Introduction

New Headway Academic Skills

A multi-level course aimed at post-secondary students who need English in their academic studies. It comprises a Student’s Book and Teacher’s Guide for each level.
Each level consists of 10 units covering a variety of topics relevant to students in higher education. Units focus on a wide range of academic reading, writing, research, and/or vocabulary skills.

New Headway Academic Skills can be used alongside New Headway and New Headway Plus, or alongside any other general English course.

Aims of New Headway Academic Skills

The aims of New Headway Academic Skills are to help post-secondary students become more efficient and effective in their studies by:

- developing strategies to improve reading speed, and to improve the ability to comprehend complex academic texts;
- developing strategies to produce more coherent writing, and to make clear, appropriate, and relevant notes from academic texts;
- encouraging them to adopt various approaches for dealing with new or unknown vocabulary by practising effective use of dictionaries, and through making effective vocabulary records;
- exploring and evaluating research techniques and resources, and crediting sources of information;
- promoting learner independence by encouraging students to return to earlier Study Skills to refresh their memories, or see how new skills build on and develop those previously presented.

Although the course primarily focuses on the skills of reading, writing, and research, students are given opportunities to practise their listening and speaking skills through brainstorming sessions, discussing issues, and sharing thoughts.

Ultimately, New Headway Academic Skills also aims to develop academic skills by being transferable to all areas of students’ day-to-day academic studies.

What’s in the Student’s Books?

Each unit consists of 5 x 50–60 minute lessons. There are four or five sections: Reading, Writing, Vocabulary Development and/or Research, and Review. Each Reading, Writing, Vocabulary Development, and Research section has clear study skill aims presented in Study Skill boxes. These skills are practised through a series of controlled to freer practice exercises.

Rules boxes highlight any grammatical areas which students may need as additional support. There is a comprehensive word list at the back of each level.
READING
Each reading section contains one or more texts which students use to develop different study skills. These study skills are clearly detailed in Study Skill boxes and are linked to specific practice exercises. The texts are of various types and styles which students will come across during the course of their academic studies, including scientific reports, articles, biographies, web pages, and data presented through graphics.

WRITING
Each writing section has clear outcomes for the students in terms of the type of text they may be asked to produce in other subjects, including summary writing, a description of a graph, and writing from notes. Skills covered include brainstorming, paragraphing and organizing ideas, linking ideas, and error correction.

VOCABULARY DEVELOPMENT
The vocabulary section contains skills and strategies which help students develop good vocabulary learning and recording techniques. It encourages them to become more autonomous learners by making them more effective users of dictionaries, helping them to work out meanings of new words, and encouraging them to keep coherent and well-organized vocabulary records.

RESEARCH
The principal skills addressed in these sections are formulating efficient search plans, and finding and assessing reliable sources of information such as an encyclopaedia and the Internet. This section also deals with the importance of recording and crediting sources which students use in their academic work.

REVIEW
In the review section, students are given the opportunity to reflect on skills learnt, to practise and develop them further, and to consider how these could be applied to their academic studies.

WORD LISTS
A comprehensive list of words with phonetic transcript from each level of the course can be found in the back of the Student’s Book. Please note that although the level of the vocabulary has been modified to some extent, it reflects the diverse and often more specialized vocabulary found in academic texts. It is not expected that students will learn or indeed need to learn these lists of words.

IELTS and TOEFL
Whilst this course does not deal specifically with the questions which occur in public examinations such as IELTS and TOEFL, many of the skills taught in this course have a direct application to preparing for these exams.

New Headway Academic Skills
Teacher’s Guide
The Teacher’s Guide is an easy-to-follow resource for the teacher offering step-by-step guidance to teaching New Headway Academic Skills. As well as step-by-step procedural notes, the Teacher’s Guide contains a summary of aims, lead-in tasks, background information, extension activities, and a comprehensive answer key.

Why use a Teacher’s Guide?
Both the Teacher’s Guides and the Student’s Books have been very carefully devised in order to develop specific academic skills. As such, the treatment of materials is often different from that in a general English course. For example, pre-teaching difficult vocabulary from a text before the students read it may interfere with subsequent skills work on drawing meaning from context, or on extracting only the essential information from a complex text. Teachers are therefore strongly encouraged to consult the Teacher’s Guide.

What’s in the Teacher’s Guide?
AIMS
Each reading, writing, vocabulary development, research, and review section has a summary of the aims of that section.

LEAD IN
Lead-in activities are devised to focus students’ attention on the topic and skills of each section.

PROCEDURE
Class management and step-by-step instructions.

BACKGROUND INFORMATION
These notes give teachers background information to the development of a skill, or the topic.

EXTENSION ACTIVITIES
Extension activities offer ideas on how to extend skills practice, or give students an opportunity to reflect on their learning.

ANSWER KEY
For ease of use, the answer key is on the same page as the teaching notes for each exercise, but presented separately. The answer key for each exercise is clearly referenced in the procedural notes. For example, exercise 1 key is referenced >>> 1

We hope you and your students enjoy working with New Headway Academic Skills.
READING   How do your read?  pp4–5

AIMS
The aim of this section is to get students to think about reading: the reading they do in their studies but also outside their study environment. They will be encouraged to think about the types of texts they have to read and the different skills they use to read each text type.

LEAD IN
• Focus students’ attention on the heading How do you read? and ask:
  – What makes a good reader?
  – How does a good reader read?
  – Are you a good reader? Why?/Why not?
• Draw students’ attention to the picture of the man on page 4 and the woman on page 5. Ask:
  – Where is the man (woman) and what is he (she) doing?
  – Is this a good place to read? Why/Why not?

PROCEDURE
1 Read the questions quickly with the class. Deal with any vocabulary difficulties. Students complete the quiz individually, then compare their answers with a partner. Go through the questions with the class and discuss their answers.  ➤1

BACKGROUND INFORMATION – READING
Point out the following:
1 It is good to be able to read anywhere, but for study purposes it is best to have a quiet place where you have access to dictionaries, notepaper, pens, etc.
2 The speed of reading depends on what you are reading. Sometimes you do need to read slowly and carefully. Elicit one or two examples from the class (e.g. reading a textbook, understanding instructions).
3 If you check every new word in a dictionary it slows you down. Often you do not need to understand every word, and sometimes you can guess the meaning of a word from the words around it.
4 Read through the words in the box briefly. Give students time to complete the table individually. Check the answers with the class. Point out that the same text can be read in different ways. For example, we read a textbook quickly to find out if it will be useful, or we read it slowly to remember everything.  ➤2
5 Students read the instructions and then read the magazine article. Students compare their answers in pairs. Point out that sometimes we need to read a text slowly and remember it— for example, when learning a poem or definition.  ➤1
6 Students read the instructions and the Study Skill. Refer students back to the text in exercise 3. Give students time to complete the exercise. Check the answers with the class.  ➤4

EXTENSION ACTIVITY
Ask students to make a list of things they have read in the last week (in any language), including various types of text on the Internet. Then ask them to decide how they read that text – Did they read it quickly or slowly? Did they skim it or scan it? Did they try to remember things? Students compare their answers in pairs, then check answers with the whole class.

READING   Answer key  pp4–5

➤1 Students’ own answers.

➤2 Possible answers
read quickly: newspaper, novel, magazine, telephone directory
read slowly: poem, textbook, report, definition

➤3 Students’ own answers.

➤4 1 a study reading
2 c scanning
3 b skimming
WRITING  Describing people  pp6–7

AIMS
The aim of this section is to help students to write simple paragraphs of description about themselves and other people. It also aims to raise students’ awareness of the use of capital letters and the general need for accuracy in writing – the need to check capital letters, spelling, grammar, and punctuation.

LEAD IN
- Write two sentences on the board with no capital letters and no full stop or question mark – for example:
  - my sister works for the national bank
  - how many languages does charles speak
- Ask:
  - What is wrong with the sentences?
  Give the students a few minutes in pairs to discuss the answers.
- Check the suggestions with the class. Elicit the need for capital letters at the beginning of sentences, and for the names of banks and people. Also elicit that punctuation is missing from the sentences – a full stop or question mark is needed at the end of the sentences.
- Ask students:
  - What other types of word need capital letters?
  Make a list of suggestions on the board.

PROCEDURE
1 Students read the Study Skill. They should compare this list with the list from the lead–in activity.
Students now read the instructions and match the rules (a–f) with the capital letters in the sentences. Students check their answers in pairs.  >>>1
2 Students read the instructions. Point out that there is more than one sentence in each example. Do the first question together with the class on the board. Students finish the exercise individually. Check the answers with the class.  >>>2

EXTENSION ACTIVITY
Ask students to write one sentence to illustrate each of the rules (a–f). Do the first together as an example. Students write the sentences and then check their sentences with a partner.
3 Students read the instructions. Ask students:
  - What does ‘skin’ mean?
  Check that they understand that it means reading quickly for the general idea. Ask students to look through the two paragraphs quickly to find out what they are about. Elicit general answers, not specific details.  >>>3
4 Read through the table with the class and deal with any difficult vocabulary. Tell students to scan the paragraphs for details about the two people and complete the first two columns of the table with the information. Check answers with the class.  >>>4
5 Students now complete the table with information about themselves. Check to see that students have completed all parts of the table.
6 Refer students to the Study Skill. Give students time to study the box.
Explain the idea that there are many ways of linking sentences. These will be explained in the Study Skills on linking ideas throughout the book. Using and and but are just two examples. Explain that linking the ideas in sentences makes writing easier to read (and more interesting).
Students now look at the text about Dr Lee again and underline and and but where they link sentences.  >>>6
Point out that but is usually preceded by a comma. Also point out the fact that not all examples of and in the text join sentences, for example: mathematics and computing, and French and Malay. In these cases and is just linking nouns in a list.
BACKGROUND INFORMATION – LINKING IDEAS

Some of the different ways of making writing more cohesive have been collected under the heading 'Linking ideas.' This heading is used in different Study Skills throughout the book. They include the use of conjunctions (and, but, so), sentence connectors (first, however, in addition), relative pronouns (which, that, where) and subordinators (because).

7 Students work individually and join the pairs of sentences. Check answers with the class.  

8 Students read the instructions and the RULES box. Ask students to look at the paragraph about Mona again and notice the Present Simple verbs, e.g. is, am, is, am, hope, am, am, have, live, speak (they could underline them). Students then write a similar paragraph about themselves. Final drafts of the paragraphs (corrected versions – see exercises 10 and 11) could later be collected and displayed.

Writing about people  p7

9 Ask students to look at the paragraph about Dr Lee. Point out the Present Simple verbs – is, comes, teaches, etc.

Ask students to draw a table like the one on page 7 (city, country, job, etc) in their notebooks, with one column for information. Put students into pairs and tell them to interview one another and collect information to put in the table. Students then write a paragraph about their partner.  

10 Students read the instructions and the Study Skill. They then correct the mistakes in the sentences. Check answers with the class.  

11 Students read the instructions, then check and correct their own paragraphs.

EXTENSION ACTIVITY

Ask students to draw another table in their notebooks. They should then find another person to interview outside the classroom — a teacher, a friend, a relative, etc. They then write a paragraph about this person. Students could read their (corrected) paragraphs to the class, or they could be part of a class display.

VOCABULARY DEVELOPMENT

Dictionary work (1)  p8

AIMS

One aim of this section is to make sure that students are familiar with the basic parts of speech. The section also aims to encourage students to explore their dictionaries. It shows them that a dictionary does not only give the meanings of words, but also provides other useful information.

In addition, this section gets students to think about ways of organizing and recording vocabulary that they want to learn.

LEAD IN

• Put students into pairs or small groups.

• Ask them to make a list of all the things we can find out about a word by looking in a dictionary.

• Collect ideas from the whole class and make a list on the board.

• Add any points they may have missed (e.g. parts of speech, pronunciation, plural forms, the forms of a verb, examples of use, opposites).

• Check that students are familiar with the term parts of speech. Write two sentences on the board, e.g.:
  – George is in the office at the moment.
  – George studies French and mathematics.

• Point to each underlined word and ask:
  – What part of speech is this?

Elicit the answers (office is a noun and studies is a verb).
PROCEDURE

1 Students read the Study Skill on parts of speech. Make sure they are familiar with the main parts of speech. Give further examples if necessary, using full sentences as in the lead in. For example:
   - Physics is a difficult subject for many students. (adjective)
   - Karen did badly in the final exam. (adverb)
   - The mobile was under the newspaper. (preposition)

Students complete exercise 1, then check answers with the class. 

EXTENSION ACTIVITY

Ask students to work in pairs. Ask them to give two examples for each of the parts of speech mentioned in the Study Skill. Check all the words. Students then write the words in full sentences.

2 Ask students to read the Study Skill. Check the list with the list that the class came up with in the lead in.

Students then look at the extracts from the Oxford Essential English Dictionary. Ask students to find the dictionary entry for the word suburb. Point out the information on pronunciation, part of speech, and meaning, and also the example sentence. Refer to the information for suburb in the table.

Students now work individually and complete the table with information on the other three words. Check answers with the class.

3 Students read the Study Skill and the instructions. Point out that it is easier to learn and remember vocabulary if it is in groups. Students complete the lists in pairs and add any other words they know. Check answers with the class.

EXTENSION ACTIVITY

Ask students to work in pairs to think of three other groups for organizing vocabulary (e.g. electrical appliances, fruit, feelings). They should give at least three or four words for each group. Get some pairs to read out their lists to the rest of the class.

REVIEW

AIMS

The aim of this section is to encourage students to review the content of the unit and also to practise and develop the skills they have learnt.

PROCEDURE

1 Students read the instructions, then allow students time to read the questions. Explain any vocabulary students do not understand. Refer students back to the Study Skill on parts of speech and a dictionary entry to help them answer the questions. Students answer the questions individually or in pairs. Check answers with the class.

2 Elicit from the class the rules about using capital letters. Then tell students to read the Study Skill on page 6. Students then complete the exercise.

3 Refer students back to the Study Skill on recording vocabulary on page 8. Get students to complete the task and add other words they know. Check answers with the whole class.

4 Students read the instructions. Students then find three (or more) new words in the unit and complete the table.

VOCABULARY DEVELOPMENT Answer key

1 lives - verb
2 parents - noun
3 in - preposition
4 of - preposition
5 usually - adverb
6 read - verb
7 carefully - adverb
8 interesting - adjective
9 language - noun
10 difficult - adjective

Possible answers
quick /ˈkwɪk/, adjective, taking little time/fast: It's quicker to travel by plane than by train.
check /tʃek/, verb, to look at something to see that it is right, good or safe: Do the sums and then use a calculator to check your answers.
always /ˈɔːlweɪz/, adverb, at all times, every time: I have always lived in London.

jobs: translator, builder, accountant, pilot, doctor, teacher, professor
family: sister, father, mother, cousin, brother, aunt, uncle
homes: house, flat, apartment, villa, hostel, palace

REVIEW Answer key

1 adverb
2 one
3 truck
4 easy
5 /ˈmeɡəˈziːnəʊz/
6 bought
7 addresses
8 mathematical
9 a poet
10 down

1 My friend Igor comes from Moscow.
2 I am studying French and History at Manchester University.
3 Is Charles doing a course at Capital Institute?
4 My brother wants to visit Turkey and Germany next summer.
5 Is there a message from Mr. Hector Ortiz from Mexico?
6 The name of the hotel is Al Bustan Palace. It is just outside Riyadh.

Possible answers
Things we read: novel, poem, dictionary, newspaper, textbook, magazine, report, telephone directory, book
Academic subjects: physics, English, French, Russian, computer programming, mathematics, history, science

Students' own answers.
2 Daily routines

READING SKILLS  Predicting content (1)  •  Skimming
WRITING SKILLS  Handwriting  •  Paragraphs  •  Linking ideas (2)  •  Writing about routine and procedure
VOCABULARY DEVELOPMENT  Collocations  •  Jobs ending in -er, -or, -ist

READING  Work and stress  pp10–11

AIMS
This section introduces the idea of making predictions about the content of a text before reading it, as an aid to comprehension. In particular, it focuses on the skill of looking at the pictures in a text to predict meaning. It also aims to give further practice in the skill of skimming a text for the general idea.

LEAD IN
• Write three jobs on the board, for example: gardener, pilot, bank clerk
• Ask students to work in pairs and to think about the good points (advantages) and bad points (disadvantages) of each job.
• Discuss the ideas briefly with the class. Try to elicit the words healthy, salary, and stress in the discussion.

PROCEDURE
1 Introduce this activity as a mini-survey. Tell students to read the instructions and to look at the table. Working with a partner, they should then complete the table. Point out that they can write any combination of numbers – for example, 1, 1, 1 if they think that all factors are very important. Collect the results for the whole class. Make totals for each factor and display them in a table on the board, e.g. a) 21, b) 32, c) 19. Use the results for a discussion on the relative importance of these three factors.

2 Tell students to read the Study Skill, and make sure they understand the word predict.
Read the instructions and the example sentence with the class. Students then identify the jobs of the other people and make similar sentences about them. They then discuss in pairs whether the jobs are healthy or stressful, and give their reasons. Discuss the answers with the class.  

3 Elicit the difference between skimming and scanning. Tell students to read the Study Skill to check that they remember correctly. Students read the instructions, then skim the article quickly to choose headings for each paragraph. Students check their answers in pairs.  

4 Students read the article to check their predictions from exercise 2.

5 Ask students to read the instructions, then ask them to say what a summary is. Elicit these facts:
   – it is shorter than the original text
   – it contains the main points
   – it is useful for revision later on
Students complete the summary individually using the words in the box. Check answers with the class.  

EXTENSION ACTIVITY
1 Tell students to go back and re-read the text How do you read? on page 5. Tell them to find the main points of the text and write two or three sentences to summarize the text.

2 Get students to bring in texts which have accompanying pictures, or bring in a set of your own. Get students to work in pairs. Give each pair a text and ask: What do you think the texts are about? They should look at the pictures and make predictions about each text. If the texts are not too difficult, encourage them to skim the text to see if their predictions were correct.
WRITING Routines and procedures pp12-13

AIMS
The aim of this section is to get students to think about the presentation of their written work, in particular, handwriting and paragraphing.
This section also focuses on routines and procedures. It helps students to understand the structure of texts which describe a routine (e.g. a daily routine) or a procedure (e.g. writing an academic essay). Students are then guided towards writing their own descriptions of routines and procedures.

LEAD IN
- Write the word routine on the board and elicit examples of routines, e.g. a work routine or a school routine. Ask some students to describe their daily routine.
- Then write the word procedure on the board.
- Elicit that a procedure is a way of doing a particular task, and elicit examples, e.g. registering for a course, sending an email, opening a bank account, etc.
- Choose one procedure, e.g. registering for a course, and elicit the steps in the procedure (e.g. look at the list of courses, discuss the options with a tutor, choose a course, etc.).

PROCEDURE
1 Ask students:
   - When do you need to write by hand?
Make a list on the board with the class. Then ask students to read the Study Skill on handwriting. Ask the class to compare the list in the book with their suggestions. Discuss any additional occasions when handwriting is important.
Students then read the instructions individually and match the mistakes with the examples (a–f) in the paragraph. Check answers with the class and elicit from students their own problems with handwriting.  

2 Ask students:
   - What is a paragraph?
   - How do we show when a new paragraph begins?
Listen to the students’ answers and then direct them to the Study Skill on paragraphs. Give them time to read the information and make sure they have understood everything.
Students now read the instructions for the exercise and look at the text about Helena. Students discuss their answers in pairs, then check answers with the class.

3 Students write out the text as two paragraphs, using either block or indented styles. Make sure they leave double spacing between paragraphs if using the block style. Check that the indentations are the same length if they use the indented style.

4 Students read the Study Skill. Elicit other examples of sequencing words (e.g. secondly, next, firstly) and time expressions (in the evening, last week, in March). Students then read the instructions and complete the exercise. Check answers with the class.

5 Ask students to point out the time expressions in the text (at 11 o'clock, at about 1 o'clock, in the afternoon). Tell them they can use these time expressions as well as the sequencing words to help them put the sentences in order. Students complete the task individually, then check their answers in pairs.

EXTENSION ACTIVITY
Ask students to write out the two paragraphs correctly. Tell them to use either indented or block style.

6 Write on the board the title: How to Plan and Write an Essay. Elicit ideas from students and write down the steps they come up with. Then draw their attention to the instructions. Get them to look at the words in the box and the paragraph about Maria. Students complete the paragraph.
Discuss briefly the steps Maria uses to write an essay. Compare them with the steps the class mentioned earlier.

WRITING Answer key pp12-13
1 a3 b2 c1 d5 e6 f4
2 1 There is a mixture of styles – some paragraphs are indented and some are block style.
   2 Some paragraphs have fewer than three sentences.
3 Two paragraphs, either block or indented style.
   Paragraph 1 begins: "My sister, Helena is..."
   Paragraph 2 begins: "At the weekends..."
4 Then First After that Finally After (the class)
5 Paragraph 1
   1 Maria usually gets to the university at about 8.30.
   2 First, she has a cup of tea in the snack bar.
   3 Then she goes to her first class. This is at 9 o'clock.
   4 At 11 o'clock she has another class. This is poetry.
   5 After that, she goes to the library and studies for an hour before lunch.

Paragraph 2
   6 At about 1 o'clock Maria goes to the student canteen with some of her friends.
   7 They talk about their studies or their plans for the weekend.
   8 In the afternoon Maria has one more class from 2 o'clock to 3.30.
   9 After the class she goes to the library again for another hour.
   10 Finally, she leaves the university at about 5. It is a long day.

6 1 First
   2 Next
   3 while
   4 After
   5 Then
   6 Finally
Writing about routine and procedure  

Put students into pairs and tell them they are going to write about their partner’s daily routine.

First, they should interview their partner and take notes.

Help them to start the interview by getting suggestions for questions:

- When do you leave home?
- When do you get to the university/school?
- What do you do first?
- What do you do after that? etc.

When students have finished taking notes, explain that they are going to write two paragraphs so they should decide which information will go in each paragraph (e.g. morning routine, afternoon routine). Refer them back to the paragraphs about Maria’s daily routine in exercise 4. Tell them they can use these paragraphs as a model for their own.

Remind them that they should use suitable sequencing words and time expressions. Refer them to the ideas in the box, and also the words and expressions used in exercises 4 and 6.

Remind students to check their writing carefully. They should check spelling, capital letters, punctuation, grammar, and paragraphing. If they are writing by hand, remind them of the rules for good handwriting.

Students write their paragraphs.  

Read the instruction with the class and elicit ideas from the class on how they revise for exams.

Read through the ideas in the box with the class and explain any difficult vocabulary. Then ask students to write the paragraph, using sequencing words and time expressions. Remind them again to check their writing at the end.

EXTENSION ACTIVITY

Ask students to think again about the way they plan formal writing – a letter, a project, a report, etc. (not necessarily in English). Get them to write down the steps they follow. They should then write a paragraph outlining the steps in their writing process.

VOCABULARY DEVELOPMENT  

Words that go together  

AIMS

The aim of this section is to introduce the idea of collocation as a useful tool for vocabulary building. The section also focuses on the organization of words related to jobs, and spelling rules for the different word endings.

LEAD IN

- Write a sentence on the board with a missing verb, for example:
  - Paulo has to ... an essay on climate change this evening.

- Ask students to think of verbs which can go in the space (write, plan, read, etc.) and point out that certain words collocate (go with) with each other. Give some other examples of nouns and elicit the verbs that collocate with them, e.g.
  - play + football
  - watch + television

- Write a second sentence:
  - I have got two ... tickets in my case.

- Elicit possible answers (plane, train, bus etc.) and point out that nouns can also collocate with other nouns.

PROCEDURE

Tell students to read the Study Skill on collocations. Check that they understand the word collocation and also the verb collocate.

Students then complete the diagrams for the words traffic and have. Students can use dictionaries to help them if necessary.

Students then read the instructions for the activity and match the verbs with the nouns individually. Check answers with the class.
2 Tell students to use their dictionaries for this exercise. They should look up the underlined words (for example, walk) to find which verbs collocate with it. Do the first with the class as an example and let students complete the exercise on their own.  

3 Students use their dictionaries to find other nouns which collocate with the nouns computer and business. Check answers with the class.

Spelling (1)  p14

4 Students read the instructions and the RULES box. They then complete the definitions of the six jobs, using dictionaries to check the spellings.

5 Students work in pairs to write the jobs from exercise 4 in the table, and add ideas of their own.

REVIEW

AIMS
The aim of this section is to encourage students to review the content of the unit and also to practise and develop the skills they have learnt.

PROCEDURE
1 Students read the instructions and the example answers. They then look back through the unit and choose five other jobs from the unit and write similar sentences. Students check their sentences in pairs.

2 Refer students back to the Study Skill on page 13. Students then read the instructions to this exercise and the sentences in the box. Tell students to read quickly through the text on Sam's day before they complete it with the missing sentences. Students complete the paragraph individually, using the sentences from the box. Check answers with the class.

EXTENSION ACTIVITY
Ask students to look at the paragraph about Sam. Remind them of the rule for paragraphing (page 12). Ask them to divide the paragraph into three possible paragraphs. Check their solution and ask them to write out the three paragraphs.

3 Read the instructions with the class. Students work individually, then compare their answers in pairs. They then write their paragraphs individually. Remind students to use sequencing words in their paragraph.

4 Refer students back to the Study Skill on page 14. Students then read the instructions and look at tables A and B. Point out the examples that are given. Students then complete table A with at least one noun for each verb, and table B with at least one verb for each noun. Tell students to use their dictionary where necessary. Check answers with the class.
3 People and the environment

READING SKILLS Scanning – using headings • Meaning from context
WRITING SKILLS Punctuation (2) • Talking about frequency • Writing about study habits
RESEARCH Sources
VOCABULARY DEVELOPMENT Recording vocabulary (2)

READING Weather pp16–17

AIMS
The aim of this section is to encourage students to get information quickly from a text, in particular from an encyclopaedia entry, by learning to use headings. It also encourages students to make their reading more efficient by developing the skill of guessing the meaning of a word from its context.

LEAD IN
• Ask students:
  – What are the seasons of the year?
  Write them on the board.
• Ask:
  – What is your favourite season and why?
• Get students to work in pairs. Ask them to write weather vocabulary associated with each season (e.g. summer – hot, dry, sunny).
• Collect the vocabulary from the class. Add words to the board in a spidergram for each season.
• Write the word hurricane on the board. Elicit the meaning, and ask students what they know about hurricanes. Ask where they could go to find out more information.
• Elicit the word encyclopaedia. Point out that many encyclopaedias are available online (e.g. Encarta, Wikipedia).

PROCEDURE
1 Refer students to the pictures and the titles. Students match the titles with the pictures. ▶️1

2 Students match the words with the pictures. Point out that some words could be used for more than one picture. Check answers and explain any vocabulary that students do not understand. ▶️2

3 Put students into pairs. Ask them to use the words in exercise 2 to discuss the weather in the pictures. Give them some questions to ask, e.g.:
  – What is the weather like in picture …?
  – What country is this?
  – Do you think it is warm, or cold? ▶️3

4 Read the questions quickly with the class and deal with any vocabulary difficulties. Students work in pairs and try to answer the questions. Listen to the students’ answers quickly, but do not say if they are right or wrong at this stage.

5 Check that students remember the meaning of scanning – reading quickly to find information.

Tell students to read the Study Skill on scanning and using headings.
Students then read the text to check their answers from exercise 4. Do the first with the class as an example. Show them how to use the heading Naming hurricanes to quickly find the answer (Yes).
Students use the headings in a similar way to check the answers for questions 2–5. ▶️5

6 To introduce the idea of context, write this sentence on the board:
  – In the very cold winter months the river freezes over and it is possible to walk on the ice.
  Ask:
  – What part of speech is ‘freezes’? (a verb)

READING Answer key pp16–17

1
b Desert morning

c A winter's day

a Hurricane season

Possible answers

a heavy rain, strong winds, wet, warm, storm
b dry, blue sky, hot, sunny
c snow, cold, ice

Students’ own answers.

1 Yes
2 Hurricanes are found in the Atlantic Ocean, the Caribbean Sea and the Gulf of Mexico. They are called typhoons in the Pacific Ocean.
3 We measure them by categories, from 1–5.
4 The eye
5 In the Atlantic, in summer and autumn. In the north-west Pacific, all the year round.
Elicit that if we don’t know the meaning of the word freezes we can use the words around it (cold, winter, river, walk on) to guess the meaning (change from liquid to solid because of the cold).

Students now read the Study Skill and answer the questions (rotate is a verb, and it means ‘move in a circle’).

Students now read the instructions and complete the table with the part of speech and the correct meaning from the box. Check answers with the class.  

WRITING  Describing our lives  pp18–19

AIMS
This section teaches students to write paragraphs describing routines (for example, how they spend their summer) or habits (for example, study habits). It encourages them to use frequency adverbs correctly in their writing. This section also aims to clarify the use of the apostrophe for possession and in contractions.

LEAD IN
• Write two example sentences on the board to show the two different uses of apostrophes. For example:
  – Mary’s sick today.
  – Mary’s essay was excellent.
• Elicit the word apostrophe and elicit that in the first sentence it is used for a contraction, and in the second sentence it shows possession.
• Point out that contractions should be avoided in formal or academic writing.

PROCEDURE
1 Students read the Study Skill on apostrophes. Make sure students understand the difference between boy’s computer (one boy) and the boys’ computer (more than one boy). Students read the instructions and complete the exercise.  
   2 Students read the instructions and the sentences. Point out that not all the sentences require apostrophes. The first sentence could be done with the class as an example. Students then complete the task individually and check their answers in pairs.  
   3 Tell students to read the text on deserts quickly. Point out that the text uses contractions and elicit that this is a formal essay and so should not use contractions.
   Read the task with the class and point out that one has been done for them. Students complete the task individually. Check the answers with the class.
   Point out that there are two examples of possession in the text (Earth’s, world’s). Students should not change these.  
   4 Refer students to the picture and elicit that it is a holiday home. Ask students: – How do you usually spend your summer holidays?
   Encourage students to use usually, never, always, etc. with their answers, e.g.:
   – I usually go on holiday with my family.
   Explain that words like usually and sometimes are adverbs of frequency.
   Students then read the instructions and circle the adverbs of frequency in the text. Check answers with the class.  
   Ask about the position of sometimes and elicit that it occurs in two positions – before the verb and the beginning of the sentences.
   Students then read the RULES box and complete the rules and the ranking of the five adverbs. Check answers with the class.  
   5 Read the task with the class. Read through the ideas in the box with the class and elicit other ideas they may want to include in their paragraphs (e.g. read books, travel abroad, go shopping). Write these on the board.
   Students then write a paragraph about their summer. Remind them to use adverbs of frequency.  
   6 Refer students to the questionnaire and elicit that a questionnaire is one way of collecting information or data. It consists of a list of questions.
   Look at the study habits questionnaire with the class and elicit that your study habits are the ways in which you usually study. Ask students to put the words in the right order to make questions.  

WRITING  Answer key  pp18–19

1 contraction (Nori has got …)
2 possession (The car belonging to Nori.)
3 contraction (Nori is …)
4 possession (The telephone number belonging to Nori.)

1 Have you got the girl’s books? She’s looking for them.
2 My favourite seasons are spring and summer. The weather’s beautiful then.
3 The students’ exam results were very bad. They all have to retake them.
4 Don’t swim today. The waves are huge and they’re very dangerous!
5 In the winter months many students go skiing in the mountains. (No change)

6 A Where’s Mike’s computer?
   B I’ve got it here.

3 rainfalls = rainfall is
   there’s = there is
   don’t = do not
   They’re = They are
   can’t = can (not)
   doesn’t = does not.

we always go …
   The weather is usually warm …
   it sometimes rains …
   My brothers like swimming and they often go there.
   The water is always freezing …
   I never swim.
   Sometimes the whole family goes for a walk …
   I do not usually cook …

4a a after the main verb
   b before the main verb
   ranking: always, usually, often, sometimes, never

5 Students’ own answers, but the text in exercise 4 is a model.

6 1 Where do you like to study?
   2 When do you usually study?
   3 How do you prefer to study?
   4 Do you make notes when you study?
   5 How many hours do you study in a week?
   6 How often do you make a study plan?

Unit 3  People and the environment  15
Students read the text and circle the answers to complete the questionnaire for Suresh. Check answers with the class.  

Students go through the questionnaire again. This time they give answers in their notebooks about their own study habits. Make sure they give a reason for each answer.  

Put students into pairs. They now interview each other and ask about their study habits. They should use the questions from the questionnaire and make a note of the reasons their partners give. Encourage students to discuss how their study habits are different. 

Get a few of the pairs to tell the class about their results.  

Read through the Study Skill with the class and point out that everyone studies in their own way, but these are useful tips. Ask students if they can add to the list. Look at the example of a study plan with the students. Tell them they are going to design their own study plan. First, plan the grid with the class. Get students to write in their class/lecture hours. Then ask them to think about their study hours and add them to the grid. Get students to exchange their plans and talk about them with a partner.  

Writing about study habits  

Read the instructions with the class. Tell students to read the paragraph about Suresh again, and tell them they can use that as a model for their own writing. Students write a paragraph about their own study habits, using the notes they made. Remind them to use some adverbs of frequency, and to check their writing carefully when they have finished.  

EXTENSION ACTIVITY  

Ask students to write a similar paragraph about their partner. They should use the notes they made.  

RESEARCH Finding information (1)  

AIMS  
The aim of this section is to get students to think about the various sources of information they can use for their studies. It aims to show that there are many different sources and that the Internet is only one of them.  

LEAD IN  

• Write a question on the board that requires a factual answer, for example:  
  - What is the capital city of Papua New Guinea?  
• Elicit various ways in which students could find this information, including an atlas, encyclopaedia, books, and the Internet.  
• Write the expression source of information on the board and explain that encyclopaedias, books, and the Internet are all sources of information.  

PROCEDURE  

1 Students read the Study Skill. Point out that a source of information should be reliable and also up-to-date. Point out that students should always make a note of the sources they use. Students then read the instructions and complete the diagram. Students check their answers in pairs. Then draw the diagram on the board and invite answers from the class to complete the diagram.  

2 Students read the instructions. Read through the questions with the class and deal with any vocabulary difficulties. Students decide what sources they will use.  

3 Students complete this task outside of the classroom. Check their answers later in the class. Discuss the sources with the students. Carry out a quick survey in the class to find the answer to question 9.  

EXTENSION ACTIVITY  

In groups, students design their own quiz along the lines of the questions on page 20. Groups then exchange the quiz with another group. The group completes the quiz as before. Finally, results are checked in the class.
**VOCABULARY DEVELOPMENT**

**Drawing and diagrams**  p20

**AIMS**
The aim of this section is to introduce another technique for learning vocabulary – by using drawings and diagrams.

**LEAD IN**
- Refer students back to the **Study Skill** on recording vocabulary (page 8). Elicit that it suggests organizing words into groups.
- Write the word **wind** on the board and check the meaning.
- Ask students to draw a picture to help them remember the word. Get students to show their pictures.
- Now write the words **warm, cold, cool,** and **hot** on the board. Nearby draw a vertical arrow. Ask students to arrange the words in order.
- Explain that these are other ways of recording vocabulary.

1 Students read the **Study Skill** on the use of pictures and ranking to record vocabulary.

Students read the instructions, then look up the meanings of the words and make drawings.

Point out the two examples of grading in the box. Give students another example to reorder, e.g. **large, small, extra-large, medium.**

**REVIEW**  p21

**AIMS**
The aim of this section is to encourage students to review the content of the unit and also to practise and develop the skills they have learnt.

**PROCEDURE**
1 Ask students to look through the Reading section of the unit and to write down vocabulary to do with the weather. Revise parts of speech by writing three sentences on the board to illustrate noun, adjective, and verb. For example:
   - **There is a lot of rain in the winter.** (noun)
   - **It is very windy today.** (adjective)
   - **It is very cold. I think it will snow later.** (verb)

   Ask them to identify the parts of speech. They should then read the instructions and complete the table, using dictionaries as necessary. >>>1

2 Point out the visuals on page 21. Students read the task and draw their own visuals. Get them to compare with other students. Choose a few students to draw their examples on the board. >>>2

3 Refer students back to the **RULES** box on adverbs of frequency (page 18). Remind them of the position of the adverbs of frequency in relation to the verb.

   Students reorder the words to make sentences. Check the answers with the class. >>>3

4 Students rewrite the sentences with the adverbs of frequency. Point out that there are two possible answers for number 6. >>>4

5 Ask students to complete the five sentences with the five verbs. Remind them that some nouns collocate with certain verbs (**Study Skill** page 14). >>>5

---

**REVIEW Answer key**  p22

1 snow – snowy – to snow
wind – windy
ice – icy – to ice over
rain – rainy – to rain
cloud – cloudy – to cloud over
sun – sunny
warmth – warm – to warm (up)
heat – hot – to heat
fog – foggy

2 Students’ own answers.

3 1 Hurricanes usually form in the summer months.
   2 Tony never studies at the weekend.
   3 Deserts are sometimes cold at night. (Sometimes deserts are cold at night.)
   4 I don’t very often go to the cinema.
   5 The weather is always beautiful in India in September. (or, In September the weather …)

4 1 Maureen usually likes studying at night.
   2 Why is Yuki always late for work?
   3 It never rains in the summer where I live.
   4 I often read the newspaper.
   5 The winters are usually long and cold in my country.
   6 Kim sometimes stays at home at weekends. (Sometimes Kim stays at home at weekends.)

5 1 look up
   2 surf
   3 consult
   4 interview
   5 read
READING  Famous buildings  pp22–23

AIMS
The aim of this section is to help students to think about how they can make notes about a text by extracting the important information. It also introduces students to the language of describing buildings and other structures.

LEAD IN
• Ask: - When do you make notes?
  Elicit the answer – in lectures, when I’m reading, when I’m revising, etc.
• Ask: - How do you take notes? and elicit some ideas.
• Focus students’ attention on the page and tell students that they are going to read about two famous buildings.

PROCEDURE
1 Students read the instructions. Read through the words in the box with the class and explain any words that students don’t understand. Students answer the questions in pairs.

2 Students read the Study Skill on making notes. Remind them of the different ways of reading, and point out that we read slowly and carefully when we are making notes.

Students read the instructions. Go through the table quickly. Students then complete the table with the information from the two texts.

3 Students label the diagrams with the details from the text.

4 Remind students that it is often possible to guess the meaning of new words from their context (Study Skill page 17).

Read the instructions with the class and point out that students should first identify the part of speech of the underlined words and then try to guess the meaning. Go through the first question with the class as an example. Students then complete the questions individually. Check answers with the class.

5 Read the instructions with the class and remind students that a summary is a short version of a text, containing all the main points. Encourage students to use their notes (and not the text) to complete the summary.

6 Read the instructions with the class. Point out that students should use the notes from exercise 2 (and not the text) to write the summary. Tell students to use the summary in exercise 5 as a model. Do the first sentence on the board with the whole class if necessary. Students then complete their summaries individually.

READING  Answer key  pp22–23

2
Building: Taj Mahal
Built by: Shah Jehan
Located: Agra, north of India
Date: 1631–1654
Building type: a tomb
Made of: white marble, sandstone
Style: Islamic
Notes: Some say—most beautiful building in the world
Can see the whole city

3
Taj Mahal: tomb, minarets
Bank of China Tower: 367m, 70 floors

4
1 tomb: noun
— a place where the body of an important person is buried
2 symbolizes: verb
— represents something
3 designs: verb
— plans and makes a drawing of something (a building)
4 skyscraper: noun
— a very tall building
5 panoramic: adjective
— of a wide area

5
1 Shah Jehan
2 1631
3 1654
4 Agra
5 tomb
6 marble
7 sandstone
8 Islamic

6
Students’ own answers, but the summary in exercise 5 is a model.
RESEARCH  Finding information (2)  p23

AIMS
The aim of this section is to give students practice in finding factual information. It encourages them to focus their search and think about the facts that they want to find out. It also prepares students for a later writing task.

LEAD IN
• Discuss the buildings in the article (the Taj Mahal and the Bank of China Tower) with students. Ask:
  – What do you like, or dislike, about these buildings?
• Ask them about other buildings that they like – in their country or outside. Get them to give reasons.

PROCEDURE
1 Tell students to read the instructions and look at the list of buildings. They then read the Study Skill.
Tell students to choose a building and decide what information they want to find out. Students complete the first column of the table with things they want to find out. They can use the tables about the Taj Mahal and the Bank of China Tower as a guide, but encourage them to use their own ideas (e.g. how the building got its name, or what it is used for).
Students then look for information about their building (at home, in the library, or learning centre) and complete the table with notes. Ask them to make a note of their source(s).
Check the notes and the sources in class, and get students to talk about their buildings in pairs.  ▶️1

EXTENSION ACTIVITY
Get students to think about the two people who built the Taj Mahal and the Bank of China Tower, Shah Jehan and Ieoh Ming Pei. Ask students to choose one of them, or another architect they have heard of.
Ask them to write down five things they would like to find out about this person. Give them a couple of examples of what they could find out: where they were born, where they studied, etc.
Students then search various sources to find answers to their five questions. Check the answers with the class.

WRITING  Describing buildings  pp24–25

AIMS
The main aim of this section is to prepare students with the vocabulary and structures needed to write paragraphs about buildings. It also aims to develop the skills necessary for more cohesive writing by the use of linking devices, in particular so and because.

LEAD IN
• Write the words and and but on the board. Remind students of how they are used to join sentences together (Study Skill Linking ideas, page 7).
• Write some example sentences on the board and get students to rewrite them using and or but. For example:
  – Lee lives in Berlin. He works in a factory.  (and)
  – Lee likes going to the cinema. He hates watching TV.  (but)
• Write these pairs of sentences on the board:
  – Yuki works hard. She needs money.
  – Yuki works hard. She is very tired.
• Elicit that in the first pair, the second sentence shows a reason and in the second pair it shows a result.
• Teach because for reason and so for result:
  – Yuki works hard because she needs money.  (reason)
  – Yuki works hard, so she is very tired.  (result)
PROCEDURE

1 Students read the Study Skill on because. They then find a sentence with because in the text on the Bank of China Tower.  

2 Read the instructions with the class and explain that students should complete the sentences with their own ideas. Elicit possible answers from the class for the first question, e.g. ... it is a very beautiful building, ... it is very well known, ... they want to take photos. Students complete the exercise, then compare their answers in pairs. Check answers with the class.  

3 Students read the Study Skill on so. Point out that we usually put a comma before so when it joins sentences. Students read the instructions and find the sentences with so in the texts about the two buildings.  

4 Tell students to read the instructions and the sentences. Deal with any vocabulary difficulties. Students then match the sentences. Check that they have matched the pairs correctly, then tell them to join them using so. Check answers with the class.  

5 Students read the instructions and complete the sentences with their own ideas.  

6 Read the instructions with the class and point out that students must choose because or so to join the sentences. Students match the sentences and join them using because or so, then check their answers in pairs. Check answers with the class.  

7 Refer students to the picture and the text. Tell students to read the text quickly, ignoring the gaps. Students then read the instructions for exercise 7. Read through the words and phrases in the box and explain any that students don't understand. Students then complete the paragraph. Check the answers with the class.  

8 Students read the Study Skill. Read through the language in the box with the students and make sure they understand everything. Students find examples of these words and phrases in the text, and underline them.  

9 Students find a result clause and a reason clause in the text.  

Writing about a building p25  

10 Refer students back to the paragraphs about the Taj Mahal and the Bank of China Tower. Tell them to read these and the text about the Tower Houses of Yemen again. They should now look at their notes from page 23 about the building they chose. Ask them to write a description of their building. Remind them to use result and reason clauses.  

EXTENSION ACTIVITY  

Ask students to make a table like the one on page 23 (Finding information). Get them to write a list of six things they want to know about Yemen in the left hand column. They should then search for the information and complete the right hand column with notes. Students can then present their results orally to the class or write a few sentences to describe what they found out.

WRITING Answer key pp24-25  

1 The building is very light inside because it is made of glass and steel.  

2 Possible answers  

1 ... it is a very beautiful building. 2 ... they are afraid of heights. 3 ... they are very stressful. 4 ... there is not enough rain. 5 ... it is very unusual.  

3 It is situated in formal gardens just outside the city, so it is in a very quiet place. The platform is on the 42nd floor, so visitors can have a panoramic view of the whole city.  

4 1b Sometimes we just want to get information, so we read the text quickly to find it.  

2 A personal diary is only for ourselves, so we write in a very informal way.  

3 To George wants to work for a computer company one day, so he is learning everything about software.  

4 Taxi drivers face traffic jams every day, so they often suffer from stress in their work.  

5 In the summer the oceans are very warm, so this is when hurricanes usually form.  

5 Possible answers  

2 ... many people come to see it. 3 ... it is easy to get to the top. 4 ... not many plants grow there. 5 ... it is not used for most buildings. 6 ... you should visit it in the winter.  

6 1 If I want to visit the Louvre in Paris because it has some beautiful paintings.  

2b Paulo likes climbing mountains, so he is going to Switzerland for his holidays.  

3c Nora wants to work for a newspaper as a journalist because she loves writing and enjoys meeting people.  

4a Land is very expensive in Hong Kong, so most of the buildings are tall and narrow.  

5e India has a lot of rain in the summer months, so it is better to visit the country in the dry season.  

6d In Russia people like to go to their ‘dachas’ in the summer because they want to get away from the noisy cities and stay in a quiet place.  

7 1are located 2 so 3 were built 4 are made of 5 have 6 In the centre 7 because 8 there is 9 On the outside 10 There are  

8 there is usually a large sitting room  

There are also decorations ...  

They are made of stone and brick.  

They were built by local builders.  

The Tower Houses of Yemen are located in the old city ...  

In the centre of the house is ...  

There are also decorations around the windows and doors.  

On the outside walls ...  

On the top floor there is usually ...  

9  

result: ... so many visitors come to Yemen to see them.  

reason: ... because these floors are for food and animals.  

10 Students’ own answers, but the text in exercise 7 is a model.
VOCABULARY DEVELOPMENT
Dictionary work (2)  p26

AIMS
This section aims to develop students’ dictionary skills. It draws students’ attention to the fact that many words in English have more than one meaning and that these are listed in the dictionary. It also encourages the use of a dictionary to check whether nouns are countable (building) or uncountable (oil).

LEAD IN
- Remind students that dictionaries contain a lot of information, not just the meanings of words. Elicit ideas from the class and write them on the board (e.g. parts of speech, pronunciation, plural forms, examples of use).
- Write the word cold on the board. Ask students to give you example sentences and write them down. Try to elicit examples that show the two main meanings of cold – a cold temperature (a cold room, a cold day, etc.) and cold meaning ‘not friendly’ (a cold person, a cold look).
- Point out that many words in English have more than one meaning.

PROCEDURE
1 Students read the Study Skill. Check that students understand the different meanings of light.
Students then find the word light in the text on the Bank of China Tower and decide which meaning it is.  

2 Students now look at the dictionary entries and decide how many meanings there are for each adjective. Check answers, and check that students understand the different meanings.

3 Read the instructions and go through the first example with the class.
Students then complete the exercise individually.

4 Refer students to the dictionary entries for rest and view. Make sure they understand the different meanings.
Students find nouns in the texts and check their meanings.

5 Remind students that nouns can be countable or uncountable. Read the instructions with the class, then read through the Study Skill with the class and check that students understand the difference between countable and uncountable nouns.
Students then look at the words in the box. They check the words in the dictionary and find out if they are countable or uncountable. Check answers with the class.

6 Students find the words glass and marble in their dictionaries and answer the question.
**AIMS**
The aim of this section is to encourage students to review the content of the unit and also to practise and develop the skills they have learnt.

**PROCEDURE**
1. Tell students to look back at the texts in Unit 4 to find words for building materials. Students complete the diagram in pairs and add their own words. Draw the diagram on the board and get students to give their answers. ➤ 1
2. Refer students back to the text on Tower Houses to help them with vocabulary. Students work individually, then check their answers in pairs. ➤ 2
3. Refer students back to the Study Skill on page 25. Students complete the text, using the words and phrases in the box. ➤ 3
4. Refer students back to the Study Skills on page 24. Students join the sentences using either because or so. Remind them to use a comma before so. ➤ 4

**EXTENSION ACTIVITY**
Ask students to write a description of a house that they know (their own house, the house of a friend or relative). Get them to draw a plan of the house first.

**Possible answers**
- marble, steel, glass, stone, sandstone, brick + wood, clay, concrete...
- a roof b window c bedroom d second floor e bathroom f garage g kitchen h stairs i first floor j living room k door l ground floor m terrace n gate o garden p walls

1. is located
2. was built
3. is made of
4. has
5. On the left
6. on the right
7. There are
8. in the centre
9. around
10. there is

1. Glass is a cheap and light material, so it is used in many modern buildings.
2. Everyone wants to visit the Burj Al Arab because it is a very famous and unusual building.
3. It is important to take good notes because they help you to understand what you read.
4. Shah Jehan decided to build a beautiful tomb for his wife because he loved her so much.
5. Winters in Russia are very cold, so it is important to wear warm clothes.
6. The weather was perfect, so they decided to have lunch in the garden.
READING SKILLS  Predicting content (2) • Linking ideas (5)
WRITING SKILLS  Greetings and endings in formal letters • Words and phrases (2) • Writing a letter or email
VOCABULARY DEVELOPMENT  Plurals
RESEARCH  Making notes (2)

5 Education

READING  Universities  pp28–29

AIMS
This section focuses on prediction. It encourages students to think about the content of a text before they read it, i.e. the topic, the information they can find, and the vocabulary they expect to come across. It also introduces however as another way of linking sentences.

LEAD IN
• Ask students about the educational structure of their country, for example, what age children go to school, what types of schools there are, etc.
• Ask at what age students normally go to university in their country.

PROCEDURE
1 Focus students’ attention on the pictures and explain that they are all universities. Students read the instructions and answer the questions in pairs. 
   2 Students read the Study Skill and the instructions.
   Tell students to read questions 1 to 3 before they skim the title and the first paragraph of the text. Tell students not to read the full text yet. 
   3 Students read the whole text quickly to check their predictions.
   4 Students read the instructions. Remind them to use context to help them to understand the meaning of the words. Students complete the exercise individually, then check their answers in pairs. Check answers with the class.
   5 Remind students of the different kinds of reading. Ask them to read the article again slowly and carefully for meaning (intensive or study reading). They should then answer the comprehension questions. Check answers with the class.
   6 Students read the Study Skill on however. Elicit the difference between but and however (but joins two clauses, however joins two sentences). Point out the use of commas with but and however.
   Students then read the instructions and answer the questions.
   7 Students read the instructions. They then match the sentences and rewrite them using however. Remind them to use the correct punctuation.

EXTENSION ACTIVITY
Ask students to write four pairs of sentences using however. Let them work with a partner. Two of the examples could be about their present place of study and two about studying or working in another country. Point out that they should compare the good points (advantages) with the bad (disadvantages). Check the examples with the class.

READING  Answer key  pp28–29

1 a Moscow State University  b Harvard University  c Oxford University
2 and 3 Students’ own answers.

Possible answers
1 Very young students going to university
2 What is special about the young boy
3 family, intelligent, examinations, school, teachers

1 mature 2 genius 3 disagree 4 institution 5 fluent 6 attend

1 c 2 b 3 c

Possible answers
However, his teachers could see that he was very intelligent.
(contrast = he couldn’t speak English/he was very intelligent)
However, his schoolteachers think he will have no problems.
(contrast = he is very young/he will have no problems)
However, are young teenagers really mature enough for university?
(contrast = young children sometimes go to university/are they mature enough?)

1 c Some people think that 14 is too young for university.
However, others believe that clever students should not wait.
2 a Yinan Wang is only 14 years old. However, he will soon be a student at Oxford University.
3 b At first Yinan Wang could only speak a little English.
However, now he is fluent in the language.

Unit 5  Education  23
WRITING  Formal letters and emails  pp 30–31

AIMS
The aim of this section is to make students aware of formal style, especially in formal letters and emails. It prepares students for writing by giving them the conventions and some of the language they will need for simple, routine letters and emails.

LEAD IN
• Ask students to make a list of any emails and letters they have written recently. Ask:
  – Who did you write these emails and letters to?
  – Were they to friends or relatives, or to companies or organizations?
• Then ask:
  – How do you write to friends?
  – How do you write to people for official reasons?
  – Is there any difference?
• Elicit differences between formal and informal emails and letters, e.g. differences of vocabulary, greetings, etc.
• Introduce the terms formal and informal language and write these on the board.

PROCEDURE
1 Read the instructions with the class. Students answer the question in pairs. Check answers with the class and write the suggestions on the board.  
2 Students read the Study Skill. Point out that these are the conventions in British English. Point out the use of commas after both the greetings and endings. Students then read the instructions and complete the exercise.
3 Ask students to read the instructions and read the email quickly, ignoring the gaps. Point out that the sender and the date are given automatically, but they should normally write a suitable subject. Students then complete the exercise. Check answers with the class.
4 Students then read the Study Skills. Read through the expressions with the class and point out some of the structures which may cause difficulty (e.g. interested in + -ing, look forward to + -ing) and give examples where needed.

Writing a letter or email  p31
5 Read the instructions with the class. Ask students to look at the email to Mrs Fernandez again and the two Study Skills on page 30. Students then complete the writing task.

EXTENSION ACTIVITY
Ask students to bring in information (a brochure, advertisement, etc.) about a college, university, sports club, cultural society, etc. that interests them. Now ask them to think about what they would like to know about the place and to make notes. They should then write a letter or email to the institution requesting the information they need.

WRITING  Answer key  pp 30–31

1 Possible answers
applying to a university/college
writing to a shop
writing to a teacher/lecturer
writing to a bank or business
writing to a doctor/hospital

2 2 Dear Sir/Madam, … Yours faithfully, …
3 Dear Mrs Thomson, … Yours sincerely, …
4 Dear Mr Ericson, … Yours sincerely, …
5 Dear Sir/Madam, … Yours faithfully, …
6 Dear Dr Darwish, … Yours sincerely, …
7 Dear Mrs Yamamoto, … Yours sincerely, …

11 hearing
12 sincerely

4 Where is the college? In Sydney, Australia
Can you study part-time? Yes
Can you apply online? Yes
Which subject interests you most? Students’ own answers.

5 Students’ own answers, but the email on page 30 is a model.

24  Unit 5  ·  Education
**VOCABULARY DEVELOPMENT**  Spelling (2)  p31

**AIMS**
This section aims to focus the students’ attention on the spelling rules for forming plurals.

**LEAD IN**
- Write these nouns on the board: student, country, watch, mouse.
- Elicit the plurals of the nouns: students, countries, watches, mice.
- Try to elicit rules for plurals from the class.

**PROCEDURE**
1 Read through the RULES box with the class and make sure students understand everything. Students match the nouns with the rules.  
2 Read through the words in the box quickly to check that students understand the meanings of the words. Tell students to apply the rules to the words in the box, and use their dictionaries to check. Check answers with the class and point out that day just adds -s because it has a vowel + y, not consonant + y.  

**EXTENSION ACTIVITY**
Bring in copies of a suitable text, (or choose one of the texts from the book). Get students to look through the text and underline any plural forms. They should then try to classify the plurals according to the rules.

**RESEARCH  Notes**  p32

**AIMS**
The aim of this section is to remind students of the reasons for taking notes. The section also introduces a number of different methods that students can use to take notes while reading.

**LEAD IN**
- Get students in pairs to think about different ways of taking notes, e.g. a list of points, using diagrams and arrows, etc.
- Elicit ideas from the class, and discuss briefly the advantages (and disadvantages) of different methods.
- Point out that you can use a combination of methods.

**PROCEDURE**
1 Students try to think of four reasons, then check in the Study Skill on page 22.  
2 Read the Study Skill with the class and make sure that students understand everything. Students then match the ways of making notes to the students’ notes in exercise 2.  
3 Students read the text and discuss the question in pairs.  
4 Students read the text about Harvard University and underline or highlight the important information. Students check their answers in pairs before you check answers with the whole class.  
5 Ask students to choose an institution (school, college, university) that they want to discuss. They should bring information about the institution to the next class. Students make highlighted notes and then talk about the institutions in pairs.

**EXTENSION ACTIVITY**
Ask students to choose their own text — no more than half a page — on a topic related to their interests. They could choose from a textbook, an article, a web page, etc. They should then underline or highlight the important information and bring the text to the class. Again, ask students to compare their notes with other students and to explain why they have highlighted/underlined certain parts.
AIMS
The aim of this section is to encourage students to review the content of the unit and also to practise and develop the skills they have learnt.

PROCEDURE
1 Tell students to look back at the RULES box on page 31. Students should then apply the rules to the words in the box and complete the table.  
2 Students should look back at the Study Skill on page 29 to help them with this exercise. Remind students to use commas correctly.  
3 Refer students back to the Study Skills on page 30. Students then correct the underlined mistakes and add the missing words.  
4 Tell students to look through the unit to find vocabulary related to academic institutions and types of writing. Students complete the diagrams with a partner.  
5 Students should compare their lists and add further examples. Finally, check answers with the class by filling in the diagrams on the board.

REVIEW  Answer key  pp33

1
- es: professors, friends, buildings
- ies: universities, faculties, families
irregular: children, wives, women

2
2 f Canada is one of the biggest countries in the world. However, it has a very small population.

3 a Pilots get good salaries. However, they have to spend a lot of time away from home.

4 e Nancy is an excellent cook. However, she usually prefers to eat in the canteen.

5 b The sun is a good source of vitamin D. However, too much can cause skin cancer.

6 c Cars are an important part of modern life. However, they cause a lot of pollution.

READING SKILLS  Getting information from websites  •  Using visuals in a website
WRITING SKILLS  Writing definitions  •  Giving examples  •  Writing a description of a device
VOCABULARY DEVELOPMENT  Homophones
RESEARCH  Websites

READING  Inventions  pp34–35

AIMS
This section aims to develop the students’ skimming and scanning skills. It focuses on extracting information from websites, using texts, diagrams, and visuals.

LEAD IN
• Write the word web on the board.
• Ask students, in pairs, to use their dictionaries find out:
  a) what part of speech it is
  b) if it has more than one meaning
  c) definitions for each meaning
• Check the answers with the class. Elicit that web has two meanings:
  a) The Web = the World Wide Web—the system that makes it possible for you to see information from all over the world on your computer—an uncountable noun
  b) web = a spider’s web—a thin net that a spider makes to catch flies—a countable noun
• Elicit other words related to the Web (website, web page, webcam) and ask students to give definitions of these.

PROCEDURE
1  Ask students: What is an invention? Listen to students’ definitions but do not give an answer at this stage. Elicit examples of inventions. Students then work with a partner and match the inventions with the pictures. Check answers with the class.  >>1

2  Students work with a partner to choose the three most important inventions. Ask each pair to give their three most important inventions and explain why they chose them. Draw a table on the board with the inventions (a–j) in the first column. Draw three more columns and give them the headings 1st, 2nd, 3rd. Add the answers of each pair to the table (by ticking the appropriate square) and get the results for the class as a whole. Discuss the results briefly. Elicit other examples of important inventions that are not on the list.  >>2

3  Students read the definition of invention. Compare it to the definitions of invention they gave earlier. Students then write a definition of device. Check answers with the class. Write the best definitions on the board. Tell students to find a definition in a dictionary, and compare this to the class definitions.  >>3

4  Students read the Study Skill. Remind students of the meaning of the terms skimming and scanning. Students scan the website article to answer the question.  >>4

5  Tell students to read the instructions and the headings. Students should now skim the article to match the headings with the paragraphs. Students check their answers in pairs before you check answers with the whole class.  >>5

6  Students read the Study Skill. Point out that visuals are an important part of a text. They can help you to understand the text fully. Students then read the instructions and complete the exercise. Draw the diagram on the board and get students to label it. Ask one or two students to give a short explanation of how the system works, referring to the diagram on the board.  >>6

7  Students read the instructions. Remind students to use the context of the words to help understand the meaning. Students complete the exercise.  >>7

READING  Answer key  pp34–35

1  a  the aeroplane
   b  satellites
   c  radio
   d  the computer
   e  the car
   f  television
   g  the washing machine
   h  the Internet

   6 orbiting
   7 locate
WRITING  Describing things  pp36–37

AIMS
The main aim of this section is to enable students to write descriptions of devices, to explain how they work, and to say what their uses are. The section also teaches students to write simple definitions and example sentences.

LEAD IN
• Choose a device that you or one of the students have in your bag, e.g. a calculator, mobile phone, or watch. Elicit a description of the device from the class, i.e. information about its size, its weight, the cost, its uses, and how it works.
• Ask the class to try to write a definition, working in pairs.
• Listen to some of the definitions and write them on the board.

PROCEDURE
1 Students read the Study Skill on definitions. They then read the instructions and complete the exercise.  
2 Read the exercise with the class and do the first sentence as an example. Point out that which and that are interchangeable in these sentences.
3 Students complete the definitions, using their own words. Tell students to check their answers with the dictionary entries.

EXTENSION ACTIVITY
Let students choose three or four other devices that they are familiar with. They should then write definitions of them as in the examples. Get students to check their definitions in a dictionary.

4 Students read the Study Skill on giving examples. Point out the use of commas in the sentences with for example and such as. Also refer them to the use of e.g. as an abbreviation of for example.

Students now read the instructions and complete the exercise.

5 Students read the instructions and the sentences. Do the first sentence on the board, eliciting examples of makes of television from the class. Students then complete the exercise.

6 Read the instructions with the class and make sure that students understand the word laptop. Point out the picture of the woman with the laptop. Students read the instructions and complete the paragraph. Check the answers with the class.

Writing a description of a device  p37

7 Read the instructions with the class and read through the list of devices in the box. Explain any vocabulary that students don’t understand. Students then choose a device and make notes on it. Encourage them to use various sources to collect their information. Ask them to make a note of their source(s), i.e. the website, the book, the newspaper article, etc.

Check their notes and then ask a few students to give a brief talk about their devices using their notes.

8 Read through the paragraph about laptop computers again with the class. Point out the definition (Laptops are a type of ...) and the way examples are given. Elicit the fact that it contains a description of the size and weight of a laptop and an explanation of how it works. It also explains why they are popular and where they can be used. Students then read the instructions and write their own paragraph about the device they chose in exercise 7, using their notes.

9 Students read the instructions and correct the mistakes in the paragraph. Check the answers with the class. Make sure students understand why the underlined words are wrong. Explain the grammar/spelling rules as necessary.

10 Students read the instructions, then go back and check their own work.

WRITING  Answer key  pp36–37

1 A thermometer is an instrument which measures temperature.
2 A satellite is an object that circles another object.
3 A vacuum cleaner is a machine which cleans carpets.
4 A laptop is a type of computer that is portable and weighs about 1.3kg.

1 c A photocopier is a machine which makes copies of documents, such as letters.
2 b A remote control is a device which controls things, such as televisions, from a distance.
3 d A drill is a tool which you use for making holes.
4 e A speedometer is an instrument which tells you how fast you are travelling in a car or plane.
5 a An iPod is a type of MP3 player which is made by Apple.

Possible answers
1 A calculator is an instrument that you use for calculating numbers.
2 A fax machine is a machine that sends copies of letters, etc.
3 A microwave is a type of oven that cooks or heats food very quickly.
4 A laser is a machine that makes a very strong line of light.

Paragraph 1 Some of these devices, for example the Garmin GPSMAP 60, ... For example, in a city they can tell you ...

Paragraph 4 There are also new uses for the GPS, such as tracking criminals.

Possible answers
1 ... Sony, Panasonic, Toshiba, etc.
2 ... can it use to locate our position.
3 ... mobile phones or satellite television
4 ... such as a Ferrari, a Lotus

1 type
2 which
3 example
4 so
5 but
6 because
7 such as

Students’ own answers.

Students’ own answers, but the text in exercise 6 is a model.

A satellite is any object which orbits another object. All bodies that are part of the solar system, for example the Earth and Jupiter, are satellites. Most of these bodies orbit the sun, but others orbit planets. For example, the moon orbits the Earth. When we use the term 'satellite', we usually mean an artificial satellite. This is a man-made object that orbits the Earth, or another body. However, scientists may also use the term for natural satellites, or moons.
VOCABULARY DEVELOPMENT  Spelling (3)  p37

AIMS
This section aims to make students aware of homophones, by looking at pairs of homophones which regularly cause confusion.

LEAD IN
- Write the words right and write on the board.
- Elicit that they have the same sound, but the spelling and meaning are different.
- Explain that these words are homophones, i.e. they sound the same, but have different spellings and different meanings.
- Ask them for other examples of homophones. Give one or two examples, if students cannot think of any: e.g. wait/weight, sea/see.

PROCEDURE
1 Students read the Study Skill. Read through the examples at the bottom of the box and check that students understand the difference between the homophones. Students then complete the gap-fill exercise. ▶️1

RESEARCH  Websites  p38

AIMS
This section aims to encourage students to be more critical of websites. It helps them to recognise the different types of websites and to check their authorship, accuracy, and reliability.

LEAD IN
- Ask students:
  - What is a website?
  - Who creates websites?
  - Why do people have websites?
- Elicit discussion and bring out the point that there are many different types of website written by various people. For example, some belong to organizations, some are the work of individuals, and some are used to advertise products.
- Make the point that not all websites are useful or reliable.

PROCEDURE
1 Students read the Study Skill on reliable sources. Go through the points in the box with the students and discuss any difficulties.
Tell students to read the instructions and the questions below. Give students time to look over the three examples of websites and answer the questions. Get them to check their answers with a partner. ▶️1

BACKGROUND INFORMATION – WIKIPEDIA
Wikipedia describes itself as:
an international non-profit organization dedicated to encouraging the growth, development, and distribution of free, multilingual content, and to providing the full content of these wiki-based projects to the public free of charge. The Wikimedia Foundation operates some of the largest collaboratively-edited reference projects in the world, including Wikipedia, one of the 20 most visited websites.
Since its creation in 2001, Wikipedia has rapidly grown into the largest reference website on the Internet. The content of Wikipedia is free, written collaboratively by people from all around the world. This website is a wiki, which means that anyone with access to an Internet-connected computer can edit, correct, or improve information throughout the encyclopedia, simply by clicking the edit this page link (with a few minor exceptions, such as protected articles and the main page).
Point out that Wikipedia is a very convenient tool for finding information.
However, because anyone can edit information in the encyclopedia, it is best to check any information in Wikipedia with other sources.

2 Students read the instructions and the list of topics in the box. Students choose their topic from the list and try to find three different websites related to the topic. Explain that they should try to find websites which are quite different from one another. Give them time to do the research and report back to the class. Students could do the research in pairs or small groups, with one student reporting back to the class on behalf of the pair or group. ▶️2
REVIEW  p39

AIMS
The aim of this section is to encourage students to review the content of the unit and also to practise and develop the skills they have learnt.

PROCEDURE
1 Refer students back to the Study Skill on writing definitions on page 36. They then read the instructions and complete the reordering exercise. The first could be done with the class as an example. ▶️1

2 Students read the instructions and the list of words in the box. Tell students to use their dictionaries to check the meaning of words they do not know. Encourage students to add some extra words to each list. Draw the table on the board and use it to check the answers with the whole class. ▶️2

3 Refer students back to the exercises in Unit 6 to help them with vocabulary. Students complete the text using words and phrases from the box. ▶️1

REVIEW  Answer key  p39

1 Gold is a metal which is used to make jewellery.
2 A washing machine is a machine that washes clothes.
3 An elephant is a very large animal which lives in Africa.
4 A hurricane is a tropical storm that causes a lot of damage.
5 A robot is a kind of machine that works like a person.

transport: the metro, an aeroplane, a train + a car, a bike...
work/study: a fax machine, a photocopier, a printer + a computer, a desk...
home: a washing machine, a dishwasher, a microwave + a television, a vacuum cleaner...

1 portable
2 lost
3 accurate
4 calculate
5 launch
6 exactly
7 network
8 distance
9 device
10 locate
READING Food from other countries  pp40–41

AIMS
This unit focuses on topic sentences and the role they play in the organization of a paragraph. Its helps students to identify topic sentences and to use them to get the meaning from texts quickly. It also aims to make students think about the writer and the need to identify his or her personal views while reading a text.

LEAD IN
• Ask students to describe the national dish of their country and say what it is made of. Teach the word ingredients.
• Ask:
  – Where do the ingredients come from?  – Are they all from the local area?
  – Are they from other countries?
• Make the point that some ingredients come from other countries.

PROCEDURE
1 Read the instructions with the class and make sure that students understand the word local. Read through the items of food to check understanding. Students work in small groups and complete the table.  
2 Remind students of the need to predict what will be in a text – the topic, the information they will find, and some likely vocabulary. Students read the title of the text and look at the map, then try to answer the questions. Check the students’ suggestions, but do not give answers at this stage.
3 Remind students of what scanning means. Students scan the text and underline the definition.
4 Students read the Study Skill on topic sentences. Refer students to the text and point out that the topic sentences are missing. Read through the instructions and the topic sentences with the class. Check that students understand everything. Remind students that they should only skim the article, not read it carefully. Students match the topic sentences to the paragraphs individually, then check their answers in pairs.
5 Read the instructions and the example with the class and remind students what context means. Students complete the exercise. Check answers with the class.
6 Read the instructions and the three sentences with the class. Students read the Study Skill. Point out that it is important to distinguish between fact and opinion in a text. Point out that sometimes a writer’s opinion is clearly marked (I think, I believe, It seems to me, etc.). However, other times what is opinion and what is fact is not so clear. Students decide which sentence shows the writer’s opinion.

EXTENSION ACTIVITY
Ask students to look back at some of the texts in earlier units, for example Too young for Oxford? in Unit 5 or Lost! Never again! in Unit 6. Tell students to read the texts again and see if they can find sentences showing the writer’s opinion. Discuss their answers as a class.
7 Remind students that a summary is a short version of a text which contains the main ideas. Read through the words in the box with the class and explain any words students don’t understand. Students then complete the summary. Check answers with the class.

READING Answer key  pp40–41

1 Students’ own answers.

Possible answers
1 how many miles food travels
2 information about where food comes from
3 farmer, market, fresh, aeroplanes, distance

A food mile is the distance that food travels from the farmer’s field to the person who buys the food.

4 a 4 b 2 c 1 d not needed e 3

Possible answers
1 consumer: the person who buys the food
2 disadvantages: some bad things about the system
3 available: we can get them
4 imported: coming from other countries

Sentence 2 shows the writer’s opinion.

1 distance
2 consumer
3 local
4 disadvantage
5 season
6 Nowadays
7 imported
8 because
9 petrol
10 pollution
EXTENSION ACTIVITY

Get students to read paragraph 3 again and to look at the map. Tell them to work in pairs and prepare a description of what the map shows. Get some students to describe the trade routes on the map to the class.

Now ask the class to prepare a similar map to show imports to their own country. Choose some of the food items from the list, or other well-known food items. Give students the task of finding out the countries of origin of these products. Place a world map on the classroom wall. When students have finished their research, they add arrows and notes to the map.

WRITING  Describing food and drink  pp42–43

Aims
The main aim of this section is to help students to write paragraphs describing food and drink, and to use topic sentences in their own writing. This section also shows students other ways in which ideas can be linked in writing – by the use of pronouns and the linking phrase in addition.

Lead In
• Remind students of some of the uses of commas shown so far in the book, e.g. before so and but and after However.
• Write some examples on the board:
  – She lives in Hong Kong, but she was born in Beijing.
  – The GPS is portable, so you can put it in your pocket.
  – Mike studies French. However, he only understands a little.
• Now write on the board a sentence containing a list of items, but with punctuation missing, for example:
  – I am studying English information technology business studies and mathematics
• Ask students to write out the sentence with punctuation.
• See what answers they have given, without giving the correct answer, before moving on to the first exercise.

Background Information – Commas

We use commas as an aid to understanding. In longer sentences they may indicate where a reader can take a breath. The following are a few of the more important uses of commas:

a) Before certain conjunctions – but, so, or … (but not usually in front of and).
   For example,
   – I am from Argentina, but I am living in London at the moment.

b) After sequencing words – first, after that, finally …
   – Finally, she checks the essay for any spelling or grammar mistakes.

c) After other linking words
   – However, the experiment was not successful.

d) In formal letters and emails
   – Dear Dr Patel, … yours sincerely,

e) Separating items in a list: My brother likes swimming, fishing, and reading.
   (The use of a comma before and is possible – it is a stylistic variation.)
   Point out to students that a full stop, and not a comma, is used to end a sentence.

Procedure

1 Students read the Study Skill and punctuate the sentences. Check answers with the class. Explain that a comma before and is optional. ➤1

Point out that a colon can be used to introduce a list, for example in sentence 3.

Extension Activity

Ask students to write four true sentences that include lists. Give them the beginning of the sentences.

– My favourite … are …
– My (sister/brother/friend …) speaks … languages:
– The ingredients of … are …
– … is studying (physics, …)
2 Read the **Study Skill** with the class. Make sure students understand the difference between *in addition* and *and.*

Students find two examples of *in addition* in the article on page 41.  

Students now match the sentences and rewrite them using *in addition.* Remind them to use commas correctly.  

3 Read the instructions with the class and remind students what a topic sentence is. Check answers and ask the students to write out the sentences to form a paragraph.  

4 Students read the **Study Skill.** Check that they understand everything. Elicit some other examples of pronouns from the class, e.g. personal pronouns and possessive pronouns. Students now read the instructions and replace the nouns in the sentences with the pronouns in the box.  

5 Read the instructions with the class. Elicit that mint tea is an example of a drink identified with a culture. Students complete the paragraph with the missing pronouns.  

**Writing about food and drink**  

Tell students to read the instructions. Point out that they are writing for a foreign visitor, who probably knows very little about their culture. Get them to think about the ingredients, how it is made, when it is eaten or drunk, etc. They should discuss their ideas with a partner and make notes.  

Students then write a paragraph. Check the paragraphs. They could be displayed as part of a project on local culture.  

---

**Paragraph 2:** In addition, they could only get food ....  

**Paragraph 4:** In addition, food that travels a long way ....  

1. **Aeroplanes cause a lot of air pollution. In addition, they make a lot of noise when they land and take off.**  
2. **Food that travels a long distance is not very fresh. In addition, it is very expensive because of the costs of transport.**  
3. **Shopping in local markets is more interesting. In addition, the food is usually cheaper than in supermarkets.**  
4. **The climate is very hot in Saudi Arabia. In addition, there is very little rainfall.**  

**a 2 b 5 c 3 d 6 e 1 (topic sentence) f 4**  

**Topic sentence:** The most important drink in Morocco is mint tea.  

1. **It**  
2. **They**  
3. **it**  
4. **them**  
5. **Them**  
6. **it**  

**Students’ own answers, but the paragraph in exercise 5 is a model.**
VOCABULARY DEVELOPMENT
Prefixes and their meanings  p44

AIMS
The aim of this section is to focus students’ attention on the use of prefixes, in particular, negative prefixes.

LEAD IN
• Write the word happy on the board. Ask the class for the meaning of the word.
• Now write unhappy and again ask for the meaning.
• Point out that un- is a prefix – a negative prefix.
• Try to elicit other examples of negative prefixes.

PROCEDURE
1 Students read the Study Skill and complete the definition of a prefix using their dictionaries.  
2 Read through the sentences briefly and draw students’ attention to the different prefixes. Students then match the underlined words with the meanings. Students check their answers in pairs.  
3 Students should look at the negative prefixes in the box. Then ask them to complete the sentences with the appropriate prefix. Check answers with the class.  
4 Students match the underlined words with their meanings.  

REVIEW p45

AIMS
The aim of this section is to encourage students to review the content of the unit and also to practise and develop the skills they have learnt.

PROCEDURE
1 Write the word teacher on the board and underline the vowels ea. Point out to students that words with two vowels are common in English. They can cause spelling problems.
Students read the instructions and complete the exercise. Check answers with the class.  
2 Refer students to the title of the article and the pictures. Ask students what they know about coffee (e.g. where it grows, how we make a cup of coffee).
Refer students back to the Study Skill on topic sentences (page 40). Students then read the instructions and match the topic sentences with the paragraphs. There is one extra sentence. Check the answers with the class.  
3 Refer students back to the Study Skill on page 44.
Put students in pairs to complete this exercise. Point out that they can use words from the unit or other words they know.
To check the answers, draw the diagrams on the board and add the students’ answers.  
4 Students use their dictionaries to add other words to the lists. Check the answers with the class.  

Possible answer
A prefix is a group of letters that you add to the beginning of a word to change its meaning.  

1 d 2 f 3 c 4 e 5 a 6 b  

1 unhappy  
2 disliked  
3 irregular  
4 impossible  
5 incomplete  
6 immoral  
7 inaccurate  
8 disorganized, untidy  

1 e 2 d 3 c 4 a 5 b  

1 ingredients  
2 onions  
3 measure  
4 season  
5 around  
6 contains  
7 countries  
8 bread  
9 field  
10 building  
11 reason  
12 materials  

a 3 b not needed c 2 d 1  

Possible answers
impossible, impatient, impolite, immoral, immobile, immature  
im: incorrect, inaccurate, incomplete, informal, independent, inexperienced  
dis: distrust, disagree, disagreement, disorganised, disadvantage, dishonest  
um: unhelpful, unhappy, untidy, unusual, unfriendly, unsuccessful  

Students’ own answers.
8 Cities of the world

READING SKILLS  Looking at data  •  Getting facts from a text
WRITING SKILLS  Comparatives and superlatives  •  Linking ideas (7)  •  Writing about cities
RESEARCH  Finding facts and figures
VOCABULARY DEVELOPMENT  Word-attack skills

READING  City life  pp46–47

AIMS
This section focuses on data in a text. It looks at various ways data can be shown visually, for example in tables, charts, and graphs. It shows students how to interpret the data in visuals, and how visuals can improve their understanding of a text.

LEAD IN
• Write the word data on the board and ask students what it means. Elicit the words facts, information, numbers, statistics.
• Write on the board: The data is/are very interesting. Point out that the word data can be considered as a plural noun or an uncountable noun.
• Then ask students:
  – How can we show data visually?
• Try to elicit the terms table, graph, flow chart, etc.

PROCEDURE
1  Put students into pairs or small groups and ask them to look at the words in the list. Check that they understand the meanings. Read the instructions with the class and give students time to work out the order. Collect the results for the class and put them into a table on the board. Briefly discuss the issues with the class.  ➤1

2  Students now stay in their pairs or groups and discuss which city they would most like to live in. Ask them to take into account the factors in the previous exercise. Get the class together to see what cities they decided on. Find out what reasons they give for their choice.  ➤2

3  Tell students to read the Study Skill. Get them to identify each type of visual. Draw their attention briefly to the tables in the texts on pages 46 and 47. Students should now read the instructions and the four questions. Students scan the article and find the information. Check answers with the class.  ➤3

4  Students should look through the text again to find the names of the missing cities and complete the table.  ➤4

5  Read the instructions and then go through the questions briefly with the students. Tell them to read the text slowly and carefully to find the answers to the questions. Check answers and discuss the answer to question 4 as a class.  ➤5

6  Students read the Study Skill. Read the instructions with the class and point out that students should look at the visuals as well as the text to find the answers. Check answers with the class.  ➤6

READING  Answer key  pp46–47

➤1
Students' own answers.

➤2
Students' own answers.

➤3
1 The Economist Intelligence Unit
2 127 cities
3 Vancouver, Port Moresby
4 Osaka and Tokyo

➤4
1 Vancouver
2 Melbourne
3 Vienna
4 Geneva
5 Perth
6 Adelaide
7 Sydney
8 Zurich
9 Toronto
10 Calgary

➤5
Possible answers
1 They came in the middle of the list.
   Reasons: Transport and crime are problems with these cities.
2 They did badly.
   Reasons: climate or the political situation.
3 They have good transport, low crime rates, and a good climate.
4 Students' own answers.

➤6
1 Pacific Ocean
2 22° C
3 Yes, on the mountains
4 November
5 540,000 (Vancouver City), 2 million in the region
6 Chinese
7 After a British naval captain, George Vancouver
8 The Lookout, Harbour Centre Tower
WRITING  Comparing data  pp48–49

AIMS
This section aims to help students analyse data. It focuses on the comparison of data and reviews the comparative and superlative form of adjectives. It also shows how writing can be improved by using the relative pronouns which and where to form non-defining relative clauses. It prepares students to write about cities.

LEAD IN
• Bring a world map (or a globe) into the class.
• Write the names of the cities Toronto and Moscow on the board. Ask students to locate the cities on the map.
• Point out that the two cities have similar latitudes and both are located inland.
• Ask students what they think the climate is like in these two cities.

PROCEDURE
1 Ask students in pairs to study the data in the charts. Check that they can differentiate between the data for Moscow and that for Toronto. Make sure they can read the scales on the vertical axes (rainfall in mm and temperature in °C). Students should now read the sentences and decide if they are true or false. Ask them to correct the false sentences. Go over the first two sentences with the students as examples. Then give them time to complete the exercise and check the answers.  

2 Students read the instructions and underline the comparative and superlative forms. Do the first sentence as an example.  

3 Read the RULES box with the class and make sure students understand everything. Read the instructions with the class and tell students to copy the table to their notebooks. They then complete the table with the correct forms of the adjectives.
Draw a table on the board and use it to check the answers and the spelling with the class.  

EXTENSION ACTIVITY
Ask the students to research data about a city they know, for example the city they live in or the nearest city. They should find out:
– the hottest month
– the coldest month
– the wettest month
– the driest month
Ask them to write six sentences about their data using comparative and superlative forms.

4 Read the instructions with the class and go through the tables to make sure that students understand everything. Students then complete the paragraph using the statistics in the table and the adjectives in the box.  

5 Read the Study Skill with the class and make sure that students understand everything.
Students now read the instructions and complete the exercise.  

Writing about cities  pp49
6 Refer students to the notes and ask what they know about Mumbai.
Students now read the notes and use them to complete the paragraph. Check answers with the class.  

7 Read the instructions with the class and do the first question as an example if necessary. Students rewrite the paragraph.  

Mumbai, which is also known as Bombay, lies on the west coast of India. The best time to visit is during the months of December, January, and February, which are usually cool and dry. The spring is very hot and the summers are wet because this is the monsoon season. The city has a population of 18 million people, which makes it the largest city in India. It is famous for its very successful film industry, which is called Bollywood, and its port. It is also an important commercial centre. The city was founded in 1668 by the British East India Company. There are many sights to see in Mumbai, including the Mani Bhavan Museum and the famous Chowpatty beach, where the people of Mumbai like to walk in the evenings.
RESEARCH    Researching a city  p50

A I M S
This section helps students use the Internet to get specific information. It encourages them to make notes of sources and provides them with some useful websites to help with their searches for information.

L E A D  I N
• Write the name Rio de Janeiro on the board. Ask:
  – How can you get facts and figures about Rio de Janiero, such as population, climate, economy, etc?
• Discuss students’ ideas.

P R O C E D U R E
1 Students read the Study Skill. They should then read the instructions and think about a city they would like to research. Ask students to choose different cities. Refer students to the table and check that they understand all the vocabulary in it.
Give students time outside the class to search for information on their chosen cities. Remind them to find information that is accurate and up-to-date.
Choose a few students to report to the class on the information they have found.
Check that they have made a note of the website, books, etc. that they have used.
2 Ask students to read again about Mumbai. They should now use their notes from exercise 1 to write a paragraph about the city they chose.
The corrected paragraphs could be used, together with photos of the cities and a world map, as a class display.  ► 2

V O C A B U L A R Y  D E V E L O P M E N T    New words  p50

A I M S
This section aims to teach students how to deal with new words by analysing the structure, i.e. using word-attack skills. It points out how they can often understand an unfamiliar word by breaking it down into its component parts.

L E A D  I N
• Ask students to brainstorm ways of understanding new words that they meet, e.g. using a dictionary, guessing the meaning from context, finding an explanation in the text.
• Explain to students that they are now going to learn a new skill.

P R O C E D U R E
1 Read through the Study Skill with the class and make sure that students understand everything. Elicit from the class that renamed means ‘given a new or different name’.
Read the instructions with the task and make sure students understand what they have to do. Students complete the exercise.  ► 1

E X T E N S I O N  A C T I V I T Y
Select a text of a suitable level and content. Ask students to look through the text and underline three unfamiliar words (or select words for them). They should then try to use word-attack skills on the words.

RESEARCH    Answer key  p50

► 2
Students’ own answers, but the paragraph on Mumbai is a model.

V O C A B U L A R Y  D E V E L O P M E N T    Answer key  p50

► 1
1 un-count-able = adjective, for nouns that we cannot count
2 re-take = verb, to take again
3 dis-organize-d = adjective, not organized
4 re-built = verb, built again
5 un-recognize-able = adjective, for things that we can’t recognize
Aims
The aim of this section is to encourage students to review the content of the unit and also to practise and develop the skills they have learnt.

Procedure
1. Students read the instructions. Refer students back to the Study Skill on page 46 to help them. Students complete the exercise. Draw the diagram on the board and check the answers with the class.
2. Refer students back to the Study Skill on page 49. Students then read the instructions and complete the exercise. Do the first sentence with the class as an example if necessary.
3. Students read the instructions and complete the exercise, using their own ideas.
4. Refer students back to the RULES box on comparative and superlative forms (page 48).
   Students read the instructions and the example sentence, and look at the table.
   They then write five sentences about the data in the table. Check answers and write down the students' example sentences on the board.
5. Divide the class into small groups (teams) and use the quiz in class as a general knowledge quiz. Give each team time to complete the quiz and then check the answers. Alternatively, if sources are available, for example in a learning centre or computer lab, get the students to find out the answers from suitable books, encyclopaedias, or websites.

Possible answers
Visuals: table, pie chart, bar chart, graph, flow chart, diagram, picture, drawing

1. e. New York, which is located on Manhattan Island, is the best-known city in North America.
2. d. Port Moresby, which is the capital of Papau New Guinea, has a very high crime rate.
3. c. In Vancouver you can go skiing in the mountains which surround the city and are covered in snow in the winter.
4. b. Robson Street, which is the main shopping street for fashion, is well worth a visit.
5. a. London is famous for its beautiful parks, which are located near the centre of the city.

Possible answers
1. ... where they like to go for walks.
2. ... where people meet to have tea and coffee.
3. ... where the national football team plays.
4. ... where people like to go for dinner.
5. ... where you can go on boat trips.

Possible answers
1. Russia has a higher birth rate than Germany.
2. Turkey has the highest birth rate.
3. Germany has a smaller population than Russia.
4. Germany has a bigger population than Turkey.
5. Turkey has the smallest population.

Note: Different sources give different population statistics depending on whether they are taking the official city boundary, or the built up area.
9 Brain power

READING skills  In other words • Making notes (3)
WRITING skills  Common mistakes • Summaries • Writing a summary
RESEARCH  Books

READING  A healthy brain  pp52–53

AIMS
The aim of this unit is to give students further practice in getting information from a text by taking notes. Students are helped to complete linear notes (using a list of points).

Students are also made aware of how writers use synonyms or rephrasing to avoid repeating words. This improves the style of the writing. Students are taught to look out for rephrasing when they read as it can help them to understand any new words and expressions.

LEAD IN
• Ask students to clench both fists and to hold them together so that the fingers are facing each other. Demonstrate to the class.
• Now ask them to turn to their neighbour and to hold their fists at head height. Point out that their fists represent the approximate size of the human brain.
• Now ask:
  - What do you know about the brain?  — What is made of? What protects it?
• Write the students’ ideas on the board, but do not give any answers at this point.

PROCEDURE
1 Tell students to read the instructions and look through the questions in the quiz. Deal with any difficulty with the questions. Then give students time to try to answer the questions individually. When most students have answers to the questions, stop the exercise. Do not go over the answers at this point.
2 Students read the Brain facts to check their answers.  >>> 2
3 Read the instructions with the class and make sure students are clear what a topic sentence is.
   Students should now skim the article and match the topic sentences to the paragraphs.  >>> 1
4 Students read the Study Skill. Point out to students that they can look for rephrasing in texts to help them understand new words. Students find the rephrasing of healthy (in good shape) and delicate (easily damaged).
   Students now complete the exercise.  >>> 4
5 Ask students what they have already learned about making notes. Refer them back to the Study Skills on pages 22 and 32.
   Students now read the Study Skill on page 52.
   Read the instructions and look at the notes with the class. Deal with any difficulties, and tell students to copy the note diagram into their notebooks.
   Students read the article again and complete the notes individually.
   Check answers and write a possible version of the notes on the board with the class.  >>> 5
6 Read the instructions with the class and make sure students understand they should use their notes (not the article) to answer the questions.
   Check answers with the class.  >>> 6a

EXTENSION ACTIVITY
Ask students to look back at the text How do you read? in Unit 1 (page 5). Write the title on the board. Ask them to read the second and third paragraphs of the text and to make linear notes. Check the students’ notes. Write the following on the board as a possible answer.  >>> 6b

READING  Answer key  pp52–53

>>> 2
1 a  2 b  3 d  4 d
>>> 3
a 4 b 5 c 3 d 1 e 2
>>> 4
a do workouts  b mix with other people  c good  d stay away from  e good for you  f helps the brain work better

>>> 5
Possible answer
Socially active  — join social clubs and groups
   — travel to other countries to meet new people
   — learn new skills (e.g. skiing)
Brain-healthy diet  — avoid fatty foods/
   — food with high cholesterol
   — eat vegetables, fruit, fish, nuts
   — some foods (e.g. liver, eggs)
   — improve brainpower
Physical activity  — good flow of blood to the brain
   — encourages new cells
   — but take care not to damage brain

>>> 6a
Possible answers
1 We can do quizzes or puzzles.
2 We can join social clubs or travel to other countries.
3 It keeps a good flow of blood to the brain and encourages new cells.
4 Fatty food and food with high cholesterol is bad for the brain.
5 Vegetables, fruit, and fish are good for the brain.

>>> 6b
Possible answer
1 Reading quickly
   a) skimming — to get the general meaning,
      e.g. from a newspaper
   b) scanning — for a piece of information,
      e.g. telephone number
2 Reading carefully
   a) intensive or study reading, e.g. textbook
   b) learning by heart, e.g. poem

Unit 9  •  Brain power  39
WRITING  Notes and summaries  pp54–55

AIMS

This section aims to raise students' awareness of the common types of error made by learners of English, and to encourage them to think about the types of error that they are making in their own writing. It also helps students write short summaries of texts, using notes that they have made.

LEAD IN

• Write a sentence on the board with a number of different types of mistake in it. For example,
  - My brother are a doctor and he working at a hospital in the France.
• Ask students to find the mistakes and make a note of them.
• Get them to identify the different types of mistake, e.g. spelling mistake, verb form, incorrect preposition.
• Elicit other types of mistake, e.g. capitalization and punctuation. Ask students what types of mistake they often make.

PROCEDURE

1 Students read the Study Skill. They then match the mistakes to the sentences. Students check their answers in pairs before you check with the class. 

2 Refer students to the picture of Albert Einstein and ask students what they know about him.

Students then read the instructions and correct the mistakes in the paragraph.

3 Read the instructions with the class, then put students into pairs or small groups to discuss the questions. Bring the whole class together to discuss the answers. Note down any common points on the board.

4 Tell students they are going to read a text about sleep. Ask them a few questions about the topic, e.g. Why is sleep important? How many hours sleep do you usually have? What do you do if you can't sleep?

Direct the students attention to the text and the notes. Read through the notes briefly with the class.

Students then read the text carefully and complete the notes. Check their notes. Together with the class write a possible answer on the board.

5 Tell students to read the Study Skill. Point out that we usually write a summary from notes, not from the original text.

Students then complete the summary in their own words, using their notes. Check the students' summaries and give them a possible answer.

WRITING  Answer key  pp54–55

1 c My brother is studying ...
2 e Bill Gates began programming ...
3 b Attila is a student at ...
4 d How can we measure ...
5 f We know that exercise is good ...
6 a I have a lecture on Tuesday ...

P R O C E D U R E

1 Importance of sleep
• during sleep: brain repairs itself
• no sleep: tired, cannot remember; may become ill

2 What stops sleep?
• not relaxed
• thinking about work/studies
• late at night: phone calls/emails
• drinks with caffeine/dinner

3 What can we do to sleep well?
• a comfortable bed
• a dark, quiet room
• every night – same routine (book, bath, music, etc)

P R O C E D U R E

During sleep the brain repairs itself and stores information. If we do not sleep, then the brain becomes tired. We cannot remember things and we may become ill. People sleep badly when they are not relaxed. They are thinking about their work or studies. Late at night they make phone calls, and look at emails. They also have drinks with caffeine or eat dinner. To sleep well, we need a comfortable bed and a dark quiet room.

We also need to have the same routine every night, for example read a book, have a bath, listen to music, etc.

P R O C E D U R E

Writing a summary  pp55

6 Students now look at the notes they made on the brain (page 52). Students write a short summary of the text.

EXTENSION ACTIVITY

Find a short text of interest to students which is at the right language level. Alternatively, ask students to bring their own texts to class. Go through the text quickly and check comprehension. Then ask students to make notes on the text. Check the notes and discuss them with the class. Finally, get the students to use their notes to write a summary.
RESEARCH Books p56

AIMS
The aim of this section is to help students to use books effectively. It makes students aware of the different parts of a book. It shows them how they can use these parts to find out if a book is going to be useful for them, if it is up-to-date, information about the author, etc. It also shows them how to locate specific information in the book.

LEAD IN
• Ask students what reference books they use. Ask them how they find information in a reference book, e.g. read the chapter heading, use the index, etc.
• Tell students that they are going to practise using books effectively.

PROCEDURE
1 Tell students to read the Study Skill. Check that they have understood anything and explain any vocabulary they don't understand.
   Draw their attention to the example pages a–e. Students match the parts of the book with the pages. 1

2 Students answer the questions using the pages. Let students check their answers in pairs. 2

3 Students choose a book and answer the questions about their book. Give students time to complete the exercise and then check the answers of some of the students. 3

4 Put students into pairs. Students discuss their books with their partners and explain which parts they are going to read, and why they want to read this book.

REVIEW p57

AIMS
The aim of this section is to encourage students to review the content of the unit and also to practise and develop the skills they have learnt.

PROCEDURE
1 Students read the instructions and complete the task. Get students to check their answers in pairs. 1

2 Remind students of the text they read about Albert Einstein. Read the instructions with the class and refer students back to the Study Skill on page 54. Students now match the mistakes in the text to the ones listed in the box. Check answers with the class. 2

3 In groups students now correct the mistakes. 3

4 Refer students back to the Study Skill on page 52. Remind them that it is usually bad style to repeat the same word in a text. Writers rephrase words, and this also helps with understanding.
   Students match the words and phrases. 4

5 Students read the instructions and complete the sentences with words from exercise 4 (beneficial, avoid, etc.). 5

6 Read the instructions with the class. Put students into pairs or small groups.
   Give them some useful language for their poster, for example:
   Instructions: Go ..., Make ..., Eat ..., Drink ..., Always ...  
   Negative instructions: Don't eat ..., Don't drink ..., Never ...
   Students make their posters. Collect the posters and make a class display.
10 Staying alive

READING SKILLS  Using what you know  • Using reference to understand a text  • Focusing on statistics
WRITING SKILLS  Linking ideas (8), (9), and (10)  • Words and phrases (3)  • Writing about statistics
VOCABULARY DEVELOPMENT  Words or figures?  • Learning a word – synonyms and antonyms

READING  Dangerous diseases of our time  pp58–59

AIMS
This section aims to show students how they can use reference in a text to help their understanding. It also points out the importance of bringing the student’s own knowledge about a topic to a text. There is also a focus on statistics and how they are represented in a text and in visual.

LEAD IN
• Refer students to the title of the unit (Staying alive). Ask:
  – What is this unit about? (health, good health)
• Ask:
  – What is good health?
  – How can we protect our health?
• Elicit ideas such as eating well, getting plenty of exercise, sleeping sufficient hours, protecting yourself against accidents (e.g. wearing seat belts in cars), spiritual well-being, spending time with family and friends, etc.
• Introduce briefly the word disease and give an example, e.g. heart disease.

PROCEDURE
1 Put students into pairs or small groups. Students read the instructions and discuss their answers. Then get the class to compare their lists. ▶️1
2 Students answer the questions in their pairs or groups. Check answers and make sure students understand the terms developed and developing. ▶️2
3 Students read the Study Skill and the instructions. They discuss the questions in pairs. Do not check answers at this stage.
4 Students read the instructions and the topics. Explain any difficult vocabulary. Then ask students to skim the article quickly and match the paragraphs (1 to 5) with the topics. Check the answers with the class. ▶️4
5 Students now read the article and check their answers from exercise 3 in pairs. Check answers with the class. ▶️5
6 Remind students of the use of pronouns in a text. Refer them back to the Study Skill on page 43. Make sure students understand the terms refer and reference. Read the Study Skill with the class and make sure students understand everything.
   Read the instructions with the class and go through the table with students to make sure they understand what they have to do. Go over the first example with them. Students then complete the table. Check answers with the class. ▶️6
7 Students read the Study Skill and the instructions.
   Look at the three tables with the class and make sure students understand the vocabulary. Students then complete the tables with statistics from the article. ▶️7
8 Students choose a country (their own or another) and find the statistics for it. Ask them to display them in tables. Remind them to make a note of the reference source (website, book, encyclopaedia, etc.) that they used.

READING  Answer key  pp58–59

مادة مميتة

1 Possible answers
malaria, HIV/AIDS, cancer, tuberculosis (TB), pneumonia, diarrhoea, measles, diabetes, meningitis

2 Possible answers
developed countries: Germany, Japan, United States
developing countries: Botswana, Sri Lanka, Peru

3 a 5 b 2 c 3 d 1 e 4

4 Possible answers
1 a disease in which the body cannot control the level of sugar in the blood
2 developed countries
3 it will rise
4 poor diet and lack of exercise
5 reduce our weight, avoid foods high in fats and sugars, exercise regularly

6 They: the inhabitants
it: life expectancy at birth
They: people in developed countries
which: processed or fast food
which: Germany
Here: The Middle East
it: diabetes

Table A  Men  Women
Japan  77.6  84.6
Botswana  37  36

Table B  Deaths per million population
Germany  183.7
Peru  61.3

Table C  Number of people (20–79) with diabetes  2003  2030
Percentage (%) of population  94m  366m  5.1%  6.3%
WRITING  Describing statistics  pp60–61

AIMS
The main aim of this section is to help students write descriptions of statistics from tables, charts, graphs, etc. It introduces students to some of the language needed and gives them opportunities to practise this skill. It also introduces students to some further ways of linking ideas in sentences and reviews some of the linking words used in earlier units.

LEAD IN
• Ask students to look back at the article on diabetes. Ask:
  – How does the writer refer the reader to the information in the tables?
  – What phrases does he/she use?
• Give students time to find the language. Get the answers from the class and write the phrases on the board, for example:
  – Table A shows that …
  – We can see from table B that …
  – We can also see from the statistics in table C …
• Also point out to students how dates are referred to in paragraph 4:
  – In the year 2003 …, By the year 2030 ….

PROCEDURE
1 Tell students to read the Study Skill. Point out that on the other hand is similar to however. It usually begins a sentence and is followed by a comma. It shows contrast or introduces a new idea.

Students find examples of on the other hand in the article on diabetes:
Paragraph 1 – On the other hand, in developing countries …
Paragraph 3 – On the other hand, in Peru …

Direct the students’ attention to the instructions and the sentences. Go over the sentences briefly. Students then complete the sentences with suitable contrast clauses. Get some examples from the class.  

2 Tell students to read the Study Skill. Point out that as a result has the same meaning as so, but it is used at the beginning of a new sentence. Give examples to show the difference, for example:
  – Kamal worked hard. As a result, he did very well in the exam.
  – Kamal worked hard, so he did very well in the exam.

Students find the example of As a result in the article on diabetes:
Paragraph 2 – As a result, the percentage of the population …

Tell students to read the instructions and look through the sentences. They should then complete the sentences with result clauses. Check answers with the class.  

3 Tell students to read the Study Skill. Point out how also differs from both in addition and and in the way it is used.

Give other examples if necessary, e.g.:
  – Mumbai is a centre for the film industry. In addition, it is a busy port.
  – Mumbai is a centre for the film industry and it is a busy port.
  – Mumbai is a centre for the film industry. It is also a busy port.

Point out that also comes before the main verb, but after the verb to be.

Students find the examples of also in the article on diabetes:
Paragraph 4 – We can also see from the statistics …
Paragraph 5 – They should also watch …

Students now read the instructions and complete the exercise. They can check their answers in pairs before you check with the class.  

4 Refer students to the picture and elicit that it shows a mosquito. Ask students what they know about malaria (what it is, what causes it, which countries have it).

Students should now read the instructions and look at the information about malaria in the table. Ask a few general questions about the table to check comprehension, e.g.:
  – What does the table show?
  – For which year is the data?
  – What regions of the world does the table show?

Students should now answer the five questions about the table. Do the first question with the class as an example. Let students complete the exercise and check the answers.  

Unit 10  Staying alive  43
5 Read the Study Skill with the class and make sure students understand all the language.

Students now read the instructions and underline the numbers. Then, ask students to complete the paragraph using the words and figures in the box. Check answers with the class.  

Writing about statistics p61

6 Read the instructions and go through the table with the class. Tell students to use the language from the Study Skill on words and phrases in their paragraph.  

VOCABULARY DEVELOPMENT Numbers in texts p62

AIMS
This section aims to show students how numbers are written in a text, when we use figures and when we use words. It also teaches students to expand their vocabulary by learning the antonyms and synonyms of new words.

LEAD IN
- Review the pronunciation of cardinal and ordinal numbers, fractions, decimals, and percentages. Start by writing several different numbers on the board, for example:

| 2,890,000 | 67.56% | 23rd | 0.025 |
| 83 | 37.6389 | 48% | 16th |

- Demonstrate how these numbers are read aloud. In particular, explain how decimals are read, e.g. sixty-seven point five six (and not sixty-seven point fifty-six).
- Point to numbers on the board and ask students to read them out.

PROCEDURE
1 Students read the instructions and underline the numbers. Check the answers. Then, without looking at the Study Skill, give students time to think about possible rules for when to use figures, and when to use words. Listen to suggestions from the class.  

Students now read the Study Skill and complete the rules. Check the answers with the class. Point out that these are not fixed rules, but descriptions of general use.

2 Students correct the sentences, using the rules in the Study Skill. Let students check their answers in pairs before you check with the class.

EXTENSION ACTIVITY
Ask each student to write a list of ten numbers in figures. Make sure they include large numbers, fractions, decimals, ordinal numbers, and percentages. In pairs ask students to dictate their lists of numbers to their partners. They should check their answers with the partner. Deal with any difficulties with the class.

Using antonyms and synonyms p62

3 Read the Study Skill with the class and make sure students understand the terms synonym and antonym. Point out that dictionaries often give antonyms and synonyms of words. Get students to check the words wealthy and rich in their dictionaries to see if their dictionary lists synonyms and antonyms.

Students now read the instructions. They should complete the sentences with suitable antonyms, using dictionaries to help them.

4 Remind students that it is not good style to repeat words in a text. Point out that synonyms help us to avoid repetition. Students complete the exercise, using their dictionaries to help them. Check answers with the class.
REVIEW  p63

AIMS
The aim of this section is to encourage students to review the content of the unit and also to practise and develop the skills they have learnt.

PROCEDURE
1 Tell students to look back through the unit to find words to complete the table. Students can also use their dictionaries to help them.  
2 Students read the instructions and complete the sentences with nouns from the table in exercise 1.  
3 Refer students back to the Study Skill on prefixes (page 44) and the one on antonyms and synonyms (page 62).
Point out to students that we form some antonyms by adding a negative prefix. Students complete the exercise.  

Spelling (4) -ing forms  p63

4 Read the RULES box with the class and make sure that students understand everything. Students should then complete the table with words from the unit and other verbs they know.  
5 Remind students of exercise 6 in the Reading section on page 58.
Tell students to read the paragraph and to study the bar chart. Check that they understand the difference between births and deaths in the chart. Point out the completed example. Students then complete the exercise.

<table>
<thead>
<tr>
<th>Verb/Adjective</th>
<th>Noun</th>
</tr>
</thead>
<tbody>
<tr>
<td>to be born</td>
<td>a birth</td>
</tr>
<tr>
<td>to live</td>
<td>a life</td>
</tr>
<tr>
<td>to die</td>
<td>a death</td>
</tr>
<tr>
<td>to increase</td>
<td>an increase</td>
</tr>
<tr>
<td>to rise</td>
<td>a rise</td>
</tr>
<tr>
<td>to decrease</td>
<td>a decrease</td>
</tr>
<tr>
<td>to fall</td>
<td>a fall</td>
</tr>
</tbody>
</table>

- **Spelling (4) -ing forms**:  
  
  - verb + -ing  
  - e + -ing  
  - double consonant + -ing  

  - Developing  
  - Rising  
  - Jogging  
  - Growing  
  - Changing  
  - Swimming  
  - Doing  
  - Becoming  
  - Travelling  
  - Falling  
  - Increasing  
  - Decreasing

5 Possible answers

Here: Africa
It: the birth rate
Which: the death rate
Where: Europe
Here: Europe
It: the death rate
They: the countries of Asia
