IMMIGRANT SONG

GUITAR
"Immigrant Song" starts with a powerful punchy 16 beat guitar riff. It is a short number with no solo, so the guitarist's function is to provide the tight rhythmic backing for the band, which should be strong and concentrated.

BASS
The exciting bass part calls for powerful picking in unison with the guitar. The riff pattern is changeable, so the bass rhythm must be tight and accurate. Play with the treble well up for a more guitar-like sound, and stay right with the tight beat.

DRUMS
The drum part throughout the number consists of the same bass drum pattern and strong snare hits on the second and fourth beats of the bar. There are no fills and only the cymbals are used for accents, so each beat needs to be accurate and played with the right balance. The main point is the rhythm of the bass drum on the first and second beats, so practise until this goes really smoothly.

1 (Gt.) : Alternate picking with a flat pick and a strong attack.
2 (Dr.) : The riff pattern is the main characteristic of the number, so its accents must be practised until they are exact.
(Ba.) Alternate picking like the guitar. Stay right with the drummer.
drive our ships to new lands, to fight the horde, singing and crying.
whisper tales of gore, of how we calmed the tides of war.

Val-hal-la, I am coming!
We are your over-lords.
(Ba.) For these 16th note major scale phrases, use alternate picking and keep it tight and accurate.

(GL): Bring out the 9th in the C7(9) on the 4th beat with extra attack to add colour here.
peace and trust can win the day despite all your losing.
FRIENDS

GUITAR
This song is based on C and played with open C tuning. The main point is the use of the open string in the riff, which is sometimes wild and sometimes delicate. The guitar backing is the basis of the song, so aim to achieve a smoothness in your playing by a light touch when cutting.

BASS
A simple bass line with few notes allows the bass guitarist to concentrate on blending in with the other instruments. Special attention should be paid to the timing both in the unison sections with the strings and in the 11/8 sections.
(Gt): This is the main pattern, which makes the most of the first and second strings, but without muting. The main point is to bring out clearly the contrast between the sounded chord and the melody of the riff.

(Gt): In this bar the time changes to 11/8, and guitar and bass play in unison, so watch out for wrong notes; keep it accurate.

(Ba): The whole song is in eight beats to the bar, but in places like this where the rhythm might be difficult to pick up, you would do well first to master the phrase and then fit it to the eight beat count later.
Bright light almost blinding, black night still there shining... I can't stop, keep on climbing...
Met a man on the roadside crying, without a friend, there's no crying... you're incomplete, they'll be no finding.

1 (Gt.) : Unison backing on strings and guitar. Here too no muting is necessary. Feel an accent on the first and fourth beats as you play, to give a dynamic touch.

2 (Ba.) : Bass and strings in unison. Listen to the guitar backing and keep good time.
(Chorus)

looking for what I knew,
looking for what you knew.
And a friend she once told me, "You got a love, you ain't lonely."
So anytime somebody needs you, don't let them down, all-tho' it grieves you.

now she's gone and left me only looking for what I knew,
some day you'll need some-one like they do, looking for what you knew.
C

Mmm, I'm telling you now.

The greatest thing you ever can do now, is trade a smile with someone who's blue now, it's very easy just...
I'm telling you now, the greatest thing you ever can do now.
is trade a smile with some-one who’s blue now, it's very easy just it's very easy it's very eas - y it's

(Synth.)

16
CELEBRATION DAY

GUITAR
One of the classic Zeppelin numbers which features some truly characteristic riffing from Jimmy Page. Make sure you're really on top of the slides and bends which make up the main riff before trying for the powerful rhythm section drive, and then accent the rhythm as you go.

BASS
The bass needs clean hard picking which brings out the offbeat, where the timekeeping must be especially exact. The bass line should be powerful and energetic without being either too even or too jerky.

DRUMS
A basic eight beat pattern with an offbeat feel. The main point for the drummer is how to bring out that tremendous drive with such a simple pattern. Despite this seeming simplicity, it's best to go for a careful approach, building up the phrases gradually.

* (Gt.) - This section calls for tight cutting, accurate slides and exact rhythm.
Her face is cracked from smiling, all the fears that she's been hiding, and it seems that pretty

2 (Gl.): Pick the 5th string while the slide on the 4th string is still sounding.
(Ba): Play downstrokes on all these eight beats for a strong attack.
and soon they'll have to go.

Coda
SINCE I'VE BEEN LOVING YOU

GUITAR
Full of the bluesy phrases for which Jimmy Page is renowned, “Since I’ve Been Loving You” requires a considerable amount of technique, but it’s worthwhile adding it to your repertoire if you’re interested in mastering the feeling and phrasing of blues guitar. You can learn a lot in that direction from just this one song.

BASS
A slow minor key blues number with the rhythm in triplets. For the bass guitarist, the main point, in addition to keeping in with the restrained rhythm, is the need for a heavy broad sound. For the most part, the bass line centres on the root notes of the chords, but there’s no fixed pattern, so the main thing is how to blend in with the overall mood of the song. A really laid-back feel is essential.

DRUMS
The drumming on this song needs to be powerful and restrained yet very relaxed. There’s a variety of fills: eight beat, sixteen beat, triplets, sextuplets, and it’s a challenge to the drummer to negotiate their way smoothly through them. The central rhythm, however, is the triplet. Listen closely to the guitar for the climax points.

9 [Dr.]: The rhythm of this bar sets the tone for the whole song, so be sure to get it right.

9 [Ba.]: Feel the rhythm from the drummer’s snare entry on the second beat of the bar.

9 [Gl.]: The bends should be restrained and relaxed, the picking light and the phrasing smooth.

\[ \text{(GL)}: \text{Watch your timing with the rhythm section to enable a smooth ritardando.} \]
OUT ON THE TILES

GUITAR
The key to the guitar part for this song is the crunchy distortion sound. A number of the riffs are played on non-muted lower strings, so take care not to distort the sound too much and watch the pitch of your low string bends. Timing with the bass player must be exact, as a lot of the riffs are in unison.

BASS
For the many 16 beat unison riffs with the guitar, the bass-playing needs to be hard-edged. In the places where you can use two finger picking, pay extra attention to synchronising with the left hand, and where bends are called for in the middle of a pattern, be careful to align the pitch with that of the guitarist.

DRUMS
The basic rhythm is a medium tempo 8 beat, but here and there the bass drum plays 16 beats, and the whole thing has quite a driving forward feel to it. There are a lot of sextuplet fills which call for accurate timekeeping, and good timing is also essential for the snare/bass drum combination work, so practise until you've got the rhythm really smooth.

Footnotes:

- (Ba.) - Usually one uses the ring finger for bends, but here you can also try downward pulls with the index, middle, and ring fingers together.
- (Dr.) - Watch the timing of your pedal kicks on these snare/bass drum sextuplet phrases so that they come out smoothly, and mind the volume balance between the snare and bass drum.

43

(Dr.): A sextuplet phrase on snare and tom-toms; keep your hi-hat timing steady.

Repeat & Fade Out
GALLOWS POLE

GUITAR
From the gentle sounds of its opening solo acoustic guitar to the eventual entry of the overdrive pedal steel guitar, this is a song which really raises a storm. The electric guitar style of the backing riff in the latter half is especially noteworthy. The pedal steel guitar phrases towards the end should be played just as if on a regular guitar.

BASS
The bass line is basically in eight beats, but it has a staccato feel to it, so don't let the notes spread out too much. There are syncopated 16 beat phrases in the second half which call for strict timekeeping. You'd do well to practise first with a metronome.

DRUMS
The drum part consists only of snare and bass drum combinations, and sounds at first like a simple eight beat, but notice the 16th note offbeats on the bass drum. With 16 beat phrases on the snare, always accent the first note and play the others very softly without getting caught up by the bass drum timing.
I couldn't get no silver, I couldn't get no gold, you know that we're too damn poor to...

keep you from the gallows pole, hang-man, hang-man.
A D G
hold it a little while,
I think I see my brother coming riding many a mile.

Brother, did you get some silver? Did you get a little gold?
Brother, I brought you some silver, I brought a little gold, I brought a little of every thing to

(Gt.) This riff features the low notes. Be sure to mute firmly on the rests on the first and second beats. Chop the third and fourth beats with alternate strokes. You’ll get the right sound if you mute them very gently as you do so.

(Gt.) Backing play which features a bold use of brushing technique. Bar the A chord with the index finger at the second fret. Brush by muting all six strings firmly with the left hand.

(Ba.) Note the staccato bass line. It’s the hint of a 16 beat which gives it this springing feeling.
G    D    A

keep me from the Gal-lows, Polo?
keep you from the Gal-lows, Polo.

Yes, I brought you ________ to keep you from the Gal-lows, Polo.

A    G    D    G    A    D    G
Hang-man, hang-man, turn your head a while,______ I think I see my sis-ter-com-ing.
Sister, I implore you,

riding many a mile,

Sister, I implore you,

take him by the hand,

take him to some shandy bower,

(Dr.): Always accent the first notes and play the others softly. Watch your timing with the offbeats and don't be too hasty.
A

Please take him, save me from the wrath of this man, man.

Hang-man, hang-man, upon your face a smile, pray tell me that I'm free to ride, ride for many a mile.

ah I got ta swing keep a swinging yeah

cho. cho. cho.
TANGERINE

GUITAR
In the impressive 12 string acoustic intro, there's much use of open strings in the low chords, so it's very easy to play. Another characteristic of the song is the two "shades" of pedal steel guitar, overdrive and distortion-free, while the solo features bottleneck playing.

BASS
This is a comparatively slow eight beat number, and there are no difficult phrases for the bassist. The accent is on the first beat of each bar, and the mood should be relaxed and laid-back. There are several long breaks for the bass and drums, so watch the tempo when you come back in. It's best to play silently through the breaks.

DRUMS
The rhythm is the most basic eight beat pattern, and as it's a difficult tempo to get any kind of mood out of, you can at least add a nuance by setting the hi-hat a little loose. Strict timekeeping is not the name of the game in this number, rather let your strokes be very relaxed and even a touch delayed. Mistakes tend to stick out all the more with such a simple pattern, so any kind of roughness should be avoided.

* (Gt.): The two continuous G notes here G/G) suddenly sound different, but actually, they aren't. The trick is to use alternate picking. If you play both with the same downward stroke, they sound completely different.
Measuring a summer's day, I only find it slips away to grey, the hours they bring me pain.
(GL): It would be good to be able to use the bottleneck here, but positionwise, practically impossible, so instead you'll need to hammer-on and pull-off. You'll get close to the original by using a wow-wow pedal, but if you do, be sure the sound is clear.
Vo.

Gt.

does she still re-mem-ber times like these
to think of us a-gain?

D

Am

G

D

F

And I do.

(Gt.) The original features an overdrive pedal steel guitar solo from this point on. Instead, you can use a regular guitar with a bottleneck and distortion.
(Gl) : Play this section with the same feel as you did in [Δ], only here it's an octave higher. The position doesn't allow the use of the bottleneck, but where you have two notes together, you could use it just for the lower of the two. The same applies to [Θ].
from a dream, I was her love, she was my queen, and now a thousand years between...
THAT'S THE WAY

GUITAR
The combination of the drawn out acoustic guitar riff and the sound of the pedal steel guitar in the back is very impressive. We've shown the pedal steel guitar part as written for normal guitar plus bottleneck. Note that there are a number of places which require you to play with the other fingers of the left hand when you have the bottleneck on.

[Recorded $\frac{1}{2}$ Step Lower(G♭ Major)]

BASS
The bass enters only towards the end and there are no difficulties for the bassist. Just watch your timing on the first beat of the bar and don't let the tempo slip. The bass line in this song needs to blend well with the other instruments. There's a long wait before the bass entry, and it's important to feel that you're playing along with the guitarist while you're waiting.

- (Gt.) The main riff. For the second beat of the first bar, just move the same position along.
G

My friend, the boy next door.

G

I can't believe what people saying.

G

you're gonna let your hair hang down.
I'm satisfied to sit here working all day long.
You're on the darker side of
(Gt.) The bottleneck is normally used by Gt.-II, but this section you can play by pulling-off and sliding. There's no problem if the bottleneck is on the ring or the little finger.

(Gt.) Here you have two notes at the same fret, so this calls for the bottleneck. The slides at 2/15 and 3/16 can be negotiated by straddling the bottleneck diagonally across both positions.
what did name say to me.

That's The Way, oh, That's The Way it ought to be.

yeah, yeah, never say. That's The Way it ought to stay, yeah, yeah.

oooh, oooh, oooh, oooh, ooh,
And yesterday I saw you standing by the river, and weren't those tears that filled your eyes, and all the fish that lay in dirty water dying, had they got you hypnotized? (GL) This part is for normal guitar. (Gt) In the slide from 2/10 to 2/12, there's also the note B at 1/10, so keep the bottleneck above and away from the first string.
Yesterday I saw you kissing my flowers, but all that lives is born to die.

And so I say to you, that nothing really matters, and all you do is stand and cry.

(G.L.) Play as per normal guitar. If you’re using a bottleneck then play only the first string.
I don't know what to say about it, when all your ears have turned a-

—way, but now's the time to look and look again at what you see, is that the way it ought to stay?

That's The Way, oh, That's The Way it ought to be, oh, don't you know, now na na
Oh (Gt.) : An effective piece of cutting using only the second, third, and fourth strings. Play the 2/5 on the fourth beat with the ring finger and the 4/5 with the middle finger.
G Am7 Bm7 C D
C G C G C G D

(Perc.) Tambourine

D G Am7 Bm7 C D
C G C G

(Gr.) : The bottleneck can be used diagonally here.
(Gt-I) : Here again use the bottleneck diagonally to play 2/13 while sliding at the same time from 3/12 to 3/14.
(Ba.II) : Gissando (3rd string) and slides with the ring finger.
BRON-Y-AUR STOMP

GUITAR
There are a lot of tempo changes in Bron-Y-Aur Stomp, and the different colours of the guitar sound play a very important role. The open tuning arpeggios should be played with a flat pick and plenty of attack. Practise the tempo change sections repeatedly until you can manage them smoothly.

BASS
A double bass style of playing which supports the vocal line is the main point in this song. If you’re using an electric bass, soften the tone and slightly mute the sound throughout. Try to find the setting which you feel comes closest to the double bass sound.

DRUMS
It’s interesting to note how such a simple hi-hat and bass drum combination can create such a driving rhythm. You’ll need to take a little extra care over the tempo changes where they occur, and rehearse them as patterns. The hi-hat can be played with sticks, and the bass drum tuning should be set low.

0 (Gt.): This section determines the tempo of the whole song, so practise it well. With the glissandos adding an extra nuance, the whole sound should be very smooth.
(Gt.) - Hard-edged cutting with an upright pick. The key point is in the placing of the accents.

(Dr.) - Right from the beginning, the drummer needs to maintain absolutely sure timekeeping.
(Ba.) : The bass line is very similar to the vocal, melodic and smooth.

(Gt.) : Here come the tempo changes which include 7/8 and 9/8, so you'll need clear and decisive cutting patterns.

(Ba.) : Watch your timing with the bass drum here. Play clearly to avoid errors.
Hear the wind whisper in the trees, telling Mother Nature 'bout you and me.

(C) (Dr.) During this multiple tempo change section, listen carefully to the vocal and the other instruments and watch your hi-hat timing.

My, my, la de la come on now, it ain't too far, tell your friends all around the world, ain't.
So of one thing I am sure, it's a friendship so pure, an angel

singing all around my door so fine.

Yeah, ain't but one thing to do spend my natural life with you, you're the finest dog I know, so fine.
HATS OFF TO (ROY) HARPER

GUITAR
A bluesy bottleneck number in open C tuning. A solo
guitar provides the only backing, so the main point is the
breathing between guitar and vocals. Also, mind your
pitch doesn’t start to wander because of the low tuning.

(Gt.) : This open tuned bottleneck pattern
recurs frequently. Avoid any unnecessary
sounds by cutting off excess vibration with
the tips of the fingers you aren’t using. For
example, when playing with the little finger,
mute with the ring finger.
Ah, must I shake 'em on down,

Well I've been mistreated, babe, I be
Love I'll shake 'em on down...

Shake

Shake

Well, I ain't no monkey, I can't climb no tree...

(GL): Synchronising with the vocal line and dynamics are the points to watch here.
no brown skin woman gonna make no monkey out of me, yeah yeah I ain't no monkey.

Bottleneck

I can't climb no tree.

Bottleneck

Well I've been mistreated baby I been

C

I believe I'll shake 'em on down.

When I done quit holler'in' baby

Bottleneck

I believe I'll shake 'em on down.

Ha ha ha ha ha ha ha ha ha ha

Bottleneck
(GL): Use a single finger slide to produce a
smooth flow of notes.
(Gt): You'll get the right mood by playing all three bars with a slight vibrato. It doesn't matter if the pitch slips a little here; concentrate on the feeling.

(Gt): By now the tension should have become quite slack. Watch out for this especially when bending.
a twenty dollar bill, If that don't get her, sure my shot, shot, shot-gun will. Yeah, I gave my baby.

If that don't get that woman,

I'm sure my shot-gun will.

shot 'em now.
