1F Talking about photos page 9
1 1 connected 6 say
2 2 show 7 as though
3 3 imagine 8 would guess
4 4 like 9 hard
5 judging

Transcript
The photos are connected with the
topic of school. Both photos show
students in class.
In the first photo I imagine that
they’re about 13 years old.
It looks like a science lesson
and judging by the students’
expressions, I’d say that they are
enjoying their lesson. They look
interested and it looks as though
they are working hard. Most of
them are looking at the experiment
and working together. They are
all wearing uniform – it’s quite an
old-fashioned-looking uniform, so
I would guess that it’s a private
school, but it could be a state
school. It’s hard to say.
2 1 I reckon they are about 17 years
old.
2 2 It’s a mixed class of girls and boys.
3 3 It’s difficult to tell what kind of
lesson their in.
4 4 It could be that they’re in a maths
lesson.
5 5 It looks as if one of them is asleep.
6 6 It’s clear that the girl in the front
desk isn’t interested.

Transcript
The second photo also shows
students in a classroom. I reckon
they are about 17 years old. It’s a
mixed class of boys and girls. It’s
difficult to tell what kind of lesson
they’re in. Their teacher is handing
a paper to one student. It could be
that they’re in a maths lesson. These
students aren’t wearing uniform. It
looks as if one of them is asleep.
It’s clear that the girl in the front
desk isn’t interested in the lesson
or perhaps she doesn’t understand
what she has to do.

   Another important point is that …

**Transcript**

S1 = student 1, S2 = student 2

S1 Well, I suppose the most obvious advantage of online shopping is that goods are cheaper than in the shops. In fact you get some really good deals on the Internet.

S2 True, but you have to admit that you don’t really know what you’re getting when you shop online, until it arrives.

S1 But surely you can almost always see a photo of what you’re buying on a website.
S2 Yes, but you can’t be sure that the colours are right, and you can’t touch it or examine carefully.

S1 That doesn’t really bother me. You can always return the goods.

S2 Another important point is that the Internet isn’t always secure. If you use your credit card to buy something online, criminals could get hold of the details, then use them to buy other stuff.

S1 But how often does that happen? Just think about the convenience of shopping online. Another advantage is that you don’t have to queue to pay, like you often do in shops. I know my mum in particular likes this aspect of shopping online. She orders all her groceries on the Internet and the supermarket delivers them to her door. She doesn’t have to queue for the checkout.

S2 Yes, but I still think security is an important concern.

Get ready for your exam page 19–20

• The Workbook Get ready for your exam lessons can be used as extra classroom lessons, as controlled exam practice or as independent study for homework. All the audio material for the listening tasks is on the Solutions Multi-ROM.

Reading
• Elicit or remind students of strategies for dealing with the true/false task type. Encourage students to read the text through once to get the general idea before reading the task statements. Remind students to underline the fragments of the text where they have found the answers.

Use of English
• Remind students that the words they write in the sentences must correspond with the rest of the sentence in terms of grammar. Encourage them to read their answers through when they have decided on the appropriate word form, making sure that their answer fits exactly with the framework of the sentence.

Listening
• Remind students to prepare for the listening by reading the statements carefully and underlining any key words. Play the recording twice.

Writing
• Read through and discuss the task together, then refer students to the Writing Bank for guidance. Students plan an article to be written at home or in class.

Speaking
• Elicit strategies for the task from the students. Remind them to talk about each picture, comparing/contrasting them rather than just describing them. If necessary, in a weaker class, brainstorm ideas about both pictures before starting. Students work in pairs to do the task.

Transcript

Speaker 1 I’m 18 and I’m the author of The Knight’s Horses, which has been published in the UK and is being translated into six foreign languages at the moment. I’m not unique – most young people have dreams and ambitions. But I’m lucky to be able to do professionally what I love most. I have written stories for as long as I can remember. My first creation, when I was four, was a book which was a mother’s day gift. Yet, it wasn’t until I was working on The Knight’s Horses that I realised I wanted to pursue writing as a career. As I spent more time working on the book I began to hope that I would be able to carry on writing. One of the challenges is that since writing has become a job as well as a hobby, I’m more conscious of other people’s expectations. Now I have to take them into consideration.

Speaker 2 I’m 13 and I’ve been campaigning against guns since my brother got shot when I was nine. I gave a speech at my brother’s funeral and that started it. It felt normal to stand up and speak out. People reacted and I thought, ‘I’ve got to stop this gun thing.’ I believe we should ban guns, period. Unfortunately, guns are used for protection by certain people. They are a part of street culture, like fashion and music. It’s very difficult to change because it’s engulfed the whole world. And I know I can’t change the world. But if you can convince one neighbour and then another, you can make your area a safer place to live.

Speaker 3 I’m Cynthia and at 18 I’m a scientist and a proud inventor of a robotic laser hand that moves via corresponding signals from a glove worn by its operator. I’ve even got a patent for it. I never imagined I could produce such a clever invention. The biggest challenge was with the design. My interest in science was sparked while I was at grammar school. We had a very enthusiastic science teacher and during one of our field trips we were taken on a tour of a laser lab. I was fascinated and, after talking to the head of the lab, I was offered a summer job. I was lucky to get funding to cover my expenses and my boss was an inspiring mentor. I’m very competitive but mostly with myself. Sometimes I feel daunted by expectations people have but I place even higher demands on myself to strive for the top.

Speaker 4 My name is Alan and I’m 15. I’m a classical composer and I’ve already had a chance to conduct the London Symphony Orchestra playing my latest piece. My parents first took me to the opera when I was three. I’ve been living and breathing music ever since. For most people music is a hobby, something to be appreciated without turning it into a profession. And that’s good, because the world of music is very competitive. But I, in a way, had no choice. I was born to be a composer. All I want to do is make music. And it comes so naturally that I don’t even see it as work. Everything inspires me and I can’t stop thinking about what my next composition will be, which can be quite frustrating when I’m trying to relax. But that’s ok; I can’t imagine my life without being able to compose almost round the clock.

**S = Susan, T = teacher**

S: The first thing I'd like to say is that it's impossible to generalize about people's lives. Everybody is an individual, and some people have much more difficult lives than others. However, in my opinion, being a teenager is difficult.

T: Why is it difficult?

S: Well, firstly, teenagers have to spend a lot of time at school doing schoolwork at home. Even at weekends, they are expected to do homework. And because of the pressure of exams, many students never really get a chance to relax. They're always worried about the possibility of failure.

T: Is there really so much pressure?
S Yes, I think so.
T But teenagers do get leisure time as well, don’t they?
S They do, but the problem is, teenagers often have very little cash to spend. So in the small amount of time that they get for leisure, they usually don’t have enough money to enjoy themselves. As a result, they end up getting bored in their free time!
T I see. It all sounds very depressing …
S And finally, teenagers do not have independence. For instance, if I want to go and stay with a friend, I have to ask permission first. Teenagers have to live according to the rules that are made by adults. That’s why I firmly believe that a person’s teenage years are more difficult than other stages in life.

Claire
Zoos have been a popular form of entertainment for a very long time, though it is only in more recent years that people have questioned
whether it is right to keep animals in captivity.

My own view is that zoos do more good than harm. Some people argue that it is cruel to keep animals locked in cages under any circumstances. They also point out that the only reason that zoos exist is to provide entertainment and to make money. There may once have been some truth in this argument. However, the role of zoos has changed over the last century. Nowadays, it is fair to say that modern zoos try to educate people about issues such as animal conservation. Zoos also see themselves as environmental organisations helping to prevent endangered wildlife from becoming extinct. Some species have been hunted nearly to extinction, and it is only in zoos that the last few remaining animals are safe. So, all in all, I disagree that it's wrong to keep animals in zoos. While it's true that in an ideal world animals are happier and healthier when allowed to live in their natural habitat, I firmly believe that zoos play a vital role in protecting many species and raising public awareness of conservation issues.

Reading

• Elicit strategies for dealing with the sentence insertion task from the class. If necessary, work on the first gap together, identifying the topic before and after the gap and looking for clues as to what is missing.

Use of English

• Encourage students to read whole sentences before choosing words, as they may seem to require one word before the gap, but after the gap, the sentence may change direction. Students re-read their answers to make sure that their answer matches the grammar and sense of the text.

Listening

• Remind students to prepare for the listening by reading the sentences carefully and underlining any key words. Play the recording twice.

Writing

• Read through and discuss the task together, then refer students to the Writing Bank for guidance. Students plan a letter to be written at home or in class.

Speaking

• Students work in pairs on the given role play. When they have finished, ask them to change roles and practice again. If there is time, get a few students to perform the task in front of the class.

Transcript

Wat Pa Luangta Bua is a famous monastery in Thailand. And right from the start it gained a reputation as a wildlife sanctuary. It started with an injured wild fowl given to the monks by the villagers. Then peacocks came, attracted by the calls of the wild fowl. An injured wild boar stumbled into the monastery and the monks cared for it until it could be released back into the forest. The next day it came back followed by a family of 10. Soon, the villagers started to bring in unwanted pets, and then four species of deer moved in, followed by buffalo, cows, horses, wild goats and gibbons. These days all the animals roam the grounds of the monastery freely.

In February 1999, the first tiger cub arrived. It was a very young female cub whose mother had been killed by poachers. She was in a very poor condition after being sold and ordered to be stuffed by her new owner. A local man was hired to do the job, which fortunately he was unable to start because the cub managed to get loose. She arrived at the monastery frail and terrified of the slightest sound, with impaired vision and blood oozing from her gums. She could hardly move her tongue, chew or swallow her food. Yet, in spite of her condition, the tigress never once attacked anyone. Under loving care of the monks she recovered, but in July of that year she fell seriously ill with heart palpitations and died.

Unfortunately, mistreating tigers is commonplace in these parts of the world. The monastery is in the vicinity of large protected areas and national parks along the Thai-Burma border. These are believed to contain the largest surviving populations of tigers in Thailand, invariably attracting tiger poachers. A poacher can get up to US $5,800 for one animal; the equivalent of several years’ salary for a farmer. The profit is well worth the risk. When the mother tiger is killed, the cubs are either taken as a bonus, or left in the jungle.

Just a few weeks after the first cub had died, more cubs were brought to the monastery. People just kept delivering them, and the abbot kindly welcomed the animals. Having had no prior training in how to handle tigers, the monks had to learn on the job and did such a terrific job that the tigers took to them like kittens. Thus the monastery became a sanctuary. And with the tiger population growing constantly, an island for tigers is now being built on the monastery premises. It will be surrounded by a ditch and a wall, providing safety to visitors as well as more space to accommodate the tigers. Inside the island, constructions imitating the tigers’ natural habitat will be set up, thus allowing the new generation of tigers to prepare themselves for life in the real jungle.

1 1 Toby says (that) he hates reading
   newspapers.
  2 Sue said (that) she would like to
   listen to the news on the radio.
  3 Sam complained that I/we/they
   had not been listening to him.
  4 My dad said (that) he would be
   working at home the next day.
  5 Chris says that I/you shouldn’t be
   so sensitive.
  6 Jeff explained that he hadn’t
   expected Tom to arrive so soon.

2 I asked Kevin what he was doing. He
   explained that he was writing a letter
   to the newspaper. I asked what the
   letter was about and Kevin replied
   that it was about crime rates in our
   town. He said that there should be
   more police. I said that he should
   mention the recent bank robbery and
   Kevin said that he would if he could
   find the name of the bank. I asked
   whether he had looked online. He
   said he couldn’t because somebody
   had stolen his laptop!

3 1 I asked him how long he had
   worked at the bank.
  2 I asked him what his job title was.
  3 I asked him if/whether he had
   seen the robbery.
  4 I asked him how much money the
   robbers stole/had stolen.
  5 I asked him if/whether it was a
   frightening experience.
  6 I asked him if/whether it was the
   first robbery at the bank.

Transcript
The number of students attending courses at the school rose steadily in April and May from 50 to 100. During June and July numbers fluctuated between 80 and 120, before rising sharply to 200 at the beginning of August. The number of students stayed the same during August and early September, before falling sharply to 50 at the end of the month.

6 1 In 2008, 2% fewer people went to work by bus than in 2000.
   2 Between 2000 and 2008, the number of people getting to work on foot increased by 50%.
   3 Between 2000 and 2008, the number of people cycling to work more than doubled.
   4 There was no change in the number of people who used the train to get to work.
   5 The number of people who get to work by car dropped by 3%.
   6 A quarter of people took the train in 2008.

Student B: question 4 – No

Transcript
Student A: Nobody can deny that not enough girls do science at school.
In my class, for example, there are only five girls who do physics, while there are 13 boys. Personally, I really enjoy physics but it seems, on the whole, that boys enjoy science subjects more than girls. It’s not that girls can’t do science – in fact I think they’re just as good as boys. There’s no doubt in my mind that they just need more encouragement to take up science subjects.

Student B: People need to go about their business, get to and from work, go shopping and so on, and public transport between the city centre and other parts of city where I live isn’t that great. Admittedly, cars cause a lot of pollution and the air would undoubtedly be much cleaner if we didn’t drive so much, but I’m not convinced it would be right to ban them from city centres. At least not yet. Not until there are adequate alternatives in place.

Get ready for your exam 3 page 55–56
Reading
• Elicit strategies for dealing with the sentence insertion task from the class. If necessary, work on the first gap together, identifying the topic before and after the gap and looking for clues as to what is missing.

Use of English
• Discuss the task with the students. Encourage them to read through the test for the first time without looking at the options, so that they can anticipate the missing word themselves without getting distracted. If they cannot make a choice for one of the items, tell them to eliminate the answers that are clearly wrong, and then focus on the options that are left, thinking about the collocations and structures in the rest of the sentence.

Listening
• Remind students to prepare for the listening by reading the sentences carefully and underlining any key words. Play the recording twice with pauses for preparation before each playing. Check and discuss the answers as a class, playing any sections again as necessary.

Writing
• Read through and discuss the task together, then refer students to the Writing Bank for guidance. Students plan a letter to be written at home or in class.

Speaking
• Students work in pairs on the given role play. When they have finished, change roles and practise again. If there is time, get a few students to perform the task in front of the class.

H = Host, MW = Marcus Wellmington
H ... and any sightings should be reported to the zoo. Moving on, and now it’s time for my favourite part of the programme – our weekly Corner for the curious segment. With me today is Marcus Wellmington, the literary critic with the Sunday Herald. Marcus, nice to have you with us.

MW Hello, everyone. It’s nice to be here.
H Now Marcus, I’m right in saying that you’re not just a critic, but also something of a connoisseur of books.

MW Yes, quite.
H And I understand you’ve brought along a book that sounds like the ultimate choice for a curious reader.

MW Yes. Definitely. You see many of us have all these questions like why the ocean is salty but lakes aren’t, or we’d like to know how much the Earth weighs, and how it’s possible to know. Or how big an atom is. Well, the author of today’s book had the same queries and decided to find out once and for all. But rather than reading thousands of science books, which, incidentally, had bored him to tears in school, he set out on a journey around the world to write his Short History of Nearly Everything.

H Oh my, that sounds like an extremely ambitious project.

MW And so it is. But who better for the job than Bill Bryson, for the most part, a beloved author of travelogues? Here, he takes his ultimate journey – into the most intriguing questions that science seeks to answer. And believe me, it certainly is an educational journey. He’s curious to understand everything that has happened from the Big Bang to the rise of civilization. And in order to find his answers, Bryson boggles plenty of the world’s most ingenious scientific minds, asking as many questions as it takes him to understand.

H But, I mean, a history of ‘everything?’

MW Actually – nothing. But please don’t try this at home. But do try to get your hands on this book. It’s a wonderful read. The language is efficient yet colloquial so you won’t be blinded with science. And to top it off, Bryson is unfailingly witty and entertaining, making you laugh out loud at times.

H Oh, I love it when an author can tackle difficult and boring topics with humour. It does sound like an indispensable book for our Curious Corner listeners. Thank you, Marcus! I think I’ll have to stop at the bookstore on my way home ...

furthest reaches of cosmology, he goes through time and space until we are looking at the smallest particles. The basic facts of physics, chemistry, biology, geology – all these and many more are presented with exceptional clarity and skill. And the accounts are brimming with strange and amazing facts.

So it’s like all my school science books in one, really?

MW It’s actually even more than that. Bryson seems enchanted by the splendid gallery of eccentric personalities he encounters. So he tells stories about some of them. Like a chemist who so much hated human contact that he forbade people to even look at him and communicated with his housekeeper by notes. Or, the story about how Isaac Newton once stuck a needle into his eye socket just to see what would happen.

H Ouch! And?

MW Actually – nothing. But please don’t try this at home. But do try to get your hands on this book. It’s a wonderful read. The language is efficient yet colloquial so you won’t be blinded with science. And to top it off, Bryson is unfailingly witty and entertaining, making you laugh out loud at times.

H Oh, I love it when an author can tackle difficult and boring topics with humour. It does sound like an indispensable book for our Curious Corner listeners. Thank you, Marcus! I think I’ll have to stop at the bookstore on my way home ...

1
Girl Computers were invented before I was born so I find it difficult to answer the question with certainty. However, computers obviously play a vital role in the modern world.
Boy I think you’re absolutely right. It would be difficult to imagine life without them. But I’m not sure computers have made the world better.
Girl I think they have. There are so many things that we can do today that our grandparents couldn’t do, because of computers.
Boy That’s true.
Girl And I think the Internet has certainly made the world a better place. Everyone can now access information which was only available to a minority of our grandparents’ generation.
Boy Actually, now I come to think of it, I think you’re spot on.
2
Boy I really enjoy online games.
Girl How much time do you spend playing them, then?
Boy A couple of hours a day.
Girl That’s a lot. I don’t think it’s a good idea to play computer games at all actually, because they’re so addictive.
Boy I totally disagree. I’m not addicted. I could easily stop playing, any time. I don’t think playing online games is any different from watching the TV or a DVD.
Girl That’s not how I see it at all. Watching the TV is harmless and isn’t addictive.
3  Boy  I think these days young people spend far too much time staring at computer screens.
Girl  I really can’t agree with you. It’s vital that people acquire computer skills and the only way they’re going to do that is by using computers.

Boy  Yes, but other activities like sport or reading are also important.
Girl  I couldn’t agree more – of course they’re important. But people can easily find time for all these things, if they plan their time carefully.

4  Girl  Computers are just machines. They can do the most amazing things, but that doesn’t mean that they’re cleverer than people.

Boy  I agree completely. They’re better at maths than people for example, but they can’t actually think, and I don’t think they’ll ever be able to.

Girl  Absolutely. In my opinion we’ll never be able to have a meaningful conversation with a computer, will we?

Boy  No.

5  Girl  We have to go to the computer lab when our teachers want us to use computers at school.

Boy  Do you? We’ve actually got computers in every classroom.

Girl  Lucky you! I wish we had. I think it would make learning much more fun.

Boy  Yes, it does. I think the government should find the money to install computers in every classroom in the country.

Girl  That’s what I think too.

2  1 Born in 1977, Chad Hurley grew up in Pennsylvania.
2  Having graduated from high school, he went on to study Fine Art at university.
3  Hired as a graphic designer by PayPal in 1999, he designed their current logo.
4  Not wishing to work for PayPal any longer, he left the company in 2002.

5  Having found it difficult to send video clips by email, he designed a website for sharing videos.
6  Launched in 2005, YouTube is now one of the most popular websites in the world.

3  (possible answer)
Steve Chen was born in 1978 in Taiwan. When he was 15, he emigrated to the USA. He attended high school between 1993 and 1996. In 1996, he went to the University of Illinois, where he studied Computer Science. He started working for PayPal in 1999. During this time, he met Chad Hurley. After leaving PayPal, he started to develop YouTube, and in December 2005, YouTube was launched. It was an immediate success. Less than a year later, Google bought YouTube for $1.6 billion. By the age of 27, Steve Chen was a millionaire.

Get ready for your exam 4  page 73–74
Reading
• Elicit or remind students of strategies for dealing with the multiple choice task type. Encourage students to read the text through once to get the general idea before reading the questions. Remind students to underline the fragments of the text where they have found the answers.

Use of English
• Encourage students to look at the whole sentence and decide what part of speech (noun, verb, adjective, adverb) is required. Remind them to make sure that their answer matches the grammar and sense of the whole sentence.

Listening
• Remind students that the order of the information on the audio does not always match the order of the statements. They have to listen carefully and should familiarise themselves with the statements before the task begins. Encourage them to underline key words.

Writing
• Read through and discuss the task together, then refer students to the Writing Bank for guidance. Students plan an essay to be written at home or in class.

Speaking
• Remind students not to describe each picture individually, but compare and contrast. In a weaker class, you could brainstorm ways of comparing and contrasting before students start.

Transcript
Host  Good evening and welcome to our programme ‘Make a World of Difference’. Today we’re going to talk about virtual volunteering. You’ll hear from people who haven’t let time constraints, physical limitations and home obligations prevent them from getting involved. Juliet Wiles, Bill Begley and Evelyn Carson have all been able to make a positive impact as virtual volunteers. Let’s find out just what they’ve done. Starting with you, Juliet.

Juliet Wiles  Hello Bob. I’ve been a mentor for teenagers for over a decade. It’s very exciting to work with young people who are at that age when everything is still a possibility. I spend several hours each week discussing books, offering encouragement and talking about what drives them in life and where they want to be in five or ten years. I help them define their goals and research college and career options. Even though all our discussions take place online, I don’t feel it makes the experience less personal. After I’ve worked with somebody for a while, I get the same sense of their personality as I would if I were sitting right across from them. I volunteered in the past in a face-to-face mentoring program, but online mentoring saves me the trouble of travelling back and forth. It saves time too. I’m a senior editor for a financial magazine, and my employer encourages me to spend some of my working week doing online mentoring.

Host  Thanks. I’m going to turn to Bill Begley next. Bill, tell us about what you do.

Bill Begley  Hello. Well, I’d worked as a nurse until my retirement a short while ago. Right after that I started volunteering for one of our local...
non-profit organisations. The program is called Reassurance. Every day of the year I make several phone calls. I call elderly, housebound people in our town who live alone. I check in on them to make sure they are safe. As long as they answer the phone and are okay, I'm happy. And if they want to chat, I can chat with them. If they don't respond and I haven't been notified that they are away, I've got to take action. I call their family members, the security office at their apartment building, or the police. I ask them to stop by and see if those people are in trouble. The program makes people feel less vulnerable but also helps with their loneliness. These folks are very responsive and friendly, and they often tell me that they appreciate my calls.

Host I'm sure they do Bill. And finally, Evelyn Carson, who joins us on the line from Austin, Texas. Can you hear me Evelyn?

Evelyn Carson Oh yes, you're coming through loud and clear! I'm 82 and I started crocheting baby blankets over 50 years ago, just before my first child was born. Since then, I've been making afghans and quilts for all my friends and family members. Seven or eight years ago, I saw a notice in our local newspaper. It was about this organisation that collects blankets and donates them to charitable agencies that serve the homeless or victims of various disasters, and other people in need. I contacted them, and asked if I could help. They were delighted and that's how it started. Now I spend around 1,500 hours a year crocheting for the group. Many of my blankets go to the northern states. They are given to the homeless or to people who are made homeless after some kind of disaster. I once watched the news when the president visited New Orleans after the hurricane – I'm sure it was my blanket I saw on one of the beds in the rescue centre in that huge stadium!
Unit 9

9A Working life
page 75
1  a pilot  c miner
   b farmer  d nurse
2  1 brick-layer
   2 fast-food employee
   3 civil servant
   4 surgeon
3 Suggested answers:
   1 If you hand in your notice, you
tell your employer that you are
leaving; if you are sacked it is
your employer who terminates
the contract.
   2 To retire is to stop working due
to old age; to resign is to stop
working for a particular company
and can be for many reasons.
   3 Shift-work involves working at
different times but can be a full-
time position (e.g. 40 hours per
week); part time work means
you work less than a full working
week.
   4 Working full time means working
for all the hours of a week during
which people normally work; to
work overtime is to work more
hours than a normal full working
week.
4  1 construction – e.g. builder,
bricklayer, carpenter, plumber
   2 health – e.g. doctor, surgeon,
   3 legal – e.g. lawyer, barrister,
   4 leisure – e.g. fitness adviser,
personal trainer, aerobics
teacher, sailing instructor
   5 retail – e.g. shop assistant,
cashier, store manager

   2 She was excited because she was
going to meet Prince William.
   3 They had to find their seats because
the show was about to start.
   4 She was looking for a job
because she would have to pay
her university fees.
   5 She was nervous because she
was soon to take her driving test.
   6 He knew he would never forget
that wonderful day.
3 It was 3rd July, and the first day
of Connor’s gap year. He was about
to leave on a six-month trip around
Europe. He was going to spend the
first month in Spain working at a
holiday camp and the second month
in France on a language course.
After that, he would decide where
to go next. He wouldn’t get another
chance to go travelling for a while,
so he was really going to make
the most of the experience. He would
definitely have some interesting
stories to tell at the end of it!

I = Interviewer, A = Alice
Hi. You must be Alice.
A Yes, that’s right. Alice Baker.
I Lovely. Please sit down, Alice.
I’d like to introduce myself. I’m
Brenda Willis, the Head of Human
Resources.
A Pleased to meet you.
I Did you find the office easily
enough?
A Oh yes. Your directions were perfect!
I Good. Now, we haven’t got a great
deal of time, so … I’d like to start
by talking about your CV. You’ve
done quite a few interesting jobs,
seems! Most recently … at the
British Museum.
A Yes.
I What would you say your main
qualities are as an employee?
A I’m honest, hardworking – and I’m a
self-starter, too.
I: Good! We like self-starters in this company. How long have you been in your current job?
A: I'll have been there three years exactly next month.
I: What do you enjoy most about your work?
A: Lots of things, really. But I suppose the best thing is working as part of a team. And also, dealing with the public – I really like that.
I: So why do you want to come and work here?
A: I just think it's the right time in my career for a new challenge.
I: I see. Do you realise that this is a part time position?
A: Yes, I do. I'm planning to start a degree course with the Open University, so I need time for that.
I: I understand. Would you be interested in going full time at a later date?
A: Perhaps. I hadn't really thought about it.
I: Is there anything you would like to ask about the job?
A: Yes. Is there a company pension scheme?
I: Well, yes and no. There is a scheme, but it's only open to full time employees.
A: Oh, I see.
I: Well, thanks for coming in. We'll be in touch very soon.
A: Thank you. I look forward to hearing from you.

4. It must have been the National Portrait Gallery because it is a part-time job and Alice has experience of working in museums.

Simon Personally, I believe that life must exist on other planets. When
you think how many stars there are in our galaxy – astronomers think about 100 billion – the chances are pretty high that there are planets out there similar to ours, orbiting stars similar to our sun, with the right conditions for life to evolve. In fact, in recent years astronomers have actually discovered a number of planets beyond our solar system. Of course we have to accept that the chances of our ever making contact with alien life forms are extremely small because of the enormous distances between the stars, and the amount of time that it would take to travel from one part of the galaxy to another. However, this doesn’t alter my view that it’s highly likely that life exists somewhere in our galaxy.

Belinda Let’s be honest, we don’t really know. Nobody knows. If you mean by ‘life’ any kind of microscopic organism, then perhaps the answer is yes. But ‘little green men’ and weird monsters – in my view that’s extremely unlikely. Some people argue that there must be life out there simply because there are so many stars in the galaxy, but I would say that the chances of finding conditions that would support life – oxygen, water, the right temperature – are really remote. I think the Earth and the life-forms on our planet are unique. So, on balance, if you ask me, I’d say that life probably doesn’t exist elsewhere in the galaxy. It follows, then, that I don’t think we’ll ever make contact with alien life-forms, even if it were possible.

Get ready for your exam 5 page 91–92

Reading
• Elicit or remind students of strategies for dealing with the multiple choice task type. Encourage students to read the text through once to get the general idea before reading the questions. Remind students to underline the fragments of the text where they have found the answers.

Use of English
• Encourage students to read whole sentences before choosing words, as they may seem to require one word before the gap, but after the gap, the sentence may change direction. Students re-read their answers to make sure that their answer matches the grammar and sense of the text.

Listening
• Remind students to prepare for the listening by reading the sentences carefully and underlining any key words. Play the recording twice with pauses for preparation before each playing. Check and discuss the answers as a class, playing any sections again as necessary.

Writing
• Read through and discuss the task together, then refer students to the Writing Bank for guidance. Students plan a note to be written at home or in class.

Speaking
• In a weaker class, brainstorm information together on your country. Encourage the students to use their own words. Then students work in pairs on the given role play. When they have finished, change roles and practise again. If there is time, get a few students to perform the task in front of the class.

A Christine I have a good relationship with Mum. She’s taught me to make the most of life. She instilled in my sisters and I the idea that we could take on the world. When I came out of art school and didn’t know what I wanted to do, it was Mum’s idea I should draw all the star signs for a teenage magazine and send them in. The art director asked me for an interview; that was a great kick-off. Mum taught us that we didn’t have to have a normal nine-to-five job; she was happy for us to be creative. Both of my parents are very inspiring. It’s the same with sport – Mum’s not sporty, but she was happy to take me to training sessions and drive me around. We didn’t have a normal upbringing; we didn’t have dinner on the table at 6pm. Mum worked weekends and taught pottery and macramé. Our relationship is a little different now that I have Maxina. I understand Mum a bit better; I see her more clearly. She was there for the birth, and the experience brought us even closer.

B ella What I love about my mum is that she’s always there for me. I was her first baby, so we spent a lot of time together. She’s always ready to give me advice and is very supportive. If I get on the wrong side of someone, I know I can rely on her. Mum’s sense of humour is different to mine. I’ve got the same humour as my dad, although Mum and I can both be stubborn. We also share a love of sport. Mum’s coached my netball team and I’ve filled in for her team when they’re a player short. It’s fun to play with Mum. I can talk to Mum about most things. If she’s strict, I can see that she’s trying to protect me. I’m fine with that. I definitely want to travel and I love sewing and collecting beads. That’s definitely Mum’s influence. I can tell when Mum’s angry because she gives me that look. But we laugh a lot, too.

C Penny Mum and I are close as can be. We enjoy each other’s company. I have no siblings, and I think that’s brought us closer. We get our eyebrows done together, go shopping and to the hairdressers. When she’s buying clothes, she always asks me first. She says she’s done this ever since I made a comment about her shoes not matching her outfit. I was about three then. Mum’s very well educated. She’s been to university and studied science at uni. She’s been someone who always wants to learn more and has always been passionate about her work. Mum has been very supportive. She’s been to university and studied for a masters. She’s been someone to look up to. Now I’m studying science at uni and Mum has been very supportive. I think she’s been a real inspiration to me.
I'll know. Mum doesn't force me into conversations about it. Some things I feel more comfortable doing on my own, and she's really good with that.
