Remarkable People in History

Learn about famous lives from different times and places
Remarkable People in History

Learn about famous lives from different times and places
In *Remarkable People in History*, you’ll discover answers to these questions and many more. Through pictures, articles, and fun facts, you’ll learn about extraordinary people who have changed the course of history.

To help you on your journey, we’ve provided the following guideposts in *Remarkable People in History*:

- **Subject Tabs**—The colored box in the upper corner of each right-hand page will quickly tell you the article subject.

- **Search Lights**—Try these mini-quizzes before and after you read the article and see how much—and how quickly—you can learn. You can even make this a game with a reading partner. (Answers are upside down at the bottom of one of the pages.)

- **Did You Know?**—Check out these fun facts about the article subject. With these surprising “factoids,” you can entertain your friends, impress your teachers, and amaze your parents.

- **Picture Captions**—Read the captions that go with the photos. They provide useful information about the article subject.

- **Vocabulary**—New or difficult words are in **bold type**. You’ll find them explained in the Glossary at the end of the book.

- **Learn More!**—Follow these pointers to related articles in the book. These articles are listed in the Table of Contents and appear on the Subject Tabs.
Cathy Freeman was the first Aboriginal to win an individual medal in an Olympic event. She won the 400-meter race at the 2000 Olympics in Sydney, Australia.

Some 2,200 years ago, the emperor Ashoka ruled India. Like many ancient rulers, he expanded his empire by conquering new lands. But unlike most rulers, Ashoka suddenly turned his back on warfare and began to govern according to the nonviolent beliefs of Buddhism.

It is said that Ashoka became a Buddhist when he saw the horrors caused by the wars he’d led. After that, he decided to serve his subjects and all humanity instead of conquering others. He called this “conquest by dharma.” In India dharma means the “right way of living” and “universal truth.” This included being honest, truthful, and kind. It also meant being merciful, generous, and thoughtful.

The emperor himself would often tour the countryside, preaching his belief in dharma to the people. Ashoka also appointed “dharma ministers” to help relieve people’s sufferings. These ministers were assigned to look after the special needs of women and people living in religious communities.

Ashoka passed laws to prevent cruelty to animals and had hospitals built for both people and animals. He also started construction projects to make all people’s lives easier. Trees were planted on roadsides, wells were dug, and watering sheds and rest houses were built.

The only recognition Ashoka wanted was for people to remember that he had ruled according to dharma. To preserve his ideas, Ashoka had his teachings carved on rocks and pillars (columns) in public areas. These inscriptions are called the Rock Edicts and Pillar Edicts. The most famous is the lion pillar found at Sarnath, which has become India’s national emblem.

Answer: b) emperor.
DID YOU KNOW?

In William Shakespeare's play *Julius Caesar*, Caesar is told to “beware the Ides of March.” The ides refers to the time around the 15th of the month. Today those famous words are sometimes used as a warning.
Julius Caesar was a brilliant general and a gifted writer. But most important, he helped create the ancient Roman Empire.

Early in his career Caesar formed a bond with the two most powerful men in Rome, the wealthy Crassus and the general Pompey. In 59 BC they helped elect Caesar as one of Rome’s two consuls, the government’s highest rank. After a year as consul, Caesar left Rome to govern Gaul (now France). There he earned a reputation as a military leader. He stopped uprisings and invasions, and he even landed in Britain. Caesar also wrote detailed accounts of his battles.

While Caesar was in Gaul, Crassus was killed. Pompey now controlled Rome, and he turned against Caesar. He declared Caesar a criminal and ordered him to break up his army. Instead, Caesar declared war and marched to Rome. Pompey fled to Greece.

At that time Rome was governed by a senate (a supreme council). But Caesar felt the government was corrupt and needed a strong leader. In 49 BC he declared himself dictator, and he spent five years fighting a civil war against Pompey to make his rule secure. Some of the Roman senators worried that Caesar had too much power. On March 15, 44 BC, they murdered Caesar on the floor of the Senate.

In the short time he led Rome, Caesar proved to be a great statesman. The changes he made helped begin the 500-year Roman Empire. And for almost 2,000 years after his death, some world leaders used a form of the title “caesar” (such as “Kaiser” in Germany and “czar” in Russia).

DID YOU KNOW?
Castro was a very good baseball player. It is said he once even tried out for the Senators, a professional baseball team in Washington, D.C.
In the 1950s General Fulgencio Batista ruled the Caribbean island of Cuba. His rule was harsh and often violent, and some large American companies grew rich while many Cubans remained poor. Fidel Castro was a young lawyer who believed Batista’s rule was unfair. There were no free elections in Cuba, so Castro organized a military force to overthrow Batista.

Castro bought guns with his own money and attacked Batista’s forces in 1953. The attack failed badly, and after two years in prison Castro went to Mexico to make a new plan. Soon he and about 80 other rebels arrived in Cuba. They hid in the mountains and fought a guerrilla war using small-scale battles and making hit-and-run attacks. Batista finally fled Cuba in 1959.

Castro became Cuba’s leader and created a communist government. In some ways the lives of the people did not improve under Castro’s rule. The people lost many of the same rights that Batista had taken away, and poverty was still a problem. Many Cubans left their homeland or tried to do so. But Castro also greatly increased many benefits to the Cuban people. Education and health services were free, and every citizen was guaranteed work.

The United States, Cuba’s near neighbor, strongly opposed Castro’s government. They even tried to overthrow it in 1961. But the Soviet Union, another communist country, supported Castro. The United States complained when Castro let the Soviets set up nuclear weapons in Cuba. The protest almost led to a war, but the weapons were soon removed. In the late 20th century there was unrest among Cubans, and Castro relaxed some of his strictest controls. Still, Castro remained Cuba’s powerful leader for many years.

The United States has also supported Castro’s rule in Cuba.

True or false?

Answer: False.
DID YOU KNOW?
Charlemagne enjoyed swimming. He even built a palace on a hot spring that he used for bathing with friends.

Charlemagne’s empire survived for only a brief time after he died. But no other ruler in the European Middle Ages had such a deep and long-lasting effect.

© Ali Meyer/Corbis
During the Middle Ages (about AD 500-1500) one of the most powerful European kings was Charlemagne. Charlemagne was a Frank. The Franks were a people who lived in parts of what are now France and Germany. When he became the one and only ruler of the Frankish lands in AD 771, Charlemagne wanted to make his kingdom bigger and stronger. He also wanted to spread Christianity and protect the Roman Catholic church.

With this plan in mind, Charlemagne spent 30 years battling the Saxons, another Germanic people. In these and many other wars, Charlemagne gained control over much of western Europe, including what is now France, Switzerland, Belgium, the Netherlands, and half of Italy and Germany.

In 794 Charlemagne established his capital at Aachen in western Germany. In the year 800, the pope crowned him emperor of the whole region. He worked with leaders of the church to improve the church and government. And he sent out special agents to make sure that his laws were being obeyed.

Charlemagne brought about many improvements in the empire. He set up a new money system and reformed the law courts. He built a large court library and set up a school at his palace court. He was concerned with educating the ordinary people and improving the learning of priests. He hoped education would make his people better Christians.

Charlemagne died in 814. Today he is remembered as one of the most important rulers in European history. In fact, he’s sometimes called the father of Europe.

ASHOKA • JULIUS CAESAR • EMPRESS OF CHINA
Cleopatra was the second daughter of King Ptolemy XII. When her father died in 51 BC, 18-year-old Cleopatra was supposed to rule Egypt with her 15-year-old brother, Ptolemy XIII. In a few years, her brother’s supporters drove Cleopatra from power. But later the Roman leader Julius Caesar helped her get her throne back. War soon broke out. In 47 BC Cleopatra’s brother and co-ruler drowned. By law she couldn’t rule alone, so she married her 11-year-old brother.

Cleopatra returned to Rome to live with Caesar and had a son by him named Caesarion. But Caesar was murdered in 44 BC, and Cleopatra lost her strongest supporter. She soon went back to Egypt. With Caesar dead, the two most powerful men in Rome were Octavian and Mark Antony. When Antony wanted to invade Persia, he invited Cleopatra to meet him.

Antony quickly fell in love with Cleopatra and married her. But he was also married to Octavian’s sister. An angry Octavian declared war against Antony and eventually defeated him. Antony died in Cleopatra’s arms.

Cleopatra did not want to live without Antony. The story is that she had an asp (a kind of snake) brought to her, and when it bit her, Cleopatra died at the age of 39. The Egyptians believed that death by snakebite made you immortal. Cleopatra didn’t live forever, but her legend has lasted more than 2,000 years.
A Clever, Courageous Queen

When Elizabeth I became queen of England, few thought she would last very long. But Elizabeth I not only ruled for almost half a century. She became one of England’s greatest rulers.

Elizabeth was the daughter of Anne Boleyn, King Henry VIII’s second wife. Henry also had a daughter, Mary, from his first marriage, and he would have a son, Edward, from his third. After Henry’s death, Edward ruled for a short time until he died. Mary ruled for three years before she too died. In 1558 Elizabeth became the queen of England at age 25.

At the time, England was poor, weak, and torn by conflict between different groups. The people hoped Elizabeth would marry a strong man who would guide her. But Elizabeth had no desire to share her power. She was determined to be a successful queen, so she gathered experienced and trustworthy advisers. Elizabeth herself had a good education and was very clever and brave.

The queen encouraged English sailors to travel to distant parts of the world. Captains such as Francis Drake brought back riches and found new trade routes to the Americas, Asia, and Africa. As trade developed with other lands, England grew wealthy. Under Elizabeth, England also experienced a Renaissance, or “rebirth” of the arts. Some of the famous writers of the period were William Shakespeare, Christopher Marlowe, Francis Bacon, Edmund Spenser, and John Donne.

By the time Elizabeth died in 1603, England had become both rich and strong. The 45 years of her reign became known as the Elizabethan Age.

JULIUS CAESAR • CLEOPATRA • GOLDA MEIR
DID YOU KNOW?

During Elizabeth's rule, Spain attacked England with a great fleet of ships called the Spanish Armada. England's victory over the Spanish forces saved the country from becoming part of the Spanish empire.

Elizabeth ruled England only after her
a) two sisters ruled.
b) sister and brother ruled.
c) two brothers ruled.

Answer: b) sister and brother ruled.
One of the most powerful women in Chinese history was Cixi. She played a major role in ruling China for more than 40 years in the late 1800s.

Cixi lived in a group of palace buildings called the Forbidden City, within the city of Beijing. She spoke to all her visitors from a large red throne shaped like a dragon that was hidden behind a silk screen. Every one of her orders ended with the warning “Hear and obey.”

Cixi was never really an empress. She was, however, the mother of the emperor’s only son. When the emperor died, she helped her 6-year-old son, who was heir to the throne, rule China. She still had power when her son was old enough to rule by himself. Then he died, and the Dragon Empress made sure her 3-year-old nephew became the new emperor. Cixi helped him rule too.

During Cixi’s time the Chinese government became very dishonest. But she did not rule alone during this time. A group of dishonest officials helped her make decisions. When her nephew grew up he tried to make some changes to improve life in China. The officials were against such changes. Only after foreign armies captured Beijing in 1900 did Cixi begin to make things better. In 1908, when the Dragon Empress was dying, her nephew, the emperor, also died. Some say that she was ruthless and did not want him to rule without her so she poisoned him. But this was never proved.

Cleopatra • Elizabeth I • Mao Zedong
Mohammed Ali Jinnah was born in Karachi in 1876. At that time the city was part of India, and India was controlled by the British. When Jinnah was a young man, his parents sent him to London to gain business experience. Instead, he studied law and learned about the British system of government. After his studies, he returned to India and began to practice law in Bombay (now Mumbai). It was about this time that the people of India began to seek freedom from British rule.

For hundreds of years, Muslims and Hindus—the area’s two major religious groups—had lived together peacefully in India. But there were many more Hindus than Muslims. Because of this, many Muslims feared that they might not be treated equally once India became an independent country.

Although Jinnah was Muslim, at first he didn’t think there was anything to be afraid of. But as time passed, he began to feel that the Muslims in India should have their own country. So Jinnah began to work hard to make a Muslim nation out of part of India’s land. The new country would be called Pakistan.

In 1947 the British government agreed to the formation of Pakistan. India became independent from Britain in August of that year, and a section of the country became Pakistan. Jinnah was chosen as Pakistan’s first head of state, but he served for only a year before he died. Still, Jinnah’s people loved him. And because he helped create Pakistan, Jinnah is considered the Father of Pakistan.
DID YOU KNOW?

In 1993 Nelson Mandela and F.W. de Klerk were jointly awarded the Nobel Prize for Peace for getting rid of the apartheid system.
South African leader Nelson Mandela was a fighter. He fought against apartheid. Apartheid was an official policy of the government of South Africa that separated people according to their race and color.

During World War II, Mandela joined the African National Congress (ANC), and he later became one of its leaders. This organization had one aim: to fight for the freedom of the black people in South Africa.

Mandela hadn’t wanted to use violence in the ANC’s fight against the government. However, after the police killed unarmed Africans, Mandela changed his mind. He argued for using sabotage against the government—that is, secretly working to undermine and destroy it. At the same time, the South African government outlawed the ANC. In 1962 the government decided that Mandela was guilty of acts against the government. He was sentenced to five years in prison. The next year, he was found guilty on more charges and sentenced to life imprisonment.

By the 1980s more and more people had heard of Mandela’s hopes for South Africa. They began to campaign for his release from prison. Countries and organizations all over the world got involved. Early in 1990 South Africa’s president, F.W. de Klerk, ordered Mandela’s release. President de Klerk, together with Mandela, worked to change South Africa into a country where all races would have equal rights.

South Africa held its first elections open to people of all races in 1994. Mandela and the ANC won the elections, and Mandela became the country’s first black president.
Mao Zedong was born in 1893, in China’s Hunan province. Mao’s father had been born a poor peasant, but he became wealthy as a farmer and grain dealer. Only limited education was available where Mao grew up. So at age 13 Mao left school to work on his family’s farm. He later ran away to attend school in the provincial capital, where he discovered new ideas from Chinese and Western thinkers.

Mao briefly served in the army during the Chinese Revolution (1911-12). This uprising overthrew the ruling Manchu dynasty and turned China into a republic. After that there were many years of fighting between different groups who wanted to rule China. This time was known as the “warlord period.”

After the war, Mao returned to school, ending up at Beijing University, where he worked in the library. There he became involved in the May Fourth Movement of 1919. This was the beginning of China’s turn toward communism. In communism, property is owned by the state or community, and all citizens are supposed to share in the nation’s wealth.

In the 1920s Mao helped found the Chinese Communist Party (CCP). He started a communist revolution among peasants in the countryside. The CCP split off from the Nationalist Party. The Nationalists thought the Chinese should decide their own future, but they were against communism. The Red Army, Mao’s military force, began fighting them and gathering strength in the late 1920s.

Mao finally took control of the whole country in 1949 and became the chairman of the People’s Republic of China. Although many poor people’s lives were better under Mao, many others suffered and died during his efforts at reform and improvement. He died on September 9, 1976.

In 1906, when Goldie Mabovitch was a child, poverty forced her family to move from Russia to the United States to find work. In high school, she joined a group that wanted Jews to have their own country. This was known as Zionism. A few years later she and her husband, Morris Myerson, moved to Palestine, a Middle Eastern region then under British control.

Goldie Myerson became involved in political activities in Palestine. She negotiated protection for Jews who fled from Nazi Europe during World War II. After the war, she worked to help Jewish war refugees.

In 1948 part of Palestine became the State of Israel, and Goldie Myerson was one of the signers of Israel’s declaration of independence. The surrounding Arab countries attacked Israel, but the new country defended itself and remained independent.

The next year she was elected to the Knesset, the Israeli parliament. Later she changed her last name from Myerson to “Meir,” a Hebrew word meaning “to burn brightly.” She also became known as “Golda” instead of “Goldie.” Meir became the prime minister of Israel in February 1969. As prime minister, she worked hard for peace in the Middle East and traveled widely to meet with the leaders of many other countries.

But in 1973 Egypt and Syria’s invasion of Israel led to another Arab-Israeli war. Though Israel eventually won the war, the whole country was stunned by the attack. Many Israelis felt Meir’s government was to blame, and so she resigned as prime minister the next year.

CLEOPATRA • ELIZABETH I • ANWAR EL-SADAT
True or false? Sadat did not want Egypt to be run by a king.
When Muhammad Anwar el-Sadat was born in 1918, Egypt was controlled by the British and was ruled by a sultan. But Sadat would rise to one day become Egypt’s president.

Sadat was in the military during World War II. After that he joined an organization that wanted to overthrow the Egyptian monarchy and drive out the British. The organization was led by Gamal Abdel Nasser. In 1952 Nasser’s group was successful, and Egypt gained its independence. Nasser became the country’s first president, and Sadat twice served as his vice president. When Nasser died in 1970, Sadat became president.

Egypt had lost control of the land lying between Egypt and Israel during a war with Israel in 1967. The two countries remained enemies after that. In six years Sadat ordered Egyptian forces to retake this land. Israel won the war that followed. But Sadat’s actions made him very popular in Egypt and in other Arab countries.

Four years after the war, Sadat tried for peace with Israel. He visited there to share his peace plan. Later he held peace talks in the United States with the Israeli prime minister, Menachem Begin. Because of their efforts, Sadat and Begin shared the 1978 Nobel Prize for Peace.

The next year Egypt and Israel signed a peace treaty—Israel’s first with an Arab country. Sadat’s actions were praised around the world. But many Egyptians and other Arabs opposed the treaty. In 1981 Sadat was killed by religious extremists during a military parade.

When Egypt and Israel were working to make peace, U.S. President Jimmy Carter was a great help. Here (from left to right) you see Sadat’s wife, Jehan, and Sadat himself, with the U.S. first lady, Rosalynn Carter, and President Carter. © Wally McNamee/Corbis

DID YOU KNOW?
While Sadat was working to overthrow the Egyptian monarchy, he went to jail twice. The second time he was jailed, he taught himself French and English.
A peacemaker has to be impartial—that is, be fair and not take sides. U Thant was a true peacemaker. As the secretary-general of the United Nations between 1961 and 1971, he had the job of peacemaker among many warring countries.

U Thant was born in 1909 in Burma (now called Myanmar). “U” is not a name but a term of respect similar to the English “Mister.” Thant means “pure.” Thant got his education at the University of Rangoon. It was here that he met Thakin Nu, later called U Nu. U Nu went on to become the prime minister of Burma after World War II.

Nu recognized Thant’s abilities and appointed him as a spokesman for the government. Later Thant became a diplomat when he was appointed a member of the Burmese representatives to the United Nations (UN). In 1957 he became his country’s permanent representative to the UN, and he later served as vice president of the UN General Assembly.

When the UN’s leader, the secretary-general, died in 1961, the United States and the Soviet Union could not agree on a new leader for the body. Though neither country got their first choice, they were able to settle on Thant as acceptable.

As secretary-general, Thant worked for peace around the world. In 1962 he aided in the removal of Soviet missiles from Cuba. He helped end the civil war in Congo, and he established a peacekeeping force on Cyprus in the Mediterranean Sea. When India and Pakistan went to war in 1965, Thant flew to India to help negotiate the cease-fire.

-answer: FALSE. U is a word with a meaning something similar to "Mister."
A new English translation of Anne Frank's diary was published in 1995. The new edition has material that was not in the original version, making it nearly one-third longer.

**DID YOU KNOW?**

True or false? Anne Frank went on to write many other famous books.
During World War II in Europe, the Nazis of Germany tried to destroy the Jewish people and their culture. The Nazis had taken control of many countries, including the Netherlands. In the city of Amsterdam, the Nazi threat meant that a young Jewish girl and her family had to spend two years in hiding. Anne Frank’s moving diary of those years in hiding has since become a classic book.

Halfway through the war, the Nazis began sending Jews to prison camps. So in July 1942, Anne’s family went into hiding in the back-room office and warehouse of Anne’s father’s business. Four other Jews hid with them in the small space, and non-Jewish friends smuggled food and other supplies to them.

Anne was 13 when she went into hiding. In her diary, she describes daily life in the secret rooms. She also writes about her own dreams and feelings while growing up in hiding.

The family never once left their hideout until the Nazi police discovered them in August 1944. Then the Frank family was moved to the concentration camp at Auschwitz in Poland, where Anne’s mother died in 1945. Anne and her sister were sent to another camp, Bergen-Belsen, where they both died of typhus. Anne’s father, Otto Frank, was the only family member who survived.

Friends had found Anne’s diary in the hiding space. After the war, they gave it to her father, and he published it in 1947. Since then, Anne’s story of courage and hope has inspired millions of readers. Today, the Frank family’s hiding place in Amsterdam is a museum.

Mahatma Gandhi • Helen Keller • Martin Luther King, Jr.
DID YOU KNOW?
The money in Venezuela is named for the South American liberator Simón Bolívar. It’s called the bolívar.
In the early 1800s, in the country that would become Venezuela, there lived a man with a big dream. He wanted the countries of Spanish South America to become independent from Spain and join together as one strong country.

This man was Simón Bolívar. For years he fought the Spanish in support of this dream, and many people came to help him from around the world. Many of them sailed from Europe and searched all over South America to find him.

Bolívar was born in 1783. His liberation of New Granada—now Colombia, Ecuador, and parts of several other countries—is one of the most daring acts in the history of war. In the spring of 1819, he led a small army of 2,500 men through floodwaters and across icy mountain passes, through places where there were no paths at all. Tired and hungry, they finally arrived in Boyacá, near Bogotá, the capital of New Granada. There they surprised a big Spanish army. Fighting fiercely, they beat the Spanish and freed New Granada.

Bolívar fought many battles to free other countries in South America, including his native Venezuela. His dream of freeing the South American countries from Spain came true. But even if he was never able to join all the different countries together as one nation, he was one of the most important heroes in South America. The South American country of Bolivia was named in his honor.

True or false? Gandhi’s real name was Mahatma.
In March of 1930, a 61-year-old Indian man started out on a long walk to the ocean. When people asked where he was going, Mohandas (“Mahatma”) Gandhi replied, “I am going to the ocean to get some salt.” Soon thousands joined him in a trip that lasted a month and became known as the Salt March.

Mohandas K. Gandhi was a Hindu Indian who had studied law in London. India was controlled by Britain, and when Gandhi returned home he was angered by the poverty and inequality he saw in his country. Rather than fight the British with guns or bombs, Gandhi believed in simply refusing to obey unjust laws. For example, he urged Indians to make their own clothing so they wouldn’t have to buy British goods. Hindus began to call Gandhi “Mahatma,” which means “great soul.”

Most Indians could not afford to buy expensive British salt, but it was against the law for them to make their own. So Gandhi walked 200 miles to the ocean to make salt from seawater. After the Salt March, the British put Gandhi in jail. It wasn’t the first or the last time he was jailed for leading nonviolent protests. Gandhi went to jail cheerfully. When he came out, he went back to teaching Indians how to get back control of their country by peaceful actions. India finally won independence from Britain in 1947.

After India became independent, there was violence between the country’s Hindu and Muslim populations. During the last year of his life, Gandhi worked to build peace between all the peoples of India.
On December 1, 1955, in Montgomery, Alabama, U.S., an African American woman named Rosa Parks was arrested. She had refused to give up her seat on a bus to a white man. At that time the law said that black people had to sit only in certain sections of trains and buses and use different bathrooms and even drinking fountains from the ones white people used. Rosa Parks’s action sparked protests by black residents of the city. And Martin Luther King, Jr., was chosen to lead the protests.

King was a Baptist minister and a student of the Indian leader Mahatma Gandhi. He believed that nonviolence was the most powerful way for people to make their point. This meant demanding one’s rights through peaceful means, such as strikes and protests, not by fighting. The protests he led became known as the Montgomery bus boycott. The law was changed after a year of protests.

However, black people still didn’t receive the same rights and privileges as white people. In 1963 King and his supporters were jailed because of their protests against this discrimination. When he was freed, King and other civil rights leaders organized a march on Washington, D.C., the national capital. There, King delivered a powerful speech to hundreds of thousands of people, saying, “I have a dream.” His dream was that someday all people would be equal, like brothers.

For his work on civil rights, King was awarded the Nobel Prize for Peace in 1964. Through all his struggles, King used only peaceful methods of protest. But in April 1968, King was shot dead in Memphis, Tennessee, by James Earl Ray.

Martin Luther King, Jr., led the march on Washington in 1963. His protests helped win important rights for African Americans.

DID YOU KNOW? In 1977, King was posthumously (after his death) awarded the Presidential Medal of Freedom. This is the U.S. government's highest honor awarded to a person not in the military.

Answer: FALSE. Rosa Parks sparked the boycott when she refused to give up her seat.
DID YOU KNOW?
The Strait of Magellan isn’t all that’s been named for the famous explorer. Magellan’s name remains a popular choice for other things. For instance, the space mission begun in 1989 to explore planet Venus was called Magellan.
Hundreds of years ago, only the very brave took the risk of traveling the open seas to reach unknown lands. Ferdinand Magellan was one such man.

Magellan was born to a noble family in Portugal in about 1480. At about age 25, he joined the Portuguese navy, where he fought in numerous battles and saw many new places. When the king of Portugal refused to raise his wages after a decade of service, Magellan went to work for the Spanish king.

At that time Portugal controlled the sea route around Africa to the Indian Ocean to reach the rich Spice Islands (now called the East Indies). Magellan decided to avoid that route, and instead he sailed west to find a new way to the islands. He set out in 1519, sailing across the Atlantic Ocean and down the coast of South America. He hoped to discover a passage to the ocean beyond South America. He found it, and it became known as the Strait of Magellan. The ocean on the other side appeared calm and peaceful, so it was named the Pacific, from the Latin word for “peaceful.”

After 99 more days, Magellan’s ship reached the island now known as Guam. Landing in the islands that became the Philippines, Magellan and his men fought with islanders. Magellan was killed there April 27, 1521.

A crewman, Juan Sebastián de Elcano, took command. The remaining crew sailed to the Spice Islands, loaded up with spices, and returned to Spain. In a voyage of more than three years that saw the death of many sailors, Magellan’s expedition became the first to circle the globe.
On May 29, 1953, at 11:30 AM, Tenzing Norgay and Edmund Hillary became the first people to reach the summit of the highest mountain on Earth, Mount Everest.

Tenzing Norgay was born in 1914 in Tibet (a region of China). He later moved to Nepal and lived with the Sherpa people. Sherpas, who moved from Tibet to Nepal hundreds of years ago, have lived in high mountains for hundreds of years. Not far from Tenzing’s adopted village rises the majestic Everest. It is part of the Himalaya Mountains and lies on the border between Nepal and Tibet. When Europeans go to Nepal to climb mountains, they often hire Sherpas to carry supplies and to show them the way up the mountains. Because of their experience living in high mountains, the Sherpas have proved to be excellent guides and mountaineers.

At age 18 Tenzing moved to Darjeeling (now spelled Darjiling), India. He hoped to make his fortune carrying loads of supplies for mountaineering expeditions. Three years later he accompanied a survey team on an expedition to Mount Everest as a porter. In the next few years, he took part in more Everest expeditions than any other climber.

Working with so many different people, Tenzing learned to speak seven languages. Later he became a sirdar, or an organizer of porters. He continued to guide expeditions to Everest and inspired many mountaineers.

During their historic climb of Mount Everest in 1953, Edmund Hillary lost his footing and nearly died. Tenzing did not panic. He held the rope line tightly and planted his ax firmly in the ice. Later he simply said, “Mountain climbers always help one another.”

For his courage and heroism and for having been one of the first people to scale Mount Everest, Tenzing was awarded the British George Cross and the Star of Nepal.

Someone who organizes porters for mountain climbing in the Himalayas is called a _________.

Answer: sirdar
Mother of the Poor and Dying

During her lifetime Mother Teresa became known worldwide for her kindness and her charitable work.

Mother Teresa was born Agnes Gonxha Bojaxhiu in Macedonia in 1910. When she was 18 years old, she decided to become a nun in the Roman Catholic church. She traveled to Ireland, and there she entered the Institute of the Blessed Virgin Mary. She took vows promising to live a simple life and not to marry, and she became Sister Teresa.

The Institute had charity missions in India, and soon Sister Teresa sailed to the country to work as a teacher. Over the next 17 years, she taught in two schools in India, one of which was in Calcutta (now Kolkata). She saw firsthand the poverty and suffering of the people. She often said that she was inspired to make two important decisions in her life. One was to become a nun, and in 1946 the other was to devote her life to helping the sick and the poor.

As soon as her studies in nursing were finished, she began working with the people living in Calcutta’s slums. She became an Indian citizen. And she became Mother Teresa when she founded the Missionaries of Charity. This was a new order of Roman Catholic nuns who wanted to help the sick, especially the dying and disabled.

Under Mother Teresa’s guidance, the Missionaries of Charity opened centers all over the world. In these centers anyone could receive care, no matter what their religion. In 1979 Mother Teresa was awarded the Nobel Prize for Peace. Soon after her death, in 1997, the Roman Catholic church began the process to have Mother Teresa declared a saint.

Fill in the blanks:
In 1868 Blackwell started the first ______ for women.
The First Modern Woman Doctor

Elizabeth Blackwell was born in England in 1821, but she moved to the United States with her family when she was 11. By the time she was 23, Blackwell had decided that she wanted to be a doctor. But at this time there were no female doctors in the United States.

It wasn’t easy for Blackwell to study medicine. Most of the medical colleges she applied to turned her down. The men who taught medicine didn’t think it was right for a woman to be a doctor. Finally Blackwell was admitted to Geneva Medical College in New York. She was the only woman in a class of 150.

The other medical students made things difficult for Blackwell. They criticized her, refused to talk to her, and kept her from taking part in the classroom medical demonstrations. However, two years later Blackwell was the best student in her class. In 1849 she became the first female doctor in the United States.

Despite this training, Blackwell could not get a job in any of the city hospitals. So she opened her own hospital, the New York Infirmary for Women and Children, in a district where many poor people lived. When the American Civil War broke out in 1861, Blackwell’s hospital became a relief center for wounded soldiers. She also helped select and train nurses for the war.

Blackwell worked to establish a medical school for women so that other women could become doctors. In 1868 she opened the Woman’s Medical College, the first of its kind in America.

DID YOU KNOW?
A year after Blackwell opened her hospital, her sister Emily went to work with her. She too had become a doctor.
When she won the 400-meter world championship in 1997, Cathy Freeman ran a victory lap carrying two flags. One was the flag of her country, Australia. The other was that of her people, the Aboriginals. The Aboriginals are the original people of Australia, who have suffered great mistreatment and injustice since the Europeans came to their country. Her choice to carry both flags was controversial. But it showed Freeman’s strong sense of national and ethnic pride.

While Freeman was growing up in Queensland, her father encouraged her to start running. By the time she was 17, Freeman had won a gold medal at the 1990 Commonwealth Games and been named Young Australian of the Year. In 1992 she was the first Australian Aboriginal woman to compete in the Olympic Games.

At the 1994 Commonwealth Games, Freeman took home gold medals in the 400-meter and 200-meter races. Her win in the 200-meter race set a national record. Perhaps Freeman’s greatest race was at the 1996 Olympic Games in Atlanta, Georgia, U.S. She ran against the world record holder, Marie-José Pérec of France. The two champions raced neck and neck. Finally, it was Pérec who shot ahead to the finish line.

In 1997 Freeman was named Australian of the Year. A year later, however, she injured her foot and had to withdraw from the Commonwealth Games. Freeman didn’t let the injury stop her, and in 1999 she was running again. She came back and successfully defended her 400-meter world championship title. At the Sydney Olympics in 2000, Freeman had the great honor of lighting the Olympic torch. A week later her dream of Olympic gold came true when she won the 400-meter race in front of her fellow Australians. Again she took her victory lap proudly carrying both the Australian and Aboriginal flags.

This fresco (a painting created on wet plaster) shows Galileo demonstrating his version of the telescope.

© Archivo Iconografico, S.A./Corbis

DID YOU KNOW?
Galileo agreed with Nicolaus Copernicus and Johannes Kepler that the Earth orbits the Sun. This upset the Roman Catholic church, and Galileo was forced to tell everyone he was wrong.
Galileo Galilei was born in Pisa, Italy, in 1564. As a young man he became interested in mathematics and astronomy. He loved to experiment and try out new ideas.

A story claims that Galileo once dropped objects of different weights from the top of the famous Leaning Tower of Pisa. He wanted to prove that things fall at the same speed, no matter how much they weigh. But some of Galileo’s ideas angered other scientists, so he left Pisa and went to Padua.

For years Galileo taught mathematics at the University of Padua. But in 1609 his career changed direction. Galileo heard about the telescope, a Dutch invention that could make distant objects appear closer. Galileo figured out how such a device would work and then used lenses from eyeglass makers’ shops to make his own telescopes. Galileo’s telescopes were better than most and could make objects appear up to 20 times larger than what the naked eye could see.

Galileo began to look up into the night sky. In December 1609, with the help of his telescope, Galileo learned that the Moon’s surface is rough and uneven. A month later he discovered four moons orbiting the planet Jupiter. Also, when Galileo studied Saturn, he noticed something mysterious about its appearance. Later scientists would learn that the planet’s strange look was due to its large rings.

Using his telescopes, Galileo helped change how people looked up at space. Likewise, much of the modern science of physics is based on his ideas—especially his ideas about how objects of all sizes move and how helpful it is to test scientific ideas by experimenting.

Elizabeth Blackwell • Ferdinand Magellan
Louis Pasteur
In the 1940s a young English girl named Jane Goodall dreamed of living in the African forests among the animals she’d read about. As she grew older, Goodall began to make her dream come true.

In 1957, when she was about 23 years old, a school friend invited Goodall to Kenya, Africa. While in Africa, Goodall met the famous scientist Dr. Louis Leakey. At the time, Leakey was studying wild chimpanzees in order to find out more about the origins of human life. He was impressed by Goodall’s interest in animals and encouraged her to study chimpanzees in Tanzania.

Some people thought that Goodall wouldn’t last for more than a few months in the jungle among the wild animals. But Goodall proved them wrong and ended up living in Tanzania for 15 years. During that time, the chimpanzees slowly became used to Goodall and finally allowed her to spend hours around them.

Being able to watch the chimpanzees up close allowed Goodall to discover many things about the animals that people did not know. Goodall saw chimpanzees use sticks as simple tools to draw termites and ants out of their nests. Goodall also found that all chimpanzees are different from each other in their behavior and natures, just like human beings.

As a child, Jane Goodall grew up reading about wild animals. But as an adult, she ended up writing many books of her own. In them she shared what she learned from 15 years of living with the wild chimpanzees of Africa.

Helen Keller (on the left) is shown here reading the lips of her teacher, Anne Sullivan (on the right). Sullivan stayed with her pupil from 1887 until her own death in 1936.

© Corbis
Helen Keller became blind and deaf soon after she was born, but she still managed to learn to read, write, and speak.

Helen was born in Alabama in the United States in 1880. At 19 months old she fell ill, probably with scarlet fever. She recovered, but lost her eyesight and hearing. Since she couldn’t hear other people, she didn’t learn to speak.

When Helen was 6 years old, Alexander Graham Bell examined her. He was a doctor for speech correction as well as being the inventor of the telephone. Bell sent a special teacher, Anne Sullivan, to stay with Helen as her governess.

Sullivan was herself a remarkable woman. She was very patient and taught Helen that things had names. She taught Helen to finger spell the alphabet. By using finger spelling on Helen’s palm, Sullivan helped Helen understand names for things that she could feel.

Helen was a hard worker and soon learned to read a form of the alphabet with her fingers. She started to read by feeling raised letters and words on cardboard. Later she learned Braille, a system of writing that many blind people use. Another teacher, Sarah Fuller, taught Helen to speak by having her feel people’s lips and throats as they were talking.

Despite her blindness, Helen Keller wrote numerous articles and several books, including The Story of My Life and Helen Keller’s Journal. Her early life with Anne Sullivan is the subject of a well-known play and film called The Miracle Worker.

Helen Keller died when she was 88 years old. She is remembered as a woman of great courage and intelligence.
DID YOU KNOW?

In 1868 Pasteur saved the French silk industry. These businesses were facing ruin because a mysterious disease was attacking the silkworms. Pasteur worked out a way of detecting the disease and preventing it from spreading.
In the 1800s, the bite of a rabid dog meant certain death for the person bitten. In 1885, when a rabid dog bit a boy named Joseph Meister, his mother was desperate. She went to Louis Pasteur, a French chemist and biologist, the only man who she thought might be able to cure her son.

Pasteur had found that rabies was caused by a virus—a disease-causing agent so small it could not be seen even under a microscope. He had already figured out a way to defeat the rabies virus in animals. But he had never tried his treatment on humans. Pasteur treated the child, and Joseph was the first person to be cured of rabies.

Pasteur had devoted his life to solving the problems of industry, farming, and medicine. He figured out that if a liquid like milk is heated to a certain temperature for a few minutes, it takes longer to spoil. If milk is not treated in this way, tiny living organisms called “bacteria” cause it to rot. These organisms are killed with heat in a process that came to be known as “pasteurization.”

Pasteur also discovered that other diseases are caused by germs that enter the body from outside. In 1877 he sought a cure for anthrax, a disease that affects the lungs and kills cattle and sheep. Pasteur successfully developed the method known as “immunization.” Immunization means giving the patient a weak dose of a virus that the patient can fight off. Then the patient’s body knows how to stop an actual case of the disease.

More than any other player, Pelé helped make association football, also known as soccer, popular over the whole world. Pelé, whose real name is Edson Arantes do Nascimento, was born in 1940 in Brazil.

Pelé made his debut with the Santos Football Club in 1956. With him playing forward, the team won several South American cups. In 1962 the team won the first world club championship. Pelé also played on Brazil’s national team and helped it win the World Cup championship in 1958, 1962, and 1970.

Pelé was a brilliant player who possessed great speed and balance. He could guess the moves of other players and had good control of the ball. In addition to all this, he could powerfully shoot a ball straight into the goal with either foot or with his head.

Pelé scored a career total of 1,281 goals in 1,363 matches, with 139 in one year alone. He scored his thousandth goal in 1969. Pelé’s career made him a national hero in Brazil. His fans called him Pérola Negra, meaning “Black Pearl.”

Although Pelé retired in 1974, he made a comeback the next year with a New York team, the Cosmos. He said he returned to “make soccer truly popular in the United States.” He succeeded, becoming a star in the United States as well.

Pelé’s skills did not stop with football. He also wrote best-selling autobiographies, starred in several films, and composed music, including the whole soundtrack to the 1977 film Pelé.
Pelé in action was so magical to watch that once two armies stopped fighting just to watch him play.

DID YOU KNOW?
Shakespeare was so imaginative in his use of language that he created, or "coined," more than 2,000 words or sayings that people have used ever since.
WILLIAM SHAKESPEARE

Plays That Never Grow Old

William Shakespeare is considered to be the greatest playwright in the English language and one of the most beloved playwrights in the world. Not much is known about Shakespeare’s life. He was born in Stratford-upon-Avon, England, in 1564. This was during the reign of Queen Elizabeth I. In his late 20s, Shakespeare went to the city of London to write and act. He joined a theater troupe and began to write plays.

Over the next 20 years, Shakespeare wrote 38 plays and many poems. From his writing we can tell that he knew a lot about human feelings, as well as both city and country life. Most of the stories that Shakespeare told were known to his audience. But his characters and the way he told their stories in his plays attracted crowds of people to the Globe Theatre, where his troupe often performed.

Four hundred years later, people still enjoy reading Shakespeare’s plays and seeing them onstage and in films. They quote his most famous lines (such as “To be or not to be”) and laugh and cry along with his characters. Shakespeare’s plays have remained popular for several reasons. His characters show realistic human emotions. His plots are often complicated, but they always hold the audience’s attention. And his language is powerful and poetic.

Some of Shakespeare’s plays, such as Hamlet, have very sad endings. They are called “tragedies.” Others, such as A Midsummer Night’s Dream, are full of silly plots and have happy endings. They are the “comedies.” Other Shakespeare plays, such as Julius Caesar or Henry V, are based on real-life figures and events. These are the “histories.” And some plays, such as Romeo and Juliet, have a little bit of everything: romance, comedy, and tragedy.

Which of the following describes a play with a happy ending?
  a) tragedy
  b) comedy
  c) plot

Answer: b) comedy
agent  something that produces an effect
astronomy  (adjective: astronomical) the science of the heavenly bodies and of their sizes, motions, and composition
autobiography  life story written by the person it is about
biologist  person who studies living organisms and life processes
bond  connection or friendship
boycott  the refusal to deal with a person, group, or country, usually in order to show disapproval or to force a change in behavior
Braille  a system of writing for the blind in which letters are represented by raised dots
campaign  planned activities designed to lead to a particular result
charitable  done to serve the needs of the poor or sick
chemist  scientist who studies the make-up and properties of physical substances and the changes that they go through
civil rights  the social and personal rights of a citizen
communism  (adjective: communist) system of government in which all property is owned by the state or community and all citizens are supposed to have a share in the total wealth
civil war  disagreement, struggle, or fighting
controversial  causing division or disagreement
debut  first formal public appearance
dictator  person who rules with total power, often in a cruel or brutal way
diplomat  person who works to keep up friendly relations between the governments of different countries
discrimination  the treatment of some individuals or groups differently from others without any fair or proper reason
dynasty  series of rulers of the same family
edict  law or order given by a ruler or leader
extremist  person who holds unusually strong opinions or beliefs
governess  woman who teaches and trains a child in a private home
guerrilla  person who is part of an independent fighting force that makes surprise raids behind enemy lines
immortal  living or lasting forever
lens  (plural: lenses) curved piece of glass that concentrates rays of light
liberation  freedom
monarchy  form of government in which the ruler inherits the position and rules for life; monarchs include kings, queens, emperors, and tsars
mountaineer  mountain climber
nature  inborn or instinctive way of behaving or thinking
negotiate  to discuss and bargain with another in order to reach an agreement
nobility  of upper-class birth or rank
nuclear weapon  explosive device that produces enormous power by splitting apart the centers of the tiny particles called “atoms”
parliament  the lawmaking body of some governments
physics  the science that deals with matter and energy and the way they interact
plot  the main story of a work of literature
pope  the leader of the Roman Catholic church
porter  person who carries baggage
rebel  person who fights against an existing power or way of doing things
reign  the time during which a ruler is in power
republic  form of government in which citizens are allowed to vote for officials and representatives responsible for governing by law
ruthless  without pity
sabotage  damage or destruction of property that interferes with an enemy’s use of it
Soviet Union  country of eastern Europe and northern Asia that existed from 1922 to 1991 and consisted of Russia and 14 other republics
strike  temporary stopping of normal activities in protest against an act or condition
summit  top or highest point
troupe  company or group; especially, a working group of stage performers
vow  solemn promise or statement
wages  payment for work or services
