or pronoun in the main clause.
IDENTIFYING Is this the book that you were looking for?
CLASSIFYING Would all those who have booked dinner please go into the restaurant?
The defining relative clause gives information which is necessary for the sense of the sentence. In the first example above, Is this the book? does not convey the full meaning of the whole sentence, i.e. the specific book that you were looking for.
We often use these clauses to describe an important quality of someone or something:
Van Gogh was an artist who used a lot of bold, vibrant colours.

⚠ In defining relative clauses we can omit the relative pronoun when it is the object of the relative clause, but NOT when it is the subject:
X I saw the film won all the Oscars. ✓ I saw the film you made at college.
In American English that is more common than which or who in defining relative clauses.
Relative clauses with introductory it ➤ Unit 75.2

3 Non-defining relative clauses
A non-defining relative clause gives extra information about a noun or pronoun in the main clause (or about the whole clause), but it doesn’t define or classify; the main clause still makes sense without it:
Napoleon Bonaparte was France’s greatest military leader.
+ EXTRA INFORMATION Napoleon Bonaparte was born in Corsica.
→ Napoleon Bonaparte, who was born in Corsica, was France’s greatest military leader.
Napoleon lost the Battle of Waterloo in 1815.
+ EXTRA INFORMATION The fact that he lost the battle led to his exile.
→ Napoleon lost the Battle of Waterloo in 1815, which led to his exile.
We can also use non-defining relative clauses to show consecutive actions:
Heskey passed the ball to Owen, who scored a magnificent goal.
We always use a relative pronoun, e.g. which, who, to introduce non-defining
relative clauses:
\(\times\) Last year's winner presented the cup, each holder keeps for the year.
\(\checkmark\) Last year's winner presented the cup, which each holder keeps for the year.
However, we don’t use that in the same way:
\(\times\) This offer, that will not be repeated, must end next week.

4 Defining or non-defining relative clause?
Compare:
DEFINING  The natives who traded with the settlers retained their land.
This answers the question ‘Which natives retained their land?’ The answer
is ‘the ones who traded with the settlers’. It identifies or defines particular
natives and this means that some of the natives probably didn’t trade with
the settlers and therefore lost their land.
NON-DEFINING  The natives, who traded with the settlers, retained their land.
This sentence means ‘The natives retained their land.’ It doesn’t identify
particular natives, so it means that all the natives retained their land.
In written English the use of commas shows these differences.
\(\cdot\) In non-defining clauses we use a comma to separate the relative clause from the rest of
the sentence.
\(\cdot\) In defining relative clauses we don’t use commas at all.

Pronunciation  \(\rightarrow\) 1.16

The use of commas also reflects the way we say the two types of relative clause. In defining
relative clauses, there is no pause between the main clause and the relative clause:
We asked for the lovely double room which had a sea view.
Although we don’t often use non-defining relative clauses in speech, when we do there is
usually a falling intonation at the end of the main clause:
We asked for the lovely double room (\(\uparrow\)), which had a sea view.

5 Comment clauses

We can add a non-defining relative clause to the end of a sentence to make a comment
about the information (not the noun) in the main clause. Unlike most non-defining
relative clauses, comment clauses are common in spoken English.
FACT  Winston Churchill lost the 1945 election.
COMMENT  People didn’t expect this.
  \(\rightarrow\)  Winston Churchill lost the 1945 election, which was rather unexpected.

In conversation, we can use a comment clause to add our opinion:
A We had to wait for over an hour to see the doctor.
B Which is outrageous!

We use which, NOT who, whose, that or it to introduce a comment clause within a sentence:
\(\times\) Harold never phones before visiting, that is annoying.
\(\checkmark\) Harold never phones before visiting, which is annoying.
In writing we always put a comma before which, and in speech there is usually a falling
intonation at the end of the main clause.
Practice

1 Choose the correct or most likely meaning, A or B.

1 I read a book while I was waiting at the airport, which was very boring.
   A The book was boring.  B Waiting at the airport was boring.

2 The members of the team, who had sponsors, flew to the championships in Ottawa.
   A All the members of the team flew to Ottawa.
   B Some of the members of the team didn’t fly to Ottawa.

3 It’s the only hotel in the town that has free wireless Internet access.
   A There are several hotels in the town.  B There is only one hotel in the town.

4 I had a plate of pasta at the new pizzeria restaurant, which was enormous.
   A The plate of pasta was enormous.  B The restaurant was enormous.

5 The students who passed the test received a prize.
   A All the students received a prize.  B Some of the students didn’t receive a prize.

6 My flatmate, who is unemployed, often struggles to pay the rent.
   A I have one flatmate.  B I have several flatmates.

2 Match each headline 1–6 with a sentence from A–G. Using each pair, write one sentence containing a relative clause, as in the example. Use the present perfect tense in the main clause and add commas where necessary.

A They were grounded by the cloud of volcanic ash.

B They have been studying cancer genes for years.

C It was held in The Hague.

D They oppose the current prime minister.

E It was in danger of closing through lack of funds.

F The man jumped off the Severn Bridge.

GRAMMAR IN USE Complete the text, using suitable relative pronouns. Then add six more missing commas, as in the example.  

The Iron Duke

Arthur Wellesley, first Duke of Wellington, is a leading military and political figure of the nineteenth century. He is best known as the commander of the British forces (1) ............, helped to defeat Napoleon Bonaparte at the battle of Waterloo in 1815. 

Wellesley, who was born in Ireland joined the British army in 1787. At first he worked for the Lord Lieutenant of Ireland, (2) ............, was a friend of his brother Richard Wellesley. He also began a political career when he was elected as a member of parliament for Trim, (3) ............, was a constituency in Ireland two years later. 

Wellesley saw his first active military service in 1794 in the Netherlands. In 1796 he went to India to fight in the fourth Anglo-Mysore war which culminated in the battle of Seringapatam. But the most significant phase of Wellesley's career began in 1808, when he sailed to Portugal to lead the British army in the campaign against the French occupation of the Iberian peninsula. In 1813 he defeated Napoleon's brother Jacob, the man (4) ............, had proclaimed himself king of Spain, at the battle of Vitoria. It was a significant victory (5) ............, effectively liberated Spain from French occupation. As a reward for this success, Wellesley was given the title of Duke of Wellington by the British government. Wellington's greatest victory came in Belgium in 1815. Together with Gebhard von Blücher who was the general leading the Prussian forces he finally defeated Napoleon at Waterloo, in Belgium. The victory brought an end to the war (6) ............, had ravaged Europe for almost twenty years. Wellington returned to London as a national hero and resumed his political career serving as prime minister from 1828 to 1830.

Pronouns, adverbs and prepositions in relative clauses

Although gangster Al Capone was responsible for a number of murders and extortion rackets in 1930s Chicago, the crime for which he was eventually tried and imprisoned was tax evasion.

¹ We can use who to refer to animals when they are known individuals, e.g. domestic pets:
   Is Sheba the cat who was run over and nearly killed last year?

² Whom is formal and we rarely use it in speech. We now mainly use whom after prepositions (see 54.2).

³ We always use which (not who) to refer to inanimate objects. (For which to introduce a comment clause ➔ Unit 53.5).

⁴ In spoken English we can use that or who to refer to people.

⁵ (For information on omitting pronouns in object defining relative clauses ➔ Unit 53.2).

ACADEMIC ENGLISH In formal and academic English we use which rather than that in defining relative clauses:

This report is based on the survey which was conducted by Shering and Beecham.

We can also use whose to refer to inanimate objects:

It would only be possible to colonise planets whose atmosphere contained enough oxygen to sustain human life. (= the atmosphere of which)

2 Relative clauses with prepositions

We can use prepositions with relative pronouns. Their position depends on formality:

<table>

</tbody>
</table>

⚠️ We do not put a preposition before the relative pronoun that:

x They didn't own the house in that they lived.

If we put a preposition before who, the pronoun always becomes whom:

The patients, among whom there were several immigrants, had to undergo a series of tests.

Compare:

The people who this report is addressed to will have to consider its proposals carefully.

The people to whom this report is addressed will have to consider its proposals carefully.

* In informal English we also use *where* with the meaning in *which* to describe a situation:
  Have you seen the episode *where* the Hoppers' farm is destroyed in a fire?
  I once saw an accident on the motorway *where* three people ended up going to hospital.

It is possible to use *where, when* and *why* without the noun to which they refer:
*It's (the place)* *where* that music festival is held every year.
*I can't remember (the time)* *when* I got home last night.
*She's hyperactive. That's (the reason)* *why* she can't concentrate.

⚠️ We don’t include a preposition in *when* or *where* clauses:

*That’s the house where I grew up in.*

4 Prepositional phrases

In some cases we can use prepositional phrases to replace relative clauses:

<table>
<thead>
<tr>
<th>with</th>
<th>instead of <em>that/which/who + have to describe possession</em></th>
<th><em>Passengers who have first-class tickets can board now.</em></th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td></td>
<td><em>Passengers with first-class tickets can board now.</em></td>
</tr>
<tr>
<td><em>in/at/on, etc.</em></td>
<td>instead of <em>which/that + be + preposition to describe position</em></td>
<td><em>I've never seen the furniture which is in the attic.</em></td>
</tr>
<tr>
<td></td>
<td></td>
<td><em>I've never seen the furniture in the attic.</em></td>
</tr>
</tbody>
</table>

5 Modifying relative pronouns

We often use modifiers such as *all of* and *many of* before *which* or *whom* in a non-defining relative clause to refer to the subject or object of the clause:
*The supermarket withdrew all of its jars of tomato puree, *several of which* were found to contain fragments of glass.*
*The renewable energy grants, *half of which* are provided by local government, will be available from September.*
*The college entered over a hundred students for the exam, *all of whom* passed.*
*We interviewed fourteen applicants for the post, *none of whom* we thought suitable.*

6 whichever, whenever, etc.

In defining relative clauses we can modify the pronoun or adverb with *-ever* to give the meaning of *anything, anyone, anywhere, etc.:
*Use whichever phone you want — they all have outside lines.* (= any phone that)
*Invite whoever you like to the party.* (= any person who)
*You can put the photo wherever you think it looks best. I don’t mind.* (= in any place where)

JACK OF HEARTS
9.00 p.m., BBC 1

Jack of Hearts is a new six-part drama series (0) that comes to our screens this week. It has been given the prime Wednesday evening slot, (1) shows that the network has faith in its latest creation. The first episode opens to a scene (2) a young man is being chased. He stops at a phone box and makes a desperate call. This calls wakes up a man (3) most viewers will recognise as Keith Allen – an actor (4) characters are usually villains on the wrong side of the law. This time, however, he is playing a hard-pressed probation officer with a complicated professional and personal life, both of (5) form the main themes of the series. The writers have managed to find a different angle on his personal problems. At the centre of these problems is his stepdaughter, for (6) he attempts to keep the household together. His relationship with his wife, (7) seems to be a short-tempered, moody woman, is further threatened later in the series (8) she joins the staff of a college at (9) she is faced with a problem from her past. Thus the ground is prepared in this first episode for a series (10) may help to lift British summertime TV out of its regular slump.

### tourism

- **Tourism today** is an industry which has grown so much in recent years that in many countries it provides the greatest single contribution to the country's revenue. But is it always a good thing? Mass tourism which is a relatively recent phenomenon, brings with it a whole raft of problems. First, it means that a country's economy may rely on an industry who is wholly seasonal, with the consequence that the huge numbers of people work in tourism during the season have no income during the rest of the year. Some find wherever work they can, but others may look for support from a government is already receiving lower revenues.

- **Second**, it is true that in many countries tourists are destroying the very sights where they flock to see. They take home pieces of an ancient monument or of a coral reef which will gradually result in erosion of the attractions and therefore of the industry. While this kind of destruction may be wholly unintentional, a certain type of tourist which wants only a 'good time' can be very destructive in a different way: they behave badly, pick fights and often damage the hotel rooms where they are staying in. Obviously, it is then this behaviour by that the local community judges all members of that nationality, creating enmity rather than fostering empathy, whose should be one of the main advantages of tourism.

- **Finally**, there are many places tourism is threatening a well-established way of life: people that whose livelihoods traditionally came from older industries, such as agriculture or fishing, are finding new jobs and wealth in the overdeveloped tourist regions, but at what cost? It is sometimes difficult to understand the reasons which for countries become involved with tourism.
55 Participle clauses

Elected in 1960, Sirimavo Bandaranaike of Sri Lanka was the world’s first woman prime minister.

1 Forms
There are several different participle forms in participle clauses:

<table>
<thead>
<tr>
<th>ACTIVE PARTICIPLE</th>
<th>PASSIVE PARTICIPLE</th>
</tr>
</thead>
<tbody>
<tr>
<td>simple</td>
<td>(not) repaired</td>
</tr>
<tr>
<td>continuous</td>
<td>(not) repairing</td>
</tr>
<tr>
<td>perfect</td>
<td>(not) having repaired</td>
</tr>
</tbody>
</table>

Using a password, I opened the email application. (Active: I used a password.) Used with a password, the application offers complete security. (Passive: the application is used by someone.)

State verbs, e.g. be, own, possess (► Unit 25.1), can be used in participle clauses:
× Yolanda is rich and is owning six homes.  ✔ Yolanda is rich, owning six homes.

2 Positioning and relationship with the subject
Participle clauses give information about a noun in the main clause, so they do not usually contain a subject. The subject of the main clause acts as the subject of the participle clause:
Moaning with pain, the victim was examined by a young doctor. (The victim was moaning.)

A participle clause at the beginning of a sentence cannot refer to the object of the main clause:
× Moaning with pain, a young doctor examined the victim.
(This would mean that the young doctor was moaning, not the victim.)

In formal written English the participle clause can have a subject which is related to the subject of the main clause, but which isn’t exactly the same:
Horns locked, the two stags struggle for supremacy. (The horns belong to the stags.)
I crouched in the alleyway, my eyes straining in the darkness. (My eyes are part of me.)

For rules about subjects and objects in reduced relative clauses ► Unit 55.5

3 Clauses of time and sequence with -ing participle
We usually use these clauses when two actions happen at around the same time:
Turning the corner, we saw the hospital in front of us.
(= As we were turning the corner we saw the hospital in front of us.)

In written English an -ing participle clause often describes the setting or background:
Living in Los Angeles, Brad was one of those ever-optimistic movie wannabes.
Standing alone in the desert, the huge pyramid dominated the landscape.
If one action happened before another, we usually use a perfect participle clause for the earlier action. This can go before or after the main clause:

**Having finished his coffee,** Versace began to walk back to his house.
= Versace began to walk back to his house, having finished his coffee.

We can also use prepositions in front of -ing participles:

On entering the darkened room, we noticed a strange figure huddled in the corner.
(As we entered the room ...)

After swallowing the pill, Edward lay down and tried to get some rest.

4 **Participle clauses for reason, condition and result**

Provided that the subject of BOTH clauses is the same, we can use participle clauses to replace clauses of reason, condition and result. We often do this in writing:

<table>
<thead>
<tr>
<th>FULL CLAUSE</th>
<th>PARTICIPLE PHRASE</th>
</tr>
</thead>
<tbody>
<tr>
<td>reason¹</td>
<td>She will be unable to answer your queries because she is not qualified.</td>
</tr>
<tr>
<td></td>
<td>As I hadn’t been asked, I didn’t really want to interfere.</td>
</tr>
<tr>
<td></td>
<td>I had to borrow a set of keys from my landlord because I’d forgotten to take mine.</td>
</tr>
<tr>
<td>condition²</td>
<td>If you treat it gently, the fabric should last for years.</td>
</tr>
<tr>
<td>result²</td>
<td>The corporation shut down the plant, with the result that many workers were left unemployed.</td>
</tr>
</tbody>
</table>

¹ We often use the perfect participle because a reason or cause usually comes before a result.
² Note that the result is often not intended: I stayed at work rather late, missing my last train home.

5 **Reduced relative clauses**

Participle clauses are an efficient way of giving more information about a noun and can often be used to replace a defining relative clause (► Unit 53.2). We call these reduced relative clauses. Compare these examples:

*The man who lives upstairs is very noisy.* (defining relative clause)

► *The man living upstairs is very noisy.* (active participle phrase)

*They haven’t identified the body which was found in the Thames.* (defining relative clause)

► *They haven’t identified the body found in the Thames.* (passive participle phrase)

Unlike participle clauses, in reduced relative clauses we put the noun we are describing in front of the participle and we do not use commas to separate the clause from the rest of the sentence.

We can only use participles in this way when the subject of the main clause and the relative clause is the same. We cannot use a reduced relative clause if there is another subject between the relative pronoun and the verb:

✗ *The house living in is really old.* ✔ *The house which we live in is really old.*

In reduced relative clauses we only use an -ing form when we are describing a continuing action or situation. We can’t use an -ing form for a single completed action or with state verbs:

✗ *The thief taking her bag has been arrested.*

✔ *The thief who took her bag has been arrested.* (single completed action)

✗ *The police are investigating the man owning the burnt-out factory.*

✔ *The police are investigating the man who owns the burnt-out factory.* (state verb)

We use commas around reduced non-defining relative clauses:

*The college, founded in the nineteenth century, became a university in the 1930s.*

**Amelia Earhart**

AMELIA EARHART GREW UP IN KANSAS, in a middle-class family. (0) **Graduating from high school in 1916**, (graduate from high school in 1916), she began her first job at Spadna Military Hospital, (1) (work as a nursing assistant). Most of the patients were soldiers (2) **(wound / in World War I)**. In 1918 she contracted Spanish influenza and became a patient herself. Later, (3) **(recover)**, she travelled to California to join her parents, (4) **(move there)**.  

(5) **(visit / an airfield)** in Long Beach in 1920, Amelia was offered a ten-minute flight with her father and she fell in love with the idea of becoming a pilot. (6) **(work as a photographer)**, a truck driver and stenographer, she managed to save up the $1,000 that it cost to take flying lessons. On May 15th, 1923, she was granted a pilot's licence.

On June 17th, 1928, Amelia flew from Newfoundland and arrived at Burry Port in Wales 20 hours later, (7) **(become / the first woman)** to fly across the Atlantic Ocean. When Earhart and her companions returned, they were given a reception by the President, (8) **(receive them)** at the White House. Earhart was determined to do the flight again, but this time on her own. On May 20th, 1932, at the age of thirty-two, she set off from Newfoundland, (9) **(land / at Culmore)**, Northern Ireland fifteen hours later.

Early in 1937, (10) **(buy / a Lockheed Electra 10E)**, Earhart started planning a round-the-world flight. She left Miami on June 1st, (11) **(head / south-east)**. After stops in South America and elsewhere the plane landed in New Guinea on June 29th, (12) (cover about 35,000 kilometres). The final part of the journey would be over the Pacific Ocean. (13) **(leave / New Guinea)** on July 2nd, Earhart and her navigator Fred Noonan headed for Howland Island in the Pacific. But their plane failed to arrive and no trace of Earhart was ever found. For years people have advanced theories about her disappearance but the most likely is that the plane, (14) **(run out / of fuel)**, simply crashed into the sea.
Infinitive clauses

1 Form and use

An infinitive clause can act as the subject or complement of the verb be:

To reach the top is their aim. Their aim is to reach the top.

We use for with an infinitive clause if the subject of the infinitive is not the same as the subject of the sentence:

✗ Jack’s aim is his team to win. ✓ Jack’s aim is for his team to win.

We can use the following infinitive forms:

<table>
<thead>
<tr>
<th>ACTIVE INFINITIVE</th>
<th>PASSIVE INFINITIVE</th>
</tr>
</thead>
<tbody>
<tr>
<td>simple</td>
<td>(not) to mend</td>
</tr>
<tr>
<td>continuous</td>
<td>(not) to be mending</td>
</tr>
<tr>
<td>perfect</td>
<td>(not) to have mended</td>
</tr>
</tbody>
</table>

We use the perfect infinitive for an event that happened before the event in the main clause:

Her greatest claim to fame is to have been chosen for the last Olympic squad.

(She is famous now because she was chosen in the past.)

Sentences with an infinitive clause as their subject can sound rather formal. In speech we usually prefer impersonal it (► Unit 43.5) or an -ing form (► Unit 46.1):

To keep up a friendship is difficult. → It’s difficult to keep up a friendship.

Keeping up a friendship is difficult.

FORMALITY CHECK In spoken English we can also use some specific expressions followed by an infinitive clause to comment on the information in the main clause:

To tell the truth, I found the exhibition disappointing. I’m not keen on spicy food, to be honest.

To cut a long story short, he’s left home.

2 Defining clauses

We can use an infinitive clause to identify or classify a person or thing in the main clause, in a similar way to a defining relative clause (► Unit 53.2). We can do this after a superlative, an ordinal number (e.g. first), or one, next, last and only:

The youngest person to enter the programme was just fourteen.

(= The youngest person that entered …)

The window seat is usually the first one to be taken. (= the first one which is taken)

Linda was the only one to stay for the whole performance. (= the only one who stayed …)

We don’t usually use an infinitive clause to replace relative clauses containing modal verbs, because the meaning would not be clear:

[He’s the only player to save the team from defeat.] (could mean ‘who saved’ or ‘who will save’)

✓ He’s the only player who might save the team from defeat.

3 Purpose and result clauses

We often use an infinitive clause to describe a deliberate purpose or aim. This is the infinitive of purpose (► Unit 45.4):

Davy took a year out to travel and see the world.

ACADEMIC ENGLISH Infinitives of purpose are common in academic English:

Dickins ended each episode with a cliffhanger to encourage readers to buy the next edition.

We can use an infinitive to describe a result or something unexpected, especially with only and verbs such as find, discover, realise, etc. (► Unit 45.4):

Mike rushed out, only to realise he’d forgotten his keys.

Lizzie rejoined her friends, only to discover that Mr Darcy had left.

In the middle of the seventeenth century Louis XIV decided to build a vast new garden to surround his new palace at Versailles. The first person to be asking to look at the site was his favourite architect, André Le Nôtre. Le Nôtre arrived at Versailles only he discovered a thick forest with uneven ground and an inadequate water supply. It was a great honour to have been choose for such a task, but it is not difficult to understand Le Nôtre’s reluctance to take on such a challenge – the main water basin alone is 1.5 kilometres long, and there are dozens of fountains, statues and avenues. It was the first garden that designed on such a large scale, and took more than forty years for building. When Le Nôtre died, in 1700, the garden was still incomplete.

Noun clauses and other noun structures

Machiavelli is a well-known character from Italian political history, although he is more famous for what he wrote than for what he did.

1 Noun clauses
A noun clause can start with that, if/whether or a wh-word. The clause acts like a noun:
Did you notice that she left early? (= Did you notice her early departure?)
He asked if I intended to leave. (= He asked my intentions.)
I'll never understand why he did it. (= I'll never understand his reasons for doing it.)
These clauses are common in spoken English as noun phrases can sound rather formal:
Please inform us of your final decision. (formal)
Let us know if you want to go ahead. (informal)
Because a noun clause acts like a noun, it can be the subject or object of a verb:
What they did doesn't interest me. I'm not interested in what they did.
We can use what, where, when, why, who and how to introduce a wh-noun clause:

I was quite shocked by his behaviour. → I was quite shocked by what he did.
The school isn't far from our home. → The school isn't far from where we live.
The label doesn't say the name of the painter. → The label doesn't say who painted it.

More on clauses with where, when, etc. ➤ Unit 54.3
What usually means the thing(s) (that). We can use a what clause to replace a noun + defining relative clause if the noun we are referring to is clear from the context:
Tell us about the event (that) you witnessed. → Tell us about what you saw.
I'm afraid the dish (that) I like isn't on the menu. → I'm afraid what I like isn't on the menu.

⚠ We don't include the noun in a what clause:
X It was the money what I wanted, not the fame.
✓ It was the money (that) I wanted, not the fame.
OR The money was what I wanted, not the fame. (= the thing that I wanted)

2 Comparison clauses with nouns
We can compare nouns which refer to amounts by using more, less and fewer. A clause beginning with than can be added after the noun:
Now that we've built the extension, our house has a lot more space than it used to.
Property taxes usually produce less income than customs duties do.
Due to the congestion charge there are fewer cars in central London than there were previously.

We can also make superlative forms using the most/the least/the fewest + noun:
The most time you should spend on the running machine is twenty minutes.
The exam papers with the fewest mistakes will gain the highest marks.

We use fewer/fewest with plural nouns and less/least with uncountable nouns, although in casual speech less is sometimes used with both:
This checkout is for customers with fewer than five items.
It would taste better if you used less salt than you did this time.
[It doesn't seem very busy. Do you think there are less people here today than there are usually?]

Isaac Newton
In 1687 the English scientist Sir Isaac Newton published a book entitled Mathematical Principles of Natural Philosophy. At the time few people fully understood (0) the suggestions in the book (what/suggest). Nonetheless, the book was hugely influential and made Newton famous around the world, although fame was not (1) his intention (what/want). Newton’s theories were based on mathematics and (2) his observations of (what/see) in the world around him. He noticed that all objects, heavy or light, fell to the ground. He wanted to explain (3) the reasons for this (why/happen). His theory of gravity provided a revolutionary explanation of (4) the movement of different objects (how/different objects / move). (5) The ideas in his book (what/write) became the basis for much of our understanding of physics and the processes which govern relationships between physical objects.

won three Oscars. (2) The film
lasts almost three hours and is
Shakespearean in its scope and
ambition. It is the story of a New
York mafia family (3) which is
headed by Marlon Brando as the
'godfather'.

Although Brando has the title role
it is Al Pacino, (4) who plays his
troubled son and heir Michael,
who steals the show in a masterly
performance.

(5) As he struggles to reconcile
his distaste for crime and brutality
with his sense of family honour

and duty, Pacino's character
embodies the moral dilemma at
the heart of the movie.

(6) The director intersperses long
scenes of family life with shorter
sequences of extreme violence in
order to achieve his aim of taking
the audience on an emotional
rollercoaster ride.

(7) Because it was shot in explicit
detail, this violence may shock
some viewers. But anyone
(8) who is prepared to put up
with this will enjoy a unique
dramatic experience. In fact, for
many people The Godfather is the
greatest American film (9) which
had been made in the 1970s.

Conjunctions and linking expressions

Before you start

1 Review these intermediate grammar points and check you know them.

Sentences and clauses

1 A sentence consists of one or more clauses; in writing, it starts with a capital letter and ends with a full stop:

*clause 1*  
*The village was evacuated*  
*as soon as the volcano started to rumble.*

*clause 2*

2 In the example above, clause 1 is an independent or main clause – it has meaning of its own and can stand alone. Clause 2 is a dependent or subordinate clause – it has meaning only in relation to the main clause it accompanies.

Ways of linking

1 We link sentences and clauses with conjunctions (linking words that join two things). Coordinating conjunctions (*and, but, or*) link clauses of equal value, usually main clauses:

*We can pay in one lump sum. We can pay in instalments.*

→ *We can pay in one lump sum or we can pay in instalments.*

We can put either of the clauses first:

*We can pay in instalments or we can pay in one lump sum.*

2 We often want to link clauses that are not of equal value, i.e. a main clause and a subordinate clause. A subordinate clause always starts with a subordinating conjunction, e.g. *when, if, although.* The conjunction indicates the type of relationship between the main and the subordinate clause:

<table>
<thead>
<tr>
<th>MAIN CLAUSE</th>
<th>SUBORDINATE CLAUSE</th>
</tr>
</thead>
</table>
| time | Call me  
| condition | Wait here  
| concession | He passed |

|  | when  
|  | if  
|  | although |

|  | you get home.  
|  | you want to see a supervisor.  
|  | he'd hardly studied. |

Some subordinating conjunctions, e.g. *since,* can express different relationships, such as

• time: *We've lived here since we got married.*

• reason: *We've postponed the meeting since you're so busy this week.*

3 When we want to show a relationship between two sentences rather than two clauses within one sentence, we use a linking adverbial. We usually put this at the start of the second sentence, followed by a comma separating it from the sentence:

*There was an unprecedented response to our advert. Therefore, I am afraid we are taking your application no further.*

We can use linking adverbials to show different relationships such as

• time: *Our next stop is the island of Lefkas, where you have two hours to visit the port and have lunch. After that, we will be sailing to the smaller Ionian island of Ithaki ...*

• contrast: *Several students didn't obtain the required 40 percent in the exam needed for an overall pass. Nevertheless, they were awarded a pass grade on second marking.*
2 Read the text and identify examples of different linking words.

Australian bushfires
In early 2009 some of the worst bushfires ever recorded raged across the southern Australian state of Victoria. Most of the fires were started by falling power lines, although some were thought to have been started deliberately. Temperatures that summer were so high that it proved impossible to extinguish some fires once they had started, as firefighters were unable to get close enough. As a result, damage to property was widespread but, fortunately, there were fewer than 200 fatalities. The fires were eventually all extinguished in March as weather conditions improved.

58 Linking sentences and clauses

The year 2005 was a particularly bad year for hurricanes in North and Central America. Several major hurricanes not only caused over 100 billion dollars' worth of damage, but also claimed over 2,200 lives. Although most of the damage was sustained in the southern United States, there was also extensive damage in Central America.

1 Linking two main clauses

In speech and writing we usually prefer to link two short main clauses to create a longer sentence:

MacMahon leapt out of the way of the car. He rolled to safety at the side of the road.

→ MacMahon leapt out of the way of the car and (he) rolled to safety at the side of the road.

We join main clauses with the coordinating conjunctions and, but and or. The most common coordinator is and, especially in speech. We use

- and for addition: I cooked the starter and laid the table.
- but for contrast: I cooked the starter but I didn't lay the table.
- or for choice: Do you want me to cook the starter or lay the table?

We always put the coordinating conjunction between the two clauses:

X But I wanted to see you I was too busy. ✓ I wanted to see you but I was too busy.

When we want to emphasise that two things happened (or didn't happen), we can also use the ‘two-part’ conjunctions both ... and, either ... or, neither ... nor and not only ... but (also):

At the French Open, Federer both proved his return to form and won the only Grand Slam title to have evaded him.

Several major hurricanes not only caused over 100 billion dollars' worth of damage, but also claimed over 2,200 lives.

To take part you can either register as an individual or enter a team of up to eight challengers.

The conjunction neither ... nor is negative (and therefore uses a positive verb) and we invert the subject and auxiliary verb after nor (➤ Unit 76.2):

X I neither don't know about his wedding, nor I don't care about it.

✓ I neither know about his wedding, nor do I care about it.

2 Linking a main and a subordinate clause

There are several different types of subordinate clause, for example:

- that or wh- clauses: Didn't the notice say when the water was going to be cut off?
- adverbial clauses of time, using conjunctions such as when, before and after (➤ Unit 59.1):
  The state of the company's finances only became clear after the Finance Director had left.
- adverbial clauses of condition, using conjunctions such as if and unless (➤ Unit 37.1/2):
  There may well be more accidents in future if air traffic continues to grow.
- adverbial clauses of contrast, using conjunctions such as although, while (➤ Unit 60.1/2):
  Although the Aztecs were rich and powerful, the Spanish conquistadors overpowered them.
- relative clauses, introduced by pronouns, e.g. who, which, that (➤ Units 53 and 54):
  It was surprisingly not their latest CD that went platinum, but the one before.

We usually put the subordinate clause after the main clause:

The price of our holiday increased because a new green tax was imposed on all flights.

We can reverse the order of the clauses if we want to emphasise the information in the subordinate clause. In this order, we usually put a comma between the clauses:

Because a new green tax was imposed on all flights, the price of our holiday increased.

More on clause order and emphasis ➤ Unit 76.2/4
1. Match the clauses to make sentences as in the example, and choose the most suitable linking word from the box to join them. Decide if each sentence contains two main clauses or a main clause and a subordinate clause, and write M+M or M+S.

after although and if or that unless when

0. Did the doctor say exactly when...
1. It was the finest portrait ...........
2. Our car broke down last week ...........
3. Your order will be cancelled ...........
4. The policeman was rushed to hospital ...........
5. We can either go camping ...........
6. Usain Bolt won the gold medal ...........
7. I'm not going to play this game ...........
8. A we'd just had it serviced.
9. B you'll be able to go back to work? M+S
10. C we can stay in a cheap hotel.
11. D he smashed the World Record.
12. E you follow the rules properly.
13. F the artist had ever painted.
14. G we don't receive payment by the due date.
15. H he had been stabbed in the park.

2. Grammar in Use. Read the story and find the relevant underlined conjunction. Cross it out, and write it in the appropriate place, as in the example. 

A disaster remembered

The only natural disaster I've witnessed was several years ago, before (0) ....... when ....... I was staying with relatives in Istanbul. It was a hot summer and we'd felt a few tremors, when (1) ............... they had been minor ones. One evening, we'd been out for a meal and had spent another couple of hours chatting before we went to bed. I must have fallen asleep, so (2) ............... I was suddenly awakened by a violent rattling. I realised at once that it was an earthquake. My thoughts immediately turned to my son, sleeping in the room next door with his cousin. As (3) ............... I'd got to the door of my room, it opened. It was my son, checking that I was OK. The shaking was so strong by now that we could both (4) ............... stand still nor move very easily. We knew we had to get out of the house, in case the building started to collapse.

By now it was chaos in the house. My brother took control or (5) ............... shouted to us all to get outside and go down to the sea. (Luckily, the house was on the outskirts of the city, by the sea.) As soon as (6) ............... we were running down to the beach, something fell from a nearby building, and we realised how lucky we were. There were hundreds of people on the beach – in an earthquake zone everyone knows that you get away from buildings although (7) ............... you can. It was a bizarre night after that – neither (8) ............... frightening and strangely calm at the same time. It was frightening because no one knew whether there would be another tremor, but we were all far from the buildings now because (9) ............... we didn't feel in immediate danger.

The next night we didn't know whether to carry on as normal and (10) ............... sleep outside again in case of aftershocks. My family has a small boathouse on the beach, so we all slept in that unless (11) ............... it seemed more sensible. Eventually, we realised that there would be no aftershocks and that we were safe to go home. It was awful to find out later that thousands of people had been killed further east, closer to the epicentre, where hundreds of buildings had collapsed. This kind of tragedy will keep happening while (12) ............... more stringent building regulations are applied.
59 Subordinate clauses (1) time, reason, result, etc.

On 26 December 2004 a huge earthquake took place in the Indian Ocean and caused one of the deadliest tsunamis ever. Over 200,000 people were killed, and because it was the peak holiday season, that figure included several thousand tourists. In fact, it was such a powerful tsunami that two people were killed as far away as South Africa!

1 Time
The most common conjunctions of time are when, as, after, before, while, until and since: Rosemary waited until her children were at school before she started studying again.
Other, less common conjunctions are as soon as, once, whenever, now (that), the minute/moment (that), immediately and by the time (that):
It was such a pity you didn't contact us immediately/the moment you got back.
Hurry up! By the time you're ready, all the tickets will be sold out!

2 Reason
We usually give a reason with the conjunction because:
We've kept the company at five people simply because the office is too small to take any more.
Several thousand tourists were killed because it was the peak holiday season.
In speech, because is often shortened to 'cos /kəz/.
Other conjunctions of reason are since, as and for. Whereas because can be used in all circumstances, since and as both introduce reasons that are already known:
Terence, since/as you raised the subject, perhaps you could start by telling us your concerns.

FORMALITY CHECK In formal speech and writing, we often use given that to introduce a reason that is already known:
Given that there are so few women in powerful positions in commerce, the number in politics is quite surprising.
For is quite old-fashioned now and rarely used in conversation and informal writing:
She decided not to move to a seaside resort, for they were full of old, retired people.
In informal English, we would use because or as:
She decided not to move to a seaside resort, as they were full of old, retired people.

3 Purpose
The most common conjunction of purpose is so that ... (not). We often omit that:
Would you mind turning the monitor round so (that) other people can't see the screen?
A more formal alternative is in order that ... (not):
Please leave all bins outside your property in order that rubbish collectors can access them easily.
We can use for fear that when we don't want something to happen. It is also possible to use lest + subjunctive in this way, although this is quite old-fashioned:
We didn't go in daylight for fear that we would be recognised/lest we be recognised.
(= so that we wouldn't be recognised)
We can also use infinitive clauses after in order and so as:
The school will be holding a number of events in order to so as to raise money for repairs.
Infinitive of purpose ➢ Unit 45.4
4 Result

The most common conjunction expressing result is so:
*The baby was crying for half of the night so I’m feeling exhausted today.*

Note the difference between *so* and *because:*
*Joe hated the new job, so he resigned last week. (so + result of hating the job)*
*Joe resigned last week because he hated the new job. (because + reason for resigning)*

We can describe the result of a particular quality or characteristic using these patterns:

<table>
<thead>
<tr>
<th><strong>so + adjective/adverb + (that) clause</strong></th>
<th><strong>Example</strong></th>
</tr>
</thead>
<tbody>
<tr>
<td>I’m afraid it was <em>so dark</em> <em>(that)</em> I couldn’t see her face.</td>
<td></td>
</tr>
<tr>
<td>Sally stayed with us <em>so often</em> <em>(that)</em> we invited her to move in.</td>
<td></td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th><strong>such + (adjective +) noun + (that) clause</strong></th>
<th><strong>Example</strong></th>
</tr>
</thead>
<tbody>
<tr>
<td>I’m afraid I can’t identify her. It was <em>such a dark night</em> <em>(that)</em> I couldn’t see her face.</td>
<td></td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th><strong>too + adjective (+ for) + infinitive clause</strong></th>
<th><strong>Example</strong></th>
</tr>
</thead>
<tbody>
<tr>
<td>It was <em>too dark</em> <em>(for me)</em> to see her face.</td>
<td></td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th><strong>(not) adjective + enough (+ for) + infinitive clause</strong></th>
<th><strong>Example</strong></th>
</tr>
</thead>
<tbody>
<tr>
<td>It wasn’t <em>light enough</em> <em>(for me)</em> to see her face.²</td>
<td></td>
</tr>
</tbody>
</table>

1 Note the article after such with a singular noun:
X *it was such a dark night.* ✓ *It was such a dark night.*

2 Enough always follows the adjective:
X *it wasn’t enough light.* ✓ *It wasn’t light enough.*

We can use *so much ... that* after a verb to express the result of an action:
*Dave shouted *so much* at the football match that he had a sore throat the next day.*

We do not combine *so much + adjective:*
X *Sorry, I was so much busy that I forgot to call you.*
✓ *Sorry, I was *so busy* that I forgot to call you.*

**FORMALITY CHECK** A more formal alternative is *so + adjective + as + infinitive clause:*
*It was *so dark* as to make it impossible to see her face.*

5 Condition

The most common conjunctions expressing condition are *if* and *unless:
*Emotions cannot be true unless they are spontaneous.*

Other conjunctions expressing condition are *as long as, providing, and in case* (► Unit 37.1):
*You can go to the party on Saturday *as long as* you book a taxi home. Take a couple of numbers of cab firms with you in case the usual one is booked up.*

**FORMALITY CHECK** More formal alternatives are *on (the) condition that and provided (that):*
*A widow has left £135,000 to an animal charity on (the) condition that her cats are looked after for the rest of their lives.*

6 Other conjunctions

We can use the conjunctions *as if and as though* to say how someone behaves or does something:
*The Minister continues to act *as though* he’s unaware of the serious complaints against him.*

Note the difference between present and past forms after these conjunctions (► Unit 40.5):
*She behaves *as if she can* afford expensive things. (Maybe she can; we don’t know.)*
*She behaves *as if she could* afford expensive things. (We know that she can’t afford them.)*

We use *except that/when/where/when/if* to express exception:
*What can I say *except that* I’m sorry? I didn’t intend to offend you.*

(= The only thing I can say is ...)
*I keep my room locked *except if* I’m only away for a couple of minutes.*

(= The only time I don’t lock it is when ...)

End of a space-age era

The United States space shuttle programme has now been brought to a close. For thirty years, the space shuttles, part rocket, part plane, have travelled back and forth into space and supplied the International Space Station tirelessly and safely, apart from two major disasters. The most recent of these happened in 2003 (F) when a small piece of foam insulation broke off and hit the outside of the spacecraft. Had this floated away from the shuttle, it wouldn’t have been a problem, but (G) because a lay person was on board, the orbiter burnt up as it re-entered the Earth’s atmosphere. No human could sustain the temperatures encountered on re-entry without sufficient protection. (H) because it damaged part of the shuttle’s heat shield, NASA engineers guessed this would happen but limited their investigations during the shuttle’s flight (I) until shuttle flights resumed.

Space Station was put on hold (5) I some two years later.

The Columbia disaster was the second to befall the shuttle programme – it took place some 17 years (6) B. This disaster received more publicity than the second (7) G: Christa McAuliffe was the first non-astronaut to take part in a shuttle flight, on the ‘Teacher on Board’ programme, (8) A as it lifted off, and millions watched the disaster unfold.

Despite these two disasters, the space shuttle programme has been a success, and these space-age workhorses can only pave the way to better – and safer – transportation into space.

A so all seven astronauts on board were killed
B while it was lifting off
C so the nation’s eyes were on the spacecraft
D as they knew
E after Challenger had broken up on lift-off

Subordinate clauses (2)

contrast and concession

1 Contrast

The conjunctions but, while, whereas and whilst express a contrast:

Reds and yellows are warm colours, whereas blues and greens are cool.

While is more informal than whereas; whilst is very formal. We often put the subordinate clause with while or whilst before the main clause:

While/Whilst only 84 people died on the railways last year, more than 5,000 died on the roads.

2 Concession

The conjunctions although, (even) though and yet indicate that the information in the main clause is somehow surprising or unexpected:

<table>
<thead>
<tr>
<th>CONJUNCTION</th>
<th>WHEN USED</th>
<th>EXAMPLES</th>
</tr>
</thead>
<tbody>
<tr>
<td>although</td>
<td>in neutral contexts</td>
<td>We now know there were over 3000 fatalities, although only 376 were reported at the time</td>
</tr>
<tr>
<td>though/much as</td>
<td>in informal contexts</td>
<td>I enjoyed the exhibition, though I thought it was rather badly organised. Much as it pains me to say this, we'll have to cancel the trip.</td>
</tr>
<tr>
<td>yet¹</td>
<td>in formal contexts</td>
<td>These exclusive villas are only a five-minute walk from the resort, yet they are a haven of peace and tranquility.</td>
</tr>
<tr>
<td>even though²</td>
<td>to add emphasis</td>
<td>Psychosis is also part of this debate, even though problems arising from it affect a relatively small number of people.</td>
</tr>
</tbody>
</table>

¹ We do not start a statement with yet:
   X Yet they arrived on time, their plane took off an hour late.

² We do not use even although, or even by itself:
   X She loves him, even although he is selfish.  X She loves him, even he is selfish.
   √ She loves him, even though he is selfish.

Compare even though and even if (► Unit 37.1):

I'm going to apply for the job, even though it pays very little. (I know that it pays very little.)
I'm going to apply for the job, even if it pays very little. (I don't know what it pays.)

We can use these conjunctions with an adjective instead of a clause:

The necklace, even though (it was) staggeringly expensive, would match the dress perfectly.

Though exhausted after the drive home, Shelley cooked a meal for them all.

We can use though after an adjective, with linking verbs such as be, look and seem:

Beautiful though she is/may be (= although she is beautiful), you must be sure of her character, too.

It is also possible to use however + adjective/much/many in this way:

However exhausted she felt after the drive home, Shelley cooked a meal for them all.

We've got to get these plans approved, however difficult it may be.

(= though it may be difficult)

You won't change my mind, however much you argue!

3 Prepositions of concession

Despite and in spite of are prepositions; they can be followed by a noun or an -ing form:

In spite of the depressed gold price, mine production rose in most areas last year.

Despite often offering basic salaries, charities rarely have problems in recruiting staff.

• We do not introduce a clause with despite or in spite of; we have to use a conjunction:
  X Despite the plane left an hour late, we arrived at our destination on time.
  √ Though the plane left an hour late, we arrived at our destination on time.

• If we want to introduce a clause with despite or in spite of, we add the fact that:

In spite of the fact that the rehearsal had gone so badly, the first night was a great success.
Practice

1 Choose the clause, A or B, that provides the best ending for each sentence.

1 Many people believe that capital punishment is a deterrent to serious crime, even though
   A it actually makes little difference to the crime rate.
   B the crime rate has decreased in some places where it is used.
2 We usually consider it healthy to eat lots of fruit, but
   A it's one of the best food groups in terms of vitamins.
   B too much can produce an excess of acid in the stomach.
3 I enjoy having people to stay, though
   A I always appreciate the peace when they've gone.
   B I always feel unhappy when they've gone.
4 Iain Banks' early novels were considered quite strange, while
   A his later ones also seem to be quite weird.
   B his later works are more mainstream and accessible.
5 The patient had the nurses running round and they quickly lost patience, much as
   A they tried to sympathise with her.
   B they got annoyed with her.
6 Global warming is often considered the main factor in current climate fluctuations, yet
   A it appears to be having a real effect on phenomena such as hurricanes.
   B periods of warming have long been a feature of the Earth's development.

2 Write the second sentence so it has a similar meaning to the first. Use the words in brackets, as in the example.

0 Although the earthquake appeared horrific at the time, there were few fatalities.
   (though) Horrific though the earthquake appeared at the time, there were few fatalities.
1 Warnings of the flood were given well in advance, yet people didn’t leave their homes.
   (spite) ...........................................................................................................................
2 Very little of the remaining stock sold, despite the low prices in the sale.
   (even though) ................................................................................................................
3 The magazine had tried introducing several new features. Nevertheless, circulation continued to drop.
   (although) ........................................................................................................................
4 The Scots won the battle, even though they had a far smaller force.
   (despite) ...........................................................................................................................
5 Although this may seem difficult now, you’ll soon wonder why it caused so many problems.
   (though) ............................................................................................................................
6 I adore children but I can’t accept that kind of behaviour from any child.

61 Adverbial linking expressions

THE DESTRUCTION OF THERA
Approximately 3,500 years ago, there was a huge volcanic eruption in the Aegean Sea, which devastated the island of Thera (Santorini). In addition, it destroyed the successful Minoan civilisation on the island of Crete. However, it now seems that the heaviest fall of volcanic ash was to the north-east, over what is now Turkey.

1 General points
Adverbial linking expressions can be single-word adverbs, e.g. therefore, however, or they can be adverbial phrases, e.g. as a result, in conclusion.
- They are not conjunctions: they are generally more formal than conjunctions and are used mainly in writing.
- They are usually separated from the sentences they link by punctuation.
- We usually place the adverb at the beginning of the second sentence of the pair we are linking, but we can sometimes also insert it into the sentence it introduces, separating it out with commas:
  There was an unprecedented response to our advert. I am afraid, therefore, we are not taking your application further.
- We can also insert it before the verb (or after be or an auxiliary):
  There was an unprecedented response to our advert. I am afraid we are therefore not taking your application further.
- Some adverbial expressions can be placed at the end of the sentence:
  The director didn’t come to the launch. It was a success, nevertheless.

2 Time and sequence
We use adverbials of time to describe sequences or stages in a process:

<table>
<thead>
<tr>
<th>LINKING WORDS</th>
<th>MEANING</th>
<th>EXAMPLES</th>
</tr>
</thead>
<tbody>
<tr>
<td>afterwards, beforehand*</td>
<td>one action happening after/before another</td>
<td>Dinner will be served at 8.00. Afterwards, the Mayor will give a speech. I had a blood test last week and had to fast for 12 hours beforehand.</td>
</tr>
<tr>
<td>after that, then, next, following that</td>
<td>a stage in a process</td>
<td>Put a plastic cup in the holder, then select the drink you want and insert the correct coins.</td>
</tr>
<tr>
<td>eventually, finally, in the end</td>
<td>last stage in a long process</td>
<td>The police interviewed every male in the street and finally charged Jim Murphy with assault.</td>
</tr>
<tr>
<td>first(ly), second(ly), third(ly), finally</td>
<td>sequence of events</td>
<td>First, a verbal warning is given; second, two written warnings are given; third, a final warning is given, and finally the employee may be dismissed.</td>
</tr>
<tr>
<td></td>
<td>to number points in an argument</td>
<td>The medical trial had to be abandoned: firstly, there weren’t enough volunteers, and secondly, the company withdrew one of the drugs.</td>
</tr>
</tbody>
</table>

* We usually only put beforehand at the end of a clause, not the beginning:
  X I had a blood test last week: Beforehand, I had to fast for 12 hours.

3 Addition
We use in addition, similarly, furthermore, what is more and moreover to add something:
Approximately 3,500 years ago, a huge volcanic eruption devastated the island of Thera. In addition, it destroyed the successful Minoan civilisation on the island of Crete.
In conversation we prefer to use also:
Can you post this letter when you go to the shops? Also, can you get me a bar of chocolate?
4 Result and reason
In formal English, we use therefore, consequently, accordingly, as a consequence/result to express a result. In conversation we often use so:
These drugs heal most ulcers but they do not cure the underlying disease. Consequently, ulcers tend to recur after treatment has stopped.
The computer crashed yesterday evening so I’ve spent all day today trying to sort it out.
We can use for this/that reason to show a relationship of reason:
We do not believe that the officers behaved inappropriately in the circumstances. For that reason, we welcome the independent inquiry.

5 Contrast and concession
We use however, nevertheless/nonetheless, on the other hand, even so and on the contrary to make a contrast:
A pet may be a good companion for the elderly. However, its need for exercise may be a problem.
The new software is not problem-free. Nevertheless, it is still an improvement on previous versions.
Even so expresses a particularly surprising contrast:
The last attempt to swim the Channel ended in disaster. Even so, more swimmers than ever are training to achieve this difficult feat.

FORMALITY CHECK In speech we often use these more informal adverbs of concession:
I know it’s not late. I have to go, all the same.
The new programme on dinosaurs is a bit far-fetched. Still/Mind you, it’s a lot more interesting than most of the other programmes on TV right now.
We haven’t had much success with the garden. This year has been much drier than usual, though.
The adverb still can appear at the beginning of the sentence, but not the end; though usually appears at the end, and all the same and mind you are common in both positions:
I know it’s far too expensive for someone on my income. Still, it’s worth it! All the same, it’s worth it! Mind you, it’s worth it! It’s worth it, all the same! It’s worth it, mind you! It’s worth it, though!

6 Other linking adverbials
We use in conclusion, in brief, overall and all in all to summarise:
In conclusion, the survey indicated that the local population would welcome a cycle lane.

ACADEMIC ENGLISH The adverbials To summarise and To conclude are common ways of introducing a conclusion in an academic paper:
To conclude, hotels large and small have a real need for dependable communication systems.
Many adverbials introduce a comment on the previous sentence by
• giving an example – for example, for instance, such as:
We specialise in office services, such as payroll and bookkeeping.
• naming/explaining something – notably, namely (formal):
This affects one of the principles of political economy, namely the free market in labour.
• restating a point – in other words, to put it another way, that is (to say):
The position is paid pro rata. In other words, your salary is calculated according to how many hours you work in comparison with a full-time employee.
Some adverbials can mark a transition from one topic to another in speech, e.g. by the way, come to think of it, incidentally (Unit 81.3):
I did enjoy my trip to Stratford. By the way, if you’re ever there, do look up Aunt Joan. She’d love to see you.

THE ELGIN MARBLES are statues which date back to the fifth century BCE. *(0) *...* although...* they were created in Greece and were located in the Parthenon in Athens until the late eighteenth century, they are now exhibited in the British Museum, London.

The statues were bought in 1799 by the Englishman Lord Elgin, who wanted to bring them back to Britain as part of his personal art collection. *(1) *...* on the sea voyage back to England, the ship carrying them was sunk and the ‘Marbles’ were temporarily lost. It would be an incredibly expensive operation to recover them.

*(2) *...* Elgin did so, and *(3) *...* placed himself in enormous debt.* *(4) *...* his own desires, he had to sell them to the British Government and they were housed in the British Museum, where they have been ever since.

More recently, the statues have become the subject of debate between Britain and Greece and, indeed, among British historians and archaeologists.

*(5) *...* the Greek authorities have requested their return on many occasions, the request has always been refused. One of the main arguments for not returning them, valid *(6) *...* the Greek request may have been, was because of the pollution that is affecting the Parthenon and the possibility of earthquakes in Greece. This argument is less valid now, since the completion of the new Acropolis Museum.

There are of course compelling arguments for their return: *(7) *...* it cannot be denied that the statues are part of the Greek heritage and belong in their original environment; *(8) *...* with the opening of the new Acropolis Museum, these works of art would now be as accessible to the public in Athens as they are now in London. *(9) *...* the Greek authorities have already received parts of the Parthenon statues back from other sources.

*(10) *...* spaces have been left in the new museum for the return of the rest of the statues, and it would seem churlish not to let them go home now.

1 Review these intermediate grammar points and check you know them.

Passive forms of tenses

1 These are more common in writing than in spoken English.
2 We make the passive form of verbs in all tenses by using be in the appropriate tense plus the past participle of the main verb:
   * A password is used to access the site. (The customer uses a password to access the site.)
   * My bag was stolen. (A thief stole my bag.)
   * The murder is being investigated. (The police are investigating the murder.)
   * The show has been cancelled. (The organisers have cancelled the show.)
   * Drinks will be served in the interval. (The waiters will serve drinks.)
3 It is possible to make passive forms of the perfect continuous tenses, but we prefer to use an active form and an impersonal subject, e.g. they/one:
   * By next month the murder will have been being investigated for over a year.
   * By next month they will have been investigating the murder for over a year.

Subjects and agents

1 In this active sentence the judge is the subject of the active verb and the names of the winners is the object:

   ![Diagram of subject, active verb, and object]

   * The judge will read out the names of the winners in alphabetical order.

In the passive equivalent the names of the winners becomes the subject of the passive verb and the judge becomes the agent (the person or thing that causes the action of the passive verb):

   ![Diagram of subject, passive verb, and agent]

   * The names of the winners will be read out in alphabetical order (by the judge).

2 We often don’t mention the agent in the passive, but if we do it is introduced with by.
CHICHEN ITZA
THE GREAT stepped pyramid at Chichen Itza is one of the most impressive ancient monuments in the Americas. It was built by the Mayan people in the sixth to ninth centuries. From the size and quality of the structure it is clear that it must have been one of the most important centres in the Mayan empire, which covered much of Central America in ancient times.
Chichen Itza is a UNESCO World Heritage site and was chosen as one of the seven wonders of the world in a recent popular vote. The monuments have been owned by the Mexican government since 1972 and are now open to the public.

The stone circle at Stonehenge is the greatest monument to have been built by the ancient Britons. It is regarded as England's most important archaeological site.

1 Passive multi-word verbs
If a phrasal verb has an object, we can usually make it passive. We never separate the parts of the verb in the passive form:

They took the company over in 2010. 🗿️ The company was taken by them over in 2010.
✓ The company was taken over (by them) in 2010.

**ACADEMIC ENGLISH** There are several prepositional verbs and phrases which are commonly used in the passive, especially in writing:

- be aimed at
- be applied to
- be based on
- be considered as
- be found in
- be known as
- be referred to (as)
- be regarded as
- be related to (can be seen as)
- be thought of (as)
- be used as

The agency's new outreach scheme is aimed at unemployed graduates.

2 Passive -ing forms
We can use -ing forms in the passive:

<table>
<thead>
<tr>
<th>ACTIVE</th>
<th>PASSIVE</th>
</tr>
</thead>
<tbody>
<tr>
<td>-ing form: I don't like people bullying me</td>
<td>being + past participle: I don't like being bullied.</td>
</tr>
<tr>
<td>having + past participle: Having signed the deal, we went out to celebrate.</td>
<td>having been + past participle: The deal having been signed, we went out to celebrate.</td>
</tr>
</tbody>
</table>

We can use either having been + past participle or being + past participle to refer to the past after certain verbs which are followed by an -ing form, e.g. regret, remember:

We regret not having been shown/not being shown the Acropolis.
(= We regret the fact that the tour guide didn’t show us the Acropolis.)

3 Passive infinitives
There are several passive infinitive forms.

- to be + past participle (to refer to the present or future):
  Children like to be praised when they do well at school.
  James was hoping to be accepted on the engineering course.

- to have been + past participle (to refer to the past):
  Stonehenge is the greatest monument to have been built by the ancient Britons.
  This ascent is the first to have been achieved without the aid of oxygen.

- in reported speech with ask for + object:
  Inspector Pascoe asked for the prisoners to be held in the cells overnight.
We can use the passive infinitive (or an active -ing form ➤ Unit 46.4) after need:
That cage really needs to be cleaned. (= That cage really needs cleaning.)
4 Verbs with two objects

Some active verbs have a direct and an indirect object:

They offered the customer a refund.

Either object can become the subject of the passive verb:

The customer was offered a refund. A refund was offered to the customer.

If the object of the passive verb is the indirect object of the active verb it is usually introduced with a preposition, e.g. to the customer (➤ Unit 42.3).

5 Verbs not used in the passive

| Verbs with no direct object  | X The visitors were arrived early.  | ✔ The visitors arrived early. |
| (intransitive verbs)        | X The plane has been landed.       | ✔ The plane has landed.       |
|                            | X He was wanted to leave.          | ✔ She wanted him to leave.    |
|                            | X Your questions are refused to answer. | ✔ I refuse to answer your questions. |
| Certain verbs followed by (object +) to + infinitive verb, such as want (him to leave), refuse (to answer) | X A Ferrari is had by John. | ✔ John has a Ferrari. |
|                            | X Marilyn Monroe is resembled by her. | ✔ She resembles Marilyn Monroe. |
| Certain verbs describing states, such as have (= own), be, belong, lack, resemble, pretend and seem | X Lunch is being had by John. | ✔ John’s having lunch. |
| have + noun to describe an action |                                |                                |
| e.g. have a shower, have lunch |                                |                                |

For make/let ➤ Unit 63.3

6 Reasons for using the passive

We often use the passive

• when the agent is not relevant, or not known:

Wars have been fought throughout history. (Who fought them is not important here.)
I think the old house has been demolished. (We don’t know who did it.)

• when the agent is obvious from the context or from general knowledge:

The parcel’s being delivered at midday. (obviously by the delivery company)

• when we want to be less direct, or more polite in a formal situation. Compare:

Will you grant our application for planning permission? (direct question)
Will our application for planning permission be granted? (more polite/less direct)

• when we want to describe general feelings, opinions and beliefs (➤ Unit 63.1):

Rio de Janeiro has been described as the most beautiful city in the Americas.
São Paulo is said to be the fastest-growing city in South America.

Sometimes we know the identity of the agent, but we don’t want to mention it because we don’t want to blame a specific person, or we want to avoid personal responsibility:
I see the washing-up hasn’t been done. Oh dear, look, the vase has been broken.

7 Using passives in writing

| ACADEMIC ENGLISH | In written English we often use the passive to |
|                  | • focus on the issues rather than on the people involved: |
|                  | The research was carried out over a period of six months. |
|                  | • describe rules and procedures: |
|                  | Answers must be written in ink. Candidates will be interviewed in alphabetical order. |
|                  | • describe commercial, industrial and scientific processes: |
|                  | Minutes are taken and then submitted to the chair for approval. |
|                  | Components are electronically tagged and transported to the production line. |
|                  | • describe historical, economic and social processes: |
|                  | Tribal lands were sold years ago. The currency has been devalued twice since 1980. |

The story of Icarus

The story of Icarus is one of the most famous myths to have/to have been preserved from ancient Greek times. Icarus and his craftsman father, Daedalus, were summoned to Crete to work for King Minos. Minos was the wealthiest king in Greece but had had a great rival in Theseus, King of Attica.

Having arrived/been arrived in Crete, Daedalus started constructing the famous maze or Labyrinth which contained the terrifying Minotaur, a creature that was half-man and half-bull. Years later, the Labyrinth having been/to be completed, King Minos asked for fourteen Athenian youths to be/being sacrificed to the Minotaur. As Daedalus was himself an Athenian, he was offended by this and Theseus was decided to help by him/he decided to help Theseus to kill the Minotaur.

King Minos was furious to discover that Daedalus had helped his arch enemy and soldiers were sent to arrest him/to be arrested soldiers were sent. But Daedalus and his son had escaped to a secret workshop that was had by them/they had on the cliffs overlooking the sea. There they hatched a plan to escape by flying away. Daedalus made two pairs of wings from eagle feathers. But he made a serious mistake – the feathers were holding/held together by wax. Icarus put on his wings and jumped off the cliff, flying high into the sky. But as he flew higher the heat from the sun melted the wax and Icarus was plunged/plunged to his death in the sea below.
A passive verb form would be more suitable for twelve of the sentences 1–20. Tick (√) the eight sentences which should not be changed. If you think a sentence should be changed, choose the correct reason(s) (A–D) from the box, then rewrite the sentence. The first two (0 and 00) have been done as examples.

The passive form is more appropriate because:
A the agent is unknown or unimportant
B the agent is obvious from the context or general knowledge
C we are describing rules, processes or procedures
D we are describing a general feeling or opinion

0 You must dry clean this garment. A/B...This garment must be dry cleaned.

19 The local authorities refused to give us any assistance.

20 We divide up the tips and share them equally amongst the staff.
63 Other passive structures

Hisarlik in modern-day Turkey is believed to be the site of the ancient city of Troy.

1 Passive reporting structures

When we want to describe an impersonal or general feeling (not something said by a particular person), or we don’t want to mention the person whose words are being reported, we can use a passive form of the reporting verb. For example:
- subject + passive verb + to + infinitive:
  *He was said to be innocent. He was asked to leave.*
- It + passive verb + that clause: *It was said that he was innocent.*

We can use these passive patterns as an alternative to using an impersonal subject like *they*:
*They said he was innocent.*

More on structures with impersonal *it* ➤ Unit 44

We can use the same pattern with *it* when reporting specific decisions or opinions:
*It was decided/agreed/felt that* it would be too costly to take the case to trial.

**ACADEMIC ENGLISH**
We can use these structures with verbs such as *assume, argue, believe, demonstrate, know,* etc:
*Hisarlik is believed to be the site of ancient Troy.*
*It is often argued that* rapid deforestation is the cause of most soil erosion.

*be regarded as/considered as,* etc. ➤ Unit 62.1

We can also use the pattern with *it* to report specific opinions, conclusions, etc:
In ‘The Selfish Gene’ *it is suggested that* genes control almost every aspect of human behaviour.

2 Passives with get

In informal English, *get* can be used instead of *be* in passive forms which describe actions. We often use *get* to describe accidental, negative, unusual or unexpected actions:
*How did he get hurt?* (= How was he hurt?)

*His hand got trapped in the car door.* (= His hand was trapped ...)

*Hurry up or you’ll get caught in the storm.* Some of the workers are getting laid off.

*Apparently there was a power cut – Jane got stuck in the lift for over an hour!*

⚠️ We cannot use *get* to describe states:
*✗ That house gets owned by my uncle. ✓ That house is owned by my uncle.* (state)

3 make, let, help, etc.

With the verbs *make* (meaning force or require), *see, hear* and *help* we make active sentences with verb + object + infinitive without to:
*The boss made me work late. I saw her take it. We helped them unpack.*

But in the passive form we use the infinitive with *to*:
*→ I was made to work late. She was seen to take it. They were helped to unpack.*

The verb *let* (meaning allow) has no passive form so we use a passive form of *allow/permit* or give permission + infinitive with *to*:
*The teacher let us leave early. ✗ We were let to leave early. ✓ We were allowed/permitted/given permission to leave early.*

The pharaohs of ancient Egypt had their tombs built while they were still alive, as the work took many years to complete.

1 have/get something done

We use have + object + past participle (known as the causative) to describe something which is done for the subject by someone else. We can use it in all tenses.

The pharaoh had the pyramid built while he was still alive. (Slaves built it for the pharaoh.)

Have you just had your hair done? It looks lovely. (Has the hairdresser done it for you?)

We'll probably have the roof repaired in the spring. (Builders will do it.)

In informal English we can use get instead of have:

Do you get your hair done at Ebony's? I'm going to get the keys copied. Do you want a set?

Harry got himself moved to the New York office.

In imperatives it can be the person spoken to or someone else who will do the action:

Have/Get that mess cleaned up at once!

Please have those spreadsheets faxed over to the New York office this afternoon.

We can use the causative in future statements as commands or promises. Here it can be the subject of the sentence or someone else who will do the action:

Make sure you have those keys back on my desk tomorrow morning.

Don't worry. I'll have the report finished before the meeting. (I will do it or I will get it done.)

We're going to get it fixed as soon as the insurance money comes through.

We can also use this pattern to describe something which is done to the subject by someone else without them asking for it, often something unpleasant or unexpected:

Liz had her passport stolen. (= Her passport was stolen.)

John got his tyres slashed by some hooligans.

Darryl argued with the police officer and ended up getting himself arrested.

Out of the blue, Mark had his plan approved by the board yesterday.

⚠️ With this meaning, we can only use have, not get, in the present perfect:

X I'm afraid Alicia has got her visa application refused.

✓ I'm afraid Alicia has had her visa application refused.

2 have somebody do something

There is an 'active' version of the causative which means 'cause someone to do something'. The object is the person who does the action. There are two patterns:

- have + object + infinitive:

  I had the mechanic repair my washing machine.

  They're having the architect draw up a set of plans for the new extension.

  This pattern is more common in American English.

- get + object + to + infinitive: I'll get the hairdresser to do my hair this afternoon.

  We get the gardener to mow the lawn once a fortnight in the summer.

In British English we can use the get + object + to + infinitive pattern with the meaning of 'persuade or force someone to do something':

After numerous letters from our solicitor we finally got them to give us a refund.

The Terracotta Army

In 1974, Chinese farmers digging a water well near the city of Xi'an discovered several terracotta statues buried in the earth. Senior archaeologists were called in and (1) ............... a large pit dug in the surrounding area. What they discovered made headlines around the world – it was the fabled terracotta army of China's first emperor, Qin Shi Huang.

According to the ancient historian, Sima Qian, Emperor Qin had (2) ............... an enormous underground necropolis, or city of the dead, constructed around the year 200 BCE. The emperor (3) ............... his servants to fill the necropolis with carved soldiers whose purpose was to protect him in death. For years people thought Sima Qian's account was simply a myth, but we now know it to be true.

Excavations continue at the site but archaeologists believe there to be around 8,000 soldiers and over 500 horses. The emperor (4) ............... each soldier (5) ............... separately, so that no two soldiers look exactly the same. Because of the huge number of statues required, a certain amount of mass production was necessary. But the emperor (6) ............... his artists to carve a different face on each statue. Some people believe he made the artists (7) ............... the faces of real soldiers, but this seems unlikely. Because the emperor wanted his army to last, he (8) ............... his carved soldiers (9) ............... from terracotta, which, unlike wood, does not rot or disintegrate with time.

Emperor Qin (10) ............... himself (11) ............... in a mausoleum close to the site of the terracotta army. It is likely that in the coming years the Chinese government will (12) ............... its archaeologists to excavate the tomb. It may turn out to contain even greater treasures than those found in the tomb of Tutankhamun in Egypt. For it is certain that an emperor as powerful as Qin would have (13) ............... his most valuable treasures (14) ............... close to his own body.
Review MODULE 14

1 **UNITS 62 AND 63** This text would be improved if at least seven of the verbs were passive. **Underline** the phrases that should go into the passive and rewrite those sections of the text below. The first one has been done as an example.

Solving the Mystery of Hieroglyphics

1 – For almost two thousand years the symbols and inscriptions which people had carved
2 – onto the great monuments of ancient Egypt were a complete mystery. They were
3 – obviously a kind of writing, but nobody knew what they meant.
4 – Then, in 1799, a French officer discovered a strange stone in the small Egyptian town of
5 – Rosetta. It had three types of writing carved into its surface. One of the languages was
6 – Greek but the other two were unknown. A year later the British seized the stone and
7 – the British moved it to the British Museum in London.
8 – For twenty years the stone lay gathering dust in the museum. Then in 1822 somebody
9 – asked a French scientist named Jean François Champollion to look at the stone. He
10 – immediately recognised that some of the symbols matched those he had seen on
11 – monuments in Egypt. By comparing the Greek words with the Egyptian symbols he was
12 – able to work out their meaning. The Egyptian symbols were hieroglyphs, a type of
13 – writing in which pictures represent sounds and meanings.
14 – Once somebody had solved the puzzle of their written language it became possible for
15 – scholars to decipher the inscriptions on all the great monuments. Thus people finally
16 – unlocked the mysteries of Egypt’s fabulous history and culture.

Dependent prepositions

In English there are many verbs, nouns and adjectives which are used with particular or dependent prepositions. For example, we *accuse* someone *of* a crime, not *at* a crime, *by* a crime or *for* a crime. Examples include:

<table>
<thead>
<tr>
<th>VERB + PREPOSITION</th>
<th>NOUN + PREPOSITION</th>
<th>ADJECTIVE + PREPOSITION</th>
</tr>
</thead>
<tbody>
<tr>
<td>to succeed in something</td>
<td>to have a fear of something</td>
<td>to be keen on something</td>
</tr>
</tbody>
</table>

Multi-word verbs

1 Multi-word verbs are formed from a verb, e.g. *grow*, plus a preposition, e.g. *on*, *off*, *up*, or/and an adverb, e.g. *away*, *back*, *out*. The combination sometimes creates a new meaning which is different from the meaning of the original verb.

2 There are four types of multi-word verb:

<table>
<thead>
<tr>
<th>TYPE</th>
<th>EXAMPLES</th>
<th>SENTENCE</th>
</tr>
</thead>
<tbody>
<tr>
<td>prepositional verbs</td>
<td>cope with something rely on somebody</td>
<td>How does she cope with all those kids?</td>
</tr>
<tr>
<td>intransitive phrasal verbs* (two-part phrasal verbs)</td>
<td>come back grow up</td>
<td>Make sure you come back before midnight.</td>
</tr>
<tr>
<td>transitive phrasal verbs (two-part phrasal verbs)</td>
<td>put something off turn somebody down</td>
<td>We’re putting the party off because of the awful weather.</td>
</tr>
<tr>
<td>phrasal-prepositional verbs (three-part phrasal verbs)</td>
<td>look forward to something catch up with somebody</td>
<td>They’re looking forward to the holidays.</td>
</tr>
</tbody>
</table>

* As intransitive phrasal verbs do not have an object, they cannot be made passive:

  X Have the children been come back yet? ✓ Have the children come back yet?

3 Multi-word verbs form tenses, and are used in questions, negatives and (apart from intransitive phrasal verbs) in the passive, in the same way as other verbs:

**Will you be putting the party off?** (future continuous question)

*The party has been put off until next month.* (present perfect passive)

Collocations

Collocations are words that often go together. There are different patterns:

<table>

<tr>
<th>adjective + noun</th>
<th>verb + noun</th>
<th>verb + noun + preposition</th>
</tr>

<tbody>
<tr>
<td>a strong swimmer a heavy smoker a great success</td>
<td>take a photo take turns run a race run a business fail a test</td>
<td>make friends with somebody take care of somebody make the most of something</td>

General rules
Prepositions after verbs, nouns and adjectives always have an object. The object can be a noun, pronoun or verb -ing form. (Note that to can be a preposition):
I apologised to my boss/her/the managing director.  I apologised for arriving late.
The -ing form can have its own subject. This can be a noun phrase, an object pronoun or, in more formal English, a possessive adjective:
I'm looking forward to my wife returning.  Dad insisted on us apologising.
The detective insisted on our leaving the crime scene. (formal)

We use whether, not if, after prepositions:
✗ That depends on if you pass the test.  ✓ That depends on whether you pass the test.

Noun + preposition
Some nouns are followed by dependent prepositions:
Please indicate your preferred method of payment.
The policy will provide insurance against damage to your vehicle.
She has a wonderful relationship with her children.

If a noun is related to a prepositional verb (➤ Unit 66.5), the noun often has the same preposition:
He succeeded in winning the Palme d'Or. (to succeed in something)
We congratulated him on his success in winning the Palme d’Or. (a success in something)

However, some nouns with dependent prepositions have a different preposition from the verb, or have a preposition where the related verb doesn’t have one:
a demand for something (to demand sth)
a discussion about something (to discuss sth)
a fear of something (to fear sth)
an influence on/over something/somebody (to influence sth/sb)
a relationship with somebody (to relate to sb)

The members had a discussion about the subscription charges.
✗ We discussed about the subscription charges.  ✓ We discussed the subscription charges.

There are some noun + preposition forms which can only be followed by a noun:
✗ The court issued a demand for repaying of the debt.
✓ The court issued a demand for repayment of the debt.

Preposition + noun, e.g. at hand, without delay ➤ page 365

Adjective + preposition
A lot of adjectives describing feelings and opinions have dependent prepositions:
My grandfather’s very keen on trout fishing.  I’ve never been afraid of flying.
People are becoming increasingly worried about climate change.

If an adjective is related to a verb or noun which takes a preposition, the adjective usually takes the same preposition:
We depend on his generosity.  ➤ We are dependent on his generosity.
I expressed my gratitude for their assistance.  ➤ I was grateful for their assistance.
He’s always had an interest in art.  ➤ He’s always been interested in art.

Some adjectives can be followed by different prepositions, depending on the meaning:
Debbie’s been promoted. I’m so glad for her. (= pleased for her)
I was so exhausted, I was glad of a break. (= grateful for it)
A lot of people are concerned about global warming. (= worried)
Don’t ask Mike, he wasn’t concerned with the decision. (= involved)

Phone networks on brink of collapse

By Jeremy Iston

The ever-growing demand for smartphones has placed an unexpected strain on the world’s mobile phone networks.

Smartphones are full of applications designed to send and receive emails, surf the Internet, watch online videos and access social networking sites. Although the mobile phone network has been upgraded to deal with the task of transmitting this kind of data, it was originally made for the transmission of basic phone calls and text messages, and is therefore struggling to find a way of dealing with these increasing demands.

It is the sophisticated applications on the new smartphones which are responsible for most of this increase in cellular traffic. To ensure that the information available to their users is kept constantly up to date, some of these applications connect to the network every eight seconds. Others continuously stream information or stay logged on for hours while downloading videos or messages. This has the effect of monopoliising the network and slowing down speeds for other users. Phones crowded with these data-hungry applications are selling at a phenomenal rate and

are popular among young people. In the UK over 60,000 phones that use the Android wireless system are sold every day.

If demand continues to grow at this rate the entire system is in danger of collapsing. What is the solution? The latest LTE (Long Term Evolution) technology can deal with much larger volumes of traffic, but requires new phone masts and new handsets. The expense of installing the new network and producing new handsets means that the prospect of such a system being adopted worldwide is unlikely in the immediate future. The alternative is to build more transmitters. We may be fond of our mobile phones, but do we really want more of these eyesores cluttering up our cities and countryside?

1 Preposition or to + infinitive
Many adjectives describing feelings and emotions can be followed by a preposition or to + infinitive:

We were **annoyed at finding** our places taken. He’s **keen on learning** archery.
We were **annoyed to find** our places taken. He’s **keen to learn** archery.

Some verbs can also be followed by a preposition or to + infinitive, but there may be a change of meaning:

They don’t **agree with** the government’s policy. (= They have a different opinion.)
I **agreed to help him fill out the forms.** (= I said that I was willing to ...)

More on verbs + infinitive ➢ Units 45 and 46.3/4

2 Preposition or that clause
Many of the words which describe or report what we say, think or feel are followed by a preposition + -ing form. Some of these words can also be followed by a that clause:

The judge **insisted on the jury disregarding** the doctor’s testimony.
The judge **insisted that the jury disregarded** the doctor’s testimony.

⚠️ We can’t put a that clause after a preposition, except with expressions such as the fact that or the idea that:

× My parents **disapproved of that my brother left school at sixteen.**
✓ My parents **disapproved of the fact that my brother left school at sixteen.**

Reporting verbs ➢ Unit 50  Subjects with -ing forms ➢ Unit 65.1

3 Verb + object + preposition
After certain verbs, e.g. accuse, prevent, we use object + preposition + -ing form to link the verb with the person it affects and the action it refers to:

The police **accused her of stealing.**

His sense of duty **prevented him from leaving.**

These verbs can be made passive:

She was **accused of stealing (by the police).**
He was **prevented from leaving (by his sense of duty).**
4 Verbs with two objects

Some verbs with dependent prepositions have two objects, e.g. explain something to somebody, discuss something with somebody. We usually use the pattern below with a direct object (usually a thing) and an indirect object (usually a person):

The tour guide discussed the day’s schedule with us.

Can you explain it to me?

Unlike other verbs used with two objects, e.g. give, with these verbs we cannot omit the preposition: He gave it to me. He gave me it.

X He explained me it. X He explained it me. ✓ He explained it to me.

X He discussed us it. X He discussed it us. ✓ He discussed it with us.

In the passive, only the direct object can become the subject of the passive verb:

My teacher explained it to me. → X I was explained it by my teacher. ✓ It was explained to me (by my teacher).

With some verbs we can change the order of the objects, but we use different prepositions:

I blame our schools for the poor standard of education. (= blame somebody for something)
I blame the poor standard of education on our schools. (= blame something on somebody)

Common prepositions with prepositions and two objects ➤ page 371

5 Prepositional verbs

Prepositional verbs consist of a verb, e.g. look, plus a preposition, e.g. into, at, for.
The combination of the verb and preposition often creates a new meaning which can sometimes, but not always, be worked out from the parts:

She looked for her missing passport. (= searched, tried to find) 
Would you mind looking into his complaint? (= investigating, researching)

Prepositional verbs are transitive – they always have an object. We put the noun or pronoun object after the preposition:

We didn’t fall for his story. We didn’t fall for it.

The rules for object position are different for phrasal verbs (➤ Unit 67.3).
With prepositional verbs we cannot put an adverb between the preposition and object, but we can put an adverb between the verb and preposition:

X She parted with reluctantly her money. ✓ She parted reluctantly with her money.

FORMALITY CHECK In formal English we sometimes prefer to avoid a preposition at the end of a sentence. With prepositional verbs we can put the preposition in front of (but NOT after) the relative pronouns whom or which:

These are the principles (which) our party stands for.

→ X These are the principles which for our party stands.

✓ These are the principles for which our party stands.

That’s the type of client (whom) I’m dealing with.

→ That’s the type of client with whom I’m dealing.

ACADEMIC ENGLISH Some prepositional verbs are mainly used in the passive form (➤ Unit 62.1), especially in written English:
The marketing strategy is aimed at a target audience of eighteen- to twenty-five-year-olds.

New technology catches liars

A team at Cornell University in New York has developed software (1) **aimed** / **designed** at detecting lies in emails and text messages.

Traditional lie detectors work by measuring a person’s heartbeat. They (2) **look** / **rely on** (3) **that** / the **fact that** a person’s pulse gets faster when they are nervous or stressed – a strong indicator that they are not telling the truth. The new software is much more subtle. It scans electronic messages and looks (4) **for** / **like** various clues which indicate lies are being told.

Researchers have identified a number of these clues, or ‘falsehood indicators’, ranging from overuse of the third person to frequent use of negative adjectives and verbs. A team of volunteers provided (5) **with** the researchers / the researchers with both truthful and dishonest emails. By comparing them they came (6) **across** / over a number of characteristics. They noticed, for instance, that truthful emails were usually short and written in the first person, with lots of use of ‘I’ to start sentences. Dishonest emails were on average 28 percent longer than honest ones because people (7) **consider** / **worry** about not sounding convincing, so tend to give more detail when lying. And because liars want people to fall (8) **at** / **for** their stories, they tend to use more sense verbs such as ‘see’ and ‘feel’, perhaps in an attempt to gain the reader’s sympathy.

There has been a lot of interest from law enforcement agencies, insurance companies, welfare agencies and banks – all of which are struggling to cope (9) **for** / **with** the growing tide of fraud. They hope the new program will be effective in protecting (10) **from the public** / the **public from** the ever-increasing threat posed by Internet crime.

3. Complete each sentence with the correct form of a suitable verb from box A and a preposition from box B. Use each verb once only. Some of the prepositions will be needed more than once. You will need two prepositions in 8–12. **Listen and check.**

A: accuse agree blame convince cure depend disagree explain present quarrel rely
B: about for from to of on over with

67 Phrasal verbs

In the old days, if somebody wanted to look something up, they’d open an encyclopaedia – now they just log on to the Internet.

1 Grammar of phrasal verbs

Phrasal verbs consist of a verb plus a particle, usually an adverb. They can be transitive or intransitive. Intransitive phrasal verbs are sometimes used in imperatives:

*Watch out – that floor's not very safe. Come on! I can't wait all day!*

Some phrasal verbs have a transitive use with one meaning, and an intransitive use with a different meaning. Compare:

*The plane took off on time. (take off, intransitive = become airborne) The man took off his coat. (take something off, transitive = remove)*

Note the correct word order in these sentence patterns:

<table>
<thead>
<tr>
<th>transitive phrasal verb + noun object</th>
<th>✓ I made that story up. ✓ I made up that story.</th>
</tr>
</thead>
<tbody>
<tr>
<td>transitive phrasal verb + pronoun object</td>
<td>X I made up it. ✓ I made it up.</td>
</tr>
<tr>
<td>transitive phrasal verb + adverb</td>
<td>X I paid early back the loan. ✓ I paid back early the loan.</td>
</tr>
<tr>
<td>transitive phrasal verb + relative pronoun</td>
<td>X That's the room which up I did. ✓ That's the room which I did up.</td>
</tr>
<tr>
<td>transitive phrasal verb + passives</td>
<td>X That story was made by a resentful employee up. ✓ That story was made up by a resentful employee.</td>
</tr>
</tbody>
</table>

We can form nouns from some multi-word verbs (➤ Unit 70):

*The car broke down five kilometres from home.*

→ *The breakdown happened five kilometres from home.* (noun)

2 Meaning of phrasal verbs

Phrasal verbs usually have a meaning which is different from the meaning of the parts:

*Are you taking a suitcase? (take = carry)*

*The power’s off. (off = not connected)*

*After the argument, he took off without a word. (take off = leave unexpectedly)*

The same phrasal verb can have more than one meaning:

*That music’s too loud. Turn it down. (= reduce the volume)*

*They offered her the job but she turned it down. (= didn’t accept the job)*

In some cases it is possible to get an idea of the meaning of a multi-word verb from its particle, but note that these particles do not always have the meanings shown here:

<table>
<thead>
<tr>
<th>up</th>
<th>completion/finality/maintaining sth</th>
<th>give up break up eat up keep up</th>
</tr>
</thead>
<tbody>
<tr>
<td>down</td>
<td>collapse, movement downwards/writing</td>
<td>fall down break down note down</td>
</tr>
<tr>
<td>out</td>
<td>removal/thoroughness</td>
<td>take out work out see out mark out</td>
</tr>
<tr>
<td>on</td>
<td>starting/continuing/progressing</td>
<td>turn on carry on take on get on</td>
</tr>
<tr>
<td>off</td>
<td>stop connection/departure</td>
<td>turn off break off set off</td>
</tr>
</tbody>
</table>
FORMALITY CHECK Where a multi-word verb has no exact synonym, e.g. grow up, we can use it in formal and informal contexts. However, when there is a single verb with an equivalent meaning (e.g. think about = consider), the multi-word verb tends to be used in informal contexts while the single verb is more formal. Compare: The bank will consider your application for a loan in due course. (formal) Honestly, how can you think about money at a time like this! (informal)

3 Differences between phrasal and prepositional verbs
The main difference between phrasal and prepositional verbs is the way we use them with objects. Because prepositions are always followed by an object, with prepositional verbs we have to put an object (noun or pronoun) after the preposition:

I won’t stand for this behaviour any longer. I won’t stand for it any longer.

Phrasal verbs are formed from a verb + adverb particle. As adverbs do not need to be followed by an object, we can put a noun object before or after the particle:

We couldn’t work out the answer. We couldn’t work the answer out.

When the object of a phrasal verb is a pronoun we always put it between the verb and particle:

\[
\begin{align*}
\times & \text{ We couldn’t work out it.} & \checkmark & \text{ We couldn’t work it out.}
\end{align*}
\]

Learner dictionaries indicate which type a verb is by showing a noun object with the verb:

put sb/sth off phr v [T] to arrange to do something at a later time or date, especially because there is a problem, difficulty, etc. They’ve put the meeting off till next week.

ACADEMIC ENGLISH Phrasal verbs are not common in formal written English, unlike prepositional verbs.

4 Phrasal-prepositional verbs
These verbs are formed by combining a verb with an adverb and preposition. The combination creates a new meaning which cannot usually be understood from the meanings of the individual parts:

We look forward to hearing from you. (anticipate with pleasure)

They are transitive and can be made passive:

All her staff looked up to her. (active) She was looked up to by all her staff. (passive)

We usually put noun or pronoun objects after the second particle:

I can’t put up with this treatment any longer. I can’t put up with it any longer.

We cannot usually put the object immediately after the verb or between the particles:

\[
\begin{align*}
\times & \text{ I can’t put this treatment up with any longer.} & \times & \text{ I can’t put it up with any longer.} \\
\times & \text{ I can’t put up this treatment with any longer.} & \times & \text{ I can’t put it up with any longer.}
\end{align*}
\]

However, if the verb has two objects, e.g. let somebody in on something, take somebody up on something, we can put a noun or pronoun object immediately after the verb:

We let James in on the plan. We took her up on her offer.

We can put an adverb between the two particles, but not before the first particle or after the final particle:

\[
\begin{align*}
\checkmark & \text{ He stands up strongly for his principles.} & \times & \text{ He stands strongly up for his principles.} & \times & \text{ He stands up for strongly his principles.}
\end{align*}
\]

Practice  To complete these exercises you may need to refer to page 372.

1  Rewrite the parts of the sentences in brackets. Put the words in the correct order, as in the example.
   0  Computers don't have floppy disk drives any longer.
      (away / they've / them / done / with).
      They've done away with them. ......................

   1  We have a wireless network in the office. (by / it / our / was / set / IT engineer / up).

   2  The architect (old barn / beautiful house / the / into / turned / a).

   3  Fog at JFK airport (up / held / for several hours / them).

   4  Don't (tomorrow / put / until / off / it); do it now.

   5  This calculation is so complicated! (help / it / can / out / you / me / work)?

   6  Silvio's coming for the weekend. We (him / put / in the spare room / can / up).

   7  I can get the machine started but I don't know (off / to / it / how / turn).

   8  You don't have to complete the form; the computer (it / automatically / out / fill / will).

2  Rewrite the verb phrases in these sentences using a suitable phrasal or prepositional verb from the box. Use a pronoun (it, him, her, them) to replace the underlined object, as in the example.

   carry out  fix up  get over  give up  look into  pick up  point out  run down  run into  sort out  take after

   0  Alan's managed to quit smoking. ....................... to give it up

   1  Would you mind organising the removal yourself?

   2  I met Steve quite by chance at the supermarket this morning.

   3  I've arranged the meeting for ten o'clock tomorrow.

   4  You're always criticising your colleagues.

   5  I'm sure the police will investigate the burglary.

   6  The builders undertook the job very professionally.

   7  Could you collect the children from school tonight?

   8  Has Perry recovered from the flu yet?

   9  They really resemble their mother, don't they?

   10  Would you highlight the advantages for me?

**Anger management**

MANDY DICKSON has set up a one-day anger workshop which helps people learn about and deal with their anger. It is aimed at ordinary people who don’t feel able to control their tempers. She points out that anger is natural and nothing to be ashamed of, but we should recognise it and look at its true causes. Then we can face it, and begin to do something positive. Participants fill in a questionnaire about things that make them angry. They compare their responses and often find that the causes are other feelings such as fear or grief.

But in our culture it isn’t acceptable to act these feelings in public. Men, in particular, are supposed to cover these feelings. Once we know the causes of anger, we must learn how to keep situations which will induce them. When we are angry we want other people to understand us, but we often make the mistake of run those around us. Anger is often caused by the feeling that you have been let by other people. But we can’t always expect other people to know our feelings. So the most important way to cut the number of anger-producing situations is to tell people exactly how we feel. It really all comes down with communication.

**4 Grammar in Use**

There are ten more mistakes with phrasal and phrasal-prepositional verbs in the dialogue (incorrect word order, use of objects and particles). Correct the mistakes, as in the example. \[4.26\] Listen and check.

**Example:**

ANDY That’s true. Look, I hate to bring it up but didn’t you say you were a bit of an expert on computer programs? Could you give me a hand with this one?
GAVIN Of course. No problem. But I’m a bit busy right now. I have to get back of the office in a few minutes.
ANDY Sorry. I don’t want to hold you up. Can we fix up another time?
GAVIN Sure. I’ll be here for lunch tomorrow. We can catch up each other with then and set up it. Well, I ought to be going.
ANDY Yes, I’d better get down at my work. I’ve got a big report to finish ...
68 Common collocations

Young people are often the first to take advantage of new technology. If a product does well with teenagers, there is usually a strong possibility it will succeed with the rest of the public.

1 Adjective + noun

We often use specific adjectives with particular nouns. For example, we can describe rain as light or heavy but we can’t say strong rain or weak rain.

X Strong rain is predicted this evening. ✓ Heavy rain is predicted this evening.

These are some common adjective + noun collocations. Sometimes the meaning changes:

<table>
<thead>

</tr>
<tr>
<td>good/bad</td>
<td>behaviour habit luck news person time word</td>
</tr>
<tr>
<td>poor</td>
<td>health memory performance relation (= less successful than others)</td>
</tr>
</tbody>
</table>

The lawyer presented a strong argument but failed to win the case. Don’t go by car, the traffic’s really heavy today.

Karl’s very strong so heavy work doesn’t bother him.

⚠ Combinations from other languages do not often translate directly. It’s always best to check in a dictionary first.

2 Verb + noun

There are many verb + noun collocations that we use to describe particular actions, e.g. take a bath, tell a story, make a mistake. In many cases the meaning of the verb does not change, but in some cases it has a new meaning:

miss the point (= not understand an argument) miss a bus/train, etc. (= arrive too late)
pass an exam (= succeed in) pass a law (= the act of officially creating a new law)
run a business (= manage a business) run a bath (= fill a bath with water)

We make most of these combinations with the verbs make, do, have and take. See opposite.

3 Verb + noun + preposition

A few verbs combine with a noun and a preposition:

<table>
<thead>
<tr>
<th>have</th>
<th>keep</th>
<th>make</th>
<th>run</th>
<th>take</th>

1  **GRAMMAR IN USE** Choose the correct words in *italics.*

**Listen and check.**

**LINDY** Carla. You’re good with machines. Could you
(1) *make / do* me a favour? I need to (2) *do / make* a
phone call and my mobile doesn’t seem to be working.

**CARLA** Let me (3) *have / do* a go. Ah. There’s a very
(4) *weak / light* signal here. We should go into the
garden, the signal might be (5) *stronger / heavier* there.

**LINDY** But it’s raining.

**CARLA** That’s OK. It’s only (6) *light / weak* rain. Right. Let’s go ...
Great, it seems to be OK now.

**LINDY** Thanks. Actually, I’ve never been very happy with that phone.
It’s probably time I (7) *did / made* a change and bought a new one — it’s always
had pretty (8) *faint / poor* performance and the battery is useless. It can’t even
(9) *take / make* photographs!

**CARLA** Well, the new models are much better, and cheaper ...

**LINDY** Which one do you suggest? You know I have faith (10) *of / in* your judgement.
And I’m sure I’d (11) *make / do* a mess of it if I tried to buy one on my own!

**CARLA** This one I’ve got is good. These phones (12) *do / run* rings around most of the
competition. Why don’t we go out and look at what’s available?

**LINDY** We’d have to drive to the high street and the traffic’s pretty (13) *heavy / strong* at
this time of day.

**CARLA** What about tomorrow then? We could go in the late morning and (14) *do / have*
some lunch afterwards, just something (15) *light / weak* — there’s that nice café by
the park.

**LINDY** That sounds great.

HIGHLAND HORRORS

This month Jeremy Vegal’s ‘Hotel Road Test’ is the Trent Castle Hotel in Scotland.

In the bad old days, some country hotels had a reputation of being cold, draughty and dour places which (0) tried hard to make their guests feel as unwelcome as possible – people (00) going on holiday there often regretted it. Well, the tourist industry has moved on and we felt it was time to see if the winds of change blowing through the British hotel world had yet reached our northern extremities. From the catalogues and brochures, it seems that every castle in Scotland has turned itself into a hotel, and it was difficult to (1) reach a conclusion about which one to try. In the end we (2) risked things and settled for a little-known but promising place deep in the Highlands.

So, full of optimism, I (3) travelled north on the overnight sleeper, a trip that seemed to (4) last for a very long time, jumped into a cab and headed east to the Trent Castle Hotel. I had (5) investigated and I knew that the place had been converted from a sixteenth-century fortress about five years ago. From the outside it certainly looked the part with tall granite walls and looming turrets overlooking the dark waters of Lochtrent. Clearly, many bloody battles had (6) occurred there in the past. But the owners had (7) committed an error with their work on the interior. Rather than warm and welcoming, it was just as grim and forbidding as the outside.

I got to my room on the third floor, and despite (8) experiencing difficulties with the hot water, managed to have a shower. Always eager to test a hotel’s efficiency, I called room service and asked for my (9) clothes to be washed. It took forty-five minutes for the chambermaid to arrive, and when she did, she happily informed me that the hotel would (10) impose a fee for each item of clothing I wished to have cleaned. Never one to (11) complain, I politely declined the offer of instant bankruptcy and decided to ask the woman about the possibility of an extra blanket or ten, as the temperature in my room was hovering around zero and it was only the middle of the afternoon. She (12) guaranteed to bring one straightaway, and that was the last I was to see of her for my entire visit.

Anxious to find some warmth, I decided to (13) make an attempt at finding the hotel sauna, sure that some dry heat would (14) be healthy for me. But when I asked the receptionist about the location of this facility, she looked at me as though I had invented it. ‘It’s been closed for months,’ she announced. ‘If you want something to do you could always (15) go for a walk and (16) buy some things, there’s a lovely souvenir shop six miles down the road.’ The prospect was deeply unexciting.

‘Look,’ I said, ‘I don’t want to (17) cause difficulties, but the sauna is advertised in your brochure.’

‘Oh, that thing’s full of mistakes,’ she replied, ‘The printers really (18) messed it up.’

Rather like the owners, I thought to myself . . .
Review  MODULE 15

To complete these exercises you may need to refer to pages 370–2.

1  **UNITS 65, 66 AND 68**  Write one word only in each gap.

**Nuclear Fusion**

For years it has been mankind's most cherished dream – a source of energy that is clean and inexhaustible and does not (1) .......... on our ever-diminishing stocks of fossil fuels. Now a laboratory in America has (2) .......... the first step towards making that dream a reality.

The source of this energy is nuclear fusion – the energy that is created when two atoms combine or 'fuse'. This is the reaction that powers the stars and our own sun. It is very different (3) .......... nuclear fission, which is when atoms are split. Nuclear fission is the source of energy used in nuclear power stations and atomic bombs.

The National Ignition Facility (NIF) in California is designing a system in which 192 powerful laser beams are aimed (4) .......... a small pellet of tritium and deuterium, attempting to replicate the intense pressure and heat found at the centre of stars. The brief pulse of intense energy should force the atoms together to create helium, releasing huge amounts of energy in the process. Some scientists are worried (5) .......... how this energy might be used and critics have (6) .......... the American project of being a thinly-veiled attempt at developing more sophisticated nuclear weapons.

Teams in France and the UK are engaged (7) .......... similar research, but using different technology. The French project plans to use magnetic fields rather than lasers. Of course, even if scientists (8) .......... in creating these reactions, they have not yet developed a method (9) .......... converting this energy into a form that can be used for everyday purposes. If they (10) .......... a mistake, there is a (11) .......... possibility that they run the (12) .......... of creating explosive energy that cannot be controlled.

2  **UNITS 66 AND 67**  Rewrite John's half of this unnatural telephone conversation in a more natural, informal style. Use the multi-word verbs in the box to replace the underlined verbs and phrases. Make any other necessary changes, as in the example.

- do sth up

**JOHN**  (to neighbour) Yes, that's glass from the conservatory, I've just pulsed it down.

**DAVE**  (0) demolished the conservatory. Excuse me. (phone is ringing, he goes inside) Hello?

**JOHN**  John. It's Dave. How are things?

**DAVE**  Sorry, I can't hear you. I'll just (1) reduce the volume on the radio. That's better.

**JOHN**  How are things? Still working on the house?

**DAVE**  Yes. We've (2) completed the work on the kitchen and we're (3) renovating the dining room. We're (4) transforming the room into a second bedroom. I've just (5) mounted the wallpaper but I've been having trouble getting it to (6) remain vertically attached. It's a nice colour: it (7) matches the paintwork. Anyway, it's all got to be (8) organised and ready by Saturday. Jane's mother is coming and we're (9) providing accommodation for her for a few days.

**DAVE**  I thought you didn't like her.

**JOHN**  We don't (10) interact in a friendly way with each other but I can (11) tolerate her for a few days, especially if we don't (12) discuss politics!
DAVE Why do you dislike her so much?

JOHN I'm sure she (13) regards me as inferior to her. And she's so lazy, I mean she comes in, (14) removes her coat, (15) assumes a seated position and expects us to wait on her hand and foot! And she spends the whole time (16) observing everything, trying to find things to criticise!

DAVE Mmm. I see what you mean ...

Before you start

1 Review these intermediate grammar points and check you know them.

Use of prefixes and suffixes

1 Prefixes are short additions that go in front of words, e.g. *im-, un-, dis-*. We often add them to adjectives, verbs and nouns to change their meaning. Most of these prefixes make words negative:
   *possible → impossible  tie → untie  approval → disapproval*

2 Suffixes are short additions that go at the end of words, e.g. *-er, -ment, -ify*. We add them to words to change their meaning:
   *work → worker*
   and to change their class:
   *occur → occurrence (verb → noun)*
   *solid → solidify (adjective → verb)*

Compound nouns and adjectives

1 Compound nouns and compound adjectives are words which have been created by combining two words which are related to each other.

2 They can be written
   - as a single word: *dressmaker*
   - as two separate words: *fashion magazine*
   - occasionally as two words joined by a hyphen: *waste-bin*

   It is best to check the formation in an up-to-date dictionary.

3 Compound nouns and adjectives are very useful because they give a lot of information in a short space:
   *It's a place where you can park your car. → It's a car park.*
   *Does the hotel have any staff who speak English?*
   *→ Does the hotel have any English-speaking staff?*

Verbs which are often confused

Some verbs, e.g. *borrow/lend*, act as ‘mirror images’ of each other. They describe the same event from different points of view.

- If you want to use something that belongs to someone else you can *borrow* it from them. The owner of something can *lend* it to you for a certain period:
  *'Dad, could we borrow your electric drill?*
  *'Sorry. I've already lent it to Michael.'*
2 Read the information and identify examples of prefixes, suffixes, compound nouns and compound adjectives.

City invaders

UNTIL RECENT TIMES A RACCOON ROAMING AROUND CITY STREETS WAS A RARELY SEEN PHENOMENON. NOW IT IS AN ALMOST NIGHTLY OCCURRENCE.

The continuing expansion of our cities and the resulting destruction of their natural habitat has made life in the countryside impossible for many raccoons. As a result, thousands of the unfortunate creatures have migrated to the back gardens and scraps of wasteland found in many cities. Rather than hunting small animals, they simply steal from waste-bins and rubbish dumps, scavenging from the carelessly discarded human waste that lies all around them. Most people regard these urban raccoons as a nuisance, but few know what to do about them. For as soon as one is captured or destroyed, several more appear to take its place.

70 Compound nouns and adjectives

1 Compound nouns

In compound nouns the first word usually 'classifies' the second word – it describes it or tells us its purpose:

wasteland (= land that has no use) a fashion magazine (= a magazine about fashion)

The first word is usually singular:

X a dressmaker ✓ a dressmaker ✓ a car park ✓ a park

Compounds are formed in several ways:

<table>
<thead>
<tr>
<th>Type of combination</th>
<th>Examples</th>
</tr>
</thead>
<tbody>
<tr>
<td>noun + noun</td>
<td>headache cash card bathroom database</td>
</tr>
<tr>
<td>noun + verb form</td>

<td>cookbook stepping stone filing cabinet swimsuit</td>
</tr>
<tr>
<td>adjective + noun</td>
<td>highway blackbird real estate mobile phone</td>
</tr>
<tr>
<td>preposition/adverb + verb/noun</td>
<td>overview outsourcing upkeep income</td>
</tr>
<tr>
<td>verb + preposition/adverb</td>
<td>flyover fallout make-up feedback</td>
</tr>
</tbody>
</table>

The main stress is usually on the first part of the compound noun:

Karl is a German teacher. (compound noun = He teaches German.)

Karl is a German teacher. (= He is a teacher who comes from Germany.)

Some compound nouns are formed from multi-word verbs (Units 66 and 67). They usually follow the same order as the verb, but there are a few exceptions:

break out → outbreak spill over → overspill put in → input

Pronunciation ➤ 1.20

Some compound nouns describe containers. The form of the compound noun only describes the container itself, not its contents. Compare:

- in a shop: I’d like six Royal Doulton teacups.
  (compound noun = cups designed to hold tea)
- in a café: X I’d like a teacup and a slice of cake, please.
  ✓ I’d like a cup of tea and a slice of cake, please. (= tea in a cup)

2 Compound adjectives

Compound adjectives can be formed from adjectives, adverbs, nouns, verbs and prepositions. They usually have a hyphen when they are used before a noun:

<table>
<thead>
<tr>
<th>Type of combination</th>
<th>Examples</th>
</tr>
</thead>
<tbody>
<tr>
<td>adjective + noun</td>
<td>high-status low-maintenance full-time large-scale</td>
</tr>
<tr>
<td>noun + adjective</td>
<td>user-friendly air-conditioned tax-free lifelong</td>
</tr>
<tr>
<td>verb + preposition/adverb</td>
<td>drive-in worn-out built-up slowed-down walk-in</td>
</tr>
</tbody>
</table>

Many are formed by adding an -ed or -ing participle to an adverb, adjective or noun:

He’s a well-known actor and the author of a best-selling novel.
This Japanese maple is a particularly slow-growing variety.
The marines made a death-defying leap over the cliff edge.

We often use compound adjectives to describe time, quantity and measurement:

a three-week holiday a four-hour delay a ten-minute drive a five-year-old child

The noun is usually singular:

X A ten-kilometre journey. ✓ A ten-kilometre journey.

Compound adjectives formed with participles can often replace relative clauses:

The impact of recent legislation is an issue which commentators frequently ignore.
→ The impact of recent legislation is a frequently-ignored issue.

1 **make and do**

*Make* has a number of uses:

- *Aunt Alice is going to make the bridesmaids’ dresses.* (= create)
- *Gouda cheese is made in Holland.* (= is produced)
- *This multinational makes a lot of products in Sri Lanka.* (= manufactures)
- *The spare bedroom has made a wonderful office for Deirdre.* (= has become)
- *Those new drugs seem to make him very lethargic.* (= cause him to be)
- *make + object + infinitive (without to) means ‘force’ or ‘command’* (Unit 63.3):
  - *The police officer made me empty my pockets.*
- *idiomatic meanings such as ‘earn’ and ‘keep an appointment’*:
  - *He makes $1,000 a week on the oil rigs. I can’t make it on Friday – I’m out all day.*

We often use *do* to describe an activity or to mean ‘carry out/complete a task’:

- *What are we going to do for your birthday?* (= take part in an activity)
- *You can go out after you’ve done your homework.* (= you’ve completed)

We can use *do + determiner + -ing form* to describe regular tasks at home or at work:

- *There isn’t much in the fridge as I haven’t done the shopping yet.*
- *We do the stocktaking every Wednesday morning.*

Collocations with *make and do*, e.g. *make an effort, do research* (Unit 68.3)

2 **bring and take, fetch**

*Bring and take* have opposite meanings:

<table>
<thead>
<tr>
<th>bring</th>
<th>take</th>
</tr>
</thead>
<tbody>
<tr>
<td>to take someone or something with you to the place you are now, to your home, or to the place/event you have been talking about.</td>
<td>to move someone or something away from the place you are now, away from your home or away from the place/event you have been talking about:</td>
</tr>
<tr>
<td><em>I’ve brought</em> the pliers you said you needed – here they are.*</td>
<td><em>I can’t find the cheque book – Dennis must have taken it</em> when he left this morning.</td>
</tr>
<tr>
<td><em>When are you going to bring your new friend to meet us?</em> (to our house)</td>
<td><em>When are you taking me to meet your parents?</em> (away from here to their home)</td>
</tr>
</tbody>
</table>

The choice of verb depends on the situation of the speaker:

- *Are you bringing your scuba gear?* (on our holiday)
- *Are you taking your scuba gear?* (on your holiday)

*Fetch* means to collect someone or something from another place and bring it to the place you are now, to your home or to the place you are talking about. We don’t use *bring* with this meaning of ‘collecting’:

- *Could you bring the kids from school tomorrow?*
- ✓ *Could you fetch the kids from school tomorrow?* (= go to the school and bring them home)
3 speak and talk

Speak and talk have very similar meanings and are often equally appropriate:
I'm going to talk/speak to my teacher about it after the lesson.

- We usually use speak, not talk, for formal speeches:
  ✓ Before the election the President talked to the nation on television.
  ✓ Before the election the President spoke to the nation on television.

- We use speak, not talk, to refer to languages:
  ✓ Anatoly talks English with an accent. ✓ Anatoly speaks English with an accent.

- We use talk for long conversations:
  ✓ We were up half the night speaking! ✓ We were up half the night talking!

There are a number of expressions with speak or talk:
Could you speak up? (= talk louder) I'd like to talk about our plans. (= explain/discuss)
You're talking nonsense. (I strongly disagree with what you are saying.)

4 lay and lie, raise and rise

<tr>
<td>arise*</td>
<td>arose</td>
<td>arisen</td>
<td>arising</td>
</tr>
</tbody>
</table>

* these verbs are intransitive (cannot have an object)

Lay expresses an action; lie describes a state or position:
First, lay all the parts on a clean work-surface. (action = place them flat on something)
I think I'll just lie on the sofa until my headache goes. (state/position)
We've been laying artificial grass on the new pitch. We found these photos lying in a drawer.
That child lies all the time. (= says things which are not true)

Raise refers to the action of someone or something lifting, increasing or moving something else (i.e. an object) in an upward direction. To rise only refers to the movement itself:
The government has been urged to raise corporation tax rates to match those in other European Union states. Rates are predicted to rise by ten percent.

✓ Fares will raise next year. ✓ They will raise the fares next year.
✓ They will rise the fares next year. ✓ Fares will rise next year. (no object)

FORMALITY CHECK In formal English we sometimes use arise to refer to difficulties occurring, or something caused or started by a situation. It does not have an object:
Tissue rejection is a problem which can arise in this procedure.
We will contact you, should the need arise.

✓ Let's hope nobody arises that issue. ✓ Let's hope that issue doesn't arise.

5 rob and steal

Rob refers to the person or place that suffered the crime; steal refers to what was taken:

✓ Thieves stole my uncle. ✓ Thieves robbed my uncle. (rob + victim)
✓ A gang stole the head office. ✓ A gang robbed the head office. (rob + place)
✓ They robbed his gold watch. ✓ They stole his gold watch. (steal + object taken)

We can use the preposition from to link steal to a person or place and we can use the preposition of to link rob with the thing which was taken:
Colonel Blood stole the crown jewels from the Tower of London in 1665.
No man has the right to rob another of his freedom.

Animal smuggling on the rise

WITH THE GROWING interest in exotic pets, unscrupulous criminals (0) .................. huge sums of money by illegally smuggling animals into many countries. As the number of these incidents (1) .................., customs authorities and ecological organisations are becoming more worried about the effect on local wildlife.

(2) .................., animals from their natural habitat is always a questionable practice because once non-indigenous animals (3) .................. into a foreign country, they can easily escape and cause devastation to local animal populations. Many species (4) .................. diseases to which indigenous animals have no defence. The ecological balance can be permanently upset, threatening the most vulnerable species with extinction.

The animals come from various sources. Some are captured in the wild, others (5) .................. from their rightful owners (often zoos or nature reserves), but many are sold by illegal breeders. One of the most serious problems is the theft of eggs from the nests of rare birds. The adult birds are frightened off and thieves simply (6) .................. the eggs (7) .................. at the bottom of the nest. Eggs are obviously much easier to smuggle than live birds and (8) .................. nests is an easy way to acquire birds which are difficult to catch when fully grown.

Methods of smuggling range from the ingenious to the ridiculous. In 2007 a smuggling racket between the UK and Australia was smashed when customs officials discovered snakes and lizards hidden inside plastic garden statues. In December 2009 Gypsy Lawson arrived in Los Angeles with a rhesus monkey hidden under her shirt. When questioned about the suspicious lump under her clothing, she (9) .................. to customs officers and claimed that she was pregnant. And last year a 23-year-old man was caught at Melbourne Airport in Australia with two racing pigeons inside his trousers, strapped to his legs.

What can be (10) .................. about this problem? (11) .................. at a conference last week, a leading ecological campaigner called on governments to (12) .................. the fines and prison sentences given to animal smugglers. Increased penalties will deter many criminals, she believes.
US RATE RISE

THE CHANCELLOR returned from this month's meeting of the 'Group of Six' with news that interest rates are to be raised by an average of half a percentage point in the United States. While the Chancellor has been in Dallas, city markets have been feverish with rumours of even higher increases. The US dollar has been laying at an all-time low for several weeks and the American trade deficit has been arising steadily. The Chairman of the Federal Reserve has gone to Tokyo to discuss the problems which have arose from pressure in Congress to tackle the deficit. He will be in Japan until next Tuesday.

Priceless treasure disappears

THE BENTON HOARD, a priceless collection of ancient Roman silver, has disappeared from its display cabinet in the British Museum. At today's emergency press conference, museum director Alan Woods talked of his theory that the treasures had probably been robbed by a professional gang on behalf of a specific collector as the silver is too well-known to be sold on the open market. Ten museums have been stolen in the last six months and the number has been raising steadily over the last few years. The Benton Hoard is one of Britain's most important collections of Roman silver. It was found in 1926, having laid undiscovered for almost sixteen centuries beneath a Sussex field.

NEW PETTING ZOO TO OPEN

A GROUP of local naturalists has done a successful proposal to open a new petting zoo in Briggstowe. Talking at a recent press conference, organiser Stephanie Fenton told reporters that the zoo will be aimed at young children. Teachers will be able to fetch children to the zoo, where they will have the chance to interact with the animals in a natural environment. Arising attendances at similar zoos in recent years have shown that this type of 'petting' zoo, where children can actually touch animals, can make a lot of good in helping to rise early awareness of natural history.
1 **UNIT 69 AND 70** Use the words in brackets to form one word for each gap in the article. Some of the words are compounds. (You may use hyphenated words, as in example 00.)

**Pets for Patients**

PETS FOR PATIENTS is an organisation which provides small pets for those suffering from certain mental and physical illnesses. It believes it is time to reconsider our long-held belief that animals should be kept out of hospitals and away from sick people.

For years medical experts have considered animals to be a source of dangerous infections, completely unsuitable for an environment containing vulnerable and sick people. Now new research has shown that rather than posing a risk to patients, pets can promote recovery and have beneficial psychological effects. Patients suffering from severe disabilities, such as those which prevent them from leaving their beds and moving around, have been given small pets to look after.

Monitoring has shown that while stroking or grooming pets, patients' blood pressure and heart rates have been low. Because of this, their dependence on drugs has been reduced, and feedback from the medical trials has shown recovery times for a large number of patients.

Doctors have noted that the effect on patients' psychology states has been remarkable. It appears that the stimulus provided by looking after pets has given patients a heightened sense of response and improved their general state of self-confidence. According to the researchers, it is almost impossible to state the positive effects of 'pet therapy'.

Pets for Patients is currently raising money to provide small pets to all the long-term care centres in the country.

The grammar of formal English

Before you start

1 Review these intermediate grammar points and check you know them.

Avoiding repetition

1 To avoid unnecessary repetition of words or phrases in speech or writing, we can use
   • substitution, when we replace one word or phrase with another, such as a pronoun:
     Instructions are given on each machine. We ask customers to read them carefully
     before exercising.
   • ellipsis, when we leave out words or phrases altogether:
     Mike left at about the same time as Jane (left).

2 We can leave out or replace nouns, verbs and entire clauses which have previously
   been mentioned:
   The managers in our company have often adopted production processes which give rise to
   unsatisfying jobs because it is cheaper for them to do so.
   (them = managers; do so = adopt production processes ...)

Emphasis and focus

We show emphasis in writing in many different ways. They include
• fronting, or bringing a word or phrase to the beginning of a sentence:
  The bell rang. Almost at once the old man appeared at the door.
• making one simple sentence into two clauses or a cleft sentence:
  The Berlin Wall fell in 1989. It was in 1989 that the Berlin Wall fell.
    Jackson published the book himself.
    What Jackson did was publish the book himself.
• inversion (reversing the position of two things):
  Hardly had she written one book before she started another.
We usually invert the subject and the auxiliary, modal or main verb that follows it:
    Harry did not offer once to take Norma home to visit her elderly parents.
    Not once did Harry offer to take Norma home to visit her elderly parents.

Nominalisation

We use nominalisation (making nouns from other parts of speech) to be more concise in
writing. We can form nouns from verbs
• by adding a suffix: educate → education establish → establishment teach → teacher
• by using a verb as a noun (more informal): Can’t you open that? Shall I give it a try?
  I’ll take you to the station if you give me a shout when you’re ready.
• by combining the verb and particle in multi-word verbs. The particle often (but not
  always) comes before the verb in the noun form:
  The epidemic first broke out in Guinea. → The first outbreak of the epidemic was in Guinea.
  The plane took off very smoothly. → The takeoff was smooth.
  The car broke down not far from home. → The breakdown happened not far from home.

⚠️ Not all verbs can be used as nouns. It is best to check in a good dictionary.
✔️ He made a speech on the theatre in Ireland.
2 Read the text and identify a cleft sentence and examples of substitution and nominalisation.

What is generally understood by the term ‘literature’?

Most people readily accept that great historical plays and novels are part of it, but what about other types of writing, such as short stories, or other media, such as works published on the Internet? This topic is much debated in academic circles. What particularly concerns those involved in education is the type of literature taught in schools. Should the subject of literature also include contemporary works by little-known authors, which children may find more accessible, or is this just ‘dumbing down’?

Substitution (1) 
nouns and noun phrases

‘Many years later, as he faced the firing squad, Colonel Aureliano Buendia was to remember that distant afternoon when his father took him to discover ice.’
from One Hundred Years of Solitude by Gabriel Garcia Marquez

1 Making reference in text

A key feature of continuous text is the use of reference words to bind sentences together:
Guest speaker Professor John Doherty gave the lecture this morning.
[Professor John Doherty’s theme was endorphin production in mammals.]
Better alternatives:
✓ ... Doherty’s theme was endorphin production in mammals.
✓ ... His/The professor’s theme was endorphin production in mammals.
In some cases we can omit the repeated information (➤ Unit 74.1).

It is very common in written English to use different ways of referring to the same noun in texts; it avoids repetition and provides variety. We can use synonyms (words with similar meaning) or longer/shorter/more general forms of the noun:
Officers Mike Cornish and Jackie Trent arrived at the scene. The officers stopped short at the carnage before them. This was the first time Trent had attended a motorway accident and the policewoman found the sight disturbing. Her superior officer, however, was more experienced ...

Most reference in text refers back to a previously mentioned item:
The museum’s lifelike new dinosaur will surely enhance its status amongst younger visitors.

We can use substitution to refer back to a previous sentence, as long as there is no ambiguity:
She had a vast collection of antique clocks, which she kept in a small room devoted to her hobby. 
While most of them dated from the Victorian era, she had a few smaller ones which dated back to the early nineteenth century.

Occasionally we use a substitute word to refer forward in the text. This has the effect of creating suspense and is often used in dramatic or literary language:
Many years later, as he faced the firing squad, Colonel Aureliano Buendia was to remember ...

1 **GRAMMAR IN USE** Substitutions in this text are shown in *italics*. Find the word or phrase that each one refers to and write it below, as in the example.

The clock on the platform was showing midnight as the train drew in. Tessa checked (0) her ticket against the sign on the window, opened the door to Coach H, climbed in and shut (1) it gently behind her.

The train was already reaching (2) its highest speed, thundering across country towards Warsaw, when Tessa dropped (3) her bags in the correct compartment. She thought briefly of the few kilometres already behind her and (4) the many ahead, then she bent to her luggage. She tried to lift the two heavy bags onto the rack, but she could hoist (5) neither over her head. She pulled the lighter (6) one onto the seat, and sat down, pulling the (7) other close to her.

Alone in the carriage, she contemplated her future. She hadn’t expected (8) this so soon, but the job opportunity in Warsaw had come up unexpectedly. She’d always wanted to return to (9) the city of her birth and (10) that of her parents, but hadn’t thought she would do it within two weeks of leaving college. At first she had discounted (11) the position, so far away from the town that had become home, but she had spoken to her prospective employers at length on the phone, after which all her concerns were laid to rest. Tessa closed her eyes and allowed the rhythm of the speeding (12) locomotive to lull her to sleep.

Substitution (2)
verbs and verb phrases

When Terry Pratchett started writing his Discworld fantasy novels, his intention was to combine the fantasy with fun and engage people in his fantasy world. With sales of over 45 million books, it is very clear that he has done so!

1 Substituting a verb with do

If we do not want to repeat a verb, we either substitute the main verb with a form of do or omit the main verb and repeat the auxiliary verb only (ellipsis ➤ Unit 74.2):

*The bride wore pink, as did her four bridesmaids.* (did = wore pink)

*Management has agreed to resume negotiations although the union hasn't yet.* (agreed is omitted)

⚠️ We do not leave out the verb altogether:

*The bride wore pink, as her four bridesmaids.*

We use do to avoid repeating a present simple or past simple verb in the second of two clauses joined by and, but or or:

*He lived according to his principles and he believed everyone else did, too.*

*(did = lived according to their principles)*

*The chef seems to expect all his customers to enjoy raw food, but I certainly don't.*

*(don't = don't enjoy raw food)*

We can also use so/neither + do/does/did + subject:

*Sara really enjoys the thrill of the open road, and so does her husband.*

*The younger children in the villages don't learn the official language. Neither do older children, at least not until their last years of school when it is clear they may need it for work.*

We also substitute do for a main verb in subordinate clauses, e.g. those starting with that, where, if, whereas, and in comparison clauses:

*At the time, the Farmer family lived very near to where I did.*

*The young princess and her sister had dark hair, whereas their brother didn't – he had ginger hair.*

*The average son doesn't help in the home as much as a daughter does.*

2 Substituting a verb or verb phrase with do it/that/so

We often use do it/that to replace a verb phrase which describes a single, specific action:

*Margaret had been trying to pluck up the courage to confront her son about the money, and she was just about to do it when the doorbell rang.*

We can also use do it or do that when the subject of the verb changes:

*I was unable to contact the barrister about the trial date. Can the clerk do it/that tomorrow?*

⚠️ We use that (and not it) to emphasise an action or make a contrast with a preceding statement:

*Many people exaggerate the value of items claimed on insurance forms.*

*X I really couldn't do it. ✓ I really couldn't do that.*

In speech, we stress that.
We prefer to use do so (and not do it/that) when we refer to an activity or a series of actions rather than a single, specific action:

Anyone wishing to interrupt with questions should feel free to do so.
When you plan to get fit, you should only do so within a planned exercise programme.
Do so tends to be more formal than do it/that.

⚠️ Schools should encourage teachers to attend conferences and give them time off to do it.
✔️ Schools should encourage teachers to attend conferences and give them time off to do so.

3 Substituting clauses with it, this or that
We use the pronouns it, this or that to refer back to an action in a previous clause/sentence:

I broke his camera and he was really upset about it. (it = breaking his camera)
This and that are more emphatic than it; they bring the focus onto the action they refer to:
Many of the latest models have been recalled because of a fault in the steering. This has caused embarrassment to the manufacturers.

ACADEMIC ENGLISH This and these are very common in academic English, where they usually refer to a previous statement/statement(s):
... they may improve the impact resistance of some materials. This still requires confirmation ...

4 Substituting clauses with so and not
To avoid repetition, we can use so rather than a that clause after these verbs:

appear assume be afraid believe expect guess hope imagine presume remain seem suppose suspect think

Was that a tear in the defendant’s eye as he described the incident?
[She believed that it was.] ✔️ She believed so.

With most other verbs we do not use so:

The officer asked Martina if the door was open. ➡️ × She remembered so.
✔️ She remembered that it was.

We usually form the negative by adding not to the auxiliary do:

They hoped that the hotel would have a restaurant but they didn’t presume so.

More formally, we can use not with all of these verbs (except remain), without using the auxiliary:

Would the average person intervene in a violent incident? From this report it appears not.
They queried whether the document had been countersigned by two witnesses, but I believed not.

× The child appeared agitated when his father entered the room, but he remained not for long.
✔️ The child appeared agitated when his father entered the room, but he didn’t remain so for long.

⚠️ We do not use a that clause after so:

× The interviewer asked if respondents believed ministers were taking green issues seriously and 61 percent replied that they thought so that they were.
✔️ The interviewer asked if respondents believed ministers were taking green issues seriously and 61 percent replied that they thought so.

We can substitute if clauses with if so (positive) and if not (negative):

Please check that the amendments to your policy are correct. If so, you need take no action.
(if so = if the amendments are correct)

We hope that all your dealings with the bank are satisfactory. If not, please see the enclosed leaflet outlining our complaints procedures.
(if not = if your dealings with the bank are not satisfactory)

**It’s no joke when you email**

HAVE YOU EVER sent an email to a friend from work? Well, we all (0) send them sometimes, don’t we? Or have you sent a joke to a colleague on the office computer? (1) *If you have*, you might like to think again. This is exactly what Rupert Beverley and David Pennington (2) sent and now they wish they hadn’t. They were sacked from an engineering company in the north of England for (3) *sending a joke email*.

Hang on – you may think – this is one small company in the UK. However, (4) *sacking people for sending emails* happens not only in less-regulated small companies but in large multinational ones, too. Eight sales staff at Cable and Wireless lost their jobs after sending a slightly risqué email. Someone made a complaint about the email and by (5) *making a complaint*, brought it to the attention of the management, who claimed that the email could be construed as offensive. The sacked workers didn’t think (6) *that it could be offensive* themselves and they insisted that it wasn’t really provocative, as they knew it was a sackable offence to download material of that sort.

Regulations governing this area vary from country to country: at present the law in the USA allows companies to monitor staff emails and while that in the UK is currently not so strict, it looks as though it will follow the US model. In Germany, however, the law does not allow ‘spying’ on employees’ personal email, but at least one multinational based there is (7) *spying on people’s email* by sending all emails to the UK to be monitored.

Civil rights organisations are concerned that monitoring emails infringes personal liberty and that it also undermines trust in the working environment. They want management to (8) monitor emails only when necessary, and to be able to prove that it was indeed necessary to (9) monitor the emails.

And what of Rupert and David? Well, their claim for unfair dismissal was rejected: the tribunal found that the company was within its rights to sack employees for sending joke emails, and also, more worryingly, for the time wasted in (10) sending joke emails. Watch out, Big Brother really is watching you now!

Ellipsis

1 Omitting a noun/pronoun
We often omit nouns or pronouns in the second of two clauses joined by and, but or or (►Unit 58.1):
Lucy went up to the counter and (she) asked for a coffee.
We needed information about the interviewees’ professions and (information) about their educational background.

⚠️ We do not leave out pronouns in subordinate clauses, e.g. those starting with a
conjunction such as that, if, when or although:
✗ That night she was so tired that she fell asleep as soon as she got into bed.
✓ That night she was so tired that she fell asleep as soon as she got into bed.
But we can leave out subject pronouns at the beginning of short sentences in informal
speech (►Unit 83.2).

2 Omitting a verb
We can often omit a verb to avoid repeating it:
She writes for a magazine and he (writes) for a daily newspaper.
We do not generally leave out the auxiliary or modal.

<table>
<thead>
<tr>
<th>FORM</th>
<th>CHANGE</th>
<th>EXAMPLE</th>
</tr>
</thead>
<tbody>
<tr>
<td>present/past simple verb</td>
<td>omit main verb in and clauses</td>
<td>She clearly liked the students, and they (liked) her.</td>
</tr>
<tr>
<td>auxiliary + main verb</td>
<td>omit main verb</td>
<td>Over 40 percent of those on benefits are looking for a job, or claim that they are (looking for one).</td>
</tr>
<tr>
<td>modal + main verb</td>
<td>omit main verb</td>
<td>Students working on doctorates may apply for funding from our organisation. Other researchers may (apply for funding) as well; we will consider all applications.</td>
</tr>
<tr>
<td>compound verb forms</td>
<td>omit second/third auxiliary or only the main verb</td>
<td>The problem was one that had been observed in other vessels and the crew should have been told about it, or at least the captain should (have been told)/should have been (told).</td>
</tr>
</tbody>
</table>

In coordinated clauses, where the second clause is very similar in pattern to the first, we
can leave out the auxiliary as well as the main verb:
Since the divorce I’ve lived in London and my wife (has lived) in Cambridge.

We can introduce a new modal to add interpretation, but still not repeat the main verb:
It wasn’t clear at first whether the house owners had been away for long but the letters on the
door mat indicated that they must have (been away).

It is possible to omit both auxiliary and modal verbs in comparison clauses:
House prices have dropped much less than share prices (have done)/than share prices have (done).
Sally could play the piano much better than her sister (could).

3 Omitting infinitives or wh- clauses
We can omit an infinitive phrase when the meaning is clear, but we keep the to:
He didn’t win the competition even though he had expected to (win it).

After most verbs which are followed by an infinitive with to, such as ask, forget, promise, want and would like in if or wh- clauses, we can also omit to:
The new ‘freedom pass’ allows anyone over sixty to use the buses and trains free of charge
whenever they want (to).

In questions and embedded questions, we often use the question word only and omit the
clause: Dr Angelo said he was going on a call but he didn’t say where (he was going).

This popular course examines literature from the last twenty years and it examines literature from a variety of countries across the English-speaking world. It was due to be replaced this year, but because of its popularity it has not been replaced; instead, it will run for two more years.

- The course is a compulsory Level 3 component in Literature degrees and the course forms an optional part of the English language degree.
- For this course you are required to have studied at least two previous literature courses at Level 2 and you are required to have passed them with Grade 3 minimum. If registering for this course from another educational institution, you may be asked to provide proof of previous study and you may be required to take an internal test.

Emphasis (1) cleft sentences

The 2006 Nobel Prize for Literature was awarded to the Turkish author Orhan Pamuk. It was his exploration of the clashes and interactions of different cultures that brought him the award.

1 Form and use of cleft sentences

In a divided or cleft sentence, information which could be given in one clause is divided into two parts, each with its own verb:

*Vanessa has made the greatest impact.* (normal sentence: single clause, one verb)

*It is Vanessa who has made the greatest impact.* (cleft sentence: two clauses, two verbs)

We use this pattern to emphasise new information, give explanations or make a contrast with a previous statement:

All of the Redgrave family are gifted actors. But it is Vanessa who has made the greatest impact in the world of feature films.

2 *It* cleft sentences

*It* cleft sentences have this pattern:

*It isn’t just his outlandish sense of humour that I’m complaining about.*

*It was his exploration of the clashes that brought him the award.*

We can use *it* to emphasise the following:

(neutral)  →  Tom saw Will Smith at the awards party last night.

subject  →  It was Tom who saw Will Smith at the awards party last night.

object  →  It was Will Smith that Tom saw at the awards party last night.

adverbial phrases  →  It was last night that Tom saw Will Smith at the awards party. It was at the awards party that Tom saw Will Smith last night.

We can use *when* and *where* (instead of *that*) in subordinate clauses of time and place:

*It was in January when the test results were published.*

*It’s in Green Street market where the best bargains can be found.*

We do not use *how, why, or what* in this way:

*X It was greed why he did it.* ✓ It was because of greed that he did it.

*X It is using a calculator how he does it.* ✓ It is by using a calculator that he does it.

*X It is the speed of the ride what is so thrilling.* ✓ It is the speed of the ride that is so thrilling.

We can reverse *it + verb* and the emphasised element in *it* clefts, but only in a very formal, literary style:

*And thus Cézanne it was who took the first steps towards Impressionism.*

Less literary: And so it was Cézanne who took the first steps towards Impressionism.
ACADEMIC ENGLISH The *it* cleft is very common in academic prose, where it presents information as known:

One of the main effects of publication is the enhancement of the researcher’s profile. It is *this* that makes writing for journals so essential in the academic world.

3 Wh- cleft sentences

We can use this pattern to highlight the action in a sentence:

\[
\text{wh- clause} + \text{a form of be (+ not)} + \text{emphasised word/phrase}
\]

\[
\text{What the manager did was (to) change the formation of the team.}
\]

In these sentences *what* means ‘the thing(s) that’. The *wh-* clause always contains a verb, which is usually a form of *do*. The emphasised phrase contains an infinitive with or without *to*. If the emphasised verb is in the continuous or perfect, the form of *do* matches it:

*The boys aren’t leaving Sandy at home. They are taking him to the beach with them.*

\[\rightarrow\] *What the boys are doing is taking Sandy to the beach with them.*

*Old members are absent but the new members have taken their seats in the assembly.*

\[\rightarrow\] *What the new members have done is taken their seats in the assembly.*

⚠️ We use *wh-* clefts, not *it* clefts, to highlight the action (verb) in a sentence:

\[\times\] *It is totally undemocratic that these actions are.*

✓ *What these actions are is totally undemocratic.*

We can reverse the order of the parts in *wh-* cleft sentences and put the emphasised part at the beginning:

*The man appeared to be engrossed in his book, but he wasn’t reading. Watching the factory opposite was what he was really doing.*

4 Other types of cleft sentence

We can use *wh-* clauses with *when*, *where*, *why* and *who* to highlight a time, a place, a reason or a person, but we usually use an introductory noun phrase (highlighted below).

The *wh-* clause acts like an ordinary relative clause:

We forgot to invite Ian. \[\rightarrow\] *X*  

\[\rightarrow\] ✓ *Who we forgot to invite was Ian.*

*The one/person (who) we forgot to invite was Ian.*

| person The guy who told me about the new club was Zack. |
| place The house where I used to live is near here. |
| time The day (when) we left was the saddest day of my life. |
| reason The reason (why) they never told me is they don’t trust me. |

We can emphasise a noun phrase or a verb phrase with the (only/last) thing, *something* or *all*:

*The thing (that) I most disliked about the movie was the scene in the graveyard.*

*The only thing (that) they want is a change to air their grievances.*

*The last thing (that) we did was (to) pack the kettle.*

*Something the surveyor neglected to mention was the damp in the kitchen.*

*All (that) we’re asking for is to be given a chance.*

We can also use the *one/only thing/person* with a negative verb:

*The one thing (that) this shop won’t do is repair goods bought in other shops.*

*The only thing (that) we didn’t find was the key to the cellar.*

*The one person (that) I didn’t want to see just then walked into the room.*

Holiday reads

IF YOU'RE LOOKING for some good books to take on holiday and you like a good detective thriller, you can't do better than the Stieg Larsson Millennium trilogy. The three books centre around an unlikely heroine -- an anti-social egotistic young woman called Lisbeth Salander. (1) is make this anti-hero a vulnerable and therefore not entirely unlikeable character, which is no mean feat. While the writing (or at least the translation) is fairly mediocre, (2) hooks the reader -- these books are fast-moving, sometimes shocking journeys into the criminal underworld in the company of Salander and investigative journalist Mikael Blomkvist. It is through the Blomkvist character (3) with one of the protagonists -- he is a hard-bitten journalist but remains sympathetic and keeps his integrity through a series of misadventures.

The characters and general feel of the novels are introduced in The Girl with the Dragon Tattoo, and developed through the series. (4) is the graphic violence, although this is kept to a minimum and is never gratuitous.

This trilogy has enjoyed enormous success, and the one thing (5) one has to conclude, is the untimely death of its author, himself an investigative journalist who delved into organised crime and neo-Naziism in Sweden. This, of course, led to endless conspiracy theories -- was Larsson murdered? Had he uncovered some awful criminal organisation at the heart of Swedish political life? (6) is the entirely natural, albeit tragic, cause of death -- a massive heart attack.

A the thing that some readers might find off-putting
B it is the pace that
C it makes these theories unlikely that
D that has helped fuel its success
E it is the pace what
F that the reader can identify
G why it has been so popular
H what makes these theories highly unlikely
I how the reader can identify
J what some readers might find offputting

Emphasis (2)
inversion and fronting

Charles Dickens started his literary career by writing for magazines. Indeed, his first novel, *The Pickwick Papers*, was serialised in a magazine before being published as a book. Only later did Dickens produce full novels to be published as complete books.

1 Reasons for inversion and fronting

Inversion and fronting are both ways of changing the normal word order of a sentence.
- Normal statement word order is subject + verb (Before you start ➤ page 180). Inversion is the word order in questions (*Are you ready?*), but we also use it for emphasis in statements. Compare:
  
  **NON-INVERTED** He was late and he didn’t apologise.
  **INVERTED** Not only was he late, but he didn’t (even) apologise.

  The inverted statement emphasises the inverted action more.
- Fronting brings adjectives and adverbs to the beginning of the sentence. Compare:
  
  **NON-FRONTED** The actors were a mixed bunch. Pacino was the least inspiring of the lot.
  **FRONTED** The actors were a mixed bunch. Least inspiring of the lot was Pacino.

  The fronted statement places more emphasis on the adjective phrase *least inspiring*.

2 Subject–auxiliary inversion

We invert the auxiliary/modal verb (*do, have, should*, etc.) and subject after these phrases:

| after adverbs with *restrictive* / negative meaning  
| (e.g. *hardly, scarcely, rarely, little, never, seldom*) | Little did we realise the true extent of his involvement.  
|                                                      | Never had they experienced such behaviour.  
|                                                      | Hardly had the guests arrived when the bell for supper was rung.  
| only + time expression or prepositional phrase     | Only later did Dickens produce full novels ...  
|                                                     | Only with a great deal of effort was he able to escape.  
| only + conjunction (inversion in main clause)      | Only if the weather improves will the golf tournament take place.  
| in no way, at no time, under no circumstances, on no account | At no time during the operation did the patient regain consciousness.  
|                                                      | Under no circumstances can refunds be given.  
| not + only/time expression/  
| person or thing                                      | Not only is he late, he hasn’t even brought a present.  
|                                                      | Not since records began has youth unemployment been so high.  
|                                                      | Not a single stone was left unturned in the search.  
| no sooner ... than                                     | No sooner had we set out than the skies opened.  
| clauses beginning with *neither or nor*             | They have no intention of paying and neither have we.  
|                                                      | We couldn’t face the customers and nor could the boss.  
| clauses beginning with *may which describe a strong wish* | May he live to regret this decision!  
| after fronted comparisons,  
| also, *such as* and so*                                | The captain is refusing to play under these conditions and so are the rest of the team.  

* See also 76.4 opposite.

⚠️ Expressions with *no, not*, etc. not listed above (e.g. *no doubt*) cannot be inverted:

**X** No doubt will he give us a key.  
✔️ No doubt he will give us a key.

We do not invert the subject and auxiliary after *only* if there is no time expression or prepositional phrase immediately after it:

**X** Only can members park there.  
✔️ Only members can park there.  
✔️ Only on Sundays can members park there.
3 Subject–verb inversion

We occasionally invert a main verb and subject after prepositional phrases (e.g. *between the trees*) or adverbs of place (e.g. *here, there, outside*) and adverbs of time (e.g. *next, then, first, now, finally*). We can use a form of *be* or verbs of place and movement (e.g. *stand, sit, lie, come, go, climb, run, sail, fly*) before the subject.

- place adverbs/prepositional phrases + *be* or verbs of place/movement:
  
  _Here lies_ the body of our late lamented sovereign.

  _All along one wall climbed_ a beautiful rambling rose.

- time adverbs + *be* or verbs of place/movement: _For the first hour the teams seemed evenly matched. Then came_ the turning point in the game as Ed scored.

  _That was the final instalment of the book of the week. Next is the news._

We often use this pattern to form a link with the information in the previous sentence, and it is common in formal literary English.

We don’t use inversion if the subject of the clause is a pronoun:

_Here comes the bus._ → *X* _Here comes it._

✓ _Here it comes._

We can also use inversion in _as and than_ clauses in formal English: _Mr Slater is expecting a pay rise, as are several other salesmen in the team._

_Social security officials are far more vigorous in handling suspect benefit claimants than is the Inland Revenue in dealing with suspected tax evasion._

Inversion is common in certain fixed expressions, often with subjunctives (➤ Unit 40.1): _So be it. Long live the king!_

4 Fronting adjective and adverbial phrases

We can place the following at the beginning of the sentence with inversion of the subject and a form of the verb *be*:

<table>

<tr>
<th>comparative and superlative adjectives*</th>
<th>The first act was dire. <em>Much more exciting</em> was the play’s second act. Many of the monuments are truly awesome. <em>Best of all</em> is the Colosseum.</th>

  _Try as she might, she simply couldn’t open the jam jar._  _Battered though he was, he never lost his will to succeed._

5 Fronting objects and complements

In literary language, we also front previously mentioned objects or complements: _The house was large and sprawling, with two wings and a dark attic._ Hilary spent most of her time in the drawing room or the garden. _The attic_ she rarely visited.

_Ben awaited his new roommate anxiously. He hoped that he was intelligent and talkative._

_Then Oliver arrived. _Intelligent_ he certainly was, but in every other way Ben was disappointed._

Organising information in writing

J K Rowling’s first Harry Potter manuscript was rejected by twelve publishing houses. It was finally accepted by a small company in London called Bloomsbury.

1 The information principle
In English we usually move from something known (already mentioned or obvious from the context) at the beginning of the sentence to something new at the end. This is called the information principle:

The door opened and John walked in. He was holding a black leather briefcase.

Starting sentences with information which relates back to something already mentioned helps the text to ‘flow’ more smoothly and makes it easier for the reader to understand:

J K Rowling’s first Harry Potter manuscript was rejected by twelve publishing houses. It was finally accepted by a small company in London called Bloomsbury. The chairman of the company gave the first chapter to his eight-year-old daughter, Alice, to read. She read it quickly and immediately demanded the next chapter.

We do not usually put new information at the beginning, unless we want to focus on it (see 77.3/4).

2 The end-weight principle
In English we prefer to put long and complex phrases or clauses at the end of a sentence. These also often contain new information, so this principle – the end-weight principle – and the information principle reinforce each other:

A striking feature of the central areas of the capital are the elegant classical squares which were originally laid out by aristocratic developers in the eighteenth century.

Sentences with a heavy clause at the beginning can seem clumsy and be difficult to understand:

[The elegant classical squares which were originally laid out by aristocratic developers in the eighteenth century are a striking feature of the central areas of the capital.]

We give more importance to the information principle in text, so we can put a heavy clause at the beginning of a sentence if it contains familiar information linking it to the preceding text:

London has many public parks and squares which date from previous centuries. The elegant classical squares which were originally laid out by aristocratic developers in the eighteenth century are a striking feature of the central areas of the capital.

If the subject of a sentence is a long clause we can use it as an ‘empty’ subject so that we can put the long subject at the end:

It was hard to believe that he had behaved so appallingly.

(= That he had behaved so appallingly was hard to believe.)
It can also be an ‘empty’ object, anticipating a later clause. This allows us to combine several pieces of information into one sentence, again putting new information at the end:

*We leave it to the reader to appreciate what this will mean.*

(= The reader can appreciate what this will mean. We leave the reader to do this.)

*She thought it a pity/sad that he hadn’t joined in the festivities.*

(= He hadn’t joined in the festivities. She thought that was a pity.)

We don’t use *it* as an ‘empty’ object when the main verb is followed immediately by a *that* clause:

*✗ She thought it that he hadn’t joined in.*  ✓ She thought that he hadn’t joined in.

### 3 Focus

In English we can show which part of a sentence or clause contains the most important point or ‘focus’ by placing the important point at the beginning or end of the sentence – these are the two positions which appear most important to a reader or listener:

*Sandra invited Lucy to her dinner party.*

If we want to put the focus on an item that doesn’t naturally come at the beginning or end of the sentence (e.g. *Lucy* in the example above) we have to manipulate the grammar to bring the item to the front focus position. For example, we can use cleft sentences (➤ Unit 75):

*It was Lucy that Sandra invited to her dinner party.*

*Lucy was the girl that Sandra invited to her dinner party.*

Similarly, we can give focus to something by moving it into the end focus position:

*The girl that Sandra invited to her dinner party was Lucy.*

### 4 Contrast and emphasis

Because word order in English is usually fixed, we can emphasise or contrast something by moving it to an unfamiliar position. We often do this with adverbial expressions and infinitive clauses (➤ Unit 76.4) and objects and complements (➤ Unit 76.5):

*The facade of the house was blank and austere. But it was ornate and luxurious inside.*

→ *But inside* it was ornate and luxurious.

*I may be old, but I’m not stupid.*

→ *Old I may be, but I’m not stupid! Old I may be, but stupid I’m not!*

*Priscilla invariably rejected impoverished suitors. Her only ambition was to marry for money.*

→ *To marry for money was her only ambition.*

### 5 Manipulating grammar and vocabulary

In order to follow the ordering principles above when writing, we have to choose suitable vocabulary and grammar. As the subject usually comes at the beginning of a sentence in English, the simplest way to organise a sentence is to choose a subject which links with the previous information:

*Whenever possible, we pack all our furniture in flat packages.*  [Transport becomes cheaper because less space is taken up by a flat pack than a bulky one.]

→ *A flat pack takes up less space than a bulky one, which means that transport becomes cheaper.*

Alternatively, we may change the grammar or vocabulary:

<th>Our neighbours got a good price for their car. They sold it to a local garage.  [It was bought by a local garage.]</th>

1 GRAMMAR IN USE Read the novel extracts below and study the underlined phrases. Match each one with a reason A–E for placing it in this position in the sentence. One reason can be matched with two phrases.

A FOCUS – putting an adverbial phrase of reason at the beginning of the sentence.
B END-WEIGHT – putting a long clause or phrase after the verb.
C FOCUS – placing a time or place adverbial at the beginning of the sentence.
D CONTRAST – fronting an adverbial to make a contrast with what has gone before.
E INFORMATION FLOW – starting a sentence with known information.

(1) Ten days later, at eight-thirty in the morning of Wednesday, 22nd January, Robyn Penrose set off in a snowstorm and an ill humour to begin her stint as the University of Runmidge Faculty of Arts Industry Year Shadow, or URFAIYS as she was designated in memoranda emanating from the Vice-Chancellor’s Office. (2) One of these documents had informed her (3) that she was to be attached to a Mr Victor Wilcox, Managing Director of I. Pringle & Sons, for one day a week during the remainder of the winter term, and she had chosen Wednesdays for this undertaking since it was the day she normally kept free from teaching. By the same token it was a day she normally spent at home, catching up on her marking, preparation and research, and she bitterly resented having to sacrifice it. (4) For this reason above all others she had come very close to declining Philip Swallow’s proposal to nominate her for the Shadow Scheme.

The nursemaid was also in the kitchen. ... Her contradictory statements about the blanket were to make her a suspect.

The Hubble Space Telescope

THE HUBBLE SPACE Telescope was put into orbit by 
the American space shuttle Discovery in April 1990. 
0 It orbits the Earth at an altitude of 610 kilometres.
(0) The Earth is orbited by it at an altitude of 610 
kilometres. (1) The light from space is not affected 
by interference from the Earth's atmosphere at this 
height. As a result the Hubble telescope is at least 
ten times more accurate than telescopes on the 
ground and has a much greater range. (2) In our 
search for distant stars and planets this makes it 
the most useful tool.

The telescope is named after the most influential 
 astronomer of the twentieth century, Edwin 
Hubble. Working at the Mount Wilson Observatory 
in Pasadena, (3) his close observation of the 
Andromeda Galaxy was used by the American 
astronomer to develop the theory that the universe 
is expanding.
The Hubble Space Telescope has not had a 
smooth history. (4) Scientists at NASA discovered 
that the main 
mirror had become 
distorted and could 
not be used with 
any accuracy only 
two months after it 
grew into orbit. Rather than 
abandon the project, NASA decided to find a way 
to resolve this problem. (5) COSTAR (corrective 
optics space telescope axial replacement) was 
the name of the solution. This was a device 
which contained ten smaller mirrors designed to 
compensate for the distortion in the telescope's 
main mirror. It cost $360 million to develop the 
technology and more than 30 hours of spacewalks 
by astronauts to fix the device. (6) The Hubble 
Space Telescope is now working correctly and 
sending its astonishing data back to Earth, the 
repairs were completed in January 1994.

Since the early eighteenth century literary critics and academics have queried whether Shakespeare wrote all of the works attributed to him, or indeed, whether Shakespeare was in fact just one person. This controversy still continues today.

1 Nominalisation

It is sometimes more concise and elegant, especially in written English, to use noun phrases rather than verb phrases to express an idea, as this can combine two sentences into one:

**VERB PHRASE**  The committee decided to open the playground to all children. This was welcomed by the local schools.

**NOUN PHRASE**  The committee’s decision to open the playground to all children was welcomed by the local schools.

The noun phrase is often made up of two nouns linked by a preposition:

<table>
<thead>
<tr>
<th>VERB PHRASE</th>
<th>NOUN PHRASE</th>
</tr>
</thead>
<tbody>
<tr>
<td>They released the video in 1998.</td>
<td>The release of the video in 1998 …</td>
</tr>
<tr>
<td>The law was amended last week.</td>
<td>The amendment to the law last week …</td>
</tr>
<tr>
<td>The war drained the country’s resources.</td>
<td>The war was a drain on the country’s resources.</td>
</tr>
</tbody>
</table>

An adverb in a verb phrase changes to an adjective if the verb is nominalised:

*The girl shouted loudly and attracted the attention she wanted.*

The girl’s loud shouts attracted the attention she wanted.

We can use nominalisation to summarise information from a previous sentence. This is useful for developing an explanation or argument:

*The rioters threw petrol bombs at the embassy. The situation was getting out of hand.*

The judges have considered at great length the six novels in the shortlist, and we have reached agreement. **Our decision** is unanimous. This year’s prize goes to …

We can often use have + noun to combine information about an event into one sentence rather than two:

*They raced up the hill. The race was exhausting.* → *They had an exhausting race up the hill.*

2 Using parallel structures

Although we try to avoid repeating words when we are writing a text, a useful way of making a text cohesive is to use similar grammar in different sentences, for example, using the same verb form, similar word order or repeating a particular grammatical form:

*She is probably going to fail the exam. And she is probably going to blame her teacher.*

Your own home. **To live and sleep in. To cook and eat in. To watch TV or maybe do some work in.**

We avoid sudden changes in grammar as this often looks clumsy and unclear:

[I can’t wait to lie on the sand. Swimming in the sea is great. To sunbathe is something I would love to do as well.]

✓ I can’t wait to be lying on the sand, sunbathing and swimming in the sea.

If we want to create a dramatic effect or make a strong contrast, we can repeat an unusual grammatical pattern. But we usually only use this device in narrative and fiction; in less literary contexts it can seem inappropriate:

**Rarely had I seen such a ramshackle boat. And never had I actually been expected to board one.**

Repetition, particularly in sets of three, is a common rhetorical device, i.e. used in giving speeches. We call this ‘tripling’:

**America, at its best, matches a commitment to principle with a concern for civility. ... America, at its best, is also courageous. ... America, at its best, is compassionate.**

(Barack Obama, inaugural address, 2009)
3 Levels of formality

A key feature of the use of language which is appropriate to its context is the choice of vocabulary. Most English words are ‘neutral’ and we can use them in any situation. But some words are only appropriate, for example, in a formal situation and others only in an informal one. Compare:

The show starts at nine o’clock. (neutral)
The performance commences at nine o’clock. (formal)
The show kicks off at nine. (informal)

We often use phrasal verbs in informal contexts and formal equivalents in formal speech and writing (▶ Unit 67.2). However, the formal equivalents can be too formal for most speech and writing:

Do you usually use an alarm clock to help you wake up and get up in the morning?
[The Sunburst alarm clock allows you to awake and arise in the most natural way possible.]
✓ ... allows you to awake/wake up and get up in the most natural way possible.

The choice of grammatical patterns can also indicate a particular level of formality:
Everyone has to remove their shoes before they enter the chamber. (neutral)
Prior to entering the chamber, all visitors are required to remove footwear. (formal)
Looks like we’ve got to take off our shoes before we go in. (informal)

Certain forms and grammatical patterns are more suitable for formal situations:

<table>
<thead>
<tr>
<th>impersonal pronouns (▶ Unit 5.1)</th>
<th>One might prefer a four-star hotel.</th>
</tr>
</thead>
<tbody>
<tr>
<td>passives (▶ Unit 62.7)</td>
<td>Non-reflective glasses should be worn at all times.</td>
</tr>
<tr>
<td>subjunctives (▶ Unit 40.1)</td>
<td>I demand that she apologise in writing.</td>
</tr>
<tr>
<td>infinitive clause subjects (▶ Unit 56.1)</td>
<td>To interrupt your elders is very rude.</td>
</tr>
<tr>
<td>non-defining relative clauses (▶ Unit 53.3)</td>
<td>The Law Society, to which he had appealed, rejected his argument at once.</td>
</tr>
</tbody>
</table>

⚠️ In written English we usually do not mix formal and informal language in the same text unless we want to create a comic or ironic effect:

[The Minister was unable to attend the reception because he was a bit tied up.]
✓ The Minister was unable to attend the reception due to a prior engagement.

4 Adverbs

Adverbs are used a lot in written English, for example, to describe a particular aspect of something we are commenting on:

Economically, the current government has been a resounding success.
(= The government has successfully managed the economy.)

We can also use an adverb to modify an adjective or a participle. The adverb can come before or after the participle:

Although successful economically, the government is starting to lose popularity.

Financially speaking, few of the dot.com companies have a good track record.

Some adverbs make a comment; for example, the adverbs definitely, probably, in fact, comment on the truth of the statement:

Hardback sales held up; paperback sales were definitely down.

Some comment on the limitation of the statement, for example, in most cases, generally: The term ‘art’ is generally used to denote painting and sculpture.

**ACADEMIC ENGLISH** These adverbs are common in academic writing, which is often concerned with the certainty or probability of the information it gives:

In the remaining fourteen patients, symptoms resolved, apparently spontaneously, after a median of four weeks.

St Andrew’s Hospital Trust has recently confirmed that a fresh wave of food poisoning has broken out in the Scottish resort, and this has alarmed everyone who lives in the town. A spokesperson stated that the illness was not serious and could be easily treated. This appeased community leaders but they requested further reassurances that the authorities were doing everything within their control to contain the spread. The hospital authority has announced that it will investigate fully the causes of this epidemic. As a recent investigation into a similar outbreak concluded that the cause was poor meat hygiene in a local butcher’s shop, it isn’t surprising that local shopkeepers are concerned about what will come out of the pending investigation. The leader of the Shopkeepers’ Association, Len Murphy, suggested that the source of the epidemic might be hospital kitchens, which has angered hospital staff. The kitchen staff at the hospital have now called for a strike of hospital auxiliaries across the region, which has concerned the health authority. The financial consequences of this action are likely to be extremely severe for the health authority.

The Inuit system of child adoption, although it is archaic, appears much more humane than our own system in the so-called civilised world, where childless couples must apply through faceless agencies for the opportunity to adopt. Childless couples must undergo a series of intrusive interviews and examinations and, if they are successful, will then be put on a waiting list for an unspecified period of time. An Inuit couple wanting to adopt simply makes the fact that they want a child known and soon enough the couple will receive a call from a woman who is prepared to give up her child. She may want to give up her child because she already has too many children and she does not want another child, or the call may come from a relative or friend who wishes to help someone less fortunate than themselves. Traditionally, the couple would be asked if the couple would like the child and, if they do, a simple handover would take place. Today, however, the handover system has been replaced by bureaucracy in the form of civil registration, although the tradition itself has not been replaced. The tradition survives even in the twenty-first century.

3 UNITS 77 AND 78 Read the text about Paul Robeson and match the underlined clauses and sentences 1–6 with the text features in A–F.

Paul Robeson was the first African American to gain international success in the ‘white’ world of Hollywood movies. He was born in 1898, the son of a runaway slave. (1) Highly intelligent, he won a scholarship to Columbia University, where he qualified as a lawyer.

But there were few opportunities for black lawyers then and Robeson decided to pursue a career on the stage, where he soon became one of the biggest stars on Broadway. (2) Applauded for his acting ability and acclaimed for his remarkable physical presence on stage, Robeson went on to show the world his greatest talent, his superb deep bass singing voice, in Jerome Kern’s hit musical Show Boat in 1927.

(3) Success on Broadway inevitably led to Hollywood and Robeson made his screen debut in 1933, before moving to England, where he starred in King Solomon’s Mines.

Back in America Robeson returned to Show Boat, singing his famous song, Ol’ Man River.

(4) A recording and singing career followed with Robeson popularising traditional songs developed by black slaves in the American South. In the 1950s Robeson made a visit to the Soviet Union. It was an era of strong anti-communist feelings in the United States and when Robeson returned home his passport was cancelled. (5) He was blacklisted by Hollywood and was unable to find work.

(6) Robeson left the States in 1958 and began a new career as a concert performer in Europe. But he became seriously ill in the sixties and returned to New York. He died in Harlem in 1976.

A Putting familiar information at the beginning by using a noun.
B Giving extra focus to information by putting it at the front of the sentence.
C Repeating a grammatical structure to give extra emphasis (parallelism).
D Familiar information at the beginning, new information at the end (the information principle).
E Putting familiar information at the beginning by using the passive.
F Long and complex phrases at the end (the end-weight principle).

Question tags

1 We can add a question tag to the end of a statement to turn it into a question. We use
   
   • do/does/did (in the present/past simple tense): You already know Harriet, don’t you?
   • a form of be: There weren’t many people at the concert, were there?
   • an auxiliary verb: She hasn’t had the baby yet, has she?
   • a modal verb: Tax returns can be submitted online now, can’t they?

   In most cases, if the sentence is positive, we use a negative form in the question tag.
   If the sentence is negative, we use a positive form.

2 We answer these questions in the following way:

<table>
<thead>
<tr>
<th>Positive tag</th>
<th>Answer</th>
</tr>
</thead>
<tbody>
<tr>
<td>“Is he?”</td>
<td>No, I don’t think he is. (agreement) Actually, yes, he is. (contradiction)</td>
</tr>
<tr>
<td>“Are they?”</td>
<td>You’re staying away for two weeks, aren’t you?</td>
</tr>
<tr>
<td>“Are you?”</td>
<td>Yes, that’s right. (agreement) No, it’s three weeks. (contradiction)</td>
</tr>
</tbody>
</table>

Indirect questions

1 An indirect question is one question within another question or a statement:

   Can you tell me how long I’ll have to wait to see the doctor?

2 Other common introductory phrases are I’d like to know, Do you know, and I wonder:

   I’d like to know if that car is abandoned or not.
   Do you know where the cash machine is?

Making adjectives and adverbs stronger

In spoken English we can use the adverbs really and pretty to make the meaning of adjectives stronger:

   That film was really exciting.
   It’s really freezing in here!
   I think their songs are pretty good.

In informal American English real can be used instead of really:

   That watch looks real expensive.

Stance and sentence adverbs

1 Adverbs such as clearly, honestly, obviously, surprisingly, understandably can express our attitude towards an action:

   You’ve obviously been eating too many sweets, young man! (This is a logical deduction which is clear to anybody.)

2 We can also use these adverbs in conversation to introduce, extend, or make a comment on a topic or opinion:

   Obviously, I had absolutely no idea of how expensive it would turn out to be.
2 Read the dialogue and see how many features of spoken English you can identify.
A There's nothing on TV tonight, is there?
B No. Just those really boring talent shows.
A I can't stand them.
B No, neither can I.
A Let's go out somewhere, shall we?
B OK. How about that new French restaurant? Sheryl went there last week.
A Did she?
B Yeah. She said it was pretty good. Obviously, it's a bit expensive.
A Oh, that's OK. Do you know if it's open tonight?
B Mmm, think so.

Spoken questions and responses

1 Indirect questions
We usually use indirect questions to make a question more polite or more tentative. We often use them when we are in a formal situation, when we are talking to strangers, or when we are not sure whether the person we are asking knows the answer.

In indirect questions we use statement word order; the subject always precedes the verb or verb phrase. This is similar to reported questions (► Unit 52):
X Do you know where is the nearest bank?  ✔ Do you know where the nearest bank is?
X Could you tell me when did he leave?  ✔ Could you tell me when he left?

In indirect questions we can use whether (or not) instead of if (or not) (► Unit 52.1):
I wonder whether or not Mum’s back?  I wonder whether Mum’s back or not?

2 Question tags
There are a number of variations in the form of the verb in question tags:

<table>
<thead>
<tr>
<th>TAGS AFTER ...</th>
<th>EXAMPLES</th>
</tr>
</thead>
<tbody>
<tr>
<td>I am</td>
<td>I’m still part of the team, aren’t I?</td>
</tr>
<tr>
<td>need (negative)</td>
<td>He doesn’t need to repeat the year, does he? (or: He needn’t repeat the year, need he?)</td>
</tr>
<tr>
<td>may/might</td>
<td>It may/might be fine tomorrow, mightn’t it?</td>
</tr>
<tr>
<td>must/can’t + have</td>
<td>He must have taken it, mustn’t he? They can’t have seen it, can they?</td>
</tr>
<tr>
<td>ought to</td>
<td>We really ought to leave now, oughtn’t we?/shouldn’t we?</td>
</tr>
<tr>
<td>Let’s</td>
<td>Let’s try that new restaurant, shall we?</td>
</tr>
</tbody>
</table>

If a positive sentence contains a negative or ‘restrictive’ adverb, e.g. scarcely, hardly (► Unit 48), it takes a positive tag:
There was hardly enough food for everyone at the wedding, was there?

Differences between British and American English ► page 368
Generally, the pronoun in the tag matches the subject of the sentence:
This is a good example, isn’t it? (This and it are both singular.)
Those are the flowers for Mum, aren’t they? (Those and they are both plural.)
Nothing ever happens when I’m away, does it?

But notice these exceptions:
Someone’s been taking my food again, haven’t they?
Nobody has phoned, have they?

We can use question tags for several purposes, and we say them differently.
• to ask for information (we don’t know the answer), we use a rising intonation (►):
  You haven’t talked to Jim yet, have you?
• to confirm something we think we already know, we use a falling intonation (►):
  It’s the first of May today, isn’t it?
• to make a request, we use a falling intonation (►):
  You’ll bring me back some of those lovely oranges, won’t you?

We also use question tags with imperatives. The form of the tag depends on the purpose:
Pick me up at eight, could you? (request)
Stay another night with us, won’t you? (invitation)
Turn the TV off, will you? Don’t annoy Rufus, will you? (polite command)

We can also use a positive statement with a positive tag when we seek confirmation:
‘I’m sorry, but I’m going to have to cancel this evening. I’m really busy and I’m still at work.’
‘Poor you. Things are still really hectic, are they?’ (to express sympathy)

Pronunciation ► 1.22
3 Reply and echo questions

We use ‘follow on’ or reply questions to show interest and to make a conversation ‘flow’:
‘We went to a really interesting play last night.’ ‘Did you?’

We form reply questions in the same way as tag questions, using auxiliary verbs, do did, etc. But, unlike tag questions, if the statement is positive, the reply question is positive and if the statement is negative, the reply question is negative:
‘I’m going to Malaysia on business next week.’ ‘Are you (really)?’
‘They didn’t give the concert after all last night.’ ‘Didn’t they?’

Reply questions can often express surprise, especially with the word really or an exclamation:
‘Great news: Jim’s just been promoted.’ ‘Has he really?’ ‘Has he? How fantastic!’

We use negative reply questions to show emphatic agreement with the speaker. Here we use a falling intonation:
‘That was the best holiday we’ve ever had!’ ‘Yes, wasn’t it?’

When we want to clarify something that the speaker has said or asked, we can use an echo question:
‘I went to Stacy’s yesterday.’ ‘You went where?’
‘Have you been to the Earth Centre?’ ‘Have I been to what?’
‘Have I been where?’

4 Short responses

If we want to agree with the speaker or say something is the same, we use these patterns:

<table>
<thead>
<tr>
<th>positive statement</th>
<th>so + be/auxiliary or modal verb + subject</th>
<th>‘I saw Jane yesterday.’ ‘Oh, yes, so did I.’</th>
</tr>
</thead>
<tbody>
<tr>
<td>subject + be/auxiliary or modal verb + too</td>
<td>‘I saw Jane yesterday.’ ‘I did too.’</td>
<td></td>
</tr>
<tr>
<td>negative statement</td>
<td>neither/nor + be/auxiliary or modal verb + subject</td>
<td>‘I didn’t have enough money’. ‘Neither/Nor did I.’</td>
</tr>
<tr>
<td>subject + be/auxiliary or modal verb + either</td>
<td>‘I didn’t have enough money’. ‘I didn’t either.’</td>
<td></td>
</tr>
</tbody>
</table>

To disagree or say something is different we can use a form of be, an auxiliary or modal verb:
‘I love French movies.’ ‘Oh, I don’t.’ ‘I haven’t seen that one.’ ‘Oh, I have.’

In informal speech we can just use the object pronoun, usually with too, neither or nor:
‘I saw Jane yesterday.’ ‘Me too!’
‘Julian’s coming with us.’ ‘Him too?’
‘I didn’t want to go.’ ‘Me neither.’ ‘Nor me.’

We can use so at the beginning of a short answer to express a certain amount of surprise. With this meaning we use so + subject + be/auxiliary verb, etc:
‘They’ve put a new statue in front of the palace.’ → X ‘So have they!’
✓ ‘So they have!’

To express a negative response to a question or prediction we make the verb negative and use so in informal spoken English:
‘Are you coming to the party tomorrow?’ → X ‘I think not.’
✓ ‘I don’t think so.’

An exception to this is hope. We do not use the not … so pattern but use hope not:
‘It’s going to rain!’ → X ‘Oh, I don’t hope so!’
✓ ‘I hope not.’

For a more emphatic negative response we can use no way + auxiliary + subject:
‘It’s going to rain!’ ‘No way is it going to rain!’
‘It’s $25.’ ‘No way am I paying $25 for that!’

**GRAMMAR IN USE**

**MS MARCH** Excuse me. Do you know (1) .......... this is the flat advertised for rent in the local shop?

**LANDLADY** Yes, it is. I’m the landlady.

**MS MARCH** I’m Eleanor March. I think we spoke on the phone a few days ago.

**LANDLADY** (2) .......... we? I don’t remember. Well, come in, (3) .......... you?

**MS MARCH** This is the living room. It’s not looking at its best right now, I’m afraid.

**LANDLADY** (4) .......... it? It looks fine to me.

**MS MARCH** Oh, I see. But aren’t electric heaters quite expensive?

**LANDLADY** Oh, I don’t think (6) .......... – they’re very economical. Now, through here is the second bedroom ...

**MS MARCH** Oh, there are two bedrooms, (7) .......... there?

**LANDLADY** Yes. And it’s very large for a second bedroom in a flat of this type.

**MS MARCH** Yes, (8) .......... it is! It’s an excellent size. Oh dear, someone’s broken the window in here, (9) .......... they?

**LANDLADY** Oh, don’t worry about that. I’ll get that fixed. This is the bathroom.

**MS MARCH** Mmm. It’s a bit dingy. I don’t suppose you could paint it, (10) .......... you?

**LANDLADY** Well, we can discuss that later. This is the kitchen. I designed it myself.

**MS MARCH** Did you (11) ..........? It’s great!

**LANDLADY** Yes, though it is in a bit of a mess. Now, let’s go back to the living room, (12) .......... we?

**MS MARCH** Yes. Well I’m quite interested in renting the flat. Nobody else has been to see it, have (13) ..........?

**LANDLADY** No. Would you like to see any of the rooms again?

**MS MARCH** I don’t (14) .......... so. But I’d just like to check the rent. I think the advert said it was £650 a month, (15) .......... it?

**LANDLADY** (16) .......... it? I thought I’d put £750.

**MS MARCH** Well, £650 plus bills.

**LANDLADY** Oh yes, so (17) .......... did – £650 plus bills.

**MS MARCH** Are there any particular rules?

**LANDLADY** Well, I don’t like loud music.

**MS MARCH** Oh, (18) .......... do I. I always play my music very quietly.

**LANDLADY** Good. Anything else?

**MS MARCH** What about pets? (19) .......... you tell me whether you allow cats?

**LANDLADY** You see I’ve got a small cat – I love cats!

**MS MARCH** Me (20) ..........! I’ve got three cats! I think we’re going to get on really well!
1 Emphasising verbs

When we want to emphasise a clause/sentence in speech, we stress the auxiliary verb:

Fancy seeing you again. It has been a long time!
Don’t beat around the bush. Did you or didn’t you take it?
That holiday’s done wonders; you are looking well!

In the present/past simple affirmative we insert stressed do/does/did before the main verb:

I never drink coffee but I do drink tea sometimes.
I’m very sorry, sir. Our representative does try her best to comply with passenger requests.
The witness is hazy on the details, but she did notice a scar on his forearm.

But if the auxiliary (or infinitive) is preceded by a modal verb then we stress the modal:

That’s absolutely ridiculous; you must have seen something!
She wasn’t even here – it can’t be her!

We can also emphasise imperatives with do:

Do be careful! The path’s very slippery.

We often use this pattern to make polite suggestions or offers:

Do sit down and make yourself comfortable.

Do let me help you with that heavy case.

Pronunciation ➤ 1.23

2 Emphasising questions

We can add -ever to question words (except whose) to add a tone of annoyance or surprise to a question. More informally, we can use the question words + why on earth:

Whatever have you done to your hair? It looks terrible!
However did they manage to get that ship in the bottle?
However did you find it?

Why on earth did John decide to study Chinese?
Where on earth are you going to put all that stuff?

We use else with question words when we have some information but would like more:
‘Elena told me she’d retired last month.’ ‘Yes, I’d heard that. What else did she say?’

It is quite common to use a question form when we don’t really want an answer. We call this a ‘rhetorical question’ and we use it to express amazement, or irritation with something:

Have you seen the price of fish at that supermarket? It’s outrageous.
Are you being deliberately unhelpful? Is this your idea of a joke?

We use What’s the point/use in/of ... ? to suggest that a course of action is worthless:

What’s the point in writing to your MP? It won’t make any difference.

What’s the use of explaining it all to you if you’re not listening?
3 Emphasising adjectives, adverbs and nouns

We can use how + adjective or what (a/an) + adjective + noun to make a brief emphatic comment (an exclamation) in conversation:

*How amazing! What an amazing story!* What lovely shoes!

We don’t use what + adjective without a noun:

*X What amazing!

We often use so and such to emphasise adjectives, adverbs and nouns:

<table>
<thead>
<tr>
<th>so + adjective/adverb</th>
<th>You should meet Larry. He’s so funny. Time goes so quickly when you’re having fun.</th>
</tr>
</thead>
<tbody>
<tr>
<td>such + a/an (+ adjective) + noun</td>
<td>This is such a lovely place for a wedding party. I had such a nightmare last night.</td>
</tr>
<tr>
<td>so much/little + uncountable noun</td>
<td>I’ve never seen so much poverty. It was shocking. There’s so little rainfall here, almost nothing grows.</td>
</tr>
<tr>
<td>so many/few + plural countable noun</td>
<td>You must go to the shops. There are so many bargains at the moment.</td>
</tr>
<tr>
<td>such a lot of + noun</td>
<td>There’s such a lot of food left over – take some home with you.</td>
</tr>
</tbody>
</table>

All these can be followed by a *that* clause (⇒ Unit 59.4). In speech we often omit *that*:

*There was such a long queue* (that) we decided not to bother.
*I’m so tired I think I’ll go to bed.*

Strengthening adjectives with pretty, dead, etc. ⇒ Unit 81.1
so to introduce a result clause ⇒ Unit 59.4

4 Using fronting for emphasis

In spoken English we can qualify something in a previous statement by using normal word order (subject + verb + adjective/complement):

*‘She’s such a nice person. So friendly and reliable,’*  
*‘She may be friendly but she certainly isn’t reliable.’*

But to make a strong contrast to the previous statement we bring these elements to the beginning of the sentence (⇒ Unit 76.5):

*Friendly she may be, but reliable she isn’t!*  

We can also put *this* and *that* at the beginning of a response for emphasis. We often use *that* to refer to something the other speaker has said and *this* to refer to something we have said or information/opinions the speaker and listener share:

‘*Taxes are way too high in this country.*’ *I disagree with that.*  
‘I don’t know that.*’  
‘*And how old is the house?*’ *I don’t know that.*  
‘*Hurry up. We always get a better seat if we arrive early.*’ *This is true. Let’s find a taxi.*

In this position, *this* and *that* can sometimes replace an adverb or noun phrase:

*It was three years ago. I met her then.*  
→ *That’s when I met her.*

*We have to get off here.*  
→ *This is where we have to get off.*

*They told me the same thing.*  
→ *That’s what they told me.*
**Practice**

1. **Match the sentences 1–10 with the responses A–J.**

   1. Do you have a sandwich?
   2. Carrie’s just told me about Jeff’s promotion.
   3. I’m going to complain to the store manager.
   4. Steve overslept again this morning.
   5. Apparently we have to re-apply in August.
   6. Jane got upgraded to first class on the flight.
   7. Is Mr Granger in the office today?
   8. What fantastic photos!
   9. Do you think the cancer is going to spread?
   10. What did you think of the announcement?

   A. Yes. That’s what they told me.
   B. I haven’t seen him. But I did see his car in the car park.
   C. That I couldn’t say.
   D. Thanks. I am quite hungry.
   E. What’s the point? They never listen to customers.
   F. I don’t know. There was such a lot of noise we couldn’t really hear it.
   G. I’m not surprised. He’s been working really hard recently.
   H. What else did she say?
   I. However did she manage to do that?
   J. I know. Karl took them when we were on safari.

2. **Choose the correct or most appropriate words in italics.**

   1. Why on earth you gave up / did you give up that job?
   2. If she won’t listen, how’s / what’s the point in speaking to her?
   3. So she told you about her divorce. What else / extra did she say?
   4. It’s so / such a cold night I think I’ll stay at home.
   5. He says Mandy took it – what ridiculous / what a ridiculous thing to say!
   6. Pretty she might be, but she young isn’t / young she isn’t!
   8. I’m telling you the truth. I did leave / left the keys on the kitchen table last night!
   9. Whatever / However did you get her to stay? I thought she was determined to leave!
   10. It was at university last year – that’s / then’s when I first discovered the truth!

3. **Grammar in use**

   Replace the underlined words and phrases with a more emphatic equivalent. The first two have been done as examples.

   **SALLY** (0) That was an amazing film. What did you think of it?

   **FRED** Rubbish. (00) It was so boring that

   **SALLY** Oh. I’m sorry to hear that. Don’t you like American films?

   **FRED** Yes, (1) I like them – but I didn’t like this one. There were no big stars in it and

   **SALLY** nothing really happened for two hours.

   **FRED** (3) I disagree with that. They spent nearly the whole time in Los Angeles.

   **SALLY** They went to the beach ...

   **FRED** True. (4) They went there. But (5) what other places did they go to?

   **SALLY** Er. They went to the hills, and the desert.

   **FRED** But (6) why did they go there? That part of the film was really pointless.

   **SALLY** They went to find the boy’s father. I thought it was exciting, and very atmospheric.

   **FRED** Well, it might have been atmospheric, but (7) it wasn’t exciting.

   **SALLY** OK. (8) There’s no reason to continue discussing it – we always disagree about

   **FRED** films anyway!
4. Complete what the people are saying by writing one word in each gap. Use emphatic forms. Listen and check.

1. 'That was ............ a great concert! I'm glad they played ............ many of my favourites.'

2. 'Please. ............ take a seat. The doctor will see you in a minute.'

8. 'Alex? Is it really you? It's years since we last saw you! It ............ be you - you look so young! ............ did you find us?'
81 Adverbs

1 Modifying adjectives in spoken English
In addition to really and pretty, expressions such as nice/good and + adjective can be used to intensify the meaning of many adjectives:
The hotel was nice and clean.
I'll come when I'm good and ready.
In very informal British English, dead and a number of slang words (e.g. well) can be used as intensifiers:
The rollercoaster ride was dead scary.

⚠️ We can use a bit to makegradable adjectives weaker. We don't use a bit in front of an adjective + noun:
X It was a bit boring film. ✓ That film was a bit boring.
We usually avoid these expressions in formal English:
X The war can be linked to a dead complex series of treaties between various European nations.

2 Using adjectives as adverbs
We sometimes use the adjectives cheap, clean, clear, good, loud, quick, slow and smooth as adverbs in informal spoken English, although some people consider these incorrect:
They sell things cheap in that place. (= cheaply) Congratulations. You did good. (= well)
This car goes so slow! (= slowly) Despite its age the engine runs pretty smooth. (= smoothly)

3 Commenting with sentence adverbs, infinitive and participle phrases
In conversation we can use sentence adverbs such as obviously, surprisingly, etc. (Unit 78.4) to introduce, extend, or make a comment. We usually put them at the beginning or end of the sentence, separated by a comma:
Incidentally, I noticed they were looking for new players down at the club.
I thought that film was pretty boring, frankly.

Some adverbs, e.g. naturally and clearly, can be used as sentence adverbs and also as adverbs of manner. Note the different meanings:
Despite being in a zoo, the animals behaved quite naturally. (= in a natural way)
Naturally, wild animals behave quite differently in captivity. (= this is not surprising)
The teacher answered the question clearly and precisely. (= in a clear way)
Clearly, the teacher didn't answer the question. (= This is obvious from evidence I have.)

We can also use infinitive and participle phrases to add a comment:
I'm not very keen on it, to tell the truth. It wasn't a bad show, all things considered.
Generally speaking, they're a pretty friendly bunch of people.

Practice

1 Choose the best explanation for each sentence, A or B.

1 We were wearing the same outfit! It was dead embarrassing.
   A The experience was slightly embarrassing. B The experience was very embarrassing.
2 Apparently, her children are all going to that expensive private school.
   A I know this is correct. B Somebody told me this and I think it is correct, but I’m not sure.
3 That new computer game is pretty exciting.
   A It looks good but it isn’t very exciting. B It’s really exciting.
4 Make sure you wear something smart and nice.
   A Wear something very smart. B Wear something nice.
5 Incidentally, have you seen Roger Baines this week at all?
   A I’ve just been talking about Roger. B This is the first time I’ve mentioned Roger.

2 Choose the correct words in italics. If both options are possible, choose both.

1 I haven’t seen Sylvia for ages. Frankly / Apparently, she’s just remarried.
2 I love my moped but I wish it didn’t go so slow / slowly.
3 It’s a nice restaurant but it has a bit spicy food / the food is a bit spicy.
4 And then the show was cancelled. Luckily / By the way, we were able to get a full refund.
5 What a great exhibition! It was dead / a bit interesting.
6 Don’t play your music so loud / loudly – I can’t hear myself think!
7 I’ve never been very keen on football, telling / to tell the truth.
8 Naturally / Generally speaking, I find the shops here a bit cheaper than the ones in town.

3 GRAMMAR IN USE Use words or phrases from the box to replace each of the expressions in brackets.

a bit, admittedly, apparently, by the way, clearly, dead, luckily, naturally, pretty, to be honest

KAREN We had a (1) (really) .................. good dinner at Cato’s last night. Lizzie was there with her new husband. (2) (This is something I’ve heard although it may not be true) .................., he’s something very high up and important in the civil service.

CLARE Yes, I’ve heard that too. (3) (This is my true opinion, although it may be shocking) .................., I never really expected her to marry anyone successful. She was always so scruffy and (4) (slightly) .................. laid back. She was never into social status or anything like that.

KAREN (5) (This seems clear to me) .................., she’s changed her outlook on life. I mean, she kept telling me all about how much money their new house had cost!

CLARE Well she never used to be interested in money at all. (6) (This probably contradicts what I’ve just said) .................., she did like eating out and travelling.

KAREN (7) (What I’m about to say isn’t really related to what we’ve been discussing) .................., guess who was at the next table? Simon Dell from university!

CLARE Was he? I remember he used to be (8) (so) .................. ambitious.

KAREN He still is. (9) (This is not surprising) .................., he’s a company director now.

CLARE That’s nice. Oh, were the awful Wallace twins there?

KAREN I’m afraid so. (10) (I’m pleased about this) .................., they were right at the other end of the table so we didn’t have to talk to them.
82 Hypothesising in speech

1 Imaginary conditions
We can use imagine, say, suppose/supposing (that) and what if to talk about imaginary conditions. There are several patterns we can use:

| Present simple | to ask about an imaginary situation in the future that we think is likely, or if we want to suggest that it is | What if* we miss the last train? Suppose/Supposing he gets caught at customs? They can be really tough. |
| Past simple/past continuous | to ask questions about an imaginary situation in the present or future and its possible results; this is similar to second conditionals (Unit 38) | Imagine/What if he asked you to marry him, what would you say? (If he asked you to marry him ...) Say* he was stealing from petty cash, would you report him? |
| Past simple | to make suggestions | Say/Suppose we took the early train? |
| Past perfect | to talk about an imaginary past situation and its results; this is similar to third conditionals (Unit 38) | Say/Imagine your parents had refused, how would you have felt? (If your parents had refused ...) |

* We often omit the result clause with these conjunctions: What if the money doesn’t arrive on time? Say he refuses to lend us the car? We don’t use these conjunctions with will: X Supposing he will get caught?

2 it’s time ...
In speech we use it’s (high/about) time + subject + past simple to say that something is not happening and it should be:
It’s high time you found yourself a job, young man! (= You should have a job but you don’t.
It’s time we left for the airport – we don’t want to miss the flight. (= We should leave now.)
It’s about time you defrosted the fridge. (= You should defrost it.)

⚠ We cannot use a negative after it’s time ...
X It’s time we didn’t stay.

More on it’s time ... ➤ Unit 40.3

3 in case ...
We use in case to imagine a future situation. It is not the same as if:
Let’s take our swimming things in case there’s a pool at the hotel.
(We don’t know if there’s a pool, but we’ll take our swimming things anyway.)
We’ll take our swimming things if there’s a pool at the hotel.
(We’ll only take our swimming things if there’s a pool at the hotel)
We often use in case to imagine a precaution necessary for a situation:
I’ve got the number of a minicab company in case we miss the train.
Take your mobile phone in case you want to call us when you’re there.

MIKE Oh, I’m sure he will.

ANITA But (3) .... we’re really busy in the office? There isn’t really anyone to take over my caseload.

MIKE What about Lucy? (4) .... she took on more responsibility.

ANITA She’s still very inexperienced. (5) .... she messed something up – I’d get the blame and have to deal with the consequences afterwards.

MIKE You’re being paranoid, I’m sure she’d be OK.

ANITA All right then. What if we (6) .... for the last two weeks of July? The weather’s sure to be good then.

MIKE Yes, but that’s during the school holidays. Everything’s bound to be expensive.

ANITA Well, (7) .... we went for the first two weeks of the month – would that be cheaper?

MIKE Yes, I’m sure it would. Do you still want to go to Florida?

ANITA I’m not sure now. I think we’d better go somewhere closer to home (8) .... Mum is ill again and we need to get back in a hurry.

1 Contractions

In spoken English and when we represent speech in writing we can combine contracted auxiliaries, e.g. ‘ve, and contracted not after modal verbs:
‘He shouldn’t’ve done it.’ (= He should not have done it.)
‘They couldn’t’ve known about it.’ (= They could not have known about it.)

In informal speech we can also use contractions when there is more than one subject:
‘Karl and Jenny’ve had a new baby.’ ‘The boss and her team’re going to the conference.’

2 Ellipsis

If the meaning is clear, we often leave out words in conversation. The most common words to omit are ones that come at or near the beginning of a sentence:

</tbody>
</table>

* We often omit words when we ask questions with the verbs see, hear and think:
  Do you think they’ll get here in time? ➔ Think they’ll get here in time?
  Have you seen her recently? ➔ Seen her recently?

We can also omit words at the end of a sentence, especially in short responses:
‘Will you be at the party?’ ‘I should be.’ (= I should be at the party.)
‘Are you going to Italy this summer?’ ‘Yes, we hope to.’ (= We hope to go to Italy.)
‘Did you get the concert tickets?!Did you get them?’ ‘Yes, I got four.’ (= I got four tickets.)

3 Inserts

Inserts are words and short expressions that we use in speech but not usually in writing. They fulfil several functions which help conversation to flow smoothly:

<table>

<td>to explain, or rephrase</td>
<td>I mean, he wants to do some more tests.</td>

<tr>
<td>you know</td>
<td>to ensure the listener understands</td>
<td>Have you worn that new pullover yet, you know, the one you bought in the sales?</td>

<td>That was delicious. Now, who wants coffee?</td>
</tr>
<tr>

<td>at the end of a statement, to check the listener agrees</td>
<td>We'll meet outside the main entrance at six, OK?</td>
</tr>
<tr>
<td>er, um, like</td>
<td>to pause and to show that you have not finished speaking</td>
<td>Do you think I've, er, passed the test?</td>
</tr>
<tr>
<td></td>

</tr>
<tr>
<td>Really?</td>
<td>to show the speaker you are interested/surprised</td>

<td>to show you agree with the speaker</td>
<td>'And Lee's the worst player on the team.'</td>
</tr>
<tr>
<td></td>
<td></td>
<td>'Right. He's rubbish.'</td>
</tr>
</tbody>
</table>

¹ Uh huh is more common in American English.
² We can also use these inserts in an ironic way, to show doubt or scepticism:
   'If you buy this new skin cream, you will never have spots again.' 'Yeah, right!'

4 Prefaces and tags

A feature of conversation is that we can 'add-on' extra information. For example, we can repeat the subject of a sentence or question using an additional word, either at the beginning (a preface) or at the end (a tag):

**Caroline, she's my best friend now.**

**That restaurant, what's it called?**

**Where does he live, that student?**

**It's a great movie, this one.**

We can use prefaces to introduce a new topic. We often use prefaces and tags to make sure that the listener knows which subject we are referring to.
Practice

1 These sentences are taken from informal conversations, but there is one auxiliary verb missing. Rewrite the sentences using a suitable auxiliary verb. Use contracted forms wherever possible, as in the example. *5.17 Listen and check.

0 He could not seen them do it. *He couldn’t’ve seen them do it.

1 She will not got back by the time the show starts.

2 They trying to find a nice hotel for two hours last night.

3 He might not known that it was you at the door.

4 Alison and Steve taking us out for a meal tomorrow.

5 They really should told you about their decision.

2 Grammar in Use In each line of these short informal conversations there is at least one word which can be left out. Find the words and cross them out. *5.18 Listen and check.

3 A How are you feeling?
   B I’m not so great today.
   A Have you got a headache?
   B Yes, I have got a headache.

4 A Have you heard the news?
   B No, I haven’t heard it.

5 A Do you think they’ll be here soon?
   B I’m not sure. Anyway it’s time for me to leave now.
   A OK. I’ll see you later.

6 A The doorbell’s ringing!
   B Is there anybody downstairs?
   A I don’t know.

7 A There are some snacks here. Are you hungry?
   B Yes. I am hungry.
   A Would you like a sandwich?
   B Yes, I’d love one.
   A And what about some cake?
   B No thanks, I wouldn’t want to put on weight!

8 A Do you want to watch TV?
   B OK. It should be the football results around now.
3 GRAMMAR IN USE Choose the correct words in italics. 5.19 Listen and check.

JOSIE Have you got any plans for the weekend, Cara?
CARA Not really.
JOSIE (1) You know, / Well, would you like to join us for a barbeque on Sunday?
CARA (2) Er, / Yeah, I'm not sure. I've got a lot of work to do, (3) I mean, / now, revision for my exams next week.
JOSIE (4) Well / Really?
CARA Yeah, these exams are really difficult ones. I'm, (5) like, / right, quite worried about them.
JOSIE (6) Well, / I mean, why don't you just come for a couple of hours? You'd still have plenty of time for revision.
CARA (7) You know / Mmm. I suppose so. But how am I going to get to your place?
(8) I mean, / Well, my car's in the garage at the moment ...
JOSIE No problem. I can ask Mandy to give you a lift.
CARA Who's Mandy? Do I know her?
JOSIE I think so. She's June's sister; she's very tall.
CARA (9) Really / Right. I remember now. She was at your birthday party.
JOSIE I'll ask her to pick you up at four o'clock.
CARA Fine. But ask her to phone first, (10) OK / like?
JOSIE Sure. But why does she need to phone you?
CARA (11) Well, / All right, the doorbell isn't working. So I don't know when people arrive at the front door.
JOSIE Oh, I see. (12) Like, / Yeah, I'll ask her to phone when she gets to your house.
CARA Is there anything you'd like me to, (13) er, / well, bring?
JOSIE Not really. (14) Right, / Well, I suppose it would be nice if you brought your camera. Mine isn't working.
CARA Fine.
JOSIE See you on Sunday then, (15) you know / OK?
CARA I'm looking forward to it!

### Spelling rules

#### 1. Plural forms of nouns and regular present tense endings

<table>
<thead>
<tr>
<th>Category</th>
<th>Rule</th>
<th>Examples</th>
</tr>
</thead>
<tbody>
<tr>
<td>Most nouns and verbs</td>
<td>Add -s</td>
<td>car → cars, argument → arguments, eat → eats, sleep → sleeps</td>

<tr>
<td>Nouns/verbs ending in -ch, -sh, -x, -z or</td>
<td>Add -es</td>
<td>watch → watches, boss → bosses, fox → foxes, waltz → waltzes¹, potato → potatoes, hero → heroes³</td>
</tr>
<tr>
<td>ending in consonant + o</td>
<td></td>
<td>teach → teaches, miss → misses, wash → washes, go → goes</td>
</tr>
<tr>
<td>Nouns/verbs ending in vowel + o</td>
<td>Add -s</td>
<td>radio → radios, video → videos</td>
</tr>
<tr>
<td>Nouns/verbs ending in consonant + y</td>
<td>Take away -y and add -ies</td>
<td>family → families, party → parties, carry → carries, fly → flies</td>
</tr>
<tr>
<td>Nouns/verbs ending in vowel + y</td>
<td>Add -s</td>
<td>enjoy → enjoys, play → plays</td>
</tr>
</tbody>
</table>

¹ If the pronunciation of ch is /k/, add -s only: patriarch → patriarchs.  
² Note these exceptions of vowel + z: quiz → quizzes, fez → fezzes.  
³ Some words ending in consonant + o, especially words from other languages, take -s only: piano → pianos, photo → photos, kilo → kilos, adagio → adagios.

#### 2. Irregular noun plurals

English does not have very many irregular noun plurals. Here are some examples:

<table>
<thead>
<tr>
<th>Category</th>
<th>Rule</th>
<th>Examples</th>
</tr>
</thead>
<tbody>
<tr>
<td>Nouns ending in -f or -fe</td>
<td>Usually add -ves*</td>
<td>leaf → leaves, loaf → loaves</td>
</tr>
<tr>
<td>Foreign nouns</td>
<td>Varies according to origin</td>
<td>Latin: datum → data, erratum → errata, terminus → termini, vertebra → vertebrae, crisis → crises, phenomenon → phenomena</td>
</tr>
<tr>
<td>Other irregulars</td>
<td>Change of vowel no change</td>
<td>child → children, ox → oxen, woman → women, foot → feet, craft → craft (e.g., boat), sheep → sheep</td>
</tr>
</tbody>
</table>

* Several words ending in -f and all those ending -ff just take -s: chief → chiefs, belief → beliefs, cliff → cliffs.  
Some words ending in -f take either plural ending: scarf → scarfs/scarves.  
You can check irregular plurals in a dictionary.
### 3 Possessive 's

<table>
<thead>
<tr>
<th>Singular noun: add 's</th>
<th>house → house's</th>
<th>bus → bus's</th>
</tr>
</thead>
<tbody>
<tr>
<td>Singular proper noun ending in -s: add 's or an apostrophe ('') only</td>
<td>Mr James → Mr James's house/Mr James' house</td>
<td></td>
</tr>
<tr>
<td>Regular plural noun: add an apostrophe only</td>
<td>boys → boys'</td>
<td>buses → buses'</td>
</tr>
<tr>
<td>Irregular plural noun (not ending in -s): add 's</td>
<td>men → men's</td>
<td>children → children's</td>
</tr>
<tr>
<td>One, somebody, everyone, each other, etc: add 's</td>
<td>one's house</td>
<td>somebody's house</td>
</tr>
<tr>
<td></td>
<td>everyone's rights</td>
<td>each other's houses</td>
</tr>
</tbody>
</table>

### 4 Comparative and superlative one-syllable adjectives

<table>
<thead>
<tr>

</tbody>
</table>

### 5 -ing forms

<table>
<thead>
<tr>
<th>Most verbs</th>

<td>Take away -ie and add -ying:</td>
<td></td>
</tr>
<tr>
<td>Verbs of one syllable that end in a short vowel + consonant</td>
<td>Repeat the consonant and add -ing:</td>
<td></td>
</tr>
<tr>
<td>Verbs with more than one syllable that end in a stressed short vowel and consonant e.g. begin(^2)</td>
<td>Repeat the consonant and add -ing:</td>
<td></td>
</tr>
<tr>
<td></td>
<td>Eat → eating</td>
<td>Go → going</td>
</tr>
<tr>
<td></td>
<td>Take → taking</td>

<td>Die → dying</td>
</tr>
<tr>
<td></td>
<td>Swim → swimming</td>
<td>Sit → sitting</td>
</tr>
<tr>
<td></td>
<td>Begin → beginning</td>
<td>Forget → forgetting</td>
</tr>
</tbody>
</table>

1 In British English, but not American English, we often double the final consonant -t: travel → travelling

2 We don’t double the consonant if the final syllable is not stressed: visit → visiting.

### 6 Past tense endings

<table>
<thead>
<tr>
<th>Regular verbs ending in a single stressed vowel + consonant(^1) (except w, x or y)</th>
<th>Double the consonant</th>
<th>Hug → hugged</th>
<th>Pat → patted</th>
</tr>
</thead>
<tbody>
<tr>
<td>Regular verbs ending in a consonant + y</td>
<td>Change y to i</td>
<td>Copy → copied</td>
<td>Tidy → tidied</td>
</tr>
<tr>
<td>Irregular verbs(^2)</td>
<td>Do not form past tense with -ed</td>
<td>Go → went</td>
<td>Sit → sat</td>
</tr>
</tbody>
</table>

1 In British English, but not American English, we often double the final consonant -t: label → labelling

2 You can check irregular verbs in a dictionary.
APPENDIX 4 British and American English

Nouns ➤ Unit 1
Some uncountable nouns in British English are countable in American English.
Br E: accommodation (uncountable) Am E: accommodations (countable)
In American English collective nouns are usually followed by singular verbs only:
Our class is studying Dickens this semester. The United Nations has announced a ceasefire.

Prepositions ➤ Unit 11
Br E: at the weekend Am E: on the weekend
In American English it is possible to omit the preposition before days.
Br E: Our flight leaves on Tuesday.
Am E: Our flight leaves Tuesday.
Br E: I’ll be staying at the Hilton from Friday until/till/to Monday.
Am E: I’ll be staying at the Hilton Friday through Monday.
In American English it is common to use a quarter/ten/five, etc. of (or till) and a quarter/ten/five, etc. after the hour in addition to the British English use of to and past.
Br E: It’s (a) quarter to nine. It’s ten to seven. It’s (a) quarter past nine. It’s twenty past seven.
Am E: It’s a quarter of nine. It’s ten till seven. It’s a quarter after nine. It’s twenty after seven.

Adverbs ➤ Unit 17
In informal American English real and good can be used instead of really and well:
She’s a real nice girl. That test was real hard. Congratulations. You did good!

Tenses ➤ Units 19 and 23
In American English have got is not common; it is used mainly in speech (and not in writing); negative and question forms are not common.
Br E: Have you got a pen I could borrow? Am E: Do you have a pen I could borrow?
In American English the past participle form of get when it means ‘has become/obtained/received’, etc. is gotten: Hollywood movies have gotten more violent in recent years.
In American English, the past simple can be used after a superlative:
Br E: This is the worst movie I’ve ever seen. Am E: This is the worst movie I ever saw!
It is common in American English to use the past simple with the adverbs just, already, yet and still:
‘We just received the invitation to your daughter’s wedding. Did she buy a wedding dress yet?’
‘No, she still didn’t make up her mind what style she wants.’ ‘What about the rings?’
‘Yeah, they bought those already – they got them in New York last weekend.’

Conditionals ➤ Unit 38
It is possible to use would in both clauses in American English but NOT in British English.
Am E: The blockades wouldn’t happen if the police would be firmer with the strikers.
Br E: The blockades wouldn’t happen if the police were firmer with the strikers.
In American English, it is possible to use would have in the if clause. This is becoming more common in British English, although many people consider it incorrect.
Am E: If the play would have finished on time, we wouldn’t have missed the train.
Br E: If the play had finished on time, we wouldn’t have missed the train.

Question tags ➤ Unit 79
Note the following contrasts:

<table>
<thead>
<tr>
<th>Br E</th>
<th>Am E</th>
</tr>
</thead>
<tbody>
<tr>
<td>have Oliver has a lot of friends. has’t he?/doesn’t he?</td>
<td>have Oliver has a lot of friends, doesn’t he?</td>
</tr>
</tbody>
</table>

**UNIT 1**

1. Yes, it was written by our next door’s neighbour’s wife – she’s a well-known art critic, apparently.

2. OK. It sounds like it might be interesting.

3. I thought we might all meet up for lunch first.

4. Good idea. That French place in Green Street’s reputation is excellent – a colleague of mine told me about it, although I haven’t been there myself.

5. Right, let’s try that place then. By the way, will you be coming by car?

6. Why?

**UNIT 2**

1. Are you interested in a drawing, painting or the sculpture?

2. Would you like to improve your knowledge and skills?

3. Would you like to experience the deep sense of satisfaction you get from creating your own original work?

4. At East Hamley College a team of highly-qualified tutors are available to help you improve your technique. We run art classes on Tuesday and Thursday evenings from 6.30 to 9.00. Each session costs £15 and lasts for two hours with a 30-minute break. We think you’ll agree that £15 isn’t a lot to pay for over two hours with the personal attention of our art teachers!

5. Both the painting and sculpture classes take place in the new annexe on Becton Road. This also has a relaxing café selling a coffee and a range of snacks where you can take a break and socialise with your fellow students.

6. You won’t need to bring anything with you – we supply paint, paper and any other materials you need. But wear something that you don’t mind covering in paint – a jeans and an old shirt is fine.

7. Every year, the work of our students is exhibited in a local gallery. So, if you’re lucky, your work might get spotted – you could be the next Damien Hirst!

**UNIT 3**

1. Who’s coming with us to the exhibition on Saturday?

2. Well, apart from me and Kylie, there’s Mike and Sandra, my brother-in-law’s nephew, Paul, and Harry.

3. Harry? Is he a friend of yours?

4. No, he’s coming with Paul – he’s a cousin of his.

5. What’s the exhibition about, anyway?

6. It’s an exhibition by the art gallery’s new discovery – Stephen Brewer.

7. Oh yes, I’ve just read an article about him in the local paper’s culture section.

8. Why?

**UNIT 4**

1. He 2 it 3 him 4 it 5 it 6 it 7 it 8 They

2. one 10 one 11 it 12 he 13 he 14 one

3. each other 2 me 3 himself

4. You 5 myself 6 one another

5. Alicia and I left the party early; Jane and Marcia stayed longer than we did.

6. Yes.

7. You’re suffering from too much stress. You should learn to relax more.

8. Do you prefer olive oil or sunflower oil?

9. I’m afraid these are the best seats I was able to find at such short notice.

10. Dorinda and Eric have been married for ten years; they met each other at university.

ANDY I know -- (2) they're always doing
(3) something around here. It's a nuisance

SANI I think it was (8) something to do with your
presentation tomorrow.
RAJ Did (9) they give you their name?
SANI No, but I know it was (10) someone from
the sales team.
3 When (11) one looks at the work in detail
(12) one can appreciate the superb craftsmanship
with which the brushstrokes evoke the
shimmering surface of the silks and satins. There
is (13) something almost sensual about the
lustrous surfaces of these rich fabrics. Every detail
is perfect; there is (14) nothing in this painting
which is clumsy or ill-thought-out. Of course,
Van Dyck's aim is to flatter his sitter, and the
accurate depiction of (15) something as
luxurious and expensive as silk serves to
emphasise the wealth and good taste of the
patron.

2 MAC Oh, Carl. I've been meaning to ask you.
How did your job interview go?
CARL It was fine. They offered me the job.
MAC Really? That's great. Where's it based?
CARL In their headquarters in city centre.
MAC Oh, of course. It's the Supersave. You told me
last week.
CARL. Yes, that's right.
MAC. Is it a big organisation?
CARL. Huge, over a hundred thousand employees.
MAC. Will you like that?
CARL. I think so. In my last job I was a manager in a really small company, but there was nowhere to go from there.
MAC. And now you're back to being a salesman again - it'll be a long way up!
CARL. All the better! It gives me something to aim for.
MAC. Is it an American company?
CARL. Well, it's from the Netherlands originally, but it's based here now.
MAC. Where did you see the ad for the job?
CARL. It was in the Herald Tribune, but it was a the smallest job ad I'd ever seen. I could easily have missed it.
MAC. Maybe they didn't want hundreds of applicants! Will you have to travel much now?
CARL. Yeah, probably. They said in the interview they thought I'd be away two weeks a month on average.
MAC. Janey won't like that ...
CARL. No, but she'll like some of the other aspects of the job, like the sports centre membership. She'll be able to play tennis whenever she wants, free.
MAC. That sounds good. Well, congratulations, let me shake your hand!

4 A cooperative was founded in 1947 by photographers Robert Capa, Henri Cartier-Bresson, George Rodger and David Seymour. All of them had been involved in the Second World War. Rodger had walked hundreds of miles to escape the Japanese in Burma. And Seymour received a medal for his work in American intelligence. However, all of the founders of Magnum had been photographers for some time. The photographic world they were famous for dated back further. Capa's photos of the Spanish Civil War were called 'the finest pictures of front-line action ever taken'. They all appreciated on the importance of showing the world what really happens during these major conflicts and world crises, so they decided to produce the best documentary photography at this time. Cartier-Bresson once commented, 'Some photographers tell the news step by step as if making an accountant's statement.' He and Magnum, on the other hand, felt that the news had to be shown in a way that would engage most the people who are unable to experience world-changing events at first-hand. Tragically, within a decade of the start of Magnum, the half of its original founders died while covering other wars. However, the agency had started to employ other top-class photographers and its work was sure to continue.

Today, Magnum is some the goal for many young photographers. It still produces the finest documentary photographs of world events. Recent coverage has included events in the Caribbean and civil wars in Africa, and while Magnum photographers cover these events, we will all be able to appreciate both the best and worst of humanity.

4 Crime is on the rise according to a (1) worried worrying report issued this week by the government's national statistics office. (2) Concerned citizens are likely to be alarmed by the report's conclusions. Despite promises that the government was tackling serious crime, the report indicates a 6% rise in serious offences over the last year. The largest increase has been in assaults especially those involving knives or other weapons. The (3) factor main main factor in these crimes appears to be the growth of gangs in our inner cities, and many of the crimes are drug-related. Burglaries and theft have also increased, although by a smaller percentage. The (4) publishing figures published figures show a 3% growth since last year. Government sources claim that the (5) underlying reason for this increase is the economic situation. An opposition spokesman said there was (6) nothing surprising in the figures. He pointed at (7) causes, which are social social causes, and blamed the rise in crime on the (8) present government's lack of investment in education and training. The chair of the Police Officers' Association placed responsibility for the situation on the shoulders of the Minister of Justice, the (9) responsible politician responsible for policing. Reductions in police numbers have been a (10) factor which is principal principal factor in the growth of crime, he contends. As usual, it is (11) old and vulnerable the old and (the) vulnerable who are most likely to be the victims of crime. More than 38% of the (12) victims identified in the report were over the age of 65. It is certainly true that there is a fear of crime amongst the elderly, and lobbying groups are calling for (13) radical something something radical to be done about the problem. They are asking for (14) sentences which are maximum maximum sentences to be given to those criminals that target (15) the elderly or disabled. They feel the (16) involved criminals criminals involved should be punished more severely than others.

   SUE That’s OK, but I’ve actually ordered the new James Bond film on DVD, and I hope to have got it by Saturday. Let’s make it Sunday evening, shall we?
   BETH Yes, that’s fine, but I need to leave a bit early as I have an interview on Monday morning.
   SUE OK, come round about seven. We’ll have a snack first, then watch the movie.

4 SARAH Welcome to the programme. This afternoon I'm standing in the middle of the northern Black Forest, Germany, with Rainer Sanger, from Friends of the Forest, a pressure group which represents people worried about the natural habitat in Europe. Rainer, you're very concerned about this area of the forest. Can you tell us why?

RAINER Yes. Much of the forest was wiped out in the storms last winter, as you can see. Many of the trees are dead, and more are dying because of the irreversible damage. We at Friends of the Forest believe that the authorities aren't doing enough right now to restore this beautiful forest to its former state.

SARAH But they are clearing the dead trees away today. I saw some men on the way here ...

RAINER Of course, but they are doing it that every year. It's the normal procedure. We need more trees now, but they aren't planting any.

SARAH I see. But you have approached the authorities about this, I understand.

RAINER We have tried but they're always making excuses – usually to do with money. It gets more and more frustrating all the time! Each time, they're telling us that they haven't got enough money to restore the forest as quickly as we'd like.

SARAH But it's not just an excuse, is it? They clearly don't have enough money for everything, and the current situation is quite extraordinary.

2 The Management of Broadbank Hotel wish to remind you that the hotel might close on 5 December for the usual year-end vacation. It is about to close to reopen early next year, but as part of the Value4U chain of hotels.
As you know, the Lister family has been involved in Broadbank Hotel for over twenty years now and the closure/marriage is a blow to all of us. We had recently started to look at ways of finding extra financial support: we anticipated working with an investment company to upgrade the hotel with the addition of a gym, swimming pool and sauna complex. We were on the verge of signing a contract, which would allow us to retain control of the hotel, but we were unable to complete the deal on time. We were bound to send our annual newsletter as usual to all our regular clients, with information about offers for the spring, but of course, that is now not possible. Unfortunately, we are likely to be not able unlikely to be able/likely not to be able to set up another hotel in the near future.
The Value4U chain envisages reopening the hotel by 1 March; you will be advised of the exact date. It just remains for us to thank you for all your support in the past.

As a safety precaution flights have been grounded, leaving thousands of passengers stranded. This couldn’t have happened at a worse time as this is the final week of the Easter holidays and holidaymakers across the continent have been trying to fly home. The source of the cloud of ash is the Eyjafjallajökull volcano in Iceland. A few days after the eruption started, the ash cloud arrived over Europe. At first the cloud was confined to the skies over the British Isles and Scandinavia, but it over the European mainland has now spread over the European main land. The fine particles of ash can enter jet engines and damage the internal parts, leading to catastrophic results. Fortunately, flights to airports in southern Europe are continuing. Some intercontinental flights originally destined for London, Amsterdam or Frankfurt have been re-routed to Madrid, which is still open. Passengers arriving there will be able to travel on to their final destination by road or rail. The aviation industry is hoping that the wind direction will change, taking the ash away from Europe. In the meantime, scientists are running test flights to assess the density of ash in the clouds. Depending on their findings, certain flight routes in the next few days may be reopened and may be reopened in the next few days.

... The cabin crew were shocked to find the previously healthy 28-year-old in a state of collapse at the end of a long-haul flight from Australia to London...

Farol Khan, director of the Aviation Health Institute, claims to have evidence that more than 6,000 passengers a year die of deep-vein thrombosis (DVT) as a result of long-haul flights. Unfortunately, as symptoms often take some time to appear, the link between the condition and flying is not always apparent. But there seems to be a clear relationship between the occurrence of DVT and the steady reduction in the amount of legroom between seats in economy-class cabins. In a bid to increase the number of passengers carried and their consequent profitability, many airlines have squeezed more and more seats into their planes, at the cost of comfort and legroom. And our willingness to put up with these uncomfortable conditions is simply based on the fact that we know more seats means lower prices. But with limited opportunities to stretch or move around, the blood circulation in passengers' legs tends to slow down, and blood clots can easily develop. Most at risk are elderly people, sufferers from heart conditions and smokers. But as Emma Christofferson's case shows, even the young and healthy can do little to prevent blood clots occurring under these circumstances.

Promoting a ‘caring, sharing’ image is something many airlines are keen on, and some of these have finally promised to take the problem more seriously, for instance by issuing health advice to passengers 'trapped' on their long-haul flights.

They usually recommend moving the legs and feet regularly, and advise taking walks up and down the aisle at least once an hour. But, as any experienced traveller knows, the aisles on most planes are only just wide enough for the trolleys to get through. It is often impossible to walk down the aisle to get to the toilets, let alone allowing enough space to take any exercise.

The truth is that until we are all prepared to give up paying rock-bottom prices for long-distance travel, the airlines will have no incentive to improve conditions. And a return to exclusive and expensive air travel is something nobody would contemplate advocating.

GILL What’s the point to join in joining that?
SEAN What’s the point? Honestly! What a crazy question!
GILL Why do you think it’s crazy?
SEAN Well, we’re in danger of losing a lot of our wildlife as the area becomes more built-up. So we need to create safe spaces for local species.

4 Arthur Wellesley, first Duke of Wellington, is a
leading military and political figure of the
nineteenth century. He is best known as the
commander of the British forces (1) which
helped to defeat Napoleon Bonaparte at the battle of
Waterloo in 1815.
Wellesley, who was born in Ireland, joined the
British army in 1787. At first he worked for the Lord
Lieutenant of Ireland, (2) who was a friend of his
brother Richard Wellesley. He also began a political
career when he was elected as a member of
parliament for Trim, (3) which was a constituency
in Ireland, two years later.
Wellesley saw his first active military service in 1794
in the Netherlands. In 1796 he went to India to
fight in the fourth Anglo-Mysore war, which
culminated in the battle of Seringapatam. But the
most significant phase of Wellesley’s career began in
1808, when he sailed to Portugal to lead the British
army in the campaign against the French
occupation of the Iberian peninsula. In 1813 he
defeated Napoleon’s brother Jacob, the man
(4) who had proclaimed himself king of Spain, at the
battle of Vitoria. It was a significant victory
(5) which effectively liberated Spain from French
occupation. As a reward for this success, Wellesley
was given the title of Duke of Wellington by the
British government.

Wellesley’s greatest victory came in Belgium in
1815. Together with Gebhard von Blücher, who
was the general leading the Prussian forces, he
finally defeated Napoleon at Waterloo, in Belgium.
The victory brought an end to the war (6) which
had ravaged Europe for almost twenty years.
Wellesley returned to London as a national hero
and resumed his political career, serving as prime
minister from 1828 to 1830.

2 ... Louis XIV decided to build a vast new garden to surround his new palace at Versailles. The first person to be asked to look at the site was his favourite architect, André Le Nôtre. Le Nôtre arrived at Versailles only to discover a thick forest with uneven ground and an inadequate water supply. It was a great honour to have been chosen for such a task, but it is not difficult to understand Le Nôtre's reluctance to take on such a challenge – the main water basin alone is 1.5 kilometres long, and there are dozens of fountains, statues and avenues. It was the first garden that was designed to be designed on such a large scale, and took more than forty years to build. When Le Nôtre died, in 1700, the garden was still incomplete.

3 This popular course examines literature from the last twenty years and examines literature from a variety of countries across the English-speaking world. It was due to be replaced this year, but because of its popularity it has not been replaced; instead, it will run for two more years.
- The course is a compulsory Level 3 component in Literature degrees and the course forms an optional part of the English language degree.
- For this course you are required to have studied at least two previous literature courses at Level 2 and you are required to have passed them with Grade 3 minimum. If registering for this course from another educational institution, you may be asked to provide proof of previous study and you may be required to take an internal test.

1 ... where childless couples they must undergo a series of intrusive interviews and examinations and, if they are successful, they will then be put on a waiting list for an unspecified period of time. An Inuit couple wanting to adopt simply makes the fact that they want a child known and soon enough the couple they will receive a call from a woman who is prepared to give up her child. She may want to give up her child. This may be because she already has too many children and she does not want another child. One of the calls may come from a relative or friend who wishes to help someone less fortunate than themselves. Traditionally, the couple would be asked if the couple they would like the child and, if they do so, a simple handover would take place. Today, however, the handover system has been replaced by bureaucracy in the form of civil registration, although the tradition itself has not been replaced. The tradition survives even in the twenty-first century.
