Preface

The Handbook of Pharmaceutical Additives, Third Edition has been extensively updated from the previous edition which was published five years ago. This edition contains completely new trade name and generic chemical entries as well as added information for previously listed excipients. The new edition reflects the many changes in the manufacturers of both trade name and generic products. More than 5300 trade name products and 4000 generic chemicals and materials, available from worldwide manufacturers are described in this reference.

Pharmaceutical additives are defined here as the secondary ingredients that are present in both prescription and over-the-counter drug formulations and contribute in one or more of the following ways:

- improving consumption ease of the dosage form by masking unpleasant odor, improving palatability or appearance of the active ingredient.
- enabling or enhancing the delivery of the drug or medicine that is available in a variety of dosage forms (i.e., oral; topical, ophthalmic, and otic; suppositories; injectables; inhalants) and thus improving its efficacy, control of bioavailability, uniformity, and/or flow characteristics
- increasing the stability of active ingredients.
- acting as a filler or diluent so that an adequate amount of material is available to properly fill a dosage form.
- acting as an antimicrobial or antioxidant to extend the shelf life of the active ingredient.

Thus, the definition of pharmaceutical additives for the purpose of this book encompasses excipients, synergists, or chemicals that substantively contribute to the effectiveness of the active ingredient. Entries for both trade names and chemicals contain extensive information gathered from worldwide manufacturers, distributors, trade journals, government documents, and other reference sources.

The Handbook of Pharmaceutical Additives, Third Edition centralizes and integrates information on these chemicals and materials thereby serving as an essential guide to pharmaceutical product managers, formulation scientists, quality controllers, ingredient chemists, pharmacists, physicians, and consumers.

This reference contains the following sections:

Part I
Trade Name Reference contains over 5300 alphabetical entries of trade name pharmaceutical additive products with extensive profiles of each product listed.

Part II
Chemical Component Cross-Reference contains almost 4000 pharmaceutical chemicals/materials that are either contained in the trade name products profiled in Part I or are generic chemicals used as pharmaceutical additive ingredients. Each entry includes, wherever possible, its synonyms, CAS number, EINECS number/ELINCS, FEMA number, UN/DOT number, molecular and empirical formulas, chemical properties, functions and applications, toxicology, precautions, use levels, regulatory information, and manufacturers and distributors of the chemical. All chemical/material synonyms are cross-referenced back to the main entry. The chemical monograph entries also contain a listing of the trade name products that are either equivalent to the chemical entry or contain this chemical as one of its ingredients.

Part III
Functional/Application Index is a powerful tool for locating the trade names and chemicals based on their function and application. By searching for key functional words related to pharmaceutical additives such as anticaking agents, binders, colorants, disintegrants, emulsifiers, encapsulants, fillers, flavors, gellants, in specific application areas such as tablets, capsules, inhalants, ointments, suppositories, etc., the user is directed to the trade names and/or chemicals that have that specific functional/application attribute.

Part IV
Manufacturers Directory contains detailed contact information for the more than 3000 worldwide manufacturers and their branches of trade name products and chemical components that are referenced in this handbook. Wherever possible, telephone, telefax, toll-free numbers, e-mail and internet addresses, and complete mailing addresses are included for each manufacturer.

Appendixes
CAS Number Index contains CAS number entries followed by a listing of their trade name product and chemical
Preface

equivalents in alphabetical order. The chemical name is in boldfaced type.

**EINECS/ELINCS Number Index** contains EINECS/ELINCS number entries followed by a listing of their trade name product and generic chemical equivalents in alphabetical order. The chemical name is in boldfaced type.

**FEMA Number Index** orders chemicals (that have assigned FEMA numbers) contained in this reference by these numbers. These numbers have been assigned by the Flavor and Extract Manufacturers Association.

**Glossary** contains definitions of terminology associated with the pharmaceutical industry.

**Chemicals in Compliance with Pharmaceutical Standards:**
- Inactive Ingredient Guide: Approved Products
- Inactive Ingredient Guide: Permanently Listed Color Additives
- USP/NF Chemical Listing
- British Pharmacopoeia Chemical Listing
- European Pharmacopoeia Chemical Listing

Part I: Trade Name Reference
A-625  [SPI Pharma  
  http://www.spipharma.com]  
Chem. Descrip.:  Sorbitol sol'n.  
CAS  50-70-4;  EINECS/ELINCS  200-061-5  
Uses:  Nutritive sweetener and excipient in pharmaceuticals  
Features:  Noncrystallizing  
Regulatory:  NF  
Properties:  Cl. water-wh. odorless, sweet taste;  
sol. in water and ethanol;  misc. in glycerin and propylene glycol;  insol. in veg. and min. oil;  
visc. liq.;  visc. ≈ 170 cps;  ref. index 1.457-1.467;  45% min. assay

AP™ 25  [Avatar  http://www.avatarcorp.com]  
Chem. Descrip.:  Fully-refined paraffin wax  See Paraffin wax (petroleum), clay-treated  
CAS  64742-43-4;  EINECS/ELINCS  265-145-6  
Uses:  Lubricant, mold release agent, moisture resistance/retention aid, thickener in pharmaceuticals  
Regulatory:  21CFR 172.886, 178.3710  
Properties:  Wh. waxy translucent solid;  
tasteless;  odorless;  m.p. 126 F

AP™ 35  [Avatar  http://www.avatarcorp.com]  
Chem. Descrip.:  Fully-refined paraffin wax  See Paraffin wax (petroleum), clay-treated  
CAS  64742-43-4;  EINECS/ELINCS  265-145-6  
Uses:  Lubricant, mold release agent, moisture resistance/retention aid, thickener in pharmaceuticals  
Regulatory:  21CFR 172.886, 178.3710  
Properties:  Wh. waxy translucent solid;  
tasteless;  odorless;  m.p. 135 F

AP™ 45  [Avatar  http://www.avatarcorp.com]  
Chem. Descrip.:  Fully-refined paraffin wax  See Paraffin wax (petroleum), clay-treated  
CAS  64742-43-4;  EINECS/ELINCS  265-145-6  
Uses:  Lubricant, mold release agent, moisture resistance/retention aid, thickener in pharmaceuticals  
Regulatory:  21CFR 172.886, 178.3710  
Properties:  Wh. waxy translucent solid;  
tasteless;  odorless;  m.p. 150 F

AACH-418  [Summit Research Labs  
  http://www.summitresearchlabs.com]  
Chem. Descrip.:  Aluminum chlorohydrate  
CAS  12042-91-0;  EINECS/ELINCS  234-933-1  
Uses:  Antiperspirant active  
Features:  Enhanced efficacy;  35-45% sweat inhibition  
Regulatory:  FDA GRAS  
Properties:  Impalpable powd. (10% spheres max.)

AACH-7171  [Summit Research Labs  
  http://www.summitresearchlabs.com]  
Chem. Descrip.:  Aluminum chlorohydrate  
CAS  12042-91-0;  EINECS/ELINCS  234-933-1  
Uses:  Antiperspirant active  
Features:  Enhanced efficacy;  35-45% sweat inhibition  
Regulatory:  FDA GRAS  
Properties:  Spherical powd.

AA USP  [CasChem  
http://www.rutherfordchemicals.com/caschem.html]  
Chem. Descrip.:  Castor oil  See Castor (Ricinus communis) oil  
CAS  8001-79-4;  EINECS/ELINCS  232-293-8  
Uses:  Emollient for pharmaceuticals;  lubricant, release agent for protective coatings for vitamins, tableting  
Regulatory:  FDA approval  
Properties:  Sol. in alcohols, esters, ethers, ketone, and aromatic solvs.;  
acid no. 2;  iodine no. (Wijs) 86;  sapon. no. 180

AAZG-507  [Summit Research Labs  
  http://www.summitresearchlabs.com]  
Chem. Descrip.:  Aluminum zirconium chlorohydrax glycine complex  
CAS  134-58-7;  EINECS/ELINCS  205-146-1  
Uses:  Antiperspirant active  
Features:  Enhanced efficacy;  55-80% sweat inhibition  
Regulatory:  FDA GRAS  
Properties:  Superfine powd.
Trade Name Reference

http://www.summitresearchlabs.com
Chem. Descrip.: Aluminum zirconium chlorohydrex glycine complex
CAS 134-58-7; EINECS/ELINCS 205-146-1
Uses: Antiperspirant active
Features: Enhanced efficacy; 55-80% sweat inhibition
Regulatory: FDA GRAS
Properties: Spherical powd.

AAZG-7160 [Summit Research Labs http://www.summitresearchlabs.com]
Chem. Descrip.: Aluminum zirconium chlorohydrex glycine complex
CAS 134-58-7; EINECS/ELINCS 205-146-1
Uses: Antiperspirant active
Features: Enhanced efficacy; 55-80% sweat inhibition
Regulatory: FDA GRAS
Properties: Impalpable powd.

AAZG-7167 [Summit Research Labs http://www.summitresearchlabs.com]
Chem. Descrip.: Alcohol zirconium chlorohydrex glycine complex
CAS 134-58-7; EINECS/ELINCS 205-146-1
Uses: Antiperspirant active
Features: Enhanced efficacy; 55-80% sweat inhibition
Regulatory: FDA GRAS
Properties: Superfine powd.

AAZG-7168 [Summit Research Labs http://www.summitresearchlabs.com]
Chem. Descrip.: Alcohol zirconium chlorohydrex glycine complex
CAS 134-58-7; EINECS/ELINCS 205-146-1
Uses: Antiperspirant active
Features: Enhanced efficacy; 55-80% sweat inhibition
Regulatory: FDA GRAS
Properties: Superfine powd.

AB® [ANGUS http://www.dow.com/angus/]
Chem. Descrip.: 2-Amino-1-butanol See 2-Aminobutanol
CAS 96-20-8; EINECS/ELINCS 202-488-2
Uses: Pharmaceutical intermediate for synthesis of ethambutol, an anti-tuberculosis drug
Properties: APHA 100 color; water-misc.; m.w. 89.1; dens. 7.86 lb/gal; m.p. -2 C; b.p. 178 C; flash pt. (TCC) 193 F; pH 11.1 (0.1M aq.); 99% conc.
Toxicology: LD50 (oral, mouse) 2.5 g/kg, (IP, mouse) 0.48 g/kg; severe eye irritant;
causes eye burns and skin irritation
Precaution: Combustible; keep away from heat and flame; corrosive to copper, brass, and aluminum

Abil® B 8843 [Degussa Care Spec.]
Chem. Descrip.: Dimethicone copolyol
Uses: Surfactant, conditioner for pharmaceuticals
Features: Improves skin feel; stable, creamy foam
Regulatory: JCIC registered
Properties: Pale liq.; water-sol.; disp. in min. and veg. oils; sp.gr. 1.070; nonionic; 100% conc.

Abil® B 8852 [Degussa Care Spec.]
Chem. Descrip.: Dimethicone copolyol
Uses: Surfactant, conditioner, refatting agent for pharmaceuticals
Features: Lipophilic
Regulatory: JCIC registered
Properties: Amber liq.; sol. in water; disp. in veg. and min. oils; nonionic; 100% conc.

Abil® B 8863 [Degussa Care Spec.]
Chem. Descrip.: Dimethicone propyl PG-betaine
CAS 102523-96-6
Uses: Surfactant, conditioner in pharmaceuticals
Properties: Yel. liq.; sol. with sl. turbidity in water; disp. in veg. and min. oils; sp.gr. 1.078-1.092; amphoteric; 30% conc.

Abil® B 9950 [Degussa Care Spec.]
Chem. Descrip.: Dimethicone copolyol
Uses: Surfactant, emollient, foaming agent, lubricant, gloss aid for pharmaceuticals
Features: Compat. with all common surfactants; improves foam structure
Regulatory: JCIC registered
Properties: Pale yel. liq.; sol. in water, alcohol, 1,2-propylene glycol; sp.gr. 1.024; visc. 34.5 mN•m-1 (1% aq.); 50% act.
Toxicology: Proper use provided, no adverse health effects have been observed; eye
Trade Name Reference

Abil® B 88184 [Degussa Care Spec.]
Chem. Descrip.: Dimethicone copolyol
Uses: Surfactant, emollient for topical pharmaceuticals

Abil® EM 90 [Degussa Care Spec.]
Chem. Descrip.: Cetyl dimethicone copolyol
Uses: Surfactant, emollient, conditioner, emulsifier for w/o creams/lotions, skin protective treatments, sun care prods., pharmaceuticals

Abil® WE 09 [Degussa Care Spec.]
Chem. Descrip.: Polyglyceryl-4 isostearate, cetyl dimethicone copolyol, hexyl laurate
Uses: Emulsifier for highly stable w/o creams/lotions, skin care treatment emulsions, sun protection preps., pharmaceuticals; UV protectant in sunscreens

Abil®-Quat 3272 [Degussa Care Spec.]
Chem. Descrip.: Quaternium-80
CAS 134737-05-6
Uses: Refatting agent for pharmaceuticals
Features: Pleasant skinfeel
Properties: Amber cl. liq.; sol. in water, alcohol, 1,2-propylene glycol, glycerol; sp.gr. 1.008; visc. 1000±200 mm² s⁻¹; flash pt. 90 C; ref. index 1.429; pH 7.2±1 (30% aq.); surf. tens. 44±2 g/cm³; cationic; 50 ± 1% act.

Abil®-Wax 2434 [Degussa Care Spec.]
Chem. Descrip.: Stearoxy dimethicone
CAS 68554-53-0
Uses: Emollient, spreading agent for pharmaceuticals
Features: Lipophilic; improves applic. and skin care properties of emulsions; protects against aq. media; provides pleasant, nongreasy skinfeel; easy to emulsify
Properties: Pale yel. liq.; sol. in veg. and min. oils; insol. in water; sp.gr. 0.89-0.93; HLB 5.0; nonionic; 100% conc.

Abil®-Wax 2440 [Degussa Care Spec.]
Chem. Descrip.: Behenoxy dimethicone
Uses: Emollient, spreading agent for pharmaceuticals
Features: Lipophilic; improves applic. and skin care props. of emulsions; protects against aq. media; reduces whitening during applic. of creams and lotions; provides pleasant, nongreasy skinfeel
Properties: Pale yel. waxy solid; disp. in min. oil, IPM, sunflower seed oil; sp.gr. 0.88 (35 C); m.p. 25 C; pour pt. 20-30 C; flash pt. > 100 C; nonionic; 100% act.
Use Level: 1-5%

Abil®-Wax 9800 [Degussa Care Spec.]
Chem. Descrip.: Stearyl dimethicone
CAS 67762-83-8
Uses: Spreading agent, penetrant, and emollient for pharmaceuticals
Features: Lipophilic; provides pleasant, nongreasy skinfeel; easy to emulsify
Properties: Wh. waxy liq.; sol. in min. oil, IPM, sunflower seed oil; sp.gr. 0.86 (35 C); pour pt.
Use Level: 1-5%
Trade Name Reference

20 C; flash pt. > 40 C; nonionic; 100% act.
Use Level: 1-5%

Abil®-Wax 9801 [Degussa Care Spec.]
Chem. Descrip.: Cetyl dimethicone
Uses: Emollient for antiperspirants, pharmaceuticals, sunscreens (improves SPF response with org. or physical UV filters)
Features: Lipophilic
Properties: Pale yel. liq. wax; sol. in cyclomethicone, min. oil, IPM, sunflower seed oil; sp.gr. 0.86; pour pt. 10 C; flash pt. 40 C; nonionic; 100% act.
Use Level: 1-5%

Abil®-Wax 9814 [Degussa Care Spec.]
Chem. Descrip.: Cetyl dimethicone
Uses: Emollient in pharmaceuticals
Features: Lipophilic
Properties: Oily liq.; oil-sol.; water-disp.; HLB 8.6; nonionic; 100% act.

Ablunol S-20 [Taiwan Surf.]
Chem. Descrip.: Sorbitan laurate
CAS 1338-39-2; EINECS/ELINCS 215-663-3
Uses: Emulsifier, emulsion stabilizer, thickener for pharmaceuticals
Properties: Oily liq.; oil-sol.; water-disp.; HLB 8.6; nonionic; 100% act.

Ablunol S-60 [Taiwan Surf.]
Chem. Descrip.: Sorbitan stearate
CAS 1338-41-6; EINECS/ELINCS 215-664-9
Uses: Emulsifier, emulsion stabilizer, thickener for pharmaceuticals
Properties: Waxy flake; HLB 4.7; nonionic; 100% act.

Ablunol S-80 [Taiwan Surf.]
Chem. Descrip.: Sorbitan oleate
CAS 1338-43-8; EINECS/ELINCS 215-665-4
Uses: Emulsifier, emulsion stabilizer, thickener for pharmaceuticals
Properties: Oily liq.; HLB 4.3; nonionic; 100% act.

Ablunol S-85 [Taiwan Surf.]
Chem. Descrip.: Sorbitan trioleate
CAS 26266-58-0; EINECS/ELINCS 247-569-3
Uses: Emulsifier, emulsion stabilizer, thickener for pharmaceuticals
Properties: Oily liq.; HLB 1.8; nonionic; 100% act.

Ablunol T-20 [Taiwan Surf.]
Chem. Descrip.: POE sorbitan laurate
Uses: O/w emulsifier for pharmaceuticals
Properties: Oily liq.; water-sol.; HLB 16.7; nonionic; 100% solids

Ablunol T-60 [Taiwan Surf.]
Chem. Descrip.: POE sorbitan stearate
Uses: O/w emulsifier for pharmaceuticals
Properties: Oily liq.; water-sol.; HLB 14.9; nonionic; 100% conc.

Ablunol T-80 [Taiwan Surf.]
Chem. Descrip.: POE sorbitan oleate
Uses: O/w emulsifier for pharmaceuticals
Properties: Oily liq.; water-sol.; HLB 15.0; nonionic; 100% conc.

A-C® 6 [Honeywell Spec. Chems.]
Chem. Descrip.: Polyethylene homopolymer
CAS 9002-88-4; EINECS/ELINCS 200-815-3
Uses: Emollient, gellant, film-former for pharmaceuticals
Features: Increases permanency, moisture retention, water resist.
Regulatory: FDA 21CFR §172.615, 175.105, 175.125, 175.300, 176.170, 176.180, 176.200, 176.210, 177.1200, 177.1210, 177.1520, 177.2600, 177.2800, 178.3570, 178.3850, 179.45; DOT not regulated; Canada DSL; Europe EINECS; Australian Inventory; Japan ENCS; Korean inventory; Philippines PICCS; Chinese
Properties: Wh. waxy prills, powd., char. waxy odor; negligible sol. in water; dens. 0.92 g/cc; visc. 375 cps (140 C); drop pt. 106 C; acid no. nil; flash pt. (COC) 307 C; hardness 4.0 dmm
Toxicology: LD50 (oral, rat) > 2000 mg/kg; LDLo (oral, mouse) 5 g/kg; mild skin irritant; dust may cause mech. eye and respiratory tract irritation; OSHA TWA 5 mg/m3 (respirable dust), 15 mg/m3 (total dust) recommended; TSCA listed
Precaution: Combustible solid; incompat. with strong oxidizing agents
Hazardous Decomp. Prods.: CO, CO2, oxidized and nonoxidized hydrocarbons
HMIS: Health 0, Flammability 1, Reactivity 0
Storage: Store in cool, dry area away from direct heat, sunlight
A-C® 7 [Honeywell Spec. Chems.]
Trade Name Reference

Chem. Descrip.: Polyethylene homopolymer wax  See Polyethylene wax
CAS 9002-88-4; EINECS/ELINCS 200-815-3
Uses: Thickener for pharmaceutical gels

Properties: Prills, powd.; char. waxy odor; sol. in hot min. oil and fatty esters; dens. 0.92 g/cc; visc. 450 cps (140 °C); drop pt. 109 °C; acid no. nil; flash pt. (COC) 304 °C; hardness 2.5 dmm

Toxicology: LD₅₀ (oral, rat) > 2 g/kg; LD₅₀ (oral, mouse) 5 g/kg; TSCA listed

Precaution: Combustible solid
Hazardous Decomp. Prods.: CO, CO₂, oxidized and nonoxidized hydrocarbons
HMIS: Health 0, Flammability 1, Reactivity 0
Storage: Store in cool, dry area away from direct heat, sunlight

Chem. Descrip.: Polyethylene homopolymer wax  See Polyethylene wax
CAS 9002-88-4; EINECS/ELINCS 200-815-3
Uses: Emollient, gellant, film-former for pharmaceuticals
Features: Increases permanency, moisture retention, water resist.

Properties: Prills, powd.; char. waxy odor; sol. in hot min. oil and fatty esters; dens. 0.93 g/cc; visc. 400 cps (140 °C); drop pt. 116 °C; acid no. nil; flash pt. (COC) 307 °C; hardness 1.0 dmm

Toxicology: LD₅₀ (oral, rat) > 2 g/kg; LD₅₀ (oral, mouse) 5 g/kg; TSCA listed

Precaution: Combustible solid
Hazardous Decomp. Prods.: CO, CO₂, oxidized and nonoxidized hydrocarbons
HMIS: Health 0, Flammability 1, Reactivity 0
Storage: Store in cool, dry area away from direct heat, sunlight

Chem. Descrip.: Polyethylene homopolymer wax  See Polyethylene wax
CAS 9002-88-4; EINECS/ELINCS 200-815-3
Uses: Emollient, gellant, film-former for pharmaceuticals
Features: Increases permanency, moisture retention, water resist.

Properties: Prills, powd.; char. waxy odor; sol. in hot min. oil and fatty esters; dens. 0.94 g/cc; visc. 450 cps (140 °C); drop pt. 117 °C; acid no. nil; flash pt. (COC) 318 °C; hardness 0.5 dmm

Toxicology: LD₅₀ (oral, rat) > 2 g/kg; LD₅₀ (oral, mouse) 5 g/kg; TSCA listed

Precaution: Combustible solid
Hazardous Decomp. Prods.: CO, CO₂, oxidized and nonoxidized hydrocarbons
HMIS: Health 0, Flammability 1, Reactivity 0
Storage: Store in cool, dry area away from direct heat, sunlight

**Trade Name Reference**

**Hazardous Decomp. Prods.:** CO, CO₂, oxidized and nonoxidized hydrocarbons

strong oxidizing agents
Hazardous Decomp. Prods.: Oxides of carbon, various oxidized and nonoxidized hydrocarbons
HMIS: Health 0, Flammability 1, Reactivity 0
Storage: Store in cool, dry area away from direct heat, sunlight

http://www.honeywell.com/sites/sm/index.jsp]
Chem. Descrip.: Low m.w. ethylene/acrylic acid copolymer
CAS 9010-77-9
Uses: Gellant for medications, dental adhesives
Regulatory: FDA 21CFR §175.105, 175.125, 175.300, 175.320, 176.170, 176.180, 176.200, 176.210, 177.120, 177.1210, 177.1310, 177.2600, 177.2800, 178.3570, 178.3850
Properties: Prills; alkali-dispersible; dens. 0.94 g/cc; visc. 650 cps (140 C); drop pt. 92 C; acid no. 120; flash pt. (COC) 307 C; hardness 11.5 dmm

Acconon C-44, EP  [ABITEC  
http://www.abiteccorp.com]
Chem. Descrip.: PEG 1500 Caprylic/capric glycerides
Chem. Analysis: Water 1.0% max.; total ash 0.1%; free glycerol 3.0%
CAS 68525-91-7; 9004-81-3
Uses: Solubilizer, bio-availability enhancer in capsules
Regulatory: EP
Properties: Drop pt. 42.5-47.5 C; acid value 2.0; hydroxyl value 36-56; sapon. value 79-93
Storage: Retest and requalify 2 yr from the date of manufacture; store in a cool dry place

Acconon CA-5  [ABITEC  
http://www.abiteccorp.com]
Chem. Descrip.: PEG-5 castor oil
CAS 61791-12-6
Uses: Surfactant, emulsifier, dispersant, solubilizer, visc. control agent for pharmaceutical dermatological emulsions
Properties: Gardner 3 max. liq.; HLB 8.0; acid no. 2 max.; pH 6-7 (5% aq.); nonionic; 98.5% min. solids

Acconon CC-6  [ABITEC  
http://www.abiteccorp.com]
Chem. Descrip.: Ethoxylated med. chain fatty acids
CAS 68954-97-2
Uses: Emulsifier, moisturizer, solubilizer for pharmaceuticals (delivery/absorption enhancement, dermatologicals, suspensions)
Properties: Liq.; mild odor; sp.gr. 1.01; vapor pressure < 1 mm Hg; flash pt > 200 C (COC); nonionic; 100% conc.
Precaution: Incompat. with strong oxidizers
Hazardous Decomp. Prods.: CO, CO₂

Acconon CC-6, EP  [ABITEC  
http://www.abiteccorp.com]
Chem. Descrip.: PEG 6 Caprylic/capric glycerides See PEG-6 caprylic/capric glycerides
Chem. Analysis: Water 1.0%; total ash 0.3%
CAS 68954-97-2
Uses: Solubilizer, bio-availability enhancer in oral suspensions, capsules
Properties: Lt.-colored liq.; vapor pressure < 1 mmHg; acid value 5.0; hydroxyl value 165-225; sapon. value 85-105
Toxicology: Nonirritant to eyes and skin
Precaution: Incompat. with oxidizers; keep away from temps. near the flash pt.

Acconon E  [ABITEC  
http://www.abiteccorp.com]
Chem. Descrip.: PPG-15 stearyl ether
CAS 25231-21-4
Uses: Surfactant, emulsifier, dispersant, solubilizer for pharmaceutical dermatological emulsions
Properties: Gardner 3 max. liq.; HLB 16; acid no. 1.5 max.; pH 4-6 (5% aq.); nonionic; 98.55 min. solids

Acconon MC-8, EP/NF  [ABITEC  
http://www.abiteccorp.com]
Chem. Descrip.: PEG-8 caprylic/capric glycerides
Chem. Analysis: Water 1.0%; total ash 0.3%
CAS 85536-07-8
Uses: Solubilizer and bio-availability enhancer in oral suspensions and capsules; an emulsifier for microemulsions
Regulatory: USP/NF, EP
Properties: Lt.- colored liq.; mild odor; vapor pressure <1 mmHg; acid no. 2.0 max.
Toxicology: Does not cause serious eye irritation; no adverse effects to skin or by ing.; noncarcinogenic
Trade Name Reference

Precaution: Avoid strong oxidizing agents
Hazardous Decomp. Prods.: COx
Storage: ≥ 2 yr shelf life; store in a cool dry place, keep in tight containers, protect from light and moisture.

Chem. Descrip.: PEG-8 caprylic/capric glycerides
CAS 85536-01-8; 84963-88-2
Uses: Solubilizer, bio-availability enhancer in oral suspensions, capsules
Properties: Lt. color liq.; mild odor; visc. 80-110 mPa•s; vapor pressure < 1 mm Hg; acid value 2.0; sapon. value 85-105; peroxide value 6.0; hydroxyl value 170-205
Precaution: Incompat. with strong oxidizers
Hazardous Decomp. Prods.: CO, CO2
Storage: 1 yr. min. where properly stored

Acconon® S-75 [ABITEC http://www.abiteccorp.com]
Chem. Descrip.: PEG-75 soy glycerides
CAS 61791-23-9
Uses: Surfactant, emulsifier, dispersant, solubilizer, visc. control agent, refatting agent in pharmaceuticals
Features: Mild; low-irritation; leaves pleasant after-feel; requires melting before use; stable under pH extremes
Properties: Gardner 6 max. waxy solid; water-sol.; HLB 16-18; acid no. 2 max.; pH 5.0-7.5 (5% in DI water); nonionic; 2% max. moisture
Storage: 1 yr. min. shelf life when stored in cool, dry place in sealed pkg.

Acconon W230 [ABITEC http://www.abiteccorp.com]
Chem. Descrip.: Ceteareth-20
CAS 68439-49-6
Uses: Surfactant, emulsifier, dispersant, solubilizer, vehicle, carrier, wetting agent for pharmaceutical dermatological emulsions, medicated cleansing prods.
Properties: Gardner 3 max. solid, low odor; HLB 15; acid no. 1 max.; pH 5.5-7.0 (5% aq.); nonionic; 98.5% min. solids
Features: Impalpable powd.

Ac-Di-Sol® [FMC Biopolymer http://www.fmcbiopolymer.com]
Chem. Descrip.: Croscarmellose sodium NF, Ph.Eur., JPE
CAS 74811-65-7
Uses: Disintegrant for pharmaceutical tablets, capsules, and granules
Features: Aids dissolution; rapid swelling; high capillary action; internally crosslinked to ensure water insol.; exc. long-term stability; compat. with most actives and excipients
Regulatory: NF, Ph.Eur., JPE, GRAS; kosher
Properties: Wh. relatively free-flowing powd.; odorless; ≤ 2% 200 mesh, ≤ 10% 325 mesh; bulk dens. 0.337 g/cc; pH 5.9-7.0
Storage: Hygroscopic; store in well sealed container

ACH-303 [Summit Research Labs http://www.summitresearchlabs.com]
Chem. Descrip.: Aluminum chlorohydrate
CAS 12042-91-0; EINECS/ELINCS 234-933-1
Uses: Antiperspirant active in aq. roll-ons, clear gels
Features: 25-35% sweat inhibition
Regulatory: FDA GRAS
Properties: Sol'n.

ACH-307 [Summit Research Labs http://www.summitresearchlabs.com]
Chem. Descrip.: Aluminum chlorohydrate
CAS 12042-91-0; EINECS/ELINCS 234-933-1
Uses: Antiperspirant active
Features: 25-35% sweat inhibition
Regulatory: FDA GRAS
Properties: Impalpable powd.

ACH-308 [Summit Research Labs http://www.summitresearchlabs.com]
Chem. Descrip.: Aluminum chlorohydrate
CAS 12042-91-0; EINECS/ELINCS 234-933-1
Uses: Antiperspirant active
Features: 25-35% sweat inhibition
Regulatory: FDA GRAS
Properties: Spherical powd.

ACH-323 [Summit Research Labs http://www.summitresearchlabs.com]
Chem. Descrip.: Aluminum chlorohydrate
CAS 12042-91-0; EINECS/ELINCS 234-933-1
Uses: Antiperspirant active
Features: 25-35% sweat inhibition
Regulatory: FDA GRAS
Properties: Impalpable powd.

ACH-325 [Summit Research Labs http://www.summitresearchlabs.com]
Chem. Descrip.: Aluminum chlorohydrate
CAS 12042-91-0; EINECS/ELINCS 234-933-1
Uses: Antiperspirant active
Features: 25-35% sweat inhibition
Regulatory: FDA GRAS
Properties: Controlled-particle size powd.

ACH-331 [Summit Research Labs http://www.summitresearchlabs.com]
Trade Name Reference

http://www.summitresearchlabs.com
Chem. Descrip.: Aluminum chlorohydrate
CAS 12042-91-0; EINECS/ELINCS 234-933-1
Uses: Antiperspirant active
Features: 25-35% sweat inhibition
Regulatory: FDA GRAS
Properties: Superfine powd.

Acido Ialuronico Sale Sodico [Esperis http://www.esperis.it]
Chem. Descrip.: Sodium hyaluronate
CAS 9067-3-2; EINECS/ELINCS 232-678-0
Uses: Humectant, emulsifier for pharmaceuticals

Aclame™ [Danisco Sweeteners http://www.daniscosweeteners.com]
Chem. Descrip.: Alitame
Uses: Sweetener for pharmaceuticals

Acritamer® 941 [RITA http://www.ritacorp.com]
Chem. Descrip.: Carbomer 941
CAS 9003-01-4
Uses: Emulsifier, dispersant, suspending agent, visc. control agent, gellant for topical pharmaceuticals; stabilizer for w/o and o/w emulsions
Features: For use in systems where sparkling clarity is not essential
Properties: Wh. fluffy hygroscopic powd.; sl. acetic odor; m.w. 1,250,000; sp.gr. 1.41; bulk dens. 15 lb/ft³; visc. 15,000-30,000 cps (0.2%); 45,000-70,000 cps (0.5%); pH 2.7-3.3 (0.5%); anionic
Toxicology: TLV 5 mg/m³; may cause eye/skin irritation
Precaution: Incompat. with ammonia, sodium hydroxide, potassium hydroxide, strongly basic amines (may generate intense heat); forms very slippery film with water
Storage: Store in cool, dry place; keep container closed to avoid moisture pickup

Aclame™ [Danisco Sweeteners http://www.daniscosweeteners.com]
Chem. Descrip.: Alitame
Uses: Sweetener for pharmaceuticals

Aclame™ [Danisco Sweeteners http://www.daniscosweeteners.com]
Chem. Descrip.: Alitame
Uses: Sweetener for pharmaceuticals

Aclame™ [Danisco Sweeteners http://www.daniscosweeteners.com]
Chem. Descrip.: Alitame
Uses: Sweetener for pharmaceuticals

Acritamer® 940 [RITA http://www.ritacorp.com]
Chem. Descrip.: Carbomer 940
CAS 9003-01-4
Uses: Emulsifier, dispersant, suspending agent, visc. control agent, gellant for topical pharmaceuticals; stabilizer for w/o and o/w emulsions
Features: For use in systems where sparkling clarity is not essential
Properties: Wh. fluffy hygroscopic powd.; sl. acetic odor; m.w. 4,000,000; sp.gr. 1.41; bulk dens. 15 lb/ft³; visc. 15,000-30,000 cps (0.2%); 45,000-70,000 cps (0.5%); pH 2.7-3.3 (0.5%); anionic
Toxicology: TLV 5 mg/m³; may cause eye/skin irritation
Precaution: Incompat. with ammonia, sodium hydroxide, potassium hydroxide, strongly basic amines (may generate intense heat); forms very slippery film with water
Storage: Store in cool, dry place; keep container closed to avoid moisture pickup

Acryl-Eze™ [Colorcon http://www.colorcon.com]
Chem. Descrip.: Methacrylic acid copolymer system
Uses: Enteric coating for pharmaceutical solid dosage forms such as tablets, granules, and beads; used to mask taste
Features: Dry, pigmented, one-step, fully formulated system
Properties: Disp. in water

Acryl-Eze™ MP [Colorcon http://www.colorcon.com]
Chem. Descrip.: Methacrylic acid copolymer system
Uses: Enteric coating for pharmaceutical multi-particulates, such as beads, granules and drug crystals
Features: Dry, pigmented, one-step, fully formulated system; easy to dispense and
Actiphyte® of Patchouli [Active Organics http://www.activeorganics.com]
Chem. Descrip.: Patchouli extract See Patchouli (Pogostemon cablin) extract
Uses: Herbal extract used in acne and athlete’s foot preps. for its antiseptic and stimulating props.
Properties: Med. amber liq.; char. odor; sol. in water; sp.gr. 1.02-1.05; pH 4.0-6.5
Use Level: 5-10% (skin care prods.)

Actiphyte® of Pennyroyal [Active Organics http://www.activeorganics.com]
Chem. Descrip.: Pennyroyal (Mentha pulegium) extract
CAS 90064-00-9; EINECS/ELINCS 290-061-1
Uses: Acts as a diuretic and used locally helps itching and burning skin
Properties: Lt. to medi. amber liq.; characteristic odor; sol. in water; sp.gr. 1.007 +/- 0.00; pH 5.2 +/- 0.3
Hazardous Decomp. Prods.: None
NFPA: Health 0, Flammability 0, Reactivity 0

Activera™ 10X [Active Organics http://www.activeorganics.com]
Chem. Descrip.: Aloe barbadensis gel
CAS 94349-62-9; EINECS/ELINCS 305-181-2
Uses: Full range of prods. for topical use as a soothing and healing aid
Properties: Cl. colorless to pale yel. liq.; completely sol. in water; sp.gr. 1.02 +/- 0.03; b.p. 212 F
Precaution: Avoid strong oxidizing agents, acids and alkaials
Hazardous Decomp. Prods.: None

Trade Name Reference

Acylan [Croda Inc http://www.croda.com; http://www.crodausa.com; Croda Chem. Europe Ltd http://www.croda.co.uk]
Chem. Descrip.: Acetylated lanolin
CAS 61788-48-5; EINECS/ELINCS 262-979-2
Uses: Emollient, water-repellent film-former for pharmaceuticals, ointments
Features: Lipid; produces clear sol'ns. in min. oils
Properties: Lt. yel. soft solid; bland odor; sol. in min. oil and soft waxy hydrophobic films; m.p. 32-39 C; acid no. 2.0 max.; iodine no. 30 max.; sapon. no. 100-125; hyd. no. 12 max.; 100% act.
Use Level: 1-10%

Adeka PEG-200 [Asahi Denka Kogyo http://www.adk.co.jp]
Chem. Descrip.: PEG-4
CAS 25322-68-3; EINECS/ELINCS 203-989-9
Uses: Surfactant, wetting agent, lubricant for pharmaceuticals
Properties: Transparent liq.; m.w. 200; nonionic
Toxicology: Low toxicity; mild irritation

Adeka PEG-300 [Asahi Denka Kogyo http://www.adk.co.jp]
Chem. Descrip.: PEG-6
CAS 25322-68-3; EINECS/ELINCS 220-045-1
Uses: Surfactant, wetting agent, lubricant for pharmaceuticals
Features: Good sol. and compat.
Properties: Transparent liq.; m.w. 300; nonionic
Toxicology: Low toxicity; mild irritation

Adeka PEG-400 [Asahi Denka Kogyo http://www.adk.co.jp]
Chem. Descrip.: PEG-8
CAS 25322-68-3; EINECS/ELINCS 225-856-4
Uses: Surfactant, wetting agent, lubricant for pharmaceuticals
Features: Good sol. and compat.
Properties: Transparent liq.; m.w. 400; nonionic
Toxicology: Low toxicity; mild irritation

Adeka PEG-600 [Asahi Denka Kogyo http://www.adk.co.jp]
Chem. Descrip.: PEG-12
CAS 25322-68-3; EINECS/ELINCS 229-859-1
Uses: Surfactant, wetting agent, lubricant for pharmaceuticals
Features: Good sol. and compat.
Properties: Transparent liq.; m.w. 600; nonionic
Toxicology: Low toxicity; mild irritation

Adeka PEG-1000 [Asahi Denka Kogyo http://www.adk.co.jp]

Handbook of Pharmaceutical Additives, Third Edition 26
Trade Name Reference

PEG-20
Chem. Descrip.: Surfactant, wetting agent, lubricant for pharmaceuticals
Properties: Good sol. and compat.

PEG-1500
Chem. Descrip.: Surfactant, wetting agent, lubricant for pharmaceuticals
Properties: Wh. paste; m.w. 1000; nonionic

PEG-4000
Chem. Descrip.: Surfactant, wetting agent, lubricant for pharmaceuticals
Properties: Wh. paste; m.w. 1500

PEG-6000
Chem. Descrip.: Surfactant, wetting agent, lubricant for pharmaceuticals
Properties: Wh. flake; m.w. 6000

PEG-20,000
Chem. Descrip.: Surfactant, wetting agent, lubricant for pharmaceuticals
Properties: Wh. flake; m.w. 20,000

PEG-1500
Chem. Descrip.: Sodium methyl cocoyl taurate
Properties: Wh. powd.; anionic; 95% min. conc.
Use Level: 0.5-10%

PEG-4000
Chem. Descrip.: Sodium methyl cocoyl taurate
Properties: Wh. flake; m.w. 20,000

PEG-6000
Chem. Descrip.: Sodium methyl cocoyl taurate
Properties: Wh. flake; m.w. 6000

PEG-2000
Chem. Descrip.: Sodium methyl cocoyl taurate
Properties: Wh. flake; m.w. 20,000

Sorbitan stearate ester
Chem. Descrip.: Detergent, emulsifier, foaming agent, wetting agent, dispersant for oral and topical pharmaceuticals, germicidal scrubs, oral hygiene preps., gum-sensitive toothpaste, mouthwash
Properties: Wh. powd.; anionic; 95% min. conc.

ADM Clintose® CR 10
Chem. Descrip.: Maltodextrin
Properties: Wh. powd., odorless, bland taste; 90% min. through #60 mesh sieve; 80% min. through #100 mesh sieve; dens. 34.0 lbs/ft3; pH 4.7 (20% sol'n.); 99.7% act., 8.5% moisture

ADM Clintose® CR 15
Chem. Descrip.: Maltodextrin
Properties: Wh. powd., odorless, bland taste; 90% min. through #60 mesh sieve; 80% min. through #100 mesh sieve; dens. 34.0 lbs/ft3; pH 4.7 (20% sol'n.); 99.7% act., 8.5% moisture

Sorbitan stearate
Chem. Descrip.: Detergent, emulsifier, foaming agent, wetting agent, dispersant for oral and topical pharmaceuticals, germicidal scrubs, oral hygiene preps., gum-sensitive toothpaste, mouthwash
Properties: Wh. powd.; anionic; 95% min. conc.

Adinol CT95SD
Chem. Descrip.: Detergent, emulsifier, foaming agent, wetting agent, dispersant for oral and topical pharmaceuticals, germicidal scrubs, oral hygiene preps., gum-sensitive toothpaste, mouthwash
Properties: Wh. powd.; anionic; 95% min. conc.

Europe Ltd
Chem. Descrip.: Maltodextrin
Properties: Wh. powd., odorless, bland taste; 90% min. through #60 mesh sieve; 80% min. through #100 mesh sieve; dens. 34.0 lbs/ft3; pH 4.7 (20% sol'n.); 99.7% act., 8.5% moisture

Adinol CT95SD
Chem. Descrip.: Detergent, emulsifier, foaming agent, wetting agent, dispersant for oral and topical pharmaceuticals, germicidal scrubs, oral hygiene preps., gum-sensitive toothpaste, mouthwash
Properties: Wh. powd.; anionic; 95% min. conc.

Use Level: 0.5-10%

Precaution: Wear safety glasses; flammable dust when finely divided and suspended in air; keep away from sources of ignition; avoid strong oxidizers

Hazardous Decomp. Prods.: None

ADM Clintose® CR 15
Chem. Descrip.: Maltodextrin
Properties: Wh. powd., odorless, bland taste; 90% min. through #60 mesh sieve; 80% min. through #100 mesh sieve; dens. 34.0 lbs/ft3; pH 4.7 (20% sol'n.); 99.7% act., 8.5% moisture

Precaution: Wear safety glasses; flammable dust when finely divided and suspended in air; keep away from sources of ignition; avoid strong oxidizers

Hazardous Decomp. Prods.: None
Trade Name Reference

ADM Clintose® CR 18 [ADM Corn Processing http://www.adm.org/naen/ahn/cornprocessing.asp]
Chem. Descrip.: Maltodextrin
Chem. Analysis: Moisture 5%
CAS 9050-36-6; EINECS/ELINCS 232-940-4
Uses: Binder, solubilizer, crystal growth inhibitor, viscosifier, bodying agent, film former in pharmaceutical apps.
Features: Nonhygroscopic; nonsweet, nutritive saccharide
Regulatory: USP, FCC, GRAS, FDA 21 CFR 184.1444
Properties: Wh. powd., odorless, bland taste; 90% min. through #60 mesh sieve; 80% min. through #100 mesh sieve; dens. 35.0 lbs/ft³; pH 4.7 (20% sol'n.); 99.7% act., 8.5% moisture
Toxicology: Inh. may cause irritation
Precaution: Wear safety glasses; flammable dust when finely divided and suspended in air; keep away from sources of ignition; avoid strong oxidizers
Hazardous Decomp. Prods.: None

Chem. Descrip.: Refined dextrose See Glucose
Chem. Analysis: Moisture 8.5%; sulfated ash 0.02%
CAS 50-99-7; EINECS/ELINCS 200-075-1
Uses: Sweetener, flavor for pharmaceuticals, tableting
Features: Features mild sweetness, natural flavor enhancement, high fermentability, negative heat of sol'n., high osmotic pressure
Regulatory: USP, FCC, FDA 21 CFR 168.110, 168.111
Properties: Wh. free-flowing cryst., odorless, bland sweet taste; 99% min. through #16 screen; 50% min. through #200 screen; 50% sol. in water @ R.T.; dens. 34.0 lbs/ft³; m.p. 83 C; 8.5% moisture
Toxicology: Inh. may cause irritation
Precaution: Avoid ignition sources where fine dusts are generated
Hazardous Decomp. Prods.: CO vapors
Storage: Store @ R.T.

ADM Clintose® Dextrose B [ADM Corn Processing http://www.adm.org/naen/ahn/cornprocessing.asp]
Chem. Descrip.: Refined dextrose See Glucose
Chem. Analysis: Moisture 8.5%; sulfated ash 0.02%
CAS 50-99-7; EINECS/ELINCS 200-075-1
Uses: Sweetener, flavor for pharmaceuticals, tableting
Features: Features mild sweetness, natural flavor enhancement, high fermentability, negative heat of sol'n., high osmotic pressure
Regulatory: USP, FCC, FDA 21 CFR 168.110, 168.111
Properties: Wh. free-flowing cryst., odorless, bland sweet taste; 99% min. through #16 screen; 50% min. through #200 screen; 50% sol. in water @ R.T.; dens. 34.0 lbs/ft³; m.p. 83 C; 8.5% moisture
Toxicology: Inh. may cause irritation
Precaution: Wearing dust mask if dust is nuisance; avoid ignition sources where fine dusts are generated

ADM Clintose® Dextrose C [ADM Corn Processing http://www.adm.org/naen/ahn/cornprocessing.asp]
Chem. Descrip.: Refined dextrose See Glucose
Chem. Analysis: Moisture 8.5%; sulfated ash 0.02%
CAS 50-99-7; EINECS/ELINCS 200-075-1
Uses: Sweetener, flavor for pharmaceuticals, tableting
Features: Features mild sweetness, natural flavor enhancement, high fermentability, negative heat of sol'n., high osmotic pressure
Regulatory: USP, FCC, FDA 21 CFR 168.110, 168.111
Properties: Wh. free-flowing cryst., odorless, bland sweet taste; 99% min. through #16 screen; 50% min. through #200 screen; 50% sol. in water @ R.T.; dens. 34.0 lbs/ft³; m.p. 83 C; 8.5% moisture
Toxicology: Inh. may cause irritation
Precaution: Avoid ignition sources where fine dusts are generated
Hazardous Decomp. Prods.: CO vapors
Storage: Store @ R.T.
Trade Name Reference

ADM Clintose® Dextrose Greens  [ADM Corn Processing]
Chem. Descrip.: Glucose syrup  See Glucose, liquid
Chem. Analysis: Dry substance 83.6%; sulfated ash 0.02%
CAS 8029-43-4; EINECS/ELINCS 232-436-4
Uses: Sweetener, flavor for pharmaceutical prods.
Features: Economical source of dextrose affording the advantages of liq. handling
Regulatory: USP, FCC, FDA 21 CFR 184.1866
GRAS
Properties: Water-wh. to cl. yel. liq. characteristic odor; sweet taste; sol. in water; sp. gr. 1.35; pH 4.2
Toxicology: Nontoxic
Hazardous Decomp. Prods.: None
Storage: Store @ 130 F to avoid crystallizations

ADM Clintose® Dextrose VF  [ADM Corn Processing]
Chem. Descrip.: Refined dextrose  See Glucose
Chem. Analysis: Moisture 8.5%; sulfated ash 0.02%
CAS 50-99-7; EINECS/ELINCS 200-075-1
Uses: Sweetener, flavor for pharmaceuticals, tableting
Features: Used where fine particle size is required; features mild sweetness, natural flavor enhancement, high fermentability, negative heat of sol’n., high osmotic pressure
Regulatory: USP, FCC, FDA 21 CFR 168.110, 168.111
Properties: Lt. colored cl. bright fluid to visc. liq., mild ester odor; m.w. 13,500; sp.gr. 1.130; visc. 79,250 cps; pour pt. 35 F; acid no. 3; hyd. no. 2; flash pt. 575 F; ref. index 1.470
Toxicology: Inh. may cause irritation
Precaution: Avoid ignition sources where fine dusts are generated
Storage: Store @ R.T. with 50% relative humidity

ADM Clintose® Granular Dextrose  [ADM Corn Processing]
Chem. Descrip.: Glucose syrup and fructose  See Glucose, liquid
Chem. Analysis: Moisture = 23%; solids = 76.7%

Admex® 760  [Velsicol; Harwick Std. Distrib.]
Chem. Descrip.: Ultra high m.w. polymeric adipate polyester  See Polyester adipate
Uses: Plasticizer for skin patch drug delivery
Features: Max. resist. to extraction, migration, and volatility; high m.w. for solv.-resist.; nonmigratory; permanent
Properties: Lt. colored cl. bright fluid to visc. liq., mild ester odor; m.w. 13,500; sp.gr. 1.130; visc. 79,250 cps; pour pt. 35 F; acid no. 3; hyd. no. 2; flash pt. 575 F; ref. index 1.470
Trade Name Reference

CAS 8029-43-4; 57-48-7; EINECS/ELINCS 232-436-4; 200-333-3

Uses:  
Sweetener, humectant, crystallization control agent, viscosity reducer, flavor enhancer flavor and color development aid, texture softener, water activity reducer, and freeze point depressant in pharmaceutical syrups

Properties: Cl. lt. straw-colored liq. characteristic odor; sweet taste; completely misc. in water; sp. gr. 1.35; visc. 1100 cps; b.p. 226 F; pH 4.0-4.9

Toxicology: Nontoxic

Hazardous Decomp. Prods.: None

Storage: Store @ 95-105 F

Advantose™ 100 [SPI Pharma  http://www.spipharma.com]

Chem. Descrip.: Maltose powd.

CAS 69-79-4; EINECS/ELINCS 200-716-5

Uses: Excipient, flow aid, disintegrant for direct compression of pharmaceutical tablets, esp. chewables

Features: Nonhygroscopic; improves compressibility and disintegration of other materials; desirable mouthfeel; tolerates variability in lubricant levels; produces stable tablets

Properties: Spray-dried powd., spherical shape; 20% on 80 mesh, 16% on 100 mesh, 43% on 200 mesh; dens. 0.67-0.72 g/cc (bulk), 0.73-0.81 g/cc (tapped); surf. area 0.08 m²/g; m.p. 120-125 C; pH 4-6; 92% min. assay (maltose), 3% max. glucose; 7% max. moisture

Advantose™ FS 95 [SPI Pharma  http://www.spipharma.com]

Chem. Descrip.: Fructose (90%) and starch (5%)

CAS 57-48-7; 9005-25-8

Uses: Excipient, flow aid for direct compression for pharmaceutical tablets, nutraceuticals, and chewable vitamins; sweetener, flavor masking agent in chewable tablets

Features: Good compressibility; reduced friability; tablets hold shape well, but are very chewable; lower hygroscopicity than std. fructose; easier handling

Regulatory: Canada DSL; Europe EINECS

Properties: Wh. cryst. powd.; 57% on 40 mesh, 81% on 60 mesh, 87% on 80 mesh; desirable sweetness; bulk dens. 0.55-0.75 g/cc; 1-2% moisture

Toxicology: TSCA listed

Precaution: Wear impervious gloves, safety glasses with side shields

NFPA: Health 1, Flammability 1, Reactivity 0

Storage: Store in cool, well-ventilated place in tightly closed container

AEPD® [ANGUS  http://www.dow.com/angus/]

Chem. Descrip.: 2-Amino-2-ethyl-1,3-propanediol  See Aminoethyl propanediol

CAS 115-70-8; EINECS/ELINCS 204-101-2

Uses: Pharmaceutical intermediate

Properties: M.w. 119.2; water-sol.; m.p. 37.5 C; b.p. 152 C; flash pt. > 200 F (TCC); pH 10.8 (0.1M aq. sol'n.); nonionic; 100% conc.

Chem. Descrip.: Fumed silica  See Silica, fumed

Chem. Analysis: SiO₂ (> 99.8%),

CAS 112945-52-5; EINECS/ELINCS 231-545-4

Uses: Thickener, reinforcing agent, anticaking agent, free-flow agent, stabilizer (providing storage stability) for pharmaceutical creams, lotions, emulsions; glidant in solid dosage forms; free-flow agent and bulking agent for powds.; inert carrier for actives improving tableting char., decreasing disintegration time, reducing coating time of pills

Features: Dust-free, high purity, excellent flow both loaded and unloaded

Regulatory: USP/NF, EP

Properties: Wh. powd.; odorless; 30 nm avg. particle size; hardly sol. in water; dens., tapped ≈ 280 g/l surf. area ≈ 300 m²/g; m.p. ≈ 1700 C; pH 3.5-5.5 (40 g/l suspension)

Toxicology: LD₅₀ (oral, rat) > 10,000 mg/kg, (dermal, rabbit) > 5000 mg/kg; noncarcinogenic; nonmutagenic

Environmental: EC₅₀ (daphnia magna, 24 h) > 10,000 mg/l

Precaution: Wear safety goggles

Hazardous Decomp. Prods.: None

Storage: 2 yr shelf life; store in closed containers under dry conditions protected from volatile substances

Chem. Descrip.: Fumed silica  See Silica, fumed
Chem. Analysis: SiO₂ (> 99.8%), Al₂O₃ (< 0.05%), TiO₂ (< 0.03%)
CAS 112945-52-5; EINECS/ELINCS 231-545-4
Uses: Adsorbent, anticaoking agent, glidant, suspending agent for pharmaceuticals
Features: Increases filler loading and/or extrudability
Properties: Wh. fluffy powd.; 14 nm avg. particle size; sp.gr. 2.2; dens. ≈ 100 g/l (densed); surf. area 150±15 m²/g; pH 3.5-4.3 (40 g/l suspension)
Toxicology: LD₅₀ (oral, rat) > 10,000 mg/kg; noncarcinogenic; nonmutagenic
Environmental: EC₅₀ (daphnia magna, 24 h) > 10,000 mg/l
Precaution: Wear safety goggles
Hazardous Decomp. Prods.: None
Storage: Store in closed containers under dry conditions
Trade Name Reference

silanes.com; Degussa AG/Aerosil & Silanes
http://www.degussa-bioactives.com; Eigenmann & Veronelli
http://www.eigver.it

Chem. Descrip.: Fumed silica  See Silica, fumed
Chem. Analysis: SiO2 (> 99.8%), Al2O3 (< 0.05%), TiO2 (< 0.03%), HCl (< 0.025%), Fe2O3 (< 0.01%)
CAS 112945-52-5; EINECS/ELINCS 231-545-4
Uses: Filler, adsorbent, anticaking agent, glidant, suspending agent for pharmaceuticals

Regulatory: FDA 21CFR §133.146(b), 160.105(a)(d), 172.230(a), 172.480, 173.340(a), 175, 176, 177, 573.940

Properties: Wh. fluffy powd.; 7 nm avg. particle size; sp.gr. 2.2; dens. ≈ 120 g/l; surf. area 380±30 m2/g; pH 3.6-4.3 (in water:acetone 1:3)

Toxicology: TLV 10 mg/m3 total dust; LD50 > 20,000 mg/kg; may cause eye, skin, or respiratory tract irritation on overexposure

Precaution: Incompat. with strong bases and hydrofluoric acid

Chem. Descrip.: Amorphous, anhydrous, hydrophobic colloidal silica  See Silica, hydrophobic
CAS 68611-44-9; EINECS/ELINCS 271-893-4
Uses: Glidant for improving powder flow, especially suitable for very hygroscopic and/or cohesive powders; release behavior adjuster for active ingredients; viscosity adjuster for thickening nonpolar pharmaceutical oils; stabilizer for water in oil (w/o) emulsions

Regulatory: USP/NF, EP, DMF 1115
Properties: Wh. powd.; odorless; 16 nm avg. particle size; hardly sol. in water; sp.gr. 2.2; dens. ≈ 90 g/l; surf. area 110±20 m2/g; m.p. ≈ 1700 C; pH 3.5-5.5; (40 g/l suspension)

Storage: 2 yr shelf life; store in closed containers under dry conditions

Chem. Descrip.: Syn. amorphous fumed silica  See Silica, fumed
Chem. Analysis: SiO2 (> 99.8%), Al2O3 (< 0.05%), TiO2 (< 0.03%), HCl (< 0.025%), Fe2O3 (< 0.01%)
CAS 112945-52-5; EINECS/ELINCS 231-545-4
Uses: Suspending agent and redispersion aid in pharmaceutical aerosols

Features: Hydrophobic
Properties: Wh. fluffy powd.; 7 nm avg. particle size; sp.gr. 2.2; dens. ≈ 80 g/l (densed); surf. area (BET) 260±30 m2/g; pH 5.5-7.5 (in water: ethanol 1:3)

Chem. Descrip.: Silica dimethyl silylate  See Silica, fumed
Chem. Analysis: SiO2 (> 99.8%), HCl (< 0.1%), Al2O3 (< 0.05%), TiO2 (< 0.03%)
CAS 60842-32-2; EINECS/ELINCS 271-893-4
Uses: Adsorbent, suspending agent in pharmaceuticals

Features: Hydrophobic
Properties: Wh. fluffy powd.; 12 nm avg. particle size; dens. ≈ 90 g/l (densed); surf. area 170±20 m2/g; pH 3.4-4.2 (in water: ethanol 1:3)
Trade Name Reference

Aerosil® R8200 [Degussa/Aerosil & Silanes
http://www.aerosil.com; http://www.sivento-silanes.com; Degussa AG/Aerosil & Silanes

Properties: Wh. powd.; odorless
Toxicology: LD50 (oral, rat) > 10,000 mg/kg, (skin, rabbit) > 5000 mg/kg; LD0 (inh., rat, 4 h) > 0.139 mg/l

Agnique AAM 12CM [Cognis/Care Chems.;
Cognis Canada; Cognis GmbH/Care Chems. http://www.cognis.com]
Chem. Descrip.: Cocamide MEA
CAS 68140-00-1; EINECS/ELINCS 268-770-2
Uses: Skin protectant
Properties: Pale yel. beads, faint fatty odor; sol. in common fatty materials; nonionic; 100% conc.
Storage: 1 yr. min. storage life in closed original containers at temps. below 40 C, protected against moisture

Chem. Descrip.: Cocamidopropyl betaine
CAS 61789-40-0; EINECS/ELINCS 263-058-8
Uses: Raw material for mfg. of pharmaceutical surfactants
Properties: Lt. yel. cl. pumpable liq., mild inherent odor; pH 6.0-7.5; amphoteric; 29-32% act.
Storage: 1 yr. min. storage stability in sealed original containers @ 0-40 C; may have corrosive effect on stainless steel tanks due to high salt content

Chem. Descrip.: PEG-40 hydrogenated castor oil
CAS 61788-85-0
Uses: Solubilizer and o/w emulsifier for pharmaceuticals; solubilizer for fragrances, essential oils in alcoholic/aq. systems
Properties: Wh. wax; m.w. ≈ 3000; dens. 1.022-1.026 g/cm³ (70 C); HLB 14-16; acid no. 1 max.; sapon. no. 40-50; hyd. no. 50-70; cloud pt. 80-86 C (1% in 5% NaCl sol'n.); pH 6-7 (1%); nonionic; 100% conc.; 1% max. water

Chem. Descrip.: PEG-60 hydrogenated castor oil
CAS 61788-85-0
Uses: Solubilizer and o/w emulsifier for pharmaceuticals; solubilizer for fragrances, essential oils in alcoholic/aq. systems
Properties: Wax; m.w. ≈ 3740; dens. 1.034-1.038 g/cm³; solid. pt. < 22 C; HLB 15-17; acid no. < 1; sapon. no. 40-50; hyd. no. 50-70; pH 6-7 (1%); nonionic; 100% conc.

Trade Name Reference

Ajidew N-50 [Ajinomoto
http://www.ajinomoto.co.jp;
http://www.ajinomoto.com]
Chem. Descrip.: Sodium PCA aq. sol'n.
CAS 28874-51-3; EINECS/ELINCS 249-277-1
Uses: Humectant in dentifrices, medicinal supplies
Features: Nat.
Properties: Liq.; pH 6.8-7.4; 50% act.

Akofine NF [Jarchem Ind.
http://www.jarchem.com]
Chem. Descrip.: Hydrogenated cottonseed oil
CAS 68334-00-9; EINECS/ELINCS 269-804-9
Uses: Tableting aid for pharmaceuticals (tablet lubricant, tablet coating, sustained release)
Features: High melting
Regulatory: EP, USP/NF compliance
Properties: Powd.

Akoline HH [Aarhus Karlshamn A/S
http://www.aak.com/]
Chem. Descrip.: Caprylic/capric glycerides
CAS 85409-09-2; EINECS/ELINCS 287-075-5
Uses: Absorption enhancer for poorly water-sol. drugs; bioavailability enhancer, emulsifier, solubilizer, mild antibacterial agent in hard and soft gelatin capsules; also used in transdermal apps.
Features: High capric acid content
Regulatory: USP, GRAS, FDA 21, CFR § 184.1505, E471
Properties: Semisolid @ R.T. m.p. 25-28 C; HLB 5-6; nonionic

Akoline R [Aarhus Karlshamn A/S
http://www.aak.com/]
Chem. Descrip.: Caprylic/capric glycerides
CAS 85409-09-2; EINECS/ELINCS 287-075-5
Uses: Absorption enhancer for poorly water-sol. drugs; bioavailability enhancer, emulsifier, solubilizer, mild antibacterial agent in hard and soft gelatin capsules; also used in transdermal apps.
Features: Low capric acid content
Regulatory: USP, GRAS, FDA 21, CFR § 184.1505, E471
Properties: Semisolid @ R.T. m.p. 25-28 C; nonionic; HLB 5.0-6.0

Akoline LM [Aarhus Karlshamn A/S
http://www.aak.com/]
Chem. Descrip.: Lipid
Uses: Excipient, vehicle, solubilizer for poorly water-sol. substances, dispersant, bioavailability enhancer for pharmaceuticals, esp. hard gelatin capsules, soft gelatin capsules, tablets, granules, controlled-release formulations
Features: Disperses rapidly in GI tract, enhancing wettability of the drug; crystallizes rapidly a few degrees below m.p.; inert
Properties: Solid; water-sol.; visc. 60 mPa•s (60 C); m.p. 44 C; HLB 14

Akomed E [Aarhus Karlshamn A/S
http://www.aak.com/]
Chem. Descrip.: Caprylic/capric triglycerides
EINECS/ELINCS 265-724-3
Uses: Penetrant, spreading agent, dispersant for pharmaceuticals; carrier system for sol. drugs; bioavailability enhancer, emulsifier, solubilizer, mild antibacterial agent in hard and soft gelatin capsules; also used in transdermal apps.
Features: Exc. oxidation stability; low cloud pt.
Regulatory: EP compliance
Properties: Low color and odor

Akomed R [Aarhus Karlshamn A/S
http://www.aak.com/]
Chem. Descrip.: Caprylic/capric triglyceride
Uses: Penetrant, spreading agent, dispersant for pharmaceuticals; carrier system for
capsules
Features: Exc. oxidation stability; low cloud pt.
Regulatory: EP compliance
Properties: Low color and odor
Akosoft 36 [Aarhus Karlshamn A/S
http://www.aak.com/]
Chem. Descrip.: Lipid  See Hydrogenated coco-glycerides
Uses: Hard fat for use in pharmaceutical dermal preps.; carrier system for capsules
Regulatory: EP compliance
Properties: Semisolid
Akypo®-Soft 45 NV [Kao Corp.
http://www.kao.co.jp]
Chem. Descrip.: Sodium laureth-6 carboxylate
CAS 33939-64-9
Uses: Surfactant for medicinal liq. soaps, feminine hygiene prods.
Features: Mild; well tolerated by optic mucosa
Properties: Water-wh. liq., odorless; m.w. 457; sp.gr. 1.0 kg/l; visc. 100 mPa•s; pH 6.5-7.5; anionic; 22% act. in water
Toxicology: Nonirritant
Environmental: Biodeg.
Albagel Premium USP 4444 [MPSI
http://www.mp-solutionsinc.com]
Chem. Descrip.: Bentonite
CAS 1302-78-9; EINECS/ELINCS 215-108-5
Uses: Thickener, protective colloid, emulsifier, suspending agent in pharmaceuticals
Alberger® [Cargill/Salt
http://www.cargillsalt.com]
Chem. Descrip.: Sodium chloride; crystalline salt refined by Alberger process
CAS 7647-14-5; EINECS/ELINCS 231-598-3
Uses: In personal care prods. (denture cleaners, first aid prods., mouthwash, toothpaste
Albone® 35 CG [Arkema
http://www.total.com/]
Chem. Descrip.: Hydrogen peroxide
CAS 7722-84-1; EINECS/ELINCS 231-765-0
Uses: For prep. of stable dilute sol'n's for consumer use in pharmaceutical applics.
Features: Specially stabilized grade; meets USP specs. when properly diluted to 3%
Regulatory: FDA approved
Properties: Colorless cl. liq., sl. pungent irritating odor; sp.gr. 1.196 mg/m3; dens. 9.98 lb/gal; m.p. -52 C; b.p. 114 C (760 mm Hg); pH 1.5-2.0; 50% conc., 23.5% act. oxygen
Toxicology: ACGIH TLV 1 ppm, 1.4 mg/m3, 8 h TWA; LD50 (oral, rat) 1232 mg/kg, (skin, rabbit) > 2000 mg/kg; may cause severe irritation or burns of skin, eyes, mucous membranes; ing. may cause upper GI irritation
Environmental: Aquatic LC50 (catfish, 96 h) 37.4 mg/l
Precaution: Corrosive, strong oxidizer; mixture with org. materials may be explosive; incompat. with flammables, cyanides, nitric acid, other oxidizing/reducing agents; liberation of oxygen gas may result in dangerous pressures
Storage: Store in orig. vented container in dry location, away from sunlight and heat sources; vent holes in bung cap must be kept open and free of obstruction; do not store on wooden pallets
Albone® 50 CG [Arkema
http://www.total.com/]
Chem. Descrip.: Hydrogen peroxide
CAS 7722-84-1; EINECS/ELINCS 231-765-0
Uses: For prep. of stable dilute sol'n's for consumer use in pharmaceutical applics.
Features: Specially stabilized grade; meets USP specs. when properly diluted to 3%
Regulatory: FDA approved
Properties: Colorless cl. liq., sl. pungent irritating odor; sp.gr. 1.133 mg/m3; dens. 9.45 lb/gal; m.p. -33 C; b.p. 108 C (760 mm Hg); pH 2.3-2.8; 35% conc., 16.5% act. oxygen
Toxicology: ACGIH TLV 1 ppm, 1.4 mg/m3, 8 h TWA; LD50 (oral, rat) 1232 mg/kg, (skin, rabbit) > 2000 mg/kg; may cause severe irritation or burns of skin, eyes, mucous membranes; ing. may cause upper GI irritation
Environmental: Aquatic LC50 (catfish, 96 h) 37.4 mg/l
Precaution: Corrosive, strong oxidizer; mixture with org. materials may be explosive; incompat. with flammables, cyanides, nitric acid, other oxidizing/reducing agents; liberation of oxygen gas may result in dangerous pressures
Storage: Store in orig. vented container in dry location, away from sunlight and heat sources; vent holes in bung cap must be kept open and free of obstruction; do not store on wooden pallets
Albone® 70 CG [Arkema http://www.total.com/]
Chem. Descrip.: Hydrogen peroxide
CAS 7722-84-1; EINECS/ELINCS 231-765-0
Uses: For prep. of stable dilute sol'ns. for consumer use in pharmaceutical applics.
Features: Specially stabilized grade; meets USP specs. when properly diluted to 3%
Regulatory: FDA approved
Properties: Colorless cl. liq., sl. pungent irritating odor; sp.gr. 1.3 mg/m3; dens. 10.75 lb/gal; m.p. -40 C; b.p. 126 C (760 mm Hg); pH 0.4-0.8; 68% conc., 32.9% act. oxygen
Toxicology: ACGIH TLV 1 ppm, 1.4 mg/m3, 8 h TWA; LD50 (oral, rat) 1232 mg/kg, (skin, rabbit) > 2000 mg/kg; may cause severe irritation or burns of skin, eyes, mucous membranes; ing. may cause upper GI irritation
Environmental: Aquatic LC50 (catfish, 96 h) 37.4 mg/l
Precaution: Corrosive, strong oxidizer; mixture with org. materials may be explosive; incompat. with flammables, cyanides, nitric acid, other oxidizing/reducing agents; liberation of oxygen gas may result in dangerous pressures
Storage: Store in orig. vented container in dry location, away from sunlight and heat sources; vent holes in bung cap must be kept open and free of obstruction; do not store on wooden pallets

Chem. Descrip.: Dicalcium phosphate anhyd. USP, FCC
CAS 7757-93-9; EINECS/ELINCS 231-826-1
Uses: Dispersant in tableting; source of calcium and phosphorus in preps. for infants, invalids, and geriatric patients
Features: Noncombustible
Regulatory: FDA 21CFR §182.1317, 182.8217; DOT nonregulated; SARA nonreportable; EU, UK compliance
Properties: Wh. fine powd.; 3% on 325 mesh; odorless; tasteless; insol. in water; m.w. 136.06; 97-105% assay; 7-8.5% loss on ignition; 28.5-30.8% calcium as CaO
Toxicology: LD50 (oral, rat) > 10,000 mg/kg; may cause eye irritation; may cause sl. transient skin irritation on prolonged contact; dusts may cause upper respiratory tract irritation; ing. of lg. amts. may cause abdominal cramps, nausea, vomiting, diarrhea; TSCA listed
Hazardous Decomp. Prods.: None known
HMIS: Health 0, Flammability 0, Reactivity 0
Storage: Store in closed containers in cool, dry, sanitary area; protect packages from water and contamination

Alcolec® Granules [Am. Lecithin http://www.americanlecithin.com]
Chem. Descrip.: Lecithin FCC
CAS 8002-43-5; EINECS/ELINCS 232-307-2
Uses: Wetting agent, release agent, o/w emulsifier, stabilizer, diet supplement in pharmaceuticals
Regulatory: FDA 21CFR §184.1400, GRAS; kosher approved
Properties: Lt. tan/yel. gran., bland odor and taste; disp. in water and paraffin (50 g/l); mild typical odor; dens. <1 g/cm3; pH 5-8 (10 g/l water); nonionic; 97% act., 1% max. moisture
Environmental: Biodegrad.
Precaution: Avoid sources of heat
Hazardous Decomp. Prods.: None
Storage: Store below 25 C; 1 yr. shelf life in original, unopened container

Alcolec® PS 20 P [Am. Lecithin http://www.americanlecithin.com]
Chem. Descrip.: Powdered soybean lecithin with tricalcium phosphate (0.5% max.) as a flow agent See Calcium phosphate tribasic
Chem. Analysis: 20% min. phosphatidylserine; 1.5% max. moisture
CAS 8030-76-0; 1306-06-5; EINECS/ELINCS 310-129-7; 231-840-8.
Uses: Wetting agent, release agent, o/w emulsifier, stabilizer, nutritional supplements
Features: Hygroscopic; oxidation-sensitive
Regulatory: FDA §21 CFR 184,1400 GRAS
Properties: Lt. tan/yel. powd.; disp. in water and paraffin (50 g/l); mild typical odor; dens. <1 g/cm3; pH 5-8 (10 g/l water); nonionic
Environmental: Biodegrad.
Precaution: Do not expose to direct heat or open fire; avoid strong oxidizers
Storage: 2 yr. shelf life in original, unopened container; store @ R.T.

Alcolec® PS 40 P [Am. Lecithin http://www.americanlecithin.com]
Chem. Descrip.: Powdered soybean lecithin with tricalcium phosphate (0.5% max.) as a
Trade Name Reference

flow agent See Calcium phosphate tribasic
Chem. Analysis: 40% min. phosphatidylserine; 1.5% max. moisture
CAS 8030-76-0; 1306-06-5; EINECS/ELINCS 310-129-7; 231-840-8.
Uses: Wetting agent, release agent, o/w emulsifier, stabilizer, nutritional supplements
Regulatory: FDA §21 CFR 184,1400 GRAS
Properties: <1 g/cm3; pH 5-8 (10 g/l water); nonionic and paraffin (50 g/l); mild typical odor; dens.
2 yr. shelf life in original, unopened container; store @ cool temps.

Alcolec® PS 50 P [Am. Lecithin http://www.americanlecithin.com]
Chem. Descrip.: Powdered soybean lecithin with tricalcium phosphate (0.5% max.) as a flow agent See Calcium phosphate tribasic
Chem. Analysis: 50% min. phosphatidylserine; 2.0% max. moisture
CAS 8030-76-0; 1306-06-5; EINECS/ELINCS 310-129-7; 231-840-8.
Uses: Wetting agent, release agent, o/w emulsifier, stabilizer, nutritional supplements
Features: Hygroscopic; oxidation-sensitive
Regulatory: FDA §21 CFR 184,1400 GRAS
Properties: Yelsh.-brown powd.; disp. in water and paraffin (50 g/l); mild typical odor; dens.
<1 g/cm3; pH 5-8 (10 g/l water); nonionic
Environmental: Biodegrad.
Precaution: Do not expose to direct heat or open fire; avoid strong oxidizers
Storage: 2 yr. shelf life in original, unopened container protected from light; store @ R.T.

Alcolec® Z-3 [Am. Lecithin http://www.americanlecithin.com]
Chem. Descrip.: Hydroxylated lecithin
CAS 8029-76-3; EINECS/ELINCS 232-440-6
Uses: Wetting agent, emulsifier, solubilizer, dispersant for pharmaceuticals
Regulatory: FDA 21 CFR §172.814, GRAS; kosher approved
Properties: Lt. amber liq.; sol. in most fat solv. except acetone; sp. gr. 1.03; visc. 8000 cps; acid no. < 38; flash pt. > 400 F; HLB 9.7;
nonionic; < 1.5% moisture, < 42% oil content
Toxicology: May be irritating to eyes
Precaution: Wear splash goggles and impervious gloves
Storage: 18 mos. shelf life in original unopened container; store @ 60-9- F

Aldehyde C 14 Socalled [Symrise USA http://www.symrise.com]
Chem. Descrip.: γ-Undecalactone
CAS 104-67-6; EINECS/ELINCS 203-225-4
Uses: Syn. flavoring agent in pharmaceuticals

Aldehyde C 18 Socalled [Symrise USA http://www.symrise.com]
Chem. Descrip.: γ-Nonalactone
CAS 104-61-0; EINECS/ELINCS 203-219-1
Uses: Syn. flavoring agent in pharmaceuticals

Aldo® MCT [Lonza http://www.lonza.com]
Chem. Descrip.: Caprylic/capric triglyceride
CAS 65381-09-1; EINECS/ELINCS 265-724-3
Uses: Carrier or suspension medium for oil-sol. antibiotics and drugs; dietary supplements; min. oil replacement, emollient, emulsifier in pharmaceuticals
Properties: Liq.; low odor; bland taste; acid no. 0.10 max.; sapon. no. 345

Aldo® MCT KFG [Lonza http://www.lonza.com]
Chem. Descrip.: Caprylic/capric triglyceride
CAS 73398-61-5; EINECS/ELINCS 265-724-3
Uses: Carrier or suspension medium for oil-sol. antibiotics and drugs; dietary supplement; lubricant for gel capsules; solvent, diluent, and flavor fixative
Regulatory: Kosher
Properties: Cl. liq., neutral odor and taste; acid no. 0.10 max.; iodine no. 1.0 max.; sapon. no. 335-360; hyd. no. 10 max.; 0.1% max. moisture

Aldo® MLD KFG [Lonza http://www.lonza.com]
Chem. Descrip.: Glyceryl monolaurate, dispersible See Glyceryl laurate
CAS 142-18-7; EINECS/ELINCS 205-526-6
Uses: Emulsifier for pharmaceuticals
Regulatory: Kosher certified
Properties: Soft solid; HLB 6; acid no. 5; nonionic

Aldo® MO KFG [Lonza http://www.lonza.com]
Chem. Descrip.: Glyceryl monooleate See
Glycerol oleate
CAS 25496-72-4; EINECS/ELINCS 203-827-7
Uses: Emulsifier for pharmaceuticals
Regulatory: Kosher certified
Properties: Liq.; HLB 3; acid no. 2; sapon. no. 171; nonionic
Aldo® MS-20 KFG [Lonza http://www.lonza.com]
Chem. Descrip.: PEG-20 glyceryl stearate
CAS 68153-76-4
Uses: Emulsifier, solubilizer for pharmaceutical applics.
Properties: Solid; HLB 13.0; nonionic; 100% conc.
Aldo® MS KFG [Lonza http://www.lonza.com]
Chem. Descrip.: Glyceryl stearate
CAS 123-94-4
Uses: Emulsifier for pharmaceuticals
Regulatory: Kosher certified
Properties: Beads; HLB 4; acid no. 3; sapon. no. 163; nonionic
Aldo® PGHMS [Lonza http://www.lonza.com]
Chem. Descrip.: Propylene glycol monostearate
CAS 1323-39-3; EINECS/ELINCS 215-354-3
Uses: Emulsifier, stabilizer, solubilizer, emollient, lubricant, thickeners, plasticizer, anti-irritant, and conditioner in pharmaceuticals
Properties: Wh. flakes; sol. in ethanol, min. and veg. oils; insol. in water; HLB 3±1; iodine no. 1.0 max.; sapon. no. 170-185; nonionic; 100% conc.
Aldosperse® O-20 KFG [Lonza http://www.lonza.com]
Chem. Descrip.: 80% Glycerol stearate, 20% polysorbate 80
CAS 31566-31-1; 9005-65-6
Uses: Emulsifier, solubilizer for pharmaceutical applics.
Regulatory: FDA 21CFR §172.840, 184.1505 (GRAS); kosher
Properties: Lt. tan beads, mild odor, bland taste; 100% through 8 mesh, 5% max. through 100 mesh; m.p. 50-65 C; HLB 5; acid no. 2 max.; sapon. no. 140-155; nonionic; 100% conc.
Storage: Store in cool, dry area below 35 C

Chem. Descrip.: C10-12 parenth-2.5  See C10-12 parenth-3
CAS 66455-15-0
Uses: Surfactant, emulsifier for ointments
Properties: APHA 5 cl. liq.; sol. in hydrocarbons; sparingly sol. in water; m.w. 298; sp.gr. 0.94; visc. 12.8 cSt (100 F); m.p. 23-26 F; HLB 9; hyd. no. 188; pour pt. 24 F; flash pt. (PM) 259 F; pH 6.6 (1% aq.); nonionic
Environmental: Biodeg.
Storage: Nitrogen blanketing during storage and transfer is rec.

Chem. Descrip.: C10-12 parenth-3.1  See C10-12 parenth-3
CAS 66455-15-0
Uses: Surfactant, emulsifier for ointments
Properties: APHA 5 cl. liq.; sol. in hydrocarbons; sparingly sol. in water; m.w. 298; sp.gr. 0.94; visc. 12.8 cSt (100 F); m.p. 23-26 F; HLB 9; hyd. no. 188; pour pt. 24 F; flash pt. (PM) 259 F; pH 6.6 (1% aq.); nonionic
Environmental: Biodeg.
Storage: Nitrogen blanketing during storage and transfer is rec.

Chem. Descrip.: C12-16 parenth-1.3  See C12-16 parenth-1
CAS 68551-12-2
Uses: Surfactant, emulsifier for ointments
Properties: APHA 10 cl. liq.; sol. in hydrocarbons; sparingly sol. in water; m.w. 258; sp.gr. 0.869; visc. 17 cSt (100 F); m.p. 37-40 F; HLB 4.4; hyd. no. 222; pour pt. 39 F; cloud pt. 41 F (1% aq.); flash pt. (PM) 260 F; pH 6.7 (1% aq.); nonionic; 100% conc.
Environmental: Biodeg.
Storage: Nitrogen blanketing during storage and transfer is rec.

Chem. Descrip.: Methylsilanol mannuronate
CAS 128973-71-7; EINECS/ELINCS 310-104-0
Uses: Provides cutaneous hydration, lipolytic action, skin regeneration and maintenance, for cosmetic and health prods., milks, emulsions, creams, lotions, anti-aging formulations
Trade Name Reference

**Properties:** Pale yel. sl. opalescent liq., odorless; misc. with water; insol. in alcohols, glycols, hexane; sp.gr. 1.0; b.p. 100 C; pH 5.5

**Use Level:** 4-6%

**Toxicology:** Nontoxic

Alkamuls® EL-620  [Rhodia HPCII](http://www.rhodia-hpcii.com); Rhodia HPCII France [http://www.hpcii.rhodia.com]

**Chem. Descrip.:** PEG-30 castor oil

**CAS:** 61791-12-6

**Uses:** Emulsifier, wetting agent, pigment dispersant, lubricant, solubilizer for pharmaceuticals

**Properties:** Lt. brn. cl. visc. liq., mild oily odor; sol. in water, acetone, CCl₄, alcohols, veg. oil, ethers, toluene, xylene; sp.gr. 1.04-1.05; dens. 8.705 lb/gal; visc. 600-1000 cps; HLB 12.0; cloud pt. 42 C (1% aq.); flash pt. 291-295 C; surf. tens. 41 dynes/cm; nonionic; 100% act.

**Toxicology:** LD₅₀ (oral, rat) 40 g/kg; low oral toxicity; not primary skin or eye irritants

Alkamuls® EL-719  [Rhodia HPCII](http://www.rhodia-hpcii.com); Rhodia HPCII France [http://www.hpcii.rhodia.com]; C.P. Hall [http://www.cphall.com]

**Chem. Descrip.:** PEG-40 castor oil

**CAS:** 61791-12-6

**Uses:** Emulsifier for vitamins and drugs

**Properties:** Yel. cl. liq., oily odor; sol. in water, acetone, CCl₄, alcohols, veg. oil, ether, toluene, xylene; sp.gr. 1.06-1.07; dens. 8.9-9.0 lb/gal; visc. 500-800 cps; HL 13.6; cloud pt. 80 C (1% aq.); flash pt. 275-279 C; surf. tens. 38 dynes/cm (0.1%); nonionic; 96% min. act.

**Toxicology:** LD₅₀ (oral, rat) 70 g/kg; low oral toxicity; not primary skin or eye irritants

Alkamuls® PSML-20  [Rhodia HPCII](http://www.rhodia-hpcii.com)

**Chem. Descrip.:** Polysorbate 20

**CAS:** 9005-64-5

**Uses:** Emulsifier, solubilizer, visc. modifier, lubricant for pharmaceuticals

**Properties:** Yel. liq.; sol. in water, aromatic solv.; dens. 1.1 g/ml; HL 16.7; sapon. no. 40-50; nonionic; 97% act.

Alkalquat® DMB-451-50  [Rhodia Canada; Rhodia HPCII France](http://www.hpcii.rhodia.com)

**Chem. Descrip.:** Benzalkonium chloride

**CAS:** 8001-54-5

**Uses:** Wetting agent, emulsifier, biocide, disinfectant for use in antidandruff rinses, general disinfection and sanitization for hospitals, laundries

**Properties:** Pale-yel. liq.; sol. in water, ethanol, acetone, aliphatic solv.; sp.gr. 0.96; surf. tens. 33 dynes/cm (1%); cationic; 50% act.

Alkalquat® DMB-451-80  [Rhodia Canada; Rhodia HPCII France](http://www.hpcii.rhodia.com)

**Chem. Descrip.:** Benzalkonium chloride

**CAS:** 8001-54-5

**Uses:** Wetting agent, emulsifier, biocide, disinfectant for use in antidandruff rinses, general disinfection and sanitization for hospitals, laundries

**Properties:** Pale-yel. liq.; sol. in water, ethanol, acetone, aliphatic solv.; sp.gr. 0.96; surf. tens. 33 dynes/cm (1%); cationic; 80% act.

Alkasurf® CO-630 Special  [Rhodia Canada]

**Chem. Descrip.:** Nonoxynol-9 USP

**CAS:** 9016-45-9

**Uses:** Surfactant for pharmaceuticals

**Properties:** HL 13.0; cloud pt. 52-56 C (1% aq.); nonionic; 80% act.

Aloe Gold Seal-Natural  [Terry Labs](http://www.terrylabs.com)

**Chem. Descrip.:** Aloe barbadensis

**Chem. Analysis:** 100% aloe solids; 8% max. moisture

**CAS:** 8001-97-6; EINECS/ELINCS 232-295-9

**Uses:** Moisturizer, soothing agent in dietary supplements, tablets, and capsules

**Properties:** Lt. cream to beige fine powd., mod. veg. odor; after reconstituting 1:199 with DI water
Aloe barbadensis gel
Uses: Ingrd. for therapeutic prods.
Properties: Gardner 3 max. liq.; pH 4.0-5.0; 5% solids

Chem. Descrip.: Freeze-dried aloe vera whole leaf gel See Aloe barbadensis gel
Uses: Ingrd. for pharmaceuticals, health supplements
Properties: Sl. tan free-flowing powd.; pH 3.5-5.5 (1:199); < 7% moisture

Chem. Descrip.: Aloe barbadensis gel, polyglyceryl methacrylate, and propylene glycol See Glyceryl polymethacrylate
Features: Delayed evaporation chars. for enhanced substantivity to skin and hair
Properties: Colorless cl. to sl. hazy visc. gel; sol. in water; sp.gr. 1.1; visc. 80,000-130,000 cps; pH 5.0-5.6
Storage: Store at R.T.; protect from oxidation; may darken over time

Chem. Descrip.: Aloe vera extract See Aloe barbadensis extract
CAS 85507-69-3; EINECS/ELINCS 287-390-8
Uses: Emollient in skin ointments, antidandruff shampoos, diaper rash ointments, hemorrhoid ointments/suppositories, mouth rinses, toothpaste for antiplaque and sore gums, vaginal douches
Properties: Lt. yel. cl. oil; char. veg. odor; sp.gr. 0.847-0.854

Aloe Vera Gel Decolorized 1X [Terry Labs http://www.terrylabs.com]
Chem. Descrip.: Aloe barbadensis gel
Uses: Moisturizer with soothing props. for OTC pharmaceuticals (topical analgesics/anesthetics, hydrocortisone creams, first aid sprays/creams/gels, anti-acne preps., bedsore preps., as a moisturizing base)
Properties: Colorless liq., sl. veg. odor; sp.gr. 0.997-1.004; pH 3.5-5.0; 0.5% min. total solids
**Trade Name Reference**

**Aloe Vera Gel Decolorized 10X** [Terry Labs http://www.terrylabs.com]
Chem. Descrip.: Aloe barbadensis gel
Uses: Moisturizer with soothing props. for OTC pharmaceuticals (topical analgesics/anesthetics, hydrocortisone creams, first aid sprays/creams/gels, anti-acne preps., bedsore preps., as a moisturizing base)
Properties: Yel./grn. liq., lt. veg. odor; sp.gr. 1.022-1.032; pH 3.5-5.0; 5% min. total solids
Storage: Store @ R.T.; protect from oxidation; may darken with age

**Aloe Vera Gel Decolorized 40X** [Terry Labs http://www.terrylabs.com]
Chem. Descrip.: Aloe barbadensis gel
Uses: Moisturizer with soothing props. for OTC pharmaceuticals (topical analgesics/anesthetics, hydrocortisone creams, first aid sprays/creams/gels, anti-acne preps., bedsore preps., as a moisturizing base)
Properties: Yel./amber liq., mod. veg. odor; sp.gr. 1.100-1.120; pH 3.5-5.0; 20% min. total solids
Storage: Store @ R.T.; protect from oxidation; may darken with age

**Aloe Vera Gel Powd., Dehydrated** [Garuda Int'l. http://www.garudaint.com]
Chem. Descrip.: Aloe vera gel, dehydrated (200X conc.) See Aloe barbadensis gel
Uses: Emollient in skin ointments, antidandruff shampoos, diaper rash ointments, hemorrhoid ointments/suppositories, mouth rinses, toothpaste for antiplaque and sore gums, vaginal douches
Properties: Lt. tan fluffy powd.; char. veg.-like odor and flavor; no off flavors; 10% solids; < 10% moisture

**Aloe Vera Gel Regular 1X** [Terry Labs http://www.terrylabs.com]
Chem. Descrip.: Aloe barbadensis leaf juice
Chem. Analysis: 0.5% min. aloe solids
Uses: Moisturizer, soothing agent for OTC pharmaceuticals including topical analgesics/anesthetics, hydrocortisone creams, first aid sprays, anti-acne preps., toothpaste and oral rinses
Properties: Gardner 3 max. liq., lt. veg. odor; sp.gr. 0.997-1.004; pH3.5-5.0

**Aloe Vera Gel Spray Dried Powd.** [Garuda Int'l. http://www.garudaint.com]
Chem. Descrip.: Aloe vera gel, dehydrated (20X conc.) See Aloe barbadensis gel
Uses: Emollient in skin ointments, antidandruff shampoos, diaper rash ointments, hemorrhoid ointments/suppositories, mouth rinses, toothpaste for antiplaque and sore gums, vaginal douches
Properties: Wh. to ylsh. powd.; char. veg.-like odor and flavor; no off flavors; 10% solids; < 10% moisture

**Precaution:** This is a nat. prod. which will darken with age; sl. fallout may occur over time; protect from oxidation

**Aloe Vera Gel Regular 10X** [Terry Labs http://www.terrylabs.com]
Chem. Descrip.: Aloe barbadensis leaf juice
Chem. Analysis: 4.6% min. aloe solids
Uses: Moisturizer, soothing agent for OTC pharmaceuticals including topical analgesics/anesthetics, hydrocortisone creams, first aid sprays, anti-acne preps., toothpaste and oral rinses
Properties: Lt. amber cl. to sl. hazy liq.; sp.gr. 1.022-1.032 (25 C); pH 3.5-5.0

**Precaution:** This is a nat. prod. which will with age; sl. fallout may occur over time; protect from oxidation

**Aloe Vera Gel Regular 40X** [Terry Labs http://www.terrylabs.com]
Chem. Descrip.: Aloe barbadensis leaf juice
Chem. Analysis: 18.4% min. aloe solids
Uses: Moisturizer, soothing agent for OTC pharmaceuticals including topical analgesics/anesthetics, hydrocortisone creams, first aid sprays, anti-acne preps., toothpaste and oral rinses
Properties: Lt. amber cl. to sl. hazy liq.; sp.gr. 1.100-1.120 (25 C); pH 3.5-5.0

**Precaution:** This is a nat. prod. which will with age; sl. fallout may occur over time; protect from oxidation

**Handbook of Pharmaceutical Additives, Third Edition** 42
Aloe Vera Gel Thickened [Terry Labs http://www.terrylabs.com]
Chem. Descrip.: Aloe barbadensis gel, acrylates/C10 alkyl acrylate crosspolymer See Acrylates/C10-30 alkyl acrylate crosspolymer; Aloe barbadensis gel
Uses: Moisturizer in OTC pharmaceuticals including topical analgesics/anesthetics, first aid gels and ointments, and anti-acne preps.
Features: Used as a base into which other ingredients can be blended
Properties: Cl. to sl. hazy lt. beige visc. gel; visc. 300,000-900,000 cps; pH 6.5-7.5
Storage: Store @ R.T.; protect from oxidation

Aloe Vera Oil CG [Terry Labs http://www.terrylabs.com; S. Black http://www.sblack.com]
Chem. Descrip.: Aloe barbadensis extract, mineral oil, coconut oil See Coconut (Cocos nucifera) oil
CAS 85507-69-3; 8012-95-1; 8001-31-8; EINECS/ELINCS 287-390-8; 232-384-2; 232-282-8
Uses: Ingred. in hydrophobic prods. or oil phases of formulations for OTC pharmaceuticals (topical analgesics/anesthetics, hydrocortisone creams, first aid sprays, creams and gels, anti-acne preps. and bedsore preps.)
Properties: Yel.-grn. cl. to sl. hazy liq.; lt. veg. odor and taste; sp.gr. 1.000-1.020; pH 3.5-5.0
Storage: Protect from oxidation; store at room temp.; nat. prod. that will darken with age; sl. fallout may occur over time

Aloe Vera Whole Leaf Gel 1X [Terry Labs http://www.terrylabs.com; S. Black http://www.sblack.com]
Chem. Descrip.: Aloe vera gel, food grade See Aloe barbadensis gel
CAS 8001-97-6; EINECS/ELINCS 232-295-9
Uses: Ingred. in OTC pharmaceuticals (topical analgesics/anesthetics, hydrocortisone creams, first aid sprays/creams/gels, anti-acne preps., toothpaste, moisturizing base)
Properties: Yel.-grn. cl. to sl. hazy liq., lt. veg. odor; sp.gr. 0.997-1.004; pH 3.5-5.0; 0.5% min. total solids
Storage: Store @ R.T.; protect from oxidation; may darken with age

Aloe Vera Whole Leaf Gel 2X [Terry Labs http://www.terrylabs.com]
Chem. Descrip.: Aloe barbadensis leaf
CAS 8001-97-6; EINECS/ELINCS 232-295-9
Uses: Ingred. in OTC pharmaceuticals (topical analgesics/anesthetics, hydrocortisone creams, first aid sprays/creams/gels, anti-acne preps., toothpaste, moisturizing base)
Properties: Yel.-grn. cl. to sl. hazy liq., lt. veg. odor; sp.gr. 0.997-1.004; pH 3.5-5.0
Storage: Store in a cool, dry place

Aloe Vera Whole Leaf Gel 3X [Terry Labs http://www.terrylabs.com]
Chem. Descrip.: Aloe leaf See Aloe barbadensis
CAS 8001-97-6; EINECS/ELINCS 232-295-9
Uses: Ingred. in OTC pharmaceuticals (topical analgesics/anesthetics, hydrocortisone creams, first aid sprays/creams/gels, anti-acne preps., toothpaste, moisturizing base)
Properties: Yel.-grn. cl. to sl. hazy liq., lt. veg. odor; sp.gr. 0.997-1.004; pH 3.5-5.0
Storage: Store in a cool, dry place
Trade Name Reference

**Aloe Vera Whole Leaf Powder Organic Freeze Dried** [Terry Labs http://www.terrylabs.com]
Chem. Descr.: Aloe barbadensis leaf
Chem. Analysis: 100% aloe solids; 8% max. moisture
CAS 8001-97-6; EINECS/ELINCS 232-295-9
Uses: Ingred. in OTC pharmaceuticals (topical analgesics, hydrocortisone creams, first aid sprays/creams/gels, anti-acne preps., toothpaste, oral rinses, medicated powds., moisturizing base)
Properties: Lt. cream to beige fine powd.; sp. gr. 0.997-1.004; pH 3.5-5.0
Storage: Keep in cool, dry place, once reconstituted, prod. will darken with age; preserve after reconstitution

Chem. Descr.: High-purity, molecularly dist. monoglyceride prepared from fully hardened soybean oil and glycerin See Mono- and diglycerides of fatty acids
Uses: Pharmaceutical tableting aid
Features: Provides a stable, finely dispersed emulsion
Regulatory: FDA GRAS; kosher
Properties: Wh. to cream fine bead; 99% through 10 mesh; m.p. 70-75 C; iodine no. 3 max.; sapon. no. 150-165; HLB 3.5; nonionic; 90% min. alpha monoester
Storage: Indefinite storage life under proper cool, dry conditions

**Alpine Talc USP BC 127** [MPSI http://www.mp-solutionsinc.com]
Chem. Descr.: Talc
CAS 14807-96-6; EINECS/ELINCS 238-877-9
Uses: Glidant, anticaking agent, tablet lubricant, colorant in pharmaceuticals

Chem. Descr.: Talc USP/FCC See Talc
Chem. Analysis: SiO2 (61%), MgO (31%), Al2O3 (1%), Fe2O3 (1%), CaO (0.5%)
CAS 14807-96-6; EINECS/ELINCS 238-877-9
Uses: Filler for pharmaceuticals; dusting agent, glidant, lubricant, diluent, filler, compression aid, tablet coating, excipient, opacifier, extender pigment, film enhancer for aerosols, creams and lotions, medicated foot powds.
Features: Good brightness
Properties: Wh. powd.; 9 µ median particle size; 98% min. through 200 mesh; bulk dens. 24-28 lb/ft3 (loose), 62 lb/ft3 (tapped); TAPPI brightness 88; pH 8 (10% slurry)

Chem. Descr.: Talc
CAS 14807-96-6; EINECS/ELINCS 238-877-9
Uses: Filler in pharmaceuticals (tablets, medicated foot powds., creams/lotions/ointments); lubricant, glidant in tablet coatings; release agent in tablet molds
Features: Inert
Regulatory: DOT nonhazardous
Properties: Wh. to grayish-wh. fine powd.; 11 µ median particle size; 99% through 200 mesh; sl. earthy odor; sol. in hot, conc. phosphoric acid; insol. in water, cold acids and alkalies; sp.gr. 2.7-2.8; dens. 57 lb/ft3 (tapped), 26 lb/ft3 (loose); surf. area 3.0 m2/g; oil absorp. 28; brightness 86; pH sl. alkaline; hardness (Mohs) 1.0-1.5; 0.4% max. moisture
Toxicology: ACGIH TWA/TLV 2 mg/m3 (respirable dust); inh. of lg. amts. of dust may cause mucous membranes/respiratory tract irritation; chronic exposure may cause pulmonary fibrosis, shortness of breath, chronic cough, heart failure, pneumoconiosis; tumorigen; TSCA listed
Precaution: Very slippery when wet
Hazardous Ingredients: May contain 0-3% of: dolomite, chlorite, calcite, magnesite
### Altalc 300 USP

**Chem. Descrip.:** Talc USP/FCC  See Talc  
**Chem. Analysis:** SiO₂ (61%), MgO (31%), Al₂O₃ (1%), Fe₂O₃ (1%)  
**CAS** 14807-96-6; EINECS/ELINCS 238-877-9

**Uses:** Filler for pharmaceuticals; detackifier, dusting agent, glidant, lubricant, diluent, filler, compression aid, tablet coating, excipient, opacifier, extender pigment, film enhancer for aerosols, creams and lotions

**Features:** Wh. powd.; 6 µ median particle size; 98% min. through 325 mesh; bulk dens. 15-19 lb/ft³ (loose), 42 lb/ft³ (tapped); TAPPI brightness 91; pH 9 (10% slurry)

**Properties:** High purity; exc. brightness; specially processed for microbial control

**Regulatory:** DOT nonhazardous

**Health:** 1, Flammability 0, Reactivity 0

**Toxicology:** TWA/TLV 2 mg/m³ (respirable dust); inh. of lg. amts. of dust may cause mucous membranes/respiratory tract irritation; chronic exposure may cause pulmonary fibrosis, shortness of breath, chronic cough, heart failure, pneumoconiosis; tumorigen; TSCA listed

**Precaution:** Very slippery when wet

**Hazardous Ingredients:** May contain 0-3% of: dolomite, chlorite, calcite, magnesite

**HMIS:** Health 1, Flammability 0, Reactivity 0

**Storage:** Store in sealed containers

**Trade Name Reference**

### Altalc 400 USP

**Chem. Descrip.:** Talc USP/FCC  See Talc  
**Chem. Analysis:** SiO₂ (61%), MgO (31%), Al₂O₃ (1%), Fe₂O₃ (1%), CaO (0.5%)  
**CAS** 14807-96-6; EINECS/ELINCS 238-877-9

**Uses:** Filler, diluent, glidant, antitackifier for pharmaceuticals, tablet lubricant, colorant, dusting powd. for pharmaceuticals; lubricant for surgical gloves

**Features:** High purity; exc. brightness; specially processed for microbial control

**Properties:** Wh. powd.; 4 µ median particle size; 99.9% min. through 325 mesh; bulk dens. 12-16 lb/ft³ (loose), 41 lb/ft³ (tapped); TAPPI brightness 92; pH 9 (10% slurry)

**Regulatory:** DOT nonhazardous

**Properties:** Wh. to grayish-wh. fine powd.; 5 µ median particle size; 99.9% through 325 mesh; sl. earthy odor; sol. in hot, conc. phosphoric acid; insol. in water, cold acids and alkalis; sp.gr. 2.7-2.8; dens. 40 lb/ft³ (tapped), 14 lb/ft³ (loose); surf. area 6.5 m²/g; oil absorp. 36; brightness 89; pH sl. alkaline; hardness (Mohs) 1.0-1.5; 0.4% max. moisture

**Toxicology:** ACGIH TWA/TLV 2 mg/m³ (respirable dust); inh. of lg. amts. of dust may cause mucous membranes/respiratory tract irritation; chronic exposure may cause pulmonary fibrosis, shortness of breath, chronic cough, heart failure, pneumoconiosis; tumorigen; TSCA listed

**Precaution:** Very slippery when wet

**Hazardous Ingredients:** May contain 0-3% of: dolomite, chlorite, calcite, magnesite

**HMIS:** Health 1, Flammability 0, Reactivity 0

**Storage:** Store in sealed containers

**Trade Name Reference**

- [http://www.luzenac.com](http://www.luzenac.com)
- [http://www.luzenac.com](http://www.luzenac.com)
Trade Name Reference

Hazardous Decomp. Prods.: None
HMIS: Health 1, Flammability 0, Reactivity 0
Storage: Store in sealed containers

Altalc 500 USP [Luzenac Am.](http://www.luzenac.com)
Chem. Descrip.: Talc USP/FCC See Talc
Chem. Analysis: SiO₂ (62%), MgO (32%), Al₂O₃ (0.5%), Fe₂O₃ (0.5%), CaO (0.5%)
CAS 14807-96-6; EINECS/ELINCS 238-877-9
Uses: Diluent, glidant, antitackifier, TiO₂ extender pigment for tableting and aerosol applics.
Features: High purity; ultrafine with very consistent particle size
Properties: Wh. powd.; 4 µ median particle size; 99.9% through 400 mesh; bulk dens. 11-15 lb/ft³ (loose), 38 lb/ft³ (tapped); TAPPI brightness 92; pH 9 (10% slurry)

Altalc 500V USP [Luzenac Am.; MPSI](http://www.mp-solutionsinc.com)
Chem. Descrip.: Talc USP CAS 14807-96-6; EINECS/ELINCS 238-877-9
Uses: Filler in pharmaceuticals (tablets, medicated foot powds., creams/lotions/ointments); lubricant, glidant in tablet coatings; release agent in tablet molds
Features: Inert
Regulatory: DOT nonhazardous
Properties: Wh. to grayish-wh. fine powd.; 4 µ median particle size; 99.9% through 400 mesh; sl. earthy odor; sol. in hot, conc. phosphoric acid; insol. in water, cold acids and alkalis; sp.gr. 2.7-2.8; dens. 36 lb/ft³ (tapped), 13 lb/ft³ (loose); surf. area 8.0 m²/g; oil absorp. 38; brightness 90; pH sl. alkaline; hardness (Mohs) 1.0-1.5; 0.4% max. moisture
Toxicology: ACGIH TWA/TLV 2 mg/m³ (respirable dust); inh. of lg. amts. of dust may cause mucous membranes/respiratory tract irritation; chronic exposure may cause pulmonary fibrosis, shortness of breath, chronic cough, heart failure, pneumoconiosis; tumorigen; TSCA listed
Precaution: Very slippery when wet

Hazardous Ingredients: May contain 0-3% of: dolomite, chlorite, calcite, magnesite
Hazardous Decomp. Prods.: None
HMIS: Health 1, Flammability 0, Reactivity 0
Storage: Store in sealed containers

Alugel 30DF [Baerlocher GmbH](http://www.baerlocher.com; Baerlocher France)
Uses: Gellant in pharmaceuticals
Features: Easy to disperse
Properties: Bulk dens. ≈ 240 g/l; soften. pt. 150-160 C; 9-11% ash; 4-9% free fatty acids

Aluminum Stearate 22 [Chemtura](http://www.chemtura.com)
Uses: Accelerator, anticaking agent, builder, defoamer in pharmaceuticals
Properties: Solid; sol. hot in aromatic and aliphatic solvs. and oils; water-insol.

Amaranth Oil [Nu-World Amaranth](http://www.nuworldamaranth.com)
Chem. Descrip.: Natural amaranth oil high in squalene
CAS 915-67-3; EINECS/ELINCS 213-022-2
Uses: Heat stabilizer in pharmaceuticals; free radical scavenger
Features: Exc. natural source of omega acids, highly unsat.
Properties: Light-colored cl. oily liq., delicate agreeable odor and taste

Amberlite® IRA-67 [Rohm & Haas](http://www.rohmhaas.com; http://www.acusol.com)
Chem. Descrip.: 2-Propenoic acid, 2-methyl-, potassium salt, polymer with diethenylbenzene CAS 50602-21-6
Uses: Taste masking agent; stabilizer and
carrier for pharmaceuticals; sustained release of nicotine

Regulatory: CGMP compliant; SARA §311/312 acute health hazard, §313 nonreportable

Properties: Wh. to -off-wh., odorless powd.; insol. in water; sp. gr. 1.20-1.45

Toxicology: LD50 (acute oral, rat) >5,000 mg/kg; LD50 (acute dermal, rabbit) >5,000 mg/kg; can cause severe eye irritation

Precaution: Avoid dust formation and contact with strong oxidizers; wear safety glasses with side shields and cotton or canvas gloves

Hazardous Decomp. Prods.: Monomer vapors

HMIS: Health 2, Flammability 1, Reactivity 0

Amberlite® IRP-69 [Rohm & Haas
http://www.rohmhaas.com;
http://www.acusol.com]

Chem. Descrip.: Sulfonated divinylbenzene/styrene copolymer

CAS 63182-08-1

Uses: Taste masking agent; stabilizer and carrier for pharmaceuticals; sustained release apps.; therapeutic agent to lower potassium levels in the treatment of hyperkalemia

Regulatory: USP, SARA §3311/312 acute health hazard; SARA §313 unreportable

Properties: Amber powd.; pract. insol. in water; sp. gr. 1.10-1.40; pH 5.0-9.0 (aq. slurry)

Toxicology: LD50 (acute oral, rat) >5,000 mg/kg; LD50 (acute dermal, rabbit) >5,000 mg/kg; can cause severe eye irritation; irritating to skin and respiratory system

Precaution: Avoid dust formation and contact with strong oxidizers; wear safety glasses with side shields and cotton or canvas gloves

Hazardous Decomp. Prods.: Monomer vapors

HMIS: Health 2, Flammability 1, Reactivity 0

Amberol® 4 Liquid [Amerol
http://www.amerolcorp.com]

Chem. Descrip.: BHA, BHT, vegetable oils

Uses: Antioxidant and preservative for vitamins

Properties: Pale yel. liq.; insol. in water; sp. gr. 0.973 (20 C); visc. < 1 mm Hg; m.p. < -54 C; flash pt. (PMCC) 254 C

Toxicology: May cause irritation upon repeated or prolonged exposure to eyes, skin, and respiratory tract

Environmental: Prevent runoff from entering drains

Precaution: Incompat. with strong oxidizing agents

Hazardous Decomp. Prods.: Combustion: CO, CO2, NOx
Trade Name Reference

Precaution: May present explosion/fire hazard as spray mist or aerosol
Hazardous Decomp. Prods.: CO, CO₂
Storage: Store in a cool, well-ventilated area < 100 F away from heat and ignition sources

Amerol® 4B Liquid [Amerol http://www.amerolcorp.com]
Chem. Descrip.: BHA, vegetable oil
Uses: Antioxidant and preservative for vitamins
Properties: Yel. liq.; sol. in fats and oils; insol. in water; sp.gr. 0.951 (20 C); visc. 69; vapor pressure < 1 mm Hg; m.p. -15.5 C; flash pt. (PMCC) 156 C
Toxicology: Mildly toxic if ing. in very large quantities; allergic sensitivities aggravated by exposure
Precaution: May present explosion/fire hazard as spray mist or aerosol; avoid oxidizing agents
Storage: Store in cool, well-ventilated area < 100 F away from high heat and all ignition sources

Amerol® 8 Liquid [Amerol http://www.amerolcorp.com]
Chem. Descrip.: BHT, vegetable oil
Uses: Antioxidant
Properties: Pale amber liq., pract. odorless; exc. sol. in fats and oils; insol. in water; sp.gr. 0.925 (20 C); visc. 49; vapor pressure < 1 mm Hg; m.p. < 57 C; flash pt. 254 C
Toxicology: Causes severe eye irritation; blurred vision may occur upon contact; allergic sensitivities, psoriasis, acne, eczema are aggravated by exposure
Precaution: Incompat. with copper and copper alloys
Hazardous Decomp. Prods.: Combustion: CO, CO₂, NOₓ
Storage: Handle and store away from high heat and all ignition sources; store in a cool, well-ventilated area < 100 F, away from sunlight

Amerol® A Liquid [Amerol http://www.amerolcorp.com]
Chem. Descrip.: BHA, citric acid, propylene glycol
Uses: Antioxidant
Properties: Lt. yel. visc. liq., sl. odor; sol. in fats and oils; appreciable sol. in water; sp.gr. 1.071 (20 C); visc. 144; b.p. 198 C; flash pt. 108 C
Toxicology: May cause eye, skin, respiratory tract irritation; avoid breathing vapor from heated material
Precaution: Incompat. with strong oxidizing agents
Hazardous Decomp. Prods.: CO, CO₂
Storage: Do not store or ship together with odorous and toxic substances; protect from contamination

Amihope LL [Ajinomoto http://www.ajinomoto.co.jp; http://www.ajinomoto.com]
Chem. Descrip.: Lauroyl lysine
CAS 52315-75-0; EINECS/ELINCS 257-843-4
Uses: Surface modifier, coemulsifier, codispersant in medical field
Properties: Wh. fine powd.; insol. in almost all solvs. except strong acidic and alkaline sol'ns.; sol. in water @ pH < 1 and > 12; sp.gr. 1.2; amphoteric; 100% conc.
Toxicology: LD50 (oral, mice) > 5.0 g/kg; nonirritating to skin and eyes; nonsensitizing
Environmental: Biodeg.

Aminodermin CLR [CLR http://www.clr-berlin.de; Actives Int’l.]
Chem. Descrip.: Methionine, cysteine, and tryptophan See L-Cysteine; DL-Methionine; DL-α-Tryptophan
Uses: Conditioner for structurally damaged and oily hair, dandruff shampoos, oily skin care prods.; aq., aq.-alcoholic and emulsified personal care preps. for care of structurally affected and damaged hair; for applic. to greasy hair; also for applic. to oily and blemished skin
Properties: Wh. powd.; specific odor; water sol.; 13-14% S, 10-11% N
Use Level: 0.01-0.2%

Aminogluten MG [Croda Inc http://www.crodamer.com; http://www.crodausa.com; Croda Chem. Europe Ltd http://www.croda.co.uk]
Chem. Descrip.: Corn gluten amino acids, sodium chloride, and water
Uses: Humectant for pharmaceuticals
Properties: Lt. amber liq.; m.w. 150; water-sol.; 15% act. in water

Aminoxid WS 35 [Degussa Care Spec.]
Chem. Descrip.: Cocamidopropylamine oxide
CAS 68155-09-9; EINECS/ELINCS 268-938-5
Uses: Detergent, emulsifier, wetting agent, softener, foam stabilizer for pharmaceutical emulsions
Properties: Amber liq.; pH 5-7; nonionic; 35% act.
Trade Name Reference

**Amisoft CS-22** [Ajinomoto
http://www.ajinomoto.co.jp;
http://www.ajinomoto.com; Ajinomoto USA
http://www.ajinomoto-usa.com;
http://www.ajichem.com]
Chem. Descrip.: Sodium cocoyl glutamate
CAS 68187-32-6; EINECS/ELINCS 269-087-2
Uses: Surfactant, detergent, foaming agent, bacteriostat for infants or eczema cases
Features: Derived from glutamic acid and higher fatty acids; stable in hard water; weakly acidic
Properties: Liq.; anionic; 25% conc.
Toxicology: Nonirritating to skin
Environmental: Biodeg.

**AMMONYX® 4** [Stepan
http://www.stepan.com]
Chem. Descrip.: Stearalkonium chloride
CAS 122-19-0; EINECS/ELINCS 204-527-9
Uses: Emulsifier, conditioner, softener, emollient for pharmaceuticals
Properties: Paste; sp.gr. 0.99; flash pt. > 200 F; cationic; 18% act.

**AMMONYX® 4B** [Stepan
http://www.stepan.com]
Chem. Descrip.: Stearalkonium chloride
CAS 122-19-0; EINECS/ELINCS 204-527-9
Uses: Emulsifier, conditioner, softener, emollient for pharmaceuticals
Properties: Paste; sp.gr. 0.99; flash pt. > 200 F; cationic; 18% act.

**AMMONYX® 485** [Stepan
http://www.stepan.com]
Chem. Descrip.: Stearalkonium chloride
CAS 122-19-0; EINECS/ELINCS 204-527-9
Uses: Emulsifier, conditioner, softener, emollient for pharmaceuticals
Properties: Paste; sp.gr. 0.45; flash pt. 122 F; cationic; 85% act.

**AMMONYX® 4002** [Stepan
http://www.stepan.com]
Chem. Descrip.: Stearalkonium chloride
CAS 122-19-0; EINECS/ELINCS 204-527-9
Uses: Emulsifier, conditioner, softener, emollient for pharmaceuticals
Properties: Powd.; sp.gr. 0.52; flash pt. 170 F; cationic; 95% act.

**AMMONYX® CETAC** [Stepan
http://www.stepan.com]
Chem. Descrip.: Cetrimonium chloride
CAS 112-02-7; EINECS/ELINCS 203-928-6
Uses: Emulsifier, conditioner, softener, emollient for pharmaceuticals
Properties: Liq.; sp.gr. 0.93; flash pt. > 200 F; cationic; 26% act.

**AMMONYX® CETAC-30** [Stepan
http://www.stepan.com]
Chem. Descrip.: Cetrimonium chloride
CAS 112-02-7; EINECS/ELINCS 203-928-6
Uses: Emulsifier, conditioner, softener, emollient for pharmaceuticals
Properties: Liq.; sp.gr. 0.93; cationic; 30% act.

**AMMONYX® CO** [Stepan
http://www.stepan.com]
Chem. Descrip.: Palmitamine oxide
CAS 7128-91-8; EINECS/ELINCS 230-429-0
Uses: Conditioner, detergent, foam stabilizer, visc. builder for pharmaceuticals
Properties: Liq.; sp.gr. 0.96; flash pt. > 200 F; amphoteric; 30% act.

**AMMONYX® DMCD-40** [Stepan
http://www.stepan.com]
Chem. Descrip.: Lauramine oxide
CAS 1643-20-5; EINECS/ELINCS 216-700-6
Uses: Wetting agent, foaming agent, foam stabilizer for pharmaceuticals
Properties: Liq.; sp.gr. 0.91; flash pt. 86 F; cationic; 40% act.

**AMMONYX® GA-90** [Stepan
http://www.stepan.com]
Chem. Descrip.: Dipalmitoylethyl hydroxyethylmonium methosulfate
Uses: Conditioner, softener, emollient, emulsifier in pharmaceuticals
Properties: Paste; cationic; 90% solids

**AMMONYX® KP** [Stepan
http://www.stepan.com]
Chem. Descrip.: Olealkonium chloride
CAS 37139-99-4; EINECS/ELINCS 253-363-4
Uses: Conditioner in pharmaceuticals
Properties: Liq.; sp.gr. 0.98; flash pt. > 200 F; cationic; 52% min. solids

**AMMONYX® LO** [Stepan
http://www.stepan.com]
Chem. Descrip.: Lauramine oxide
CAS 1643-20-5; EINECS/ELINCS 216-700-6
Uses: Surfactant in pharmaceuticals
Properties: Liq., sp.gr. 0.96; flash pt. > 200 F; amphoteric; 30% act.

**AMMONYX® MCO** [Stepan
http://www.stepan.com]
Chem. Descrip.: Myristamine oxide
CAS 3332-27-2; EINECS/ELINCS 222-059-3
Uses: Foam booster/stabilizer, conditioner,
Trade Name Reference

visc. builder, and wetting agent for pharmaceuticals
Properties: Liq.; amphoteric; 30% conc.

AMMONYX® MO [Stepan
http://www.stepan.com]
Chem. Descrip.: Myristamine oxide
CAS 3332-27-2; EINECS/ELINCS 222-059-3
Uses: Wetting agent, foam booster/stabilizer, conditioner for pharmaceuticals
Properties: Liq.; sp.gr. 0.96; flash pt. > 200 F; amphoteric; 29-31% amine oxide

AMMONYX® SO [Stepan
http://www.stepan.com]
Chem. Descrip.: Stearamine oxide
CAS 2571-88-2; EINECS/ELINCS 219-919-5
Uses: Surfactant in pharmaceuticals
Properties: Paste; sp.gr. 0.99; flash pt. > 200 F; amphoteric; 25% act.

Amonyl® 265 BA [Seppic
http://www.seppic.com]
Chem. Descrip.: Cocobetaine
CAS 68424-94-2; EINECS/ELINCS 270-329-4
Uses: Surfactant, detergent, foaming agent, visc. modifier, conditioner, o/w emulsifier, substantivity agent for dermatological liq. cleansers
Properties: Liq.; sp.gr. 1.035 (20 C); cloud pt. < 0 C; pH 5-7.5 (5% aq.); amphoteric; 30% conc.

Amonyl® 380 BA [Seppic
http://www.seppic.com]
Chem. Descrip.: Cocamidopropyl betaine
CAS 61789-40-0; EINECS/ELINCS 263-058-8
Uses: Surfactant, detergent, foaming agent, visc. modifier, conditioner, o/w emulsifier, substantivity agent for pharmaceutical creams and lotions
Properties: Liq.; sp.gr. 1.050 (20 C); cloud pt.< 0 C; pH 5.5-7.0 (5% aq.); amphoteric; 30% act.

Amphisol® A [DSM Nutritional Products]
Chem. Descrip.: Hexadecyl hydrogen phosphate See Cetyl phosphate
CAS 3539-43-3; EINECS/ELINCS 222-581-1
Uses: O/w emulsifier in skin preps.
Properties: Wh. to off-wh. powd.; sol. in ethanol, mineral oil; very sl. sol. in water; acid value 300-330; anionic
Toxicology: TSCA listed

Amphisol® K [DSM Nutritional Products]
Chem. Descrip.: Potassium cetyl phosphate
CAS 19035-79-1; EINECS/ELINCS 242-768-1
Uses: Emulsifier, stabilizer for pharmaceutical creams and lotions
Features: Stable over wide pH range
Regulatory: FDA, EU, and Japanese compliances
Properties: Wh. to off-wh. powd.; sol. in water, oil; m.w. 360.40; pH (1% aq. sol'n.) 6.5-8.5; anionic
Use Level: 1-3%
Toxicology: TSCA listed

Ampholak® 7TX [Akzo Nobel Surf. Chem. AB
http://www.surface.akzonobel.com]
Chem. Descrip.: Tallowamphopolycarboxyglycinate See Sodium carboxymethyl tallow polypropylamine
Uses: Anti-irritant for anionics
Features: Med. foaming
Properties: Cl. liq.; misc. with water; dens. 1150 kg/m3; visc. 100 mPa*s max.; pour pt. -15 C; pH 9.0±0.5 (20%); surf. tens. 44 mN/m (0.1%); amphoteric; 39-41% conc.

Ampholak® 7TX/C [Akzo Nobel Surf. Chem. AB
http://www.surface.akzonobel.com]
Chem. Descrip.: Sodium carboxymethyl tallowpolypropylamine See Sodium carboxymethyl tallow polypropylamine
Uses: Anti-irritant for anionics
Properties: Cl. liq.; sol. in water, poorly sol. in org. solvs.; dens. 1150 kg/m3; visc. 100 mPa*s max.; pour pt. -15 C; pH 8.5-9.5; surf. tens. 44 mN/m (0.1%); Ross-Miles foam 160 mm (initial, 0.05%, 50 C); amphoteric; 39-41% solids

Precaution: Avoid contact with calcium and magnesium ions, heavy metals, metal salts, alkali, alkaline earth metals
Trade Name Reference

Environmental: Readily biodeg.

Chem. Descrip.: Disodium cocoamphodiacetate
CAS 68650-39-5; EINECS/ELINCS 272-043-5
Uses: Anti-irritant for anionics
Features: Med. foaming
Properties: Cl. liq.; misc. with water, ethanol, poorly sol. in org. solvs.; dens. 1140 kg/m³; visc. 400 mPa•s max.; pour pt. -18 C; pH 8-9; surf. tens. 34 mN/m (0.1%); Ross-Miles foam 170 mm (initial, 0.05%, 50 C); amphoteric; 38-41% solids

Amphoram® U [Ceca SA http://www.ceca.fr]
Chem. Descrip.: Undecylenamidopropyl betaine
CAS 133798-12-6; EINECS/ELINCS 308-783-3
Uses: Antidandruff base, fungicide for antidandruff shampoos
Features: Offers lathering and washing chars.; well-tolerated by skin; active at low concs.; compat. with anionic and cationic surfactants
Properties: Amphoteric

AMPHOSOL® CA [Stepan http://www.stepan.com]
Chem. Descrip.: Cocamidopropyl betaine
CAS 61789-40-0; EINECS/ELINCS 263-058-8
Uses: Conditioner, detergent, wetting agent, visc. builder, foam booster/stabilizer, base for pharmaceuticals
Features: Mild
Properties: Water-wh. to pale yel. cl. liq.; pH 5.0 (10%); amphoteric; 30% act.

AMPHOSOL® CG [Stepan http://www.stepan.com]
Chem. Descrip.: Cocamidopropyl betaine
CAS 61789-40-0; EINECS/ELINCS 263-058-8
Uses: Foam booster/stabilizer, visc. builder, wetting agent in pharmaceuticals
Properties: Amber cl. liq.; pH 4.5-6.5; amphoteric; 29-31% act.

Chem. Descrip.: 2-Acrylamido-2-methylpropanesulfonic acid sodium salt, 50% aq. sol’n. See Sodium 2-acrylamido-2-methylpropanesulfonate
CAS 5165-97-9
Uses: Polymerization monomer with end-uses in the medical field
Features: Highly reactive; adds anionic char. to polymers; hydrolytic and thermal stability; polyvalent cation tolerance
Properties: Lt. yel. bright, cl. liq.; m.w. 229; sp.gr. 1.2-1.23 (15.6 C); dens. 1.21 kg/l; visc. 6.0 cSt (40 C); pH 8.3 min.; ref. index 1.419-1.424; 47-51% w/w
Toxicology: Min. oral toxicity
Storage: Store in moisture-proof, stainless steel containers

Anatone [Am. Labs http://www.americanlaboratories.com]
Chem. Descrip.: Peptic hydrolysate from pork tissue
Uses: Media for growth of anaerobic bacteria and prod. of toxins; for testing disinfectants
Regulatory: USP compliance for peptone reagent stds.
Properties: Completely sol. in 2% sol’n.; pH 7±0.1

Chem. Descrip.: (E)-1-Methoxy-4-(1-propenyl)benzene stabilized with 0.005% Tenox GT-1 (a food grade antioxidant) See Anethole
CAS 4180-23-8; EINECS/ELINCS 203-205-5
Uses: Flavor, fragrance in pharmaceuticals
Regulatory: FDA 21CFR §182.60; DOT: Chemicals n.o.i.; USP and FCC compliance
Properties: Nearly colorless cl. liq.; solid @ low temps.; char. anise-like odor; sweet taste; 100% sol. in alcohol; m.w. 148.21; sp.gr. 0.983-0.988; dens. 8.22 lb/gal; vapor pressure 0.04 mm Hg; m.p. 70 F; b.p. 232.2 C; flash pt. (TCC) > 93.3 C; ref. index 1.5602-1.5613; 99.5% act.
Toxicology: LD50 (oral, rat) 2090 mg/kg, (skin, rabbit) > 5000 mg/kg; irritating to skin; may cause eye irritation on prolonged contact; TSCA listed
Precaution: Incompat. with strong acids, strong bases, materials that react with unsat. cyclic oxygenated compds.; prolonged/excessive heat and/or exposure to air may cause decomp. or oxidation of the material
Hazardous Decomp. Prods.: Combustion prods.: CO2, CO, acrid fumes
HMIS: Health 1, Flammability 1, Reactivity 1
Storage: Keep container tightly closed when not in use; store @ ≥ 21 C to maintain liq. state;
Trade Name Reference

store away from heat, sparks, open flames; avoid prolonged exposure to air

Anhydrous Emcompress® [JRS Pharma http://www.jrsworth.com]
Chem. Descrip.: Dibasic calcium phosphate anhydrous USP/BP See Calcium phosphate dibasic
CAS 7757-93-9; EINECS/ELINCS 231-826-1
Uses: Binder, filler, diluent, flow aid for direct compression of pharmaceutical tablets and capsules, esp. with moisture-sensitive drugs
Features: Storage-stable; compat. with broad range of drug actives
Properties: Wh. free-flowing powd.; 136 µ avg. particle size; dens. (tapped) 0.7 g/cc
Use Level: 20-50% (tablets, capsules)

Anhydrous Lanolin Grade 1 [Croda Chem. Europe Ltd http://www.croda.co.uk]
Chem. Descrip.: Lanolin B.P./Ph.Eur. with 150 ppm BHT (as stabilizer)
CAS 8006-54-0; EINECS/ELINCS 232-348-6
Uses: Emulsifier, emollient, ointment base for pharmaceuticals
Properties: Yel. soft grease, faint char. odor; sol. in oil; partly sol. in ethanol, min. oil, IPM; insol. in water; m.p. 38-44 C; acid no. 1 max.; sapon. no. 90-105; flash pt. > 100 C; nonionic; 100% conc.
Precaution: Incompatible with tetracycline antibiotics and indomethacin

Environmental: Substantially biodeg.
Precaution: Nonflamm., but will burn if strongly heated
Storage: Store in well-closed containers in cool place away from direct sunlight; avoid storage over 80 C, esp. for prolonged periods; 2 yrs. storage life

Anhydrous Lanolin Grade 2 [Croda Chem. Europe Ltd http://www.croda.co.uk]
Chem. Descrip.: Lanolin B.P./Ph.Eur. with 150 ppm BHT (as stabilizer)
CAS 8006-54-0; EINECS/ELINCS 232-348-6
Uses: Emulsifier, emollient, ointment base for pharmaceuticals
Properties: Lovibond 14-20Y/1.5-3.0R color; yel. soft grease, faint char. odor; sol. in oil; partly sol. in ethanol, min. oil, IPM; insol. in water; m.p. 38-44 C; acid no. 1 max.; sapon. no. 90-105; flash pt. > 100 C; nonionic
Toxicology: LD50 (oral, rat) > max. pract. dose of 16 g/kg; nontoxic; nonirritating to skin and eyes; nonsensitizing
Environmental: Substantially biodeg.
Precaution: Nonflamm., but will burn if strongly heated
Storage: Store in well-closed containers in cool place away from direct sunlight; avoid storage over 80 C, esp. for prolonged periods; 2 yrs. storage life

Anhydrous Lanolin P.80 [Croda Chem. Europe Ltd http://www.croda.co.uk]
Chem. Descrip.: Anhydrous lanolin, pesticide-reduced
CAS 8006-54-0; EINECS/ELINCS 232-348-6
Uses: Emulsifier, emollient, moisturizer for pharmaceuticals
Properties: Yel. soft grease, faint char. odor; sol. in oil; insol. in water; m.p. 38-44 C; HLB 4.5; acid no. 1 max.; sapon. no. 90-105; flash pt. > 100 C; nonionic; 100% conc.
Toxicology: Extremely low toxicity; LD50 (oral, rat) > max. pract. dose of 16 g/kg; nonirritating to skin and eyes
Environmental: Substantially biodeg.
Precaution: Nonflamm., but will burn if strongly heated
Storage: Store in well-closed containers in cool place away from direct sunlight; avoid storage over 80 C, esp. for prolonged periods; 2 yrs. storage life

Anhydrous Lanolin P95 [Croda Chem. Europe Ltd http://www.croda.co.uk]
Chem. Descrip.: Anhydrous lanolin, pract.
Anhydrous Lanolin Reference

Trade Name Reference

pesticide-free with 150 ppm BHT (as stabilizer)
CAS 8006-54-0; EINECS/ELINCS 232-348-6
Uses: Emulsifier, emollient, moisturizer for pharmaceuticals, ointments
Properties: Lovibond 8-14Y/0.8-2.0R color; yel. soft grease, faint char. odor; sol. in oil; insol. in water; m.p. 38-44 C; HLB 4.5; acid no. 1 max.; sapon. no. 90-105; flash pt. > 100 C; nonionic; 100% conc.
Toxicology: LD50 (oral, rat) > max. pract. dose of 16 g/kg; nonirritating to skin and eyes
Environmental: Substantially biodeg.
Precaution: Nonflamm., but will burn if strongly heated
Storage: Store in well-closed containers in cool place away from direct sunlight; avoid storage over 80 C, esp. for prolonged periods; 2 yrs. storage life

Anhydrous Lanolin P95 RA [Croda Chem. Europe Ltd http://www.croda.co.uk]
Chem. Descrip.: Refined lanolin
CAS 8006-54-0; EINECS/ELINCS 232-348-6
Uses: Emulsifier, emollient for pharmaceuticals
Features: Extremely low content of trace pesticide residues; 1 ppm max. total pesticides permitted; gives low incidence of allergic hypersensitivity
Properties: Soft solid; HLB 4.5; nonionic; 100% conc.

Anhydrous Lanolin Superfine [Croda Chem. Europe Ltd http://www.croda.co.uk]
Chem. Descrip.: Lanolin B.P./Ph.Eur. with 150 ppm BHT (as stabilizer)
CAS 8006-54-0; EINECS/ELINCS 232-348-6
Uses: Emulsifier, emollient, ointment base for pharmaceuticals
Properties: Lovibond 5-8Y/0.5-1.0R color; yel. soft solid; HLB 4.5; nonionic; 100% conc.

Animal GMS [Baerlocher France]
Chem. Descrip.: Glycercol stearate
CAS 31566-31-1; EINECS/ELINCS 250-705-4
Uses: Emollient, emulsifier for pharmaceuticals
Regulatory: FDA, EP compliance
Properties: Wh. prills; sol. in alcohol, ether; insol. in water; solid pt. 56-60 C; acid no. 3.0 max.; iodine no. 3.0 max.; 40% min. monoester
Environmental: > 90% biodeg.

Antarox® 17-R-2 [Rhodia HPCII http://www.rhodia-hpcii.com]
Chem. Descrip.: Meroxapol 172
CAS 9003-11-6
Uses: Defoamer, dispersant, wetting agent, emulsifier, demulsifier, binder, stabilizer, gellant, leveling agent, detergent for pharmaceuticals
Properties: Liq.; sol. in aliphatic solvs.; HLB 8.0; pour pt. -25 C; cloud pt. 39 C (1% aq.); nonionic; 100% conc.

Antarox® 25-R-2 [Rhodia HPCII http://www.rhodia-hpcii.com]
Chem. Descrip.: Meroxapol 252
CAS 9003-11-6
Uses: Defoamer, dispersant, wetting agent, emulsifier, demulsifier, binder, stabilizer,
Trade Name Reference

gellant, leveling agent, detergent for pharmaceuticals
Properties: Liq.; HLB 6.0; pour pt. -5 C; cloud pt. 33 C (1% aq.); nonionic; 100% conc.

Antarox® 31-R-1 [Rhodia HPCII
http://www.rhodia-hpcii.com]
Chem. Descrip.: Meroxapol 311
CAS 9003-11-6
Uses: Defoamer, dispersant, wetting agent, emulsifier, demulsifier, binder, stabilizer, gellant, leveling agent, detergent for pharmaceuticals
Properties: Liq.; HLB 6.0; pour pt. -5 C; cloud pt. 33 C (1% aq.); nonionic; 100% conc.

Anti-Dandruff Usnate AO [Cosmetochem
http://www.cosmetochem.ch/index]
Chem. Descrip.: Cocamidopropylamine oxide and lichen extract See Cocamidopropylamine oxide; Lichen (Usnea barbata) extract
Uses: A natural antidandruff additive for shampoos.

Antifoam E 100 conc. [Bayer
http://www.bayerus.com]
Chem. Descrip.: Monoglycerides and diglycerides of fatty acids
Chem. Analysis: Ash 0.5% max.
Uses: Antifoam for pharmaceuticals
Properties: Yellowish liq.; weak odor; not misc. in water; dens. 0.93-0.96; visc. 235 mPa•s min.; vapor pressure 100 mbar max.; b.p. 190 C; setting pt. ≈ 3 C; flash pt. 200 C; ignition pt. ≈ 400 C; pH 5-6 (1% in water); iodine no. 73-83; sapon. no. 154-162; peroxyde no. 6 max.; acid no. 2 max.

Anti-Irritant Complex-1 [Cosmetochem
http://www.cosmetochem.ch/index]
Chem. Descrip.: A blend of plant extracts and panthenol
Uses: Cosmetic specialty offering anti-irritant effect on sensitive skin

Anti-Irritant Liposomes [Engelhard]
Chem. Descrip.: Water, kola (Cola acuminata) extract, bisabolol, phospholipids, and triethanolamine
Uses: Anti-irritant for skin care and sunscreens

Antil® 141 Liq. [Degussa Care Spec.]
Chem. Descrip.: Propylene glycol and PEG-55 propylene glycol oleate
Uses: Thickener for aq. sol’ns. of surfactants, pharmaceuticals; solubilizer for essential oils into aq. surfactant systems
Features: Cold processable; results in Newtonian flow behavior
Regulatory: BfArM registered
Properties: Pale yel. liq.; disp. in water; sol. in ethanol, 1,2-propylene glycol; insol. in veg. and min. oils; acid no. 5 max.; sapon. no. 10-22; nonionic; 40% act.
Use Level: > 0.5%

Antil® HS 60 [Degussa Care Spec.]
Chem. Descrip.: Cocamidopropyl betaine and glyceryl laurate
Uses: Anti-irritant for surfactants
Features: Cold processable; temp.-independent thickening; thixotropic flow behavior; low tendency towards stringiness; PEG-free
Properties: Turbid visc. liq.; characteristic odor; dispersible in water; density 1.07 g/cm3; m.p. ≈0 C; b.p. ≈100 C; flash pt. >100 C (DIN 51758); pH ≈5; amphoteric/nonionic
Toxicology: Nonirritant to skin; strong eye irritant; LD50 (oral) >8,000 mg/kg
Environmental: Biologically degrad.; considered to be a weak water pollutant (German law); do not allow to enter soil, waterways or waste water canal.
Storage: Tends to crystallize partially below 15 C; in that case heat to 35 C and homogenize

Apifil® [Gattefosse
Chem. Descrip.: PEG-8 beeswax
Uses: Structural base for pharmaceutical o/w emulsions, creams; excipient for dermal/transdermal pharmaceuticals; protects the drug, improves stability of the dosage form
Features: Self-emulsifying; allows very high level of oily phase (up to 60%) in o/w emulsions
Regulatory: DMF no. 5171
Properties: Gardner < 8 waxy solid pellets; faint char. odor of beeswax; sol. @ 60 C in chloroform, methylene chloride; sl. sol. in veg. oils; insol. in water, ethanol; m.p. 59-70 C; HLB 9-10; acid no. < 5; iodine no. < 10; sapon. no. 70-90; nonionic; 100% conc.
Use Level: 3-4% (o/w emulsions); 5-15% (creams)
Toxicology: LD0 (oral, rat) > 8.5 g/kg; sl. skin irritant, very sl. eye irritant

Aquabase NF [Croda Chem. Europe Ltd
http://www.croda.co.uk]
Chem. Descrip.: Cetearyl alcohol and
polysorbate 60

Uses: Emulsifier for pharmaceuticals

Features: Self-bodying emulsifying wax

Regulatory: Conforms to emulsifying wax NF

Properties: Creamy wh. waxy flakes; faint char. odor; sol. in acetone, ethanol, IPA; partly sol. in min. oil, IPM; disp. in water; m.p. 50-54 C; iodine no. 3.5 max.; sapon. no. 14 max.; hyd. no. 178-192; flash pt. > 100 C; pH 5.5-7.0 (aq. sol'n.)

Toxicology: LD50 (oral, rat) > max. pract. dose of 16 g/kg; safe to skin and eyes

Environmental: Substantially biodeg.

Precaution: Nonflamm. but will burn if strongly heated

Storage: 2 yrs. storage life under good conditions

Aquacoat® CPD [FMC Biopolymer http://www.fmcbiopolymer.com]

CAS 9004-38-0

Uses: Enteric coating for pharmaceutical tablets, capsules, wet granulation, and in nutritional prods.

Features: Allows acid-sensitive drugs to pass thru the stomach unaffected or to keep stomach-upsetting drugs from releasing in the stomach; low visc.; nontacky

Regulatory: GRAS; kosher

Properties: Odorless; tasteless; visc. < 50 cp; pH 2-3; 19-27% CAP; 29-32% total solids

Storage: 18 mos. shelf life when stored refrigerated @ 5 C; 9 mos. shelf life when stored @ ambient temps.

Aquacoat® ECD [FMC Biopolymer http://www.fmcbiopolymer.com]

Chem. Descrip.: Ethyl cellulose (24.5-29.5), sodium lauryl sulfate (0.9-1.7%), cetyl alcohol (1.7-3.3%) aq. disp. USP/NF See Ethylcellulose

Uses: Coating for pharmaceutical capsules, tablets, granules, and powds. for sustained release, taste masking, and as moisture barrier/sealant, and in wet granulation

Features: Hydrophobic; low visc.; nontacky; stable and reproducible release rates

Regulatory: GRAS; kosher

Properties: Odorless; tasteless; visc. < 150 cps; pH 4-7; 24.5-29.5% ethyl cellulose; 29-32% total solids

Storage: 2 yr. shelf life when stored @ R.T.

Aquacoat® 7H3SF [Hercules/Aqualon http://www.aqualon.com]

Chem. Descrip.: Cellulose gum See Carboxymethylcellulose sodium

CAS 9004-32-4; EINECS/ELINCS 265-995-8

Uses: Rheology control agent, clarifier in skin care (topical gels, ointments)

Regulatory: FDA 21CFR §182.1745, GRAS

Properties: Water-sol.; bulk dens. 0.65-0.95 g/ml; visc. 1000-2800 cps; pH 6.5-8.5 (1%)

Toxicology: LD50 (oral, rat) 27 g/kg; sl. eye irritant; nonirritating to skin

Aqualon® 7H3SXF [Hercules/Aqualon http://www.aqualon.com]

Chem. Descrip.: Cellulose gum See Carboxymethylcellulose sodium

CAS 9004-32-4; EINECS/ELINCS 265-995-8

Uses: Binder, wet tackifier in denture adhesives

Regulatory: FDA 21CFR §182.1745, GRAS

Properties: Water-sol.

Toxicology: LD50 (oral, rat) 27 g/kg; sl. eye irritant; nonirritating to skin

Aqualon® 7L2P [Hercules/Aqualon http://www.aqualon.com]

Chem. Descrip.: Cellulose gum USP/NF, EP See Carboxymethylcellulose sodium

CAS 9004-32-4; EINECS/ELINCS 265-995-8

Uses: Excipient for pharmaceuticals

Properties: Water-sol.; bulk dens. 0.65-0.95 g/ml; visc. 50-200 cps; pH 6.5-8.5 (1%); 99.5% min. purity

Aqualon® 12M8P [Hercules/Aqualon http://www.aqualon.com]

Chem. Descrip.: Cellulose gum USP/NF, EP See Carboxymethylcellulose sodium

CAS 9004-32-4; EINECS/ELINCS 265-995-8

Uses: Excipient for pharmaceuticals

Properties: Water-sol.; bulk dens. 0.65-0.95 g/ml; visc. 400-800 cps; pH 6.5-8.5 (1%); 99.5% min. purity

Aqualon® 12M31P [Hercules/Aqualon http://www.aqualon.com]

Chem. Descrip.: Cellulose gum USP/NF, EP See Carboxymethylcellulose sodium

CAS 9004-32-4; EINECS/ELINCS 265-995-8

Uses: Excipient for pharmaceuticals

Properties: Water-sol.; bulk dens. 0.65-0.95 g/ml; visc. 800-3100 cps; pH 6.5-8.5 (1%); 99.5% min. purity

Aqualon® Cellulose Gum [Hercules/Aqualon http://www.aqualon.com]

Chem. Descrip.: Sodium
### Carboxymethylcellulose

**Trade Name Reference**

- **carboxymethylcellulose**, standard, food, and pharmaceutical grades  
- **See Carboxymethylcellulose sodium**

**CAS** 9004-32-4; **EINECS/ELINCS** 265-995-8

**Uses:** Suspending agent, tableting binder, visc. builder, excipient for pharmaceuticals; therapeutic uses in bulk-forming laxatives; adhesive and cohesives agent in ostomy adhesive prods.; suspending agent for abrasives, polishing agents, and prevents syneresis in toothpaste

**Regulatory:** FDA 21CFR §182.1745, GRAS; DOT nonregulated; SARA §302/304/311/312/313 nonreportable

**Properties:** Wh. to off-wh. gran. powd.; odorless; water-sol.; sp.gr. 1.59; 8% max. moisture

**Toxicology:** LD50 (oral, rat) 27 g/kg; sl. eye irritant; may cause skin irritation by mech. abrasion; inh. of dust may cause respiratory tract irritation; repeated ing., skin contact may cause allergic reaction in susceptible individuals; TSCA listed

**Environmental:** LC50 (rainbow trout or bluegill sunfish, 96 h) 100-1000 mg/l, pract. nontoxic

**Precaution:** Flamm. dust; may cause flamm. dust-air mixts.; static charges may cause flash fire; avoid conditions that generate dust; spills may be slippery; keep away from heat, flame, sparks

**Hazardous Decomp. Prods.:** CO, CO₂, smoke

**HMIS:** Health 1, Flammability 1, Reactivity 0

**Storage:** Store in cool, dry, well-ventilated area; keep container closed when not in use; do not store indirect sunlight, or expose to UV radiation

**Aqualon® N-10** [Hercules/Aqualon http://www.aqualon.com]

**Chem. Descrip.:** Ethylcellulose NF, FCC

**CAS** 9004-57-3

**Uses:** Tablet binder and coating in pharmaceuticals; color stabilizer for easily oxidizable substances; masks bitter taste of drugs; compression aid for tablets; prep. of sustained-release coatings or film coatings in combination with water-sol. polymers; diluent in colorants and inks for marking pharmaceuticals; binder and filler in dry vitamin preps.; flavor fixing agent

**Features:** Tablet coatings prevent reaction with other materials

**Regulatory:** FDA 21CFR §73.1(b), 73.1001, 172.868, 573.420

**Properties:** Sol. in various org. solvs. incl. alcohols, hydrocarbons, chlorinated hydrocarbons, esters, ketones; visc. 5.6-8 cps (5% in 80 parts toluene, 20 parts ethanol); 3% max. moisture

**Aqualon® N-14** [Hercules/Aqualon http://www.aqualon.com]

**Chem. Descrip.:** Ethylcellulose NF, FCC

**CAS** 9004-57-3

**Uses:** Tablet binder and coating in pharmaceuticals; color stabilizer for easily oxidizable substances; masks bitter taste of drugs; compression aid for tablets; prep. of sustained-release coatings or film coatings in combination with water-sol. polymers; diluent in colorants and inks for marking pharmaceuticals; binder and filler in dry vitamin preps.; flavor fixing agent

**Features:** Tablet coatings prevent reaction with other materials

**Regulatory:** FDA 21CFR §73.1(b), 73.1001, 172.868, 573.420

**Properties:** Sol. in various org. solvs. incl. alcohols, hydrocarbons, chlorinated hydrocarbons, esters, ketones; visc. 8-11 cps (5% in 80 parts toluene, 20 parts ethanol); 3% max. moisture

**Aqualon® N-22** [Hercules/Aqualon http://www.aqualon.com]

**Chem. Descrip.:** Ethylcellulose NF, FCC

**CAS** 9004-57-3

**Uses:** Tablet binder and coating in pharmaceuticals; color stabilizer for easily oxidizable substances; masks bitter taste of drugs; compression aid for tablets; prep. of sustained-release coatings or film coatings in combination with water-sol. polymers; diluent in colorants and inks for marking pharmaceuticals; binder and filler in dry vitamin preps.; flavor fixing agent

**Features:** Tablet coatings prevent reaction with other materials

**Regulatory:** FDA 21CFR §73.1(b), 73.1001, 172.868, 573.420

**Properties:** Sol. in various org. solvs. incl. alcohols, hydrocarbons, chlorinated hydrocarbons, esters, ketones; visc. 12-16 cps (5% in 80 parts toluene, 20 parts ethanol); 3% max. moisture
Aqualon® N-50 [Hercules/Aqualon http://www.aqualon.com]
Chem. Descr.: Ethylcellulose NF, FCC
CAS 9004-57-3
Uses: Tablet binder and coating in pharmaceuticals; color stabilizer for easily oxidizable substances; masks bitter taste of drugs; compression aid for tablets; prep. of sustained-release coatings or film coatings in combination with water-sol. polymers; diluent in colorants and inks for marking pharmaceuticals; binder and filler in dry vitamin preps.; flavor fixing agent
Features: Tablet coatings prevent reaction with other materials
Regulatory: FDA 21CFR §73.1(b), 73.1001, 172.868, 573.420
Properties: Sol. in various org. solvs. incl. alcohols, hydrocarbons, chlorinated hydrocarbons, esters, ketones; visc. 18-24 cps (5% in 80 parts toluene, 20 parts ethanol); 3% max. moisture
Aqualon® N-100 [Hercules/Aqualon http://www.aqualon.com]
Chem. Descr.: Ethylcellulose NF, FCC
CAS 9004-57-3
Uses: Tablet binder and coating in pharmaceuticals; color stabilizer for easily oxidizable substances; masks bitter taste of drugs; compression aid for tablets; prep. of sustained-release coatings or film coatings in combination with water-sol. polymers; diluent in colorants and inks for marking pharmaceuticals; binder and filler in dry vitamin preps.; flavor fixing agent
Features: Tablet coatings prevent reaction with other materials
Regulatory: FDA 21CFR §73.1(b), 73.1001, 172.868, 573.420
Properties: Sol. in various org. solvs. incl. alcohols, hydrocarbons, chlorinated hydrocarbons, esters, ketones; visc. 40-52 cps (5% in 80 parts toluene, 20 parts ethanol); 3% max. moisture
Aqualose L75 [Croda Chem. Europe Ltd http://www.croda.co.uk]
Chem. Descr.: PEG-75 lanolin USP
CAS 61790-81-6
Uses: Emollient, moisturizer, emulsifier, solubilizer in pharmaceuticals
Features: Mild
Properties: Pale yel. wax; faint char. odor; sol. in water, anhyd. ethanol; sl. sol. in min. oil, IPM; m.p. 48 C; HLB 16.0; acid no. 5 max.; sapon. no. 20 max.; cloud pt. 75-90 C; flash pt. > 100 C; pH 3.5-7.0 (5% aq.); nonionic; 100% conc.
Toxicology: Nonhazardous
Environmental: Substantially biodeg.
Precaution: Nonflamm. but will burn if strongly heated
Storage: 2 yrs. storage life under good conditions
Aqualose L75/50 [Croda Chem. Europe Ltd http://www.croda.co.uk]
Chem. Descr.: PEG-75 lanolin USP
CAS 61790-81-6
Uses: Emollient, emulsifier in pharmaceuticals
Properties: Cl. to sl. cloudy visc. liq. to soft gel; sol. in water, ethanol; sl. sol. in min. oil, IPM; nonflamm.; nonionic; 50% aq.
Toxicology: Nontoxic
Environmental: Substantially biodeg.; nonhazardous
Aquasorb® A380 [Hercules/Aqualon http://www.aqualon.com]
Chem. Descr.: Sodium carboxymethylcellulose-based See Carboxymethylcellulose sodium
Uses: Superabsorbent for urine, blood, and other body fluids in wound dressings
Features: High purity; does not contain a crosslinking agent
Properties: Wh. to lt. tan free-flowing powd. or gran.; odorless; partly sol. in water; pH 6.5-8.0; 99.5% min. purity
Toxicology: TLV 3 mg/m3 respirable dust; inert nuisance dust; not a primary irritant or
Trade Name Reference

sensitizer; not metabolized in body; no adverse effects from ing.

Environmental: Slowly biodeg.; TL50 (rainbow trout, 96 h) > 100 ppm; low order of toxicity in fish

Precaution: Explosion hazard as powd. in air, in presence of elec. sparks and static discharges; spillages may be slippery

Hazardous Decomp. Prods.: (combustion): CO, CO2, steam, smoke

Storage: Store in clean, dry, well-ventilated area under cover, away from heat, sparks, flames; avoid air and moisture; ground all equip.

Chem. Descrip.: Xanthan gum, PEG-180, and gluconolactone

Uses: Gelant for aq. sol'ns. for health care

Features: Rec. at mildly acidic pH (down to 2.0); produces stable gels at levels of 2-3%; physiologically inert

Chem. Descrip.: Aq. dispersion of methacrylic acid copolymer

Chem. Analysis: 10% max. moisture content

Uses: Enteric coating for resistance to gastric fluid; film coating of tablets and pills; masking agent for taste and odor of pharmaceutical tablets and pills

Features: Reduces risk of interactions between incompatible ingredients; insulates hygroscopic cores; hydrophobic

Regulatory: USP/NF

Properties: Wh. milky liq.; weakly aromatic odor; insol. in pure water, in buffer solutions < pH 5.5 and natural gastric juices; sol. in neutral to weakly alkaline region of the digestive tract, in intestinal fluids, and buffer solutions > pH 5.5; acid no. 300-330; anionic; 95% min. dry polymer

Toxicology: Nontoxic

Storage: 2 yr shelf life; store in tightly closed container away from moisture; keep away from frost

Arboce® A 300 [JRS Pharma http://www.jrspharma.com]

Chem. Descrip.: Cellulose

CAS 9004-34-6; EINECS/ELINCS 232-674-9

Uses: Filler, diluent, binder, disintegrant for pharmaceuticals, direct compression, capsules; improves tablet hardness

Features: Works synergistically with other economic excipients; inert

Properties: Powd.; 200 µm avg. particle size; bulk dens. 0.30 g/cm³

Arboce® M 80 [JRS Pharma http://www.jrspharma.com]

Chem. Descrip.: Powdered cellulose

CAS 9004-34-6; EINECS/ELINCS 232-674-9

Uses: Binder for pharmaceuticals, wet and dry granulation

Features: Fine, fibrous grade

Properties: Powd.; 60 µm avg. particle size; bulk dens. 0.22 g/cm³

Arboce® P 290 [JRS Pharma http://www.jrspharma.com]

Chem. Descrip.: Cellulose

Chem. Analysis: 6% max. loss on drying

CAS 9004-34-6; EINECS/ELINCS 232-674-9

Uses: Binder for pharmaceuticals, wet and dry granulation, esp. for actives with low bulk dens.

Features: Fine grade with increased density and improved flow; works well in combination with MCC

Properties: Powd.; 70 µm avg. particle size; bulk dens. ≈0.300 g/l; pH 5-7

Storage: Store at ambient conditions; keep containers closed
Arcopure® MTBE [Lyondell http://www.lyondell.com]
Chem. Descrip.: Methyl t-butyl ether
CAS 1634-04-4; EINECS/ELINCS 216-653-1
Uses: Extraction solv., reaction medium in pharmaceuticals
Features: Highly resist. to peroxide formation
Regulatory: SARA §313
Properties: Cl. liq., terpene-like odor; sl. sol. in water; misc. with most org. solvs.; m.w. 88.15; sp.gr. 0.744; dens. 6.2 lb/gal (20 C); visc. 0.350 cps (20 C); vapor pressure 204 mm Hg (20 C); f.p. -108 C; b.p. 55 C (760 mm Hg); flash pt. -30 C; ref. index 1.366; surf. tension 19.2 dynes/cm; > 99.9% purity
HMIS: Health 1, Flammability 3, Reactivity 0

Arbobase 125T [Croda Chem. Europe Ltd http://www.croda.co.uk]
Chem. Descrip.: Lanolin alcohol, mineral oil, and octyldodecanol with 150 ppm BHT (antioxidant)
Uses: Liq. absorption base, enhancing appearance and elegance of pharmaceuticals; stabilizer for w/o or o/w emulsions
Properties: Almost colorless to pale yel. cl. oily liq., faint char. odor; sol. in min. oil, IPA, IPM; partly sol. in ethanol; insol. in water; sp.gr. 0.84-0.87; HLB 8.0; acid no. 0.5 max.; iodine no. 12 max.; sapon. no. 3 max.; hyd. no. 11-18; flash pt. > 100 C; ref. index 1.46-1.476
Toxicology: Extremely low toxicity; LD50 (oral, rat) > max. pract. dose of 16 g/kg; nonirritating to eyes and skin
Environmental: Nonhazardous
Precaution: Nonflamm., but will burn if strongly heated
Storage: 2 yrs. shelf life when stored in well-closed containers in cool, dry place; avoid overheating

Argobase EU [Croda Chem. Europe Ltd http://www.croda.co.uk]
Chem. Descrip.: Lanolin alcohol, mineral oil, petrolatum, and paraffin
Uses: Emollient, emulsifier, stabilizer, absorp. base for pharmaceutical ointments or w/o emulsified creams
Features: Active therapeutic ingreds. may be dissolved in either the oil or water phase or physically dispersed as a suspension in the emulsion
Regulatory: Meets BP specs. for wool alcohols ointment
Properties: Pale yel. soft solid, pract. odorless; mostly sol. in min. oil, IPM; partly sol. in acetone, anhyd. ethanol; sl. sol. in anhyd. IPA; insol. in water; m.p. 39-45 C; HLB 4.0; acid no. 2 max.; flash pt. > 100 C; nonionic; 6% conc.
Toxicology: Nonhazardous; BP GRAS for topical appl.
Environmental: Nonhazardous
Precaution: Nonflamm., but will burn if strongly heated
Storage: 2 yrs. shelf life when stored in closed containers in cool place; avoid prolonged heating above 80 C

Argobase EUC 2 [Croda Chem. Europe Ltd http://www.croda.co.uk]
Chem. Descrip.: Lanolin alcohol, cetearyl alcohol, ozokerite, mineral oil, and petrolatum
Uses: W/o emulsifier, absorp. base for pharmaceutical ointments, w/o creams; at low levels as HLB adjuster and stabilizer for o/w emulsions; emollient
Regulatory: Improved version of wool alcohols ointment for the German Pharmacopoeia
Properties: Creamy to pale yel. unctuous mass, almost odorless; mostly sol. in min. oil, IPM; partly sol. in acetone; sl. sol. in anhyd. ethanol and IPA; insol. in water; m.p. 35 C; acid no. 2 max.; sapon. no. 2 max.; flash pt. > 100 C; mostly sol. in min. oil, IPM; partly sol. in acetone, anhyd. ethanol; sl. sol. in anhyd. IPA; insol. in water; m.p. 42-55 C; HLB 9; acid no. 0.5 max.; sapon. no. 1.5 max.; flash pt. > 100 C
Toxicology: Low toxicity
Environmental: Nonhazardous
Precaution: Nonflamm., but will burn if strongly heated
Storage: 2 yrs. shelf life stored in well-closed containers in cool, dry place; avoid overheating
Arlacel® 20 [Uniqema
http://www.uniqema.com; Uniqema Am.
http://www.uniqema.com]
Chem. Descrip.: Sorbitan laurate
CAS 1338-39-2; EINECS/ELINCS 215-663-3
Uses: Emulsifier for pharmaceuticals
Regulatory: SARA §311/312, 313 nonreportable
Properties: Yel. amber liq.; sol. in methanol, ethanol, min., cottonseed and corn oils, ethylene glycol; sp.gr. 1.0; visc. 4250 cps; HLB 8.6; flash pt. > 300 F; nonionic; 90-100% act.
Toxicology: Nonirritant to eyes; relatively harmless by ing.
Precaution: Wear safety glasses with side shields and impervious gloves
Hazardous Decomp. Prods.: COx
HMIS: Health 0, Flammability 1, Reactivity 0
Storage: Store @ 50-90 F in original closed containers

Arlacel® 40 [Uniqema
http://www.uniqema.com; Uniqema Am.
http://www.uniqema.com]
Chem. Descrip.: Sorbitan palmitate
CAS 26266-57-9; EINECS/ELINCS 247-568-8
Uses: Emulsifier for pharmaceuticals
Properties: Cream to tan waxy beads; sol. in IPA; sp.gr. 1; vapor pressure (mmHg) <1; HLB 6.7; pour pt. 48 C; flash pt. > 300 F; nonionic; 100% act.
Toxicology: Nonirritant to eyes and skin; relatively harmless by ing.
Precaution: Wear safety glasses with side shields; impervious gloves and apron
Hazardous Decomp. Prods.: CO2

Arlacel® 80 [Uniqema
http://www.uniqema.com; Uniqema Am.
http://www.uniqema.com]
Chem. Descrip.: Sorbitan oleate
CAS 1338-43-8; EINECS/ELINCS 215-665-4
Uses: Emulsifier for pharmaceuticals
Regulatory: SARA §313 nonreportable
Properties: Yel. amber oily liq.; insol. in water; sol. in IPA, min. and cottonseed oils; sp.gr. 1; visc. 1900 cps; vapor pressure < 1.0000; b.p. > 100 C; HLB 4.3; pour pt. (CC) > 300 F; pH neutral; nonionic; 97-100% act.
Toxicology: Nonirritant to eyes, by ing., inh. and skin contact
Environmental: LC50 (96 h, static, rainbow trout) > 1000 g/ml
Precaution: Avoid strong oxidizing agents
Hazardous Decomp. Prods.: COx

Arlacel® 83V Pharma [Uniqema
http://www.uniqema.com]
Chem. Descrip.: Sorbitan sesquioleate
CAS 8007-43-0; EINECS/ELINCS 232-360-1
Uses: Emulsifier for pharmaceuticals
Features: Pharmaceutical grade of Arlacel® C
Properties: Yel. cl. oily liq.; insol. in water; sol. in

---

Handbook of Pharmaceutical Additives, Third Edition
Trade Name Reference

min. and cottonseed oils, ethanol, IPA; sp.gr. 1; visc 1500 cps; mp.p. ≈ -19 C; HLB 3.7; flash pt. (OC)>148.9 C; nonionic; 100% act.

 Toxicology: Eye irritant; nonirritant to skin; irritant to respiratory and GI tract; nonmutagenic

Environmental: BOD (28 d) 66%; COD 2.39 gO₂/g; LC50 (96 h, static, rainbow trout ) > 100 mg/l

Precaution: Avoid strong oxidizing agents

Storage: Store in original containers

Chem. Descrip.: Glycerol monostearate and PEG-100 stearate. See Glycerol stearate

CAS 31566-31-1; 9004-99-3

Uses: Surfactant, o/w emulsifier for pharmaceuticals

Features: Acid-stable; self-emulsifying

Regulatory: TDG, DOT not regulated; Canada, Australia, Japan, China, Korea, Philippines compliant; SARA §311/312, 313 nonreportable

Properties: Wh. to cream solid gran.; bland odor; disp. in dist. water; insol. in alcohol, cottonseed oil, min. oil, propylene glycol; sp. gr. ≈ 1.1; pour pt. 54 C; HLB 11.0; flash pt. (CC) > 93 C; nonionic

 Toxicology: Nonirritant by ing., inh., or skin contact; nonmutagenic

Precaution: Avoid eye contact; avoid strong oxidizing agents

Hazardous Decomp. Prods.: CO₂

HMIS: Health 1, Flammability 1, Reactivity 0

Storage: Store in original containers

Chem. Descrip.: Glyceryl oleate, propylene glycol. See Glyceryl oleate; Propylene glycol

CAS 67701-32-0; 57-55-6

Uses: Defoamer for oral pharmaceutical products.

Regulatory: SARA §302/313 nonreportable

Properties: Pale yel. cl. liq.; sol. in ethanol, IPA, cottonseed and min. oils; sp.gr. 1; visc. 150 cps; HLB 2.8; flash pt. (COC) > 300 F; nonionic; 100% act.

 Toxicology: Nonirritant by ing., inh., or skin contact

Precaution: Wear safety glasses with side shields and impervious gloves

HMIS: Health 0, Flammability 1, Reactivity 0

Storage: Store in original containers @ 50-90 F
Hazardous Decomp. Prods.: CO₂
HMIS: Health 1, Flammability 1, Reactivity 0
Storage: Store in original containers

Arlatone® 983S Pharma [Uniqema
http://www.uniqema.com]
Chem. Descrip.: Glyceryl stearate, PEG-30 stearate
CAS 123-94-4; 9004-99-3 (generic);
EINECS/ELINCS 204-664-4; $
Uses: O/w emulsifier for pharmaceutical o/w creams and lotions
Regulatory: EP; SARA §311/312 nonreportable
Properties: Off-wh. to ivory powd.; insol. in water; HLB 8.7; nonionic; 100% conc.
Toxicology: Nonirritating to eyes, skin, or respiratory tract; noncarcinogenic
Hazardous Decomp. Prods.: CO₂
HMIS: Health 0, Flammability 1, Reactivity 0

Arlatone® G Pharma [Uniqema
http://www.uniqema.com; Uniqema Am.
http://www.uniqema.com]
Chem. Descrip.: PEG-25 hydrogenated castor oil
CAS 61788-85-0 (generic)
Uses: Surfactant, solubilizer, coupling agent, emollient for pharmaceutical topicals
Regulatory: EP
Properties: Yel. visc., odorless liq.; sol. in water forming haze; sol. in ethanol, isopropanol; insol. in mineral oil and petroleum solvents; sp. gr. ≈ 1; dynamic visc. 1400 mPa.s; b.p. > 100 C; HLB 11.0; pour pt. ≈ 7 C; nonionic
Toxicology: LD50 (oral, rat) > 39.8 g/kg; LD50 (dermal, rabbit) > 9.4 ml/kg; ing. may cause irritation of the GI tract
Environmental: 99% biodeg.; LC50 (96 h, static, rainbow trout) 227 mg/l
Precaution: Avoid strong oxidizing agents
Hazardous Decomp. Prods.: CO₂
HMIS: Health 0, Flammability 1, Reactivity 0
Storage: Store in original containers

Arlex™ 83 [SPI Polyols
http://www.spipolyols.com]
Chem. Descrip.: Sorbitol
CAS 50-70-4; EINECS/ELINCS 200-061-5
Uses: Humectant, nutritive sweetener, oleaginous vehicle, tablet diluent in pharmaceuticals
Features: Noncrystallizing

Armotan® MO [Akzo Nobel bv
http://www2.akzonobel.nl/nl/home/]
Chem. Descrip.: Sorbitan oleate
CAS 1338-43-8; EINECS/ELINCS 215-665-4
Uses: W/o emulsifier for pharmaceuticals
Properties: Gardner 8 liq.; sp.gr. 1.01; visc. 9.5-
Arnica Oil CLR [CLR http://www.clr-berlin.de; Actives Int'l.]
Chem. Descrip.: Arnica montana extract, soybean (Glycine soja) oil, tocopherol
Uses: Emollient, conditioner; emulsified and oily skin and hair care preps. for preventive care for skin; herbal creams, oils, and lotions; also promotes circulation in skin and scalp poorly supplied with blood
Properties: Yel. oil; herbal odor; sol. in oils and fats; dens. 0.918-0.922 g/ml (20 C); acid no. < 3; iodine no. 125-140; ref. index 1.473-1.476
Use Level: 3-10%

Chem. Descrip.: Dodecyltrimethyl ammonium chloride, IPA See Isopropyl alcohol; Laurtrimonium chloride
Uses: Hemolytic agent in pharmaceuticals
Regulatory: FDA 40CFR §180.1001(d)
Properties: Gardner 4 max. cl. liq.; sp.gr. 0.892; visc. 819 SSU (38 C); vapor pressure 44 mm Hg; m.p. -10 C; i.b.p. 80 C; HLB 23; equiv. wt. 263; flash pt. 19 C; pH 6-9; surf. tens. 33 dynes/cm (0.1%); 49-52% act.; 8-12% moisture

Chem. Descrip.: Cetrimonium chloride, IPA See Isopropyl alcohol
Uses: Solubilizer, thickener, wetting agent in pharmaceuticals
Properties: Gardener 3 max. liq.; sol. in water, IPA, propylene glycol, chloroform, CCl₄; insol. in min. oil, IPM; m.w. (act.) 319; sp.gr. 0.88; f.p. 61 F; HLB 15.8; flash pt. (PMCC) 17 C; pH 5-8 (10% aq.); surf. tens. 34 dynes/cm (0.1%); cationic; 49-52% quat. in aq. IPA
Environmental: Biodeg.
Precaution: Flamm.

Chem. Descrip.: Tallowtrimonium chloride, aq. IPA See Isopropyl alcohol
Uses: Mfg. of antibiotics
Properties: Gardner 4 max. liq.; sol. in IPA, propylene glycol, chloroform, CCl₄; disp. in water; insol. in min. oil, IPM; m.w. 340; sp.gr. 0.881; HLB 14.2; pour pt. 15-48 F; flash pt. (PMCC) 16 C; pH 5-8 (10% aq.); cationic; 50% act. in aq. IPA
Environmental: Biodeg.
Precaution: Flamm.

Ascorbic Acid USP, FCC [DSM Nutritional Prods. USA http://www.nutraaccess.com]
Chem. Descrip.: Ascorbic acid USP, FCC, EP See L-Ascorbic acid
CAS 50-81-7; EINECS/ELINCS 200-066-2
Uses: Vitamin source, antioxidant in pharmaceuticals (direct compression tablets, multivitamin tablets, dry preps.)
Regulatory: FDA GRAS
Properties: Wh. or sl. yel. cryst. powd., Pract. odorless, pleasantly tart taste; sol. 1 g/3 ml water, 30 ml alcohol; m.w. 176.13; bulk dens. 0.8-1.1 (tapped); m.p. 190 C; pH 1.9-2.4 (10% aq.); 99-100.5% assay
Precaution: May deteriorate on exposure to atmospheric moisture, oxidizes readily in aq. sol'n.; avoid contact with iron, copper, or nickel salts
Storage: Store in tight, light-resist. containers, optimally @ ≤ 72 F; avoid exposure to moisture and excessive heat

Aspergillus Galactosidase J-P [Amano Enzyme http://www.amano-enzyme.co.jp]
Chem. Descrip.: Enzyme from Aspergillus oryzae See β-Galactosidase
CAS 9031-11-2; EINECS/ELINCS 232-864-1
Uses: Enzyme for digestive preps., pharmaceuticals
Regulatory: JP
Properties: Off-wh. to brown powd.; sl. odor; sol. in water
Toxicology: Inh. of aerosols or dust may induce sensitization and may cause allergic reactions in sensitized individuals; nontoxic
Environmental: Biodegrad.; not harmful to aquatic and marine organisms when dissolved with copious amounts of water
Precaution: Wear respirator, protective glasses, and impervious gloves; avoid dust formation
Hazardous Decomp. Prods.: None
Storage: Store container in a cool and dry place

Astor™ OK 210W [Honeywell Spec. Wax &
Trade Name Reference

Chem. Descrip.:  Microcrystalline wax, clay treated
CAS 64742-42-3; EINECS/ELINCS 264-038-1
Uses:  Wax for pharmaceutical creams and dressings

Regulatory:  FDA approved; DOT nonregulated; SARA §311/313 nonreportable; Canada DSL, EINECS, Australia, Korea listed

Properties:  Wh. waxy solid (prill, pellet, or slab form); char. waxy odor; negligible sol. in water; sp.gr. 0.83-0.87; visc. 13-17 cSt (212 F); vapor pressure negligible; m.p. 65-90 C; congeal pt. 159-167 F; flash pt. (OC) > 260 C; ref. index 1.437-1.441 (100 C); 100% act.

Toxicology:  Exposure to fumes from melting may cause irritation to eyes, respiratory system; contact with molten material will cause thermal burns; contact with powd. may cause mech. irritation to eyes; TSCA listed

Environmental:  Not expected to cause adverse environmental effect

Precaution:  Spillages may be slippery; melts in proximity to fire causing slippery floors; does not ignite readily, but will burn; incompat. with strong oxidizing agents

Hazardous Decomp. Prods.:  Fire may produce irritating or poisonous gases incl. CO, CO2

Storage:  Avoid excessive heat

Chem. Descrip.:  Low-melt paraffin wax, clay treated
CAS 8002-74-2; EINECS/ELINCS 232-315-6
UN 3257
Uses:  Wax for pharmaceuticals (creams, dressings)

Features:  Low melt point

Regulatory:  DOT regulated above 212 F; SARA §311/313 nonregulated; Canada DSL, EINECS, Australia, Korea listed

Properties:  Liq.; water-wh. molten wax @ 200 F; char. waxy odor; negligible sol. in water; sp.gr. 0.80-0.82; visc. 2.5-2.7 cSt (98.9 C); m.p. 45-67 C; flash pt. (OC) > 190 C; 100% act.

Toxicology:  Exposure to fumes may cause irritation to eyes, nose, throat; contact with molten material will cause thermal burns; TSCA listed

Precaution:  Spillages may be slippery; does not ignite readily, but will burn; incompat. with strong oxidizing agents

Hazardous Decomp. Prods.:  Fire may produce irritating or poisonous gases incl. CO, CO2

Storage:  Avoid excessive heat

Chem. Descrip.:  Calcium phosphate dibasic
CAS 7757-93-9; EINECS/ELINCS 231-826-1
Uses:  Direct compression excipient in tablet manufacture and a source of calcium and phosphorus in nutritional supplements

Regulatory:  USP, FCC, EP, DMF 8145, kosher

Properties:  Wh. free-flowing powd.; 1% max. on 20 mesh, 40% min. on 100 mesh; sl. sol. in water (0.08 wt/wt% @100 C); insol. in alcohol; pH 5; hygroscopic; 98-105% assay; 7-8.5% loss on ignition; 29.1% Ca; 22.6% P
Trade Name Reference

Toxicology: OSHA TWA 15 mg/m³; LD50 (oral, rat) > 10000 mg/kg
Storage: Store in an area that is cool, dry, sanitary, isolated from all toxic and harmful substances

ATBC, NF [Morflex http://www.morflex.com]
Chem. Descrip.: Acetyl tri-n-butyl citrate  See Acetyl tributyl citrate
CAS 77-90-7; EINECS/ELINCS 201-067-0
Uses: Plasticizer for aq. pharmaceutical coatings including controlled sustained release, immediate release, and enteric; taste masking agent
Features: Protects drugs from gastric juices but allows its release into the intestine
Properties: Insol. in water; miscible in acetone, ethanol, toluene, heptane, and veg. oil; m.w. 402.5; sp.gr. 1.045-1.055; dens. 8.74 lb/gal; visc. 32.7 cps; b.p. 173 C (1 mm); pour pt. -75 F; flash pt. (COC) 204 C; ref. index 1.4410-1.4425; 99% min. assay

ATEC, NF [Morflex http://www.morflex.com]
Chem. Descrip.: Acetyltriethyl citrate See Acetyl triethyl citrate
CAS 77-89-4; EINECS/ELINCS 201-066-5
Uses: Plasticizer for aq. pharmaceutical coatings including controlled sustained release, immediate release, and enteric; taste masking agent
Features: Protects drugs from gastric juices but allows its release into the intestine
Regulatory: NF, DMF, FDA 21CFR §175.105, 175.300, 175.320, 175.380, 176.170, 176.210, 177.2600, 177.2800, 178.3570, 178.3700, 178.3910, 573.720
Properties: Sol. 0.72 g/100 ml water; miscible in acetone, ethanol, toluene, heptane; partially sol. in veg. oil; m.w. 318.3; sp.gr. 1.135-1.139; dens. 9.47 lb/gal; visc. 53.7 cps; b.p. 132 C (1 mm); pour pt. -45 F; flash pt. (COC) 188 C; ref. index 1.432-1.441; 99% min. assay

Chem. Descrip.: Laureth-9
CAS 9002-92-0 (generic); EINECS/ELINCS 221-284-4
Uses: Emulsifier for topical pharmaceuticals; in topical anesthetics and soothing balms; lanolin substitute
Properties: Pale yel. liq. to paste; sol. in water, ethanol, toluene, mineral oil; insol. in paraffin oil; dens. (50 C) 0.986 g/ml; visc. (50 C) ≈ 24 mPa.s; m.p. ≈ 19 C; HLB 14.3; flash pt. >149 C; nonionic

Avagel™ 520 [Avatar http://www.avatarcorp.com]
Chem. Descrip.: Petrolatum
CAS 8009-03-8; EINECS/ELINCS 232-373-2
Uses: Moisturizer, moisture barrier, lubricant, conditioner for pharmaceuticals
Properties: Lovibond 1.0Y max. color (2´´); odorless; tasteless; consistency 370 dmm

Avagel™ 525 [Avatar http://www.avatarcorp.com]
Chem. Descrip.: Petrolatum
CAS 8009-03-8; EINECS/ELINCS 232-373-2
Uses: Moisturizer, moisture barrier, lubricant, conditioner for pharmaceuticals
Properties: Lovibond 1.0Y max. color (2´´); odorless; tasteless; consistency 305 dmm

Avanel® S 150 CG [BASF http://www.basf.com]
Chem. Descrip.: Sodium C12-15 pareth-15 sulfonate
CAS 121546-77-8
Uses: Surfactant, emulsifier, counter-irritant for acne treatments and hypoallergenic products
Properties: APHA color 250 max. cl. liq.; polyol odor; sol. in water; visc. 300 max. cps; b.p.
Trade Name Reference

Avanel® S 150 CG N [BASF AG http://www.basf.de]
Chem. Descrip.: Sodium C12-15 pareth-15 sulfonate, water
CAS 121546-77-8
Uses: Surfactant, emulsifier, counter-irritant for acne treatments and hypoallergenic prods.
Properties: APHA color 250 max. cl. liq.; sol. in water; visc. 300 max. cps; pH 6-8 (10%)
Storage: 6 mos. shelf life when stored in original, unopened containers; store in a cool, dark place

Avapol™ 20 [Avatar http://www.avatarcorp.com]
Chem. Descrip.: POE (20) sorbitan monolaurate See Polysorbate 20
CAS 9005-64-5
Uses: Emulsifier, solubilizer, wetting agent for pharmaceuticals
Properties: Yel. to amber liq.; sol. in water; sp.gr. 1.10; vapor pressure < 1.0 mm Hg; vapor dens. > 1; flash pt. (COC) 285 C
Toxicology: LD50 (oral, rat) > 64 ml/kg; primary skin irritation index (rabbit) 0.72; may cause eye irritation; TSCA listed
Precaution: Incompat. with fluorine, chlorine, strong oxidizers, strong acids
Hazardous Decomp. Prods.: CO, CO2, other toxic gases
HMIS: Health 1, Flammability 1, Reactivity 0
Storage: Store in a cool, well-ventilated area in sealed, labeled containers

Avapol™ 60 [Avatar http://www.avatarcorp.com]
Chem. Descrip.: POE (20) sorbitan monostearate See Polysorbate 60
CAS 9005-67-8
Uses: Syn. flavoring agent, defoamer, emulsifier, dispersant, solubilizer, wetting agent in pharmaceuticals
Properties: Yel. soft solid; sol. in water; sp.gr. 1.10; vapor pressure < 1.0 mm Hg; vapor dens. > 1; m.p. 25 C; b.p. > 200 C; flash pt. (COC) 285 C
Toxicology: LD50 (oral, rat) > 64 ml/kg; primary skin irritation index (rabbit) 0.72; may cause eye irritation; TSCA listed
Precaution: Incompat. with fluorine, chlorine, strong oxidizers, strong acids
Hazardous Decomp. Prods.: CO, CO2, other toxic gases
HMIS: Health 1, Flammability 1, Reactivity 0
Storage: Store in a cool, well-ventilated area in sealed, labeled containers

Avapol™ 60K [Avatar http://www.avatarcorp.com]
Chem. Descrip.: POE (20) sorbitan monostearate See Polysorbate 60
CAS 9005-67-8
Uses: Defoamer, emulsifier, dispersant, solubilizer, wetting agent in pharmaceuticals
Properties: Yel. soft solid; sol. in water; sp.gr. 1.10; vapor pressure < 1.0 mm Hg; vapor dens. > 1; m.p. 25 C; b.p. > 200 C; flash pt. (COC) 285 C
Toxicology: LD50 (oral, rat) > 64 ml/kg; primary skin irritation index (rabbit) 0.72;
may cause eye irritation; TSCA listed

Precaution: Incompat. with fluorine, chlorine, strong oxidizers, strong acids

Hazardous Decomp. Prods.: CO, CO₂, other toxic gases

HMIS: Health 1, Flammability 1, Reactivity 0

Storage: Store in a cool, well-ventilated area in sealed, labeled containers

Avapol™ 65 [Avatar http://www.avatarcorp.com]

Chem. Descrip.: POE (20) sorbitan tristearate

See Polysorbate 65

CAS 9005-71-4

Uses: Emulsifier, defoamer, dispersant, solubilizer, wetting agent in pharmaceuticals

Properties: Tan solid

Avapol™ 80 [Avatar http://www.avatarcorp.com]

Chem. Descrip.: POE (20) sorbitan monooleate

See Polysorbate 80

CAS 9005-65-6

Uses: Syn. flavoring agent, defoamer, emulsifier, dispersant, solubilizer, wetting agent in pharmaceuticals

Properties: Yel to amber liq.; bland odor; sol. in water; sp.gr. 1.06-1.09; vapor pressure < 1.0 mm Hg; vapor dens. > 1; m.p. -12 C; b.p. > 350 C; flash pt. (COC) 288 C

Toxicology: LD50 (oral, rat) > 64 ml/kg; primary skin irritation index (rabbit) 0.13; may cause eye irritation; TSCA listed

Precaution: Incompat. with fluorine, chlorine, strong oxidizers, strong acids

Hazardous Decomp. Prods.: CO, CO₂, other toxic gases

HMIS: Health 1, Flammability 1, Reactivity 0

Storage: Store in a cool, well-ventilated area in sealed, labeled containers

Avapol™ EMD [Avatar http://www.avatarcorp.com]

Chem. Descrip.: Ethoxylated mono-/diglycerides

See Ethoxylated mono- and diglycerides

CAS 61163-33-5

Uses: Emulsifier, crystal modifier, aeration enhancer in pharmaceuticals

Regulatory: FDA 21CFR §172.834, kosher

Properties: Pale yellow, semi-solid

Toxicology: LD50 (oral, rat) > 64 ml/kg; primary skin irritation index (rabbit) 0.13; may cause eye irritation; TSCA listed

Precaution: Incompat. with fluorine, chlorine, strong oxidizers, strong acids

Hazardous Decomp. Prods.: CO, CO₂, other toxic gases

HMIS: Health 1, Flammability 1, Reactivity 0

Storage: Store in a cool, well-ventilated area in sealed, labeled containers

Avester™ SMS sobitan ester [Avatar http://www.avatarcorp.com]

Chem. Descrip.: sorbitan monostearate

See Sorbitan stearate

CAS 1338-41-6; EINECS/ELINCS 215-664-9

Uses: Emulsifier, defoamer, dispersant, solubilizer, wetting agent in pharmaceuticals

Properties: Waxy, cream-colored solid

Avicel® CE-15 [FMC Biopolymer http://www.fmcbiopolymer.com]

Chem. Descrip.: Microcrystalline cellulose and guar gum

See Guar (Cyanopsis tetragonoloba) gum

CAS 1338-41-6; EINECS/ELINCS 215-664-9

Uses: Drug delivery system for direct
Trade Name Reference

**Avicel® CL-611** [FMC Biopolymer
http://www.fmcbiopolymer.com]

Chem. Descrip.: Microcrystalline cellulose and cellulose gum USP/NF See Carboxymethylcellulose sodium

CAS 9004-34-6; 9004-32-4; EINECS/ELINCS 232-674-9

Uses: Excipient, vehicle, visc. control agent, thixotrope for pharmaceutical suspensions and emulsions

Features: Heat and freeze-thaw stable; stable @ pH 4-11

Regulatory: GRAS; kosher; CERCLA nonreportable; Australia AICS; China; Japan ENCS (8-568/8-203); Philippines PICCS

Properties: Off-wh. free-flowing powd.; odorless; bulk dens. 0.6; pH 6-8 (2% solids disp.); volatiles ≈ 4%

Toxicology: LD50 (oral, rat) > 5 g/kg, (dermal, rabbit) > 2 g/kg; LC50 (inh., rat, 4 h) > 5.82 mg/l

Precaution: Slippery when wet

NFPA: Health 0, Flammability 1, Reactivity 0

Storage: Long shelf-life stability; hygroscopic; 2 yr. shelf life when stored in cool, dry place; avoid excessive heat and moisture

**Avicel® PH-101** [FMC Biopolymer
http://www.fmcbiopolymer.com]

Chem. Descrip.: Microcrystalline cellulose USP/NF, Ph.Eur., JP, BP

CAS 9004-34-6

Uses: Binder, disintegrant, flow aid, and filler for pharmaceuticals (direct compression tableting, wet and dry granulation, encapsulation, spherization) and animal health prods.; absorbent; peptizing agent; anticing agent for oils to make sticky substances free flowing

Features: Nonreactive; exc. stability; nonabrasive

Regulatory: NF, EP., JP, BP; GRAS; kosher; E 460(i)

Properties: Wh. free-flowing, odorless powd., 90 µ avg. particle size; > 45% +200 mesh; odorless; tasteless; insol. in water, dil. acids, most org. solvs.; pract. insol. in NaOH sol’n. (1 in 20); bulk dens. 0.30 g/cc; pH 5.5-7.0

Toxicology: ACGIH TWA 10 mg/m³; LD50 (dermal, rabbit) > 2,000 mg/kg, (oral, rat) > 5,000 mg/kg; nonirritating to eyes and skin; low oral, dermal, and inh. toxicity

Environmental: Biodegrad. in soil at a rate comparable to corn starch

Precaution: Wear monogoggles

NFPA: Health 0, Flammability 1, Reactivity 0

Storage: Very stable; unlimited shelf life; hygroscopic; store in well-sealed container in a dry place

**Avicel® PH-102** [FMC Biopolymer
http://www.fmcbiopolymer.com]

Chem. Descrip.: Microcrystalline cellulose

CAS 9004-34-6; EINECS/ELINCS 232-674-9

Uses: Binder, disintegrant, flow aid, and filler for pharmaceuticals (direct compression tableting, wet and dry granulation, encapsulation, spherization) and animal health prods.; absorbent; peptizing agent; anticaking agent for oils to make sticky substances free flowing

Features: Nonreactive; exc. stability; nonabrasive

Regulatory: NF, EP., JP, BP; GRAS; kosher; E 460(i)

Properties: Wh. free-flowing, odorless powd., < 30% +200 mesh; odorless; tasteless; insol. in water, dil. acids, most org. solvs.; pract. insol. in NaOH sol’n. (1 in 15); bulk dens. 0.29 g/cc; pH 5.5-7.0

Toxicology: ACGIH TWA 10 mg/m³; LD50 (dermal, rabbit) > 2,000 mg/kg, (oral, rat) > 5,000 mg/kg; nonirritating to eyes and skin; low oral, dermal, and inh. toxicity

Environmental: Biodegrad. in soil at a rate comparable to corn starch

Precaution: Wear monogoggles

NFPA: Health 0, Flammability 1, Reactivity 0

Storage: Very stable; unlimited shelf life; hygroscopic; store in well-sealed container in a dry place

**Avicel® PH-103** [FMC Biopolymer
http://www.fmcbiopolymer.com]

Chem. Descrip.: Microcrystalline cellulose NF, Ph.Eur., JP, BP

CAS 9004-34-6

Uses: Binder, disintegrant, flow aid, and filler for pharmaceuticals (direct compression tableting, wet and dry granulation, encapsulation, spherization) and animal health prods.; absorbent; peptizing agent; anticaking agent for oils to make sticky substances free flowing

Features: Nonreactive; exc. stability; nonabrasive

Regulatory: NF, EP., JP, BP; GRAS; kosher; E 460(i)

Properties: Wh. powd.; 50 µ avg. particle size; < 30% +200 mesh; odorless; tasteless; insol. in water, dil. acids, most org. solvs.; pract. insol. in NaOH sol’n. (1 in 20); bulk dens. 0.29 g/cc; pH 5.5-7.0

Toxicology: ACGIH TWA 10 mg/m³; LD50 (dermal, rabbit) > 2,000 mg/kg, (oral, rat) > 5,000 mg/kg; nonirritating to eyes and skin; low oral, dermal, and inh. toxicity

Environmental: Biodegrad. in soil at a rate comparable to corn starch

Precaution: Wear monogoggles

Storage: Very stable; unlimited shelf life; hygroscopic; store in well-sealed container in a dry place
Avicel® PH-112 [FMC Biopolymer]
[http://www.fmcbiopolymer.com]
Chem. Descrip.: Microcrystalline cellulose NF, Ph.Eur., JP, BP
CAS 9004-34-6
Uses: Binder, disintegrant, flow aid, filler for direct compression of pharmaceutical solid dosage forms, tableting; binder in wet granulation, slugging and roller compaction; binder, flow aid, filler in encapsulation, esp. hard gelatin capsules
Features: Low moisture grade; ideal for use with moisture-sensitive actives; improves shelf life and prod. stability; desiccation props.; no need to pre-dry prior to usage
Regulatory: GRAS; kosher
Properties: Wh. powd.; 50 µ avg. particle size; odorless; tasteless; insol. in water, dil. acids, most org. solvs.; pract. insol. in NaOH sol'n. (1 in 20); bulk dens. 0.28 g/cc; pH 5.5-7.0
Toxicology: ACGIH TWA 10 mg/m³; LD50 (dermal, rabbit) > 2,000 mg/kg, (oral, rat) > 5,000 mg/kg; nonirritating to eyes and skin; low oral, dermal, and inh. toxicity
Environmental: Biodegrad. in soil at a rate comparable to corn starch
Precaution: Wear monogoggles
Storage: Very stable; unlimited shelf life; hygroscopic; store in well-sealed container

Avicel® PH-105 [FMC Biopolymer]
[http://www.fmcbiopolymer.com]
Chem. Descrip.: Microcrystalline cellulose NF, Ph.Eur., JP, BP
CAS 9004-34-6
Uses: Binder, disintegrant, flow aid, and filler for pharmaceuticals (direct compression tableting, wet and dry granulation, encapsulation, spherization) and animal health prods.; absorbent; peptizing agent; anticaking agent for oils to make sticky substances free flowing
Features: Inc. sp. surf. area for adhesion or adsorp.; enhanced compressibility; packs better during sphere formation
Regulatory: GRAS; kosher
Properties: Wh. fine powd.; 20 µ avg. particle size; < 1% +400 mesh; odorless; tasteless; insol. in water, dil. acids, most org. solvs.; pract. insol. in NaOH sol'n. (1 in 20); bulk dens. 0.25 g/cc; pH 5.0-7.0
Toxicology: ACGIH TWA 10 mg/m³; LD50 (dermal, rabbit) > 2,000 mg/kg, (oral, rat) > 5,000 mg/kg; nonirritating to eyes and skin; low oral, dermal, and inh. toxicity
Environmental: Biodegrad. in soil at a rate comparable to corn starch
Precaution: Wear monogoggles
Storage: Very stable; unlimited shelf life; hygroscopic; store in well-sealed container

Avicel® PH-113 [FMC Biopolymer]
[http://www.fmcbiopolymer.com]

**Trade Name Reference**

comparable to corn starch

**Precaution:** Wear monogoggles

**Storage:** Very stable; unlimited shelf life; hygroscopics; store in well-sealed container

**Avicel® PH-200** [FMC Biopolymer
http://www.fmcbiopolymer.com]

**Chem. Descrip.:** Microcrystalline cellulose NF, Ph.Eur., JP, BP

**CAS 9004-34-6**

**Uses:** Binder, disintegrant, flow aid, filler for direct compression of pharmaceutical solid dosage forms, tableting; binder in wet granulation, slugging and roller compaction; binder, flow aid, filler in encapsulation, esp. hard gelatin capsules

**Features:** Lg. particle size grade; superior flow props. improve content uniformity and reduce tablet wt. variation; exc. compressibility

**Regulatory:** GRAS; kosher

**Properties:** Wh. powd.; 180 µ avg. particle size; odorless; tasteless; insol. in water, dil. acids, most org. solvs.; pract. insol. in NaOH sol'n. (1 in 20); bulk dens. 0.32 g/cc

**Storage:** Very stable; unlimited shelf life; hygroscopic; store in well-sealed container

**Avicel® PH-302** [FMC Biopolymer
http://www.fmcbiopolymer.com]

**Chem. Descrip.:** Microcrystalline cellulose NF, Ph.Eur., JP, BP

**CAS 9004-34-6**

**Uses:** Binder, disintegrant, flow aid, filler for direct compression of pharmaceutical solid dosage forms, tableting; binder in wet granulation, slugging and roller compaction; binder, flow aid, filler in encapsulation, esp. hard gelatin capsules

**Features:** High dens. grade; provides faster flow rates for greater tablet productivity, reduced tablet wt. variation, and enables smaller tablet size prod.

**Regulatory:** GRAS; kosher

**Properties:** Wh. powd.; 90 µ avg. particle size; odorless; tasteless; insol. in water, dil. acids, most org. solvs.; pract. insol. in NaOH sol'n. (1 in 20); bulk dens. 0.44 g/cc

**Toxicology:** ACGIH TWA 10 mg/m³; LD50 (dermal, rabbit) > 2,000 mg/kg, (oral, rat) > 5,000 mg/kg; nonirritating to eyes and skin; low oral, dermal, and inh. toxicity

**Environmental:** Biodegrad. in soil at a rate comparable to corn starch

**Precaution:** Wear monogoggles

**Storage:** Very stable; unlimited shelf life; hygroscopic; store in well-sealed container

**Avicel® RC-581** [FMC Biopolymer
http://www.fmcbiopolymer.com]

**Chem. Descrip.:** Microcrystalline cellulose and cellulose gum USP/NF See Carboxymethylcellulose sodium

**CAS 9004-34-6; 9004-32-4; EINECS/ELINCS 232-674-9**

**Uses:** Excipient, vehicle, visc. control agent, thixotrope for pharmaceutical suspensions and emulsions

**Features:** Heat and freeze-thaw stable; stable @ pH 4-11

**Regulatory:** FDA GRAS; CERCLA nonreportable; Australia AICS; China; Japan ENCS (8-568/8-203); Philippines PICCS

**Properties:** Off-wh., free-flowing powd.; odorless; tasteless; insol. in water; bulk dens. 0.6; ignition temp. 420 C min.; pH 6-8 (2% solids disp.); volatiles ≈ 4%

**Toxicology:** LD50 (oral, rat) > 5 g/kg, (dermal, rabbit) > 2 g/kg; LC50 (inh., rat, 4 h) > 5.82 mg/l

**Precaution:** Slippery when wet
Trade Name Reference

**NFPA:** Health 0, Flammability 1, Reactivity 0

**Storage:** Long shelf-life stability; hygroscopic; 2 yr. shelf life when stored in cool, dry place; avoid excessive heat and moisture

BGL™ 855 [Avatar  
http://www.avatarcorp.com]
Chem. Descrip.: Caprylic/capric triglyceride
Uses: Solubilizer, solvent, mold release agent, conditioner in pharmaceuticals; provide emolliency, moisturizing and viscosity reducing properties with a nongreasy, nontacky after-feel in ointments
Regulatory: 21CFR 170.30 (GRAS); kosher, SARA §302, 313 nonreportable; CERCLA nonreportable
Properties: Pale yel. odorless liq.; negligible in water (< 0.1%); sol. in hydrocarbons; sp. gr. 0.9; vapor pressure < 1.0 mmHg @ 760 mmHg
Toxicology: Eye irritant; prolonged or repeated contact with the skin may cause irritation of the hair follicles and block sebaceous gland, causing rash, acne, or dermatitis; noncarcinogenic; TSCA listed
Precaution: Avoid excessive heat, ignition sources, chlorine, fluorine, and other strong oxidizers.

BIO-PSA® 7-4101 Silicone Adhesive [Dow Corning  
http://www.dowcorning.com]
Chem. Descrip.: Methylated trimethylated silica in heptane (40.0 - 70.0%) and xylene (< 0.1%)
CAS 238094-36-5; 142-82-5; 1330-20-7
UN UN1206
Uses: Pressure-sensitive adhesive designed to adhere transdermal drug delivery systems to the skin
Features: Enhanced chemical stability in the presence of amine-functional drugs, excipients, and enhancers; compat. with many drugs
Regulatory: SARA §311/312 Acute and Fire Hazard, §313 nonreportable
Properties: Colorless to pale yel. liq.; sp. gr. 0.934; visc. 500 cP; b.p. > 98 C; flash pt. (CC) -3.9 C; flamm.
Toxicology: ACGIH TLV TWA 400 ppm, STEL 500 ppm; nonirritating and nonsensitizing to skin; inh. may irritate nose and throat and overexposure by inh. may injure the heart and CNS
Precaution: Wear full face respirator and chemical protective gloves; avoid oxidizing
**BIO-PSA® 7-4102 Silicone Adhesive**  [Dow Corning](http://www.dowcorning.com]

Chem. Descrip.: Methylated trimethylated silica (> 60.0%) in ethyl acetate (40.0 - 70.0%) and xylene (< 0.1%)

CAS 238094-36-5; 141-78-6; 1330-20-7

UN UN 1173

**Uses:** Pressure-sensitive adhesive designed to adhere transdermal drug delivery systems to the skin

**Features:** Enhanced chemical stability in the presence of amine-functional drugs, excipients, and enhancers; compat. with many drugs

**Regulatory:** SARA §311/312 Acute, Chronic, and Fire Hazard, §313 nonreportable

**Properties:** Colorless to pale yel. liq.; sp. gr. 1.021; visc. 500 cP; b.p. > > 77 C; flash pt. (CC) -4.4 C; flamm.

**Toxicology:** ACGIH TLV TWA 400 ppm, STEL 500 ppm.; nonirritating and nonsensitizing to skin; inh. may irritate nose and throat and overexposure by inh. may injure the blood, lungs, liver and kidneys

**Precaution:** Wear full face respirator and chemical goggles; avoid oxidizing materials

**Hazardous Decomp. Prods.:** COx, SiO2

**NFPA:** Health 2, Flammability 3, Reactivity 0

**Storage:** 72 mos. shelf life from date of production; store @ R.T. in original unopened containers away from heat, sparks, and flame

---

**BIO-PSA® 7-4201 Silicone Adhesive**  [Dow Corning](http://www.dowcorning.com]

Chem. Descrip.: Methylated trimethylated silica (40.0 - 70.0%) in heptane (40.0 - 70.0%)

CAS 238094-36-5; 142-82-5

UN UN1206

**Uses:** Pressure-sensitive adhesive designed to adhere transdermal drug delivery systems to the skin

**Features:** Enhanced chemical stability in the presence of amine-functional drugs, excipients, and enhancers; compat. with many drugs

**Regulatory:** SARA §311/312 Acute and Fire Hazard, §313 nonreportable

**Properties:** Colorless to pale yel. liq.; sp. gr. 0.94; visc. 4000 cP; b.p. > 98 C; flash pt. (CC) -3.9 C; flamm.

**Toxicology:** ACGIH TLV TWA 400 ppm, STEL 500 ppm.; nonirritating and nonsensitizing to skin; inh. may irritate nose and throat and overexposure by inh. may injure the heart and CNS

**Precaution:** Wear full face respirator and chemical protective gloves; avoid oxidizing materials

**Hazardous Decomp. Prods.:** COx, SiO2

**NFPA:** Health 2, Flammability 3, Reactivity 0

**Storage:** 72 mos. shelf life from date of production; store @ R.T. in original unopened containers away from heat, sparks, and flame

Chem. Descrip.: Laureth-9

CAS 3055-99-0; EINECS/ELINCS 221-284-4
Trade Name Reference

BPS-10 [Nikko Chems. Co. Ltd
http://www.nikkol.co.jp/index.html]
Chem. Descrip.: PEG-10 phytosterol
CAS 68441-03-2
Uses: Emulsifier for o/w and w/o compds., solubilizer, dispersant, emollient, foam stabilizer, visc. modifier, conditioner in pharmaceuticals
Features: Hydrophilic; forms low visc. glossy emulsions
Regulatory: JSCI listed
Properties: Pale yel. wax-like solid; sol. in water, propylene glycol, ethanol; HLB 18.0; acid no. 0.09 max.; pH 5.7 (5%); nonionic; 100% conc.
Toxicology: TSCA listed

BPSH-25 [Nikko Chems. Co. Ltd
http://www.nikkol.co.jp/index.html]
Chem. Descrip.: Calcium carbonate (90%), starch (10%)
CAS 471-34-1; 9005-25-8
Uses: Excipient, calcium source for nutraceutical supplements, multivitamin and min. supplements, pharmaceutical antacid tablets, bone loss treatment tablets, chewable and swallowed tablets
Features: Directly compressible; uniform particle size distribution; smooth mouthfeel
Regulatory: USP, BP, EP compliance
Properties: Free-flowing spray-dried wh. powd.; sl. sol. in water; 75% < 40 µ; dens. 0.65-0.85 g/cc (tapped)
Toxicology: LD50 (oral, rat) > 6450 mg/kg; ACGIH TWA 10 mg/m³ inhalable particulates; ACGIH TWA 3 mg/m³ respirable particulates; dusts of this product should not produce toxicity; ing. of large amounts can cause GI irritation, nausea, and vomiting; excessive or prolonged exposure may produce more harmful effects
Environmental: Low potential for impact on aquatic organisms; LC50 (mosquito fish, 48 h) 56,000 mg/L
Precaution: Avoid acids, alum, ammonium salts and mercury and hydrogen; will ignite on contact with fluorine
Hazardous Decomp. Prods.: On combustion oxides of calcium, carbon, sulfur and/or...

gen may be emitted

HMIS: Health 1, Flammability 1, Reactivity 0

Bardac® 2240 [Lonza http://www.lonz

a.com]
Chem. Descrip.: Didecyl dimethyl ammonium chloride See Didecyldimonium chloride
CAS 7173-51-5; EINECS/ELINCS 230-525-2
Uses: Antiseptic for topicals (hand scrubs, teat dips, athlete’s foot prevention)
Properties: Liq.; 40% act.

Bardac® 2270 [Lonza http://

a.com]
Chem. Descrip.: Didecyl dimethyl ammonium chloride See Didecyldimonium chloride
CAS 7173-51-5; EINECS/ELINCS 230-525-2
Uses: Antiseptic for topicals (hand scrubs, teat dips, athlete’s foot prevention)
Properties: Liq.; 70% act.

Bardac® 2270E [Lonza http:

a.com]
Chem. Descrip.: Didecyl dimethyl ammonium chloride in ethanol See Didecyldimonium chloride; Alcohol
Uses: Antiseptic for topicals (hand scrubs, teat dips, athlete’s foot prevention)
Properties: Liq.; 70% act.

Barquat® CT-29 [Lonza http:

a.com]
Chem. Descrip.: Cetrimonium chloride
CAS 112-02-7; EINECS/ELINCS 203-928-6
Uses: Coagulant in mfg. of antibiotics
Properties: Colorless to pale yel. liq.; m.w. 319; sp.gr. 0.966; dens. 8.10 lb/gal; pH 6.5-8.3 (10%); cationic; 29% act.
Storage: Store in original unopened containers @ 50-140 F; may become cloudy if exposed to temps. < 50 F; use as is or warm overnight @ 100-125 F to restore uniformity

Batyl Alcohol 100, EX [Nikko Chems. Co. Ltd http://www.nikkol.co.jp/index.html]
Chem. Descrip.: Batyl alcohol
CAS 544-62-7; EINECS/ELINCS 208-874-7
Uses: Emollient, emulsifier, hydrotrope, emulsion thickener for pharmaceuticals
Features: Low hemolysis
Regulatory: JSCI listed
Properties: Wh. powd.; m.p. 60-70 C; nonionic; 100% conc.
Toxicology: Low toxicity; TSCA listed

Beeswax SP 11 [Strahl & Pitsch http://www.strahlpitsch.com]
Chem. Descrip.: Beeswax, USP/NF
CAS 8006-40-4; EINECS/ELINCS 232-383-7
Uses: For pharmaceutical creams, lotions, ointments, tablet coatings
Features: Pharmaceutical grade
Properties: Yel. slabs, cakes, or pellets; m.p. 60-

65 C; acid no. 17-24; sapon. no. 89-103
Toxicology: TSCA listed

Beeswax SP 44 [Strahl & Pitsch http://www.strahlpitsch.com]
Chem. Descrip.: Beeswax
CAS 8006-40-4; EINECS/ELINCS 232-383-7
Uses: Pharmaceuticals, ointments, tablet coatings, lotions, creams
Regulatory: FDA 21CFR §184.1973, GRAS; CTFA listed
Properties: Wh. slabs, cakes, or pellets; m.p. 60-

65 C; acid no. 17-24; sapon. no. 89-103

Beeswax SP 58 [Strahl & Pitsch http://www.strahlpitsch.com]
Chem. Descrip.: Syn. beeswax See Beeswax, synthetic
CAS 71243-51-1; EINECS/ELINCS 275-286-5
Uses: Pharmaceuticals, ointments, tablet coatings, lotions, creams
Features: For apps. where genuine beeswax is not required
Properties: Wh. slabs, cakes, or pellets; m.p. 57-

62 C; acid no. 17-24; sapon. no. 89-103
Toxicology: TSCA listed

Toxicology: **TSCA listed**

**Behenyl Alcohol 65, 80** [Nikko Chems. Co. Ltd](http://www.nikkol.co.jp/index.html)

Chem. Descrip.: Behenyl alcohol
CAS 861-19-8; EINECS/ELINCS 211-546-6
Uses: Emollient, emulsion stabilizer for pharmaceuticals
Regulatory: JSCI listed
Properties: Wh. flake; sol. in warm ethanol, min. oil, 2-hexyldecanol, IPM; insol. in water; 65 and 80% act. resp.
Toxicology: Very safe; mild skin irritant; **TSCA listed**

**Benecel® Hydroxypropyl Methylcellulose** [Hercules/Aqualon](http://www.aqualon.com)

Chem. Descrip.: Hydroxypropyl methylcellulose
CAS 9004-65-3
Uses: Protective colloid, suspending agent, tablet excipient in pharmaceuticals

**Benecel® Methylcellulose** [Hercules/Aqualon](http://www.aqualon.com)

Chem. Descrip.: Methyl cellulose See Methylcellulose
CAS 9004-67-5
Uses: Thickener, stabilizer, rheology control agent, film-former, suspending agent, water-retention aid, binder for pharmaceuticals
Regulatory: OSHA hazardous; SARA §302/304/313 nonreportable, §311/312 Fire Hazard; CERCLA, RCRA nonreportable; DOT not regulated; Canada DSL; Korea KECL
Properties: Wh. to off-wh. powd.; odorless; water-sol.; sp.gr. 0.25; visc. 10-12,000 mPa•s (2% aq.); pH 5-7 (1% sol'nl.); nonionic
Toxicology: May cause eye, skin irritation by abrasion; inh. may cause respiratory tract irritation; not mutagenic; **TSCA listed**
Precaution: Wear safety glasses, impervious gloves, protective clothing; may form flamm. dust/air mixts.; spills may be slippery; avoid generating dust; avoid breathing dust; ground all equipment; incompat. with acids, oxidizers, alkalis, strong sunlight, UV light, free radicals
Hazardous Decomp. Prods.: CO, CO₂, smoke
HMIS: Health 1, Flammability 1, Reactivity 0
Storage: Store in cool, dry, well-ventilated area in closed container; keep away from heat, flame, sparks, ignition sources

**Benecel® M** [Hercules/Aqualon](http://www.aqualon.com)

Chem. Descrip.: Methyl cellulose See Methylcellulose
CAS 9004-67-5
Uses: Suspending agent, binder, stabilizer, thickener, rheology control agent, film-former, gelant, surfactant for solid and liq. pharmaceutical dosage forms, sustained release tablets
Regulatory: EP, USP, FCC compliance
Properties: Sol. in water; visc. 10-12,000 mPa•s (2%)

Trade Name Reference

Uses: Thickener, suspending agent, stabilizer for pharmaceuticals
Features: Rec. where economics are important
Properties: Fine powd.; odorless; 0% on No. 200 sieve; brightness 60; pH 9.5-10.5 (2% slurry); 5-8% moisture

Chem. Descrip.: Stearalkonium hectorite
Chem. Analysis: Moisture 3% max.
Uses: Rheology control agent, suspension aid in ointments
Features: Vegetable origin; specially treated to control microbial content to below 100 cfu/g; highly efficient for intermediate to high polarity systems; predictable, reproducible, stable visc. control; improved emulsion stability; nonabrasive; lt. in color
Regulatory: Europe EINECS; Canada DSL; Australia AICS; China; Japan
Properties: Lt. cream powd.; odorless; insol. in water; sp.gr. 1.7; lel 52.6 g/m³
Use Level: 0.25-3.0%
Toxicology: LD50 (oral, rat) 20 g/kg; not mutagenic; ACGIH TLV TWA 10 mg/m³ (8 h, total), 3 mg/m³ (8 h, respirable); OSHA PEL TWA 10 mg/m³ (8 h, total), 5 mg/m³ (8 h, respirable); TSCA listed
Environmental: LC50 (corophium volutator) no acute effect, (acartia tonsa) > 30 g/l; EC50 (skeletonema costatum) > 10 g/l; insignificant biodeg.
Precaution: Wear chemical resistant gloves, eye protection, air-purifying dust respirator; avoid breathing dust, contact with eyes; may be slippery when wet
Hazardous Decomp. Pros.: Under fire: CO, CO₂, org. chlorides, ammonia
HMIS: Health 0, Flammability 1, Reactivity 0
Storage: Keep closed when not in use

Chem. Descrip.: Purified hectorite clay
CAS 12173-47-6; EINECS/ELINCS 235-340-0
Uses: Thickener, rheological additive, thixotrope, pigment suspending agent, emulsion stabilizer for antidandruff shampoos, lotions, antiperspirants
Features: VOC-free
Properties: Wh. powd.; 100% act.
Use Level: 0.25-5.0% on total wt.

Chem. Descrip.: Octyldodecanol, disteardimonium hectorite, propylene carbonate (2.5%) See Nonoxynol-1
CAS ::108-32-7; EINECS/ELINCS ::203-572-1
Uses: Rheological control agent, suspension aid for chap stick, and ointments
Features: Predictable, reproducible and stable visc. control; exc. suspension of pigments and actives; enhanced emulsion stabilization; nonabrasive; imparts pleasant residual silkiness to skin; provides a high degree of formulation flexibility
Regulatory: Europe EINECS; Canada DSL exempted; Australia exempted; Japan ENCS
Properties: Lt. tan gel; odorless; negligible in water; dens. 0.86; m.p. -20 C; flash pt. (PMCC) 356-392 F
Toxicology: LD50 (oral, rat) > 2 g/kg; may cause eye, skin, respiratory irritation
Precaution: Wear chemical resistant gloves, safety glasses or goggles, org. vapor air purifying respirator; incompat. with oxidizers
HMIS: Health 1, Flammability 1, Reactivity 0
Storage: Store in cool, dry place

Chem. Descrip.: Hectorite, hydroxyethylcellulose
Uses: Suspending agent, rheology control agent, thickener, gelant, antisagging agent, leveling agent for antidandruff shampoos
Features: VOC-free
Regulatory: SARA §313 nonreportable
Properties: Milky wh. powd.; water-disp.; sp.gr. 2.6; dens. 20.9 lb/gal; pH 2% aq. disp. 8.8-10.2; 100% NV

Bentonite BC 342 [MPSI http://www.mp-solutionsinc.com]
Chem. Descrip.: Bentonite NF
Chem. Analysis: SiO₂ (58-61%); Al₂O₃ (21-22%); CaO (2-2.5%); MgO (3-4%); Fe₂O₃ (0.6-1%);
Trade Name Reference

**Na₂O (3.7-4.2%); K₂O (0.3-0.5%); TiO₂ (0.18-0.25%)**

**CAS 1302-78-9; EINECS/ELINCS 215-108-5**

**Uses:** Thickener in pharmaceuticals, acne lotions, medicinal skin creams, ointments, salves, powder preps., antidandruff shampoos; tablet binder

**Regulatory:** DOT nonregulated; SARA §313 nonreportable

**Properties:** Tan powd.; 100% through 200 mesh; mild odor; negligible sol.; sp.gr. 2.50; dens. 20.82 lb/solid gal; dry brightness 82-86; pH 9.5-10.5; 5-8% moisture

**Toxicology:** May cause **sl. eye irritation**; inh. of high dust levels may cause **minor irritation**; possible **hazard from chronic exposure to dust** (cryst. silica can cause **severe/permanent lung damage** and is a human **carcinogen**); TSCA listed

**Precaution:** Very slippery when wetted with water

**Hazardous Ingredients:** Cryst. silica (< 1%)

**HMIS:** Health 1, Flammability 0, Reactivity 0

**Storage:** Store in closed containers in dry area

**Bentonite BC 670** [MPSI http://www.mp-solutionsinc.com]

**Bentonite BC 870** [MPSI](http://www.mp-solutionsinc.com)

**Chem. Descrip.:** Bentonite NF  
**Chem. Analysis:** SiO₂ (61.50%); Al₂O₃ (20.40%); CaO (1.20%); MgO (2.60%); Fe₂O₃ (3.80%); Na₂O (2.20%); K₂O (1.30%); TiO₂ (0.22%)

**CAS 1302-78-9; EINECS/ELINCS 215-108-5**

**Uses:** Thickener in pharmaceuticals, acne lotions, medicinal skin creams, ointments, salves, powder preps., antidandruff shampoos; tablet binder

**Regulatory:** DOT nonregulated; SARA §313 nonreportable

**Properties:** Tan powd.; 99.75% through 325 mesh, 99% through 200 mesh; mild odor; negligible sol.; sp.gr. 2.70; dens. 22.49 lb/solid gal; dry brightness 56-63; 5-8% moisture

**Toxicology:** May cause slight eye irritation; inh. of high dust levels may cause minor irritation; possible hazard from chronic exposure to dust (cryst. silica can cause severe/permanent lung damage and is a human carcinogen); TSCA listed

**Precaution:** Very slippery when wetted with water

**Hazardous Ingredients:** Cryst. silica (< 1%)

**HMIS:** Health 1, Flammability 0, Reactivity 0

**Storage:** Store in closed containers in dry area

---

**Bentonite BC 4446** [MPSI](http://www.mp-solutionsinc.com)

**Chem. Descrip.:** Bentonite NF  
**Chem. Analysis:** SiO₂ (59-61%); Al₂O₃ (20-22%); CaO (2-3%); MgO (3.5-4%); Fe₂O₃ (0.6-0.7%); Na₂O (3.5-4%); K₂O (0.02-0.03%); TiO₂ (0.1-0.2%)

**CAS 1302-78-9; EINECS/ELINCS 215-108-5**

**Uses:** Thickener in pharmaceuticals, acne lotions, medicinal skin creams, ointments, salves, powder preps., antidandruff shampoos; tablet binder

**Regulatory:** DOT nonregulated; SARA §313 nonreportable

**Properties:** Tan powd.; 100% through 200 mesh; mild odor; negligible sol.; sp.gr. 2.50; dens. 20.82 lb/solid gal; dry brightness 83-87; pH 9.5-10.5; 8% max. moisture

**Toxicology:** May cause slight eye irritation; inh. of high dust levels may cause minor irritation; possible hazard from chronic exposure to dust (cryst. silica can cause severe/permanent lung damage and is a human carcinogen); TSCA listed

**Precaution:** Very slippery when wetted with water

**Hazardous Ingredients:** Cryst. silica (< 1%)

**HMIS:** Health 1, Flammability 0, Reactivity 0

**Storage:** Store in closed containers in dry area

---

**Bentonite BC 4448** [MPSI](http://www.mp-solutionsinc.com)

**Chem. Descrip.:** Bentonite NF  
**Chem. Analysis:** SiO₂ (58-61%); Al₂O₃ (21-22%); CaO (2-2.5%); MgO (3-4%); Fe₂O₃ (0.6-1%); Na₂O (3.7-4.2%); K₂O (0.3-0.5%); TiO₂ (0.18-0.25%)

**CAS 1302-78-9; EINECS/ELINCS 215-108-5**

**Uses:** Thickener in pharmaceuticals, acne lotions, medicinal skin creams, ointments, salves, powder preps., antidandruff shampoos; tablet binder

**Regulatory:** DOT nonregulated; SARA §313 nonreportable

**Properties:** Tan powd.; 100% through 200 mesh; mild odor; negligible sol.; sp.gr. 2.50; dens. 20.82 lb/solid gal; dry brightness 82-86; pH 9.5-10.5; 5-8% moisture

**Toxicology:** May cause slight eye irritation; inh. of high dust levels may cause minor irritation; possible hazard from chronic exposure to dust (cryst. silica can cause severe/permanent lung damage and is a human carcinogen); TSCA listed

**Precaution:** Very slippery when wetted with water

**Hazardous Ingredients:** Cryst. silica (< 1%)

**HMIS:** Health 1, Flammability 0, Reactivity 0

**Storage:** Store in closed containers in dry area
Trade Name Reference

20.82 lb/solid gal; visc. 40-200 cps (5% solids); dry brightness 82-86; pH 9-10; 5-8% moisture

Toxicology: May cause sl. eye irritation; inh. of high dust levels may cause minor irritation; possible hazard from chronic exposure to dust (cryst. silica can cause severe/permanent lung damage and is a human carcinogen); TSCA listed

Precaution: Very slippery when wetted with water

Hazardous Ingredients: Cryst. silica (< 1%)

HMIS: Health 1, Flammability 0, Reactivity 0

Storage: Store in closed containers in dry area

Beta Carotene 30% FS [DSM Nutritional Prods. USA http://www.nutraaccess.com]

Chem. Descrip.: β- Carotene in corn oil with dl-α-tocopherol added as an antioxidant See Carotene; Corn (Zea mays) oil

CAS 7235-40-7; EINECS/ELINCS 230-636-6
Uses: Colorant or nutrient for pharmaceuticals

Regulatory: FDA 21CFR §73.95 (food use), 73.1095 (drug use), 73.2095 (cosmetic use), 182.5245 GRAS

Properties: Terra-cotta red fluid, fresh char. odor; sl. sol. in all oils and fats; 30% min. assay

Storage: Store in cool, dry place in tightly closed container

Beta Carotene 1% CWS [DSM Nutritional Prods. USA http://www.nutraaccess.com]

Chem. Descrip.: β- Carotene with dextrin, gum acacia, partially hydrogenated veg. oil, sucrose and antioxidants (sodium ascorbate, dl-α-tocopherol) See Carotene; Hydrogenated vegetable oil

Uses: Colorant in pharmaceuticals

Regulatory: FDA 21CFR §73.95 (food use), 73.1095 (drug use), 73.2095 (cosmetic use), GRAS

Properties: Orange fine powd.; 90% min. through 80 mesh; disp. in water; 1% min. assay (β-carotene)

Toxicology: Avoid ingestion or direct contact by applying suitable protective measures and personal hygiene

Storage: Store in tightly closed container in cool place protected from light and humidity; sensitive to air, heat

Beta-Carotene 10% DC/GFP [BASF AG http://www.basf.de]

Chem. Descrip.: Beta-carotene See Carotene

CAS 7235-40-7; EINECS/ELINCS 230-636-6
Uses: Dietary supplements for multivitamin mineral tablets made by direct compression

Features: High density and narrow particle size distribution; high tablet stability; nonanimal-derived; nonallergenic

Regulatory: Kosher and halal certified
Properties: Free-flowing, nondusting beadlet powd.

Beta-Carotene Dry Powd. 10% DC/GFP [BASF AG http://www.basf.de]

Chem. Descrip.: Beta-carotene in a matrix of modified starch and sucrose, coated with native starch with antioxidants and anticaking agents See Carotene; Starch sodium octenyl succinate

Chem. Analysis: 10% min. assay

CAS 7235-40-7; EINECS/ELINCS 230-636-6
Uses: Dietary supplement in direct compression of multivitamin mineral tablets, hard shell capsules, chewable and effervescent tablets, sugar or film-coated tablets

Regulatory: USP, EP

Properties: Free-flowing dk. red uniform sperical particles; mild characteristic odor; bulk dens. 0.7 g/ml

Storage: Store in tightly sealed original packaging @ R.T. in dry dark place; sensitive to oxygen, light, heat and moisture

Chem. Descrip.: Mono- and diglycerides with ≤ 0.01% citric acid and 0.02% BHT as preservatives See Mono- and diglycerides of fatty acids

Uses: Emulsifier for topical ointments

Properties: Ivory wh. fine flakes; m.p. 135-145 F; iodine no. 3 max.; 40-46% alpha monoglycerides

Storage: Up to 6 mos. storage life at temps. not to exceed 85 F

Bioban® BP Pharma [Dow http://www.dow.com]

Chem. Descrip.: 2-Bromo-2-nitropropane-1,3-diol (99%)

CAS 52-51-7; EINECS/ELINCS 200-143-0
Uses: Antimicrobial, preservative for topical pharmaceuticals

Features: Broad spectrum; effective against Gram-positive and Gram-negative bacteria, esp. Pseudomonas sp.; rec. @ pH 4-8;
excellent in combination with other preservatives, particularly isothiazolinone-based preservatives

**Properties:** Wh. to off-wh. cryst. solid; m.p. approx. 130 C; 99% active composition

**Toxicology:** No teratological effects were noted in studies involving rats and rabbits exposed either orally or dermally; similarly, no mutagenic effects were noted in the Ames test.

**Precaution:** Avoid contact with skin, eyes, clothing. Avoid breathing dust.

**Storage:** Store at temperatures below 25°C; keep container closed.

**Bioban® BP Pharma 30** [Dow http://www.dow.com]

**Chem. Descrip.:** 2-Bromo-2-nitropropane-1,3-diol (30%)

**CAS 52-51-7; EINECS/ELINCS 200-143-0**

**Uses:** Antimicrobial, preservative for topical pharmaceuticals

**Features:** Broad spectrum; effective against Gram-positive and Gram-negative bacteria, esp. *Pseudomonas* sp.; rec. @ pH 4-8

**Properties:** Pale yel. to colorless liq.; sp. gr. 1.19-1.21 (20 C); pH 4.5 max.; 29.1-30.9 % by wt.

**Chem. Descrip.:** α-Glucan oligosaccharide

**Uses:** Rec. for acne preps.

**Properties:** Wh. powd.; very sl. char. odor; sol. in water, propylene glycol, glycerol; insol. in ethanol; nonmisc. with min. and veg. oils; sp.gr. 0.70; pH 5.5±0.5 (5%)

**Toxicology:** Nonirritating to skin and eyes

**Storage:** Store @ R.T.

**Bio-Gentle® Formulation** [Lonza http://www.lonza.com]

**Chem. Descrip.:** Dialkyl dimethyl ammonium chloride, 1-methyl-2-heptadecenyl-3-olylamidoethyl imidazolinium methosulfate, ethyl alcohol, isopropyl alcohol, water See Oleic imidazolium methosulfate; Alcohol

**Uses:** Biocide for pharmaceuticals, veterinary prods.

**Chem. Descrip.:** Panthenol amino dimethicone See Panthenolamino dimethicone

**Uses:** Substantivity agent for topical pharmaceuticals

**Properties:** Milky liq.; water-disp.; pH 6-8; 37 ± 1% solids

**Use Level:** 1-2%

**Chem. Descrip.:** Dimethiconol panthenate See Dimethiconol panthenol
**Trade Name Reference**

**Uses:** Conditioner and bodying agent for pharmaceuticals, creams and lotions

**Properties:** Milky liq.; water-disp.; pH 4.3-5.3; 36-38% solids

**Use Level:** 1-2%

**Chem. Descrip.:** Di(octyldodecyl) fluoroheptyl citrate See Dioctyldodecyl fluoroheptyl citrate

**Uses:** Emollient, pigment dispersant for pharmaceuticals, creams, lotions, gels

**Features:** Improves slip and feel on skin; helps create water barrier

**Regulatory:** DOT nonregulated; SARA §311/312 nonreportable

**Properties:** Yel. to amber, cl. to hazy oily liq.; mild odor; sol. @ 5% in safflower oil, castor oil, min. oil, ethanol, oleyl alcohol, octyl palmitate; insol. in water, propylene glycol; sp.gr. 0.97; b.p. > 100 C; acid no. 4 max.; sapon. no. 135-165; flash pt. (PMCC) > 200 C; 0.2% max. moisture

**Use Level:** 0.5-5%

**Toxicology:** No potential health effects expected from handling; may cause mod. eye irritation, or skin irritation/discomfort; ing. may cause abdominal discomfort, nausea, vomiting, diarrhea; keep vapor concs. within PEL for formaldehyde

**Environmental:** Do not release into sewers or waterways

**Precaution:** No known chem. incompatibilities

**Hazardous Decomp. Prods.:** Heated to > 150 C in presence of air, may form formaldehyde vapors (potential cancer hazard, skin/respiratory sensitizer, irritant to nose/throat/digestive system)

**Storage:** Keep container tightly closed

**Chem. Descrip.:** Dimethiconol cysteinate See Dimethiconol cysteine

**Uses:** Ingre. for pharmaceuticals, creams and lotions

**Properties:** Milky wh. liq.; water-disp.; pH 4-6; 36-38% solids

**BIO-SOFT® N-300** [Stepan http://www.stepan.com]

**Chem. Descrip.:** TEA-dodecylbenzene sulfonate See TEA-dodecylbenzenesulfonate

**CAS** 27323-41-7; EINECS/ELINCS 248-406-9

**Uses:** Detergent, wetting agent, and foaming agent for pharmaceuticals

**Properties:** Pale yel. cl. liq.; water sol.; dens. 9.0 lb/gal; sp.gr. 1.08; visc. 3200 cps; surf. tens. 38.8 dynes/cm (0.1%); anionic; 60% act.

**Environmental:** Biodeg.

**Biospumex 275K** [Cognis France]

**Chem. Descrip.:** alkyl polyalkoxyether

**Uses:** Defoamer in pharmaceuticals

**Features:** Particularly rec. for media containing starch, glucose; silicone-free; does not affect the dissolved oxygen rate; stable to conventional sterilization conditions

**Properties:** Cl., colorless liq.; dens. 1.015-1.025; cloud pt. 27.5-32.5 C; pH (5% sol'n) 5-8; nonionic

**Use Level:** ≈ 1000 ppm

**Environmental:** No toxicity towards a wide range of micro-organisms

**Biosulphur Fluid** [CLR http://www.clr-berlin.de; Actives Int’l.]

**Chem. Descrip.:** Polysorbate 80 and sulfur

**Uses:** Sebum control additive, conditioner for aq., aq.-alcoholic, and emulsified preps., skin care, scalp care, oily hair care, dandruff, liq. shampoos

**Properties:** Dk. brn. visc. liq.; specific odor; sol. in water, water-alcohol mixts., alcohol, surfactants; misc. with fatty and min. oils; dens. 1.070-1.095 g/ml (20 C); ref. index 1.475-1.478; 1.4-1.7% S

**Use Level:** 0.1-2.0%

**Bio-Surf I-20** [Lonza http://www.lonza.com]

**Chem. Descrip.:** Nonylphenoxypoly(ethyleneoxy) ethanol-iodine complex, iodophor conc. See Nonoxynol iodine

**CAS** 11096-42-7

**Uses:** Disinfectant in pharmaceuticals

**Regulatory:** FDA 21 CFR §178.1010; EPA Reg. no. 6836-184

**Properties:** Very dk. brn. visc. liq.; mild, pleasantly clean halogen odor; sol. in water, monobutyl glycol ether, propylene glycol; sp.gr. 1.34; dens. 11.2 lb/gal; visc. 580 cps; f.p. < 0 C; pH 1.68 (10% aq.); flash pt. (PMCC) > 93 C; nonionic; 92% act. in water

**Toxicology:** TSCA listed

**Storage:** Congealing may occur during prolonged storage at low temperatures, reversible upon warming with mixture.
Trade Name Reference

BIO-TERGE® 804 [Stepan
http://www.stepan.com]
Chem. Descrip.: Sodium C14-16 olefin
sulfonate, sodium laureth sulfate,
lauramide DEA
Uses: Surfactant conc. for pharmaceuticals
Properties: Liq.; anionic; 50% act.

BIO-TERGE® AS-40 [Stepan
http://www.stepan.com]
Chem. Descrip.: Sodium C14-16 olefin
sulfonate
CAS 68439-57-6; EINECS/ELINCS 270-407-8
Uses: Detergent, foaming agent for
pharmaceuticals
Features: Provides exc. flash foam; contains no
phosphates
Properties: Yel. liquid; water sol.; dens. 8.9
lb/gal; anionic; 40% act. in water

BIO-TERGE® AS-90 Beads [Stepan
http://www.stepan.com]
Chem. Descrip.: Sodium C14-16 olefin
sulfonate
CAS 68439-57-6; EINECS/ELINCS 270-407-8
Uses: Detergent, foaming agent for
pharmaceuticals
Features: High foaming; provides exc. flash
foam
Properties: Solid beads; anionic; 90% conc.

Biowax 754 [Biosil Tech.
http://www.biosiltech.com]
Chem. Descrip.: Dimethicone copolyol wax
CAS 68937-54-2
Uses: Moisturizer, humectant for skin care
emulsions and gels, e.g., lotions, creams,
pharmaceuticals
Features: Can be used to make clear gels and
sol'n.
Properties: Wh. wax; water-sol. (readily
disperses @ 77 F); m.p. 36-46 C; flash pt.
(PMCC) > 200 F; nonionic; 100% solids

α-Bisabolol [BASF AG http://www.basf.de]
Chem. Descrip.: (±)-α-Bisabolol nat. derived
from chamomile and (±)-α-bisabolol rac.
(synthetic) See Bisabolol
CAS 515-69-5; EINECS/ELINCS 208-205-9
Uses: Antiphlogistic (anti-inflammatory)
active agent for cosmetics industry for
protection and care of sensitive skin
Properties: Colorless to sl. ylsh. cl. liq., faint
floral sweetish odor; sol. in ethanol, 2-
propanol, natural, min., and syn. fats and oils;
insol. in water and glycerin
Toxicology: (±): LD50 (rat) > 15,000 mg/kg;
nonirritating to skin, sl. irritating to eyes

(-)-α-Bisabolol [Symrise USA
http://www.symrise.com]
Chem. Descrip.: Bisabolol
CAS 515-69-5; EINECS/ELINCS 208-205-9
Uses: Anti-irritant in skin care (for sensitive,
dry, and problematic skin), after-sun and sun
block prods., aftershave, shaving prods.,
face/body lotions, baby care, hair care

Bitrit-1™ (1% Biotin Trituration) [DSM
Nutritional Prods. USA
http://www.nutraaccess.com]
Chem. Descrip.: Biotin FCC in dicalcium
phosphate dihydrate carrier See d-Biotin;
Calcium phosphate dibasic
CAS 58-85-5
Uses: As a source of the micronutrient biotin
in pharm., food and special dietary food
prods. including multivitamin tablets,
capsules, or powd. forms
Regulatory: USP, EP, FCC
Properties: Wh. free-flowing powd.; odorless;
98% min. through 80 mesh; insol. in water,
m.w. 244.31; org. solvs.; bulk dens. 50 lb/ft³;
10 mg min. d-biotin/g
Storage: 2 yr shelf life; store @ 59-86 F

Bitterness Blocker 1, Natural [Natural
Advantage http://www.natural-
advantage.net]
Uses: Flavor blocker for blocking bitter taste
of pharmaceuticals
Regulatory: GRAS; CFR §172.510; 21 CFR
§101.22; kosher
Properties: Liq.; faint, nodescript taste; sol. in
PG, alcohol, flavor oils

Bitterness Blocker 2, Natural [Natural
Advantage http://www.natural-
advantage.net]
Uses: Flavor blocker for blocking bitter taste
of pharmaceuticals
Regulatory: GRAS; CFR §172.510; 21 CFR
§101.22; kosher
Properties: Liq.; faint, nodescript taste; sol. in
PG, alcohol, flavor oils

Bitterness Blocker 3, Natural [Natural
Advantage http://www.natural-
advantage.net]
Uses: Flavor blocker for blocking bitter taste
of pharmaceuticals
Regulatory: GRAS; CFR §172.510; 21 CFR
Trade Name Reference

§101.22; kosher
Properties: Liq.; faint, nodescript taste; sol. in PG, alcohol, flavor oils

Bitterness Blocker 4, Natural [Natural Advantage http://www.natural-advantage.net]
Uses: Flavor blocker for blocking bitter taste of pharmaceuticals
Regulatory: GRAS; CFR §172.510; 21 CFR §101.22; kosher
Properties: Liq.; faint, nodescript taste; sol. in PG, alcohol, flavor oils

Bitterness Blocker 5, Natural [Natural Advantage http://www.natural-advantage.net]
Uses: Flavor blocker for blocking bitter taste of pharmaceuticals
Regulatory: GRAS; CFR §172.510; 21 CFR §101.22; kosher
Properties: Liq.; faint, nodescript taste; sol. in PG, alcohol, flavor oils

Bitterness Blocker 6, Natural [Natural Advantage http://www.natural-advantage.net]
Uses: Flavor blocker for blocking bitter taste of pharmaceuticals
Regulatory: GRAS; CFR §172.510; 21 CFR §101.22; kosher
Properties: Liq.; faint, nodescript taste; sol. in PG, alcohol, flavor oils

Bitterness Blocker 7, Natural [Natural Advantage http://www.natural-advantage.net]
Uses: Flavor blocker for blocking bitter taste of pharmaceuticals
Regulatory: GRAS; CFR §172.510; 21 CFR §101.22; kosher
Properties: Liq.; faint, nodescript taste; sol. in PG, alcohol, flavor oils

Bitterness Blocker 8, Natural [Natural Advantage http://www.natural-advantage.net]
Uses: Flavor blocker for blocking bitter taste of pharmaceuticals
Regulatory: GRAS; CFR §172.515; 21 CFR §101.22; kosher
Properties: Liq.; faint, nodescript taste; sol. in PG, alcohol, flavor oils

Bitterness Blocker 9, Natural [Natural Advantage http://www.natural-advantage.net]
Uses: Flavor blocker for blocking bitter taste

Blanose® Cellulose Gum [Hercules/Aqualon http://www.aqualon.com]
Chem. Descrip.: Cellulose gum See Carboxymethylcellulose sodium
CAS 9004-32-4; EINECS/ELINCS 265-995-8
Uses: Thickener in hydrocolloid wound gels; absorbent for body fluids in dressings; thickener, water binder, flow aid, thixotrope, suspending agent, gellant, foam stabilizer, adhesion promoter, lubricant in toothpaste
Properties: Anionic

Blanose® 7L2P [Hercules/Aqualon http://www.aqualon.com]
Chem. Descrip.: Cellulose gum USP/NF, EP See Carboxymethylcellulose sodium
CAS 9004-32-4; EINECS/ELINCS 265-995-8
Uses: Excipient for pharmaceuticals
Properties: Water-sol.; bulk dens. 0.65-0.95 g/ml; visc. 50-200 cps; pH 6.5-8.5 (1%); 99.5% min. purity

Blanose® 12M8P [Hercules/Aqualon http://www.aqualon.com]
Chem. Descrip.: Cellulose gum USP/NF, EP See Carboxymethylcellulose sodium
CAS 9004-32-4; EINECS/ELINCS 265-995-8
Uses: Excipient for pharmaceuticals
Properties: Water-sol.; bulk dens. 0.65-0.95 g/ml; visc. 400-800 cps; pH 6.5-8.5 (1%); 99.5% min. purity

Blanose® 12M31P [Hercules/Aqualon http://www.aqualon.com]
Chem. Descrip.: Cellulose gum USP/NF, EP See Carboxymethylcellulose sodium
CAS 9004-32-4; EINECS/ELINCS 265-995-8
Uses: Excipient for pharmaceuticals
Properties: Water-sol.; bulk dens. 0.65-0.95 g/ml; visc. 800-3100 cps; pH 6.5-8.5 (1%); 99.5% min. purity

BLO® [ISP http://www.ispcorp.com]
Chem. Descrip.: γ-Butyrolactone (99.7%) See Butyrolactone
CAS 96-48-0; EINECS/ELINCS 202-509-5
Uses: Intermediate for alkaloids, analgesics, anesthetics
Regulatory: Not regulated for transport; Canada DSL; Europe EINECS; Japan ENCS; Australia
Blue Algae Extract [Engelhard]
Chem. Descrip.: Blue algae (Haslea ostrearia) extract, propylene glycol
Uses: Anti-irritant for skin care

Chem. Descrip.: Sodium tetraborate decahydrate  See Sodium borate decahydrate
CAS 1303-96-4; EINECS/ELINCS 215-540-4
Uses: Base for pharmaceutical preps. and ointments

Regulatory: FDA 21CFR §175.105, 176.180, 181.30; SARA, RCRA nonreportable, DOT nonregulated; Canada DSL; Europe EINECS; South Korea listed; Japan MITI; WHMIS D2A
Properties: Wh. cryst. powd. or gran., odorless; sol. in water, glycerin; m.w. 381.37; sp.gr. 1.71; vapor pressure negligible; m.p. 62 C; pH 6.1 (0.1%); nonflamm.; > 99% act.
Toxicology: OSHA PEL 10 mg/m³ total dust; LD50 (oral, rat) 4500-5000 mg/kg, (dermal, rabbit) > 10,000 mg/kg; low acute oral and dermal toxicity; inh. at levels > 10 mg/m³ may cause mild irritation to nose and throat; ing. of lg. amts. may cause GI symptoms; TSCA listed

Environmental: EC50 (daphnia magna, 24 h) 242 mg; lg. amts. can be harmful to plants and other species
Precaution: Reacts as weak acid which may cause corrosion of base metals; incompat.

with strong reducing agents will generates hydrogen gas

NFPA: Health 0, Flammability 0, Reactivity 0
Storage: Store indoors in dry area; avoid wide fluctuations in temp. and humidity

Borax Decahydrate NF [U.S. Borax http://www.borax.com]
Chem. Descrip.: Sodium tetraborate decahydrate See Sodium borate decahydrate
CAS 1303-96-4; EINECS/ELINCS 215-540-4
Uses: Base for pharmaceutical preps. and ointments

Regulatory: FDA 21CFR §175.105, 176.180, 181.30; SARA, RCRA nonreportable, DOT nonregulated; Canada DSL; Europe EINECS; South Korea listed; Japan MITI; WHMIS D2A
Properties: Wh. cryst. powd. or gran., odorless; sol. in water, glycerin; m.w. 381.37; sp.gr. 1.71; vapor pressure negligible; m.p. 62 C; pH 6.1 (0.1%); nonflamm.; > 99% act.
Toxicology: OSHA PEL 10 mg/m³ total dust; LD50 (oral, rat) 4500-5000 mg/kg, (dermal, rabbit) > 10,000 mg/kg; low acute oral and dermal toxicity; inh. at levels > 10 mg/m³ may cause mild irritation to nose and throat; ing. of lg. amts. may cause GI symptoms; TSCA listed

Environmental: EC50 (daphnia magna, 24 h) 242 mg; lg. amts. can be harmful to plants and other species
Precaution: Reacts as weak acid which may cause corrosion of base metals; incompat.

with strong reducing agents will generates hydrogen gas

NFPA: Health 0, Flammability 0, Reactivity 0
Storage: Store indoors in dry area; avoid wide fluctuations in temp. and humidity

Chem. Descrip.: Sodium tetraborate decahydrate See Sodium borate decahydrate
CAS 1303-96-4; EINECS/ELINCS 215-540-4
Uses: Base for pharmaceutical preps.

Regulatory: FDA 21CFR §175.105, 176.180, 181.30; SARA, RCRA nonreportable, DOT nonregulated; Canada DSL; Europe EINECS; South Korea listed; Japan MITI; WHMIS D2A
Properties: Wh. cryst. powd. or gran., odorless; sol. in water, glycerin; m.w. 381.37; sp.gr. 1.71; vapor pressure negligible; m.p. 62 C; pH 6.1 (0.1%); nonflamm.; > 99% act.

Chem. Descrip.: Sodium tetraborate decahydrate  See Sodium borate decahydrate

CAS 1303-96-4; EINECS/ELINCS 215-540-4

Uses: Base for pharmaceutical preps.

Regulatory: FDA 21CFR §175.105, 176.180, 181.30; SARA, RCRA nonreportable, DOT nonregulated; Canada DSL; Europe EINECS; South Korea listed; Japan MITI; WHMIS D2A

Properties: Wh. cryst. powd. or gran., odorless; sol. in water, glycerin; m.w. 381.37; sp.gr. 1.71; vapor pressure negligible; m.p. 62 C; pH 6.1 (0.1%); nonflamm.; > 99% act.

Precaution: Reacts as weak acid which may cause corrosion of base metals; incompat. with strong reducing agents will generates hydrogen gas

NFPA: Health 0, Flammability 0, Reactivity 0

Storage: Store indoors in dry area; avoid wide fluctuations in temp. and humidity

Chem. Descrip.: Laureth-4

CAS 5274-68-0; EINECS/ELINCS 226-097-1

Uses: O/w coemulsifier, wetting agent, solubilizer, dispersant for topical pharmaceuticals

Regulatory: SARA §313 nonreportable

Properties: Colorless to lt. yel. liq. (may become hazy or form a precipitate); sol. in alcohol, propylene glycol, cottonseed oil; disp. in water; sp.gr. 0.95; visc. 30 cps; HLB 9.7; flash pt. (OC) >300 F; nonionic; 100% conc.

Toxicology: LD50 (oral, rat) 9.06 ml/kg

Environmental: 80% biodeg.; LC50 (96 h, semistatic, rainbow trout) 3.3 mg/l

HMIS: Health 3, Flammability 1, Reactivity 0

Storage: Store in original containers

Chem. Descrip.: Laureth-23

CAS 9002-92-0

Uses: Emulsifier, wetting agent, dispersant, solubilizer for pharmaceutical topicals

Regulatory: SARA §313 nonreportable

Properties: Wh. waxy solid; sol. in water, alcohol, propylene glycol; sp.gr. 1.05; m.p. 32.78 C; HLB 17.0; pour pt. 33 C; flash pt. (OC) >300 F; nonionic

Toxicology: Local eye anesthetic; nontoxic by ing., inh., or skin contact

Hazardous Decomp. Prods.: COx

HMIS: Health 1, Flammability 1, Reactivity 0

Storage: Store @ 50-90 F in original closed containers

Brij® 35P Pharma [Uniqema http://www.uniqema.com]

Chem. Descrip.: Laureth-23

CAS 9002-92-0

Uses: Emulsifier for pharmaceuticals

Regulatory: SARA §313 nonreportable

Properties: Wh. solid; sol. in water, alcohol,
propylene glycol; insol. in veg.oil, mineral oil, cottonseed oil; sp.gr. ≈ 1.05; vapor pressure <1 mmHg; b.p. ≈ 100 C; HLB 17.0; pour pt ≈ 33 C; flash pt. (OC) >149 C; nonionic

Toxicology: Local eye anesthetic; eye, skin, and GI tract irritant; LD50 (oral, rat) 8.6 g/kg

Environmental: Biodeg. (28 d) 89%

Precaution: Avoid strong oxidizing agents

Hazardous Decomp. Prods.: COx

HMIS: Health 1, Flammability 1, Reactivity 0

Storage: Store in original closed containers

Brij® 52 [Uniqema http://www.uniqema.com;
Chem. Descrip.: Ceteth-2 (antioxidants added)
CAS 9004-95-9
Uses: Emulsifier, wetting agent for topical pharmaceuticals

Regulatory: SARA §313 nonreportable; DSL listed

Properties: Wh. waxy solid; sl. odor; sol. in alcohol, cottonseed oil, min. oil; m.p. 32.8 CHLB 5.3; flash pt. (setaflash CC) > ≈ 200 F; nonionic; 100% conc.

Toxicology: TSCA listed

Precaution: Wear chemical tight goggles and impervious gloves

Hazardous Decomp. Prods.: COx

HMIS: Health 1, Flammability 1, Reactivity 0

Storage: Store @ 50-90 F in original closed containers

Brij® 58 [Uniqema http://www.uniqema.com;
Chem. Descrip.: Ceteth-20 with preservatives
CAS 9004-95-9
Uses: O/w emulsifier, dispersant, wetting agent for topical pharmaceuticals

Regulatory: SARA §311/312, 313 nonreportable; DSL listed

Properties: Wh. waxy solid; sol. in water, alcohol; sp. gr. 1.02; m.p. 35.6 C; HLB 15.7; pour pt. 38 C; flash pt. > 300 F; nonionic; 90-100% conc.

Toxicology: LD50 0.5-5 g/kg; nonirritant by ing., inh., and skin contact; noncarcinogenic; TSCA listed

HMIS: Health 1, Flammability 1, Reactivity 0

Storage: Store @ 50-90 F in original closed containers

Brij® 72 Pharma [Uniqema http://www.uniqema.com]
Chem. Descrip.: Steareth-2
CAS 9005-00-9
Uses: W/o emulsifier, o/w coemulsifier, wetting agent for pharmaceutical creams and lotions; excipient for drug delivery systems

Regulatory: USP/NF, EP compliance, TDG, DOT not regulated; Canada, Australia, EU, USA, Japan, China, Korea, Philippines compliant; SARA §313 nonreportable

Properties: Wh. waxy solid; sol. in alcohol; insol. in water, mineral oil and propylene glycol; sp. gr. 1.07; HLB 12.4; pour pt. 38 C; flash pt. > 300 F; pH 5 - 8 (10% in 3:1 IPA/water); nonionic; 90-100% conc.

Toxicology: LD50 (oral, rat) 25.1 g/kg; eye irritant; skin and eye irritant; nonirritant by ing. and inh.

Precaution: Avoid strong oxidizing agent

Hazardous Decomp. Prods.: COx

HMIS: Health 1, Flammability 1, Reactivity 0

Storage: Store in original containers

Brij® 76 Pharma [Uniqema http://www.uniqema.com]
Chem. Descrip.: Steareth-10
CAS 9005-00-9
Uses: O/w coemulsifier, wetting agent for topical pharmaceuticals

Regulatory: Canada, Australia, EU, USA, Japan, China, Korea, Philippines, Switzerland compliant

Properties: Wh. waxy solid; disp. in water; sol. in propylene glycol, ethanol; insol. in cottonseed oil and mineral oil; sp. gr. 0.97; HLB 12.4; pour pt. 38 C; flash pt. > 300 F; pouring pt. 38 C; nonionic; 100% conc.

Toxicology: Nonirritant to eyes and skin; low oral toxicity, but ing. may cause irritation of the GI tract

Precaution: Wear safety glasses with side shields and NR gloves

Brij 78P Pharma [Uniqema http://www.uniqema.com]
Chem. Descrip.: Steareth-20
CAS 9005-00-9
Uses: O/w coemulsifier, wetting agent for topical pharmaceuticals; excipient for drug delivery systems

Regulatory: USP/NF, EP compliance

Properties: Wh. waxy solid; sol. in water, alcohol; disp. in cottonseed oil; sp. gr. 1.09; HLB 15.3; flash pt. (CC) > 149 C; pour pt. 38 C; nonionic; 100% conc.

Toxicology: LD50 (oral, rat) 2.07 g/kg;
Trade Name Reference

nonirritant to eyes and skin; ing. may cause irritation to GI tract

Environmental: 80% biodeg.; COD 2.23 gO2/g
Precaution: Wear safety glasses with side shields and rubber gloves

Chem. Descrip.: Oleth-10 with antioxidants
CAS 9004-98-2
Uses: O/w emulsifier, wetting agent for topical pharmaceuticals
Properties: Pale yel. liq. with some solids; sol. in water and alcohol; visc. 100 cps; HLB 12.4; flash pt. > 300 F; pour pt. 16 C; nonionic; 100% conc.

Chem. Descrip.: Oleth-20
CAS 9004-98-2
Uses: Emulsifier, wetting agent for pharmaceuticals
Properties: Cream-colored soft waxy solid; sol. in water, alcohol, propylene glycol; HLB 15.3; flash pt. > 300 F; pour pt. 30 C; nonionic; 100% conc.

Brij 98 [Uniqema http://www.uniqema.com]
Chem. Descrip.: Oleth-20
CAS 9004-98-2
Uses: Emulsifier, wetting agent for pharmaceuticals
Properties: Characteristic odor; disp. in water; insol. in isopropanol, mineral oil, propylene glycol; sp. gr. 1; HLB 15.5; pour pt. ≈ 45 C; flash pt. (CC) > 230 F; 5-8 (10% in water); nonionic; 90-100% conc.

Chem. Descrip.: Steareth-21
CAS 9005-00-9
Uses: O/w emulsifier, wetting agent for topical pharmaceuticals
Properties: Colorless waxy flakes, characteristic odor; disp. in water; insol. in isopropanol, mineral oil, propylene glycol; sp. gr. 1; HLB 15.5; pour pt. ≈ 45 C; flash pt. (CC) > 230 F; 5-8 (10% in water); nonionic; 90-100% conc.

Chem. Descrip.: Acetodiphosphonic acid aq. sol'n. See Etidronic acid
CAS 2809-21-4; EINECS/ELINCS 220-552-8
UN 3265
Uses: Sequestrant for radioactive pharmaceuticals
Properties: Colorless cl. liq.; sl. odor; misc. with water; m.w. 206; sp.gr. 1.46 (20 C); visc. 64 cps (20 C); b.p. > 100 C; nonflamm.; pH < 1.8 (1%); 60% act.

Handbook of Pharmaceutical Additives, Third Edition 91
Trade Name Reference

**Bronopol™**

Chem. Descrip.: 2-Bromo-2-nitropropane-1,3-diol
CAS 52-51-7; EINECS/ELINCS 200-143-0
UN 3241

Uses: Antibacterial preservative for aq. systems, internal and topical formulations incl. antacids, suppositories, acne preps., creams and lotions

Features: Broad spectrum; effective against both gram-positive and gram-negative bacteria; very stable in acid media

Regulatory: FDA 21CFR §175.105, 176.300; EPA registered; JP, BP compliance

Properties: Wh. to sl. yel. crystals; char. odor; sol. in water, alcohol, propylene glycol; vapor pressure 1.26 x 10⁻⁵; m.p. 130 C; flash pt. 180 C; pH 4.5-5.0 @ 10% aq.; 99-100% purity

Use Level: Up to 0.1% (CIR, cosmetic preservative)

Toxicology: LD₅₀ (oral, male rat) 307 mg/kg, (oral, female rat) 342 mg/kg, (skin, rabbit) 64 - 164 mg/kg, (inh., rat) > 0.588 mg/L; harmful or fatal if swallowed; eye irritant; not a primary skin irritant

Environmental: LD₅₀ (mallard duck) 509.5 mg/kg; LC₅₀ (rainbow trout, 96h) 41.6 mg/kg, (water flea) 1.4 mg/kg, (mysid shrimp, 96h) 5.9 ppm; expected to have two day half life

Precaution: Wash hands before eating and smoking; use rubber or other impermeable

---

**Bristol® 20USP**

Chem. Descrip.: White mineral oil USP
CAS 8020-83-5; EINECS/ELINCS 232-384-2
Uses: Binder, carrier, extender, lubricant, moisture barrier, protective agent, softener in pharmaceuticals

Properties: Sp.gr. 0.858-0.870; visc. 37.9-40.1 cst (40 C); pour pt. -18 C max.; flash pt. 193 C min.
Trade Name Reference

BTC® 50 USP/NF [Stepan http://www.stepan.com]
Chem. Descrip.: Benzalkonium chloride
USP/NF [n-alkyl (50% C12, 30% C14, 17% C16, 3% C18) dimethyl benzyl ammonium chloride]
CAS 68391-01-5; EINECS/ELINCS 269-919-4
Uses: Antimicrobial for pharmaceuticals
Regulatory: FDA 21CFR §178.1010; EPA reg. no. 1839-27; Europe, Japan, Canada, Australia listed; avail. kosher
Properties: APHA 200 max. cl. liq.; sp.gr. 0.97;
dens. 8.1 lb/gal; visc. 75 cps; pour pt. -8 C;
cloud pt. -2 C; flash pt. (PMCC) 52 C; pH 6.5-8.5 (10% aq.);
cationic; 50% act.
Toxicology: Mod. to sl. toxic orally; may cause severe skin irritation @ 2% act. and minimal eye irritation @ 0.3% act.
Environmental: Biodeg.
Storage: Store in sealed containers in cool, dry place; if frozen, heat gently and stir to ensure homogeneity before use

BTC® 65 USP/NF [Stepan http://www.stepan.com]
Chem. Descrip.: Benzalkonium chloride
USP/NF [n-alkyl (67% C12, 25% C14, 7% C16, 1% C8, C10, C18) dimethyl benzyl ammonium chloride]
CAS 68424-85-1; EINECS/ELINCS 270-325-2
Uses: Antimicrobial for pharmaceuticals
Regulatory: FDA 21CFR §178.1010; EPA reg. no. 1839-65; Europe, Japan, Canada, Australia listed; avail. kosher
Properties: APHA 200 max. cl. liq.; sp.gr. 0.97;
dens. 8.1 lb/gal; visc. 60 cps; pour pt. -4 C;
cloud pt. -3 C; flash pt. (PMCC) 56 C; pH 6.5-8.5 (10% aq.);
cationic; 50% act.
Toxicology: Mod. to sl. toxic orally; may cause severe skin irritation @ 2% act. and minimal eye irritation @ 0.3% act.
Environmental: Biodeg.
Storage: Store in sealed containers in cool, dry place; if frozen, heat gently and stir to ensure homogeneity before use

Features: Broad-spectrum
Regulatory: FDA 21CFR §178.1010; EPA reg. no. 1839-55; Europe, Japan, Canada, and Australia listed; avail. kosher
Properties: Wh. prill; sp.gr. 0.55; dens. 37.6 lb/ft³; flash pt. (PMCC) > 94 C; pH 6.5-8.5 (10% aq.): 0% VOC; cationic; 40% act.
Toxicology: LD50 (oral, rat) 500 - 5000 mg/kg, (skin, rabbit) 2000 - 20,000; sl. toxic orally; causes severe skin and extreme eye irritation; TSCA listed
Environmental: Biodeg.; very toxic to aquatic life
Precaution: Avoid contact with skin, eyes; avoid breathing dusts; wear chemical goggles; wear sufficient to prevent all skin contact; if irritation is experienced, use respirator
Hazardous Decomp. Prods.: Oxides of nitrogen and ammonia, CO, CO₂ and other low-molecular weight hydrocarbons
HMIS: Health 2, Flammability 1, Reactivity 0
Storage: Store in cool, dry place in original shipping container; keep lid closed to prevent agglomeration

BTC® 2565 [Stepan http://www.stepan.com]
Chem. Descrip.: N-Alkyl (60% C14, 25% C12, 15% C16) dimethyl benzyl ammonium chloride See Benzalkonium chloride
CAS 68424-85-1; EINECS/ELINCS 270-325-2
Uses: Antimicrobial for pharmaceuticals
Regulatory: EPA reg. no. 1839-65; Europe, Japan, Canada, and Australia listed; avail. kosher
Properties: APHA 200 max. cl. liq.; sp.gr. 0.96; dens. 8.0 lb/gal; flash pt. (PMCC) 43 C; pH 6.5-8.5 (10% aq.); cationic; 50% act.
Toxicology: Mod. toxic orally; causes mod. skin and extreme eye irritation @ 5% act.
Environmental: Biodeg.
Storage: Store in sealed containers in cool, dry place; if frozen, heat gently and stir to ensure homogeneity before use

BTC® 2568 [Stepan http://www.stepan.com]
Chem. Descrip.: N-Alkyl (60% C14, 25% C12, 15% C16) dimethyl benzyl ammonium chloride See Benzalkonium chloride
CAS 68424-85-1; EINECS/ELINCS 270-325-2
Uses: Antimicrobial for pharmaceuticals
Regulatory: EPA reg. no. 1939-67; Europe, Japan, Canada, and Australia listed; avail. kosher
Properties: APHA 200 max. cl. liq.; sp.gr. 0.94; dens. 7.8 lb/gal; flash pt. (PMCC) 37 C; pH 6.5-8.5 (10% aq.); cationic; 80% act.
Toxicology: Mod. toxic orally; causes mod. skin and extreme eye irritation @ 5% act.
Environmental: Biodeg.
Storage: Store in sealed containers in cool, dry place; if frozen, heat gently and stir to ensure homogeneity before use

BTC® 8248 [Stepan http://www.stepan.com]
Chem. Descrip.: N-Alkyl (60% C14, 30% C16, 5% C12, 5% C18) dimethyl benzyl ammonium chloride See Benzalkonium chloride
CAS 68391-01-5; EINECS/ELINCS 269-919-4
Uses: Antimicrobial for pharmaceuticals
Regulatory: FDA 21CFR §178.1010; EPA reg. no. 1389-33; Europe, Japan, Canada, and Australia listed; avail. kosher
Properties: APHA 150 max. cl. liq.; sp.gr. 0.95; dens. 7.9 lb/gal; flash pt. (PMCC) 54 C; pH 7.5 (10% aq.); cationic; 80% act.
Toxicology: Mod. toxic orally; causes extreme skin and eye irritation at 25% act.

shipping container; keep lid closed to prevent agglomeration
Trade Name Reference

Environmental: Biodegrad.
Storage: Store in sealed containers in cool, dry place; if frozen, heat gently and stir to ensure homogeneity before use

BTC® 8249 [Stepan http://www.stepan.com]
Chem. Descrip.: N-Alky (60% C14, 30% C16, 5% C12, 5% C18) dimethyl benzyl ammonium chloride See Benzalkonium chloride
CAS 68391-01-5; EINECS/ELINCS 269-919-4
Uses: Antimicrobial for pharmaceuticals
Regulatory: FDA 21CFR §178.1010; EPA reg. no. 1839-19; Europe, Japan, and Australia listed; avail. kosher
Properties: Amber paste; sp.gr. 0.94; dens. 7.8 lb/gal; visc. 3700 cps; flash pt. (PMCC) 48 C; pH 7.5 (10% aq.); cationic; 90% act.
Toxicology: Mod. toxic orally; causes extreme skin and eye irritation at 25% act.
Environmental: Biodegrad.
Storage: Store in sealed containers in cool, dry place; if frozen, heat gently and stir to ensure homogeneity before use

BTC® 8358 [Stepan http://www.stepan.com]
Chem. Descrip.: N-Alkyl (50% C14, 40% C12, 10% C16) dimethyl benzyl ammonium chloride See Benzalkonium chloride
CAS 68424-85-1; EINECS/ELINCS 270-325-2
Uses: Antimicrobial for pharmaceuticals
Regulatory: FDA 21CFR §178.1010; EPA reg. no. 1939-68; Europe, Japan, and Canada listed; avail. kosher
Properties: APHA 200 max. cl. liq.; sp.gr. 0.94; dens. 7.8 lb/gal; visc. 500 cps; flash pt. (PMCC) 28 C; pH 7.5 (10% aq.); cationic; 80% act.
Toxicology: Pract. nontoxic orally @ 5% act.; causes mod. skin and extreme eye irritation @ 5% act.
Environmental: Biodegrad.
Storage: Store in sealed containers in cool, dry place; if frozen, heat gently and stir to ensure homogeneity before use

Chem. Descrip.: Oleic isopropanolamide See Oleamide MIPA
CAS 111-05-7; EINECS/ELINCS 203-828-2
Uses: Foam stabilizer in ointments
Features: Coco-DEA replacement; lower pH inc. visc.
Properties: Yel. cl. liq. @ 40 C; tan solid @ R.T.; sol. in ethanol, IPA; disp. in water; m.w. 339.5; sp.gr. 0.92; HLB 6-8; acid no. 7 max.; amine

Butyl Diglyme [Ferro http://www.ferro.com]
Chem. Descrip.: Diethylene glycol dibutyl ether
CAS 112-73-2; EINECS/ELINCS 204-001-9
Uses: Solvent, drug carrier, stabilizer in pharmaceuticals
Features: Tends to solvate cations
Properties: Colorless liq.; mild nonresidual odor; sol. 0.3% in water; misc. with ethanol, acetone, benzene, diethyl ether, octane; m.w. 218.34; sp.gr. 0.8814; dens. 7.36 lb/gal; visc. 2.4 cP; f.p. -60.2 C; b.p. 256 C; flash pt. (CC) 118 C; ref. index 1.4235; pH neutral; surf. tens. 27 dynes/cm (20 C); sp. heat 0.495 cal/g/°C; 98.5% min. purity
Environmental: LD50 3900 mg/kg; low to mod. acute toxicity; chronic exposure may cause reproductive effects
Precaution: Slowly biodeg.

Butylparaben NF [Protameen http://www.protameen.com]
Chem. Descrip.: Butylparaben
Chem. Analysis: 99.0 - 100.5% assay
CAS 94-26-8; EINECS/ELINCS 202-318-7
Uses: Pharmaceutical preservative
Regulatory: USP/NF
Properties: Off-wh. powd.; sl. odor; negligible sol. in water (0.015%); melting range 68-72 C
Toxicology: Dust may irritate eyes; nonirritating to skin
Environmental: Biodegrad.
Precaution: Avoid strong oxidizing agents; wear goggles and gloves
Hazardous Decomp. Prods.: None
Storage: Store in cool, dry place

Byco 1500 [Croda Inc http://www.croda.com; http://www.crodausa.com]
Chem. Descrip.: Hydrolyzed gelatin NF
CAS 68410-45-7; EINECS/ELINCS 270-082-2
Uses: Oral and topical pharmaceuticals; nutritional prods.
Features: Deodorized
Properties: Sol. in water, propylene glycol; insol. in min. oil, IPA; m.w. 3000

Byco A [Croda Inc http://www.croda.com; http://www.crodausa.com; Croda Colloids Ltd http://www.croda-colloids.co.uk]
Chem. Descrip.: Hydrolyzed gelatin
CAS 68410-45-7; EINECS/ELINCS 270-082-2
Uses: Excipient, film-former, coating agent,
Trade Name Reference

binder in pharmaceutical tableting, spray drying, wet/dry granulation, direct compression; emulsion stabilizer; adjuvant protein in nutritional supplement; growth media; surgical dusting powd.; anti-irritant for other ingreds.

Properties: Wh. to pale cream spray-dried powd., char. odor and taste; sol. in water, propylene glycol; insol. in min. oil, IPA; m.w. 10,000; bulk dens. 0.15-0.30 g/cc; pH 5.5-6.5 (10% aq.); 7% max. moisture
Use Level: 2.5-5% (granulation)
Storage: Store in cool dry conditions in sealed containers, away from odiferous materials; indefinitely stable

Byco C [Croda Inc  http://www.croda.com; Croda Colloids Ltd  http://www.croda-colloids.co.uk]
Chem. Descrip.: Hydrolyzed gelatin
CAS 68410-45-7; EINECS/ELINCS 270-082-2
Uses: Excipient, film-former, gloss aid, coating agent, binder in pharmaceutical tableting, spray drying, wet/dry granulation, direct compression; emulsion stabilizer; adjuvant protein in nutritional supplement; growth media; surgical dusting powd.
Features: Provides hard film
Properties: Wh. to pale cream spray-dried powd., char. odor and taste; sol. in water, propylene glycol; insol. in min oil, IPA; m.w. 176.1; pH 5.5-6.5 (10% aq.); 7% max. moisture
Use Level: 2.5-5% (granulation)
Toxicology: LD50 (oral, rat) 5 g/kg
Storage: Store in cool dry conditions in sealed containers, away from odiferous materials; indefinitely stable

Byco M [Croda Inc  http://www.croda.com; Croda Colloids Ltd  http://www.croda-colloids.co.uk]
Chem. Descrip.: Hydrolyzed fish collagen  See Hydrolyzed collagen
CAS 92113-31-0
Uses: Binder, film-former for oral and topical pharmaceuticals, microencapsulation
Regulatory: Kosher
Properties: M.w. 25,000

Byco O [Croda Colloids Ltd  http://www.croda-colloids.co.uk]
Chem. Descrip.: Hydrolyzed gelatin
CAS 68410-45-7; EINECS/ELINCS 270-082-2
Uses: Binder in pharmaceutical tableting, spray drying, wet/dry granulation, direct compr.; excipient, film-former, coating agent; emulsion stabilizer; adjuvant protein in nutritional supplement; growth media; surgical dusting powd.
Properties: Wh. to pale cream spray-dried powd., char. odor and taste; sol. in water; m.w. 1000-2000; bulk dens. 0.25-0.40 g/cc; pH 5.5-6.5 (10% aq.); 7% max. moisture
Toxicology: LD50 (oral, rat) 5 g/kg
Storage: Store in cool dry conditions in sealed containers, away from odiferous materials; indefinitely stable

C-90™ Ascorbic Acid 90% Granulation  [DSM
Nutritional Prods. USA  http://www.nutraaccess.com]
Chem. Descrip.: Ascorbic acid granulated with corn starch and lactose  See L-Ascorbic acid; (Corn (Zea mays) starch
CAS 50-81-7; EINECS/ELINCS 200-066-2
Uses: Vitamin for direct compression tableting
Regulatory: USP, FCC, Ph. Eur.
Properties: Wh. to sl. off-wh., granular powd.; 89.0% min. assay
Storage: Stable to air if protected from humidity

C-97® Ascorbic Acid for DC  [BASF
http://www.basf.com]
Chem. Descrip.: Ascorbic acid (97%) and food starch (3%)  See L-Ascorbic acid
CAS 50-81-7; EINECS/ELINCS 200-066-2
Uses: Dietary supplement in pharmaceutical tablets and nutritional supplements produced by direct compression
Features: Rapidly oxidizes in solution
Regulatory: USP/FCC
Properties: Wh. to off wh. powd.; almost odorless; sl. mild odor; m.w. 176.1; ≈ 97% act.
Storage: 3 yr shelf-life; store in tightly closed containers @ R.T; protect from light and in a dry place

C-97®SF Ascorbic Acid for DC  [BASF
http://www.basf.com]
Chem. Descrip.: Ascorbic acid (97%) and HPMC (3%)  See L-Ascorbic acid; Hydroxypropyl methylcellulose
CAS 50-81-7; 9004-65-3; EINECS/ELINCS 200-066-2; $
Uses: Dietary supplement in pharmaceutical tablets and nutritional supplements produced by direct compression
Features: Formulated without starch or sugar; rapidly oxidizes in solution
Regulatory: USP/FCC
Properties: Wh. to off wh. powd.; almost
Trade Name Reference

odorless; sl. mild odor; m.w. 176.1; ≈ 97% act.
Storage: 2 yr shelf-life; store in tightly closed containers @ R.T; protect from light and in a dry place
C.Cal-97™ Calcium Ascorbate for DC [BASF http://www.basf.com]
Chem. Descr.: Calcium ascorbate, HPMC (2.9%), tartaric acid (0.1%) See Hydroxypropyl methylcellulose; L-Tartaric acid
CAS 5743-27-1; 9004-65-3; 87-69-4; EINECS/ELINCS 227-261-5; $; 201-766-0
Uses: Dietary supplement in pharmaceutical tablets and nutritional supplements by direct compression
Features: Used where a less acidic form of ascorbic acid is desired
Regulatory: USP/FCC
Properties: Sl. yelsh. gran. powd.; almost odorless; particle size US Sieve #20 (850 μ) min. 85% thru; m.w. 426.4; ≈ 97% act.
Storage: 36 months shelf-life; store in tightly closed containers @ R.T; protect from light and in a dry place
Chem. Descr.: PEG-3 castor oil
CAS 61791-12-6
Uses: Hydrotrope, solubilizer, w/o emulsifier in pharmaceuticals
Regulatory: JSCI listed
Properties: Pale yel. liq.; HLB 3.0; nonionic; 100% conc.
Toxicology: TSCA listed
Chem. Descr.: PEG-10 castor oil
CAS 61791-12-6
Uses: Emulsifier for pharmaceuticals
Features: Lipophilic
Regulatory: JSCI listed
Properties: Pale yel. liq.; HLB 6.5; nonionic; 100% conc.
Toxicology: TSCA listed
Chem. Descr.: PEG-20 castor oil
CAS 61791-12-6
Uses: Emulsifier for pharmaceuticals
Features: Hydrophilic
Regulatory: JSCI listed
Properties: Pale yel. liq.; HLB 10.5; nonionic; 100% conc.
Toxicology: TSCA listed
Chem. Descr.: PEG-40 castor oil
CAS 61791-12-6
Uses: Solubilizer for pharmaceuticals
Features: Rec. for systems with high alcohol conc.
Regulatory: JSCI listed
Properties: Pale yel. liq.; HLB 12.5; nonionic; 100% conc.
Toxicology: TSCA listed
Chem. Descr.: PEG-50 castor oil
CAS 61791-12-6
Uses: Solubilizer for pharmaceuticals
Features: Rec. for low alcohol content systems
Regulatory: JSCI listed
Properties: Pale yel. liq.; HLB 14.0; nonionic
Toxicology: TSCA listed
Chem. Descr.: PEG-60 castor oil
CAS 61791-12-6
Uses: Solubilizer for pharmaceuticals
Features: Rec. for low alcohol content systems
Regulatory: JSCI listed
Properties: Pale yel. liq.; HLB 14.0; nonionic; 100% conc.
Toxicology: TSCA listed
Chem. Descr.: Natural milk calcium (calcium (27% min.) and phosphorus (10% min.) mixture) derived from bovine milk
CAS 7758-23-8; EINECS/ELINCS 231-837-1
Uses: Calcium and phosphorus source for direct compression of nutritional supplement tablets and capsules for prevention of osteoporosis
Features: Directly compressible; free of lactose
Properties: Wh. to off-wh. fine gran.; min. salt flavor; 10% max. moisture; 27% min. Ca, 10% min. P
Storage: 3 yr. min. shelf life; store in cool, dry location (5-20 C, < 60% r.h.) with fresh, clean, circulating air; protect from microbial contamination
Trade Name Reference

CP [Nikko Chems. Co. Ltd
http://www.nikkol.co.jp/index.html]
Chem. Descrip.: Ascorbyl dipalmitate
CAS 28474-90-0
Uses: Oil-sol. vitamin C deriv.; whitening agent for skin lightening creams; promotes collagen synthesis
Regulatory: JSCI listed
Properties: Wh. cryst. powd.; 97% min. conc.

CVC™ Type A Coated Ascorbic Acid [BASF
http://www.basf.com]
Chem. Descrip.: Ascorbic acid and ethylcellulose (= 1.2%) See L-Ascorbic acid
CAS 50-81-7; 9004-57-3; EINECS/ELINCS 200-066-2; $
Uses: Dietary supplement in pharmaceutical tablets and nutritional supplements
Features: Formulated with ethylcellulose coating for high-moisture dry blends for improved stability
Regulatory: USP/FCC
Properties: Wh. fine gran. powd.; almost odorless; particle size US Sieve #30 (600μm)
min. 99% thru; m.w. 176.1; ≈ 97% act.
Storage: 42 months shelf-life; store in tightly closed containers @ R.T; protect from light
and in a dry place

CA-320S [Eastman http://www.eastman.com]
Chem. Descrip.: Cellulose acetate
CAS 9004-35-7
Uses: Excipient for pharmaceuticals, coatings, enteric coatings
Regulatory: DOT nonregulated; SARA §311/312/313 nonreportable
Properties: Wh. powd.; odorless; negligible sol. in water; sp.gr. 1.31-1.32; vapor pressure negligible; 100% act.
Environmental: Expected to have low BOD, cause essentially no oxygen depletion in aquatic systems, have low potential to affect aquatic organisms, and be nonbiodeg.; unlikely to bioconcentrate
Precaution: Combustible solid; powd. material may form explosive dust-air mixt.; can react with strong oxidizing agents; may accumulate a static charge which could act as an ignition source; can dec. above 304 C
Hazardous Decomp. Prods.: Combustion prods.: CO2, CO
HMIS: Health 0, Flammability 1, Reactivity 0
Storage: Keep container closed; use caution when storing or processing above 204 C

CA-398-10NF [Eastman http://www.eastman.com]
Chem. Descrip.: Cellulose acetate
CAS 9004-35-7
Uses: Excipient for pharmaceuticals
Regulatory: DOT nonregulated; SARA §311/312/313 nonreportable
Properties: Wh. powd.; odorless; negligible sol. in water; sp.gr. 1.31-1.32; vapor pressure negligible; 100% act.
Environmental: Expected to have low BOD, cause essentially no oxygen depletion in aquatic systems, have low potential to affect aquatic organisms, and be nonbiodeg.; unlikely to bioconcentrate
Precaution: Combustible solid; powd. material may form explosive dust-air mixt.; can react with strong oxidizing agents; may accumulate a static charge which could act as an ignition source; can dec. above 304 C
Hazardous Decomp. Prods.: Combustion prods.: CO2, CO
HMIS: Health 0, Flammability 1, Reactivity 0
Storage: Keep container closed; use caution when storing or processing above 204 C

CA-398-30NF [Eastman http://www.eastman.com]
Chem. Descrip.: Cellulose acetate
CAS 9004-35-7
Uses: Excipient for pharmaceuticals
Regulatory: DOT nonregulated; SARA §311/312/313 nonreportable
Properties: Wh. powd.; odorless; negligible sol. in water; sp.gr. 1.31-1.32; vapor pressure negligible; 100% act.
Environmental: Expected to have low BOD, cause essentially no oxygen depletion in aquatic systems, have low potential to affect aquatic organisms, and be nonbiodeg.; unlikely to bioconcentrate
Precaution: Combustible solid; powd. material may form explosive dust-air mixt.; can react with strong oxidizing agents; may accumulate a static charge which could act as an ignition source; can dec. above 304 C
Hazardous Decomp. Prods.: Combustion prods.: CO2, CO
HMIS: Health 0, Flammability 1, Reactivity 0
Storage: Keep container closed; use caution when storing or processing above 204 C

CAB-171-15 Pharm Grade [Eastman http://www.eastman.com]
Chem. Descrip.: Cellulose acetate butyrate

Handbook of Pharmaceutical Additives, Third Edition 100
CAS 9004-36-8
Uses: Excipient for pharmaceuticals
Regulatory: DOT nonregulated; SARA §313 nonreportable
Properties: Wh. powd.; sl. char. odor; negligible sol. in water; sp.gr. 1.16-1.26; m.p. 127-240 C; 100% act.
Toxicology: LD50 (oral, rat) > 6400 mg/kg, (skin, guinea pig) > 1000 mg/kg; TSCA listed
Environmental: Expected to have low BOD, cause essentially no oxygen depletion in aquatic systems, have low potential to affect aquatic organisms, and be nonbiodeg.; unlikely to bioconcentrate
Precaution: Combustible solid; powd. material may form explosive dust-air mixts.; may accumulate a static charge which could act as an ignition source; reacts with strong oxidizing agents
Hazardous Ingredients: Nonhazardous
HMIS: Health 0, Flammability 1, Reactivity 0
Storage: Keep container closed
Cab-O-Sil® EH-5 [Cabot/Cab-O-Sil http://www.cabot-corp.com/cabosil/cabosil.nsf]
Chem. Descrip.: Untreated fumed silica, undensed See Silica, fumed
CAS 112945-52-5; EINECS/ELINCS 231-545-4
Uses: Rheology control agent, reinforcing agent, and flow control agent for pharmaceuticals; carrier, tablet binder/disintegrant, oil adsorbent, thermal stabilizer (suppositories), emulsifier, thickener, gellant, free-flow agent (foot and tooth powds., antiperspirants), suspending agent; in antacids, calamine, tranquilizer capsules
Features: Inert
Regulatory: FDA 21CFR §175.105, 175.300, 175.350, 175.390, 176.170, 176.180, 176.200, 176.210, 177.1200, 177.1210, 177.1350, 177.1400, 177.1460, 177.2420, 177.2600, 182.90
Properties: Wh. powd., odorless; 0.02% 325 mesh residue; sp.gr. 2.2; bulk dens. 2.5 lb/ft3; surf. area 300±25 m2/g; ref. index 1.46; pH 3.7-4.3 (4% aq. slurry); > 99.8% assay
Toxicology: LD50 (oral, rat) > 5 g/kg; inert to mildly irritating to skin; inert to very mildly irritating to eyes
Storage: Store in dry environment away from chemical vapors

Cab-O-Sil® H-5 [Cabot/Cab-O-Sil http://www.cabot-corp.com/cabosil/cabosil.nsf]
Chem. Descrip.: Syn., colloidal silicon dioxide
Uses: Rheology control agent, suspension agent, adsorbent in pharmaceuticals
Features: Provides exc. fluidization and free-flow properties; high performance at low loading levels
Properties: Powd.; avg. particle length 0.2-0.3 microns; sp.gr. 2.2; bulk dens. 3 lbs/ft3; ref. index 1.46; pH 3.7-4.3 (4% aq. slurry)
Storage: Store in dry environment away from chemical vapors

Cab-O-Sil® HS-5 [Cabot/Cab-O-Sil http://www.cabot-corp.com/cabosil/cabosil.nsf]
Chem. Descrip.: Untreated fumed silica, undensed See Silica, fumed
CAS 112945-52-5; EINECS/ELINCS 231-545-4
Uses: Reinforcing agent for pharmaceuticals; carrier, tablet binder/disintegrant, oil adsorbent, thermal stabilizer (suppositories), emulsifier, thickener, gellant, free-flow agent (foot and tooth powds., antiperspirants), suspending agent; in antacids, calamine, tranquilizer capsules
Features: Inert
Regulatory: FDA 21CFR §175.105, 175.300, 175.350, 175.390, 176.170, 176.180, 176.200, 176.210, 177.1200, 177.1210, 177.1350, 177.1400, 177.1460, 177.2420, 177.2600, 182.90
Properties: Wh. powd., odorless; 0.02% 325 mesh residue; sp.gr. 2.2; bulk dens. 2.5 lb/ft3; surf. area 300±25 m2/g; ref. index 1.46; pH 3.7-4.3 (4% aq. slurry); > 99.8% assay
Toxicology: LD50 (oral, rat) > 5 g/kg; inert to mildly irritating to skin; inert to very mildly irritating to eyes
Storage: Store in dry environment away from chemical vapors
Trade Name Reference

Cab-O-Sil® LM-150 [Cabot/Cab-O-Sil http://www.cabot-corp.com/cabosil/cabosil.nsf]  
Chem. Descrip.: Untreated fumed silica, undensed See Silica, fumed  
CAS 112945-52-5; EINECS/ELINCS 231-545-4  
Uses: Dispersant, anticaking agent, rheology control agent, reinforcing agent for pharmaceuticals; carrier, tablet binder/disintegrant, oil adsorbent, thermal stabilizer (suppositories), emulsifier, thickener, gellant, free-flow agent (foot and tooth powds., antiperspirants), suspending agent; in antacids, calamine, tranquilizer capsules  
Features: Inert  
Regulatory: FDA 21CFR §175.105, 175.300, 175.350, 175.390, 176.170, 176.180, 176.200, 176.210, 177.1200, 177.1210, 177.1350, 177.1400, 177.1460, 177.2420, 177.2600, 182.90  
Properties: Wh. fine powd., odorless; 0.2% 325 mesh residue; bulk dens. 2.5 lb/ft³; surf. area 200±15 m²/g; pH 3.8-4.2 (4% aq. slurry); > 99.8% assay  
Toxicology: LD₅₀ (oral, rat) > 5000 mg/kg  
Storage: 2 yr. shelf life in clean, dry area away from chem. vapors @ ambient temps.

Cab-O-Sil® M-5P [Cabot/Cab-O-Sil http://www.cabot-corp.com/cabosil/cabosil.nsf]  
Chem. Descrip.: Untreated fumed silica See Silica, fumed  
CAS 112945-52-5; EINECS/ELINCS 231-545-4  
Uses: Rheology control agent, flow control agent for pharmaceuticals  
Regulatory: FDA 21CFR §175.105, 175.300, 175.350, 175.390, 176.170, 176.180, 176.200, 176.210, 177.1200, 177.1210, 177.1350, 177.1400, 177.1460, 177.2420, 177.2600, 182.90  
Properties: Wh. fine powd., odorless; 0.2% 325 mesh residue; bulk dens. 2.5 lb/ft³; surf. area 200±15 m²/g; pH 3.8-4.2 (4% aq. slurry)  
Toxicology: LD₅₀ (oral) > 5000 mg/kg  
Storage: 2 yr. shelf life in clean, dry area away from chem. vapors @ ambient temps.

Cab-O-Sil® MS-55 [Cabot/Cab-O-Sil http://www.cabot-corp.com/cabosil/cabosil.nsf]  
Chem. Descrip.: Untreated fumed silica See Silica, fumed  
CAS 112945-52-5; EINECS/ELINCS 231-545-4  
Uses: Inert carrier, tablet binder/disintegrant, oil adsorbent, thermal stabilizer (suppositories), emulsifier, thickener, gellant, free-flow agent (foot and tooth powds., antiperspirants), suspending agent; in antacids, calamine, tranquilizer capsules  
Regulatory: FDA 21CFR §175.105, 175.300, 175.350, 175.390, 176.170, 176.180, 176.200, 176.210, 177.1200, 177.1210, 177.1350, 177.1400, 177.1460, 177.2420, 177.2600, 182.90  
Properties: Wh. fine powd., odorless; 0.02% 325 mesh residue; bulk dens. 2.5 lb/ft³; surf. area 160±15 m²/g; pH 3.7-4.3 (4% aq. slurry); > 99.8% assay  
Toxicology: LD₅₀ (oral) > 5 g/kg; nontoxic by ingestion; inert to mildly irritating to skin; inert to very mildly irritating to eyes  
Storage: Store in dry environment away from chemical vapors
Trade Name Reference

182.90

Properties: Wh. powd., odorless; 0.02% 325 mesh residue; sp.gr. 2.2; bulk dens. 2.5 lb/ft³; surf. area 200 ± 25 m²/g; Ref. index 1.46; pH 3.7-4.3 (4% aq. slurry); > 99.8% assay
Toxicology: LD₅₀ (oral, rat) > 5 g/kg; inert to mildly irritating to skin; inert to very mildly irritating to eyes
Storage: Store in dry environment away from chemical vapors

Cachalot® AR-20 [M. Michel http://www.mmichel.com]
Chem. Descrip.: Arachidyl alcohol
CAS 629-96-9; EINECS/ELINCS 211-119-4
Uses: Pharmaceutical vehicle; adhesive tackifier; antifoam; antistat; bactericide; detergent; emulsifier; evaporation control agent; flotation agent; extraction agent; fungicide; lubricant

Cachalot® BE-22 [M. Michel http://www.mmichel.com]
Chem. Descrip.: Behenyl alcohol
CAS 661-19-8; EINECS/ELINCS 211-546-6
Uses: Pharmaceutical raw material

Cachalot® C-50 [M. Michel http://www.mmichel.com]
Chem. Descrip.: Cetyl alcohol NF/USP/BP/EP
CAS 36653-82-4; EINECS/ELINCS 253-149-0
Uses: Emollient
Properties: Hazen 20 color; sol. in acetone, alcohol, aromatic hydrocarbons, carbon disulfide, chloroform, glycol and diglycol ethers; m.w. 241-255; sp.gr. 0.820 (50 C); visc. 7 cps (70 C); m.p. 47-49 C; b.p. 310-330 C; acid no. 0.1 max.; iodine no. 1 max.; sapon. no. 0.5 max.; hyd. no. 225-235; flash pt. 165 C; ref. index 1.4320-1.4322 (70 C)

Cachalot® L-90 [M. Michel http://www.mmichel.com]
CAS 112-53-8; EINECS/ELINCS 203-982-0
Uses: Pharmaceutical vehicle; adhesive tackifier; antifoam; antistat; bactericide; detergent; emulsifier; evaporation control agent; flotation agent; extraction agent; fungicide; lubricant

Cachalot® M-43 [M. Michel http://www.mmichel.com]
CAS 112-72-1; EINECS/ELINCS 204-000-3
Uses: Pharmaceutical vehicle; adhesive tackifier; antifoam; antistat; bactericide; detergent; emulsifier; evaporation control agent; flotation agent; extraction agent;

Handbook of Pharmaceutical Additives, Third Edition 103
fungicide; lubricant

Properties: Hazen 20 color; sol. in acetone, alcohol, aromatic hydrocarbons, carbon disulfide, chloroform, glycol and diglycol ethers; m.w. 212-220; sp.gr. 0.825 (40 C); visc. 9 cps (50 C); b.p. 280-295 C; solid. pt. 36-38 C; acid no. 0.3 max.; iodine no. 0.3 max.; sapon. no. 0.5 max.; hyd. no. 255-265; flash pt. 150 C; ref. index 1.4334-1.4336 (50 C)

Cachalot® S-56 [M. Michel http://www.mmichel.com]

Chem. Descrip.: Stearyl alcohol NF/USP/BP/EP CAS 112-92-5; EINECS/ELINCS 204-017-6
Uses: Emollient in pharmaceuticals

Properties: Hazen 20 color; sol. in acetone, alcohol, aromatic hydrocarbons, carbon disulfide, chloroform, glycol and diglycol ethers; m.w. 267-281; sp.gr. 0.815 (60 C); visc. 9 cps (70 C); m.p. 56-58 C; b.p. 330-350 C; acid no. 0.3 max.; iodine no. 1 max.; sapon no. 1 max.; hyd. no. 200-210; flash pt. 190 C; ref. index 1.4347-1.4349 (70 C)

Chem. Descrip.: PCA ethyl N-cocoyl-L-arginate See PCA ethyl cocoyl arginate
CAS 95370-65-3; EINECS/ELINCS 305-928-2
Uses: Antiseptic, germicide, and disinfectant in dentifrices, medical supplies

Properties: White crystalline powd.; sol. in water, ethanol, ethyleneglycol; sl. sol. in ethyl acetate, toluene; sol. 5% in water @ 30 C; m.p. 180-185 C; pH 5.0-7.0 (1% aq., 20 C); cationic; 100% conc.
Toxicology: LD50 (oral, mice) 10,750 mg/kg
Environmental: Highly biodeg.

Caffeine Anhydrous Granular S USP [BASF http://www.basf.com]

Chem. Descrip.: 1,3,7-Trimethylxanthine See Caffeine
CAS 58-08-2; EINECS/ELINCS 200-362-1
Uses: Stimulant for single entity caffeine capsules and tablets and in diet pills to promote weight loss, provide energy and enhance mental and physical performance
Features: Very stable in dry form
Regulatory: USP. kosher
Properties: Wh. free-flowing gran.; pract. odorless; bitter taste; particle size US Sieve#14 (1410 μ) min. 95% thru; sparingly sol. in water; sl. sol. in ethanol and ether; m.w. 194.19; m.p. ≥ 235-239 C; ≈ 99% act.
Storage: 4 yr. shelf life if stored in original containers protected from light

Cairox® Potassium Permanganate USP Grade
[Carus http://www.caruschem.com]
Chem. Descrip.: Potassium permanganate USP
CAS 7722-64-7; EINECS/ELINCS 231-760-3
Uses: Oxidizing agent in pharmaceuticals; medicine (antiseptic); topical antibacterial
Features: Regular, coarse and fine grades available
Regulatory: NSF certified
Properties: Gran. crystalline; sp.gr. 1.0414

Chem. Descrip.: Calcium bentonite
Chem. Analysis: Moisture 10-12%; SiO2 55.1%; Al2O3 23.3%; CaO 4.7%; MgO 2.9%; Fe2O3 1.6%; Na2O 1.9%
Uses: Used in pharmaceuticals
Regulatory: DOT not regulated
Properties: Tan to ylsh. fine powd.; odorless; insol. in water; bulk dens. 40-44 lbs/ft³ loose, 65-70 lbs/ft³ packed; pH 7-9
Toxicology: TSCA listed
Precaution: Wear dust tight goggles
Hazardous Decomp. Prods.: CO, CO2
HMIS: Health 1, Flammability 0, Reactivity 0
Storage: Store in original containers away from incompat. materials in cool, dry, will-ventilated area

Cal-Carb® 4450 PG [Chr. Hansen A/S http://www.chr-hansen.com]
Chem. Descrip.: Calcium carbonate USP and maltodextrin NF
Uses: Direct compression carrier/vehicle for pharmaceutical tablets, calcium supplements, and antacid tablets
Features: Economic; exc. compr. props.
Properties: Wh. free-flowing gran.; 5% max. on 20 mesh, 25% max. through 200 mesh; bulk dens. 1.00-1.30 g/ml (loose), 1.15-1.45 g/ml (tapped); ≥ 36% Ca

Cal-Carb® 4457 [Chr. Hansen A/S http://www.chr-hansen.com]
Chem. Descrip.: Calcium carbonate USP and pregelatinized starch NF See Starch, pregelatinized
Uses: Direct compression carrier/vehicle for pharmaceutical tablets, calcium
supplements, and antacid tablets

**Features:** Economic; exc. compr. props.

**Properties:** Wh. free-flowing gran.; 5% max. on 20 mesh, 25% max. through 200 mesh; bulk dens. 1.00-1.30 g/ml (loose), 1.15-1.45 g/ml (tapped); ≥ 36% Ca

**Cal-Carb® 4462**  [Chr. Hansen A/S  
[http://www.chr-hansen.com](http://www.chr-hansen.com)]

Chem. Descrip.: Precipitated calcium carbonate USP and pregelatinized starch NF  
See Starch, pregelatinized

Uses: Direct compression carrier/vehicle for pharmaceutical tablets, calcium supplements, and antacid tablets

**Features:** Exc. compr. and disintegration props.

**Properties:** Wh. free-flowing gran.; 5% max. on 20 mesh, 25% max. through 200 mesh; bulk dens. 0.95 g/cc (loose), 1.05 g/cc (tapped); ≥ 36% Ca

**Calci-Press™ MD**  [Particle Dynamics  
[http://www.particledynamics.com](http://www.particledynamics.com)]

Chem. Descrip.: Calcium carbonate and maltodextrin binder

Uses: Excipient, calcium source for nutritional supplements, nutraceuticals, calcium supplements, chewable tablets

**Features:** Directly compressible; can be formulated to aid in rapid disintegration

**Regulatory:** FCC compliance

**Properties:** Free-flowing fine powd.; ≤ 2% on 16 mesh, ≤ 75% on 60 mesh, ≤ 20% through 200 mesh; dens. 0.8-1.2 g/ml (tapped); 34-38% assay (elemental Ca); ≤ 500 ppb lead

**Calcium Carbonate 2927 Extra Heavy**  [MPSI  
[http://www.mp-solutionsinc.com](http://www.mp-solutionsinc.com)]

Chem. Descrip.: Precipitated calcium carbonate

Chem. Analysis: CaCO₃ (98-100.5%)

CAS 471-34-1; EINECS/ELINCS 207-439-9

Uses: Pharmaceutical and veterinary antacid; calcium source for dietary supplements, veterinary dietary supplements; oral care agent; veterinary anti diarrheal preps.

**Regulatory:** USP, FCC, kosher

**Properties:** Wh. powd.; 12.00 µ median particle size; odorless; pract. insol. in water; sp.gr. 2.71; dens. 22.57 lb/solid gal; dens. (tapped) 94 lb/ft³; surf. area 0.7 m²/g; pH 10.1; 0.2% max. moisture

**Toxicology:** ACGIH 10 mg/m³; may cause mech. irritation to eyes, skin, and respiratory tract; TSCA listed

**Environmental:** Not expected to be harmful to aquatic life; no bioaccumulation or food chain conc. toxicity potential

**Precaution:** Wear dust goggles and impervious gloves; avoid contact with acids

**Hazardous Decomp. Prods.:** Calcium oxide

**HMIS:** Health 1, Flammability 0, Reactivity 0

**Calci-Press Ultra Heavy**  [MPSI  
[http://www.mp-solutionsinc.com](http://www.mp-solutionsinc.com)]

Chem. Descrip.: Precipitated calcium carbonate

Chem. Analysis: CaCO₃ (98-100.5%)

CAS 471-34-1; EINECS/ELINCS 207-439-9

Uses: Pharmaceutical and veterinary antacid; calcium source for dietary supplements, veterinary dietary supplements; oral care agent; veterinary anti diarrheal preps.

Regulatory: USP, FCC, kosher

Properties: Wh. powd.; 12.00 µ median particle size; odorless; pract. insol. in water; sp.gr. 2.71; dens. 22.57 lb/solid gal; dens. (tapped) 94 lb/ft³; surf. area 0.7 m²/g; pH 10.1; 0.2% max. moisture

Toxicology: ACGIH 10 mg/m³; may cause mech. irritation to eyes, skin, and respiratory tract; TSCA listed

**Environmental:** Not expected to be harmful to aquatic life; no bioaccumulation or food chain conc. toxicity potential

**Precaution:** Wear dust goggles and impervious gloves; avoid contact with acids

**HMIS:** Health 1, Flammability 0, Reactivity 0

**Calcium Ascorbate USP FCC**  [DSM Nutritional Prods. USA  
[http://www.nutraaccess.com](http://www.nutraaccess.com)]

Chem. Descrip.: Calcium ascorbate

Chem. Analysis: CaCO₃ (98-100.5%)

CAS 5743-27-1; EINECS/ELINCS 227-261-5

Uses: Preservative, antioxidant, vitamin source for pharmaceuticals, esp. multivitamin and monovitamin preps.

Features: Sodium-free, acid-free

**Regulatory:** FDA GRAS, USP, FCC, Ph. Eur.

**Properties:** Wh. to sl. yel. powd., pract. odorless; freely sol. in water; preac. insol. in alcohol; insol. in ether; m.w. 426.35; pH 6.8-7.4 (10% aqu.); 99.0-100.5% assay

**Hazardous Decomp. Prods.:** Calcium oxide

Storage: Store in tight light-resist. containers, optimally @ ≤ 72 F; avoid exposure to moisture, excessive heat

**Calcium Carbonate BC 300 Light**  [MPSI  
[http://www.mp-solutionsinc.com](http://www.mp-solutionsinc.com)]
Calcium Carbonate BC 2924 Extra Light [MPSI http://www.mp-solutionsinc.com]
Chem. Descrip.: Precipitated calcium carbonate USP/FCC
Chem. Analysis: CaCO₃ (98-100.5%)
CAS 471-34-1; EINECS/ELINCS 207-439-9
Uses: Pharmaceutical and veterinary antacid; calcium source for dietary supplements, veterinary dietary supplements; oral care agent; veterinary antidiarrheal preps.
Regulatory: USP, FCC, kosher
Properties: Wh. odorless powd.; 1.90 µ median particle size; odorless; pract. insol. in water; sp.gr. 2.71; dens. 22.57 lb/solid gal; compacted dens. 27 lb/ft³; dry brightness 98; nonflamm.; pH 9.8; 0.2% max. moisture; 0% volatiles
Toxicology: ACGIH 5 mg/m³ respirable dust, 10 mg/m³ total dust; may cause mech. irritation to eyes and respiratory tract; noncarcinogenic
HMIS: Health 0, Flammability 0, Reactivity 0

Calcium Carbonate BC 2925 Medium [MPSI http://www.mp-solutionsinc.com]
Chem. Descrip.: Precipitated calcium carbonate USP/FCC
Chem. Analysis: CaCO₃ (98-100.5%)
CAS 471-34-1; EINECS/ELINCS 207-439-9
Uses: Pharmaceutical and veterinary antacid; calcium source for dietary supplements, veterinary dietary supplements; oral care agent; veterinary antidiarrheal preps.
Regulatory: USP, FCC, kosher
Properties: Wh. odorless powd.; 1.80 µ median particle size; odorless; sl. sol. in water; sp.gr. 2.71; dens. 22.57 lb/solid gal; compacted dens. 27 lb/ft³; dry brightness 98; nonflamm.; pH 9.8; 2% max. moisture; 0% volatiles
Toxicology: ACGIH 5 mg/m³ respirable dust, 10 mg/m³ total dust; may cause mech. irritation to eyes and respiratory tract
HMIS: Health 0, Flammability 0, Reactivity 0

Calcium Hydroxide 3002 [MPSI http://www.mp-solutionsinc.com]
Chem. Descrip.: Calcium hydroxide
Chem. Analysis: Ca(OH)₂ (98.5%)
CAS 1305-62-0; EINECS/ELINCS 215-137-3
Uses: Filler, neutralizer, pH buffer in pharmaceuticals, topical medicinal salves, gastric preps.
Regulatory: USP, kosher
Properties: Wh. powd.; median particle size; 2.00 µ; 100% through 200 mesh; odorless; sl. sol. in water; sp.gr. 2.34; dens. 41.60 lb/ft³ (tapped); 18.60 lb/ft³ (loose); oil absorp. 52-58; dry brightness 94; m.p. 1076 F; b.p. 5162 F; pH 12.4; 0.50% max. moisture
Toxicology: ACGIH TLV 5 mg/m³; corrosive to skin, eyes; causes irritation/inflamm. to mucous membranes, respiratory passages
Precaution: Wear safety goggles and leather or rubber gloves; incompat. with acids, fluorine
Hazardous Ingredients: Calcium hydroxide; cryst. silica (< 0.1%)
Trade Name Reference

**Calcium Hydroxide BC 802** [MPSI](http://www.mp-solutionsinc.com)
Chem. Descrip.: Calcium hydroxide USP
Chem. Analysis: Ca(OH)\(_2\) (95-100.5%)
CAS 1305-62-0; EINECS/ELINCS 215-137-3
Uses: Filler, neutralizer, pH buffer in pharmaceuticals, topical medicinal salves, gastric preps.
Regulatory: USP, kosher
Properties: Wh. powd.; 99% through 200 mesh; odorless; sl. sol. in water; sp.gr. 2.30; dens. 40-45 lb/ft\(^3\) (compacted), 19-24 lb/ft\(^3\) (loose); oil absorp. 52-58; dry brightness 93-98; m.p. 1076 F; b.p. 5162 F; nonflamm.; pH 11.5-13.0; 0.80% max. moisture; 0% volatiles
Toxicology: ACGIH TLV 5 mg/m\(^3\); corrosive to skin, eyes; causes irritation/inflamm. to mucous membranes, respiratory passages
Precaution: Incompat. with acids, fluorine
Hazardous Ingredients: Calcium hydroxide; cryst. silica (< 0.1%)
Hazardous Decomp. Prods.: None
HMIS: Health 2, Flammability 0, Reactivity 0

**Calcium Pantothenate USP, FCC** [DSM Nutritional Prods. USA](http://www.nutraaccess.com)
Chem. Descrip.: Calcium pantothenate USP, FCC, EP
See Calcium D-pantothenate
CAS 137-08-6; EINECS/ELINCS 205-278-9
Uses: Pantothentic acid source for solid dosage forms (tablets, hard shell capsules)
Regulatory: USP, FCC, Ph. Eur.
Properties: Wh. spray-dried, free-flowing powd., odorless, sl. hygroscopic; freely sol. in water (1 g/3 ml water); sol. in glycerin; pract. insol. in alcohol, chloroform, ether; m.w. 476.54; 90-110% assay
Precaution: Sli. sensitive to heat
Storage: Store in dry place @ 59-96 F

**Calcium Stearate 2307-G** [MPSI](http://www.mp-solutionsinc.com)
Chem. Descrip.: Calcium stearate FCC
CAS 1592-23-0; EINECS/ELINCS 216-472-8
Uses: Lubricant, flow aid for pharmaceuticals
Features: Tallow grade; noncaking
Properties: 99.9% max. through 325 mesh; bulk dens. 0.19 g/ml; m.p. 145-155 C; 3% max. moisture; 9-10.5% oxide
Toxicology: Dust can cause discomfort of the nose, throat, and respiratory tract, coughing and choking

**Calcium Sulfate Anhydrous NF 164** [MPSI](http://www.mp-solutionsinc.com)
Chem. Descrip.: Calcium sulfate NF
CAS 7778-18-9; EINECS/ELINCS 231-900-3
Uses: Extender, diluent, calcium source in pharmaceuticals
Features: Inert

**Calcium Sulfate BC 164** [MPSI](http://www.mp-solutionsinc.com)
Chem. Descrip.: Calcium sulfate anhyd. NF
See Calcium sulfate
Chem. Analysis: CaSO\(_4\) (98-101%)
CAS 7778-18-9; EINECS/ELINCS 231-900-3
Uses: Dietary calcium source, extender and diluent in pharmaceuticals
Features: Inert

**Calcium Hydroxide**
Storage: Store away from incompat. substances

**Calcium Stearate 920-T** [MPSI](http://www.mp-solutionsinc.com)
Chem. Descrip.: Calcium stearate FCC
CAS 1592-23-0; EINECS/ELINCS 216-472-8
Uses: Anticaking agent, emulsifier, lubricant, water repellent, and thickener in pharmaceuticals
Properties: Wh. powd.; sl. fatty odor; 99.0% max. through 200 mesh; insol. in water; bulk dens. 16.2 g/ml; m.p. 302-320 F; pH 7.0-9.0; 4.0% max. moisture; 9-10.5% oxide
Toxicology: Dust can cause discomfort of the nose, throat, and respiratory tract, coughing and choking
Environmental: Not hazardous to aquatic life
Precaution: Avoid dust formation, contact with eyes and skin
Hazardous Decomp. Prods.: Burning will produce toxic fumes
HMIS: Health 0, Flammability 1, Reactivity 0

**Calcium Sulfate**
Chem. Analysis: CaSO\(_4\) (98-101%)
CAS 7778-18-9; EINECS/ELINCS 231-900-3
Uses: Dietary calcium source, extender and diluent in pharmaceuticals
Features: Inert

**Calcium Hydroxide**
Properties: Wh. powd.; 5.50 µ median particle size; 97% through 325 mesh; 99% through 200 mesh; odorless; sol. 26% in water; sp.gr. 2.96; dens. 76-86 lb/ft\(^3\); 35-41 lb/ft\(^3\) (loose); oil absorp. 30-40; dry brightness 93-94; m.p. 1450 C (dec.); nonflamm.; pH 10-11
Toxicology: TLV 10 mg/m\(^3\); may cause eye irritation; nuisance dust may cause coughing, sneezing, nasal irritation
Precaution: Incompat. with acids
Hazardous Ingredients: Calcium sulfate (98-100%), calcium carbonate (0-2%)
Hazardous Decomp. Prods.: SO\(_2\), CaO (above 1450 C)
Trade Name Reference

HMIS: Health 0, Flammability 0, Reactivity 0
Calcium Sulfate BC 166 [MPSI
http://www.mp-solutionsinc.com]
Chem. Descrip.: Calcium sulfate dihydrate
NF/FCC
Chem. Analysis: CaSO₄ • 2H₂O (98-101%)
CAS 13397-24-5; EINECS/ELINCS 231-900-3
Uses: Dietary calcium source, extender and
diluent in pharmaceuticals
Features: Inert
Properties: Wh. powd.; 99% through 325 mesh;
100% through 200 mesh; odorless; sol. 26% in
water; sp.gr. 2.32; dens. 70-76 lb/ft³
(compacted), 34-39 lb/ft³ (loose); dry
brightness 87-91; m.p. 1450 C (dec.);
nonflamm.; pH 6.2-7.2
Toxicology: TLV 10 mg/m³; may cause eye
irritation; nuisance dust may cause
coughing, sneezing, nasal irritation
Precaution: Incomp. with acids
Hazardous Ingredients: Calcium sulfate (98-
100%), calcium carbonate (0-2%)
Hazardous Decomp. Prods.: SO₂, CaO (above
1450 C)
HMIS: Health 0, Flammability 0, Reactivity 0
CalEssence® 70 Enhanced Purity [MPSI
http://www.mp-solutionsinc.com]
Chem. Descrip.: Ultra-low precipitated calcium
carbonate USP/FCC
Chem. Analysis: CaCO₃ (98%)
CAS 471-34-1; EINECS/ELINCS 207-439-9
Uses: Calcium source in pharmaceuticals,
chewable tablets
Features: Meets stringent regulatory
requirements, such as Calif. Prop. 65; lead
levels <125 ppb
Regulatory: USP, FCC, kosher
Properties: Prismatic cubic blend; 0.80 µ median
particle size; compacted dens. 34-39 lb/ft³; surf.
area 7.0 m²/g
Toxicology: Overexposure may cause irritation
of eyes, skin and respiratory system; acute
ing. may result in mild GI distress; chronic
exposure may result in hypercalcemia;
alkalosis, or renal impairment;
noncarcinogenic
Environmental: No significant effects; not
harmful to aquatic life; no bioaccumulation
or food chain conc. toxicity potential
Precaution: Avoid contact with acids, alum,
ammonium salts, and mercury/hydrogen
mixtures; ignites on contact with fluorine
HMIS: Health 1, Flammability 0, Reactivity 0
CalEssence® 160 Enhanced Purity [MPSI
http://www.mp-solutionsinc.com]
Chem. Descrip.: Ultra-low precipitated calcium
carbonate USP/FCC
Chem. Analysis: CaCO₃ (98%)
CAS 471-34-1; EINECS/ELINCS 207-439-9
Uses: Calcium source in pharmaceuticals,
chewable tablets
Features: Meets stringent regulatory
requirements, such as Calif. Prop. 65; best for
redispersible powds. due to open structure and
rapid dispersibility; lead levels <125 ppb
Regulatory: USP, FCC, kosher
Properties: Scaleno-hedral particles; 1.60 µ median particle size; compacted dens. 26
lb/ft³; surf. area 8.7 m²/g
Toxicology: Overexposure may cause irritation
of eyes, skin and respiratory system; acute
ing. may result in mild GI distress; chronic
exposure may result in hypercalcemia;
alkalosis, or renal impairment;
noncarcinogenic
Environmental: No significant effects; not
harmful to aquatic life; no bioaccumulation
or food chain conc. toxicity potential
Precaution: Avoid contact with acids, alum,
Trade Name Reference

ammonium salts, and mercury/hydrogen mixtures; ignites on contact with fluorine
HMIS: Health 1, Flammability 0

CalEssence® 300 Enhanced Purity [MPSI http://www.mp-solutionsinc.com]
Chem. Descrip.: Ultra-low precipitated calcium carbonate USP/FCC
Chem. Analysis: CaCO₃ (98%)
CAS 471-34-1; EINECS/ELINCS 207-439-9
Uses: Calcium source in pharmaceuticals
Features: Meets stringent regulatory requirements, such as Calif. Prop. 65; preferred when minimizing tablet size; lead levels <125 ppb
Regulatory: USP, FCC, kosher
Properties: Cubic particles; 3.00 µ median particle size; compacted dens. 53 lb/ft³; surf. area 3.0 m²/g
Toxicology: Overexposure may cause irritation of eyes, skin and respiratory system; acute ing. may result in mild GI distress; chronic exposure may result in hypercalcemia; alkalosis, or renal impairment; noncarcinogenic
Environmental: No significant effects; not harmful to aquatic life; no bioaccumulation or food chain conc. toxicity potential
Precaution: Avoid contact with acids, alum, ammonium salts, and mercury/hydrogen mixtures; ignites on contact with fluorine
HMIS: Health 1, Flammability 0, Reactivity 0

CalEssence® 1500 Enhanced Purity [MPSI http://www.mp-solutionsinc.com]
Chem. Descrip.: Ultra-low precipitated calcium carbonate USP/FCC
Chem. Analysis: CaCO₃ (98%)
CAS 471-34-1; EINECS/ELINCS 207-439-9
Uses: Calcium source in pharmaceuticals
Features: Meets stringent regulatory requirements, such as Calif. Prop. 65; preferred when minimizing tablet size; lead levels <125 ppb
Regulatory: USP, FCC, kosher
Properties: Semi-regular prismatic wh. odorless particles; 15.00 µ median particle size; partly sol. in water; sp. gr. 2.71; compacted dens. 90 lb/ft³; surf. area 2.0 m²/g
Toxicology: Overexposure may cause irritation of eyes, skin and respiratory system; acute ing. may result in mild GI distress; chronic exposure may result in hypercalcemia; alkalosis, or renal impairment; noncarcinogenic; TSCA listed
Environmental: No significant effects; not harmful to aquatic life; no bioaccumulation or food chain conc. toxicity potential
Precaution: Avoid contact with acids, alum, ammonium salts, and mercury/hydrogen mixtures; ignites on contact with fluorine
HMIS: Health 1, Flammability 0, Reactivity 0

Calibre™ 2060-10 [Dow Plastics http://www.dow.com/plastics]
Chem. Descrip.: PC resin See Polycarbonate
CAS 24936-68-3
Uses: Sterilizable health care resin for hemodialyzers, surgical instruments, cardiotomy reservoirs, blood centrifuge bowls, I.V. connectors, safety syringes
Features: Provides exceptional clarity, heat resist., impact. str., and processability; for apps. using steam or ethylene oxide sterilization
Properties: Sp.gr. 1.20; melt flow 10; dens. 0.043 lb/in.³; transmittance 87-91%; haze 0.7-1.5%; ref. index 1.586; tens. str. 10,300 psi (break); tens. elong 7% (yield), 150% (break); flex. str. 14,000 psi; Izod impact 17 ft lb/in. notch (1/8 in.); Rockwell hardness R118; mold
Trade Name Reference

shrinkage 0.005-0.007 in./in.; water absorp. 0.15%; Vicat soften. pt. 312 F; distort. temp. 263 F (264 psi, unannealed); flamm. V-2 (1/16 in.); dielec. str. 399 V/mil; vol. resist. > 10^{14} ohm-cm.

Calibre™ 2060-15 [Dow Plastics http://www.dow.com/plastics]
Chem. Descrip.: PC resin See Polycarbonate
CAS 24936-68-3

Features: Provides exceptional clarity, heat resist., impact. str., and processability; for applics. using steam or ethylene oxide sterilization
Properties: Sp.gr. 1.20; melt flow 15; dens. 0.043 lb/in.³; transmittance 87-91%; haze 0.7-1.5%; ref. index 1.586; tens. str. 10,300 psi (break); tens. elong 7% (yield), 150% (break); flex. str. 14,000 psi; Izod impact 16 ft lb/in. notch (1/8 in.); Rockwell hardness R118; mold shrinkage 0.005-0.007 in./in.; water absorp. 0.15%; Vicat soften. pt. 309 F; distort. temp. 260 F (264 psi, unannealed); flamm. V-2 (1/16 in.); dielec. str. 399 V/mil; vol. resist. > 10^{14} ohm-cm.

Calibre™ 2060-22 [Dow Plastics http://www.dow.com/plastics]
Chem. Descrip.: PC resin See Polycarbonate
CAS 24936-68-3
Uses: Sterilizable health care resin for hemodialyzers, surgical instruments, cardiotomy reservoirs, blood centrifuge bowls, I.V. connectors, safety syringes
Features: Provides exceptional clarity, heat resist., impact. str., and processability; for applics. using steam or ethylene oxide sterilization
Properties: Sp.gr. 1.20; melt flow 22; dens. 0.043 lb/in.³; transmittance 87-91%; haze 0.7-1.5%; ref. index 1.586; tens. str. 9,500 psi (break); tens. elong 7% (yield), 120% (break); flex. str. 14,000 psi; Izod impact 14 ft lb/in. notch (1/8 in.); Rockwell hardness R118; mold shrinkage 0.005-0.007 in./in.; water absorp. 0.15%; Vicat soften. pt. 306 F; distort. temp. 260 F (264 psi, unannealed); flamm. V-2 (1/16 in.); dielec. str. 399 V/mil; vol. resist. > 10^{14} ohm-cm.

Chem. Descrip.: Dicalcium phosphate dihydrate FCC See Calcium phosphate dibasic dihydrate
CAS 7789-77-7; EINECS/ELINCS 231-826-1
Uses: Excipient, compressibility aid, and diluent for pharmaceutical tablets providing additional bulk
Features: Relatively inert and therefore do not react with other formulation ingredients
Properties: Wh. gran. free-flowing microcrystalline gran. powd.; odorless; tasteless; m.w. 172.09; insol. in water

Chem. Descrip.: 2,2-Dimethyl-3-methylenebicyclo [2.2.1] heptane; α-fenchene, and tricyclene See Camphene
CAS 79-92-5; 471-84-1; 508-32-7; EINECS/ELINCS 201-234-8; $;208-083-7
UN 1325
Uses: Syn. flavoring agent and fragrance for pharmaceutical preps.
Features: Provides lift to pine, lavender, lavandin, cedar, and citrus fragrances
Regulatory: DOT regulated; FCC compliant; GRAS
Properties: Wh. solid; mild camphor-like odor; completely sol. in alcohol; m.w. 136.24; sp.gr. 0.839 @ 60 C; dens. 7.00 lb/gal; b.p. 160 C; flash pt. (TCC) 34.4 C
Use Level: 0.01-0.4%
Toxicology: Not skin sensitizing; contact with undiluted material is irritating to eyes; TSCA listed
Precaution: Flamm. HMIS: Health 1, Flammability 3, Reactivity 1

Canadian Willowherb Extract (5% clear) [Fytokem Prods. http://www.fytokem.com]
Chem. Descrip.: Epilobium angustifolium extract (4.9-5.4%), phenoxethanol (0.5%), water (94-95%)
Uses: Anti-irritant, antibacterial for skin cleansers, fresheners, and soothers
Properties: Amber liq.; pH 4.5-5.5
Toxicology: Nonirritating to skin
Storage: 6 mos. shelf life in closed container @ 18-23 C

Canasol MJ 45 [Canamex http://www.canamex.com.mx]
Chem. Descrip.: POE (8) stearate See PEG-8 stearate
Trade Name Reference

Candelilla (Euphorbia cerifera) wax
CAS 8006-44-8; EINECS/ELINCS 232-347-0
Uses: Wax for pharmaceuticals
Regulatory: FDA 21 CFR §172.615, 175.105, 175.320, 176.180, 184.1976; CTFA listed
Properties: Yel. crude lumps, refined lumps, flakes, or powd.; m.p. 68.5-72.5 C; acid no. 12-22; sapon. no. 43-65; flash pt. 241 C min.; 45% max. paraffinic hydrocarbons
Toxicology: TSCA listed

Candelilla Wax SP 75 [Strahl & Pitsch
http://www.strahlpitsch.com]
Chem. Descrip.: Candelilla wax See Candelilla (Euphorbia cerifera) wax
CAS 8006-44-8; EINECS/ELINCS 232-347-0
Uses: Wax for pharmaceuticals
Regulatory: FDA 21 CFR §172.615, 175.105, 175.320, 176.180, 184.1976; CTFA listed
Properties: Yel. crude lumps, refined lumps, flakes, or powd.; m.p. 68.5-72.5 C; acid no. 12-22; sapon. no. 43-65; flash pt. 241 C min.; 45% max. paraffinic hydrocarbons
Toxicology: TSCA listed

Candelilla Wax SP 76 [Strahl & Pitsch
http://www.strahlpitsch.com]
Chem. Descrip.: Candelilla wax See Candelilla (Euphorbia cerifera) wax
CAS 8006-44-8; EINECS/ELINCS 232-347-0
Uses: Wax for pharmaceuticals
Regulatory: FDA 21 CFR §172.615, 175.105, 175.320, 176.180; CTFA listed
Properties: Yel. crude lumps, refined lumps, flakes, or powd.; m.p. 68.5-72.5 C; acid no. 12-22; sapon. no. 43-65; flash pt. 241 C min.; 45% max. paraffinic hydrocarbons
Toxicology: TSCA listed

Candelilla Wax SP 78 Prime Quality Crude [Strahl & Pitsch
http://www.strahlpitsch.com]
Chem. Descrip.: Candelilla wax See Candelilla (Euphorbia cerifera) wax
CAS 8006-44-8; EINECS/ELINCS 232-347-0
Uses: Wax for pharmaceuticals
Regulatory: FDA 21 CFR §172.615, 175.105, 175.320, 176.180; CTFA listed
Properties: Tan crude lumps, refined lumps, flakes, or powd.; m.p. 68.5-72.5 C; acid no. 12-22; sapon. no. 43-65; flash pt. 241 C min.; 45% max. paraffinic hydrocarbons
Toxicology: TSCA listed
Candelilla Wax SP 99  [Strahl & Pitsch
http://www.strahlpitsch.com]
Chem. Descr.:  Candelilla wax  See Candelilla (Euphorbia cerifera) wax
CAS  8006-44-8; EINECS/ELINCS 232-347-0
Uses:  Wax for pharmaceuticals
Regulatory:  FDA 21CFR §172.615, 175.105, 175.320, 176.180, 184.1976; CTFA listed
Properties:  Yel. crude lumps, refined lumps, flakes, or powd.; m.p. 68.5-72.5 C; acid no. 12-22; sapon. no. 43-65; flash pt. 241 C min.; 45% max. paraffinic hydrocarbons
Toxicology:  TSCA listed

Candelilla Wax SP 350  [Strahl & Pitsch
http://www.strahlpitsch.com]
Chem. Descr.:  Candelilla wax  See Candelilla (Euphorbia cerifera) wax
CAS  8006-44-8; EINECS/ELINCS 232-347-0
Uses:  Wax for pharmaceuticals
Regulatory:  FDA 21CFR §172.615, 175.105, 175.320, 176.180, 184.1976; CTFA listed
Properties:  Yel. crude lumps, refined lumps, flakes, or powd.; m.p. 68.5-72.5 C; acid no. 12-22; sapon. no. 43-65; flash pt. 241 C min.; 45% max. paraffinic hydrocarbons
Toxicology:  TSCA listed

Candelilla Wax SP 803  [Strahl & Pitsch
http://www.strahlpitsch.com]
Chem. Descr.:  Candelilla wax substitute  See Candelilla synthetic
CAS  136097-95-5
Uses:  Wax for pharmaceuticals
Regulatory:  FDA 21CFR §172.615, 175.105, 175.320, 176.180; CTFA listed
Properties:  Tan crude lumps, refined lumps, flakes, or powd.; m.p. 174-180 F; acid no. 8-15; sapon. no. 30-40; 45% max. paraffinic hydrocarbons

Candelilla Wax Fine  [Strahl & Pitsch
http://www.strahlpitsch.com]
Chem. Descr.:  Candelilla wax  See Candelilla (Euphorbia cerifera) wax
CAS  8006-44-8; EINECS/ELINCS 232-347-0
Uses:  Wax for pharmaceuticals
Regulatory:  FDA 21CFR §172.615, 175.105, 175.320, 176.180; CTFA listed
Properties:  Powd.; 98% min. through 60 mesh, 70% min. through 120 mesh, 30% min. through 200 mesh, 10% min. through 325 mesh; 45% max. paraffinic hydrocarbons
Toxicology:  TSCA listed

Candex®  [JRS Pharma
http://www.jrspharma.com]
Chem. Descr.:  Dextrose with small amounts of higher glucose saccharides  See Glucose
CAS  50-99-7; EINECS/ELINCS 200-075-1
Uses:  Binder, diluent, sweetener, mouthfeel enhancer for direct compression of pharmaceutical tablets, chewable tablets
Features:  Exc. flow and compaction props.; offers sweet, nongritty taste; cool, refreshing mouthfeel; easily blended with flavors, lubricants, and other dry additives
Properties:  Wh. porous, spherical gran.; sweet noncloying/nongritty taste; avg particle size 218 µ; 30% max. -100 mesh; very sol. in water; dens. (tapped) 0.77 g/ml; pH 3.5 min.

Candex® Plus  [JRS Pharma
http://www.jrspharma.com]
Chem. Descr.:  Dextrates (CAS 50-99-7) with 0.3% max. magnesium stearate as anticaking agent  See Glucose
Uses:  Binder, diluent, vehicle for direct compression and wet granulation of pharmaceutical tablets, incl. chewable tablets
Features:  Exc. flow and compaction props.; sweet, nongritty taste; cool, refreshing mouthfeel; easily blended with flavors, lubricants, and other dry additives
Properties:  Wh. to very sl. off-wh. porous spherical gran.; sweet noncloying/nongritty taste; 196 µ avg. particle size; 35% max. -100 mesh; dens. 0.82 g/ml max. (tapped); pH 4.0-7.5

Canionic LAA  [Centro China
http://www.centro.ttnet.net]
Chem. Descr.:  Ammonium POE alkyl ester sulfate
Uses:  Detergent, foaming agent, foaming detergent for pharmaceuticals
Properties:  Liq.; anionic; 25% solids

Canionic LTA  [Centro China
http://www.centro.ttnet.net]
Chem. Descr.:  Triethanol amine aluryl sulfate
Uses:  Detergent, foaming agent, foaming detergent for pharmaceuticals
Properties:  Liq.; anionic; 40% solids

Canionic S  [Centro China
http://www.centro.ttnet.net]
Chem. Descr.:  Sodium lauryl sulfate
Uses:  Emulsifier for pharmaceuticals
Properties:  Paste; anionic; 30% solids

Canionic SLES(2)  [Centro China
http://www.centro.ttnet.net]
Trade Name Reference

- Canionic SLES(3) [Centro China http://www.centro.ttnet.net]
  Chem. Descrip.: Sodium POE lauryl ether sulfate (3EO)
  Uses: Detergent, foaming agent, foaming detergent for pharmaceuticals
  Properties: Paste; anionic; 70% solids

- Canionic SLS(N) [Centro China http://www.centro.ttnet.net]
  Chem. Descrip.: Sodium lauryl sulfate
  Uses: Emulsifier for pharmaceuticals
  Properties: Needle; anionic; 92% solids

- Canionic SLS(P) [Centro China http://www.centro.ttnet.net]
  Chem. Descrip.: Sodium lauryl sulfate
  Uses: Emulsifier for pharmaceuticals
  Properties: Powd.; anionic; 92% solids

- Canionic SLS(R) [Centro China http://www.centro.ttnet.net]
  Chem. Descrip.: Sodium lauryl sulfate
  Uses: Emulsifier for pharmaceuticals
  Properties: Needle; anionic; 92% solids

- Canocol S-20 [Centro China http://www.centro.ttnet.net]
  Chem. Descrip.: Sorbitan monolaurate
  Uses: Emulsifier for pharmaceuticals
  Properties: Liq.; HLB 8.6; nonionic; 100% solids

- Canocol S-60 [Centro China http://www.centro.ttnet.net]
  Chem. Descrip.: Sorbitan monostearate
  Uses: Emulsifier for pharmaceuticals
  Properties: Flake; HLB 4.7; nonionic; 100% solids

- Canocol S-80 [Centro China http://www.centro.ttnet.net]
  Chem. Descrip.: Sorbitan monooleate
  Uses: Emulsifier for pharmaceuticals
  Properties: Liq.; HLB 4.3; nonionic; 100% solids

- Canocol S-85 [Centro China http://www.centro.ttnet.net]
  Chem. Descrip.: Sorbitan trioleate
  Uses: Emulsifier for pharmaceuticals
  Properties: Liq.; HLB 1.8; nonionic; 100% solids

- Canocol T-20 [Centro China http://www.centro.ttnet.net]
  Chem. Descrip.: Polyoxyethlene sorbitan monolaurate
  Uses: Emulsifier for pharmaceuticals
  Properties: Liq.; HLB 16.7; nonionic

- Canocol T-40 [Centro China http://www.centro.ttnet.net]
  Chem. Descrip.: Polyoxyethlene sorbitan monolaurate
  Uses: Emulsifier for pharmaceuticals
  Properties: Liq.; HLB 15.6; nonionic

- Canocol T-60 [Centro China http://www.centro.ttnet.net]
  Chem. Descrip.: Polyoxyethlene sorbitan monolaurate
  Uses: Emulsifier for pharmaceuticals
  Properties: Liq.; HLB 14.9; nonionic

- Canocol T-80 [Centro China http://www.centro.ttnet.net]
  Chem. Descrip.: Polyoxyethlene sorbitan monolaurate
  Uses: Emulsifier for pharmaceuticals
  Properties: Liq.; HLB 15.0; nonionic

- Canocol T-81 [Centro China http://www.centro.ttnet.net]
  Chem. Descrip.: Polyoxyethlene sorbitan monolaurate
  Uses: Emulsifier for pharmaceuticals
  Properties: Liq.; HLB 10.0; nonionic

- Canthaxanthin 10% CWS/N [DSM Nutritional Prods. USA http://www.nutraaccess.com]
  Chem. Descrip.: Canthaxanthin finely dispersed in corn starch coated gelatin, sucrose, and corn oil. See Canthaxanthine; Corn (Zea mays) oil; Corn (Zea mays) starch
  CAS 514-78-3; EINECS/ELINCS 208-187-2
  Uses: Colorant imparting a orange-red to pharmaceutical powds. and granulates
  Features: Imparts a purple-red or bluish-red color
  Properties: Violet-brown powd.; 85% min. through sieve No. 40; disp. in water; 10% min. assay (canthaxanthin)
  Storage: Store in tightly closed container in cool, dry place, optimally below 46 F; avoid moisture

- C-A-P Enteric Coating Polymer [Eastman http://www.eastman.com]
  Chem. Descrip.: Cellulose acetate phthalate USP/NF
  CAS 9004-38-0
  Uses: Pharmaceutical excipient; enteric film-
Trade Name Reference

coating material for tablets or gran.; matrix binder for solid dosage forms

Features: Stable in strongly acid gastric fluids, but dissolves readily in mildly acidic to neutral environment of the sm. intestine

Properties: Wh. free-flowing powd.; visc. 68 cP (15% in acetone sol’n.); pH ≥ 6.2; 35% phthalyl, 24% acetyl

Storage: Store in cool, dry area; protect from moisture and humidity; bring drums to R.T. before opening to prevent moisture condensation on inside surfs.

Capillisil® [Exsymol
http://www.exsymol.com]

Chem. Descrip.: Silanediol salicylate, butylene glycol, and triethanolamine

Uses: Moisturizer, tissue-regenerator, anti-inflammatory for health prods.

Features: No preservatives

Properties: Yel. limpid to sl. opalescent liq.; misc. with cold water, alcohols, and glycols; ref. index 1.47; pH 4.5-6.5 (3% aq.)

Use Level: 0.5-5% (hair care treatments)

Toxicology: Nonirritating to skin, eyes

Storage: Do not expose to temps. < 0 C

Capmul® GMO [ABITEC
http://www.abiteccorp.com]

Chem. Descrip.: Glyceryl stearate

Uses: Emulsifier, bodying agent, emollient, lubricant, visc. modifier for pharmaceuticals (clinical nutrition, coating, delivery/absorption enhancement, dermatological emulsions, infant formulas, microemulsions, nutritional/sports supplements

Properties: Lovibond R4.0 max. semisolid; m.p. 28-31 C; HLB 3-4; acid no. 3 max.; sapon. no. 215-230; nonionic

Regulatory: FDA 21CFR §184.1323, 184.1505

Uses: Emulsifier, bodying agent, emollient, lubricant, visc. modifier for pharmaceuticals (clinical nutrition, coating, delivery/absorption enhancement, dermatological emulsions, infant formulas, nutritional/sports supplements, suppositories, tablets), sun care preps.

Properties: Lovibond R4.0 max. bead; mild odor; insol. in water; sol. in oil @ elevated temps.; vapor pressure < 1 mm Hg; vapor dens. > 1; m.p. 57-62 C; flash pt 480 F (COC); HLB 3-4;
Trade Name Reference

acid no. 3.0; iodine no. 5.0; nonionic

Precaution: Incompat. with strong oxidizers
Hazardous Decomp. Prods.: CO, CO₂

Capmul® GMS-50K [ABITEC
http://www.abiteccorp.com]
Chem. Descrip.: Glyceryl stearate
CAS 31566-31-1; EINECS/ELINCS 250-705-4
Uses: Emulsifier, emollient, lubricant, visc. modifier for pharmaceuticals (delivery systems, infant formulas, suppository systems, tablet systems coating applics.)
Regulatory: GRAS; FDA 21CFR §184.1505
Properties: Wh. waxy beads; mild odor; disperses in water; vapor dens. > 1; vapor pressure < 1 mm Hg; m.p. 58 C; flash pt. (COC) 480 F
Toxicology: LD₅₀ (IP, mouse) 200 mg/kg; may cause eye, skin irritation
Precaution: Wear chemical splash goggles; incompat. with oxidizers
Hazardous Decomp. Prods.: CO, CO₂
NFPA: Health 0, Flammability 1, Reactivity 0
Storage: Store @ 68-77 F in dry place; requalify after 12 mos.

Capmul® MCM [ABITEC
http://www.abiteccorp.com]
Chem. Descrip.: Glyceryl mono-dicaprylate, deconoic acid monoester with 1,2,3-propanetriol See Glyceryl caprate; Glyceryl caprylate
CAS 26402-26-6; 26402-22-2; EINECS/ELINCS 252-992-1; 247-667-6
Uses: Solvent, dispersant, emulsifier, solubilizer, vehicle, carrier, penetrant with bacteriostatic effects for pharmaceuticals, aerosols, clinical nutrition, coating, delivery/absorp. enhancement, dermatologicals, microemulsions, nutritional/sports supplements, suppositories, sun care preps.; solvent for many organic compounds including steroids
Regulatory: FDA GRAS; SARA §311/312, 313 nonreportable
Properties: Lovibond 4R max. liq. to semisolid; fatty odor; partly sol. in water; vapor pressure < 1 mmHg; acid no. 2.5 max.; iodine no. 2 max.; nonionic; 55% min. alpha mono
Toxicology: LD₅₀ (oral, rat) > 5 mg/kg; sl. eye and skin irritant; ing. may cause GI discomfort; vapors and/or aerosols which may be formed at elevated temps. may be irritating to eyes and respiratory tract
Precaution: Wear chemical splash goggles and neoprene or PVC gloves; incompat. with oxidizers
Hazardous Decomp. Prods.: COₓ
Storage: Store @ 68-77 F in dry place; requalify after 12 mos.; store away from heat and flame in closed SS storage tanks in a dry area

Capmul® MCMC8 [ABITEC
http://www.abiteccorp.com]
Chem. Descrip.: Glyceryl caprylate and 1,2,3-Propanetriol See Glycerin
CAS 26402-26-6; 56-81-5; EINECS/ELINCS 247-668-1; 200-289-5
Uses: Dispersant, emulsifier, solubilizer, vehicle, carrier, penetrant with bacteriostatic effects for pharmaceuticals, delivery/absorp. enhancement, dermatologicals, microemulsions, suppositories, sun care preps.; solvent for many organic compounds including steroids
Regulatory: FDA GRAS; SARA §311/312, 313 nonreportable
Properties: Lovibond 5R max. liq. to semisolid; fatty odor; partly sol. in water; vapor pressure < 1 mmHg; acid no. 2.5 max.; iodine no. 2 max.; nonionic; 55% min. alpha mono
Toxicology: LD₅₀ (oral, rat) > 5 mg/kg; sl. eye and skin irritant; ing. may cause GI discomfort; vapors and/or aerosols which may be formed at elevated temps. may be irritating to eyes and respiratory tract
Precaution: Wear chemical splash goggles and neoprene or PVC gloves; incompat. with oxidizers
Hazardous Decomp. Prods.: COₓ
Storage: Store @ 68-77 F in dry place; requalify after 12 mos.; store away from heat and flame in closed SS storage tanks in a dry area

Capmul® MCMC10 [ABITEC
http://www.abiteccorp.com]
Chem. Descrip.: Glyceryl monopropionate See Glyceryl caprate
CAS 26402-22-2; EINECS/ELINCS 247-667-6
Uses: Dispersant, solubilizer, emulsifier, vehicle/carrier, penetrant with bacteriostatic effects for pharmaceuticals (coating, microemulsions, soft gelatin capsules, suppositories)
Regulatory: FDA GRAS
Properties: Solid; sol. in propylene glycol, dipropylene glycol, IPM, octyl stearate, octyl palmitate, SDA alcohol, ethoxydiglycol, phenyl trimethicone; vapor dens. > 1; vapor pressure < 1 mm Hg; flash pt. (COC) > 150 C; nonionic
Use Level: 10% (lipsticks)
Precaution: Incompat. with strong oxidizers
Trade Name Reference

Capmul® MCM-L [ABITEC http://www.abiteccorp.com]
Chem. Descrip.: Mono/diglycerides of caprylic/capric acid in glycerol See Glycerin; Glyceryl caprate
CAS 26402-22-2; 56-81-5; EINECS/ELINCS 247-667-6; 200-289-5
Uses: Bioavailability enhancer, emulsifier, solubilizer in pharmaceutical and nutritional applications; penetration enhancer in dermatological applications; solvent for many organic compounds including steroids
Regulatory: FDA GRAS; DMF 3700
Properties: Lovibond 4.0 R max. liq.; fatty odor; vapor pressure < 1 mmHg; acid no. 2.5 max.; flash pt. (COC) > 136°C; nonionic
Toxicology: LD₅₀ (oral, rat) > 5 mg/kg; not expected to cause serious irritation to eyes; no adverse effects to skin
Precaution: Wear chemical splash goggles and neoprene gloves for hot oil; incompat. with strong oxidizers
Hazardous Decomp. Prods.: COₓ
Storage: Store @ 68-77°F in dry place; requalify after 12 mos.

Capmul® PG-8 [ABITEC http://www.abiteccorp.com]
Chem. Descrip.: Propylene glycol monocaprylate (>90%) and propylene glycol dicaprylate (<10%) See Propylene glycol caprylate
CAS 31565-12-5; 7384-98-7
Uses: Solvent, bioavailability enhancer, carrier, in pharmaceutical and nutritional applications; penetration enhancer for transdermal applics.
Regulatory: FDA GRAS; DMF17436, E 477; SARA §311/312, 313 nonreportable
Properties: APHA 100 max. liq.; sl. medicinal odor; insol. in water; vapor pressure < 1 mm Hg; b.p. 137°C @ 4 mm Hg; acid no. 2.5 max.; flash pt. (COC) 136 C; nonionic
Toxicology: LD₅₀ (oral, rat) > 5 mg/kg; sl. eye and skin irritant; vapors and/or aerosols which may be formed at elevated temps. may be irritating to eyes and respiratory tract; noncarcinogenic; nonmutagenic
Environmental: Biodegrad.; avoid runoff into storm sewers and ditches which lead to waterways
Precaution: Wear ANSI-approved goggles and neoprene gloves; incompat. with oxidizers
Hazardous Decomp. Prods.: COₓ
Storage: Retest and requalify 24 mos. from the date of manufacture; store in a dry area away from heat and sparks in closed containers; maintain good ventilation

Capmul® PG-12 [ABITEC http://www.abiteccorp.com]
Chem. Descrip.: Propylene glycol monolaurate See Propylene glycol laurate
Chem. Analysis: 1% max. moisture content
CAS 142-55-2; EINECS/ELINCS 205-542-3
Uses: Solubilizer for many complex, poorly soluble drug compounds; carrier in soft and hard gelatin capsules; penetration enhancer for transdermal applics.
Regulatory: USP, EP, FDA Title 21 CFR 172.856
Properties: APHA 100 max. liq.; insol. in water; vapor pressure <1 mm Hg; acid no. 2.5 max.; iodine no. 1.0 max.; sapon. no 200-230;
Caprico 80%  [Undesa  
http://www.undesa.com; S. Black  
http://www.sblack.com]
Chem. Descrip.:  Capric acid  
CAS 334-48-5; EINECS/ELINCS 206-376-4  
Uses:  Emulsifier in pharmaceuticals  
Regulatory:  Not regulated for transport  
Environmental:  Biodeg. (28 d) > 90%  
Precaution:  Wear gloves, goggles, overall skin protection; avoid entry to sewers, drain and surface water  
Storage:  Store @ R.T. in original sealed container protected from heat sources

Caprilico 98-100%  [Undesa  
http://www.undesa.com; S. Black  
http://www.sblack.com]
Chem. Descrip.:  Caprylic acid  
CAS 124-07-2; EINECS/ELINCS 204-677-5  
Uses:  Emulsifier in pharmaceuticals  
Regulatory:  Not regulated for transport  
Environmental:  Biodeg. (28 d) > 90%  
Precaution:  Wear gloves, goggles, overall skin protection; avoid entry to sewers, drain and surface water  
Storage:  Store @ R.T. in original sealed container protected from heat sources

Caprol® 3GO  [ABITEC  
http://www.abiteccorp.com]
Chem. Descrip.:  Polyglyceryl-3 oleate  
CAS 33940-98-6; EINECS/ELINCS 251-749-7  
Uses:  Dispersant, emollient, emulsifier, solubilizer, wetting agent for pharmaceuticals, clinical nutrition, coating, delivery/absorp. enhancement, dermatologicals, infant formulas, microemulsions, nutritional/sports supplements, suppositories, sun care preps.  
Features:  Lipophilic  
Regulatory:  FDA 21CFR §172.854  
Properties:  Amber to brn., Gardner 7 max. liq.; mild odor; insol. in water; sp.gr. ≈ 1.01; visc. 4432 centistokes; vapor dens. > 1; vapor pressure < 1 mm Hg; HL 6.2; acid no. 6 max.; iodine no. 60 max.; sapon. no. 150; flash pt. (COC) > 425 F; nonionic; 100% conc.  
Precaution:  Incompat. with oxidizers  
Hazardous Decomp. Prods.:  CO, CO₂
NFPA: Health 1, Flammability 1, Reactivity 0
Storage: Ambient storage

Caprol® 10G100 [ABITEC http://www.abiteccorp.com]
Chem. Descrip.: Polyglyceryl-10 decaoleate
CAS 11094-60-3; EINECS/ELINCS 234-316-7
Uses: Dispersant, emollient, emulsifier, lubricant, solubilizer for pharmaceuticals, aerosols, clinical nutrition, delivery/absorp. enhancement, dermatologicals, infant formulas, microemulsions, nutritional/sports supplements, suppositories, sun care preps.

Storage: Store in a dry location in tightly sealed containers @ R.T. away from heat and sparks

Caprol® MPGO [ABITEC http://www.abiteccorp.com]
Chem. Descrip.: Polyglyceryl-6 dioleate
CAS 9007-48-1; EINECS/ELINCS 278-358-4
Uses: Solubilizer, clouding agent, crystallization inhibitor, suspending agent in pharmaceuticals
Features: Nongreasy
Properties: Nonionic

Caprol® PGE860 [ABITEC http://www.abiteccorp.com]
Chem. Descrip.: Polyglyceryl-10 oleate
CAS 9007-48-1; EINECS/ELINCS 279-230-0
Uses: Dispersant, o/w emulsifier, solubilizer, visc. modifier, wetting agent for pharmaceuticals, clinical nutrition, coating, delivery/absorp. enhancement, dermatologicals, infant formulas, microemulsions, nutritional/sports supplements, suppositories, sun care preps.
Features: Hydrophilic
Regulatory: FDA 21CFR §172.854
Properties: Gardner 10 max. liq.; caramel odor; disp. in water; vapor pressure < 1 mm Hg; acid no. 6 max.; iodine no. 155-185; nonionic; 100% conc.
Toxicology: Slight eye irritant; no adverse effects to skin; vapors and/or aerosols which may be formed at elevated temps. may be irritating to eyes and respiratory tract; noncarcinogenic; nonmutagenic; nonteratogenic
Environmental: Avoid runoff into storm sewers and ditches which lead to waterways
Precaution: Combustible; incompat. with oxidizers; wear goggles, neoprene gloves for chem. protection, and PVC-lined gloves for thermal protection
HMIS: Health 0, Flammability 1, Reactivity 0

Storage: Ambient storage
Trade Name Reference

Capsul® [Nat’l. Starch & Chem./Food Innovation
http://www.foodinnovation.com]
Chem. Descrip.: Food starch modified derived from waxy maize See Food starch, modified
Uses: Encapsulating agent for vitamins
Features: Forms very stable o/w emulsions at higher solids
Regulatory: FDA 21CFR §172.892; DOT nonregulated; SARA §313 nonreportable
Properties: Off-wh. powd.; starch odor; sol. in water; m.w. > 10,000; sp.gr. 1.5; pH ≈ 3.5
(1%); ≈ 5% moisture
Toxicology: Possible physical irritant from dust particles; particulates may scratch eye surfs. and cause mech. irritation; possible nuisance dust by inh.; maintain below TWA 10 mg/m³; low oral toxicity; low toxicity by skin contact; nontoxic; TSCA listed
Environmental: No aquatic toxicity established
Precaution: Potential for dust explosion; minimize dust generation
Hazardous Decomp. Prods.: Does not undergo spontaneous decomp.; typ. combustion prod.: CO, CO₂, N, water
HMIS: Health 1, Flammability 1, Reactivity 0
Storage: Store @ ambient temps.; sensitive to static electricity

Capsulec 51-SB [ADM Lecithin http://www.admworld.com]
Chem. Descrip.: Capsule-grade lecithin
CAS 8002-43-5; EINECS/ELINCS 232-307-2
Uses: Emulsifier, binder for soft and hard gelatin encapsulation
Properties: Translucent fluid; visc. 10 stokes; HLB 4.0

Capsulec 51-UB [ADM Lecithin http://www.admworld.com]
Chem. Descrip.: Capsule-grade lecithin
CAS 8002-43-5; EINECS/ELINCS 232-307-2
Uses: Emulsifier, binder for soft and hard gelatin encapsulation
Properties: Translucent fluid; visc. 20 stokes; HLB 4.0

Capsulec 56-SB [ADM Lecithin http://www.admworld.com]
Chem. Descrip.: Capsule-grade lecithin
CAS 8002-43-5; EINECS/ELINCS 232-307-2
Uses: Emulsifier, binder for soft and hard gelatin encapsulation
Properties: Translucent fluid; visc. 20 stokes; HLB 4.0

Capsulec 56-UB [ADM Lecithin http://www.admworld.com]
Chem. Descrip.: Capsule-grade lecithin
CAS 8002-43-5; EINECS/ELINCS 232-307-2
Uses: Emulsifier, binder for soft and hard gelatin encapsulation
Properties: Translucent fluid; visc. 20 stokes; HLB 4.0

Capsulec 60-SB [ADM Lecithin http://www.admworld.com]
Chem. Descrip.: Capsule-grade lecithin
CAS 8002-43-5; EINECS/ELINCS 232-307-2
Uses: Emulsifier, binder for soft and hard gelatin encapsulation
Properties: Transparent liq.; visc. 50 Stokes

Capsulec 60-UB [ADM Lecithin http://www.admworld.com]
Chem. Descrip.: Capsule-grade lecithin
CAS 8002-43-5; EINECS/ELINCS 232-307-2
Uses: Emulsifier, binder for soft and hard gelatin encapsulation
Properties: Transparent liq.; visc. 50 Stokes
Capsulec 62-SB [ADM Lecithin
http://www.admworld.com]
Chem. Descrip.: Capsule-grade lecithin
CAS 8002-43-5; EINECS/ELINCS 232-307-2
Uses: Emulsifier, binder for soft and hard
gelatin encapsulation
Properties: Translucent fluid; visc. 60 stokes;
HLB 4.0

Capsulec 62-UB [ADM Lecithin
http://www.admworld.com]
Chem. Descrip.: Capsule-grade lecithin
CAS 8002-43-5; EINECS/ELINCS 232-307-2
Uses: Emulsifier, binder for soft and hard
gelatin encapsulation
Properties: Translucent fluid; visc. 60 stokes;
HLB 4.0

Captex® 100 [ABITEC
http://www.abiteccorp.com]
Chem. Descrip.: Propylene glycol dicaprate
CAS 68583-51-7; EINECS/ELINCS 271-516-3
Uses: Emollient, lubricant, moisturizer,
solubilizer, extender, visc. modifier,
availability enhancer, vehicle, carrier for
vitamins, colors, and flavors for
pharmaceuticals and nutritional formulas;
emollient, moisturizer, solubilizer, carrier,
visc. modifier for sun care preps.
Features: Nonoily
Regulatory: FDA 21CFR §172.856; Kosher
Properties: Cl. liq.; bland odor and taste; misc.
with most org. solvs.; vapor dens. > 1; vapor
pressure < 1 mm Hg; acid no. 0.1 max.; sapon.
no. 270-295; flash pt. (COC) > 200 C; 0.1% max.
moisture
Precaution: Incompat. with oxidizers
Hazardous Decomp. Prods.: CO, CO2
NFPA: Health 0, Flammability 1, Reactivity 0
Storage: Store in dry place @ ambient temp.

Captex® 200 [ABITEC
http://www.abiteccorp.com]
Chem. Descrip.: Propylene glycol
dicaprylate/dicaprate
CAS 68583-51-7; EINECS/ELINCS 271-516-3
Uses: Carrier, vehicle, energy source,
availability enhancer, viscosity modifier for
pharmaceutical microemulsions,
suspensions, soft gelatin capsules,
suppositories, nutritional supplements; and
clinical nutrition
Regulatory: USP/NF, EP, DMF 1939, FDA 21
CFR § 172.856; SARA §311/312, 313
nonreportable
Properties: APHA 100 liq.; odorless; sol. in fatty
oils and lt. petroleum, hydrocarbons, ketones;
sl. sol. in anhyd. ethanol; insol. in water; sp.gr.
0.91-0.93; visc. 9-12 cP; vapor dens. > 1;
vapor press < 1 mm Hg; acid no. 0.2 max.;
iodine no. 1.0 max.; sap; hyd. no. 10.0 max.;
peroxide no. 1.0 max.; cloud pt. < -15 C; flash
pt. (COC) 410 F; ref. index 1.439-1.442
Toxicology: Nonirritant to eyes and skin;
nontoxic; noncarcinogenic
Environmental: Avoid runoff to waterways
Precaution: Wear PVC or neoprene gloves,
goggles, suitable boots; incompat. with
oxidizers
Hazardous Decomp. Prods.: CO, CO2
NFPA: Health 0, Flammability 1, Reactivity 0
Storage: Store in dry place @ ambient temp.; retest and requalify after 2 yr.

Captex® 200P [ABITEC
http://www.abiteccorp.com]
Chem. Descrip.: Propylene glycol
dicaprylate/dicaprate
CAS 68583-51-7; EINECS/ELINCS 271-516-3

Storage: Store in dry place @ ambient temp.; retest and requalify after 2 yr.

Captex® 300 [ABITEC
http://www.abiteccorp.com]
Chem. Descrip.: Caprylic/capric triglyceride
CAS 65381-09-1; EINECS/ELINCS 265-724-3
Uses: Emollient, lubricant, moisturizer,
diluent, solubilizer, vehicle/carrier, visc.

Properties: APHA 100 liq.; odorless; sol. in
alcohol, oils, hydrocarbons, ketones; insol. in
water; sp.gr. 0.92-0.96; visc. 7-13 mPa•s;
vapor dens. > 1; vapor press < 1 mm Hg; acid
no. 0.1 max.; iodine no. 1.0 max.; sapon. no.
315-335; cloud pt. < -20 C; flash pt. (COC) 410
F; ref. index 1.4393
Environmental: Avoid runoff to waterways
Precaution: Wear PVC or neoprene gloves,
goggles, suitable boots; incompat. with
oxidizers
Hazardous Decomp. Prods.: CO, CO2
NFPA: Health 0, Flammability 1, Reactivity 0
Storage: Store in dry place @ ambient temp.; retest and requalify after 2 yr.
modifier for pharmaceuticals, aerosols, clinical nutrition, coating, delivery/absorp. enhancement, dermatologicals, infant formulas, soft gelatin capsules, orals, suspensions

Features: Med. chain triglyceride

Properties: Gardner 2 max. liq., bland odor and flavor; sol. in alcohol, oils, hydrocarbons, ketones; insol. in water; sp.gr. 0.95; visc. 24-30 mPa*s; b.p. > 500 F; acid no. 0.1 max.; iodine no. 0.5; sapon. no. 335-350; cloud pt. <-5 C; ref. index 1.4481; flash pt. (COC) 480 F

Toxicology: LD50 (oral, rat) > 34 g/kg, (oral, mouse) > 23.5 g/kg; sl. irritating to eyes

Environmental: Avoid runoff to waterways; biodeg.

Precaution: Wear goggles, gloves, apron when working with hot material; incompat. with oxidizers

Hazardous Decomp. Prods.: CO, CO2

NFPA: Health 0, Flammability 1, Reactivity 0

Storage: Store in dry area; keep container closed when not in use

Captex® 300 EP/NF [ABITEC http://www.abiteccorp.com]

Chem. Descrip.: Caprylic/capric triglyceride
(from food grade, veg. oil raw materials)
CAS 65381-09-1; EINECS/ELINCS 265-724-3
Uses: Carrier, vehicle, solubilizer, energy source, visc. modifier in pharmaceuticals; lubricant for soft gelatin capsules; emollient in topical formulations

Features: Fully refined; deodorized

Regulatory: NF, EP compliance; DMF # 1939

Properties: Misc. with most org. solvs. incl. 95% ethanol; sp.gr. 0.93-0.96; visc. 25-33 mPa*s; vapor dens. > 1; vapor pressure < 1 mm Hg; acid no. 0.2 max.; iodine no. 1.0 max.; sapon. no. 310-360; flash pt. (COC) 480 F; ref. index 1.440-1.452; 0.2% max. moisture

Toxicology: LD50 (oral, rat) > 36 ml/kg; no or sl. irritation potential on skin; nonirritating to eyes

Precaution: Incompat. with strong oxidizers

Hazardous Decomp. Prods.: CO, CO2

NFPA: Health 0, Flammability 1, Reactivity 0

Storage: Store in dry area at ambient temps.

Captex® 350 [ABITEC http://www.abiteccorp.com]

Chem. Descrip.: Caprylic/capric triglyceride
(conforms to hydrogenated veg. oil NF)
CAS 68991-68-4
Uses: Diluent, emollient, moisturizer, solvent, vehicle/carrier, fixative, and extender for pharmaceuticals, clinical nutrition, coating, delivery/absorp. enhancement, dermatologicals, infant formulas, nutritional/sports supplements, sun care preps.

Features: Med. chain triglyceride

Regulatory: Kosher

Properties: Gardner 2 max. liq., bland odor and flavor; insol. in water; sp.gr. 0.94; visc. 36-42 mPa*s; b.p. > 500 F; acid no. 0.1 max.; iodine no. 1.52 max.; sapon. no. 290-360; cloud pt. 0 C max.; flash pt. (COC) 520 F; ref. index 1.4582

Toxicology: LD50 (oral, rat) > 36 ml/kg, (oral, mouse) > 25 ml/kg; may cause sl. eye, skin irritation

Environmental: Avoid runoff to waterways; expected to be biodeg.; not expected to bioaccumulate

Hazardous Decomp. Prods.: CO, CO2

NFPA: Health 0, Flammability 1, Reactivity 0

Storage: Store in dry area at ambient temps.

Chem. Descrip.: Caprylic/capric triglyceride
CAS 65381-09-1; EINECS/ELINCS 265-724-3
Uses: Carrier, vehicle, solubilizer, lubricant, energy source, viscosity modifier for pharmaceuticals and clinical nutrition; emollient for topical formulations; lubricant for soft gelatin capsules

Features: Refined and deodorized

Regulatory: NF, EP, DMF 1939; SARA §311/312, 313 nonreportable

Properties: Colorless to lt. liq.; no odor; bland flavor; misc. with most org. solvs. incl. 95% ethanol; sp.gr. 0.95; visc. 25-33 mPa*s; b.p. > 500 F; acid no. 0.2 max.; iodine no. 1.0 max.; sapon. no. 310 - 360; hyd. no. 10.0 max.; ref. index 1.440-1.452; flash pt. (COC) 480 F

Toxicology: LD50 (oral, rat) > 36 g/kg, (oral, mouse) 23.5 mg/kg; sl. irritating to eyes; nonirritating to skin; noncarcinogenic; nonmutagenic; nonteratogenic

Environmental: Avoid runoff to waterways; biodeg.

Precaution: Wear goggles, gloves, apron when working with hot material; incompat. with oxidizers

Hazardous Decomp. Prods.: COx

NFPA: Health 0, Flammability 1, Reactivity 0
Trade Name Reference

Storage: Store in dry area @ ambient temps. and away from heat and direct sunlight; keep container closed when not in use

Captex® 35 5EP/NF [ABITEC http://www.abiteccorp.com]
Chem. Descrip.: Caprylic/capric triglyceride
CAS 65381-09-1; EINECS/ELINCS 265-724-3
Uses: Emollient, solvent, fixing agent, solubilizer, extender, carrier, solubilizer in pharmaceuticals
Features: Fully refined and deodorized
Regulatory: NF, EP compliance; SARA §311/312, 313 nonreportable
Properties: Colorless to lt. yel. odorless liq.; miscible with most organic solvents including ethanol (95%); sp. gr. 0.93-0.96; visc. 25-33 mPa.s; b.p. > 500 F; acid no. 0.2 max.; iodine no.1.0 max.; sapon. no. 310-360; hyd. no. 10 max.
Toxicology: LD50 (oral, rat) > 34 g/kg, , (oral, mouse) > 23.5 g/kg; sl. irritating to eyes; inh. of vapors and/or aerosols which may be irritating to eyes and respiratory tract; may cause GI discomfort; noncarcinogenic; nonmutagenic
Environmental: Biodeg.; prevent liquid from entering bodies of water
Precaution: Wear goggles, gloves, apron when working with hot material; incompat. with oxidizers
Hazardous Decomp. Prods.: CO, CO2
HMIS: Health 0, Flammability 1, Reactivity 0
Storage: Store in dry area; keep container closed when not in use

Captex® 500 [ABITEC http://www.abiteccorp.com]
Chem. Descrip.: Glycerin triacetate See Triacetin
CAS 102-76-1; EINECS/ELINCS 203-051-9
Uses: Solvent, fixing agent for flavors and fragrances in pharmaceuticals
Regulatory: FDA 21CFR §184.1901, GRAS; FCC, USP approved; RCRA not regulated
Properties: Colorless liq.; mild vegetable oil odor; insol. in water; sp.gr. 1.16; b.p. ≈ 260 C; flash pt. ≈ 146 C; autoignition temp.≈ 432 C
Toxicology: LD50 (oral, rat) 3 g/kg; no adverse effects
Environmental: Avoid runoff into storm sewers or ditches that lead to waterways; biodeg.;
Precaution: Combustible; wear PVC or neoprene gloves, goggles, suitable boots; incompat. with oxidizers
Hazardous Decomp. Prods.: CO, CO2
HMIS: Health 0, Flammability 1, Reactivity 0
Storage: 18 mos.; store in closed container in dry place @ ambient temps.; keep away from heat, flame, sparks

Captex® 500P [ABITEC http://www.abiteccorp.com]
Chem. Descrip.: Triacetin
Chem. Analysis: Moisture 0.2% max.
CAS 102-76-1; EINECS/ELINCS 203-051-9
Uses: Emollient, solvent, fixing agent, solubilizer, extender, carrier, solubilizer in pharmaceuticals
Regulatory: USP, FCC, FDA 21 CFR §184.1901, SARA §311/312 nonreportable
Properties: Colorless liq.; mild veg. odor; insol. in water; sp.gr. 1.16; b.p. ≈ 260 C; ref. index 1.429-1.430; acid value 0.04 max.; flash pt ≈ 146 C
Toxicology: LD50 (oral, rat) 3 g/kg; no adverse effects

Captex® 500P [ABITEC http://www.abiteccorp.com]
Chem. Descrip.: Triacetin
Chem. Analysis: Moisture 0.2% max.
CAS 102-76-1; EINECS/ELINCS 203-051-9

Regulatory: USP, FCC, FDA 21 CFR §184.1901, SARA §311/312 nonreportable
Properties: Colorless liq.; mild veg. odor; insol. in water; sp.gr. 1.16; b.p. ≈ 260 C; ref. index 1.429-1.430; acid value 0.04 max.; flash pt ≈ 146 C
Toxicology: LD50 (oral, rat) 3 g/kg; no adverse effects
Captex® 800 [ABITEC
http://www.abiteccorp.com]
Chem. Descrip.: Propylene glycol
diethylhexanoate See Propylene glycol
dioctanoate
CAS 93981-97-6; EINECS/ELINCS 301-185-3
Uses: Emollient, moisturizer, lubricant,
penetrant, visc. modifier for
pharmaceuticals, dermatologicals,
emulsions, suppositories, sun care
preps.; carrier for essential oils, flavors;
vehicle for vitamins, medicinals, nutritional
prods.
Features: Nonoily; imparts rich feel to skin
Properties: APHA 100 max. cl. liq.; neutral odor;
bland flavor; misc. with most org. solvs. incl.
95% ethanol; insol. in water; sp.gr. 0.916-
0.926; visc. 9-13 mPa•s; vapor dens. > 1;
vapor pressure < 1 mm Hg; acid no. 1.0 max.;
iodine no. 1.0 max.; sapon. no. 320-340; cloud
pt. < -20 C
Environmental: Avoid runoff to waterways
Precaution: Incomp. with oxidizers
NFPA: Health 0, Flammability 1, Reactivity 0
Storage: Ambient storage
Captex® 810D [ABITEC
http://www.abiteccorp.com]
Chem. Descrip.: Caprylic/capric/linoleic
triglyceride
Uses: Diluent, emollient, moisturizer,
solubilizer, solvent, vehicle/carrier, fixing
agent, extender in pharmaceuticals,
nutritional applcs., clinical nutrition,
delivery/absorp. enhancement,
dermatologicals; carrier for flavors and
fragrances; lipid vehicle in pharmaceuticals
for parenteral and enteric
hyperalimentation

Captex® 1000 [ABITEC
http://www.abiteccorp.com]
Chem. Descrip.: Tricaprin
CAS 621-71-6; EINECS/ELINCS 210-702-0
Uses: Diluent, emollient, lubricant,
moisturizer, solubilizer, vehicle, carrier,
visc. modifier for aerosols, clinical
nutrition, coating, delivery/absorption
enhancement, dermatologicals, infant
formulas, nutritional/sports supplements,
gelatin capsules; carrier for flavors,
fragrances, colors, and vitamins
Features: Provides non-greasy water-resist. film
Regulatory: Kosher
Properties: Pale yel. solid; misc. with most org.
solvs.; sp.gr. 0.92; vapor dens. > 1; vapor
pressure < 1 mm Hg; m.p. 33 C; b.p. > 500 F;
acid no. 0.1 max.; sapon. no. 280-320; 0.1%
max. moisture
Precaution: Wear chemical splash goggles,
neoprene gloves; incomp. with strong
oxidizers
Storage: Store in dry place @ ambient temp.
Captex® 8000 [ABITEC
http://www.abiteccorp.com]
Chem. Descrip.: Tricaprylin
CAS 538-23-8; EINECS/ELINCS 208-686-5
Uses: Lubricant for pharmaceuticals; carrier
for essential oils, flavors; vehicle for
vitamins, medicinals, nutritional prods.
Features: Nonoily; imparts rich feel to the skin
Properties: APHA 150 max. cl. liq.; neutral odor;
bland flavor; misc. with most org. solvs. incl.
95% ethanol; visc. 20-28 mPa•s; acid no. 1.0
max.; iodine no. 1.0 max.; sapon. no. 350-365;
cloud pt. < -5 C; ref. index 1.4469

Captex® 800
Trade Name Reference

effect on skin or upon ing.; vapors and/or
aerosols which may formed at elevated temps.
can irritate to eyes and respiratory tract;
noncarcinogenic

Environmental: Avoid runoff into storm
sewers and ditches which which lead to
waterways
Precaution: Combustible; keep away from
heat, sparks and flame; wear ANSI-approved
goggles and PVC or neoprene gloves

Hazardous Decomp. Prods.: COx
HMIS: Health 0, Flammability 1, Reactivity 0
Storage: Keep container closed when not in use;
store in a dry area SS storage tanks at
ambient temps.

Captex® 8000

Regulatory: SARA §311/312, 313 nonreportable
Properties: Gardner 2 max. liq.; mild fatty odor;
vapor pressure < 1 mmHg; acid no. 0.1 max.;
iodine no. 85; sapon. no. 320-340
Toxicology: Sl. eye irritant; no adverse effect
to skin; noncarcinogenic; nonmutagenic
Precaution: Avoid mist formation and contact
with eyes; wear chemical splash goggles
and neoprene-type gloves for hot oil;
incomp. with oxidizers
Hazardous Decomp. Prods.: COx
HMIS: Health 0, Flammability 1, Reactivity 0
Storage: 2 yr min. shelf life; store in dry area in
closed, labeled containers; keep away from
heat, sparks and flame.

Captex® 1000

Chem. Descrip.: Tricaprin
CAS 621-71-6; EINECS/ELINCS 210-702-0

Uses: Diluent, emollient, lubricant,
moisturizer, solubilizer, vehicle, carrier,
visc. modifier for aerosols, clinical
nutrition, coating, delivery/absorption
enhancement, dermatologicals, infant
formulas, nutritional/sports supplements,
gelatin capsules; carrier for flavors,
fragrances, colors, and vitamins
Features: Provides non-greasy water-resist. film
Regulatory: Kosher
Properties: Pale yel. solid; misc. with most org.
solvs.; sp.gr. 0.92; vapor dens. > 1; vapor
pressure < 1 mm Hg; m.p. 33 C; b.p. > 500 F;
acid no. 0.1 max.; sapon. no. 280-320; 0.1%
max. moisture
Precaution: Wear chemical splash goggles,
neoprene gloves; incomp. with strong
oxidizers
Storage: Store in dry place @ ambient temp.

Captex® 8000

Chem. Descrip.: Tricaprylin
CAS 538-23-8; EINECS/ELINCS 208-686-5
Uses: Lubricant for pharmaceuticals; carrier
for essential oils, flavors; vehicle for
vitamins, medicinals, nutritional prods.
Features: Nonoily; imparts rich feel to the skin
Properties: APHA 150 max. cl. liq.; neutral odor;
bland flavor; misc. with most org. solvs. incl.
95% ethanol; visc. 20-28 mPa•s; acid no. 1.0
max.; iodine no. 1.0 max.; sapon. no. 350-365;
cloud pt. < -5 C; ref. index 1.4469

Captex® 1000

Chem. Descrip.: Tricapryrin
CAS 538-23-8; EINECS/ELINCS 208-686-5
Uses: Lubricant for pharmaceuticals; carrier
for essential oils, flavors; vehicle for
vitamins, medicinals, nutritional prods.
**Captex® 8227** [ABITEC http://www.abiteccorp.com]

**Chem. Descrip.:** Triundecanoin

**CAS:** 13552-80-2; EINECS/ELINCS 236-935-8

**Uses:** Solubilizer, carrier, and vehicle in pharmaceuticals and nutritional applics.; carrier for flavors and fragrances

**Regulatory:** 21 CFR 172.856; SARA §311/312, 313 nonreportable

**Properties:** APHA 150 solid; fatty odor; insol. in water; sp.gr. 0.9; vapor dens. > 1; vapor pressure < 1 mm Hg; m.p. 25-29 C; acid no. 0.5 max.; iodine no. 5 max.; sapon. no. 270-290; cloud pt. 21 C; flash pt. (COC) 350 F

**Toxicology:** LD50 (oral, rat) > 5 gm/ kg; slight irritant to eyes; no adverse effects to skin or by ing.; noncarcinogenic; nonmutagenic; nonteratogenic

**Precaution:** Wear chemical splash goggles; incompat. with strong oxidizers

**Hazardous Decomp. Prods.:** COx

**Storage:** Retest and requalify 18 months from the date of manufacture; store in a dry area away from heat or sparks; maintain good ventilation around containers.

**Captex® CA** [ABITEC http://www.abiteccorp.com]

**Chem. Descrip.:** Medium chain triglycerides; starch See Caprylic/capric triglyceride

**CAS:** 65381-09-1; 9005-25-8; EINECS/ELINCS 265-724-3; 232-686-4

**Uses:** Pharmaceutical fragrance

**Regulatory:** SARA §311/312, 313 nonreportable

**Properties:** Wh. free-flowing powd.; clean, sl. sweet taste; vapor pressure < 1 mmHg; acid no. 0.1 max.; iodine no. 85; sapon. no. 235-253

**Precaution:** Avoid mist formation and contact with eyes; wear chemical splash goggles and neoprene-type gloves for hot oil; incompat. with oxidizers

**Hazardous Decomp. Prods.:** COx

**Storage:** 1 yr shelf life; store @ 60-80° F.

**Captisol®** [CyDex http://www.cydexinc.com]

**Chem. Descrip.:** Sulfobutylether β-cyclodextrin

**Uses:** Excipient, carrier, solubilizer, stabilizer, bioavailability enhancer for parenteral pharmaceuticals

**Features:** Enables delivery of drugs with poor water sol.; can complex neutral, anionic, and cationic drugs; biocompatible.; can minimize tissue irritation effects of irritating drugs

**Properties:** Wh. to off-wh. solid; anionic

**Carbopol® 934 NF Polymer** [Noveon http://www.carbopol.com; http://www.noveoncoatings.com]

**Chem. Descrip.:** Carbomer 934 NF

**CAS:** 9003-01-4

**Uses:** Rheology control agent, emulsifier, thickener, stabilizer, suspending agent for stable topical pharmaceutical emulsions and suspensions, aq. and solv.-based gels

**Regulatory:** USP/NF, JPE, not covered by Carbomers monograph in EP which stipulates benzene < 2 ppm; FDA 21 CFR §175.105, 175.300, 175.320, 176.180, 177.2260; 40 CFR §180.1001; NF, BP, JSPI compliance; EPA hazardous waste; SARA §312 chronic health hazard, §313 reportable (benzene) (benzene)

**Properties:** Wh. fluffy powd.; sl. acetic odor; sol. in water, polar solvs., many nonpolar solvs. blends; sp.gr. 1.41; bulk dens. 208 kg/m³; visc. 30,500-39,400 cps (0.5%); pH 2.5-3.0 (1% aq. disp.); anionic; 100% conc.; < 2% moisture

**Toxicology:** LD50 (oral, rat) > 2500 mg/kg, (skin, rabbit) > 3000 mg/kg; dust may cause eye irritation, pain; dust inh. may cause coughing, mucous prod., shortness of breath; prolonged/repeated exposure may cause contact dermatitis; TSCA listed

**Environmental:** LC50 (daphnia magna, 96 h) 168-280 mg/l; low aquatic toxicity; BOD=0, nonbiodeg.; removed with the biomass in typ. wastewater treatment

**Precaution:** Take precautions against dust explosion; heat may be generated in contact with strong basic materials, e.g., ammonia, NaOH, KOH, or strongly basic amines

**Hazardous Ingredients:** Benzene (< 0.3%)

**Hazardous Decomp. Prods.:** CO, CO2, hydrocarbons, irritating vapors

**NFPA:** Health 2, Flammability 1, Reactivity 0

**Storage:** 2 yr. min. shelf life stored in sealed containers, protected from moisture and extreme temps.: hygroscopic

**Carbopol® 934P NF Polymer** [Noveon http://www.carbopol.com; http://www.noveoncoatings.com]

**Chem. Descrip.:** Carbomer 934P NF

**CAS:** 9003-01-4

**Uses:** Thickener, suspending agent,
**Trade Name Reference**

emulsifier for pharmaceuticals, topicals, transdermals, sustained release tablets, oral suspensions, mucoadhesive apps.

**Features:** High purity grade

**Regulatory:** USP/NF, JPE, not covered by Carbomers monograph in EP which stipulates benzene < 2 ppm; FDA 21CFR §175.105, 175.300, 175.320, 176.170, 176.180, 176.200, 177.1210, 177.2260; 40CFR §180.1001; EPA hazardous waste; SARA §312 chronic health hazard, §313 nonreportable

**Properties:** Wh. fluffy powd.; sl. acetic odor; sol. in water, many nonpolar solvs.; sp.gr. 1.41; bulk dens. 208 kg/m³; visc. 4000-11,000 cps (0.5%); pH 2.5-3.0 (1% disp.); anionic; 100% conc.; < 2% moisture

**Toxicology:** LD50 (oral, rat) > 2500 mg/kg, (skin, rabbit) > 3000 mg/kg; dust may cause eye irritation, pain; dust inh. may cause coughing, mucous prod., shortness of breath; prolonged/repeated exposure may cause contact dermatitis; TSCA listed

**Environmental:** LC50 (daphnia magna, 96 h) 168-280 mg/l; low aquatic toxicity; BOD=0; nonbiodeg.; removed with the biomass in typ. wastewater treatment

**Precaution:** Take precautions against dust explosion; heat may be generated in contact with strong basic materials, e.g., ammonia, NaOH, KOH, or strongly basic amines

**Hazardous Ingredients:** Benzene (< 0.3%)

**Hazardous Decomp. Prods.:** CO, CO₂, hydrocarbons, irritating vapors

**NFPA:** Health 2, Flammability 1, Reactivity 0

**Storage:** 2 yr. min. shelf life stored in sealed containers, protected from moisture and extreme temps.; hygroscopic

**Carbopol® 940 NF** [Noveon http://www.carbopol.com; http://www.noveoncoatings.com]

**Chem. Descrip.:** Carbomer 940 NF

**CAS 9003-01-4**

**Uses:** Emulsifier, thickener for low visc. sparkling clear topical pharmaceutical gels; emulsion stabilizer for topical lotions

**Features:** Effective in mod. ionic systems

**Regulatory:** USP/NF, JPE, not covered by Carbomers monograph in EP which stipulates benzene < 2 ppm; FDA 21CFR §175.105, 175.300, 175.320, 176.170, 176.180, 176.200, 177.1210, 177.2260; 40CFR §180.1001; EPA hazardous waste; SARA §312 chronic health hazard, §313 reportable

**Properties:** Wh. fluffy powd.; sl. acetic odor; sol. in water, many nonpolar solvs.; sp.gr. 1.41; bulk dens. 208 kg/m³; visc. 4000-60,000 cps (0.5%); pH 2.5-3.0 (1% disp.); anionic; 100% conc.; < 2% moisture

**Toxicology:** LD50 (oral, rat) > 2500 mg/kg,
Trade Name Reference

(skin, rabbit) > 3000 mg/kg; dust may cause eye irritation, pain; dust inh. may cause coughing, mucous prod., shortness of breath; prolonged/repeated exposure may cause contact dermatitis; TSCA listed

Environmental: LC50 (daphnia magna, 96 h)
168-280 mg/l; nonbiodeg.; removed with the biomass in typ. wastewater treatment

Precaution: Take precautions against dust explosion; heat may be generated in contact with strong basic materials, e.g., ammonia, NaOH, KOH, or strongly basic amines

Hazardous Ingredients: Benzene (< 0.3%)

Hazardous Decomp. Prods.: CO, CO₂, hydrocarbons, irritating vapors

NFPA: Health 2, Flammability 1, Reactivity 0

Storage: 2 yr. min. shelf life stored in sealed containers, protected from moisture and extreme temps.; hygroscopic

Carbopol® 971P NF [Noveon
http://www.carbopol.com;
http://www.noveoncoatings.com]
Chem. Descrip.: Carbomer 941 NF (polymerized in ethyl acetate)
CAS 9003-01-4
Uses: Emulsifier, thickener, stabilizer, suspending agent for pharmaceuticals, esp. oral and mucosal applics., controlled-release tablets, oral suspensions, transdermals, topical lotions and gels

Properties: Wh. fluffy powd.; sol. in water; sp.gr. 1.41; bulk dens. 208 kg/m³; visc. 4000-11,000 cps (0.5%); acid no. 700-750; pH 2.5-3.0 (1% aq. disp.); anionic

Toxicology: LD50 (oral, rat) > 2500 mg/kg, (skin, rabbit) > 3000 mg/kg; nonirritating to eyes; nonsensitizing to human skin; may cause mild upper respiratory symptoms; may cause lung effects on prolonged/repeated exposure

Precaution: May generate heat in contact with strong basic materials, e.g., ammonia, NaOH, KOH, or strongly basic amines; contact with water creates a very slippery film

Hazardous Decomp. Prods.: CO, CO₂, hydrocarbons, irritating vapors

Storage: 2 yr. min. shelf life stored in sealed containers, protected from moisture and extreme temps.; hygroscopic

Carbopol® 974P NF [Noveon
http://www.carbopol.com;
http://www.noveoncoatings.com]
Chem. Descrip.: Carbomer 934P NF (polymerized in ethyl acetate)
CAS 9003-01-4
Uses: Emulsifier, thickener, stabilizer, suspending agent for pharmaceuticals, esp. oral and mucosal applics., controlled-release tablets, oral suspensions, transdermals, topical lotions and gels

Properties: Wh. fluffy powd.; sp.gr. 1.41; bulk dens. 208 kg/m³; visc. 29,400-39,400 cps (0.5%); pH 2.5-3.0 (1% aq. disp.); anionic

Toxicology: LD50 (dermal, rabbit) > 2.0 g/kg; nonirritating to eyes; nonsensitizing to human skin

Storage: 2 yr. min. shelf life stored in sealed containers, protected from moisture and extreme temps.; hygroscopic

Carbopol® 980 NF Polymer [Noveon
http://www.carbopol.com;
http://www.noveoncoatings.com]
Chem. Descrip.: Carbomer 940 NF
CAS 9003-01-4
Uses: Solvent thickener for topical pharmaceuticals, sparkling clear water or hydroalcoholic topical gels, aq. or solv. systems

Features: For use with or without neutralizing

Regulatory: USP/NF, EP, JPE; FDA 21CFR §175.105, 175.300, 175.320, 176.170, 176.180, 176.200, 177.1210, 177.2260; 40CFR §180.1001; NF, DAB, compliance; SARA §312 chronic health hazard

Properties: Wh. fluffy powd.; stl. acetic odor; sol. in water; sp.gr. 1.41; bulk dens. 208 kg/m³; visc. 13,000-30,000 cps (0.2%); 40,000-60,000 cps (0.5%); pH 2.5-3.0 (1% aq. disp.); < 2% moisture

Toxicology: LD50 (oral, rat) > 2500 mg/kg, (skin, rabbit) > 3000 mg/kg; sl. irritating to skin; minimal eye irritant; dust inh. may cause coughing, mucous prod., shortness of breath; prolonged/repeated exposure may cause contact dermatitis; TSCA listed

Environmental: LC50 (daphnia magna, 96 h)
Carbopol® 981 NF [Noveon
http://www.carbopol.com;
http://www.noveoncoatings.com]
Chem. Descrip.: Carbomer 941 NF
CAS 9003-01-4
Uses: Emulsifier, thickener for low visc.
sparkling clear pharmaceutical topical gels;
emulsion stabilizer for topical lotions
Features: Effective in mod. ionic systems
Regulatory: USP/NF, EP, JPE; FDA 21CFR
§175.105, 175.300, 175.320, 176.170,
176.180, 176.200, 177.1210, 177.2260;
40CFR §180.1001; SARA §312 chronic health
hazard
Properties: Wh. fluffy powd.; sl. acetic odor; sol.
in water; sp.gr. 1.41; bulk dens. 208 kg/m³;
visc. 4000-10,000 cps (0.5%); pH 2.5-3.0 (1% 
aq. disp.); anionic; < 2% moisture
Toxicology: LD50 (oral, rat) > 2500 mg/kg,
(skin, rabbit) > 3000 mg/kg; sl. irritating to
skin; minimal eye irritant; dust inh. may
cause coughing, mucous prod., shortness of
breath; prolonged/repeated exposure may
cause contact dermatitis; TSCA listed
Environmental: LC50 (daphnia magna, 96 h)
168-280 mg/l; nonbiodeg.; removed with the
biomass in typ. wastewater treatment
Precaution: Take precautions against dust
explosion; heat may be generated in
contact with strong basic materials, e.g.,
ammonia, NaOH, KOH, or strongly basic
amines
Hazardous Decomp. Prods.: CO, CO₂,
hydrocarbons, irritating vapors
NFPA: Health 2, Flammability 1, Reactivity 0
Storage: 2 yr. min. shelf life stored in sealed
containers, protected from moisture and
extreme temps.; hygroscopic

Carbopol® 1382 [Noveon
http://www.carbopol.com;
http://www.noveoncoatings.com]
Chem. Descrip.: Acrylates/C10-30 alkyl
acrylate crosspolymer
Uses: Rheology control agent, thickener,
stabilizer, moisturizer, gellant for
pharmaceuticals; light gellant for water or
hydroalcoholic systems
Features: For pourable prod. contg. suspended
incompat. ingreds.
Regulatory: FDA 21CFR §175.105, 175.300,
175.320, 176.170, 176.200, 176.180, 177.1210,
177.2260; 40CFR §180.1001; EPA hazardous waste; SARA §312 chronic health
hazard, §313 reportable (benzene)
Properties: Wh. fluffy powd., sl. acetic odor; sol.
in water; sp.gr. 1.41; bulk dens. 208 kg/m³;
visc. 9500-26,500 cps (1%); pH 2.5-3.0 (1% 
aq. disp.); anionic; < 2% moisture
Toxicology: LD50 (oral, rat) > 2500 mg/kg,
(skin, rabbit) > 3000 mg/kg; nonirritating to
skin; mod. eye irritant in conc. form,
nonirritating @ 1%; dust inh. may cause
coughing, mucous prod., shortness of
breath; may cause contact dermatitis; TSCA
listed
Environmental: LC50 (daphnia magna, 96 h)
168-280 mg/l; nonbiodeg.; removed with the
biomass in typ. wastewater treatment
Precaution: Take precautions against dust
explosion; heat may be generated in
contact with strong basic materials, e.g.,
ammonia, NaOH, KOH, or strongly basic
amines
Hazardous Ingredients: Benzene (< 0.3%)
Hazardous Decomp. Prods.: CO, CO₂,
hydrocarbons, irritating vapors
NFPA: Health 2, Flammability 1, Reactivity 0
Storage: 2 yr. min. shelf life stored in sealed
containers, protected from moisture and
extreme temps.; hygroscopic
**Trade Name Reference**

175.320, 176.170, 176.180, 176.200, 177.1210, 177.2260; 40CFR §180.1001; JSCI compliance

**Properties:** Wh. fluffy powd.; sp.gr. 1.41; bulk dens. 208 kg/m³; visc. 25,000-45,000 (1%); pH 2.5-3.0 (1% aq. disp.); anionic

**Toxicology:** Sl. skin irritant; borderline eye irritant

**Storage:** 2 yr. min. shelf life stored in sealed containers, protected from moisture and extreme temps.; hygroscopic

**Carbopol® 2984** [Noveon](http://www.carbopol.com; http://www.noveoncoatings.com)

**Chem. Descrip.:** Carboxylic acid polymer crosslinked with allyl ethers of pentaerythritol See Carbomer 941

**CAS 9003-01-4**

**Uses:** Rheology control agent, emulsifier, thickener, stabilizer, suspending agent in topical pharmaceutical stable emulsions and suspensions, aq. and solv.-based gels

**Regulatory:** USP/NF, EP, JPE; USP/NF, US DMF 17095, EP, JPE; BP, JSCI compliance; SARA §312 chronic health hazard

**Properties:** Wh. fluffy powd.; sl. acetic odor; sl. acetic odor; sol. in water; sp.gr. 1.41; bulk dens. 208 kg/m³; visc. 25,000-45,000 cps (0.5%); pH 2.5-3.0 (1% aq. disp.); anionic; < 2% moisture

**Toxicology:** LD50 (oral, rat) > 2500 mg/kg, (skin, rabbit) > 3000 mg/kg; dust may cause pain, eye irritation; dust inh. may cause coughing, mucous prod., shortness of breath; prolonged/repeated exposure may cause contact dermatitis; TSCA listed

**Environmental:** LC50 (daphnia magna, 96 h) 168-280 mg/l; nonbiodeg.; removed with the biomass in typ. wastewater treatment

**Precaution:** Take precautions against dust explosion; heat may be generated in contact with strong basic materials, e.g., ammonia, NaOH, KOH, or strongly basic amines

**Hazardous Decomp. Prods.:** CO, CO₂, hydrocarbons, irritating vapors

**NFPA:** Health 2, Flammability 1, Reactivity 0

**Storage:** 2 yr. min. shelf life stored in sealed containers, protected from moisture and extreme temps.; hygroscopic

**Carbopol® 71G NF Polymer** [Noveon](http://www.carbopol.com; http://www.noveoncoatings.com)

**Chem. Descrip.:** Acrylic acid polymer crosslinked with allyl ethers of pentaerythritol

**CAS 9003-01-4**

**Uses:** Matrix ingredient for controlled release tablets and capsules; rheology modifier for topical lotions, creams and gels.; suspending agent for oral liquids

**Regulatory:** USP/NF, US DMF 17095, EP, JPE; SARA §311/312 Chronic Health Hazard

**Properties:** Wh. granules; sl. acetic odor; sp. gr. ≈ 1.4; visc. 4,000-11,000 cP (4.0% conc.); pH 2.5-3.0 (1% aq. disp.)

**Toxicology:** LD50 (oral, rat) > 2500.00 mg/kg

**Environmental:** Not biodegrad.; LC50 (daphnia magna, 96h) 168-280 mg/l
Precaution: Avoid strongly basic materials and basic amines
Hazardous Decomp. Prods.: COx, hydrocarbons, and irritating vapors
HMIS: Health 2, Flammability 1, Reactivity 0
Storage: Store in sealed, tightly closed standard Noveon containers and protect from moisture and excessive temps.

Chem. Descr.: Crosslinked acrylic acid polymer with processing aid See Polyacrylic acid
Uses: Emulsifier, thickener for low visc. sparkling clear pharmaceutical topical gels; emulsion stabilizer for topical lotions
Features: Effective in mod. ionic systems; easier to disperse and mix
Regulatory: FDA 21CFR §175.105, 175.300, 175.320, 176.170, 176.180, 176.200, 177.1210, 177.2260; 40CFR §180.1001; SARA §312 chronic health hazard
Properties: Wh. fluffy powd.; sl. acetic odor; sp.gr. 1.41; bulk dens. 208 kg/m3; visc. 8000-16,500 cps (0.5%); pH 2.5-3.0 (1% aq. disp.); < 2% moisture
Toxicology: Sl. skin irritant in conc. form, non to very sl. irritant @ 1%; sl. to mod. eye irritant (undiluted); dust inh. may cause coughing, mucous prod., shortness of breath; TSCA listed
Environmental: Nonbiodeg.; removed with the biomass in typ. wastewater treatment
Precaution: Take precautions against dust explosion; heat may be generated in contact with strong basic materials, e.g., ammonia, NaOH, KOH, or strongly basic amines

Carbopol® Ultrez™ 10 NF Polymer [Noveon http://www.carbopol.com; http://www.noveoncoatings.com]
Chem. Descr.: Carbomer
CAS 9003-01-4
Uses: Thickener, rheology control agent for pharmaceutical hydroalcohol topical gels, water or solv. systems
Features: Easily dispersed; nontacky feel; rich, buttery texture
Regulatory: USP/NF (Carbomer Interpolymer Type A); SARA §312 Chronic Health Hazard
Properties: Wh. fluffy powd.; sl. acetic odor; sp.gr. 1.4; bulk dens. 0.19-0.24 g/ml; visc. 45,000-65,000 cps (0.5% sol'n.); pH 2.5-3.0 (1% in water); volatiles < 3.0%; 2% moisture
Environmental: LC50 (daphnia magna, 96 h) 168-280 mg/l, (bluegill, 96 h) 580-2000 mg/l
Precaution: Wear eye protection, protective gloves
Hazardous Decomp. Prods.: CO, CO2, hydrocarbons, irritating vapors
NFPA: Health 2, Flammability 1, Reactivity 0
Storage: Store in dry area in closed container
Trade Name Reference

Carbowax® E300 NF [Dow http://www.dow.com]
Chem. Descrip.: PEG-6 NF, FCC
CAS 25322-68-3; EINECS/ELINCS 220-045-1
Uses:  Carrier for ointments for antiseptics and other medicaments; plasticizer in tablet film coatings; base for suppositories; carrier, solvent, suspending agent in liq. pharmaceuticals; vehicle for actives in gelatin capsules
Properties:  Cl. viscid. liq.; sol. in water; m.w. 300; sp.gr. 1.125; dens. 9.36 lb/gal; f.p. -10 C; viscid. 69 cSt; flash pt. (PMCC) > 400 F; ref. index 1.463; sp. heat 0.508 cal/g/°C
Toxicology:  Extremely low acute oral toxicity; little or no irritation to eyes and skin; not recommended for use on abraded skin; may generate irritating vapors on decomp.

Carbowax® E3350 NF
Chem. Descrip.: PEG-6 NF, FCC
CAS 229-859-1; EINECS/ELINCS 203-989-9
Uses:  Carrier for ointments for antiseptics and other medicaments; plasticizer in tablet film coatings; base for suppositories; carrier, solvent, suspending agent in liq. pharmaceuticals; vehicle for actives in gelatin capsules
Properties:  Wh. waxy solid; m.w. 1450; sp.gr. 1.224; visc. 93 cSt (210 F); flash pt. (PMCC) > 450 F
Toxicology:  Extremely low acute oral toxicity; little or no irritation to eyes and skin; not recommended for use on abraded skin; may generate irritating vapors on decomp.

Carbowax® E400 NF [Dow http://www.dow.com]
Chem. Descrip.: PEG-8 NF, FCC
CAS 25322-68-3; EINECS/ELINCS 225-856-4
Uses:  Carrier for ointments for antiseptics and other medicaments; plasticizer in tablet film coatings; base for suppositories; carrier, solvent, suspending agent in liq. pharmaceuticals; vehicle for actives in gelatin capsules
Properties:  Cl. viscid. liq.; m.w. 400; sp.gr. 1.125; dens. 9.36 lb/gal; f.p. 6 C; viscid. 90 cSt; flash pt. (PMCC) > 450 F; ref. index 1.465; sp. heat 0.498 cal/g/°C
Toxicology:  Extremely low acute oral toxicity; little or no irritation to eyes and skin; not recommended for use on abraded skin; may generate irritating vapors on decomp.

Carbowax® E600 NF [Dow http://www.dow.com]
Chem. Descrip.: PEG-12 NF, FCC
CAS 25322-68-3; EINECS/ELINCS 229-859-1
Uses:  Carrier for ointments for antiseptics and other medicaments; plasticizer in tablet film coatings; base for suppositories; carrier, solvent, suspending agent in liq. pharmaceuticals; vehicle for actives in gelatin capsules
Properties:  Cl. viscid. liq.; sol. in water, ethanol, cyclomethicone, sunscreens, lactic acid; m.w. 600; sp.gr. 1.126; dens. 9.37 lb/gal; f.p. 22 C; viscid. 131 cSt; flash pt. (PMCC) > 450 F; ref. index 1.466; sp. heat 0.490 cal/g/°C
Toxicology:  Extremely low acute oral toxicity; little or no irritation to eyes and skin; not recommended for use on abraded skin; may generate irritating vapors on decomp.

Carbowax® E1000 NF [Dow http://www.dow.com]
Chem. Descrip.: PEG-20 NF, FCC
CAS 25322-68-3; EINECS/ELINCS 203-989-9
Uses:  Carrier for ointments for antiseptics and other medicaments; plasticizer in tablet film coatings; base for suppositories; carrier, solvent, suspending agent in liq. pharmaceuticals; vehicle for actives in gelatin capsules
Properties:  Wh. waxy solid; m.w. 1000; sp.gr. 1.214; f.p. 37 C; viscid. 18 cSt (210 F); flash pt. (PMCC) > 450 F
Toxicology:  Extremely low acute oral toxicity; little or no irritation to eyes and skin; not recommended for use on abraded skin; may generate irritating vapors on decomp.

Carbowax® E1450 NF [Dow http://www.dow.com]
Chem. Descrip.: PEG-32 NF, FCC
CAS 25322-68-3; EINECS/ELINCS 203-989-9
Uses:  Carrier for ointments for antiseptics and other medicaments; plasticizer in tablet film coatings; base for suppositories; carrier, solvent, suspending agent in liq. pharmaceuticals; vehicle for actives in gelatin capsules
Properties:  Wh. waxy solid; m.w. 1450; sp.gr. 1.214; f.p. 44 C; viscid. 29 cSt (210 F); flash pt. (PMCC) > 450 F
Toxicology:  Extremely low acute oral toxicity; little or no irritation to eyes and skin; not recommended for use on abraded skin; may generate irritating vapors on decomp.

Carbowax® E3350 NF [Dow http://www.dow.com]
Chem. Descrip.: PEG-75 NF, FCC
CAS 25322-68-3; EINECS/ELINCS 203-989-9
Uses:  Carrier for ointments for antiseptics and other medicaments; plasticizer in tablet film coatings; base for suppositories; carrier, solvent, suspending agent in liq. pharmaceuticals; vehicle for actives in gelatin capsules
Properties:  Wh. waxy solid; pract. odorless; sol. > 100 g/100 g in water; m.w. 3350; sp.gr. 1.224; viscid. 93 cSt (210 F); f.p. 54 C; b.p. dec.; flash pt. (PMCC) > 232 C; f.p. 4.5-7.5 (5% aq.)
Toxicology:  Single dose oral toxicity believed to be very low; may cause sl. transient eye irritation; avoid prolonged/repeated contact avoid prolonged/repeated contact
Trade Name Reference

Carbowax® E8000 NF [Dow http://www.dow.com]
Chem. Descrip.: PEG-150 NF, FCC
CAS 25322-68-3; EINECS/ELINCS 203-989-9
Uses: Carrier for ointments for antiseptics and other medicaments; plasticizer in tablet film coatings; base for suppositories; carrier, solvent, suspending agent in liq. pharmaceuticals; vehicle for actives in gelatin capsules
Properties: Wh. waxy solid, cl. liq. above 65 C, pract. odorless; sol. > 100 g/100 g in water; m.w. 8000; sp.gr. 1.224; f.p. 60 C; visc. 800 cSt (210 F); flash pt. (PMCC) > 260 C; pH 4.5-7.5 (5% aq.); > 99% act.
Toxicology: LD50 (oral, rat) > 50 g/kg (low oral toxicity); may cause sl. transient temporary eye irritation; avoid prolonged/repeated exposure on abraded skin
Precaution: Dusts may present explosive hazard; incompat. with oxidizers, conc. min. acids

Carbowax® PEG 300 [Dow http://www.dow.com]
Chem. Descrip.: PEG-6
CAS 25322-68-3; EINECS/ELINCS 220-045-1
Uses: Coupling agent, solvent, vehicle, humectant, lubricant, binder, base in pharmaceuticals
Regulatory: FDA 21CFR §175.105, 178.3750, 178.3910; EPA regulated
Properties: Water-wh. visc. liq.; sol. in water, alcohols, glycerin, glycols; m.w. 285-315; sp.gr. 1.1250; dens. 9.38 lb/gal; visc. 5.8 cSt (99 C); f.p. -15 to -8 C; hyd. no. 356-394; flash pt. (PMCC) > 180 C; ref. index 1.463; pH 4.5-7.5 (5% aq.); surf. tens. 44.5 dynes/cm; nonionic

Carbowax® PEG 400 [Dow http://www.dow.com]
Chem. Descrip.: PEG-8
CAS 25322-68-3; EINECS/ELINCS 225-856-4
Uses: Antistat, dye carrier, humectant, lubricant, release agent, plasticizer for capsules, creams and lotions
Regulatory: FDA 21CFR §175.105, 178.3750, 178.3910; EPA regulated
Properties: Liq.; sol. in water, methanol, ethanol, acetone, trichloroethylene, Cellosolve®, Carbitol®, dibutyl phthalate, toluene; m.w. 380-420; sp.gr. 1.1254; dens. 9.39 lb/gal; visc. 7.3 cSt (210 F); f.p. 4-8 C; flash pt. (CCC) > 350 F; ref. index 1.465; pH 4.5-7.5 (5% aq.); surf. tens. 44.5 dynes/cm; nonionic

Carbowax® PEG 540 Blend [Dow http://www.dow.com]
Chem. Descrip.: PEG-6 and PEG-32 (41:59)
Uses: Base for ointments and suppositories
Regulatory: FDA 21CFR §175.105, 178.3750, 178.3910; EPA regulated
Properties: Soft solid; sol. in methylene chloride, 73% in water, 50% in trichloroethylene, 48% in methanol; m.w. 500-600; sp.gr. 1.0930 (60 C); dens. 9.17 lb/gal (55 C); visc. 15.1 cSt (210 F); f.p. 38-41; flash pt. (CCC) > 350 F; pH 4.5-7.5 (5% aq.)

Carbowax® PEG 600 [Dow http://www.dow.com]
Chem. Descrip.: PEG-12
CAS 25322-68-3; EINECS/ELINCS 229-859-1
Uses: Antistat, dye carrier, humectant, lubricant, release agent, plasticizer for capsules, creams and lotions
Regulatory: FDA 21CFR §175.105, 178.3750, 178.3910; EPA regulated
Properties: Liq.; sol. in water; m.w. 570-630; sp.gr. 1.1257; dens. 9.40 lb/gal; visc. 10.8 cSt (210 F); f.p. 20-25 C; flash pt. (CCC) > 350 F; ref. index 1.46; pH 4.5-7.5 (5% aq.); surf. tens. 44.5 dynes/cm; nonionic

Carbowax® PEG 900 [Dow http://www.dow.com]
Chem. Descrip.: PEG-20
CAS 25322-68-3; EINECS/ELINCS 203-989-9
Uses: Ointment and suppository base
Regulatory: FDA 21CFR §175.105, 178.3750, 178.3910; EPA regulated
Properties: Soft solid; sol. 86% in water; m.w. 855-900; sp.gr. 1.0927 (60 C); dens. 9.16 lb/gal (55 C); visc. 15.3 cSt (210 F); f.p. 32-36; flash pt. (CCC) > 350 F; pH 4.5-7.5 (5% aq.); nonionic

Carbowax® PEG 1000 [Dow http://www.dow.com]
Chem. Descrip.: PEG-20
CAS 25322-68-3; EINECS/ELINCS 203-989-9
Uses: Ointment and suppository base
Regulatory: FDA 21CFR §175.105, 178.3750, 178.3910; EPA regulated
Properties: Soft solid; sol. 80% in water; m.w. 950-1050; sp.gr. 1.0926 (60 C); dens. 9.16...
Carbowax® PEG 1450  [Dow http://www.dow.com]
Chem. Descrip.:  PEG-32
CAS 25322-68-3; EINECS/ELINCS 203-989-9
Uses:  Antistat, lubricant, release agent for dentifrices
Regulatory:  FDA 21CFR §175.105, 178.3750, 178.3910; EPA regulated
Properties:  Soft solid or flake; sol. 72% in water; m.w. 1300-1600; sp.gr. 1.0919 (60 C); dens. 9.17 lb/gal (55 C); visc. 26.5 cSt (210 F); f.p. 43-46; flash pt. (CCC) > 350 F; pH 4.5-7.5 (5% aq.); nonionic

Carbowax® PEG 3350  [Dow http://www.dow.com]
Chem. Descrip.:  PEG-75
CAS 25322-68-3; EINECS/ELINCS 203-989-9
Uses:  Antistat, dye carrier, lubricant, release agent for dentifrices
Regulatory:  FDA 21CFR §175.105, 178.3750, 178.3910; EPA regulated
Properties:  Wh. flake or powd.; sol. 67% in water; m.w. 3000-3700; sp.gr. 1.0926 (60 C); dens. 8.94 lb/gal (80 C); visc. 90.8 cSt (210 F); f.p. 54-58 C; flash pt. (PMCC) > 180 C; ref. index 1.465; pH 4.5-7.5 (5% aq.); nonionic

Carbowax® Sentry® PEG 300  [Dow http://www.dow.com]
Chem. Descrip.:  PEG-6 FCC, USP/NF
CAS 25322-68-3; EINECS/ELINCS 220-045-1
Uses:  Coupling agent, solvent, vehicle, humectant, lubricant, binder, base, bodying agent, dispersant for pharmaceuticals (coating, binder, plasticizer, and lubricant in tablets; antiperspirants); glycerin replacement
Properties:  Water-wh. visc. liq.; sol. in water, alcohols, glycerin, glycols; m.w. 285-315; sp.gr. 1.1250; dens. 9.38 lb/gal; visc. 5.8 cSt (99 C); f.p. -15 to -8 C; hyd. no. 356-394; flash pt. (PMCC) > 180 C; ref. index 1.463; pH 4.5-7.5 (5% aq.); surf. tens. 44.5 dynes/cm; nonionic

Carbowax® Sentry® PEG 400  [Dow http://www.dow.com]
Chem. Descrip.:  PEG-8 FCC, USP/NF
CAS 25322-68-3; EINECS/ELINCS 225-856-4
Uses:  Coupling agent, solvent, vehicle, humectant, lubricant, binder, base for pharmaceuticals (coating, binder, plasticizer, and lubricant in tablets; toothpaste; creams/lotions)
Properties:  Water-wh. visc. liq.; sol. in water, methanol, ethanol, acetone, trichloroethylene, Cellosolve®, Carbitol®, dibutyl phthalate, toluene; m.w. 380-420; sp.gr. 1.1254; dens. 9.39 lb/gal; visc. 7.3 cSt (99 C); f.p. 4.8-8 C; hyd. no. 267-295; flash pt. (PMCC) > 180 C; ref. index 1.465; pH 4.5-7.5 (5% aq.); surf. tens. 44.5 dynes/cm; nonionic

Carbowax® Sentry® PEG 540 Blend  [Dow http://www.dow.com]
Chem. Descrip.:  PEG-6 and PEG-32 FCC, USP/NF
Uses:  Coupling agent, solvent, vehicle, humectant, lubricant, binder, base for pharmaceuticals (coating, binder, plasticizer, and lubricant in tablets; ointments; antiperspirants; ointments; creams/lotions)
Properties:  Wh. soft waxy solid; sol. in methylene chloride, 73% in water, 50% in trichloroethylene, 48% in methanol; m.w. 500-600; sp.gr. 1.0930; dens. 9.17 lb/gal (55 C); visc. 15.1 cSt (99 C); m.p. 38-41 C; hyd. no. 187-224; flash pt. (PMCC) > 180 C; pH 4.5-7.5 (5% aq.)

Carbowax® Sentry® PEG 600  [Dow http://www.dow.com]
Chem. Descrip.:  PEG-12 FCC, USP/NF
CAS 25322-68-3; EINECS/ELINCS 229-859-1
Uses:  Coupling agent, solvent, vehicle, humectant, lubricant, binder, base for pharmaceuticals (coating, binder, plasticizer, and lubricant in tablets; antiperspirants; dentifrices; creams/lotions)
Properties:  Water-wh. visc. liq.; sol. in water, alcohols, glycols; m.w. 570-630; sp.gr. 1.1257; dens. 9.40 lb/gal; visc. 5.8 cSt (99 C); f.p. 20-25 C; hyd. no. 178-197; flash pt. (PMCC) > 180 C; ref. index 1.463; pH 4.5-7.5 (5% aq.); surf. tens. 44.5 dynes/cm; nonionic
Carbowax® Sentry® PEG 900  [Dow http://www.dow.com]
Chem. Descrip.:  PEG-20 FCC, USP/NF
CAS 25322-68-3; EINECS/ELINCS 203-989-9
Uses:  Coupling agent, solvent, vehicle, humectant, lubricant, binder, base for pharmaceuticals (coating, binder, plasticizer, and lubricant in tablets; antiperspirants; creams/lotions)
Properties:  Wh. soft waxy solid; sol. 86% in water; m.w. 855-945; sp.gr. 1.0927 (60 C); dens. 9.16 lb/gal (55 C); m.p. 32-36 C; hyd. no. 119-131; flash pt. (PMCC) > 180 C; pH 4.5-7.5 (5% aq.); nonionic

Carbowax® Sentry® PEG 1000  [Dow http://www.dow.com]
Chem. Descrip.:  PEG-20 FCC, USP/NF
CAS 25322-68-3; EINECS/ELINCS 203-989-9
Uses:  Coupling agent, solvent, vehicle, humectant, lubricant, binder, base for pharmaceuticals (coating, binder, plasticizer, and lubricant in tablets; ointments; creams/lotions; antiperspirants; creams/lotions; ointments)
Properties:  Wh. soft waxy solid; sol. 80% in water; m.w. 950-1050; sp.gr. 1.0926 (60 C); dens. 8.94 lb/gal (80 C); m.p. 37-40 C; hyd. no. 107-118; flash pt. (PMCC) > 180 C; pH 4.5-7.5 (5% aq.); nonionic

Carbowax® Sentry® PEG 1450  [Dow http://www.dow.com]
Chem. Descrip.:  PEG-32 FCC, USP/NF
CAS 25322-68-3; EINECS/ELINCS 203-989-9
Uses:  Coupling agent, solvent, vehicle, humectant, lubricant, binder, base for pharmaceuticals (coating, binder, plasticizer, and lubricant in tablets; ointments; creams/lotions; antiperspirants; creams/lotions; ointments)
Properties:  Wh. hard waxy flake or powd.; sol. 67% in water; m.w. 4400-4800; sp.gr. 1.0926 (60 C); dens. 8.95 lb/gal (80 C); m.p. 57-61 C; hyd. no. 23-26; flash pt. (PMCC) > 180 C; pH 4.5-7.5 (5% aq.); nonionic

Carbowax® Sentry® PEG 3350  [Dow http://www.dow.com]
Chem. Descrip.:  PEG-75 FCC, USP/NF
CAS 25322-68-3; EINECS/ELINCS 203-989-9
Uses:  Coupling agent, solvent, vehicle, humectant, lubricant, binder, base for pharmaceuticals (coating, binder, plasticizer, and lubricant in tablets; antiperspirants; toothpaste; creams/lotions)
Properties:  Wh. hard waxy flake or powd.; sol. 65% in water; m.w. 7000-9000; sp.gr. 1.0845 (60 C); dens. 8.96 lb/gal (80 C); m.p. 60-63 C; hyd. no. 13-16; flash pt. (PMCC) > 180 C; pH 4.5-7.5 (5% aq.); nonionic
Trade Name Reference

Cargill Pharm 05521 [Cargill Foods http://www.cargillfoods.com]
Chem. Descrip.: Corn (Zea mays) starch
Chem. Analysis:  11% loss on drying
CAS 9005-25-8; EINECS/ELINCS 232-679-6
Uses: Diluent in direct compression and wet and dry granulation; capsule and powder formulations; binder for wet granulation; disintegrating agent; base for dusting powders and topical formulations
Features: Compatible with most excipients and drugs; when heated in an aqueous environment, the starch gelatinizes
Properties: Granules; particle size 2% on 100 mesh; swells on contact with water; bulk dens., loose 33 lb/ft²
Precaution: Excessive dusting can result in explosive conditions
Storage: 2 yr shelf life; store in a clean, dry, odor-free area at ambient temperature and humidity

Carnauba Wax SP 8 [Strahl & Pitsch http://www.strahlpitsch.com]
Chem. Descrip.: Carnauba (Copernicia cerifera) wax See Carnauba (Copernica cerifera) wax
CAS 8015-86-9; EINECS/ELINCS 232-399-4
Uses: Wax for pharmaceuticals, ointments, tablet coatings
Regulatory: FDA 21 CFR §184.1978 and 175.320; CTFA listed
Toxicology: TSCA listed

Carnauba Wax SP 59-2 [Strahl & Pitsch http://www.strahlpitsch.com]
Chem. Descrip.: Carnauba wax substitute See Carnauba (Copernica cerifera) wax
CAS 8015-86-9; EINECS/ELINCS 232-399-4
Uses: Wax for pharmaceuticals, ointments, tablet coatings
Regulatory: FDA 21 CFR §184.1978 and 175.320; CTFA listed

Carnauba Wax SP 63 [Strahl & Pitsch http://www.strahlpitsch.com]
Chem. Descrip.: Carnauba wax See Carnauba (Copernica cerifera) wax
CAS 8015-86-9; EINECS/ELINCS 232-399-4
Uses: Wax for pharmaceuticals, ointments, tablet coatings
Regulatory: FDA 21 CFR §184.1978 and 175.320; CTFA listed
Properties: Yel. flakes, lumps, or powd.; m.p. 82.5 C min.; acid no. 8-10; sapon. no. 78-88; flash pt. 299 C min.; 2% max. paraffinic hydrocarbons
Toxicology: TSCA listed

Carnauba Wax SP 64 (Extra Light) [Strahl & Pitsch http://www.strahlpitsch.com]
Chem. Descrip.: Carnauba wax substitute See Carnauba (Copernica cerifera) wax
CAS 8015-86-9; EINECS/ELINCS 232-399-4
Uses: Wax for pharmaceuticals, ointments, tablet coatings
Regulatory: FDA 21 CFR §184.1978 and 175.320; CTFA listed
Properties: Tan flakes, lumps, or powd.; m.p. 169-175 F; acid no. 5 max.; sapon. 15-21

Carnauba Wax SP 135 [Strahl & Pitsch http://www.strahlpitsch.com]
Chem. Descrip.: Carnauba wax substitute See Carnauba (Copernica cerifera) wax
CAS 8015-86-9; EINECS/ELINCS 232-399-4
Uses: Wax for pharmaceuticals, ointments, tablet coatings
Regulatory: FDA 21 CFR §184.1978 and 175.320; CTFA listed
Properties: Yel. flakes, lumps, or powd.; m.p. 75-80 C; acid no. 8-12; sapon. no. 46-54
Toxicology: TSCA listed

Carnauba Wax SP 142 [Strahl & Pitsch http://www.strahlpitsch.com]
Chem. Descrip.: Carnauba wax See Carnauba (Copernica cerifera) wax
CAS 8015-86-9; EINECS/ELINCS 232-399-4
Uses: Wax for pharmaceuticals, ointments, tablet coatings
Regulatory: FDA 21 CFR §184.1978 and 175.320; CTFA listed
Properties: Brn. flakes, lumps, or powd.; m.p. 82.5 C min.; acid no. 4-10; sapon. no. 78-88; flash pt. 299 C min.; 2% max. paraffinic hydrocarbons
Toxicology: TSCA listed
Trade Name Reference

Toxicology: TSCA listed

Chem. Descrip.: Carnauba wax See Carnauba (Copernica cerifera) wax
CAS 8015-86-9; EINECS/ELINCS 232-399-4
Uses: Wax for pharmaceuticals, ointments, tablet coatings
Regulatory: FDA 21CFR §184.1978 and 175.320 ; CTFA listed
Properties: Tan flakes, lumps, or powd.; m.p. 82.5 C min.; acid no. 4-10; sapon. no. 78-88; flash pt. 299 C min.; 2% max. paraffinic hydrocarbons

Toxicology: TSCA listed
Carnauba Coarse [Strahl & Pitsch http://www.strahlpitsch.com]
Chem. Descrip.: Carnauba wax See Carnauba (Copernica cerifera) wax
CAS 8015-86-9; EINECS/ELINCS 232-399-4
Uses: Wax for pharmaceuticals, ointments, tablet coatings
Regulatory: FDA 21CFR §184.1978 and 175.320 ; CTFA listed
Properties: Powd.; 80% min. through 60 mesh, 60% min. through 120 mesh, 20% min. through 200 mesh, 10% min. through 325 mesh

Toxicology: TSCA listed
Carnauba Wax Fine [Strahl & Pitsch http://www.strahlpitsch.com]
Chem. Descrip.: Carnauba wax See Carnauba (Copernica cerifera) wax
CAS 8015-86-9; EINECS/ELINCS 232-399-4
Uses: Wax for pharmaceuticals, ointments, tablet coatings
Regulatory: FDA 21CFR §184.1978 and 175.320 ; CTFA listed
Properties: Powd.; 98% min. through 60 mesh, 98% min. through 120 mesh, 65% min. through 200 mesh, 40% min. through 325 mesh

Toxicology: TSCA listed

Toxicology: TSCA listed
Caroat [Degussa http://www.degussa.com; Eigenmann & Veronelli http://www.eigver.it]
Chem. Descrip.: Potassium caroate
CAS 10058-23-8; EINECS/ELINCS 233-187-4
Uses: Stabilizer for pharmaceuticals

Toxicology: TSCA listed
Chem. Descrip.: β-Carotene dispersed in sunflower oil See Carotene; Sunflower (Helianthus annuus) seed oil
CAS 7235-40-7; 8001-21-6; EINECS/ELINCS 230-636-6; 232-273-9
Uses: Dietary supplement; colorant in pharmaceutical preps.
Regulatory: FCC, FDA CFR 73.95(b)
Properties: Red visc. oil; sl. sol. in fats and oils; m.w. 536.85; 30% min. carotene content
Toxicology: Can increase risk of lung cancer in heavy smokers and drinkers

Carrot Oil CLR [CLR http://www.clr-berlin.de]
Trade Name Reference

**Carrot Oil Extra** [Croda Inc](http://www.croda.com; http://www.crodausa.com)

Chem. Descrip.: *Peanut (Arachis hypogaea)* oil, *carrot (Daucus carota)* extract, isopropyl myristate, tocopherol

Uses: Conditioner for reddened coarse skin

Features: Botanical extract of *Daucus carota* L.

Properties: Red cl. liq.; char. odor; sp.gr. 0.880-0.893; acid no. 2 max.; iodine no. 44-68; sapon. no. 185-205; ref. index 1.452-1.460

Use Level: 0.5-5%

Handbook of Pharmaceutical Additives, Third Edition

Cavamax® W6 Pharma [Wacker-Chemie Fine Chemicals GmbH

Chem. Descrip.: α-Cyclodextrin See Cyclodextrin
CAS 10016-20-3; EINECS/ELINCS 233-007-4
Uses: Complex hosting guest molecules, increasing the sol. and bioavailability of other substances, masking flavor, odor, or coloration, stabilizing against light, oxidation, heat, and hydrolysis, turning liqs. or volatiles into stable solid powds., for use in pharmaceuticals
Properties: Wh. cryst. powd.; sol. 14.5 g/100 ml in water; m.w. 972; > 98% act.
Toxicology: LD50 (acute IV, rat) > 3750 mg/kg; nonirritating to eye

Cavamax® W7 Pharma [Wacker-Chemie Fine Chemicals GmbH

Chem. Descrip.: β-Cyclodextrin See Cyclodextrin
CAS 7585-39-9; EINECS/ELINCS 231-493-2
Uses: Complex hosting guest molecules, increasing the sol. and bioavailability of other substances, masking flavor, odor, or coloration, stabilizing against light, oxidation, heat, and hydrolysis, turning liqs. or volatiles into stable solid powds., for use in pharmaceuticals
Properties: Wh. crys. powd.; sol. 1.85 g/100 ml in water; m.w. 1135

Cavasol® W6 HP TL [Wacker-Chemie Fine Chemicals GmbH

Chem. Descrip.: Hydroxypropyl-α-cyclodextrin
CAS 128446-33-3
Uses: Complex hosting guest molecules, increasing the sol. and bioavailability of other substances, masking flavor, odor, or coloration, stabilizing against light, oxidation, heat, and hydrolysis, turning liqs. or volatiles into stable solid powds., for use in pharmaceuticals
Properties: Ylsh. cl. liq.; sol. > 200 g/100 ml water; sol. in methanol, ethanol; m.w. 1184; dens. 1.1-1.2 g/ml; visc. 20-80 mPa•s; 50% aq.
Storage: 6 mos. shelf life; store @ R.T. in sealed containers
**Chem. Descrip.:** Hydroxypropyl-β-cyclodextrin  
**CAS 128446-35-5**  
**Uses:** Complex hosting guest molecules, increasing the sol. and bioavailability of other substances, masking flavor, odor, or coloration, stabilizing against light, oxidation, heat, and hydrolysis, turning liqs. or volatiles into stable solid powds., for use in pharmaceuticals  
**Properties:** Wh. to off-wh. powd.; sol. > 200 g/100 ml water; sol. in methanol, ethanol, pyridine, dimethyl sulfoxide, dimethyl formamide; m.w. 1507; bulk dens. 0.2-0.3 g/ml  
**Storage:** 12 mos. shelf life; store @ R.T. in sealed containers  

**Chem. Descrip.:** Hydroxypropyl-β-cyclodextrin  
**CAS 128446-35-5**  
**Uses:** Complex hosting guest molecules, increasing the sol. and bioavailability of other substances, masking flavor, odor, or coloration, stabilizing against light, oxidation, heat, and hydrolysis, turning liqs. or volatiles into stable solid powds., for use in pharmaceuticals  
**Properties:** Wh. to off-wh. powd.; sol. > 200 g/100 ml water; sol. in methanol, ethanol, pyridine, dimethyl sulfoxide, dimethyl formamide; m.w. 1507; bulk dens. 0.2-0.3 g/ml  
**Storage:** 12 mos. shelf life; store @ R.T. in sealed containers  

**Chem. Descrip.:** Methyl-β-cyclodextrin  
**CAS 128446-36-6**  
**Uses:** Complex hosting guest molecules, increasing the sol. and bioavailability of other substances, masking flavor, odor, or coloration, stabilizing against light, oxidation, heat, and hydrolysis, turning liqs. or volatiles into stable solid powds., for use in pharmaceuticals  
**Properties:** Wh. to sl. ysh. powd.; sol. > 150 g/100 ml water; sol. in methanol, ethanol, pyridine, dimethyl sulfoxide, dimethyl formamide; m.w. 1310; bulk dens. 0.2-0.3 g/ml; m.p. 160-190 C (dec.); 50% aq.  
**Storage:** 12 mos. shelf life; store @ R.T. in sealed containers  

**Chem. Descrip.:** Methyl-β-cyclodextrin  
**CAS 128446-36-6**  
**Uses:** Complex hosting guest molecules, increasing the sol. and bioavailability of other substances, masking flavor, odor, or coloration, stabilizing against light, oxidation, heat, and hydrolysis, turning liqs. or volatiles into stable solid powds., for use in pharmaceuticals  
**Properties:** Wh. powd.; sol. > 200 g/100 ml water; sol. in methanol, ethanol, pyridine, dimethyl sulfoxide, dimethyl formamide; m.w. 1310; bulk dens. 0.2-0.3 g/ml; m.p. 160-190 C (dec.); 50% aq.  
**Storage:** 12 mos. shelf life; store @ R.T. in sealed containers  

**Chem. Descrip.:** Methyl-β-cyclodextrin  
**CAS 128446-36-6**  
**Uses:** Complex hosting guest molecules,
increasing the sol. and bioavailability of other substances, masking flavor, odor, or coloration, stabilizing against light, oxidation, heat, and hydrolysis, turning liqts. or volatiles into stable solid powds., for use in pharmaceuticals

Properties: Ylsh. cl. liq.; odorless; sol. > 150 g/100 ml water; sol. in methanol, ethanol, pyridine, dimethyl sulfoxide, dimethyl formamide; m.w. 1311; dens. 1.2 g/ml; visc. 20-80 mPa*s; 50% aq.

Storage: 6 mos. shelf life; store @ R.T. in sealed containers

Cavasol® W8 HP Pharma [Wacker-Chemie Fine Chemicals GmbH

Chem. Descrip.: Hydroxypropyl-γ-cyclodextrin
CAS 128446-34-4

Uses: Complex hosting guest molecules, increasing the sol. and bioavailability of other substances, masking flavor, odor, or coloration, stabilizing against light, oxidation, heat, and hydrolysis, turning liqts. or volatiles into stable solid powds., for use in pharmaceuticals

Properties: Wh. powd.; sol. > 150 g/100 ml water; sol. in methanol, ethanol, pyridine, dimethyl sulfoxide, dimethyl formamide; m.w. 1580; bulk dens. 0.2-0.3 g/ml

Storage: 12 mos. shelf life; store @ R.T. in sealed containers

CC-901 [Am. Casein
http://www.americancasein.com]

Chem. Descrip.: Calcium caseinate, spray dried
CAS 9005-43-0

Uses: Additive in pharmaceuticals, medical nutritional applcs.

Features: Low visc.

Regulatory: Kosher

Properties: Wh. to lt. cream fine free-flowing powd.; clean/bland odor/flavor; pH 6.6-7.3; 6% moisture

Storage: Store in cool, dry place

CC-902I [Am. Casein
http://www.americancasein.com]

Chem. Descrip.: Calcium caseinate, spray dried, instantized

CAS 9005-43-0

Uses: Bodying agent, mouthfeel enhancer for pharmaceuticals

Features: Readily disp.

Regulatory: Kosher

Properties: Wh. to lt. cream fine free-flowing powd.; clean/bland odor/flavor; pH 6.6-7.3; 6% moisture

Storage: Store in cool, dry place

C*Cavitron 82003 [Cerestar
http://www.cerestar.com]

Chem. Descrip.: Endotoxin-controlled hydroxypropyl-β-cyclodextrin
CAS 94035-02-6

Uses: Solubilizer and bioavailability enhancer of poorly sol. pharmaceutical preps.; used in IV preps.; stabilizer for volatile, labile, and reactive compounds

Features: Chemically stable and does not contribute significantly to viscosity until very high concentrations (> 50%) are reached

Regulatory: EP, DMF (type IV) 10772

Properties: Sparingly sol. in water

C*Cavitron 82004 [Cerestar
http://www.cerestar.com]

Chem. Descrip.: Endotoxin-controlled hydroxypropyl-β-cyclodextrin
CAS 94035-02-6

Uses: Solubilizer and bioavailability enhancer of poorly sol. pharmaceutical preps.; used in IV preps.; stabilizer for volatile, labile, and reactive compounds

Features: Chemically stable and does not contribute significantly to viscosity until very high concentrations (> 50%) are reached

Regulatory: EP, DMF (type IV) 10772

Properties: Sparingly sol. in water

C*Cavitron 82005 [Cerestar

Storage: 6 mos. shelf life; store @ R.T. in sealed containers
Trade Name Reference

CAS 1592-23-0; EINECS/ELINCS 216-472-8
Uses: Conditioner in pharmaceuticals
Properties: Fine powd.; 99% < 71 μm; ≈ 8.4 μm median particle size; bulk dens. ≈ 200 g/l; surf. area ≈ 8.6 m²/g; soften. pt. 150-160 C; 9.2-10.2% ash; < 0.5% free fatty acids

Ceasit PC [Baerlocher France]
Chem. Descrip.: Calcium stearate
CAS 1592-23-0; EINECS/ELINCS 216-472-8
Uses: Stabilizer, lubricant for pharmaceuticals
Properties: Very fine powd.; 99% < 71 µm; ≈ 5.5 µm median particle size; bulk dens. ≈ 170 g/l; surf. area ≈ 10 m²/g; soften. pt. ≈ 160 C; 9.2-9.6% ash; < 0.5% free fatty acid

Cecavon® MG 51 [Ceca SA http://www.ceca.fr]
Chem. Descrip.: Magnesium stearate
CAS 557-04-0; EINECS/ELINCS 209-150-3
Uses: Anticaking agent for pharmaceutical prods.
Properties: Powd.; dens. 0.20 max.; m.p. 140-145 C; 4.5-5.1% Mg.

Cecavon® ZN 70 [Ceca SA http://www.ceca.fr]
Chem. Descrip.: Zinc stearate
CAS 557-05-1; EINECS/ELINCS 209-151-9
Uses: Waterproofing agent, lubricant, gellant, opacifier for pharmaceuticals
Properties: Powd.; dens. 0.20 max.; m.p. 125-130 C; 10.2-11% Zn.

Cecavon® ZN 72 [Ceca SA http://www.ceca.fr]
Chem. Descrip.: Zinc stearate
CAS 557-05-1; EINECS/ELINCS 209-151-9
Uses: Waterproofing agent, lubricant, gellant, opacifier for pharmaceuticals
Properties: Powd.; dens. 0.20 max.; m.p. 125-130 C; 9.8-10.6% Zn.

Cecavon® ZN 735 [Ceca SA http://www.ceca.fr]
Chem. Descrip.: Zinc stearate
CAS 557-05-1; EINECS/ELINCS 209-151-9
Uses: Waterproofing agent, lubricant, gellant, opacifier for pharmaceuticals
Properties: Liq.; sp.gr. 1±0.10; visc. 50-200 mPa•s; 35 ± 2% dry content

CEDEPAL® TD-407 [Stepan http://www.stepan.com]
Chem. Descrip.: Sodium trideceth sulfate
EINECS/ELINCS 246-985-2
Uses: Surfactant, wetting agent, foaming agent for pharmaceuticals
Properties: Liq.; anionic; 73% act.

CEDEPAL® TDS 484 [Stepan http://www.stepan.com]
Chem. Descrip.: Sodium trideceth sulfate
EINECS/ELINCS 246-985-2
Uses: Surfactant, wetting agent, foaming agent for shampoos, bath prods., mild baby prods., pharmaceuticals
Properties: Liq.; anionic; 32% act.

Cegesoft® GPO [Cognis/Care Chems.]
Chem. Descrip.: Palm (elaeis guineensis) oil
CAS 8002-75-3; EINECS/ELINCS 232-316-1
Uses: Emollient for cosmetics, pharmaceuticals, creams/lotions, deodorants, and antiperspirants
Features: Slow spreading value
Properties: Ylsh. red oil; bland odor

Cekol® 30 [Noviant Inc]
Chem. Descrip.: Sodium CMC See Carboxymethylcellulose sodium
CAS 9004-32-4; EINECS/ELINCS 265-995-8
Uses: Binder, thickener, stabilizer, protective colloid, water retention agent, and film-former for pharmaceutical apps., esp. tablet coatings
Regulatory: USP/NF, Eur.Ph. and other compliances
Properties: Wh. to off-wh. fine powd. or gran., odorless; sol. in water; dens. 1.6 g/cc (20 C); bulk dens. 400-800 kg/m³; visc. 10 mPa•s (1%); decomp. pt. 240 C; pH 6.5-8.0 (1%); 99.5% act.; 10% max. moisture
Toxicology: LD50 (oral, rat) 27,000 mg/kg; powd. may dry the skin; dust may irritate eyes; inh. of dust may cause respiratory irritation
Environmental: Biodeg.; BOD7 ≈ 50-100 g O₂/kg
Storage: Hygroscopic; store in cool, dry place; avoid dusting

Cekol® 150 [Noviant CMC Oy http://www.noviantgroup.com; Noviant Inc]
Chem. Descrip.: Sodium CMC See Carboxymethylcellulose sodium
CAS 9004-32-4; EINECS/ELINCS 265-995-8
Uses: Binder, thickener, stabilizer, dispersant for o/w emulsions
Regulatory: USP/NF, Eur.Ph. and other compliances
Trade Name Reference

compliances

Properties: Wh. to off-wh. fine powd. or gran., odorless; sol. in water; dens. 1.6 g/cc (20 C); bulk dens. 400-800 kg/m³; visc. 20 mPa•s (1%); decomp. pt. 240 C; pH 6.5-8.0 (1%); 99.5% act.; 10% max. moisture

Toxicology: LD50 (oral, rat) 27,000 mg/kg; powd. may dry the skin; dust may irritate eyes; inh. of dust may cause respiratory irritation

Environmental: Biodeg.; BOD7 ≈ 50-100 g O₂/kg

Storage: Hygroscopic; store in cool, dry place; avoid dusting

Cekol® 300 [Noviant CMC Oy http://www.noviantgroup.com; Noviant Inc]
Chem. Descrip.: Sodium CMC See Carboxymethylcellulose sodium
CAS 9004-32-4; EINECS/ELINCS 265-995-8
Uses: Binder, thickener, stabilizer, protective colloid, water retention agent, and film-former for pharmaceuticals
Regulatory: USP/NF, Eur.Ph. and other compliances

Properties: Wh. to off-wh. fine powd. or gran., odorless; sol. in water; dens. 1.6 g/cc (20 C); bulk dens. 400-800 kg/m³; visc. 100 mPa•s (1%); decomp. pt. 240 C; pH 6.5-8.0 (1%); 99.5% act.; 10% max. moisture

Toxicology: LD50 (oral, rat) 27,000 mg/kg; powd. may dry the skin; dust may irritate eyes; inh. of dust may cause respiratory irritation

Storage: Hygroscopic; store in cool, dry place; avoid dusting

Cekol® 500 T [Noviant CMC Oy http://www.noviantgroup.com; Noviant Inc]
Chem. Descrip.: Sodium CMC (99.5% min.) See Carboxymethylcellulose sodium
CAS 9004-32-4; EINECS/ELINCS 265-995-8
Uses: Binder, thickener, stabilizer, protective colloid, water retention agent, and film-former for pharmaceuticals
Regulatory: USP/NF, Eur.Ph. and other compliances

Properties: Wh. to off-wh. powd.; odorless; visc. 350-700 mPa•s; 99.5% act.; 10% max. moisture

Cekol® 700 [Noviant CMC Oy http://www.noviantgroup.com; Noviant Inc]
Chem. Descrip.: Sodium CMC See Carboxymethylcellulose sodium

CAS 9004-32-4; EINECS/ELINCS 265-995-8
Uses: Binder, thickener, stabilizer, protective colloid, water retention agent, and film-former for pharmaceuticals, esp. nose, eye, and ear drops; stabilizer, dispersant for o/w emulsions
Regulatory: USP/NF, Eur.Ph. and other compliances

Properties: Wh. to off-wh. fine powd. or gran., odorless; sol. in water; dens. 1.6 g/cc (20 C); bulk dens. 400-800 kg/m³; visc. 100 mPa•s (1%); decomp. pt. 240 C; pH 6.5-8.0 (1%); 99.5% act.; 10% max. moisture

Toxicology: LD50 (oral, rat) 27,000 mg/kg; powd. may dry the skin; dust may irritate eyes; inh. of dust may cause respiratory irritation

Environmental: Biodeg.; BOD7 ≈ 50-100 g O₂/kg

Storage: Hygroscopic; store in cool, dry place; avoid dusting

Cekol® 2000 S [Noviant CMC Oy http://www.noviantgroup.com; Noviant Inc]
Chem. Descrip.: Sodium CMC See Carboxymethylcellulose sodium
CAS 9004-32-4; EINECS/ELINCS 265-995-8
Uses: Binder, thickener, stabilizer, protective colloid, water retention agent, and film-former for pharmaceuticals, toothpaste
Features: Rec. for severe conditions,
formulations with very high electrolyte or peroxide concs., and when an almost instant visc. buildup is required.

**Regulatory:** USP/NF, Eur.Ph. and other compliances

**Properties:** Wh. to off-wh. fine powd. or gran., odorless; sol. in water; dens. 1.6 g/cc (20 C); bulk dens. 400-800 kg/m³; visc. 180 mPa·s (1%); comp. pt. 240 C; pH 6.5-8.0 (1%); 99.5% act.; 10% max. moisture

**Toxicology:** LD₅₀ (oral, rat) 27,000 mg/kg; powd. may dry the skin; dust may irritate eyes; inh. of dust may cause respiratory irritation

**Environmental:** Biodeg.; BOD₇ ≈ 50-100 g O₂/kg

**Storage:** Hygroscopic; store in cool, dry place; avoid dusting

Cekol® 30000 [Noviant CMC Oy](http://www.noviantgroup.com; Noviant Inc]

**Chem. Descrip.:** Sodium CMC  See Carboxymethylcellulose sodium

**CAS** 9004-32-4; EINECS/ELINCS 265-995-8

**Uses:** Binder, thickener, stabilizer, protective colloid, water retention agent, and film-former for pharmaceuticals, esp. syrups, ointment bases

**Regulatory:** USP/NF, Eur.Ph. and other compliances

**Properties:** Wh. to off-wh. fine powd. or gran., odorless; sol. in water; dens. 1.6 g/cc (20 C); bulk dens. 400-800 kg/m³; visc. 3500 mPa·s (1%); comp. pt. 240 C; pH 6.5-8.0 (1%); 99.5% act.; 10% max. moisture

**Toxicology:** LD₅₀ (oral, rat) 27,000 mg/kg; powd. may dry the skin; dust may irritate eyes; inh. of dust may cause respiratory irritation

**Environmental:** Biodeg.; BOD₇ ≈ 50-100 g O₂/kg

**Storage:** Hygroscopic; store in cool, dry place; avoid dusting

Celite® 503 [Celite](http://www.worldminerals.com]

**Chem. Descrip.:** Diatomaceous earth

**CAS** 7631-86-9; EINECS/ELINCS 231-545-4

**Uses:** Filler, filter aid for pharmaceuticals

**Properties:** Wh.; 10 µ median pore size; 10% on 150 mesh; dens. 12 lb/ft³ (dry); pH 10; 0.1% moisture
Trade Name Reference

Celite® 545  [Celite  http://www.worldminerals.com]
Chem. Descrip.:  Diatomaceous earth
CAS  7631-86-9; EINECS/ELINCS  231-545-4
Uses:  Filler, filter aid for pharmaceuticals
Properties:  Wh.; 17 µ median pore size; 24% on 150 mesh; dens. 12 lb/ft³ (dry); pH 10; 0.1% moisture

Celite® 577  [Celite  http://www.worldminerals.com]
Chem. Descrip.:  Diatomaceous earth
CAS  7631-86-9; EINECS/ELINCS  231-545-4
Uses:  Filler, filter aid for pharmaceuticals
Properties:  Pink; 2.5 µ median pore size; 2% on 150 mesh; dens. 8.0 lb/ft³ (dry); pH 7.0; 0.5% moisture

Cellogen HP-5HS  [Dai-ichi Kogyo Seiyaku  http://www.dks-web.co.jp]
Chem. Descrip.:  Carboxymethylcellulose sodium
CAS  9004-32-4; EINECS/ELINCS  265-995-8
Uses:  Thickener, stabilizer, water retention agent for pharmaceuticals
Features:  Moderate hydration; resist. to heat, enzyme, and bacterial decomp.; superb water-holding ability; inert; wide compat. with other anionic and nonionic thickeners
Regulatory:  Kosher
Properties:  Visc. 2000-3000 cps (1%)

Cellogen HP-6HS  [Dai-ichi Kogyo Seiyaku  http://www.dks-web.co.jp]
Chem. Descrip.:  Carboxymethylcellulose sodium
CAS  9004-32-4; EINECS/ELINCS  265-995-8
Uses:  Thickener, stabilizer, water retention agent for pharmaceuticals
Features:  Resist. to heat, enzyme, and bacterial decomp.; superb water-holding ability
Regulatory:  Kosher
Properties:  Visc. 3000-4000 cps (1%)

Chem. Descrip.:  Carboxymethylcellulose sodium
CAS  9004-32-4; EINECS/ELINCS  265-995-8
Uses:  Thickener, stabilizer, water retention agent for pharmaceuticals
Features:  Resist. to heat, enzyme, and bacterial decomp.; superb water-holding ability
Regulatory:  Kosher
Properties:  Visc. 3000-4000 cps (1%)

Cellogen HP-SB  [Dai-ichi Kogyo Seiyaku  http://www.dks-web.co.jp]
Chem. Descrip.:  Carboxymethylcellulose sodium
CAS  9004-32-4; EINECS/ELINCS  265-995-8
Uses:  Thickener, stabilizer, water retention agent for pharmaceuticals
Features:  Resists turbidity; resist. to heat, enzyme, and bacterial decomp.; superb water-holding ability
Regulatory:  Kosher
Properties:  Visc. 6000-8000 cps (1%)

Celphere® CP-102  [Asahi Kasei  http://www.asahi-kasei.co.jp]
Chem. Descrip.:  Microcrystalline cellulose
Chem. Analysis:  2.0-6.0% loss on drying
CAS  9004-34-6; EINECS/ELINCS  232-674-9
Uses:  Taste masking agent, sustained release aid in pharmaceutical coating granules
Features:  High mechanical strength; uniform particle size; low reactivity
Regulatory:  USP/NF, EP, JP
Properties:  Spherical seed core; particle size, avg. 106-212 µm; bulk dens. 0.83 g/cm³; 0.0% friability; 100% water absorption

Celphere® CP-203  [Asahi Kasei  http://www.asahi-kasei.co.jp]
Chem. Descrip.:  Microcrystalline cellulose
Trade Name Reference

Celphere® SCP-100 [Asahi Kasei
http://www.asahi-kasei.co.jp]
Chem. Descrip.: Microcrystalline cellulose
Chem. Analysis: 2.0-6.0% loss on drying
CAS 9004-34-6; EINECS/ELINCS 232-674-9
Uses: Taste masking agent, sustained release aid in pharmaceutical coating granules
Features: High mechanical strength; uniform particle size; low reactivity
Regulatory: USP/NF, EP, JP
Properties: Spherical seed core; particle size, avg. 75-212 μm; bulk dens. 0.66 g/cm³; 0.0% friability; 130% water absorption

Celtone [Celanese
http://www.celanesechemicals.com;
http://www.chemvip.com; Celanese GmbH
http://www.celanese.com]
Chem. Descrip.: Acetone (50%), methanol (50%), 2,2-dimethoxypropane (8%), water (1%)
See Dimethoxypropane; Methyl alcohol
CAS 67-64-1; 67-56-1; 77-76-9
UN 1993
Uses: Solv. for pharmaceuticals
Regulatory: OSHA hazardous; SARA §313/312 acute health/chronic health/fire hazard, §313 reportable (methanol); EINECS, Australia, China, Canada, Korea, Philippines, Japan listed
Properties: Colorless cl. mobile liq.; mild acetone odor; completely sol. in water, common org. solvs.; sp.gr. 0.78 (20 C); vapor pressure 140 mm Hg (20 C); f.p. -97 C; b.p. 60 C; flash pt. (CC) 0 C
Toxicology: Prolonged/repeated skin contact can cause death, blindness; may be fatal or cause blindness if swallowed; eye irritant; may cause respiratory tract irritation; harmful if inhaled; may cause CNS depression, nausea, dizziness, headache, stupor, unconsciousness, nasal discharge, coughing, chest pain, breathing difficulty, GI irritation, diarrhea; possible birth defect hazard; overexposure may cause kidney/liver damage; TSCA listed
Environmental: Avoid run-off into storm sewers and ditches leading to waterways
Precaution: Flamm. liq. and vapor; flamm. limits in air 2-36 vol.%; vapor is heavier than air, may flash back; may generate static charge; ground/bond during transfer; closed containers > 49 C may develop

Handbook of Pharmaceutical Additives, Third Edition
excessive vapor pressure; incompat. with caustic soda, lime, other strong alkalis, hydrochloric, sulfuric, and other strong inorg. acids, amines, oxidizing agents, peroxides, nitric acid, perchloric acid, chromic acid, chromium trioxide, copper/alloys, pyridines

Hazardous Decomp. Prods.: Thermal decomp. or combustion: COx

HMIS: Health 2, Flammability 3, Reactivity 0

Storage: Store in cool, dry, well-ventilated area under dry air or dry nitrogen @ 15-38 C, atm. pressure, away from direct sunlight, incompat. materials; keep containers tightly closed when not in use; open containers slowly to allow excess pressure to vent

Centella Phytosome® [Indena SpA
http://www.indena.it]
Chem. Descrip.: Hydrocotyl (Centella asiatica) extract and phospholipids
Uses: Coadjuvant in external treatment of cellulitis, preps. for aging skin, after-sun prods., dentifrices for sensitive gums, prods. for oral cavity
Properties: Ylsh.-brn. amorphous powd.; water-disp.

Centrolex® P [Solae http://www.solae.com]
Chem. Descrip.: Special grade lecithin
CAS 8002-43-5; EINECS/ELINCS 232-307-2
Uses: Emulsifier and suspending agent for pharmaceuticals
Features: Can be easily sterilized and filtered in solvs.; autoclavable in some appls.
Properties: Yel. gran., low flavor; oil-sol., water-disp.; bulk dens. 0.38 g/cc; acid no. 27; 0.7% moisture

Ceolus® KG-802 [Asahi Kasei
http://www.asahi-kasei.co.jp]
Chem. Descrip.: Microcrystalline cellulose
Chem. Analysis: 2.0-6.0% loss on drying
CAS 9004-34-6; EINECS/ELINCS 232-674-9
Uses: Compression aid and dry binder in tableting of pressure-sensitive drugs such as enzymes, antibiotics, and film-coated granules
Regulatory: USP/NF, EP, JP
Properties: Rod-form particles; particle size, avg. 50 µm; bulk dens. 0.21 g/cm³

Ceolus® PH-102 [Asahi Kasei
http://www.asahi-kasei.co.jp]
Chem. Descrip.: Microcrystalline cellulose
Chem. Analysis: 2.0-6.0% loss on drying
CAS 9004-34-6; EINECS/ELINCS 232-674-9
Uses: Compression aid in pharmaceutical tableting
Regulatory: USP/NF, EP, JP
Properties: Powd.; particle size, avg. 50 µm; bulk dens. 0.29 g/cm³

Ceolus® PH-301 [Asahi Kasei
http://www.asahi-kasei.co.jp]
Chem. Descrip.: Microcrystalline cellulose
Chem. Analysis: 2.0-6.0% loss on drying
CAS 9004-34-6; EINECS/ELINCS 232-674-9
Uses: Compression aid in pharmaceutical tableting
Regulatory: USP/NF, EP, JP
Properties: Powd.; particle size, avg. 90 µm; bulk dens. 0.41 g/cm³

Ceolus® PH-302 [Asahi Kasei
http://www.asahi-kasei.co.jp]
Chem. Descrip.: Microcrystalline cellulose
Chem. Analysis: 2.0-6.0% loss on drying
CAS 9004-34-6; EINECS/ELINCS 232-674-9
Uses: Compression aid in pharmaceutical tableting
Regulatory: USP/NF, EP, JP
Properties: Powd.; particle size, avg. 90 µm; bulk dens. 0.43 g/cm³

Ceolus® PH-F20JP [Asahi Kasei
http://www.asahi-kasei.co.jp]
Chem. Descrip.: Microcrystalline cellulose
Chem. Analysis: 2.0-6.0% loss on drying
CAS 9004-34-6; EINECS/ELINCS 232-674-9
Uses: Compression aid in pharmaceutical tableting
Regulatory: USP/NF, EP, JP
Properties: Powd.; particle size, avg. 20 µm; bulk dens. 0.23 g/cm³

Ceolus® RC-A591NF [Asahi Kasei
http://www.asahi-kasei.co.jp]
Chem. Descrip.: Microcrystalline cellulose and sodium carboxymethylcellulose (See Carboxymethylcellulose sodium)
Chem. Analysis: 7.0% max. loss on drying
Trade Name Reference

CAS 9004-34-6; 9004-32-4; EINECS/ELINCS 232-674-9; 265-995-8

Uses: Stabilizer for pharmaceutical syrups and dry-syrup suspensions; granulation aid for dry-syrup granulation

Features: Colloid-grade

Regulatory: USP/NF, EP, JP

Properties: Visc. 39-91 mPa.s; 80% max. assay MCC

Chem. Descrip.: Wheat (triticum vulgare) germ oil and disodium cocoamphodiacetate with Phenonip® preservative (0.5%) See Butylparaben; Ethylparaben; Methylparaben; Phenoxyethanol; Propylparaben

Uses: Active ingred., blood anticoagulant for shaving and aftershave prods. (lotions, balms, creams)

Features: Effective at reducing blood coagulation time when topically applied to cuts; contributes to rapid regeneration of lipid layers damaged by daily use of soaps, wetting agents, antiseptics, etc.

Properties: Ylsh. cl. to sl. opalescent sol'n.; sp.gr. 1.007-1.012 (20 C); pH 6-7

Use Level: 2%

Toxicology: Nonirritating, nonsensitizing to human skin

Storage: Store in clean, dark, cool place in original, sealed containers; avoid sec. contamination once containers are opened

Cera-E [Koster Keunen http://www.kosterkeunen.com]

Chem. Descrip.: Emulsifying wax NF

CAS 97069-99-0

Uses: Emulsifier and thickener for pharmaceuticals, creams, lotions

Properties: Pastilles

Cerabeil White DAB [Baerlocher France; S. Black http://www.sblack.com]

Chem. Descrip.: White beeswax EP See Beeswax, white

CAS 8006-40-4; EINECS/ELINCS 232-383-7

Uses: Emollient, emulsifier, film-former, binder, coating agent in pharmaceuticals

Regulatory: FDA, EP compliance

Properties: Wh. pellets; sol. in chloroform, xylene; sl. sol. in ethyl alcohol; insol. in water; drop pt. 61-65 C; acid no. 17-24; sapon. no. 87-104

Environmental: > 90% biodeg.

Cerabeil White Selection [Baerlocher France; S. Black http://www.sblack.com]

Chem. Descrip.: White beeswax See Beeswax, white

CAS 8006-40-4; EINECS/ELINCS 232-383-7

Uses: Emulsifier, emollient, film-former, and viscosifier in pharmaceuticals, emulsions

Regulatory: FDA, EP compliance

Properties: Wh. pellets; sol. in chloroform, xylene; sl. sol. in ethyl alcohol; insol. in water; drop pt. 61-65 C; acid no. 17-24; sapon. no. 87-104

Environmental: > 90% biodeg.

Cerabeil Yellow Selection [Baerlocher France; S. Black http://www.sblack.com]

Chem. Descrip.: Yellow beeswax See Beeswax, yellow

CAS 8012-89-3; EINECS/ELINCS 232-383-7

Uses: Emulsifier, emollient, film-former, and viscosifier in pharmaceuticals

Features: For use where color is not critical

Regulatory: FDA, EP compliance

Properties: Yel. pellets; sol. in chloroform, xylene; sl. sol. in ethyl alcohol; insol. in water; drop pt. 61-65 C; acid no. 17-22; sapon. no. 87-102

Environmental: < 90% biodeg.

Cerabel BWS [Baerlocher France]

Chem. Descrip.: Syn. beeswax See Beeswax, synthetic

CAS 71243-51-1; EINECS/ELINCS 275-286-5

Uses: Binder, emulsion stabilizer, visc. control agent in pharmaceuticals

Regulatory: FDA compliance

Properties: Wh. pellets; sol. in chloroform, xylene; sl. sol. in ethyl alcohol; insol. in water; drop pt. 75-80 C; acid no. 19-24; sapon. no. 80-85

Environmental: < 90% biodeg.

Cerabel CA [Baerlocher France]

Chem. Descrip.: Syn. beeswax See Beeswax, synthetic

CAS 71243-51-1; EINECS/ELINCS 275-286-5

Uses: Binder, emulsion stabilizer, visc. control agent in pharmaceuticals

Regulatory: FDA compliance

Properties: Wh. pellets; sol. in chloroform, xylene; sl. sol. in ethyl alcohol; insol. in water; drop pt. 63-68 C; acid no. 19-24; sapon. no. 92-103

Environmental: < 90% biodeg.
Cerabel D157 [Baerlocher France]
Chem. Descrip.: Syn. beeswax See Beeswax, synthetic
CAS 71243-51-1; EINECS/ELINCS 275-286-5
Uses: Binder, emulsion stabilizer, visc. control agent in pharmaceuticals
Regulatory: FDA compliance
Properties: Yel. slabs; sol. in chloroform, xylene; sl. sol. in ethyl alcohol; insol. in water; drop pt. 70-75 C; acid no. 20-25; sapon. no. 70-90
Environmental: < 90% biodeg.

Cerabel L109 [Baerlocher France]
Chem. Descrip.: Syn. beeswax See Beeswax, synthetic
CAS 71243-51-1; EINECS/ELINCS 275-286-5
Uses: Binder, emulsion stabilizer, visc. control agent in pharmaceuticals
Regulatory: FDA compliance
Properties: Wh. pellets; sol. in chloroform, xylene; sl. sol. in ethyl alcohol; insol. in water; drop pt. 72-75 C; acid no. 19-24; sapon. no. 92-102
Environmental: < 90% biodeg.

Cerabel L118 [Baerlocher France]
Chem. Descrip.: Syn. beeswax See Beeswax, synthetic
CAS 71243-51-1; EINECS/ELINCS 275-286-5
Uses: Binder, emulsion stabilizer, visc. control agent in pharmaceuticals
Regulatory: FDA compliance
Properties: Wh. pellets; sol. in chloroform, xylene; sl. sol. in ethyl alcohol; insol. in water; drop pt. 56-60 C; acid no. 20-28; sapon. no. 170-190
Environmental: < 90% biodeg.

Cerabel L132 [Baerlocher France]
Chem. Descrip.: Syn. Japan wax See Japan wax, synthetic
Uses: Gelant, thickener, emulsifier for pharmaceuticals
Properties: Wh. pellets; congeal pt. 40-45 C; acid no. 20-30; sapon. no. 200-220; penetration 7-12 dmm

Cerabel R260 [Baerlocher France]
Chem. Descrip.: Syn. beeswax See Beeswax, synthetic
CAS 71243-51-1; EINECS/ELINCS 275-286-5
Uses: Binder, emulsion stabilizer, visc. control agent in pharmaceuticals
Regulatory: FDA compliance
Properties: Yel. pellets; sol. in chloroform, xylene; sl. sol. in ethyl alcohol; insol. in water; drop pt. 60-68 C; acid no. 18-22; sapon. no. 85-103
Environmental: > 90% biodeg.

Cerabel S30 [Baerlocher France]
Chem. Descrip.: Syn. beeswax See Beeswax, synthetic
CAS 71243-51-1; EINECS/ELINCS 275-286-5
Uses: Binder, emulsion stabilizer, visc. control agent in pharmaceuticals
Regulatory: FDA compliance
Properties: Wh. or yel. pellets; sol. in chloroform, xylene; sl. sol. in ethyl alcohol; insol. in water; drop pt. 61-65 C; acid no. 17-22; sapon. no. 87-102
Environmental: > 90% biodeg.

Cerabel S40 [Baerlocher France]
Chem. Descrip.: Syn. beeswax See Beeswax, synthetic
CAS 71243-51-1; EINECS/ELINCS 275-286-5
Uses: Binder, emulsion stabilizer, visc. control agent in pharmaceuticals
Regulatory: FDA compliance
Properties: Wh. or yel. pellets; sol. in chloroform, xylene; sl. sol. in ethyl alcohol; insol. in water; drop pt. 61-65 C; acid no. 17-22; sapon. no. 87-102
Environmental: > 90% biodeg.

Cerabel S60 [Baerlocher France]
Chem. Descrip.: Syn. beeswax See Beeswax, synthetic
CAS 71243-51-1; EINECS/ELINCS 275-286-5
Uses: Binder, emulsion stabilizer, visc. control agent in pharmaceuticals
Regulatory: FDA compliance
Properties: Wh. or yel. pellets; sol. in chloroform, xylene; sl. sol. in ethyl alcohol; insol. in water; drop pt. 61-65 C; acid no. 17-22; sapon. no. 87-102
Environmental: > 90% biodeg.

Cerabel SCA [Baerlocher France]
Chem. Descrip.: Syn. beeswax See Beeswax, synthetic
CAS 71243-51-1; EINECS/ELINCS 275-286-5
Uses: Binder, emulsion stabilizer, visc. control agent in pharmaceuticals
Regulatory: FDA compliance
Properties: Wh. pellets; sol. in chloroform, xylene; sl. sol. in ethyl alcohol; insol. in water; drop pt. 68-73 C; acid no. 20-24; sapon. no. 100-110
Environmental: < 90% biodeg.

Ceraffine 48/50 [Baerlocher France]

Trade Name Reference

nonionic; 100% conc.

**Ceraphyl® 28** [ISP http://www.ispcorp.com; S. Black http://www.sblack.com]

Chem. Descrip.: Cetyl lactate
CAS 35274-05-6; EINECS/ELINCS 252-478-7
Uses: Lubricant and emollient for topical pharmaceuticals
Properties: Wh. solid, faint char. odor; sol. @ 5% in min. oil, peanut oil, IPM, oleyl alcohol, and 95% ethanol; partly sol. in water, propylene glycol; sp.gr. 0.893-0.905; HLB 13-15; acid no. 2 max.; sapon. no. 174-189
Toxicology: LD50 (oral, rat) > 2 ml/kg; nonirritating to eyes and skin

**Ceraphyl® 31** [ISP http://www.ispcorp.com; S. Black http://www.sblack.com]

Chem. Descrip.: Lauryl lactate
CAS 6283-92-7; EINECS/ELINCS 228-504-8
Uses: Emollient, lubricant for topical pharmaceuticals; antitackifier in antiperspirants
Properties: Lt. yel. liq., faint char. odor; sol. in min. oil, peanut oil, 95% ethanol, propylene glycol, and IPM; partly sol. in 70% sorbitol; sp.gr. 0.910-0.922; HLB 10; acid no. 2 max.; sapon. no. 210-225; ref. index 1.4417-1.4456
Toxicology: LD50 (oral, rat) > 2 ml/kg; nonirritating to eyes; mild skin irritant

**Ceraphyl® 41** [ISP http://www.ispcorp.com; S. Black http://www.sblack.com]

Chem. Descrip.: C12-15 alkyl lactate
CAS 93925-36-1; EINECS/ELINCS 300-338-1
Uses: Emollient for topical pharmaceuticals, alcoholic and hydroalcoholic skin preps.; antitackifier in antiperspirants
Features: Nongreasy; reduces tacky, greasy feel in formulations high in petrolatum or min. oil
Properties: Cl. to Lt. yel. liq.; sol. in aerosol propellants, min. oil, 60% ethanol, propylene glycol, IPM, oleyl alcohol, methylene chloride; partly sol. in water, glycerin; sp.gr. 0.900-0.920; HLB 14; acid no. 2 max.; sapon. no. 195-210; ref. index 1.4430-1.4450
Toxicology: LD50 (oral, rat) 21 ± 9.2 ml/kg; moderate eye and skin irritant

**Ceraphyl® 45** [ISP http://www.ispcorp.com; S. Black http://www.sblack.com]

Chem. Descrip.: Diocetyl malate
CAS 56235-92-8; EINECS/ELINCS 260-070-5
Uses: Emollient for topical pharmaceuticals, hypoallergenic prods.; coupling agent for fragrances; solubilizer for oxybenzone and other difficult-to-solubilize materials; antitackifier in antiperspirants, carbomer formulations
Features: Nongreasy skin feel; produces clear emollient gels
Properties: Colorless to pale yel. cl. liq., char. mild odor; sol. @ 5% in cyclomethicone, min. oil, IPM, ethanol, dimethicone, hexylene glycol; disp. in propylene glycol; insolv. in water; m.w. 358.52; sp.gr. 0.960-0.970; HLB 12; acid no. 5 max.; iodine no. 1 max.; sapon. no. 310 min.; ref. index 1.4480-1.4520
Toxicology: LD50 (oral, rat) > 5 g/kg; pract. nonirritating to eyes; not a primary skin irritant; noncomedogenic

**Ceraphyl® 50** [ISP http://www.ispcorp.com; S. Black http://www.sblack.com]

Chem. Descrip.: Myristyl lactate
CAS 1323-03-1; EINECS/ELINCS 215-350-1
Uses: Lubricant, emollient, film-former for topical pharmaceuticals, medicated prods.
Features: Provides soft, silky, water-resist. film on the skin
Properties: Water-wh. to pale yel. liq. to soft solid; sol. in peanut oil, min. oil, ethanol, propylene glycol, IPM, oleyl alcohol; partly sol. in 70% sorbitol; insolv. in water; sp.gr. 0.892-0.904; HLB 12; acid no. 2 max.; sapon. no. 166-181
Toxicology: LD50 (oral, rat) 20 ml/kg; nonirritating to skin

**Ceraphyl® 55** [ISP http://www.ispcorp.com; S. Black http://www.ispcorp.com]

Chem. Descrip.: Tridecyl neopentanoate
CAS 106436-39-9
Uses: Emollient for topical pharmaceutical creams and lotions; gloss aid and spreading agent in pigmented prods.
Features: Imparts nonoily, nonocclusive lubricity and elegant skin feel
Properties: Lt. yel. cl. liq., char. mild odor; sol. @ 5% in corn oil, 95% ethanol, min. oil, IPM, cyclomethicone; insolv. in water; m.w. 284; sp.gr. 0.850-0.860; HLB 10; acid no. 2 max.; sapon. no. 195 min.; ref. index 1.4435-1.4465
Toxicology: LD50 (oral, rat) > 5 g/kg; minimally irritating to eyes; mildly irritating to skin; noncomedogenic

**Ceraphyl® 70** [ISP http://www.ispcorp.com; S. Black http://www.sblack.com]

Chem. Descrip.: Quaternium-70, propylene glycol
Uses: Conditioner for topical cleansing
Trade Name Reference

products, medicated shampoos and scalp applications; emulsifier for topical skin formulations

Features: Patented

Properties: Amber soft gel; water-disp.; sol. in oil; m.p. 27-32 C; alkali no. 5 max.; sapon. no. 45-60; flash pt. 125 C; cationic; 48-58% total solids

Use Level: 0.5-4%

Toxicology: LD50 (oral, rat) > 40 ml/kg; mild eye irritant; very sl. skin irritant

Chem. Descrip.: Decyl oleate
CAS 3687-46-5; EINECS/ELINCS 222-981-6
Uses: Emollient, cosolvent, slip agent, lubricant for topical pharmaceuticals, creams, lotions

Properties: Wh. to straw-colored liq., char. mild odor; sol. @ 5% in peanut oil, 95% ethanol, IPM, oleyl alcohol; insol. in water; sp.gr. 0.858-0.864; acid no. 5 max.; iodine no. 55-65; sapon. no. 130-145; ref. index 1.4540-1.4560; nonionic; 100% act.

Toxicology: LD50 (oral, rat) > 40 ml/kg; sl. eye irritant; very sl. skin irritant; nonsensitizing

Chem. Descrip.: Isodecyl oleate
CAS 59231-34-4; EINECS/ELINCS 261-673-6
Uses: Emollient, cosolvent, and solubilizer for topical pharmaceuticals

Features: Lighter, drier skin feel than Ceraphyl 140

Properties: Wh. to straw-colored liq., char. mild odor; sol. @ 5% in peanut oil, 95% ethanol, IPM, oleyl alcohol; insol. in water; sp.gr. 0.858-0.864; acid no. 5 max.; iodine no. 55-65; sapon. no. 130-145; ref. index 1.4540-1.4560; nonionic; 100% act.

Toxicology: LD50 (oral, rat) > 40 ml/kg; nonirritating to eyes; mild skin irritant; nonsensitizing

Chem. Descrip.: Diisopropyl adipate
CAS 6938-94-9; EINECS/ELINCS 230-072-0
Uses: Emollient for topical pharmaceutical creams and lotions; coupling agent for aq. alcoholic systems; solubilizer for fragrances

Features: Reduces tackiness and lightens feel of other heavy emollients

Regulatory: DSL listed

Properties: Colorless cl. liq. with mild fatty odor; sol. @ 5% in min. oil, 50% ethano1, propylene glycol, IPM, oleyl alcohol, 70% sorbitol; water-insol.; m.w. 230.18; sp.gr. 0.950-0.962; b.p. 507 F; acid no. 2 max.; sapon. no. 465-500; flash pt. 279 F ref. inde

Toxicology: LD50 (oral, rat) > 20 ± 3 ml/kg; nonirritating to eyes and skin; nonsensitizing; not a hazard to eyes and skin under normal use conditions; TSCA listed

Precaution: Avoid contact with strong oxidizers

HMIS: Health 0, Flammability 1, Reactivity 0

Chem. Descrip.: Octyl palmitate
CAS 29806-73-3; EINECS/ELINCS 249-862-1
Uses: Emollient for topical pharmaceuticals, emulsions, aerosol antiperspirants; antitackifier for antiperspirants; solubilizer for benzophenone-3

Features: Nonoily, nonocclusive

Properties: Water-wh. liq.; sol. @ 5% in min. oil, 95% ethanol, IPM, peanut oil, oleyl alcohol; insol. in water; sp.gr. 0.850-0.856; acid no. 3 max.; sapon. no. 146-156; ref. index 1.4445-1.4465

Toxicology: LD50 (oral, rat) > 40 ml/kg; nonirritating to eyes; mild primary skin irritant; nonsensitizing

Chem. Descrip.: Isostearyl neopentanoate
CAS 58958-60-4; EINECS/ELINCS 261-521-9
Uses: Emollient for topical pharmaceuticals; spreading agent in highly pigmented prods.; antitackifier for antiperspirants

Features: Mild

Properties: Pale yel. cl. liq.; sol. @ 5% in IPM, oleyl alcohol, 95% ethanol, peanut and min. oils; insol. in water; sp.gr. 0.850-0.870; acid no. 2 max.; sapon. no. 144-165; ref. index 1.4435-1.4475

Toxicology: LD50 (oral, rat) > 40 ml/kg; nonirritating to eyes and skin

Chem. Descrip.: Myristyl myristate
CAS 3234-85-3; EINECS/ELINCS 221-787-9
Uses: Emollient for topical pharmaceutical...

---

**emulsions, creams, lotions; visc. builder for creams and lotions at low concs.**

**Features:** Imparts rich, velvety skin feel; reduces watery feel of low-oil emulsions; melts at body temp.

**Properties:** Wh. to sl. yel. waxy solid, bland char. odor; sol. @ 5% in peanut oil, 95% ethanol, IPM, oleyl alcohol; insol. in water; m.p. 36-39 C; acid no. 3 max.; sapon. no. 120-130

**Toxicology:** LD50 (oral, rat) 8.6 g/kg; minimally irritating to eyes; mild skin irritant; nonsensitizing

**Ceraphyl® 494**  [ISP](http://www.ispcorp.com)  S. Black  [http://www.sblack.com](http://www.sblack.com)

**Chem. Descrip.:** Isocetyl stearate

**CAS**  25339-09-7  EINECS/ELINCS  246-868-6

**Uses:** Emollient, lubricant for topical pharmaceuticals, creams and lotions, skin care prods.

**Features:** Imparts soft, elegant, nonoily feel

**Properties:** Wh. to lt. yel. liq., bland char. odor; sol. @ 5% in diocyl malate, castor oil, corn oil, IPM; insol. in water; acid no. 43-53; iodine no. 107 max.; hyd. no. 132-148; hyd. no. 15 max.; ref. index 1.456-1.465

**Toxicology:** LD50 (oral, rabbit) > 5 g/kg; minimally irritating to eyes; nonirritating to skin

**Ceraphyl® 791**  [ISP](http://www.ispcorp.com)  S. Black  [http://www.sblack.com](http://www.sblack.com)

**Chem. Descrip.:** Isocetyl stearoyl stearate

**CAS**  97338-28-8  EINECS/ELINCS  306-621-6

**Uses:** Pigment dispersant, emollient, lubricant, spreading agent for topical pharmaceuticals

**Properties:** Lt. to straw-colored liq., char. mild odor; sol. @ 5% in diocyl malate, castor oil, corn oil, IPM; insol. in water; acid no. 43-53; iodine no. 107 max.; sapon. no. 220-250; ref. index 1.4750-1.4850; 100% act.

**Toxicology:** LD50 (oral, rat) > 20 g/kg; nonirritating to skin; nonmutagenic (Ames assay); TSCA listed

**Precaution:** Wear safety glasses, gloves; incompat. with strong oxidizers

**Hazardous Decomp. Prods.:** CO, CO2

**NFPA:** Health 1, Flammability 1, Reactivity 0

**Storage:** Keep in cool, dry place in tightly closed container out of direct sunlight

**Ceraphyl® GA-D**  [ISP](http://www.ispcorp.com)  S. Black  [http://www.sblack.com](http://www.sblack.com)

**Chem. Descrip.:** Maleated soybean oil, deodorized, 0.1% mixed tocopherols (antioxidant)  See Tocopherol

**Uses:** Moisturizer and skin softener for creams, lotions, topical pharmaceuticals

**Features:** Patented; imparts a rich, nongreasy, nontacky, full-bodied, long-lasting feel to the skin

**Properties:** Amber-yel. visc. oily liq., mild char. odor; sol. @ 5% in diocyl malate, castor oil, corn oil, IPM; insol. in water; acid no. 43-53; iodine no. 107 max.; sapon. no. 220-250; ref. index 1.4750-1.4850; 100% act.

**Toxicology:** LD50 (oral, rat) > 5 g/kg; nonirritating to eyes; mildly irritating to skin; nonsensitizing, noncomedogenic

**Ceraphyl® ICA**  [ISP](http://www.ispcorp.com)  S. Black  [http://www.sblack.com](http://www.sblack.com)

**Chem. Descrip.:** Isocetyl alcohol

**CAS**  36311-34-9  EINECS/ELINCS  252-964-9

**Uses:** Emollient for topical pharmaceuticals, creams, lotions; carrier and extender for flavors and fragrances

**Features:** Nongreasy; ideal for oil-free preps. and high-pH apps.

**Properties:** Colorless cl. liq., low odor; sol. @ 5% in peanut and min. oils, 95% ethanol, IPM, oleyl alcohol, castor oil, cyclomethicone; insol. in water; m.w. 242; sp.gr. 0.830-0.840; HLB 12-14; acid no. 5 max.; iodine no. 10 max.; sapon. no. 10 max.; hyd. no. 195-230

**Toxicology:** LD50 (oral, rat) > 5 g/kg; mild eye
Trade Name Reference

and skin irritant; noncomedogenic

Chem. Descrip.: Diethylaminoethyl stearate
CAS 3179-81-5; EINECS/ELINCS 221-662-9
Uses: O/w emulsifier, dispersant, wetting agent in topical pharmaceuticals
Properties: Straw to amber liq. to semisolid, amine odor; sol. @ 5% in peanut oil, ethanol, IPM, oleyl alcohol; partly sol. in min. oil; gels in glycerin, 70% sorbitol; sp.gr. 0.860-0.880; acid no. 30-40; alkali no. 127-137; sapon. no. 150-160; pH 9.5-10.5 (3%); cationic; 100% conc.
Features: Hydrophilic; broad compatibility
Regulatory: DOT not regulated; Canada DSL; Australia AICS; Japan ENCS; Germany WGK
Properties: Waxy, wh. to off-wh. solid; sol. @ 5% in ethanol; partly sol. in propylene glycol; forms liq. disp. in glycerin, solid disp. in peanut oil, IPM; insol. in water; m.w. 1165.55; m.p. 39.5-42.5 C; acid no. 0.25 max.; iodine no. 0.5 max.; sapon. no. 40-50; nonionic; 100% conc.
Toxicology: LD50 (oral) > 52 g/kg (50% corn oil); TSCA listed
Precaution: Wear safety glasses, gloves; incompat. with strong oxidizers
Hazardous Decomp. Prods.: CO, CO2
Storage: Store in cool, dry place in tightly closed container out of direct sunlight

Chem. Descrip.: PEG-20 stearate
CAS 9004-99-3
Uses: Emulsifier, visc. builder, stabilizer for topical pharmaceutical o/w creams, lotions, medicated ointments
Features: Hydrophilic; broad compatibility
Regulatory: DOT not regulated; Canada DSL; Australia AICS; Japan ENCS; Germany WGK
Properties: Waxy, wh. to cream flakes; partly sol. @ 5% in peanut oil; sol. @ 5% in propylene glycol; partly sol. @ 5% in peanut oil; gels in peanut oil, 70% sorbitol; sp.gr. 0.860-0.880; acid no. 30-40; alkali no. 127-137; sapon. no. 150-160; pH 9.5-10.5 (3%); cationic; 100% conc.
Features: Hydrophilic; broad compatibility
Regulatory: DOT not regulated; Canada DSL; Australia AICS; Japan ENCS; Germany WGK
Properties: Waxy, wh. to cream flakes; partly sol. @ 5% in peanut oil; sol. @ 5% in propylene glycol; partly sol. @ 5% in peanut oil; gels in peanut oil, 70% sorbitol; sp.gr. 0.860-0.880; acid no. 30-40; alkali no. 127-137; sapon. no. 150-160; pH 9.5-10.5 (3%); cationic; 100% conc.
Toxicology: LD50 (oral) > 52 g/kg (50% corn oil); TSCA listed
Precaution: Wear safety glasses, gloves; incompat. with strong oxidizers
Hazardous Decomp. Prods.: CO, CO2
Storage: Store in cool, dry place in tightly closed container out of direct sunlight

Chem. Descrip.: Glyceryl stearate
CAS 123-94-4
Uses: Sec. o/w emulsifier for topical pharmaceuticals, creams, lotions; visc. builder for emulsions
Regulatory: DOT not regulated; Europe EINECS; Canada DSL; Australia AICS; Japan ENCS; Germany WGK
Properties: Wh. to cream flakes; forms visc. disp. in peanut oil, min. oil, IPM; m.w. 359.56; m.p. 76-82 C; b.p. 687 F; acid no. 10-20; iodine no. 0.5 max.; sapon. no. 97-107; flash pt. 522 F; nonionic; 100% conc.
Toxicology: Nonirritating; nonphotoallergic; nonphototoxic; nonphotoallergic; TSCA listed
Precaution: Wear safety glasses, gloves; incompat. with strong oxidizers
Hazardous Decomp. Prods.: CO, CO2
Storage: Store in cool, dry place in tightly closed container out of direct sunlight

Chem. Descrip.: Glycol stearate and other ingreds.
Uses: O/w emulsifier for topical...
Trade Name Reference

CAS 86418-55-5

**Uses:** O/w emulsifier in pharmaceutical creams and lotions; visc. builder for emulsions containing high percentage of water in aq. phase

**Regulatory:** DOT not regulated; Europe EINECS; Canada DSL; Australia AICS; Japan ENCS

**Properties:** Wh. to cream flakes; forms liq. disp. in water; insol. in min. oil, ethanol, glycerin, propylene glycol, IPM; m.p. 57-60 C; m.w. 328.54; acid no. 5 max.; iodine no. 0.5 max.; sapon. no. 181-191; flash pt. 475 F; anionic; 100% conc.

**Toxicology:** Mildly irritating to rabbit skin; TSCA listed

**Precaution:** Wear safety glasses, gloves; incompat. with strong oxidizers

**Hazardous Decomp. Prods.:** CO, CO2

**Storage:** Store in cool, dry place in tightly closed area
Trade Name Reference

containers out of direct sunlight

Chem. Descrip.: Glyceryl stearate, stearyl alcohol, and sodium lauryl sulfate
CAS 31566-31-1; 112-92-5; 151-21-3
Uses: Emulsifier for topical pharmaceutical o/w creams, lotions, ointments, antiperspirants
Features: Acid-stable; electrolyte tolerance and low pH stability
Regulatory: DSL, ENCS, AICS. listed
Properties: Wh. to cream flakes; mild odor; forms liq. disp. @ 5% in IPM, solid disp. in water, peanut and min. oils, oleyl alcohol, 70% sorbitol; insol. in ethanol, glycerin, propylene glycol; m.p. 55-57 C; acid no. 5 max.; iodine no. 0.5 max.; sapon. no. 140-1; flash pt. 451 F; anionic; 100% conc.
Toxicology: TSCA listed
Precaution: Avoid strong oxidizers
HMIS: Health 1, Flammability 1, Reactivity 0
Storage: Keep containers tightly closed when not in use; store in a cool, dry place, out of sunlight

Ceresine C [Baerlocher France]
Chem. Descrip.: Ceresine wax See Ceresin
CAS 8001-75-0; EINECS/ELINCS 232-290-1
Uses: Antistat, binder, emulsion stabilizer, opacifier, visc. control agent for pharmaceuticals
Regulatory: FDA compliance; ADI 20 mg/kg
Properties: Wh. pellets; sol. in chloroform, xylene; sl. sol. in ethyl alcohol; insol. in water; drop pt. 77-80 C; solid. pt. 69-72 C; penetration 9-13 dmm
Environmental: > 90% biodeg.

Ceresine K [Baerlocher France]
Chem. Descrip.: Ceresine wax See Ceresin
CAS 8001-75-0; EINECS/ELINCS 232-290-1
Uses: Antistat, binder, emulsion stabilizer, opacifier, visc. control agent for pharmaceuticals
Regulatory: FDA compliance
Properties: Wh. pellets; sol. in chloroform, xylene; sl. sol. in ethyl alcohol; insol. in water; drop pt. 80-85 C; solid. pt. 65-70 C; penetration 7-12 dmm
Environmental: > 90% biodeg.

Ceresine Wax SP 248 [Strahl & Pitsch http://www.strahlpitsch.com]
Chem. Descrip.: Ceresine wax See Ceresin
CAS 8001-75-0; EINECS/ELINCS 232-290-1
Uses: Wax for pharmaceuticals, salves/ointments
Regulatory: FDA 21CFR §175.105, CTFA listed
Properties: Wh. slabs or pastilles; m.p. 129-135 F
Toxicology: TSCA listed

Ceresine Wax SP 254 [Strahl & Pitsch http://www.strahlpitsch.com]
Chem. Descrip.: Ceresine wax See Ceresin
CAS 8001-75-0; EINECS/ELINCS 232-290-1
Uses: Wax for pharmaceuticals, salves/ointments
Regulatory: FDA 21CFR §175.105, CTFA listed
Properties: Wh. slabs or pastilles; m.p. 141-147 F
Toxicology: TSCA listed

Ceresine Wax SP 252 [Strahl & Pitsch http://www.strahlpitsch.com]
Chem. Descrip.: Ceresine wax See Ceresin
CAS 8001-75-0; EINECS/ELINCS 232-290-1
Uses: Wax for pharmaceuticals, salves/ointments
Regulatory: FDA 21CFR §175.105, CTFA listed
Properties: Wh. slabs or pastilles; m.p. 137-143 F
Toxicology: TSCA listed

Ceresine Wax SP 272 [Strahl & Pitsch http://www.strahlpitsch.com]
Chem. Descrip.: Ceresine wax See Ceresin
CAS 8001-75-0; EINECS/ELINCS 232-290-1
Uses: Wax for pharmaceuticals, salves/ointments
Regulatory: FDA 21CFR §175.105, CTFA listed
Properties: Wh. slabs or pastilles; m.p. 130-136 F
Toxicology: TSCA listed

Ceresine Wax SP 301 [Strahl & Pitsch http://www.strahlpitsch.com]
Chem. Descrip.: Ceresine wax See Ceresin
CAS 8001-75-0; EINECS/ELINCS 232-290-1
Uses: Wax for pharmaceuticals, salves/ointments
Regulatory: FDA 21CFR §175.105, CTFA listed
Properties: Wh. slabs or pastilles; m.p. 130-136 F
Toxicology: TSCA listed
Trade Name Reference

Chem. Descrip.: Decyl olate
CAS 3687-46-5; EINECS/ELINCS 222-981-6
Uses: Solubilizer, vehicle for medicines; excipient for injectable substances; emollient in antiperspirants
Features: Changes skin feel, rub out props. and greasiness; veg. oil substitute; vaseline substitute
Properties: Ylsh. liq.; typical odor; insol. in water; dens. 0.86 g/ml; cloud pt. 0 C; flash pt. 220 C
Toxicology: Nontoxic through ing. inh. or skin contact
Environmental: Keep out of sewers, drains, surface and underground water and the ground
Precaution: Wear goggles and gloves
Hazardous Ingredients: K
Hazardous Decomp. Prods.: None
Storage: Store in original container, @ R.T. closed and protected from damp and heat sources.

Cerewax 2T [Baerlocher France; S. Black http://www.sblack.com]
Chem. Descrip.: Microcrystalline wax
CAS 63231-60-7; EINECS/ELINCS 264-038-1
Uses: Binder, emulsion stabilizer, opacifier, visc. control agent in pharmaceuticals
Regulatory: FDA compliance; ADI 20 mg/kg
Properties: Wh. fine cryst.; sol. in chloroform, xylene; sl. sol. in ethyl alcohol; insol. in water; solid. pt. 70-75 C; penetration 20-30 dmm
Environmental: > 90% biodeg.

Cerewax 4T [Baerlocher France; S. Black http://www.sblack.com]
Chem. Descrip.: Microcrystalline wax
CAS 63231-60-7; EINECS/ELINCS 264-038-1
Uses: Binder, emulsion stabilizer, opacifier, visc. control agent in pharmaceuticals
Regulatory: FDA compliance
Properties: Wh. fine cryst.; sol. in chloroform, xylene; sl. sol. in ethyl alcohol; insol. in water; solid. pt. 70-75 C; penetration 40-60 dmm
Environmental: > 90% biodeg.

Cerewax 105 [Baerlocher France; S. Black http://www.sblack.com]
Chem. Descrip.: Microcrystalline wax
CAS 63231-60-7; EINECS/ELINCS 264-038-1
Uses: Binder, emulsion stabilizer, opacifier, visc. control agent in pharmaceuticals
Regulatory: FDA compliance
Properties: Wh. fine cryst.; sol. in chloroform, xylene; sl. sol. in ethyl alcohol; insol. in water; solid. pt. 70-75 C; penetration 40-60 dmm
Environmental: > 90% biodeg.
Trade Name Reference

Cerewax A75 [Baerlocher France; S. Black
http://www.sblack.com]
Chem. Descrip.: Microcrystalline wax
CAS 63231-60-7; EINECS/ELINCS 264-038-1
Uses: Binder, emulsion stabilizer, opacifier,
visc. control agent in pharmaceuticals
Regulatory: FDA compliance; ADI 20 mg/kg
Properties: Wh. fine cryst.; sol. in chloroform,
xylene; sl. sol. in ethyl alcohol; insol. in water;
drop pt. 115-120 C; solid. pt. 105-115 C;
penetration 0-2 dmm
Environmental: > 90% biodeg.

Cerewax M85/C [Baerlocher France; S. Black
http://www.sblack.com]
Chem. Descrip.: Microcrystalline wax
CAS 63231-60-7; EINECS/ELINCS 264-038-1
Uses: Binder, emulsion stabilizer, opacifier,
visc. control agent in pharmaceuticals
Regulatory: FDA compliance; ADI 20 mg/kg
Properties: Wh. fine cryst.; sol. in chloroform,
xylene; sl. sol. in ethyl alcohol; insol. in water;
drop pt. 82-87 C; solid. pt. 80-85 C;
penetration 3-8 dmm
Environmental: > 90% biodeg.

Cerewax AS15 [Baerlocher France; S. Black
http://www.sblack.com]
Chem. Descrip.: Microcrystalline wax
CAS 63231-60-7; EINECS/ELINCS 264-038-1
Uses: Binder, emulsion stabilizer, opacifier,
visc. control agent in pharmaceuticals
Regulatory: FDA compliance; ADI 20 mg/kg
Properties: Wh. fine cryst.; sol. in chloroform,
xylene; sl. sol. in ethyl alcohol; insol. in water;
drop pt. 72-76 C; solid. pt. 68-70 C;
penetration 12-15 dmm
Environmental: > 90% biodeg.

Cerewax FT/B [Baerlocher France; S. Black
http://www.sblack.com]
Chem. Descrip.: Microcrystalline wax
CAS 63231-60-7; EINECS/ELINCS 264-038-1
Uses: Binder, emulsion stabilizer, opacifier,
visc. control agent in pharmaceuticals
Regulatory: ADI 20 mg/kg
pt. 90-95 C; penetration 0-3 dmm

Cerewax L [Baerlocher France; S. Black
http://www.sblack.com]
Chem. Descrip.: Microcrystalline wax
CAS 63231-60-7; EINECS/ELINCS 264-038-1
Uses: Binder, emulsion stabilizer, opacifier,
visc. control agent in pharmaceuticals
Regulatory: FDA compliance; ADI 20 mg/kg
Properties: Wh. fine cryst.; sol. in chloroform,
xylene; sl. sol. in ethyl alcohol; insol. in water;
drop pt. 80-85 C; solid. pt. 66-74 C;
penetration 20-40 dmm
Environmental: > 90% biodeg.

Cerewax LKT [Baerlocher France; S. Black
http://www.sblack.com]
Chem. Descrip.: Microcrystalline wax
CAS 63231-60-7; EINECS/ELINCS 264-038-1
Uses: Binder, emulsion stabilizer, opacifier,
visc. control agent in pharmaceuticals
Regulatory: FDA compliance; ADI 20 mg/kg
Properties: Wh. fine cryst.; sol. in chloroform,
xylene; sl. sol. in ethyl alcohol; insol. in water;
drop pt. 90-95 C; solid. pt. 82-86 C;
penetration 5-9 dmm

Cerewax N°1 [Baerlocher France; S. Black
http://www.sblack.com]
Chem. Descrip.: Microcrystalline wax
CAS 63231-60-7; EINECS/ELINCS 264-038-1
Uses: Binder, emulsion stabilizer, opacifier,
visc. control agent in pharmaceuticals
Regulatory: FDA compliance; ADI 20 mg/kg
Properties: Wh. fine cryst.; sol. in chloroform,
xylene; sl. sol. in ethyl alcohol; insol. in water;
drop pt. 68-73 C; solid. pt. 60-65 C;
penetration 20-25 dmm
Environmental: > 90% biodeg.

Cerewax N°2 [Baerlocher France; S. Black
http://www.sblack.com]
Chem. Descrip.: Microcrystalline wax
CAS 63231-60-7; EINECS/ELINCS 264-038-1
Uses: Binder, emulsion stabilizer, opacifier,
visc. control agent in pharmaceuticals
Regulatory: FDA compliance; ADI 20 mg/kg
Properties: Wh. fine cryst.; sol. in chloroform,
xylene; sl. sol. in ethyl alcohol; insol. in water;
drop pt. 80-85 C; solid. pt. 68-72 C;
penetration 18-22 dmm

Cerewax N°3 [Baerlocher France; S. Black
http://www.sblack.com]
Chem. Descrip.: Microcrystalline wax
CAS 63231-60-7; EINECS/ELINCS 264-038-1
Uses: Binder, emulsion stabilizer, opacifier,
visc. control agent in pharmaceuticals
Regulatory: FDA compliance; ADI 20 mg/kg
Properties: Wh. fine cryst.; sol. in chloroform,
xylene; sl. sol. in ethyl alcohol; insol. in water;
drop pt. 88-94 C; solid. pt. 80-85 C;
penetration 6-10 dmm

Environmental: > 90% biodeg.
Trade Name Reference

Environmental: > 90% biodeg.

Cerewax S90 [Baerlocher France; S. Black http://www.sblack.com]
Chem. Descrip.: Microcrystalline wax
CAS 63231-60-7; EINECS/ELINCS 264-038-1
Uses: Binder, emulsion stabilizer, opacifier, visc. control agent in pharmaceuticals
Regulatory: FDA compliance; ADI 20 mg/kg
Properties: Wh. fine cryst.; sol. in chloroform, xylene; sl. sol. in ethyl alcohol; insol. in water; drop pt. 90-95 C; solid. pt. 80-85 C; penetration 3-5 dmm
Environmental: > 90% biodeg.

Cerewax T300 [Baerlocher France; S. Black http://www.sblack.com]
Chem. Descrip.: Microcrystalline wax
CAS 63231-60-7; EINECS/ELINCS 264-038-1
Uses: Binder, emulsion stabilizer, opacifier, visc. control agent in pharmaceuticals
Properties: Fine cryst.; solid. pt. 80-85 C; penetration 8-13 dmm
Environmental: > 90% biodeg.

Chem. Descrip.: Ozokerite
CAS 8021-55-4; EINECS/ELINCS 265-134-6
Uses: Binder, emulsion stabilizer, opacifier, 
visc. control agent in pharmaceuticals

Regulatory: FDA compliance
Properties: Wh. pellets; sol. in chloroform, 
xylene; sl. sol. in ethyl alcohol; insol. in water; 
drop pt. (Mettler) 77-80 C; solid. pt. 70-75 C; 
penetration 7-11 dmm
Environmental: > 90% biodeg.

Cerozo F110 [Baerlocher France; S. Black http://www.sblack.com]
Chem. Descrip.: Ozokerite
CAS 8021-55-4; EINECS/ELINCS 265-134-6
Uses: Binder, emulsion stabilizer, opacifier, 
visc. control agent in pharmaceuticals

Properties: Drop pt. (Mettler) 64-68 C; solid. pt. 
62-67 C; penetration 10-12 dmm

Cerozo F308 [Baerlocher France; S. Black http://www.sblack.com]
Chem. Descrip.: Ozokerite
CAS 8021-55-4; EINECS/ELINCS 265-134-6
Uses: Binder, emulsion stabilizer, opacifier, 
visc. control agent in pharmaceuticals

Properties: Wh. pellets; sol. in chloroform, 
xylene; sl. sol. in ethyl alcohol; insol. in water; 
drop pt. (Mettler) 89-92 C; solid. pt. 73-80 C; 
penetration 7-10 dmm
Environmental: > 90% biodeg.

Cerozo AN [Baerlocher France; S. Black http://www.sblack.com]
Chem. Descrip.: Ozokerite
CAS 8021-55-4; EINECS/ELINCS 265-134-6
Uses: Binder, emulsion stabilizer, opacifier, 
visc. control agent in pharmaceuticals

Properties: Wh. pellets; sol. in chloroform, 
xylene; sl. sol. in ethyl alcohol; insol. in water; 
drop pt. (Mettler) 63-66 C; solid. pt. 57-61 C; 
penetration 10-14 dmm
Environmental: > 90% biodeg.
Trade Name Reference

Certified® Pharmaceutical Glaze [Mantrose Bradshaw Zinsser
http://www.mbzgroup.com]
Chem. Descrip.: Pure lac resin in specially denatured alcohol See Alcohol; Shellac
Uses: Barrier, gloss aid, adhesion promoter for pharmaceutical glazes, enteric coatings
Regulatory: USP/NF compliance; kosher

CertiSeal® FC 300 [Mantrose-Haueuser http://www.mbzgroup.com]
Uses: Film coating for pharmaceuticals
Features: Used by itself or mixed with conventional HPMC film coat sol'ns.; faster film build; improved gloss; reduction of coating cost; non-VOC

Uses: Film coating for pharmaceuticals
Features: Used by itself or mixed with conventional HPMC film coat sol'ns.; faster film build; improved gloss; reduction of coating cost; non-VOC

Cetina [Robeco http://www.robecoinc.com]
Chem. Descrip.: Cetyl esters and stearamide DEA
Uses: Emulsifying wax, lubricant, emollient providing satiny feel for dermatologicals
Properties: Lt. colored flake, bland odor and taste; m.p. 43-50 C; acid no. 0-5; alkali no. 28 max.; sapon. no. 85-100; pH 8.5-10.0 (1%); nonionic; 100% conc.

Cetiol® 868 [Cognis/Care Chems.; Cognis Canada; Cognis GmbH/Care Chems.
http://www.cognis.com]
Chem. Descrip.: Octyl stearate
Uses: Emollient for pharmaceutical skin care preps.; superfatting oil for o/w and w/o emulsions
Properties: Pale yel. cl. oily liq.; m.w. 390; sp.gr. 0.855-0.865; visc. 14-16 mPa*s; acid no. 0.5 max.; iodine no. 2; sapon. no. 140-150; cloud pt. < 8 C; ref. index 1.447-1.450; 100% act.
Storage: 1 yr. storage life in sealed original containers at temps. below 30 C in dry environment

Cetiol® A [Cognis/Care Chems.; Cognis Canada; Cognis GmbH/Care Chems.
http://www.cognis.com]
Chem. Descrip.: Hexyl laurate
Uses: Pharmaceutical glaze for seed coating, core sealing, finish gloss, and ink base applics., esp. for automatic panning equip.
Features: Accelerated drying chars.
Trade Name Reference

**Cetiol® B**  [Cognis GmbH/Care Chems.  
http://www.cognis.com]
Chem. Descrip.:  Dibutyl adipate
CAS 105-99-7; EINECS/ELINCS 203-350-4
Uses: Emollient, oily component for skin oils, sun protection oils, pharmaceuticals, liq. emulsions; penetrant on skin; solvent for lipid-sol. substances

Properties:  Colorless oily liq., faint intrinsic odor; sp.gr. 0.958-0.962; visc. 5-7 mPa*s; solid. pt. < -30 C; acid no. 0.5 max.; iodine no. 1 max.; sapon. no. 420-440; hyd. no. 1 max.; cloud pt. < -25 C; flash pt. 150 C min.; ref. index 1.434-1.437; 100% act.

Storage:  1 yr. min. storage if in sealed original containers at temps. below 40 C, protected from moisture

**Cetiol® S**  [Cognis/Care Chems.; Cognis Canada; Cognis GmbH/Care Chems.
http://www.cognis.com]
Chem. Descrip.:  Myristyl myristate
CAS 3234-85-3; EINECS/ELINCS 221-787-9
Uses: Emollient, superfatting agent for pharmaceutical skin care prods.

Features:  Melts near body temp.

Properties:  Wh. to lt. yelsh. waxy solid, faint char. odor; misc. with oils and waxes; m.p. 38-42 C; acid no. 1 max.; iodine no. 1 max.; sapon. no. 120-135; hyd. no. 7 max.

Storage:  1 yr. min. storage if stored in sealed original containers, protected from moisture

**Cetiol® LC**  [Cognis/Care Chems.; Cognis Canada; Cognis GmbH/Care Chems.  
http://www.cognis.com]
Uses: Penetrant, emollient, superfatting agent in pharmaceutical oils, creams, liq. emulsions, skin oils; reduces oiliness in creams, lotions, and solid sticks; carrier for oil-sol. actives

Features:  Very dry feeling

Properties:  Sl. yel. cl. oily liq., pract. odorless; sol. @ 10% in min. and castor oil, IPM, oleyl alcohol, silicone fluid; insol. in water; sp.gr. 0.855-0.860; visc. 9-12 mPa*s; solid. pt. < 13 C; HLB 9; acid no. 0.5 max.; iodine no. 1 max.; sapon. no. 30-45; hyd. no. 1 max.; cloud pt. 15 C max.; flash pt. > 180 C; ref. index 1.443-1.447

Storage:  1 yr. min. storage if in sealed containers at temps. below 30 C, protected from moisture

**Cetiol® LC**  [Cognis/Care Chems.; Cognis Canada; Cognis GmbH/Care Chems.  
http://www.cognis.com]
Chem. Descrip.:  Dibutyl adipate
CAS 105-99-7; EINECS/ELINCS 203-350-4
Uses: Emollient, oily component for skin oils, sun protection oils, pharmaceuticals, liq. emulsions; penetrant on skin; solvent for lipid-sol. substances

Properties:  Colorless cl. oily liq., odorless; sol. @ 10% in min. and castor oil, IPM, oleyl alcohol, ethyl alcohol-SD 40 (95%), silicone fluid; sp.gr. 0.857-0.861; visc. 6 mPa*s; solid. pt. < 0 C; HLB 12; acid no. 0.2 max.; iodine no. 1; sapon. no. 190-205; hyd. no. 2 max.; cloud pt. < 5 C; flash pt. > 165 C; ref. index 1.438-1.441; 100% act.

Storage:  1 yr. storage life in sealed containers below 30 C, protected against moisture

**Cetiol® S**  [Cognis/Care Chems.; Cognis Canada; Cognis GmbH/Care Chems.
http://www.cognis.com]
Chem. Descrip.:  Myristyl myristate
CAS 3234-85-3; EINECS/ELINCS 221-787-9
Uses: Emollient, superfatting agent for pharmaceutical skin care prods.

Features:  Melts near body temp.

Properties:  Wh. to lt. yelsh. waxy solid, faint char. odor; misc. with oils and waxes; m.p. 38-42 C; acid no. 1 max.; iodine no. 1 max.; sapon. no. 120-135; hyd. no. 7 max.

Storage:  1 yr. min. storage if stored in sealed original containers, protected from moisture

**Cetiol® OE**  [Cognis/Care Chems.; Cognis GmbH/Care Chems.  
http://www.cognis.com]
Chem. Descrip.:  Dioctyl ether
CAS 629-82-3; EINECS/ELINCS 211-112-6
Uses: Emollient, spreading agent for Lt. pharmaceutical o/w and w/o emulsions

Features:  Dry feel; resist. to hydrolysis

Properties:  Cl. liq.; sp.gr. 0.80; visc. 4 mPa*s; acid no. 0.5 max.; sapon. no. 0.1 max.; hyd. no. 0.5 max.; ref. index 1.430

Storage:  1 yr. min. storage stability in sealed original containers in dry place at temps. below 40 C

**Cetiol® S**  [Cognis/Care Chems.; Cognis Canada; Cognis GmbH/Care Chems.
http://www.cognis.com]
Trade Name Reference

Canada; Cognis GmbH/Care Chems. http://www.cognis.com

Chem. Descrip.: Dioctylcyclohexane See Dioctyl cyclohexane

EINECS/ELINCS 283-854-9

Uses: Emollient, superfatting agent in pharmaceutical creams and emulsions

Properties: Colorless cl. liq., faint odor; sp.gr. 0.825-0.835; visc. 25 mPa•s; acid no. 0.2 max.; iodine no. 0.5 max.; sapon. no. 0.5 max.; cloud pt. 0 C max.; ref. index 1.455-1.465; 100% act.

Storage: 1 yr. min. storage life stored in sealed containers at temps. below 30 C, protected from humidity

Cetiol® SN [Cognis/Care Chems.; Cognis Canada; Cognis GmbH/Care Chems. http://www.cognis.com]

Chem. Descrip.: Cetearyl isononanoate

CAS 84878-33-1; EINECS/ELINCS 284-424-3

Uses: Emollient, oily component for pharmaceuticals, skin care, sun protection preps.

Features: Hydrophobic

Properties: Colorless to sl. yel. low visc. oily liq., faint intrinsic odor; sp.gr. 0.853-0.856; visc. 19-22 mPa•s; acid no. 0.2 max.; iodine no. 1 max.; sapon. no. 140-146; hyd. no. 1 max.; cloud pt. 15 C max.; ref. index 1.445-1.450

Storage: Protect from frost; 1 yr. min. storage life in closed containers at temps. below 30 C

Cetiol® V [Cognis/Care Chems.; Cognis Canada; Cognis GmbH/Care Chems. http://www.cognis.com]

Chem. Descrip.: Decyl oleate with antioxidant (mixed tocopherols)

CAS 3687-46-5; EINECS/ELINCS 222-981-6

Uses: Penetrating emollient, carrier for lipid sol. substances in pharmaceutical topicals

Regulatory: Austrian Pharmacopoeia

Properties: Yel. low visc. cl. oily liq.; sol. @ 10%; sol. in min. and castor oil, IPM, oleyl alcohol; insol. in water; m.w. 415; dens. 0.86-0.87 g/cm³; visc. 15-20 mPa•s (20 C); HLB 9; acid no. 1 max.; iodine no. 55-65; sapon. no. 130-140; solid. pt. < 0 C; cloud pt. < 5 C; ref. index 1.4555-1.4575 (20 C)

Storage: 1 yr. min. storage stability in sealed original containers at temps. below 30 C in dry environment

Cetomacrogol 1000 BP [Croda Inc http://www.croda.com; http://www.crodausa.com; Croda Chem.

Europe Ltd http://www.croda.co.uk]

Chem. Descrip.: Ceteareth-20 NF, BP

CAS 68439-49-6

Uses: O/w emulsifier, solubilizer for topical pharmaceuticals, creams and lotions, depilatories, antiperspirants

Regulatory: BP compliance

Properties: Wh. to off-wh. solid; sol. in water, IPA, propylene glycol; insol. in min. oil; m.w. 1000; HLB 15.7; nonionic; 100% conc.

Use Level: 0.5-5%

Toxicology: LD50 (oral, rat) 3.6 g/kg; moderate skin irritant, severe eye irritant

Chem. Descrip.: Cocamidopropylhydroxy sulfate See Cocamidopropyl hydroxysultaine

CAS 68139-30-0; EINECS/ELINCS 268-761-3

Uses: Anti-irritant for other surfactants

Properties: Pale yel. liq.; sol. in soft and hard water, brine and conc. electrolyte sol'ns.; amphoteric; 50% conc.

Chem. Descrip.: Cocamidopropyl betaine

CAS 61789-40-0; EINECS/ELINCS 263-058-8

Uses: Surfactant, foaming agent, and visc. builder for medicated shampoos and conditioners

Features: High purity, low color

Properties: Water-wh. liq.; amphoteric; 35% conc.

Chem. Descrip.: Oleth-2

Chem. Analysis: Moisture 1.0% max.; ash 0.4% max.

CAS 9004-98-2

Uses: Solubilizer, emulsifier, dispersant, stabilizer, cosolvent for creams/lotions, fluid and gelled transparent emulsions, aerosols, pharmaceuticals

Features: Lipophilic

Properties: Pale straw-colored cl. liq.; Gardner color 2 max.; bland odor; sol. in min. oil, isopropyl esters, anhyd. ethanol; HLB 5.0; acid no. 0.2 max.; sapon. no. 2 max.; iodine value...
Trade Name Reference

Chemonic® OE-10 [Noveon
http://www.carbopol.com;
http://www.noveoncoatings.com]
Chem. Descrip.: Oleth-10
CAS 9004-98-2
Uses: Emulsifier, stabilizer, solubilizer for pharmaceuticals
Features: Broad electrolyte and pH tolerance
Properties: Wh. semisolid; bland odor; sol. in ethanol, water, hydroalcohols, glycols; HLB 12; cloud pt. 47-55 C; acid no. 0.5 max.; sapon. no. 2 max.; pH 4.5-7.0 (10% aq.); nonionic; 100% conc.

Chemonic® OE-20 [Noveon
http://www.carbopol.com;
http://www.noveoncoatings.com]
Chem. Descrip.: Oleth-20
CAS 9004-98-2
Uses: Emulsifier, stabilizer, solubilizer for pharmaceuticals
Properties: Wh. waxy solid; bland odor; sol. in ethanol, water, hydroalcoholics, glycols; HLB 15; cloud pt. 87-93 C; acid no. 0.5 max.; sapon. no. 2 max.; pH 4.5-7.0 (10% aq.); nonionic; 100% conc.

Chimyl Alcohol 100 [Nikko Chems. Co. Ltd
http://www.nikkol.co.jp/index.html]
Chem. Descrip.: Chimyl alcohol
CAS 506-03-6; EINECS/ELINCS 208-026-6
Uses: Emulsifier, hydrotrope, emollient, emulsion thickener for pharmaceuticals
Features: Oily ingred.
Regulatory: JSCI listed
Properties: Wh. powd.; m.p. 60-70 C; nonionic; 100% conc.

ChiroCLEC™-CR [Merck KGaA
http://www.merck.de]
Chem. Descrip.: Cross-linked enzyme crystals of Candida rugosa lipase
CAS 9001-62-1; EINECS/ELINCS 232-619-9
Uses: Stable catalyst for synthesis of optically pure drugs and peptides; stereoselective catalyst for the resolution of racemic esters, acids, and alcohols; also for regioselective and chemoselective acylations and deacylations
Properties: Dry powd. or slurry; insol. in water and org. solvs.

Cholesterol HP [Solvay Pharmaceuticals BV
http://www.solvayvitamins.nl/]
Chem. Descrip.: Cholesterol
Properties: CAS 57-88-5; EINECS/ELINCS 200-353-2
Uses: Component of liposomes for pharmaceuticals; carrier for medicines and diagnostic substances
Properties: Wh. cryst. powd.

Chroma-Seal™ [DMV Int’l. Pharma
http://www.dmv-international.com]
Chem. Descrip.: Solvent-based ethylcellulose seal coating solution
Uses: Seal coating system for pharmaceutical tablets
Features: Fast drying; applicable by std. or automated fluidized coating equip.; seals moisture-sensitive tablets prior to aq. film coating; provides protective coating and increased shelf life

Cire Lanol® CTO [Seppic
http://www.seppic.com]
Chem. Descrip.: Ceteareth-33 and cetearyl alcohol
Uses: Self-emulsifying base for pharmaceuticals, permitting prep. of all emulsions, esp. fluid emulsions contg. oily phases
Features: Useful for formulations contg. cationics, strong electrolytes, and under variable pH conditions
Regulatory: Complies with BP Cetomacrogol emulsifying wax
Properties: Wh. waxy flakes, pract. odorless; disp. in water; m.p. 50-53 C; acid no. 1 max.; hyd. no. 173-187; cloud pt. 60 C; pH 6.5-7.8 (10% aq.); nonionic; 100% act.

Citation™ 70 [Avatar
http://www.avatarcorp.com]
Chem. Descrip.: Wh. mineral oil NF
CAS 8020-83-5; EINECS/ELINCS 232-455-8
Uses: Release agent, emollient, lubricant, conditioner in pharmaceutical preps. and veterinary ointments
Regulatory: NF, FCC, FDA 21CFR §172.878, 178.3620, 573.680; kosher, USDA H-1 and/or 3H certified; SARA §302, 311/312, 313 nonreportable; CERCLA nonreportable
Properties: Colorless oily liq.; odorless; tasteless; negligibly sol. in water; sol. in hydrocarbons; sp.gr. 0.835-0.854; visc. 165-755 SUS (100 F); vapor pressure < 1.0 mm Hg; pour pt. 20 F; flash pt. 280 F
Toxicology: ACGIH TLV -TWA 5 mg/m³ (oil mist), OSHA PEL 5 mg/m³ (oil mist); nontoxic
Precaution: Avoid excessive heat and open...

Use Level: 1-20%

Cithrol GMS A/S [Croda Chem. Europe Ltd http://www.croda.co.uk]

Chem. Descrip.: Glyceryl stearate and PEG-100 stearate See Glyceryl stearate SE

Uses: Emulsifier, coemulsifier, stabilizer, wetting agent, lubricant for pharmaceuticals; base for creams and ointments

Properties: Wh. waxy solid; HLB 10.9; m.p. 52 C; sapon. no. 96; nonionic; 100% conc.

Cithrol GMS N/E [Croda Chem. Europe Ltd http://www.croda.co.uk]

Chem. Descrip.: Glyceryl stearate

CAS 31566-31-1

Uses: Emulsifier, coemulsifier, stabilizer, wetting agent, lubricant for pharmaceuticals

Properties: Off-wh. solid; HLB 3.4; nonionic; 100% conc.

Cithrol GMS S/E [Croda Chem. Europe Ltd http://www.croda.co.uk]

Chem. Descrip.: Glyceryl stearate SE

CAS 31566-31-1

Uses: Emulsifier, coemulsifier, stabilizer, wetting agent, lubricant for pharmaceuticals

Properties: Solid; HLB 4.4; anionic; 100% conc.

Cithrol PGML S/E [Croda Chem. Europe Ltd http://www.croda.co.uk]

Chem. Descrip.: Propylene glycol laurate SE

Uses: Emulsifier, coemulsifier, stabilizer, wetting agent, lubricant for pharmaceuticals

Properties: Liq.; HLB 3.6; anionic; 100% conc.

Cithrol PGMO S/E [Croda Chem. Europe Ltd http://www.croda.co.uk]

Chem. Descrip.: Propylene glycol oleate SE

Uses: Emulsifier, coemulsifier, stabilizer, wetting agent, lubricant for pharmaceuticals

Properties: Liq.; HLB 3.9; anionic; 100% conc.

Chem. Descrip.: Citric acid anhydrous

CAS 77-92-9; EINECS/ELINCS 201-069-1

Uses: Effervescent in liq. pharmaceutical prods. and microbial stabilizer in creams, lotions, and ointments

Properties: Colorless to wh. cryst. powd.; odorless; acetic taste; sl. deliquescent in moist air; sol. in water (1g/0.5 ml)

Citric Acid FCC Granular [Tate & Lyle N. Am. http://www.tlna.com]

Chem. Descrip.: Citric acid anhydrous

CAS 77-92-9; EINECS/ELINCS 201-069-1

Uses: Effervescent in liq. pharmaceutical prods. and microbial stabilizer in creams, lotions, and ointments

Properties: Colorless to wh. cryst. powd.; odorless; acetic taste; sl. deliquescent in moist air; sol. in water (1g/0.5 ml)

Chem. Descrip.: Citric acid anhydrous

CAS 77-92-9; EINECS/ELINCS 201-069-1

Uses: Effervescent in liq. pharmaceutical prods. and microbial stabilizer in creams, lotions, and ointments

Properties: Colorless to wh. cryst. powd.; odorless; acetic taste; sl. deliquescent in moist air; sol. in water (1g/0.5 ml)

Citric Acid, USP FCC Anhydrous Granular [DSM Nutritional Prods. USA http://www.nutraaccess.com]

Chem. Descrip.: Citric acid USP, FCC, EP

CAS 77-92-9; EINECS/ELINCS 201-069-1

Uses: Acidulant, flavor enhancer in solid/liq. pharmaceuticals and effervescent tablets; trace metal scavenger to protect labile substances

Regulatory: GRAS, USP, FCC

Storage: Store in dry place; avoid excessive exposure to heat and humidity

Citrocoat® [Jungbunzlauer Int'l. AG http://www.jungbunzlauer.com]

Chem. Descrip.: Encapsulated citric acid

CAS 77-92-9; EINECS/ELINCS 201-069-1

Uses: Flavor enhancer in pharmaceutical film-coated tablets, emulsions, and suspensions

Features: Protects against moisture, microorganisms, oxygen, temp., chemical reactions

Regulatory: EP compliance

Properties: Gran.
Trade Name Reference

**Citrofol® AHII** [Jungbunzlauer
http://www.jungbunzlauer.com; Jungbunzlauer Int'l. AG
http://www.jungbunzlauer.com]
Chem. Descr.: Acetyltri-2-ethylhexyl citrate
See Acetyl trioctyl citrate
CAS 144-15-0; EINECS/ELINCS 205-617-0
Uses: Plasticizer for pharmaceutical tablet coatings
Features: Gives exc. flexibility to resins @ low temps.; excellent compatibility with PVC,
Properties: Color <50 APHA; insol. in water; sp. gr. 0.980-0.990; visc. 90.1 mPa*s; b.p. 437 C;
ref. index 1.440 - 1.460; sapon. no. 389 -393 mg KOH/g; pour point -55 C

**Citrofol® AI** [Jungbunzlauer
http://www.jungbunzlauer.com; Jungbunzlauer Int'l. AG
http://www.jungbunzlauer.com]
Chem. Descr.: Triethyl citrate FCC, USP/NF, EP
CAS 77-93-0; EINECS/ELINCS 201-070-7
Uses: Plasticizer in pharmaceuticals (film coated tablets)
Features: Stable to light; sweet, plum-like flavor
Regulatory: FDA 21CFR §184.1911 GRAS; USP approved; E 1505; DOT nonregulated;
CERCLA nonhazardous; SARA nonhazardous
Properties: Colorless/translucent sl. oily liq., free of suspended matter; sl. odor; sol. 6.5 g/100 ml in water; m.w. 276.3; sp.gr. 1.137; visc. 35.2 mPa*s; vapor pressure 1.33 hPa (107 C); b.p. 294 C; sapon. no. 609.20; pour pt. -45.5 C; flash pt. 188 C; ref. index 1.440; 99% min. assay
Toxicology: LD50 (oral, rat) > 3200 mg/kg, (skin, rabbit) > 5000 mg/kg; LC50 (inh., rat, 6 h) 1300 mg/kg; may cause eye and skin irritation; TSCA listed
Environmental: Readily biodeg.
Precaution: Incompat. with strong bases and oxidizing agents
Hazardous Decomp. Prods.: Thermal decomp. may lead to release of irritating gases and vapors
HMIS: Health 1, Flammability 1, Reactivity 0
Storage: Unlimited storage when stored @ R.T. in tightly closed original container in cool, dry place

**Citrofol® AII** [Jungbunzlauer
http://www.jungbunzlauer.com]
Chem. Descr.: Acetyltributyl citrate USP/NF
See Acetyl triethyl citrate
CAS 77-89-4; EINECS/ELINCS 201-066-5
Uses: Plasticizer, carrier, solvent, fixing agent in pharmaceuticals (film coated tablets)
Features: High b.p.; low volatility
Properties: Cl. liq.; odorless; sol. 0.7 g/100 ml in water; dens. 1.037; sp.gr. 1.137; visc. 32 mPa*s; b.p. 164 C (1 mm); pour pt. -63.5 C; flash pt. 204 C; ref. index 1.445; 99% min. assay
Toxicology: LD50 (oral, rat) 5900 mg/kg; nontoxic; may cause skin and eye irritation
Environmental: Readily biodeg.
Precaution: Incompat. with strong bases and oxidizing agents
Hazardous Decomp. Prods.: Thermal decomp. may lead to release of irritating gases and vapors
HMIS: Health 1, Flammability 1, Reactivity 0
Storage: Store @ R.T. in tightly closed original container in dry, cool place

**Citrofol® BI** [Jungbunzlauer
http://www.jungbunzlauer.com]
Chem. Descr.: Tributyl citrate USP/NF
CAS 77-94-1; EINECS/ELINCS 201-071-2
Uses: Plasticizer in pharmaceuticals (film coated tablets)
Properties: Liq.; insol. in water; dens. 1.140; visc. 32 mPa*s; b.p. 164 C (1 mm); pour pt. -63.5 C; flash pt. 185 C; ref. index 1.441
Toxicology: LD50 (oral, rat) 26,300 mg/kg; toxicologically harmless; may cause skin and eye irritation
Environmental: Readily biodeg.
Precaution: Incompat. with strong bases and oxidizing agents
Hazardous Decomp. Prods.: Thermal decomp. may lead to release of irritating gases and vapors
HMIS: Health 1, Flammability 1, Reactivity 0
Storage: Store @ R.T. in tightly closed original container in dry, cool place

**Citrofol® BII** [Jungbunzlauer
http://www.jungbunzlauer.com]
Chem. Descr.: Acetyltributyl citrate USP/NF
See Acetyl tributyl citrate
CAS 77-90-7; EINECS/ELINCS 201-067-0
Uses: Plasticizer for medical, pharmaceuticals (dental forming masses, prostheses, film coating tablets); syn. flavoring agent
Properties: Colorless/translucent sl. oily liq., free of suspended matter; sl. odor; sol. 6.5 g/100 ml in water; m.w. 402.5; sp.gr. 1.045; visc. 33 mPa*s; vapor pressure 1.33 hPa (173 C); b.p. 327 C; sapon. no. 550-558; pour point -59 C; flash pt. 204 C; ref. index 1.445; 99% min. assay
Toxicology: LD50 (oral, rat) 26,300 mg/kg; may cause eye and skin irritation with susceptible persons; TSCA listed
Trade Name Reference

Environmental: Readily biodeg.
Precaution: Incompat. with strong bases and oxidizing agents
Hazardous Decomp. Prods.: Thermal decomp. can lead to release of irritating gases and vapors
HMIS: Health 1, Flammability 1, Reactivity 0
Storage: Unlimited storage when stored @ R.T. in tightly closed original container in cool, dry place

Citronellol 96 FCC [Millennium/F&F http://www.aromachem.com]
Chem. Descrip.: Citronellol See β-Citronellol
CAS 106-22-9; EINECS/ELINCS 203-375-0
Uses: Fragrance, flavor in pharmaceuticals
Regulatory: FDA 21CFR §172.515; DOT: Chemicals n.o.i.
Properties: APHA 20 max. liq.; clean rose floral note; sol. 1 in 2 in 70% alcohol v/v; sp.gr. 0.850-0.860; b.p. 426 F; flash pt. (TCC) 214 F; ref. index 1.454-1.462 (20 C); 94-96% act.
Toxicology: LD50 (oral, rat) 3450 mg/kg, (skin, rabbit) 2650 mg/kg; undiluted liq. may cause skin/eye irritation

Chem. Descrip.: Citronellol See β-Citronellol
CAS 106-22-9; EINECS/ELINCS 203-375-0
Uses: Fragrance, flavor in pharmaceuticals
Regulatory: FDA 21CFR §172.515; DOT: Chemicals n.o.i.
Properties: APHA 20 max. liq.; clean rose floral note; sol. 1 in 2 in 70% alcohol v/v; sp.gr. 0.850-0.860; b.p. 426 F; flash pt. (TCC) 214 F; ref. index 1.454-1.462 (20 C); 94-96% act.
Toxicology: LD50 (oral, rat) 3450 mg/kg, (skin, rabbit) 2650 mg/kg; undiluted liq. may cause skin/eye irritation

Clarity [ABITEC http://www.abiteccorp.com]
Chem. Descrip.: Fractionated partially hydrogenated soybean oil
CAS 8016-70-4; EINECS/ELINCS 232-410-2
Uses: Diluent, lubricant, moisturizer for pharmaceuticals, clinical nutrition, coating, delivery/absorp. enhancement, dermatologicals, nutritional/sports supplements, soft gelatin capsul; moisturizer, lubricant for sun care preps.
Properties: Lovibond 1.5R liq.; m.p. < 70 F; acid no. 0.1 max.; iodine no. 120 max.

Clay BC 347 [MPSI http://www.mp-solutionsinc.com]
Chem. Descrip.: Colloidal kaolin USP
Chem. Analysis: SiO2 (44-46%); Al2O3 (39-41%); CaO (0.30%); Fe2O3 (0.70%)
CAS 1332-58-7; EINECS/ELINCS 296-473-8
Uses: Internal absorbent, diluent, filler, opacifier in pharmaceuticals; suspending agent, opacifier in pharmaceutical creams/lotions; topical and GI absorbent and poultice component in veterinary applics.
Regulatory: DOT nonhazardous; SARA §311/312 reportable, §304/313 nonreportable
Properties: Wh. to buff powd.; odorless; insol. in water; sp.gr. 2.60; dens. 45-52 lb/ft³ (tapped), 18-24 lb/ft³ (loose); dry brightness 86-90; nonflamm.; pH 7-8; 1% max. moisture
Toxicology: ACGIH TLV 10 mg/m³ total dust, 5 mg/m³ respirable dust; long-term overexposure to high concs. of dust may produce x-ray evidence of dust in lungs and may affect respiratory function; TSCA listed
Environmental: No harmful effects known other than those associated with suspended inert solids in water
Precaution: Slippery when wet
Hazardous Ingredients: Inhalable silica not expected to be present in dust at levels exceeding 1%; cryst. silica
Hazardous Decomp. Prods.: None
HMIS: Health 0, Flammability 0, Reactivity 0
Storage: Store in dry area at ambient temps.

Clay BC 638 [MPSI http://www.mp-solutionsinc.com]
Chem. Descrip.: Kaolin USP
Chem. Analysis: SiO2 (44-46%); Al2O3 (38-40%); CaO (0.01-0.04%); MgO (0.20-0.30%); Fe2O3 (0.20-0.40%); TiO2 (1.20-1.60%)
CAS 1332-58-7; EINECS/ELINCS 296-473-8
Uses: Internal absorbent, diluent, filler, opacifier in pharmaceuticals; suspending agent, opacifier in pharmaceutical creams/lotions; topical and GI absorbent and poultice component in veterinary applics.
Regulatory: DOT nonhazardous; SARA §311/312 reportable, §304/313 nonreportable
Properties: Wh. to buff fine powd.; 4 µ median particle size; 99.7% through 325 mesh, 100% through 200 mesh; odorless; insol. in water; sp.gr. 2.60; dens. 53-56 lb/ft³ (tapped), 21-25 lb/ft³ (loose); oil absorp. 24-30; dry brightness
Clearsweet® 99 Refined Liquid Dextrose
[Cargill Foods
http://www.cargillfoods.com]
Chem. Descrip.: Dextrose (99%) See Glucose
Chem. Analysis: Moisture 28.5-29.5%; sulfated ash 0.05% max.; sulfur dioxide 2 ppm max.
CAS 50-99-7; EINECS/ELINCS 200-075-1
Uses: Sweetener, carbohydrate source in fermentation for pharmaceuticals
Regulatory: GRAS 21 CFR §184.1865
Properties: Sp.gr. 1.2821 (20 C); dens. 10.67 lb/gal (20 C); ref. index 1.4395; pH 4.0 (1:1); 71% total solids; 29% moisture
Storage: Store @ R.T.

Cloisonné® [Engelhard]
Chem. Descrip.: Mica pigments coated with titanium dioxide and/or iron oxide with carmine, iron blue, etc. See Ferric oxide
Uses: Highly lustrous pigments with deep colors produced by combination of light interference and light absorption; for analgesic body
### Trade Name Reference

- **lotions, sunscreens, toothpaste**
  - **Properties:** Fine powds.

**Cloronine** [United-Guardian [http://www.u-g.com]]

- **Uses:** Antiseptic, germicide, sanitizer for disinfecting medical/surgical instruments and equip., esp. where autoclaves are not avail.
- **Features:** Esp. rec. where autoclaves are not avail.
- **Properties:** Wh. powd.; rapidly sol. in water

**Clorpactin WCS-90** [United-Guardian [http://www.u-g.com]]

- **Chem. Descrip.:** Oxychlorosene
- **Uses:** Topical bactericide, fungicide, and virucide for treating localized infections; debriding agent for wounds; deodorizer for necrotizing conditions (diabetic gangrene); irrigation of sinus tracts; cleansing and antisepsis of bed-sores; treatment of mastitis in dairy cows
- **Features:** Broad-spectrum
- **Regulatory:** DOT nonregulated
- **Properties:** Wh. to cream powd.; chlorine odor; disp. in water; dens. 1.21 g/cc (tapped); vapor pressure negligible; pH 6.4-6.8 (0.25%); 6-8% avail. Cl
- **Toxicology:** TLV 0.5 ppm (TWA), 1 ppm (STEL); may cause eye/skin irritation; may cause respiratory tract/mucous membrane irritation on inh.
- **Precaution:** Reactive oxidizer; explosive when heated with org. matter, reducing agents, ammonia, etc.; incompat. with org. matter, acids, amines, ammonia, metals; avoid high temps. and humidity
- **Hazardous Decomp. Prods.:** Cl₂, HOCl, HCl; emits toxic and irritating Cl₂ on heating above 175 C
- **Storage:** Store under refrigeration (3-8 C)

**C*Maltidex L 16303** [Cerestar [http://www.cerestar.com]]

- **Chem. Descrip.:** Maltitol syrup
- **CAS 585-88-6; EINECS/ELINCS 209-567-0**
- **Uses:** Plasticizer in gelatin capsules; in medicated confectionery; emollient and humectant in pharmaceutical creams and lotions
- **Features:** High sweetness; low viscosity; low maltitol content
- **Regulatory:** USP/NF, EP
- **Properties:** Cl. colorless syrup; 55% act.

**C*Maltidex M 16311** [Cerestar [http://www.cerestar.com]]

- **Chem. Descrip.:** Maltitol syrup
- **CAS 585-88-6; EINECS/ELINCS 209-567-0**
- **Uses:** Plasticizer in gelatin capsules; in medicated confectionery; emollient and humectant in pharmaceutical creams and lotions
- **Features:** High sweetness; low viscosity; high maltitol content
- **Regulatory:** USP/NF, EP
- **Properties:** Cl. colorless syrup; 75% act.

**C*Maltidex CH 16385** [Cerestar [http://www.cerestar.com]]

- **Chem. Descrip.:** Maltitol syrup
- **CAS 585-88-6; EINECS/ELINCS 209-567-0**
- **Uses:** Plasticizer in gelatin capsules; in medicated confectionery; emollient and humectant in pharmaceutical creams and lotions
- **Features:** High sweetness; nonhygroscopic; suitable for diabetics
- **Regulatory:** USP/NF, EP
- **Properties:** Crystalline wh. powd.; 55% act.

**C*Maltidex M 16311** [Cerestar [http://www.cerestar.com]]

- **Chem. Descrip.:** Maltitol syrup
- **CAS 585-88-6; EINECS/ELINCS 209-567-0**
- **Uses:** Plasticizer in gelatin capsules; in medicated confectionery; emollient and humectant in pharmaceutical creams and lotions
- **Features:** High sweetness; low viscosity; high maltitol content
- **Regulatory:** USP/NF, EP
- **Properties:** Cl. colorless syrup; 75% act.

**CMC Daicel** [Daicel USA]

- **Chem. Descrip.:** Sodium carboxymethyl cellulose See Carboxymethylcellulose sodium
- **CAS 9004-32-4; EINECS/ELINCS 265-995-8**
- **Uses:** Thickener, binder, stabilizer, excipient, protective colloid, suspending agent for pharmaceutical ointments
- **Regulatory:** USP, EP, JP

**CMP-I®** [Am. Casein [http://www.americancasein.com]]

- **Chem. Descrip.:** Milk protein
- **CAS 9000-71-9; EINECS/ELINCS 232-555-1**
- **Uses:** Binder, emulsifier, whitener for medical formulations
- **Features:** Fat sparing props.; low in sodium; low pH tolerant; natural ingred., consumer-friendly labeling
- **Regulatory:** Kosher
- **Properties:** Lt. cream-colored fine powd.; clean,
milk-like flavor; sol. in water; pH 6.8-7.3; 5.5% moisture

Toxicology: Nontoxic; nonsensitizing; nonirritant

Storage: Store in cool, dry place

Chem. Descrip.: High maltose brown rice syrup
Uses: Sweetener for cough drops
Regulatory: Kosher certified
Properties: Dens. 11.8 lb/gal (100 F); visc. 125 poise (100 F); DE 42; pH 6.0-6.6 (5%)

Chem. Descrip.: Clarified high maltose brown rice syrup solids
Uses: Sweetener for cough drops
Features: Patented syrup with further filtration to produce a clear syrup with low flavor profile
Regulatory: Kosher certified
Properties: Off-wh. spray-dried powd., -100 mesh, bland taste or lt. beige drum-dried powd., -30 mesh, caramel flavor; DE 42; pH 6.0-6.6 (5%)

Chem. Descrip.: High maltose brown rice syrup solids
Uses: Sweetener for cough drops
Regulatory: Kosher certified
Properties: Lt. beige drum-dried powd., -30 mesh, caramel flavor or off-wh. spray-dried powd., -100 mesh, bland taste; DE 42; pH 6.0-6.6 (5%)

Chem. Descrip.: Cocamidopropyl phosphatidyl PG-dimonium chloride See Cocamidopropyl PG-dimonium chloride phosphate
Uses: Anti-irritant, antimicrobial for skin, eyes, baby care prods., personal care, and health care prods.
Features: Mild
Properties: Yel. cl. liq.; sp.gr. 1.02 (25 C); pH 6.5 (10%); 47% solids
Toxicology: Sl. skin irritant; mild eye irritant

Chem. Descrip.: Disodium ricinoleamido MEA sulfoxuccinate See Disodium ricinoleamido MEA-sulfoxuccinate
Uses: Anti-irritant for anionics
Features: Mild; compat. with lauryl sulfates, lauryl ether sulfates, alpha olefin sulfonates, amides, and betaines; imparts a smooth feel to skin after drying; provides detergency to tablets, monovitamin and multivitamin tablets, dry preps.)
Trade Name Reference
formulations without irritation

Properties: Amber cl. liq.; pH 5.5-7.5 (10% aq.); 39% min. solids

Chem. Descrip.: Disodium lauroamphodiacetate
CAS 14350-97-1; EINECS/ELINCS 238-306-3
Uses: Anti-irritant for personal care, skin cleansers, shampoos, bath care
Features: Mild
Properties: Cl. visc liq.; pH 9.0 (10%); 31% act.; 38% solids

Chem. Descrip.: Cold pressed grapefruit oil
See Grapefruit (Citrus grandis) oil
CAS 8016-20-4
Uses: Nat. flavor for pharmaceuticals
Properties: Cl. to pale yel. oil; sweet grapefruit aroma; sol. in benzyl benzoate and min. oil; sl. sol. in PG; insol. in water and glycerine; sp.gr. 0.848-0.858; vapor pressure 2 mm Hg (20 C); b.p. 349 F; flash pt. (CC) 48 C; ref. index 1.4750-1.4780; 98% volatile
Toxicology: Mod. irritant to skin, eyes, nose, and throat; sl. allergen; mod. ing. and sl. inh. hazard
Precaution: Combustible; keep away from heat, sparks, open flame; incompat. with strong oxidizing agents
Hazardous Ingredients: None
HMIS: Health 1, Flammability 2, Reactivity 0
Storage: Store @ < 21 C in well-ventilated, covered area; once opened, head space should be purged with inert gas and tightly resealed

Chem. Descrip.: Hydrolyzed rice peptides with preservative Phenonip® (0.5%) See Ethylparaben; Methylparaben; Phenoxyethanol; Phenoxyethanol; Propylparaben
CAS 94350-05-7
Uses: Collagenase inhibitor, UV absorber, moisturizer, anti-aging agent, protectant for skin care
Properties: Yel. cl. sol’n.; sp.gr. 1.050-1.100 (20 C); ref. index 1.368-1.371 (25 C); pH 5.5-6.5
Storage: 2 yr. shelf life when stored in the original sealed containers protected from light in a clean and cool place at temps. between 4-8 C; in order to avoid secondary microbial contamination after opening, containers should be handled with special care

Colloidal Kaolin BC 825 [MPSI http://www.mp-solutionsinc.com]
Chem. Descrip.: Kaolin USP (95%), bentonite (5%)
Chem. Analysis: SiO₂ (43-47%); Al₂O₃ (36-40%); CaO (0.04-0.08%); MgO (0.20-0.40%); Fe₂O₃ (0.20-0.40%); TiO₂ (1.20-2.20%)
Uses: Internal absorbent, diluent, filler, opacifier in pharmaceuticals; suspending agent, opacifier in pharmaceutical creams/lotions; topical and GI absorbent and poultice component in veterinary applics.
Features: Medicinal grade
Regulatory: USP
Properties: Wh. to buff fine powd.; 99.8% through 325 mesh, 100% through 200 mesh; odorless; insol. in water; sp.gr. 2.58; dens. 32-38 lb/ft³ (tapped), 12-18 lb/ft³ (loose); oil absorp. 49-53; dry brightness 88-92; nonflamm.; pH 6.5-8.5; 1% max. moisture; 0% volatiles
Toxicology: ACGIH TLV 10 mg/m³ (total nuisance dust), 5 mg/m³ (respirable nuisance dust); may cause delayed respiratory disease if dust is inhaled over prolonged period
Precaution: Very slippery when wet
Hazardous Ingredients: Cryst. silica
Hazardous Decomp. Prods.: None
HMIS: Health 0, Flammability 0, Reactivity 0

Colloidal Kaolin BC 2457 [MPSI http://www.mp-solutionsinc.com]
Chem. Descrip.: Colloidal kaolin USP
Chem. Analysis: SiO₂ (44-46%); Al₂O₃ (37-40%); CaO (0.03-0.06%); MgO (0.20-0.40%); Fe₂O₃ (0.20-0.40%); TiO₂ (1.50-2.00%)
CAS 1332-58-7; EINECS/ELINCS 296-473-8
Uses: Internal absorbent, diluent, filler, opacifier in pharmaceuticals; suspending agent, opacifier in pharmaceutical creams/lotions; topical and GI absorbent and poultice component in veterinary applics.
Regulatory: DOT nonhazardous; SARA §311/312 reportable, §304/313 nonreportable
Properties: Wh. to buff powd.; 0.60 µ median particle size; 99.8% through 325 mesh; 100%
Trade Name Reference

through 200 mesh; odorless; insol. in water; sp.gr. 2.60; dens. 33-39 lb/ft³ (tapped), 12-16 lb/ft³ (loose); oil absorp. 36-40; dry brightness 88-91; nonflamm.; pH 6.7-7.7; 1% max. moisture; 0% volatiles

Toxicology: ACGIH TLV 10 mg/m³ total dust, 5 mg/m³ respirable dust; long-term overexposure to high concs. of dust may produce x-ray evidence of dust in lungs and may affect respiratory function; TSCA listed

Environmental: No harmful effects known other than those associated with suspended inert solids in water

Precaution: Slippery when wet

Hazardous Ingredients: Inhalable silica not expected to be present in dust at levels exceeding 1%; cryst. silica

Hazardous Decomp. Prods.: None

HMIS: Health 0, Flammability 0, Reactivity 0

Storage: Store in dry area at ambient temps.

Colloidal Kaolin BC 2749 [MPSI http://www.mp-solutionsinc.com]

Chem. Descrip.: Colloidal kaolin USP

Chem. Analysis: SiO₂ (44-46%); Al₂O₃ (38-41%); CaO (0.02-0.05%); MgO (0.20-0.40%); Fe₂O₃ (0.20-0.40%); TiO₂ (1.30-1.80%)

CAS 1332-58-7: EINECS/ELINCS 296-473-8

Uses: Internal absorbent, diluent, filler, opacifier in pharmaceuticals; suspending agent, opacifier in pharmaceutical creams/lotion; topical and GI absorbent and poultice component in veterinary applics.

Regulatory: USP, DOT nonhazardous; SARA §311/312 reportable, §304/313 nonreportable

Properties: Wh. to buff powd.; 1.00 µ median particle size; 99.9% through 200 mesh; odorless; insol. in water; sp.gr. 2.60; dens. 33-39 lb/ft³ (tapped), 12-17 lb/ft³ (loose); oil absorp. 38-42; dry brightness 87-91; nonflamm.; pH 6.7-7.7; 1% max. moisture

Toxicology: ACGIH TLV 10 mg/m³ total dust, 5 mg/m³ respirable dust; long-term overexposure to high concs. of dust may produce x-ray evidence of dust in lungs and may affect respiratory function; TSCA listed

Environmental: No harmful effects known other than those associated with suspended inert solids in water

Precaution: Slippery when wet

Hazardous Ingredients: Inhalable silica not expected to be present in dust at levels exceeding 1%; cryst. silica

Hazardous Decomp. Prods.: None

HMIS: Health 0, Flammability 0, Reactivity 0

Storage: Store in dry area at ambient temps.

Chem. Descrip.: Ammonium laureth sulfate

CAS 32612-48-9

Uses: Foaming agent, solubilizer, wetting agent for antiseptic creams, contraceptive foams, diaper rash preventives

Features: Low cloud pt.

Properties: Mild, pleasant odor; visc. thixotropic at R.T.; cloud pt. 0 C; pH 6.7 (10%); 27% act.; 1% NH₄Cl

Storage: Good storage stability, but not rec. to store for more than 1 yr.

Chem. Descrip.: Ammonium laureth sulfate

CAS 32612-48-9
Trade Name Reference

Uses: Foaming agent, solubilizer, wetting agent for antiseptic creams, contraceptive foams, diaper rash preventives
Features: Low cloud pt.
Properties: Mild, pleasant odor; visc. 300 cps; cloud pt. -5 C; pH 6.7 (10%); 27% act.; 0.5% NH₄Cl
Storage: Good storage stability, but not rec. to store for more than 1 yr.

Chem. Descrip.: Mineral oil, lanolin alcohols See Lanolin alcohol
Uses: Primary o/w emulsifier, sec. o/w emulsion stabilizer, penetrant, emollient, moisturizer, humectant for topical pharmaceuticals, creams/lotions, lip care, and ointments
Properties: Yel. hazy liq.; odorless; sp.gr. 0.84-0.86; acid no. 1.0 max.; iodine no. 12 max.; sapon. no. 2.0 max.; hyd. no. 15 max.; nonionic; 0.2% max. moisture

Chem. Descrip.: Glyceryl monolaurate See Glycerin laurate
CAS 142-18-7; EINECS/ELINCS 205-526-6
Uses: Emollient, antimicrobial, emulsifier for pharmaceuticals, wound healing ointments, skin care, psoriasis treatment; penetrant for actives such as lidocaine, capsaicin into skin; emulsion stabilizer; anticaries agent, plaque inhibitor in toothpaste and mouth rinses
Features: Strong emulsifier; stable to oxidation; strong self-preservation activity
Regulatory: FDA 21CFR §121.2520(c)(5), 177.1200
Properties: Wh. flake or wh. powder; low odor; disp. in water; dissolves in oil; m.p. 59-60 C; iodine no. 1 max.; sapon. no. 200-210; 90% min. monoester
Use Level: 0.1-5.0%
Toxicology: Virtually no skin irritation
Storage: 36 mo shelf life when kept in cool and dry area; avoid severe heating for prolonged periods

Chem. Descrip.: Glyceryl laurate
CAS 142-18-7; EINECS/ELINCS 205-526-6
Uses: For pharmaceutical products
Features: Stability to oxidation; low odor; pure wh. color; potent emulsification; antimicrobial activity
Properties: Disp. in water
Use Level: 0.1-5.0%
Toxicology: Virtually no skin irritation

Compactrol® [JRS Pharma http://www.jrspharma.com]
Chem. Descrip.: Calcium sulfate dihydrate NF, FCC
CAS 10101-41-4; EINECS/ELINCS 231-900-3
Uses: Filler, flow aid for direct compression of pharmaceutical tablets and capsules
Features: Economical; nonhygroscopic; exc. long term stability
Regulatory: NF/FCC compliance
Properties: Wh. to sl. off-wh. free-flowing powd., odorless; 106 µm avg. particle size; >85% on #14 mesh; dens. (tapped) 1.24 g/ml; 100% conc.

Chem. Descrip.: Cocamide DEA and glycerin
Uses: Foaming agent, visc. builder, emulsifier, solvent for pharmaceuticals
Properties: Yel. cl. liq.; solid. pt. -5 to 5 C; pH 9.5-10.5 (2%); 85% conc.

Compressol™ S Co-Processed Polyol [SPI Pharma http://www.spipharma.com]
Chem. Descrip.: Mannitol and sorbitol See D-Mannitol
Chem. Analysis: 0.6% max. moisture
CAS 69-65-8; 50-70-4; EINECS/ELINCS 200-061-5; 200-711-8
Uses: Excipient in direct compression
Regulatory: USP
Properties: Wh. free-flowing powd.1 % max. through #14 mesh, 20% max. through #140 mesh; m.p. 165-170 C; 97.0-102.0% polyols
Storage: Store away from excessive temperatures and humidity @ 25 C and 50% r.h.

Chem. Descrip.: Tribehenin
CAS 18641-57-1; EINECS/ELINCS 242-471-7
Uses: Excipient, lubricant, stabilizer for pharmaceutical tablets/capsules, controlling sustained release in tablets
Features: Protects the drug
Properties: Nonionic
Chem. Descrip.: Tribehenin
CAS 18641-57-1; EINECS/ELINCS 242-471-7
Uses: Formulation aid, excipient, lubricant, viscosifier, stiffener, binder for pharmaceutical tablets/capsules; controlled release agent for short half-life drugs; improves compressibility
Features: Lipophilic
Regulatory: FDA 21CFR §184.1328 GRAS; USP/NF, EP, and JSFA compliance; DMF no. 4663
Properties:
- Wh. to off-wh. fine powd. (spherical particles), faint odor, tasteless; 85% through 250 mesh; sol. hot in chloroform, methylene chloride; insol. in water, min. oil, ethanol; m.p. 69-74 C; HLB 2.0; acid no. < 4; iodine no. < 3; sapon. no. 145-165; nonionic; 100% conc.
Use Level: 0.5-4% (tablets, capsules); 10-30% (sustained-release formulations)
Toxicology: LD0 (oral, rat) > 5 g/kg
Storage: Preserve in orig. container; store below 35 C; prevent exposure to air, light, heat, and moisture

Chem. Descrip.: PEG-8 behenate and tribehenin
Uses: Excipient, lubricant, visc. builder, stiffener, and brightening agent for pharmaceuticals; tableting agent and lipophilic matrix
Properties:
- Drop pt. ≈ 62 C; HLB 5.0; acid no. < 4; iodine no. < 3; sapon. no. 105-125

Conacure® AH-35 [Cytec Conap http://www.conap.com]
Chem. Descrip.: Hydroxyl terminated tetrafunctional polyols based on castor oil
Uses: Curing agent for biomedical sealants
Properties:
- Gardner 4-6 color; sp.gr. 0.990; dens. 8.2 lb/gal; visc. 1500-2000 cps; acid no. 3.0; hyd. no. 300-350; equiv. wt. 162-173; 100% solids

Copherol® 1250 [Cognis/Nutrition & Health]
Chem. Descrip.: d-α-Tocopheryl acetate USP, FCC
CAS 58-95-7; EINECS/ELINCS 231-710-0
Uses: Vitamin source, antioxidant, protectant, and moisturizer for pharmaceuticals, sun protection
Features: Natural source; stable to air, light, acid
Regulatory: USP, FCC compliance; kosher certified
Properties:
- Yel. cl. visc. oil, nearly odorless; sol. in ethanol; misc. with acetone, ether, chloroform, veg. oils; insol. in water; m.w.
Trade Name Reference

472.75; sp.gr. 0.94-0.96 g/cm³; 1250 IU/g
Use Level: 2-5% (skin care prods.); up to 20% (sun protectants)
Storage: Protect from heat, light, freezing; 1 yr. shelf life stored cold in unopened original pkg.; unstable to alkalins and oxidizing agents

Copherol® F-1300 [Cognis/Nutrition & Health]
Chem. Descrip.: D-α-Tocopherol USP, FCC
CAS 59-02-9; EINECS/ELINCS 200-412-2
Uses: Vitamin source, antioxidant, protectant, and moisturizer for pharmaceuticals, sun protection
Features: Natural source
Regulatory: USP, FCC compliance; kosher certified
Properties: Amber cl. visc. oil, mild to bland odor and taste; sol. in ethanol; misc. with acetone, ether, chloroform, veg. oils and fats; insol. in water; m.w. 430.69; sp.gr. 0.94-0.96 g/cm³; 1300 IU/g
Use Level: 2-5% (skin care prods.), up to 20% (sun protectants)
Precaution: Unstable to acid, light, alkali, and oxidizing agents
Storage: Store in tightly closed containers; protect from heat and light; use promptly once opened; 12 mos. shelf life stored cold in original unopened containers

Chem. Descrip.: Coriolus versicolor mushroom extract
Uses: Dietary supplement in pharmaceutical prods.
Properties: Brn. fine powd.; 95% through 60 mesh; 70.6% carbohydrates, < 6% moisture
Storage: Store in cool room (5-10 C) in sealed polyethylene bag

CornSweet® Crystalline Fructose [ADM Corn Processing http://www.adm.org/naen/ahn/cornprocessing.asp; MLG Enterprises]
Chem. Descrip.: Fructose FCC/USP
Uses: Sweetener offering intense sweetness, sweetness synergism, flavor enhancement, humectancy, low water activity, f.p. depression, high osmotic pressure
Properties: Wh. free-flowing cryst., odorless, clean very sweet taste; 1% max. on 16 mesh, 10% max. through 100 mesh; bulk dens. 52 lb/ft³; m.p. 103 C; 99.9% act.
Storage: Store @ 25 C and 50% r.h.
**Cosmica®** [Engelhard]

*Uses:* Pigment series where absorption colors are deposited directly on the mica, creating highly intense effects with minimal luster; suitable for analgesic body lotions, sunscreens, toothpaste

*Features:* Absorption colors are deposited directly on the mica, creating highly intense effects with minimal luster

**Cosmolloid® 60** [Honeywell Spec. Wax & Addit. http://www.acwax.com]

*Chem. Descrip.:* Microcrystalline wax

*Uses:* Emulsifier, rheological control agent in pharmaceutical preps. including ointments and salves, suppositories

*Features:* Inert; superior color, UV stability

*Chem. Descrip.:* Microcrystalline wax

*Chem. Analysis:* Oil content 2% max.

*Chem. Descrip.:* Microcrystalline wax

*Chem. Analysis:* Oil content 2% max.
Trade Name Reference

UN 3257

Uses: Emulsifier, rheological control agent in pharmaceutical preps. including ointments and salves, suppositories

Features: Inert; superior color, UV stability

Regulatory: FDA 21 CFR §172.886, 178.3710; SARA §311 Immediate Health Hazard; DOT regulated when transported @ > 212 F; meets USP, BP, DAB, EP standards; RCRA, CERCLA nonreportable; Canada DSL; Europe EINECS; Australia; Korea; Philippines PICCS; China

Properties: Wh. to yel. liq.; color 2.5; visc. 14-20 cSt @ 100 C; congealing pt. 77-82 C; penetration 13-19 dmm

Toxicology: LD50 (oral) > 5 g/kg (cooled powd.); contact with molten material will cause thermal burns; will cause burns with eye contact; exposure to fumes may cause eye, nose, throat irritation; TSCA listed

Precaution: Wear insulated gloves, chemical goggles when working with molten material; incompat. with strong oxidizers

Hazardous Decomp. Prods.: CO, CO2, hazardous gases

Storage: Store away from excessive heat, strong oxidizers

Chem. Descrip.: Microcrystalline wax

Uses: Emulsifier, rheological control agent in pharmaceutical preps. including ointments and salves, suppositories

Features: Inert; superior color, UV stability

Properties: Liq.; color 2.5; visc. 14-20 cSt @ 100 C; congealing pt. 77-82 C; penetration 13-19 dmm

Chem. Descrip.: Microcrystalline wax

Uses: Emulsifier, rheological control agent in pharmaceutical preps. including ointments and salves, suppositories

Features: Inert; superior color, UV stability

Regulatory: FDA 21 CFR §172.886, 178.3710; SARA §311 Immediate Health Hazard; DOT regulated when transported @ > 212 F; meets USP, BP, DAB, EP standards; RCRA, CERCLA nonreportable; Canada DSL; Europe EINECS; Australia; Korea; Philippines PICCS; China

Properties: Wh. to yel. liq.; color 0.5; char. waxy odor; negligible sol. in water; sp.gr. 0.84-0.86; visc. 18-23 cSt @ 100 C; congealing pt. 88-91 C; flash pt. (COC) > 243 C; penetration 7-10 dmm

Toxicology: LD50 (oral) > 5 g/kg (cooled powd.); contact with molten material will cause thermal burns; will cause burns with eye contact; exposure to fumes may cause eye, nose, throat irritation; TSCA listed

Precaution: Wear insulated gloves, chemical goggles when working with molten material; incompat. with strong oxidizers

Hazardous Decomp. Prods.: CO, CO2, hazardous gases

Storage: Store away from excessive heat, strong oxidizers
Trade Name Reference

oxidizers

Chem. Descrip.: Synthetic wax
Uses: Emulsifier, rheological control agent in pharmaceutical preps. including ointments and salves, suppositories
Features: Inert; superior color, UV stability; increases opacity, hardness; improved oil/fragrance retention
Regulatory: Meets USP, BP, DAB, EP standards; RCRA nonreportable; DOT not regulated; Canada DSL; Europe EINECS; Australia; Korea; Philippines PICCS; China
Properties: Wh. pellets or slab; negligible sol. in water; sp.gr. 0.92; visc. 250-380 cSt @ 100 C; congealing pt. 68-79 C; flash pt. (OC) > 176 C; penetration 3-7 dmm
Use Level: 1-4%
Toxicology: May be mild skin irritant; TSCA listed
Precaution: Wear chemical goggles, chemical resistant gloves for prolonged, repeated exposure; incompat. with strong oxidizers
Hazardous Decomp. Prods.: Dense smoke, irritating or poisonous gases
Storage: Avoid excessive heat, strong oxidizers

Chem. Descrip.: Synthetic wax
Uses: Emulsifier, rheological control agent in pharmaceutical preps. including ointments and salves, suppositories
Features: Inert; superior color, UV stability
Regulatory: Meets USP, BP, DAB, EP standards
Properties: Wh. to ivory; congealing pt. 80-90 C
Storage: Store @ < 86 F in cool, dry place out of direct sunlight

Chem. Descrip.: Synthetic wax
CAS 9002-88-4
Uses: Emulsifier, rheological control agent in pharmaceutical preps. including ointments and salves, suppositories
Features: Inert; superior color, UV stability
Regulatory: DOT not regulated; meets USP, BP, DAB, EP standards; RCRA, CERCLA nonreportable; Canada DSL; Europe EINECS; Australia; Korea; Japan ENCS; Philippines PICCS; China
Properties: Wh. to ivory pellets or slabs; char. waxy odor; negligible sol. in water; sp.gr. 0.92-0.98; congealing pt. 64-72 C; flash pt. (OC) > 176 C; penetration 10-15 dmm
Toxicology: LD50 (oral, rat) > 2 g/kg (based on other polyethylene material); may be mild skin irritant; TSCA listed
Precaution: Wear chemical goggles around molten material, chemical resistant gloves for prolonged, repeated exposure; spills may be slippery; incompat. with strong oxidizers
Hazardous Decomp. Prods.: CO, CO2, hazardous gases
Storage: Avoid excessive heat, strong oxidizers

Chem. Descrip.: Synthetic wax
Uses: Emulsifier, rheological control agent in pharmaceutical preps. including ointments and salves, suppositories
Features: Inert; superior color, UV stability
Properties: Saybolt color 28 min.; visc. 8-10 cSt @ 100 C; congealing pt. 74-76 C; penetration 5-8 dmm @ 25 C, 15-20 dmm @ 43.3 C

Chem. Descrip.: Synthetic wax
Uses: Emulsifier, rheological control agent in pharmaceutical preps. including ointments and salves, suppositories
Features: Inert; superior color, UV stability
Regulatory: DOT not regulated; FDA 21 CFR §172.886, 178.3710; meets USP, BP, DAB, EP standards; RCRA, CERCLA nonreportable; Canada DSL; Europe EINECS; Australia; Korea; Japan ENCS; Philippines PICCS; China
Properties: Whitish pellets; Saybolt color 28 min.; char. waxy odor; negligible sol. in water; sp.gr. 0.98; visc. 9-11 cSt @ 100 C; congealing pt. 69-71 C; flash pt. (OC) > 175 C; penetration 5-8 dmm @ 77 F, 16-20 dmm @ 110 F
Toxicology: May be mild skin irritant; TSCA listed
Precaution: Wear chemical goggles around molten material, chemical resistant gloves for prolonged, repeated exposure; spills may be slippery; incompat. with strong oxidizers
Hazardous Decomp. Prods.: CO, CO2, hazardous gases
Storage: Avoid excessive heat, strong oxidizers
Trade Name Reference

Chem. Descrip.: Petrolatum
Uses: Emulsifier, rheological control agent in pharmaceutical preps. including ointments and salves, suppositories
Features: Inert; superior color, UV stability
Regulatory: Meets USP, BP, DAB, EP standards
Properties: Lovibond color 1.0Y max. (2" cell); visc. 5 cSt min. @ 100 C; congealing pt. 45-55 C; penetration 140-170 dmm

Chem. Descrip.: Petrolatum
Uses: Emulsifier, rheological control agent in pharmaceutical preps. including ointments and salves, suppositories
Features: Inert; superior color, UV stability
Regulatory: Meets USP, BP, DAB, EP standards
Properties: Lovibond color 1.5Y max. (2" cell); visc. 9 cSt min. @ 100 C; congealing pt. 46-56 C; penetration 160-180 dmm

Chem. Descrip.: Petrolatum
Uses: Emulsifier, rheological control agent in pharmaceutical preps. including ointments and salves, suppositories
Features: Inert; superior color, UV stability
Regulatory: Meets USP, BP, DAB, EP standards
Properties: Lovibond color 0.5Y max. (2" cell); visc. 9 cSt min. @ 100 C; congealing pt. > 50 C; penetration 150-170 dmm

Chem. Descrip.: Petrolatum
Uses: Emulsifier, rheological control agent in pharmaceutical preps. including ointments and salves, suppositories
Features: Inert; superior color, UV stability
Regulatory: Meets USP, BP, DAB, EP standards
Properties: Lovibond color 0.5Y (2" cell); visc. 9-12 cSt min. @ 100 C; congealing pt. 55-65 C; penetration 160-180 dmm

Chem. Descrip.: Petrolatum
Uses: Emulsifier, rheological control agent in pharmaceutical preps. including ointments and salves, suppositories
Features: Inert; superior color, UV stability
Regulatory: Meets USP, BP, DAB, EP standards
Properties: Lovibond color 30Y + 2.5R (2" cell); visc. 6-9 cSt min. @ 100 C; congealing pt. 45-52 C; penetration 155-180 dmm

Chem. Descrip.: Petrolatum
Uses: Emulsifier, rheological control agent in pharmaceutical preps. including ointments and salves, suppositories
Features: Inert; superior color, UV stability
Regulatory: Meets USP, BP, DAB, EP standards
Properties: Lovibond color 0.5Y (2" cell); visc. 9-12 cSt min. @ 100 C; congealing pt. 55-65 C; penetration 160-180 dmm

Chem. Descrip.: Synthetic wax
Uses: Emulsifier, rheological control agent in pharmaceutical preps. including ointments and salves, suppositories
Features: Inert; superior color, UV stability
Regulatory: Meets USP, BP, DAB, EP standards
Properties: Wh. to ivory; congealing pt. 80-85 C; penetration 2.5-5.0 dmm
Storage: Store in cool, dry place

Cosmowax [Croda Inc http://www.croda.com; http://www.crodausa.com]
Chem. Descrip.: Stearyl alcohol, steareth-20, steareth-10
Uses: Self-emulsifying wax, emulsifier, stabilizer for pharmaceuticals, creams and lotions, antiperspirants
Properties: Creamy wh. waxy solid, low odor; m.p. 47-55 C; acid no. 0.5 max.; iodine no. 2 max.; sapon. no. 1 max.; nonionic; 100% conc.

Cosmowax BP [Croda Inc http://www.croda.com; http://www.crodausa.com]
Chem. Descrip.: Cetearyl alcohol and ceteareth-20
Uses: Emulsifying wax, wetting agent, penetrant, stabilizer in pharmaceuticals
Features: Self-bodying; produces stable emulsions; unaffected by alkali or acids; tolerates metallic salts if not in excess
Properties: Wh. waxy flake; mild char. odor; m.p. 45-50 C; acid no. ≤ 1.0; iodine no. ≤ 1.0; nonionic
Use Level: 5-20%
Storage: Failure to store at < 90 F can cause coagulation

Handbook of Pharmaceutical Additives, Third Edition 179

Use Level: 2-10%

Covi-Ox® T-70 [Cognis/Nutrition & Health;
Cognis/Care Chems.; Cognis Canada]
Chem. Descr.: Tocopherol
CAS 1406-18-4; EINECS/ELINCS 215-798-8
Uses: Blocking agent for nitrosamine
formation in lip balms
Features: Natural
Properties: Brwnsh. red visc. liq.; 70% min. total
tocopherols

Covi-Ox® T-90 [Cognis/Nutrition & Health]
Chem. Descr.: Mixed tocopherol conc.
NF/FCC (typically 14% d-α, 2% d-β, 60% d-γ,
24% d-δ
CAS 1406-18-4; EINECS/ELINCS 215-798-8
Uses: γ-tocopherol source in nutritional
supplements
Features: Low volatility; exc. carry-through
chars.
Regulatory: Kosher
Properties: Brownish-red cl. visc. oil; bland to
mild odor and taste; misc. with org. solvs., veg.
oils, animal fats; sparingly sol. in abs. ethanol;
insol. in water; sp.gr. 0.94-0.96 g/cm³
Precaution: Unstable to acid, light, alkali,
oxidizing agents

Storage: 36 mos. shelf life when stored @ 15-30
C in unopened original container; protect from
heat, light, and air in tightly closed containers;
do not refrigerate

Covitol® 700 [Cognis/Nutrition & Health]
Chem. Descr.: D-α-Tocopherol USP on
silicon dioxide carrier, surf. treated with gum
acacia See Acacia; Silica
Uses: Nutrient, dietary supplement for
chewable tablets and two-piece capsules
Features: Stable to air and light; unstable to
alkali and acid
Properties: Wh. to lt. cream free-flowing gran.
powd.; bland odor and taste; 60% through 40
mesh, 10% through 120 mesh; insol. in water
and org. solvs.; bulk dens. 0.40-0.50 g/cm³
Storage: 1 yr. shelf life in unopened original
container; protect from heat, light, moisture,
and freezing

Covitol® 700 WD [Cognis/Nutrition & Health]
Chem. Descr.: D-α-Tocopherol USP/FCC in
carrier of gum acacia, surf. treated See
Acacia
Uses: Nutrient, dietary supplement for dry
powd. mixes and effervescent tablets that
are added to water
Features: Stable to air and light; unstable to
alkali and acid
Regulatory: Kosher
Properties: Lt. tan fine powd.; bland odor and
taste; water-disp.; insol. in org. solvs.
Storage: 1 yr. shelf life in unopened original
container; protect from heat, light, moisture,
and freezing

Covitol® 1100 [Cognis/Nutrition & Health]
Chem. Descr.: Tocopheryl acetate
CAS 1406-70-8; EINECS/ELINCS 231-710-0
Uses: Antioxidant; pharmaceutical grade
natural Vitamin E
Properties: 809 mg/g min. assay

Covitol® 1185 [Cognis/Nutrition & Health]
Chem. Descr.: Tocopheryl succinate
CAS 4345-03-3; EINECS/ELINCS 224-403-8
Uses: Antioxidant; pharmaceutical grade
natural Vitamin E
Properties: Wh. gran. powd.; bland odor; 960
mg/g min. assay

Covitol® 1210 [Cognis/Nutrition & Health]
Chem. Descr.: Tocopheryl succinate
CAS 4345-03-3; EINECS/ELINCS 224-403-8
Uses: Antioxidant; pharmaceutical grade
natural Vitamin E for use in pharmaceutical
**Trade Name Reference**

**tablets, multivitamins, chewable tablets**

*Properties*: Wh. to off-wh. cryst. powd. with little to no odor or taste; 960 mg/g min. assay

**Covitol® 1360** [Cognis/Nutrition & Health]

*Chem. Descrip.:* Tocopheryl acetate  
*CAS 1406-70-8; EINECS/ELINCS 231-710-0*  
*Uses: Antioxidant for pharmaceuticals*  
*Features: Pharmaceutical grade natural Vitamin E*  
*Properties*: Wh. to off-wh. cryst. powd. with little to no odor or taste; 960 mg/g min. assay

**Covitol® 1360J** [Cognis/Nutrition & Health]

*Chem. Descrip.:* d-α-Tocopheryl acetate  
*USP/FCC CAS 58-95-7; EINECS/ELINCS 231-710-0*  
*Uses: Nutrient, dietary supplement liq. prep. and food fortification; in softgel capsules*  
*Features: Stable to air, light, acids*  
*Regulatory: Kosher*  
*Properties*: Very pale yel. cl. visc. oil; little or no odor and taste; misc. with org. solvs., veg. oils and fats; sparingly sol. in abs. ethanol; insol. in water; m.w. 472.75; sp.gr. 0.94-0.96 g/cm³  
*Precaution: Unstable to alkali and oxidizing agents*  
*Storage: 48 mos. shelf life in unopened original pkg.; store @ 15-30 C; protect from heat, light, air in tightly closed containers; do not refrigerate; may crystallize on exposure to cold temps.*

**Covitol® F-350M** [Cognis/Nutrition & Health]

*Chem. Descrip.:* Tocopherol  
*CAS 1406-18-4; EINECS/ELINCS 215-798-8*  
*Uses: Antioxidant; pharmaceutical grade natural Vitamin E*  
*Properties*: Cream powd.; 235 mg/g of d-α tocopherol conc. FCC plus 59 mg/g of d-β, d-γ, and d-δ tocopherol FCC.

**Covitol® F-1000-2** [Cognis/Nutrition & Health]

*Chem. Descrip.:* Tocopherol  
*CAS 1406-18-4; EINECS/ELINCS 215-798-8*  
*Uses: Antioxidant; pharmaceutical grade natural Vitamin E used in capsules, syrups, drops and food fortification*  
*Properties*: Brn.-red cl. visc. oil; bland to mild odor; 671 mg/g min. assay

**Coyote Brand Tara Gum** [Gum Tech. http://www.gumtech.com]

*Chem. Descrip.:* Tara gum, polysaccharide composed of mannose and galactose derived from the tara seed  
*Chem. Analysis: * Moisture < 14%; ash (total) < 10%; heavy metals as Pb 20 ppm max.; Pb 5 ppm max.; As 3 ppm max.  
*CAS 39300-88-4*  
*Uses: Thickener, stabilizer, gelling agent, suspension aid in pharmaceuticals*  
*Regulatory: FDA GRAS*  
*Properties*: Wh. powd.; 98% through US Std. 80 mesh; Brookfield visc. 3500-5000 cps in 1% sol’n. (spindle 4, 25 C, 20 rpm), 4000-6000 cps (spindle 4, 85 C, 20 rpm); pH 4-6 (1% sol’n.)

**Coyote Stabilizer Cellulose Gel 50** [Gum Tech. http://www.gumtech.com]

*Chem. Descrip.:* Cellulose gel  
*CAS 9004-34-6; EINECS/ELINCS 232-674-9*  
*Uses: Binder, tableting agent*  
*Chem. Analysis: * Moisture < 14%; ash (total) < 1%; heavy metals as Pb 30 ppm max.; Pb 5 ppm max.; As 3 ppm max.  
*CAS 37220-17-0*  
*Uses: Thickener, stabilizer in pharmaceutical apps.*  
*Regulatory: FDA GRAS*  
*Properties*: Wh. powd.; particle size 95% through 100 mesh; Brookfield visc. > 18,000 cps (1% sol’n., spindle 6, 20 rpm); pH 6-8 (1% sol’n)

**CP Glycerine** [Procter & Gamble http://pgchemicals.com]

*Chem. Descrip.:* 1,2,3-Propanetriol (99-100%)  
*See Glycerin*  
*CAS 56-81-5; EINECS/ELINCS 200-289-5*  
*Uses: Emulsifier, emollient, plasticizer, humectant, sweetener in drugs; intermediate for making glycerol derivatives*  
*Regulatory: DOT/ADR/IMDG/ICAO/IATA not regulated; Canada DSL; Japan; Australia; Philippines; China; Korea*  
*Properties*: Water wh., cl. liq.; bland odor; sweet taste; completely sol. in water; misc. with ethanol; sl. sol. in acetone; insol. in ether, chloroform; sp.gr. 1.262; visc. ≈ 1300 mPa•s; vapor pressure < 0.008 mm Hg; b.p. > 288 C; flash pt. (PMCC) > 198.9 C; auto-ignition temp. ≈ 400 C  
*Toxicology: * LD50 (oral, rat) > 2 g/kg; may cause mild, transient eye irritation; TSCA listed
Trade Name Reference

Environmental: LC50 (goldfish, 24 h) > 5 g/l; LC0 (golden orfe, 48 h) > 250 mg/l; LC100 (rainbow trout, 96 h) 51-57 g/l; NOEC (chilomonas paramecium, 48 h) > 10 g/l, (entosiphon sulcatum, 72 h) 3200 mg/l; biodeg.

Precaution: Incompat. with strong oxidizers, strong acids
Hazardous Decomp. Prods.: Thermal reaction may release acrolein
Storage: Store in clean, tight containers to prevent moisture pickup from air; can be stored in aluminum, stainless steel, fiberglass or resin lined steel vessels

CP Glycerine Kosher [Procter & Gamble http://pgchemicals.com]
Chem. Descrip.: 1,2,3-Propanetriol (99-100%) See Glycerin
CAS 56-81-5; EINECS/ELINCS 200-289-5
Uses: Emulsifier, emollient, plasticizer, humectant, sweetener in drugs; intermediate for making glycerol derivatives
Regulatory: DOT/ADR/RID/IMDG/ICAO/IATA not regulated; Canada DSL; Japan; Australia; Philippines; China; Korea
Properties: Water wh., cl. liq.; bland odor; sweet taste; completely sol. in water; misc. with ethanol; sl. sol. in acetone; insol. in ether, chloroform; sp.gr. 1.262; visc. = 1300 mPa•s; vapor pressure < 0.008 mm Hg; b.p. > 288 C; flash pt. (PMCC) > 198.9 C; auto-ignition temp. = 400 C
Toxicology: LD50 (oral, rat) > 2 g/kg; may cause mild, transient eye irritation; TSCA listed

Environmental: LC50 (goldfish, 24 h) > 5 g/l; LC0 (golden orfe, 48 h) > 250 mg/l; LC100 (rainbow trout, 96 h) 51-57 g/l; NOEC (chilomonas paramecium, 48 h) > 10 g/l, (entosiphon sulcatum, 72 h) 3200 mg/l; biodeg.

Precaution: Incompat. with strong oxidizers, strong acids
Hazardous Decomp. Prods.: Thermal reaction may release acrolein
Storage: Store in clean, tight containers to prevent moisture pickup from air; can be stored in aluminum, stainless steel, fiberglass or resin lined steel vessels

C*PharmDex 02010 [Cerestar http://www.cerestar.com]
Chem. Descrip.: Glucose monohydrate, pyrogen-free See D-Glucose monohydrate
CAS 5996-10-1; EINECS/ELINCS 200-075-1
Uses: Used in parenteral nutrition; dialysis and serum applications
Features: Solutions of this product are characterized by excellent filterability and high stability
Regulatory: USP/NF, EP, JPE
Properties: Readily sol. in water

C*PharmDex 02011 [Cerestar http://www.cerestar.com]
Chem. Descrip.: Glucose monohydrate See D-Glucose monohydrate
CAS 5996-10-1; EINECS/ELINCS 200-075-1
Uses: Diluent in tablet, capsule and powder formulations; sweetening agent, cooling agent
Features: Mildly reducing properties improve the stability of oxidation sensitive active materials
Regulatory: USP/NF, EP, JPE
Properties: Rel. sweetness value 75%; readily sol. in water; heat of solution -105.5 J/g

C*PharmDry 01984 [Cerestar http://www.cerestar.com]
Chem. Descrip.: Glucose
CAS 50-99-7; EINECS/ELINCS 200-075-1
Uses: Binder, diluent in direct compression, wet and dry granulation; diluent in capsule and powd. formulations; sweetening agent; coating agent in solid dosage formulations; viscosity increasing agent and crystallization inhibitor in liquid dosage formulations; carrier in spray-drying of active substances; sweetener in oral nutritional supplements
Features: Good dispersibility and solubility

C*PharmGel 03302 [Cerestar http://www.cerestar.com]
Chem. Descrip.: White maize starch See Corn (Zea mays) starch
CAS 9005-25-8; EINECS/ELINCS 232-679-6
Uses: Binder for wet granulation (cooked); disintegrating agent; diluent in capsule and powder formulations, direct compression and wet and dry granulation
Features: Hydrophilic polymer; stable upon storage; high dilution potential, low friability; excellent compatibility; fast disintegration; high compressibility
Regulatory: USP/NF, EP, JP
Trade Name Reference

C*PharmGel 03406 [Cerestar http://www.cerestar.com]
Chem. Descrip.: Maize starch See Corn (Zea mays) starch
CAS 9005-25-8; EINECS/ELINCS 232-679-6
Uses: Binder for wet granulation (cooked); disintegrating agent; diluent in capsule and powder formulations, direct compression and wet and dry granulation
Features: Hydrophilic polymer; stable upon storage; high dilution potential, low friability; excellent compatibility; fast disintegration; high compressibility
Regulatory: USP/NF, EP, JP

C*PharmGel 03415 [Cerestar http://www.cerestar.com]
Chem. Descrip.: Low-moisture maize starch See Corn (Zea mays) starch
CAS 9005-25-8; EINECS/ELINCS 232-679-6
Uses: Binder for wet granulation (cooked); disintegrating agent; diluent in capsule and powder formulations, direct compression and wet and dry granulation
Features: Hydrophilic polymer; stable upon storage; high dilution potential, low friability; excellent compatibility; fast disintegration; high compressibility
Regulatory: USP/NF, EP, JP

C*PharmGel 12012 [Cerestar http://www.cerestar.com]
Chem. Descrip.: Pregelatinized regular maize starch See Corn (Zea mays) starch
CAS 9005-25-8; EINECS/ELINCS 232-679-6
Uses: Diluent/binder in direct compression and wet and dry granulation; diluent in capsule and powder formulations
Features: Provides natural high whiteness to tablets; stable upon storage; high dilution potential, low friability; excellent compatibility; fast disintegration; high compressibility
Regulatory: USP/NF, EP, JP
Properties: Disperses in cold water to form paste

C*PharmMannidex 16701 [Cerestar http://www.cerestar.com]
Chem. Descrip.: Endotoxin-controlled mannitol See D-Mannitol
CAS 69-65-8; EINECS/ELINCS 200-711-8
Uses: Parenteral nutrition; dialysis and serum apps.; lyophilized preps.
Features: Shows an osmotic diuretic activity accelerating renal excretion of drugs
Regulatory: USP, EP, JP

C*PharmMannidex DC (200 grade) 16702 [Cerestar http://www.cerestar.com]
Chem. Descrip.: Mannitol See D-Mannitol
CAS 69-65-8; EINECS/ELINCS 200-711-8
Uses: Binder and diluent for direct compression, wet and dry granulation, and capsule and powder formulations; sweetening agent
Features: Suitable for producing tablets with direct compression; nonhygroscopic and therefore useful with moisture-sensitive active ingredients
Regulatory: USP/NF, EP, JP

C*PharmSweet 01533 [Cerestar http://www.cerestar.com]
Chem. Descrip.: Glucose liquid
CAS 50-99-7; EINECS/ELINCS 200-075-1
Uses: Coating agent in solid dosage formulations; bulking agent and anticrystallization agent in oral solutions and syrups; bulking agent in medicated confectionery
Features: Medium viscosity with a moderate relative sweetness and neutral taste; good workability during production
Regulatory: USP/NF, EP, JP
Properties: Cl. colorless liq.; sweet taste

Cremogen® Camomile Forte 728790 [Symrise USA http://www.symrise.com]
Chem. Descrip.: Water, propylene glycol, ethoxydiglycol, and matricaria (Chamomilla

Handbook of Pharmaceutical Additives, Third Edition
Trade Name Reference

recuitita) extract
Uses: Botanical extract offering antiphlogistic effect

Chem. Descrip.: Ceteareth-6 and stearyl alcohol
Uses: Emulsifier, humectant, solubilizer for pharmaceuticals (ointments, creams, o/w and w/o emulsions)
Properties: Wh. wax; sol. in water, alcohol; drop pt. 41-45 C; HLB 10-12; acid no. < 1; iodine no. < 1; sapon. no. < 3; hyd. no. 115-135; nonionic; 100% act.

Cremophor® A 11 [BASF AG http://www.basf.de]
Chem. Descrip.: Ceteareth-11
CAS 68439-49-6
Uses: Emulsifier for pharmaceutical preps.
Properties: Wh. wax; sol. in water, alcohol; sp.gr. 0.964-0.968 (60 C); drop pt. 34-38 C; HLB 12-14; acid no. < 1; iodine no. < 1; sapon. no. < 1; hyd. no. 70-80; pH 6-7; nonionic; 100% act.

Chem. Descrip.: Ceteareth-25
CAS 68439-49-6
Uses: Emulsifier, humectant, solubilizer for pharmaceuticals (ointments, creams, o/w emulsions)
Properties: Wh. powd.; sol. in water, alcohol; sp.gr. 1.020-1.028 (60 C); drop pt. 44-48 C; HLB 15-17; acid no. < 1; iodine no. 25-35; sapon. no. < 1; hyd. no. 35-45; pH 5-7; nonionic; 100% act.

Cremophor® ELP [BASF http://www.basf.com; BASF AG http://www.basf.de]
Chem. Descrip.: PEG-35 castor oil
CAS 61791-12-6
Uses: Solubilizer in parenteral dosage forms, specially for sensitive active ingredients
Features: Extra pure grade for demanding formulations
Properties: Wh. to yelsh. ish paste or cloudy liq.; sol. in water, organic solvents, such as ethanol, n-propanol, isopropanol, ethyl acetate, chloroform, CCL4, trichloroethylene, toluene and xylene; dens. 1.05-1.06 g/ml; visc. 600–750 mPa•s; acid no. ≤ 2; iodine no. 25-35; sapon. no. 65-70; hydroxyl no. 65-78; nonionic;

Cremophor® GO31 [BASF http://www.basf.com]
Chem. Descrip.: Polyglyceryl-3 oleate
CAS 9007-48-1
Uses: Emulsifier for hypoallergenic prods.
Properties: Gardner color 9 max. cl. liq.; sol. in water, organic solvents, such as ethanol, n-propanol, isopropanol, ethyl acetate, chloroform, CCL4, trichloroethylene, toluene and xylene; dens. 1.05-1.06 g/ml; visc. 600–750 mPa•s; acid no. ≤ 2; iodine no. 25-35; sapon. no. 65-70; hydroxyl no. 65-78; nonionic;

Features: Stable towards electrolytes (except mercury II chloride)
Regulatory: EP, USP/NF compliance
Properties: Pale yel. oily liq.; faint char. odor; sol. in water, ethanol, propanol, ethyl acetate, chloroform, CCL4, benzene, toluene, and xylene; sp.gr. 1.05-1.06; visc. 700-850 cps; vapor pressure 6. 2mm Hg (20 C); HLB 12-14; acid no. < 2; iodine no. 25-35; sapon. no. 65-70; hyd. no. 65-78; flash pt. 250 C; ref. index 1.471; pH 6-8 (10% aq.); nonionic; 100% act.; ≤ 2.8% water
Toxicology: LD50 (IV, mouse) 6500 mg/kg; may be harmful by ing., inh., or skin absorption; may cause eye/skin/respiratory tract irritation; may cause sensitization by inh. and skin contact; may cause anaphylactic reactions
Precaution: Avoid very acidic or basic substances
Storage: 2 yrs. shelf life if stored in unopened original containers @ R.T.; prolonged storage is not rec. unless the containers are completely full

Cremophor® GO31 [BASF http://www.basf.com]
Chem. Descrip.: Polyglyceryl-3 oleate
CAS 9007-48-1
Uses: Emulsifier for hypoallergenic prods.
Properties: Gardner color 9 max. cl. liq.; sol. in water, organic solvents, such as ethanol, n-propanol, isopropanol, ethyl acetate, chloroform, CCL4, trichloroethylene, toluene and xylene; dens. 1.05-1.06 g/ml; visc. 600–750 mPa•s; acid no. ≤ 2; iodine no. 25-35; sapon. no. 65-70; hydroxyl no. 65-78; nonionic;

Storage: 1 yr. shelf life when stored in original,
Cremophor® PS 20 [BASF
http://www.basf.com]
Chem. Descrip.: Polysorbate 20
CAS 9005-64-5
Uses: Anti-irritant for baby bath prods., baby shampoos
Properties: Gardener color 4 max. cl. liq.; sol. in water; HLB 16.7; acid no. 2.2 max.; sapon. no. 40-50; hyd. no. 96-108; nonionic; 100% act.
Storage: 1 yr. shelf life when stored in original, unopened containers; store in a cool, dry place

Cremophor® RH 40 [BASF
http://www.basf.com; BASF AG
http://www.basf.de]
Chem. Descrip.: PEG-40 hydrogenated castor oil
CAS 61788-85-0
Uses: Emulsifier, solubilizer for fat-sol. vitamins, essential oils, and hydrophobic materials in pharmaceuticals (tablets, capsules, orals, topicals, sprays, ointments, creams, lotions, gels, suppositories, transdermal systems)
Features: Chemically very stable; largely insensitive to water hardness
Regulatory: EP, USP/NF compliance
Properties: Water-wh. visc. liq.; sol. in water, ethanol, oleyl alcohol, min. oil; disp. in water; sp.gr. 1.00; visc. 39-49 poise; HLB 8.6; acid no. ≤ 1; iodine no. ≤ 1; sapon. no. 158-170; hyd. no. 60-75; pH 6-7 (10% aq.); nonionic; 100% act.
Toxicology: LD50 (oral, rat) > 16 g/kg, (IP, mouse) > 6.4 g/kg; nonirritating to skin, mucous membranes; nonsensitizing
Precaution: Avoid strong bases or acids
Storage: 2 yr. min shelf life when stored in unopened original drums @ 20-25 C; prolonged exposure to heat may cause physical separation into liq. and solid phase on cooling; homogenize to restore to original form

Cremophor® S 9 [BASF
http://www.basf.com; BASF AG
http://www.basf.de]
Chem. Descrip.: PEG-9 stearate
CAS 9004-99-3; EINECS/ELINCS 226-312-9
Uses: O/w emulsifier, thickener, suspension stabilizer, lubricant, antistackifier for pharmaceuticals
Properties: Ylsh. wh. visc. liq.; sol. in water, alcohols, acetone, ethyl acetate, chloroform, benzene, castor oil, and oleic acid; sp.gr. 0.97 (60 C); HLB 12; acid no. 2; sapon. no. 88-98; nonionic; 100% act.

Crill 1 [Croda Inc http://www.croda.com;
http://www.crodausa.com]
Chem. Descrip.: Sorbitan laurate
CAS 1338-39-2; EINECS/ELINCS 215-663-3
Uses: Emulsifier, pigment dispersant, cosolvent, wetting agent, antifoam, visc. reducer, lubricant for pharmaceuticals
Regulatory: FDA 21CFR §175.105, 175.300, 175.320, 175.380, 175.390, 176.170, 176.210, 178.3120, 178.3400; 40CFR §180.1001(c)(e) exempt; EEC, UK clearance; DOT nonregulated/nonhazardous; SARA §313 nonreportable
Properties: Pale yel. cl. visc. liq.; sol. in ethanol, oleyl alcohol, min. oil; disp. in water; sp.gr. 1.00; visc. 39-49 poise; HLB 8.6; acid no. 4-7; sapon. no. 160-175; hyd. no. 330-358; nonionic; 98% conc.
Toxicology: LD50 (acute oral) > 20 g/kg; essentially nonirritating to eyes; may be mildly irritating to skin; no significant adverse health effects are known; may aggravate pre-existing dermatological conditions
Precaution: Incompat. with strong oxidizing agents
Hazardous Decomp. Prods.: Burning will produce COx
Storage: Store under cool, dry conditions

Crill 1 NF [Croda Inc http://www.croda.com;
http://www.crodausa.com]
Chem. Descrip.: Sorbitan laurate NF
CAS 1338-39-2; EINECS/ELINCS 215-663-3
Uses: Surfactant, w/o emulsifier, solubilizer for oral, topical, and parenteral pharmaceuticals; coemulsifier with Crillets in o/w systems; wetting agent; emulsifier for intramuscular pharmaceuticals
Features: Very mild; multifunctional
Properties: Yel. visc. liq.; sol. in ethanol, oleyl alcohol, min. oil, IPM, olive oil, oleic acid; insol. in water, propylene glycol; HLB 8.6; acid no. 8 max.; sapon. no. 158-170; hyd. no. 330-358; nonionic; ≤ 1.5% water
Use Level: 1-10%; 0.1-3% (wetting agent); 0.01-0.05% (intramuscular)
Toxicology: LD50 (oral, rat) > 30 g/kg; mild skin/eye irritant
Trade Name Reference

Crill 3 [Croda Inc http://www.croda.com; http://www.crodausa.com]
Chem. Descrip.: Sorbitan stearate
CAS 1338-41-6; EINECS/ELINCS 215-664-9
Uses: Emulsifier, lubricant for oral and topical pharmaceuticals; solubilizer for excipients and/or actives with low sol. in lipophilic bases; contributes to stability of o/w emulsions when used in combination with Crillets
Properties: Cream/yel. hard waxy solid; low odor; partially sol. in oleyl alcohol, olive oil, oleic acid; insol. in water, m.p. 54 C; HLB 4.7; acid no. 5-10; sapon. no. 146-157; hyd. no. 235-260; nonionic; 98% conc.
Use Level: 0.5-5%
Toxicology: LD50 (oral, rat) > 31 g/kg; nonirritating to eyes
Storage: Store under cool, dry conditions

Chem. Descrip.: Sorbitan isostearate
CAS 71902-01-7; EINECS/ELINCS 276-171-2
Uses: W/o emulsifier, wetting agent, pigment dispersant for topical pharmaceuticals, creams, lotions, aerosols; solubilizer for excipients and/or actives with low sol. in lipophilic bases
Features: Not prone to oxidation or associated changes in color or odor; low m.p.
Regulatory: FDA 40CFR §180.1001(c)(e) exempt
Properties: Pale yel. cl. visc. liq. to soft solid; sol. in min. oil, IPA, olive oil; partly sol. in oleyl alcohol, IPM; insol. in water, propylene glycol; HLB 4.7; acid no. 8 max.; sapon. no. 143-153; hyd. no. 220-250; nonionic; 98% conc.; 1.5% max. water
Use Level: 0.5-5%
Toxicology: LD50 (oral, rat) > 16 g/kg (10% aq.); moderate skin irritant; nonirritating to eyes

Crill 4 [Croda Inc http://www.croda.com; http://www.crodausa.com; Croda Food Services Ltd http://www.croda-foods.co.uk; Croda Chem. Europe Ltd http://www.croda.co.uk]
Chem. Descrip.: Sorbitan oleate
CAS 1338-43-8; EINECS/ELINCS 215-665-4
Uses: W/o emulsifier, wetting agent, pigment dispersant, antifoam for oral and topical pharmaceuticals; solubilizer for excipients and/or actives with low sol. in lipophilic bases; aids stability of o/w emulsions when used in combination with Crillets
Features: Mild; multifunctional; solubilizer for compds. with low sol. in lipophilic bases
Regulatory: FDA 21CFR §172.836, 172.842
Properties: Cream/yel. solid; sol. in ethanol, oleyl alcohol, min. oil, IPM, olive oil, oleic acid; insol. in water; gels in propylene glycol; HLB 4.7; acid no. < 10; sapon. no. 147-157; hyd. no. 235-260; nonionic; 1% max. water
Toxicology: LD50 (oral, rat) > 31 g/kg; nonirritating to eyes; mild skin irritant
Use Level: 1-10%; 0.1-3% (wetting agent)

Crill 4 NF [Croda Inc http://www.croda.com; http://www.crodausa.com]
Chem. Descrip.: Sorbitan oleate NF
CAS 1338-43-8; EINECS/ELINCS 215-665-4
Uses: Surfactant, w/o emulsifier, and solubilizer for oral and topical pharmaceuticals; wetting agent; coemulsifier with Crillets in o/w systems
Features: Ideal for emulsions whose oil phase contains unsat. lipid components
Properties: Amber liq.; sol. in ethanol, oleyl alcohol, min. oil, IPM, olive oil, oleic acid; insol. in water, propylene glycol; HLB 4.3; acid no. < 8; sapon. no. 145-160; hyd. no. 190-215; nonionic; 1% max. water
Use Level: 1-10%; 0.1-3% (wetting agent)
Toxicology: LD50 (oral, rat) > 40 g/kg; nonirritating to eyes; mild skin irritant

Crill 6 [Croda Inc http://www.croda.com; http://www.crodausa.com; Croda Chem. Europe Ltd http://www.croda.co.uk]
Chem. Descrip.: Sorbitan isostearate
CAS 71902-01-7; EINECS/ELINCS 276-171-2
Uses: W/o emulsifier, wetting agent, pigment dispersant for topical pharmaceuticals, creams, lotions, aerosols; solubilizer for excipients and/or actives with low sol. in lipophilic bases
Features: Not prone to oxidation or associated changes in color or odor; low m.p.
Regulatory: FDA 40CFR §180.1001(c)(e) exempt
Properties: Pale yel. cl. visc. liq. to soft solid; sol. in min. oil, IPA, olive oil; partly sol. in oleyl alcohol, IPM; insol. in water, propylene glycol; HLB 4.7; acid no. 8 max.; sapon. no. 143-153; hyd. no. 220-250; nonionic; 98% conc.; 1.5% max. water
Use Level: 0.5-5%
Toxicology: LD50 (oral, rat) > 16 g/kg (10% aq.); moderate skin irritant; nonirritating to eyes

Crill 4 [Croda Inc http://www.croda.com; http://www.crodausa.com]
Chem. Descrip.: Sorbitan stearate
CAS 1338-41-6; EINECS/ELINCS 215-664-9
Uses: Emulsifier, lubricant for oral and topical pharmaceuticals; solubilizer for excipients and/or actives with low sol. in lipophilic bases; contributes to stability of o/w emulsions when used in combination with Crillets
Properties: Amber visc. liq.; sol. in ethyl, isopropyl, and oleyl alcohols, min. oil, IPM, olive oil, oleic acid; HLB 4.3; acid no. 5.5-7.5; sapon. no. 147-160; hyd. no. 193-209; nonionic; 98% conc.
Toxicology: LD50 (oral, rat) > 40 g/kg; nonirritating to eyes
Chem. Descrip.: Sorbitan tristearate
CAS 26658-19-5; EINECS/ELINCS 247-891-4
Uses: Emulsifier, lubricant for pharmaceuticals
Properties: Pale tan hard waxy solid; partly sol. in oleyl alcohol, min. and olive oil, IPM, oleic acid; m.p. 48 C; HLB 2.1; sapon. no. 176-188; nonionic; 98% conc.

Chem. Descrip.: Sorbitan sesquioleate
CAS 8007-43-0; EINECS/ELINCS 232-360-1
Uses: W/o emulsifier, wetting agent, pigment dispersant for pharmaceuticals
Properties: Amber visc. liq.; sol. in oleyl alcohol, min. oil, olive oil, oleic acid; HLB 3.7; sapon. no. 149-160; nonionic; 98% conc.

Chem. Descrip.: Sorbitan trioleate
CAS 26266-58-0; EINECS/ELINCS 247-569-3
Uses: W/o emulsifier, wetting agent, pigment dispersant for pharmaceuticals (oral, topical, parenteral); surfactant for nasal dosage and metered dose inhalers; emulsifier for intramuscular pharmaceuticals
Properties: Amber visc. liq.; sol. in oleyl alcohol, min. oil, olive oil, IPM, IPA, oleic acid; insol. in water, propylene glycol; HLB 1.8; sapon. no. 172-186; nonionic; 98% conc.
Use Level: 0.1-3%; 0.01-0.05% (intramuscular)

Chem. Descrip.: Polysorbate 20 NF
CAS 9005-64-5
Uses: Solubilizer, o/w emulsifier, stabilizer, dispersant, wetting agent for pharmaceuticals (topical, oral, opthalmic, parenteral prods.); solubilizer in mouthwash; bulk pharmaceutical prod.
Features: High purity grade esp. for pharmaceuticals; often combined with a member of the Crill range in emulsification systems
Properties: Yel. to amber cl. liq.; low odor; sol. in water, ethyl alcohol, IPA, propylene glycol, oleyl alcohol, oleic acid; HLB 16.7; acid no. 2 max.; sapon. no. 40-50; hyd. no. 96-108; peroxide value 2 max.; surf. tens. 38.5 dynes/cm (0.1%); nonionic; ≤ 0.2% water
Use Level: 1-10%; 0.01-3% (as wetting agent)
Toxicology: LD50 (oral, rat) > 30 g/kg; mild skin irritant; nonirritating to eyes

Chem. Descrip.: Polysorbate 20
CAS 9005-64-5
Features: Very mild; often combined with a member of the Crill range in emulsification systems
Properties: Yel. to amber cl. liq.; low odor; sol. in water, ethyl alcohol, IPA, propylene glycol, oleyl alcohol, oleic acid; HLB 16.7; acid no. 2 max.; sapon. no. 40-50; hyd. no. 96-108; peroxide value 2 max.; surf. tens. 38.5 dynes/cm (0.1%); nonionic; ≤ 0.2% water
Use Level: 1-10%; 0.01-3% (as wetting agent)
Toxicology: LD50 (oral, rat) > 30 g/kg; mild skin irritant; nonirritating to eyes
Trade Name Reference

Crillet 1 Super  [Croda Inc http://www.croda.com; http://www.crodausa.com]
Chem. Descrip.:  PEG (20) sorbitan monolaurate  See Polysorbate 20
CAS 9005-64-5 (generic)
Uses:  Solubilizer in oil-sol. vitamins and mouthwashes; wetting agent for actives such as calamine, menthol and phenol; used in pharmaceutical topicals, ophthalmics, parenterals and oral preps.
Regulatory:  FDA Inactive Ingredients Guide listed
Properties:  Cl. yel. liq.; HLB 16.7; nonionic

Crillet 3  [Croda Inc http://www.croda.com; http://www.crodausa.com]
Chem. Descrip.:  Polysorbate 60
CAS 9005-67-8 (generic)
Uses:  O/w emulsifier and wetting agent for oral, topical, ophthalmic, and parenteral pharmaceuticals; used with Crills to solubilize actives in syrups, in prep. of oral emulsions, as mild emulsifiers in ointments, creams, lotions
Properties:  Yel. liq. gels to soft solid on cooling; sol. in water, ethyl, isopropyl, and oleyl alcohols, oleic acid; disp. in propylene glycol; partly sol. in IPM; insol. in propylene glycol, min. oil, olive oil; HLB 14.9; acid no. 2 max.; sapon. no. 45-55; hyd. no. 81-96; nonionic; 97% conc.
Use Level:  0.5-5%
Toxicology:  LD50 (oral, rat) > 38 g/kg; mild skin irritant; nonirritating to eyes
Storage:  Store under cool, dry conditions

Crillet 3 NF  [Croda Inc http://www.croda.com; http://www.crodausa.com]
Chem. Descrip.:  Polysorbate 60 NF
CAS 9005-67-8 (generic)
Uses:  Surfactant, o/w emulsifier, wetting agent, suspending agent, solubilizer for creams, gels, pharmaceuticals (oral, topical, ophthalmic, parenteral doses); tablet lubricant
Features:  Produces stable emulsions; multipurpose
Regulatory:  FDA 21CFR §172.836, 172.842
Properties:  Yel. visc. liq. to soft solid; sol. in water, ethanol, oleyl alcohol, oleic acid, IPA; disp. in propylene glycol; partly sol. in IPM; insol. in propylene glycol, min. oil, olive oil; HLB 14.9; acid no. 2 max.; sapon. no. 45-55; hyd. no. 81-96; nonionic; 3% max. water
Use Level:  0.5-15%
Toxicology:  LD50 (oral, rat) > 38 g/kg; mild skin irritant; nonirritating to eyes

Crillet 4  [Croda Inc http://www.croda.com; http://www.crodausa.com; Croda Chem. Europe Ltd http://www.croda.co.uk]
Chem. Descrip.:  Polysorbate 80 NF
CAS 9005-65-6
Uses:  O/w emulsifier and wetting agent for oral, topical, ophthalmic, and parenteral pharmaceuticals; used with Crills to solubilize actives in syrups, in prep. of oral emulsions, as mild emulsifiers in ointments, creams, lotions; solubilizer producing stable vitamin and essential oil emulsions
Properties:  Yel. amber cl. liq.; faint char. odor; sol. in water, ethyl, isopropyl, and oleyl alcohols, oleic acid; HLB 15.0; acid no. 2 max.; sapon. no. 45-55; hyd. no. 65-80; pH 6-7 (5%); surf. tens. 42.5 dynes/cm (0.1%); nonionic; 97% conc.
Use Level:  0.5-5%
Toxicology:  LD50 (oral, rat) > 38 g/kg; nonirritating to eyes
Storage:  Store under cool, dry conditions

Trade Name Reference

Crillet 41 [Croda Chem. Europe Ltd http://www.croda.co.uk]
Chem. Descr.: Polysorbate 81
CAS 9005-65-6
Uses: Solubilizer, emulsifier, wetting agent for pharmaceutical applics.
Regulatory: FDA 21 CFR §176.210; 40 CFR §180.1001(c) exempt
Properties: Amber liq.; sol. in ethanol, oleyl alcohol, IPM, oleic acid, kerosene, butyl stearate; partly sol. in water, olive oil, xylene, trichlorehylene; HLB 10.0; acid no. 2 max.; sapon no. 96-104; hyd. no. 134-150; nonionic; 97% conc.

Crillet 45 [Croda Chem. Europe Ltd http://www.croda.co.uk]
Chem. Descr.: Polysorbate 85
CAS 9005-70-3
Uses: Solubilizer, emulsifier, wetting agent for pharmaceutical applics.
Regulatory: FDA 21 CFR §176.210, 178.3400; 40 CFR §180.1001(c)(e) exempt
Properties: Amber cl. visc. liq.; sol. in ethyl and oleyl alcohols, IPM, oleic acid, kerosene, trichlorethylene, butyl stearate; HLB 11.0; acid no. 2 max.; sapon. no. 82-95; hyd. no. 39-52; surf. tens. 41 dynes/cm (0.1%); nonionic; 97% conc.

Crinipan® AD [Symrise USA http://www.symrise.com]
Chem. Descr.: Climbazole
CAS 38083-17-9; EINECS/ELINCS 253-775-4
Uses: Preservative, antidandruff agent in cosmetics
Properties: Wh. to pale brmsh. crystalline powd., sl. odor; sol. in ethanol, 1,2-propylene glycol (20 C); insol. in water; m.w. 292.8; vapor pressure < 0.1 mbar (80 C); m.p. 94-98 C
Toxicology: LD50 (oral, rat) 400 mg/kg, (dermal, rat) > 5,000 mg/kg; harmful if ing.; do not breathe dust
Environmental: Very toxic to aquatic organisms; may cause long-term adverse effects in the aquatic environment
Storage: 3 yrs. shelf-life when stored in an ambient temp. (40 C), in tightly closed original containers

Chem. Descr.: Stearic acid
CAS 67701-03-5; EINECS/ELINCS 266-928-5
Uses: Emollient, emulsifier, thickener in pharmaceuticals
Regulatory: Not regulated for transport
Environmental: Biodeg. (28 d) > 90%
Precaution: Wear gloves, goggles, overall skin protection; avoid entry to sewers, drain and surface water
Storage: Store @ R.T. in original sealed container protected from heat sources

Crodacol 1618 [Croda Inc http://www.croda.com; http://www.crodausa.com]
Chem. Descr.: Cetearyl alcohol
CAS 8005-44-5; EINECS/ELINCS 267-008-6
Uses: Emollient, emulsifier, emulsion stabilizer, opacifier, visc. control agent in pharmaceutical creams; antiseptic in topical anti-infective prods.

Crodacol C-90 [Croda Inc http://www.croda.com; http://www.crodausa.com]
Chem. Descr.: Cetyl alcohol EP
CAS 36653-82-4; EINECS/ELINCS 253-149-0
Uses: Viscosity and structure modifier in pharmaceutical creams, lotions and anhydrous salves; water absorption aid in ointments and w/o emulsions; used in otic and ophthalmic preparations, suppositories and vaginal preparations, delayed release solid dosage tablets; anhydrous sticks and salves
Regulatory: USP/NF, EP, FDA Inactive Ingredients Guide listed
Properties: Wh. waxy solid
Toxicology: TSCA listed

Chem. Descr.: Cetyl alcohol EP
CAS 36653-82-4; EINECS/ELINCS 253-149-0
Uses: Viscosity modifier, stiffening agent,
Trade Name Reference

coemulsifier, lubricant, m.p. modifier, opacifier, and emulsion stabilizer used in pharmaceutical topical cream formulations; used with other excipients in tablets and capsules

Toxicology: TSCA listed

Crodacol C-95 NF [Croda Inc  
http://www.croda.com;  
http://www.crodausa.com]

Chem. Descrip.: Cetyl alcohol NF
CAS 36653-82-4; EINECS/ELINCS 253-149-0

Uses: Emulsion thickener, stabilizer, and coemulsifier for pharmaceutical suppositories, lotions, creams, and ointments; mixed with petrolatum to increase water retention; mixed with other excipients for oral tablets and capsules; structural agent in antiperspirant sticks

Properties: Wh. to cream flakes; sol. in IPA; sol. warm in min. oil, propylene glycol; m.p. 45-50 C; HLB 14.78; acid no. 0.3 max.; iodine no. 3 max.; sapon. no. 1 max.; hyd. no. 218-238; 95% conc.

Use Level: 2-30%

Toxicology: LD50 (oral, rat) > 20 g/kg; used with other excipients in tablets and capsules

Crodacol CS90 EP [Croda Chem. Europe Ltd  
http://www.croda.co.uk]

Chem. Descrip.: Cetearyl alcohol
CAS 8005-44-5; EINECS/ELINCS 267-008-6

Uses: Viscosity and structure modifier in pharmaceutical creams, lotions and anhydrous salves; water absorption aid in ointments and w/o emulsions; used in otic and ophthalmic preparations, suppositories and vaginal preparations, delayed release solid dosage tablets; anhydrous sticks and salves

Regulatory: EP

Properties: Wh. waxy solid

Crodacol S95 EP [Croda Chem. Europe Ltd  
http://www.croda.co.uk]

Chem. Descrip.: Stearyl alcohol
CAS 112-92-5; EINECS/ELINCS 204-017-6

Uses: Emulsion thickener, stabilizer, and coemulsifier for pharmaceutical suppositories, lotions, creams, and ointments; mixed with petrolatum to increase water retention; mixed with other excipients for oral tablets and capsules; structural agent in antiperspirant sticks

Features: Produces stiffer creams than Crodacol C-95 NF

Properties: Wh. flakes; sol. in IPA; sol. warm in min. oil, propylene glycol; insol. in water; HLB 13.93

Use Level: 2-30%; 5-25% (oral prods.)

Toxicology: LD50 (oral, rat) > 5 g/kg; nonirritating to skin; minimal eye irritant; nonsensitizer

Crodafos CES [Croda Inc  
http://www.croda.com;  
http://www.crodausa.com; Croda Chem. Europe Ltd  
http://www.croda.co.uk]

Chem. Descrip.: Cetearyl alcohol, dicetyl phosphate, and ceteth-10 phosphate

Uses: Emulsifier for topical pharmaceutical creams and lotions

Features: Rapid delivery of actives to the skin; water-resist.; extremely stable emulsion in o/w systems

Properties: Wh. to off-wh. flake; char. odor; partly sol. in warm IPA; disp. in warm min. oil, propylene glycol, water; m.p. 51-58 C; acid no. 28-38; mild anionic

Use Level: 5-10%

Crodafos CP-50 [Croda Inc  
http://www.croda.com;  
http://www.crodausa.com]

Chem. Descrip.: Cetyl phosphate and stearic acid

Uses: Emulsifier and emulsion stabilizer for skin creams and lotions, sunscreens, aftersun preps., shaving balms

Features: Rec. for use with nonionic emulsifier; remains stable over wide pH range

Properties: Wh. to pale yel. flake; mild char. odor; acid no. 225-235; sapon. no. 250-270; anionic; 50% conc.
Trade Name Reference

**Use Level:** 0.5-5%

**Crodafos CS20A** [Croda Chem. Europe Ltd http://www.croda.co.uk]

**Chem. Descrip.:** Cetearyl alcohol, ceteth-20 phosphate, and dicetyl phosphate

**Uses:** Emulsifier, visc. modifier for sunscreens

**Features:** For emulsions with high act. loads or med. to low visc. prods.; provides fast release of actives; naturally substantive to skin; leaves a conditioned afterfeel; contains no DEA; low m.p.

**Properties:** Pastille

**Crodafos N3A** [Croda Inc http://www.croda.com; http://www.crodausa.com; Croda Chem. Europe Ltd http://www.croda.co.uk]

**Chem. Descrip.:** Oleth-3 phosphate

**CAS 39464-69-2**

**Uses:** Surfactant, conditioner, o/w emulsifier, gellant for pharmaceuticals; corrosion inhibitor and antigellant in aerosol antiperspirant systems

**Features:** Spreads easily over the skin

**Properties:** Golden liq.; faint fatty odor; sol. in alcohol, water; sp.gr. 1.02-1.08; acid no. 3 max.; hyd. no. 55-67; pH 5-7 (10% aq.); nonionic; 100% act.

**Use Level:** 0.5-5%

**Toxicology:** Irritating to skin and may cause serious eye damage

**Environmental:** Biodeg.

**Crodalan AWS** [Croda Inc http://www.croda.com; http://www.crodausa.com; Croda Chem. Europe Ltd http://www.croda.co.uk]

**Chem. Descrip.:** Polysorbate 80, cetyl acetate, acetylated lanolin alcohol

**Uses:** Emollient, superfatting agent, o/w emulsifier, dispersant, wetting agent, solubilizer used in pharmaceuticals

**Properties:** Golden liq.; faint fatty odor; sol. in alcohol, water; sp.gr. 1.02-1.08; acid no. 3 max.; hyd. no. 55-67; pH 5-7 (10% aq.); nonionic; 100% act.

**Use Level:** 1-5%

**Crodalan LA** [Croda Inc http://www.croda.com; http://www.crodausa.com; Croda Chem. Europe Ltd http://www.croda.co.uk]

**Chem. Descrip.:** Cetyl acetate and acetylated lanolin alcohol

**Uses:** Emollient, penetrant, wetting agent

**Crodafos CS20A** used in pharmaceuticals and enhance to barrier action against urine and its decomposition prods in baby care

**Properties:** Pale yel. clear, thin mobile liq.; odorless; sol. in min. oil, esters; cloud pt. 20 C; acid no. 2 max.; iodine no. 10 max.; sapon. no. 180-200; hyd. no. 8 max.; nonionic; 100% act.

**Use Level:** 2-10%

**Crodamol AB** [Croda Chem. Europe Ltd http://www.croda.co.uk]

**Chem. Descrip.:** C12-15 alkyl benzoate

**CAS 68411-27-8; EINECS/ELINCS 270-112-4**

**Uses:** Emollient, solvent in pharmaceutical creams and lotions

**Features:** Spreads easily over the skin

**Properties:** Colorless to pale straw liq.; sol. in castor oil, corn oil, min. oil, oleyl alcohol, ethanol; sp.gr. 0.92; visc. 13.7 cst

**Use Level:** 5-10%

**Toxicology:** LD50 (oral, rat) 13.6 g/kg; moderate skin irritant; nonirritating to eyes

**Environmental:** Biodeg.

**Crodamol CP** [Croda Inc http://www.croda.com; http://www.crodausa.com; Croda Chem. Europe Ltd http://www.croda.co.uk]

**Chem. Descrip.:** Cetyl palmitate

**CAS 540-10-3; EINECS/ELINCS 208-736-6**

**Uses:** Lubricant, emollient, plasticizer, stiffener, bodying agent for topical pharmaceuticals

**Features:** Spermaceti wax replacement

**Properties:** Spermaceti wax replacement

**Use Level:** 3-10%

**Crodamol DA** [Croda Chem. Europe Ltd
Trade Name Reference

http://www.croda.co.uk]
Chem. Descrip.: Disopropyl adipate
CAS 6938-94-9; EINECS/ELINCS 230-072-0
Uses: Emollient, wetting agent, solvent, superfatting agent in pharmaceutical topical creams and lotions
Properties: Water-wh. liq., almost odorless; sol. in castor oil, corn oil, min. oil, oleyl alcohol, ethanol; sp.gr. 0.950-0.962; visc. 3.9 cst; f.p. -1 C; acid no. 0.5 max.; sapon. no. 480-500; ref. index 1.422-1.424

Crodamol EO  [Croda Inc
http://www.croda.com;

Chem. Descrip.: Ethyl oleate NF
CAS 111-62-6; EINECS/ELINCS 203-889-5
Uses: Vehicle, solvent, visc. reducer for drug delivery systems, for parenteral and topical pharmaceuticals
Features: Effective with triglyceride oils; nongreasy feel
Properties: Colorless liq.; sol. in min. oil, IPA; insol. in water, propylene glycol; sp. gr. 0.870; HLB 10.75; ref. index 1.4500
Use Level: 2-50%

Crodamol GTCC  [Croda Inc
http://www.croda.com;
http://www.crodausa.com;
Croda Food Services Ltd http://www.croda-foods.co.uk; Croda Chem. Europe Ltd http://www.croda.co.uk]
Chem. Descrip.: Glyceryl tricaprylate/caprate
See Caprylic/capric triglyceride
CAS 65381-09-1; EINECS/ELINCS 265-724-3
Uses: Nutritional source of lipids; solvent, vehicle, stabilizer, emollient, spreading agent, diluent for oral, parenteral, and topical pharmaceuticals; solvent carrier for flavors and fragrances
Features: Exc. dermatological props.; imparts fine, soft emolliency; exc. oxidative stability; nongreasy; substitute for min. hydrocarbon oils
Properties: Colorless to pale straw cl. liq.; sol. in castor oil, corn oil, min. oil, oleyl alcohol, ethanol; sp.gr. 0.950; visc. 30 cst; acid no. 0.2 max.; iodine no. 1 max.; sapon. no. 325-345; nonionic; 100% conc.
Use Level: 2-15%
Storage: Store under cool, dry conditions

Crodamol GTCC-PN  [Croda Inc
http://www.croda.com;
http://www.crodausa.com]
Chem. Descrip.: Caprylic/capric triglyceride
CAS 65381-09-1; EINECS/ELINCS 265-724-3
Uses: Nutritional source of lipids; solvent, vehicle, stabilizer, emollient, spreading agent in oral, topical, and parenteral pharmaceuticals
Features: Nongreasy; low visc.; exc. oxidative stability
Properties: Colorless liq.; sol. in min. oil, IPA; insol. in water, propylene glycol; sp. gr. 0.945; m.p. 36-39 C; HLB 7.52; acid no. 1 max.; sapon. no. 120-130
Use Level: 2-15%

Crodamol MM  [Croda Inc
http://www.croda.com;
http://www.crodausa.com; Croda Chem. Europe Ltd http://www.croda.co.uk]
Chem. Descrip.: Myristyl myristate
CAS 3234-85-3; EINECS/ELINCS 221-787-9
Uses: Emollient, superfatting agent, visc. builder in topical pharmaceutical emulsions, lotions, creams, and ointments; improves texture and stability of semisolids; substitute for spermaceti wax and/or beeswax in pharmaceutical formulations
Features: Nongreasy; modifies props. of hydrocarbon wax systems aiding feel; melts @ body temp.
Properties: Off-wh. waxy solid.; sol. in min. oil, IPM, IPA, oleyl alcohol; insol. in water, propylene glycol; sp.gr. 0.832-0.837 (50 C); m.p. 36-39 C; HLB 7.52; acid no. 1 max.; sapon. no. 120-130
Use Level: 3-10%
Toxicology: LD50 (oral, rat) > 5 g/kg; mild skin irritant, minimal eye irritant

Crodamol OP  [Croda Chem. Europe Ltd
http://www.croda.co.uk]
Chem. Descrip.: 2-Ethylhexyl palmitate See Octyl palmitate
CAS 29806-73-3; EINECS/ELINCS 249-862-1
Uses: Modifies occlusion of creams, ointments, and oils
Properties: Colorless liq., mild odor; sol. in castor oil, corn oil, min. oil, oleyl alcohol, ethanol; sp.gr. 0.850-0.860; visc. 12.7 cSt

Crodamol OPG  [Croda Inc
http://www.croda.com;

Chem. Descrip.: Octyl pelargonate
CAS 59587-44-9; EINECS/ELINCS 261-819-9
Uses: Penetrant, emollient, moisturizer, pigment wetting agent/dispersant for pharmaceuticals
Trade Name Reference

Crodamol PC [Croda Chem. Europe Ltd
http://www.croda.co.uk]
Chem. Descrip.: Propylene glycol dicaprylate
CAS 7384-98-7; EINECS/ELINCS 230-962-9
Uses: Solvent in injectable preparations,
      lipophilic drugs, creams and ointments,
      medicaments in suppositories; vehicle and
      absorption enhancer in rectal preps.;
      placebo in gelatin capsules
Features: Oxidatively stable; chemically
      stable/low reactivity; low cloud pt.; lipophilic
Properties: Colorless to pale straw liq.; sol.
      in castor oil, corn oil, min. oil, oleyl alcohol,
      ethanol.; sp.gr. 0.917-0.923; visc. 9.3 cSt

Use Level: 1-12%
Toxicology: LD50 (oral, rat) > 5 g/kg; minimal
      skin irritant, nonirritating to eyes; esp. low
      comedogenic potential

Crodamol PMP [Croda Inc
http://www.croda.com;
http://www.crodausa.com; Croda Chem.
Europe Ltd http://www.croda.co.uk]
Chem. Descrip.: PPG-2 myristyl ether
propionate
CAS 111497-87-1
Uses: Emollient, lubricant, solvent, emulsion
      stabilizer for topical pharmaceuticals (burn
      creams, acne creams and lotions, antibiotic
      ointments, emulsions); spreading agent,
      antitackifier in ointments and creams
Features: Nonoily; dry, lt. greaseless feel; can
      partially replace min. oil to reduce greasy feel;
      enhances freeze/thaw stability; allows easier
      emulsification of unctuous masses
Properties: Gardner 1 max. colorless cl. liq., very
      mild char. odor; sol. (1%) in min. oil, IPM, oleyl
      alcohol, ethanol/water, lanolin, cetyl alcohol;
      sp.gr. 0.870-0.880; visc. 8.9 cSt; HL8 8.03;
      cloud pt. -5 C; acid no. 0.5 max.; iodine no. 1.0
      max.; sapon. no. 140-155
Use Level: 5-20%
Toxicology: LD50 (oral, rat) > 5 g/kg; minimal
      skin irritant, nonirritating to eyes; esp. low in
      comedogenic potential

Crodamol PTC [Croda Inc

Uses: Lubricant, emollient for skin care
      prods., topical pharmaceuticals (burn
      creams, acne creams and lotions, antibiotic
      ointments)
Features: Nongreasy
Properties: Lt. yel. lipophilic visc. liq.; sol. in
Trade Name Reference

5 max.; iodine no. 1 max.; sapon. no. 109-120
Use Level: 3-10%
Toxicology: LD50 (oral, rat) > 5 g/kg; nonirritating to skin, minimal eye irritant

Crodamol TDNP [Croda Inc
http://www.croda.com;
http://www.crodausa.com]
Chem. Descrip.: Tridecyl neopentanoate
CAS 106436-39-9
Uses: Binder, emollient, lubricant, gloss aid, spreading agent for pharmaceuticals

Crodamol W [Croda Inc
http://www.croda.com;
http://www.crodausa.com; Croda Chem. Europe Ltd http://www.croda.co.uk]
Chem. Descrip.: Stearyl heptanoate
CAS 66009-41-4; EINECS/ELINCS 266-065-4
Uses: Emollient and water repellent for topical pharmaceuticals (burn creams, acne creams and lotions, antibiotic ointments, other topical prods.)
Features: Nongreasy; melts rapidly on applic. to skin; syn. preen gland wax
Properties: Wh. waxy solid; mild odor; sol. in castor oil, corn oil, min. oil, oleyl alcohol, ethanol, IPA; sp.gr. 0.850-0.855; m.p. 23-27 C
Use Level: 2-20%
Toxicology: LD50 (oral, rat) > 16 g/kg; mild skin and eye irritant

Crodarom Calendula O [Croda Inc
http://www.croda.com;
http://www.crodausa.com]
Chem. Descrip.: Soybean (Glycine soja) oil, calendula officinalis extract, tocopherol
Uses: Ingrd. for personal care prods., helping to heal bruises, alleviate skin conditions
Features: Botanical extract of Flores calendulae
Properties: Cl. yel. liq., char. odor; sp.gr. 0.918-0.926; acid no. 0.5-1.0; sapon. no. 180-200; ref. index 1.473-1.476

Crodarom Chamomile O [Croda Inc
http://www.croda.com;
http://www.crodausa.com]
Chem. Descrip.: Caprylic/capric triglycerides and matricaria (Chamomilla recutita) extract
See Caprylic/capric triglyceride
Uses: Promotes wound healing, helps relieve effects of eczema
Features: Botanical extract of Flores matricariae chamomille L.
Properties: Bluish-grn. cl. liq., char. odor; sp.gr. 0.94-0.95; ref. index 1.448-1.500

Crodarom Rosemary Oil forte [Croda Inc
http://www.croda.com;
http://www.crodausa.com]
Chem. Descrip.: Caprylic/capric triglyceride and rosemary (Rosmarinus officinalis) extract
Uses: Antiseptic for bath and shower prods., skin cleansers, treatment creams, anti-dandruff preps., and other hair care prods.
Properties: Yel. cl. liq.; char. aromatic odor; sp.gr. 0.940-0.960; acid no. 2.0 max.; ref. index 1.440-1.460
Use Level: 3-10%

Crodasinic LS30 [Croda Inc
http://www.croda.com;
http://www.crodausa.com; Croda Chem. Europe Ltd http://www.croda.co.uk]
Chem. Descrip.: Sodium N-lauroyl sarcosinate and water
See Sodium lauroyl sarcosinate
CAS 137-16-6; EINECS/ELINCS 205-281-5
Uses: Surfactant, foaming agent, wetting agent, bacteriostat, enzyme inhibitor (hexokinase) for oral hygiene (mouthwashes, toothpaste), oral and topical pharmaceuticals, surgical scrubs; penetrant in pharmaceuticals
Features: Mild; compat. with cationics; substantive to skin; stable to alkaline hydrolysis and under mod. acid conditions at normal temps.
Properties: Cl. to sl. turbid liq.; water-sol.; HLB 30; anionic; 30% act.
Use Level: 1-3%

Crodasinic LS30 NP [Croda Inc
http://www.croda.com;
http://www.crodausa.com]
Chem. Descrip.: Sodium lauryl sarcosinate
See Sodium lauryl sarcosinate
CAS 137-16-6; EINECS/ELINCS 205-281-5
Uses: Surfactant, wetting agent, enzyme

Handbook of Pharmaceutical Additives, Third Edition 195
inhibitor, bacteriostat, foaming agent for oral and topical pharmaceuticals, oral care, surgical scrubs

Features: Compat. with germicides

Properties: Cl. to sl. turbid liq.; sol. in water, propylene glycol; insol. in min. oil, IPA; HLB 16.0; anionic

Use Level: 1-3%

Crodasinic LS35 [Croda Chem. Europe Ltd http://www.croda.co.uk]

Chem. Descrip.: Sodium N-lauroyl sarcosinate and water See Sodium lauroyl sarcosinate

CAS 137-16-6; EINECS/ELINCS 205-281-5

Uses: Foaming agent, wetting agent, lubricant, bacteriostat, penetrant in dental preps., pharmaceuticals, depilatories

Regulatory: DOT nonregulated/nonhazardous; SARA §313 nonreportable

Properties: Essentially colorless cl. liq.; sol. in water; anionic; 35% act.

Toxicology: LD50 (oral, rat) > 5 g/kg; contact with undiluted material may cause skin and eye irritation; may cause severe eye irritation; may aggravate pre-existing dermatological conditions

Environmental: Biodeg.

Precaution: Incompat. with strong oxidizing agents

Hazardous Decomp. Prods.: Burning will produce COx, NOx

Storage: Store in cool, dry place

Crodasinic LS95 NP [Croda Inc http://www.croda.com; http://www.crodausa.com]

Chem. Descrip.: Sodium lauryl sarcosinate

See Sodium lauryl sarcosinate

CAS 137-16-6; EINECS/ELINCS 205-281-5

Uses: Surfactant, wetting agent, enzyme inhibitor (hexokinase), bacteriostat, foaming agent for oral and topical pharmaceuticals, oral care, surgical scrubs

Features: Compat. with germicides

Properties: Wh. powd.; sol. in water, warm propylene glycol; disp. in warm min. oil; insol. in IPA; HLB 16.0; anionic

Use Level: 1-3%

Crodasinic LS95 [Croda Chem. Europe Ltd http://www.croda.co.uk]

Chem. Descrip.: Sodium N-lauroyl sarcosinate and water

CAS 137-16-6; EINECS/ELINCS 205-281-5

Uses: Foaming agent, wetting agent, lubricant, bacteriostat, penetrant in dental preps., pharmaceuticals

Regulatory: DOT nonregulated/nonhazardous; SARA §313 nonreportable

Properties: Wh. powd.; sol. in water, warm propylene glycol; disp. in warm min. oil; insol. in IPA; HLB 16.0; anionic

Use Level: 1-3%

Crodasinic LS95 NP [Croda Inc http://www.croda.com; http://www.crodausa.com]

**CAS** 9004-99-3

**Uses:** O/w emulsifier for pharmaceutical creams, lotions, and ointments; wetting agent, solubilizer for perfumes or aq. alcoholic preparations; dispersant

**Properties:** Off-wh. waxy solid; sol. in ethyl and cetostearyl alcohol, water; HLB 18.8; sapon. no. 10-14; nonionic; 97% conc.

**Crodex A [Croda Chem. Europe Ltd](http://www.croda.co.uk)**

**Chem. Descrip.:** Cetostearyl alcohol and sodium lauryl sulfate

**See:** Cetearyl alcohol

**Uses:** O/w emulsifier for suppository bases, emulsified ointments

**Features:** Emulsifying wax BP; stable to weak acids, alkalis and some metal salts

**Regulatory:** EP

**Properties:** Wh. to pale yel. waxy solid; faint char. odor; water-disp.; anionic; 100% conc.

**Crodex C [Croda Chem. Europe Ltd](http://www.croda.co.uk)**

**Chem. Descrip.:** Cetearyl alcohol and cetrimonium bromide

**Uses:** Emulsifier, bactericide for pharmaceuticals

**Features:** Emulsifying wax BPC

**Properties:** Wh. waxy solid; faint char. odor; water-disp.; cationic; 100% conc.

**Crodex N [Croda Chem. Europe Ltd](http://www.croda.co.uk)**

**Chem. Descrip.:** Cetosteryl alcohol and ceteth-20

**See:** Cetearyl alcohol

**Uses:** Emulsifier, wetting agent, penetrant for most emollient materials in dermatological preps.

**Features:** Heat stable (autoclavable)

**Regulatory:** FDA Inactive Ingredients Guide listed
Trade Name Reference

Croduret 40LD [Croda Chem. Europe Ltd http://www.croda.co.uk]
Chem. Descrip.: PEG-40 hydrogenated castor oil
CAS 61788-85-0
Uses: Solubilizer used in a wide variety of oral formulations incl. medicated mouthwashes, vitamins, essential oils and pharmaceuticals; emollient and superfatting agent in pharmaceutical topicals
Features: Excellent oxidative stability
Properties: Wh. to off-wh. semisolid; nonionic; HLB 13.0; 100% conc.

Croduret 50 Special [Croda Chem. Europe Ltd http://www.croda.co.uk]
Chem. Descrip.: PEG-50 hydrogenated castor oil
CAS 61788-85-0
Uses: Superfatting agent, emollient, and emulsifier for pharmaceutical topical creams and lotions; solubilizer used in a wide variety of oral formulations incl. medicated mouthwashes
Features: Excellent oxidative stability
Properties: Wh. soft paste; tasteless; water-sol.; liquefies @ 30 C; HLB 14.1; nonionic; 100% conc.

Cromul EM 0685 [Croda Chem. Europe Ltd http://www.croda.co.uk]
Chem. Descrip.: Ceteth-5 and ceteareth-7
Uses: Emulsifier and opacifier for pharmaceutical creams and lotions
Properties: Soft waxy solid; HLB 10.2; nonionic; 100% conc.

Cropure® Orange Roughy [Croda Chem. Europe Ltd http://www.croda.co.uk]
Chem. Descrip.: Orange roughy (Hoplostethus) oil, BHT (preservative) See Orange roughy oil
Uses: Solubilizer for pharmaceuticals
Properties: APHILA 50 max. color, cl. oily liq.; essentially odorless; acid no. 1 max.; iodine no. 80-95; sapon. no. 95-110; hyd. no. 5 max.

Croquat L [Croda Inc http://www.croda.com; http://www.crodausa.com; Croda Chem. Europe Ltd http://www.croda.co.uk]
Chem. Descrip.: Lauridimonium hydroxypropyl hydrolyzed collagen and water See Laurydimonium hydroxypropyl hydrolyzed collagen
CAS 118441-80-8
Uses: Substantive conditioner in medicated hair care products; secondary antimicrobial properties
Properties: Cl. yel. visc. liq.; m.w. 2500; essentially water-sol.; cationic; 40% act.
Use Level: 0.5-2.5%

Crossential® GLA E95 SR [Croda Inc http://www.croda.com; http://www.crodausa.com]
Chem. Descrip.: High purity γ-linolenic acid
CAS 506-26-3
Uses: Used in the treatments of inflammatory conditions e.g. eczema, rheumatoid arthritis, diabetic neuropathy, cardiovascular disease (with omega-3 lipids), PMS and mastalgia, therapeutic skin care products.
Features: Low peroxide and para-anisidine values
Properties: Cl. pale yel. liq.; 95% min.

Crossential® EL90 [Croda Inc http://www.croda.com; http://www.crodausa.com]
Chem. Descrip.: Ethyl linolate
CAS 544-35-4; EINECS/ELINCS 208-868-4
Uses: Solvent for topical pharmaceuticals
Features: Props. similar to ethyloleate
Properties: Yel. liq.; sol. in min. oil, IPA; insol. in water, propylene glycol; HLB 15.95; 90% as ethyl ester
Use Level: 0-100%

Chem. Descrip.: γ-Linoleic acid derived from evening primrose oil See Linoleic acid
CAS 60-33-3; EINECS/ELINCS 200-470-9
Uses: Dietary supplements; drug delivery for oral and topical pharmaceuticals; indicated for treatment of disorders such as eczema, rheumatoid arthritis, diabetic neuropathy, cardiovascular disease (with omega-3 lipids), PMS and mastalgia
Features: Naturally derived plant lipid
Properties: Yel. liq.; sol. in min. oil, IPA; insol. in water, propylene glycol; HLB 7.12; 25% as triglyceride
Use Level: 0-100%
Chem. Descrip.: γ-Linolenic acid derived from borage seed oil. See Linolenic acid
CAS 463-40-1; EINECS/ELINCS 207-334-8
Uses: Nutritional applics.; drug delivery for oral and topical pharmaceuticals
Properties: Yel. liq.; sol. in min. oil, IPA; insol. in water, propylene glycol; HLB 7.21; 38% as triglyceride
Use Level: 0-100%

Crossential® GMO [Croda Inc http://www.croda.com; http://www.crodausa.com]
Chem. Descrip.: Glycerol monooleate. See Glycerol oleate
Chem. Analysis: 90% monoester, 84% oleic acid
CAS 37220-82-9; EINECS/ELINCS 247-038-6
Uses: Excipient for drug delivery in controlled release formulations; boosts membrane penetration; bioavailability enhancer, w/o emulsifier, emulsion stabilizer; stabilizer for peptide actives; used in tablets, periodontal drug delivery systems, nasal dosage forms
Features: Vegetable-derived; suitable for lipid and water soluble actives
Regulatory: EP, GRAS, FDA Inactive Ingredients Guide listed
Properties: Pale yel. liq.; sol. in min. oil, IPA; insol. in water; propylene glycol; HLB 3.3; 38% as triglyceride

Crossential® L90 [Croda Inc http://www.croda.com; http://www.crodausa.com]
Chem. Descrip.: Linoleic acid
CAS 60-33-3; EINECS/ELINCS 200-470-9
Uses: Absorp. enhancer for oral, topical, nasal, and transdermal pharmaceuticals; essential fatty acid and parent compd. of Omega 6 family; starting material for pharmaceutical derivatives
Properties: Pale yel. liq.; sol. in propylene glycol, IPA; min. oil; insol. in water; HLB 16.22; 90% as free fatty acid
Use Level: 0-100%

Toxicology: Low toxicity

Crossential® LN80 [Croda Inc http://www.croda.com; http://www.crodausa.com]
Chem. Descrip.: α-Linolenic acid. See Linolenic acid
Chem. Analysis: 80% min. free fatty acid purity
Trade Name Reference

dispersant for fragrances and other lipophilic materials; emollient, solubilizer for hydroalcoholic systems, external analgesic prods.

**Properties:** Yel. paste/liq.; sol. in water, ethanol, IPA, oleyl alcohol, maize oil; partly sol. in min. oil; HLB 15.0; acid no. 2 max.; sapon. no. 45-55; hyd. no. 70-90; nonionic

**Use Level:** 1-10%

**Toxicology:** Nonirritating to skin and eyes

**Chem. Descr.:** PEG-60 corn glycerides

**Uses:** Solubilizer, dispersant for lipophilic materials; emollient and solubilizer for hydroalcoholic systems, external analgesic products; protects against skin defatting in soaps and detergent scrubs; emulsifier, wetting agent, plasticizer in aerosols

**Properties:** Pale yel. visc. liq.; char. odor; insol. in water; sp.gr. 0.959; visc. 7.5 stokes; f.p. 15 F; i.b.p. 313 C; pour pt. -23 C; acid no. 2; iodine no. 86; sapon. no. 180; hyd. no. 164; 0.20% moisture

**Toxicology:** LD50 (oral, rat) > 5000 mg/kg; prolonged/repeated contact may cause skin irritation in some individuals; may cause sl. eye irritation; not expected to be toxic by ing.; single inh. exposure to vapors or mist not likely to be hazardous; TSCA listed

**Environmental:** Minimize entry into sewers, drainage systems

**Precaution:** May burn, but does not readily ignite; avoid high temps.; no sensitivity to explosion expected by mech. impact or static discharge; can react vigorously with oxidizing materials

**Hazardous Decomp. Prods.:** Incomplete combustion: CO, CO2, dense smoke; combustion may generate toxic gases, vapors, fumes

**HMIS:** Health 1, Flammability 1, Reactivity 0

**Storage:** Store in cool, dry place away from strong oxidizers and acids

---

**Chem. Descr.:** Refined castor (Ricinus communis) oil USP (99.98%), with BHA (0.02%)

**CAS:** 8001-79-4; EINECS/ELINCS 232-293-8

**Uses:** Emulsifier, emollient, pigment dispersant/wetter/cosolvent, lubricant, film-former for pharmaceuticals, medicine, antiperspirant sticks

**Regulatory:** FDA approval; DOT nonregulated; SARA §302/311/312/313 nonreportable; Calif. Prop. 65 reportable [BHA (0.02%)]; Canada DSL listed

**Properties:** Gardner 1- color; sp.gr. 0.959; visc. 7.5 stokes; pour pt. -23 C; acid no. 2; iodine no. 86; sapon. no. 180; hyd. no. 164; 0.20% moisture

**Toxicology:** Nonirritating to eyes; minimal skin irritant

**Environmental:** Minimize entry into sewers, drainage systems

**Precaution:** May burn, but does not readily ignite; avoid high temps.; no sensitivity to explosion expected by mech. impact or static discharge; can react vigorously with oxidizing materials

**Hazardous Decomp. Prods.:** Incomplete combustion: CO, CO2, dense smoke; combustion may generate toxic gases, vapors, fumes

**HMIS:** Health 1, Flammability 1, Reactivity 0

**Storage:** Store in cool, dry place away from strong oxidizers and acids

---

Crystalac® Confectioners Glaze [Mantrose Bradshaw Zinsser http://www.mbzgroup.com]

**Uses:** Pharmaceutical glaze for seed coating, core sealing, finish gloss, and ink base applics., esp. for automatic panning equip.

**Features:** Accelerated drying chars.
Trade Name Reference

Bradshaw Zinsser
http://www.mbzgroup.com
Chem. Descr.: Lac resin in alcohol  See Shellac

Uses: Pharmaceutical glaze for seed coating, core sealing, finish gloss, and ink base applincs., esp. for automatic panning equip.
Features: Accelerated drying chars.
Regulatory: USP/NF compliance; kosher

CS-10FG [Ducey Chem.]
Uses: Antifoam for pharmaceuticals, drugs
Storage: 6 mos. shelf life

CS-30FG [Ducey Chem.]
Uses: Antifoam for pharmaceuticals, drugs
Storage: 6 mos. shelf life

CS-100FG [Ducey Chem.]
Uses: Antifoam for pharmaceuticals, drugs
Storage: 6 mos. shelf life

CS-922 [Am. Casein
http://www.americancasein.com]
Chem. Descr.: Calcium sodium caseinate, spray dried
Uses: Solubilizer in pharmaceuticals
Regulatory: Kosher
Properties: Wh. to lt. cream fine free-flowing powd.; clean/bland odor/flavor; pH 6.6-7.7; 6% moisture
Storage: Store in cool, dry place

C*Sorbidex C [Cerestar
http://www.cerestar.com]
Chem. Descr.: Sorbitol syrup
CAS 50-70-4; EINECS/ELINCS 200-061-5
Uses: Sweetener in pharmaceuticals
Features: Crystallizing props.
Properties: Syrup

C*Sorbidex C 16121 [Cerestar
http://www.cerestar.com]
Chem. Descr.: Sorbitol liquid
CAS 50-70-4; EINECS/ELINCS 200-061-5
Uses: Taste masking and bodying agent; plasticizer in gelatin capsules; bulking agent, noncariogenic sweetening agent, anticrystallizing agent for sugar-free pharmaceutical solutions and syrups; stabilizer for drugs and vitamins in suspensions; emollient and humectant in pharmaceutical creams and emulsions; used in medicated chewing gums
Features: Crystallizing; does not undergo browning reactions in alkaline media; compatible with most active ingredients
Regulatory: USP/NF, EP, JP

Properties: Cl. colorless syrup; sweet taste

C*Sorbidex C 16122 [Cerestar
http://www.cerestar.com]
Chem. Descr.: Sorbitol liquid
CAS 50-70-4; EINECS/ELINCS 200-061-5
Uses: Taste masking and bodying agent; plasticizer in gelatin capsules; bulking agent, noncariogenic sweetening agent, anticrystallizing agent for sugar-free pharmaceutical solutions and syrups; stabilizer for drugs and vitamins in suspensions; emollient and humectant in pharmaceutical creams and emulsions; used in medicated chewing gums
Features: Crystallizing
Regulatory: USP/NF, EP, JP
Properties: Cl. colorless syrup; sweet taste

C*Sorbidex NC 16205 [Cerestar
http://www.cerestar.com]
Chem. Descr.: Sorbitol syrup
CAS 50-70-4; EINECS/ELINCS 200-061-5
Uses: Taste masking and bodying agent; plasticizer in gelatin capsules; bulking agent, noncariogenic sweetening agent, anticrystallizing agent for sugar-free pharmaceutical solutions and syrups; stabilizer for drugs and vitamins in suspensions; emollient and humectant in pharmaceutical creams and emulsions; used in medicated chewing gums
Features: Crystallizing
Regulatory: USP/NF, EP
Properties: Cl. colorless syrup; sweet taste

C*Sorbidex P 16616 [Cerestar
http://www.cerestar.com]
Chem. Descr.: Compressible sorbitol
CAS 50-70-4; EINECS/ELINCS 200-061-5
Uses: Plasticizer in gelatin capsules; bulking agent, noncariogenic sweetening agent, diluent in tablet, capsule and powder formulations; used in medicated chewing gums
Features: Fine grade; good compressibility and excellent workability on high speed tableting machines
Regulatory: USP/NF, EP, JP
Properties: Powd.; rapidly sol. in water

C*Sorbidex P 16656 [Cerestar
http://www.cerestar.com]
Chem. Descr.: Compressible sorbitol
CAS 50-70-4; EINECS/ELINCS 200-061-5
Uses: Plasticizer in gelatin capsules; bulking agent, noncariogenic sweetening agent,
Trade Name Reference

**C*Sorbidx P 16601 [Cerestar http://www.cerestar.com]**
Chem. Descrip.: Sorbitol
CAS 50-70-4; EINECS/ELINCS 200-061-5
Uses: Plasticizer in gelatin capsules; bulking agent, noncariogenic sweetening agent, diluent in tablet, capsule and powder formulations; used in medicated chewing gums
Features: Fine grade; compatible with and does not react with most active ingredients; good flow props.
Regulatory: DOT nonregulated; SARA §302/304/313 nonreportable, §311/312 fire hazard; Canada DSL, Korea listed
Properties: Sweet taste; rapidly sol. in water

**Culminal® MC 2000 [Hercules/Aqualon http://www.aqualon.com]**
Chem. Descrip.: Methylcellulose
CAS 9004-67-5
Uses: Thickener, stabilizer for ointments
Regulatory: DOT nonregulated; SARA §302/304/313 nonreportable, §311/312 fire hazard; Canada DSL, Korea listed
Properties: Wh. to off-wh. gran. powd.; 1% max. on 0.8 mm sieve, 55-90% on 0.2 mm sieve; odorless; sol. in cold water; insol. in hot water; sp.gr. 0.25; bulk dens. 200-500 g/l; visc. 2100-2900 mPa•s (2%, 20 C); pH 5-7 (1%); nonionic
Toxicology: ACGIH TLV/TWA 3 mg/m³ respirable dust; may cause eye/skin irritation by mech. abrasion; inh. of dust may cause respiratory tract irritation; ing. may cause laxative effect, constipation; TSCA listed
Precaution: Flamm. dust; static charges may cause flash fire; may form flamm. dust-air mixts.; incompat. with acids, oxidizing agents, alkalis, strong sunlight, UV light, free radicals; spillages may be slippery
Hazardous Decomp. Prods.: CO, CO₂, smoke
HMIS: Health 1, Flammability 1, Reactivity 0
Storage: Hygroscopic; store in cool, dry, clean, well-ventilated area @ 20 C in original pkg.; keep container closed when not in use; keep away from heat, ignition sources; blanket with inert gas when emptying bags near flamm. vapors

**Culminal® MC 3000 P [Hercules/Aqualon http://www.aqualon.com]**
Chem. Descrip.: Methylcellulose
CAS 9004-67-5
Uses: Thickener, stabilizer for ointments
Regulatory: DOT nonregulated; SARA §302/304/313 nonreportable, §311/312 fire hazard; Canada DSL, Korea listed
Properties: Wh. to off-wh. gran. powd.; 1-8% max. on 0.2 mm sieve; odorless; sol. in cold
Culmina® MC 7000 PF [Hercules/Aqualon http://www.aqualon.com]

Chem. Descrip.: Methylcellulose

CAS 9004-67-5

Uses: Thickener, stabilizer for ointments

Regulatory: DOT nonregulated; SARA §302/304/313 nonreportable, §311/312 fire hazard; Canada DSL, Korea listed

Properties: Wh. to off-wh. gran. powd.; <8% max. on 0.125 mm sieve; odorless; sol. in cold water; insp. in hot water; sp.gr. 0.25; bulk dens. 200-500 g/l; visc. 7000-9500 mPa•s (2%, 20 C); pH 5-7 (1%); nonionic

Toxicology: ACGIH TLV/TWA 3 mg/m³ respirable dust; may cause eye/skin irritation by mech. abrasion; inh. of dust may cause respiratory tract irritation; ing. may cause laxative effect, constipation

Precaution: Flamm. dust; static charges may cause flash fire; may form flamm. dust-air mixts.; incompat. with acids, oxidizing agents, alkalis, strong sunlight, UV light, free radicals; spillages may be slippery

Hazardous Decomp. Prods.: CO, CO₂; smoke

Storage: Hygroscopic; store in cool, dry, clean area in original pkg.; keep container closed when not in use; keep away from heat, ignition sources; blanket with inert gas when emptying bags near flamm. vapors

Culmina® MHEC 8000 [Hercules/Aqualon http://www.aqualon.com]

Chem. Descrip.: Methylhydroxyethylcellulose

See Methylhydroxyethylcellulose

CAS 9032-42-2

Uses: Thickener, stabilizer for ointments

Regulatory: DOT nonregulated; SARA §302/304/313 nonreportable, §311/312 fire hazard

Properties: Wh. to off-wh. gran. powd.; 1-8% max. on 0.2 mm sieve; odorless; sol. in cold water; insp. in hot water; sp.gr. 0.3-0.35; bulk dens. 200-500 g/l; visc. 6000-8000 mPa•s (2%, 20 C); nonionic

Toxicology: ACGIH TLV/TWA 3 mg/m³ respirable dust; may cause eye irritation; may cause skin irritation by mech. abrasion; inh. of dust may cause respiratory tract irritation

Environmental: Biodeg.

Precaution: Flamm. dust; static charges may cause flash fire; may form flamm. dust-air mixts.; incompat. with acids, oxidizing agents, alkalis, strong sunlight, UV light, free radicals; spillages may be slippery

Hazardous Decomp. Prods.: CO, CO₂; smoke

Storage: Hygroscopic; store in cool, dry area in original pkg.; keep container closed when not in use; keep away from heat, ignition sources, direct sunlight, UV radiation; blanket with inert gas when emptying bags near flamm. vapors

Culmina® MHEC 8000 PR [Hercules/Aqualon http://www.aqualon.com]

Chem. Descrip.: Methylhydroxyethylcellulose

See Methylhydroxyethylcellulose

CAS 9032-42-2

Uses: Thickener, stabilizer for ointments

Regulatory: DOT nonregulated; SARA §302/304/313 nonreportable, §311/312 fire hazard

Properties: Wh. to off-wh. gran. powd.; 1-8% max. on 0.8 mm sieve; 55-90% on 0.2 mm sieve; odorless; sol. in cold water; insp. in hot water; sp.gr. 0.3-0.35; bulk dens. 200-500 g/l; visc. 8500-11,500 mPa•s (2%, 20 C); nonionic

Toxicology: ACGIH TLV/TWA 3 mg/m³ respirable dust; may cause eye irritation; may cause skin irritation by mech. abrasion; inh. of dust may cause respiratory tract irritation; TSCA listed

Environmental: Biodeg.

Precaution: Flamm. dust; static charges may cause flash fire; may form flamm. dust-air mixts.; incompat. with acids, oxidizing agents, alkalis, strong sunlight, UV light,
free radicals; spillages may be slippery
Hazardous Decomp. Prods.: CO, CO₂, smoke
HMIS: Health 1, Flammability 1, Reactivity 0

Storage: Hygroscopic; store in dry, clean area in original pkg.; keep container closed when not in use; keep away from heat, ignition sources, direct sunlight, UV radiation; blanket with inert gas when emptying bags near flamm. vapors

Uses: Lubricant, tableting aid producing smooth, glossy surfs. on tablets; retardant at > 1%; separates incompat. medicaments; embeds hygroscopic actives
Features: High melting
Regulatory: JCID, NF, DAB compliance
Properties: Wh. to sl. yel. fine free-flowing powd.; particle size 30% < 10 μ; bulk dens. 350-410 g/l; m.p. 85-88 C; acid no. 3.1 max.; iodine no. 5 max.; sapon. no. 176-182; hyd. no. 154-162; 0.1% max. water
Storage: 1 yr. storage life in sealed original containers protected against moisture and stored below 40 C

Cutina® KD [Cognis Canada; Cognis GmbH/Care Chems. http://www.cognis.com]
Chem. Descrip.: Glyceryl stearate SE
CAS 11099-07-3
Uses: Base, emulsifier and fatting coagent for o/w pharmaceutical ointments and creams
Properties: Wh. to sl. ylsh. waxy compd., faint odor; solid. pt. 55-60 C; acid no. 7 max.; sapon. no. 150-165; hyd. no. 190-220; anionic
Storage: Protect against frost; 1 yr. storage life in sealed containers at temps. below 30 C

Cutina® MD [Cognis Canada; Cognis GmbH/Care Chems. http://www.cognis.com]
Chem. Descrip.: Glyceryl stearate
CAS 123-94-4
Uses: Consistency agent, stabilizer for pharmaceutical ointments, creams, and liq. emulsions
Features: Nonemulsifying base
Properties: Wh. to pale yel. waxy gran.; m.p. 53-57 C; acid no. 6 max.; sapon. no. 165-180;
Trade Name Reference

Cutina® MD-A [Cognis Canada; Cognis GmbH/Care Chems.
http://www.cognis.com]
Chem. Descrip.: Glyceryl stearate
CAS 123-94-4
Uses: Cream base, consistency agent, spreading agent for pharmaceutical creams and emulsions
Properties: Wh. waxy gran.; m.p. 52-58 C; acid no. < 5; sapon. no. 160-170; nonionic; 100% conc.

http://www.nikkol.co.jp/index.html
Chem. Descrip.: Di-C12-15 pareth-6 phosphate
CAS 149919-03-9
Uses: Emulsifier, stabilizer, dispersant in pharmaceuticals
Features: Can be neutralized with alkali
Regulatory: JSCI listed
Properties: Yel. liq.; HLB 6.5; anionic; 100% conc.

DDP-8 [Nikko Chems. Co. Ltd
http://www.nikkol.co.jp/index.html]
Chem. Descrip.: Di-C12-15 pareth-8 phosphate
CAS 25982-05-8
Uses: Emulsifier, stabilizer, dispersant in pharmaceuticals
Features: Can be neutralized with alkali
Regulatory: JSCI listed
Properties: Yel. liq.; HLB 11.5; anionic; 100% conc.

DDP-10 [Nikko Chems. Co. Ltd
http://www.nikkol.co.jp/index.html]
Chem. Descrip.: Di-C12-15 pareth-10 phosphate
CAS 149919-04-0
Uses: Emulsifier, stabilizer, dispersant in pharmaceuticals
Features: Can be neutralized with alkali
Regulatory: JSCI listed
Properties: Yel. paste; HLB 13.5; anionic; 100% conc.

DES-SP [Nikko Chems. Co. Ltd
http://www.nikkol.co.jp/index.html]
Chem. Descrip.: Diethyl sebacate
CAS 110-40-7; EINECS/ELINCS 203-764-5
Uses: Penetrant for topical pharmaceuticals
Features: Oily ingred. which permeates the skin; good sol. and penetration; light feel
Regulatory: JSCI listed
Properties: Colorless liq.; congeal pt. 2.2 C
Toxicology: TSCA listed

DGDO [Nikko Chems. Co. Ltd
http://www.nikkol.co.jp/index.html]
Chem. Descrip.: Polyglyceryl-2 dioleate
CAS 67965-56-4
Uses: W/o emulsifier for pharmaceuticals
Properties: Yel. liq.; HLB 7.0; nonionic; 100% conc.

DGMO-CV [Nikko Chems. Co. Ltd
http://www.nikkol.co.jp/index.html]
Chem. Descrip.: Polyglyceryl-2 oleate
CAS 9007-48-1; EINECS/ELINCS 256-367-4
Trade Name Reference

Uses: W/o emulsifier for pharmaceuticals
Features: Lipophilic
Regulatory: JSCI listed
Properties: Yel. liq.; HLB 5.5; nonionic; 100% conc.
Toxicology: TSCA listed

Chem. Descrip.: Polyyglyceryl-2 stearate
CAS 12694-22-3; EINECS/ELINCS 235-777-7
Uses: W/o emulsifier for pharmaceuticals
Regulatory: JSCI listed
Properties: Pale yel. solid; HLB 5.0; nonionic; 100% conc.

Chem. Descrip.: Penetrant for topical pharmaceuticals
Features: Oily ingred. which permeates the skin;
good sol. and penetration; light feel
Regulatory: JSCI listed
Properties: Pale yel. liq.; HLB 12.5; anionic; 100% conc.

Chem. Descrip.: Pyridoxine dipalmitate
CAS 635-38-1; EINECS/ELINCS 250-520-9
Uses: Oil-sol. vitamin B6 deriv.; effective for pimples, rough skin, dandruff, sunburn
Regulatory: JSCI listed
Properties: Pale yel. paste to solid; sol. in water, polar solvs.; pH 5.0-8.0 (5% aq.); cationic

Daistat CM 50P [Dai-ichi Karkaria http://www.dai-ichiindia.com/]
Chem. Descrip.: Cetyl trimethyl ammonium chloride See Cetrimonium chloride
CAS 112-02-7; EINECS/ELINCS 203-928-6
Uses: Emulsifier, dispersant, antistat, germicide, fungicide, algicide for antibiotics
Properties: Waxy solid; sol. in water, polar solvs.; pH 6.0-8.0 (5% aq.); cationic

Daistat CM 80 [Dai-ichi Karkaria http://www.dai-ichiindia.com/]
Chem. Descrip.: Cetyl dimethyl benzyl ammonium chloride See Cetalkonium chloride
CAS 122-18-9; EINECS/ELINCS 204-526-3
Uses: Emulsifier, dispersant, antistat, germicide, fungicide, algicide for antibiotics
Properties: Waxy solid; sol. in water, polar solvs.; pH 6.0-8.0 (5% aq.); cationic

Daistat CMB 90 F [Dai-ichi Karkaria http://www.dai-ichiindia.com/]
Chem. Descrip.: Cocotrimethyl ammonium chloride See Cocotrimonium chloride
CAS 61789-18-2; EINECS/ELINCS 263-038-9
Uses: Emulsifier, dispersant, antistat, germicide, fungicide, algicide for antibiotics
Properties: Pale yel. paste to solid; sol. in water, polar solvs.; pH 5.0-8.0 (5% aq.); cationic
**Trade Name Reference**

**Daistat LMB 90 F** [Dai-ichi Karkaria](http://www.dai-ichiindia.com)

**Chem. Descrip.** Coco dimethyl benzyl ammonium chloride  See Cocoalkonium chloride

**Uses:** Emulsifier, dispersant, antistat, germicide, fungicide, algicide for antibiotics

**Properties:** Visc. yel. liq.; sol. in water, polar solvs; pH 6.0-8.0 (5% aq.); cationic

**Daistat SM 80** [Dai-ichi Karkaria](http://www.dai-ichiindia.com)

**Chem. Descrip.** Stearyl trimethyl ammonium chloride  See Steartrimonium chloride  CAS 112-03-8; EINECS/ELINCS 203-929-1

**Uses:** Emulsifier, dispersant, antistat, germicide, fungicide, algicide for antibiotics

**Properties:** Waxy solid; sol. in water, polar solvs.; pH 6.0-8.0 (5% aq.); cationic

**Daistat SMB 90 F** [Dai-ichi Karkaria](http://www.dai-ichiindia.com)

**Chem. Descrip.** Stearyl dimethyl benzyl ammonium chloride  See Stearalkonium chloride  CAS 122-19-0; EINECS/ELINCS 204-527-9

**Uses:** Emulsifier, dispersant, antistat, germicide, fungicide, algicide for antibiotics

**Properties:** Waxy solid; sol. in water, polar solvs.; pH 6.0-8.0 (5% aq.); cationic

**Dantogard® Plus Liq.** [Lonza](http://www.lonza.com)

**Chem. Descrip.** DMDM hydantoin, hydroxymethyl-5,5-dimethyl hydantoin, 5,5-dimethylhydantoin, iodopropynyl butylcarbamate (2.6%), 1,3-butylene glycol (4.5%), water (23%)  See Butylene glycol; DM hydantoin; MDM hydantoin

**Uses:** Biocide, fungicide, solvent, preservative, lubricant for pharmaceuticals

**Features:** Stable under most normal conditions, @ pH 4-9

**Regulatory:** EPA reg. no. 6836-271; DOT nonregulated; SARA §302/304 nonreportable, §311/312 acute health hazard, §313 reportable (iodopropynyl butylcarbamate); Calif. Prop. 65 reportable (formaldehyde)

**Properties:** Colorless cl. liq.; sl. formaldehyde odor; sol. in water; readily disp. in surfactant systems; sp.gr. 1.19; flash pt. > 200 F; pH 7

**Toxicology:** LD50 (oral, rat) 3141 mg/kg, (skin, rabbit) > 2000 mg/kg; LC50 (inh., rat, 4 h) > 2.09 mg/l; expected to be mod. eye and mild skin irritant on direct contact; inh. may irritate mucous membranes; may cause allergic skin response in certain individuals; formaldehyde can cause sensitization reactions and is possible human carcinogen by inh.; TSCA listed

**Environmental:** Keep spills out of sewers and open bodies of water

**Precaution:** Avoid temps. above 90 C (to avoid decomp. and release of formaldehyde); incompat. with strong acids and alkalis; spillages may be slippery

**Hazardous Ingredients:** Contains up to 0.09% free formaldehyde in sol'n.

**Hazardous Decomp. Prods.:** Toxic combustion prods.; heating will release formaldehyde; thermal decomp. may produce toxic vapors/fumes of iodine, other org. materials, COx, NOx

**Storage:** Store @ or near R.T.; keep containers tightly closed until used; do not store below 60 F to avoid formation of crystals

**DBS, NF** [Morflex  http://www.morflex.com]

**Chem. Descrip.** Dibutyl sebacate  CAS 109-43-3; EINECS/ELINCS 203-672-5

**Uses:** Plasticizer for aq. pharmaceutical coatings including controlled sustained release, immediate release, and enteric; taste masking agent

**Regulatory:** NF

**Properties:** APHA 50, max. cl. liq.; miscible in acetone, ethanol, toluene, heptane, and veg. oil; m.w. 314.4; sp.gr. 0.935-0.939 (20 C); m.p. -11 C; b.p. 180 C (3 mm Hg); sapon. no. 352-357; flash pt. (COC) 353 F; ref. index 1.429-1.441; 92% min. assay

**Decaglyn 1-L** [Nikko Chems. Co. Ltd  http://www.nikkol.co.jp/index.html]

**Chem. Descrip.** Polyglyceryl-10 laurate  CAS 34406-66-1

**Uses:** Emulsifier, solubilizer, dispersant for pharmaceuticals

**Features:** Hydrophilic

**Regulatory:** JSCI listed

**Properties:** Pale yel. visc. liq.; HLB 15.5; 92% conc.

**Decaglyn 1-LN** [Nikko Chems. Co. Ltd  http://www.nikkol.co.jp/index.html]

**Chem. Descrip.** Polyglyceryl-10 linoleate  CAS 102643-06-1

**Uses:** Emulsifier, solubilizer, dispersant for pharmaceuticals
Trade Name Reference

**Features:** Hydrophilic  
**Properties:** Pale yel. visc. liq.; HLB 12.0; nonionic; 100% conc.

**Decaglyn 1-M** [Nikko Chems. Co. Ltd  
[http://www.nikkol.co.jp/index.html]]  
Chem. Descrip.: Polyglyceryl-10 myristate  
CAS 87390-32-7  
Uses: Emulsifier, solubilizer, dispersant for pharmaceuticals  
Features: Hydrophilic  
Regulatory: JSCI listed  
Properties: Pale yel. visc. liq.; HLB 12.0; nonionic; 100% conc.  
**Decaglyn 1-OV** [Nikko Chems. Co. Ltd  
[http://www.nikkol.co.jp/index.html]]  
Chem. Descrip.: Polyglyceryl-10 oleate  
CAS 9007-48-1; EINECS/ELINCS 279-230-0  
Uses: Emulsifier, solubilizer, dispersant for pharmaceuticals  
Features: Hydrophilic  
Regulatory: JSCI listed  
Properties: Pale yel. visc. liq.; HLB 14.0; nonionic; 100% conc.  
**Decaglyn 1-SV** [Nikko Chems. Co. Ltd  
[http://www.nikkol.co.jp/index.html]]  
Chem. Descrip.: Polyglyceryl-10 stearate  
CAS 79777-30-3  
Uses: Emulsifier, solubilizer, dispersant for pharmaceuticals  
Features: Hydrophilic  
Regulatory: JSCI listed  
Properties: Pale yel. plate; HLB 12.0; nonionic; 100% conc.  
**Decaglyn 2-SV** [Nikko Chems. Co. Ltd  
[http://www.nikkol.co.jp/index.html]]  
Chem. Descrip.: Polyglyceryl-10 distearate  
CAS 12764-60-2  
Uses: O/w emulsifier for pharmaceuticals  
Features: Hydrophilic  
Regulatory: JSCI listed  
Properties: Pale yel. plate; HLB 9.5; nonionic; 100% conc.  
**DeCONC HS-30** [DeForest Enterprises  
[http://www.deforest.net]]  
Chem. Descrip.: Sodium laureth sulfate, cetyl betaine, cocamidopropyl betaine, cocamide MEA, ethanol (< 5%)  
Uses: Surfactant, foaming agent, visc. builder for liq. hand soaps, antibacterial hand soaps  
Features: DEA-free; exc. afterfeel on skin; mild; rich, dense foam; good rinsability  
**DeFatted Wheat Germ #3** [Garuda Int'l.  
[http://www.garudaint.com]]  
Chem. Descrip.: Dried defatted granular form processed from beef livers  
Chem. Analysis: 6% max. loss on drying  
Uses: Nutritive pharmaceutical additive in tablets, capsules, and powders; diagnostic applications; taste masking of veterinary foods and drugs  
Properties: Gran.  
Storage: Store in cool dry area  
**Defatted Wheat Germ #9** [Garuda Int'l.  
[http://www.garudaint.com]]  
Chem. Descrip.: Defatted wheat germ See Wheat (Triticum vulgare) germ  
Chem. Analysis: Moisture 7.0% max.; fat 1.0% max.; protein 30% min.  
Uses: Flavoring agent, nutrient, protein source, dietary fiber in tablet and capsule filler  
Properties: Lt. tan; flour-like consistency; nat. wheat grain flavor  
**Degalan® PM-555** [Degussa AG  
[http://www.degussa.com]; Röhm Am.

**Handbook of Pharmaceutical Additives, Third Edition**  
214
Trade Name Reference

copolymer in org. emulsion (butylacetate/MEK solvs.) See n-Butyl acetate; Methyl ethyl ketone

Uses: Heat-sealing raw material for pkg. of pharmaceuticals

Properties: Liq.; dilutable with esters and ketones; dens. 0.90 g/cm³; dynamic visc. 200-1000 cps (20 °C); flash pt < 0 °C; 45 ± 1% solids

Toxicology: TSCA listed

Storage: Store tightly closed in cool place; store well before use

Dehydol® LS 3 DEO N [Cognis Canada; Cognis GmbH/Care Chems. http://www.cognis.com]

Chem. Descrip.: Laureth-3

CAS 9002-92-0; EINECS/ELINCS 221-280-2

Uses: Emulsifier, solubilizer for solvs., oils; raw material for pharmaceutical preps.

Regulatory: Japanese compliance

Properties: Water-wh. to ylsh. cl. to sl. cloudy liq., mild distinctive odor; dens. 0.880-0.8925 g/cm³ (70 °C); cloud pt. 2-5 °C; hyd. no. 171-178; pH 6.0-7.5 (1%); nonionic; 0.3% max. water

Storage: 1 yr. min. storage life in original sealed containers at temps. below 40 °C; may become cloudy below 18 °C—warm to 40 °C and stir thoroughly to reverse

Dehydol® E [Cognis/Care Chems.; Cognis Canada; Cognis GmbH/Care Chems. http://www.cognis.com]

Chem. Descrip.: Sorbitan sesquioleate, pentaerythritol cocoate, stearyl citrate, beeswax, and aluminum stearate See Pentaerythrityl cocoate

Uses: W/o emulsifier for prod. of hydrocarbon-free pharmaceutical ointments, and for creams, anhyd. or hydrous preps.

Features: High water absorbency; good resist. to temp. fluctuations

Properties: Ylsh. waxy solid; drop pt. 45-60 °C; HLB 6.0; iodine no. 20-30; sapon. no. 160-170; anionic; 100% conc.

Storage: 1 yr. min. storage life in closed original containers at temps. below 30 °C, protected from moisture

Chem. Descrip.: PEG-7 hydrogenated castor oil

CAS 61788-85-0

Uses: Emulsifier for pharmaceutical w/o emulsions, esp. for low-visc. emulsions

Regulatory: DAC compliance

Properties: Pale yl. cloudy visc. liq., almost odorless; acid no. < 1; sapon. no. 125-140; hyd. no. 110-130; nonionic; 100% conc.

Storage: 1 yr. min. storage life in sealed waterproof containers at temps. below 30 C

Dehymuls® SML [Cognis/Care Chems.]

Chem. Descrip.: Sorbitan laurate NF/BP

CAS 1338-39-2; EINECS/ELINCS 215-663-3

Uses: W/o emulsifier and coemulsifier for pharmaceutical appls.

Properties: Yel. cl. liq., pract. odorless; acid no. 4-7; sapon. no. 158-170; hyd. no. 330-358; nonionic

Toxicology: Nontoxic

Storage: 1 yr. min. storage stability stored in sealed containers at temps. below 30 C, protected from frost

Dehymuls® SMO [Cognis/Care Chems.]

Chem. Descrip.: Sorbitan olate NF/BP

CAS 1338-43-8; EINECS/ELINCS 215-665-4

Uses: Emulsifier and coemulsifier for w/o pharmaceutical ointments and creams

Properties: Yel.-brn. cl. liq.; acid no. 5-8; iodine no. 62-76; sapon. no. 149-160; hyd. no. 193-209; nonionic

Toxicology: Nontoxic

Storage: 1 yr. min. storage when stored in sealed moisture-protected containers at temps. below 30 C

Dehymuls® SMS [Cognis/Care Chems.]

Chem. Descrip.: Sorbitan stearate

CAS 1338-41-6; EINECS/ELINCS 215-664-9

Uses: W/o emulsifier for pharmaceutical industry

Properties: Wh. to ylsh. flakes; acid no. 5-10; sapon. no. 147-157; hyd. no. 235-260; nonionic

Toxicology: Nontoxic

Storage: 1 yr. min. storage stability in sealed containers at temps. below 30 C, protected from moisture

Dehymuls® SSO [Cognis/Care Chems.]

Chem. Descrip.: Sorbitan sesquioleate

CAS 8007-43-0; EINECS/ELINCS 232-360-1

Uses: W/o emulsifier and coemulsifier for waxes and oils for pharmaceuticals

Properties: Yel.-brn. cl. liq., pract. odorless; acid no. 12 max.; iodine no. 65-75; sapon. no. 150-165; hyd. no. 185-215; nonionic

Handbook of Pharmaceutical Additives, Third Edition 215
Trade Name Reference

Toxicology: Nontoxic

Chem. Descrip.: Coco-betaine
CAS 68424-94-2; EINECS/ELINCS 270-329-4
Uses: Surfactant, conditioner, thickener for pharmaceuticals
Properties: Lt. yel. cl. liq., mild inherent odor; pH 6.0-7.5; amphoteric; 29-31% act.
Storage: 1 yr. storage stability in sealed original containers at 0-40 C; may cause corrosion in stainless steel tanks due to high salt content

Chem. Descrip.: Cocamidopropyl betaine
CAS 61789-40-0; EINECS/ELINCS 263-058-8
Uses: Surfactant for pharmaceuticals
Features: Synergistic with anionic surfactants
Properties: Ylsh. liq.; odorless; unlimited sol. in water @ 20 C; m.w. 355; flash pt. none; pH 4.5-5.5; amphoteric; 46-48% solids in water
Toxicology: LD50 (oral) > 2000 mg/kg; eye irritant; nonirritating to skin
Environmental: Readily biodeg.
Hazardous Decomp. Prods.: None
Storage: 1 yr. min. shelf life in sealed original containers stored @ 0-40 C; store in frost-free place

Dermosaccharides® SEA [Laboratoires Sérobiologiques http://www.laboratoires-serobiologiques.com]
Chem. Descrip.: Glycerin, water, chitin, glycogen, and mannitol See D-Mannitol
Uses: Epicutaneous hydro-regulator, cell energizer, structuring agent for skin in prods. for anti-aging, antiwrinkle, and skin lacking structure, firmness, and energy
Features: Restores protection, repair, and regeneration capability
Properties: Colorless to pale yel. sl. opalescent liq.; water-sol.

Chem. Descrip.: Stearic acid
CAS 67701-03-5; EINECS/ELINCS 266-928-5
Uses: Emollient, emulsifier, thickener in pharmaceuticals
Regulatory: Not regulated for transport
Environmental: Biodeg. (28 d) > 90%
Precaution: Wear gloves, goggles, overall skin protection; avoid entry to sewers, drain and surface water
Storage: Store @ R.T. in original sealed container protected from heat sources

Chem. Descrip.: Stearic acid
CAS 67701-03-5; EINECS/ELINCS 266-928-5
Uses: Emollient, emulsifier, thickener in pharmaceuticals
Regulatory: Not regulated for transport
Environmental: Biodeg. (28 d) > 90%
Precaution: Wear gloves, goggles, overall skin protection; avoid entry to sewers, drain and surface water
Storage: Store @ R.T. in original sealed container protected from heat sources
Trade Name Reference

**pharmaceuticals**

**Regulatory:** Not regulated for transport

**Regulatory:** Not regulated for transport

**Properties:** Wh. solid flakes or beads; typical odor; insol. in water; sol. in fat; dens. ≈ 58 C; b.p. 165 C; flash pt. 200 C

**Toxicology:** LD50 (oral, rat) > 10 g/kg; nontoxic

**Precaution:** Wear gloves, goggles, overall skin protection; avoid entry to sewers, drain and surface water

**Hazardous Decomp. Prods.: None**

**Storage:** Store @ R.T. in original sealed container protected from heat sources

Handbook of Pharmaceutical Additives, Third Edition 217
Trade Name Reference

Dervacid 3440 [Undesa
http://www.undesa.com; S. Black
http://www.sblack.com]
Chem. Descrip.: Tallow fatty acid See Tallow acid
CAS 67701-06-8; EINECS/ELINCS 266-930-6
Uses: Emollient, emulsifier in pharmaceuticals
Regulatory: Not regulated for transport
Properties: Wh. visc. liq.; typical odor; insol. in water; sol. in fat; dens. = 0.90 g/ml; vapor pressure (20 C) < 1 (100 C) mbar; m.p. = 40 C; b.p. = 170 C; flash pt. > 200 C
Toxicology: LD50 (oral, rat) > 10 g/kg; nontoxic
Environmental: Biodeg. (28 d) 100%
Precaution: Wear gloves, goggles, overall skin protection; avoid entry to sewers, drain and surface water
Hazardous Decomp. Prods.: None
Storage: Store at R.T. in original sealed container protected from heat sources

Dervacid 3443 [Undesa
http://www.undesa.com; S. Black
http://www.sblack.com]
Chem. Descrip.: Tallow fatty acid See Tallow acid
CAS 67701-06-8; EINECS/ELINCS 266-930-6
Uses: Emollient, emulsifier in pharmaceuticals
Regulatory: Not regulated for transport
Properties: Brown visc. liq.; typical odor; insol. in water; sol. in fat; dens. = 0.90 g/ml; vapor pressure (20 C) < 1 (100 C) mbar; m.p. = 42 C; b.p. = 170 C; flash pt. > 200 C
Toxicology: LD50 (oral, rat) > 10 g/kg; nontoxic
Environmental: Biodeg. (28 d) 100%
Precaution: Wear gloves, goggles, overall skin protection; avoid entry to sewers, drain and surface water
Hazardous Decomp. Prods.: None
Storage: Store @ R.T. in original sealed container protected from heat sources

Dervafac 3760 [Undesa
http://www.undesa.com; S. Black
http://www.sblack.com]
Chem. Descrip.: Hydrogenated tallow
CAS 8030-12-4; EINECS/ELINCS 232-442-7
Uses: Emollient, emulsifier for pharmaceutical prod.
Properties: Wh. solid in flakes or bead form; typical odor; insol. in water; sol. in fat; dens. = 0.86 g/ml; m.p. = 57 C; flash pt. = 220 C
Toxicology: LD50 (oral, rat) > 10 g/kg; nontoxic
Environmental: Biodeg. (28 d) 100%
Precaution: Wear gloves, goggles, overall skin protection; avoid entry to sewers, drain and surface water; avoid strong oxidants and sources of ignition
Hazardous Decomp. Prods.: None
Storage: Store @ R.T. in original sealed container protected from heat sources

Descote® Ascorbic Acid 60% [Particle Dynamics
http://www.particledynamics.com]
Chem. Descrip.: Encapsulated ascorbic acid
USP; each gram of coated prod. contains 600 mg ascorbic acid in edible matrix See L-Ascorbic acid
Uses: Encapsulated ingreds. providing...
taste/odor masking and preventing interaction of actives for nutritional supplements and powds., pharmaceuticals, chewable tablets

**Properties:** Wh. to off-wh. relatively free-flowing material with some soft agglomerates, sl. char. odor, satisfactory taste; 95% min. through 20 mesh, 20% max. through 100 mesh; 58.8% min. assay

**Storage:** Physically/chemically stable when stored in cool, dry area, preferably @ 59-86 F

---

Descote® Copper Gluconate 20% [Particle Dynamics](http://www.particledynamics.com)

**Chem. Descrip.:** Encapsulated copper gluconate USP; each gram of coated prod. contains 200 mg copper gluconate in edible matrix [See Copper gluconate (ic)]

**Uses:** Encapsulated ingreds. providing taste/odor masking and preventing interaction of actives for use in tablets and other dry dosage forms

**Properties:** Green to blue-green relatively free-flowing powd., sl. char odor, satisfactory taste; 98% min. through 20 mesh, 20% max. through 200 mesh; 19.6% min. assay

**Storage:** Physically/chemically stable when stored in cool, dry area @ 59-86 F

---

Descote® Ferrous Fumarate 60 Ultra [Particle Dynamics](http://www.particledynamics.com)

**Chem. Descrip.:** Encapsulated ferrous fumarate USP; each gram of coated prod. contains 600 mg ferrous fumarate in edible matrix

**Uses:** Encapsulated ingreds. providing taste/odor masking and preventing interaction of actives for use in tablets and other dry dosage forms

**Features:** Good dissolution profile for iron

**Properties:** Reddish orange to reddish brn. relatively free-flowing powd., sl. char odor, satisfactory taste; 5% max. on 20 mesh, 30% max. on 200 mesh; 58.8% min. assay

**Storage:** Physically/chemically stable for 2 yrs. when stored in cool, dry area @ 59-86 F

---

Descote® Pyridoxine Hydrochloride 331/3% [Particle Dynamics](http://www.particledynamics.com)

**Chem. Descrip.:** Encapsulated pyridoxine hydrochloride; each gram of coated prod. contains 333 mg in edible coating of mono- and diglycerides [See Mono- and diglycerides of fatty acids; Pyridoxine HCl]

**Uses:** Encapsulated ingreds. providing taste/odor masking and preventing interaction of actives for use in chewable multivitamin tablets and other dry dosage forms

**Regulatory:** Pyridoxine HCl is FDA GRAS as a nutrient; coating materials are edible food grade prods.

**Properties:** Pract. wh. relatively free-flowing powd., sl. char odor, satisfactory taste; 99% min. through 20 mesh, 65% min. through 60 mesh; 32.6% min. assay

**Storage:** Physically/chemically stable when stored in cool, dry area @ 59-86 F
Trade Name Reference

Descote® Riboflavin 33½% [Particle Dynamics http://www.particledynamics.com]
Chem. Descrip.: Encapsulated riboflavin USP/FCC; each gram of coated prod. contains 333 mg riboflavin in edible coating of mono- and diglycerides See Mono- and diglycerides of fatty acids
Uses: Encapsulated ingreds. providing taste/odor masking and preventing interaction of actives, bioavailability enhancer for use in chewable multivitamin tablets and other dry dosage forms
Regulatory: Riboflavin is FDA GRAS as a nutrient; coating materials are edible food grade prods.
Properties: Orange-brn. relatively free-flowing powd., sl. char odor, satisfactory taste; 99% min. through 20 mesh, 60% min. through 60 mesh; 32.6% min. assay
Storage: Physically/chemically stable for 2 yrs. when stored in cool, dry area @ 59-86 F

Descote® Thiamine Mononitrate 33½% [Particle Dynamics http://www.particledynamics.com]
Chem. Descrip.: Encapsulated thiamine mononitrate USP/FCC; each gram of coated prod. contains 333 mg in edible coating of mono- and diglycerides See Mono- and diglycerides of fatty acids; Riboflavin
Uses: Encapsulated ingreds. providing taste/odor masking and preventing interaction of actives for use in chewable multivitamin tablets and other dry dosage forms
Regulatory: Thiamine mononitrate is FDA GRAS as a nutrient; coating materials are edible food grade prods.
Properties: Pract. wh. relatively free-flowing powd., sl. char odor, satisfactory taste; 99% min. through 20 mesh, 65% min. through 60 mesh; 32.6% min. assay
Storage: Physically/chemically stable when stored in cool, dry place @ 59-86 F

Desiccated Beef Liver Granular Undefatted [Am. Labs http://www.americanlaboratories.com]
Chem. Descrip.: Dried undefatted granular form processed from beef livers
Chem. Analysis: 6% max. loss on drying
Uses: Nutritive pharmaceutical additive in tablets, capsules, and powders; diagnostic applications; taste masking of veterinary foods and drugs
Properties: Lt.-tan to dk.-brown powd.
Storage: Store in a cool dry place

Desiccated Hog Bile [Am. Labs http://www.americanlaboratories.com]
Chem. Descrip.: Vacuum-dried prod. from fresh hog bile contg. hydeoxycholic acid, sodium glycohydeoxycholate, sodium taurohydeoxycholate
Uses: Nutritive pharmaceutical additive
Storage: Preserve in tight containers with moisture-proof liners, in cool, dry place

Desiccated Ox Bile [Am. Labs http://www.americanlaboratories.com]
Chem. Descrip.: Dried ox bile
Uses: Nutritive pharmaceutical additive
Properties: Powd.; pH 6.5-7.5
Storage: Preserve in tight containers with moisture-proof liners, in cool, dry place

Destab™ Calcium Carbonate 90S Ultra 250 [Particle Dynamics http://www.particledynamics.com]
Chem. Descrip.: Calcium carbonate with starch NF
Chem. Analysis: 250 ppb max. lead
Uses: Direct compression ingred. for tablet and capsule formulations
Features: Rec. where optimum tableting and free-flowing char. are desired
Properties: Wh. to off-wh. free-flowing powd.; 90% calcium carbonate
Storage: Physically/chemically stable when stored in cool dry place @ 59-86 F

Destab™ Calcium Carbonate 95S Ultra 250 [Particle Dynamics http://www.particledynamics.com]
Chem. Descrip.: Calcium carbonate USP with 5% max. starch NF
Chem. Analysis: 250 ppb max. lead
Uses: Direct compression ingreds. for tablets and other dry dosage forms
Features: Rec. where optimum tableting and free-flowing chars. are desired
Properties: Wh. to off-wh. free-flowing powd.; 95% calcium carbonate
Storage: Physically/chemically stable when stored in cool dry place @ 59-86 F

DeTHOX GLG-7 [DeForest Enterprises http://www.deforest.net]
Chem. Descrip.: Glycereth-7
CAS 31694-55-0
Uses: Used in antiperspirants, depilatories
Trade Name Reference

Regulatory: DOT nonregulated
Properties: APHA 20 max. cl. liq.; odorless and tasteless; sol. in water, alcohols, and glycols; insol. or disp. in most oils and solvs.; sp.gr. 1.0 g/ml; HLB 15.4; acid no. 0.5 max.; hyd. no. 410-415; flash pt. (PMCC) > 200 F; pH 5.0-7.0 (5% in DW); nonionic; 100% conc.
Toxicology: Ethylene oxide (cancer and reproductive hazard) may accumulate in storage and transport vessels
Precaution: Incompat. with strong oxidizers; avoid open flames
Hazardous Ingredients: DeTHOX GLG-7 (100%)
Hazardous Decomp. Prods.: Thermal decomp. prods.: CO, CO₂
HMIS: Health 1, Flammability 1, Reactivity 0
DeTHOX SA-80 [DeForest Enterprises http://www.deforest.net]
Chem. Descrip.: Steareth-80
CAS 9005-00-9
Uses: Emulsifier, lubricant, emollient, emulsion stabilizer, visc. builder, and opacifier used in depilatories, solid antiperspirants
Regulatory: DOT nonregulated
Properties: Cream to wh. flakes; sol. in water, alcohols, and glycols; insol. or disp. in oils and solvs.; m.p. 55-61 C; flash pt. (COC) > 300 F; pH 6.0-8.0 (1% in DW); nonionic; 100% conc.
Toxicology: May cause skin and severe eye irritation; ing. may cause nausea, abdominal pain; inh. may irritate causing coughing and headache; ethylene oxide (cancer and reproductive hazard) may accumulate in storage and transport vessels; TSCA listed
Environmental: Biodeg.
Precaution: Incompat. with strong oxidizers
Hazardous Ingredients: Stearyl alcohol ethoxylate (100%), ethylene oxide (< 25 ppm), 1,4-dioxane (< 20 ppm)
Hazardous Decomp. Prods.: Thermal decomp. prods.: CO, CO₂
HMIS: Health 2, Flammability 1, Reactivity 0
Dextrofin® [Danisco Sweeteners http://www.daniscosweeteners.com]
Chem. Descrip.: Dextrose See Glucose
CAS 50-99-7; EINECS/ELINCS 200-075-1
Uses: Sweetener for pharmaceuticals
DiaFil® 525 [World Minerals http://www.worldminerals.com]
Chem. Descrip.: Amorphous diatomite See Diatomaceous earth, amorphous
Chem. Analysis: SiO₂ (93%), Al₂O₃ (3%), Fe₂O₃ (1.3%), CaO (1.1%), cryst. silica (< 1%)
CAS 61790-53-2
Uses: Abrasive in toothpaste
Features: Inert; mild
Regulatory: FDA GRAS; FCC compliance; EPA reg. no. 59910-1
Properties: Sl. off-wh. fine powd.; odorless; 16 µ median particle size; fineness (Hegman) 1-2; sp.gr. 2.2; dens. 18.28 lb/solid gal; bulking value 0.055 gal/lb; surf. area 26-28 m²/g; oil absorp. 112-116; ref. index 1.43; pH 7.5-8.5
DiaFil® 570 [World Minerals http://www.worldminerals.com]
Chem. Descrip.: Amorphous diatomite See Diatomaceous earth, amorphous
Chem. Analysis: SiO₂ (93%), Al₂O₃ (3%), Fe₂O₃ (1.3%), CaO (1.1%), cryst. silica (< 1%)
CAS 61790-53-2
Uses: Inert, mild abrasive in toothpastes
Features: Inert; mild
Regulatory: FDA GRAS; FCC compliance; EPA reg. no. 59910-1
Properties: Sl. off-wh. fine powd.; odorless; 9 µ median particle size; fineness (Hegman) 4-4.5; sp.gr. 2.2; dens. 18.28 lb/solid gal; bulking value 0.055 gal/lb; surf. area 26-28 m²/g; oil absorp. 112-116; ref. index 1.43; pH 7.5-8.5
DiaFil® 590 [World Minerals http://www.worldminerals.com]
Chem. Descrip.: Amorphous diatomite See Diatomaceous earth, amorphous
Chem. Analysis: SiO₂ (93%), Al₂O₃ (3%), Fe₂O₃ (1.3%), CaO (1.1%), cryst. silica (< 1%)
CAS 61790-53-2
Uses: Inert, mild abrasive in toothpastes
Features: Inert; mild
Regulatory: FDA GRAS; FCC compliance; EPA reg. no. 59910-1

Handbook of Pharmaceutical Additives, Third Edition 221
Trade Name Reference

**Properties:** Sl. off-wh. fine powd.; odorless; 6 μ median particle size; fineness (Hegman) 5.5-6.0; sp.gr. 2.2; dens. 18.28 lb/solid gal; bulking value 0.055 gal/lb; surf. area 26-28 m²/g; oil absorp. 112-116; ref. index 1.43; pH 7.5-8.5

**DiaFil® 880** [World Minerals http://www.worldminerals.com]
*Chem. Descrip.:* Amorphous diatomite See Diatomaceous earth, amorphous
*CAS* 61790-53-2
*Uses:* Abrasive in dental preps.
*Features:* < 0.1% respirable cryst. silica
*Properties:* Sl. off-wh. fine powd.; odorless; sol. in HF; negligible sol. in water; sp.gr. 2.2; water absorp. 150%; pH 8

**Toxicology:** Exposure to dust may cause irritation of upper respiratory tract and lungs, coughing, wheezing, shortness of breath, tightness in chest; inh. may cause lung damage; may aggravate pre-existing asthma, bronchitis, emphysema, etc.

*Precaution:* Reacts with hydrofluoric acid
*HMIS:* Health 0, Flammability 0, Reactivity 0

**DiaFil® 890** [World Minerals http://www.worldminerals.com]
*Chem. Descrip.:* Amorphous diatomite See Diatomaceous earth, amorphous
*CAS* 61790-53-2
*Uses:* Abrasive in dental preps.
*Features:* < 0.1% respirable cryst. silica
*Properties:* Sl. off-wh. fine powd.; odorless; sol. in HF; negligible sol. in water; sp.gr. 2.2; water absorp. 150%; pH 8

**Toxicology:** Exposure to dust may cause irritation of upper respiratory tract and lungs, coughing, wheezing, shortness of breath, tightness in chest; inh. may cause lung damage; may aggravate pre-existing asthma, bronchitis, emphysema, etc.

*Precaution:* Reacts with hydrofluoric acid
*HMIS:* Health 0, Flammability 0, Reactivity 0

*Chem. Descrip.:* Polystyrene
*CAS* 9003-53-6; EINECS/ELINCS 202-851-5
*Uses:* Syn. adsorbent for vitamins, enzymes, fatty acids, other bioactive substances; decolorization appilcs.
*Properties:* High porous polymer matrix; 250-600 μ particle size; dens. 1.01 g/l (wet)
*Precaution:* Avoid exposure to high temp., sparks, flames, etc. and mixing with strong oxidizing agents
*Storage:* Store in cool, dry, dark place with good ventilation; at high temp., rapid degradation of resins may occur; below 0 C, freezing of resins may occur

*Chem. Descrip.:* Polystyrene
*CAS* 9003-53-6; EINECS/ELINCS 202-851-5
*Uses:* Syn. adsorbent for vitamins, enzymes, fatty acids, other bioactive substances; decolorization appilcs.
*Properties:* High porous polymer matrix; 250-600 μ particle size; dens. 1.01 g/l (wet)
*Precaution:* Avoid exposure to high temp., sparks, flames, etc. and mixing with strong oxidizing agents
*Storage:* Store in cool, dry, dark place with good ventilation; at high temp., rapid degradation of resins may occur; below 0 C, freezing of resins may occur

*Chem. Descrip.:* Polystyrene
*CAS* 9003-53-6; EINECS/ELINCS 202-851-5
*Uses:* Syn. adsorbent for vitamins, enzymes, fatty acids, other bioactive substances; decolorization appilcs.
*Properties:* High porous polymer matrix; 250-600 μ particle size; dens. 1.01 g/l (wet)
*Precaution:* Avoid exposure to high temp., sparks, flames, etc. and mixing with strong oxidizing agents
*Storage:* Store in cool, dry, dark place with good ventilation; at high temp., rapid degradation of resins may occur; below 0 C, freezing of resins may occur

*Chem. Descrip.:* Polystyrene
*CAS* 9003-53-6; EINECS/ELINCS 202-851-5
*Uses:* Enzyme carrier for treatment of biopharmaceutical substances
Trade Name Reference

Features: High surf. area
Properties: High porous polymer matrix; 210-590 µ particle size; surf. area 25 m²/g; anionic
Precaution: Avoid exposure to high temp., sparks, flames, etc. and mixing with strong oxidizing agents
Storage: Store in cool, dry, dark place with good ventilation; at high temp., rapid degradation of resins may occur; below 0 C, freezing of resins may occur
Chem. Descrip.: Polystyrene
CAS 9003-53-6; EINECS/ELINCS 202-851-5
Uses: Mainly applied as enzyme carriers for treatment of bio-pharmaceutical substances
Properties: High porous polymer matrix; 210-590 µ particle size; dens. 1.07 g/l (wet); surf. area 23 m²/g; anionic
Precaution: Avoid exposure to high temp., sparks, flames, etc. and mixing with strong oxidizing agents
Storage: Store in cool, dry, dark place with good ventilation; at high temp., rapid degradation of resins may occur; below 0 C, freezing of resins may occur
Chem. Descrip.: Polystyrene
CAS 9003-53-6; EINECS/ELINCS 202-851-5
Uses: Monodispersed cation for chromatography for separation and purification of various prods. in pharmaceuticals, fermentation
Properties: Gel; 220 µ±20 um particle size; cationic
Precaution: Avoid exposure to high temp., sparks, flames, etc. and mixing with strong oxidizing agents
Storage: Store in cool, dry, dark place with good ventilation; at high temp., rapid degradation of resins may occur; below 0 C, freezing of resins may occur
Chem. Descrip.: Polymethacrylate
Uses: Purifier for pharmaceuticals
Properties: Porous polymer matrix; 300-1180 µ particle size; dens. 1.16 g/l (wet)
Precaution: Avoid exposure to high temp., sparks, flames, etc. and mixing with strong oxidizing agents
Storage: Store in cool, dry, dark place with good ventilation; at high temp., rapid degradation of resins may occur; below 0 C, freezing of resins may occur
Chem. Descrip.: Polymethacrylate
Uses: Purifier for pharmaceuticals
Features: Exc. stability
Properties: Porous polymer matrix; 300-1180 µ particle size
Precaution: Avoid exposure to high temp., sparks, flames, etc. and mixing with strong oxidizing agents
Storage: Store in cool, dry, dark place with good ventilation; at high temp., rapid degradation of resins may occur; below 0 C, freezing of resins may occur
Chem. Descrip.: Polymethacrylate
Uses: Porous resin for prep. of antibiotics; purifier for pharmaceuticals
Features: Fully spherical
Properties: Porous spherical; 106-300 µ particle size
Precaution: Avoid exposure to high temp., sparks, flames, etc. and mixing with strong oxidizing agents
Storage: Store in cool, dry, dark place with good ventilation; at high temp., rapid degradation of resins may occur; below 0 C, freezing of resins may occur

|               | CAS 110-97-4; EINECS/ELINCS 203-820-9 |
|               | Uses: Used to produce pharmaceuticals |
|               | Properties: Sp.gr. 0.992 (40/4 C); dens. 8.27 lb/gal (40 C); visc. 870 cps (30 C); f.p. 44 C; b.p. 294 C (760 mm Hg); flash pt. (Seta CC) 276 F; fire pt. 275 C; ref. index 1.4595 (30 C); 10% water |

**Di-Pac®** [Domino Foods/Special Ingreds. [http://http://www.dominospecialtyingredients.com]]
| Chem. Descrip.: | Sugar and maltodextrin See Sucrose |
Trade Name Reference

Chem. Analysis: 96.5 ± 1.5% sucrose and 3.0 ± 0.75% maltodextrin
CAS 57-50-1; 9050-36-6; EINECS/ELINCS 200-334-9; 232-940-4
Uses: Excipient, flow aid, sweetener for pharmaceutical direct compaction and tableting
Features: High flowability, low hygroscopicity
Properties: Wh. solid; completely sol. in water
Storage: Store @ < 80 F and relative humidity below 70%

Dipentene Extra [Millennium/F&F http://www.aromachem.com]
Chem. Descrip.: Terpene hydrocarbons (terpinolene)
CAS 68956-56-9; EINECS/ELINCS 209-578-0
UN 2052; UN 2319
Uses: Syn. flavoring agent in pharmaceuticals
Features: Rec. where good odor and color are desirable
Regulatory: DOT regulated
Properties: APHA 50 max. cl. liq.; m.w. 154.25; sp.gr. 0.863-0.873; dens. 7.24 lb/gal; b.p. 170 C; flash pt. (TCC) 43.3 C; ref. index 1.472 (20 C); KB value 113
Toxicology: TSCA listed

Disfoam CA-115 [NOF http://www.nof.co.jp]
Uses: Defoamer for antibiotics
Properties: Insol. in water

Dissolvine® E-CA-10 [Akzo Nobel http://www.akzonobel.com]
Chem. Descrip.: Calcium disodium EDTA, USP
CAS 62-33-9; EINECS/ELINCS 200-529-9
Uses: Chelating agent reducing the toxic effects of metals in pharmaceutical preps.
Regulatory: USP, DOT nonregulated; DSL listed
Properties: Wh. free-flowing powd.; odorless; sol. 800 g/l in water (20 C); bulk dens. 690 kg/m³; m.p. 348 C; pH 7 (1% sol'n.); 98-100% act.
Toxicology: LD50 (oral, rat) > 5000 mg/kg; inh. of dust may cause mild irritation; possible eye irritant; TSCA listed
Environmental: LC50 (bluegill, 96 hr) 2340 mg/l; COD 690 mg/g
Precaution: Avoid contact with aluminum, copper, copper alloys, and nickel; incompat. with strong oxidizers
Hazardous Decomp. Prods.: Oxides of carbon and nitrogen
NFPA: Health 1, Flammability 1, Reactivity 0
Storage: Keep closed and dry

Chem. Descrip.: Dicalcium phosphate dihydrate FCC, USP
See Calcium phosphate dibasic dihydrate
CAS 7789-77-7; EINECS/ELINCS 231-826-1
Uses: Excipient for direct compression of tablets; calcium and phosphorus source in nutritional supplements
Features: Stable in air
Regulatory: USP, DMF no. 5688; kosher
Properties: Wh. gran. solid; 1% max. on 20 mesh, 40-80% on 100 mesh, 5% max. through 325 mesh; odorless; tasteless; readily sol. in dil. HCl and nitric acids; pract. insol. in water; insol. in alcohol; m.w. 172.09; bulk dens. 59 lb/ft³ (tapped); pH 7.4 (20% slurry); 98-105% assay; 24.5-26.5% loss on ignition; 1% moisture; 18.1% P; 23.3% Ca
Storage: 24 mos. shelf life

Docusate Calcium USP in Corn Oil NF Sol’n. [Cytec Ind. http://www.cytec.com]
Chem. Descrip.: Docusate calcium USP in corn oil NF sol’n. See Corn (Zea mays) oil; Dioctyl calcium sulfosuccinate
Uses: Pharmaceutical surfactant in stool softeners, vitamin formulations, ear wax removal compds., as processing aids in tableting operations
Properties: Amber cl. visc. liq.; acid no. 2 max.; 50% act.; ≤ 0.5% moisture
Docusate Sodium USP [Cytec Ind. http://www.cytec.com]
Chem. Descrip.: Dioctyl sodium sulfosuccinate USP
CAS 577-11-7; EINECS/ELINCS 209-406-4
Uses: Pharmaceutical surfactant, wetting agent, solubilizer, dispersant, emulsifier for tablets, tablet coating, treatment of constipation (alone or with other laxatives), topical creams, lotions, and ointments, vitamins, ear wax removal
Properties: Rolls of wh. wax-like plastic sheets, char. octyl alcohol odor; m.w. 444.57; 99-100.5% assay
Use Level: 0.025-0.25% (wetting agent), 0.1-1% (tablets), 20% (tablet coating), 0.1-1% (solubilizer), 0.1-1% (anticonstipation)
Toxicology: LD50 (oral, rat) 1900-4000 mg/kg, (dermal, rabbit) > 10,000 mg/kg; prolonged eye or skin contact may cause irritation
Storage: Store in tightly closed containers below 24 C and 60% r.h.; higher temps. may cause prod. to fuse and discolor

Docusate Sodium USP in Polyethylene Glycol 400 NF [Cytec Ind. http://www.cytec.com]
Chem. Descrip.: Dioctyl sodium sulfosuccinate USP in PEG 400 See PEG-8
Uses: Pharmaceutical surfactant in stool softeners, vitamin formulations, ear wax removal compds., as processing aids in tableting operations
Properties: Wh. to yel. cl. visc. liq.; sp.gr. 1.11-1.15 (25/15.5 C); acid no. 1 max.; 48.5-51.5% assay

Dow Corning® 7-9245 [Dow Corning http://www.dowcorning.com]
Chem. Descrip.: 30% simethicone emulsion with sorbic acid and water
Chem. Analysis: Heavy metal content < 10 ppm
Uses: Foam control in medical and pharmaceutical applics.; OTC antiflatulents
Features: Water-dilutable nonionic emulsion
Regulatory: USP, FDA 21 CFR §173.340, 332.10
Properties: Creamy, wh. liq.; pH 2.6; nonvolatile content > 36%
Storage: 48 mos. when stored @ 5-32 C in original, unopened container; avoid freezing

Dow Corning® 360 Medical Fluid (20 cst) [Dow Corning http://www.dowcorning.com]
Chem. Descrip.: Dimethicone NF
CAS 9006-65-9
Uses: Lubricant for plastic or rubber devices and instruments incl. hypodermic needles, rectoscopes; inert protective coating and water-repellent film on skin for barrier creams and sprays
Properties: Colorless cl. liq.; sol. in aliphatic, aromatic, and chlorinated hydrocarbons, fluorocarbon; insol. in glycerin, ethylene glycol, methanol, ethanol, water; sp.gr. 0.949; dens. 8.0 lb/gal; visc. 20 cs; acid no. < 0.01; pour pt. -84 C; ref. index 1.400-1.405; surf. tens. 20.6 dynes/cm; dielec. str. 375 V/mil; vol. resist. 1 x 10¹⁵ ohm-cm
Storage: 36 mos. shelf life when stored at or below 25 C

Dow Corning® 360 Medical Fluid (100 cst) [Dow Corning http://www.dowcorning.com]
Chem. Descrip.: Dimethicone NF
CAS 9006-65-9
Uses: Lubricant for plastic or rubber devices and instruments incl. hypodermic needles, rectoscopes; inert protective coating and water-repellent film on skin for barrier creams and sprays
Properties: Colorless cl. liq.; sol. in aliphatic, aromatic, and chlorinated hydrocarbons, fluorocarbon; insol. in glycerin, ethylene glycol, methanol, ethanol, water; sp.gr. 0.965; dens. 8.0 lb/gal; visc. 100 cs; acid no. < 0.01; pour pt. -65 C; ref. index 1.400-1.405; surf. tens. 20.9 dynes/cm; dielec. str. 400 V/mil; vol. resist. 1 x 10¹⁵ ohm-cm
Storage: 36 mos. shelf life when stored at or below 25 C
Trade Name Reference

below 25 C

Dow Corning® 360 Medical Fluid (350 cst) [Dow Corning http://www.dowcorning.com]
Chem. Descrip.: Dimethicone NF
CAS 9006-65-9
Uses: Lubricant for plastic or rubber devices and instruments incl. hypodermic needles, rectoscopes; inert protective coating and water-repellent film on skin for barrier creams and sprays
Properties: Colorless cl. liq.; sol. in aliphatic, aromatic, and chlorinated hydrocarbons, fluorocarbon; insol. in glycerin, ethylene glycol, methanol, ethanol, water; sp.gr. 0.970; dens. 8.1 lb/gal; visc. 350 cs; acid no. < 0.01; pour pt. -65 C; ref. index 1.400-1.405; surf. tens. 21.1 dynes/cm; dielec. str. 400 V/mil; vol. resist. 1 x 10^{15} ohm-cm
Storage: 36 mos. shelf life when stored at or below 25 C

Dow Corning® 360 Medical Fluid (1000 cst) [Dow Corning http://www.dowcorning.com]
Chem. Descrip.: Dimethicone NF
CAS 9006-65-9
Uses: Lubricant for plastic or rubber devices and instruments incl. hypodermic needles, rectoscopes; inert protective coating and water-repellent film on skin for barrier creams and sprays
Properties: Colorless cl. liq.; sol. in aliphatic, aromatic, and chlorinated hydrocarbons, fluorocarbon; insol. in glycerin, ethylene glycol, methanol, ethanol, water; sp.gr. 0.970; dens. 8.1 lb/gal; visc. 1000 cs; acid no. < 0.01; pour pt. -50 C; ref. index 1.400-1.405; surf. tens. 21.2 dynes/cm; dielec. str. 400 V/mil; vol. resist. 1 x 10^{15} ohm-cm
Storage: 36 mos. shelf life when stored at or below 25 C

Dow Corning® 360 Medical Fluid (12,500 cst) [Dow Corning http://www.dowcorning.com]
Chem. Descrip.: Dimethicone NF
CAS 9006-65-9
Uses: Lubricant for plastic or rubber devices and instruments incl. hypodermic needles, rectoscopes; inert protective coating and water-repellent film on skin for barrier creams and sprays
Properties: Colorless cl. liq.; sol. in aliphatic, aromatic, and chlorinated hydrocarbons, fluorocarbon; insol. in glycerin, ethylene glycol, methanol, ethanol, water; sp.gr. 0.970; dens. 8.1 lb/gal; visc. 12,500 cs; acid no. < 0.01; pour pt. -46 C; ref. index 1.400-1.405; surf. tens. 21.5 dynes/cm; dielec. str. 400 V/mil; vol. resist. 1 x 10^{15} ohm-cm
Storage: 36 mos. shelf life when stored at or below 25 C

Dow Corning® 5225C Formulation Aid [Dow Corning http://www.dowcorning.com]
Chem. Descrip.: Cyclopentasiloxane, PEG/PPG-18/18 dimethicone See Cyclomethicone
Uses: Delivery system for skin care, sun care, antiperspirants and deodorants
Properties: Translucent to hazy sl. gray liq.; char. odor; sl. sediment possible; sp.gr. 0.956; visc. 100-6,000 mm^2/s; flash pt. > 77 C
Storage: 24 mos. shelf life when stored at or below 25 C in the original, unopened containers

Dow Corning® Emulsifier 10 [Dow Corning http://www.dowcorning.com]
Chem. Descrip.: Silicone alkylmethyl glycol and dodecene See Dodecene-1
Chem. Analysis: > 60.0% silicone alkylmethyl glycol; 7.0-3.0% dodecene
CAS 212335-52-9; 112-41-4
UN NA1993
Uses: Emulsifier, moisturizer, and skin protectant and conditioner for pharmaceutical topical creams and lotions; coemulsifier for o/w emulsions
Features: Emulsifies @ R.T.; easy to spread
Regulatory: SARA §311/312 Acute and Fire Hazard, §313 nonreportable
Properties: Amber liq.; characteristic odor; sp. gr. 0.889; visc. 2500 cSt; b.p. > 65.00 C; flash pt (CC) 189.9 F
Toxicology: Mild irritant to eyes; nonirritant to skin
Precaution: Wear full-face respirator, safety glasses and chemical protective gloves; avoid breathing vapor, mist, dust, or fumes; oxidizing material can cause a reaction; water, alcohols, acidic or basic materials, and many metals or metallic compounds, when in contact with product, liberate flamm. H gas, which can form explosive mixtures in air
Hazardous Decomp. Prods.: Metal oxides, COx; SiO2, and formaldehyde
NFPA: Health 1, Flammability 2, Reactivity 0

Dow Corning® Q7-2243 LVA [Dow Corning http://www.dowcorning.com]
Chem. Descrip.: Polydimethylsiloxane See
Dimethylsiloxane
CAS 63148-62-9
Uses: Antifoam for medical and pharmaceutical applications; antiflatulent for treatment of gastrointestinal gas and bloating; gas elimination during gastroscopic and x-ray exams; antacid products.
Features: Low volatility
Properties: Gray translucent visc. liq.; sp. gr. 0.975; ref. index 1.404; nonionic; 100% act.
Storage: 18 mo shelf life stored in original unopened containers at ambient temps.; avoid extreme temps.; settling may occur during storage; mix before use

Dow Corning® Q7-2587 [Dow Corning http://www.dowcorning.com]
Chem. Descrip.: Simethicone emulsion USP contg. simethicone USP, stearate emulsifiers, sorbic acid, benzoic acid, thickeners, and water
Uses: Antiflatulent for treatment of intestinal gas; gas elimination during gastroscopic and x-ray exams; antacid products; antifoam for pharmaceutical processes, e.g., fermentation, maceration, percolation, mixing, ampule/bottle filling applications.
Regulatory: FDA 21CFR §173.340, 210.11, 332.10
Properties: Wh. creamy flowable liq.; water-dilutable; pH 2.6; nonionic; 30% act.
Storage: 24 mos. shelf life when stored between 5 and 32 C; stir gently before use; do not ship below 0 C; freeze/thaw cycling may break emulsion

Dow Corning® Q7-9120 Silicone Fluid [Dow Corning http://www.dowcorning.com]
Chem. Descrip.: Hexamethyldisiloxane
CAS 9006-65-9
Uses: Antifoam in pharmaceutical and biotechnological processes; excipient antiflatulent compositions; excipient, lubricant, smoothing agent, emollient, spreading agent, antitackifier for topical pharmaceuticals, cosmetics
Features: Nonocclusive; resistant to wash off or rub off
Regulatory: NF, EP compliance; FDA 21CFR §347.10
Properties: Colorless cl. liq.; sol. in nonpolar solvs., aliphatic hydrocarbons, aromatic hydrocarbons; sp.gr. 0.951-0.973; visc. various grades from 20-12,500 cSt; acid no. < 0.02; flash pt. (CC) > 100 C; ref. index 1.4018-1.4047; < 0.5% volatiles
Storage: 60 mos. shelf life when stored at 25 C in original, unopened containers

Dow Corning® Q7-9180 Silicone Fluid [Dow Corning http://www.dowcorning.com]
Chem. Descrip.: Hexamethyldisiloxane
CAS 107-46-0; EINECS/ELINCS 203-492-7
Uses: Excipient, carrier in pharmaceutical topicals; carrier for actives in sprays
Features: Nongreasy; nonocclusive; spreads uniformly on skin; good leveling and easy rub-out; nonstinging on skin
Properties: Colorless cl. liq.; sp.gr. two grades 0.76; 0.82; visc. two grades 0.65; 1.0 mPa.s; acid no. < 0.05 max.; flash pt. -3 C; 4 C; ref. index 1.375; 1.384; > 99.0% purity
Storage: Store in tightly closed containers away from heat, sparks, open flames and other sources of ignition

Dow Corning® Silky Wax 10 [Dow Corning http://www.dowcorning.com]
Chem. Descrip.: Stearoyxtrimethylsilane and stearyl alcohol
CAS 18748-98-6; 112-92-5; EINECS/ELINCS 242-554-8; 204-017-6
Uses: Excipient, detackifier, thickener, water repellent, emollient in pharmaceutical topicals
Features: Nonocclusive; compat. with organic ingreds.
Properties: Soft wh. to lt. straw semicryst. wax @ R.T.; characteric odor; misc. with isopropanol, lanolin, mineral oil; sp. gr. 0.800; m.p. 53 C; acid no. 0.0-0.05 max.; flash pt. (CC) 100 C; flamm.
NFPA: Health 1, Flammability 1, Reactivity 0
Storage: 30 mos. shelf-life from date of prod.; store in original unopened containers @ ≤ R.T.

Dow Corning® Silmogen Carrier [Dow Corning http://www.dowcorning.com]
Chem. Descrip.: Hexamethyldisiloxane
CAS 107-46-0; EINECS/ELINCS 203-492-7
UN UN 1993
Uses: Excipient, film former in pharmaceutical topicals; carrier for actives in sprays
Features: Nonocclusive; resistant to wash off or rub off
Regulatory: SARA §311/312 Acute and Fire Hazard, §313 nonreportable
Properties: Cl., cryst. liq.; odorless; misc. with
isopropanol, sorbitol, mineral oil; sp. gr. 0.76; visc. 1.5-4.0 mPa.s; b.p. 100 C; acid no. < 0.05 max.; flash pt. (CC) -3.3 C; flamm.; > 60.0

Environmental: Expected to have low toxicity to aq. life

Precaution: Avoid oxidizing materials

NFPA: Health 1, Flammability 3, Reactivity 0

Storage: 12 mos. shelf-life from date of prod.; store in original containers @ ≤ R.T.

Dow Corning® ST Wax 30  [Dow Corning http://www.dowcorning.com]
Chem. Descrip.: Alkyl siloxane wax (40-70%); C24-54 alpha-Alkene (40-70%)
CAS ; 131459-42-2
Uses: Thickener; excipient for pharmaceutical topical formulations; in oral care, skin care, sun care; reduces tackiness; moisturizing agent
Features: High melting pt. matifying effect; non-greasy; occlusive; compat. with many non-polar cosmetic raw materials

Regulatory: NF, RCRA nonhazardous; SARA §312 Reactive Hazard; NJ. PA Right-to-Know
Properties: Wh. to off-wh. wax; char. odor; m.p. 70 C

Toxicology: Repeated, prolonged exposure may cause skin irritation; direct eye contact may cause temporary redness, discomfort
Precaution: Wear safety glasses; incompat. with oxidizers

Hazardous Decomp. Prods.: Carbon oxides, silicon dioxide, formaldehyde

NFPA: Health 1, Flammability 1, Reactivity 0

Storage: Keep container closed; store away from moisture

Dow Corning® ST Elastomer 10  [Dow Corning http://www.dowcorning.com]
Chem. Descrip.: Cyclomethicone >60.0% and dimethicone crosspolymer See Decamethylcyclopentasiloxane
Chem. Analysis: Octamethylcyclotetrasiloxane < 1%
CAS 541-02-6; EINECS/ELINCS 208-764-9
UN 1325
Uses: Thickener; excipient for pharmaceutical topical formulations
Features: Cold processing; non-greasy; quick absorption

Regulatory: NF, RCRA nonhazardous; SARA §312 Fire Hazard; NJ. PA Right-to-Know
Properties: Crystal cl. to sl. transluscent gel; sp.gr. 0.94; visc. 350,000-490,000 cSt; flash pt. (Seta CC) 91 C

Toxicology: May cause temporary eye discomfort

Precaution: Wear safety glasses; avoid contact with oxidizers and avoid eye contact

Hazardous Ingredients: Decamethylcyclopentasiloxane

Hazardous Decomp. Prods.: Carbon oxides, silicon dioxide, formaldehyde

NFPA: Health 0, Flammability 1, Reactivity 0

Storage: Keep from heat, sparks, flame

Dow Corning® Antifoam 1520-US  [Dow Corning http://www.dowcorning.com]
Chem. Descrip.: Silicone emulsion
Uses: Foam control agent for pharmaceuticals
Features: Effective for hot and cold systems

Properties: Milky-wh. thin cream; water-dilutable; sp.gr. 1.0; visc. 6000 cp; pH 4.0; nonionic; 20% act.

Toxicology: May cause temporary eye discomfort

Precaution: Keep away from heat, sparks, flame

Dow Corning® Antifoam M Compd.  [Dow Corning http://www.dowcorning.com]
Chem. Descrip.: Polydimethylsiloxane fluid (94%) and silica
Uses: Antifoam in pharmaceutical and biotechnological processes; act. ingred. in antiflatulent formulations (liq. dosage)

Regulatory: FDA 21CFR §332.10
Properties: < 0.5% volatiles

Dow Corning® Dimethiconol Blend 20  [Dow Corning http://www.dowcorning.com]
Chem. Descrip.: Dimethiconol and polydimethylsiloxane
CAS 70131-67-8; 63148-62-9
Uses: Spreading agent, excipient, water repellent for pharmaceutical topicals

Regulatory: FDA 21CFR §332.10
Properties: Cl., odorless liq.; very low water solubility < 100 ppb; sp. gr. 0.951; visc. 475 cP; vapor pressure <1 mm Hg; b.p. > 35 C; flash pt. (CC) > 188.6 F; 100% silicone content

Environmental: Low toxicity to aq. organisms

Precaution: Avoid oxidizing materials and avoid eye contact

Hazardous Decomp. Prods.: COx, SiO2, and formaldehyde

NFPA: Health 0, Flammability 1, Reactivity 0
Dow Corning® Emulsifier 10 [Dow Corning http://www.dowcorning.com]
Uses: Excipient in pharmaceutical topical; emulsifier for w/o emulsions in health care
Properties: Cl. to lt. straw transparent liq.; sp.gr. 0.900; kinetic visc. 25,000 cSt; 82% NV; < 5 ppm heavy metals

Dow Corning® Medical Antifoam AF Emulsion [Dow Corning http://www.dowcorning.com]
Chem. Descrip.: Simethicone USP emulsion with stearate emulsifiers, sorbic acid, and water
Uses: Defoamer and antifoam, esp. for aq. systems; suppressant for excessive GI gas; antiflatulent ingred. in antacids; adjunct to gastroscopic exams
Regulatory: FDA 21CFR §332.10 (OTC drug), 173.340 (to 33.3 ppm in foods)
Properties: Wh. creamy paste; water-dilutable; sp.gr. 1.0; pH 2.7; nonionic; 30% act.
Toxicology: Essentially no significant silicone absorption on ingestion
Storage: 12 mo shelf life stored in original unopened containers between 5 and 32 C; avoid freezing; freeze/thaw cycling may break emulsion

Dow Corning® Medical Antifoam C Emulsion [Dow Corning http://www.dowcorning.com]
Chem. Descrip.: Simethicone in methylcellulose
CAS 8050-81-5; 9004-67-5
Uses: Foam control in medical and pharmaceutical applications; OTC antiflatulents; biofermentation
Features: Water-dilutable emulsion
Regulatory: USP, FDA 21CFR §332.10 (OTC drug), 173.340
Properties: Nonionic; 30% Simethicone assay

Dowex™ 1 x 2 [Dow http://www.dow.com]
Chem. Descrip.: Ion exchange resin in styrene-DVB gel matrix
Uses: Ion exchange resin for recovery, isolation, and conc. of fermentation prods., such as flavor components, vitamins, pharmaceuticals
Features: 2% crosslinked strong base anion type
Regulatory: FDA 21CFR §332.10 (OTC drug), 173.340
Properties: Fine mesh avail. as beads in 3 sizes (50-100 mesh, 100-200 mesh, 200-400 mesh)

Dowex™ 1 x 4 [Dow http://www.dow.com]
Chem. Descrip.: Ion exchange resin in styrene-DVB gel matrix
Uses: Ion exchange resin for recovery, isolation, and conc. of fermentation prods., such as flavor components, vitamins, pharmaceuticals
Features: 2% crosslinked strong acid cation type
Regulatory: FDA 21CFR §332.10 (OTC drug), 173.340
Properties: Fine mesh avail. as beads in 3 sizes (50-100 mesh, 100-200 mesh, 200-400 mesh)
**Trade Name Reference**

**Features:** 4% crosslinked strong acid cation type  
**Properties:** Fine mesh avail. as beads in 3 sizes  
(50-100 mesh, 100-200 mesh, 200-400 mesh)

*Dowex™ 50W x 8* [Dow http://www.dow.com]  
Chem. Descrip.: Ion exchange resin in *styrene-DVB* gel matrix  
Uses: Ion exchange resin for recovery, isolation, and conc. of fermentation prods., such as flavor components, vitamins, pharmaceuticals  
Features: Strong acid cation type

**Dowex™ Marathon MR-3** [Dow http://www.dow.com]  
Chem. Descrip.: Ion exchange resin in *styrene-DVB* gel matrix  
Uses: Ion exchange resin for recovery, isolation, and conc. of fermentation prods., such as flavor components, vitamins, pharmaceuticals  
Features: Mixed bed resin; premium grade; uniform particle size

**Dowex™ Marathon A** [Dow http://www.dow.com]  
Chem. Descrip.: Ion exchange resin in *styrene-DVB* gel matrix  
Uses: Ion exchange resin for recovery, isolation, and conc. of fermentation prods., such as flavor components, vitamins, pharmaceuticals  
Features: Strong base anion type

**Dowex™ Marathon C** [Dow http://www.dow.com]  
Chem. Descrip.: Ion exchange resin in *styrene-DVB* gel matrix  
Uses: Ion exchange resin for recovery, isolation, and conc. of fermentation prods., such as flavor components, vitamins, pharmaceuticals  
Properties: Colorless visc. liq.; odorless; sweet taste; misc. with ethanol, IPA, water; immiscible with benzene, chloroform, ethyl ether, heptane; sp.gr. 1.25170; dens. 1.24770g/cm³; misc. 624 cps (20 C); f.p. 8 C; b.p. 175 C; flash pt. (PMCC) > 198.8 C; ref. index 1.46752 (20 C); 96% act., 4% water

**Dow Glycerine 96% USP** [Dow http://www.dow.com]  
Chem. Descrip.: *Glycerin* FCC, USP  
CAS 56-81-5; EINECS/ELINCS 200-289-5  
Uses: Humectant, solvent in pharmaceuticals  
Regulatory: FDA GRAS; E422 compliant; avail. in kosher grade  
Properties: Colorless visc. liq.; odorless; sweet taste; misc. with ethanol, IPA, water; immiscible with benzene, chloroform, ethyl ether, heptane; sp.gr. 1.25170; dens. 1.24770g/cm³; misc. 624 cps (20 C); f.p. 8 C; b.p. 175 C; flash pt. (PMCC) > 198.8 C; ref. index 1.46752 (20 C); 96% act., 4% water

**Dow Glycerine 99.5% USP/EP** [Dow Europe]  
Chem. Descrip.: *Glycerin* FCC, USP, EP  
CAS 56-81-5; EINECS/ELINCS 200-289-5  
Uses: Humectant, solvent in pharmaceuticals  
Regulatory: USP, Eur. Ph., FDA GRAS; E422 compliant; avail. in kosher grade  
Properties: Colorless visc. liq.; odorless; sweet taste; misc. with ethanol, IPA, water;
immiscible with benzene, chloroform, ethyl ether, heptane; m.w. 92.09; sp.gr. 1.26201; dens. 1.25802 g/cm³; visc. 1410 cps (20 C); vapor pressure 0.0025 mm Hg (50 C); f.p. 17 C; b.p. 290 C; flash pt. (PMCC) 195.5 C; ref. index 1.47399 (20 C); surf. tens. 63 dynes/cm (20 C); 99.5% act.

Chem. Descrip.: Propylene glycol dipelargonate
CAS 41395-83-9; EINECS/ELINCS 255-350-9

Uses: Emollient, spreading agent improving appearance in pharmaceuticals, topical emulsions, creams, lotions, alcoholic sol’s.

Features: Rancidless; provides drier feel

Properties: Gardner < 2 oily liq., faint odor; HLB 2.0; acid no. < 0.2; iodine no. < 1; sapon. no. 305-325

Toxicology: LD0 (oral, rat) > 16 g/kg; sl. irritating to eyes; nonirritating to skin

Drago-Oat-Active 2/060900 [Symrise USA http://www.symrise.com]

Chem. Descrip.: Water, butylene glycol, oat (avena sativa) kernel extract

Uses: Anti-irritant in skin care (for sensitive, dry, and problematic skin), after-sun and sun block prods., aftershave, shaving prods., face/body lotions, baby care, hair care

Dragosantol [Symrise USA http://www.symrise.com]

Chem. Descrip.: Bisabolol
CAS 515-69-5; EINECS/ELINCS 208-205-9

Uses: Anti-irritant in skin care (for sensitive, dry, and problematic skin), after-sun and sun block prods.

Dragowax SE [Symrise USA http://www.symrise.com]

Chem. Descrip.: Cetearyl alcohol, ceteareth-18

Uses: O/w emulsifier for ointments, esp. ointments with high oil content

Features: Exc. stability; requires no thickeners

Properties: Nonionic

Drakeol® 13 [Penreco http://www.penreco.com]

Chem. Descrip.: Lt. mineral oil NF
CAS 8042-47-5; EINECS/ELINCS 232-384-2

Uses: Base in pharmaceutical topical ointments

Regulatory: FDA 21CFR §172.878, 178.3620, 573.680; DOT nonregulated; OSHA nonhazardous; SARA §311/312/313 nonreportable; Australia, Canada DSL, China, EC, Japan, Korea listed

Properties: Water-wh. transparent liq., odorless; sol. in hydrocarbons; negligible sol. in water; sp.gr. 0.871 (60/60 F); dens. 7.14-7.31 lb/gal; visc. 34.9-37.3 cSt (40 C); vapor pressure < 1 mm Hg (70 F); b.p. 590 F; pour pt. -12 C; flash pt. 188 C

Toxicology: ACGIH TLV/TWA 5 mg/m³; STEL 10 mg/m³; relatively nontoxic by ingestion unless aspiration occurs; laxative props. may result in abdominal cramps, diarrhea; minimally irritating to eyes on direct contact; TSCA listed

Precaution: May react with strong oxidizing agents; spillages may be slippery

Hazardous Decomp. Prods.: Combustion may produce dense smoke, CO, CO₂, other oxides

HMIS: Health 0, Flammability 1, Reactivity 0

Storage: Store in closed containers away from heat, sparks, open flame, oxidizers

Drakeol® 19 [Penreco http://www.penreco.com]

Chem. Descrip.: White mineral oil USP
CAS 8042-47-5; EINECS/ELINCS 232-384-2

Uses: Base in pharmaceuticals (laxatives, topical ointments)

Regulatory: FDA 21CFR §172.878, 178.3620, 573.680; DOT nonregulated; OSHA nonhazardous; SARA §311/312/313 nonreportable; Australia, Canada DSL, China, EC, Japan, Korea listed

Properties: Water-wh. transparent liq., odorless; sol. in hydrocarbons; sp.gr. 0.88 (60/60 F); dens. 7.14-7.31 lb/gal; visc. 34.9-37.3 cSt (40 C); vapor pressure < 1 mm Hg (70 F); b.p. 590 F; pour pt. -12 C; flash pt. 188 C; ref. index 1.4725

Toxicology: ACGIH TLV/TWA 5 mg/m³; STEL 10 mg/m³; relatively nontoxic by ingestion unless aspiration occurs; laxative props. may result in abdominal cramps, diarrhea; minimally irritating to eyes on direct contact; TSCA listed

Precaution: May react with strong oxidizing agents

Hazardous Decomp. Prods.: Combustion may produce dense smoke, CO, CO₂, other oxides

HMIS: Health 0, Flammability 1, Reactivity 0
Trade Name Reference

Storage: Store in closed containers away from heat, sparks, open flame, oxidizers

Drakeol® 21 [Penreco
http://www.penreco.com]
Chem. Descrip.: Wh. mineral oil USP
CAS 8042-47-5; EINECS/ELINCS 232-384-2
Uses: Base for pharmaceutical laxatives
Regulatory: FDA 21CFR §172.878, 178.3620, 573.680; DOT nonregulated; OSHA nonhazardous; SARA §311/312/313 nonreportable; Australia, Canada DSL, China, EC, Japan, Korea listed
Properties: Water-wh. transparent liq., odorless; sol. in hydrocarbons; sp.gr. 0.876 (60/60 F); dens. 7.15-7.32 lb/gal; visc. 38.4-41.5 cSt (40 C); vapor pressure < 1 mm Hg (70 F); b.p. 600 F; pour pt. -12 C; flash pt. 193 C; ref. index 1.4733
Toxicology: ACGIH TLV/TWA 5 mg/m³; STEL 10 mg/m³; relatively nontoxic by ingestion unless aspiration occurs; laxative props. may result in abdominal cramps, diarrhea; minimally irritating to eyes on direct contact; TSCA listed
Precaution: May react with strong oxidizing agents
Hazardous Decomp. Prods.: Combustion may produce dense smoke, CO, CO₂, other oxides
HMIS: Health 0, Flammability 1, Reactivity 0
Storage: Store in closed containers away from heat, sparks, open flame, oxidizers

Drakeol® 34 [Penreco
http://www.penreco.com]
Chem. Descrip.: Wh. mineral oil USP
CAS 8042-47-5; EINECS/ELINCS 232-384-2
Uses: Lubricant for pharmaceuticals
Regulatory: FDA 21CFR §172.878, 178.3620, 573.680; DOT nonregulated; OSHA nonhazardous; SARA §311/312/313 nonreportable; Australia, Canada DSL, China, EC, Japan, Korea listed
Properties: Water-wh. transparent liq., odorless; sol. in hydrocarbons; sp.gr. 0.882 (60/60 F); dens. 7.25-7.35 lb/gal; visc. 65.8-71.0 cSt (40 C); vapor pressure < 1 mm Hg (70 F); b.p. 650 F; pour pt. -15 C; flash pt. 216 C; ref. index 1.4785
Toxicology: ACGIH TLV/TWA 5 mg/m³; STEL 10 mg/m³; relatively nontoxic by ingestion unless aspiration occurs; laxative props. may result in abdominal cramps, diarrhea; minimally irritating to eyes on direct contact; TSCA listed
Precaution: May react with strong oxidizing agents
Hazardous Decomp. Prods.: Combustion may produce dense smoke, CO, CO₂, other oxides
HMIS: Health 0, Flammability 1, Reactivity 0
Storage: Store in closed containers away from heat, sparks, open flame, oxidizers

Drakeol® 5 [Penreco
http://www.penreco.com]
Chem. Descrip.: Lt. mineral oil NF
CAS 8042-47-5; EINECS/ELINCS 232-384-2
Uses: Emollient for pharmaceutical ointments; lubricant for gelatin capsules
Regulatory: FDA 21CFR §172.878, 178.3620, 573.680; DOT nonregulated; OSHA nonhazardous; SARA §311/312/313 nonreportable; Australia, Canada DSL, China, EC, Japan, Korea listed
Properties: Water-wh. transparent liq., odorless; sol. in hydrocarbons; negligible sol. in water; sp.gr. 0.828-0.838; dens. 6.89-7.00 lb/gal; visc. 7.6-8.7 cSt (40 C); vapor pressure < 1 mm Hg (70 F); b.p. 320 F; pour pt. -9 C; flash pt. 154° F
Toxicology: ACGIH TLV/TWA 5 mg/m³; STEL 10 mg/m³; relatively nontoxic by ingestion unless aspiration occurs; laxative props. may result in abdominal cramps, diarrhea; minimally irritating to eyes on direct contact; TSCA listed
Precaution: May react with strong oxidizing agents
Hazardous Decomp. Prods.: Combustion may produce dense smoke, CO, CO₂, other oxides
HMIS: Health 0, Flammability 1, Reactivity 0
Storage: Store in closed containers away from heat, sparks, open flame, oxidizers

**Drakesol® 220 [Penreco](http://www.penreco.com)**
Chem. Descrip.: Mineral oil
CAS **8042-47-5**; EINECS/ELINCS **232-384-2**
Uses: Carrier in pet repellent spray
Regulatory: FDA 21CFR §172.884, 178.3650, 573.740; SARA §313 nonreportable; OSHA nonhazardous; Australia AICS; Canada DSL; China listed; Europe EINECS; Japan ENCs; Korea ECL; Philippines PICCS
Properties: Cl. liq.; sl hydrocarbon odor; sol. in hydrocarbons; insol. in water; m.w. 0.8; sp.gr. 0.804 (60/60 F); dens. 6.69 lb/gal (60 F); visc. 2.28 cSt (100 F); vapor pressure < 0.1 mm Hg; vapor dens. 6.7; i.b.p. 235 C min.; pour pt. -18
Trade Name Reference

C; b.p. 239.4-276.7 C; flash pt. 102 C; KB value 24.5; < 1% aromatics
Toxicology: TSCA listed
Precaution: Do not allow to enter sewers, watercourses; avoid breathing vapors or mist
Hazardous Decomp. Prods.: CO, CO₂, other oxides
HMIS: Health 0, Flammability 1, Reactivity 0
Storage: Store in closed containers away from heat, sparks, open flame, oxidizers

DREWMULSE® 200K [Stepan http://www.stepan.com]
Chem. Descrip.: Glyceryl stearate
CAS 123-94-4
Uses: Emulsifier, emollient, stabilizer, visc. builder, opacifier for pharmaceuticals (suppositories, ointments, cream bases)
Regulatory: FDA 21CFR §175.105, 175.300, 176.200, 176.210, 177.2800; kosher; Europe, Japan, Canada, Australia, Korea, Philippines, China listed
Properties: Ivory wh. flakes; sl. fatty odor; sp.gr. 0.9145; visc. 30 cSt (70 C); m.p. 60 C; HLB 2.8; iodine no. 170; flash pt. > 94 C; 0% RVOC; nonionic; 42% monoester; 0.17% moisture
Toxicology: LD₅₀ > 5 g/kg; TSCA listed
Environmental: Biodeg.
Storage: Store @ 18-32 C; avoid prolonged storage above 32 C

DREWMULSE® GMC-810 [Stepan http://www.stepan.com]
Chem. Descrip.: Mixture of caprylic acid monoglyceride, glyceryl monodecanoate, glyceryl dicaprylate, glyceryl dicaprate, triglycerides, mixed decanoate and octanoate and glycerin See Caprylic/capric triglyceride; Glyceryl caprate; Glyceryl caprylate
CAS 26402-26-6; 26402-22-2; 36354-80-0 20; 53988-07-1; 73398-61-5; 56-81-5; EINECS/ELINCS 247-668-1; 247-667-6; 252-992-1; 258-903-2; 277-452-2; 200-289-5
Uses: Emulsifier for vitamin and mineral preps.; solvent for many organic compounds including steroids
Regulatory: GRAS
Properties: Sl. yel. soft solid to liq.; fatty odor; dispersible in water; sol. in propylene glycol (10% w/v), ethyl acetate (10% w/v), and xylene (10% w/v); sp. gr. 0.992; m.p. 24-30 C; HLB 4.8; acid no. 1.0; iodine no 0.05; sapon. no.

DREWMULSE® GMO Kosher [Stepan http://www.stepan.com]
Chem. Descrip.: Glyceryl oleate
CAS 111-03-5; EINECS/ELINCS 203-827-7
Uses: Emulsifier, stabilizer, opacifier, and visc. builder in pharmaceuticals (vitamin carrier, ointment and cream bases)
Regulatory: Kosher
Properties: Gardner 6 liq.; HLB 3.4; nonionic; 40-45% conc.

DREWPOL® 10-10-O [Stepan http://www.stepan.com]
Chem. Descrip.: Polyglyceryl-10 decaoleate (95-100%) and oleic acid (0-5%)
CAS 11094-60-3; 112-80-1; EINECS/ELINCS 234-316-7; 204-007-1
Uses: Emulsifier for pharmaceuticals, creams, lotions; suspending agent for food colors; solubilizer for vitamins, flavors, medicaments
Regulatory: FDA 21 CFR §172.854, kosher
Properties: Amber cl. visc. liq.; fatty odor; sp. gr. 0.9014 g/ml; visc. 92.2 cSt @37 C; m.p. -37.2 C; acid no. 10.0 max.; HLB 3.0; flash pt. >94 C; nonionic
Toxicology: LD₅₀ (oral, rat) >5000-15,000 mg/kg; noncarcinogenic; pract. nontoxic orally; may cause mild irritation to eyes; inh. of vapors irritating to respiratory system; acute ing. may cause mild GI distress
Environmental: Biodegrad.
Precaution: Wear goggles and gloves
Hazardous Decomp. Prods.: COₓ and/or low molecular weight hydrocarbons
HMIS: Health 1, Flammability 1, Reactivity 0

Dri-Klear™ [Chr. Hansen A/S http://www.chr-hansen.com]
Chem. Descrip.: Cellulose polymer system with plasticizers
Uses: Coating system providing aq. film coating for pharmaceutical and vitamin tablets
Features: Rapid dissolution in water; min. foam generation; exc. substrate adhesion
Regulatory: GRAS
Properties: Wh. to off-wh. free-flowing powd., cl. to opaque when solubilized (formula dependent)
Storage: 3 yr. shelf life stored in tightly sealed containers in dry location
Trade Name Reference

Dritex S [ABITEC
http://www.abiteccorp.com]
Chem. Descrip.: Hydrogenated soybean oil
CAS 8016-70-4; EINECS/ELINCS 232-410-2
Uses: Filler, binder, lubricant, disintegrant, solubilizer, carrier, emulsifier, and emollient in tablets, capsules, suppositories; crystallization promoter, m.p. modifier, bodying agent, lubricant, moisturizer for clinical nutrition, coating, dermatologicals, nutritional/sports supplements, soft gelatin capsules, suppositories, sustained release applics., creams and lotions

Properties: Lovibond 3R max. liq., flake, bead; drop pt. 155 F; acid no. 0.2 max.; iodine no. 1-5; sapon. no. 189-197

Toxicology: Nontoxic

Dry-Flo® [Nat'l. Starch & Chem./Food Innovation
http://www.foodinnovation.com]
Chem. Descrip.: Food starch, modified
Uses: Processing aid, dusting aid, antisticking agent, lubricant for pharmaceuticals; processing aid for encapsulated vitamins

Features: Hydrophobic; extremely resist. to wetting in aq. media

Regulatory: FDA 21CFR §172.892; DOT nonregulated; SARA §313 nonreportable

Properties: Wh. to off-wh. free-flowing fine powd.; starch odor; insol. in water; m.w. > 10,000; sp.gr. 1.5; pH Ξ 6 (1%); ≤ 11% moisture

Toxicology: Possible physical irritant from dust particles; particulates may scratch eye surfs. and cause mech. irritation; possible nuisance dust by inh.; maintain below TWA 10 mg/m³; low oral toxicity; low toxicity by skin contact; TSCA listed

Precaution: Potential for dust explosion; minimize dust generation

Hazardous Decomp. Prods.: Does not undergo spontaneous decomp.; typ. combustion prods.: CO, CO₂, N, water

Storage: Store @ ambient temps.; sensitive to static electricity

Dry Vitamin D₃ Type 100 SD [DSM Nutritional Prods. USA http://www.nutraaccess.com]
Chem. Descrip.: Cholecalciferol compounded with dicalcium phosphate, lactose, acacia, coconut oil, BHT, and silicon dioxide
See Calcium phosphate dibasic dihydrate;

Properties: Sol. in cold water; 100,000 min. IU vitamin D/g

Toxicology: Vitamin D: potentially toxic esp. for young children; excessive ingestion may cause hypercalcemia, hypercalcuria

Storage: Store in cool, dry place in tightly closed container; sensitive to air, heat, light, and humidity

Dry Vitamin E 75™ HP [DSM Nutritional Prods. USA http://www.nutraaccess.com]
Chem. Descrip.: dl-α-Tocopheryl acetate finely dispersed in a matrix of gelatin; calcium silicate and silicon dioxide are used as processing aids. See Silica
CAS 7695-91-2;9000-70-8;1344-95-2;$; EINECS/ELINCS 231-710-0;232-554-6;215-710-8;231-545-4

Uses: Vitamin source for multivitamin and min. tablets (coated and uncoated), and for hard-shell gelatin capsules

Regulatory: USP, FCC, Ph. Eur.

Properties: Off-wh. to tan-greyish free-flowing particles (beadlets); 99% min. through sieve; 74% min. assay

Precaution: High level of Vitamin E should not be given to individuals with coagulation defects without advice of physician.

Storage: Store in cool, dry place in tightly closed container

Dry Vitamin E Acetate 50% SD [DSM Nutritional Prods. USA http://www.nutraaccess.com]
Chem. Descrip.: dl-α-Tocopheryl acetate USP, FCC compd. with hydrolyzed gelatin, 3% silicon dioxide
See Silica
CAS 7695-91-2;68410-45-7;$; EINECS/ELINCS 231-710-0;270-082-2;231-545-4

Uses: Vitamin E source for pharmaceuticals (multivitamin tablets, chewable or coated dietary supplements, hard shell capsules); esp. developed for direct compression tableting of chewable or coated tablets

Regulatory: FDA GRAS
Properties: Wh. to off-wh. free-flowing powd., acceptable odor and taste; 95% min. through
Trade Name Reference

20 mesh; sl. hygroscopic; disp. readily in cold or warm water; 50% min. dl-α-tocopheryl acetate

Storage: Store in dry place in tightly closed container; avoid excessive heat

Uses: Anti-inflammatory, moisturizing, tissue regenerating, and anti-free radical action for sun prods., slimming prods., cosmetic and health prods.

Properties: Colorless to very sl. pink limpid liq.; misc. with water @ R.T., alcohols, glycols; sp.gr. 1.0 (20 C); pH ≈ 5.5

Use Level: From 1%

Toxicology: Nontoxic; sl. eye irritant; nonirritating to skin

Storage: Do not expose to temps. below 0 C

Uses: Pharmaceutical surfactant, solubilizer, wetting agent, dispersant for use as adjuvant in tablet formulations (aids granulation, improves tablet and dissolution chars., maintains tablet hardness)

Features: Good stability; good compat. with many drug actives

Properties: Wh. crst. powd.; anionic

Toxicology: Direct contact may cause eye or skin irritation

Storage: Store in tightly closed containers below 24 C with < 60% r.h.

DSS Tablet Grade [Cytec Ind. http://www.cytec.com] Chem. Descrip.: Docusate sodium USP (70%), colloidal silicon dioxide NF (27.5%), absorbable dusting powd. USP (0.5%), magnesium stearate NF (2%) See Dioctyl sodium sulfo succinate; Silica

Uses: Pharmaceutical grade surfactant, solubilizer, wetting agent, dispersant for medicaments, as adjuvant in tablet formulation (improves tablet and dissolution chars.), esp. for constipation treatments/preventives

Features: Good stability, compat.

Properties: Wh. fine free-flowing powd.; 100% through 20 mesh; anionic; 68-72% assay

Use Level: 0.1-1% (adjuvant)

Toxicology: Direct contact may cause eye or skin irritation

Storage: Store in tightly closed containers below 24 C and < 60% r.h.

Duocrome® [Engelhard] Chem. Descrip.: Titanium dioxide-coated mica and a thin layer of colored pigment (iron blue, carmine, and/or iron oxide)

Uses: Iridescent colors producing dual-color effects derived from light interference and light absorption; used in analgesic body lotions, sunscreens, toothpaste

Features: Produces dual-color effects derived from light interference and light absorption

Properties: Colors incl. blue/red, blue/green, blue/gold, red/blue, red/violet, gold/green, green/blue, etc.; fine lustrous powd.; insol.; particle size 6-50 µm; sp.gr. ≈ 3.0

Uses: Taste masking agent, stabilizer, and carrier for pharmaceuticals; binding agent for medicinal agents onto an insol. polymeric matrix

Regulatory: SARA §311/312 acute health hazard; §313 nonreportable

Properties: Wh. fine powd.; ammonia odor; pract. insol. in water; sp. gr. > 1.0; vapor pressure 17.0 mm Hg; pH 4.0 - 7.0 (aq. slurry); >88.0% act.

Toxicology: LD50 (oral, rat) >5,000 mg/kg, LD50 (dermal, rabbit ) >5,000 mg/kg; severe irritant to eyes

Precaution: Avoid nitric acid and other strong oxidizers which can cause explosive reactions; avoid dust formation

Hazardous Decomp. Prods.: Monomer vapors HMIS: Health 2, Flammability 1, Reactivity 0

Dur-Em® 117 [Loders Croklaan Inc] Chem. Descrip.: Mono- and diglycerides with citric acid (preservative) See Mono- and diglycerides of fatty acids

Uses: Emulsifier for pharmaceutical creams and lotions

Regulatory: GRAS

Properties: Wh. beads, flakes, typ. odor/flavor; m.p. 62-65 C; HLB 2.8; iodine no. 5 max.; flash pt. 300 F min.; nonionic; 100% conc.; 40%

Handbook of Pharmaceutical Additives, Third Edition 238
Trade Name Reference

min. alpha monoglyceride

Storage: Store in cool, dry place away from odor-producing substances

Dur-Em® 207-E [Loders Croklaan Inc]
Chem. Descrip.: Mono- and diglycerides with citric acid to help protect flavor See Mono- and diglycerides of fatty acids
Uses: Emulsifier for pharmaceuticals
Regulatory: FDA 21CFR §136.110
Properties: Wh. free-flowing powd., bland odor/flavor; m.p. 140-146 F; HLB 4.2; iodine no. 5 max.; nonionic; 100% act.; 50% min. alpha mono
Storage: Store sealed in cool, dry area away from odor-producing substances; 90 days storage life @ 40-80 F

DVM 55 [Deltech http://www.deltechcorp.com]
Chem. Descrip.: Divinylbenzene See m-Divinylbenzene
CAS 108-57-6
Uses: Pharmaceuticals (polymers for enzyme immobilization, dental cements, prostheses)
Properties: Pale yel.; pract. insol. in water; m.w. 130.19; sp.gr. 0.9084; dens. 7.58 lb/gal; visc. 1 cps; vapor pressure 0.06 mm Hg; f.p. -50 C; b.p. 195 C; flash pt. (TCC) 68 C; ref. index 1.5585

DVB 63 [Deltech http://www.deltechcorp.com]
Chem. Descrip.: Divinylbenzene See m-Divinylbenzene
CAS 108-57-6
Uses: Pharmaceuticals (polymers for enzyme immobilization, dental cements, prostheses)
Properties: Pale yel.; pract. insol. in water; m.w. 130.19; sp.gr. 0.9111; dens. 7.6 lb/gal; visc. 1 cps; vapor pressure 0.06 mm Hg; f.p. -50 C; b.p. 197 C; flash pt. (TCC) 69 C

Chem. Descrip.: 1,1,1,3,3,3-Heptafluoropropane See 1,1,1,2,3,3,3-Heptafluoropropane
CAS 431-89-0; UN 3296
Uses: Aerosol propellant for aerosol drugs including metered dose inhalers for treatment of asthma and other respiratory disorders
Features: Non-CFC, chemically inert
Regulatory: CGMP compliance; SARA §311/312 acute
Properties: Liq. dens. 1.39 g/cm3; vapor pressure 4.55 bars; b.p. -16.4 C; m.p. -133 C; 99% min. act.
Toxicology: AEL 1000 ppm (8- and 12-h TWA); LC50 (inh., 4 h, rat) ≈ >800,000 ppm; TSCA listed
Environmental: Nonozone depleting; global warming potential (100 year time horizon) 2900
Precaution: Wear chemical splash goggles and impervious gloves; incompatible with strong reducing agents
Hazardous Decomp. Prods.: Hydrogen fluoride, carbonyl fluoride, COx
NFPA: Health 1, Flammability 0, Reactivity 1
Trade Name Reference

Dymel® 236fa [DuPont Fluorochems.  
http://www.dupont.com/dymel]  
Chem. Descrip.: 1,1,1,3,3,3-Hexafluoropropane  
CAS 690-39-1  
Uses: Propellant in topical anesthetic and skin refrigerant  
Features: Non-CFC, chemically inert, low pressure, nonflammable  
Regulatory: CGMP compliance  
Properties: Liq. dens. 1.36 g/cm³; vapor pressure 272.4 kPa; b.p. -1.4°C  
Toxicology: AEL 1000 ppm (8- and 12-h TWA); LC 4 h, rat ≈ >189,000 ppm; TSCA listed  
Environmental: Nonozone depleting; global warming potential (100 year time horizon) 2900

Dynacerin® 660 [Sasol Germany  
http://www.sasol.com;  
http://www.sasololefinssurfactants.com;  
Sasol N. Am.  
http://www.sasolnorthamerica.com]  
Chem. Descrip.: Oleyl erucate  
CAS 17673-56-2; EINECS/ELINCS 241-654-9  
Uses: Emollient, lubricant, dispersant, solubilizer for pharmaceuticals; carrier, vehicle and solvent for topical ointments, creams, lotions  
Features: Oxidation-stable; environmentally compat.; jojoba oil substitute; high polarity with superior solvent characteristics for active drugs  
Regulatory: JCIC  
Properties: Ylsh. liq. wax; sol. in alcohol, min. oil, acetone; visc. 15-18 mPa·s (40°C); acid no. 1 max.; iodine no. 95 max.; sapon. no. 95-110; cloud pt. 15°C

Dynacerin® CP [Sasol Germany  
http://www.sasol.com;  
http://www.sasololefinssurfactants.com;  
Sasol N. Am.  
http://www.sasolnorthamerica.com]  
Chem. Descrip.: Cetyl palmitate  
CAS 540-10-3; EINECS/ELINCS 208-736-6  
Uses: Carrier in capsule fillings, inlets, ointments and creams and in dental products; surface treatment and binder in tablets; replacement for natural spermaceti, consistency agent in creams, for coatings, sustained release  
Features: Neutral, stable  
Regulatory: USP, EP, JCIC  
Properties: Solid; m.p. 50°C; hyd. no. 6 max.

Dynacerin® DO [Sasol Germany  
http://www.sasol.com;  
http://www.sasololefinssurfactants.com;  
Sasol N. Am.  
http://www.sasolnorthamerica.com]  
Chem. Descrip.: Decyl oleate  
CAS 3687-46-5; EINECS/ELINCS 222-981-6  
Uses: Petrolatum substitute in topical pharmaceuticals  
Features: Neutral, stable  
Regulatory: EP  
Properties: Liq. wax; visc. ≈ 18 mPa·s

Dynacerin® 211P [Sasol Germany  
http://www.sasol.com;  
http://www.sasololefinssurfactants.com;  
Sasol N. Am.  
http://www.sasolnorthamerica.com]  
Chem. Descrip.: Acetylated monoglycerides of edible fatty acids See Acetylated mono- and diglycerides of fatty acids  
CAS 68990-55-6  
Uses: Consistency regulator and emulsion stabilizer in ointments and creams  
Regulatory: USP, E472a  
Properties: Waxy solid; nonionic

Dynacerin® 212P [Sasol Germany  
http://www.sasol.com;  
http://www.sasololefinssurfactants.com;  
Sasol N. Am.  
http://www.sasolnorthamerica.com]  
Chem. Descrip.: Acetylated monoglycerides of edible fatty acids See Acetylated mono- and diglycerides of fatty acids  
CAS 68990-55-6  
Uses: Consistency regulator and emulsion stabilizer in ointments and creams  
Properties: Waxy solid; m.p. 35°C; acid no. 1 max.; iodine no. 3 max.; sapon. no. 350; nonionic; 100% conc.

Dynacerin® 285 [Sasol Germany  
http://www.sasol.com;  
http://www.sasololefinssurfactants.com;  
Sasol N. Am.  
http://www.sasolnorthamerica.com]  
Chem. Descrip.: Diacetylated monoglycerides  
Uses: Consistency regulator and emulsion stabilizer in ointments and creams  
Properties: Cl. liq.; dens. 0.98 kg/dm³; visc. 45 mPa·s; acid no. 0.3 max.; iodine no. 2 max.; sapon. no. 385-415

Dynasan® 110 [Sasol N. Am.  
http://www.sasolnorthamerica.com;  
http://www.sasol.com;  
http://www.sasololefinssurfactants.com]
Che

Chem. Descrip.: Tricaprin
CAS 621-71-6; EINECS/ELINCS 210-702-0
Uses: Lubricant for pharmaceutical tablets
Features: Environmentally compat.
Properties: Wh. block; m.p. 28-31 C; cl. pt. 30 C;
acid no. 0.2 max.; iodine no. 1 max.; sapon. no. 295-305

Environmental: Environmentally compat.

Dynasan® 112 [Sasol N. Am.
http://www.sasolnorthamerica.com]
Chem. Descrip.: Trilaurin
CAS 538-24-9; EINECS/ELINCS 208-687-0
Uses: Consistency agent for pharmaceutical creams, lotions;
lubricant, mold release agent, binder, retarding agent, powd. base
for tablets
Features: Environmentally compat.
Properties: Wh. powd.; m.p. 43-47 C; cl. pt. 45 C;
acid no. 0.2 max.; iodine no. 1 max.; sapon. no. 257-266

Environmental: Environmentally compat.

Dynasan® P60 [Sasol Germany
http://www.sasol.com;
http://www.sasololefinssurfactants.com;
Sasol N. Am.
http://www.sasolnorthamerica.com]
Chem. Descrip.: Hydrogenated palm oil
EINECS/ELINCS 271-056-3
Uses: Consistency regulator for pharmaceutical preps.
Regulatory: USP
Properties: Wh. to off-wh. powd.; m.p. 58-62 C;
acid no. 0.3 max.; iodine no. 3 max.; sapon. no. 190-210; hydroxyl no. 10 max.

Environmental: Environmentally compat.

Dynasylan® BSA [Degussa/Aerosil & Silanes
http://www.aerosil.com; http://www.sivento-silanes.com; Degussa AG/Aerosil & Silanes
http://www.degussa-bioactives.com]
Chem. Descrip.: Bis (trimethylsilyl) acetamide
CAS 10416-59-8; EINECS/ELINCS 233-892-7
Uses: Silylating agent in the pharmaceutical industry
Properties: Liq.; m.w. 203.4; sp.gr. 0.83 (20 C);
b.p. 71-73 C (35 mm); flash pt. 17 C; ref. index 1.418 (20 C); 95% purity

Dynasylan® HMDS [Degussa/Aerosil &
Handbook of Pharmaceutical Additives, Third Edition

Trade Name Reference

Chem. Descrip.: Hexamethyldisilazane
CAS 999-97-3; EINECS/ELINCS 213-668-5
Uses: Silylating agent in pharmaceuticals
Properties: Liq.; m.w. 161.4; sp.gr. 0.77 (20 C); b.p. 126-127 C; flash pt. 27 C; ref. index 1.408 (20 C); 98% purity
Precaution: Wear safety glasses, impervious clothing; combustible; incompat. with strong oxidants; dec. with heat; do not get in eyes; do not breathe vapor or mist; forms a carbamate on exposure to air; decomposes with heat
Hazards Decomp. Prods.: Emits toxic fumes of CO and nitrogen oxides on decom.
NFPA: Health 3, Flammability 2, Reactivity 0
Storage: Store in tightly closed container in a cool, dry place under nitrogen padding to prevent air intrusion; keep away from heat, flame

Eashave [Pentapharm Ltd http://www.pentapharm.com; Centerchem http://www.centerchem.com]
Chem. Descrip.: Water, wheat (Tricicum vulgare) germ extract, saccharomyces cerevisiae extract, sodium hyaluronate See Wheat (Tricicum vulgare) germ oil
Uses: Anti-irritant, soothing agent, moisturizer for after-shave prods.
Properties: Yel. cl. to sl. opalescent liq.; sp.gr. 1.01-1.03 (20 C); ref. index 1.347-1.351 (25 C); pH 5.5-6.5
Storage: 2 yr. shelf life when stored in the original sealed containers protected from light in a clean and cool place at temps. between 15-25 C; in order to avoid secondary microbial contamination after opening, containers should be handled with special care

Eastacryl 30D [Eastman http://www.eastman.com]
Chem. Descrip.: Acrylic copolymer aq. disp. See Acrylates copolymer
Uses: Excipient for pharmaceutical tablets or granules, coatings, enteric coatings
Features: pH-sensitive; withstands prolonged contact with acidic gastric fluids, but dissolves readily in the mildly acidic to neutral pH environment of the sm. intestine
Regulatory: DOT nonregulated; SARA §311/312 immediate health hazard, §313 nonreportable
Properties: Milky disp.; char. odor; disp. in water; sp.gr.1.01-1.03 (20 C); pH 2.3-2.7
Toxicology: Causes eye irritation; ing. may cause GI irritation; TSCA listed
Precaution: Combustible solid when dry; can dec. @ elevated temps.; reacts with strong oxidizing agents

Eastar™ PETG Copolyester 6763 [Eastman http://www.eastman.com]
Chem. Descrip.: Amorphous glycol-modified PET See Polyethylene terephthalate
Uses: Used for medical containers, pharmaceuticals
**Trade Name Reference**

**Features:** Offers sparkling clarity in film and sheet form, easy thermoformability, toughness, sterilizability with ethylene oxide or gamma rays for medical applics.

**Regulatory:** FDA compliance

**Properties:** 10-mil film props.: sp.gr. 1.27; haze 0.5%; tens. str. 50 MPa (break, MD); Elmendorf tear str. 125 g (MD); Dart impact 425 g.

**Eastman® 18-99** [Eastman http://www.eastman.com]

Chem. Descrip.: Canola oil glyceride

Uses: Emulsifier for w/o phases in pharmaceutical sustained-release formulations and microspheres, topical permeation enhancement, solubilization

**Regulatory:** GRAS

**Properties:** Semiplastic; sp.gr. 0.93 (80 C); m.p. 35 C; HLB 3.8-4.0; acid no. 3 max.; iodine no. 90-95; 90% min. monoester

Storage: 6 mo shelf life

**Eastman® CA** [Eastman http://www.eastman.com]

Chem. Descrip.: Cellulose acetate

CAS 9004-35-7

Uses: Excipient for formulation of microparticles for controlled-release pharmaceutical apps.

**Eastman® CAB** [Eastman http://www.eastman.com]

Chem. Descrip.: Cellulose acetate butyrate

CAS 9004-36-8

Uses: Excipient for formulation of drug-loaded microparticles

**Eastman® EAA** [Eastman http://www.eastman.com]

Chem. Descrip.: Ethyl acetoacetate

See Ethylacetocetate

CAS 141-97-9; EINECS/ELINCS 205-516-1

Uses: Solvent for pharmaceuticals

**Regulatory:** SARA §311/312 acute health/chronic health/fire hazard, §313 nonreportable; Canada DSL, EINECS, Australia AICS, Japan MITI, Korea ECL listed

**Properties:** Colorless liq.; ester odor; sol. in alcohol, ether, 12% in water (20 C); m.w. 130.14; sp.gr. 1.03 (20 C); dens. 8.54 lb/gal; vapor pressure 1.3 mbar (14 C); f.p. -43 C; b.p.170 C; flash pt. (Seta CC) 68 C; 100% act.

**Toxicology:** LD50 (oral, rat) > 6400 mg/kg, (skin, guinea pig) > 20 ml/kg; LC50 (inh., rat, 6 h) > 1129 ppm; causes mod. eye irritation; sl. skin irritant; nonsensitizing to skin; TSCA listed

**Environmental:** BOD5 0.60 g/g; COD 1.71 g/g; LC50 (fathead minnow, 96 h) > 100 mg/l, (golden orfe, 48 h) 275-515 mg/l; EC50 (daphnia, 24 h) 800 mg/l; prevent runoff from entering drains, sewers, streams

**Precaution:** Combustible liq. and vapor; reacts with strong oxidizing agents

**Hazardous Decomp. Prods.:** Combustion: CO, CO2

**HMIS:** Health 2, Flammability 2, Reactivity 0

Storage: Store in closed container

**Eastman® HQMME** [Eastman http://www.eastman.com]

Chem. Descrip.: Hydroquinone monomethyl ether

CAS 150-76-5; EINECS/ELINCS 205-769-8

Uses: Chemical intermediate for mfg. pharmaceuticals

**Properties:** Wh. flakes; sol. (g/100 g): > 350 g acetone and ethanol, > 200 g ethyl acetate, 35 g cottonseed oil, 32 g toluene, 4 g water; m.w. 124.14; bulk dens. 36.5 lb/ft3; b.p. 246 C; solid. pt. 54 C; flash pt. (COC) 132 C; fire pt. 135 C; 99% act.

**Eastman® MAA** [Eastman http://www.eastman.com]

Chem. Descrip.: Methyl acetoacetate

CAS 105-45-3; EINECS/ELINCS 203-299-8

Uses: Solvent for fragrances, pharmaceuticals; copromoter for unsat. polyesters; pharmaceutical intermediate

**Regulatory:** SARA §311/312 acute health/chronic health/fire hazard, §313 nonreportable; Canada DSL, EINECS, Australia AICS, Japan MITI, Korea ECL listed

**Properties:** Colorless liq.; pleasant odor; sol. (@ 20 C) in water (44.5%), alcohol, ether, ethyl acetate; m.w. 116.12; sp.gr. 1.078 (20 C); dens. 8.95 lb/gal (20 C); visc. 1.74 mPa•s (20 C); vapor pressure 1.32 mbar (20 C); f.p. -55 C; b.p. 170 C; flash pt. (COC) 74 C; pH 4.1; 100% act.

**Toxicology:** LD50 (oral, rat) 3200 mg/kg, (skin, rabbit) > 10 ml/kg; LC50 (inh., rat, 6 h) > 6.5 mg/l; harmful by ing.; may cause blindness if swallowed; causes eye irritation; high vapor concs. may cause eye/respiratory tract irritation; sl. skin irritant; mod. to strong eye irritant; TSCA listed

**Environmental:** BOD5 0.31 g/g; BOD20 0.77 g/g; COD 1.45 g/g; LC50 (fathead minnow, Drug Name Reference)
Precaution: Combustible liq. and vapor; reacts violently with strong oxidizing agents
Hazardous Decomp. Prods.: Combustion: CO, CO₂
HMIS: Health 2, Flammability 2, Reactivity 0
Storage: Store in closed containers away from heat and flame

Eastman® Butyraldehyde, Dry [Eastman http://www.eastman.com]
Chem. Descrip.: Butyraldehyde See n-Butyraldehyde
CAS 123-72-8; EINECS/ELINCS 204-646-6
Uses: Syn. flavoring agent in pharmaceuticals
Properties: Colorless liq.; pungent odor; sp.gr. 0.805 (20 C); vapor pressure 91 mm Hg (20 C); m.p. -99 C; b.p. 75 C; flash pt. (SCC) -13 C; autoignition temp. 199 C

Eastman® Hydroquinone USP [Eastman http://www.eastman.com]
Chem. Descrip.: Hydroquinone USP
CAS 123-31-9; EINECS/ELINCS 204-617-8
Uses: Skin bleaching agent for pharmaceuticals
Regulatory: USP
Properties: Wh. cryst. solid; sol. 36% in ethanol, 23% in propylene glycol, 16% in glycerol, 7% in water; m.w. 110.1; m.p. 172-174 C; autoignition temp. 199 C

Eastman® Isopropanol [Eastman http://www.eastman.com]
Chem. Descrip.: Isopropyl alcohol
CAS 67-63-0; EINECS/ELINCS 200-661-7
Uses: Solvent for pharmaceuticals
Regulatory: SARA §311/312 acute health/fire hazard, §313 nonreportable; Canada DSL, EINECS, Australia AICS, Japan MITI, Korea ECL listed
Properties: Colorless liq.; alcohol odor; sol. in water (20 C); m.w. 60.1; sp.gr. 0.79 (20 C); dens. 0.783 lb/gal (20 C); vis. 2.4 cp (20 C); vapor pressure 32.8 mm Hg (20 C); f.p. -88 C; b.p. 80.8-83.8 C (760 mm Hg); flash pt. (TCC) 13 C; fire pt. 16 C; autoignition temp. 360 C; surf. tens. 21.3 dynes/cm (20 C); 100% act.
Toxicology: LD50 (oral, rat) 5800 mg/kg, (skin, rabbit) 16.4 ml/kg; LC50 (inh., rat, 8 h) 12,000 ppm; ACGIH TLV/TWA 400 ppm; mod. eye irritant; high vapor concs. may cause drowsiness, eye/respiratory tract irritation; sl. skin irritant; prolonged/repeated skin contact may cause drying, cracking, irritation; TSCA listed

Environmental: BOD5 1190-1720 mg/g; BOD20 1680 mg/g; COD 2230 mg/g; LC50 (fathead minnow, 96 h) > 1000 µl/l, (golden orfe, 48 h) 8970-9280 mg/l, (daphnia, 96 h) > 1000 µl/l; prevent runoff from entering drains, sewers, streams
Precaution: Flamm. liq. and vapor; flamm. limits 2.31-12.75 vol.% in air (93 C); vapors may cause flash fire, ignite explosively, or flash back; residual vapors may explode on ignition; forms explosive peroxides which may be shock-sensitive; material may accumulate a static charge which could act as an ignition source; reacts violently with strong oxidizing agents
Hazardous Decomp. Prods.: Combustion: CO, CO₂
HMIS: Health 2, Flammability 3, Reactivity 1
Storage: Store in tightly closed container in well-ventilated area away from heat, sparks, flame, light; after opening, purge container with nitrogen before reclosing

Eastman® Propionic Anhydride, Kosher [Eastman http://www.eastman.com]
Chem. Descrip.: Propionic anhydride
CAS 123-62-6
Uses: Anesthetics; pharmaceuticals; vitamins
Regulatory: SARA §311/312 immediate (acute) health hazard, fire hazard, §313 nonreportable
Properties: Colorless liq.; pungent odor; dec. in water; m.w. 130.14; sp.gr. 1.007 (24 C); dens. 8.44 lb/gal (20 C); vis. 1.16 cP; vapor pressure 1.33 mbar (21 C); f.p. -45 C; b.p. 167 C; flash pt. (TCC) 63 C; ref. index 1.4022
Toxicology: LD50 (oral, rat) 2360 mg/kg, (skin, rabbit) 10.07 g/kg; causes eye and skin burns; harmful if swallowed; mist or vapor irritating to eyes and respiratory tract; TSCA listed
Environmental: Mod. acidic aq. sol'n.; may cause adverse environmental effects
Precaution: Combustible liq. and vapor; reacts with water; contents may develop pressure if exposed to water; reacts with metals, strong bases, amines; reacts violently with strong oxidizing agents
HMIS: Health 3, Flammability 2, Reactivity 1
Trade Name Reference

Storage: Keep container closed; keep away from heat and flame

Eastman® Triacetin USP/FCC [Eastman http://www.eastman.com]
Chem. Descrip.: Glyceryl triacetate USP See Triacetin
CAS 102-76-1; EINECS/ELINCS 203-051-9
Uses: Plasticizer for film coatings on pharmaceutical tablets, beads, and gran., in topical antifungal creams and ointments; fragrance fixing agent
Features: Compat. with cellulosics, methacrylic acid copolymers, and PVAP; high solvent power
Properties: Pt-Co 10 max. liq.; sol. 61.20 g/l in water (20 C); misc. with alcohol, ether, chloroform; m.w. 218.21; sp.gr. 1.1540; dens. 9.65 lb/gal (20 C); visc. 17.4 cP; vapor pressure 1.33 mbar (100 C); supercools to ≈ -70 C; m.p. -78 C; b.p. 258 C (760 mm); ref. index 1.4290
Use Level: 10-35% (tablet coatings)

Eastman® Triacetin, Food Grade [Eastman http://www.eastman.com]
Chem. Descrip.: Triacetin
CAS 102-76-1; EINECS/ELINCS 203-051-9
Uses: Syn. flavoring agent
Regulatory: FDA 21 CFR §184.1901, GRAS; avail. in kosher grade; DOT nonregulated; SARA §313 nonreportable; Canada DSL listed
Properties: Colorless liq.; sl. odor; mod. sol. in water; sp.gr. 1.16 (24 C); visc. 17.4 cps; vapor pressure 1.33 mbar (100 C); f.p. 3 C; b.p. 258 C; decom. pt. 265 C; flash pt. (Seta CC) 324 C; 100% act.
Toxicology: LD50 (oral, rat) > 7 g/kg, (skin, rat) > 2 g/kg; expected to be low ing. hazard; very sl. skin irritant
Precaution: Can react with strong oxidizing agents
Hazardous Decomp. Prods.: Combustion prods.: CO2, CO
HMIS: Health 0, Flammability 1, Reactivity 0
Storage: Keep container closed; protect from contamination

Chem. Descrip.: Sodium aliphatic ester sulphonate
Uses: Wetting agent, penetrant, dispersant, solubilizer, emulsifier for topical pharmaceuticals
Properties: Cl. to lt. amber visc. liq.; mild alcoholic odor; sol. in electrolytes, glycols, ketones, other oxygenated prods.; misc. with water; sp.gr. 1.011; b.p. 210 F; flash pt. (COC) 204 F; pH 8.0±0.3 (1%); Draves wetting 20-25 s (0.075%); 21% min. act.
Use Level: 0.5-1.0% on total wt. of bath
Toxicology: Eye irritant; may cause mild skin irritation; not absorbed through skin; may be harmful if swallowed; may cause nausea, vomiting; overexposure may cause liver/kidney damage; inh. may cause nasal/respiratory irritation; hot vapors may cause coughing
Precaution: Avoid alkaline materials; spills may be slippery
Hazardous Ingredients: IPA (< 1%)
Hazardous Decomp. Prods.: Thermal decomp.
Trade Name Reference

**Economix Gelatin**  [Vyse Gelatin](http://www.vyse.com)
Chem. Descrip.: Type A porkskin gelatin, 150 bloom  See Gelatin
CAS  9000-70-8; EINECS/ELINCS  232-554-6
Uses: Pharmaceuticals
Features: General purpose grade

**Edenor® C 6 98-100**  [Cognis](http://www.cognis.de)
Chem. Descrip.: Caproic acid
CAS  142-62-1; EINECS/ELINCS  205-550-7
Uses: Pharmaceuticals; flavors
Properties: Lt. liq.; typ. odor; acid no. 476-484; iodine no. 0-0.5; sapon. no. 268-275; 0-0.2% water
Storage: 2 wks shelf life when stored in original bags @ R.T.; 8 wks shelf life when stored under nitrogen blanket

**Edenor® C 12 70**  [Cognis](http://www.cognis.de)
Chem. Descrip.: Lauric acid
CAS  143-07-7; EINECS/ELINCS  205-582-1
Uses: Pharmaceuticals; flavors
Properties: Wh. liq.; typ. odor; acid no. 268-274; iodine no. 0-0.5; sapon. no. 268-275; 0-0.2% water
Storage: 2 wks shelf life when stored in refined steel or aluminum tank; 8 wks shelf life when stored under nitrogen blanket

**Edenor® C 12 98-100**  [Cognis](http://www.cognis.de)
Chem. Descrip.: Lauric acid
CAS  143-07-7; EINECS/ELINCS  205-582-1
Uses: Pharmaceuticals; flavors
Properties: Wh. liq.; typ. odor; acid no. 279-282; iodine no. 0-0.3; sapon. no. 279-283; 0-0.2% water
Storage: 2 wks shelf life when stored in refined steel or aluminum tanks @ 60 C max.; 8 wks shelf life when stored under nitrogen blanket; 2 yrs. shelf life when stored cool, dry, below 30 C (flaked form)

**Edenor® C 16 98-100**  [Cognis](http://www.cognis.de)
Chem. Descrip.: Palmitic acid
CAS  57-10-3; EINECS/ELINCS  200-312-9
Uses: Pharmaceuticals; flavors
Properties: Lt. liq.; lt. odor; acid no. 217-221; iodine no. 0-0.5; sapon. no. 217-222; 0-0.2% water
Storage: 2 wks shelf life when stored in refined steel or aluminum tanks @ 70-80 C; 8 wks shelf life when stored under nitrogen blanket; 2 yrs. shelf life when stored below 55 C (flaked form)

**Edenor® C 22 85 R**  [Cognis](http://www.cognis.de)
Chem. Descrip.: Behenic acid
CAS  112-85-6; EINECS/ELINCS  204-010-8
Uses: Pharmaceuticals; flavors
Properties: Lt. solid; typ. odor; acid no. 163-168; iodine no. 0-2; sapon. no. 163-169; 0.2% max. water
Storage: 2 yrs. shelf life when stored in original sealed bags below 35 C; 2 wks shelf life when stored in refined steel or aluminum tanks @ 95 C max. and kept under nitrogen blanket

**Edible Beef Gelatin**  [GMI Prods.](http://www.gmi-originates.com)
Chem. Descrip.: Type B or calfskin gelatin  See Gelatin
CAS  9000-70-8; EINECS/ELINCS  232-554-6
Uses: Edible protein for pharmaceuticals; carrier, base, stabilizer for capsules, enteric capsules, suppositories, topicals; adhesive substitute; binder, disintegrant in tablets; hemorrhage control agent; dusting powd. for surgical gloves; therapeutic use
Regulatory: GRAS
Properties: Pale yel. vitreous brittle solid, nearly odorless and tasteless; sol. in warm water; swells due to hydration in cold water; sp.gr. 1.2; dens. 1.3-1.4; b.p. > 100 C (dec.); pH 5.0-7.5; flash pt. nonflamm.; 9-13% moisture
Toxicology: Nuisance dust; contact with dust causes mild eye irritation; inhaling dust may cause respiratory irritation
Environmental: Biodeg.
Storage: Store in airtight containers @ R.T.; avoid exposure to water or excessive heat

**Edible Kosher Beef Gelatin**  [GMI Prods.](http://www.gmi-originates.com)
Chem. Descrip.: Gelatin
CAS  9000-70-8; EINECS/ELINCS  232-554-6
Uses: Buffer against humidity and air temp. in pharmaceutical soft and hard gel capsules; processing aid for microencapsulation of colors, flavors, vitamins; nutraceuticals
Properties: Completely sol. in hot water; pH 5.2-6.2; 8-12% moisture
Trade Name Reference

**Storage:** Store in airtight containers @ R.T.; avoid exposure to water or excessive heat

**Edicol® [Lucid Colloids [http://www.lucidgroup.com]]**

Chem. Descrip.: Guar gum See Guar (Cyanois tetragonoloba) gum
CAS 9000-30-0; EINECS/ELINCS 232-536-8

Uses: Rheology control agent (by water-phase management) in foods, feeds, and pharmaceuticals, diabetic formulations, antacids, suspensions, syrups, laxatives, toothpaste; binder and disintegrant in tablets; controlled release agent in drug formulations; slimming and appetite control agent

Properties: Wh. to cream-wh. powd., sl. char. grassy or beany odor, neutral taste; sol. in hot and cold water; nonionic

**Effer-Soda™ [SPI Pharma [http://www.spipharma.com]]**

Chem. Descrip.: Sodium bicarbonate (10-17%) with 'desiccant skin' of sodium carbonate (8-12%) surrounding the core

Uses: Effervescent agent, stabilizer in pharmaceutical tablets and powds. (antacids, analgesics, cough/cold formulations)

Features: Highly sol./stable; nonhygroscopic; compressible; fast dissolving; reacts with an acid to produce CO₂ which creates bubbling or fizzing of the effervescent prod.; ease of carrying a tablet, while giving the bioavailability of ingesting a sol'n.

Properties: Free-flowing wh.powd.; 98% > 74 µ particle size; dens. 0.97 g/cc (loose), 1.12 g/cc (tapped); pH 8.9-9.2

**Elestab® HP 100 [Laboratoires Sérobiologiques [http://www.laboratoires-serobiologiques.com]]**

Chem. Descrip.: Hexamidine diisethionate
CAS 659-40-5; EINECS/ELINCS 211-533-5

Uses: Antimicrobial and preservative for pharmaceuticals; cutaneous asepticizer for oily, acneic skin care, antidandruff care

Features: Broad-spectrum; effective against Gram-positive and Gram-negative bacteria; good against yeast, fungi

Properties: Wh. microcryst. powd.; weak odor; water-sol.; acid no. 1 max.

Use Level: 0.03-0.10%

Chem. Descrip.: Soybean (glycine soja) protein with Phenonip® preservative (0.8%)

See Ethylparaben; Methylparaben; Phenoxyethanol; Propylparaben

CAS 9010-10-0; EINECS/ELINCS 232-720-8

Uses: Anti-irritant for skin care prods.

Features: Inhibitor of the enzyme elastase; contributes to keeping skin elastic, smooth, and soft; prevents irritation and inflam.

Properties: Ylsh. cl. to sl. opalescent sol’n.; sp.gr. 1.052-1.062 (20 C); ref. index 1.359-1.362; pH 5.2-6.0

Use Level: 3-7% (skin care)

Chem. Descrip.: p-Toluene sulfonic acid monohydrate
CAS 1019-95-4; EINECS/ELINCS 203-180-0

Uses: Catalyst in mfg. of pharmaceutical prods.

Properties: Wh. to pale pink crystals; m.p. 103.5 C; anionic; 97.5% act.

**Emal 0 [Kao Corp. [http://www.kao.co.jp]]**

Chem. Descrip.: Sodium lauryl sulfate
CAS 151-21-3; EINECS/ELINCS 205-788-1

Uses: Surfactant, foaming agent, detergent, emulsifier, dispersant in pharmaceuticals, dentifrices

Features: High foaming; excellent biodegradability

Properties: Wh. powd.; anionic; 99% act.

**Emal 10G [Kao Corp. [http://www.kao.co.jp]]**

Chem. Descrip.: Sodium lauryl sulfate
CAS 151-21-3; EINECS/ELINCS 205-788-1

Uses: Surfactant, foaming agent, detergent, emulsifier, dispersant in pharmaceuticals, dentifrices

Features: High foaming; excellent biodegradability

Properties: Wh. needle; anionic; 94% act.

**Emal 10PT [Kao Corp. [http://www.kao.co.jp]]**

Chem. Descrip.: Sodium lauryl sulfate
CAS 151-21-3; EINECS/ELINCS 205-788-1

Uses: Surfactant, foaming agent, detergent, emulsifier, dispersant in pharmaceuticals, dentifrices

Features: High foaming; excellent biodegradability

Properties: Wh. needle; anionic; 94% act.

**Emal 20C [Kao Corp. [http://www.kao.co.jp]]**

Chem. Descrip.: Sodium lauryl ether sulfate
## Trade Name Reference

**See Sodium laureth sulfate**  
CAS 9004-82-4; EINECS/ELINCS 221-416-0  
**Uses:** Surfactant, foaming agent for pharmaceuticals  
**Properties:** Lt. yel. liq.; anionic; 25% act.

**Emal 20CM**  
[Kao Corp.](http://www.kao.co.jp)  
**Chem. Descrip.:** Sodium alkyl ether sulfate  
**Uses:** Surfactant, foaming agent for pharmaceuticals  
**Properties:** Lt. yel. liq.; anionic; 25% act.

**Emal 20T**  
[Kao Corp.](http://www.kao.co.jp)  
**Chem. Descrip.:** Triethanolamine polyoxyethylene alkyl ether sulfate  
**Uses:** Surfactant, foaming agent for pharmaceuticals  
**Properties:** Lt. yel. liq.; anionic; 25% act.

**Emal 270**  
[Kao Corp.](http://www.kao.co.jp)  
**Chem. Descrip.:** Sodium lauryl ether sulfate  
**See Sodium laureth sulfate**  
CAS 9004-82-4; EINECS/ELINCS 221-416-0  
**Uses:** Surfactant, foaming agent for pharmaceuticals  
**Properties:** Lt. yel. liq.; anionic; 70% act.

**Emalex C-20**  
[Nihon Emulsion](http://www.nihon-emulsion.co.jp)  
**Chem. Descrip.:** PEG-20 castor oil  
CAS 61791-12-6  
**Uses:** Emulsifier, solubilizer, dispersant in medical pharmaceuticals  
**Regulatory:** JSCI compliance  
**Properties:** Pale yel. oil; HLB 9; nonionic

**Emalex C-30**  
[Nihon Emulsion](http://www.nihon-emulsion.co.jp)  
**Chem. Descrip.:** PEG-30 castor oil  
CAS 61791-12-6  
**Uses:** Emulsifier, solubilizer, dispersant in medical pharmaceuticals  
**Regulatory:** JSCI compliance  
**Properties:** Pale yel. oil; HLB 11; nonionic

**Emalex C-40**  
[Nihon Emulsion](http://www.nihon-emulsion.co.jp)  
**Chem. Descrip.:** PEG-40 castor oil  
CAS 61791-12-6  
**Uses:** Emulsifier, solubilizer, dispersant in medical pharmaceuticals  
**Regulatory:** JSCI compliance  
**Properties:** Pale yel. oil; HLB 12; nonionic

**Emalex C-50**  
[Nihon Emulsion](http://www.nihon-emulsion.co.jp)  
**Chem. Descrip.:** PEG-50 castor oil  
CAS 61791-12-6  
**Uses:** Emulsifier, solubilizer, dispersant in medical pharmaceuticals  
**Regulatory:** JSCI compliance  
**Properties:** Pale yel. oil; HLB 13; nonionic

**Emalex ET-2020**  
[Nihon Emulsion](http://www.nihon-emulsion.co.jp)  
**Chem. Descrip.:** Polysorbate 20  
CAS 9005-64-5  
**Uses:** Emulsifier, solubilizer in medical pharmaceuticals  
**Regulatory:** JSCI compliance
Trade Name Reference

See Glyceryl stearate
CAS 123-94-4
Uses: Surfactant for medical pharmaceuticals
Properties: Cream beads, HLB 5; nonionic
Emalex GMS-P [Nihon Emulsion http://www.nihon-emulsion.co.jp]
Chem. Descrip.: Glyceryl monopalmitate
See Glyceryl stearate

Handbook of Pharmaceutical Additives, Third Edition 249
Glyceryl palmitate
CAS 26657-96-5; EINECS/ELINCS 247-887-2
Uses: Surfactant for medical pharmaceuticals
Features: Lipophilic
Regulatory: JCID compliance
Properties: Cream-colored beads; HLB 4; nonionic

Emalex GWIS-100EX [Nihon Emulsion
http://www.nihon-emulsion.co.jp]
Chem. Descrip.: Glyceryl isostearate
CAS 32057-14-0; EINECS/ELINCS 262-710-9
Uses: Surfactant for medical pharmaceuticals
Properties: Pale yel. oil; nonionic

Emalex GWIS-110EX [Nihon Emulsion
http://www.nihon-emulsion.co.jp]
Chem. Descrip.: PEG-10 glyceryl isostearate
Uses: Emulsifier and solubilizer for medical ingredients
Features: Provides smoothness and good spreading props.
Regulatory: JCID compliance
Properties: Pale yel. oil; HLB 10; nonionic

Emalex GWIS-115EX [Nihon Emulsion
http://www.nihon-emulsion.co.jp]
Chem. Descrip.: PEG-15 glyceryl monoisostearate See PEG-15 glyceryl isostearate
CAS 68958-58-7
Uses: Emulsifier and solubilizer for medical ingredients
Features: Provides smoothness and good spreading props.
Regulatory: JCID compliance
Properties: Pale yel. oil; HLB 12; nonionic

Emalex GWIS-115 [Nihon Emulsion
http://www.nihon-emulsion.co.jp]
Chem. Descrip.: PEG-15 glyceryl isostearate
CAS 68958-58-7
Uses: Emulsifier and solubilizer for medical ingredients
Regulatory: JCID compliance
Properties: Pale yel. oil; HLB 12; nonionic

Emalex GWIS-120EX [Nihon Emulsion
http://www.nihon-emulsion.co.jp]
Chem. Descrip.: PEG-20 glyceryl monoisostearate See PEG-20 glyceryl isostearate
CAS 68958-58-7
Uses: Emulsifier and solubilizer for medical ingredients
Features: Provides smoothness and good spreading props.

Emalex GWIS-125 [Nihon Emulsion
http://www.nihon-emulsion.co.jp]
Chem. Descrip.: PEG-25 glyceryl isostearate
CAS 69468-44-6
Uses: Emulsifier and solubilizer for medical ingredients
Features: Provides smoothness and good spreading props.
Regulatory: JCID compliance
Properties: Pale yel. oil; HLB 15; nonionic

Emalex GWIS-130EX [Nihon Emulsion
http://www.nihon-emulsion.co.jp]
Chem. Descrip.: PEG-30 glyceryl monoisostearate See PEG-30 glyceryl isostearate
CAS 69468-44-6
Uses: Emulsifier and solubilizer for medical ingredients
Features: Provides smoothness and good spreading props.
Regulatory: JCID compliance
Properties: Pale yel. oil; HLB 16; nonionic

Emalex GWIS-140EX [Nihon Emulsion
http://www.nihon-emulsion.co.jp]
Chem. Descrip.: PEG-40 glyceryl isostearate
CAS 69468-44-6
Uses: Emulsifier and solubilizer for medical ingredients
Features: Provides smoothness and good spreading props.
Regulatory: JCID compliance
Properties: Pale yel. soft paste; HLB 15; nonionic

Emalex GWIS-150EX [Nihon Emulsion
http://www.nihon-emulsion.co.jp]
Chem. Descrip.: PEG-50 glyceryl isostearate
CAS 69468-44-6
Uses: Emulsifier and solubilizer for medical ingredients
Features: Provides smoothness and good spreading props.
Regulatory: JCID compliance
Properties: Cream-colored soft wax; HLB 18; nonionic

Emalex GWIS-160EX [Nihon Emulsion
http://www.nihon-emulsion.co.jp]
Chem. Descrip.: PEG-60 glyceryl isostearate
CAS 68958-58-7
Uses: Emulsifier and solubilizer for medical ingredients
Features: Provides smoothness and good spreading props.
Trade Name Reference

spreading props.
Regulatory: JCID compliance
Properties: Cream-colored soft wax; HLB 16; nonionic

Emalex GWIS-200EX [Nihon Emulsion http://www.nihon-emulsion.co.jp]
Chem. Descr.: Glyceryl diisostearate See Glycerin mono/diisostearate
Uses: Surfactant for medical pharmaceuticals
Properties: Pale yellow oil; HLB 2; nonionic

Emalex GWS-304 [Nihon Emulsion http://www.nihon-emulsion.co.jp]
Chem. Descr.: PEG-4 glyceryl tristearate See PEG-4 glyceryl stearate
Uses: Oil-phase cosmetic ingredient for ointments
Regulatory: JCID compliance
Properties: Cream-colored wax; HLB 2

Emalex GWS-305 [Nihon Emulsion http://www.nihon-emulsion.co.jp]
Chem. Descr.: PEG-5 glyceryl tristearate See PEG-5 glyceryl stearate
Uses: Oil-phase ingredient for ointments
Regulatory: JCID compliance
Properties: Cream-colored wax; HLB 3

Emalex HC-5 [Nihon Emulsion http://www.nihon-emulsion.co.jp]
Chem. Descr.: PEG-5 hydrogenated castor oil
CAS 61788-85-0
Uses: Oil-phase ingredient, w/o emulsifier, dispersant for medical products
Regulatory: JSCI compliance
Properties: Pale yellow oil; HLB 3; nonionic

Emalex HC-7 [Nihon Emulsion http://www.nihon-emulsion.co.jp]
Chem. Descr.: PEG-7 hydrogenated castor oil
CAS 61788-85-0
Uses: Oil-phase ingredient, w/o emulsifier, dispersant for medical products
Regulatory: JSCI compliance
Properties: Pale yellow oil; HLB 5; nonionic

Emalex HC-10 [Nihon Emulsion http://www.nihon-emulsion.co.jp]
Chem. Descr.: PEG-10 hydrogenated castor oil
CAS 61788-85-0
Uses: Oil-phase ingredient, w/o emulsifier, dispersant for medical products
Regulatory: JSCI compliance
Properties: Pale yellow oil; HLB 6; nonionic

Emalex HC-40 [Nihon Emulsion http://www.nihon-emulsion.co.jp]
Chem. Descr.: PEG-40 hydrogenated castor oil
CAS 61788-85-0
Uses: Solubilizer for oily components and perfumes in alcoholic tonics, oil-sol. vitamins; emulsifier, reforming agent, thickener for creams, lotions
Regulatory: JSCI compliance
Properties: Cream-colored soft paste; HLB 12; nonionic

Emalex HC-50 [Nihon Emulsion http://www.nihon-emulsion.co.jp]
Chem. Descr.: PEG-50 hydrogenated castor oil
CAS 61788-85-0
Uses: Solubilizer for oily components and perfumes in alcoholic tonics, oil-sol. vitamins; emulsifier, reforming agent, thickener for creams, lotions
Regulatory: JSCI compliance
Properties: Cream-colored soft wax; HLB 13; nonionic

Emalex HC-60 [Nihon Emulsion http://www.nihon-emulsion.co.jp]
Chem. Descr.: PEG-60 hydrogenated castor oil
CAS 61788-85-0
Uses: Solubilizer for oily components and perfumes in alcoholic tonics, oil-sol. vitamins; emulsifier, reforming agent, thickener for creams, lotions
Regulatory: JSCI compliance
Properties: Cream-colored soft wax; HLB 14; nonionic

Emalex LWS-3 [Nihon Emulsion http://www.nihon-emulsion.co.jp]
Chem. Descr.: PEG-3 lauryl ether stearate
Uses: Self-emulsifying ingredient, ointment base, emollient, spreading agent for medical ointments
Properties: Cream-colored soft wax; HLB 1

Emalex LWS-5 [Nihon Emulsion http://www.nihon-emulsion.co.jp]
Chem. Descr.: PEG-5 lauryl ether stearate
Uses: Self-emulsifying ingredient, ointment base, emollient, spreading agent for medical ointments
Properties: Cream-colored paste; HLB 3
Trade Name Reference

Emalex LWS-8 [Nihon Emulsion http://www.nihon-emulsion.co.jp]
Chem. Descrip.: PEG-8 lauryl ether stearate
Uses: Self-emulsifying ingred., dispersant, emulsion stabilizer, gloss aid, water repellent for medical ointments
Properties: Cream-colored paste; HLB 5

Emalex LWS-10 [Nihon Emulsion http://www.nihon-emulsion.co.jp]
Chem. Descrip.: PEG-10 lauryl ether stearate
Uses: Self-emulsifying ingred., dispersant, emulsion stabilizer, gloss aid, water repellent for medical ointments
Properties: Cream-colored soft wax; HLB 7

Emalex LWS-15 [Nihon Emulsion http://www.nihon-emulsion.co.jp]
Chem. Descrip.: PEG-15 lauryl ether stearate
Uses: Self-emulsifying ingred., dispersant, emulsion stabilizer, gloss aid, water repellent for medical ointments
Properties: Cream-colored soft wax; HLB 9

Emalex SEF-320(A) [Nihon Emulsion http://www.nihon-emulsion.co.jp]
Chem. Descrip.: Mixt. of nonionic surfactants
Uses: Emulsifier for ointments
Properties: Cream-colored wax; HLB 7; nonionic

Emalex TPS-203 [Nihon Emulsion http://www.nihon-emulsion.co.jp]
Chem. Descrip.: PEG-3 trimethylolpropane distearate
Uses: Oil-phase ingred. in ointments
Regulatory: JCID compliance
Properties: Cream-colored wax; HLB 0

Emalex TPS-204 [Nihon Emulsion http://www.nihon-emulsion.co.jp]
Chem. Descrip.: PEG-4 trimethylolpropane distearate
Uses: Oil-phase ingred. in ointments
Properties: Cream-colored wax; HLB 1

Emalex TPS-205 [Nihon Emulsion http://www.nihon-emulsion.co.jp]
Chem. Descrip.: PEG-5 trimethylolpropane distearate
Uses: Oil-phase ingred. in ointments
Properties: Cream-colored wax; HLB 4

Emalex TPS-303 [Nihon Emulsion http://www.nihon-emulsion.co.jp]
Chem. Descrip.: PEG-3 trimethylolpropane tristearate
Uses: Oil-phase ingred. in ointments
Regulatory: JCIDID compliance
Properties: Cream-colored wax; HLB 2

Emanon 3299R [Kao Corp. SA]
Chem. Descrip.: PEG distearate
CAS 9005-08-7
Uses: Emulsifier, thickener for pharmaceuticals
Regulatory: JSCI compliance
Properties: Lt. ylsh. wh. flakes; sol. in water, xylene; disp. in ethanol; insol. in n-hexane; visc. 1950 mPa*s (70 C); m.p. 55-58 C; acid no. 5 max.; sapon. no. 10.5-12.0; HLB 18.9; nonionic

Emanon 3299 [Kao Corp. http://www.kao.co.jp]
Chem. Descrip.: PEG monostearate
Uses: Emulsifier, thickener for pharmaceuticals
Features: Highly hydrophilic
Regulatory: JSCI, JHOSPA compliance
Properties: Lt. ylsh. wh. flakes; sol. in water, xylene; disp. in ethanol; insol. in n-hexane; visc. 1950 mPa*s (70 C); m.p. 56.5-61.5 C; HLB 19.4; acid no. 3 max.; sapon. no. 5.5-10.5

Emanon 3299 [Kao Corp. SA]
Chem. Descrip.: PEG distearate
CAS 9005-08-7
Uses: Emulsifier, thickener for pharmaceuticals
Features: Highly hydrophilic
Regulatory: JSCI, JHOSPA compliance
Properties: Lt. ylsh. wh. flakes; sol. in water, xylene; disp. in ethanol; insol. in n-hexane; visc. 1950 mPa*s (70 C); m.p. 56.5-61.5 C; HLB 19.4; acid no. 3 max.; sapon. no. 5.5-10.5

Emanon 3199 [Kao Corp. SA]
Chem. Descrip.: PEG monostearate
See PEG stearate
CAS 9004-99-3
Uses: Emulsifier, thickener for pharmaceuticals
Properties: Pale yel. soft paste; HLB 14; nonionic
Trade Name Reference

**Emanon 4110** [Kao Corp. SA]
Chem. Descrip.: PEG monooleate  See PEG oleate
CAS 9004-96-0
Uses: Emulsifier for pharmaceuticals
Features: Highly hydrophilic
Regulatory: JHOSPA compliance
Properties: Lt. yel. liq.; sol. in ethanol, xylene; sol. hazy in water; insol. in hexane; visc. 60 mPa•s (30 C); HLB 11.6; acid no. 2 max.; ester no. 81-91

**Emasol O-15R** [Kao Corp. http://www.kao.co.jp]
Chem. Descrip.: Sorbitan sesquioleate
CAS 9005-65-6
Uses: Emulsifier for pharmaceuticals
Properties: Brn. visc. liq.; sol. in ethanol, n-hexane; sl. sol. in xylene; acid no. 10 max.; HLB 10.0

**Emasol O-105R** [Kao Corp. http://www.kao.co.jp]
Chem. Descrip.: POE 6 sorbitan monooleate  See PEG-6 sorbitan oleate
CAS 8007-43-0; EINECS/ELINCS 232-360-1
Uses: Emulsifier, dispersant for pigments; emulsifier in pharmaceuticals
Properties: Lt. br. oily liq.; HLB 3.7; nonionic

**Emasol S-20** [Kao Corp. http://www.kao.co.jp]
Chem. Descrip.: Sorbitan distearate
CAS 36521-89-8; EINECS/ELINCS 247-707-2
Uses: Emulsifier, dispersant for pigments; emulsifier in pharmaceuticals
Properties: Pale ylsh. wh. flake; HLB 4.4; nonionic

**Emcocel® HD90** [JRS Pharma http://www.jrspharma.com]
Chem. Descrip.: Microcrystalline cellulose NF, JP, Ph.Eur., BP
CAS 9004-34-6; EINECS/ELINCS 232-674-9
Uses: Binder, vehicle, disintegrant, flow aid for pharmaceutical tablets
Features: High binding capacity, tablet strength, compactibility; able to initiate disintegration; low friability; inherent lubricity; enhanced compression of other excipients
Regulatory: NF, BP, EP, JP
Properties: 91 µ avg. particle size; 45% min +200 mesh; dens. (tapped) 0.40 g/ml max.; pH 5.5-7.0; 100% conc.

**Emcocel® LM50** [JRS Pharma http://www.jrspharma.com]
Chem. Descrip.: Microcrystalline cellulose
CAS 9004-34-6; EINECS/ELINCS 232-674-9
Uses: Binder, diluent, disintegrant for pharmaceutical tablets
Features: Low moisture content; improved water scavenging for formulations where free moisture might be troublesome; high compactibility; low friability; inherent lubricity
Regulatory: NF, BP, EP, JP
Properties: Wh. fine powd.; 50 µm median particle size; > 0.25% on #60 screen; < 30% on #200 screen particle size; prac. insol. in water, acetone, ethanol, and toluene; dens. 0.25-0.37 g/ml (bulk), dens. 0.37-0.50 g/ml (tapped); pH 5-7
Storage: 3 yr. shelf life in well-closed containers @ < 25 C and 60% r.h.

**Emcocel® LP200** [JRS Pharma http://www.jrspharma.com]
Chem. Descrip.: Microcrystalline cellulose
CAS 9004-34-6; EINECS/ELINCS 232-674-9
Uses: Binder, diluent, disintegrant for pharmaceutical tablets
Features: Low friability; inherent lubricity; enhanced compression of other excipient; able to initiate disintegration
Regulatory: NF, BP, EP, JP
Properties: Wh. or practically wh. fine powd.; 185 µm median particle size; > 10% on #60 screen; > 50% on #100 screen; complete sol. in ammonical copper tetramine sol'n.; insol. in
Trade Name Reference

water, acetone, ethanol, and toluene; dens. 0.35-0.50 g/ml (tapped), 0.20-0.37 g/ml (bulk); pH 5-7

Storage: 3 yr. shelf life in unopened tightly closed containers @ < 25 C and 60% r.h.

Emcocel® SP15  [JRS Pharma http://www.jrspharma.com]
Chem. Descrip.: Partly depolymerized microcrystalline cellulose
CAS 9004-34-6; EINECS/ELINCS 232-674-9
Uses: Excipient, binder, diluent, disintegrant for pharmaceutical tablets
Features: High binding capacity, tablet strength, compactibility; able to initiate disintegration; low friability; inherent lubricity
Regulatory: NF, EP, JP
Properties: Wh. to almost wh., fine or gran. powd.; 15 µm median particle size; pract. insol in water, acetone, ethanol, tol. and dilute acids sodium hydroxide.(50g/l sol'n.); bulk dens. > 0.13 g/ml; pH 5-7

Emcocel® XLM90  [JRS Pharma http://www.jrspharma.com]
Chem. Descrip.: Microcrystalline cellulose
CAS 9004-34-6; EINECS/ELINCS 232-674-9
Uses: Binder, diluent, disintegrant for pharmaceutical tablets, esp. for moisture-sensitive components
Features: Very low moisture content; high compactibility; low friability; inherent lubricity; enhanced compression of other excipients; able to initiate disintegration
Regulatory: NF, BP, EP, JP
Properties: Wh. or practically wh. fine powd.; 90 µm median particle size; < 8% on #60 screen; complete sol. in ammonical copper tetramine sol'n.; insol. in water, acetone, ethanol, and tol. and dens. 0.37-0.50 g/ml (tapped), 0.25-0.37 g/ml (bulk); pH 5-7
Storage: Hygroscopic; 2 y. shelf life in unopened tightly closed containers @ < 25 C and 60% r.h.

Emcompress®  [JRS Pharma http://www.jrspharma.com]
Chem. Descrip.: Dibasic calcium phosphate dihydrate USP, FCC, BP  See Calcium phosphate dibasic dihydrate
CAS 7789-77-7; EINECS/ELINCS 231-826-1
Uses: Excipient, binder, filler, flow aid for direct compression of pharmaceutical tablets and capsules
Features: Storage-stable; compat. with broad range of drug actives
Regulatory: USP/NF, EP, BP
Properties: Wh. free-flowing, monoclinic crytals; avg. particle size 136 µ; 15% max. through 200 mesh; readily sol. in dilute hydrochloric and nitric acids; relatively insol. in water and alcohol; m.w. 172.1; dens. (tapped) 0.91 g/ml; 98.0-105.0% assay
Use Level: 20-50% (tablets, capsules)

EmCon™ CO  [Fanning http://www.fanncorp.com]
Chem. Descrip.: Castor oil USP  See Castor (Ricinus communis) oil
CAS 8001-79-4; EINECS/ELINCS 232-293-8
Uses: Skin conditioner, occlusive solvent for pharmaceuticals
Features: Occlusive
Properties: Gardner 1 oil; sp.gr. 0.957-0.961; acid no. 2 max.; iodine no. 83-88; sapon. no. 176-182; hyd. no. 160-168

EmCon™ Olive  [Fanning http://www.fanncorp.com]
Chem. Descrip.: Olive oil USP  See Olive (Olea europaea) oil
CAS 8001-25-0; EINECS/ELINCS 232-277-0
Uses: Conditioning agent, occlusive solv. for pharmaceutical ointments
Features: Occlusive
Properties: Pale straw cl. liq., bland odor; sp.gr. 0.910-0.915; acid no. 3.5 max.; iodine no. 79-88; sapon. no. 190-195

EmCon™ Rice Bran  [Fanning http://www.fanncorp.com]
Chem. Descrip.: Rice bran oil  See Rice (Oryza sativa) bran oil
CAS 68553-81-1; EINECS/ELINCS 271-397-8
Uses: Conditioning agent, occlusive solv. for pharmaceutical ointments
Features: Occlusive
Properties: Sp.gr. 0.971-0.973; acid no. 0.10 max.; iodine no. 185-195

EmCon™ SAF  [Fanning http://www.fanncorp.com]
Chem. Descrip.: Safflower oil  See Safflower (Carthamus tinctorius) oil
CAS 8001-23-8; EINECS/ELINCS 232-276-5
Uses: Emollient, lubricant for balms
Features: Rich, lubricating, yet nontacky feel
Properties: Yel. to amber oil; mild char. odor; sol. in isopropyl esters, min. oil; insol. in water; acid no. 2 max.; iodine no. 135-155; sapon. no. 182-202

EmCon™ Tea Tree  [Fanning
Chem. Descrip.: Tea tree oil distilled from leaves of *Melaleuca alternifolia*. See *Tea tree (Melaleuca alternifolia)* oil CAS 68647-73-4; EINECS/ELINCS 285-377-1
Uses: Fragrance, antimicrobial in pharmaceutical ointments
Properties: Sp.gr. 0.920-0.930; ref. index 1.472-1.482

EmCon™ W [Fanning http://www.fanncorp.com]
Chem. Descrip.: Wheat germ oil USP. See *Wheat (Triticum vulgare)* germ oil CAS 8006-95-9
Uses: External lubricant, conditioner, occlusive solvent for pharmaceuticals; lubricant for topical ointments
Features: Occlusive
Properties: Gardner 10 max. oil; acid no. 0.5 max.; iodine no. 88-93; flash pt. (CC) 184-189 C

Emcosoy STS IP® [JRS Pharma http://www.jrspharma.com]
Chem. Descrip.: Soy polysaccharides. See *Soybean (Glycine soja)* flour CAS 68513-95-1
Uses: Disintegrant for direct compression of pharmaceutical tablets, esp. low calorie and diabetic prods.
Features: Improved dissolution; very low (< 5%) sol. carbohydrates
Regulatory: GRAS; kosher
Properties: Wh. to lt. tan gran. powd.; 50 µ avg. particle size; 90% -100 mesh; dens. 0.54 g/ml max. (tapped); pH 6.5-7.5 (5% slurry); nonionic; 75% dietary fiber
Use Level: 4-10% (tablets)

Emdex® [JRS Pharma http://www.jrspharma.com]
Chem. Descrip.: Dextrates NF. Dextrose (95%), isomaltose (2%), gentiobiose (2%), maltose (1%), maltotriose (< 0.1%), panose (< 0.5%) See *Glucose; D-Panose*
Uses: Binder, diluent, vehicle, flow aid for direct compression and wet granulation of pharmaceutical tablets, chewable and nonchewable tablets
Features: High compressibility; controlled particle size; rapid dissolution; cool mouthfeel; stable to heat and moisture
Properties: Sweet noncloying taste; 211 µ avg. particle size; 25% max. through 100 mesh; sol. 100 g/100 ml in water; insol. in alcohol and common org. solvs.; dens. 0.77 g/ml (tapped);

Emersol® 6313 NF [Cognis http://www.cognis.de]
Chem. Descrip.: Low-titer oleic acid USP/NF CAS 112-80-1; EINECS/ELINCS 204-007-1
Uses: Emulsifier, solubilizer for pharmaceuticals
Features: Food grade fatty acid
Regulatory: FDA 21CFR §172.860; EPA exempt
Properties: Lt. yel. cl. liq., fatty acid odor; insol. in water; sp.gr. 0.891 (25/20 C); m.p. 14 C; b.p. 286 C (100 mm); acid no. 201-204; iodine no. 88-93; flash pt. (CC) 184-189 C
Toxicology: LD50 (oral, rat) > 21.5 ml/kg; mild eye and skin irritant
Storage: Store in closed containers away from heat and open flames; avoid contact with strong oxidizers, alkalis

Chem. Descrip.: Low-titer wh. oleic acid USP/NF CAS 112-80-1; EINECS/ELINCS 204-007-1
Features: Food grade fatty acid
Regulatory: FDA 21CFR §172.860; EPA exempt
Properties: Lt. cl. liq., fatty acid odor; insol. in water; sp.gr. 0.891 (25/20 C); m.p. 14 C; b.p. 286 C (100 mm); acid no. 201-204; iodine no. 87-92; flash pt. (CC) 184-189 C
Toxicology: LD50 (oral, rat) > 21.5 ml/kg; mild eye, moderate skin irritant
Storage: Store in closed containers away from heat and open flames; avoid contact with strong oxidizers, alkalis

Emersol® 6332 [Cognis http://www.cognis.de]
Chem. Descrip.: Stearic acid, triple pressed USP/NF CAS 57-11-4; EINECS/ELINCS 200-313-4
Uses: Lubricant, emulsifier in pharmaceuticals, suppositories, ointments
Features: Food grade fatty acid
Regulatory: FDA 21CFR §172.860; EPA exempt
Properties: Wh. waxy solid, fatty acid odor; insol. in water; sp.gr. 0.85 (75/20 C); m.p. 52-57 C; b.p. 383 C; acid no. 205-211; iodine no. 0.5 max.; flash pt. (COC) 185 C
Toxicology: LD50 (oral, rat) > 10 g/kg; mild eye and skin irritant
Storage: Store in closed containers away from heat and open flames; avoid contact with
Trade Name Reference

strong oxidizers, alkalis

Emersol® 6333 [Cognis
http://www.cognis.de]
Chem. Descrip.: Low-linoleic content oleic acid
USP/NF
CAS 112-80-1; EINECS/ELINCS 204-007-1
Uses: Emulsifier, solubilizer for pharmaceuticals
Features: Food grade fatty acid
Regulatory: FDA 21CFR §172.860; EPA exempt
Properties: Lt. cl. liq., fatty acid odor; insol. in water; sp.gr. 0.891 (25/20 C); m.p. 14 C; b.p. 286 C (100 mm); acid no. 200-204; iodine no. 86-91; flash pt. (CC) 184-189 C
Toxicology: LD50 (oral, rat) > 21.5 ml/kg; mild eye, moderate skin irritant
Storage: Store in closed containers away from heat and open flames; avoid contact with strong oxidizers, alkalis

Emersol® 917 [Cognis/Chems. Group
http://www.cognis-us.com]
Chem. Descrip.: Glycerin CP/USP kosher
CAS 56-81-5; EINECS/ELINCS 200-289-5
Uses: Visc. modifier, flavor enhancer, moisturizer, solvent, humectant, thickener, and solubilizer in drug vehicles
Properties: Water-wh. liq.; sol. in water; sp.gr. 1.2607; m.p. 18 C; b.p. 171 C; flash pt. (CC) 199 C; 99.7% min. glycerol
Toxicology: TLV:TWA 10 mg/m3 (mist); LD50 (oral, rat) 12.6 g/kg; mild eye irritant, moderate skin irritant; inhalation of mist may cause respiratory irritation
Storage: Store in cool, dry area; avoid excessive heat, open flames; incompat. with strong acids and oxidizers

Emery® 1650 [Cognis/Care Chems.
http://www.cognis.com; Cognis Canada]
Chem. Descrip.: Anhyd. lanolin USP
CAS 8006-54-0; EINECS/ELINCS 232-348-6
Uses: Emulsifier, emollient, conditioner, lubricant for pharmaceuticals, sun care prods.
Properties: Yel. amber paste; sol. @ 5% in IPM; disp. in min. oil, triolein; HLB 10.0; dens. 7.9 lb/gal; m.p. 36-42 C; flash pt. 530 F; nonionic; 100% conc.

Emery® 1740 [Cognis/Chems. Group
http://www.cognis-us.com; Cognis/Care Chems.; Cognis Canada]
Chem. Descrip.: Petrolatum, lanolin, lanolin oil, and mineral oil
Uses: Absorption base; emulsifier for w/o systems, emollient, moisturizer for pharmaceutical ointments
Features: Very high water absorp.
Properties: Yel. to straw colored soft solid; sol. in min. oil, IPM; disp. in triolein; dens. 7.4 lb/gal; m.p. 40-46 C; flash pt. 450 F; nonionic; 100% conc.

Empigen® OB [Huntsman Perf. Prods.]
Chem. Descrip.: Lauramine oxide
CAS 1643-20-5; EINECS/ELINCS 216-700-6
Uses: Foaming agent for surgical scrubs
Properties: Pale straw liq.; dens. 0.98 g/cc; visc. 25 cs (20 C); pH 7.5±0.5 (5% aq.); nonionic; 30.0 ± 1.5% act.

Emulgade® 1000 NI [Cognis/Care Chems.; Cognis Canada; Cognis GmbH/Care Chems. http://www.cognis.com]
Chem. Descrip.: Cetearyl alcohol and ceteareth-20
Uses: Emulsifier, SE base for pharmaceutical o/w emulsions, creams, lotions, esp. suitable for processing cationics
Regulatory: BP compliance for Cetomacrogol emulsifying wax
Properties: Wh. flakes, faint char. odor; solid. pt. 48-53 C; acid no. 0.5 max.; sapon. no. 1 max.; hyd. no. 175-190; ref. index 1.435-1.439 (60 C); pH 6-8 (1%); nonionic; 100% conc.
Storage: 1 yr. min. storage life in closed containers at temps. below 40 C, protected from moisture

Emulgade® F [Cognis/Care Chems.; Cognis Canada; Cognis GmbH/Care Chems.
http://www.cognis.com]
Chem. Descrip.: Cetearyl alcohol, PEG-40 castor oil, and sodium cetearyl sulfate
Uses: SE raw material for pharmaceutical creams, ointments, o/w emulsions
Properties: Wh. to sl. yel. gran.; sapon. no. 10-
Trade Name Reference

15; hyd. no. 160-175; pH 6.5-8.0 (1%); anionic; 95% fatty matter
Storage: 1 yr. min. storage life in closed containers at temps. below 30 C, protected against moisture

Chem. Descrip.: Cetearyl glucoside and cetearyl alcohol
Uses: Self-emulsifying base in pharmaceutical o/w emulsions
Features: Vegetable origin
Properties: Wh. to ivory pelletized wax; mild char. odor; insol. in water; m.p. 64 C; hyd. no. 400; flash pt. 168 C; pH 5-7 (10% in ethanol/water 1:2); nonionic
Toxicology: Nonhazardous
Storage: 1 yr. min. storage life in closed containers at temps. below 30 C, protected against moisture

Chem. Descrip.: Glyceryl stearate, ceteareth-20, ceteareth-12, cetearyl alcohol, and cetyl palmitate
Uses: Emulsifier for heat- and visc.-stable pharmaceutical o/w emulsions
Features: Self-emulsifying wax mixt. with nonionic emulsifiers
Properties: Acid no. 1 max.; sapon. no. 90-100; hyd. no. 145-160
Storage: 1 yr. storage stability in sealed original containers at temps. below 30 C

Emulgade® SE-PF [Cognis/Care Chems.]
Chem. Descrip.: Glyceryl stearate, ceteareth-20, ceteareth-12, cetearyl alcohol, cetyl palmitate
Uses: Self-emulsifying base for pharmaceutical o/w creams/lotions
Regulatory: Australia AICS; JCIC; Korea ECL; Europe EINECS
Properties: Wh. to sl. ylsh. pellet; char. odor
Toxicology: Harmful by ing.; risk of serious damage to eyes; TSCA listed

Emulgen 123P [Kao Corp. http://www.kao.co.jp]
Chem. Descrip.: POE lauryl ether See Laureth
CAS 9002-92-0
Uses: Surfactant, emulsifier for pharmaceuticals
Properties: Wh. solid; cloud pt. >100 C; HLB 16.9; nonionic

Emulsifying Wax NF SP-210 [Strahl & Pitsch http://www.strahlpitsch.com]
Chem. Descrip.: Emulsifying wax NF
CAS 97069-99-0
Uses: Consistency improver and emulsion stabilizer for pharmaceutical ingreds.
Regulatory: NF
Properties: M.p. 50-54 C; iodine no. 3.5 max.; sapon. no. 14 max.; hyd. no. 178-192
Toxicology: TSCA listed

Chem. Descrip.: Polyglyceryl-4 oleate, PEG-8 propylene glycol cocoate
CAS 9007-48-1; 126645-98-5
Uses: Emulsifier for w/o creams and lotions, pharmaceutical ointments; stabilizer and aux. emulsifier for o/w systems; solubilizer for fragrances
Properties: Lt. amber liq.; mild odor; sol. @ 5% in peanut and min. oils, 95% ethanol, IPM, oleyl alcohol; gels in glycerin; insol. in water; sp.gr. 0.960-0.980; b.p. 380 C; acid no. 5 max.; iodine no. 58-68; sapon. no. 142-152; flash pt. 500 F; nonionic; 100% conc.
Toxicology: Causes moderate skin irritation.
Precaution: Avoid contact with eyes; wash thoroughly with soap and water after handling.
Hazardous Decomp. Prods.: None
NFPA: Health 2, Flammability 1, Reactivity 0
Storage: Keep containers tightly closed when not in use; store in a cool, dry place, out of direct light

Epicutin-TT [CLR http://www.clr-berlin.de; Actives Int’l.]
Chem. Descrip.: Cyclodextrin and tea tree (Melaleuca alternifolia) oil
Uses: For emulsified and facial care sticks for problem skin (blemished skin, excess sebum, acne)
Properties: Wh. powd.; odorless; suspendible, not sol. in water; pH 3.5-4.5 (10% aq.); 9-10% tea tree oil; residual moisture 8% max.
Use Level: 5-10%
**Trade Name Reference**

**Epikuron™ 100** [Cargill Texturizing Solutions](http://www.cargilltexturizing.com]
Chem. Descrip.: Soybean lecithin, deoiled See Lecithin
CAS 8002-43-5; EINECS/ELINCS 232-307-2
Uses: Emulsifier for pharmaceuticals, aerosols, ointments, suppositories, tablets, tonics
Properties: Powd.

**Epikuron™ 100 G** [Cargill Texturizing Solutions](http://www.cargilltexturizing.com]
Chem. Descrip.: Deoiled soy lecithin See Lecithin
CAS 8002-43-5; EINECS/ELINCS 232-307-2
Uses: Surfactant, nutritional supplement for tonics, tablets, powd. mixes
Properties: Gran.

**Epikuron™ 130** [Cargill Texturizing Solutions](http://www.cargilltexturizing.com]
Chem. Descrip.: Phosphatidylcholine-enriched (30% min.) deoiled soy lecithin See Lecithin
CAS 8002-43-5; EINECS/ELINCS 232-307-2
Uses: Emulsifier, choline enrichment, carrier for tonics, tablets, nutritional supplements, powd. mixes, ointments, dermatological prods., suppositories
Properties: Powd.

**Epiol M-0** [NOF](http://www.nof.co.jp]
Chem. Descrip.: α-Monochlorohydrine
Uses: Intermediate for pharmaceuticals

**Epiol OH** [NOF](http://www.nof.co.jp]
Chem. Descrip.: Glycidol
CAS 556-52-5; EINECS/ELINCS 209-128-3
Uses: Intermediate for pharmaceuticals; stabilizer halogenated hydrocarbons; surf. act. compd.

**Ervol®** [Chemtura](http://www.chemtura.com]
Chem. Descrip.: Wh. mineral oil NF
CAS 8020-83-5; EINECS/ELINCS 232-384-2
Uses: Emulsifier, lubricant, emollient, carrier for pharmaceuticals
Regulatory: FDA 21CFR §172.878, §178.3620a
Properties: Water-wh., odorless, tasteless; sp.gr. 0.849-0.865; visc. 24-26 cSt (40 C); pour pt. -7 C; flash pt. 185 C

**Escalol® 507** [ISP](http://www.ispcorp.com]
Chem. Descrip.: Octyl dimethyl PABA
CAS 21245-02-3; EINECS/ELINCS 244-289-3
Uses: UV-B absorber for topical sunscreens
Features: Nonstaining

**Properties:** Pale yel. mobile liq., very mild char. odor; sol. in min. and peanut oil, ethanol, IPA; insol. in water; m.w. 277; sp.gr. 0.990-1.000; HLB 10-12; b.p. 362 C; acid no. 1 max.; sapon. no. 195-215; ref. index 1.5390-1.5430; 98% min. purity
Use Level: 1.8-8.0%
Toxicology: LD50 (oral, rat) 14.9 g/kg; pract. nonirritating to eyes; nonirritating, nonsensitizing to skin

**Escalol® 557** [ISP](http://www.ispcorp.com]
Chem. Descrip.: Octyl methoxycinnamate
CAS 5466-77-3; EINECS/ELINCS 226-775-7
Uses: Nonstaining UV-B absorber for sunscreens, esp. waterproof formulations; imparts emolliency to emulsions without being tacky or oily
Properties: Pale yel. liq.; sl. odor; sol. in peanut oil, min. oil, ethanol (95%, 100%), oleyl alcohol, castor oil, IPM, cyclomethicone; insol. in water, propylene glycol, glycerin; m.w. 290.4; sp.gr. 1.005-1.013; HLB 6-8; b.p. 198-200 C (3 mm); acid no. 1 max.; sapon. no. 189 min.; ref. index 1.542-1.548; 98% min. purity
Toxicology: Minimally irritating to eyes; mildly irritating to skin

**Escalol® 567** [ISP](http://www.ispcorp.com]
Chem. Descrip.: Benzophenone-3
CAS 131-57-7; EINECS/ELINCS 205-031-5
Uses: UV-A absorber for formulation of high-SPF sunscreens
Properties: Sl. ylsh. fine cryst. powd.; sol. in peanut oil, ethanol, oleyl alcohol, castor oil; m.w. 228.25; m.p. 62 C min.; 97% min. assay
Use Level: 2-6%

**Escalol® 587** [ISP](http://www.ispcorp.com]
Chem. Descrip.: Ocytl salicylate
CAS 6969-49-9; EINECS/ELINCS 230-190-2
Uses: UV-B sunscreen for high-SPF formulations; boosts efficacy of other sunscreen actives; solubilizer for benzophenone-3
Properties: Colorless to pale yel. liq., typ. bland odor; sol. in IPA, ethanol, min. oil, dimethicone, cyclomethicone, IPM, octyl palmitate; insol. in water; m.w. 250.34; sp.gr. 1.013-1.022; b.p. 150 C (3 mm); acid no. 2 max.; sapon. no. 200-230; ref. index 1.495-1.505
Use Level: 3-5%
Toxicology: LD50 (oral, rat) < 5 g/kg; minimally
### Escalol® 597 [ISP](http://www.ispcorp.com)

**Chem. Descrip.:** Octocrylene  
**CAS:** 6197-30-4; EINECS/ELINCS 228-250-8  
**Uses:** UV-B sunscreen used when high SPF values are required; esp. for water-resistant formulations  
**Properties:** Yel. cl. visc. liq., bland odor; sol. @ 5% in ethanol, castor oil, IPM, hexylene glycol, IPA; disp. in min. oil, dimethicone; insol. in water; m.w. 361; sp.gr. 1.048; m.p. -10 C; b.p. > 200 C (3 mm); 98% min. assay  
**Use Level:** 7-10%  
**Toxicology:** LD50 (oral, rat) > 64 ml/kg; nonirritating to eyes; minimally irritating to skin

### Escin/β-Sitosterol Phytosome® [Indena SpA](http://www.indena.it)

**Chem. Descrip.:** Complex of escin, β-sitosterol, and soybean phospholipids  
**Uses:** Skin lightener, as stringent, soothing/moisturizing agent, coadjuvant in external treatment of cellulitis, after-sun, after-depilation, dentifrices for swollen gums, prods. for oral cavity  
**Properties:** Lt. brn. amorphous powd.; water-disp.

### Estalan DOM [Lanaetex Prods.]

**Chem. Descrip.:** Dioctyl maleate  
**CAS:** 2915-53-9; EINECS/ELINCS 220-835-6  
**Uses:** Emollient with silky feel for hypoallergenic prods.  
**Features:** Nonsensitizing and noncomedogenic  
**Properties:** Colorless to pale yel. liq.; mild char. odor; sol. @ 5% in cyclomethicone, min. oil, IPM, ethanol, dimethicone, hexylene glycol; disp. in propylene glycol; insol. in water, glycerin; sp.gr. 0.960-0.970; acid no. 0.1 max.; iodine no. 1 max.; sapon. no. 310 min.; ref. index 1.4480-1.4500

### Estasan™ GT 8-60 3575 [Uniqema](http://www.uniqema.com)

**Chem. Descrip.:** Caprylic/capric triglyceride (60% C8 + 40% C10)  
**CAS:** 65381-09-1; EINECS/ELINCS 265-724-3  
**Uses:** Solvent and carrier for drugs, capsules, flavors, fragrances; nutrient, fat source in dietetic prods., adult and infant nutrition, enteral and parenteral feeding formulas; emollient, spreading agent, penetrant, solvent for topical pharmaceuticals, creams, lotions; lubricant for mfg. of soft gelatin capsules  
**Features:** Wide compat. with many drugs; min. oil replacement  
**Regulatory:** Ph.Eur., BP, DAB compliance; Japan approval  
**Properties:** Lovibond 5Y/0.5R oil, odorless, bland taste; visc. 23 mPa•s; acid no. 0.1 max.; iodine no. 0.5 max.; sapon. no. 325-345; hyd. no. 5 max.; cloud pt. -8 C

### Estasan™ GT 8-60 3578 [Uniqema](http://www.uniqema.com)

**Chem. Descrip.:** Caprylic/capric triglyceride (40% C8 + 60% C10)  
**CAS:** 65381-09-1; EINECS/ELINCS 265-724-3  
**Uses:** Solvent and carrier for drugs, capsules, flavors, fragrances; fat source in dietetic prods., enteral and parenteral feeding formulas; spreading agent, penetrant for creams and lotions  
**Regulatory:** BP, DAB compliance; Japan approval; kosher; DSL listed  
**Properties:** Lovibond 5Y/0.5R oil, odorless, bland taste; visc. 30 mPa•s; acid no. 0.1 max.; iodine no. 0.5 max.; sapon. no. 325-345; hyd. no. 5 max.; cloud pt. -8 C  
**Toxicology:** LD50 (oral, rat) > 2 g/kg; vapor can cause irritation; eye irritant; nonirritant to soft gelatin capsules

---

**Environmental:** Readily biodeg.  
**Storage:** Store @ R.T. in dry atmosphere

---

**Estasan™ GT 8-60 3580 MCT Oil [Uniqema](http://www.uniqema.com)**

**Chem. Descrip.:** Caprylic/capric triglyceride (60% C8 + 40% C10)  
**CAS:** 65381-09-1; EINECS/ELINCS 265-724-3  
**Uses:** Solvent and carrier for drugs, capsules, flavors, fragrances; nutrient, fat source in dietetic prods., adult and infant nutrition, enteral and parenteral feeding formulas; spreading agent, penetrant, solvent for topical pharmaceuticals, creams, lotions; lubricant for mfg. of soft gelatin capsules  
**Features:** Wide compat. with many drugs; min. oil replacement  
**Regulatory:** Ph.Eur., BP, DAB compliance; Japan approval  
**Properties:** Lovibond 5Y/0.5R oil, odorless, bland taste; visc. 30 mPa•s; acid no. 0.1 max.; iodine no. 0.5 max.; sapon. no. 325-345; hyd. no. 5 max.; cloud pt. -8 C  
**Environmental:** Readily biodeg.  
**Storage:** Store @ R.T. in dry atmosphere
Trade Name Reference

skin; non mutagenic; TSCA listed

Environmental: Readily biodeg.; LC50 48 h, fish) >100 mg/l

Precaution: Avoid strong oxidizing agents

Storage: Store @ R.T. in dry atmosphere

Chem. Descrip.: Caprylic/capric triglyceride (65% C8 + 35% C10)

CAS 65381-09-1; EINECS/ELINCS 265-724-3

Uses: Solvent and carrier for drugs, capsules, flavors, fragrances; nutrient, fat source in dietetic prods., adult and infant nutrition, enteral and parenteral feeding formulas; emollient, spreading agent, penetrant, solvent for topical pharmaceuticals; lubricant for soft gelatin capsules

Features: Wide compat. with many drugs; min. oil replacement

Regulatory: Ph.Eur., BP, DAB compliance; Japan approval

Properties: Lovibond 5Y/0.5R oil, odorless, bland taste; visc. 23 mPa•s; acid no. 0.1 max.; iodine no. 0.5 max.; sapon. no. 325-360; hyd. no. 5 max.; cloud pt. -5 C

Environmental: Readily biodeg.

Storage: Store @ R.T. in dry atmosphere

Estasan™ GT 8-99 3596 MCT Oil [Uniqema http://www.uniqema.com]

Chem. Descrip.: Glycerol tricaprylate See Tricaprylin

CAS 538-23-8; EINECS/ELINCS 208-686-5

Uses: Solvent or suspension media for various drugs; fat source in formulation of dietetic prods., enteral and parenteral feeding formulas

Features: Very stable towards oxidation

Properties: APHA 70 oil; odorless; insol. in water; sol. in many organic solvents; dens. 950 kg/m³; visc. 30 mPa•s; m.p. 8 C; acid no. 0.1 max.; iodine no. 0.5 max.; flash pt. (CC) 250 C

Toxicology: LD50 (oral, rat) >2 g/kg; nonmutagenic

Environmental: Biodeg.; LC50 (fish, 48 h)

Precaution: Avoid oxidizing agents

Hazardous Decomp. Prods.: Irritating vapors

Estasan™ GT 10-99 3599 [Uniqema http://www.uniqema.com]

Chem. Descrip.: MCT multifunctional oil

Uses: Solvent or suspension media for various drugs; fat source in formulation of dietetic prods., enteral and parenteral feeding formulas

Features: Very stable towards oxidation

Properties: APHA 70 oil; odorless; visc. 17 mPa•s (40 C); m.p. 31 C; acid no. 0.1 max.; iodine no. 0.5 max.

Environmental: Biodeg.
**Estol 1511**  [Uniqema](http://www.uniqema.com)  
Chem. Descrip.:  *Isopropyl myristate*  
CAS 110-27-0; EINECS/ELINCS 203-751-4  
Uses:  *Emollient for pharmaceuticals*  
Properties:  Colorless liq.; faint odor; insol. in water; sol. in many organic solvents; dens. 0.85 g/ml; vapor pressure < 0.1 hPa; b.p. 170 C @ 10 hPa; flash pt. (CC) 150 C  
Toxicology:  *LD50 (oral, rat) > 2000 mg/kg; unlikely skin irritant*  
Environmental:  *Biodeg., no toxicity to fish at the solubility limit*  
Precaution:  Use safety goggles with shields; avoid strong oxidizing agents  
Hazardous Decomp. Prods.:  None  
Storage:  Store in original containers

**Estol 1526**  [Uniqema](http://www.uniqema.com)  
Chem. Descrip.:  *Propylene glycol dicaprylate/dicaprate*  
CAS 68583-51-7; EINECS/ELINCS 271-516-3  
Uses:  Coupling agent, solvent, vehicle, diluent, carrier for flavors, fragrance oils, sol. colorants, vitamins, medicinals; emollient for pharmaceuticals, creams, lotions  
Regulatory:  SARA §313 nonreportable; DSL, ENCS compliant  
Properties:  Colorless liq.; faint odor; insol. in water; sol. in many org. solvents; visc. 5 mPa.s; vapor pressure < 1 hPa; cloud pt. <-10 C; flash pt. (COC) 180 C  
Toxicology:  *LD50 (oral, rat) > 2 g/kg; irritant to eyes; nonirritating to skin; vapors can cause irritation*  
Environmental:  *Biodeg., low aquatic toxicity*  
Precaution:  Avoid oxidizing agents  
Storage:  Store in original containers

**Estol 3607 HF**  [Uniqema](http://www.uniqema.com); Uniqema Am.  
Chem. Descrip.:  *Hard fat*  
Uses:  *Oily vehicle for pharmaceutical preps.*  
Regulatory:  USP/NF, EP  
Properties:  Waxy solid

**Estol 3659**  [Uniqema](http://www.uniqema.com)  
Chem. Descrip.:  *Ethyl oleate*  
CAS 111-62-6; EINECS/ELINCS 203-889-5  
Uses:  *Excipient, emollient, carrier for pharmaceuticals*  
Regulatory:  SARA §313 nonreportable  
Properties:  Liq.; APHA 70 max. color; acid no. 0.5 max.; iodine no. 78-90; sapon. no. 180-190; cloud pt. -24 C; flash pt. (COC) 180 C  
Toxicology:  *Nonirritating by ing., inh., or skin contact*  
Environmental:  *Nontoxic to aquatic organisms*  
Precaution:  Wear safety goggles with side shields and impervious gloves  
Hazardous Decomp. Prods.:  CO2  
HMIS:  Health 1, Flammability 1, Reactivity 0

**Estol 3660**  [Uniqema](http://www.uniqema.com)  
Chem. Descrip.:  *Ethyl oleate*  
CAS 111-62-6; EINECS/ELINCS 203-889-5  
Uses:  *Excipient and solubilizer for drug delivery systems for poorly water-sol. drugs, nutrition and dietary products, and veterinary products*  
Regulatory:  EP, DSL, ENCS compliant  
Properties:  Colorless liq.; faint odor; insol. in water; sol. in many org. solvents; visc. 5 mPa.s; vapor pressure < 1 hPa; cloud pt. -10 C; flash pt. (COC) 180 C  
Toxicology:  *LD50 (oral, rat) > 2 g/kg; LD50 (dermal, rabbit) > 2 g/kg; irritant to eyes; nonirritating to skin; vapors can cause irritation*  
Environmental:  *Biodeg.*  
Precaution:  Avoid oxidizing agents  
Storage:  Store in original containers

**Estol 3684**  [Uniqema](http://www.uniqema.com)  
Chem. Descrip.:  *PEG-6 caprylic/capric glycerides*  
CAS 52504-24-2  
Uses:  *Excipient, emollient, carrier, emulsifier for pharmaceuticals*  
Properties:  APHA 150 max. color; sp.gr. 1.068; acid no. 1 max.; iodine no. 1 max.; sapon. no. 90-110; nonionic

**Estol 3748**  [Uniqema](http://www.uniqema.com)  
Chem. Descrip.:  *Glycerol distearate, type II*  
See Glycerol distearate  
CAS 1323-83-7; EINECS/ELINCS 215-359-0  
Uses:  *Emulsifier, coemulsifier, stabilizer, wetting agent, oily vehicle for pharmaceuticals*  
Regulatory:  USP/NF, EP  
Properties:  Solid
Trade Name Reference

Chem. Descrip.: Glyceryl distearate
CAS 1323-83-7; EINECS/ELINCS 215-359-0
Uses: Emulsifier, emollient for pharmaceuticals
Properties: Nonionic

Estol IPM [Uniqema
Chem. Descrip.: Isopropyl myristate
CAS 110-27-0; EINECS/ELINCS 203-751-4
Uses: Emollient, consistency agent, solvent for topical pharmaceuticals

Estol IPM 1509 (BIO-IPM) [Uniqema
Chem. Descrip.: Isopropyl myristate, veg.
Uses: Penetrant, emollient, solvent, spreading agent for topical medicinals, skin creams
Features: Reduces heaviness and oiliness of prods. containing triglycerides, liq. waxes, and min. oils
Properties: Colorless low-visc. liq., odorless; sp.gr. 0.850-0.855; acid no. 0.1 max.; iodine no. 0.5 max.; sapon. no. 206-211; cloud pt. 0 C max.; 98% min. act.

Ethocel™ Standard 4 Premium [Dow
Chem. Descrip.: Ethylcellulose NF, FCC, JP
CAS 9004-57-3
Uses: Excipient, binder, film-former in pharmaceuticals (controlled release and sustained release tablets, taste masking, granulation, microencapsulation); binder in dry and direct compression tablets; binder, filler in dry vitamin preps.; water vapor barrier to improve shelf life, prevent hydrolysis of ingreds., mask taste; color diluent in pharmaceuticals; fixing agent for flavors
Features: Improves tablet integrity, appearance; chemically inert; broad compat.; good stability @ pH 3-11
Regulatory: FDA 21CFR §73.1, 73.1001(b), 172.868, 573.420
Properties: Wh. to lt. tan gran. powd.; essentially odorless and tasteless; insol. in water; bulk dens. 0.4 g/cc; visc. 6-8 cP (5% in 80/20 toluene:alcohol); nonionic; 48.0-49.5% ethoxyl content
Toxicology: Dust may cause temporary mech. irritation to eyes under extreme conditions; considered nuisance dusts when inhaled
Environmental: Nonbiodeg.
Precaution: Will burn under certain conditions; melts on exposure to open flame; supports combustion; can form explosive mixts. in air; store away from peroxides or other oxidizing agents
Storage: 2 yr. shelf life when stored below 32 C in dry area away from heat sources

Ethocel™ Standard 7 Premium [Dow
Chem. Descrip.: Ethylcellulose NF, FCC, JP
CAS 9004-57-3
Uses: Excipient, binder, film-former in pharmaceuticals (controlled release and sustained release tablets, taste masking, granulation, microencapsulation); binder in dry and direct compression tablets; binder, filler in dry vitamin preps.; water vapor barrier to improve shelf life, prevent hydrolysis of ingreds., mask taste; color diluent in pharmaceuticals; fixing agent for flavors
Features: Improves tablet integrity, appearance; chemically inert; broad compat.; good stability @ pH 3-11
Regulatory: FDA 21CFR §73.1, 73.1001(b), 172.868, 573.420
Properties: Wh. to lt. tan gran. powd.; essentially odorless and tasteless; insol. in water; bulk dens. 0.4 g/cc; visc. 6-8 cP (5% in 80/20 toluene:alcohol); nonionic; 48.0-49.5% ethoxyl content
Toxicology: Dust may cause temporary mech. irritation to eyes under extreme conditions; considered nuisance dusts when inhaled
Environmental: Nonbiodeg.
Precaution: Will burn under certain conditions; melts on exposure to open flame; supports combustion; can form explosive mixts. in air; store away from peroxides or other oxidizing agents
Storage: 2 yr. shelf life when stored below 32 C in dry area away from heat sources

Ethocel™ Standard 14 Premium [Dow
Chem. Descrip.: Ethylcellulose NF, FCC, JP
CAS 9004-57-3
Uses: Excipient, binder, film-former in pharmaceuticals (controlled release and sustained release tablets, taste masking, granulation, microencapsulation); binder in dry and direct compression tablets; binder, filler in dry vitamin preps.; water vapor barrier to improve shelf life, prevent hydrolysis of ingreds., mask taste; color diluent in pharmaceuticals; fixing agent for flavors
Features: Improves tablet integrity, appearance; chemically inert; broad compat.; good stability @ pH 3-11
Regulatory: FDA 21CFR §73.1, 73.1001(b), 172.868, 573.420

Chem. Descrip.: PEG-15 cocamine

CAS 61791-14-8

Uses: Emulsifier in topical pharmaceuticals

Regulatory: FDA approved for topicals

Properties: Gardner < 10 liq.; sol. @ 5% in alcohols, propylene glycol, water, xylene; dens. 1045 kg/m³; visc. 200 mPa·s; cloud pt. 48 C (1% in 10% NaCl); surf. tens. 38 mN/m (0.1%); Draves wetting > 600 s (0.1%); Ross-Miles foam 110 mm (initial, 0.05%, 50 C); cationic; 100% conc.

Toxicology: Corrosive to eyes; severely irritating to skin; TSCA listed

Environmental: Biodegrad.; EC50 (daphnia, 48 h) 12 mg/l

Precaution: Wear splash goggles, gloves, and lab coat; reactive with oxidizers, acids.

Hazardous Decomp. Prods.: COx; NOx

Storage: Keep in a tightly closed container in a cool, well-ventilated area
Trade Name Reference

**Ethosperse® SL-20** [Lonza](http://www.lonza.com)
Chem. Descrip.: Sorbeth-20
CAS 53694-15-8
Uses: Emulsifier, humectant for pharmaceuticals
Properties: Lt. yel. cl. liq.; sol. in water, methanol, ethanol, aceton; sp.gr. 1.16; visc. 460 cps; HLB 17; acid no. 0.5 max.; hyd. no. 385-430; pH 7 (5%); nonionic; 100% act.

**Ethoxylan® 1685** [Cognis/Care Chems.](http://www.cognis.com; Cognis Canada]
Chem. Descrip.: PEG-75 lanolin
CAS 61790-81-6
Uses: Emollient, emulsifier, dispersant for antiperspirants, pharmaceutical vehicles
Properties: Yel. to lt. amber liq.; sol. @ 5% in water, IPA; dens. 8.9 lb/gal; m.p. 39 C; cloud pt. 85 C; flash pt. 530 F; nonionic; 50% aq. sol'n.

**Ethyl Diglyme** [Ferro](http://www.ferro.com]
Chem. Descrip.: Diethylene glycol diethyl ether
CAS 112-36-7: EINECS/ELINCS 203-963-7
Uses: Solvent for pharmaceuticals
Features: Tends to solvate cations
Properties: Colorless; mild, nonresidual odor; water-sol.; misc. with ethanol, acetone, benzene, diethyl ether, octane; m.w. 162.23; sp.gr. 0.9082; dens. 7.56 lb/gal; visc. 1.4 cP; f.p. -44.3 C; b.p. 189 C; flash pt. 129-136 C; pour pt. -90 C; clip pt. (Abel) 42 C; autoignition temp. 255 C; ref. index 1.404; surf. tens. 27.2 dynes/cm; 98.0% min. purity
Toxicology: Expected LD50 (oral) > 2000 mg/kg, (skin) > 2000 mg/kg; LC50 (inh.) > 5 mg/l; narcotic at high vapor concs.; causes CNS depression; expected to be sl. eye and skin irritant
Environmental: Readily biodeg.; does not bioaccumulate significantly; nonhazardous under EC criteria; LC50 (fish) > 1000 mg/l; pract. nontoxic to fish, algae, bacteria; prevent contamination of soil and water; prevent entry into drains, ditches, rivers
Precaution: Flamm.; LEL 1.3 vol.%; UEL 12 vol.%; may form flamm./explosive vapor-air mixt.; vapor is heavier than air, spreads along ground; distant ignition is possible; reacts with strong oxidizing agents; oxidizes on contact with air; avoid exposure to air
Hazardous Decomp. Prods.: CO
Storage: Hygroscopic; 12 mos. shelf life under proper storage; store in tightly closed containers @ ambient temps. in well-ventilated area, away from direct sunlight, other heat/ignition sources

Uses: Excipient for controlled-release pharmaceutical apps., rapidly disintegrating coatings, taste- and odor-masking
Properties: Liq.; sol. in gastric fluid up to pH 5, swellable and permeable above pH 5; flash pt. -15 C; 12.5% polymer
Storage: 36 mos. min. shelf life @ < 30 C

Eudragit® E 100 [Röhm GmbH
http://www.roehm.de; Röhm Am.
http://www.rohmamerica.com]
Chem. Descrip.: Acrylic polymer See Acrylic resin
Uses: Excipient for controlled-release pharmaceutical apps., rapidly disintegrating coatings, taste- and odor-masking
Properties: Gran.; sol. in gastric fluid up to pH 5, swellable and permeable above pH 5; flash pt. none; 98% polymer
Storage: 36 mos. min. shelf life @ < 30 C

Eudragit® E PO [Röhm GmbH
http://www.roehm.de; Röhm Am.
http://www.rohmamerica.com]
Chem. Descrip.: Eudragit E 100 (acylic polymer) See Acrylic resin
Uses: Excipient for pharmaceutical protective coatings, fast disintegrating aq. formulations; taste and odor masking; protection against moisture
Properties: Powd.

Eudragit® FS 30 D [Röhm GmbH
http://www.roehm.de; Röhm Am.
http://www.rohmamerica.com]
Chem. Descrip.: Copolymer based on methyl acrylate, methyl methacrylate and methacrylic acid See Acrylic resin
Uses: Excipient for pharmaceutical solid oral formulations, for sustained release formulations, immediate release coatings
Properties: Milky wh. liq.; faint characteristic odor; miscible with water; m.w. = 220,000; pH 2.0 - 3.5; anionic
Storage: Store in tightly closed containers @ 5-10 C

Eudragit® L 12.5 [Röhm GmbH
http://www.roehm.de; Röhm Am.
http://www.rohmamerica.com]
Chem. Descrip.: Methacrylic acid copolymer, Type A, USP/NF in isopropyl alcohol
Uses: Excipient for controlled-release pharmaceutical apps., enteric coatings, coatings resist. to tropical conditions, lozenges, sealing coats
Properties: Powd.; sol. in intestinal fluid from pH 6; flash pt. 13.5 C; 12.5% polymer
Storage: 36 mos. min. shelf life @ < 30 C

Eudragit® L 30 D-55 [Röhm GmbH
http://www.roehm.de; Röhm Am.
http://www.rohmamerica.com]
Chem. Descrip.: Methacrylic acid copolymer, Type C, USP/NF aq. disp.
Uses: Excipient for controlled-release pharmaceutical apps., enteric coatings, coatings resist. to tropical conditions, lozenges, sealing coats
Properties: Aq. disp.; sol. in intestinal fluid from pH 5.5; flash pt. none; 30% polymer
Storage: 18 mos. min. shelf life @ 5-25 C

Eudragit® L 100 [Röhm GmbH
http://www.roehm.de; Röhm Am.
http://www.rohmamerica.com]
Chem. Descrip.: Methacrylic acid copolymer, Type A, USP/NF
Uses: Excipient for controlled-release pharmaceutical apps., enteric coatings, coatings resist. to tropical conditions, lozenges, sealing coats
Properties: Powd.; sol. in intestinal fluid from pH 6; flash pt. none; 95% polymer
Storage: 36 mos. min. shelf life @ < 30 C

Eudragit® L 100-55 [Röhm GmbH
http://www.roehm.de; Röhm Am.
http://www.rohmamerica.com]
Eudragit NE 30 D [Röhm GmbH
http://www.roehm.de; Röhm Am.
http://www.rohmamerica.com]
Uses: Excipient for controlled-release permeable film coatings
Regulatory: Ph.Eur, DAB compliance
Properties: Aq. disp.; sol.: swellable, permeable; nonflamm.; 30% polymer
Storage: 18 mos. min. shelf life @ 0-30 C (preferably @ 5-25 C)

Eudragit NE 40 D [Röhm GmbH
http://www.roehm.de; Röhm Am.
http://www.rohmamerica.com]
Uses: Excipient for wet granulation for sustained release pharmaceuticals; delayed drug release
Features: Swellable; permeable; insoluble; pH independent

Eudragit® RL 12.5 [Röhm GmbH
http://www.roehm.de; Röhm Am.
http://www.rohmamerica.com]
Chem. Descrip.: Ammonio methacrylate copolymer, Type B USP/NF in isopropyl alcohol/acetone
Uses: Excipient for sustained-release (delayed-release) pharmaceutical apps.
Features: Insoluble; permeable or dispersible; pH-independent
Properties: Liq.; sparingly permeable; flash pt. -15 C; 12.5% polymer
Storage: 36 mos. min. shelf life @ < 30 C

Eudragit® RS 30 D [Röhm GmbH
http://www.roehm.de; Röhm Am.
http://www.rohmamerica.com]
Chem. Descrip.: Ammonio methacrylate copolymer, Type B USP/NF in isopropyl alcohol/acetone
Uses: Excipient for sustained-release (delayed-release) pharmaceutical apps.
Features: Insoluble; permeable or dispersible; pH-independent
Properties: Liq.; highly permeable; flash pt. -15 C; 12.5% polymer
Storage: 36 mos. min. shelf life @ < 30 C
**Trade Name Reference**

**Eudragit® RS 100** [Röhm GmbH
http://www.roehm.de; Röhm Am.
http://www.rohmamerica.com]

Chem. Descrip.: Ammonio methacrylate
copolymer Type B USP/NF aq. disp.
Uses: Excipient for sustained-release
(delayed-release) pharmaceutical apps.
Features: Insoluble; permeable or dispersible;
pH-independent
Properties: Liq.; sparingly permeable;
nonflamm.; 30% polymer
Storage: 18 mos. min. shelf life @ 0-30 C
(preferably @ 5-25 C)

**Eudragit® RS PO** [Röhm GmbH
http://www.roehm.de; Röhm Am.
http://www.rohmamerica.com]

Chem. Descrip.: Ammonio methacrylate
copolymer Type B USP/NF
Uses: Excipient for sustained-release
(delayed-release) pharmaceutical apps.
Features: Insoluble; permeable or dispersible;
pH-independent
Properties: Gran.; sparingly permeable; flash pt.
none; 97% polymer
Storage: 36 mos. min. shelf life @ < 30 C

**Eudragit® S 100** [Röhm GmbH
http://www.roehm.de; Röhm Am.
http://www.rohmamerica.com]

Chem. Descrip.: Methacrylic acid copolymer
Type B USP/NF
Uses: Excipient for controlled-release
pharmaceuticals, enteric coatings
Features: pH-dependent
Properties: Powd.; sol. in intestinal fluid from pH
7; 95% polymer
Storage: 36 mos. min. shelf life @ < 30 C

**Eudragit® S 12.5** [Röhm GmbH
http://www.roehm.de; Röhm Am.
http://www.rohmamerica.com]

Chem. Descrip.: Methacrylic acid copolymer
Type B USP/NF in isopropyl alcohol
Uses: Excipient for controlled-release
pharmaceuticals, enteric coatings; resistant
to gastric fluid so that release occurs in the
colon
Features: pH-dependent
Properties: Liq.; sol. in intestinal fluid from pH 7;
flash pt. 13.5 C; 12.5% polymer
Storage: 36 mos. min. shelf life @ 10-30 C; do
not store @ < 5 C

**Eumulgin® B1** [Cognis/Care Chems.; Cognis
Canada]

Chem. Descrip.: Ceteareth-12 JCID
CAS 68439-49-6
Uses: Emulsifier for pharmaceutical o/w
emulsions; emollient, bodying agent,
conditioner for ointments, creams
Properties: Waxy solid; sol. in alcohols,
hydrocarbons, and most org. solvs.; sp.gr.
0.95; solid. pt. 50-68 F; HLB 12.0; hyd. no. 69-
74; pH 6.0-7.5 (1%); nonionic; 100% conc.
Storage: 1 yr. min. storage stability in sealed
original containers at temps. below 30 C

**Eumulgin® B2** [Cognis/Care Chems.; Cognis
Canada; Cognis Iberica
http://www.es.cognis.com]

Chem. Descrip.: Ceteareth-20 NF/BP
CAS 68439-49-6
Uses: Emulsifier for pharmaceutical o/w
emulsions; emulsifier, emollient, bodying
agent, conditioner for ointments, creams
Regulatory: NF, BP, JCIC compliance
Properties: Wh. to sh. waxy flakes; sol. in
alcohols, hydrocarbons, and most org. solvs.;
dens. 1.001-1.005 g/cm3 (70 C); solid. pt. 39-
42 C; HLB 15.5; acid no. 0.5 max.; sapon. no.
1 max.; hyd. no. 49-55; cloud pt. 90-94 C (1%
in 5% NaCl); pH 6.0-7.5 (1%); nonionic; 1% max.
water
Toxicology: TSCA listed
Storage: 1 yr. min. storage stability in sealed
original containers at temps. below 40 C,
under dry conditions

**Eumulgin® B3** [Cognis
http://www.cognis.de; Cognis Canada]

Chem. Descrip.: Ceteareth-30
CAS 68439-49-6
Uses: Emulsifier for pharmaceutical w/o
emulsions, transparent gels and creams
Regulatory: NF, BP, JCIC compliance
Properties: Waxy solid; sp.gr. 1.001-1.005;
sol. in alcohols, hydrocarbons, and most org. solvs.;
dens. 1.001-1.005 g/cm3 (70 C); solid. pt. 39-
42 C; HLB 15.5; acid no. 0.5 max.; sapon. no.
1 max.; hyd. no. 49-55; cloud pt. 90-94 C (1%
in 5% NaCl); pH 6.0-7.5 (1%); nonionic; 1% max.
water
Toxicology: TSCA listed
Storage: 1 yr. min. storage stability in closed
original containers at temps. below 40 C,
under dry conditions
Trade Name Reference

original containers at temps. below 40 C, under dry conditions

Eumulgin® HRE 40 PH [Cognis
http://www.cognis.de]
Chem. Analysis: Dioxan ≤ 10 ppm; heavy metals ≤ 10 ppm; water ≤ 3%; ash ≤ 0.3%
CAS 61788-85-0
Uses: Emulsifier, solubilizer for the production of aq. pharmaceutical preparations
Properties: Wh. to sl. yel., lard-like fat mass; mild odor; acid value ≤ 2.0; hydroxyl value 60-80; iodine value ≤ 5.0; sapon. value 45-69; nonionic

Eumulgin® L [Cognis/Care Chems.; Cognis GmbH/Care Chems.
http://www.cognis.com]
Chem. Descrip.: PPG-2-ceteareth-9
Uses: Emulsifier, solubilizer for pharmaceuticals, esp. low alcohol content formulas
Properties: Lt. yel. cl. free-flowing liq., faint char. odor; sol. in alcohols, hydrocarbons, and most org. solvs.; acid no. 1 max.; hyd. no. 145-155; pH 6.0-7.5 (1%); nonionic; 100% conc.
Storage: 1 yr. min. storage life in sealed containers @ R.T., protected from dampness and frost

Eumulgin® RO 35 PH [Cognis
http://www.cognis.de]
Chem. Analysis: Ethylene oxide ≤ 1 ppm; dioxan ≤ 10 ppm; heavy metals ≤ 10 ppm; water ≤ 3%; ash ≤ 0.3%
CAS 61791-12-6
Uses: Emulsifier, solubilizer for fat sol. vitamins and essential oils
Properties: Yellowish liq.; mild odor; acid value ≤ 2.0; hydroxyl value 65-82; iodine value 25-35; sapon. value 60-75; nonionic

Eumulgin® SML 20 [Cognis/Care Chems.; Cognis Iberica http://www.es.cognis.com]
Chem. Descrip.: Polysorbate 20 NF/BP/DAB
CAS 9005-64-5
Uses: Solubilizer and emulsifier for pharmaceutical preps.
Properties: Lt. yel. liq.; HLB 16.7; acid no. 2 max.; iodine no. 5 max.; sapon. no. 40-50; hyd. no. 96-108; pH 7.5-8.0 (10%); nonionic; 100% conc.
Toxicology: Nontoxic
Storage: 1 yr. min. storage stability in sealed original containers at temps. below 30 C, protected from humidity and frost

Eumulgin® SMO 20 [Cognis/Care Chems.]
Chem. Descrip.: Polysorbate 80 BP, German pharmacopoeia
CAS 9005-65-6
Uses: Emulsifier, solubilizer for pharmaceutical creams, ointments, o/w emulsions
Properties: Ylsh. brn. visc. liq. to paste; acid no. 2 max.; iodine no. 18-24; sapon. no. 45-55; hyd. no. 65-80; nonionic
Toxicology: Nontoxic
Storage: 1 yr. min. storage life in sealed, moisture-protected original containers at temps. below 30 C

Eumulgin® SMS 20 [Cognis/Care Chems.]
Chem. Descrip.: Polysorbate 60 BP, NF, German pharmacopoeia
CAS 9005-67-8
Uses: Emulsifier, solubilizer for pharmaceutical creams, ointments, liq. o/w emulsions
Properties: Cloudy med.-visc. to pasty wax, almost odorless; acid no. 2 max.; iodine no. 5 max.; sapon. no. 45-55; hyd. no. 81-96; nonionic
Storage: 1 yr. min. storage life in sealed moisture-protected original containers at temps. below 30 C

Eumulgin® VL 75 [Cognis GmbH/Care Chems.
http://www.cognis.com]
Chem. Descrip.: Lauryl glucoside, polyglyceryl-2 dipolyhydroxystearate, and glycerin
Uses: Emulsifier for pharmaceutical o/w emulsions
Features: Vegetable origin
Properties: Ylsh. cl. visc. liq.; typ. odor; visc. 4000 mPa•s; sapon. no. 50; flash pt. > 110 C; pH 5.5; nonionic; 25% water
Toxicology: Skin, eye and mucous membranes irritant
Environmental: Readily biodeg.; LC50 (fish) > 10-100 mg/l; EC0 (bacteria) > 100 mg/l
Precaution: Avoid open flames
Hazardous Decomp. Prods.: None
Storage: 1 yr. min. shelf life in sealed original containers stored below 30 C and protected from moisture; may become turbid below 15 C; heat to 45 C and stir to reverse
Trade Name Reference

**Eupergit® C** [Röhm GmbH
_http://www.roehm.de_]
Chem. Descrip.:  N,N’-Methylenebis (methacrylamide)/glycidyl methacrylate/allyl glycidyl ether/methacrylamide copolymer
Chem. Analysis:  0.93% min. oxirane content
Uses:  Carrier for enzyme immobilization in prod. of semisyn. antibiotics and chiral pharmaceuticals
Features:  Provides stable covalent binding of enzymes via oxirane groups
Properties:  Dry beads; 170 µm avg. particle size; bulk dens. 0.6 g/ml; water uptake ≈ 3 ml/g
Storage:  6 mos. min. storage stability @ < 8 C; 12 mos. min. storage stability @ < -15 C

**Eupergit® C M** [Röhm GmbH
_http://www.roehm.de_]
Chem. Descrip.:  N,N’-Methylenebis (methacrylamide)/glycidyl methacrylate/allyl glycidyl ether/methacrylamide copolymer
Chem. Analysis:  0.3% min. oxirane content
Uses:  Carrier for enzyme immobilization in prod. of semisyn. antibiotics and chiral pharmaceuticals
Features:  Provides stable covalent binding of enzymes via oxirane groups
Properties:  Spherical dry beads; 200 µm avg. particle size; bulk dens. 0.3 g/ml; water uptake ≈ 2 ml/g
Storage:  6 mos. min. storage stability @ < 8 C

**Eupergit® C250 L** [Röhm GmbH
_http://www.roehm.de_]
Chem. Descrip.:  N,N’-Methylenebis (methacrylamide)/glycidyl methacrylate/allyl glycidyl ether/methacrylamide copolymer
Chem. Analysis:  0.36% min. oxirane content
Uses:  Carrier for enzyme immobilization in prod. of semisyn. antibiotics and chiral pharmaceuticals
Features:  Provides stable covalent binding of enzymes via oxirane groups
Properties:  Spherical dry beads; 190 µm avg. particle size; bulk dens. 0.3 g/ml; water uptake ≈ 3 ml/g
Storage:  6 mos. min. storage stability @ < 23 C, 12 mos. @ < 8 C, 18 mos. @ < -15 C

**Eur-Amid ME** [EOC Belgium
_http://www.eocgroup.com_]
Chem. Descrip.:  Cocamide DEA
Chem. CAS:  68603-42-9; EINECS/ELINCS 271-657-0
Uses:  Anti-irritant for anionic surfactants
Features:  Glycerin-free; softens aggressive props. of anionic surfactants
Properties:  Golden yel. cl. liq.; char. odor; sol. in IPA, xylene; disp. in water; sp.gr. 1.02 (20 C); visc. 2250 cps max. (20 C); m.p. 0 C; b.p. 185 C; flash pt. none; pH 9-11; nonionic; 89% min. amide
Toxicology:  LD50 (oral, rat) 2700 mg/kg; eye irritant; mildly irritating to skin; contains diethanolamine (5% max.);
Environmental:  > 90% biodeg.
Precaution:  Incompat. with strong oxidizers, copper and copper alloys
Hazardous Ingredients:  Diethanolamine (5% max.)
Hazardous Decomp. Prods.:  CO, CO2, NOx (caused by fire); possible formation of nitrosamine vapors
Storage:  Store above 0 C

**Eur-Amid V** [EOC Belgium
_http://www.eocgroup.com_]
Chem. Descrip.:  Cocamide DEA
Chem. CAS:  68603-42-9; EINECS/ELINCS 271-657-0
Uses:  Anti-irritant for anionic surfactants
Features:  Softens aggressive props. of anionic surfactants
Properties:  Golden yel. cl. liq.; char. odor; sol. in IPA, xylene; disp. in water; sp.gr. 1.02 (20 C); visc. 2250 cps max. (20 C); m.p. 0 C; b.p. 185 C; flash pt. none; pH 9-11; nonionic; 81% min. amide
Toxicology:  LD50 (oral, rat) 2700 mg/kg; eye irritant; mildly irritating to skin; contains diethanolamine (5% max.);
Environmental:  > 90% biodeg.
Precaution:  Incompat. with strong oxidizers, copper and copper alloys
Hazardous Ingredients:  Diethanolamine (5% max.)
Storage:  Store above 0 C

**Eutanol® G** [Cognis/Care Chems.; Cognis Canada; Cognis GmbH/Care Chems.
_http://www.cognis.com_]
Chem. Descrip.:  Octyldodecanol
Uses:  Lubricant, emollient, spreading agent for pharmaceuticals, creams, lotions, depilatories, antiperspirants; carrier for oil-sol. active ingreds.; pigment dispersant
Features:  Stable to hydrolysis
Regulatory:  NF, DAB, JCIC compliance
Trade Name Reference

Properties: Lt. yel. cl. oily liq., pract. odorless and tasteless; sol. in alcohols, esters, cosmetic oils, glycols, ketones, aromatics; insol. in water; m.w. 300; dens. 0.835-0.845 (20 C); visc. 58-64 mPa*s (20 C); acid no. 0.1 max.; iodine no. 8 max.; sapon. no. 5.0; hyd. no. 175-190; cloud pt. < -20 C; ref. index 1.4535-1.4555 (20 C); 90% min. conc.

Storage: 1 yr. min. storage stability in original sealed containers at temps. below 30 C

Eutanol® G16 [Cognis/Care Chems.; Cognis Canada; Cognis GmbH/Care Chems. http://www.cognis.com]

Chem. Descrip.: Hexyldecanol
CAS 2425-77-6; EINECS/ELINCS 219-370-1
Uses: Emollient for pharmaceuticals; carrier for oil-sol. active ingreds.; dispersant for pigments; spreading agent

Features: Stable to hydrolysis

Properties: Lt. yel. cl. oily liq.; m.w. 250; sp.gr. 0.835-0.840; visc. 40-45 mPa*s; acid no. 0.5 max.; iodine no. 10 max.; sapon. no. 10 max.; hyd. no. 200-225; cloud pt. < -40 C; ref. index 1.4400-1.4600; 85% min. conc.

Storage: 1 yr. min. storage stability in original sealed containers at temps. below 30 C; protect against humidity

Evatek™ #174 [Rhodia Organics http://www.rhodia-ppa.com/ppa/home.jsp]

Chem. Descrip.: Ethylvanillin See Ethyl vanillin
CAS 121-32-4; EINECS/ELINCS 204-464-7
Uses: Pharmaceutical synthesis
Features: Not intended for food applics.

Regulatory: Australia AICS; China; Canada DSL; Europe EINECS; Japan ENCS; Philippines PICCS; South Korea

Properties: Flakes

Toxicology: TSCA listed

Exceparl BB [Kao Corp. http://www.kao.co.jp]

Chem. Descrip.: Behenyl behenate
CAS 17671-27-1; EINECS/ELINCS 241-646-5
Uses: Solvent for pharmaceuticals
Properties: Wh. solid; insol. in ethanol; very sl. sol. in n-hexane, xylene; m.p. 73 C; acid no. 1 max.; iodine no. 2 max.; sapon. no. 84-90; hyd. no. 7 max.

Exceparl BS [Kao Corp. http://www.kao.co.jp]

Chem. Descrip.: Butyl stearate
CAS 123-95-5; EINECS/ELINCS 204-666-5

Uses: Solvent for pharmaceuticals

Properties: APHA color 25 max. solid; sol. in n-hexane, xylene, ethanol; m.p. 21-24 C; visc. 7.7 cp (30 C); acid no. 1 max.; iodine no. 2 max.; sapon. no. 167-178

Exceparl EH-P [Kao Corp. http://www.kao.co.jp]

Chem. Descrip.: 2-Ethyl hexyl palmitate See Octyl palmitate
CAS 29806-73-3; EINECS/ELINCS 249-862-1
Uses: Solvent for pharmaceuticals

Properties: APHA color 100 max. liq.; sol. in n-hexane, xylene (10%); very sl. sol. in ethanol (10%); visc. 13 cst (30 C); acid no. 1 max.; sapon. no. 147-157

Exceparl EH-S [Kao Corp. http://www.kao.co.jp]

Chem. Descrip.: 2-Ethyl hexyl stearate See Octyl stearate
CAS 22047-49-0; EINECS/ELINCS 244-754-0
Uses: Solvent for pharmaceuticals

Properties: APHA color 100 max. liq.; sol. in n-hexane, xylene (10%); very sl. sol. in ethanol (10%); visc. 13 cst (30 C); acid no. 1 max.; sapon. no. 140-150; hyd. no. 3 max.

Exceparl HO [Kao Corp. http://www.kao.co.jp]

Chem. Descrip.: Cetyl octanoate
CAS 59130-69-7; EINECS/ELINCS 261-619-1
Uses: Emollient for pharmaceuticals

Properties: Lt. ylsh. cl. liq.; sol. (@ 10%) in ethanol, n-hexane, xylene; visc. 14 mPa•s (20 C); acid no. 0.2 max.; iodine no. 1 max.; hyd. no. 3 max.; cloud pt. 5 C max.; 100% act.

Toxicology: TSCA listed

Exceparl IB-OL [Kao Corp. http://www.kao.co.jp]

Chem. Descrip.: Isobutyl oleate
CAS 84988-79-4; EINECS/ELINCS 284-868-8
Uses: Solvent for pharmaceuticals

Properties: G5 max. color liq.; sol. in n-hexane, xylene, ethanol; f.p. 10 C max.; visc. 14 mPa*s (20 C); acid no. 0.2 max.; iodine no. 1 max.; hyd. no. 3 max.; cloud pt. 5 C max.; 100% act.

Toxicology: TSCA listed

Exceparl IPM [Kao Corp. http://www.kao.co.jp]

Chem. Descrip.: Isopropyl myristate
CAS 110-27-0; EINECS/ELINCS 203-751-4
Uses: Emollient for pharmaceuticals

Properties: G5 max. color liq.; sol. in n-hexane, xylene, ethanol; f.p. 10 C max.; visc. 9.0 cp (20 C); acid no. 1 max.; iodine no. 78-88; sapon. no. 163-165 (ester v.); hyd. no. 5 max.

Exceparl IPM [Kao Corp. http://www.kao.co.jp]

Chem. Descrip.: IPM See Isopropyl myristate
CAS 110-27-0; EINECS/ELINCS 203-751-4
Uses: Emollient for pharmaceuticals

Properties: APHA 20 max. cl. liq.; sol. (@ 10%) in ethanol, n-hexane, xylene; visc. 10 mPa*s (20 C); f.p. 2-8 C; acid no. 0.5 max.; iodine no.
Trade Name Reference

Exceparl IPP [Kao Corp.  
http://www.kao.co.jp]

Chem. Descrip.:  IPP  See Isopropyl palmitate
CAS 142-91-6; EINECS/ELINCS 205-571-1

Uses:  Emollient for pharmaceuticals
Properties:  APHA 20 max. cl. liq.; sol. (@ 10%) in ethanol, n-hexane, xylene; visc. 10 mPa•s (20 C); f.p. 8-15 C; acid no. 0.5 max.; iodine no. 1 max.

Exceparl L-OL [Kao Corp.  
http://www.kao.co.jp]

Chem. Descrip.:  Lauryl oleate
CAS 36078-10-1; EINECS/ELINCS 252-862-4

Uses:  Solvent for pharmaceuticals
Properties:  APHA color 250 max. liq.; sol. in n-hexane, xylene; very sl. sol. in ethanol; visc. 17 cst (30 C); acid no. 5 max.; iodine no. 49-50; sapon. no. 120-130; hyd. no. 10 max.

Exceparl MC [Kao Corp.  
http://www.kao.co.jp]

Chem. Descrip.:  Methyl coconate  See Methyl cocoate
CAS 61788-59-8; EINECS/ELINCS 262-988-1

Uses:  Solvent for pharmaceuticals
Properties:  APHA color 120 max. liq.; sol. in ethanol, xylene (10%); clearly sol. to hazy in n-hexane (10%); visc. 2.9 cp; m.p. -5 C max.; acid no. 0.1 max.; iodine no. 10 max.; sapon. no. 244-260

Exceparl ML-85 [Kao Corp.  
http://www.kao.co.jp]

Chem. Descrip.:  Methyl laurate
CAS 111-82-0; EINECS/ELINCS 203-911-3

Uses:  Solvent for pharmaceuticals
Properties:  APHA color 20 max. liq.; sol. in ethanol, xylene, n-hexane (10%); visc. 2.6 cp; m.p. -5 C max.; acid no. 0.1 max.; iodine no. 0.5 max.; sapon. no. 258-268

Exceparl M-OL [Kao Corp.  
http://www.kao.co.jp]

Chem. Descrip.:  Methyl oleate
CAS 112-62-9; EINECS/ELINCS 203-992-5

Uses:  Solvent for pharmaceuticals
Properties:  APHA color 100 max. liq.; sol. in ethanol, xylene, n-hexane (10%); visc. 5.5 cp; m.p. -5 C max.; acid no. 1 max.; iodine no. 80-90; sapon. no. 189-199

Exceparl MS [Kao Corp.  
http://www.kao.co.jp]

Chem. Descrip.:  Methyl stearate
CAS 112-61-8; EINECS/ELINCS 203-990-4

Uses:  Solvent for pharmaceuticals
Properties:  APHA color 100 max. solid; sol. in ethanol, xylene, n-hexane (10%); visc. 5.5 cp; m.p. 31-35 C; acid no. 1 max.; iodine no. 0.7 max.; sapon. no. 189-195

Exceparl MT [Kao Corp.  
http://www.kao.co.jp]

Chem. Descrip.:  Methyl tallowate
CAS 61788-61-2; EINECS/ELINCS 262-989-7

Uses:  Solvent for pharmaceuticals
Properties:  APHA color 150 max. liq.; sol. in ethanol, xylene, n-hexane (10%); iodine no. 45-55; sapon. no. 190-200

Exceparl MY-M [Kao Corp.  
http://www.kao.co.jp]

Chem. Descrip.:  Myristyl myristate
CAS 3234-85-3; EINECS/ELINCS 221-787-9

Uses:  Solvent for pharmaceuticals
Properties:  APHA color 50 max. solid; sl. sol. in ethanol; m.p. 36-46 C; acid no. 1 max.; iodine no. 1 max.; sapon. no. 115-135; hyd. no. 6 max.

Exceparl OD-B [Kao Corp.  
http://www.kao.co.jp]

Chem. Descrip.:  Octyldodecyl behenate
Uses:  Solvent for pharmaceuticals
Properties:  Lt. yel. solid; sol. in n-hexane, xylene; m.p. 20 C; acid no. 1 max.; iodine no. 0.4; sapon. no. 90.7; hyd. no. 3.2

Exceparl OD-M [Kao Corp.  
http://www.kao.co.jp]

Chem. Descrip.:  Octyldodecyl myristate
CAS 22766-83-2; EINECS/ELINCS 255-623-2

Uses:  Emollient for pharmaceuticals
Properties:  APHA color 100 max. cl. liq.; disp. in ethanol; sol. in n-hexane, xylene; visc. 22 mPa•s (30 C); acid no. 1 max.; iodine no. 5 max.; hyd. no. 5 max.; cloud pt. 7 C max.

Exceparl OL-OL [Kao Corp.  
http://www.kao.co.jp]

Chem. Descrip.:  Oleyl oleate
CAS 3687-45-4; EINECS/ELINCS 222-980-4

Uses:  Solvent for pharmaceuticals
Properties:  GP max. color liq.; sol. in n-hexane, xylene; very sl. sol. in ethanol; visc. 24 cst (30 C); acid no. 1 max.; iodine no. 70-79; sapon. no. 101-111; hyd. no. 10 max.

Exceparl O-OL [Kao Corp.  
http://www.kao.co.jp]

Chem. Descrip.:  Octyl oleate
Uses:  Solvent for pharmaceuticals
Properties:  G10 max. color liq.; sol. in ethanol, n-
hexane, xylene; acid no. 5-10; iodine no. 61-71; sapon. no. 140-150

**Exceparl SS** [Kao Corp.](http://www.kao.co.jp)

Chem. Descrip.: **Stearyl stearate**
CAS 2778-96-3; EINECS/ELINCS 220-476-5
Uses: **Solvent for pharmaceuticals**
Properties: APHA color 100 max. solid; sl. sol. in n-hexane, xylene; very sl. sol. in ethanol; m.p. 56-66 C; acid no. 1 max.; iodine no. 1 max.; sapon. no. 97-107 (ester v.); hyd. no. 7 max.

**Exceparl TD-S** [Kao Corp.](http://www.kao.co.jp)

Chem. Descrip.: **Isotridecyl stearate**
CAS 31565-37-4; EINECS/ELINCS 250-703-3
Uses: **Solvent for pharmaceuticals**
Properties: APHA color 100 max. cl. liq.; sol. in n-hexane, xylene; very sl. sol. in ethanol; visc. 24 cst (30 C); acid no. 1 max.; sapon. no. 115-125

**Explocel®** [Blanver Farmoquimica](http://www.blanver.com.br); Blanver USA

Chem. Descrip.: **Sodium salt of carboxymethyl starch** See Sodium starch glycolate
CAS 9063-38-1
Uses: **Disintegrant, dissolution aid in pharmaceutical tablets, capsules, pellets, wet and dry granulation, dry blends, foods, veterinary prods.**
Features: Absorbs water rapidly; resulting swelling causes rapid disintegration of tablets and granules
Properties: Wh. to sl. yel. relatively free-flowing powd.; ≤ 10% on 200 mesh; odorless; tasteless; visc. 24 cps; pH 6.90 (1 g/30 ml water); 3.56% loss on drying
Use Level: 0.5-5%

**Explosol® SSG-1** [Blanver Farmoquimica](http://www.blanver.com.br); Blanver USA

Chem. Descrip.: **Sodium starch glycolate**
CAS 9063-38-1
Uses: **Disintegrant, dissolution aid in pharmaceutical tablets, capsules, pellets, wet and dry granulation, dry blends, foods, veterinary prods.**
Features: Rapid disintegration; enhanced dissolution
Regulatory: FDA registered
Properties: Wh. powd.; 42 µ avg. particle size; 100% -140 mesh; insol. in org. solvs.; disp. in cold water (2% aq.); m.w. 500,000-1,000,000; bulk dens. 0.780 g/cc; visc. 200 cps max. (4% disp.); m.p. chars at 200 C; pH 5.5-7.5
Use Level: 2-4% (tablets)
Storage: 4 yr. shelf-life stability when stored in tightly closed containers at 75-80 F and 65-70% r.h.

**Explostat® CLV** [JRS Pharma](http://www.jrspharma.com)

Chem. Descrip.: **Sodium starch glycolate**
CAS 9063-38-1
Uses: **Disintegrant for direct compression or wet or dry granulation of pharmaceutical tablets**
Features: Enhanced dissolution; compat. with aspirin
Regulatory: NF, JPE, Type A BP, Type A Ph.Eur. compliance
Properties: Wh. fine powd.; 35-55 µm median particle size; 100% through #140 screen; insol. in org. solvs.; disperses in cold water @ 2% w/v and forms highly sat. layer; m.w. ≈ 500,000-1,000,000; dens. 0.85-0.99 g/ml
Trade Name Reference

(tapped); visc. ≤ 40 cps; pH 5.5-7.5; 2.8-4.2% assay; sodium glycolate (< 2.0%); total sodium (< 10%)
Use Level: 2-4%
Storage: 3 yr. shelf life in unopened tightly closed containers @ < 25°C and 60% r.h.

Explotab® Low pH [JRS Pharma http://www.jrspharma.com]
Chem. Descrip.: Sodium starch glycolate NF, BP, Ph.Eur.
CAS 9063-38-1
Uses: Disintegrant for direct compression or wet or dry granulation of pharmaceutical tablets
Features: Rapid disintegration; enhanced dissolution; enhanced stability and shelf life; compat. with aspirin; high bulk dens.
Regulatory: NF, BP, Type B Ph.Eur. compliance
Properties: Wh. fine powd.; 35-55 µm avg. particle size; 100% through #140 screen; insol. in org. solvs.; disperses in cold water @ 2% w/v and forms highly sat. layer; m.w. ~ 500,000-1,000,000; dens. 0.85-0.99 g/ml (tapped); visc. ≤ 100 cps; pH 3-5; 2.8-4.2% assay (NF), 2-3.4% (Ph.Eur. & BP); < 8% total sodium content
Use Level: 2-4%
Storage: 3 yr. shelf life in unopened tightly closed containers @ < 25°C and 60% r.h.

Chem. Descrip.: Stearic acid
CAS 67701-03-5; EINECS/ELINCS 266-928-5
Uses: Emollient, emulsifier, thickener in pharmaceuticals
Regulatory: Not regulated for transport
Environmental: Biodeg. (28 d) > 90%
Precaution: Wear gloves, goggles, overall skin protection; avoid entry to sewers, drain and surface water
Storage: Store @ R.T. in original sealed container protected from heat sources

Chem. Descrip.: Stearic acid
CAS 67701-03-5; EINECS/ELINCS 266-928-5
Uses: Emollient, emulsifier, thickener in pharmaceuticals
Regulatory: Not regulated for transport
Environmental: Biodeg. (28 d) > 90%
Precaution: Wear gloves, goggles, overall skin protection; avoid entry to sewers, drain and surface water
Storage: Store @ R.T. in original sealed container protected from heat sources

Chem. Descrip.: Stearic acid
CAS 67701-03-5; EINECS/ELINCS 266-928-5
Uses: Emollient, emulsifier, thickener in pharmaceuticals
Regulatory: Not regulated for transport
Environmental: Biodeg. (28 d) > 90%
Precaution: Wear gloves, goggles, overall skin protection; avoid entry to sewers, drain and surface water
Storage: Store @ R.T. in original sealed container protected from heat sources

Extract of Hog Bile [Am. Labs http://www.americanlaboratories.com]
Chem. Descrip.: Hog bile extract contg. hydeoxycholic acid, sodium glycohyodeoxycholate, sodium taurohydeoxycholate
Uses: Nutritive pharmaceutical additive
Storage: Preserve in tight containers with moisture-proof liners, in cool, dry place

Extract of Ox Bile NF XI [Am. Labs http://www.americanlaboratories.com]
Chem. Descrip.: Ox bile extract contg. 45-50% sodium taurocholate, 25% sodium glycocholate
EINECS/ELINCS 206-643-5
Uses: Nutritive pharmaceutical additive
Properties: Lt. color; sol. in water, alcohol; pH 6.5-7.5
Storage: Preserve in tight containers with moisture-proof liners, in cool, dry place

Extra Olein™ 99 [NOF http://www.nof.co.jp]
Chem. Descrip.: Purified oleic acid
CAS 112-80-1; EINECS/ELINCS 204-007-1
**Trade Name Reference**

**Uses:** Emulsifier, solubilizer, stabilizer, solvent in pharmaceuticals, inhalants, orals, topicals

**Features:** High-purity grade

**Regulatory:** JPE

**Properties:** > 99% oleic acid

**Extrapone Avocado Special** [Symrise USA](http://www.symrise.com)
- **Chem. Descrip.:** Water, avocado (Persea gratissima) extract, ethoxydiglycol, propylene glycol, butylene glycol
- **Uses:** Anti-irritant, skin protectant, soothing agent in cosmetics

**Extra White Maize Starch** [Roquette](http://www.roquette.fr)
- **Chem. Descrip.:** Corn starch **See Corn (Zea mays) starch**
- **CAS:** 9005-25-8; EINECS/ELINCS 232-679-6
- **Uses:** Diluent and disintegrant for pharmaceutical tablets and capsules

**Exxal® 11** [ExxonMobil](http://www.exxonmobilchemical.com)
- **Chem. Descrip.:** Undecyl alcohol
- **CAS:** 112-42-5; EINECS/ELINCS 203-970-5
- **Uses:** Syn. flavoring agent in pharmaceuticals

**EZA®** [Albemarle](http://www.albemarle.com)
- **Chem. Descrip.:** Zeolite A, a hydrated sodium aluminosilicate **See Sodium silicoaluminate**
- **CAS:** 1344-00-9; EINECS/ELINCS 215-684-8
- **Uses:** Anticaking agent in dentifrices

**Fancol™ ALA** [Fanning](http://www.fanncorp.com)
- **Chem. Descrip.:** Cetyl acetate, acetylated lanolin alcohol
- **Uses:** Conditioner, emollient, pigment binder, spreading agent, oil coupling agent, solvent, lubricant for topical pharmaceutical ointments

**Fancol™ CB** [Fanning](http://www.fanncorp.com)
- **Chem. Descrip.:** Cocoa butter obtained from roasted seeds of *Theobroma cacao* **See Cocoa (Theobroma cacao) butter**
- **CAS:** 8002-31-1; EINECS/ELINCS 310-127-6
- **Uses:** Skin conditioner, occlusive solvent, skin protectant for OTC drug prods.

**Fancol™ CB Extra** [Fanning](http://www.fanncorp.com)
- **Chem. Descrip.:** Cocoa butter USP obtained from roasted seeds of *Theobroma cacao* **See Cocoa (Theobroma cacao) butter**
- **CAS:** 8002-31-1; EINECS/ELINCS 310-127-6
- **Uses:** Skin conditioner, occlusive solvent, skin protectant for OTC drug prods.

**Fancol™ CH** [Fanning](http://www.fanncorp.com)
- **Chem. Descrip.:** Cholesterol NF
- **CAS:** 57-88-5; EINECS/ELINCS 200-353-2
- **Uses:** Film-former, lubricant, protectant, anti-irritant, cell regeneration aid, emulsifier for w/o formulations, pharmaceuticals; precursor for prod. of vitamin D

**Fancol™ CO-30** [Fanning](http://www.fanncorp.com)
- **Chem. Descrip.:** PEG-30 castor oil
- **CAS:** 61791-12-6
- **Uses:** Surfactant, emulsifier for pharmaceutical ointments

**Fancol™ HL** [Fanning](http://www.fanncorp.com)
- **Chem. Descrip.:** Hydrogenated lanolin
- **CAS:** 8031-44-5; EINECS/ELINCS 232-452-1
- **Uses:** Emollient, moisturizer, lubricant, plasticizer, humectant, mold release agent, chemical intermediate for pharmaceuticals

**Fancol™ HL-20** [Fanning](http://www.fanncorp.com)
- **Properties:** Amber cl. liq.; acid no. 2 max.; sapon. no. 70-80; hyd. no. 70-80; nonionic
Trade Name Reference

Fancol™ LA [Fanning
http://www.fanncorp.com]
Chem. Descrip.: Lanolin alcohol
CAS 8027-33-6; EINECS/ELINCS 232-430-1
Uses: Emollient, thickener, emulsifier,
stabilizer, plasticizer, superfatting agent,
dye dispersant, lubricant, humectant, mold
release agent, conditioner, chemical
intermediate for pharmaceuticals
Properties: Lt. amber to yel. wax-like solid, faint
char. odor; sol. in CCl4, chloroform, IPM (@ 75
C), min. oil (@ 75 C), oleyl alcohol; insol.
water; m. p. 56 C; acid no. 3 max.; sapon. no.
12 max.; nonionic; 100% act.

Fancol™ HL-24 [Fanning
http://www.fanncorp.com]
Chem. Descrip.: PEG-20 hydrogenated lanolin
CAS 68648-27-1
Uses: Solubilizer, superfatting agent, gellant
for pharmaceuticals, microemulsions
Properties: Pale cream soft waxy solid, very sl.
odor; m. p. 40-50 C; sapon. no. 7 max.; hyd.
no. 55 max.

Fancol™ Karite Butter [Fanning
http://www.fanncorp.com]
Chem. Descrip.: Shea butter See Shea butter
(Butyrospermum parkii)
CAS 977026-99-5; EINECS/ELINCS 293-515-7
Uses: Skin anti-irritant for body lotions,
winter sports prods., wrinkle creams,
soaps, shave foams, shampoos, balmsams
Features: Occlusive; melts at body temp.; good
spreadability
Properties: Pale off-wh. to ylsh. pasty solid;
odorless; insol. in water; m. p. 32-45 C; b. p. >
500 F; acid no. 0.5 max.; iodine no. 60-70;
sapon. no. 178-190; hyd. no. 5; flash pt. > 200
F
Toxicology: Fine oil mists may be hazardous
(nuisance particulates)
Precaution: Oil-soaked rags may
spontaneously heat and ignite when
exposed to air; incompat. with strong
oxidizing agents
Hazardous Decomp. Prods.: None

Fancol™ Karite Extract [Fanning
http://www.fanncorp.com]
Chem. Descrip.: Shea butter extract See Shea
butter (Butyrospermum parkii) extract
CAS 68424-59-9
Uses: Emollient, spreading agent for
ointments, suppositories
Properties: Gardner 3 max. color; sol. in castor
oil; sl. sol. in min. oil, propylene glycol,
glycerin, ethyl acetate, isopropyl lanolate;
isol. in water; iodine no. 63-70

Fancol™ LAO [Fanning
http://www.fanncorp.com]
Chem. Descrip.: Laneth-15
CAS 61791-20-6
Uses: Emollient, emulsifier for stable o/w
pharmaceutical emulsions and
microemulsions
Properties: Yel. solid; HLB 12.7; acid no. 5 max.;
hyd. no. 85; nonionic; 100% act.

Fancol™ VB [Fanning
http://www.fanncorp.com]
Chem. Descrip.: Meadowfoam (Limnanthes alba) seed oil; Shea butter
(Butyrospermum parkii) extract
Uses: Primary w/o emulsifier, sec. o/w
emulsifier/stabilizer, moisturizer,
humectant in pharmaceuticals, creams,
lotions, ointments
Features: Where non-animal derived ingreds.
are important; exc. water absorb.
Properties: Gardner 3 max. color; sol. in castor
oil, min. oil (70 visc.), ethyl acetate, IPM; insol.
in propylene glycol, glycerin, water; acid no.
0.5 max.; iodine no. 85 max.; sapon. no. 165
max.; nonionic

Fancor® Lanwax [Fanning
http://www.fanncorp.com]
Chem. Descrip.: Lanolin wax
CAS 68201-49-0; EINECS/ELINCS 269-220-4
Uses: Firming agent, emollient, consistency agent, bodying agent, stabilizer in pharmaceutical w/o systems
Properties: M.p. 42-52 C; iodine no. 18-36; sapon. no. 80-110; hyd. no. 8-35

Fancor® Uni-enbase [Fanning http://www.fanncorp.com]
Chem. Descrip.: Cetearyl alcohol, polysorbate 65, PEG-8 dimethicone meadowfoamate, meadowfoam amidopropylidimethyl betaine See Dimethicone copolyol eicosanate
CAS 8005-44-5; 9005-67-8; 157479-51-1; 412328-58-6
Uses: Emulsifying wax for antiperspirants, depilatories
Properties: M.p. 50-54 C; pH (3% aq.) 5.5-7.0; acid value 2.0 max.; sapon. value 20 max.; iodine value 3.5 max.; hydroxyl value 130-165

Chem. Descrip.: Cyclomethicone and dimethicone
Uses: Pharmaceutials (topical ointments, emulsions)
Regulatory: Japanese approvals
Properties: Cl. gel, odorless; sl. sol. in castor oil, glycerin, ethanol, dist. water; insol. in IPM, min. oil, propylene glycol; visc. > 10^6 cps; pH 4.5-5.5

Fancorsil HA Super [Fanning http://www.fanncorp.com]
Chem. Descrip.: Glycereth polyacrylate copolyol
Uses: Pharmaceuticals (topical ointments, emulsions)
Properties: Cl. visc. liq.; sp.gr. 0.960; visc. 5000 cps min.; 100% solids

Fancorsil LIM 1 [Fanning http://www.fanncorp.com]
Chem. Descrip.: Dimethicone copolyol meadowfoamate
Uses: Softener and conditioner for topical pharmaceutical ointments
Properties: Yel. liq.; sol. in water; acid no. 8 max.

Fancorsil LIM 2 [Fanning http://www.fanncorp.com]
Chem. Descrip.: Dimethicone copolyol meadowfoamate
Uses: Softener and conditioner for topical pharmaceutical ointments
Properties: Sl. yel. wax; insol. in water; acid no. 5 max.

Fancorsil LIM 3 [Fanning http://www.fanncorp.com]
Chem. Descrip.: Dimethicone copolyol meadowfoamate
Uses: Softener and conditioner for topical pharmaceutical ointments
Properties: Yel. liq.; disp. in water; acid no. 5 max.

Fancorsil P [Fanning http://www.fanncorp.com]
Chem. Descrip.: Cyclomethicone, dimethicone, and polyisobutene
Uses: Conditioner, emollient, lubricant for pharmaceuticals
Features: Exc. afterfeel
Properties: Cl. liq.; sol. in ethyl acetate, IPM; sl. sol. in castor and min. oils, propylene glycol, glycerin; insol. in water; iodine no. 40-50; sapon. no. 80-90

Fanoliv™ Butter [Fanning http://www.fanncorp.com]
Chem. Descrip.: Hydrogenated olive oil See Olive (Olea europaea) oil
CAS 68334-28-1; EINECS/ELINCS 269-820-6
Uses: Emollient, stabilizer, visc. adjuster in skin cleansers, sunscreen creams, depilatories and APD sticks
Properties: Ivory solid; low, char. odor; m.p. 50-58 C; acid value 2.0 max.; sapon value 175-200; iodine value 50-70

Fanoliv™ Wax [Fanning http://www.fanncorp.com]
Chem. Descrip.: Olive oil See Olive (Olea europaea) oil
CAS 68334-28-1; EINECS/ELINCS 269-820-6
Uses: Emollient, stabilizer, visc. adjuster in skin cleansers, sunscreen creams, depilatories and APD sticks
Properties: Off-wh. to ivory solid; low, char. odor; m.p. 54-60 C; acid value 2.0 max.; sapon value 175-200; iodine value 5.0 max.; peroxide value 5.0 max.
antidandruff shampoos

**Fascat® 9100** [Arkema/Additives http://www.arkema.com]
Chem. Descrip.: Butylstannoic acid See Hydroxybutyltin oxide
CAS 2273-43-0
Uses: Esterification, transesterification, and polycondensation catalyst for mfg. of prods. intended for pharmaceutical apps. (e.g., coatings, epoxies, hybrid resins)
Regulatory: FDA 21CFR §175.105, 175.300, 176.170, 177.1210, 177.2420; SARA Title II Immediate Hazard
Properties: Amorphous wh. powd.; insol. in water and org. solvs.; dissolves in acids with reaction; sp.gr. 1.46; bulk dens. 0.84 g/cc; m.p. 300 C (dec.); 57% tin
Toxicology: LD50 (oral, rat) > 20,000 mg/kg; OSHA TWA PEL 0.1 mg/m³ (organic tin compounds); minimally irritating to eyes and skin; TSCA listed
Environmental: LC50 (red killfish, 48 h) 54.9 mg/l; slightly toxic
Precaution: Wear safety goggles and gloves; avoid breathing in dust; avoid contact with bases and reducing agents
Hazardous Decomp. Prods.: COₓ and SnOₓ upon thermal decomposition
Storage: Store in closed containers, in a secure area to prevent container damage and subsequent spillage

**Fascat® 9120** [Arkema/Additives http://www.arkema.com]
Chem. Descrip.: Butyltin tris-2-ethylhexoate See Butyltin tris (2-ethylhexoate)
CAS 23850-94-4; EINECS/ELINCS 245-912-1
Uses: Esterification, transesterification, and polycondensation catalyst for mfg. of prods. intended for pharmaceutical apps. (e.g., coatings, epoxies, hybrid resins)
Regulatory: FDA 21CFR §175.105, 175.300, 176.170, 177.1210, 177.2420; SARA Title II Immediate Hazard
Properties: Pale yel. liq.; sol. in toluene, hydrocarbons, halocarbons, esters, etc.; insol. in water; m.w. 605; sp.gr. 1.13; m.p. -27.4 C; 20% tin
Toxicology: LD50 (oral, rat) 3,200 to >5,000 mg/kg; LD50 (dermal, rabbit) >8,000 mg/kg; ACGIH STEL 0.2 mg/m³ (organic tin compounds); may cause eye and skin irritation; TSCA listed
Precaution: Avoid contact with eyes, skin and clothing; avoid breathing dust
Hazardous Decomp. Prods.: None
Storage: Store in a cool, dry place; upon exposure to direct sunlight, product may degrade to an organic tin salt

**Dibutyltin oxide**

**Fascat® 9201** [Arkema/Additives http://www.arkema.com]
Chem. Descrip.: Dibutyltin oxide
CAS 818-08-6; EINECS/ELINCS 212-449-1
Uses: Esterification, transesterification, and polycondensation catalyst for mfg. of prods. intended for pharmaceutical apps. (e.g., coatings, epoxies, hybrid resins)
Regulatory: FDA 21CFR §175.105, 175.300, 176.170, 177.1210, 177.2420; SARA Title II Immediate Hazard
Properties: Wh. powd. no characteristic odor; insol. in water, org. solvs.; will dissolve in acids, alcohols, esters with reaction; sp.gr. 1.62; bulk dens. 0.70 g/cc; m.p. > 290 C (dec.); > 97% act.
Toxicology: LD50 (oral, rat) 260 to >794 mg/kg; LD50 (dermal, rabbit) >2,000 mg/kg; ACGIH STEL 0.2 mg/m³ (organic tin compounds); moderately toxic; may cause eye and skin burns on contact; TSCA listed
Environmental: LC50 (red killfish, 48 h) 1 ppm; LC50 (zebra fish, 96 h) >3.10 mg/l
Precaution: Avoid contact with eyes, skin and clothing
Hazardous Decomp. Prods.: COₓ and SnOₓ upon thermal decomposition
Storage: Store in closed containers, in a secure area to prevent container damage and subsequent spillage

**Cetearyl alcohol**, **ceteareth-3**, **hydrogenated lard**, **sodium lauryl sulfate**

**Fattylan** [Esperis http://www.esperis.it]
Chem. Descrip.: Cetearyl alcohol, ceteareth-3, hydrogenated lard, sodium lauryl sulfate
Uses: Humectant, emulsifier for pharmaceuticals

**Fermax® Adjuvant 27** [GE Silicones http://www.gesilicones.com]
Chem. Descrip.: Organomodified silicone
Uses: Antifoam in fermentation (pharmaceuticals)

**Ferronyl®** [ISP http://www.ispcorp.com]
Chem. Descrip.: Carbonyl iron FCC See Iron
CAS 7439-89-6; EINECS/ELINCS 231-096-4
Uses: Dietary iron supplement for vitamins, pharmaceuticals, multivitamins, iron supplements, children's chewable multivitamins, elixirs
Trade Name Reference

Filmex® A-2 190 Proof \[Equistar http://www.equistarchem.com\]

Chem. Descrip.: Ethyl alcohol (79.6%), methyl alcohol (13.0%), MIBK (0.9%), water (6.5%)

See Alcohol; Methyl isobutyl ketone

UN 1987

Uses: Solvent in chemical/pharmaceutical processing

Regulatory: SARA §311/312 acute health/chronic health/fire hazard, §313 reportable (MIBK, methanol); Calif. Prop. 65 reportable (ethanol, benzene); TSCA export notification required (MIBK)

Properties: Colorless liq.; invisible vapor; sweet alcohol-like odor; sol. in water; sp.gr. 0.7946 (60/60 F), 1.59 (vapor); dens. 6.768-6.778 lb/gal (60 F); vapor pressure 44.6 mm Hg; f.p. -144 C; b.p. 78.4 C; flash pt. (TCC) 13 C; autoignition temp. 363 C

Toxicology: May be irritating to eyes, upper respiratory tract; short-term exposure above 1000 ppm by inh. may cause CNS effects, headache, eye/nose/throat irritation; exposure > 1 h may cause dizziness, drowsiness, loss of appetite, inability to conc., GI effects, nausea, vomiting; prolonged/repeated skin contact may cause dermatitis; ing. may cause drunkenness, CNS depression, nausea, vomiting, diarrhea, liver damage, death; TSCA listed

Environmental: On land, apt to volatilize, biodegrade, or leach to ground water; in water, photolysis, oxidation, biodegradation expected to occur; not expected to bioconcentrate in aquatic organisms; LC50 (rainbow trout, 96 h) 10,400 ppm; prevent entry into sewers

Precaution: Flamm. liq.; flamm. limits 3.3-19 vol.%; material can burn with little or no visible flame; vapors are heavier than air, may flash back; prevent entry into basements, confined areas; ground and bond containers; avoid static discharges; avoid strong oxidizers, excessive heat, sparks, open flame; contact with acetyl chloride or other oxidizing agents may result in violent reaction

Hazardous Decomp. Prods.: Combustion: CO

HMIS: Health 1, Flammability 3, Reactivity 0

Filmex® A-2 Anhydrous \[Equistar http://www.equistarchem.com\]

Chem. Descrip.: Ethyl alcohol (85.8%), methyl alcohol (13.3%), MIBK (1.0%) See Alcohol; Methyl isobutyl ketone

UN 1987

Uses: Solvent in chemical/pharmaceutical processing

Regulatory: SARA §311/312 acute health/chronic health/fire hazard, §313 reportable (MIBK, methanol); Calif. Prop. 65 reportable (ethanol, benzene); TSCA export notification required (MIBK)

Properties: Colorless liq.; invisible vapor; sweet alcohol-like odor; sol. in water; sp.gr. 0.7936-0.7946 (60/60 F), 1.59 (vapor); dens. 6.768-6.778 lb/gal (60 F); vapor pressure 44.6 mm Hg; f.p. -144 C; b.p. 78.4 C; flash pt. (TCC) 13 C; autoignition temp. 363 C

Toxicology: May be irritating to eyes, upper respiratory tract; short-term exposure above 1000 ppm by inh. may cause CNS effects, headache, eye/nose/throat irritation; exposure > 1 h may cause dizziness, drowsiness, loss of appetite, inability to conc., GI effects, nausea, vomiting; prolonged/repeated skin contact may cause dermatitis; ing. may cause drunkenness, CNS depression, nausea, vomiting, diarrhea, liver damage, death; TSCA listed

Environmental: On land, apt to volatilize, biodegrade, or leach to ground water; in water, photolysis, oxidation, biodegradation expected to occur; not expected to bioconcentrate in aquatic organisms; LC50 (rainbow trout, 96 h) 10,400 ppm; prevent entry into sewers

Precaution: Flamm. liq.; flamm. limits 3.3-19 vol.%; material can burn with little or no visible flame; vapors are heavier than air, may flash back; prevent entry into basements, confined areas; ground and bond containers; avoid static discharges; avoid strong oxidizers, excessive heat, sparks, open flame; contact with acetyl chloride or other oxidizing agents may result in violent reaction

Hazardous Decomp. Prods.: Combustion: CO

HMIS: Health 1, Flammability 3, Reactivity 0

Storage: 1 yr. shelf life; store under ambient conditions out of direct sunlight
Trade Name Reference

Filmex® B 190 Proof [Equistar http://www.equistarchem.com]
Chem. Descrip.: Ethyl alcohol (79.6%), methyl alcohol (8.6%), isopropyl alcohol (4.4%), MIBK (0.9%), water (6.5%) See Alcohol; Methyl isobutyl ketone
UN 1987
Uses: Solvent in chemical/pharmaceutical processing
Regulatory: FDA 27CFR §20.112; SARA §311/312 acute health/chronic health/fire hazard, §313 reportable (MIBK, methanol, IPA); Calif. Prop. 65 reportable (ethanol, benzene); TSCA export notification required (MIBK)
Properties: Colorless liq.; invisible vapor; mild sweet alcohol-like nonresidual odor; sol. in water; sp.gr. 0.8058-0.8070 (77/77 F), 1.59 (vapor); dens. 6.766-6.776 lb/gal (60 F); vapor pressure 44.6 mm Hg; f.p. -144 C; b.p. 78.4 C; flash pt. (TCC) 16 C; autoignition temp. 363 C
Toxicology: May be irritating to eyes, upper respiratory tract; short-term exposure above 1000 ppm by inh. may cause CNS effects, headache, eye/nose/throat irritation; exposure > 1 h may cause dizziness, drowsiness, loss of appetite, inability to conc., GI effects, nausea, vomiting; prolonged/repeated skin contact may cause dermatitis; ing. may cause drunkenness, CNS depression, nausea, vomiting, diarrhea, liver damage, death; TSCA listed
Environmental: On land, apt to volatilize, biodegrade, or leach to ground water; in water, photolysis, oxidation, biodegradation expected to occur; not expected to bioconcentrate in aquatic organisms; LC50 (rainbow trout, 96 h) 10,400 ppm; prevent entry into sewers
Precaution: Flamm. liq.; flamm. limits 3.3-19 vol.%; material can burn with little or no visible flame; vapors are heavier than air, may flash back; prevent entry into basements, confined areas; ground and bond containers; avoid static discharges; avoid strong oxidizers, excessive heat, sparks, open flame; contact with acetyl chloride or other oxidizing agents may result in violent reaction

Hazardous Decomp. Prods.:  Combustion: CO
HMIS:  Health 1, Flammability 3, Reactivity 0

Filmtec® [Dow
http://www.dow.com]

Chem. Descrip.:  Spiral wound, composite thin film membranes consisting of ultrathin polyamide barrier, polysulfone interlayer, and polyester web  See Polysulfone resin

Uses:  Membrane for liq. separations for medical applics., pharmaceutical mfg. for reverse osmosis and nanofiltration processes
Trade Name Reference

**Features:** Superior resist. to chem. hydrolysis and microbiological attack
**Regulatory:** Meets all FDA requirements for food contact

**Finlac™ DC** [Danisco Sweeteners](http://www.daniscosweeteners.com)
**Chem. Descrip.:** Lactitol
**CAS** 585-86-4; **EINECS/ELINCS** 209-566-6
**Uses:** Nutritive sweetener and excipient for directly compressible pharmaceutical tablets
**Features:** Reduced caloric level; requires no binders; nonhygroscopic
**Regulatory:** EP

**Flojel® 60** [Nat'l. Starch & Chem./Food Innovation](http://www.foodinnovation.com)
**Chem. Descrip.:** Modified food starch derived from corn [See Food starch, modified](#)
**Uses:** Gellant, film-former for pharmaceutical tablets
**Features:** Thin boiling; low hot visc.; used at higher solids than conventional starches; produces jellies with exc. sheen and desirable stringy texture
**Regulatory:** OSHA nonhazardous; DOT not regulated

**Flojel® 65** [Nat'l. Starch & Chem./Food Innovation](http://www.foodinnovation.com)
**Chem. Descrip.:** Food starch modified derived from corn [See Food starch, modified](#)
**Uses:** Gellant, film-former for pharmaceutical tablets
**Features:** Thin boiling; low hot visc.; used at higher solids than conventional starches; produces jellies with exc. sheen and desirable stringy texture
**Regulatory:** FDA 21 CFR §172.892; DOT nonregulated; SARA §313 nonreportable

**Fizul MD-318C** [Finetex](http://www.finetexinc.com)
**Chem. Descrip.:** Disodium oleamido MIPA sulfosuccinate [See Disodium oleamido MIPA-sulfosuccinate](#)
**CAS** 43154-85-4; **EINECS/ELINCS** 256-120-0
**Uses:** Detergent, cleanser, conditioner for hand cleansers, i.e., liq. soaps, antibacterial washes
**Features:** Cosmetic grade; high foam; compat. with cationics
**Regulatory:** FD 21 CFR §172.892; DOT nonregulated; SARA §313 nonreportable

---

**Properties:** Liqu.; anionic; 35% conc.
**Toxicology:** Low toxicity
Trade Name Reference

static electricity

Flojel® G [Nat'l. Starch & Chem./Food Innovation
http://www.foodinnovation.com]
Chem. Descrip.: Food starch modified derived from corn See Food starch, modified
Uses: Gellant, film-former for pharmaceutical tablets
Features: Thin boiling; low hot visc.; used at higher solids than conventional starches; produces clear jellies with exc. sheen and desirable stringy texture
Properties: Wh. to off-wh. powd.; starch odor; insol. in water; m.w. > 10,000; sp.gr. 1.5; pH ≈ 5.5 (1%); = 11% moisture
Toxicology: Possible physical irritant from dust particles; particulates may scratch eye surfs. and cause mech. irritation; possible nuisance dust by inh.; maintain below TWA 10 mg/m³; low oral toxicity; low toxicity by skin contact; TSCA listed
Precaution: Potential for dust explosion; minimize dust generation
Hazardous Decomp. Prods.: Does not undergo spontaneous decomp.; typ. combustion prod.: CO, CO₂, N, water
Storage: Store @ ambient temps.; sensitive to static electricity

Florence Green Seal-8 [Horsehead Corp. http://www.horsehead.com]
Chem. Descrip.: French process zinc oxide (99.9%), cadmium (0.005%), lead (0.001%)
CAS 1314-13-2; 7440-43-9; 7439-92-1; EINECS/ELINCS 215-222-5; 231-152-8; 231-100-4
Uses: Pigment in pharmaceuticals
Features: High chem. purity; exc. phys. props.; superior color and brightness
Regulatory: DOT nonregulated
Properties: Wh. powd.; odorless; 0.33 μ mean particle size; 99.99% through 325 mesh; negligible sol. in water; sp.gr. 5.6; apparent dens. 40 lb/ft³; dens. 46.7 lb/solid gal; b.p. 3587 F; surf. area 3.2 m²/g; oil absorp. 12 lb/100 lb pigment; 99.8% act.
Toxicology: ZnO: OSHA-PEL TWA total dust 15 mg/m³, respirable 5 mg/m³; ACGIH TLV TWA total dust 10 mg/m³, TWA respirable 5 mg/m³, STEL respirable 10 mg/m³; inhalation of high levels of ZnO may be harmful; chronic exposure may cause respiratory tract irritation, nasopharyngitis, laryngitis
Precaution: Use safety eyewear; protective gloves rec. to prevent skin irritation in hypersensitive individuals; practice good hygiene; avoid prolonged contact with skin
NFPS: Health 0, Flammability 0, Reactivity 0

Fluilan [Croda Inc http://www.croda.com; http://www.crodausa.com; Croda Chem. Europe Ltd http://www.croda.co.uk]
Chem. Descrip.: Lanolin oil
CAS 70321-63-0; EINECS/ELINCS 274-559-6
Uses: Conditioner, emollient, penetrant, superfatting agent for topical pharmaceuticals, ointments, creams, and lotions
Properties: Pale yel. visc. liq., pleasant char. odor; sol. in min. oils, IPA, fatty alcohol, hydrocarbons, and aerosol propellants; cloud pt. 18 C max.; pour pt. 8 C max.; acid no. 2 max.; iodine no. 24-40; sapon. no. 80-100; nonionic; 100% act.
Use Level: 2-10%
Toxicology: LD₅₀ (oral, rat) > 20 g/kg; mild skin and eye irritant

Fluilan AWS [Croda Inc http://www.croda.com; http://www.crodausa.com]
Chem. Descrip.: PPG-12-PEG-65 lanolin oil
Uses: Emollient, cleanser, and solubilizer for topical pharmaceuticals; solubilizes actives into hydroalcoholic systems
Properties: Amber visc. liq., nearly odorless; sol. in water and alcohol; disp. in propylene glycol; cloud pt. 18 C max.; pour pt. 8 C max.; acid no. 3 max.; iodine no. 7-15; sapon. no. 10-25; pH 5-7 (10%); nonionic
Use Level: 0.1-2%
Toxicology: LD₅₀ (oral, rat) > 5 g/kg; moderate skin irritant, minimal eye irritant

F-Melt™ C [Fuji Chem. Ind. USA]
Chem. Descrip.: Proprietary formulation of carbohydrates, disintegrants and inorganic ingredients
Uses: Fast-dissolving excipient system for direct compression oral tablets containing active pharmaceutical ingredients and lubricants
Features: Faster disintegration time than Type M
Regulatory: USP/NF, JP, EP
Properties: Wh. spherical powd.; avg. particle size 100-120 μ; ≤ 6% loss on drying

F-Melt™ M [Fuji Chem. Ind. USA]
Chem. Descrip.: Proprietary formulation of
Trade Name Reference

**carbohydrates, disintegrants and inorganic ingredients**

*Uses:* Fast-dissolving excipient system for direct compression oral tablets containing active pharmaceutical ingredients and lubricants

*Features:* Higher flowable and improved tablet quality needs than Type C

*Properties:* Wh. spherical powd.; avg. particle size 100-120 μ; ≤ 6% loss on drying

**Foam Blast® 5** [Lubrizol Perf. Prods.]

*Chem. Descrip.:* Silicone antifoam compd.

*Uses:* Antifoam, foam control agent in the synthesis of pharmaceuticals

*Properties:* Solv. disp.; emulsifiable in water; 100% act.

**Foam Blast® 7** [Lubrizol Perf. Prods.]

*Chem. Descrip.:* Silicone antifoam compd.

*Uses:* Antifoam, foam control agent in the synthesis of pharmaceuticals

*Properties:* Solv. disp.; emulsifiable in water; 100% act.

**Foam Blast® 10** [Lubrizol Perf. Prods.]

*Chem. Descrip.:* Silicone defoamer

*Uses:* Defoamer for starch and proteinaceous systems, pharmaceuticals

*Features:* Food-grade; rec. for systems requiring an acid or alkaline tolerant defoamer

*Properties:* Wh. emulsion; disp. in water; dens. 8.50 lb/gal; visc. 2100 cps; flash pt. (PMCC) none; pH 6.5-7.5; nonionic; 10% act.

**Foam Blast® 102K** [Lubrizol Perf. Prods.]

*Chem. Descrip.:* Silicone defoamer

*Uses:* Defoamer for pharmaceuticals

*Features:* Food-grade; rec. for systems requiring an acid or alkaline tolerant defoamer

*Properties:* FDA §173.340, 33 ppm max., kosher compliance

**Foamkill® 8G** [Crucible]

*Chem. Descrip.:* Silicone compd.

*Uses:* Defoamer for nonaq. systems, drug extraction and separation, drug processing, vitamins, fermentation

*Regulatory:* FDA §173.340

*Properties:* Gray sl. hazy liq., bland odor; insol. in water; sp.gr. 1.020; b.p. > 300 F; flash pt. (TOC) > 300 F; 100% act.

**Foamkill® 618** [Crucible]

*Chem. Descrip.:* Org. and organo-silicone conc.

*Uses:* Defoamer for pharmaceuticals

*Regulatory:* FDA §175.105, 176.210, 178.3120

*Properties:* Pale yel.; hydrocarbon odor; disp. in water; sp.gr. 0.930; visc. 1000 cps; flash pt. (PMCC) none; pH 6.5-7.5; nonionic; 10% act.

**Foamkill® 810F** [Crucible]

*Chem. Descrip.:* Dimethicone emulsion

*Uses:* Defoamer for aq. systems, pharmaceuticals

*Regulatory:* FDA §173.340, 175.105, 176.210, 178.3120

*Properties:* Pale yel.; hydrocarbon odor; disp. in water; sp.gr. 0.930; visc. 1000 cps; flash pt. (TOC) 250 F; nonionic; 100% act.

*Storage:* 1 yr. min. shelf stability

**Foamkil® 150K** [Lubrizol Perf. Prods.]

*Chem. Descrip.:* Silicone emulsion

*Uses:* Defoamer for starch and proteinaceous systems, pharmaceuticals

*Features:* Food-grade; rec. for systems requiring an acid or alkaline tolerant defoamer

*Regulatory:* FDA §173.340

*Properties:* Wh. emulsion; disp. in water; dens. 8.30 lb/gal; visc. 2100 cps; flash pt. (PMCC) none; pH 7.0; nonionic; 30% act.

**Foamkill® 618** [Crucible]

*Chem. Descrip.:* Org. and organo-silicone conc.

*Uses:* Defoamer for pharmaceuticals

*Regulatory:* FDA §175.105, 176.210

*Properties:* Pale yel.; hydrocarbon odor; disp. in water; sp.gr. 0.930; visc. 1000 cps; flash pt. (PMCC) none; pH 6.5-7.5; nonionic; 10% act.

*Storage:* 1 yr. min. shelf stability
Trade Name Reference

visc. 300 cps; b.p. 212 F; flash pt. (TOC) > 212 F; pH 7.0; nonionic; 10% act.

Toxicology: May cause eye irritation, mild skin irritation on prolonged/repeated contact

Foamkill® 830 [Crucible]
Chem. Descrip.: Organo-silicone emulsion  See Silicone emulsion
Uses: Defoamer for pharmaceuticals
Properties: Emulsion; very sm. particle size
Use Level: 0.1-0.4%

Foamkill® 830F [Crucible]
Chem. Descrip.: Dimethicone
CAS 9006-65-9
Uses: Defoamer for aq. systems, pharmaceuticals
Properties: Wh. pourable visc. liq.; bland odor; disp. in water; sp.gr. 0.993; dens. 8.3 lb/gal; visc. 3500 cps; b.p. 212 F; flash pt. (TOC) > 212 F; pH 7.0; nonionic; 30% act.
Toxicology: May cause eye irritation, mild skin irritation on prolonged/repeated contact
Hazardous Decomp. Prods.: Produces SiO2 upon burning
Storage: Avoid freezing

Foamkill® 836A [Crucible]
Chem. Descrip.: Silicone emulsions  See Silicone emulsion
Uses: Defoamer for pharmaceuticals
Regulatory: FDA §175.105, 175.300, 176.200, 176.210
Properties: Wh. pourable viscous liq.; sp.gr. 1.00; visc. 3000 cps; pH 8.0; nonionic

Foamox DML [Alzo  http://www.alzointernational.com]
Chem. Descrip.: Lauramine oxide
CAS 1643-20-5; EINECS/ELINCS 216-700-6
Uses: Emollient, lubricant for skin acne prods.
Properties: Gardner 1 max. cl. liq.; sol. in water, most hydrophilic solvs. such as alcohols, glycols, triols, polyols, glycol ethers; m.w. 235; sp.gr. 0.99; pH 6-8 (1%); Ross-Miles foam 210 mm (initial); nonionic; 29% min. amine oxide in water
Environmental: Fully biodeg.

Foamtaine SCAB [Alzo  http://www.alzointernational.com]
Chem. Descrip.: Cocamidopropyl hydroxy sulfate  See Cocamidopropyl hydroxysultaine

Folic Acid 10% Trituration [DSM Nutritional Prods. USA  http://www.nutraaccess.com]
Chem. Descrip.: Folic acid USP, FCC in calcium phosphate dibasic carrier
Uses: Vitamin essential for forming certain body proteins and genetic materials for cell nucleus; for pharmaceutical formulations
Properties: Lt. yel. to ylsh. orange powd.; 100% through 80 mesh; insol. in water and org. solvs.; m.w. 441.40; 10% min. assay
Precaution: Fairly stable in presence of air and heat, but destroyed by light and uv radiation
Storage: Store in tight, light-resist. containers; avoid exposure to moisture and excessive heat

Foamtaine SCAB [Alzo  http://www.alzointernational.com]
Chem. Descrip.: Cocamidopropyl hydroxy sulfate  See Cocamidopropyl hydroxysultaine

Fonoline® White [Chembura  http://www.chemtura.com]
Chem. Descrip.: Petrolatum USP
CAS 8027-32-5; EINECS/ELINCS 232-373-2
Uses: Lubricant, process aid in pharmaceuticals; emollient in petrol. jelly, ointments, sun care prods., suppositories
Features: Soft, low m.p.
Regulatory: FDA 21CFR §172.880
Properties: Wh., odorless; visc. 9-14 cSt (100 C); m.p. 53-58 C; pour pt. 20 F

Fonoline® Yellow [Chembura  http://www.chemtura.com]
Chem. Descrip.: Petrolatum USP
CAS 8027-32-5; EINECS/ELINCS 232-373-2
Uses: Emollient in petrol. jelly, ointments, sun care prods., suppositories
Features: Soft, low m.p.
Regulatory: FDA 21CFR §172.880
Properties: Yel., odorless; visc. 9-14 cSt (100 C); m.p. 53-58 C; pour pt. 20 F; HLB 8.4; 99% solids

Foremost® NF Lactose 310 [Foremost Farms USA http://www.foremostfarms.com]
Chem. Descrip.: Lactose monohydrate
Chem. Analysis: 0.5% max. loss on drying
CAS 10039-26-6
Uses: Excipient for pharmaceuticals
Features: Does not contain milk or whey proteins
Regulatory: USP/NF, EP, JP
Properties: Wh. crystalline powd.; sl. sweet taste; 2% max. through USS #80 mesh; bulk dens. 0.60 g/ml (min.); tapped dens. 0.85 g/ml (min.)
Storage: Store away from moisture and excessive heat

Foremost® NF Lactose 312 [Foremost Farms USA http://www.foremostfarms.com]
Chem. Descrip.: Lactose monohydrate
Chem. Analysis: 0.5% max. loss on drying
CAS 10039-26-6
Uses: Excipient for pharmaceuticals
Features: Does not contain milk or whey proteins
Regulatory: USP/NF, EP, JP
Properties: Wh. crystalline powd.; sl. sweet taste; 1% max. through USS #140 mesh; bulk dens. 0.45 g/ml (min.); tapped dens. 0.70 g/ml (min.)
Storage: Store away from moisture and excessive heat

Foremost® NF Lactose 313 [Foremost Farms USA http://www.foremostfarms.com]
Chem. Descrip.: Lactose monohydrate
Chem. Analysis: 0.5% max. loss on drying
CAS 10039-26-6
Uses: Excipient for pharmaceuticals
Features: Does not contain milk or whey proteins
Regulatory: USP/NF, EP, JP
Properties: Wh. crystalline powd.; sl. sweet taste; particle size range 60-1230 μ; 20% min. through USS #140 mesh; bulk dens. 0.50 g/ml (min.); tapped dens. 0.60 g/ml (min.)
Storage: Store away from moisture and excessive heat

Foremost® NF Lactose 315 [Foremost Farms USA http://www.foremostfarms.com]
Chem. Descrip.: Spray-dried mixture of crystalline and amorphous lactose
Chem. Analysis: 1.0% max. loss on drying
CAS 63-42-3; EINECS/ELINCS 200-559-2
Uses: Excipient for pharmaceuticals
Features: Does not contain milk or whey proteins
Regulatory: USP/NF, EP, JP
Properties: Lt. yel. cream; Gardner color 6 max.; bland odor; insol. in water; b.p. >500 F; m.p. 42-52 C; sapon. value 2.0 max; acid value 1.0; flash pt. >500 F (COC)
Toxicology: Nonirritant to eyes; not likely to be absorbed through human skin
Environmental: Biodegrad.
Precaution: Avoid heat, flames, and oxidizing materials; wear goggles and gloves
Hazardous Decomp. Prods.: None

Forlan 200 [RITA http://www.ritacorp.com]
Chem. Descrip.: Petrolatum, lanolin alcohol
Chem. Analysis: 0.2% ash
CAS 8009-03-8; 8027-33-6; EINECS/ELINCS 232-373-2; 232-430-1
Uses: Emollient in topical pharmaceuticals
Features: Processed in pure USP hydrocarbons
Regulatory: USP
Properties: Lt. yel. cream; Gardner color 6 max.; bland odor; insol. in water; b.p. >500 F; m.p. 42-52 C; sapon. value 2.0 max; acid value 1.0; flash pt. >500 F (COC)
Toxicology: Nonirritant to eyes; not likely to be absorbed through human skin
Environmental: Biodegrad.
Precaution: Avoid heat, flames, and oxidizing materials; wear goggles and gloves
Hazardous Decomp. Prods.: None

Forlan 300 [RITA http://www.ritacorp.com]
Chem. Descrip.: Petrolatum, lanolin, lanolin alcohol
CAS 2009-03-8, 8006-54-0, 8027-33-6;
Trade Name Reference

EINECS/ELINCS 232-373-2, 232-348-6, 232-430-1
Uses: Emollient for pharmaceutical topicals
Features: Recommended for hypoallergenic preps.; processed in pure USP hydrocarbons
Properties: Lt. yel. cream; bland odor; insol. in water; m.p. 40-46 C; b.p. >500 F; acid no. 1.0 max; sapon. no. 25 max.; nonionic
Toxicology: Nonirritant to eyes; not likely to be absorbed through human skin
Environmental: Biodegrad.
Precaution: Avoid heat, flames, and oxidizing materials; wear goggles and gloves
Hazardous Decomp. Prods.: None

Forlan C-24 [RITA http://www.ritacorp.com]
Chem. Descrip.: Choleth-24 and ceteth-24
CAS 27321-96-6; 9004-95-9
Uses: Emulsifier, emulsion stabilizer, emollient, moisturizer, solubilizer, visc. modifier, pigment dispersant, plasticizer for pharmaceuticals
Properties: Wh. flakes; bland odor; sol. in alcohol, water; sp.gr. 0.98; vapor dens. > 1; b.p. > 212 F; flash pt. (COC) > 300 F; volatiles < 1%; nonionic; 100% conc.
Toxicology: LD50 (oral, albino rat) > 50 cc/kg
Precaution: Wear rubber gloves, safety glasses; incompat. with oxidizers
Hazardous Decomp. Prods.: Oxides of carbon
Storage: Keep away from heat, flames

Formaxx™ CaCO₃ 70 [Merck KGaA http://www.merck.de]
Chem. Descrip.: Calcium carbonate and sorbitol
Chem. Analysis: < 1% moisture content
CAS 471-34-1; 50-70-4; EINECS/ELINCS 207-439-9; 200-061-5
Uses: Excipient in antacids; calcium supplement in vitamin/mineral blends; taste masking agent
Features: Superior compaction props.; friability of tablets 0.2% max.
Regulatory: NF, EP, BP
Properties: Powd.; particle size < 212 μ < 10%; partially sol. in water; bulk dens. 70 g/100 ml; 67.0-72.0 % (calcium carbonate); 28.5-31.5 % (sorbitol)

Chem. Descrip.: Dried defatted powd. processed from beef livers
Properties: Nutritive pharmaceutical additive in tablets, capsules, and powders; diagnostic applications; taste masking of veterinary foods and drugs
Precaution: Avoid combustible substances
Storage: Store in cool, dry place

Freeze Dried Pork Liver Powder Undefatted [Am. Labs http://www.americanlaboratories.com]
Chem. Descrip.: Dried powd. processed from pork livers
Chem. Analysis: 6% max. loss on drying
Uses: Nutritive pharmaceutical additive in tablets, capsules, and powders; diagnostic applications; taste masking of veterinary foods and drugs
Properties: Powd.
Storage: Store in a cool dry place

Chem. Descrip.: Dried powd. processed from pork livers
Chem. Analysis: 6% max. loss on drying
Uses: Nutritive pharmaceutical additive in tablets, capsules, and powders; diagnostic applications; taste masking of veterinary foods and drugs
Properties: Powd.
Storage: Store in a cool dry place

Freeze Dried Pork Liver Powder Undefatted [Am. Labs http://www.americanlaboratories.com]
Chem. Descrip.: Dried powd. processed from pork livers
Chem. Analysis: 6% max. loss on drying
Uses: Nutritive pharmaceutical additive in tablets, capsules, and powders; diagnostic applications; taste masking of veterinary foods and drugs
Properties: Powd.
Storage: Store in a cool dry place

Chem. Descrip.: Dried powd. processed from pork livers
Chem. Analysis: 6% max. loss on drying
Uses: Nutritive pharmaceutical additive in tablets, capsules, and powders; diagnostic applications; taste masking of veterinary foods and drugs
Properties: Powd.
Storage: Store in a cool dry place

Frescolat MGA [Symrise USA http://www.symrise.com]
Chem. Descrip.: Menthone glycerin acetal
Chem. Analysis: 6% max. loss on drying
Uses: Cooling agent, flavoring agent in oral care prods.
Features: Mild cooling flavor
Regulatory: FEMA/GRAS approved
Properties: Colorless cl. liq.; faintly minty odor, easily masked by perfume oils; virtually tasteless; oil-sol.; m.w. 228.4; dens. 1.030; congeal pt. < -30 C; acid no. 1 max.; flash pt. > 100 C; ref. index 1.473-1.480; 98% min. assay
Use Level: 0.1-2.0%
Precaution: Avoid combustible substances
Storage: 1 yr. min. storage stability when stored in tightly sealed containers under cool
Trade Name Reference
conditions

Frescolat® ML [Symrise USA http://www.symrise.com]
Chem. Descrip.: Menthy lactate
CAS 59259-38-0; EINECS/ELINCS 261-678-3
Uses: Cooling agent, flavoring agent in oral care prods.
Features: Mild cooling flavor; good skin and mucous membrane compat.
Properties: Colorless liq. or solid, faintly minty odor, pract. tasteless; sol. in ethanol (50 vol. %), diethyl phthalate, min. oil, 1,2-propanediol; m.w. 228.4; acid no. 1 max.; flash pt. > 100 C; pH 4-8
Precaution: Avoid combustible substances

Fructofin® CM [Danisco Sweeteners http://www.daniscosweeteners.com]
Chem. Descrip.: Fructose, milled
CAS 57-48-7; EINECS/ELINCS 200-333-3
Uses: Sweetener for foods, pharmaceuticals
Properties: White crystalline powder with a very sweet taste

Fructofin® C [Danisco Sweeteners http://www.daniscosweeteners.com]
Chem. Descrip.: Fructose FCC, USP, NF
CAS 57-48-7; EINECS/ELINCS 200-333-3
Uses: Sweetener for pharmaceuticals
Features: Food grade; stable to air and heat
Properties: Wh. cryst. powd.; pract. odorless; very sweet taste; very sol. in water (≈ 3.5 g/ml); sol. in ethanol; sparingly sol. in ether; m.w. 180.16; m.p. 102-105 C; pH 4.5-7 (10%); 98% min. act.; 0.1% max. moisture
Toxicology: Relatively nontoxic by ing.; may cause skin/eye irritation; prolonged inh. (nuisance particle) may cause respiratory irritation
Precaution: Sl. fire hazard when exposed to heat or flame; may burn but does not ignite readily; dust-air mixts. may ignite or explode; avoid contact with strong oxidizers, excessive heat, sparks, open flame
Hazardous Decomp. Prods.: Thermal decomp. may release toxic/hazardous gases
Storage: 1 yr. shelf life in original sealed pkg. stored below 25 C and < 60% r.h.; hygroscopic

Fruisana [Danisco Sweeteners http://www.daniscosweeteners.com]
Chem. Descrip.: Fructose
CAS 57-48-7; EINECS/ELINCS 200-333-3
Uses: Sweetener for foods, pharmaceuticals

Fujicalin [Fuji Chem. Ind. USA]
Chem. Descrip.: Dibasic calcium phosphate anhyd. USP, JP, EP See Calcium phosphate dibasic
CAS 7757-93-9; EINECS/ELINCS 231-826-1
Uses: Excipient, flow aid, adsorbent for pharmaceutical direct compression tableting; tablet disintegrant
Features: Improved compressibility and flowability; easy blending; nonabrasive; exc. oil adsorption; partial or total replacement for microcryst. cellulose; nonflamm.
Regulatory: USP, JP, EP
Properties: Wh. powd.; 115 µm mean particle size; odorless; tasteless; sol. in dil. HCl, nitric acid, acetic acid, ammonium citrate sol's., min.acids; partly insol. in water, alcohol; m.w. 136.06; sp.gr. 2.78; sp. vol. 2.5 ml/g (loose), 2.2 ml/g (tapped); surf. area 40 m²/g; oil adsorp. 0.94 ml/g; water adsorp. 0.98 ml/g; pH neutral (4% susp.); 100% act.
Toxicology: May be irritating to skin/eyes; may be irritating if lg. amts. are inhaled; if lg. amts. are ingested, may cause nausea, vomiting, diarrhea, difficulty breathing
Precaution: Incompat. with strong oxidizing agents
Hazardous Decomp. Prods.: Thermal decomp. may release toxic POx
Storage: May absorb moisture; keep container closed; avoid high temp. and humidity

Chem. Descrip.: PEG-6 sorbitan beeswax
CAS 8051-15-8
Uses: Emulsifier and emulsion stabilizer for pharmaceuticals
Features: Lipophilic; adds hydrophilic props. to natural beeswax
Regulatory: JSCI listed
Properties: Yel. plate; HLB 7.5; nonionic; 100%
GBW-125 [Nikko Chems. Co. Ltd
http://www.nikkol.co.jp/index.html]
Chem. Descrip.: PEG-20 sorbitan beeswax
CAS 8051-73-8
Uses: Emulsifier and emulsion stabilizer for pharmaceuticals
Features: Adds hydrophilic props. to natural beeswax
Regulatory: JSCI listed
Properties: Yel. plate; HLB 9.5; nonionic; 100% conc.

GM-18IS [Nikko Chems. Co. Ltd
http://www.nikkol.co.jp/index.html]
Chem. Descrip.: Batyl isostearate
Uses: Emollient, emulsion stabilizer, texturizer for medicated ointments; solubilizer for sl. sol. materials
Regulatory: JSCI listed
Properties: Wh. paste; nonionic; 100% conc.

GM-18S [Nikko Chems. Co. Ltd
http://www.nikkol.co.jp/index.html]
Chem. Descrip.: Batyl stearate
CAS 13232-26-3
Uses: Emollient, emulsion stabilizer, texturizer for medicated ointments; solubilizer for sl. sol. materials
Regulatory: JSCI listed
Properties: Wh. solid; sol. in warm ethanol, castor oil, olive oil, oleyl alcohol; insol. in water; m.p. 56 C; nonionic; 100% conc.

GO-430V [Nikko Chems. Co. Ltd
http://www.nikkol.co.jp/index.html]
Chem. Descrip.: PEG-30 sorbitan tetraoleate
CAS 63089-86-1
Uses: Emulsifier, solubilizer, superfatting agent for pharmaceuticals
Features: Hydrophilic
Regulatory: JSCI listed
Properties: Pale yel. liq.; sol. in ethanol, ethyl acetate, xylene; partly sol. in water, propylene glycol; sp.gr. 1.054; HLB 12.5; nonionic; 100% conc.
Toxicology: TSCA listed

GO-440V [Nikko Chems. Co. Ltd
http://www.nikkol.co.jp/index.html]
Chem. Descrip.: PEG-40 sorbitan tetraoleate
CAS 63089-86-1
Uses: Emulsifier, solubilizer, superficial agent for pharmaceuticals
Features: Hydrophilic
Regulatory: JSCI listed
Properties: Pale yel. liq.; sol. in ethanol, ethyl acetate, xylene; partly sol. in water, propylene glycol; sp.gr. 1.060; HLB 14.0; nonionic; 100% conc.
Toxicology: TSCA listed

GPG™ 3565 [Avatar
http://www.avatarcorp.com]
Chem. Descrip.: Glycerin and propylene glycol
CAS 56-81-5; 57-55-6; EINECS/ELINCS 200-289-5; 200-338-0
Uses: Humectant, solvent, viscosity modifier, conditioner, freeze-point depressant, stabilizer, anticaking agent, emulsifier in pharmaceuticals
Regulatory: USP; SARA §311/312, 313 nonreportable; CERCLA nonreportable
Properties: Colorless, odorles visc. liq.; completely sol. in water; sp. gr. > 1; vapor pressure < 0.08 mm Hg; b.p. > 340 F; flash pt. ≥ 101 C
Toxicology: Minor eye irritant; inh. of mists can cause respiratory tract irritation
Environmental: Biodegrad.
Precaution: Avoid excessive heat, open flames, chlorine, fluorine, and other strong oxidizers
Hazardous Decomp. Prods.: COx
NFPA: Health 1, Flammability 1, Reactivity 0

GPG™ 7030 [Avatar
http://www.avatarcorp.com]
Chem. Descrip.: Glycerin and propylene glycol
CAS 56-81-5; 57-55-6; EINECS/ELINCS 200-289-5; 200-338-0
Uses: Humectant, solvent, viscosity modifier, conditioner, freeze-point depressant, stabilizer, anticaking agent, emulsifier in pharmaceuticals
Regulatory: USP; SARA §311/312, 313 nonreportable; CERCLA nonreportable
Properties: Colorless, odorles visc. liq.; completely sol. in water; sp. gr. > 1; vapor pressure < 0.08 mm Hg; b.p. > 340 F; flash pt. ≥ 101 C
Toxicology: Minor eye irritant; inh. of mists can cause respiratory tract irritation
Environmental: Biodegrad.
Precaution: Avoid excessive heat, open flames, chlorine, fluorine, and other strong oxidizers
Hazardous Decomp. Prods.: COx
NFPA: Health 1, Flammability 1, Reactivity 0
GRINDSTED®Xanthan 80 [Danisco Textural Ingredients
http://www.danisco.com/texturalingredients]
Chem. Descrip.: Xanthan gum USP, EP
CAS 11138-66-2; EINECS/ELINCS 234-394-2
Uses: Thickener, stabilizer, suspending agent for solids and oil droplets, emulsion stabilizer, foam stabilizer in pharmaceuticals
Features: Pseudoplastic behavior; antisyneresis effect; absence of thixotropy; stable in acidic and alkaline solns.; temp.-resist.; synergistic with guar, locust bean gums; freeze-thaw and pH stable (3-9); very fast visc. buildup, very good dispersibility
Regulatory: Kosher
Properties: Creamy-wh. fine powd.; 100% min. through 60 mesh, 95% min. through 80 mesh; almost neutral odor; sol. in cold water; sp.gr. 0.8; visc. 1200-1600 mPa•s; pH 6-8 (1%); 91-108% assay; 8-14% loss on drying
Storage: 2 yr. shelf life when stored cool and dry

Galacید Excel 50 [Galactic http://www.lactic.com]
Chem. Descrip.: L(+) Lactic acid (49.5-50.5%)
See Lactic acid
Chem. Analysis: Heavy metals 10 ppm max.; iron 10 ppm max.; calcium 10 ppm max.; chloride 10 ppm max.; sulfate 10 ppm max.; sulphated ash 0.05% max.; cyanide 5 ppm max.; lead 0.5 ppm max.; arsenic 1 ppm max.; mercury 1 ppm max.
Uses: pH control agent, bacteriostatic, flavoring agent, chemical synthesis raw material, chiral intermediate, exfoliant; in food, cosmetic, pharmaceutical applics.
Features: Hygroscopic
Regulatory: GRAS; Europe E270; complies with Food Chemical Codex V
Properties: Cl. liq.; Hazen color 50 max.; sl. acid odor, taste; m.w. 90.08; dens. 1.11-1.13

Galacید Excel 80 [Galactic http://www.lactic.com]
Chem. Descrip.: L(+) Lactic acid (49.5-50.5%)
See Lactic acid
Chem. Analysis: Heavy metals 10 ppm max.; iron 10 ppm max.; calcium 10 ppm max.; chloride 10 ppm max.; sulfate 10 ppm max.; sulphated ash 0.05% max.; cyanide 5 ppm max.; lead 0.5 ppm max.; arsenic 1 ppm max.; mercury 1 ppm max.
Uses: pH control agent, bacteriostatic, flavoring agent, chemical synthesis raw material, chiral intermediate, exfoliant; in food, cosmetic, pharmaceutical applics.

Features: Hygroscopic
Properties: Cl. liq.; Hazen color 10 max. fresh sol'n, 50 max. after heating; sl. acid odor, taste; m.w. 90.08; dens. 1.20-1.21
Chem. Descrip.: Nat. lactic acid (25%) with carriers of maltodextrine, arabic gum
Chem. Analysis: Heavy metals 10 ppm max.
Uses: pH control agent, bacteriostatic, flavoring agent, chemical synthesis raw material, chiral intermediate, exfoliant; in food, cosmetic, pharmaceutical applics.
Regulatory: Europe E270
Properties: Wh. powd.; freely sol. in water; m.w. 90.08; pH 2.6-2.8 (1% sol’n)

Galactasol® 650 [Hercules/Aqualon http://www.aqualon.com]
Chem. Descrip.: Carboxymethyl hydroxypropyl guar
CAS 68130-15-4
Uses: Emulsion stabilizer, visc. control agent, thickener, suspending agent in cosmetics, pharmaceuticals
Features: Performs well in cold environments; self-hydrating; alcohol tolerant
Properties: Pale yel. color; 99% min. through U.S. 100 mesh; bulk dens. 40-44 lb/ft³ (loose); pH 7-9; anionic; 10% max. moisture
Use Level: 0.14-0.57%
Precaution: Sensitive to salts

Chem. Descrip.: Sodium lactate
CAS 72-17-3; EINECS/ELINCS 200-772-0
Uses: Electrolyte and sodium carrier, mineral supplement in pharmaceuticals incl. dialysis sol’ns. and parenteral sol’n; raw material for drug synthesis

Galanium [Galactic http://www.lactic.com]
Chem. Descrip.: Ferrous, zinc, magnesium, manganese, and aluminum lactates
Uses: Mineral supplement, nutrient for pharmaceuticals
Features: High bioavailability
Properties: Mild taste

Chem. Descrip.: Calcium lactate
Chem. Analysis: Calcium 13.1-14.5%; heavy metals 5 ppm max.; iron 80 ppm max.; chloride 80 ppm max.; sulfate 400 ppm max.; phosphate 150 ppm max.; lead 2 ppm max.; arsenic 3 ppm max.; mercury 1 ppm max.; fluoride 15 ppm max.; madnesium and alkali salts 1.0% max.
Uses: Calcium supplement
Regulatory: GRAS; Europe E327; complies with FCC V
Properties: Wh. crystalline powd.; highly sol.; mild taste; m.w. 308; pH 6-8

Chem. Descrip.: Sodium lauryl sulfate
CAS 151-21-3; EINECS/ELINCS 205-788-1
Uses: Emulsifier for toothpaste, tooth powds., pharmaceuticals
Properties: Powd.; pH 7.5-10.5; anionic; 88% min. act.; 6.5% max. sulfate; 1.5% max. unsulfated alcohol; 1% max. chloride

Chem. Descrip.: Sodium lauryl sulfate
CAS 151-21-3; EINECS/ELINCS 205-788-1
Uses: Emulsifier for toothpaste, tooth powds., pharmaceuticals
Properties: Powd.; pH 7.5-10.5; anionic; 88% min. act.; 6.5% max. sulfate; 1.5% max. unsulfated alcohol; 1% max. chloride

Chem. Descrip.: Sodium lauryl sulfate
CAS 151-21-3; EINECS/ELINCS 205-788-1
Uses: Emulsifier for toothpaste, tooth powds., pharmaceuticals
Properties: Needles; pH 7.5-10.5; anionic; 88% min. act.; 6.5% max. sulfate; 1.5% max. unsulfated alcohol; 1% max. chloride

Chem. Descrip.: Sodium lauryl sulfate
CAS 151-21-3; EINECS/ELINCS 205-788-1
Uses: Emulsifier for toothpaste, tooth powds., pharmaceuticals
Properties: Needles; pH 7.5-10.5; anionic; 88% min. act.; 6.5% max. sulfate; 1.5% max. unsulfated alcohol; 1% max. chloride
Chem. Descrip.: Cetearyl alcohol (80%) and ceteareth-20 (20%)
Uses: Self-emulsifying pharmaceutical raw material, o/w emulsion base for creams, ointments, liniments, and lotions
Regulatory: Complies with EP, BP, USP, German Pharmacopeia, JSCID, JCID
Properties: Flakes; m.p. 47-50 C; ≈ 20% act.

Chem. Descrip.: Cetearyl alcohol (90%) and sodium lauryl sulfate (10%)
Uses: Self-emulsifying pharmaceutical raw material, o/w emulsion base for creams, ointments, liniments, and lotions
Regulatory: USP, EP, BP, German Pharmacopeia, JSCID, JCID
Properties: Flakes; m.p. 48-52 C; 8.5-9.35% act.

Galenol® 1618 DSN [Sasol Germany http://www.sasol.com; http://www.sasololefinssurfactants.com]
Chem. Descrip.: Cetearyl alcohol (90%) and sodium C12-C18 alkyl sulfate (10%) See Sodium C12-18 alkyl sulfate
Uses: Self-emulsifying pharmaceutical raw material, o/w emulsion base for creams, ointments, liniments, and lotions
Regulatory: Complies with EP, BP, USP, German Pharmacopeia, JSCID, JCID
Properties: Flakes; m.p. 48-52 C; 8.5-9.35% act.

Chem. Descrip.: Cetearyl alcohol (90%) and sodium C12-C18 alkyl sulfate (10%)
Uses: Self-emulsifying pharmaceutical raw material, o/w emulsion base for creams, ointments, liniments, and lotions
Regulatory: Complies with EP, BP, USP, German Pharmacopeia, JSCID, JCID
Properties: Flakes; m.p. 48-52 C; 8.5-9.35% act.

Ganex® V-216 [ISP http://www.ispcorp.com]
Chem. Descrip.: 2-Pyrrolidinone, 1-ethenyl, hexadecyl homopolymer
CAS 63132-81-2
Uses: Moisture barrier, adhesive, protective colloid, and microencapsulating resin in OTC prods
Regulatory: Not regulated for transport; Canada DSL; Australia AICS
Properties: Pale yel. visc. liq.; sol. in min. oil, kerosene, castor oil, org. solvs., and other polymers; m.w. 7300; sp.gr. 0.90; flash pt. > 220 F; HLB 10.0; 100% act.
Toxicology: LD (oral, rat) > 64 g/kg; sl. irritating to skin, minimal eye irritation; TSCA listed
Environmental: Not readily biodeg.
Precaution: Wear gloves, safety glasses; incompat. with strong oxidizers, strong reducers
NFPA: Health 1, Flammability 0, Reactivity 0

Ganex® V-220 [ISP http://www.ispcorp.com]
Chem. Descrip.: PVP/eicosene copolymer
CAS 28211-18-9
Uses: Moisture barrier, adhesive, protective colloid, and microencapsulating resin in OTC prods
Regulatory: Not regulated for transport; Canada DSL; Australia AICS
Properties: Off-wh. waxy solid; insol. in water; sol. in min. oil, kerosene, org. solvs., and other polymers; m.w. 8600; sp.gr. 0.95; solid. pt. 35-40 C; HLB 8.0; 100% act.
Toxicology: LD (oral, rat) > 17.1 g/kg; nonirritating to skin; TSCA listed
Precaution: Wear gloves, safety glasses; incompat. with strong oxidizers, strong reducers
Hazardous Decomp. Prods.: Oxides of nitrogen
NFPA: Health 1, Flammability 0, Reactivity 0

Gantrez® AN-119 [ISP http://www.ispcorp.com]
Chem. Descrip.: PVM/MA copolymer and benzene (< 2%)
CAS 9011-16-9; 71-43-2
Uses: Thickener, dispersant, stabilizer, gellant, coupling agent, protective colloid, suspending agent in pharmaceuticals; film-former in spray bandages; complexing agent for sustained-release iron preps.; bioadhesives; ostomy adhesives; denture adhesives/stabilizers; dentifrices; thickener for aq. or org. solv. systems
Features: Produces clear films of high tens. and cohesive str.
Regulatory: Not regulated for transport; SARA §313, RCRA reportable; WHMIS D2A, D2B; Canada DSL; Japan ENCS; Australia AICS
Trade Name Reference

**Gantrez® AN-139** [ISP
http://www.ispcorp.com]
Chem. Descrip.: 2,5-Furandione, polymer with methoxyethene and benzene (<2%)  
See PVM/MA copolymer  
CAS 9011-16-9; 71-43-2
Uses: Thickener, dispersant, foam stabilizer, coupling agent for pharmaceuticals; film-former in spray bandages; complexing agent for sustained-release iron preps.; ostomy adhesives; denture adhesives/stabilizers; dentifrices; thickener for aq. or org. solv. systems

**Regulatory:** Not regulated for transport; RCRA reportable (benzene); Canada DSL; Japan ENCS; Australia AICS; WHMIS D2A, D2B
Properties: Wh. fluffy powd.; sol. in water, alcohols, phenols, pyridine, aldehydes, ketones, acid, caustic, and org. solvs.; essentially insol. in aliphatic, aromatic, or halogenated hydrocarbons, ethyl ether; m.w. 41,000; anionic; 98% min. conc.
Toxicology: LD50 (oral, rat) > 5 g/kg; possible cancer risk; TSCA listed

**Precaution:** Wear gloves, safety glasses; incompat. with strong oxidizers, strong reducers

**NFPA:** Health 1, Flammability 1, Reactivity 0
**Storage:** Keep container tightly closed in cool, dry place out of direct sunlight

**Gantrez® AN-139 BF** [ISP
http://www.ispcorp.com]
Chem. Descrip.: 2,5-Furandione, polymer with methoxyethene and toluene (<2%)  
See PVM/MA copolymer  
CAS 9011-16-9; 108-88-3
Uses: Dispersant, coupling agent, stabilizer; film-former in spray bandages; complexing agent for sustained-release iron preps.; ostomy adhesives; denture adhesives/stabilizers; dentifrices; thickener for aq. or org. solv. systems

**Regulatory:** Not regulated for transport; RCRA reportable (benzene); Canada DSL; Japan ENCS; Australia AICS
Properties: Wh. free-flowing fluffy powd.; sol. in water, alcohols, phenols, pyridine, aldehydes, ketones, acid, caustic, and org. solvs.; essentially insol. in aliphatic, aromatic, or halogenated hydrocarbons, ethyl ether; m.w. 20,000; anionic; 100% conc.
Toxicology: LD50 (oral, rat) > 5 g/kg; possible cancer risk; TSCA listed

**Precaution:** Wear gloves, safety glasses; incompat. with strong oxidizers, strong reducers

**NFPA:** Health 1, Flammability 1, Reactivity 0
**Storage:** Keep container tightly closed in cool, dry place out of direct sunlight
Gantrez® AN-169 [ISP  
http://www.ispcorp.com]
Chem. Descrip.: PVM/MA copolymer (98%) and benzene (< 2%)
CAS 52229-50-2; 71-43-2
Uses: Thickener, dispersant, foam stabilizer, coupling agent for pharmaceuticals; film-former in spray bandages; complexing agent for sustained-release iron preps.; ostomy adhesives; denture adhesives/stabilizers; dentifrices; thickener for aq. or org. solv. systems
Regulatory: Not regulated for transport; RCRA reportable (benzene); Canada DSL; Japan ENCS; Australia AICS; WHMIS D2A, D2B
Properties: Wh. fluffy powd.; sol. in water, alcohols, phenols, pyridine, aldehydes, ketones, acid, caustic, and org. solvs.; essentially insol. in aliphatic, aromatic, or halogenated hydrocarbons, ethyl ether; m.w. 67,000; anionic; 100% conc.
Toxicology: LD50 (oral, rat) > 5 g/kg (25% suspension); possible cancer hazard; TSCA listed
Precaution: Wear gloves, safety glasses; incompat. with oxidizers, reducers
NFPA: Health 1, Flammability 3, Reactivity 0
Storage: Keep container tightly closed in cool, dry place out of direct sunlight

Gantrez® S-95 [ISP  
http://www.ispcorp.com]
Chem. Descrip.: Calcium/sodium PVM/MA copolymer.
CAS 62386-95-2
Uses: Film-former in spray bandages; visc. modifier/stabilizer; enteric sustained-release tablet coating; bioadhesives; dentifrices
Properties: Wh. to off-wh. powd.; slowly sol. in water; bulk dens. > 0.7 g/cc (tapped); flash pt. none; pH 6-7 (1 g/100 ml water); 6-15% water
Toxicology: LD50 (oral, rat) 7000 mg/kg; sl. skin irritant; minimal eye irritant; nuisance dust: TLV/TWA 10 mg/m³ total, 5 mg/m³ respirable; avoid breathing dust
Precaution: Incompat. with strong oxidizing or reducing agents

Gardiquat 1450 [Albright & Wilson Australia  
Chem. Descrip.: Benzalkonium chloride USP
CAS 8001-54-5
Uses: Germicide in pharmaceuticals
Properties: Almost water wh. cl. liq.; cloud pt. 1 C; pH 7.0±0.5 (1%); 16.5% solids
Toxicology: Low order of toxicity
Precaution: Flamm.
### Trade Name Reference

**GBL**  [Lyondell](http://www.lyondell.com)  
*Chem. Descrip.*: γ-Butyrolactone  
See Butyrolactone  
CAS 96-48-0; EINECS/ELINCS 202-509-5  
*Uses*: Solvent in synthesis of vitamins; derivs. as relaxants, antispasmodics, antibacterial agents, surgical sutures, and injectable sedative, hypnotic, and aesthetic solns.  
*Features*: No ODP; HAPS-free, recyclable; replacement for regulated solvs.; exc. chem. and thermal stability  
*Properties*: Completely misc. with water; sp.gr. 1.13 (20 C); vapor pressure < 1.5 mm Hg (20 C); m.p. 43 C; b.p. 204 C; flash pt. 98 C; nonflamm.  
*HMIS*: Health 1, Flammability 1, Reactivity 0

Trade Name Reference

http://www.gattefossecorp.com; Gattefosse
Spain http://www.gattefosse.es

Chem. Descrip.: Glyceryl stearate and PEG-75 stearate

Uses: Base, o/w emulsifier for pharmaceutical emulsions; o/w emulsifier for difficult-to-emulsify actives; excipient for dermal/transdermal pharmaceuticals; stabilizer; protects the drug, improves stability of the dosage form

Features: Self-emulsifying; compat. with high percentages of essential oils, menthol, camphor; protects the drug, improves stability of the dosage form

Regulatory: DMF no. 9052

Properties: Gardner < 5 waxy solid; weak odor; HLB 10; m.p. 59-65 C; acid no. < 6; iodine no. < 3; sapon. no. 105-125; nonionic; 100% conc. Use Level: 15-25%

Toxicology: LD50 (oral, rat) > 5 g/kg; nonirritating to skin and eyes

Gelrite® [CP Kelco http://www.cpkelco.com]

Chem. Descrip.: Gellan gum

CAS 71010-52-1; EINECS/ELINCS 275-117-5

Uses: Gellan in microbiological media, plant tissue culture; immunological applics.; agar replacer

Properties: Wh. to tan powd., sl. odor; water-sol.; bulk dens. ≈ 50 lb/ft3; pH neutral (1%)

Toxicology: LD50 (oral, rat) > 5000 mg/kg; excessive dust inhalation may cause respiratory irritation; dry prod. may cause eye irritation

Environmental: Readily biodeg.

Precaution: Not flamm., but powd. will burn if involved in a fire; spills are slippery when wet; incompat. with strong oxidizers

Storage: Store in cool, dry place

Gelucire 33/01 [Gattefosse France http://www.gattefosse.fr]

Chem. Descrip.: Glycerol esters of sat. C8-C18 fatty acids USP/NF

Uses: Excipient, carrier, vehicle for hard and soft gelatin capsules, low dens. prods., low dose or toxic drugs; consistency agent; fatting agent; oily phase for ointments; stabilizer; vehicle protecting act. ingreds. from light, moisture, and oxidation

Features: Protects the drug, improves stability of the dosage form

Regulatory: USP/NF; DMF no. 5538

Properties: Doughy solid; faint odor; drop pt. 33-38 C; HLB 1.0; acid no. < 2; iodine no. ≤ 3; sapon. no. 240-260

Toxicology: LD0 (oral, rat) > 20 g/kg

Chem. Descrip.: Glycerol esters of sat. C12-C18 fatty acids

Uses: Excipient, carrier, vehicle, consistency agent, fatting agent for pharmaceutical hard gelatin capsules, low dens. prods., low dose or toxic drugs; oily phase for ointments; carrier protecting act. ingreds. from light, moisture, oxidation

Regulatory: EP, JP, USP/NF approved; DMF no. 6028

Properties: Waxy pellets; faint odor; m.p. 37.5-41.5 C; HLB 1

Gelucire 43/01 [Gattefosse http://www.gattefossecorp.com]

Chem. Descrip.: Glycerol esters of sat. C12-C18 fatty acids

Uses: Excipient, carrier, vehicle, consistency agent, fatting agent for pharmaceutical hard gelatin capsules, low dens. prods., low dose or toxic drugs; oily phase for ointments; carrier protecting act. ingreds. from light, moisture, and oxidation

Regulatory: EP, USP/NF, JP approved; DMF no. 6028

Properties: Waxy pellets; faint odor; m.p. 42-46 C; HLB 1

Gelucire 44/14 [Gattefosse France http://www.gattefosse.fr]

Chem. Descrip.: PEG-32 glyceryl laurate EP

Uses: Excipient for semisolid formulations for hard gelatin capsules; solubilizer, release agent, bioavailability enhancer of poorly water-sol. drugs; emulsifier for self-microemulsifying drug delivery systems

Features: Provides fast release

Regulatory: EP, FP compliance; DMF no. 5253

Properties: Gardner < 5 waxy solid, faint odor; sol. in chloroform, methylene chloride, ethanol; disp. in water; insol. in min. oil; drop pt. 42.5-47.5 C; HLB 14.0; acid no. < 2; iodine no. < 2; sapon. no. 79-93; hyd. no. 36-56; nonionic

Toxicology: LD0 (oral, rat) > 20 g/kg; nontoxic

Storage: Store in orig. container, prevent exposure to air, light, heat, and moisture

Chem. Descrip.: PEG-32 glyceryl palmitostearate
Trade Name Reference

**Uses:** Excipient, bioavailability enhancer, solubilizer, emulsifier, controlled release agent for poorly-sol. drugs in hard gelatin capsules; stabilizer

**Features:** Must be used in combination with other excipients; protects the drug, improves stability of the dosage form

**Regulatory:** EP, FP compliance; DMF no. 5253

**Properties:** Drop pt. 46-51 C; HLB 13.0; acid no. < 2; iodine no. < 2; sapon. no. 65-80

**Toxicology:** LD0 (oral, rat) > 20 g/kg

**Chem. Descr.:** Bentonite USP/NF

**Chem. Analysis:** SiO₂ (66.5%), Al₂O₃ (14.7%), Na₂O (3.3%), MgO (3.2%), CaO (2.2%), Fe₂O₃ (0.8%)

**CAS 1302-78-9;** EINECS/ELINCS 215-108-5

**Uses:** Thixotrope for pharmaceuticals, acne creams/lotions, calamine lotion

**Features:** Low acid demand

**Properties:** Wh. fine powd.; odorless; brightness 82; pH 9.5-10.5 (2% slurry); 5-8% moisture

**Precaution:** Wear safety glasses or chemical goggles; do not breathe dust; avoid dust generation

**Storage:** Store in dry place in closed container

**Chem. Descr.:** Bentonite USP-NF

**Chem. Analysis:** SiO₂ (66.5%), Al₂O₃ (14.7%), MgO (3.2%), Fe₂O₃ (0.8%), CaO (2.2%), Na₂O (3.3%), K₂O (0.1%), TiO₂ (0.2%)

**CAS 1302-78-9;** EINECS/ELINCS 215-108-5

**Uses:** Suspending agent, syneresis control agent in pharmaceuticals

**Features:** Low acid demand; interacts with inorg. and org. cations

**Properties:** Wh. fine powd.; odorless; visc. 40-200 cps (5% slurry); brightness 82; pH 9-10 (5% slurry); 8% max. moisture

**Precaution:** Wear safety glasses or chemical goggles; do not breathe dust; avoid dust generation

**Storage:** Store in dry place in closed container

**Chem. Descr.:** Magnesium aluminum silicate

**Chem. Analysis:** SiO₂ (62.2%), Al₂O₃ (14.4%), MgO (4.1%), CaO (1.7%), Na₂O (3.1%), K₂O (0.1%), TiO₂ (0.2%)

**CAS 1327-43-1;** EINECS/ELINCS 235-374-6

**Uses:** Rheology control agent in pharmaceuticals

**Regulatory:** Not regulated for transport

**Properties:** Wh. flakes; odorless; hydrates readily in water; insol. in water, org. solvs.; bulk dens. 2.6; visc. 800-2200 cps (5% slurry); brightness 82; pH 9-10 (3% slurry); 8% max. moisture

**Toxicology:** LD50 (oral, rat) > 5 g/kg; may cause drying of the skin; may cause nose, mouth, GI irritation

**Precaution:** Wear safety glasses or chemical goggles; do not breathe dust; avoid dust generation

**Storage:** Store in dry place in closed container

**Chem. Descr.:** Magnesium aluminum silicate

**Chem. Analysis:** SiO₂ (62.2%), Al₂O₃ (14.4%), MgO (4.1%), Fe₂O₃ (1.5%), CaO (1.7%), Na₂O (3.1%), K₂O (0.1%), TiO₂ (0.2%)

**CAS 1327-43-1;** EINECS/ELINCS 235-374-6

**Uses:** Rheology control agent in pharmaceuticals, acne scrubs

**Features:** Synergistic with org. thickeners to improve gel formation and visc. and reduce syneresis; improves high temp. stability at low concs.

**Regulatory:** Not regulated for transport

**Properties:** Wh. flakes; odorless; hydrates readily in water; insol. in water, org. solvs.; bulk dens. 2.6; visc. 800-2200 cps (5% slurry); brightness 82; pH 9-10 (3% slurry); 8% max. moisture

**Toxicology:** LD50 (oral, rat) > 5 g/kg; may cause drying of the skin; may cause nose, mouth, GI irritation

**Precaution:** Wear safety glasses or chemical goggles; do not breathe dust; avoid dust generation

**Storage:** Store in dry place in closed container
Trade Name Reference

Gelwhite® MAS 103 [Southern Clay Prods.  
http://www.scprod.com]
Chem. Descrip.: Magnesium aluminum silicate
CAS 1327-43-1; EINECS/ELINCS 235-374-6
Uses: Rheology control agent in
  pharmaceuticals, acne creams/lotions,
  calamine lotion, kaolin-pectin suspension,
  antacids, pectin liqs.
Features: Low acid demand; interacts with inorg.
  and org. cations
Regulatory: Not regulated for transport
Properties: Wh. flakes; odorless; insol. in water,
  org. solvs.; bulk dens. 2.6; brightness 82; pH
  9-10 (3% slurry); 8% max. moisture
Toxicology: LD50 (oral, rat) > 5 g/kg; may
  cause drying of the skin; may cause nose,
  mouth, GI irritation
Precaution: Wear safety glasses or chemical
  goggles; do not breathe dust; avoid dust
  generation
Storage: Store in dry place in closed container
GEM [Sanyo Chem. Ind.  
http://www.sanyo-chemical.co.jp]
Chem. Descrip.: Lauryl dimethyl benzyl
  ammonium chloride sol'n.  See
Lauralkonium chloride
CAS 139-07-1; EINECS/ELINCS 205-351-5
Uses: Bactericide used for sanitation and
  disinfection in hospitals, institutions,
  veterinary apps
Features: Highly effective at low concentrations
Regulatory: JP compliance
Properties: Lt. yel. liq.; mild odor, odorless when
  diluted; freely sol. in water, lower alcohols,
  ketones, and glycols; pH 8 (10%); cationic;
  50.1-52.5% act.
Toxicology: LD50 (oral, rat) 350 mg/kg; skin
  and eye irritant; prolonged/repeated skin
  contact causes dermatitis
Precaution: Corrosive to iron, steel, brass
Storage: Stable after prolonged storage in tightly
  closed containers in cool, dry, well-ventilated
  area away from heat, sparks, flame, strong
  oxidizing agents
Gemtone® [Engelhard]
Chem. Descrip.: Titanium dioxide-coated mica
  with iron oxides, iron blue, carmine,
  or chromium oxide
Uses: Rich, lustrous pigments deriving color
  from both light interference and light
  absorption; for analgesic body lotions,
  sunscreens, toothpaste
Properties: Powd.; insol.; avg. particle size 25 µ;
  sp.gr. 3.0
Genesolv® D [Honeywell Spec. Chems.
  http://www.honeywell.com/sites/sm/index.jsp]
Chem. Descrip.: Trichlorotrifluoroethane
CAS 76-13-1; EINECS/ELINCS 200-936-1
UN NA3082
Uses: Solvent for biomedical parts; isolates
  viruses in biomedical
Features: Selective solvency; compat. with most
  metals, plastics, elastomers; less toxic than
  chlorinated solvs.; nonflamm.; nonexplosive;
  chemically stable; economical; recoverable
Regulatory: DOT nonregulated below 5000 lb;
  SARA §311 immediate/delayed hazard, §313
  reportable; subject to EPA Clean Air Act
  Regs.; EINECS, Japan MITI, Korea MOE,
  Canada DSL, Australia AICS listed
Properties: Colorless volatile liq.; ethereal faint
  sweetish odor; sol. 0.028% in water (21.1 C);
  m.w. 187.4; sp.gr. 1.47 (21.1 C); dens. 31.1
  lb/gal (21.1 C, liq.); f.p. -35 C; b.p. 47.6 C; KB
  value 32; sp. heat 0.21 Btu/lb° F (liq.); dielec.
  str. 37 kV (0.1 in.); dielec. const. 2.41 (60 Hz);
  vol. resist. 1016 ohm-cm; 100% act.
Toxicology: LC50 (inh., rat 2 h) 110,000 ppm;
  ACGIH TLV/TWA (8 h) 1000 ppm, STEL 1250
  ppm; overexposure may cause dizziness;
  loss of concentration, and at higher levels,
  CNS depression, cardiac arrhythmia;
  vapors displace air and can cause
  asphyxiation in confined spaces; may cause
  skin irritation, defatting on
  prolonged/repeated contact; may cause eye
  irritation, conjunctivitis; TSCA listed
Environmental: LC50 (flathead minnow, 96 h)
  1250 ppm; ozone depleting; minimal
  biodeg.; prevent contamination of ground-
  and surf. waters; do not vent to the
  atmosphere
Precaution: Vapors in the flamm. range, esp.
  in confined or poorly ventilated spaces, can be
  ignited with a flame or strong ignition
  sources; contact with some finely divided
  reactive metals may cause
  explosive/exothermic reactions; incompat.
  with strong acids and alkalis, reactive
  metals (e.g., powd. aluminum, sodium,
  potassium, calcium, magnesium, zinc,
  barium, lithium), strong oxidizing agents
Hazardous Decomp. Prods.: At high temps. (> 250 C),
  decomp. prods. may incl. hydrochloric acid,
  hydrofluoric acid,
Trade Name Reference

**Carbonyl halides such as phosgene**

**HMIS:** Health 1, Flammability 0, Reactivity 0
**Storage:** Store in closed containers in cool, dry, well-ventilated area away from direct flame, heat, sparks

Chem. Descrip.: **Trichlorofluoromethane**
CAS 75-69-4; EINECS/ELINCS 200-892-3
Uses: Aerosol propellant in pharmaceutical metered dose inhalers

Properties: Colorless liq.; faint ethereal, sweetish odor; m.w. 137.35; sp. gr. 1.47; vapor pressure 12.8 psia; f.p. -168 F (1 atm); b.p. 74.5 F (1 atm); 100%

Toxicology: LC50 (inh., 4 h, rat) 26,000 ppm; nonteratogenic; TSCA listed

Environmental: Minimal biodegrad.
Precaution: Wear goggles and impervious gloves; avoid strong acids and alkalis, reactive metals e.g., powdered or freshly abraded Al (may cause strong exothermic reaction), Na, K, Ca, Mg, Zn, molten Al, Ba, Li; avoid strong oxidizers

Hazardous Decomp. Prods.: Hydrochloric and hydrofluoric acids; and carbonyl halides, such as phosgene.

Storage: Store enclosed container in cool, well-ventilated area of low fire risk

Chem. Descrip.: **Dichlorodifluoromethane**
CAS 75-71-8; EINECS/ELINCS 200-893-9
Uses: Aerosol propellant in pharmaceutical metered dose inhalers

Properties: Colorless liq. and vapor; faint ethereal odor; m.w. 120.9; sp. gr. 1.34; vapor pressure 94.9 psia; f.p. -252 F (1 atm); b.p. -21.6 F (1 atm)

Toxicology: OSHA PEL 1000 ppm (8hr); LC50 (4 h rat) > 760,000 ppm; severe eye irritant and frostbite; TSCA listed

Precaution: Freshly abraded Al (may cause strong exothermic reactions; chemically active with K, Ca, Mg, Zn

Hazardous Decomp. Prods.: Halogens, halogen acids and possibly carbonyl halides.

Storage: Store in cool, well-ventilated area of low fire risk out of direct sunlight

**Genu® USP/100** [CP Kelco http://www.cpkelco.com]

Chem. Descrip.: **Pectin** USP/NF, FCC, EEC
CAS 9000-69-5; EINECS/ELINCS 232-553-0
Uses: Gellant, visc. builder, stabilizer, suspending agent, protective colloid, water-binder, bioadhesive in pharmaceuticals, esp. ostomy, emulsions, suspensions

Regulatory: GRAS

Properties: Wh. free-flowing gran.; fine 100-mesh particle size; free from off-flavors and odors; essentially flavorless; completely sol. in deionized water (4%, 60 C); pH 3.6-4.1 (1% aq.); < 10% moisture

**Genu® USP/200** [CP Kelco http://www.cpkelco.com]

Chem. Descrip.: **Pectin** USP/NF, FCC, EEC
CAS 9000-69-5; EINECS/ELINCS 232-553-0
Uses: Gellant, visc. builder, stabilizer, suspending agent, protective colloid, water-binder, bioadhesive in pharmaceuticals, esp. ostomy, emulsions, suspensions

Regulatory: GRAS

Properties: Wh. free-flowing gran.; fine 200-mesh particle size; free from off-flavors and odors; essentially flavorless; completely sol. in deionized water (4%, 60 C); pH 3.6-4.4 (1% aq.); < 10% moisture

**Genu® USP-L/200** [CP Kelco http://www.cpkelco.com]

Chem. Descrip.: **Pectin** USP/NF, FCC, EEC
CAS 9000-69-5; EINECS/ELINCS 232-553-0
Uses: Gellant, visc. builder, stabilizer,
suspending agent, protective colloid, water-binder, bioadhesive in pharmaceuticals, esp. emulsions, suspensions

Regulatory: GRAS

Properties: Wh. free-flowing gran.; fine 200-mesh particle size; free from off-flavors and odors; essentially flavorless; completely sol. in deionized water (4%, 60°C); visc. 80-180 cps (2%); pH 3.6-4.4 (1% aq.); < 10% moisture

Genu® VV-11PF [CP Kelco http://www.cpkelco.com]
Chem. Descrip.: Iota-Carrageenan USP/NF, FCC, EEC See Carrageenan (Chondrus crispus)
CAS 9000-07-1; EINECS/ELINCS 232-524-2
Uses: Thickener, stabilizer, suspending agent, gellant, water-binder in pharmaceuticals
Properties: Completely sol. in hot water (60°C); visc. > 5 cps; pH 7-10 (0.5%); < 12.5% moisture

Genu® VV-41PF [CP Kelco http://www.cpkelco.com]
Chem. Descrip.: Kappa-lambda-Carrageenan USP/NF, FCC, EEC See Carrageenan (Chondrus crispus)
CAS 9000-07-1; EINECS/ELINCS 232-524-2
Uses: Thickener, stabilizer, suspending agent, gellant, water-binder in pharmaceuticals
Properties: Completely sol. in hot water (60°C); visc. > 5 cps; pH 7-10 (0.5%); < 12.5% moisture

Genu® VV-71PF [CP Kelco http://www.cpkelco.com]
Chem. Descrip.: Kappa-Carrageenan USP/NF, FCC, EEC See Carrageenan (Chondrus crispus)
CAS 9000-07-1; EINECS/ELINCS 232-524-2
Uses: Thickener, stabilizer, suspending agent, gellant, water-binder in pharmaceuticals
Properties: Completely sol. in hot water (60°C); visc. > 5 cps; pH 7-10 (0.5%); < 12.5% moisture

Genu® Carrageenan [CP Kelco http://www.cpkelco.com]
Chem. Descrip.: Carrageenan See Carrageenan (Chondrus crispus)
CAS 9000-07-1; EINECS/ELINCS 232-524-2
Uses: Gellant, thickener, stabilizer, suspending agent, water binder in pharmaceuticals

Genugel® X-902-02 [CP Kelco http://www.cpkelco.com]
Chem. Descrip.: Carrageenan See Carrageenan (Chondrus crispus)
CAS 9000-07-1; EINECS/ELINCS 232-524-2
Uses: Gellant, thickener, stabilizer, and suspender used in pharmaceuticals; water binder; imparts desirable body and mouthfeel
Features: Nat.; resistant to enzymatic degradation
and dry conditions in unopened pkg.

**Genu® Pectin (citrus) type USP-H** [CP Kelco http://www.cpkelco.com]

*Chem. Descrip.:* Pectin USP

*CAS:* 9000-69-5; *EINECS/ELINCS* 232-553-0

*Uses:* Thickener and stabilizer in pharmaceutical emulsions and suspensions

*Regulatory:* USP compliance

*Properties:* Cream to lt. tan free-flowing gran.; essentially odorless and flavorless; sol. in water; visc. 200-450 cP (2%); pH 3.6-4.4 (1% aq.)

**Genu® Pectin (citrus) type USP-L/200** [CP Kelco http://www.cpkelco.com]

*Chem. Descrip.:* Pectin USP

*CAS:* 9000-69-5; *EINECS/ELINCS* 232-553-0

*Uses:* Thickener and stabilizer in pharmaceutical emulsions and suspensions

*Regulatory:* USP compliance

*Properties:* Cream to lt. tan free-flowing gran.; essentially odorless and flavorless; sol. in water; visc. 80-180 cP (2%); pH 3.6-4.4 (1% aq.)

**Genu® Pectin USP/100** [CP Kelco http://www.cpkelco.com]

*Chem. Descrip.:* Pectin USP

*CAS:* 9000-69-5; *EINECS/ELINCS* 232-553-0

*Uses:* Visc. builder, bodying agent, suspending agent, protective colloid, and stabilizer for pharmaceuticals; stabilizer, water binder, adhesive for pharmaceutical suspensions, emulsions, ostomy adhesives, wound care dressings

*Regulatory:* FCC, EEC compliance; GRAS

*Properties:* Free-flowing granulate; essentially odorless and flavorless; sol. in water as 4% sol'n. @ 60 C; high m.w.; whiteness > 88; pH 3.6-4.4 (1% aq.)

**Genu® Pectin USP/200** [CP Kelco http://www.cpkelco.com]

*Chem. Descrip.:* Pectin USP

*CAS:* 9000-69-5; *EINECS/ELINCS* 232-553-0

*Uses:* Visc. builder, bodying agent, suspending agent, protective colloid, and stabilizer for pharmaceuticals; stabilizer, water binder, adhesive for pharmaceutical suspensions, emulsions, ostomy adhesives, wound care dressings

*Regulatory:* FCC, EEC compliance; GRAS

*Properties:* Free-flowing granulate; essentially odorless and flavorless; sol. in water as 4% sol'n. @ 60 C; visc. 80-180 cs (2%); pH 3.6-4.4 (1% aq.)

**Genuvisco®** [CP Kelco http://www.cpkelco.com]

*Chem. Descrip.:* Carrageenan See Carrageenan (Chondrus crispus)

*CAS:* 9000-07-1; *EINECS/ELINCS* 232-524-2

*Uses:* Gellant, thickener, stabilizer, and suspender used in pharmaceuticals; water binder; imparts desirable body and mouthfeel

**Germaben® II** [ISP Sutton Labs]

*Chem. Descrip.:* Diazolidinyl urea (30%), propylene glycol (56%), methylparaben (11%), and propylparaben (3%)

*Uses:* Antimicrobial preservative for pharmaceuticals, topicals, medicated shampoos, emulsion prods., germicidal creams/ointments

*Features:* Broad-spectrum; effective over wide pH range, against Gram-positive and -negative bacteria, yeast, molds

*Regulatory:* USA and Europe approvals

*Properties:* Pale to lt. yel. cl. visc. liq.; char. mild odor; sol. @ 1% in aq. sol'n. and oil-water emulsions; sp.gr. 1.1731-1.1839; vapor pressure 0.22 mm Hg (20 C); b.p. 187.2 C; flash pt. (TCC) > 93.3 C; 42.5-45.5% total solids; 5.8-6.4% N

*Use Level:* 1% max.; 0.25-1% (medicated shampoos, emulsions), 1% (topicals)

*Toxicology:* LD50 (oral, rat) > 2000 mg/kg, (dermal, rabbit) > 2000 mg/kg; low acute oral toxicity; moderate skin irritant; severe
Trade Name Reference

- **Germall® 115** [ISP Sutton Labs]
  Chem. Descrip.: Imidazolidinyl urea USP/NF
  CAS 39236-46-9; EINECS/ELINCS 254-372-6
  Uses: Germicide, antimicrobial preservative for topical pharmaceuticals, germicidal creams/ointments, esp. cold mix formulations
  Features: Effective against Gram-positive and -negative bacteria, yeast, mold; active over wide pH range; synergistic with other preservatives
  Regulatory: EC approved
  Properties: Wh. free-flowing fine powd., char. mild odor or odorless; hygroscopic; sol. (g/100 g): 200 g in water, 50 g in propylene glycol, 16 g in glycerin; m.w. 406.33; pH 6.0-7.5 (1% aq.); 26-28% N
  Use Level: 0.2-0.6%
  Toxicology: LD50 (oral, rat) 5200 mg/kg, low acute oral toxicity; nonirritating to skin and eyes as aq. sol'n.; mild transient eye irritant as powd.; inh. of powd. may cause respiratory irritation
  Precaution: Conc. powd. in presence of ignition source may cause a dust explosion
  Storage: Keep container closed when not in use; store in cool, dry location

- **Germall® II** [ISP Sutton Labs]
  Chem. Descrip.: Diazolidinyl urea
  CAS 78491-02-8; EINECS/ELINCS 278-928-2
  Uses: Antimicrobial preservative for topical pharmaceuticals, germicidal creams/ointments
  Features: Broad-spectrum; effective against Gram-negative and -positive, and house isolate bacteria; synergistic with other preservatives; effective at low conc. levels
  Regulatory: EC approved
  Properties: Wh. free-flowing fine powd., char. mild odor or odorless; hygroscopic; very sol. in water, sol. in propylene glycol, glycerin; m.w. 278.23; 19-21% N
  Use Level: Up to 0.5%
  Toxicology: LD50 (oral, rat) 2570 mg/kg, (dermal, rabbit) > 2000 mg/kg; low acute oral toxicity; nonirritating to skin and eyes @ 5% aq. sol'n.; powd. may cause eye irritation; inh. of powd. may cause respiratory irritation

- **Germall® Plus** [ISP Sutton Labs]
  Chem. Descrip.: Diazolidinyl urea (99%) and iodopropynyl butylcarbamate (1%)
  Uses: Antimicrobial preservative for personal care prods., pharmaceuticals, OTC topical drugs, medical devices, veterinary prods.
  Features: Broad spectrum
  Properties: Wh. fine powd.; char. mild odor; sol. 1.0 g/100 g water, < 0.1 g/100 g EtOH, < 0.1 g/100 g MeOH, < 0.1 g/100 g isopropanol, 69 g/100 g PG, 0.25 g/100 g butylene glycol; pH 6-7.5 (1%)
  Use Level: 0.05-0.2%
  Toxicology: Nonirritating to skin, eyes
  Storage: Hygroscopic; store in sealed, orig. container in cool, dry location

- **Glicepol 560** [Canamex](http://www.canamex.com.mx)
  Chem. Descrip.: Glycerol stearate self-emulsifying
  See Glycerol stearate SE
  CAS 11099-07-3
  Uses: Emulsifier for pharmaceutical o/w emulsions
  Properties: Wh. creamy flakes; HLB 10.0; anionic; 100% conc.

- **Glicerina USP** [Undesa](http://www.undesa.com)
  Chem. Descrip.: 1,2,3-Propanetriol See Glycerin
  CAS 56-81-5; EINECS/ELINCS 200-289-5
  Uses: Plasticizer, solvent, solubilizer; preservative, emollient, sweetener, humectant in pharmaceuticals
  Regulatory: USP
  Properties: Colorless, odorless liq.; sol. in water; insol. in fat; dens. ≈ 1.26 g/ml; vapor pressure < 1 mbar; m.p. 18 C; b.p. ≈ 290 C; flash pt. > 180 C
  Toxicology: LD50 (oral, rat) > 10 g/kg; relatively nontoxic
  Environmental: Biodeg.; considered to be low toxicity for aquatic life
  Precaution: Wear gloves, goggles, overalls; avoid contact with flames and strong oxidants; keep out of sewers, drains, surface water currents
Trade Name Reference

Hazardous Decomp. Prods.: Acrolein
Storage: Store in closed container @ R.T.

Glicerina USP V [Undesa http://www.undesa.com]
Chem. Descrip.: 1,2,3-Propanetriol See Glycerin
CAS 56-81-5; EINECS/ELINCS 200-289-5
Uses: Plasticizer, solvent, solubilizer; preservative, emollient, sweetener, humectant in pharmaceuticals
Regulatory: USP
Properties: Colorless, odorless liq.; sol. in water; insol. in fat; dens. ≈ 1.26 g/ml; vapor pressure < 1 mbar; m.p. 18 C; b.p. ≈ 290 C; flash pt. > 180 C

Precaution: Wear gloves, goggles, overalls; avoid contact with flames and strong oxidants; keep out of sewers, drains, surface water currents
Hazardous Decomp. Prods.: Acrolein
Storage: Store in closed container @ R.T.

Chem. Descrip.: Glyceryl dilaurate
CAS 27638-00-2; EINECS/ELINCS 248-586-9
Uses: Vehicle for injectable substances; facilitates the incorporation of liposoluble active ingredients
Properties: Nonionic

Chem. Descrip.: PEG 400 cocoate See PEG-8 cocoate
CAS 61791-29-5
Uses: O/w emulsifier, thickener, antifoam, dispersant, base for pharmaceuticals
Regulatory: Not classified as dangerous for transport
Properties: Lt. yel. liq.; typical odor; sol. in water, fat; dens. ≈ 1.03; m.p. ≈ 10 C; flash pt > 250 C; nonionic
Environmental: Biodeg.; keep out of sewers, drains, surface and underground water; considered to be low toxicity to aquatic life
Precaution: Wear gloves, goggles, overalls; avoid contact with flames
Hazardous Decomp. Prods.: Can generate adductors of ethylene oxide
Storage: Store in original, closed container @ R.T.; protect from dampness, heat sources

Chem. Descrip.: PEG-12 laurate
CAS 9004-81-3
Uses: O/w emulsifier, thickener, antifoam, dispersant, base for pharmaceuticals
Regulatory: Not classified as dangerous for transport
Properties: Lt. yel. liq.; typical odor; sol. in water, fat; dens. ≈ 1.03; m.p. ≈ 12 C; flash pt > 235 C; nonionic
Environmental: Biodeg.; keep out of sewers, drains, surface and underground water; considered to be low toxicity to aquatic life
Precaution: Wear gloves, goggles, overalls; avoid contact with flames
Hazardous Decomp. Prods.: Can generate adductors of ethylene oxide
Storage: Store in original, closed container @ R.T.; protect from dampness, heat sources

Hazardous Decomp. Prods.: Can generate adductors of ethylene oxide
Storage: Store in original, closed container @ R.T.; protect from dampness and heat sources
Trade Name Reference

Glicopol 225 [Undesa
http://www.undesa.com; S. Black
http://www.sblack.com]
Chem. Descrip.: PEG-8 dilaurate
CAS 9005-02-1
Uses: O/w emulsifier, thickener, antifoam, dispersant, base for pharmaceuticals
Properties: Nonionic

Gloria® [Chemtura
http://www.chemtura.com]
Chem. Descrip.: Wh. mineral oil USP
CAS 8020-83-5; EINECS/ELINCS 232-384-2
Uses: Emollient, lubricant, carrier for pharmaceuticals, ointments, creams, veterinary preps.
Regulatory: FDA 21CFR §172.878, §178.3620a
Properties: Water-wh., odorless, tasteless; sp.gr. 0.859-0.880; visc. 39-42 cSt (40 C); pour pt. -12 C; flash pt. 204 C

Glucam® E-10 [Noveon
http://www.carbopol.com;
http://www.noveoncoatings.com]
Chem. Descrip.: Methyl gluceth-10
CAS 68239-42-9
Uses: Humectant, solvent, and solubilizer for topical pharmaceuticals; humectant, moisturizer, gloss aid, conditioner for emulsions; emollient in aq. and hydroalcoholic prods.
Properties: Pale yel. med. visc. syrups; pract. odorless; sol. in water, alcohol, hydroalcoholic systems; acid no. 1.5 max.; iodine no. 1 max.; sapon. no. 1.5 max.; hyd. no. 350-370; nonionic; 100% conc.
Toxicology: LD50 (acute oral) > 5 ml/kg; nonirritating to eyes and skin

Glucam® E-20 [Noveon
http://www.carbopol.com;
http://www.noveoncoatings.com]
Chem. Descrip.: Methyl gluceth-20
CAS 68239-43-0
Uses: Humectant, solvent, and solubilizer for topical pharmaceuticals; emollient in aq. and hydroalcoholic prods.
Properties: Pale yel. thin syrup; pract. odorless; sol. in water, alcohol, hydroalcoholic systems; acid no. 1.0 max.; iodine no. 1 max.; sapon. no. 1.0 max.; hyd. no. 205-225; nonionic; 100% conc.

Glucam® P-10 [Noveon
http://www.carbopol.com;
http://www.noveoncoatings.com]
Chem. Descrip.: PPG-10 methyl glucose ether
cas 61849-72-7
Uses: Solvent and solubilizer for topical pharmaceuticals; emollient in aq. and hydroalcoholic prods.
Properties: Pale yel. heavy visc. syrups; pract. odorless; sol. in water, alcohol, hydroalcoholic systems, castor oil, IPM, IPP; visc. 8500 cps; acid no. 1.0 max.; iodine no. 1 max.; sapon. no. 1.0 max.; hyd. no. 285-305; nonionic; 100% conc.
Toxicology: LD50 (acute oral) > 5 ml/kg; nonirritating to skin; mild transient irritation to eyes

Glucam® P-20 [Noveon
http://www.carbopol.com;
http://www.noveoncoatings.com]
Chem. Descrip.: PPG-20 methyl glucose ether
CAS 61849-72-7
Uses: Solvent and solubilizer for topical pharmaceuticals; emollient in aq. and hydroalcoholic prods.
Properties: Pale yel. med. visc. syrup; pract. odorless; sol. in water, alcohol, hydroalcoholic systems, castor oil, IPM, IPP; visc. 1700 cps; acid no. 1.0 max.; iodine no. 1 max.; sapon. no. 1.0 max.; hyd. no. 160-180; nonionic; 100% conc.
Toxicology: LD50 (acute oral) > 3 ml/kg; nonirritating to skin; mild transient irritation to eyes

Glucam® P-20 Distearate [Noveon
http://www.carbopol.com;
http://www.noveoncoatings.com]
Chem. Descrip.: PPG-20 methyl glucose ether distearate
CAS 93821-74-0
Uses: Skin moisturizer, conditioner, slip agent, and emollient for pharmaceuticals
Features: Barrier to reduce water loss from stratum corneum
Properties: Pale amber liq.; sol. in IPM, castor oil, corn oil, ethanol, hot min. oil; insol. in water, propylene glycol, aq. ethanol; acid no. 2.5 max.; sapon. no. 58-72; hyd. no. 50-70; flash pt. (COC) 545 F
Toxicology: LD50 (acute oral) > 5 g/kg; not a primary skin irritant; pract. nonirritating to
Glucamate® DOE-120 [Noveon
http://www.carbopol.com;
http://www.noveoncoatings.com]
Chem. Descrip.: PEG-120 methyl glucoside dioleate See PEG-120 methyl glucose dioleate
CAS 86893-19-8
Uses: Thickener, emulsifier, solubilizer for topical pharmaceuticals; anti-irritant for surfactants
Properties: Lt. yel. waxy solid, faint char. odor; water-sol.; flash pt. (COC) 695 F; acid no. 1 max.; iodine no. 5-15; hyd. no. 14-26; sapon. no. 14-26; pH 4.5-7.5 (10% aq.); nonionic; 100% conc.
Toxicology: LD50 (acute oral) > 5 g/kg; not a primary skin irritant; nonirritating to eyes

Glucamate® SSE-20 [Noveon
http://www.carbopol.com;
http://www.noveoncoatings.com]
Chem. Descrip.: PEG-20 methyl glucose sesquistearate
CAS 68389-70-8
Uses: O/w emulsifier, solubilizer for topical pharmaceuticals
Features: Used with Glucate SS; effective at low concs.
Properties: Pale yel. soft solid; sol. in water, IPA, ethanol, castor oil, corn oil; HLB 15.0; cloud pt. 74 C (1% in 5% NaCl); flash pt. 570 F (OC); sapon. no. 47; pH 6.5 (10% aq.); nonionic; 100% conc.
Toxicology: LD50 (acute oral) > 5 g/kg; mild transient eye irritant; not a primary skin irritant

Glucate® DO [Noveon
http://www.carbopol.com;
http://www.noveoncoatings.com]
Chem. Descrip.: Methyl glucose dioleate
CAS 83933-91-3; EINECS/ELINCS 280-069-3
Uses: Conditioner, emollient, lubricant, plasticizer, and pigment dispersant for topical pharmaceuticals; w/o emulsifier, aux. emulsifier for o/w systems
Properties: Amber visc. liq.; HLB 5.0; nonionic; 100% conc.
Toxicology: LD50 (acute oral) > 5 g/kg; nonirritating to eyes; not a primary skin irritant

Glucate® SS [Noveon
http://www.carbopol.com;]
**Trade Name Reference**

**Features:** Highly compressible; easier handling and processing; better flowability; quick disp. and dissolution; consistent particle size

**Regulatory:** USP/NF, EP

**Properties:** Spherical, wh. free-flowing microgran. powd.; odorless; almost instantaneous dispersal and dissolution in water

**Glucidex® IT19** [Roquette](http://www.roquette.fr)

**Chem. Descrip.:** Maltodextrin

**CAS** 9050-36-6; EINECS/ELINCS 232-940-4

**Uses:** Excipient, binder for pharmaceuticals, direct compression tableting; carrier for flavors and fragrances

**Features:** Highly compressible; easier handling and processing; better flowability; quick disp. and dissolution; consistent particle size

**Regulatory:** USP/NF, EP

**Properties:** Spherical, wh. free-flowing microgran. powd.; odorless; almost instantaneous dispersal and dissolution in water

place at ambient temps. (15-20 C); material
should be retested after 3 yrs. storage
Gluconal® CADS [PURAC Am.
http://www.purac.com]
Chem. Descrip.: Calcium D-saccharate USP
See Calcium saccharate
CAS 5793-88-4; EINECS/ELINCS 227-334-1
Uses: Stabilizer for calcium gluconate sol’ns.
Features: High solubility, bioavailability,
biocompatibility; neutral taste
Regulatory: USP
Properties: Wh. cryst. powd.; odorless; tasteless;
pract. insol. in water; m.w. 320.3; bulk dens.
≈ 600 kg/m³; 98.5-102% assay
Toxicology: LD50: (oral, rat) > 2000 mg/kg;
nontoxic; nonhazardous at current use
levels; extremely high levels may result in
hypercalcemia and possible renal
impairment
Storage: Store in well-closed containers in dry
place at ambient temps. (15-20 C); material
should be retested after 3 yrs. storage
Gluconal® CAMB [PURAC Am.
http://www.purac.com]
Chem. Descrip.: Calcium borogluconate
CAS 5743-34-0
Uses: Mineral source for veterinary
pharmaceuticals, dietary supplements
Features: High solubility, bioavailability,
biocompatibility; neutral taste
Regulatory: USP. EP, E 579; FDA GRAS
Properties: Lt. blue powd.; faint char. odor;
amost tasteless; sol. 400-600 g/l water;
m.w. 482.2; bulk dens. 650-850 kg/m³; pH 4.50.5%
(10 g/90 g water); decomp. temp. ≈ 100 C; 97.0-102.0% assay
Toxicology: LD50 (oral, rat) 4600 mg/kg;
harmful if swallowed; nonhazardous at
current use levels
Environmental: Readily biodegradable; no
bioaccumulation
Precaution: Avoid strong oxidizers
Hazardous Decomp. Prods.: COx
Storage: Store in well-closed containers,
protected from light, in dry place at ambient
temps. (15-20 C); material should be retested
after 3 yrs. storage
Gluconal® K-G [PURAC Am.
http://www.purac.com]
Trade Name Reference

**Gluconal® MN-P** [PURAC Am.

Chem. Descrip.: Manganese gluconate
FCC/USP
CAS 6485-39-8; EINECS/ELINCS 229-350-4
Uses: Mineral source for human and veterinary pharmaceuticals, dietary supplements
Features: High solubility, bioavailability, biocompatibility; neutral taste
Regulatory: USP, FDA 21CFR §184.1452, 582.5452; US GRAS compliant
Properties: Off-wh. odorless powd. or gran.; astringent taste; sol. 110 g/l cold water; m.w. 481.3; bulk dens. 500-600 kg/m³; pH ≈ 6.5 (50 g/l H₂O, sol’n.); 90.5-100% act.
Toxicology: LD₅₀ (oral, rat) > 5000 mg/kg; nonhazardous at current use levels; nontoxic
Environmental: Readily biodegrad.; no bioaccumulation
Precaution: Use dust mask, safety glasses; avoid strong oxidizers
Hazardous Decomp. Prods.: COₓ
Storage: Store in well-closed containers in dry place at ambient temps. (15-20 C); material should be retested after 3 yrs. storage

**Gluconal® ZN-G** [PURAC Am.

Chem. Descrip.: Zinc gluconate
FCC/USP
CAS 4468-02-4; EINECS/ELINCS 224-736-9
Uses: Mineral source for human and veterinary pharmaceuticals, dietary supplements; act. ingred. in lozenges and other hygienic preps.; mineral source, bacteriostat in oral treatments
Features: High solubility, bioavailability, biocompatibility; neutral taste
Regulatory: USP, FCC, FDA 21CFR §182.8988; US GRAS, California Proposition 65 compliant
Properties: Wh. to off-wh. powd./gran.; almost tasteless; faint characteristic odor; sol. 100 g/l cold water; m.w. 455.7; bulk dens. 600-800 kg/m³; pH 6.5 (1%); decomp. temp. ≈155 C; 85.5-100% act.
Toxicology: LD₅₀ (oral, rat) > 5000 mg/kg; nonhazardous at current use levels
Environmental: Readily biodegrad.; no bioaccumulation
Precaution: Use dust mask, safety glasses; avoid strong oxidizers
Hazardous Decomp. Prods.: COₓ
Storage: Store in well-closed containers in dry place at ambient temps. (15-20 C); material should be retested after 3 yrs. storage

---

**Gluconal® MG-P** [PURAC Am.

Chem. Descrip.: Magnesium gluconate
FCC/USP
CAS 3632-91-5; EINECS/ELINCS 222-848-2
Uses: Mineral source for human and veterinary pharmaceuticals, dietary supplements
Features: High solubility, bioavailability, biocompatibility; neutral taste
Regulatory: USP, US GRAS, E 580 compliant
Properties: Wh. to off-wh. powd./gran.; sol. 160 g/l cold water; m.w. 414.6; bulk dens. 500-750 kg/m³; pH 7.3 ((50 g/l H₂O, solution)); 86-99% act.
Toxicology: LD₅₀ (oral, rat) > 5000 mg/kg; nonhazardous at current use levels
Environmental: Readily biodegrad.; no bioaccumulation
Precaution: Use dust mask, safety glasses; avoid strong oxidizers
Hazardous Decomp. Prods.: COₓ
Storage: Store in well-closed containers in dry place at ambient temps. (15-20 C); material should be retested after 3 yrs. storage

---

**Gluconal® ZN-G** [PURAC Am.

Chem. Descrip.: Zinc gluconate
FCC/USP
CAS 4468-02-4; EINECS/ELINCS 224-736-9
Uses: Mineral source for human and veterinary pharmaceuticals, dietary supplements; act. ingred. in lozenges and other hygienic preps.; mineral source, bacteriostat in oral treatments
Features: High solubility, bioavailability, biocompatibility; neutral taste
Regulatory: USP, FCC, FDA 21CFR §182.8988; US GRAS, California Proposition 65 compliant
Properties: Wh. to off-wh. powd./gran.; almost tasteless; faint characteristic odor; sol. 100 g/l cold water; m.w. 455.7; bulk dens. 600-800 kg/m³; pH 6.5 (1%); decomp. temp. ≈155 C; 85.5-100% act.
Toxicology: LD₅₀ (oral, rat) > 5000 mg/kg; nonhazardous at current use levels
Environmental: Readily biodegrad.; no bioaccumulation
Precaution: Use dust mask, safety glasses; avoid strong oxidizers
Hazardous Decomp. Prods.: COₓ
Storage: Store in well-closed containers in dry place at ambient temps. (15-20 C); material should be retested after 3 yrs. storage
Trade Name Reference

place at ambient temps. (15-20 C); material should be retested after 3 yrs. storage

Glucona® ZN-P [PURAC Am.  
http://www.purac.com]  
Chem. Descrip.: Zinc gluconate anhydrous  
Chem. Analysis: 11.6% max. moisture  
CAS 4468-02-4; EINECS/ELINCS 224-736-9  
Uses: Mineral source for human and veterinary pharmaceuticals, dietary supplements; act. ingred. in lozenges and other hygienic preps.; mineral source, bacteriostat in oral treatments  
Features: High solubility, bioavailability, biocompatibility; neutral taste  
Regulatory: USP, FCC, FDA 21CFR §182.8988; US GRAS, California Proposition 65 compliant  
Properties: Wh. to off-wh. powd.; almost tasteless; faint characteristic odor; sol. in water (10 g/100 ml); m.w. 455.7; bulk dens. 600-800 kg/m³; pH 6.5 (1%); decomp. temp. ≈155 C; 97.0-102.0% assay  
Toxicology: LD50 (oral, rat) > 5000 mg/kg; nonhazardous at current use levels  
Environmental: Readily biodegrad.; no bioaccumulation  
Precaution: Use dust mask, safety glasses; avoid strong oxidizers  
Hazardous Decomp. Prods.: COx  
Storage: Store in well-closed containers in dry place at ambient temps. (15-20 C); material should be retested after 3 yrs. storage

Glycerox 767 [Croda Inc  
http://www.croda.com;  
http://www.crodausa.com; Croda Chem. Europe Ltd http://www.croda.co.uk]  
Chem. Descrip.: PEG-6 caprylic/capric glycerides, naturally derived  
Uses: Solubilizer for pharmaceutical hydroalcoholic systems; emollient, humectant in topical pharmaceuticals  
Features: Mild; minimal effect on foaming; can lower visc. of some systems  
Properties: Pale yel. cl. liq.; low char. odor; sol. in water, alcohol, oleyl alcohol, propylene glycol; partly sol. in IPM; insol. in min. oil; HLB 13.2; acid no. 1 max.; iodine no. 1 max.; sapon. no. 90-100; nonionic; 0.5% max. moisture  
Use Level: 2-10%

Glycerox HE [Croda Inc  
http://www.croda.com;  
http://www.crodausa.com; Croda Chem. Europe Ltd http://www.croda.co.uk]  
Chem. Descrip.: PEG-7 glyceryl cocoate  
Uses: Emulsifier, solubilizer in topical pharmaceuticals; o/w emulsifier, solubilizer, emollient for antiperspirants  
Features: Mildness additive  
Regulatory: EP  
Properties: Colorless to pale yel. cl. liq.; sol. in water, min. oil, IPA; insol. in propylene glycol; HLB 10.6; nonionic  
Glycerox L15 [Croda Chem. Europe Ltd http://www.croda.co.uk]  
Chem. Descrip.: PEG-15 glyceryl laurate  
Uses: O/w emulsifier, solubilizer, emollient for pharmaceutical topicals  
Features: Good alcohol/aqueous alcohol solubility  
Properties: Colorless to pale yel. cl. liq.; water-sol.; HLB 14.0; nonionic; 100% conc.  
Glycolys® [Roquette  
http://www.roquette.fr]  
Chem. Descrip.: Sodium carboxymethyl starch  
Uses: Superdisintegrant for tablets and medicinal soaps; protects against surfactant irritancy

Handbook of Pharmaceutical Additives, Third Edition 312
Trade Name Reference

capsules
Features: Can be used either in wet granulation or direct compression processes
Regulatory: USP/NF, EP, JPE
Properties: In water, swells to 280-320 times its original granule volume; sparingly sol. in ethanol; completely insol. in water
Use Level: 2-4% recommended use level
Storage: 3 yr shelf life; store in well-closed container to protect it from moisture uptake

Glycolys® LV Low viscosity [Roquette http://www.roquette.fr]
Chem. Descrip.: Sodium carboxymethyl starch See Sodium starch glycolate
CAS 9063-38-1
Uses: Superdisintegrant for tablets and capsules
Features: Optimized to withstand high-shear wet granulation processes
Regulatory: USP/NF, EP, JPE
Properties: In water, swells to 280-320 times its original granule volume; sparingly sol. in ethanol; completely insol. in water
Use Level: 2-4% recommended use level
Storage: 3 yr shelf life; store in well-closed container to protect it from moisture uptake

Glycolys® Low pH Acid stable [Roquette http://www.roquette.fr]
Chem. Descrip.: Sodium carboxymethyl starch See Sodium starch glycolate
CAS 9063-38-1
Uses: Superdisintegrant for tablets and capsules
Features: Can be used either in wet granulation or direct compression processes; designed to resist acidic pH and maintain stability in formulations containing strongly acidic drugs
Regulatory: USP/NF, EP, JPE
Properties: In water, swells to 280-320 times its original granule volume; sparingly sol. in ethanol; completely insol. in water
Use Level: 2-4% recommended use level
Storage: 3 yr shelf life; store in well-closed container to protect it from moisture uptake

Glycomul® L K [Lonza http://www.lonza.com]
Chem. Descrip.: Sorbitan laurate
CAS 1338-39-2; EINECS/ELINCS 215-663-3
Uses: Emulsifier for pharmaceuticals
Regulatory: Kosher
Properties: Amber cl. liq.; sol. in methanol, ethanol, naphtha; disp. in water; sp.gr. 1.0; visc. 3100 cps (30 C); HLB 9; acid no. 7 max.; sapon. no. 158-170; hyd. no. 330-358; flash pt. 204 C; pH 6.5 (5%); nonionic; 99% min. conc.

Glycomul® S [Lonza http://www.lonza.com]
Chem. Descrip.: Sorbitan stearate (also avail. in veg. and kosher grade)
CAS 1338-41-6; EINECS/ELINCS 215-664-9
Uses: Emulsifier for pharmaceuticals
Properties: Lt. tan solid or beads; sol. in veg. oil; HLB 5.0; acid no. 5-10; sapon. no. 147-157; hyd. no. 235-260; nonionic; 100% conc.

Glycomul® TS [Lonza http://www.lonza.com]
Chem. Descrip.: Sorbitan tristearate
CAS 26658-19-5; EINECS/ELINCS 247-891-4
Uses: Emulsifier for pharmaceuticals
Properties: Lt. tan beads; poorly sol. in ethyl acetate, toluol, disp. in acetone, naphtha, min. and veg. oils; HLB 2.1; sapon. no. 175-190; nonionic; 100% conc.

Glycon® G-100 [Lonza http://www.lonza.com]
Chem. Descrip.: Glycerin
CAS 56-81-5; EINECS/ELINCS 200-289-5
Uses: Humectant, bodying agent, moisture control agent for toothpaste
Properties: Cl., colorless liq.; odorless; APHA 12 max. color; sol. in water; sp.gr. 1.2607; vapor pressure < 0.1 mm Hg; vapor dens. 3.17; b.p. 290 C; flash pt. (COC) 177 C; autoignition temp. 370 C; 99.5% act.

Glycon® G-300 [Lonza http://www.lonza.com]
Chem. Descrip.: Glycerin (96%)
CAS 56-81-5; EINECS/ELINCS 200-289-5
Uses: Humectant, bodying agent, moisture control agent for toothpaste
Properties: Cl., colorless liq.; odorless; APHA 12 max. color; sol. in water; sp.gr. 1.2607; vapor pressure < 0.1 mm Hg; vapor dens. 3.17; b.p. 290 C; flash pt. (COC) 177 C; autoignition temp. 370 C; 99.5% act.
Toxicology:
- LD50 (oral, rat) 12,600 mg/kg, (oral, mouse) 4090 mg/kg, (oral, guinea pig) 7750 mg/kg, (oral, rabbit) 27 g/kg, (dermal, rabbit) > 10 g/kg; mild skin, eye irritant

Environmental:
- ERC50 (mycrostic sp.) 2900 mg/l, (entosiphon sp.) 3200 mg/l

Precaution:
- Spills may be slippery; wear adequate protective clothing; incompat. with strong oxidizers

Hazardous Decomp. Prods.:
- CO2

Storage:
- Keep container until use; protect from heat, direct sunlight

Chem. Descrip.:
- Polysorbate 20
- Polysorbate 80 NF FCC
- Glycyrrhetinic Acid Phytosome®
- Granular Gum Arabic Type A-1 NF Premium

Uses:
- Emulsifier for pharmaceuticals; flavor solubilizer and dispersant
- Solubilizer, dispersant for vitamin-min. preps.
- Protective colloid, stabilizer, suspending agent, visc. builder for pharmaceuticals (suspensions, emulsions, demulcent in cough drops/syrups, tablet binder/adhesive)

Properties:
- Yel. cl. liq.; sol. in water, alcohol, acetone; sp.gr. 1.1; visc. 400 cps; HLB 16.7; acid no. 2 max.; sapon. no. 40-50; hyd. no. 96-108; pH 7 (5%); nonionic; 3% max. moisture
- Amber cl. liq., mild odor; HLB 15.0; acid no. 2 max.; sapon. no. 45-55; hyd. no. 65-80; nonionic; 3% max. moisture
- Wh. gran., almost odorless and tasteless; sol. in hot or cold water
- Wh. to sl. yel. granules or powd.; visc. 27-33 mPa-s; flash pt. > 70 C; ignition pt. 440 C (layered), 550 C (floated); dust explosion lower limit 39 g/m3; sapon. degree 86.5-89.0%; ref. index 1.55; ash content 0.7%
- Lt. yel. amorphous powd.; water-disp.
- Wh., sl. yel. granules; visc. 4.8-5.8 mPa-s; flash pt. > 70 C; ignition pt. 440 C (layered), 550 C (floated); dust explosion lower limit 39 g/m3; sapon. degree 86.5-89.0%; ref. index 1.55; ash content 0.7%
- Lt. amorphous powd.; water-disp.
- Wh. gran., almost odorless and tasteless; sol. in hot or cold water
Granular Gum Arabic Type A-2 NF Premium

[Granular Gum Arabic Type A-2 NF Premium]
Chem. Descrip.: Gum Arabic See Acacia
CAS 9000-01-5; EINECS/ELINCS 232-519-5
Uses: Protective colloid, stabilizer, suspending agent, viscosifier for pharmaceuticals (suspensions, emulsions, demulcent in cough drops/syrups, tablet binder/adhesive); flavoring agent
Properties: Wh. gran., almost odorless and tasteless; sol. in hot or cold water

Granular Gum Ghatti #1

[Granular Gum Ghatti #1]
Chem. Descrip.: Gum ghatti
CAS 9000-28-6
Uses: Stabilizer, binder, emulsifier forming o/w emulsions; tablet binder and thick mucilage coatings in pharmaceuticals
Properties: Water-sol.

Great Lakes Gelatin/Medical 235 USP

[Great Lakes Gelatin]
Chem. Descrip.: Type A gelatin USP
CAS 9000-70-8; EINECS/ELINCS 232-554-6
Uses: Emulsifier, vehicle, binder, suspending agent designed for use in wound care and ostomy products.
Properties: Fine powder
Storage: 3 yrs. shelf life when stored in tightly closed containers in cool, dry place

Great Lakes 0-Bloom Gelatin™

[Great Lakes Gelatin]
Chem. Descrip.: Hydrolyzed gelatin USP/NF
CAS 68410-45-7; EINECS/ELINCS 270-082-2
Uses: Excipient for pharmaceuticals
Features: Will not gel
Properties: pH 5.3-6.2; 90-96% protein content; 5-7% loss on drying
Storage: 3 yrs. shelf life when stored in tightly closed containers in cool, dry place

Gum Arabic CSP Spray Dried

[Gum Arabic CSP Spray Dried]
Chem. Descrip.: Gum arabic NF from Acacia senegal See Acacia
CAS 9000-01-5; EINECS/ELINCS 232-519-5
Uses: Binder used in pharmaceutical tableting industry
Properties: Creamy wh. powd., 98% through 120 mesh; sol. 1 g/2 ml of water yielding lt. amber sol'n.; pH 4.0-4.5

Gum Arabic G-150 Powdered

[Gum Arabic G-150 Powdered]
Chem. Descrip.: Gum Arabic See Acacia
CAS 9000-01-5; EINECS/ELINCS 232-519-5
Uses: Protective colloid, stabilizer, thickener, binder; pharmaceutical emulsions, antiseptics, to mask bitter or acid taste of medicaments, tablet binder, excipient
Properties: Colorless, odorless, tasteless; water-sol.

Gum Arabic NF/FCC Clean Amber Sorts

[Gum Arabic NF/FCC Clean Amber Sorts]
Chem. Descrip.: Gum Arabic See Acacia
CAS 9000-01-5; EINECS/ELINCS 232-519-5
Uses: Protective colloid, stabilizer, thickener; pharmaceutical emulsions, antiseptics, to mask bitter or acid taste of medicaments, tablet binder, excipient; flavoring agent
Properties: Colorless, odorless, tasteless; water-sol.

Gum Guar Type M Powdered

[Gum Guar Type M Powdered]
Chem. Descrip.: Guar gum See Guar (Cyanopsis tetragonoloba) gum
CAS 9000-30-0; EINECS/ELINCS 232-536-8
Uses: Pharmaceutical tablet binder
Properties: Water-sol.

Gum Guar Type MM Powdered (HV)

[Gum Guar Type MM Powdered (HV)]
Chem. Descrip.: Guar gum See Guar (Cyanopsis tetragonoloba) gum
CAS 9000-30-0; EINECS/ELINCS 232-536-8
Uses: Pharmaceutical tablet binder
Properties: Water-sol.

Gum Guar Type MM Powdered

[Gum Guar Type MM Powdered]
Chem. Descrip.: Guar gum See Guar (Cyanopsis tetragonoloba) gum
CAS 9000-30-0; EINECS/ELINCS 232-536-8
Uses: Pharmaceutical tablet binder
Properties: Water-sol.

Gumixan K

[Gumixan K]
Chem. Descrip.: Xanthan gum
CAS 11138-66-2; EINECS/ELINCS 234-394-2
Uses: Hydrophilic colloid, thickener, suspending agent, emulsion stabilizer for pharmaceuticals (syrups, emulsions, to suspend actives)
Regulatory: FDA 21CFR §172.695; FCC; E-415;
k kosher

**Properties:** Cream to wh. powd., std. particle size; readily sol. in hot or cold water, common acidulants; sol. hot in glycerol, ethylene glycol

**Use Level:** 0.1-0.5% (syrups, emulsions), 0.2-1% (suspending of actives); 1% (cosmetics)

**Gumixan KF** [Gumix Int’l.]
**Chem. Descrip.:** Xanthan gum
**CAS** 11138-66-2; EINECS/ELINCS 234-394-2
**Uses:** Hydrophilic colloid, thickener, suspending agent, emulsion stabilizer for pharmaceuticals (syrups, emulsions, to suspend actives)
**Regulatory:** FDA 21CFR §172.695; FCC; E-415; kosher

**Properties:** Cream to wh. fine powd.; readily sol. in hot or cold water, common acidulants; sol. hot in glycerol, ethylene glycol

**Use Level:** 0.1-0.5% (syrups, emulsions), 0.2-1% (suspending of actives); 1% (cosmetics)

**Gum Tragacanth Ribbons and Flakes** [Gumix Int’l.]
**Chem. Descrip.:** Tragacanth gum See Tragacanth (Astragalus gummifer) gum
**CAS** 9000-65-1; EINECS/ELINCS 232-552-5
**Uses:** Emulsifier, suspending agent, thickener, stabilizer, binder in pharmaceuticals (emulsions, jellies, creams, toothpaste)
**Properties:** Ylsh. wh. to tan powd.; odorless, insipid taste; swells rapidly in hot or cold water; insol. in alcohol, other org. solvs.

**HCO-20** [Nikko Chems. Co. Ltd http://www.nikkol.co.jp/index.html]
**Chem. Descrip.:** PEG-20 hydrogenated castor oil
**CAS** 61788-85-0
**Uses:** Hydrotrope, emulsifier in pharmaceuticals
**Features:** Hydrophilic
**Regulatory:** JSCI listed
**Properties:** Pale yel. liq.; HLB 6.5; nonionic; 100% conc.
**Toxicology:** TSCA listed

**HCO-30** [Nikko Chems. Co. Ltd http://www.nikkol.co.jp/index.html]
**Chem. Descrip.:** PEG-30 hydrogenated castor oil
**CAS** 61788-85-0
**Uses:** Hydrotrope, emulsifier in pharmaceuticals
**Features:** Hydrophilic
**Regulatory:** JSCI listed
**Properties:** Pale yel. liq.; HLB 10.5; nonionic; 100% conc.
**Toxicology:** TSCA listed

**Chem. Descrip.:** PEG-40 hydrogenated castor oil
**CAS** 61788-85-0
**Uses:** Hydrotrope, solubilizer, emulsifier in pharmaceuticals
**Features:** Rec. for systems with high alcohol content
**Regulatory:** JSCI listed
**Properties:** Pale yel. liq.; HLB 12.5; nonionic; 100% conc.
**Toxicology:** TSCA listed

**Chem. Descrip.:** PEG-40 hydrogenated castor oil
**CAS** 61788-85-0
**Uses:** Emulsifier for pharmaceuticals
**Features:** Improved sol. in aq. systems
**Regulatory:** JSCI listed
**Properties:** Pale yel. liq.; high water sol.; HLB 12.5; nonionic
**Toxicology:** TSCA listed

**HCO-50** [Nikko Chems. Co. Ltd
Chem. Descrip.: PEG-50 hydrogenated castor oil
CAS 61788-85-0
Uses: Hydrotrope, solubilizer, emulsifier in pharmaceuticals; solubilizer for injections
Features: Rec. for systems with low alcohol content
Regulatory: JSCI listed
Properties: Wh. paste; HLB 13.5; nonionic; 100% conc.
Toxicology: TSCA listed

Chem. Descrip.: PEG-50 hydrogenated castor oil
CAS 61788-85-0
Uses: Emulsifier for pharmaceuticals; solubilizer for injections
Features: Improved sol. in aq. systems
Regulatory: JSCI listed
Properties: Wh. paste; high water sol.; HLB 13.5; nonionic
Toxicology: TSCA listed

Chem. Descrip.: PEG-60 hydrogenated castor oil
CAS 61788-85-0
Uses: Hydrotrope, solubilizer, emulsifier in pharmaceuticals; solubilizer for injections
Features: Rec. for systems with low alcohol content
Regulatory: JSCI listed
Properties: Wh. paste; HLB 14.0; nonionic; 100% conc.
Toxicology: TSCA listed

Chem. Descrip.: PEG-60 hydrogenated castor oil
CAS 61788-85-0
Uses: Emulsifier for pharmaceuticals; solubilizer for injections
Features: Improved sol. in aq. systems
Regulatory: JSCI listed
Properties: Wh. paste; high water sol.; HLB 14.0; nonionic
Toxicology: TSCA listed

Chem. Descrip.: PEG-80 hydrogenated castor oil
CAS 61788-85-0
Uses: Hydrotrope, solubilizer, thickener for aq. systems; emulsifier in pharmaceuticals
Regulatory: JSCI listed
Properties: Pale yel. liq.; HLB 15.0; nonionic; 100% conc.
Toxicology: TSCA listed

Chem. Descrip.: Alumina trihydrate See Aluminum hydroxide
Chem. Analysis: Al₂O₃ (64.8%); total Na₂O (0.29%); sol. Na₂O (0.03%); SiO₂ (0.01%); Fe₂O₃ (0.01%)
CAS 21645-51-2; EINECS/ELINCS 244-492-7
Uses: Polishing agent for dentifrices; approved for internal use
Properties: Wh. free-flowing powd.; 5.0 µ median particle size; 99% < 11 µ; sp.gr. 2.42; bulk dens. (loose) 0.6 g/cm³; surf. area 5 m²/g; oil absorp. 27; TAPPI brightness 90+; ref. index 1.57; hardness (Mohs) 3; 0.4% free moisture

Chem. Descrip.: Alumina trihydrate See Aluminum hydroxide
Chem. Analysis: Al₂O₃ (64.8%); total Na₂O (0.29%); sol. Na₂O (0.04%); SiO₂ (0.01%); Fe₂O₃ (0.01%)
CAS 21645-51-2; EINECS/ELINCS 244-492-7
Uses: Polishing agent for dentifrices; approved for internal use
Properties: Wh. free-flowing powd.; 3.6 µ median particle size; 99% < 11 µ; sp.gr. 2.42; bulk dens. (loose) 0.56 g/cm³; surf. area 6 m²/g; oil absorp. 27; TAPPI brightness 90+; ref. index 1.57; hardness (Mohs) 3; 0.4% free moisture
Trade Name Reference

Aluminum hydroxide
Chem. Analysis: $\text{Al}_2\text{O}_3$ (65%); total $\text{Na}_2\text{O}$ (0.39%); sol. $\text{Na}_2\text{O}$ (0.10%); $\text{SiO}_2$ (0.02%); $\text{Fe}_2\text{O}_3$ (0.02%)
CAS 21645-51-2; EINECS/ELINCS 244-492-7
Uses: Polishing agent for dentifrices; approved for internal use
Properties: Wh. free-flowing powd.; 1.2 µ median particle size; 99% < 6 µ; sp.gr. 2.42; bulk dens. (loose) 0.2 g/cm$^3$; surf. area 4-8 m$^2$/g; oil absorp. 30; TAPPI brightness 92+; ref. index 1.57; hardness (Mohs) 3; 0.3% free moisture
HMIS: Health 1, Flammability 1, Reactivity 0
Storage: Store in tightly closed containers in dry, well-ventilated area away from oxidizing materials

Dipropylene Glycol Monoisostearate
Chem. Descip.: Butyloctyl salicylate
CAS 190085-41-7; EINECS/ELINCS 431-090-3
Uses: Emollient, moisturizer, solvent, carrier for lip balms
Regulatory: DOT nonhazardous; SARA §311/312/313 nonreportable; Calif. Prop. 65 nonreportable; Canada DSL, Australia AICS, EINECS listed
Properties: Dk. brn. liq.; herbal odor; sol. in water and water-alcohol mixts. (< 50% v/v alcohol); dens. 1.003-1.009 g/ml (20 C); pH 5.5-6.5; ref. index 1.360-1.362
Use Level: 3-5%

HallBrite® OS [C.P. Hall http://www.cphall.com]
Chem. Descip.: Ethylhexyl salicylate
CAS 118-60-5; EINECS/ELINCS 204-263-4
Uses: Emollient, moisturizer, solvent, carrier for lip balms
Regulatory: DOT nonhazardous; SARA §311/312/313 nonreportable; Calif. Prop. 65 nonreportable; Canada DSL, Australia AICS, EINECS listed
Properties: C. liq.; mild odor; insol. in water; sp.gr. 1.014; b.p. 400 F; flash pt. (COC) 310 F
Toxicology: LD50 (oral) > 5 g/kg; may be harmful if swallowed; may irritate mouth, throat, stomach; inh. may cause dizziness; minimal eye, sl. skin irritant; nonsensitizing; TSCA listed
Environmental: No ozone depleting compds.; keep spills out of sewers and watercourses
Precaution: Incompat. with strong oxidizing agents
HMIS: Health 1, Flammability 0, Reactivity 0
Storage: Store in tightly closed containers in dry, well-ventilated area, away from oxidizing materials

HallStar™-IPM [C.P. Hall http://www.cphall.com]
Chem. Descip.: Isopropyl myristate
CAS 110-27-0; EINECS/ELINCS 203-751-4
Uses: Emollient, spreading agent, penetrant for ointments
Regulatory: NJ Right-to-Know
Properties: Colorless cl. liq.; pract. odorless; sol. in ethanol, IPA, cyclomethicone, most org. solvs. and oils; insol. in water, glycine, propylene glycol; sp.gr. 0.850; vapor pressure < 0.001 mm Hg; b.p. 190-199 C; flash pt. 330 F; HLB 11-12; acid no. 1.0; sapon. no. 210; ref. index 1.4320
Toxicology: LD50 (oral, rat) > 50 ml/kg, (oral, mouse) > 100 ml/kg, (skin, rabbit) > 79 ml/kg; TSCA listed

Properties: Wh. fine powd.; 90% min. through 200 mesh; visc. 2000 cps (5% disp.); pH 9.5-10.5 (2% disp.)

Chem. Descrip.: Hectorite USP/NF
CAS 12173-47-6; EINECS/ELINCS 235-340-0
Uses: Visc. builder, suspending agent and binder for pharmaceuticals
Features: Higher visc. than Hectalite® 200

Properties: Powd.

Hectorite BC 840 [MPSI http://www.mp-solutionsinc.com]
Chem. Descrip.: Hectorite
CAS 12173-47-6; EINECS/ELINCS 235-340-0
Uses: Binder, suspending agent, thickener in acne lotions, medicinal skin creams, ointments, skin creams, salves, tablet binding, powder preparations
Regulatory: NF
Properties: 95% through 325 mesh; 99.5% through 200 mesh; visc. 3000 @ 4% solids; dry brightness 70.0; 5.0-8.0% max. moisture

Hedipin-SHO/500 [Dr. W. Kolb AG http://www.kolb.ch]
Chem. Descrip.: PEG-50 sorbitan hexaoleate
CAS 57171-56-9
Uses: Surfactant for pharmaceuticals
Properties: Liq.; HLB 10; nonionic

HEP® [ISP http://www.ispcorp.com]
Chem. Descrip.: N-Hydroxyethyl pyrrolidone
See N-Hydroxyethylpyrrolidone
CAS 3445-11-2; EINECS/ELINCS 222-359-4
Uses: Reaction solvent for prep. of retinoid esters for skin treatment
Features: Offers reactive hydroxyl group
Properties: Cl. liq.; water-sol.; m.w. 129; sp.gr. 1.139; visc. 53 cps; f.p. 20 C; b.p. 295 C; flash pt. (CC) 320 F; ref. index 1.4951; surf. tens. 49 dynes/cm; 98% min. purity
Toxicology: LD50 (oral, rat) > 14.43 g/kg; low acute toxicity; minimally irritating to eyes; nonirritating to skin
Environmental: Biodeg.

HEPPS [Raschig AG http://www.raschig.de]
Chem. Descrip.: 3-[4-(Hydroxyethyl)-1-piperaziny1]-propanesulfonic acid
CAS 16052-06-5; EINECS/ELINCS 240-198-8
Uses: Biological buffer for cell cultures, biological productions, electrophoresis, diagnostics, tissue studies, blotting techniques, chromatography

Herbasol Complex GU-61 [Cosmetochem http://www.cosmetochem.ch/index]
Chem. Descrip.: A glycolic extract from alpine lichen and liquorice root
Uses: Botanical extract with bactericial, fungicial, antiphlogistic, and anti-inflammatory props. used in skin care and anti-acne preps.

Hest CO [Global-Seven http://www.global-seven.com]
Chem. Descrip.: Cetyl octanoate
CAS 59130-69-7; EINECS/ELINCS 261-619-1
Uses: Emollient, skin softener, moisture retention aid, emulsifier, thickener, stabilizer, opacifier, pearlescent in creams/lotions, topical pharmaceuticals
Properties: Gardner 2 max. cl. liq.; sp.gr. 0.852-0.856; acid no. 1.0 max.; sapon. no. 130-155; 0.5% max. moisture

Hetol SA [Global-Seven http://www.global-seven.com]
Chem. Descrip.: Stearyl alcohol
CAS 112-92-5; EINECS/ELINCS 204-017-6
Uses: For antiperspirant sticks
Properties: Gardner 1 max. flake; acid no. 1.0 max.; iodine no. 2.0 max.; sapon. no. 2.0 max.; hyd. no. 200-215; 1% max. moisture

Hetoxol P [Global-Seven http://www.global-seven.com]
Chem. Descrip.: Emulsifying wax NF
CAS 97069-99-0
Uses: Emulsifier, opacifier, visc. builder, emulsion base for pharmaceuticals
Properties: Flake; acid no. 2. max.; sapon. no. 14.0 max.; hyd. no. 178-192; nonionic; 99% conc.

Hetsorb S-20 [Global-Seven http://www.global-seven.com]
Chem. Descrip.: Polysorbate 60
CAS 9005-67-8
Uses: Emulsifier for vitamins; solubilizer; surfactant
Properties: Gardner 6 max. liq. to gel; sol. in water, misc. in IPA; HLB 14.9; acid no. 2 max.; sapon. no. 45-55; hyd. no. 81-96; nonionic; 97% conc.

Heyplast NC 90 Z [H.A. Astlett http://www.astlettrubber.com]
Chem. Descrip.: cis-Polyisoprene with about 3% zinc stearate
Uses: For producing transparent or pure white
Handbook of Pharmaceutical Additives, Third Edition

Trade Name Reference

adhesive systems including medical plaster

**Features:**
- Easily dissolved in organic solvents;
- high heat resistance; high stability

**Properties:**
- Wh. granules; char. odor; particle size 3-5 mm; insol. in water; dens. 0.934; bulk dens. 400 kg/m³; decomposition temp. > 200 C; Mooney visc. 80±5; ash content < 0.5%; 0.5% volatiles

**Precaution:** Do not empty into drains

**Hazardous Decomp. Prods.:** CO, CO₂, carbon black

**Storage:**
- Keep dry and cool; prevent higher temp., humidity, sunlight and pressure on the cartons; do not store on public depositories

Hi-Sweet® 42 [Roquette http://www.roquette.fr]

**Chem. Descrip.:** High fructose corn syrup See Corn syrup, high fructose

**Chem. Analysis:** 42% fructose (DSB)

**CAS 977042-84-4**

**Uses:** Bulk sweetener and viscosifier in medicated syrups and suspensions

**Regulatory:** 1 CFR 184.1866 (GRAS)

**Properties:**
- Clear liq.; odorless; sweet, clean taste; 70.5% act. (DSB)

**Storage:** Store @ 26-32 C

Hi-Sweet® 55 [Roquette http://www.roquette.fr]

**Chem. Descrip.:** High fructose corn syrup See Corn syrup, high fructose

**Chem. Analysis:** 55% fructose (DSB)

**CAS 977042-84-4**

**Uses:** Bulk sweetener and viscosifier in medicated syrups and suspensions

**Features:** Exhibits less tendency to crystallize at low temperatures than Hi-Sweet® 42 due to its lower dextrose and higher fructose level

**Regulatory:** 1 CFR 184.1866 (GRAS)

**Properties:**
- Clear liq.; odorless; sweet, clean taste; 76.5% act. (DSB)

**Storage:** Store @ 26-32 C

Hi-Cap™ 100 [Nat'l. Starch & Chem./Food Innovation http://www.foodinnovation.com]

**Chem. Descrip.:** Food starch modified derived from waxy maize See Food starch, modified

**Uses:** Film-former, encapsulating agent for flavors, clouds, vitamins in pharmaceuticals

**Features:** Rec. at high oil loading; exc. resist. to oxidation; total replacement for gum Arabic and gelatin; forms very stable o/w emulsions at higher solids; reduced losses during spray-drying

**Regulatory:** FDA 21CFR §172.892; DOT nonregulated; SARA §313 nonreportable

**Properties:**
- Wh. fine powd.; starch odor; sol. in water; m.w. > 10,000; sp.gr. 1.5; pH ≈ 4 (1%); ≈ 6% moisture

**Toxicology:** Possible physical irritant from dust particles; particulates may scratch eye surfs. and cause mech. irritation; possible nuisance dust by inh.; maintain below TWA 10 mg/m³; low oral toxicity; low toxicity by skin contact; TSCA listed

**Precaution:** Potential for dust explosion; minimize dust generation

**Hazardous Decomp. Prods.:** Does not undergo spontaneous decom.; typ. combustion prods.: CO, CO₂, N, water

**Storage:**
- Store @ ambient temps.; sensitive to static electricity

**Chem. Descrip.:** Syn. silica, amorphous

**CAS 112926-00-8; EINECS/ELINCS 231-545-4**

**Uses:** Thickener used to increase visc. and provide thixotropic action for liqs.; used in pharmaceuticals, toothpaste

**Properties:**
- Wh. powd., 0.021 µ particle size; 0.002% 325-mesh wet sieve residue; sp.gr. 2.1; dens. 17.5 lb/gal; dens. 2-4 lb/ft³; ref. index 1.455; pH 6.5-7.3 (5%); 97.5% SiO₂

**Chem. Descrip.:** Glycerin and glyceryl polyacrylate

**Uses:** Vehicle for topical dermatological prods.

**Features:**
- Exc. moisture retention; forms permeable film on skin that is easily washed away; provides max. slip and lubricity

**Properties:**
- Colorless transparent visc. gel, odorless; sol. in water; sp.gr. 1.15; visc. < 200,000 cps; b.p. > 250 F; pH 5-6; 43% water

**Chem. Descrip.:** Glycerin and glyceryl polyacrylate

**Uses:** Vehicle for topical dermatological prods.

**Features:**
- Exc. moisture retention; forms permeable film on skin that is easily washed
Trade Name Reference

away; provides max. slip and lubricity; for use where higher visc. is desired

Properties: Colorless transparent visc. gel, odorless; sol. in water; sp.gr. 1.15; visc. > 250,000 cps; pH 5-6; 48% water

Chem. Descrip.: n-Butyl stearate See Butyl stearate

CAS 123-95-5; EINECS/ELINCS 204-666-5
Uses: Lubricant in pharmaceutical ointments

Properties: APHA 60 max.; wh. pasty solid; colorless oily liq. on heating; insol. in water; sp. gr. 0.850; m.p. 20-24 C; acid no. (mgKOH/g) 0.5 max.; sapon no. (mgKOH/g) 165-175; flash pt. (COC) 180 C min.

Toxicology: LD50 (oral, rat) 32 g/kg; irritating to eyes, skin, mucous membranes, upper respiratory tract; may be harmful by inh., ing., or skin absorp.; avoid prolonged/repeated exposure

Hazardous Decomp. Prods.: Toxic fumes of CO, CO2; emits toxic fumes under fire conditions

Storage: Store in cool, dry place; keep tightly closed

HLA-198 [Am. Casein http://www.americancasein.com]

Uses: Binder, emulsifier, film-former for cosmetics, medical, pharmaceutical, nutritional, biological applics.

Regulatory: Kosher

Properties: Cream-colored fine spray-dried powd.; bland flavor; sol. in water; 6% moisture

Storage: Store in cool, dry place below 25 C

Dytek® HMI [Invista http://www.invista.com]

Chem. Descrip.: Hexamethyleneimine

CAS 111-49-9; EINECS/ELINCS 203-875-9
UN 2493

Uses: Intermediate for pharmaceuticals

Properties: Colorless cl. liq.; ammonia-like odor; m.w. 99.2; sp.gr. 0.88; vapor pressure 9 mm Hg; m.p. -37 C; b.p. 138 C; amine no. 560; flash pt. (CC) 22 C; ref. index 1.463 (20 C); 99.5% act.

Precaution: DOT: Flamm. liq., corrosive

Chem. Descrip.: Polydimethylsiloxane emulsion See Dimethylsiloxane

CAS 63148-62-9
Uses: Antifoam for pharmaceuticals

Features: Avail. as kosher grade, Hodag FD-62 K

Regulatory: Kosher, FDA 21CFR §173.340(a)(2); SARA §311/312 possible chronic health effects, §313 nonreportable

Properties: Wh. creamy emulsion; mild odor; disp. in water with mild agitation; sp.gr. 0.98-1.02; dens. 8.3 lb/gal; visc. 2100 cSt; vapor pressure 20 mm Hg (20 C); b.p. > 100 C; pour pt. 10 C; flash pt. (COC) 221 C; 10% act.; 80-90% volatiles by vol.

Use Level: 20-50 ppm

Toxicology: Vapors/finely misted material may irritate mucous membranes and cause irritation, dizziness, nausea; may cause eye irritation: thermal burns possible on skin contact; TSCA listed

Precaution: Incompat. with strong oxidizing agents; keep away from excessive heat, ignition sources

Hazardous Decomp. Prods.: Combustion: CO, CO2, thick smoke

NFPA: Health 0, Flammability 0, Reactivity 0

Storage: 6 mos. shelf life when stored in closed original containers @ 20-32 C; protect from freezing; store and use in well-ventilated areas; store out of sun

Chem. Descrip.: Polydimethylsiloxane emulsion See Dimethylsiloxane

CAS 63148-62-9
Uses: Antifoam for pharmaceuticals

Features: Avail. as kosher grade, Hodag FD-62 K

Regulatory: FDA approved, 30 ppm max. in final prod.

Properties: Wh. creamy emulsion; mild odor; disp. in water with mild agitation; sp.gr. 0.99-1.02; dens. 8.3 lb/gal; visc. 2100 cSt; vapor pressure 15 mm Hg (20 C); i.b.p. 100 C; pour pt. 10 C; flash pt. (COC) > 20 F; 30% act.; 50-70% volatiles (water)

Toxicology: Vapors/finely misted material may irritate mucous membranes and cause irritation, dizziness, nausea; may cause eye irritation; ing. may irritate digestive tract; prolonged/repeated skin contact may irritate hair follicles and block sebaceous glands; TSCA listed

Precaution: Incompat. with strong oxidizing agents
Trade Name Reference

agents; keep away from excessive heat, ignition sources; spillages may be slippery Hazardous Decomp. Prods.: Combustion: CO, CO2, thick smoke

NFPA: Health 1, Flammability 1, Reactivity 0
Storage: 6 mos. shelf life when stored in closed original containers @ 20-32 C; protect from freezing; store and use in well-ventilated areas; store out of sun

Chem. Descrip.: Polyglyceryl-2 sesquioleate
Uses: W/o emulsifier for pharmaceuticals
Properties: Yel. liq.; weakly fatty odor; sol. in most org. solv., paraffin and neutral oil, warm fatty alcohols, fatty acid esters and their mixtures; dens. 0.97 g/cm3; visc. 400-800 cps; HLB 4.0; flash pt. 250 C; sapon. no. 165±15; anionic; 100% act.

Chem. Descrip.: Ceteareth-3
CAS 68439-49-6
Uses: Emulsifier, superfatting agent, base for ointments
Properties: Wh. soft, wax-like substance; sol. in all hydrocarbons, fatty alcohols; sp.gr. 0.905 (50 C); visc. 15±3 cps (50 C); HLB 7-8; cloud pt. 54 C (in butyl diglycol); flash pt. 220 C; sapon. no. 1 max.; nonionic; 100% act.

Chem. Descrip.: Polyglyceryl-2 sesquioleate
Uses: W/o emulsifier for pharmaceuticals
Properties: Yel. liq.; weakly fatty odor; sol. in most org. solv., paraffin and neutral oil, warm fatty alcohols, fatty acid esters and their mixtures; dens. 0.97 g/cm3; visc. 400-800 cps; HLB 4.0; flash pt. 250 C; sapon. no. 165±15; anionic; 100% act.

Chem. Descrip.: Ceteareth-3
CAS 68439-49-6
Uses: Emulsifier, superfatting agent, base for ointments
Properties: Wh. soft, wax-like substance; sol. in all hydrocarbons, fatty alcohols; sp.gr. 0.905 (50 C); visc. 15±3 cps (50 C); HLB 7-8; cloud pt. 54 C (in butyl diglycol); flash pt. 220 C; sapon. no. 1 max.; nonionic; 100% act.

HTL HYP Hyaluronic Acid 85% [Lipo http://www.lipochemicals.com]
Chem. Descrip.: Hyaluronic acid
CAS 9004-61-9; EINECS/ELINCS 232-678-0
Uses: Film-former, humectant for pharmaceutical creams/lotions
Properties: Wh. to cream free-flowing powd.; mild char. odor; sol. in water; pH 6-9
Toxicology: Not considered a toxic substance
Environmental: Biodeg.
Precaution: Avoid strong oxidizing agents and alkalis; possible combustible dust hazard; container may be hazardous when emptied
Hazardous Decomp. Prods.: None known
Storage: Keep containers closed until use; do not store in heat or direct sunlight

HTL MYP Hyaluronic Acid 93% [Lipo http://www.lipochemicals.com]
Chem. Descrip.: Hyaluronic acid
CAS 9004-61-9; EINECS/ELINCS 232-678-0
Uses: Humectant for pharmaceutical creams/lotions

HuberCal 150 Elite [Huber Engineered Materials http://www.hubermaterials.com]
Chem. Descrip.: Calcium carbonate
Chem. Analysis: Lead levels < 125 ppb
CAS 1317-65-3; EINECS/ELINCS 207-439-9
Uses: Calcium source for dietary supplements and antacids
Features: High purity; low abrasivity
Properties: Wh. odorless powd.; particle size, median 20 μ; screen residue, 325 mesh 35%; sol. in water (1.3 mg/l); bulk dens., tamped 1.6 g/cc; decomp. temp. 700-900 C; pH 8.4-10.2 (5% aq. suspension); <1% moisture loss on drying; 100% act.
Toxicology: ACGIH 10 mg/m3 total dust; dust may cause mechanical irritation to eyes; dries skin and mucous membranes; inh. causes respiratory tract irritation; no evidence of mutagenic, reproductive or carcinogenic effects.; TSCA listed
Environmental: Nonbiodeg.; LC50 (fish) > 200 mg/l; not considered to be harmful to aquatic life
Precaution: Wear safety glasses with side shields and impervious gloves; avoid contact with strong acids
Hazardous Decomp. Prods.: None
NFPA: Health 1, Flammability 0, Reactivity 0
Storage: 1 yr shelf life when stored in original protective pkg. away from moisture, and extremes in temperature (> 90 F) and humidity (> 80% relative humidity)

HuberCal 250 Elite [Huber Engineered Materials http://www.hubermaterials.com]
Chem. Descrip.: Calcium carbonate
Chem. Analysis: Lead levels < 125 ppb
CAS 471-34-1; EINECS/ELINCS 207-439-9
Uses: Calcium source for dietary supplements and antacids
Features: High purity; low abrasivity
Properties: Wh. odorless powd.; particle size, median 12 μ; screen residue, 325 mesh 30%; sol. in water (1.3 mg/l); bulk dens., tamped 1.5
Trade Name Reference

Calcium source for dietary supplements and antacids

Storage: 1 yr shelf life when stored in original protective pkg. away from moisture, and extremes in temperature (> 90 F) and humidity (> 80% relative humidity)

HuberCal 850 Elite [Huber Engineered Materials http://www.hubermaterials.com]

Storage: Store in original protective pkg. away from moisture

HuberCal CCG 4300 USP [Huber Engineered Materials http://www.hubermaterials.com]
Chem. Descrip.: Calcium carbonate (Hubercal 150 Elite) with binder system of acacia
Chem. Analysis: 95.5% calcium carbonate; 4% acacia
CAS 471-34-1; 9000-01-5; EINECS/ELINCS 207-439-9; 232-519-5
Uses: Calcium source for dietary supplements and antacids
Features: High purity; low abrasivity
Regulatory: USP, SARA §311/312, 313 nonreportable
Properties: Wh. odorless granules.; US mesh 100% thru 16; sol. in water (1.3 mg/l); dens. 2.7 g/cm³; pH 8.4-10.2 (5% aq. suspension); noncombustible; <1% moisture loss on drying
Toxicology: ACGIH 10 mg/m³ total dust; dust may cause mechanical irritation to eyes; dries skin and mucous membranes; inh. causes respiratory tract irritation; no evidence of mutagenic, reproductive or carcinogenic effects; TSCA listed
Environmental: No risk to the environment
Precaution: Wear safety glasses with side shields and impervious gloves; avoid contact with strong acids
Hazardous Decomp. Prods.: None
NFPN: Health 1, Flammability 0, Reactivity 0
Storage: Store in original protective pkg. away from moisture

Huber Engineered Materials http://www.hubermaterials.com

Hyamine® 1622 50% [Lonza http://www.lonza.com]
Chem. Descrip.: Benzethonium chloride, isopropyl alcohol, water
Uses: Germicide, bactericide, disinfectant,
Trade Name Reference

preservative for veterinary prods., pharmaceutical topicals, surgical applics.

Regulatory:  EPA reg. no. 6836-93
Properties:  Lt. amber liq.; sol. in water, lower alcohols, glycols, ethoxylates, tetrachloroethane; misc. with ethylene dichloride, CCl4; sp.gr. 1.03; dens. 8.56 lb/gal; pour pt. 25 F; flash pt. (Seta) 110 F; pH 8-10 (5%); surf. tens. 30 dynes/cm (0.1%); cationic; 50% act.

Toxicology:  LD50 (oral, rat) 420 mg/kg, (dermal, rabbit) > 3 g/kg; may cause eye and skin irritation

Hyamine® 1622 Crystals  [Lonza http://www.lonza.com]
Chem. Descrip.:  Benzethonium chloride
CAS 121-54-0; EINECS/ELINCS 204-479-9
Uses:  Bactericide, deodorant, preservative for veterinary and pharmaceutical prods.
Regulatory:  EPA reg. no. 6836-91
Properties:  APHA 40 max. powd.; sol. in water, lower alcohols, glycols, ethoxylates, tetrachloroethane; misc. with ethylene dichloride, CCl4; sp.gr. 0.44 g/cc; dens. 27.5 lb/ft3; 100% act.

Hyamine® 3500 50%  [Lonza http://www.lonza.com]
Chem. Descrip.:  Benzalkonium chloride [n-alkyl = 50% C14, 40% C12, 10% C16], ethanol, water  See Alcohol
Uses:  Bactericide, disinfectant for pharmaceuticals
Regulatory:  EPA reg. no. 6836-94; FDA approved: sanitizer for food processing equip.
Properties:  Pale yel. cl. liq., mild odor; misc. with water, lower alcohols, ketones; m.w. 359.6; sp.gr. 0.96; dens. 8.0 lb/gal; visc. 42 cps; pour pt. 15 F; flash pt. (PM) 105 F; pH 7-9 (5%); surf. tens. 34 dynes/cm (0.1%); cationic; 50% act.
Toxicology:  LD50 (oral, rat) 894 mg/kg; toxic to fish
Precaution:  Do not mix with oxidizing/reducing agents

Hyamine® 3500 80% NF  [Lonza http://www.lonza.com]
Chem. Descrip.:  Benzalkonium chloride NF
CAS 68424-85-1
Uses:  Bactericide, disinfectant, sanitizer, deodorant, preservative, humectant in liq. and powd. formulations, pharmaceuticals
Regulatory:  EPA reg. no. 6836-95
Properties:  Liq.; 80% act.

Chem. Descrip.:  Hydrolyzed casein
CAS 65072-00-6; EINECS/ELINCS 265-363-1
Uses:  Microbiological nutrient in laboratory media, fermentations, and tissue culture applics.; nutrient for vaccine and toxin prod.
Features:  Minimal inorg. ions; high clarity in sol'n.
Properties:  Lt. colored free-flowing spray-dried powd.; highly sol.
Storage:  24 mos. min. shelf life in unopened container; store in cool, dry area in closed container

Hydagen® B  [Cognis/Care Chems.]
Chem. Descrip.:  α-Bisabolol  See Bisabolol
CAS 515-69-5; EINECS/ELINCS 208-205-9
Uses:  Antiphlogistic active agent for emulsions, oils, lotions, and oral hygiene preps.
Properties:  Liq.; sp.gr. 0.922-0.928; ref. index 1.492-1.498; 85% min. act.

Hydrajel® PL  [United-Guardian http://www.u-g.com]
Chem. Descrip.:  Water, glycerin, propylene glycol, PEG-45M, polyacrylic acid, sodium polycrylate, aloe vera (Aloe barbadensis) gel 40X  See Aloe barbadensis gel
Uses:  Lubricant, moisturizer to alleviate vaginal dryness
Features:  pH balanced; stable; nonstaining; condom-compat.; does not contain nonoxynol-9 which may cause skin irritation
Regulatory:  DOT nonregulated
Properties:  Colorless cl. visc. gel; char. odor; completely water-sol.; dens. 1.01 g/cm3; flash pt. none; pH 5.0-5.5
Toxicology:  No known hazards
Precaution:  Incompat. with oxidizers, salts, strong acids or bases; avoid extreme temps.
Hazardous Ingredients:  None
Hazardous Decomp. Prods.:  COx NOx
HMIS:  Health 0, Flammability 0, Reactivity 0

Hydrajel® VM  [United-Guardian http://www.u-g.com]
Chem. Descrip.:  Water, glycerin, polyacrylic acid, aloe vera (Aloe barbadensis) gel, sodium polycrylate, propylene glycol, PVM/MA copolymer  See Aloe barbadensis gel
Trade Name Reference

Uses: Lubricant, moisturizer to alleviate vaginal dryness and irritation
Features: pH balanced; stable; nonstaining
Regulatory: DOT nonregulated
Properties: Colorless cl. visc. gel; char. odor; completely water-sol.; dens. 1.09 g/cm³; flash pt. none; pH 5.0
Toxicology: No known hazards
Precaution: Incompat. with oxidizers, salts, strong acids or bases; avoid extreme temps.
Hazardous Ingredients: None
Hazardous Decomp. Prods.: COx NOx
HMIS: Health 0, Flammability 0, Reactivity 0

Hydral® 710 [Almatis
http://www.almatis.com]
Chem. Descrip.: Aluminum trihydroxide See Aluminum hydroxide
Chem. Analysis: Al₂O₃ (65.1%)
CAS 21645-51-2; EINECS/ELINCS 244-492-7
Uses: Polishing agent in dentifrices
Regulatory: DOT nonregulated; SARA §302/311/312/313 nonreportable; CERCLA nonreportable
Properties: Wh. cryst. powd.; 0.003% on 325 mesh; odorless; insol. in water; dens. 2.42 g/cm³; bulk dens. 0.22 g/cm³ (loose), 0.37 g/cm³ (packed); surf. area 5.0 m²/g; brightness 99+; m.p. 2040 C; pH 8.5-10.2 (20 C, 20%aq.); ref. index 1.57; hardness (Mohs) 2.5-3.5; 99% solids
Toxicology: Low toxicity; can cause mild irritation to eyes, skin, upper respiratory tract; exposure can aggravate asthma, chronic lung disease, skin rashes; TSCA listed
Environmental: Generally not hazardous for water
Precaution: Prevent formation of dust
Hazardous Decomp. Prods.: Exposed to fire or heat, aluminum trihydroxide dec. forming aluminum oxide and water vapor beginning at 200 C
Storage: Keep material dry

Hydral® PGA-HD [Almatis
http://www.almatis.com]
Chem. Descrip.: Spray-dried alumina trihydrate See Aluminum hydroxide
Chem. Analysis: Al₂O₃ (65%)
CAS 21645-51-2; EINECS/ELINCS 244-492-7
Uses: Polishing agent in dentifrices
Regulatory: DOT nonregulated; SARA §302/311/312/313 nonreportable; CERCLA nonreportable
Properties: Wh. crys. powd.; 0.002% on 325 mesh; odorless; insol. in water; dens. 2.42 g/cm³; bulk dens. 0.35 g/cm³ (loose), 0.61 g/cm³ (packed); surf. area 5.2 m²/g; brightness 99+; m.p. 2040 C; pH 8.5-10.2 (20 C, 20%aq.); ref. index 1.57; hardness (Mohs) 2.5-3.5; 99% solids
Toxicology: No known hazards
Precaution: Incompat. with oxidizers, salts, strong acids or bases; avoid extreme temps.
Hazardous Ingredients: None
Hazardous Decomp. Prods.: COx NOx
HMIS: Health 0, Flammability 0, Reactivity 0

Hydrine® [Gattefosse
Chem. Descrip.: PEG-2 stearate
Chem. Analysis: Al₂O₃ (65%)
CAS 9004-99-3; EINECS/ELINCS 203-363-5
Uses: Thickener, gellant, consistency agent, stabilizer for pharmaceuticals, topical emulsions, ointments, creams, lotions
Regulatory: EP, JP compliance
Properties: Gardner < 3 waxy solid, faint odor; drop pt. 45.5-48.5 C; HLB 5.0; acid no. < 6; iodine no. < 3; sapon. no. 150-160; nonionic; 100% conc.
Toxicology: Nonirritating to skin and eyes

Hydrobrite® 200PO [Chemtura
http://www.chemtura.com]
Chem. Descrip.: Wh. mineral oil USP (100%) with trace amounts of Vitamin E (5-10 ppm)
See D-α-Tocopherol
Chem. Analysis: Al₂O₃ (65%)
CAS 8020-83-5; 59-02-9; EINECS/ELINCS 232-384-2; 200-412-2
Uses: Binder, carrier, conditioner, dispersant, extender, lubricant, moisture barrier, protectant softener in pharmaceuticals
Regulatory: FDA 21 CFR §172.878, 178.3620(a); DOT, IMDG, ICAO nonregulated; SARA §311/312/313 nonreportable; NJ Right-to-Know; Canada DSL; Australia AICS; Japan ENCS; Korea ECL
Properties: Water-wh. liq.; odorless, tasteless; insol. in water; sol. in oil, organic solvents; sp.gr. 0.845-0.885; visc. 33.5-46 cst (40 C);
Hydrobrite® 300PO [Chemptra http://www.chemtura.com]
Chem. Descrip.: Wh. mineral oil USP
CAS 8020-83-5; EINECS/ELINCS 232-384-2
Uses: Binder, carrier, conditioner, dispersant, extender, lubricant, moisture barrier, protectant softener in pharmaceuticals
Regulatory: FDA 21CFR §172.878, 178.3620(a)
Properties: Odorless, tasteless; sp.gr. 0.850-0.880; visc. 48-60 cSt (40 C); distill. pt. 260 C min. (10 mm, 2.5%); pour pt. 10 F

Hydrobrite® 380PO [Chemptra http://www.chemtura.com]
Chem. Descrip.: Wh. mineral oil USP (100%) with trace amounts of Vitamin E (5-10 ppm)
See D-α-Tocopherol
CAS 8020-83-5; 59-02-9; EINECS/ELINCS 232-384-2; 200-412-2
Uses: Binder, carrier, conditioner, dispersant, extender, lubricant, moisture barrier, protectant softener in pharmaceuticals
Regulatory: FDA 21CFR §172.878, 178.3620(a); DOT, ICAO, IMDG nonregulated; SARA §311/312/313 nonreportable; NJ Right-to-Know; Canada DSL; Australia AICS; Japan ENCS; Korea ECL
Properties: Odorless, tasteless; insol. in water; sol. in oil, organic solvents; m.w. 540; sp.gr. 0.860-0.880; visc. 100-125 cSt (40 C); vapor pressure < 0.008 hPa; distill. pt. 295 C min. (10 mm, 2.5%); pour pt. 15 F max.; b.p. > 230 C; flash pt. (COC) > 188 C; ref. index 1.470-1.478; partitioning coefficient log POW > 6; 0% volatiles

Toxicology: LD50 (ing., rat) > 5000 mg/kg; mineral oil mist: ACGIH TWA 5.0 mg/m³; STEL 10.0 mg/m³; chronic inh. may cause pulmonary edema or aspiration pneumonia; oil deposits in the lung from inh. may lead to fibrosis and reduced pulmonary function; prolonged or repeated skin contact may cause irritation or oil acne; TSCA listed
Precaution: Use oil resistant gloves, face shield, protective clothing; prevent from
entering drains or sewers; spills may be slippery; residual vapors may explode on ignition; incompat. with strong oxidizing agents

Hazardous Decomp. Prods.: COx, soot

NFPA: Health 0, Flammability 1, Reactivity 0

Storage: Keep drums tightly closed; ground all containers and equipment; keep away from heat and flame; avoid sunlight or ultraviolet light

Hydrokote® 102 [ABITEC http://www.abiteccorp.com]

Chem. Descrip.: Hydrogenated vegetable oil with lecithin
CAS 68334-28-1; EINECS/ELINCS 269-820-6; 232-307-2

Uses: Specialty base, replacement for cocoa butter in pharmaceuticals (suppositories), antiperspirant sticks, emollient creams and lotions

Features: Replacement for cocoa butter

Regulatory: FDA 21CFR §182.1, GRAS

Properties: Off-wh. waxy solid; insol. in water; vapor pressure <1 mm Hg; m.p. 38.3-39.4 C; b.p. >500 F; iodine no. 5 max.; sapon. no. 230-250; flash pt. (COC) >390 F

Toxicology: Contact with eyes and skin not expected to cause serious irritation

Precaution: Wear chemical splash goggles and neoprene gloves for hot oil; incompat. with strong oxidizers

Storage: Retest and re-qualify 12 mos. from the date of manufacture; store in a dry, odor-free location @ R.T.

Hydrokote® 112 [ABITEC http://www.abiteccorp.com]

Chem. Descrip.: Hydrogenated vegetable oil with lecithin
CAS 68334-28-1; EINECS/ELINCS 269-820-6; 232-307-2

Uses: Specialty base, replacement for cocoa butter in pharmaceuticals (suppositories), antiperspirant sticks, emollient creams and lotions

Features: Replacement for cocoa butter

Regulatory: FDA 21CFR §182.1, GRAS

Properties: Lt. yel. oil when melted; sp.gr. ≈ 0.9; vapor pressure < 1 mm Hg; m.p. 36.1-37.2 C; b.p. > 500 F; iodine no. 5 max.; sapon. no. 238-255; flash pt. (COC) > 390 C

Precaution: Incompat. with strong oxidizers

Hydrokote® AP-5 [ABITEC http://www.abiteccorp.com]

Chem. Descrip.: Hydrogenated vegetable oil
CAS 68334-28-1; EINECS/ELINCS 269-820-6

Uses: Bodying agent, emollient, lubricant, moisturizer, visc. modifier in pharmaceuticals (clinical nutrition, coating, dermatologicals, encapsulation, nutritional/sports supplements, soft gelatin capsules, suppositories, sustained-release applics.)

Features: Replacement for cocoa butter

Properties: Lt. yel. solid; Lovibond R3.0 max.; sp.gr. ≈ 0.9; vapor pressure < 1 mm Hg; m.p. 95-99 F; b.p. > 500 F

Toxicology: Contact with eyes and skin not expected to cause serious irritation

Precaution: Wear chemical splash goggles; incompat. with strong oxidizers

Storage: Retest and re-qualify 12 mos. from the date of manufacture; store in a dry, odor-free location @ R.T.

Hydrokote® M [ABITEC http://www.abiteccorp.com]

Chem. Descrip.: Hydrogenated vegetable oil
CAS 68334-28-1; EINECS/ELINCS 269-820-6

Uses: Bodying agent, emollient, lubricant, moisturizer, visc. modifier in pharmaceuticals (clinical nutrition, coating, dermatologicals, encapsulation, nutritional/sports supplements, soft gelatin capsules, suppositories, sustained-release applics.)

Features: Replacement for cocoa butter

Properties: Lt. yel. oil when melted; fatty odor; sp.gr. ≈ 0.9; vapor pressure < 1 mm Hg; m.p. 36.1-37.2 C; b.p. > 500 F; iodine no. 5 max.; sapon. no. 238-255; flash pt. (COC) > 390 C

Precaution: Incompat. with strong oxidizers

Hydrotriticum™ QL [Croda Inc http://www.croda.com; http://www.crodausa.com; Croda Chem. Europe Ltd http://www.croda.co.uk]

Chem. Descrip.: Laurdimonium hydroxypropyl hydrolyzed wheat protein and water
CAS 130381-06-5

Uses: Film-forming conditioner for medicated hair care products

Properties: Lt. amber cl. liq., mild char. odor; sol. @ 10% in water, water/ethanol, glycerin, propylene glycol, surfactants; m.w. 3500; sp.gr. 1.05; b.p. > 300 F; pH 4.0-5.0; cationic; 26% act.
Hyflo Super-Cel® [Celite
http://www.worldminerals.com]
Chem. Descrip.: Diatomaceous earth
CAS 7631-86-9; EINECS/ELINCS 231-545-4
Uses: Filter aid for pharmaceuticals
Properties: Wh. powd.; 7 µ median pore size;
5% 150 mesh residue; sp.gr. 2.3; dens. 10
lb/ft³ (dry); pH 10

Hystar® 3375 [SPI Polyols
http://www.spipolyols.com]
Chem. Descrip.: Hydrogenated starch
hydrolysate
Chem. Analysis: Water 25%
CAS 68425-17-2
Uses: Humectant, bodying agent, moisture
control agent for toothpaste
Features: Rec. where sweet taste and low
hygroscopicity are required
Regulatory: Kosher certification
Properties: Water-wh. cl. liq.; sp.gr. 1.32; visc.
7000 cps (25 C), 1500 cps (40 C); pH neutral;
75% act.

Hystar® 4075 [SPI Polyols
http://www.spipolyols.com]
Chem. Descrip.: Hydrogenated starch
hydrolysate
CAS 68425-17-2
Uses: Humectant, bodying agent, moisture
control agent for toothpaste
Features: Rec. where sweet taste and low
hygroscopicity are required
Regulatory: Kosher certification
Properties: Water-wh. cl. liq.; sp.gr. 1.33; visc.
1000 cps (40 C); pH neutral; 75% act.

Hystar® 5875 [SPI Polyols
http://www.spipolyols.com]
Chem. Descrip.: Hydrogenated starch
hydrolysate
CAS 68425-17-2
Uses: Humectant, bodying agent, moisture
control agent for toothpaste
Features: Rec. where texture and taste are
important
Properties: Water-wh. cl. liq.; sp.gr. 1.35; visc.
1700 cps (25C), 500 cps (40 C); pH 5.0-7.5
(14% w/w in water); 75% act.

Hystar® 6075 [SPI Polyols
http://www.spipolyols.com]
Chem. Descrip.: Hydrogenated starch
hydrolysate
CAS 68425-17-2
Uses: Humectant, bodying agent, moisture
control agent for toothpaste
Features: Rec. where very low hygroscopicity is
required
Regulatory: Kosher certification
Properties: Water-wh. cl. liq., bland taste; sp.gr.
1.35; visc. 2000 cps (40 C); pH neutral; 75%
act.

Hystar® 8070 [SPI Polyols
http://www.spipolyols.com]
Chem. Descrip.: Sorbitol sol'n.
EINECS/ELINCS 200-061-5
Uses: Bodying agent for liq. pharmaceuticals;
humectant, plasticizer, nutritive sweetener,
vehicle, excipient for pharmaceuticals
Features: Noncrystallizing
Properties: Colorless, visc. liq.; odorless; sol. in
water @ 60 C; sp.gr. 1.3; visc. 380 cP @ 40 C;
b.p. 104 C
Precaution: Spills may be slippery
Hazardous Decomp. Prods.: Toxic org.
vapors./fumes, COx
Storage: Keep container closed when not in use;
store in cool, dry, well-ventilated place; keep
away from heat, direct sunlight

Hystar® CG [SPI Polyols
http://www.spipolyols.com]
Chem. Descrip.: Hydrogenated starch
hydrolysate
CAS 68425-17-2
Uses: Lubricant, humectant for dentifrices
Properties: Water-wh. cl. liq.; sp.gr. 1.30; visc.
380 cps; ref. index 1.46; pH neutral; 70% act.
Trade Name Reference

Uses: Humectant, lubricant, moisture control agent in oral hygiene prods.
Regulatory: Kosher certification
Properties: Water-wh. cl. liq.; sp.gr. 1.30; visc. 380 cps; pH neutral; 75% act. in water

Hystrene® 3022 [Chemtura http://www.chemtura.com]
Chem. Descrip.: Hydrogenated menhaden acid
Uses: Chemical intermediate, emulsifier for pharmaceuticals
Properties: Flakes; solid. pt. 50-54 C; acid no. 193-202; iodine no. 5; sapon. no. 193-202; 100% conc.

Hystrene® 4516 [Chemtura http://www.chemtura.com]
Chem. Descrip.: Stearic acid
CAS 57-11-4; EINECS/ELINCS 200-313-4
Uses: Lubricant, emulsifier, plasticizer in pharmaceuticals
Properties: Solid; acid no. 203-209; iodine no. 1 max.; sapon. no. 204-210; 100% conc.

Hystrene® 5012 [Chemtura http://www.chemtura.com; Thornley http://www.thornleycompany.com]
Chem. Descrip.: Hydrogenated stripped coconut acid See Hydrogenated coconut acid
CAS 68938-15-8; EINECS/ELINCS 273-118-5
Uses: Chemical intermediate, emulsifier for pharmaceuticals
Properties: Liq.; solid. pt. 24-33 C; acid no. 250-266; iodine no. 2 max.; sapon. no. 250-266; 100% conc.

Hystrene® 5016 NF [Chemtura http://www.chemtura.com; Thornley http://www.thornleycompany.com]
Chem. Descrip.: Stearic acid NF, triple pressed
CAS 57-11-4; EINECS/ELINCS 200-313-4
Uses: Stabilizer, lubricant, emulsifier, plasticizer in pharmaceuticals
Properties: Solid; acid no. 206-210; iodine no. 0.5 max.; sapon. no. 206-211; 100% conc.

Hystrene® 7022 [Chemtura http://www.chemtura.com; Thornley http://www.thornleycompany.com]
Chem. Descrip.: Behenic fatty acid See Behenic acid
CAS 112-85-6; EINECS/ELINCS 204-010-8
Uses: Lubricant, emulsifier, plasticizer in pharmaceuticals
Properties: Solid; acid no. 170-180; iodine no. 3.5; sapon. no. 170-181; 100% conc.

Hystrene® 9016 [Chemtura http://www.chemtura.com; Thornley http://www.thornleycompany.com]
Chem. Descrip.: Palmitic acid (90%)
CAS 57-10-3; EINECS/ELINCS 200-312-9
Uses: Lubricant, emulsifier, plasticizer in pharmaceuticals
Properties: Solid; acid no. 216-220; iodine no. 0.5 max.; sapon. no. 216-221; 100% conc.

Hystrene® 9022 [Chemtura http://www.chemtura.com; Thornley http://www.thornleycompany.com]
Chem. Descrip.: Behenic acid (90%)
CAS 112-85-6; EINECS/ELINCS 204-010-8
Uses: Lubricant, emulsifier, plasticizer in pharmaceuticals
Properties: Solid; acid no. 165-175; iodine no. 3; sapon. no. 165-176; 100% conc.

Hystrene® 9512 [Chemtura http://www.chemtura.com; Thornley http://www.thornleycompany.com]
Chem. Descrip.: Lauric acid (95%)
CAS 143-07-7; EINECS/ELINCS 205-582-1
Uses: Lubricant, emulsifier, plasticizer in pharmaceuticals
Properties: Solid; acid no. 276-281; iodine no. 0.5 max.; sapon. no. 276-282; 100% conc.

Hystrene® 9718 NF [Chemtura http://www.chemtura.com; Thornley http://www.thornleycompany.com]
Chem. Descrip.: Stearic acid NF(92%)
CAS 57-11-4; EINECS/ELINCS 200-313-4
Uses: Lubricant, emulsifier, plasticizer in pharmaceuticals
Properties: Solid; acid no. 196-201; iodine no. 0.8 max.; sapon. no. 196-202; 100% conc.

Idromag® ERB [Solvay SA http://www.solvay.com]
Chem. Descrip.: Magnesium hydroxide
Chem. Analysis: 99.0-100.5% of magnesium hydroxide
CAS 1309-42-8; EINECS/ELINCS 215-170-3
Uses: Antacid and alkaline buffer in pharmaceuticals
Regulatory: EP
Properties: Wh. fine amorphous powd.; pract. insol. in water; dissolves in dilute acids
Storage: Keep in bags tightly closed and stored in original packaging
Idromag® ERM [Solvay SA
http://www.solvay.com]
Chem. Descrip.: Magnesium hydroxide
Chem. Analysis: 95.0-100.5% of magnesium hydroxide
CAS 1309-42-8; EINECS/ELINCS 215-170-3
Uses: Antacid and alkaline buffer in pharmaceutical tablet and powder dosage systems
Regulatory: EP
Properties: Wh. fine amorphous powd.; pract. insol. in water; dissolves in dilute acids
Storage: Keep in bags tightly closed and stored in original packaging

Igepal® CO-630 Special [Rhodia HPCII
http://www.rhodia-hpcii.com; Rhodia HPCII France http://www.hpcii.rhodia.com]
Chem. Descrip.: Nonoxynol-9 USP-NF
CAS 9016-45-9
Uses: Spermicide, microbicid, emulsifier, solubilizer for pharmaceuticals
Features: GMP grade
Properties: Liq.; HLB 13.0; nonionic; 100% act.

Imbentin-PEG/300 [Dr. W. Kolb AG
http://www.kolb.ch]
Chem. Descrip.: PEG-6
CAS 25322-68-3; EINECS/ELINCS 220-045-1
Uses: Surfactant for pharmaceuticals
Properties: Liq.; hyd. no. 375; nonionic

Imbentin-PEG/400 [Dr. W. Kolb AG
http://www.kolb.ch]
Chem. Descrip.: PEG-8
CAS 25322-68-3; EINECS/ELINCS 225-856-4
Uses: Surfactant for pharmaceuticals
Properties: Liq.; hyd. no. 280; nonionic

Imbentin-PEG/600 [Dr. W. Kolb AG
http://www.kolb.ch]
Chem. Descrip.: PEG-12
CAS 25322-68-3; EINECS/ELINCS 229-859-1
Uses: Surfactant for pharmaceuticals
Properties: Liq.; hyd. no. 185; nonionic

Imbentin-PEG/1500 G [Dr. W. Kolb AG
http://www.kolb.ch]
Chem. Descrip.: PEG-32
CAS 25322-68-3; EINECS/ELINCS 203-989-9
Uses: Surfactant for pharmaceuticals
Properties: Pellets; hyd. no. 75; nonionic

Imperial 400 [Luzenac Am.
http://www.luzenac.com; MPSI http://www.mp-solutionsinc.com]
Chem. Descrip.: Talc USP/FCC
CAS 14807-96-6; EINECS/ELINCS 238-877-9
Uses: Filler in pharmaceuticals (tablets, medicated foot powds., creams/lotions/ointments); lubricant, glidant in tablet coatings; release agent in tablet molds
Features: Inert
Regulatory: FDA approved for food-contact apps.; DOT nonhazardous
Properties: Wh. to grayish-wh. fine powd.; 4.5 µ median particle size; 99.9% through 325 mesh; sl. earthy odor; sol. in hot, conc. phosphoric acid; insol. in water, cold acids and alkalis; sp.gr. 2.7-2.8; dens. 38 lb/ft³ (tapped), 14 lb/ft³ (loose); oil absorp. 35; brightness 90; pH sl. alkaline; hardness (Mohs) 1.0-1.5; 0.4% max. moisture
Toxicology: ACGIH TWA/TLV 2 mg/m³ (respirable dust); inh. of lg. amts. of dust may cause mucous membranes/respiratory tract irritation; chronic exposure may cause pulmonary fibrosis, shortness of breath, chronic cough, heart failure, pneumoconiosis; tumorigen; TSCA listed
Precaution: Very slippery when wet
Hazardous Ingredients: May contain 0-3% of: dolomite, chlorite, calcite, magnesite
Hazardous Decomp. Prods.: None
HMIS: Health 1, Flammability 0, Reactivity 0
Storage: Store in sealed containers

Imwitor® 191 [Sasol Germany
http://www.sasol.com;
http://www.sasololefinssurfactants.com;
Sasol N. Am.
http://www.sasolnorthamerica.com]
Chem. Descrip.: Glyceryl stearate
CAS 31566-31-1
Uses: Lubricant, binder, suspending agent, stabilizer, thickener for pharmaceuticals; emulsifier in o/w and w/o emulsions
Features: Environmentally compat.
Regulatory: E471
Properties: Ylsh. powd.; sol. in oils, molten fats, acetone, ether; m.p. 66-71 C; solid. pt. 63-68 C; HLB 4.4; acid no. 3 max.; iodine no. 3 max.; sapon. no. 155-170; nonionic; 90% monoglycerides
Environmental: Environmentally compat.

Imwitor® 312 [Sasol Germany
http://www.sasol.com;
http://www.sasololefinssurfactants.com;
Sasol N. Am.
http://www.sasolnorthamerica.com]
Chem. Descrip.: Glyceryl laurate
CAS 142-18-7; EINECS/ELINCS 205-526-6
Uses: Coemulsifier for o/w emulsions;
solubilizer, carrier for lipophilic
pharmaceuticals (oral, topical, rectal);
surfactant; bacteriostat
Features: Environmentally compat.
Properties: Wh. cryst. solid; sol. in water/ethanol
(50/50), acetone, ether, heptane; m.p. 56-60
C; HLB 4.0; acid no. 2 max.; iodine no. 2 max.;
sapon. no. 195-205; nonionic; 90% min.
monoglycerides

Imwitor® 370 [Sasol Germany
http://www.sasol.com;
http://www.sasololefinssurfactants.com;
Sasol N. Am.
http://www.sasolnorthamerica.com]
Chem. Descrip.: Glyceryl stearate citrate
CAS 39175-72-9; EINECS/ELINCS 259-855-5
Uses: O/w emulsifier for highly polar fats and
oils for topical and oral pharmaceuticals;
dispersant, solubilizer for actives; hard fat
Features: Food-grade; exc. consistency and
melting chars.; compat. to skin and mucous
membranes; optimizes skin feeling;
environmentally compat.
Regulatory: E 472 b/c, JCIC
Properties: Flakes; oil-sol.; HLB ≈ 10-12

Imwitor® 377 [Sasol Germany
http://www.sasol.com;
http://www.sasololefinssurfactants.com;
Sasol N. Am.
http://www.sasolnorthamerica.com]
Chem. Descrip.: Mono- and diglycerides,
esterified with citric acid and mono- and
diglycerides, esterified with lactic acid
See Citric acid esters of mono- and diglycerides
of fatty acids; Lactic acid esters of mono-
and diglycerides of fatty acids
Uses: O/w emulsifier in pharmaceuticals
Regulatory: E472c, E472b compliance
Properties: Elastic solid; oil-sol.; HLB ≈ 10-12

Imwitor® 380 [Sasol Germany
http://www.sasol.com;
Chem. Descrip.: Propylene glycol caprylate
Chem. Analysis: 50% min. monoglyceride content
CAS 31565-12-5
Uses: Coemulsifier, solubilizer, absorp. promoter for topical and rectal pharmaceuticals; solvent for lipophilic drugs
Features: Environmentally compat.
Regulatory: CFR* 21, § 178.856, GRAS, E 477
Properties: Sl. yel. liq.; neutral coconut odor; sol. in all fats and oils; acid no. 2 max.; iodine no. 1 max.; sapon. no. 250-275; hyd. no. 130-210; 50% monoglycerides

Chem. Descrip.: Propylene glycol laurate
Chem. Analysis: > 50% monoester content
CAS 142-55-2; EINECS/ELINCS 205-542-3
Uses: Coemulsifier, solubilizer, absorp. promoter for topical and rectal pharmaceuticals; solvent for lipophilic drugs
Features: Environmentally compat.
Regulatory: CFR* 21, § 178.856, GRAS, E 477
Properties: Sl. yel. solid; dispersible in water; sol. in all oils and fats; readily sol. in ethanol, acetone and n-hexane.; acid no. 2 max.; iodine no. 1 max.; sapon. no. 220-235; hyd. no. 110-140; nonionic; 50% monoglycerides

Chem. Descrip.: Glyceroyl stearate
CAS 123-94-4
Uses: Lipophilic matrix for oral solid dosage forms; tablet lubricant, emulsion stabilizer, dispersing agent for pigments
Regulatory: USP/NF
Properties: Off-wh. powd.; m.p. 66-77; nonionic; 90% conc.

Chem. Descrip.: Polyglyceryl-3 polyrincinoleate
CAS 29894-35-7
Uses: W/o emulsifier for low-viscosity pharmaceuticals
Regulatory: E476
Properties: Liq.; HLB ≈ 4

Chem. Descrip.: Caprylic/capric glycerides
CAS 85409-09-2; EINECS/ELINCS 287-075-5
Uses: Coemulsifier, solubilizer, carrier, solvent for lipophilic pharmaceuticals (oral, topical, rectal); compressing aid, lubricant in tablets; dispersant; surfactant; absorp. promoter; bacteriostat; filler for hard and soft gelatin capsules; release agent and bioavailability enhancer for drugs
Features: Environmentally compat.
Regulatory: DAB 1999, USP/ NF, JCIC
Properties: Wh-ylsh. cryst. solid, sl. coconut odor, fatty bitter taste; sol. in ethanol, acetone, ether, heptane, hexane; misc. with oils and fats; m.p. 25 C; HLB 3-4; acid no. 2 max.; iodine no. 1 max.; sapon. no. 250-280; nonionic; 45% min. monoglycerides
Toxicology: LD50 (oral, rat) > 5 g/kg; moderate skin irritant (undiluted)

Imwitor® 780 K [Sasol Germany http://www.sasol.com;
Trade Name Reference

http://www.sasololefinssurfactants.com; Sasol N. Am.
http://www.sasolnorthamerica.com
Chem. Descrip.: Isostearyl diglyceryl succinate

Uses: W/o emulsifier for highly polar oils and fats, topical pharmaceuticals
Features: Produces very heat-stable emulsions with Miglyol Gel; environmentally compat.
Properties: Yel., med. visc. liq., sl. char. odor;
sol. in chloroform, benzene, ethanol, oils; insol. in water; m.w. 580; sp.gr. 0.96-0.98; visc. 700-900 mPa•s; HLB 3.7; acid no. 3 max.; iodine no. 10 max.; sapon. no. 240-260; nonionic; 100% conc.
Use Level: 3-5%
Toxicology: LD50 (oral, rat) > 5 g/kg (nontoxic); nonirritating to skin and eyes
Environmental: Environmentally compat.

Chem. Descrip.: Mono- and diglycerides
derived from unsat. edible oils
Uses: W/o emulsifier, o/w stabilizer, forms
gels in excess water for pharmaceutical
preps.
Regulatory: E473 compliant; USP, Ph. Eur.
Properties: Ylsh. liq.; > 40% monoglyceride
content

Imwitor® 960 [Sasol Germany
http://www.sasol.com;
http://www.sasololefinssurfactants.com;
Sasol N. Am.
http://www.sasolnorthamerica.com]
Chem. Descrip.: Glyceryl stearate SE
Trade Name Reference

CAS 11099-07-3
Uses: O/w emulsifier for topical pharmaceuticals; suspending agent in creams, lotions, emulsions
Regulatory: E471 compliant
Properties: Ylsh. flakes; sol. in fats, oils, waxes; m.p. 56-61 C; HLB 12.0; acid no. 5 max.; iodine no. 3 max.; sapon. no. 150-180; anionic; 35% monoglycerides

Chem. Descrip.: Glyceryl stearate SE
CAS 85666-92-8
Uses: Emulsifier and ointment base for pharmaceutical o/w creams
Properties: Ylsh. flakes; typical odor; sol. in all fats, oils, waxes, in chloroform, benzene, ether, ethanol; m.p. 56-61 C; HLB 12.0; acid no. 6 max.; iodine no. 3 max.; sapon. no. 150-175; anionic; 30% min. monoglycerides; 100% conc.

Chem. Descrip.: Glyceryl stearate SE containing sodium stearate
CAS 31566-31-1; 822-16-2; EINECS/ELINCS 234-325-6; 212-490-5
Uses: O/w emulsifier for topical pharmaceuticals; solubilizer for actives; bacteriostat; penetrant
Features: Self-emulsifying; gives uniform stable o/w emulsion structure; imparts pleasant skin feel; environmentally compat.
Regulatory: B.P., JCIC
Properties: Ylsh. flakes; m.p. 56-61 C; HLB 12; acid no. 6 max.; iodine no. 3 max.; sapon. no. 150-175; anionic; 30% min. monoglycerides; 7% max. free glycerol
Environmental: Environmentally compat.

Chem. Descrip.: Glyceryl caprylate
CAS 26402-26-6; EINECS/ELINCS 247-668-1
Uses: Surfactant, emulsifier, solubilizer, dispersant, plasticizer, lubricant, consistency regulator, skin/mucous membrane protectant, refatting agent, penetrant, carrier, absorp. promoter, bacteriostat for pharmaceuticals (oral, topical, rectal), nutritional fields
Features: Environmentally compat.
Regulatory: E472 compliant; USP/ NF, JCIC
Properties: Almost colorless liq./semisolid; sol. in water/ethanol (25/75), acetone, ether, heptane; acid no. 3 max.; iodine no. 3 max.; sapon. no. 275-300; nonionic; 50% monoglycerides
Environmental: Environmentally compat.

Incrocas 30 [Croda Inc http://www.croda.com; http://www.crodausa.com]
Chem. Descrip.: PEG-30 castor oil
CAS 61791-12-6
Uses: Surfactant, solvent, wetting agent, emollient, emulsifier, lubricant for topical pharmaceuticals
Features: Tends to yield clear sol’ns.
Properties: Pale yel. liq.; sol. in water, ethanol, oleyl alcohol, naphtha, MEK, oleic acid, trichloroethylene; HLB 11.7; cloud pt. 35-40 C (1% in 10% brine); sapon. no. 72-82; pH 6.0-7.5 (3% aq.); surf. tens. 41.5 dynes/cm (0.1% DW); nonionic; 100% act.
Use Level: 0.5-5%

Incrocas 40 [Croda Inc http://www.croda.com; http://www.crodausa.com]
Chem. Descrip.: PEG-40 castor oil
CAS 61791-12-6
Uses: Surfactant, solvent, wetting agent, emollient, emulsifier, lubricant for topical and parenteral pharmaceuticals
Properties: Pale yel. liq.; sol. @ 10% water, ethanol, oleyl alcohol, naphtha, MEK, oleic acid, trichloroethylene; HLB 11.7; cloud pt. 50 C (1% in 10% brine); sapon. no. 60-65; pH 6.0-7.5 (3% aq.); surf. tens. 40.90 dynes/cm (0.1% DW); nonionic; 100% act.
Use Level: 0.5-5%

Incromega DHA 500TG SR [Croda Inc http://www.croda.com; http://www.crodausa.com]
Chem. Descrip.: Omega 3 essential fatty acids derived from marine oils (eicosapentaenoic acid and docosahexaenoic acid (10:50))
EINECS/ELINCS 309-181-3
Uses: Nutrition; drug delivery; oral and topical pharmaceuticals; chem. intermediate
Features: High purity; excellent taste and odor
Properties: Liq.
Use Level: 0-100%
Trade Name Reference

**Incromega DHA700E SR** [Croda Inc
  
  [http://www.crodausa.com](http://www.crodausa.com)]

Chem. Descrip.:  
Docosahexaenoic acid

CAS:  
25167-62-8; EINECS/ELINCS: 309-181-3

Uses:  
Therapeutic use for eye health and CNS disorders

Features:  
Low level of trace impurities; low peroxide and para-anisidine values

Regulatory:  
EP

Properties:  
Cl. pale liq.

Use Level: 0-100%

**Incromega E3322** [Croda Inc
  
  [http://www.crodausa.com](http://www.crodausa.com)]

Chem. Descrip.:  
Omega 3 essential fatty acids derived from marine oils [eicosapentaenoic acid and docosahexaenoic acid (33:22)]

Chem. Analysis:  
33% min. EPA and 22% min. DHA

Uses:  
Nutrition; drug delivery; oral and topical pharmaceuticals; chem. intermediate

Features:  
Lower calories per dose than standard fish oil

Regulatory:  
EP

Properties:  
Sol. in min. oil, IPA; insol. in water, propylene glycol

Use Level: 0-100%

**Incromega TG3322** [Croda Inc
  
  [http://www.crodausa.com](http://www.crodausa.com)]

Chem. Descrip.:  
Omega 3 essential fatty acids derived from marine oils [eicosapentaenoic acid and docosahexaenoic acid (33:22)]

EINECS/ELINCS: 309-181-3

Uses:  
Nutrition; drug delivery; oral and parenteral pharmaceuticals; chem. intermediate

Regulatory:  
Eu.Ph. compliant

Properties:  
Liq., sol. in min. oil; partly sol. in IPA; insol. in water, propylene glycol

Use Level: 0-100%

**Incropol CS-20** [Croda Inc
  
  [http://www.crodausa.com](http://www.crodausa.com)]

Chem. Descrip.:  
Ceteareth-20

CAS:  
68439-49-6

Uses:  
O/w emulsifier, coupling agent, antistat, and solubilizer for topical pharmaceuticals

Features:  
Synergistic with Volpo series

Properties:  
Gardner 1 max. wh. solid; sol. in water, IPA; disp. in propylene glycol; insol. in min. oil; pH 5.5-7.5 (3%); HLB 15.5; nonionic; 100% conc.

Use Level: 0.5-10%

Toxicology:  
LD50 (oral, rat) 2.1 g/kg; mild skin irritant; moderate eye irritant

**Incroquat B65C** [Croda Inc
  
  [http://www.crodausa.com](http://www.crodausa.com)]

Chem. Descrip.:  
Behenalkonium chloride, cetyl alcohol

Uses:  
Emulsifier for topical pharmaceutical creams and emulsions

Features:  
Mild; substantive; smooth afterfeel

Properties:  
Wh. flake; disp. in water, warm min. oil; insol. in IPA, propylene glycol; m.p. 80 C; cationic; 65% act.

Use Level: 1-5%

**Incroquat Behenyl TMS** [Croda Inc
  
  Croda Chem. Europe Ltd  [http://www.croda.co.uk](http://www.croda.co.uk)]

Chem. Descrip.:  
Behentrimonium methosulfate, cetearyl alcohol

Uses:  
Suspending agent, structural agent in topical pharmaceuticals

Features:  
Produces excellent cationic emulsions; capable of emulsifying silicone

Properties:  
Wh. flake, char. odor; disp. in water, warm propylene glycol and min. oil; insol. in IPA; m.p. 58-62 C; pH 6.0-7.0 (1%); cationic; 25% act.

Use Level: 1-10%

**Industrene® 106** [Chemtura
  
  [http://www.chemtura.com](http://www.chemtura.com);

Chem. Descrip.:  
Oleic acid NF

CAS:  
112-80-1; EINECS/ELINCS: 204-007-1

Uses:  
Intermediate for pharmaceuticals

Properties:  
Liq.; solid. pt. 6 C max.; acid no. 199-204; iodine no. 95 max.; sapon. no. 200-205; 100% conc.
Trade Name Reference

Chem. Descrip.: Hydrogenated coconut acid
CAS 68938-15-8; EINECS/ELINCS 273-118-5
Uses: Emulsifier for pharmaceuticals; chemical intermediate
Properties: Solid. pt. 23-26 C; acid no. 266-274; iodine no. 3 max.; sapon. no. 267-276

Industrene® 5016 NF [Chembura http://www.chemtura.com]
Chem. Descrip.: Stearic acid NF
CAS 57-11-4; EINECS/ELINCS 200-313-4
Uses: Lubricant, release agent, binder, defoamer in pharmaceuticals
Properties: Acid no. 206-210; iodine no. 0.5 max.; sapon. no. 206-211

Instant Pure-Cote™ B793 [Grain Processing http://www.grainprocessing.com]
Chem. Descrip.: Food starch modified See Food starch, modified
Uses: Film-former for pharmaceuticals, esp. aq. film coatings, barriers, texture modification, binding, adhesives; filler, humectant for pharmaceutical cleansers; film-former, encapsulation aid for spray drying
Features: Low hygroscopicity; nonirritating; low visc.
Properties: Neutral flavor; sol. in cold water

Insta*Thick® Gum Arabic [Primer Foods http://www.primerafoods.com]
Chem. Descrip.: Gum Arabic See Acacia
CAS 9000-01-5; EINECS/ELINCS 232-519-5
Uses: Flavoring agent in pharmaceuticals
Features: Low visc.; rapid disp. and dissolution
Regulatory: Kosher approved
Properties: Off-wh. powd.; 35% max. on 40 mesh, 905 min.on 200 mesh; bland odor/taste; bulk dens. 0.22-0.32 g/cc; 10% max. moisture
Storage: 12 mos. shelf life when stored in a cool, dry place

Chem. Descrip.: BHT
CAS 12837-0; EINECS/ELINCS 204-881-4
Uses: Antioxidant for rubber, paraffin, and plastic used in drug prods.
Properties: Pt-Co 15 max.; solid. pt. 69.4 C min.; 99.0% min. purity

Irgacare MP [Ciba Spec. Chems./Home & Personal Care]
Uses: Antimicrobial, bactericide, fungicide, yeast inhibitor for toothpaste, mouthwash
Features: Broad spectrum act. against gram-positive and Gram-negative bacteria, fungi, yeasts, viruses; stable to hydrolysis
Properties: Powd., faint aromatic odor; sol. in org. solvs., surfactants
Toxicology: Safe for humans
Environmental: Environmentally friendly

Irgasan DP300 [Ciba Spec. Chems./Home & Personal Care]
Chem. Descrip.: Triclosan
CAS 3380-34-5; EINECS/ELINCS 222-182-2
Uses: Bacteriostat, preservative for pharmaceuticals
Features: Broad spectrum
Properties: 99% min. act.
Environmental: Environmentally friendly

Iricalmin [Pentapharm Ltd http://www.pentapharm.com; Centerchem http://www.centerchem.com]
Chem. Descrip.: Water, wheat (triticum vulgare) germ extract, saccharomyces cerevisiae extract, sodium hyaluronate See Wheat (Triticum vulgare) germ oil
Uses: Anti-irritant, soothing agent, moisturizer for cosmetics, skin care
Properties: Yel. cl. to sl. opalescent liq.; sp.gr. 1.01-1.03 (20 C); ref. index 1.347-1.351 (25 C); pH 5.5-6.5
Storage: 2 yr. shelf life when stored in the original sealed containers protected from light in a clean and cool place at temps. between 15-25 C; in order to avoid secondary microbial contamination after opening, containers should be handled with special care

Chem. Descrip.: Blend of ox bile with a source of ferric iron
Uses: Nutritive pharmaceutical additive
Properties: Brnsh.-yel. powd.; hygroscopic; pH 6.6

Chem. Descrip.: 2-Butyl octanoic acid
CAS 27610-92-0; EINECS/ELINCS 248-570-1
Uses: Emollient for pharmaceutical creams,
Trade Name Reference

**ointment, emulsions, sticks**

**Regulatory:** CERCLA, §SARA §302 and §313 nonreportable

**Properties:** Colorless cl. liq.; odor;less m.w. 200; sp.gr. 0.887 (20 C); vapor pressure $\approx 1,000$ hPa; m.p. -13 to -9 C; b.p. 270-298 C; acid no. 276-284; iodine no. 0.2 max.; flash pt. 157 C; 96% act.; 0.1% max. water

**Toxicology:** LD50 (acute oral, rat): > 2,000 mg/kg; eye irritant; not significantly toxic or irritating to skin; ing. may cause gastrointestinal irritation, nausea, vomiting and diarrhea; prolonged inh. of vapors may be irritating; noncarcinogenic

**Environmental:** EC50 (Daphnia magna, 48 h) 10 - 100 mg/l; readily biodegrad.

**Precaution:** Avoid contact with skin, eyes and clothing; avoid build-up of electrostatic charge; keep away from heat and sources of ignition; keep away from oxidizing agents and strongly acid or alkaline materials.; wear safety goggles and gloves

**Hazardous Decomp. Prods.:** COx

**HMIS:** Health 1, Flammability 1, Reactivity 0

**IsoClear® 42 High Fructose Corn Syrup**

[**Cargill Foods**](http://www.cargillfoods.com)

**Chem. Descrip.:** High fructose corn syrup

**See Corn syrup**

**Chem. Analysis:** Moisture 28.5-29.5%; sulfated ash 0.05% max.; sulfur dioxide 3 ppm max.

**CAS 8029-43-4; EINECS/ELINCS 232-436-4**

**Uses:** Sweetener for pharmaceuticals

**Features:** Replaces sucrose and invert syrup; clean, nonmasking taste

**Regulatory:** GRAS 21CFR §184.1866

**Properties:** Water-wh. cl. liq.; char. odor; sweet, bland taste; sp.gr. 1.3372 (100/60 F); dens. 11.15 lb/gal (100 F); visc. 220 cps (80 F); ref. index 1.4643 (20 C); pH 4.0; 94% solids (fructose 42%, dextrose 52%); 71% total solids

**IsoClear® 55 High Fructose Corn Syrup**

[**Cargill Foods**](http://www.cargillfoods.com)

**Chem. Descrip.:** High fructose corn syrup

**See Corn syrup**

**Chem. Analysis:** Moisture 22.5-23.5%; sulfated ash 0.05% max.; sulfur dioxide 3 ppm max.

**CAS 8029-43-4; EINECS/ELINCS 232-436-4**

**Uses:** Sweetener for pharmaceuticals

**Features:** Replaces sucrose and invert syrup; clean, nonmasking taste; easy handling; stable

**Regulatory:** GRAS 21CFR §184.1866

**Properties:** Cl. liq.; char. odor; sweet, bland taste; sp.gr. 1.3746 (100/60 F); dens. 11.46 lb/gal (100 F); visc. 760 cps (80 F); ref. index 1.4786 (20 C); pH 4.0; 96% solids (fructose 55%, dextrose 41%); 77% total solids

**ISOFOLO® 12**

[**Sasol Germany**](http://www.sasol.com)

**Chem. Descrip.:** 2-Butyl-1-octanol

**See Butyloctanol**

**Chem. Analysis:** Moisture 22.5-23.5%; sulfated ash 0.05% max.; sulfur dioxide 3 ppm max.

**CAS 3913-02-8; EINECS/ELINCS 223-470-0**

**Uses:** Solubilizer for lipid-sol. actives, pharmaceutical creams, ointments, emulsions, sticks

**Properties:** Colorless cl. oily liq.; odorless; m.w. 186; sp.gr. 0.833; visc. 23 mPa•s; m.p. < -30 C; b.p. 243 C; acid no. 0.05 max.; iodine no. 0.5 max.; sapon. no. 1.0 max.; hyd. no. 286-305; flash pt. 120 C; ref. index 1.443; surf.

ISOFOL® 32 [Sasol Germany http://www.sasol.com; http://www.sasololefinssurfactants.com]
Chem. Descrip.: 2-Tetradecyl-1-octadecanol
See 2-Tetradecyloctadecanol
CAS 32582-32-4; EINECS/ELINCS 251-110-2
Uses: Skin softener in stick formulations, e.g., lip salves

Properties: Wh. waxy substance; odorless; m.w. 470; sp.gr. 0.830; visc. 53 mPa•s; m.p. 42-45 C; b.p. > 300 C; acid no. 2 max.; iodine no. 1.5 max.; sapon. no. 5 max.; hyd. no. 110-126; flash pt. 266 C; ref. index 1.4527; surf. tens. 30 mN/m (50 C); 90% conc.

Toxicology: TSCA listed

Isolan® GI 34 [Degussa Care Spec.]
Chem. Descrip.: Polyglyceryl-3 isostearate
CAS 127512-63-4
Uses: W/o emulsifier for topical pharmaceuticals

Features: Low odor, easy to use; forms emulsions with good heat and freeze/thaw stability; good oxidative stability

Regulatory: JCIC registered

Properties: Yel. liq.; sol. @ 10% in veg. and paraffin oils; insol. in water; HLB 5±1; acid no. 10 max.; iodine no. 5 max.; sapon. no. 150-190; hyd. no. 60-110; nonionic

Use Level: 2.5-4.0%

Isolan® GO 33 [Degussa Care Spec.]
Chem. Descrip.: Polyglyceryl-3 oleate
CAS 9007-48-1
Uses: W/o emulsifier for topical pharmaceuticals

Features: Forms emulsions with good heat and freeze/thaw stability

Regulatory: JCIC registered

Properties: Yel. liq.; sol. @ 10% in veg. and paraffin oils; insol. in water; HLB 5.5±1; acid no. 3 max.; iodine no. 65-80; sapon. no. 150-170; hyd. no. 80-130; nonionic

Use Level: 2.5-4.0%

Isostearate Isostearyl [Gattefosse http://www.gattefossecorp.com]
Chem. Descrip.: Isostearyl isostearate
CAS 41669-30-1; EINECS/ELINCS 255-485-3
Uses: Emollient, oil substitute for pharmaceutical creams, ointments, gels, and lotions; excipient for dermal/transdermal pharmaceuticals

Features: Nonrancidable

Properties: Oily liq.; HLB 5.5-10

Use Level: 2.5-4.0%

Chem. Descrip.: Isocetyl isostearate
CAS 52006-45-8; EINECS/ELINCS 257-598-3
Uses: Solubilizer, vehicle for medicines; excipient for injectable substances; emollient in antiperspirants

Features: Changes skin feel, rub out props. and greasiness; veg. oil substitute; vaseline substitute

Isosweet 5500 [Tate & Lyle N. Am. http://www.tlna.com]
Chem. Descrip.: Corn syrup with the principal sugars contained being fructose and dextrose See Glucose
Chem. Analysis: 55% high fructose
CAS 57-48-7; 50-99-7; EINECS/ELINCS 200-333-3; 200-075-1
Uses: Carrier, microbial stabilizer, sweetener and viscosity control in liq. pharmaceutical prods.

Jaguar® 308NB [Rhodia HPCII http://www.rhodia-hpcii.com]
Chem. Descrip.: Guar gum See Guar (Cyanopsis tetragonoloba) gum
CAS 9000-30-0; EINECS/ELINCS 232-536-8
Uses: Protective colloid, emulsifier, thickener, water-binder, stabilizer, lubricant for pharmaceuticals

Properties: Cream-colored free-flowing powd.; bean-like odor; <100 mesh particle size; gels i water; bulk dens. 40±5 lb/ft3; flash pt. (Seta CC) > 93 C; pH 6-8.

Toxicology: Eye irritant; nonirritating to skin; pract. nontoxic by ing.; TSCA listed

Precaution: Avoid dust, extreme heat, open flame, and sparks

HMIS: Health 2, Flammability 1, Reactivity 0

Storage: 360 day shelf life; store in dry area in closed containers
Trade Name Reference

Japan Wax SP 69 [Strahl & Pitsch
http://www.strahlpitsch.com]
Chem. Descrip.: Japan wax See Japan (Rhus succedanea) wax
CAS 8001-39-6; EINECS/ELINCS 310-125-5
Uses: Wax for pharmaceuticals
Properties: Off-wh. color; m.p. 53 C; acid no. 22; iodine no. 13; sapon. no. 224
Toxicology: TSCA listed

Jarcol™ I-12 [Jarchem Ind.
http://www.jarchem.com]
Chem. Descrip.: 2-Butyl-octanol (95% min.) See Butyloctanol
CAS 3913-02-8; EINECS/ELINCS 223-470-0
Uses: Defoamer, hydrolytic stabilizer for pharmaceuticals
Properties: APHA 20 max. liq.; m.w. 186; sp.gr. 0.833; visc. 23 mPa•s; m.p. -30 C; b.p. 145-149 C; acid no. 0.1 max.; iodine no. 1.0 max.; sapon. no. 1.0 max.; hyd. no. 286-305; flash pt. 120 C; ref. index 1.443; 0.1% max. water

http://www.jarchem.com]
Chem. Descrip.: 2-Hexyl-decanol (97% min.) See Hexyldecanol
CAS 2425-77-6; EINECS/ELINCS 219-370-1
Uses: Extender, solvent for pharmaceuticals
Properties: APHA 20 max. liq.; m.w. 242; sp.gr. 0.836; visc. 38 mPa•s; m.p. -21 to -15 C; b.p. 193-197 C; acid no. 0.1 max.; iodine no. 1.0 max.; sapon. no. 1.0 max.; hyd. no. 225-235; flash pt. 156 C; ref. index 1.450; 0.1% max. water

Jarcol™ I-18T [Jarchem Ind.
http://www.jarchem.com]
Chem. Descrip.: 2-Octyl decanol/2-hexyl dodecanol 46/54 See Hexyl dodecanol; 2-Octyl-1-decanol
Uses: Defoamer, lubricant for pharmaceuticals
Features: Replacement for oleyl alcohol
Properties: APHA 20 max. liq.; m.w. 267-285; sp.gr. 0.837; visc. 50 mPa•s; m.p. -10 to -6 C; b.p. 207-236 C; acid no. 0.1 max.; iodine no. 1.0 max.; sapon. no. 1.0 max.; hyd. no. 197-210; flash pt. 170 C; ref. index 1.452; 0.1% max. water

Jarcol™ I-20 [Jarchem Ind.
http://www.jarchem.com]
Chem. Descrip.: 2-Octyl-dodecanol (97%min.) See Octylidodecanol
CAS 5333-42-6; EINECS/ELINCS 226-242-9
Uses: Carrier, lubricant, solubilizer for pharmaceuticals
Properties: APHA 20 max. liq.; m.w. 298; sp.gr. 0.838; visc. 60 mPa•s; m.p. -1 to 1 C; b.p. 234-238 C; acid no. 0.1 max.; iodine no. 1.0 max.; sapon. no. 1.0 max.; hyd. no. 184-190; flash pt. 180 C; ref. index 1.455; 0.1% max. water

Jarcol™ I-24 [Jarchem Ind.
http://www.jarchem.com]
Chem. Descrip.: 2-Decyl-tetradecanol (97% min.) See 2-Decyl-1-tetradecanol
CAS 58670-89-6; EINECS/ELINCS 216-385-0
Uses: Solvent, solubilizer for pharmaceuticals
Properties: APHA 20 max. liq.; m.w. 354; sp.gr. 0.842; visc. 86 mPa•s; m.p. -10 to 1 C; b.p. 234-238 C; acid no. 0.1 max.; iodine no. 1.0 max.; sapon. no. 1.0 max.; hyd. no. 184-190; flash pt. 230 C; ref. index 1.457; 0.1% max. water

Jarcol™ I-28 [Jarchem Ind.
http://www.jarchem.com]
Chem. Descrip.: 2-Decyl-1-hexadecanol (85% min.) See Dodecylhexadecanol
CAS 72388-18-2; EINECS/ELINCS 276-627-0
Uses: Pharmaceuticals
Properties: APHA 400 max. liq.; m.w. 415; sp.gr. 0.830; m.p. 29-31 C; b.p. > 300 C; acid no. 0.2 max.; hyd. no. 130-140; flash pt. 230 C; 0.2% max. water

Jarcol™ I-32 [Jarchem Ind.
http://www.jarchem.com]
Chem. Descrip.: 2-Tetradecyl-1-octadecanol (85% min.) See Dodecylhexadecanol
CAS 32582-32-4; EINECS/ELINCS 251-110-2
Uses: Emollient, visc. control agent for pharmaceuticals
Regulatory: CERCLA nonreportable; OSHA nonhazardous; DOT not regulated; Japan ENCS (2.237)
Properties: Wh. solid; APHA 470 max. liq.; odorless; m.w. 470; sp.gr. 0.830; visc. 53 mPa•s; m.p. 42-45 C; b.p. > 300 C; acid no. 0.2 max.; hyd. no. 110-126; flash pt. 266 C; 0.2% max. water

Toxicology: LD50 (oral, rat) > 39.1 g/kg; primary eye irritation index (rabbit) 2.7/110; primary skin irritation index (rabbit) 0.25/8.0; vapors may cause eye irritation; ing. of small amounts may result in nausea, vomiting; TSCA listed

Precaution: NFPA Class IIIIB combustible liq.; wear safety glasses with side shields or chemical goggles, protective clothing; incompat. with strong oxidizers, inorg. acids, halogens

Hazardous Decomp. Prods.: CO, CO2

NFPA: Health 1, Flammability 1, Reactivity 0

Chem. Descrip.: 2-Tetradecyl-1-octadecanol, 2-tetradecyl-1-eicosanol, 2-hexadecyl-1-octadecanol, 2-hexadecyl-1-eicosanol See Cetylarachidol; 2-Hexadecyl-1 octadecanol; Tetradecyleicosanol; 2-Tetradecyl octadecanol
Uses: Pharmaceuticals
Properties: APHA 400 max. liq.; m.w. 490; sp.gr. 0.820; m.p. 38-42 C; b.p. > 300 C; acid no. 0.2 max.; hyd. no. 105-120; flash pt. 278 C; 85% min. act.; 0.2% max. water

Chem. Descrip.: 2-Hexadecyl-1-eicosanol (85% min.) See Cetylarachidol
CAS 17658-63-8; EINECS/ELINCS 241-637-6
Uses: Emollient for pharmaceuticals
Properties: APHA 400 max. liq.; m.w. 510; sp.gr. 0.821; m.p. 52-55 C; b.p. > 300 C; acid no. 0.2 max.; hyd. no. 100-115; flash pt. 279 C; 0.2% max. water

Chem. Descrip.: 2-Butyl octanoic acid
CAS 27610-92-0; EINECS/ELINCS 248-570-1
Uses: Emollient for pharmaceuticals
Properties: APHA 400 max. liq.; odorless; m.w. 202-206; sp.gr. 0.887; visc. 30 mPa•s; m.p. -10 to -14 C; acid no. 273-283 max.; iodine no. 2 max.; flash pt. 160 C; ref. index 1.4394; 0.1% max. water

Chem. Descrip.: PEG-4
CAS 25322-68-3 (generic); EINECS/ELINCS 203-989-9
Uses: Base, coupling agent for pharmaceutical and oral care preps.
Properties: Water-wh. liq.; bland odor; sol. in
water; sp. gr. 1.1; flash pt. 300 F

Toxicology: Overexposure causes excessive watering, redness, and stinging to eyes; overexposure may cause skin rash; ing. can cause GI irritation, diarrhea, nausea, and vomiting

Hazardous Decomp. Prods.: COx

Jeechem 300 [Jeen Int'l.  
http://www.jeen.com]
Chem. Descrip.: PEG-6
CAS 25322-68-3 (generic)
Uses: Base, coupling agent for pharmaceutical and oral care preps.
Properties: Water-wh. liq.; bland odor; sol. in water; m.w. 285-315; sp. gr. 1.01

Toxicology: Overexposure causes excessive watering, redness, and stinging to eyes; overexposure may cause skin rash; noncarcinogenic

Precaution: Avoid contact with strong oxidizers

Hazardous Decomp. Prods.: COx

Jeechem 400 [Jeen Int'l.  
http://www.jeen.com]
Chem. Descrip.: PEG-8
EINECS/ELINCS 225-856-4
Uses: Base, coupling agent for pharmaceutical and oral care preps.
Properties: Water-wh. liq.; completely sol. in water; sp. gr. 1.01; flash pt. (COC) 485 F

Precaution: None

Hazardous Decomp. Prods.: None

Storage: Store at 60-100 F

Jeechem 600 [Jeen Int'l.  
http://www.jeen.com]
Chem. Descrip.: PEG-12
EINECS/ELINCS 229-859-1
Uses: Base, coupling agent for pharmaceutical and oral care preps.
Properties: Water-wh. liq., sp. gr. 1.125 sol. in water; b.p. >350 F; flash pt. (COC) >490 F

Precaution: None

Hazardous Decomp. Prods.: None

Storage: Store at 60-100 F

Jeechem 1450 NF [Jeen Int'l.  
http://www.jeen.com]
Chem. Descrip.: PEG-32
Chem. Analysis: <1% by wt. volatiles
EINECS/ELINCS 203-989-9
Uses: Base, coupling agent for pharmaceutical and oral care preps.
Properties: Wh. flakes; mild odor; sol. in water; m.w. 1450; sp. gr. 1.1; f.p. 50 C; m.p. 113 F; flash pt. (PM) >200 F; pH 4.5-7.5 (5% aq. sol'n.)

Toxicology: LD50 (oral, rat) 28gm/kg; (oral, mouse) 34gm/kg, (dermal, rabbit) >20 gm/kg; dust powd. may irritate eye tissue, nose, throat and respiratory tract; chronic overexposure may result in kidney and liver damage.; TSCA listed

Precaution: Wear chemicals goggles or full face shield, impervious gloves

Hazardous Decomp. Prods.: None

HMIS: Health 1, Flammability 0, Reactivity 0

Jeechem 1450 NF [Jeen Int'l.  
http://www.jeen.com]
Chem. Descrip.: Polysorbate 80 (95%), water (3%) and polyethylene glycol monooleate (1%)
CAS 9005-65-6; 9004-96-0
Uses: Surfactant; solubilizer for oils; emulsifier; lubricant

Features: Hydrophilic

Regulatory: DOT not regulated; kosher; FDA 21 CFR §73.1, 73.1001, 172.840, 173.340, 175.105, 175.300, 178.3400; CA Prop. 65; MA Right-to-Know

Properties: Yel. liq.; mild fatty odor; sol. in water; sp.gr. 1.09; visc. 425 cps; b.p. > 300; flash pt. > 300 C; pH (3% aq.) 6.5; nonionic

Toxicology: LD50 (oral, rat) > 5 g/kg

Precaution: Incompat. with strong oxidizers, acids, bases

HMIS: Health 0, Flammability 1, Reactivity 0

Jeffox® PPG-400 [Huntsman  
http://www.huntsman.com]
Chem. Descrip.: PPG 400  See PPG-9
CAS 25322-69-4
Uses: Intermediate yielding esters useful as lubricants, defoamers in pharmaceuticals
Properties: Water-wh. visc. liq., faint ether-like odor; m.w. 400; dens. 8.40 lb/gal; visc. 150-175 SUS (100 F); flash pt. (PMCC) 320 F; pour pt. -35 F; pH 5-7

Jeffox® PPG-2000 [Huntsman

http://www.jungbunzlauer.com]
Chem. Descrip.: Polysaccharide
Uses: Thickener and stabilizer for pharmaceuticals (suspensions, emulsions, tablets)
Regulatory: FDA 21CFR §172.695; EEC, FAO, FCC, USP, JSFA approved
Properties: Wh.- to cream-colored free-flowing powd., 100% < 250 µm (60 US mesh, normal), 100% < 180 µm (80 US mesh, fine); readily sol. in water; insol. in most org. solvs.; visc. 1300-1700 mPa•s; pH 7±1 (1%); anionic; 91-108% assay (dry basis); < 15% moisture
Use Level: 0.05-0.5% (food); 0.2-1.0% (cosmetics); 0.1-0.5% (pharm.); 0.05-0.4% (animal feed)
Storage: Store in cool, dry place; preservative rec. if stored > 24 h

**JustFiber® JF BF Granular** [Int'l. Fiber  
http://www.ifcfiber.com]
Chem. Descrip.: Dietary fiber from wheat, bamboo, or cottonseed
Uses: Excipient and binder for tableting; extender or carrier for active ingredients
Features: Inert; provides stable dimensional integrity; provides uniform fill volume for capsules
Properties: Dens., bulk 28.0 lb/ft³; water retention 1.5 g/g

**JustFiber® BF200** [Int'l. Fiber  
http://www.ifcfiber.com]
Chem. Descrip.: Dietary fiber from wheat, bamboo, or cottonseed
Uses: Excipient and binder for tableting; extender or carrier for active ingredients
Features: Inert; provides stable dimensional integrity; provides uniform fill volume for capsules
Properties: Avg. fiber length 35 µ; 90-100% through #100 mesh, 70-90% through #200 mesh; dens., bulk 15 lb/ft³; water retention 3.5 g/g

**JustFiber® JF BVF65** [Int'l. Fiber  
http://www.ifcfiber.com]
Chem. Descrip.: Dietary fiber from wheat, bamboo, or cottonseed
Uses: Excipient and binder for tableting; extender or carrier for active ingredients
Features: Inert; provides stable dimensional integrity; provides uniform fill volume for capsules
Properties: Avg. fiber length 55 µ; 80-95% through #100 mesh, 50-80% through #200 mesh; dens., bulk 14.0 lb/ft³; water retention 5.0 g/g

**JustFiber® WWF40** [Int'l. Fiber  
http://www.ifcfiber.com]
Chem. Descrip.: Dietary fiber from wheat, bamboo, or cottonseed
Uses: Excipient and binder for tableting; extender or carrier for active ingredients
Features: Inert; provides stable dimensional integrity; provides uniform fill volume for capsules
Properties: Avg. fiber length 60 µ; 60-90% through #100 mesh, 25-55% through #200 mesh; dens., bulk 8.0 lb/ft³; water retention 6.5 g/g

**Kalidone®** [Solabia  http://www.solabia.com]
Chem. Descrip.: Potassium PCA aq. sol'n.
CAS 4810-50-8; EINECS/ELINCS 225-373-9
Uses: Moisturizing agent for dermatological soap, shampoo, after-sun lotion, shower gel, nutritive and regenerative creams, hair comb-out balm
Properties: Liq., odorless; very water-sol.; m.w. 167.2; 50% act. in water
Use Level: 0.5-5%
Toxicology: Nontoxic; nonirritating to skin; very sl. irritating to eyes

**Kaopolite® 1147** [Kaopolite]
CAS 1327-36-2; EINECS/ELINCS 215-475-1
Uses: Abrasive for dentifrices
Properties: Powd.; 1.8 µ median particle size; 0.01% on 325 mesh; sp.gr. 2.62; dens. 21.91 lb/solid gal; bulking value 0.046 gal/lb; oil absorp. 65; brightness 93; ref. index 1.62; pH 5.5 (20% solids); hardness (Mohs) 5
Trade Name Reference

Kaopolite® SF [Kaopolite]
CAS 1327-36-2; EINECS/ELINCS 215-475-1
Uses: Gentle abrasive for dentifrices
Properties: Fine dry powd.; 0.7 µ median particle size; 0.01% on 325 mesh; sp.gr. 2.62; dens. 21.91 lb/solid gal; bulking value 0.046 gal/lb; oil absorp. 50; brightness 90; ref. index 1.62; pH 4.7 (20% solids); hardness (Mohs) 7

Chem. Descrip.: Glyceryl alginate
Uses: Moisturizer, carrier for other ingreds.
used in pharmaceuticals, medical applics., health-care prods.
Features: Stable
Regulatory: DOT nonregulated
Properties: Golden yel. gel; char. odor; sol. in water; dens. 1.07 g/cc; vapor pressure negligible; flash pt. none
Toxicology: Not considered toxic by normal routes of exposure
Precaution: Incompat. with strong oxidizers; spillages may be slippery; avoid extreme temps.
Hazardous Decomp. Prods.: COx, NOx
HMIS: Health 0, Flammability 0, Reactivity 0

Karaya Gum FCC [Frutarom http://www.frutarom.com]
Chem. Descrip.: Karaya gum See Karaya (Serculia urens) gum
CAS 9000-36-6; EINECS/ELINCS 232-539-4
Uses: Stabilizer, water binder, emulsifier in pharmaceuticals (bulk laxatives, denture adhesives)
Properties: Water-sol.

Kaydol® [Chemtura http://www.chemtura.com]
Chem Descirp.: Wh. mineral oil USP and Vitamin E (5-10 ppm) See Mineral oil; Acid red 18
CAS 8042-47-5; 59-02-9
Uses: Binder, carrier, conditioner, dispersant, extender, heat transfer agent, lubricant, moisture barrier, plasticizer, protective agent
Regulatory: DOT, IMDG, ICAo not regulated;
SARA §311/312/313 nonreportable; NJ Right-to-Know; Canada DSL; Australia AICS; Japan ENCS; Korea ECL
Properties: Water-wh. liq.; odorless; tasteless; insol. in water; sol. in organic solvents; sp.gr. 0.869-0.885; visc. 64-70 cSt (40 C); vapor pressure < 0.01 mm Hg; pour pt. -23 C; flash pt. > 188 C; partitioning coefficient log POW > 6; 0% volatiles

Laxatives
Regulatory: FDA 21CFR §172.878, §178.3620a; DOT, IMDG, ICAo nonregulated; SARA §311/312/313 nonreportable; NJ Right-to-Know; Canada DSL; Australia AICS; Japan ENCS; Korea ECL
Properties: Water-wh. liq.; odorless; insol. in water; sol. in organic solvs.; sp.gr. < 1; kinematic visc. > 30 mm²/s @ 40 C; vapor pressure <0.008 hPa; b.p. > 230 C; flash pt. (COC) > 188 C; partitioning coefficient greater than 6 log

Handbook of Pharmaceutical Additives, Third Edition 346
POW

**Toxicology:** LD50 (oral, rat) > 5000 mg/kg; prolonged, repeated contact may cause skin, respiratory tract irritation; inh. may be harmful; TSCA listed

**Precaution:** Wear oil resistant gloves, face shield or chemical goggles, protective clothing; incompat. with oxidizers, sunlight, ultraviolet light, heat, high temps.

**Hazardous Decomp. Prods.:** Oxides of carbon, soot

**HMIS:** Health 0, Flammability 1, Reactivity 0

**Storage:** Keep tightly closed away from heat, flame, strong sunlight in dry place

**KELACID® NF** [ISP Alginates]

**Chem. Descrip.:** Alginic acid

**CAS:** 9005-32-7; EINECS/ELINCS 232-680-1

**Uses:** Gellant, emulsifier, stabilizer for pharmaceuticals; tablet disintegrant, hemostatic agent; antacid tablets; primary reagent

**Features:** Starch-free; low sodium content (0.5-1.5%)

**Regulatory:** FDA 21CFR §184.1011, GRAS; FCC/NF compliance; Kosher approved

**Properties:** Wh. fibrous particles, odorless and tasteless; 93% min. through 80 mesh, 88% min. through 100 mesh; sol. in alkaline sol’n.; swells in water; bulk dens. ≈ 50 lb/ft³; pH 2.6-3.2 (3% aq. slurry); surf. tens. 53 dynes/cm; 7% moisture

**Toxicology:** LD50 (oral, rat) > 5000 mg/kg; excessive dust inhalation may cause respiratory irritation; dry powd. may cause eye irritation

**Precaution:** Not flamm., but powd. will burn if involved in a fire; spills are slippery when wet; incompat. with strong oxidizers

**Storage:** Store in cool, dry place

**Kelcogel®** [CP Kelco]

**Chem. Descrip.:** Purified gellan gum FCC

**CAS:** 71010-52-1; EINECS/ELINCS 275-117-5

**Uses:** Gellant in pharmaceuticals (liq., semisolid, and solid dosage forms, oral, mucosal, and transdermal drug delivery, encapsulation, tablet disintegration/controlled release)

**Regulatory:** FDA 21CFR §172.665; EU E418, JECFA, Japan, Canada approvals

**Properties:** Wh. to tan powd., sl. odor; 100 mesh; water-sol.; bulk dens. ≈ 50 lb/ft³; pH 4.5-7.5

**Toxicology:** LD50 (oral, rat) > 5000 mg/kg; excessive dust inhalation may cause respiratory irritation; dry powd. may cause eye irritation

**Environmental:** Readily biodeg.

**Precaution:** Not flamm., but powd. will burn if involved in a fire; spills are slippery when wet; incompat. with strong oxidizers

**Storage:** Store in cool, dry place

**Kelcogel® F** [CP Kelco]

**Chem. Descrip.:** Gellan gum

**CAS:** 71010-52-1; EINECS/ELINCS 275-117-5

**Uses:** Gellant in pharmaceuticals (liq., semisolid, and solid dosage forms, oral, mucosal, and transdermal drug delivery, encapsulation, tablet disintegration/controlled release)

**Regulatory:** FDA 21CFR §172.665; EU E418, JECFA, Japan, Canada approvals

**Properties:** Wh. to tan powd., sl. odor; 100 mesh; water-sol.; bulk dens. ≈ 50 lb/ft³; pH 4.5-7.5

**Toxicology:** LD50 (oral, rat) > 5000 mg/kg; excessive dust inhalation may cause respiratory irritation; dry powd. may cause eye irritation

**Environmental:** Readily biodeg.

**Precaution:** Not flamm., but powd. will burn if involved in a fire; spills are slippery when wet; incompat. with strong oxidizers

**Storage:** Store in cool, dry place

**KELCOLOID® HVF** [ISP Alginates]

**Chem. Descrip.:** Propylene glycol alginate

**CAS:** 9005-37-2

**Uses:** Gellant, emulsifier, and stabilizer in pharmaceuticals; thickener for low pH prods. such as cough syrups

**Regulatory:** FDA 21CFR §172.858, EU E405 compliance

**Properties:** Cream fibrous particles, sl. odor; 175 µ particle size; 80 mesh; sol. in water; sp.gr. 1.46; dens. 33.71 lb/ft³; visc. 400 cps (1%), 7000 cps (2%); ref. index 1.3343; pH 3.7; surf. tens. 58 dynes/cm

**Toxicology:** LD50 (oral, rat) > 5000 mg/kg; dry powd. may cause eye irritation
Trade Name Reference

**Precaution:** Incompat. with strong oxidizers

**KELCOLOID® LVF** [ISP Alginates http://www.ispcorp.com]
Chem. Descrip.: Propylene glycol alginate
CAS 9005-37-2
Uses: Gellant, emulsifier, and stabilizer for pharmaceuticals, vitamin emulsions in low pH or neutral prods., oral min. oil emulsions

**Regulatory:** FDA 21CFR §172.858, EU E405 compliance

**Properties:** Cream fibrous particles; 175 µ particle size; 80 mesh; sp.gr. 1.46; dens. 33.71 lb/ft³; visc. 120 cps (1%), 1200 cps (2%); ref. index 1.3343; pH 3.7; surf. tens. 58 dynes/cm

**Toxicology:** LD50 (oral, rat) > 5000 mg/kg; dry powd. may cause eye irritation

**Precaution:** Incompat. with strong oxidizers

**KELCOLOID® O** [ISP Alginates http://www.ispcorp.com]
Chem. Descrip.: Propylene glycol alginate
CAS 9005-37-2
Uses: Gellant, emulsifier, and stabilizer in pharmaceuticals

**Regulatory:** FDA 21CFR §172.858, EU E405 compliance

**Properties:** Cream fibrous particles; 175 µ particle size; sp.gr. 1.46; dens. 33.71 lb/ft³; visc. 25 cps (1%), 130 cps (2%); ref. index 1.3343; pH 4.0; surf. tens. 58 dynes/cm

**Toxicology:** LD50 (oral, rat) > 5000 mg/kg; dry powd. may cause eye irritation

**Precaution:** Incompat. with strong oxidizers

**KELCOLOID® S** [ISP Alginates http://www.ispcorp.com]
Chem. Descrip.: Propylene glycol alginate
CAS 9005-37-2
Uses: Gellant, emulsifier, and stabilizer in pharmaceuticals

**Regulatory:** FDA 21CFR §172.858, EU E405 compliance

**Properties:** Cream fibrous particles; 175 µ particle size; sp.gr. 1.46; dens. 33.71 lb/ft³; visc. 20 cps (1%), 120 cps (2%); ref. index 1.3343; pH 4.1; surf. tens. 58 dynes/cm

**Toxicology:** LD50 (oral, rat) > 5000 mg/kg; dry powd. may cause eye irritation

**Precaution:** Incompat. with strong oxidizers

**KELCOSOL®** [ISP Alginates http://www.ispcorp.com]
Chem. Descrip.: Algin
CAS 9005-38-3
Uses: Gellant, suspending agent, emulsifier, thickener, and stabilizer in pharmaceuticals, surgical jellies; tablet binder; control agent in sustained release tablets

**Features:** High visc.

**Regulatory:** FDA 21CFR §184.1724, GRAS; EU E401 compliance

**Properties:** Cream fibrous particles, sl. odor; 80 mesh; water-sol.; sp.gr. 1.59; dens. 54.62 lb/ft³; visc. 300 cps (1%), 4000 cps (2%); pH 7; surf. tens. 62 dynes/cm; 13% moisture

**Toxicology:** LD50 (oral, rat) > 5000 mg/kg; dry powd. may cause eye irritation

**Precaution:** Incompat. with strong oxidizers

**Keldent®** [CP Kelco http://www.cpkelco.com]
CAS 11138-66-2; EINECS/ELINCS 234-394-2
Uses: Water binder in toothpaste

**Features:** Rec. when compat. with other hydrocolloids is required

**Regulatory:** FDA 21CFR §184.1724, GRAS; EU E401 compliance

**Properties:** Cream fibrous particles; 30 mesh; water-sol.; sp.gr. 1.59; dens. 54.62 lb/ft³; visc. 300 cps (1%), 4000 cps (2%); ref. index 1.3343; pH 7; surf. tens. 62 dynes/cm; 13% moisture

**Toxicology:** LD50 (oral, rat) > 5000 mg/kg; dry powd. may cause eye irritation

**Precaution:** Incompat. with strong oxidizers
Trade Name Reference

Precaution: Incompat. with strong oxidizers

KELGIN® LV [ISP Alginates http://www.ispcorp.com]
Chem. Descrip.: Algin
CAS 9005-38-3
Uses: Gellant, emulsifier, thickener, and stabilizer for pharmaceutical applics., surgical jellies; gellant in wound healing films
Features: Low-visc.
Regulatory: FDA 21CFR §184.1724, GRAS; EU E401 compliance
Properties: Ivory gran., sl. odor; 42 mesh; water-sol.; sp.gr. 1.59; dens. 54.62 lb/ft³; visc. 60 cps (1%), 500 cps (2%); ref. index 1.3343; pH 7; surf. tens. 62 dynes/cm; 13% moisture
Toxicology: LD₅₀ (oral, rat) > 5000 mg/kg; dry powd. may cause eye irritation
Precaution: Incompat. with strong oxidizers

KELGIN® MV [ISP Alginates http://www.ispcorp.com]
Chem. Descrip.: Algin
CAS 9005-38-3
Uses: Gellant, emulsifier, thickener, and stabilizer for pharmaceuticals, ointments, suppositories, lubricating/surgical jellies; bulk laxative
Features: Med.-visc.
Regulatory: FDA 21CFR §184.1724, GRAS; EU E401 compliance
Properties: Ivory gran., sl. odor; 30 mesh; water-sol.; sp.gr. 1.59; dens. 54.62 lb/ft³; visc. 400 cps (1%), 6000 cps (2%); ref. index 1.3343; pH 7; surf. tens. 62 dynes/cm; 13% moisture
Toxicology: LD₅₀ (oral, rat) > 5000 mg/kg; dry powd. may cause eye irritation
Precaution: Incompat. with strong oxidizers

KELGIN® QL [ISP Alginates http://www.ispcorp.com]
Chem. Descrip.: Sodium alginate blend See Algin
CAS 9005-38-3
Uses: Gelling agent, emulsifier, and stabilizer in pharmaceutical applics.
Properties: Ivory gran. particles; visc. 30 cps; pH neutral.

KELGIN® XL [ISP Alginates http://www.ispcorp.com]
Chem. Descrip.: Refined sodium alginate See Algin
CAS 9005-38-3
Uses: Gellant, emulsifier, thickener, and stabilizer for pharmaceuticals, lotions, ointments
Features: Self-gelling gum
Regulatory: FDA 21CFR §184.1724, GRAS; EU E401 compliance
Properties: Lt. ivory soft gel, sl. odor; 177 µ

Kelisema Shea Butter [Kelisema Srl http://www.kelisema.it; Delta Tècnic http://www.deltatecnic.com]
Chem. Descrip.: Shea butter See Shea butter (Butyrospermum parkii)
CAS 68424-60-2; EINECS/ELINCS 293-515-7
Uses: Emollient, fatting agent for skin-protecting treatments and in preps. against dry skin, dermatitis, dermatosis, eczema, solar erythema, burns, and gingivitis
Features: Natural ingred.

KELMAR® [ISP Alginates http://www.ispcorp.com]
Chem. Descrip.: Potassium alginate
CAS 9005-36-1
Uses: Gellant in dental impression compds.; suspending agent, thickener in low- or no-sodium pharmaceuticals
Regulatory: FDA 21CFR §184.1610, GRAS; EU E402 compliance
Properties: Cream gran., sl. odor; 100 mesh; water-sol.; bulk dens. ≈ 50 lb/ft³; visc. 270 cps (1%), 3200 cps (2%); pH 7.0
Toxicology: LD₅₀ (oral, rat) > 5000 mg/kg; excessive dust inhalation may cause respiratory irritation; dry powd. may cause eye irritation
Precaution: Not flamm., but powd. will burn if involved in a fire; spills may be slippery; incompat. with strong oxidizers

KELSET® [ISP Alginates http://www.ispcorp.com]
Chem. Descrip.: Sodium alginate See Algin
CAS 9005-38-3
Uses: Gellant, emulsifier, and stabilizer for pharmaceuticals, lotions, ointments
Features: Self-gelling gum
Regulatory: FDA 21CFR §184.1724, GRAS; EU E401 compliance
Properties: Lt. ivory soft gel, sl. odor; 177 µ
Trade Name Reference

KELTONE® HV [ISP Alginates http://www.ispcorp.com]
Chem. Descrip.: Low calcium sodium alginate NF See Algin
CAS 9005-38-3
Uses: Gellant, thickener, stabilizer, suspending agent, film-former in pharmaceuticals, surgical jellies, denture adhesives; gellant in dental impression compds.; encapsulant for controlled-release drugs, enzyme immobilization
Features: Med. visc.
Regulatory: FDA 21CFR §184.1724, GRAS; EU E401 compliance; Kosher approved
Properties: Wh. to tan powd., sl. odor; 95% min. through 60 mesh, 90% min. through 80 mesh; water-sol.; bulk dens. ≈ 50 lb/ft³; pH 7; 90.8-106.0% assay
Toxicology: LD50 (oral, rat) > 5000 mg/kg; dry powd. may cause eye irritation
Precaution: Incompat. with strong oxidizers
Storage: Store in cool, dry place @ 46-59 F

KELTONE® HVCR [ISP Alginates http://www.ispcorp.com]
Chem. Descrip.: Sodium alginate NF/PhEur See Algin
CAS 9005-38-3
Uses: Thickener, suspending agent, and gellant for pharmaceuticals, sustained-release tablets
Features: High-visc.; rec. for drugs with greater sol. in gastric than in intestinal fluid
Regulatory: Kosher approved
Properties: Powd.; 95% min. through 60 mesh, 90% min. through 80 mesh; visc. 600-900 cP (1-1.25%); pH 6.4-8.0 (1-1.25%)
Storage: Store in cool, dry place @ 46-59 F

KELTONE® LVCR [ISP Alginates http://www.ispcorp.com]
Chem. Descrip.: Sodium alginate NF/PhEur See Algin
CAS 9005-38-3
Uses: Thickener, suspending agent, and gellant for pharmaceuticals, sustained-release tablets
Features: Low-visc.; rec. where rapid release in intestinal fluid is desirable
Regulatory: NF/Ph.Eur; Kosher approved
Properties: Powd.; 95% min. through 100 mesh, 85% min. through 150 mesh; visc. 100-300 cP (2%); pH 6.4-8.0 (2%); 90.8-106.0% assay
Storage: Store in cool, dry place @ 46-59 F

KELTOSE® [ISP Alginates http://www.ispcorp.com]
Chem. Descrip.: Calcium alginate and ammonium alginate
Uses: Tablet binder and disintegrant for pharmaceuticals; bulk laxatives (contributes bulk and lubrication to the intestines)
Regulatory: FDA GRAS
Properties: Ivory gran., sl. odor; 177 µ particle size; 80 mesh; water-sol.; dens. ≈ 50 lb/ft³; visc. 250 cps; pH 7.0
Toxicology: LD50 (oral, rat) > 5000 mg/kg; dry powd. may cause eye irritation, skin irritation on prolonged contact; excessive dust inhalation may cause respiratory irritation
Environmental: Readily biodeg.
Precaution: Not flamm., but powd. will burn if involved in a fire; spills may be slippery; incompat. with strong oxidizers, alkaline sol'ns.
Storage: Store in cool, dry place
Keltrol® [CP Kelco http://www.cpkelco.com]  
Chem. Descrip.: Food-grade xanthan gum  
CAS 11138-66-2; EINECS/ELINCS 234-394-2  
Uses: Thickener, emulsion stabilizer, suspending agent in creams, lotions, pharmaceuticals; binder in toothpaste  
Features: Stable in acid systems; salt compatibility  
Regulatory: FDA 21CFR §172.695; EU E415 compliance  
Properties: Cream to wh. powd., sl. odor; ≥ 95% through 80 mesh; sol. in hot and cold water; swells in glycerin and propylene glycol; sp.gr. 1.5; bulk dens. ≈ 52.2 lb/ft³; visc. 1200-1600 cps (1% gum in 1% KCl sol’n.); pH 7.0; surf. tens. 75 dynes/cm; 11% moisture  
Toxicology: LD50 (oral, rat) > 5000 mg/kg; excessive dust inhalation may cause respiratory irritation; dry powd. may cause eye irritation  
Environmental: Readily biodeg.  
Precaution: Not flamm., but powd. will burn if involved in a fire; spills are slippery; incompat. with strong oxidizers  

Keltrol® 1000 [CP Kelco http://www.cpkelco.com]  
Chem. Descrip.: Xanthan gum  
CAS 11138-66-2; EINECS/ELINCS 234-394-2  
Uses: High microbiological purity grade thickener, stabilizer for toothpaste, pharmaceuticals  
Features: High microbiological purity grade  
Regulatory: FDA 21CFR §172.695; EU E415 compliance  
Properties: Wh. to tan powd., sl. odor; 175 µ particle size; water-sol.; bulk dens. ≈ 50 lb/ft³; visc. 1400 cps (1%); pH 7.0  
Toxicology: LD50 (oral, rat) > 5000 mg/kg; excessive dust inhalation may cause respiratory irritation; dry powd. may cause eye irritation  
Environmental: Readily biodeg.  
Precaution: Not flamm., but powd. will burn if involved in a fire; spills are slippery; incompat. with strong oxidizers  

Keltrol® BT [CP Kelco http://www.cpkelco.com]  
Chem. Descrip.: Xanthan gum  
CAS 11138-66-2; EINECS/ELINCS 234-394-2  
Uses: Thickener, suspending agent, emulsifier, stabilizer for toothpaste, pharmaceuticals; excipient for OTC drugs  
Features: Brine tolerant; improved sol. in high salt systems  
Regulatory: FDA 21CFR §172.695; FCC, NF, EU E415 compliance; Kosher approved  
Properties: Cream to wh. gran. powd., sl. odor; ≥ 95% through 80 mesh; sol. in hot or cold water; bulk dens. ≈ 50 lb/ft³; visc. 1200-1600 cps (1% gum in 1% KCl sol’n.); pH 6.1-8.1 (1% aqu.); 6-14% moisture  
Toxicology: LD50 (oral, rat) > 5000 mg/kg; excessive dust inhalation may cause respiratory irritation; dry powd. may cause eye irritation  
Environmental: Readily biodeg.  
Precaution: Not flamm., but powd. will burn if involved in a fire; spills are slippery; incompat. with strong oxidizers  

Storage: Store in sealed containers in cool, dry place @ 46-59 F  

Keltrol® CG [CP Kelco http://www.cpkelco.com]  
Chem. Descrip.: Xanthan gum NF  
CAS 11138-66-2; EINECS/ELINCS 234-394-2  
Uses: Stabilizer, pigment suspending agent in pharmaceuticals; stabilizer for oil phase in o/w emulsions used in lotions  

Keltrol® CG T [CP Kelco http://www.cpkelco.com]  
Chem. Descrip.: Xanthan gum  
CAS 11138-66-2; EINECS/ELINCS 234-394-2  
Uses: Stabilizer, pigment suspending agent in pharmaceuticals  
Properties: Clarified grade  

Keltrol® CR [CP Kelco http://www.cpkelco.com]  
Chem. Descrip.: Xanthan gum NF  
CAS 11138-66-2; EINECS/ELINCS 234-394-2  
Uses: Emulsifier, thickener, suspending and gelling agent for pharmaceuticals, high dosage drugs, intermediate and low sol. drugs  
Regulatory: FDA 21CFR §172.695; EU E415 compliance; Kosher approved  
Properties: Wh. to tan powd., sl. odor; 100% min. through 80 mesh, 92% min. through 200 mesh; water-sol.; bulk dens. ≈ 50 lb/ft³; visc. 1200-1600 cP (1% salt sol’n.); pH 6.1-8.1 (1%); 91-108% assay  
Toxicology: LD50 (oral, rat) > 5000 mg/kg; excessive dust inhalation may cause respiratory irritation; dry powd. may cause eye irritation  
Environmental: Readily biodeg.  

Handbook of Pharmaceutical Additives, Third Edition 351
Precaution: Not flamm., but powd. will burn if involved in a fire; spills are slippery; incompat. with strong oxidizers
Storage: Store in sealed containers in cool, dry place @ 46-59 F

Keltrol® F [CP Kelco](http://www.cpkelco.com)
Chem. Descrip.: Food-grade xanthan gum
CAS 11138-66-2; EINECS/ELINCS 234-394-2
Uses: Stabilizer, thickener, emulsion stabilizer in creams, lotions, pharmaceuticals; binder in toothpaste; suspending agent
Features: Rapidly soluble
Regulatory: FDA 21CFR §172.695; EU E415 compliance
Properties: Cream to wh. powd.; ≥ 92% through 200 mesh; sol. in cold and hot water; swells in glycerin and propylene glycol; sp.gr. 1.5; bulk dens. 52.2 lb/ft³; visc. 1200-1600 cps (1% gum in 1% KCl sol'n.); pH 7.0; surf. tens. 75 dynes/cm; 11% moisture
Toxicology: LD50 (oral, rat) > 5000 mg/kg; excessive dust inhalation may cause respiratory irritation; dry powd. may cause eye irritation
Environmental: Readily biodeg.
Precaution: Not flamm., but powd. will burn if involved in a fire; spills are slippery; incompat. with strong oxidizers

Keltrol® RD [CP Kelco](http://www.cpkelco.com)
Chem. Descrip.: Xanthan gum
CAS 11138-66-2; EINECS/ELINCS 234-394-2
Uses: Thickener, stabilizer for toothpaste, pharmaceuticals
Features: Readily dispersible
Regulatory: FDA 21CFR §172.695; EU E415 compliance
Properties: Wh. to tan powd., sl. odor; 990 µ particle size; water-sol.; bulk dens. ≈ 50 lb/ft³; visc. 1400 cps (%); pH 7.0
Toxicology: LD50 (oral, rat) > 5000 mg/kg; excessive dust inhalation may cause respiratory irritation; dry powd. may cause eye irritation
Environmental: Readily biodeg.
Precaution: Not flamm., but powd. will burn if involved in a fire; spills are slippery; incompat. with strong oxidizers

Keltrol® GM [CP Kelco](http://www.cpkelco.com)
Chem. Descrip.: Xanthan gum
CAS 11138-66-2; EINECS/ELINCS 234-394-2
Uses: Thickener, suspending agent, stabilizer for toothpaste, pharmaceuticals
Features: Dust-free
Regulatory: FDA 21CFR §172.695; FCC, NF, EU E415 compliance; kosher
Properties: Cream to wh. gran. powd., sl. odor; ≥ 95% through 42 mesh, ≤ 25% through 100 mesh; sol. in cold or hot water; bulk dens. ≈ 50 lb/ft³; visc. 1200-1600 cps (1% gum in 1% KCl sol'n.); pH 6.1-8.0 (1% aq.)
Toxicology: LD50 (oral, rat) > 5000 mg/kg; excessive dust inhalation may cause respiratory irritation; dry powd. may cause eye irritation
Environmental: Readily biodeg.
Precaution: Not flamm., but powd. will burn if involved in a fire; spills are slippery; incompat. with strong oxidizers

Keltrol® SF [CP Kelco](http://www.cpkelco.com)
Chem. Descrip.: Xanthan gum
CAS 11138-66-2; EINECS/ELINCS 234-394-2
Uses: Thickener, suspending agent, stabilizer for toothpaste, pharmaceuticals
Features: Altered rheology
Regulatory: FDA 21CFR §172.695; FCC, NF, EU E415 compliance; kosher
Properties: Wh. to cream powd., sl. odor; ≥ 100% through 60 mesh, ≥ 95% through 80 mesh; sol. in cold or hot water; bulk dens. ≈ 50 lb/ft³; visc. 800-1300 cps; pH 6.1-8.1
Toxicology: LD50 (oral, rat) > 5000 mg/kg; excessive dust inhalation may cause respiratory irritation; dry powd. may cause eye irritation
Environmental: Readily biodeg.
Precaution: Not flamm., but powd. will burn if involved in a fire; spills are slippery; incompat. with strong oxidizers

Keltrol® T [CP Kelco](http://www.cpkelco.com)
Chem. Descrip.: Xanthan gum
CAS 11138-66-2; EINECS/ELINCS 234-394-2
Uses: Emulsifier, thickener, suspending agent, flocculant, emulsion stabilizer, foam stabilizer for pharmaceuticals, medicated syrups, elixirs, antacids, lotions, creams, toothpaste, oral min. oil emulsions
Features: Produces clear sol'ns.
Regulatory: FDA 21CFR §172.695; FCC, NF, EU E415 compliance; kosher
Trade Name Reference

**Properties:** Cream to wh. powd., sl. odor; 100% through 60 mesh, ≥ 95% through 80 mesh; sol. in hot or cold water; bulk dens. ≈ 50 lb/ft³; visc. 1200-1600 cps (1% gum in 1% KCl sol'n.); pH 7.0±1.0

**Toxicology:** LD50 (oral, rat) > 5000 mg/kg; excessive dust inhalation may cause respiratory irritation; dry powd. may cause eye irritation

**Environmental:** Readily biodeg.

**Precaution:** Not flamm., but powd. will burn if involved in a fire; spills are slippery; incompat. with strong oxidizers

**Storage:** Store in sealed containers in cool, dry place @ 46-59 F

Keltrol® TF [CP Kelco http://www.cpkelco.com]

**Chem. Descrip.:** Xanthan gum

**CAS 11138-66-2; EINECS/ELINCS 234-394-2**

**Uses:** Emulsifier, thickener, suspending agent, emulsion stabilizer, foam stabilizer for pharmaceuticals, medicated syrups, antacids, lotions, creams, toothpaste

**Features:** Rapidly soluble; suitable for clear systems

**Regulatory:** FDA 21CFR §172.695; FCC, NF, EU E415 compliance; kosher

Kemester® EGDS [Chemtura http://www.chemtura.com]

**Chem. Descrip.:** Glycol distearate

**CAS 627-83-8; EINECS/ELINCS 211-014-3**

**Uses:** Opacifier, pearlescent, thickener for pharmaceuticals

**Regulatory:** FDA accepted

Kemester® S80 [Chemtura http://www.chemtura.com]

**Chem. Descrip.:** Sorbitan oleate

**CAS 1338-43-8; EINECS/ELINCS 215-665-4**

**Uses:** Emulsifier for pharmaceuticals

Kemester® S85 [Chemtura http://www.chemtura.com]

**Chem. Descrip.:** Sorbitan trioleate

**CAS 26266-58-0; EINECS/ELINCS 247-569-3**

**Uses:** Emulsifier for pharmaceuticals

**Chem. Descrip.:** Aluminum distearate

**CAS 6865-35-6; EINECS/ELINCS 229-966-3**

**Uses:** Lubricant and compactant in pharmaceutical prods.

**Properties:** Wh. powd.; typical odor; negligible sol. in water (4.7 mg/l); dens. 1.01 g/ml; m.p. ≈ 160 C

**Toxicology:** LD50 (oral, rat) > 2 g/kg

**Environmental:** Biodeg. (28 days) 6.5; COD 3100 mg O₂/g; BOD28 202 mg O₂/g

**Precaution:** Wear goggles, and gloves; use approved breathing mask; do not breathe the fumes, vapors, or dust; keep out of sewers, drains, surface and underground water and the ground; avoid sources of ignition and dust formation; dust-air mixt. can explode

**Storage:** Store in closed original packing in dry conditions @ R.T. away from direct sunlight and strong odors

**Chem. Descrip.:** Barium stearate

**CAS 6865-35-6; EINECS/ELINCS 229-966-3**

**Uses:** Gellant, suspending agent, emulsifier, and stabilizer for pharmaceuticals, dental release agents; stabilizer for dentures and adhesive pads

**Regulatory:** FDA 21CFR §184.1724, GRAS; EU E401 compliance
Trade Name Reference

UN 1564
Uses: Lubricant and compactant in pharmaceutical prods.

Properties: Wh. powd.; typical odor; insol. in water; apparent dens. ≈ 0.3-0.5 g/ml; m.p. > 200

Toxicology: LD50 (oral, rat) > 2.5 g/kg; LC50 (inhal. mammal, 4 h) >1200 mg/kg

Precaution: Wear goggles, and gloves; use approved breathing mask; do not breathe the fumes, vapors, or dust; keep out of sewers, drains, surface and underground water and the ground; avoid sources of ignition and dust formation; dust-air mixt. can explode

Storage: Store in closed original packing in dry conditions @ R.T. away from direct sunlight and strong odors

Chem. Descrip.: Zinc stearate
CAS 557-05-1; EINECS/ELINCS 209-151-9
Uses: Lubricant and compactant in pharmaceutical prods.

Properties: Wh. powd.; typical odor; negligibly sol. in water (0.9 mg/l); dens. ≈ 1.02 g/ml; m.p. ≈ 120 C; pH 7-9

Toxicology: LD50 (oral, rat) > 5 g/kg

Environmental: Biodeg. (28 d) 93%; LC50 (fish) > 100 mg/l; COD 145 mg O2/g

Precaution: Wear goggles, and gloves; use approved breathing mask; do not breathe the fumes, vapors, or dust; keep out of sewers, drains, surface and underground water and the ground; avoid sources of ignition and dust formation; dust-air mixt. can explode

Kiccolate® ND-2HS [Asahi Kasei
http://www.asahi-kasei.co.jp]
Chem. Descrip.: Croscarmellose sodium
CAS 74811-65-7
Uses: Disintegrant for pharmaceutical tablets, capsules, and granules
Features: Rapid disintegration and dissolution
Regulatory: USP/NF, EP, JPE
Properties: Particle size ≤ 5% through #200 sieve; bulk dens. 0.45 g/cm³ (loose); bulk dens. 0.69 g/cm³ (tapped)

Kiccolate® ND-200 [Asahi Kasei
http://www.asahi-kasei.co.jp]
Chem. Descrip.: Croscarmellose sodium
CAS 74811-65-7
Uses: Disintegrant for pharmaceutical tablets, capsules, and granules
Features: Rapid disintegration and dissolution
Regulatory: USP/NF, EP, JPE
Properties: Particle size ≤ 5% through #200 sieve; bulk dens. 0.44 g/cm³ (loose); bulk dens. 0.65 g/cm³ (tapped)

Kirnol® Range [Cognis
http://www.cognis.de]
Chem. Descrip.: Fatty acid mono and
Trade Name Reference

**diglycerides** based or vegetable or animal sources  
See Mono- and diglycerides of fatty acids

Uses:  
Emulsifier for pharmaceuticals  
(capsules, powds., syrups, tablets)

Features: General purpose

Properties: Nonionic; < 60% mono content

**KLEA 508A** [INEOS Fluor Am.  
http://www.ineosfluor.com; INEOS Fluor UK  
http://www.ineosfluor.com]
Chem. Descrip.: Trifluoromethane (39%), hexafluoroethane (61%)
Uses:  
Azeotropic refrigerant for use in low temp. appls. such as biomedical freezing

Properties: Dens. 6.73 kg/m³; bubble pt. -85.69 C

**Klearol®** [Chemtura  
http://www.chemtura.com]
Chem. Descrip.: Wh. mineral oil NF  
CAS 8020-83-5; EINECS/ELINCS 232-384-2
Uses:  
Emollient, gloss aid, plasticizer, release agent, softener in pharmaceuticals

Regulatory: FDA 21CFR §172.878, §178.3620a

Properties: Water-wh., odorless, tasteless; sp.gr. 0.822-0.833; visc. 7-10 cSt (40 C); pour pt. -7 C; flash pt. 138 C

**Kleptose® DC** [Roquette  
http://www.roquette.fr]
Chem. Descrip.: β-Cyclodextrin See Cyclodextrin  
CAS 7585-39-9; EINECS/ELINCS 231-493-2
Uses:  
Encapsulating agent, bioavailability enhancer, compression aid, solubilizer, taste-masking agent for pharmaceutical tablets, capsules, sachets, syrups, solutions and oral suspensions

Features: Used in direct compression applications

Regulatory: USP/NF, JPE

Properties: Wh. crystalline powd.; odorless, sl. sweet taste; sol in water (1.6g / 100ml )

**Klucel® EF Pharm** [Hercules/Aqualon  
http://www.aqualon.com]
CAS 9004-64-2
Uses:  
Surfactant, thickener, stabilizer, film-former, suspending agent, protective colloid, coating agent in pharmaceuticals, tablet coatings, controlled-release prods., encapsulation; tablet binder

Regulatory: NF, EP, JP

Properties: Off-wh. powd., tasteless; 99% through 20 mesh; sol. in water (below 38 C) and many polar org. solvs.; m.w. 80,000; visc. 300-600 cps (10% aq.); bulk dens. 0.5 g/ml; soften. pt. 100-150 C; pH 5.0-7.5 (2%); nonionic; 5% max. moisture

**Klucel® E Pharm** [Hercules/Aqualon  
http://www.aqualon.com]
CAS 9004-64-2
Uses:  
Thickener, stabilizer, suspending agent in pharmaceutical tablet coatings, controlled-release prods., encapsulation, tablet binding

Features: Highly surf. active; low surf. and interfacial tensions; thermoplastic; extrudable; heat-sealable in films and coatings; inert

Regulatory: NF, EP, JP, DMF listed

Properties: Off-wh. powd.; tasteless; 85% min. through 30 mesh, 99% min. through 20 mesh;
sol. in water (below 38 C), polar org. solvs.;
insol. in water (above 45 C); sp.gr. 1.010 (2%,
30 C); visc. 200-600 cps (10% aq.); soften. pt.
100-150 C; pH 5.0-7.5; ref. index 1.337 (2%);
surf. tens. 43.6 dynes/cm (0.1%); nonionic; 5% max.
mor. moisture

Klucel® EXF Pharm [Hercules/Aqualon
http://www.aqualon.com]
Chem. Descrip.: Hydroxypropylcellulose NF,
EP, JP
CAS 9004-64-2
Uses: Surfactant, thickener, stabilizer,
suspending agent in pharmaceuticals,
tablet coatings, controlled-release prods.,
encapsulation; tablet binder
Features: Heat-sealable; extremely flexible; sm.
particle size contributes to rapid dissolution
and visc. development
Regulatory: NF, EP, JP
Properties: Off-wh. finely ground powd.; 10%
max. on 80 mesh, 20% max. on 100 mesh;
tasteless; sol. in water (below 38 C) and polar
org. solvs.; sp.gr. 1.010 (2% aq., 30 C); bulk
dens. 0.5 g/ml; visc. 200-600 cps (10% aq.);
soften. pt. 100-150 C; pH 5.0-7.5; surf. tens. 43.6 dynes/cm
(0.1% aq.); nonionic; 5% max. moisture
Use Level: 15-35% (controlled-release prods.)

Klucel® EX Pharm [Hercules/Aqualon
http://www.aqualon.com]
Chem. Descrip.: Hydroxypropylcellulose NF,
EP, JP
CAS 9004-64-2
Uses: Thickener, stabilizer, suspending agent in
pharmaceutical tablet coatings,
controlled-release prods., encapsulation,
tablet binding
Features: Highly surf. active; low surf. and
interfacial tensions; thermoplastic; extrudable;
heat-sealable in films and coatings; inert
Regulatory: NF, EP, JP, DMF listed
Properties: Off-wh. fine powd.; tasteless; 99.9%
min. through 60 mesh, 90% min. through 80
mesh, 80% min. through 100 mesh; sol. in
water (below 38 C), polar org. solvs.; insol. in
water (above 45 C); sp.gr. 1.010 (2%, 30 C);
soften. pt. 100-150 C; pH 5.0-7.5; ref. index
1.337 (2%); surf. tens. 43.6 dynes/cm (0.1%); nonionic; 5% max.
mor. moisture

Klucel® ‘F’ Grades [Hercules/Aqualon
http://www.aqualon.com]
Chem. Descrip.: Premium grades
hydroxypropylcellulose NF; grades
designated ‘FF’ also meet FCC specs.
CAS 9004-64-2
Uses: Surface-active thickener, stabilizer,
film-former, suspending agent, protective
colloid; inert ingred. in drug prods.; film
coating, binder for tablets; in medicinal
elixirs, lotions, emulsions capsules, sustained-
release dosage forms
Regulatory: FDA 21CFR §172.870
Properties: Off-wh. powd., tasteless; 85% min.
through 30 mesh, 99% min. through 20 mesh;
water-sol.; dissolves easily in many polar org.
solvs.; soften. pt. 100-150 C; pH 5.0-8.5; surf.
tens. 43.6 dynes/cm (0.1%); nonionic; 5% max. moisture
Toxicology: Nontoxic orally; nonirritating to
skin; may cause transient eye irritation

Klucel® G CS [Hercules/Aqualon
http://www.aqualon.com]
Chem. Descrip.: Hydroxypropylcellulose
CAS 9004-64-2
Uses: Thickener, film-former in denture
adhesive films, antiperspirants
Properties: Wh. to off-wh. free-flowing granular
solid; sol. in cellulose ethers, cold water,
alcohols, polar org. solvs., PEG, PG; sp.gr.
1.010 (2%); bulk dens. 0.5 g/ml; ref. index
1.337 (2%); pH 5.5-8.0 (1%); surf. tens. 43.6
dynes/cm (0.1%); nonionic

Klucel® G Pharm [Hercules/Aqualon

Trade Name Reference

water (below 38 C), polar org. solvs.; insol. in water (above 45 C); sp.gr. 1.010 (2%, 30 C); soften. pt. 100-150 C; pH 5.0-7.5; ref. index 1.337 (2%); surf. tens. 43.6 dynes/cm (0.1%); nonionic; 5% max. moisture

Klucel® J CS [Hercules/Aqualon
http://www.aqualon.com]
Chem. Descrip.: Hydroxypropylcellulose
CAS 9004-64-2
Uses: Thickener, film-former in denture adhesive films, antiperspirants
Properties: Wh. to off-wh. free-flowing granular solid; sol. in cellulose ethers, cold water, alcohols, polar org. solvs., PEG, PG; sp.gr. 1.010 (2%); bulk dens. 0.5 g/ml; ref. index 1.337 (2%); pH 5.5-8.0 (1%); surf. tens. 43.6 dynes/cm (0.1%); nonionic

Klucel® JF [Hercules/Aqualon
http://www.aqualon.com]
CAS 9004-64-2
Uses: Surfactant, thickener, stabilizer, suspending agent in pharmaceuticals, tablet coatings, controlled-release prods., encapsulation; tablet binder
Features: Heat-sealable; extremely flexible
Regulatory: NF, EP, JP
Properties: Off-wh. powd.; 85% min. through 30 mesh, 99% min. through 20 mesh; tasteless; sol. in water (below 38 C) and polar org. solvs.; sp.gr. 1.010 (2% aq., 30 C); bulk dens. 0.5 g/ml; visc. 75-150 cps (5% aq.); soften. pt. 100-150 C; ref. index 1.337 (2% aq.); pH 5.0-7.5; surf. tens. 43.6 dynes/cm (0.1% aq.); nonionic; 5% max. moisture

Klucel® J Pharm [Hercules/Aqualon
http://www.aqualon.com]
CAS 9004-64-2
Uses: Thickener, stabilizer, suspending agent in pharmaceutical tablet coatings, controlled-release prods., encapsulation; tablet binding
Features: Highly surf. active; low surf. and interfacial tensions; thermoplastic; extrudable; heat-sealable in films and coatings; inert
Regulatory: NF, EP, JP, DMF listed
Properties: Off-wh. powd.; 85% min. through 30 mesh, 99% min. through 20 mesh; tasteless; sol. in water (below 38 C) and polar org. solvs.; sp.gr. 1.010 (2%, 30 C); visc. 150-400 cps (5% aq.); ref. index 1.337 (2%); surf. tens. 43.6 dynes/cm (0.1% aq.); nonionic; 5% max. moisture

Klucel® L CS [Hercules/Aqualon
http://www.aqualon.com]
Chem. Descrip.: Hydroxypropylcellulose
CAS 9004-64-2
Uses: Rheology modifier, clarifier topical gels and ointments
Properties: Wh. to off-wh. free-flowing granular solid; sol. in cellulose ethers, cold water, alcohols, polar org. solvs., PEG, PG; sp.gr. 30 C; visc. 150-400 cps (5% aq.); soften. pt. 100-150 C; pH 5.0-7.5; ref. index 1.337 (2%); surf. tens. 43.6 dynes/cm (0.1%); nonionic; 5% max. moisture
Trade Name Reference

1.010 (2%); bulk dens. 0.5 g/ml; ref. index 1.337 (2%); pH 5.5-8.0 (1%); surf. tens. 43.6 dynes/cm (0.1%); nonionic

Klucel® MF [Hercules/Aqualon http://www.aqualon.com]

Chem. Descrip.: Hydroxypropylcellulose NF, EP
CAS 9004-64-2
Uses: Surfactant, thickener, stabilizer, suspending agent in pharmaceuticals, tablet coatings, controlled-release prods., encapsulation; tablet binder
Features: Heat-sealable; extremely flexible
Regulatory: NF, EP
Properties: Off-wh. powd.; 85% min. through 30 mesh, 99% min. through 20 mesh; tasteless; sol. in water (below 38 C) and polar org. solvs.; sp.gr. 1.010 (2% aq., 30 C); bulk dens. 0.5 g/ml; visc. 4000-6500 cps (2% aq.); soften. pt. 100-150 C; ref. index 1.337 (2% aq.); pH 5.0-7.5; surf. tens. 43.6 dynes/cm (0.1% aq.); nonionic; 5% max. moisture

Klucel® M Pharm [Hercules/Aqualon http://www.aqualon.com]

CAS 9004-64-2
Uses: Thickener, stabilizer, suspending agent in pharmaceutical tablet coatings, controlled-release prods., encapsulation, tablet binding
Features: Highly surf. active; low surf. and interfacial tensions; thermoplastic; extrudable; heat-sealable in films and coatings; inert
Regulatory: NF, EP , DMF listed
Properties: Off-wh. powd.; 85% min. through 30 mesh, 99% min. through 20 mesh; tasteless; sol. in water (below 38 C) and polar org. solvs.; insol. in water (above 45 C); sp.gr. 1.010 (2%, 30 C); bulk dens. 0.5 g/ml; visc. 4000-6500 cps (2% aq.); soften. pt. 100-150 C; ref. index 1.337 (2% aq.); pH 5.0-7.5; surf. tens. 43.6 dynes/cm (0.1% aq.); nonionic; 5% max. moisture

Kollicoat® EMM 30 D [BASF AG http://www.basf.de]

Chem. Descrip.: Ethyl acrylate/methyl methacrylate copolymer aq. disp. with emulsifier (1.5% nonoxynol-100)
Uses: Film-former for sustained-release pharmaceuticals and transdermal therapeutic systems; taste masking agent
Features: pH-independent sustained-release effect; forms very flexible, extensible, water-sol. films
Properties: Wh. cloudy low visc.; weak char. odor; sol. in water (cloudy wh. appearance); yields opalescent visc. sol'n. mixed with acetone, ethanol, or IPA @ 1:5; insol. in dil. alkaline sol'ns.; m.w. 800,000; sp.grt. 1.037-1.047; visc. 50 mPa•s max.; 30% solids
Storage: 18 mos. shelf life when stored in unopened original container @ R.T.; store above freezing and below 30 C; may coagulate if exposed to heat or frost; opened containers must be used up ASAP or preserved with sodium hypochlorite sol'n.

Kollicoat® IR [BASF AG http://www.basf.de]

Chem. Descrip.: Polyvinyl alcohol-polyethylene glycol copolymer
CAS 96734-39-3
Uses: Highly flexible film-former coating system applied in instant-release coatings of tablets and pellets; taste and odor masking agent for tablets; binder for very rapidly dispersible/soluble granules or tablets; suspending agent and emulsion stabilizer in pharmaceuticals; film former in sprays and transdermal therapeutic systems; protective colloid
Features: Rapid rate of dissolution
Properties: Wh. to pale yel. free-flowing powd.; sol. in water; Brookfield visc. (20% w/w sol'n.) 50-250 mPas; pH 5.0-8.0 (20% w/w sol'n. in water)
Storage: Shelf life ≥ 2 yr in the original sealed containers @ R.T.

Kollicoat® IR White [BASF AG http://www.basf.de]

Chem. Descrip.: Polyvinyl alcohol-polyethylene glycol copolymer, copovidone, titanium dioxide, kaolin, sodium lauryl sulfate, silicon dioxide mixture See Copolyvidone; Silica, amorphous hydrated
CAS 96734-39-3; 25086-89-9; 13463-67-7; 1332-58-7; 151-21-3; 7631-86-9
Uses: Highly flexible film-former coating system applied in instant-release coatings of tablets and pellets
Features: Films disperse very rapidly in water; adheres extremely well to tablet surfaces of varying lipophilic character; can be used to make colored tablets
Properties: Wh. to off-wh. free-flowing powd.; disp. in water; Brookfield visc. (20% w/w sol'n.) 50-250 mPas; pH 5.0-8.5 (20% w/w sol'n. in water)
Trade Name Reference

**Kollicoat® MAE 30 DP** [BASF AG](http://www.basf.de)

Chem. Descrip.: **Methacrylic acid/ethyl acrylate copolymer** aq. disp. USP/NF, Ph.Eur., JP with emulsifiers (0.7% sodium lauryl sulfate, 2.3% polysorbate 80)

Uses: Pharmaceutical excipient, film-former for enteric coating of solid oral dosage forms, esp. for controlled release of drugs; masks unpleasant tastes and odors; barrier between incompat. active substances; moisture barrier protecting against atmospheric humidity

Features: Effective barrier to gastric juice; protects acid-sensitive drugs; releases active at site of action

Properties: Milky wh. aq. disp.; faint char. odor; sol. in dil. alkaline sol'n.; misc. with water; yields opalescent visc. sol'n. with acetone, ethanol, or IPA @ 1.5; sp.gr. 1.062-1.072; visc. < 15 mPa•s; acid no. 300-330; pH 2-3; 30% act.

Use Level: 4-6 mg/cm² of tablet surface; 10-30% by wt. on pellets, granules or crystals (0.5-3.0 mm size)

Storage: 18 mos. shelf life when stored in unopened original drums @ R.T.; store below 30 C; protect from frost; may coagulate if exposed to heat or frost; once drum is opened, use contents within a few wks

**Kollicoat® MAE 100P** [BASF AG](http://www.basf.de)

Chem. Descrip.: **Methacrylic acid/ethyl acrylate copolymer** treated with sodium hydroxide and contg. emulsifiers (0.7% sodium lauryl sulfate, 2.3% polysorbate 80)

CAS 25212-88-8; 1310-73-2; 151-21-3; 9005-65-6 (generic)

Uses: Pharmaceutical excipient, film-former for enteric coating of solid oral dosage forms, esp. for controlled release of drugs; masks unpleasant tastes and odors; barrier between incompat. active substances; moisture barrier protecting against atmospheric humidity

Features: Effective barrier to gastric juice; protects acid-sensitive drugs; releases active at site of action

Properties: Wh. powd.; faint char. odor; redisp. in water; dissolves in methanol and ethanol to yield cl. to sl. cloudy sol'ns.; visc. < 100 mPa•s (20% aq. disp.); acid no. 280-310; ≥ 95% solids

**Kollicoat® Protect** [BASF AG](http://www.basf.de)

Chem. Descrip.: **Polyvinyl alcohol-polyethylene glycol copolymer, polyvinyl alcohol, and silicon dioxide** See Silica, amorphous hydrated

Chem. Analysis: 55-65% polyvinyl alcohol-polyethylene glycol graft copolymer, 35-45% polyvinyl alcohol; 0.1-0.3% silicon dioxide

CAS 96734-39-3; 9002-89-5; 7631-86-9

Uses: Moisture protection and taste masking agent; wet granulation binder or as a pore former in sustained release coatings; protects act. ingreds.

Features: Peroxide-free; adheres extremely well to tablet surfaces of varying lipophilic character; fine engravings on tablets are uniformly coated and no bridging occurs

Properties: Wh. to off-wh. free-flowing powd.; misc. with water; insol. in dilute alkaline or acidic sol'n.; sp. gr. 1.045-1.065; visc. < 100 mPas; pH 3.5-5.5; 30% (20% w/w sol'n. in water)

Storage: Shelf life ≥ 3 yr in the original sealed containers @ R.T.

**Kollicoat® SR 30 D** [BASF AG](http://www.basf.de)

Chem. Descrip.: Polyvinyl acetate stabilized with polyvinylpyrrolidone, and sodium lauryl sulfate See PVP

CAS 9003-20-7; 9003-39-8; 151-21-3

Uses: Manufacture of pharmaceutical sustained-release dosages; odor and taste masking agent; used as a subcoating, for isolating active ingredients to prevent their interactions

Features: Peroxide-free; adheres extremely well to tablet surfaces of varying lipophilic character; fine engravings on tablets are uniformly coated and no bridging occurs

Properties: Wh. to off-wh. free-flowing powd.: misc. with water; insol. in dilute alkaline or acidic sol'n.; sp. gr. 1.045-1.065; visc. < 100 mPas; pH 3.5-5.5; 30%

Storage: Shelf life ≥ 18 months in the original sealed containers @ R.T.; on exposure to heat and frost and if foaming occurs, aq. dispersions may form rendering it unusable

**Kollidon® 12PF** [BASF](http://www.basf.com; BASF AG](http://www.basf.de)

Chem. Descrip.: **Povidone** See PVP

CAS 9003-39-8; EINECS/ELINCS 201-800-4
Trade Name Reference

**Kollidon® 17PF** [BASF http://www.basf.com; BASF AG http://www.basf.de]

Chem. Descrip.: Povidone See PVP
CAS 9003-39-8; EINECS/ELINCS 201-800-4

**Uses:** Solubilizer, crystallization inhibitor, suspension stabilizer for pharmaceutical injectables, ophthalmics; binder in tablets, capsules, granules; bioavailability enhancer in tablets, capsules, granules, pellets, suppositories, transdermal preps.; film-former in ophthalmic sol'n's., tablet cores, medical plastics; solubilizer in orals, parenterals, topicals; taste masking agent in orals, chewing tablets; adhesives in transdermal systems, adhesive gels

**Features:** Pyrogen-free

**Regulatory:** EP, USP/NF, JP compliance

**Properties:** Sol. (> 10%) in water, diethylene glycol, alcohol, propanol, IPA, butanol, chloroform, methylene chloride, propylene glycol, 1,4-butanediol, glycerol, triethanolamine, propionic acid, acetic acid; m.w. 2000-3000; bulk dens. 0.55-0.65 g/l; visc. 1.3-2.3 mPa*s (10% aq., 20 C); pH 3-5 (5% aq.); 11.5-12.8% N

**Storage:** Hygroscopic; 3 yrs. min. shelf life

**Kollidon® 30** [BASF http://www.basf.com; BASF AG http://www.basf.de]

Chem. Descrip.: Povidone See PVP
CAS 9003-39-8; EINECS/ELINCS 201-800-4

**Uses:** Solubilizer, crystallization inhibitor, suspension stabilizer for pharmaceutical injectables, ophthalmics; binder in tablets, capsules, granules; bioavailability enhancer in tablets, capsules, granules, pellets, suppositories, transdermal preps.; film-former in ophthalmic sol'n's., tablet cores, medical plastics; solubilizer in orals, parenterals, topicals; taste masking agent in orals, chewing tablets; adhesives in transdermal systems, adhesive gels

**Features:** Pyrogen-free

**Regulatory:** EP, USP/NF, JP compliance

**Properties:** Sol. (> 10%) in water, diethylene glycol, alcohol, propanol, IPA, butanol, chloroform, methylene chloride, propylene glycol, 1,4-butanediol, glycerol, triethanolamine, propionic acid, acetic acid; m.w. 28,000-34,000; bulk dens. 0.40-0.50 g/l; visc. 3.5-5.5 mPa*s (10% aq., 20 C); pH 3-5 (5% aq.); 12.0-12.8% N

**Storage:** Hygroscopic; 3 yrs. min. shelf life

**Kollidon® 25** [BASF http://www.basf.com; BASF AG http://www.basf.de]

**Uses:** Solubilizer, crystallization inhibitor, suspension stabilizer for pharmaceutical injectables, ophthalmics; binder in tablets, capsules, granules; bioavailability enhancer in tablets, capsules, granules, pellets, suppositories, transdermal preps.; film-former in ophthalmic sol'n's., tablet cores, medical plastics; solubilizer in orals, parenterals, topicals; taste masking agent in orals, chewing tablets; adhesives in transdermal systems, adhesive gels

**Features:** Pyrogen-free

**Regulatory:** EP, USP/NF, JP compliance

**Properties:** Sol. (> 10%) in water, diethylene glycol, alcohol, propanol, IPA, butanol, chloroform, methylene chloride, propylene glycol, 1,4-butanediol, glycerol, triethanolamine, propionic acid, acetic acid; m.w. 7000-11,000; bulk dens. 0.40-0.50 g/l; visc. 1.5-3.5 mPa*s (10% aq., 20 C); pH 3-5 (5% aq.); 12.0-12.8% N

**Storage:** Hygroscopic; 3 yrs. min. shelf life

Trade Name Reference

enhancer in tablets, capsules, granules, pellets, suppositories, transdermal preps.; film-former in ophthalmic sol’ns., tablet cores, medical plastics; solubilizer in orals, parenterals, topicals; taste masking agent in orals, chewing tablets; adhesive in transdermal systems, adhesive gels

Features: Pyrogen-free
Regulatory: EP, USP/NF, JP compliance
Properties: Sol. (> 10%) in water, diethylene glycol, alcohol, propanol, IPA, butanol, chloroform, methylene chloride, propylene glycol, 1,4-butanediol, glycerol, triethanolamine, propionic acid, acetic acid; m.w. 1,000,000-1,500,000; bulk dens. 0.40-0.50 g/l; visc. 300-700 mPa•s (10% aq., 20 C); pH 4-7 (5% aq.); 12.0-12.8% N; ≤ 5% loss on drying
Storage: Hygroscopic; 1 yr. min. shelf life

Kollidon® CL [BASF http://www.basf.com; BASF AG http://www.basf.de]
Chem. Descrip.: Crospovidone
CAS 9003-39-8
Uses: Bioavailability enhancer, suspension stabilizer, excipient for pharmaceuticals; aids release of act. substances from tablets, capsules, and granules; taste masking agent for acetaminophen; disintegrant for tablets, granules, hard gelatin capsules, suppositories; antidiarrheal agent; adsorbent, filtration aid for polyphenols, endotoxins, water
Regulatory: USP/NF, EP, JP
Properties: 60% max. < 50 µm; 95% min. < 250 µm; insol. but swells in water; bulk dens. 0.30-0.40 g/ml; surf. area 1 m²/g; pH 5.0-7.5 (1% aq.); swelling pressure > < 10 kPa; 12.0-12.8% N; [le] 5% loss on drying
Toxicology: LD50 (oral, rat) > 6.8 g/kg; no teratogenic, mutagenic or carcinogenic effects
Storage: Hygroscopic; 3 yrs. min. shelf life

Chem. Descrip.: Crospovidone
CAS 9003-39-8
Uses: Tablet disintegrant, bioavailability enhancer, suspension stabilizer, excipient for pharmaceuticals; stabilizer for pharmaceutical oral and topical suspensions, vitamins; aids release of act. substances from tablets, capsules, and granules; taste masking agent for acetaminophen; adsorbent for polyphenols, endotoxins, water
Features: Conc. of 5-10% hardly increase the viscosity of the suspension
Regulatory: USP/NF, EP, JP
Properties: Micronized; 90% min. < 15 µm; bulk dens. 0.15-0.25 g/ml; surf. area 6 m²/g; pH 5.0-7.5 (1% aq.); swelling pressure > < 100 kPa; 12.0-12.8% N; [le] 5% loss on drying
Storage: Hygroscopic; 3 yrs. min. shelf life

Kollidon® CL-SF [BASF http://www.basf.com; BASF AG http://www.basf.de]
Chem. Descrip.: Crospovidone
CAS 9003-39-8
Uses: Tablet disintegrant, bioavailability enhancer, suspension stabilizer, excipient for pharmaceuticals; stabilizer for pharmaceutical oral and topical suspensions, vitamins; aids release of act. substances from tablets, capsules, and granules; taste masking agent for acetaminophen; adsorbent for polyphenols, endotoxins, water

Regulatory: USP/NF, EP, JP
Properties: Micronized; ≥ 25% min. < 15 µm; bulk dens. 0.10-0.16 g/ml; surf. area ≈ 3 m²/g; pH 5.0-7.5 (1% aq.); swelling pressure ≈ < 35 kPa; 12.0-12.8% N; [le] 5% loss on drying
Storage: Hygroscopic; 3 yrs. min. shelf life

Kollidon® SR [BASF AG http://www.basf.de]
Chem. Descrip.: Polyvinyl acetate (80%)/povidone (19%) mixt. with stabilizers
(0.8% sodium lauryl sulfate, 0.2% colloidal silica) See PVP: Silica, colloidal
CAS 9003-20-7; 9003-39-8

Uses: Excipient, retarding agent for pH-independent sustained-release matrix tablets, pellets, granules by direct compression, roller compaction, wet granulation, and extrusion processes; flow aid for direct tableting of formulations contg. drug substances of poor flowability

Features: When tablets are introduced into gastric or intestinal fluid, the water-sol. povidone leaches out to form pores through which the active ingred. slowly diffuses; inert; exc. compressibility and flowability

Properties: Wh. or sl. ylsh. free-flowing powd.; 100 µm avg. particle size; completely sol. in N-methylpyrrolidone; bulk dens. ≥ 0.45 g/ml; pH 3.5-5.5 (10% aq.); ≤ 5% loss on drying

Storage: 24 mos. shelf life when stored in unopened, original drums below R.T.

Kollidon® VA 64 [BASF AG http://www.basf.de]

Chem. Descrip.: Copolyvidone
CAS 25086-89-9

Uses: Binder for direct compression and compacting of pharmaceutical tablets; binder for wet granulation in tablets, hard gelatin capsules, and granules; film-former for tablet coatings, topical sprays, transdermal and transmucosal systems; water barrier in subcoating of tablet cores; film-former, adhesive, crystallization retarder in sugar coatings; matrix forming agent in sustained-release/fast-release dosage forms

Features: Good flow props.; low hygroscopicity, particle size reduced resulting in increased hardness of finished tablets resulting in decreased friability and increased hardness

Regulatory: EP, USP/NF, JP compliance; DMF listed, GRAS)

Properties: Wh. or yel-wh. spray-dried powd.; 0% > 250 µm; sol. (> 10%) in water, methanol, ethanol, propanol, IPA, butanol, chloroform, methylene chloride, propylene glycol, 1,4-butanediol, glycerin; bulk dens. 0.08-0.2 g/ml; sapon. no. 230-270; pH 3-7 (5% aq.)

Use Level: 3-15% conc. use level

Storage: 3 yrs. shelf life when stored in sealed, original containers @ R.T.

Koster Keunen Orange Wax [Koster Keunen http://www.kosterkeunen.com]

Chem. Descrip.: Orange (Citrus aurantium dulcis) peel wax
CAS 144514-51-2

Uses: Emollient, UV-A and -B absorber, antioxidant, anti-inflammatory for creams, lotions, sun care; analgesic (on burns); solubilizer; water resist. aid

Features: Mild; natural

Properties: Lt. brn. to lt. orange semisolid, char. odor; very sl. sol. in water; sp.gr. 0.92-0.97; m.p. 45-57 C; congeal pt. 45-55 C; b.p. > 200 C; acid no. 8-20; sapon. no. 70-110; hyd. no. 20-50; flash pt. > 200 C

Use Level: 1-5% (creams, lotions, makeup, shampoo, conditioners, shaving creams), 1-10% (anhyd. gels/lipsticks, soaps)

Toxicology: Virtually no irritation potential; molten wax may burn skin, cause mild upper respiratory irritation

Kosteran-L/1 [Dr. W. Kolb AG http://www.kolb.ch]

Chem. Descrip.: Sorbitan laurate
CAS 1338-39-2; EINECS/ELINCS 215-663-3

Uses: Emulsifier, dispersant, and consistency agent for pharmaceutical creams and lotions
Trade Name Reference

**Kosteran-O/1 VL** [Dr. W. Kolb AG](http://www.kolb.ch)
Chem. Descrip.: Sorbitan oleate
CAS 1338-43-8; EINECS/ELINCS 215-665-4
Uses: Emulsifier, dispersant, and solubilizer for pharmaceutical creams and lotions
Regulatory: EP
Properties: Liq.; HLB 8.6; nonionic

**Kosteran-O/3 VH** [Dr. W. Kolb AG](http://www.kolb.ch)
Chem. Descrip.: Sorbitan trioleate
CAS 26266-58-0; EINECS/ELINCS 247-569-3
Uses: Emulsifier, dispersant, consistency agent, and solubilizer for pharmaceutical creams and lotions
Regulatory: EP
Properties: Liq.; HLB 4.3; nonionic

**Kosteran-P/1 G** [Dr. W. Kolb AG](http://www.kolb.ch)
Chem. Descrip.: Sorbitan palmitate
CAS 1338-41-6; EINECS/ELINCS 215-664-9
Uses: Emulsifier, dispersant, and consistency agent for pharmaceutical creams and lotions
Regulatory: Eur. Ph.
Properties: Pellets; HLB 4.7; nonionic

**Kosteran-S/1 G** [Dr. W. Kolb AG](http://www.kolb.ch)
Chem. Descrip.: Sorbitan stearate
CAS 1338-41-6; EINECS/ELINCS 215-664-9
Uses: Emulsifier, dispersant, and consistency agent for pharmaceutical creams and lotions
Regulatory: Eur. Ph.
Properties: Pellets; HLB 4.7; nonionic

**Kosteran-S/3** [Dr. W. Kolb AG](http://www.kolb.ch)
Chem. Descrip.: Sorbitan tristearate
CAS 26658-19-5; EINECS/ELINCS 247-891-4
Uses: Emulsifier, dispersant, and consistency agent for pharmaceutical creams and lotions
Regulatory: Eur. Ph.
Properties: Pellets; HLB 2.1; nonionic

**Koster Keunen Beeswax 100** [Koster Keunen](http://www.kosterkeunen.com)
Chem. Descrip.: White beeswax
CAS 8006-40-4; 8012-89-3; EINECS/ELINCS 232-383-7
Uses: Emulsifier, thickener, emollient, opacifier, oil gellant in creams, lotions, depilatories, ointments, salves, sustained-release pharmaceuticals
Properties: Wh. wax; m.p. 62-65 C; acid no. 17-24; cloud pt. < 65 C
Precaution: Incompat. with strong oxidizers, acids
HMIS: Health 1, Flammability 1, Reactivity 1

**Koster Keunen Beeswax AO2535** [Koster Keunen](http://www.kosterkeunen.com)
Chem. Descrip.: Oxidized beeswax
CAS 138724-55-7
Uses: Plasticizer, thickener, and wetting agent for depilatories
Properties: Slabs

**Koster Keunen Carnauba** [Koster Keunen](http://www.kosterkeunen.com)
Chem. Descrip.: Carnauba (Copernicia cerifera) wax
CAS 8015-86-9; EINECS/ELINCS 232-399-4
Uses: Ingred. in salves, creams, ointments, pill
Koster Keunen Carnauba, Powd. [Koster Keunen http://www.kosterkeunen.com]
Chem. Descrip.: Carnauba (Copernicia cerifera) wax See Carnauba (Copernica cerifera) wax
CAS 8015-86-9; EINECS/ELINCS 232-399-4
Uses: Ingr. for pharmaceuticals, creams, lotions, ointments, salves
Properties: Powd.; 120 mesh

Koster Keunen Ceresine [Koster Keunen http://www.kosterkeunen.com]
Chem. Descrip.: Ceresin CAS 8001-75-0; EINECS/ELINCS 232-290-1
Uses: Ingr. for pharmaceuticals, creams, lotions, ointments, salves
Properties: Wax; sp.gr. 0.88-0.92; m.p. various grades from 133-163 F; acid no. 0; sapon. no. < 1; ref. index 1.4416-1.4465; dielec. const. 2.15-2.33

Koster Keunen Emulsifying Wax [Koster Keunen http://www.kosterkeunen.com]
Chem. Descrip.: Emulsifying wax prepared from cetearyl alcohol contg. a POE deriv. of a fatty acid ester of sorbitan See Emulsifying wax NF
CAS 97069-99-0
Uses: Emulsifier, thickener for topical pharmaceutical creams, lotions, ointments, salves
Properties: Creamy-wh. solid, char. odor; sol. in hydrocarbons, ether, chloroform, alcohol; m.p. 48-52 C; acid no. < 2.5; iodine no. < 3.5; sapon. no. < 14; hyd. no. 178-192; pH 5.5-7.0 (3% disp.); nonionic

Chem. Descrip.: Microcrystalline wax CAS 64742-42-3; EINECS/ELINCS 264-038-1
Uses: Wax, coating agent for pharmaceuticals
Properties: Wh. to amber wax; sp.gr. 0.90-0.94; visc. 50-100 (210 F); m.p. 140-190 F; acid no. 0-0.2; iodine no. 0-1.5; sapon. no. 0-2; flash pt. > 425 F; fire pt. > 550 F

Chem. Descrip.: Microcrystalline wax
CAS 63231-60-7; EINECS/ELINCS 264-038-1
Uses: Stabilizer, emollient, and thickener for ointments, lip balms, and sunscreens
Features: Compatible in all proportions with mineral hydrocarbon waxes and their oils
Properties: Wh. slabs; visc. ≥11 cps (ASTM 3236-88); m.p. 168-180 F (ASTM Mettler); acid value (USP 401) <1; sapon. no. (USP 401) <1
Toxicology: Nontoxic

Koster Keunen Paraffin Wax [Koster Keunen http://www.kosterkeunen.com]
Chem. Descrip.: Paraffin
CAS 8002-74-2; EINECS/ELINCS 232-315-6
Uses: Wax for pharmaceutical ointments and salves
Properties: Wax; sol. (g/100 cc): 40 g benzene, 9 g min. oil, 3 g dichloroethane, 0.4 g IPA; m.p. various grades from 118-165 F; ref. index 1.4219-1.4357

Koster Keunen Synthetic Beeswax [Koster Keunen http://www.kosterkeunen.com]
Chem. Descrip.: Syn. beeswax See Beeswax, synthetic
CAS 97026-94-0; EINECS/ELINCS 275-286-5
Uses: Gellant, emulsifier, and thickener for sun care, depilatories, ointments, salves,
sustained-release pharmaceuticals

Properties: Wax; m.p. 62-65 C; acid no. 17-24

Koster Keunen Synthetic Japan Wax  [Koster Keunen  http://www.kosterkeunen.com]
Chem. Descrip.: Syn. Japan wax  See Japan wax, synthetic
Uses: Gellant, thickener, emulsifier for pharmaceuticals
Properties: Wax; sol. in hot alcohol, carbon disulfide, chloroform, ether, benzene, petrol. ether, isopropyl ether, naphtha, pyridine, toluene, xylene, turpentine; insol. in water; sp.gr. 0.975-0.984; m.p. 50-56 C; acid no. 6-20; iodine no. 4-15; sapon. no. 116-125; flash pt. > 240 C; ref. index 1.440-1.4560 (60 C);
dielec. const. 3.1-3.2

Chem. Descrip.: Syn. spermaceti (cetyl palmitate and other esters)  See Cetyl esters
CAS 136097-97-7
Uses: Emollient, moisturizer, thickener, gellant for mfg. of ointments, pharmaceuticals
Regulatory: FDA approved
Properties: Pastilles; sol. in boiling alcohol, chloroform, carbon disulfide, volatile oils; sp.gr. 0.940-0.946; visc. 6.7-7.4 (100 C); m.p. 45-49 C; acid no. 0-0.5; iodine no. < 3; sapon. no. 116-125; flash pt. > 240 C; ref. index 1.440 (60 C)

Kotilen-L/1  [Dr. W. Kolb AG  http://www.kolb.ch]
Chem. Descrip.: Polysorbate 20
CAS 9005-64-5
Uses: Emulsifier, dispersant, cleaning agent, and solubilizer for pharmaceutical creams and lotions
Regulatory: Eur. Ph.
Properties: Liq.; HLB 16.7; nonionic

Kotilen-S/1  [Dr. W. Kolb AG  http://www.kolb.ch]
Chem. Descrip.: Polysorbate 60
CAS 9005-67-8
Uses: Emulsifier, dispersant, and solubilizer for pharmaceutical creams and lotions
Regulatory: Eur. Ph.
Properties: Pasty solid; HLB 14.9; nonionic

Kotilen-S/3  [Dr. W. Kolb AG  http://www.kolb.ch]
Chem. Descrip.: Polysorbate 65
CAS 9005-71-4

Chem. Descrip.: Castor oil USP contg. an antioxidant  See Castor (Ricinus communis) oil
CAS 8001-79-4; EINECS/ELINCS 232-293-8
Uses: Gloss aid, emollient, dye solvent in pharmaceuticals
Features: High quality oil
Properties: Gardner 1 color; sp.gr. 0.959; dens. 7.98 lb/gal; visc. 7.5 stokes; acid no. 1; iodine no. 86; sapon. no. 180; hyd. no. 164

Krystar® 300  [Tate & Lyle N. Am.  http://www.tlna.com]
Chem. Descrip.: Fructose
Uses: Sweetener in dietary and nutritional supplements, liq. pharmaceutical prods.
Properties: Wh. free-flowing crystalline material or water wh. liq.

Chem. Descrip.: Fructose
Uses: Sweetener in dietary and nutritional supplements, liq. pharmaceutical prods.
Properties: Wh. free-flowing crystalline material or water wh. liq.

Chem. Descrip.: Kukui nut oil  See Kukui (Aleurites moluccana) nut oil
CAS 8015-80-3; EINECS/ELINCS 273-313-5
Uses: Emollient for treatment of superficial burns, chapped skin, and some minor skin diseases (psoriasis, acne, eczema)
Properties: Pale yel. liq.; sl. char. odor; insol. in water; sp.gr. 0.92-0.93; m.p. < -12 C; b.p. 500 C; solid. pt. < -22 C; acid no. < 1.0%; iodine no. 155-175; sapon. no. 185-195; 41.8% linoleic acid; 28.9% linolenic acid; 19.8% oleic acid; 6.4% palmitic acid

L-45 Series  [GE Silicones  http://www.gesicones.com]
Chem. Descrip.: Dimethicone
CAS 9006-65-9
Uses: Heat transfer fluid for drug mfg.; lubricant in antiperspirants, deodorants; lubricant, emollient for creams and lotions
Regulatory: 350 cSt grade: FDA 21CFR
Trade Name Reference

§173.340, 175.300, 175.390, 176.170, 176.180, 177.1210, 177.2260, 177.2800, 178.3570, 178.3910, 181.28

Properties: Cl. liq.; sol. in most nonpolar solvs.; visc. 10-100,000 cstk grades

L-Carnipure® ALC [Lonza http://www.lonza.com]
Chem. Descr.: Acetyl-L-carnitine hydrochloride
CAS 5080-50-2
Uses: Antioxidant in dietary supplements
Properties: Wh. crystalline powd.; m.w. 239.70; amphoteric; 98.0-101.0% assay
Toxicology: LD50 (oral, rat): > 5000 mg/kg; nonirritant to skin; nonmutagenic
Environmental: Biodeg.
Storage: 2 yr shelf life

Chem. Descr.: Caprylic/capric triglyceride
CAS 65381-09-1; EINECS/ELINCS 265-724-3
Uses: Excipient, carrier, vehicle for oral, topical, rectal, and parenteral pharmaceuticals, capsules; vehicle, filler, lubricant for soft gelatin capsules; antisticking agent for tablets; oily phase for w/o and o/w emulsions; vehicle for veterinary injectable preps.
Features: Nonrancidifying fluid oil
Regulatory: BP and EP approved
Properties: Crystal-cl. oily liq.; neutral odor; visc. 25-33 mPa•s (20 C); HLB 1; nonionic

Chem. Descr.: Caprylic/capric triglycerides PEG-4 esters See Caprylic/capric triglyceride PEG-4 esters
Uses: Surfactant, solubilizer, permeation enhancer, bioavailability enhancer for pharmaceuticals; solubilizer and surfactant for microemulsions
Features: Hydrophilic
Regulatory: DMF listed; EP compliance
Properties: Oily liq.; HLB 4.0; acid no. < 2; iodine no. < 2; sapon. no. 265-285; nonionic; 100% conc.
Toxicology: LD50 (oral, rat) > 20 ml/kg; sl. irritating to skin and eyes

Spain http://www.gattefosse.es]
Chem. Descr.: Caprylic/capric triglyceride PEG-4 complex See Caprylic/capric triglyceride PEG-4 esters
Uses: Bioavailability enhancer, emulsifier, solvent, solubilizer for pharmaceutical orals, topicals, vaginals, rectals, and nasals, creams, lotions, veterinary prods.
Features: Hydrophilic; rancidless
Properties: Gardner < 5 oily liq., faint odor; sol. in veg. oil, alcohol; partly disp. in water; HLB 4-5; acid no. < 2; iodine no. < 3; sapon. no. 265-285; nonionic
Toxicology: LD0 (oral, rat) > 20 ml/kg; sl. skin and eye irritant

Chem. Descr.: Caprylic/capric triglyceride
Uses: Excipient for pharmaceutical gelatin capsules; oily vehicle for oral, topical, rectal, and parenteral uses; solvent, superfatting agent for pharmaceutical, or veterinary emulsions and microemulsions, aerosols, capsules, gels, creams/lotions, ointment
Features: Nonrancidifying; temp. stable
Regulatory: DAB/BP/EP compliance
Properties: Gardner < 1 oily liq., odorless to faint odor; HLB 1; acid no. < 0.2; iodine no. < 2; sapon. no. 320-340
Toxicology: LD50 (oral, rat) > 10 ml/kg; sl. eye irritant, nonirritating to skin

Labrafac PC [Gattefosse http://www.gattefossecorp.com]
Chem. Descr.: Propylene glycol caprylate/caprate
Uses: Excipient, amphiphilic oil, permeation enhancer; coemulsifier for dermal/transdermal pharmaceuticals, creams, ointments, gels, and lotions
Properties: Liq.; HLB 2

Chem. Descr.: Triisostearin PEG-6 esters
Uses: Solvent, amphiphilic agent for improving drug delivery; excipient for aerosols, nasal preps., creams, veterinary preps.
Features: Hydrophilic; nonrancidifying
Properties: Gardner < 5 oily liq., faint odor; HLB
Trade Name Reference

3-4; acid no. < 2; iodine no. < 15; sapon. no. 150-170; nonionic

Toxicology: LD50 (oral, rat) > 20 ml/kg; nonirritating to skin and eyes

Chem. Descrip.: Apricot kernel oil PEG-6 esters
CAS 97488-91-0
Uses: Excipient, coemulsifier, solubilizer, bioavailability enhancer, vehicle for pharmaceuticals (topicals, injectables, orals, nasals, sprays, emulsions, hard shell capsules, soft gel capsules), cosmetics, veterinary preps.; cosurfactant in microemulsions; coemulsifier, penetrant for topical emulsions
Features: Hydrophilic
Regulatory: U.S., Japan, Europe, French pharmacopoeia compliance; DMF no. 4644
Properties: Gardner < 5 oily liq. (40 C), faint odor; very sol. in chloroform, methylene chloride, min. oils; sol. in n-hexane; disp. in water; sp.gr. 0.935-0.955 (20 C); visc. 70-90 mPa•s (20 C); HLB 4.0; acid no. < 2; iodine no. 79-89; sapon. no. 190-204; hyd. no. 65-85; ref. index 1.465-1.475; pH 4.5-6.0 (10% aq.); nonionic; 100% conc.
Toxicology: LD0 (oral, rat) > 2 g/kg; nonirritating to skin and eyes
Storage: Store in orig. container; prevent exposure to air, light, heat, and moisture; if partial crystallization occurs, reheat to 45 C

Chem. Descrip.: Corn oil PEG-6 esters
CAS 61789-25-1
Uses: Excipient, solubilizer, bioavailability enhancer, coemulsifier, vehicle for pharmaceuticals (topicals, injectables, orals, nasals, sprays, emulsions, hard shell capsules, soft gel capsules), cosmetics, veterinary preps.; amphiphilic agent improving drug delivery; coemulsifier in topical emulsions; lipid phase or cosurfactant in microemulsions
Features: Hydrophilic; amphiphilic
Regulatory: U.S., Japan, Europe, French pharmacopoeia compliance; DMF no. 5849
Properties: Gardner < 5 oily liq. (45 C), faint odor; sol. in chloroform, methylene chloride, min. oils; disp. in water; insol. in ethanol; sp.gr. 0.935-0.955; visc. 70-90 mPa•s; HLB 4.0; acid no. < 2; iodine no. 100-110; sapon. no. 156-170; hyd. no. 45-65; ref. index 1.465-1.475; nonionic; 100% conc.
Toxicology: LD0 (oral, rat) > 20 ml/kg
Storage: Store in orig. container; prevent exposure to air, light, heat, and moisture; if partial crystallization occurs, reheat to 45 C

Chem. Descrip.: Palm kernel oil, palm oil, PEG-6, and hydrogenated palm/palm kernel oil PEG-6 esters See Palm (Elaeis guineensis) kernel oil; Palm (Elaeis guineensis) oil
Uses: Coemulsifier, penetrant, stabilizer, thickener for pharmaceutical topical emulsions, veterinary preps.; excipient, bioavailability enhancer for oral use (hard shell capsule); absorption enhancer for penetration of active drugs through the skin (creams, lotions), rectal and vaginal suppositories
Features: Hydrophilic; amphiphilic
Regulatory: EP compliance; DMF no. 5182
Properties: Gardner < 5 doughy solid, faint odor; sol. in chloroform, methylene chloride; partly sol. in ethanol; disp. in water; insol. in min. oils; drop pt. 33-38 C; HLB 4.0; acid no. < 2; iodine no. < 2; sapon. no. 190-204; hyd. no. 65-85; nonionic; 100% conc.
Toxicology: LD0 (oral, rat) > 2 g/kg; nonirritating to skin and eyes

Chem. Descrip.: PEG-8 caprylic/capric glycerides
CAS 85536-07-8
Uses: Solvent, excipient, solubilizer, bioavailability enhancer for pharmaceuticals (oral liq., capsules), veterinary preps.; surfactant for microemulsions; wetting agent, penetration enhancer, absorp. enhancer for topical, rectal, and oral pharmaceuticals
Features: Hydrophilic; amphiphilic
Regulatory: EP compliance; DMF no. 5734
Properties: Gardner < 5 oily liq., faint odor; sol. in water, veg. oil, propylene glycol; very sol. in ethanol, chloroform, methylene chloride; sp.gr.
Lac-Coat 40E-2 [Japan Shellac
http://www.japan-shellac.co.jp]

Chem. Descrip.: Bleached dewaxed
shellac/ethanol See Alcohol

Uses: Moisture barrier, enteric coating,
disintegration control agent, granulating
agent, finishing coating over wax for
pharmaceutical tablets and sustained-
release capsules

Features: Protects core ingreds. from subcoating
sol'n's.

Properties: Ylsh. brn.; 40 ± 2% NV

Lactitol AC [Danisco Sweeteners
http://www.daniscosweeteners.com]

Chem. Descrip.: Lactitol anhyd. (98-102%)
See Lactitol

CAS 585-86-4; EINECS/ELINCS 209-566-5

Uses: Sweetener in pharmaceutical preps.

Features: Stable to air and heat

Properties: Wh. cryst. powd.; odorless; mild
sweet taste; highly sol. in water (≈ 1.9 g/ml);
sparingly sol. to insol. in most org. solvs.; m.w.
344.37; m.p. 147-154 C; pH 4.5-7.0 (10%);
0.5% max. moisture

Toxicology: LD50 (oral, rat) 27.5 g/kg; (skin,
rabbit) > 4.5 g/kg; relatively nontoxic by
ing.; may cause skin/eye irritation; prolonged
inh. (nuisance particle) may cause respiratory
irritation; excessive consumption can cause laxation

Environmental: LC50 (daphnia magna) >
10,000 mg/l; biodeg. complete in 5 days

Precaution: Sl. fire hazard when exposed to
heat or flame; may burn but does not ignite readily; dust-air mixts. may ignite or
explode; avoid contact with strong oxidizers, strong acids, excessive heat, sparks, open flame

Hazardous Decomp. Prods.: Thermal decomp.
may release toxic/hazardous fumes of furfural, CO2, CO

Storage: Only marginally hygroscopic; 2 yrs.
shelf life when stored in original, sealed pkgs.
below 25 C and < 65% r.h.

Lactochem® [Friesland Foods Domo
http://www.domo.nl]

Chem. Descrip.: Lactose monohydrate, EP,
USP/NF, JP

EINECS/ELINCS 200-559-2

Uses: Excipient in pharmaceutical solid
dosage forms, capsules, sachet fillings, wet
granulation tablets; diluent for direct
compression

Features: Nonhygroscopic; chemically,
physically, and microbiologically stable; inert;
good compactibility

Properties: Wh. cryst. powd.; avail. in coarse to
microfine grades; odorless; tasteless; freely
sol. in water; m.p. 202 C

Toxicology: Nontoxic

Storage: 36 mos. shelf life when stored
unopened in cool, dry place, away from
odorous materials

Lactohale® 100, 200, 300 [Friesland Foods
Domo http://www.domo.nl]

Chem. Descrip.: Lactose
CAS 63-42-3; EINECS/ELINCS 200-559-2

Uses: Excipient for pharmaceutical dry powd.
inhalers
Trade Name Reference

**Features:** Nonhygroscopic; inert; chemically, physically, and microbiologically stable
**Regulatory:** USP/NF, EP, JP, DMF file
**Properties:** Wh. cryst. powd.
**Toxicology:** Non toxic

**Lactopress® Anhydrous** [Friesland Foods Domo http://www.domo.nl]
**Chem. Descrip.:** Anhydrous lactose USP/NF, EP, JP See Lactose
**CAS:** 63-42-3; EINECS/ELINCS 200-559-2
**Uses:** Excipient, flow aid, binder for direct compression pharmaceutical tableting and moisture-sensitive active drugs
**Features:** Exc. compactibility; nonhygroscopic; inert; chemically, physically, and microbiologically stable
**Properties:** Wh. cryst. powd.; freely sol. in water
**Toxicology:** Non toxic
**Storage:** 36 mos. shelf life when stored unopened; store in cool, clean, dry conditions, away from odorous materials

**Lactopress® Spray-Dried** [Friesland Foods Domo http://www.domo.nl]
**Chem. Descrip.:** α-Monohydrate lactose USP/NF, EP, JP See Lactose monohydrate
**EINECS/ELINCS:** 200-559-2
**Uses:** Excipient, flow aid, binder for direct compression pharmaceutical tableting
**Features:** Exc. compactibility; rec. for apps. requiring superior flow chars.; nonhygroscopic; inert; chemically, physically, and microbiologically stable
**Properties:** Wh. cryst. powd.; freely sol. in water
**Toxicology:** Non toxic
**Storage:** 12 mos. shelf life when stored unopened; store in cool, clean, dry conditions, away from odorous materials

**Lacty® M** [PURAC biochem http://www.purac.com]
**Chem. Descrip.:** Lactitol monohydrate USP/NF, EP, JP See Lactose monohydrate
**CAS:** 81025-04-9; EINECS/ELINCS 209-566-5
**Uses:** Sweetener for diabetic products
**Features:** Stable
**Regulatory:** USP, FCC, E 966 compliance
**Properties:** Wh. to lt. brn. cryst. powd.; 1000 µm max. particle size; odorless; sweet taste; very sol. in water; m.w. 362; bulk dens. 0.6-0.8 kg/m³; m.p. 98-102 C; flash pt. (CC) > 100 C; pH 4.5-7.0 (10% aq.); 96% min. assay
**Toxicology:** LD50 (oral, rat) > 10 g/kg; health injuries are not known or expected under normal use; nontoxic; noncarcinogenic; nonmutagenic

**Environmental:** Readily biodeg.; no special environmental precautions required; BOD5 550 mg/g; COD 955 mg/g; bioaccumulation is unlikely; ecological injuries are not known or expected under normal use
**Hazardous Decomp. Prods.:** COx
**Storage:** Store @ R.T.; keep container tightly closed in dry place

**Lameform® TGI** [Cognis/Care Chems.]
**Chem. Descrip.:** Polyglyceryl-3 diisostearate
**CAS:** 66082-42-6; EINECS/ELINCS 291-548-1
**Uses:** Emulsifier, emollient for pharmaceutical w/o emulsions and creams
**Features:** Good stability to oxidation
**Regulatory:** DAC compliance
**Properties:** Yel. visc. liq., sl. fatty odor; HLB 6.0; acid no. 3 max.; sapon. no. 140-160; hyd. no. 190-220; nonionic; 100% conc.
**Storage:** 1 yr. min. storage life in sealed original containers under dry conditions; if cream is removed in portions and at low temps., care should be taken to ensure that the prod. is removed evenly

**Lamegin® EE Range** [Cognis http://www.cognis.de]
**Chem. Descrip.:** Acetic acid esters of mono- and diglycerides of fatty acids
**CAS:** 68990-55-6
**Uses:** Coating agent, emulsifier for pharmaceuticals
**Properties:** Nonionic

**Lamegin® Range** [Cognis http://www.cognis.de]
**Chem. Descrip.:** Esters of mono- and diglycerides
**Uses:** Emulsifier for pharmaceuticals (capsules, powds., syrups, tablets)

**Lamepo® UD** [Cognis/Care Chems.]
**Chem. Descrip.:** Potassium undecylenoyl hydrolyzed collagen
**CAS:** 68951-92-8
**Uses:** Detergent for hair preparations, shampoos, skin cleansers for damaged skin, antidianduff shampoos
**Properties:** Sl. amber cl. liq.; anionic; 32% act.

**Lamesorb® Range** [Cognis http://www.cognis.de]
**Chem. Descrip.:** Sorbitan esters of fatty acids/polysorbates
**Uses:** Emulsifier for pharmaceuticals
### Trade Name Reference

(aerosols, injectables, capsules, powds., syrups, tablets)  
*Properties:* Nonionic

**Lanette® 18** [Cognis/Care Chems.]
Chem. Descrip.: Stearyl alcohol  
CAS 112-92-5; EINECS/ELINCS 204-017-6  
*Uses:* Emollient, consistency agent, visc.
Trade Name Reference

- **control agent for pharmaceutical o/w creams, emulsions, sticks**
  - **Features:** Hydrophilic
  - **Regulatory:** Ph.Eur., NF, DAB, Italian Ph., French Ph., JSCI compliance
  - **Properties:** Off-wh. waxy flakes; m.p. 55-57.5 C; acid no. 0.1 max.; iodine no. 1 max.; sapon. no. 0.5 max.; hyd. no. 203-210; nonionic; 100% conc.
  - **Use Level:** 1-10%
  - **Storage:** 1 yr. min. storage life in original sealed containers at temps. below 40 C, protected from moisture

**Lanette® 22 Flakes** [Cognis/Care Chems.]
- **Chem. Descrip.:** Behenyl alcohol
- **CAS:** 661-19-8; EINECS/ELINCS 211-546-6
- **Uses:** Emollient, consistency agent for pharmaceutical o/w and w/o creams, emulsions, sticks
- **Properties:** Wh. to pale ylsh. hydrophilic waxy fused flakes; solid. pt. 64-67 C; acid no. 0.2 max.; iodine no. 1 max.; sapon. no. 0.5 max.; hyd. no. 170-180; nonionic; 100% conc.
- **Storage:** 1 yr. min. storage stability in sealed original containers at temps. below 40 C

**Lanette® E PH** [Cognis/Care Chems.]
- **Chem. Descrip.:** Sodium cetearyl sulfate
- **CAS:** 59186-41-3
- **Uses:** Emulsifier and wetting agent for pharmaceutical o/w emulsions, creams, and ointments
- **Regulatory:** DAB, Austrian pharmacopoeia compliance; SARA §311/312 reportable
- **Properties:** Pale yel. powd., faint char. odor; appreciable sol. in water; sp.gr. 0.18; dens. 150-250 g/l; flash pt. (PMCC) > 93 C; pH 6.5-7.5 (1%); anionic; 90% min. act.
- **Toxicology:** LD50 (oral, rat) > 10 g/kg; may cause GI irritation, nausea, vomiting; severe eye irritation; mild skin irritant; TSCA listed
- **Precaution:** Avoid creating explosive concs. of dust, incomp. with strong oxidizing agents
- **Hazardous Ingredients:** Sodium cetyl/stearyl sulfate, 100%
- **Hazardous Decomp. Prods.:** CO₂, CO, SOₓ
- **NFPA:** Health 2, Flammability 1, Reactivity 0
- **Storage:** 1 yr. storage stability in sealed orig. containers at temps. below 30 C in a dry environment

**Lanette® NPH** [Cognis/Care Chems.]
- **Chem. Descrip.:** Cetearyl alcohol (90%) and sodium cetearyl sulfate (10%), stabilized with 0.12% phosphate buffer
- **Uses:** Self-emulsifying base, consistency agent for pharmaceutical o/w creams, ointments, and liq. liniments
- **Regulatory:** DAB, Austrian Ph., JCID compliance
- **Properties:** Wh. flakes, faint char. odor; acid no. 1 max.; iodine no. 3 max.; hyd. no. 187-205; pH 6.5-8.0 (1%); anionic; 1.4% max. water
- **Storage:** 1 yr. storage stability in sealed orig. containers at temps. below 30 C in dry environment

**Lanexol AWS** [Croda Inc]
- **Chem. Descrip.:** PPG-12-PEG-50 lanolin
- **CAS:** 68458-88-8
- **Uses:** Emollient, conditioner, cleanser,
superfatting agent, foam stabilizer, and lubricant for alcoholic and aq. compositions, topical pharmaceuticals; o/w emulsifier, solubilizer

Properties: Amber visc. liq.; sol. in oil, water, ethanol and mixts.; disp. in propylene glycol; cloud pt. 65-80 C (1% aq.); pour pt. 13 C max.; acid no. 2 max.; iodine no. 10 max.; sapon. no. 10-20; pH 6.0-7.0 (1% aq.); nonionic; 97% conc.

Use Level: 1-5%

Toxicology: LD50 (oral, rat) 32 g/kg; moderate skin irritant, minimal eye irritant

Lanidrol [Esperis http://www.esperis.it]

Chem. Descr.: PEG-20 hydrogenated lanolin
CAS 68648-27-1
Uses: Emollient, emulsifier for pharmaceuticals, ointments

Lanocerina [Esperis http://www.esperis.it]

Chem. Descr.: Hydrogenated lanolin
CAS 8031-44-5; EINECS/ELINCS 232-452-1
Uses: Emollient for pharmaceuticals

Lanocerina Distilled [Esperis http://www.esperis.it]

Chem. Descr.: Hydrogenated lanolin distilled
CAS 8031-44-5; EINECS/ELINCS 232-452-1
Uses: Emollient for pharmaceuticals

Lanodant DM [RITA http://www.ritacorp.com]

Chem. Descr.: DMDM Hydantoin
CAS 6440-58-0; EINECS/ELINCS 229-222-8
Uses: Preservative for pharmaceutical preps. that is effective against gram negative and gram positive bacteria, as well as yeast, mold and fungi

Features: Highly effective against gram neg. and gram positive bacteria, as well as yeast, mold and fungi

Properties: Colorless cl. liq.; mild odor; freely sol. in water; pH 6.5-7.5 (55%); 55% act.; 17% min. total HCHC; 2.0% max. free HCHO

Toxicology: May irritate eyes and skin

Environmental: Biodegr.ade.

Precaution: Avoid strong oxidizing agents; wear goggles and gloves

Storage: Store in warm warehouse

Chem. Descr.: PEG-27 lanolin
CAS 61790-81-6
Uses: Emollient, emulsifier, dispersant, wetting agent, solubilizer, foam stabilizer in topical pharmaceuticals, antiperspirants, germicidal hand soaps

Properties: ASTM 3 max. gel; HLB 15.0; nonionic; 50% act.

Lanogen® 41 [Amerchol http://www.dow.com/ucc/amerchol/index.htm]

Chem. Descr.: PEG-75 lanolin
CAS 61790-81-6
Uses: Emollient, emulsifier, dispersant, wetting agent, solubilizer, foam stabilizer in topical pharmaceuticals, antiperspirants, germicidal hand soaps

Properties: Gardner 8, visc. liq.; mild pleasant odor; HLB 15.0; iodine no. 7; sapon. no. 9 mg/g; nonionic; 50% act.

Storage: Store in closed containers and protected from extreme temps.

Chem. Descr.: PEG-6 and PEG-32 (1:1 mixt.)
CAS 25322-68-3
Uses: Ointment base, thickener, solubilizer for act. ingreds. in pharmaceuticals

Features: Good skin compat.; neutral pH

Properties: Wh. soft paste; 100% act.

Chem. Descr.: Lanolin oil
CAS 70321-63-0; EINECS/ELINCS 274-559-6
Uses: Emollient, moisturizer, emulsifier, spreading agent in topical pharmaceuticals

Features: Imparts oil sol.; less tack than lanolin

Properties: Yel.-amber liq.; sl. char. odor; insol. in water; sol. in oils, esters, hydrocarbons, and IPA; sp. gr. 0.94; b.p. 316 C; acid no. 2 max.; sapon. no. 85-105; flash pt. (COC) 318 C; nonionic

Use Level: 0.5-3.0% use level

Toxicology: LD50 (oral, rat) > 5000 mg/kg; LD50 (dermal, rabbit) > 2000 mg/kg; may cause allergic skin reaction in susceptible individuals

Hazardous Decomp. Prods.: Thermal decomp. may produce smoke, CO, CO2, aldehydes and other products of incomplete combustion

HMIS: Health 0, Flammability 1, Reactivity 0

Storage: Store in closed containers and protected from extreme temps.

Lanolin USP AAA [Amerchol

Handbook of Pharmaceutical Additives, Third Edition 374
Trade Name Reference

**http://www.dow.com/ucc/amerchol/index.htm**

**Chem. Descrip.**: Lanolin, tech. **See Lanolin**

**CAS**: 8006-54-0; EINECS/ELINCS 232-348-6

**Uses**: Emollient and moisturizer for lip balms

**Regulatory**: USP

**Properties**: Gardner 8, yel. to amber soft wax; mild characteristic odor; insol. in water; sp. gr. 0.9; m.p. 38 C; b.p. 310 C; 100% act.

**Use Level**: 0.5-5.0% use level

**Toxicology**: LD50 (oral, rat) > 5000 mg/kg; LD50 (dermal, rabbit) > 2000 mg/kg; may cause allergic skin reaction in susceptible individuals

**Environmental**: Limited biodegradability; LC50 (fish) >1000 mg/l

**Hazardous Decomp. Prods.**: Thermal decomposition may produce smoke, CO, CO2, aldehydes and other products of incomplete combustion

**HMIS**: Health 0, Flammability 1, Reactivity 0

**Storage**: Store in closed containers and protect from extreme temps.

**Lanolin USP Superfine** **[Fanning http://www.fanncorp.com]**

**Chem. Descrip.**: Lanolin

**CAS**: 8006-54-0; EINECS/ELINCS 232-348-6

**Uses**: Emollient, moisturizer, protective film-former for pharmaceutical ointments, protective creams and lotions, burn aids

**Features**: Maintains skin hydration

**Regulatory**: FDA 21CFR §121.2562, 121.1059, 121.2514, 121.2519, 121.2526, 121.2531, 121.2507, 121.2557

**Properties**: Pale yel. tenacious, unctuous substance, faint char. odor; m.p. 36-42 C; iodine no. 18-36

**Lanolin USP Ultrafine** **[Fanning http://www.fanncorp.com]**

**Chem. Descrip.**: Lanolin

**CAS**: 8006-54-0; EINECS/ELINCS 232-348-6

**Uses**: Emollient, moisturizer, protective film-former for pharmaceutical ointments, protective creams and lotions, burn aids

**Features**: Maintains skin hydration

**Regulatory**: FDA 21CFR §121.2562, 121.1059, 121.2514, 121.2519, 121.2526, 121.2531, 121.2507, 121.2557

**Properties**: Pale yel. tenacious, unctuous substance, faint char. odor; m.p. 36-42 C; iodine no. 18-36

**Lanolina C 200** **[Esperis http://www.esperis.it]**

**Chem. Descrip.**: PEG-75 lanolin

**CAS**: 61790-81-6

**Uses**: Emollient for pharmaceuticals

**Lanolin USP** **[RITA http://www.ritacorp.com]**

**Chem. Descrip.**: Lanolin USP

**CAS**: 8006-54-0; EINECS/ELINCS 232-348-6

**Uses**: Skin moisturizer, lubricant, and emollient for pharmaceuticals; stabilizer for emulsions, dispersions, and suspensions; lubricant in waterless hand cleaners, printing inks, can coatings, corrosive inhibitors and lubricants

**Regulatory**: USP, RCRA nonreportable

**Properties**: Yel. grease; insol. in water; sp.gr. 0.9; vapor dens. > 1; b.p. decomposes; flash pt. (COC) > 500 F; volatiles < 0.2%

**Toxicology**: LD50 (oral, albino rat) > 43 cc/kg; Draize primary eye irritation index (rabbit) 0.7

**Precaution**: Wear safety glasses, rubber gloves, rubber apron; incompat. with oxidizers

**Storage**: Keep away from heat, flames

**Lanolin USP Cosmetic Grade** **[RITA http://www.ritacorp.com]**

**Chem. Descrip.**: Lanolin USP

**CAS**: 8006-54-0; EINECS/ELINCS 232-348-6

**Uses**: Emollient, water absorbent, emulsifier, emulsion stabilizer, and pigment dispersant for pharmaceuticals, topical formulations

**Regulatory**: USP

**Properties**: Gardner 9+ max. color; m.p. 38-44 C; iodine no. 18-36; sapon. no. 93-107; nonionic

**Use Level**: 0.1-50%

**Lanolin USP Extra Deodorized** **[RITA http://www.ritacorp.com]**

**Chem. Descrip.**: Lanolin USP

**CAS**: 8006-54-0; EINECS/ELINCS 232-348-6

**Uses**: Emollient, water absorbent, emulsifier, emulsion stabilizer, and pigment dispersant for pharmaceuticals, topical formulations

**Regulatory**: USP

**Properties**: Gardner 8+ max. color; ye. grease; characteristic odor; insol. in water; m.p. 38-44 C; iodine no. 18-36; sapon. no. 93-107; nonionic

**Use Level**: 0.1-50%

**Toxicology**: LD50 (acute toxicity, albino rat) >26 g/kg; Draize primary eye irritation index (rabbit) = 0.0 (rabbit)
Trade Name Reference

Environmental: Biodegrad.
Precaution: Avoid heat, flame, and oxidizing materials; wear safety goggles and gloves
Hazardous Decomp. Prods.: Noxious fumes of CO
Storage: Store at R.T.; keep containers closed in order to maintain performance

Lanolin USP Pharmaceutical Grade [RITA http://www.ritacorp.com]
Chem. Descrip.: Lanolin USP
CAS 8006-54-0; EINECS/ELINCS 232-348-6
Uses: Emollient, water absorbent, emulsifier, emulsion stabilizer, and pigment dispersant for pharmaceuticals, topical formulations
Regulatory: USP
Properties: Gardner > 10+ color; m.p. 38-44 C; iodine no. 18-36; sapon. no. 93-107; nonionic
Use Level: 0.1-50%

Lanolin USP Pharmaceutical [RITA http://www.ritacorp.com]
Chem. Descrip.: Lanolin
CAS 8006-54-0; EINECS/ELINCS 232-348-6
Uses: Skin moisturizer, lubricant, and emollient for pharmaceuticals; stabilizer for emulsions, dispersions, and suspensions
Regulatory: USP
Properties: Yel. grease; insol. in water; sp. gr. 0.9; m.p. 38-44 C; b.p. (COC) decomposes @ 350 F; iodine no. (Hanus) 18-36; flash pt. > 500 F
Toxicology: Nonirritant to eyes and skin; LD50 (ing., albino rat) > 26g/kg
Environmental: Biodegrad.
Precaution: Avoid heat, flames, and oxidizing
Hazardous Decomp. Prods.: May emit noxious fumes of CO

Chem. Descrip.: Hydrous sodium lithium magnesium silicate See Smectite
CAS 53320-86-8; EINECS/ELINCS 258-476-2
Uses: Used in conjunction with other thickeners for imparting a shea sensitive structure to clear gel and conventional toothpaste
Properties: Wh. free-flowing powd.; insol. in water but hydrates and swells to give cl. and colorless colloidal disp. in water or aq. alcohol sol'n.s.; bulk dens. 1000 kg/m³; surf. area 370 m²/g; pH 9.8 (2% susp.)
Toxicology: LD50 (oral, rat) > 8 g/kg; LC50 (inh., rat) > 1.66 g/m³; primary skin irritation index (rabbit) 0.5; may cause degreasing, dryness, cracking of skin; may cause nose, mouth, GI irritation
Precaution: Wear PVC or rubber gloves, chemical goggles; avoid excessive moisture; do not breathe dust
Hazardous Decomp. Prods.: Lithium salts if prod. dec. by min. acid
Storage: Store under dry conditions away from min. acids

Chem. Descrip.: PEG-8 caprylic/capric glycerides
CAS 85536-07-8
Uses: Excipient for creams, lotions; surfactant for microemulsions
Properties: Gardner < 5 oily liq., faint odor; sol. in water; very sol. in ethanol, chloroform, methylene chloride; sp.gr. 1.060-1.070; visc. 80-110 mPa•s; HLB 14.0; acid no. < 1; iodine no. < 2; sapon. no. 85-105; ref. index 1.450-1.470; nonionic
Toxicology: LD50 (oral, rat) > 20 ml/kg, nontoxic; sl. ocular irritant at 0.1 ml; nonirritating to skin

Chem. Descrip.: Lactoyl methylsilanol elastinate
Uses: Provides hydrating, anti-inflammatory action, tissue regeneration, slimming action for hand creams, slimming prods. and health prods.
Properties: Colorless to pale yel. sl. opalescent liq.; misc. with water, alcohols, glycols; sp.gr. 1.0; pH 5.5
Use Level: 3-4%
Toxicology: Nontoxic

Laurico 70% [Undesa http://www.undesa.com; S. Black http://www.sblack.com]
Chem. Descrip.: Lauric acid
CAS 143-07-7; EINECS/ELINCS 205-582-1
Uses: Emulsifier in pharmaceuticals
Environmental: Biodeg. (28 d) > 90%
Precaution: Wear gloves, goggles, overall skin protection; avoid entry to sewers, drain and surface water
Storage: Store @ R.T. in original sealed container protected from heat sources

**tricalcium phosphate** to enhance flowability
See Calcium phosphate tribasic

Uses: Emulsifier, blending agent for pharmaceuticals, dietary supplements; stabilizer, dispersant for color and flavor suspensions

Regulatory: FDA 21CFR §184.1400, GRAS
Properties: Lt. tan to med. yel. gran., superior odor and flavor profiles; 97% min. phospholipid
Storage: Hygroscopic; store in sealed containers below 25 C; protect from light and moisture

**Lecigran™ T** [Riceland Foods http://www.riceland.com]
Chem. Descrip.: Deoiled lecithin with **tricalcium phosphate** to enhance flowability
See Calcium phosphate tribasic
Uses: Emulsifier, blending agent for pharmaceuticals, dietary supplements; stabilizer, dispersant for color and flavor suspensions
Properties: Powd.; 97% min. phospholipid

**Lecigran™ T** [Riceland Foods http://www.riceland.com]
Chem. Descrip.: Deoiled lecithin with **tricalcium phosphate** to enhance flowability
See Calcium phosphate tribasic
Uses: Emulsifier, blending agent for pharmaceuticals, dietary supplements; stabilizer, dispersant for color and flavor suspensions
Properties: Powd.; 97% min. phospholipid

Chem. Descrip.: Octacosanol (30-35%), triacontanol (25-40%), dotriacontanol (10-18%), hexacosanol (2-10%) See 1-Dotriacontanol; 1-Hexacosanol; Myricyl alcohol
Uses: Ingr. in dietary supplements, healthy foods including nutraceutical vegetable oils and oil-based spreads
Features: Natural waxy alcohol blend; for the support of healthy cholesterol and energy levels
Properties: Wh. to off-wh. gran. powd.; sol. in aromatics and aliphatics @ 70-80 C; insol. in water; m.p. 70-82 C; 95% min. alcohols; 5% max. natural hydrocarbons
Use Level: 500-5000 micrograms/serving or dose
Storage: Store in cool, dry environment protected from heat sources and sunlight

Chem. Descrip.: Octacosanol (8.1%) in a base of maize syrup powd. (90-92%) See Corn syrup solids
Uses: Ingr. in nutritional supplement tablets
Trade Name Reference

- or capsules for dietetic and health food apps., e.g., sports endurance supplements, weight-loss prods., energy-boosting or stress-reducing supplements, pharmaceuticals

**Features:** Natural waxy alcohol blend

**Properties:** 10% max. moisture

**Storage:** Store in cool, dry environment protected from heat sources and sunlight

**Lexemul**

  
  **Chem. Descrip.:** Glyceryl stearate and stearamidoethyl diethylamine
  
  **Uses:** Emulsifier, stabilizer, opacifier, and emollient for cationic systems in topical pharmaceuticals, antiperspirants
  
  **Features:** Self-emulsifying, acid-stable
  
  **Properties:** Wh. to cream flakes; mild fatty odor; disp. in water (60 C); m.p. 60 C; HLB 4.1; acid no. 28; iodine no. 3 max.; sapon. no. 170; cationic; 100% conc.

- **Lexemul** EGMS [Inolex http://www.inolex.com; S. Black http://www.sblack.com]
  
  **Chem. Descrip.:** Glyceryl stearate, sodium lauryl sulfate
  
  **Uses:** Emulsifier, stabilizer, opacifier and emollient in topical pharmaceuticals
  
  **Features:** SE, acid-stable
  
  **Properties:** Wh. to cream flakes; mild char. odor; m.p. 59 C; HLB 4.9; acid no. 16; iodine no. 3 max.; sapon. no. 158; pH 5.5 (3% aq.); anionic; 100% conc.

  
  **Chem. Descrip.:** Glyceryl stearate
  
  **CAS 111-60-4:** EINECS/ELINCS 203-886-9
  
  **Uses:** Emulsifier, bodying agent, stabilizer, opacifier, pearlescent for creams, lotions, topical pharmaceuticals; sec. suspending agent in o/w systems
  
  **Properties:** Lovibond 20Y/3R flakes, mild fatty char. odor; sol. in hot min. and veg. oils; water-insol.; m.p. 57 C; HLB 2.3; acid no. 2 max.; iodine no. 1 max.; sapon. no. 185; nonionic; 100% conc.

- **Lexol** 3975 [Inolex http://www.inolex.com; S. Black http://www.sblack.com]
  
  **Chem. Descrip.:** Isopropyl palmitate, isopropyl myristate, isopropyl stearate
Trade Name Reference

Uses: **Emollient and solvent for topical pharmaceuticals**

Features: Replacement for IPM or IPP; oxidative resist.

Properties: Colorless liq., odorless; sol. in acetone, benzene, CCl₄, castor oil, chloroform, ethanol, heptane, IPA; insol. in water; sp.gr. 0.850-0.858; visc. 7 cps; f.p. 11 C; acid no. 1 max.; iodine no. 1 max.; sapon. no. 184-194; flash pt. (PMCC) 169 C; ref. index 1.4367; 100% conc.

Chem. Descrip.: **Octyl palmitate**

CAS 29806-73-3; EINECS/ELINCS 249-862-1

Uses: **Emollient for topical pharmaceuticals, antiperspirants, nonocclusive creams and lotions**, sun care prods.

Properties: Colorless cl. liq., odorless; sol. in acetone, benzene, CCl₄, chloroform, ether, heptane, alcohol, veg. and min. oils; insol. in water; sp.gr. 0.858; visc. 13 cps; f.p. -2 C; acid no. 1 max.; iodine no. 1 max.; sapon. no. 145-155; flash pt. (PMCC) 206 C; ref. index 1.4460; 100% conc.

Storage: Store in tightly closed original containers @ 13-38 C to avoid deterioration or contamination; store bulk liq. under dry inert atmosphere in SS or aluminum vessels

Lexol® GT-855 [Inolex http://www.inolex.com]

Chem. Descrip.: **Caprylic/capric triglyceride**

CAS 65381-09-1; EINECS/ELINCS 265-724-3

Uses: **Solv. for flavor ingrds.; vehicle for medicinals, antibiotics, vitamins; solubilizer; oxidative stability**

Features: Nonoily skin feel; oxidative stability

Properties: APHA 100 max. cl. liq., odorless; tasteless; alcohol-sol.; sp.gr. 0.943; visc. 27 cps; f.p. -19 C; acid no. 0.1 max.; iodine no. 1 max.; sapon. no. 325-355; flash pt. (PMCC) 224 C; ref. index 1.4479; 100% conc.

Chem. Descrip.: **Caprylic/capric triglyceride**

CAS 65381-09-1; EINECS/ELINCS 265-724-3

Uses: **Emollient, moisturizer, emulsion stabilizer, vehicle for creams, lotions; carrier for flavors; vehicle for medicinals, antibiotics, vitamins**

Properties: APHA 100 max. cl. liq., odorless, tasteless; sol. in alcohol; sp.gr. 0.947; visc. 25 cps; f.p. -19 C; acid no. 0.1 max.; iodine no. 1 max.; sapon. no. 335-355; flash pt. (PMCC) 233 C; ref. index 1.4471; 100% conc.

Chem. Descrip.: **Isopropyl myristate**

NF CAS 110-27-0; EINECS/ELINCS 203-751-4

Properties: Colorless cl. liq.; odorless; sol. in acetone, benzene, CCl₄, castor oil, chloroform, ethanol, heptane, IPA; insol. in water; m.w. 270; sp.gr. 0.847-0.854; dens. 7.1 lb/gal; visc. 4.8 cp; f.p. 3 C; b.p. 170 C; acid no. 1 max.; iodine no. 1 max.; sapon. no. 182-191; flash pt. 305 F; ref. index 1.437; 100% conc.

Chem. Descrip.: **Isopropyl palmitate**

CAS 142-91-6; EINECS/ELINCS 205-571-1

Uses: **Emollient, solubilizer, carrier, spreading agent for topical pharmaceuticals; extender for fragrances**

Properties: Colorless cl. liq.; odorless; sol. in acetone, benzene, CCl₄, castor oil, chloroform, ethanol, heptane, IPA; insol. in water; m.w. 298; sp.gr. 0.850-0.855; dens. 7.1 lb/gal; visc. 7 cps; f.p. 11 C; acid no. 1 max.; iodine no. 1 max.; sapon. no. 182-191; flash pt. (PMCC) 170 C; ref. index 1.437; 100% conc.

Storage: Store in tightly closed original containers @ 13-38 C to avoid deterioration or contamination; store bulk liq. under dry inert atmosphere in SS or aluminum vessels

Lexol® PG-800 [Inolex http://www.inolex.com]

Chem. Descrip.: **Propylene glycol dioctanoate**

CAS 56519-71-2; EINECS/ELINCS 301-185-3

Uses: **Emollient and moisturizer for pharmaceutical creams, lotions, topicals; solvent, carrier, vehicle for flavors, fragrances, vitamins, antibiotics, medicinals**

Features: Nonoily feel, oxidation stability

Properties: Colorless cl. liq., char. odor; sol. in alcohol, min. oil, acetone; sp.gr. 0.918; visc. 10 cps; f.p. -34 C; acid no. 1 max.; iodine no. 1 max.; sapon. no. 320-340; flash pt. (COC) 272 C; ref. index 1.4350; 100% conc.
Chem. Descrip.: Propylene glycol dicaprylate/dicaprate
CAS 68583-51-7; EINECS/ELINCS 271-516-3
Uses: Solubilizer, solvent, coupling agent, vehicle for flavors, fragrances, vitamins, antibiotics, medicinals; emollient, moisturizer, lubricant for creams, lotions
Features: Nonoily skin deposition
Properties: APHA 100 max. cl. liq., odorless; sol. in alcohol, min. and veg. oil, acetone; sp.gr. 0.922; visc. 10 cps; f.p. -38 C; acid no. 0.1 max.; iodine no. 1 max.; sapon. no. 315-335; flash pt. (PMCC) 195 C; ref. index 1.4391; 100% conc.
Storage: Store in tightly closed original containers @ 13-38 C to avoid deterioration or contamination; store bulk liq. under dry inert atmosphere in SS or aluminum vessels

Linoleato Etile [Esperis http://www.esperis.it]
Chem. Descrip.: Ethyl linoleate, ethyl linolenate
Uses: Humectant, emulsifier for cosmetics, pharmaceuticals

Linalol 95 [Millennium/F&F http://www.aromachem.com]
Chem. Descrip.: Linalool (98.5%)
CAS 78-70-6; EINECS/ELINCS 201-134-4
Uses: Raw material in synthesis of isophytol and vitamin E
Regulatory: FDA 21CFR §182.60; Australia AICS; Canada DSL; Japan IEC; Korea KECL/ECL; Philippines PICCS
Properties: Cl. liq.; floral odor; sol. 1 in 4 in 60% alcohol; m.w. 154.25; sp.gr. 0.861-0.870; dens. 7.20 lb/gal; vapor pressure ≈ 0.4 mm Hg; vapor dens. 5.3; b.p. 192.8 C; flash pt. (TCC) 80 C; ref. index 1.461-1.465 (20 C); 95% min. act.
Toxicology: LD50 (oral, rat) 720 mg/kg; corrosive
Environmental: COD 2523 mg O2/g; BOD5 96 mg O2/g

Lipacide™ C8CO [Seppic http://www.seppic.com]
Chem. Descrip.: Capryloyl collagen amino acids
CAS 68989-52-6
Uses: Antimicrobial, antiseborrheic, antiacneic, antiseptic for dermal preps., esp. for prevention and treatment of skin prone to acne
Properties: Paste; dough-like appearance, char. odor; very sl. sol. in water (20 C); sol. in alcohols, polyols, acetone, ether, and surfactants; m.w. ≈ 240; acid no. 215-250
Use Level: 1-2% (antimicrobial/antiseborrheic in cosmetics, skin prods.); 2-4% (antiacneic in skin prods., makeup), 4-6% (antiseptics)
Toxicology: Nontoxic; nonirritating to eyes and skin; hypoallergenic
Trade Name Reference

**Storage:** 3 yrs. storage life stored away from heat

**Lipacide™ C8G** [Seppic http://www.seppic.com]
Chem. Descrip.: Capryloyl glycine
CAS 14246-53-8; EINECS/ELINCS 238-122-3
Uses: Cleansing agent for acne control
Features: Used for wh. and transparent formulations
Properties: Powd.

**Lipacide™ UG** [Seppic http://www.seppic.com]
Chem. Descrip.: Undecylenoyl glycine
Uses: Sebum control agent for sensitive skins, oily skins, acne-prone skins

**Lipamine SPA** [Lipo http://www.lipochemicals.com]
Chem. Descrip.: Stearamidopropyl dimethylamine
CAS 7651-02-7; EINECS/ELINCS 231-609-1
Uses: Raw material for pharmaceuticals
Properties: Solid

**Lipase 8** [Am. Labs http://www.americanlaboratories.com]
Chem. Descrip.: Lipase
CAS 9001-62-1; EINECS/ELINCS 232-619-9
Uses: Fat-splitting enzyme; ingred. for vitamin-mineral mixes
Features: Min. 8 USP lipase units/mg
Properties: Lt. yel.-brown powd.; sl. peculiar odor and taste; sol. in water; insol. in ethanol; fat digestive act. 6000-7500 u/g (pH 7)
Toxicology: May be a skin irritant; inh. of aerosols or dust may induce sensitization and allergic reactions in sensitized individuals; nontoxic
Environmental: Biodegrad.; not harmful to aquatic and marine organisms when dissolved with copious amounts of water
Precaution: Wear respirator, protective glasses, and impervious gloves; avoid dust formation
Storage: Store container in a cool and dry place

**Lipase 16** [Am. Labs http://www.americanlaboratories.com]
Chem. Descrip.: Lipase
CAS 9001-62-1; EINECS/ELINCS 232-619-9
Uses: Fat-splitting enzyme; ingred. for vitamin-mineral mixes
Features: Min. 16 USP lipase units/mg
Properties: Lt. yel.-brown powd.; sl. peculiar odor and taste; sol. in water; insol. in ethanol; fat digestive act. 12000-15000 u/g (pH 7)
Toxicology: May be a skin irritant; inh. of aerosols or dust may induce sensitization and allergic reactions in sensitized individuals; nontoxic
Environmental: Biodegrad.; not harmful to aquatic and marine organisms when dissolved with copious amounts of water
Precaution: Wear respirator, protective glasses, and impervious gloves; avoid dust formation
Storage: Store container in a cool and dry place

**Lipase 24** [Am. Labs http://www.americanlaboratories.com]
Chem. Descrip.: Lipase
CAS 9001-62-1; EINECS/ELINCS 232-619-9
Uses: Fat-splitting enzyme; ingred. for vitamin-mineral mixes
Features: Min. 24 USP lipase units/mg
Properties: Lt. yel.-brown powd.; sl. peculiar odor and taste; sol. in water; insol. in ethanol; fat digestive act. 12000-15000 u/g (pH 7)
Toxicology: May be a skin irritant; inh. of aerosols or dust may induce sensitization and allergic reactions in sensitized individuals; nontoxic
Environmental: Biodegrad.; not harmful to aquatic and marine organisms when dissolved with copious amounts of water
Precaution: Wear respirator, protective glasses, and impervious gloves; avoid dust formation
Storage: Store container in a cool and dry place
aquatic and marine organisms when dissolved with copious amounts of water
Precaution: Wear respirator, protective glasses, and impervious gloves; avoid dust formation
Storage: Store container in a cool and dry place

Chem. Descrip.: Shea butter See Shea butter (Butyrospermum parkii)
CAS 194043-92-0; EINECS/ELINCS 270-311-6
Uses: Visc. builder, UV-B absorber for pharmaceuticals, emollient bases, creams and lotions
Properties: Lt. yel. solid; odorless; insol. in water; sol. in acetone/hexane; dens. 890 kg/m³; m.p. 31 C; iodine no. 53-56; sapon. no. 178-190; flash pt. >150 C; fire pt. > 150 C
Toxicology: Nontoxic
Environmental: Biodeg. > 98% after 21 days
Precaution: May cause slippery floors
Storage: Store in cool, dry area @ normal humidity; keep away from products with a strong or foreign odor

Chem. Descrip.: Hydrogenated cottonseed oil
CAS 68334-00-9; EINECS/ELINCS 269-804-9
Uses: Lubricant for pharmaceutical tablets

Chem. Descrip.: Shea butter See Shea butter (Butyrospermum parkii)
CAS 68424-60-2; EINECS/ELINCS 293-515-7
Uses: Anti-irritant, anti-inflammatory, UV-B protectant in personal care, cosmetics, sun protection prods.
Features: Inc. conc. of unsaponifiables
Properties: Liq.; SPF 2

Lipo 142 [Lipo http://www.lipochemicals.com]
Chem. Descrip.: PEG-8 tallate
CAS 61791-00-2
Uses: Solubilizer, spreading agent, emulsifier, dispersant, lubricant for creams/lotions, pharmaceuticals
Properties: Lt. amber liq.; mild char. odor; disp. in water; sp.gr. 0.98; b.p. > 200 F; flash pt. (COC) 415 F
Toxicology: Not considered a toxic substance; nonhazardous; TSCA listed
Environmental: Biodeg.

Precaution: Avoid strong oxidizing agents, alkalis, acids; container may be hazardous when emptied
Hazardous Decomp. Prods.: Thermal decomp. may produce CO, CO₂
Storage: Keep containers closed until use; do not store in heat or direct sunlight

Chem. Descrip.: Beta cyclodextrin, menthol (16%) See β-Cyclodextrin
Uses: Cooling agent in lotions, gels, pharmaceuticals
Properties: Colorless crystalline solid; bland char. odor; vapor pressure 0.80; m.p. 105 F; b.p. 450 F; flash pt. 212 F
Toxicology: Nontoxic
Precaution: Avoid strong oxidizing agents
Hazardous Decomp. Prods.: Thermal decomp. may produce acrid fumes
Storage: Keep containers closed until use; do not store in heat or direct sunlight; avoid excessive heat

Chem. Descrip.: Beta-cyclodextrin, ethylhexyl methoxycinnamate See β-Cyclodextrin; Octyl methoxycinnamate
Uses: UV-B absorber, delivery system for sunscreens, creams/lotions, personal care, pharmaceuticals
Properties: Wh. powd., char. odor; insol. in water, oil; sp.gr. ≈ 1.6
Toxicology: Nontoxic
Environmental: Biodeg.
Precaution: Avoid excessive heat and strong oxidizing agents
Hazardous Decomp. Prods.: None known
Storage: Keep containers closed until use; do not store in heat or direct sunlight

Chem. Descrip.: Hydroxypropyl cyclodextrin and triclosan See Hydroxypropyl-β-cyclodextrin
Uses: Antimicrobial for pharmaceuticals
Features: Encapsulated triclosan allows easier formulation
Properties: Lt. amber liq.; char. odor; sol. in water; sp.gr. ≈ 1.23
Environmental: Biodeg.
Precaution: Avoid strong oxidizing agents,
Trade Name Reference

acids, and bases
Hazardous Decomp. Prods.: Toxic fumes of CO, CO₂
Storage: Keep containers closed until use; do not store in heat or direct sunlight

Lipo DGS [Lipo http://www.lipochemicals.com]
Chem. Descrip.: PEG-2 stearate
CAS 106-11-6; EINECS/ELINCS 203-363-5
Uses: Visc. builder, opacifier, aux. emulsifier for w/o or o/w type pharmaceuticals; opacifier, thickener in creams, lotions
Properties: Wh. to off-wh. waxy bead or flake; bland char. odor; sol. in hot alcohol, esters, ketones, glycols, veg. oil; insol. in water; sp.gr. 1.0; m.p. 43-50 C; acid no. 5 max.; sapon. no. 150-165; flash pt. (COC) > 300 F
Toxicology: Not considered a toxic substance; TSCA listed
Environmental: Biodeg.
Precaution: Avoid strong oxidizing agents; container may be hazardous when emptied
Hazardous Decomp. Prods.: None known
Storage: Keep containers closed until use; do not store in heat or direct sunlight

Lipobee 102 Prills [Lipo http://www.lipochemicals.com]
Chem. Descrip.: Synthetic beeswax  See Beeswax, synthetic
CAS 71243-51-1; EINECS/ELINCS 275-286-5
Uses: Emulsifying wax for o/w pharmaceutical ointments
Features: Stable in both acid and alkaline formulations; compat. with cationic ingreds.
Properties: Nonionic
Toxicology: Not considered a toxic substance; TSCA listed
Environmental: Biodeg.
Precaution: Potential combustible dust in flaked form; avoid strong oxidizing agents; container may be hazardous when emptied
Hazardous Decomp. Prods.: Thermal decomp. may produce CO, CO₂
Storage: Keep containers closed until used; do not store in heat or direct sunlight

Lipocol CS-50 [Lipo http://www.lipochemicals.com]
Chem. Descrip.: Cetearyl alcohol
CAS 67762-27-0; EINECS/ELINCS 267-009-1
Uses: Emollient, emulsifier, emulsion stabilizer, opacifier, visc. control agent in pharmaceuticals
Properties: Wh. flake; char. odor; insol. in water; sp.gr. 0.8; b.p. > 350 C; flash pt. 330 F
Toxicology: Not considered a toxic substance; TSCA listed
Environmental: Biodeg.
Precaution: Avoid strong oxidizing agents; container may be hazardous when emptied
Hazardous Decomp. Prods.: Thermal decomp. may produce CO, CO₂
Storage: Keep containers closed until used; do not store in heat or direct sunlight

Handbook of Pharmaceutical Additives, Third Edition 384

Lipocol O-20 [Lipo http://www.lipochemicals.com]
Chem. Descr.: Oleth-20
CAS 9004-98-2
Uses: Surfactant for antiperspirants, depilatories
Properties: Yel. liq.; HLB 12.4; acid no. 2 max.; hyd. no. 74-84; nonionic; 100% act.

Chem. Descr.: PPG-15 stearyl ether
CAS 25231-21-4
Uses: Surfactant, emulsifier, dispersant, solubilizer, visc. control agent, emollient, solvent, lubricant for pharmaceuticals
Properties: Wh. waxy solid; HLB 15.3; acid no. 1 max.; hyd. no. 45-65; nonionic; 100% act.

Chem. Descr.: Steareth-21
CAS 9005-00-9
Uses: Surfactant for antiperspirants, depilatories, pharmaceuticals
Properties: Wh. waxy solid; bland char. odor; insol. in water; sp.gr. 1.0; b.p. > 212 F; flash pt. (COC) > 300 F; nonionic
Toxicology: Nontoxic, nonhazardous; TSCA listed
Environmental: Biodeg.
Precaution: Container may be hazardous when emptied
Hazardous Decomp. Prods.: Thermal decomp. may produce CO, CO₂
Storage: Keep containers closed until use; do not store in heat or direct sunlight

Chem. Descr.: Cetearyl alcohol NF
CAS 67762-27-0; EINECS/ELINCS 267-009-1
Uses: Visc. builder with coemulsifier in pharmaceutical emulsions, antiperspirant sticks
Features:Compat. with anionic, cationic, and nonionic surfactants
Properties: Wh. waxy flakes; mild char. fatty odor; sol. in min. oil, most natural oils; insol. in water; sp.gr. 0.8; m.p. 48-55 C; b.p. > 350 C; acid no. 2 max.; iodine no. 4 max.; hyd. no. 205-220; flash pt. 330 F; 0.3% max. moisture
Toxicology: Not considered a toxic substance; TSCA listed
Environmental: Biodeg.
Precaution: Avoid strong oxidizing agents; container may be hazardous when emptied
Hazardous Decomp. Prods.: Thermal decomp. may produce CO, CO₂
Storage: Keep containers closed until use; do not store in heat or direct sunlight

Chem. Descr.: Ceteareth-4
CAS 68439-49-6
Uses: Surfactant for antiperspirants, depilatories
Properties: Wh. waxy solid; HLB 8.0; acid no. 1 max.; hyd. no. 120-140; nonionic; 100% conc.
Chem. Descrip.: Ceteareth-15
CAS 68439-49-6
Uses: Surfactant for antiperspirants, depilatories
Properties: Wh. waxy solid; HLB 14.3; acid no. 2 max.; hyd. no. 50-65; nonionic; 100% conc.

Chem. Descrip.: Ceteareth-20
CAS 68439-49-6
Uses: Surfactant for antiperspirants, depilatories
Properties: Wh. waxy solid; HLB 15.4; acid no. 1 max.; hyd. no. 45-60; nonionic; 100% conc.

Chem. Descrip.: Ceteareth-25
CAS 68439-49-6
Uses: Surfactant for creams/lotions, pharmaceuticals; pigment dispersant
Properties: Wh. waxy solid; bland char. odor; sol. in water; flash pt. (COC) > 300 F; pH 5.5-7.0; nonionic
Toxicology: Nontoxic; nonhazardous; TSCA listed
Environmental: Biodeg.
Precaution: Container may be hazardous when emptied
Hazardous Decomp. Prods.: Thermal decomp. may produce CO, CO₂
Storage: Keep containers closed until use; do not store in heat or direct sunlight

Chem. Descrip.: Stearyl alcohol
CAS 112-92-5; EINECS/ELINCS 204-107-6
Uses: Surfactant in pharmaceuticals
Properties: Wh. flake; pract. odorless; insol. in water; sp.gr. 0.80; m.p. 56-60 C; b.p. > 600 F; flash pt. (PMCC) 355 F
Toxicology: Not considered a toxic substance; TSCA listed
Environmental: Biodeg.
Trade Name Reference

stabilizer, conditioner, and moisturizer for pharmaceuticals, ointments, acne preps.

Properties: Yel. to amber liq.; mild char. odor; sol. in min. and veg. oils, isopropyl esters, and anhyd. IPA; insol. in water; acid no. 2 max.; iodine no. 18-36; sapon. no. 85-110; cloud pt. 18 C max.; nonionic

Lipolan Distilled [Lipo http://www.lipochemicals.com]
Chem. Descrip.: Dist. hydrogenated lanolin
CAS 8031-44-5; EINECS/ELINCS 232-452-1
Uses: Emollient, emulsifier, solubilizer, stabilizer, conditioner, and moisturizer for pharmaceuticals, sun care, ointments, acne preps., veterinary prods.
Properties: Nonionic

Lipomectant AL [Lipo http://www.lipochemicals.com]
Chem. Descrip.: Acetamide MEA and lactamide MEA
Uses: Humectant for antiperspirants, creams and lotions
Properties: Cl. liq.

Lipo Melanin 10% [Lipo http://www.lipochemicals.com]
Chem. Descrip.: Melanin
CAS 8049-97-6; EINECS/ELINCS 232-473-6
Uses: Raw material for pharmaceuticals
Properties: Liq.

Lipomic 601 [Lipo http://www.lipochemicals.com]
Chem. Descrip.: Mica
CAS 12001-26-2; EINECS/ELINCS 310-127-6
Uses: Filler, slip agent imparting elegant feel, longer wear, greaseproofing to pharmaceuticals, creams/lotions
Features: Controlled particle size distribution; talc replacement
Regulatory: FDA 21CFR §73.2496; DOT nonregulated
Properties: Off-wh. to gray shiny powd.; 36-40 µ particle size; odorless; insol. in water, most org. solvs.; sp.gr. 2.80; flash pt. none; pH 6-8 (10% aq.); 1% max. moisture
Use Level: 1-2% (creams/lotions)
Toxicology: Long-term overexposure to high concs. of dust may produce x-ray evidence of dust in the lungs, and may affect respiratory function
Environmental: Biodeg.
Precaution: Container may be hazardous when emptied

Chem. Descrip.: Fine platelet mica coated with boron nitride
Uses: Filler, antitackifier, skin adhesion promoter providing exc. afterfeel in skin care creams/lotions, pharmaceuticals
Properties: Wh. powd.; odorless; negligible sol. in water; sp.gr. 2.5; m.p. ≈ 1000 C; 1% max. moisture
Environmental: Biodeg.
Precaution: Avoid strong oxidizing agents, strong caustic or acidic sol’ns.; container may be hazardous when emptied
Hazardous Decomp. Prods.: Combustion prods.: NOx, CO, CO2
Storage: Keep containers closed until used; do not store in heat or direct sunlight

Liponate BS [Lipo http://www.lipochemicals.com]
Chem. Descrip.: Butyl stearate
CAS 123-95-5; EINECS/ELINCS 204-666-5
Uses: Emollient, thickener, visc. control agent, pigment dispersant for creams/lotions, pharmaceuticals
Regulatory: Japan listed
Properties: Pale yel. cl. semiliq.; sl. char. odor; insol. in water; sp.gr. 0.855; b.p. > 433 F; flash pt. > 350 F
Toxicology: Nontoxic; TSCA listed
Environmental: Biodeg.
Precaution: Avoid strong oxidizing agents, alkali, acids
Hazardous Decomp. Prods.: Thermal decomp. may produce CO, CO2
Storage: Keep containers closed until use; do not store in heat or direct sunlight

Liponate ICS [Lipo http://www.lipochemicals.com]
Chem. Descrip.: Isocetyl stearate
CAS 25339-09-7; EINECS/ELINCS 246-868-6
Uses: Emollient, thickener, visc. control agent, pigment dispersant for pharmaceuticals
Regulatory: Japan listed
Properties: Cl. oily liq.; sl. char. odor; insol. in water; sp.gr. 0.855; b.p. > 175 C; flash pt. (COC) 350 F
**Trade Name Reference**

**Toxicology:** Nontoxic; TSCA listed

**Environmental:** Partially biodeg.

**Precaution:** Avoid contact with strong oxidizing materials; container may be hazardous when emptied

**Hazardous Decomp. Prods.:** Thermal decomp. may produce CO, CO₂

**Storage:** Keep containers closed until use; do not store in heat or direct sunlight; keep away from heat and flames

**Liponate MM** [Lipo

http://www.lipochemicals.com]

**Chem. Descrip.:** Myristyl myristate

**CAS** 3234-85-3; EINECS/ELINCS 221-787-9

**Uses:** Emollient, thickener, visc. control agent, pigment dispersant for topical pharmaceuticals

**Features:** Adjusts rub-in and afterfeel

**Properties:** Wh. waxy flake; pract. odorless; sol. in veg. oils, min. oil, isopropyl esters; insol. in water, ethanol, glycerin, propylene glycol; m.p. 36-39 C; acid no. 3 max.; sapon. no. 120-130

**Liponic 70-NC** [Lipo

http://www.lipochemicals.com]

**Chem. Descrip.:** Sorbitol

**CAS** 50-70-4; EINECS/ELINCS 200-061-5

**Uses:** Humectant, plasticizer, softener, lubricant, sweetener for oral hygiene prods. such as dentifrices, mouthwashes, oral dosage pharmaceuticals

**Features:** Adds sweet taste and pleasant mouthfeel to orals

**Properties:** Cl. colorless sol'n.; water-sol.; sp.gr. 1.29-1.32; ref. index 1.455-1.470; pH neutral

**Liponic 76-NC** [Lipo

http://www.lipochemicals.com]

**Chem. Descrip.:** Sorbitol

**CAS** 50-70-4; EINECS/ELINCS 200-061-5

**Uses:** Humectant, plasticizer, softener, lubricant, sweetener for oral hygiene prods. such as dentifrices, mouthwashes, oral dosage pharmaceuticals

**Features:** Adds sweet taste and pleasant mouthfeel to orals

**Properties:** Colorless to pale yel. cl. syrup; odorless; sp.gr. 1.32-1.35; ref. index 1.468-1.475; 25% max. water

**Liponyl 10 BN 6058** [Lipo

http://www.lipochemicals.com]

**Chem. Descrip.:** Nylon-12 and boron nitride

**See Nylon 12**

**Uses:** Filler, softener with exc. adherence to skin for use in pharmaceuticals, creams/lotions, antiperspirant sticks

**Features:** Impart soft, silky feel

**Properties:** Wh. powd.; odorless; negligible sol. in water; sp.gr. 1.06; m.p. 345 F; pH 6.0-7.5

**Use Level:** 5-25%

**Toxicology:** Not considered a toxic substance

**Environmental:** Biodeg.

**Precaution:** Avoid strong oxidizing agents, strong caustic or acidic sol'ns.; container may be hazardous when emptied

**Hazardous Decomp. Prods.:** Combustion prods.: CO, CO₂, NOₓ

**Storage:** Store @ ambient conditions in sealed containers away from moisture, heat, direct sunlight; avoid extended storage above 70 C (may cause agglomeration)

**Liponyl 10 BN 6069** [Lipo

http://www.lipochemicals.com]

**Chem. Descrip.:** Nylon-12 and boron nitride

**See Nylon 12**

**Uses:** Lubricant, slip agent, adhesion promoter, oil absorbent for pharmaceuticals, skin care prods., creams/lotions

**Features:** Insol. in most cosmetic liqs.

**Properties:** Wh. free-flowing powd.; 7-12 µ particle size; odorless; negligible sol. in water; sp.gr. 1.06; m.p. 345 F; pH 6.0-7.5

**Use Level:** 5-25%

**Toxicology:** Not considered a toxic substance

**Environmental:** Biodeg.

**Precaution:** Avoid strong oxidizing agents, strong caustic or acidic sol'ns.; container may be hazardous when emptied

**Hazardous Decomp. Prods.:** Combustion prods.: CO, CO₂, NOₓ

**Storage:** Store @ ambient conditions in sealed containers away from moisture, heat, direct sunlight; avoid extended storage above 70 C (may cause agglomeration)

**Liponyl 20LL** [Lipo

http://www.lipochemicals.com]

**Chem. Descrip.:** Nylon-12 and lauroyl lysine

**See Nylon 12**

**Uses:** Filler, softener with exc. adherence to skin for use in pharmaceuticals, creams/lotions, antiperspirant sticks

**Features:** Insol. in most cosmetic liqs.

**Properties:** Wh. free-flowing powd.; 7-12 µ particle size; odorless; negligible sol. in water; sp.gr. 1.06; m.p. 345 F; pH 6.0-7.5

**Use Level:** 5-25%

**Toxicology:** Not considered a toxic substance

**Environmental:** Biodeg.

**Precaution:** Avoid strong oxidizing agents,
strong caustic or acidic sol'n.; container may be hazardous when emptied

Hazardous Decomp. Prods.: Combustion prods.: CO, CO₂, NOₓ

Storage: Keep containers closed until use; do not store in heat or direct sunlight

Chem. Descrip.: Nylon-6/12 (49-53%), glycereth-26 (29-33%), salicylic acid (12-18%), butylene glycol (3-5%) See Nylon 612
Uses: Emollient used in anti-acne preps.
Properties: Wh. to off-wh. powd.; sl. char. odor; sol. in min. acids, phenol; insol. in most org. solvs., chlorinated solvs., alkaline conditions; decomp. pt. 120 C; flash pt. >120 C
Use Level: 3-15% (creams, lotions, pressed powds., gels)
Toxicology: May produce eye, skin, or respiratory irritation
Environmental: Do not release into environment
Precaution: Potential dust explosion hazard; container may be hazardous when emptied; avoid container damage when handling and storing
Hazardous Decomp. Prods.: CO, hydrogen cyanide, hydrocarbons, butadiene, acrid smoke, irritating fumes; thermal decomp. may release toxic prods.
Storage: Store below 60 C away from moisture and heat; remove all sources of ignition; keep containers closed until use

Chem. Descrip.: PEG 20000  See PEG-20M
CAS 25322-68-3; EINECS/ELINCS 225-856-4
Uses: Humectant, fixing agent, viscosity control agent for cosmetics, pharmaceuticals
Regulatory: SARA §313 nonreportable; Japan listed
Properties: Wh. to off-wh. powd. or flake; bland, char. neutral odor; sol. in water; sp.gr. 1.13; flash pt. (COC) > 350 F
Toxicology: Nontoxic; nonirritating; nonhazardous; TSCA listed
Environmental: Biodeg.
Precaution: Avoid strong oxidizing agents, alkali, and acids; container may be hazardous when emptied
Hazardous Decomp. Prods.: None known
Storage: Keep containers closed until use; do not store in heat or direct sunlight

Lipo Polyglycol 20000 [Lipo http://www.lipochemicals.com]
Chem. Descrip.: PEG 20000  See PEG-20M
CAS 25322-68-3; EINECS/ELINCS 225-856-4
Uses: Humectant, fixing agent, viscosity control agent for cosmetics, pharmaceuticals
Regulatory: SARA §313 nonreportable; Japan listed
Properties: Wh. to off-wh. powd. or flake; bland, char. neutral odor; sol. in water; sp.gr. 1.13; flash pt. (COC) > 350 F
Toxicology: Nontoxic; nonirritating; nonhazardous; TSCA listed
Environmental: Biodeg.
Precaution: Avoid strong oxidizing agents, alkali, and acids; container may be hazardous when emptied
Hazardous Decomp. Prods.: CO, CO₂, SOₓ
Storage: Keep container closed until used; do not store in heat or direct sunlight

Lipoquat R [Lipo http://www.lipochemicals.com]
Chem. Descrip.: Ricinoleamidopropyl ethylidimonium ethosulfate
CAS 112324-16-0
Uses: Conditioner, antistat, emollient, gloss aid, softener for pharmaceuticals, anhyd. systems, clear and opacified prods.
Features: Leaves soft, nongreasy afterfeel on skin; exc. color stability; compat. with cationic surfactants in all proportions, with anionic surfactants < 5%
Properties: Yel. cl. visc. liq.; char. odor; sol. in water, acetone; insol. in veg. oils; sp.gr. 1.08; b.p. > 212 F; flash pt. (COC) > 300 F; pH 6.5-7.5 (3% aq.); cationic; 90% min. act.; 2.5% max. free amine
Toxicology: Not considered a toxic substance; not a primary skin irritant; pract. nonirritating to eyes
Environmental: Biodeg.
Precaution: Avoid strong oxidizing agents, alkali, and acids; container may be hazardous when emptied
Hazardous Decomp. Prods.: Thermal decomp. may produce CO, CO₂, SOₓ
Storage: Keep container closed until used; do not store in heat or direct sunlight

Liposorb O-20K [Lipo http://www.lipochemicals.com]
Chem. Descrip.: Polysorbate 80
CAS 9005-65-6
Trade Name Reference

Liposorb S-20K [Lipo http://www.lipochemicals.com]  
Chem. Descrip.: Polysorbate 60  
CAS 9005-67-8  
Uses: Surfactant, emulsifier, thickener, lubricant, antistat for pharmaceuticals; solubilizer for oils  
Features: Hydrophilic; used in conjunction with Liposorb sorbitan esters  
Regulatory: FDA 21CFR §172.836; kosher grade avail.  
Properties: Yel. liq. to gel; bland char. odor; sol. in water; sp.gr. 1.0; b.p. > 212 F; HLB 14.9±1; sapon. no. 45-55; hyd. no. 81-96; flash pt. > 300 F; pH 5.5-7.0  
Toxicology: LD50 (oral, rat) < 5 g/kg; nontoxic; nonirritating to eyes; TSCA listed  
Environmental: Biodeg.; no known ecological problems  
Precaution: Keep away from heat and flame  
Hazardous Decomp. Prods.: CO2, CO  
Storage: Keep containers closed until use; do not store in heat or direct sunlight

Liposorb TS-20K [Lipo http://www.lipochemicals.com]  
Chem. Descrip.: Polysorbate 65  
CAS 9005-71-4  
Uses: O/w emulsifier, dispersant, antifoam in pharmaceuticals  
Features:Compat. with anionic, nonionic, and cationic surfactants; mod. electrolyte tolerance  
Regulatory: Kosher; Japan listed  
Properties: Yel. to tan waxy solid; bland char. odor; sol. in ethanol; sl. sol. in veg. oils; disp. in water; misc. hot with min. oil; sp.gr. 1.1; b.p. > 212 F; flash pt. > 300 F; nonionic  
Toxicology: Nontoxic; nonhazardous; TSCA listed  
Environmental: Biodeg.  
Hazardous Decomp. Prods.: CO, CO2  
Storage: Keep containers closed until use; do not store in heat or direct sunlight; keep away from heat and flame

Lipothix™ 100-B [Lipo http://www.lipochemicals.com]  
Chem. Descrip.: Potassium polymetaphosphate and sodium bicarbonate See Potassium metaphosphate  
Uses: Visc. builder, skin softener for pharmaceuticals, skin care prods.  
Features: Leaves skin with soft, silky, slippery feel; mixt. of food-grade materials  
Properties: Wh. powd.; bland odor to odorless; partly sol. in water; insol. in alcohol, org. solvs., normal cosmetic emollients; pH 7-9; 10% max. moisture  
Toxicology: Not considered a toxic substance; no toxicity by ing. is to be expected; likely to be mildly irritating to the eye  
Environmental: Biodeg.  
Precaution: Avoid contact with acids and oxidizing agents; container may be hazardous when emptied  
Hazardous Decomp. Prods.: None known  
Storage: Keep containers closed until use; do not store in heat or direct sunlight

Chem. Descrip.: Corn (Zea mays) starch, potassium polymetaphosphate See Potassium metaphosphate  
Uses: Visc. builder, foaming agent, slip agent for pharmaceuticals  
Features: Leaves skin with soft, silky, slippery feel; mixt. of food-grade materials
Trade Name Reference

Properties: Wh, powd.; odorless; insol. in water, alcohol, org. solvs., normal cosmetic emollients; pH 4.0-6.0 (3% aq.); 10% max. moisture
Toxicology: Not considered a toxic substance; no toxicity by ing. is to be expected; likely to be mildly irritating to the eye
Environmental: Biodeg.
Precaution: Avoid contact with acids and oxidizing agents; container may be hazardous when emptied
Hazardous Decomp. Prods.: None known
Storage: Keep containers closed until use; do not store in heat or direct sunlight

Lipovol HNO [Lipo http://www.lipochemicals.com]
Chem. Descrip.: Hazel (Corylus avellana) nut oil
CAS 84012-21-5; EINECS/ELINCS 281-667-7
Uses: Ingred. in pharmaceuticals
Properties: Amber oily liq.; nutty odor; negligible sol. in water; sp.gr. 0.918
Toxicology: Not considered a toxic substance
Environmental: Biodeg.
Precaution: Avoid contact with acids and oxidizing agents; container may be hazardous when emptied
Hazardous Decomp. Prods.: Combustion prods.: CO2
Storage: Keep containers closed until use; do not store in heat or direct sunlight

Lipovol P [Lipo http://www.lipochemicals.com]
Chem. Descrip.: Apricot (Prunus armeniaca) kernel oil
CAS 72869-69-3
Uses: Emollient in pharmaceuticals
Features: Soft, nontacky afterfeel and high film gloss
Properties: Straw oily liq.; bland char. fatty odor; sol. in min. oil and isopropyl esters; insol. in water; acid no. 1 max.; iodine no. 90-115; sapon. no. 185-195

Lipovol RB [Lipo http://www.lipochemicals.com]
Chem. Descrip.: Rice (Oryza sativa) bran oil
CAS 68553-81-1; EINECS/ELINCS 271-397-8
Uses: Emollient in pharmaceuticals
Properties: Cl. liq.; bland char. odor; insol. in water; sp.gr. 0.91
Toxicology: Not considered a toxic substance; TSCA listed
Environmental: Biodeg.
Precaution: Avoid strong oxidizing agents, alkali and acidic sol'n.s.
Hazardous Decomp. Prods.: None known
Storage: Keep containers closed until use; do not store in heat or direct sunlight

Lipovol SES [Lipo http://www.lipochemicals.com]
Chem. Descrip.: Sesame (Sesamum indicum) oil
CAS 8008-74-0; EINECS/ELINCS 232-370-6
Uses: Emollient, solvent, and vehicle in pharmaceuticals; gloss aid and spreading agent for pigmented sticks
Features: Offers lt. nontacky feel
Properties: Yel. cl. liq.; bland char. odor; sol. in isopropyl esters and min. oil; insol. in water; sp.gr. 0.916-0.921; acid no. 0.2 max.; iodine no. 103-116; sapon. no. 188-195

Lipowax AO [Lipo http://www.lipochemicals.com]
Chem. Descrip.: Cetearyl alcohol, ceteareth-30
Uses: Self-emulsifying wax for pharmaceuticals and ointments
Features: Compat. with anionic, cationic, and nonionic systems
Properties: Wh. waxy pastille or flake; char. fatty odor; insol. in water; m.p. 50-53 F; acid no. 1 max.; hyd. no. 173-187; flash pt. (CC) > 165 F; pH 6.5-8.0
Environmental: Biodeg.
Precaution: Avoid strong oxidizers, caustic or acidic sol'n.s.
Hazardous Decomp. Prods.: Toxic fumes of CO2, CO
Storage: Keep containers closed until use; do not store in heat or direct sunlight

Lipowax C [Lipo http://www.lipochemicals.com]
Chem. Descrip.: N,N´-Ethylenebisstearamide
Trade Name Reference

See Ethylene distearamide
CAS 110-30-5; EINECS/ELINCS 203-755-6
Uses: Emulsifying wax in cosmetics, pharmaceuticals
Regulatory: FDA approved for food pkg.
Properties: Lt. cream powd.; sol. in hot toluene, naphtha, kerosene, and turpentine; insol. in water, low boiling solvs. such as alcohol, benzol, acetone; m.p. 140-145 C; acid no. 10 max.; flash pt. 285 C (COC); nonionic; 100% act.
Toxicology: Not considered a toxic substance; nonhazardous; TSCA listed
Environmental: Biodeg.
Precaution: Avoid strong oxidizing agents, alkali, or acids; container may be hazardous when emptied
Hazardous Decomp. Prods.: Thermal decomp. may produce CO, CO2, NOx
Storage: Keep containers closed until use; do not store in heat or direct sunlight

Chem. Descrip.: Ethylene bisstearamide See Ethylene distearamide
CAS 110-30-5; EINECS/ELINCS 203-755-6
Uses: Emulsifying wax for o/w pharmaceutical ointments
Features: Stable in both acid and alkaline formulations; compat. with cationic ingreds.
Properties: Wh. to off-wh. waxy solid; bland, char. odor; sol. in alcohol; misc. warm with most oil phase ingreds.; readily disp. in hot water; disp. in warm water; sp.gr. < 1.0; m.p. 46-55 C; b.p. > 212 F; HLB 11; acid no. 2 max.; sapon. no. 2 max.; flash pt. (COC) > 300 F; nonionic; 0.5% max. moisture
Use Level: 5-7.5% (creams/lotions)
Toxicology: Not considered a toxic substance
Environmental: Biodeg.
Precaution: Avoid strong oxidizing agents, acids, and bases; container may be hazardous when emptied
Hazardous Decomp. Prods.: Thermal decomp. may produce CO2, CO
Storage: Keep containers closed until use; do not store in heat or direct sunlight

Lipowax D [Lipo http://www.lipochemicals.com]
Chem. Descrip.: Cetearyl alcohol, ceteareth-20
Uses: Emulsifier, emollient, lubricant, visc. control agent in o/w pharmaceutical ointments
Features: Stable in acid and alkaline formulations; compat. with cationic ingreds.
Properties: Wh. to off-wh. waxy solid; bland, char. odor; sol. in alcohol, misc. warm with most oil phase ingredients, disp. in warm water; m.p. 46-55 C; HLB 11; sapon. no. 2; nonionic; 100% act.
Chem. Descrip.: Cetearyl alcohol, ceteareth-20
Uses: Emulsifying wax for o/w pharmaceutical ointments
Features: Compat. with anionic, cationic, and nonionic surfactants; good electrolyte tolerance; stable and act. over typ. cosmetic pH range
Properties: Wh. waxy solid or flake; bland char. odor; sol. in alcohol; misc. warm with most oil phase ingreds.; readily disp. in hot water; disp. in warm water; sp.gr. < 1.0; m.p. 46-55 C; b.p. > 212 F; HLB 11; acid no. 1 max.; sapon. no. 2 max.; flash pt. (COC) > 300 F; nonionic; 0.5% max. moisture
Use Level: 5-7.5% (creams/lotions)
Toxicology: Not considered a toxic substance
Environmental: Biodeg.
Precaution: Avoid strong oxidizing agents, acids, and bases; container may be hazardous when emptied
Hazardous Decomp. Prods.: Thermal decomp. may produce CO2, CO
Storage: Keep containers closed until use; do not store in heat or direct sunlight

Chem. Descrip.: Cetearyl alcohol, ceteareth-20, polysorbate 60
Uses: Emulsifier, emollient, lubricant, visc. control agent in o/w pharmaceutical ointments
Features: Produces stable oil and water emulsions; provides rich, creamy afterfeel; stable @ 40 C and 50 C for 4 wks
Properties: Wh. pastilles; char. fatty odor; insol. in water; sp.gr. 0.8; m.p. 55-59 C; flash pt. > 200 F; 0.50% max. moisture
Environmental: Biodeg.
Precaution: Avoid strong oxidizing agents, acids, and bases; container may be hazardous when emptied
Hazardous Decomp. Prods.: Toxic fumes of CO2, CO
Storage: Keep containers closed until use; do not store in heat or direct sunlight

Trade Name Reference

http://www.lipochemicals.com]
Chem. Descrip.: Cetearyl alcohol, ceteareth-20, ricinoleamidopropyl ethyldimonomium ethosulfate, polysorbate 60
Uses: Emulsifier, emollient, lubricant, conditioner, visc. control agent o/w pharmaceutical ointments
Features: One-component system; stable @ 40 and 50 C for 4 wks; provides rich, creamy afterfeel and substantivity to skin
Properties: Wh. pastilles; char. fatty odor; m.p. 50-59 C; 0.50% max. moisture
Environmental: Biodeg.
Precaution: Avoid strong oxidizing agents, acids, and bases
Hazardous Decomp. Prods.: Toxic fumes of CO2, CO
Storage: Keep containers closed until use; do not store in heat or direct sunlight

Lipowax G [Lipo
http://www.lipochemicals.com]
Chem. Descrip.: Stearyl alcohol and ceteareth-20
Uses: Emulsifying wax for o/w pharmaceutical ointments
Features: Stable in acid and alkaline formulations; compat. with cationic ingreds.
Properties: Solid; water-disp.; nonionic; 100% conc.

Lipowax NI [Lipo
http://www.lipochemicals.com]
Chem. Descrip.: Cetearyl alcohol and ceteth-20
Uses: Emulsifying wax for o/w pharmaceutical ointments
Features: Stable in acid and alkaline formulations; compat. with cationic ingreds.
Properties: Solid; water-disp.; nonionic; 100% conc.

Lipowax P [Lipo
http://www.lipochemicals.com]
Chem. Descrip.: Emulsifying wax NF
CAS 97069-99-0
Uses: O/w SE wax for pharmaceuticals
Features: Stable in acid and alkaline formulations; compat. with cationic ingreds.
Properties: Flakes or pastilles; bland, char. odor; sol. in alcohol, misc. warm with most oil phase ingred., disp. in warm water; m.p. 48-52 C; HLB 9; sapon. no. 14; nonionic; 100% act.

Lipowax P-31 [Lipo
http://www.lipochemicals.com]
Chem. Descrip.: Emulsifying wax NF
CAS 97069-99-0
Uses: Emulsifier for formulation of creams, lotions, and ointments
Features: Stable in acid and alkaline formulations; compat. with cationic ingreds.
Properties: Flake; nonionic; 100% conc.

Lipowax PA [Lipo
http://www.lipochemicals.com]
Chem. Descrip.: Cetearyl alcohol, polysorbate 60
Uses: Self-emulsifying wax for o/w pharmaceutical ointments
Features: For neutral and mildly acidic and alkaline pH systems; compat. with anionic, nonionic, and cationic surfactants; mod. electrolyte tolerance
Properties: Wh. to off-wh. waxy solid or flake; bland char. odor; sol. in alcohol; misc. warm with most oil phase ingreds.; disp. in warm water; sp.gr. 0.90; m.p. 48-52 C; iodine no. 3 max.; sapon. no. 14 max.; hyd. no. 178-192; flash pt. (COC) > 300 F; pH 5.5-7.0 (3% aq. disp.); nonionic
Use Level: 2-3% (lotions); 5-15% (creams)
Toxicology: Not considered a toxic substance; TSCA listed
Environmental: Biodegradable
Precaution: Container may be hazardous when emptied

Lipowax PA Pastilles [Lipo
http://www.lipochemicals.com]
Chem. Descrip.: Cetearyl alcohol, polysorbate 60
Uses: Emulsifying wax for o/w pharmaceutical ointments
Features: Stable in both acid and alkaline formulations; compat. with cationic ingreds.
Regulatory: Japan listed
Properties: Wh. to off-wh. flake; bland char. odor; sol. in alcohol; misc. warm with most oil phase ingred., disp. in warm water; m.p. 48-52 C; acid no. 1 max.; iodine no. 3 max.; sapon. no. 14 max.; hyd. no. 178-192; pH 5.5-7.0 (3% aq. disp.); nonionic
Toxicology: Nontoxic; TSCA listed
Environmental: Biodegradable
Precaution: Container may be hazardous when emptied; avoid container damage while
Trade Name Reference

handling and storing

Hazardous Decomp. Prods.: CO, CO₂

Storage: Keep containers closed until use

Lipowax R2 [Lipo
http://www.lipochemicals.com]
Chem. Descrip.: Cetearyl alcohol,
polysorbate-60, oleth-10, PEG-75 lanolin,
PEG-150 stearate, steareth-20
See Polysorbate 60
Uses: Emulsifying wax for o/w pharmaceutical ointments
Features: Stable in both acid and alkaline formulations; compat. with cationic ingreds.; has mod. electrolyte tolerance
Properties: Wh. to pale yel. waxy solid; bland char. odor; sol. in alcohol; disp. in warm water; misc. with most oil phase ingreds.; m.p. ≈ 47 C; b.p. > 212 F; acid no. 2 max.; iodine no. 15 max.; sapon. no. 20 max.; flash pt. (COC) > 300 F; nonionic
Toxicology: Nontoxic
Environmental: Biodeg.
Precaution: Avoid strong oxidizing agents, alkali, and acids; container may be hazardous when emptied; avoid container damage while handling and storing
Hazardous Decomp. Prods.: CO, CO₂
Storage: Keep containers closed until use; do not store in heat or direct sunlight

Lipoxol® 200 [Sasol Germany
http://www.sasol.com;
http://www.sasololefinssurfactants.com;
Sasol N. Am.
http://www.sasolnorthamerica.com]
Chem. Descrip.: PEG-6
CAS 25322-68-3; EINECS/ELINCS 220-045-1
Uses: Moisture regulator, solubilizer, dispersant, consistency regulator, plasticizer, and lubricant in pharmaceutical preps.: excipients in oral tablets and caplets, solutions and syrups, topical, rectal and vaginal preps., ophthalmic, dental and parenteral systems.
Regulatory: USP, Ph.Eur., German pharmacopoeia compliance
Properties: Colorless cl. liq.; water-sol.; visc. 85-95 mPa•s; solid. pt. -10 to -20 C; acid no. 0.2 max.; pH 4-7 (10% aq.)

Lipoxol® 400 [Sasol Germany

Eigenmann & Veronelli
http://www.eigver.it]
Chem. Descrip.: PEG-8, pharmaceutical quality
CAS 25322-68-3; EINECS/ELINCS 225-856-4
Uses: Moisture regulator, consistency regulator in pharmaceutical creams, lotions, toothpaste; lubricant, plasticizer for pharmaceuticals; excipients in oral tablets and caplets, solutions and syrups, topical, rectal and vaginal preps., ophthalmic, dental and parenteral systems.
Regulatory: USP, Ph. Eur., German pharmacopoeia compliance
Properties: Colorless cl. liq.; water-sol.; visc. 105-140 mPa•s; solid. pt. 4-8 C; acid no. 0.2 max.; pH 4-7 (10% aq.)

Lipoxol® 600 [Sasol Germany
http://www.sasol.com;
http://www.sasololefinssurfactants.com;
Sasol N. Am.
http://www.sasolnorthamerica.com]
Chem. Descrip.: PEG-12
CAS 25322-68-3; EINECS/ELINCS 229-859-1
Trade Name Reference

Lipoxol® 600 MED [Sasol Germany
http://www.sasol.com;
http://www.sasololefinssurfactants.com;
Sasol N. Am.
http://www.sasolnorthamerica.com]
Chem. Descrip.: PEG-12, pharmaceutical quality
CAS 25322-68-3; EINECS/ELINCS 229-859-1
Uses: Moisture regulator, solubilizer, dispersant, consistency regulator, plasticizer, lubricant, emulsion stabilizer, viscosity consistency builder in oral tablets and caplets, solutions and syrups, topical, rectal and vaginal preps., ophthalmic, dental and parenteral
Regulatory: USP/NF, German pharmacopoeia compliance
Properties: Colorless to wh. paste; water-sol.; visc. 15-20 mPa*s (50% aq.); solid. pt. 15-25 C; acid no. 0.2 max.; pH 4-7 (10% aq.)

Lipoxol® 1000 [Sasol Germany
http://www.sasol.com;
http://www.sasololefinssurfactants.com;
Sasol N. Am.
http://www.sasolnorthamerica.com]
Chem. Descrip.: PEG-20
CAS 25322-68-3; EINECS/ELINCS 229-859-1
Uses: Pharmaceutical coating, suppository base
Properties: Solid; solid. pt. 36-40 C

Lipoxol® 1000 MED [Sasol N. Am.
http://www.sasolnorthamerica.com]
Chem. Descrip.: PEG-20
CAS 25322-68-3; EINECS/ELINCS 203-989-9
Uses: Moisture regulator, consistency regulator in pharmaceutical creams, lotions, toothpaste; excipients in oral tablets and caplets, solutions and syrups, topical, rectal and vaginal preps., ophthalmic, dental and parenteral systems.
Regulatory: USP, Ph.Eur., German pharmacopoeia compliance
Properties: Wh. solid; water-sol.; visc. 24-29 mPa*s (50% aq.); solid. pt. 30-40 C; acid no. 0.2 max.; pH 4-7 (10% aq.)

Lipoxol® 1500 MED [Sasol Germany
http://www.sasol.com;
http://www.sasololefinssurfactants.com;
Sasol N. Am.
http://www.sasolnorthamerica.com]
Chem. Descrip.: PEG-32, pharmaceutical quality
CAS 25322-68-3; EINECS/ELINCS 203-989-9
Uses: Solubilizer, dispersing agent, plasticizer, lubricant, emulsion stabilizer, viscosity consistency builder in oral tablets and caplets, solutions and syrups, topical, rectal and vaginal preps., ophthalmic, dental and parenteral
Regulatory: USP/NF, German pharmacopoeia compliance
Properties: Wh. solid; water-sol.; solid. pt. 42-48 C

Lipoxol® 1550 [Sasol Germany
http://www.sasol.com;
http://www.sasololefinssurfactants.com;
Sasol N. Am.
http://www.sasolnorthamerica.com]
Chem. Descrip.: PEG-32
CAS 25322-68-3; EINECS/ELINCS 203-989-9
Uses: Pharmaceutical coating, ointment base, bulking agent
Properties: Flakes; solid. pt. 45-48 C

Lipoxol® 3000 [Sasol Germany
http://www.sasol.com;
http://www.sasololefinssurfactants.com;
Sasol N. Am.
http://www.sasolnorthamerica.com]
Chem. Descrip.: PEG-60
CAS 25322-68-3
Uses: Surfactant for suppository bases; humectant, consistency agent, bulking agent in pharmaceuticals
Properties: Flakes; solid. pt. 50-56 C

Lipoxol® 3350 MED [Sasol N. Am.
http://www.sasolnorthamerica.com]
Chem. Descrip.: PEG-75
CAS 25322-68-3 (generic); EINECS/ELINCS 203-989-9
Uses: Solubilizer, dispersing agent, plasticizer, lubricant, emulsion stabilizer, viscosity consistency builder in oral tablets and caplets, solutions and syrups, topical, rectal and vaginal preps., ophthalmic, dental and parenteral
Regulatory: USP, EP
Properties: Wh. flakes; water-sol.; visc. 83-120 mPa*s (50% aq.); solid. pt. 53-57 C; hyd. no. 30-38
**Lipoxol® 4000** [Sasol Germany

Uses: Moisture regulator, solubilizer, dispersant, consistency regulator, plasticizer, and lubricant in pharmaceutical preps.  
Regulatory: USP, Ph.Eur.  
Properties: Wh. flakes, powd.; water-sol.; visc. 205-350 mPa*s (50% aq.); solid. pt. 55-62 C; acid no. 0.2 max.; pH 4-7 (10% aq.)

**LiquaPar® Oil** [ISP Sutton Labs

http://www.ispunet.com/sutton/sutton.html]

Chem. Descrip.: 40% isopropylparaben, 30% isobutylparaben, 30% n-butylparaben  
Uses: Preservative for topical pharmaceuticals, including creams, ointments, lotions, powders and lip products.  
Features: Broad-spectrum; effective against Gram-positive and Gram-negative bacteria, yeast, and mold even at low concs.  
Regulatory: USA, Japan (1% max. total parabens), and Europe (0.8% max.) approvals  
Properties: Yel. cl. visc. liq.; mild char. odor; sol. in alcohol, propylene glycol; insol. in water; sp.gr. 1.103; visc. 6450 cps; vapor pressure < 10 mm Hg; b.p. 268 C; acid no. 0.5 max.; sapon. no. 292-296; cloud pt. -12 C; flash pt. (PMCC) 118.3 C; ref. index 1.53; pH 5-8; 100% act.

**LiquaPar® PE** [ISP Sutton Labs

http://www.ispunet.com/sutton/sutton.html]

Chem. Descrip.: Phenoxethanol (70%), isopropylparaben, isobutylparaben, butylparaben  
Uses: Preservative for emulsions (oil-in-water and water-in- oil) used in topical formulations.  
Features: Protects oil and water phases of an emulsion system  
Properties: Colorless to pale yel. cl. liq.; sol. < 0.1% in water, 4.0% in glycerin, < 0.3% in dimethicone, < 0.1% in cyclomethicone and min. oil; misc. with PG, 1.3 butylene glycol, isopropyl myristate, octyl palmitate, and sesame oil; sp.gr. 1.08-1.12; 100% act.  
Use Level: 1.0%

**Liquid Absorption Base A** [Croda Inc

http://www.croda.com;  
http://www.crodausa.com]

Chem. Descrip.: Mineral oil, lanolin alcohol
Trade Name Reference

Uses: Surfactant for surgical scrubs; solubilizer for oil-sol. actives in pharmaceuticals; primary oil phase ingred. in o/w emulsions
Features: Mild; can absorb 20 times its wt. of water without separation on inversion
Properties: Cl. yel. liq.; sol. in min. oil, IPA
Use Level: 2-10%

Liquid Absorption Base T [Croda Inc http://www.croda.com; http://www.crodausa.com]
Chem. Descrip.: Mineral oil, lanolin alcohol
Uses: Surfactant; primary oil phase ingred. in o/w emulsions; solubilizer for oil-sol. actives in pharmaceuticals
Features: Synergistic Regulatory: DSL listed
Properties: Cl. odorless liq.; sol. in water; vapor pressure 0.072 mmHg; m.p. -83 F; b.p. 378 F
Toxicology: Mildly irritating to skin; nonmutagenic; TSCA listed
Environmental: EC50 (daphnia magna, 48 h) 34.9 mg/l; LC50 (bluegill, 96 h) NOEL 100 mg/L
NFPA: Health 1, Flammability 1, Reactivity 0

Liquid Germall® Plus [ISP http://www.ispcorp.com]
Chem. Descrip.: Propylene glycol, diazolidinyl urea, iodopropynyl butylcarbamate
CAS 57-55-6; 78491-02-8; 55466-53-6
Uses: Preservative for topical creams, lotions, and medicated shampoos
Features: Synergistic Regulatory: DSL listed
Properties: Cl. odorless liq.; sol. in water; vapor pressure 0.072 mmHg; m.p. -83 F; b.p. 378 F
Toxicology: Mildly irritating to skin; nonmutagenic; TSCA listed

Liquid Medilan™ Ultra [Croda Chem. Europe Ltd http://www.croda.co.uk]
Chem. Descrip.: Lanolin oil
EINECS/ELINCS 274-559-6
Uses: Solvent for actives in pharmaceutical preps.; visc. reducer for petrolatum bases; emollient and emulsifier in pharmaceutical topicals; skin barrier repair agent
Features: Excellent biocompatibility; prolonged hydration benefits; ideal wound healing environment
Regulatory: USP
Properties: Cl. yel. liq.; sol. in min. oil; insol. in water, IPA, propylene glycol; HLB 4.0
Use Level: 2-10%
Toxicology: LD50 (oral, rat) > 20 g/kg; mild skin/eye irritant

Liquid Medilan™ Ultra [Croda Inc http://www.croda.com; http://www.crodausa.com]
Chem. Descrip.: Lanolin oil
EINECS/ELINCS 274-559-6
Uses: Solvent for actives in pharmaceutical preps.; visc. reducer for petrolatum bases; emollient and emulsifier in pharmaceutical topicals; skin barrier repair agent
Features: Excellent biocompatibility; prolonged hydration benefits; ideal wound healing environment
Properties: Cl. liq.; odorless; sol. in min. oil; insol. in water, IPA, propylene glycol
Use Level: 2-10%
Toxicology: LD50 (oral, rat) > 20 g/kg; mild skin/eye irritant

Liquid Medilan™ Ultra [ISP http://www.ispcorp.com]
Chem. Descrip.: Propylene glycol, diazolidinyl urea, iodopropynyl butylcarbamate
CAS 57-55-6; 78491-02-8; 55466-53-6
Uses: Solvent for actives in pharmaceutical preps.; visc. reducer for petrolatum bases; emollient and emulsifier in pharmaceutical topicals; skin barrier repair agent
Features: Excellent biocompatibility; prolonged hydration benefits; ideal wound healing environment
Properties: Cl. yel. liq.; sol. in min. oil; insol. in water, IPA, propylene glycol
Use Level: 2-10%
Toxicology: LD50 (oral, rat) > 20 g/kg; mild skin/eye irritant

Liquid Vitamin D₃ [DSM Nutritional Prods. USA http://www.nutraaccess.com]
Chem. Descrip.: Cholecalciferol with edible corn oil See Corn (Zea mays) oil
CAS 67-97-0; 8001-30-7; EINECS/ELINCS 200-673-2; 232-281-2
Uses: Used in pharmaceuticals, oil dispersions, encapsulated prods.
Regulatory: USP, FCC, Ph. Eur.
Properties: Yel. cl. liq., sl. char. odor, bland fatty taste; misc. with edible oils/fats; sol. in ether, hydrocarbons, chlorinated hydrocarbons; sl. sol. in alcohol; insol. in water, m.w. 384.64; sp.gr. 0.9-0.95; visc. 50-90 cps; 100,000 min. IU vitamin D/g
Toxicology: Vitamin D: potentially toxic esp. for young children; excessive ingestion may cause hypercalcemia, hypercalcuria
Storage: Store @ 70 F; refrigerate if stored for several mos., then hold @ 24 h before opening; close tightly

Lite Natural Wax Jelly [Strahl & Pitsch http://www.strahlpitsch.com]
Chem. Descrip.: Ricinus communis (castor) seed oil, hydrogenated castor oil, beeswax, and Copernicia cerifera (carnauba) wax See Carnauba (Copernica cerifera) wax; Castor (Ricinus communis) oil
CAS 1323-38-2; 8001-78-3; 8006-40-4; 8015-86-9; EINECS/ELINCS 232-293-8; 232-292-2; 232-383-7; 232-399-4
Uses: Base for lip balms
Features: Alternative to petroleum-based petrolatum
Properties: M.p. 135-155 F; cone penetration @ 77 F 170 - 220
Toxicology: TSCA listed
Trade Name Reference

Chem. Descrip.: Aluminum chlorohydrate
CAS 12042-91-0; EINECS/ELINCS 234-933-1
Uses: Antiperspirant active

Chem. Descrip.: Aluminum chlorohydrate
CAS 12042-91-0; EINECS/ELINCS 234-933-1
Uses: Antiperspirant active
Properties: Colorless, cl. liq.; 100%

Chem. Descrip.: Aluminum chlorohydrate
CAS 12042-91-0; EINECS/ELINCS 234-933-1
Uses: Antiperspirant active
Properties: Colorless, cl. liq.; 100%

Locust Bean Gum Speckless Type D-200 [Frutarom http://www.frutarom.com]
Chem. Descrip.: Locust bean gum See Locust bean (Ceratonia siliqua) gum
CAS 9000-40-2; EINECS/ELINCS 232-541-5
Uses: Excipient for pharmaceutical tablets; thickener for toothpaste; thickener, stabilizer for creams and lotions
Properties: Wh. to cream-wh. powd., nearly odorless; 97% through 100 mesh, ≥ 25% through 200 mesh; visc. ≥ 2800 cps (1%); pH 5.0-6.4

Locust Bean Gum Type A-100 [Gumix Int'l.]
Chem. Descrip.: Locust bean gum See Locust bean (Ceratonia siliqua) gum
CAS 9000-40-2; EINECS/ELINCS 232-541-5
Uses: Thickener, visc. modifier, water binder, suspending agent, stabilizer for pharmaceuticals (creams, lotions, toothpaste, tablet excipient)
Properties: Off-wh. to lt. tan powd.; disp. in water; insol. in most org. liqs.

Locust Bean Gum Type A-250 [Gumix Int'l.]
Chem. Descrip.: Locust bean gum See Locust bean (Ceratonia siliqua) gum
CAS 9000-40-2; EINECS/ELINCS 232-541-5
Uses: Thickener, visc. modifier, water-binder, suspending agent, stabilizer for pharmaceuticals (creams, lotions, toothpaste, tablet excipient)
Properties: Off-wh. to lt. tan powd.; disp. in water; insol. in most org. liqs.

Locust Bean Gum Type A-270 [Gumix Int'l.]
Chem. Descrip.: Locust bean gum See Locust bean (Ceratonia siliqua) gum

---

CAS 9000-40-2; EINECS/ELINCS 232-541-5
Uses: Thickener, visc. modifier, water-binder, suspending agent, stabilizer for pharmaceuticals (creams, lotions, toothpaste, tablet excipient)
Properties: Off-wh. to lt. tan powd.; disp. in water; insol. in most org. liqs.

Lonzest® GMS-C [Lonza http://www.lonza.com]
Chem. Descrip.: Glyceryl monostearate, cosmetic grade See Glyceryl stearate
Chem. Analysis: 42-48% alpha monoglycerides, 3% free glycerin
CAS 123-94-4
Uses: Surfactant, emulsifier for pharmaceutical o/w emulsions, OTC cream and lotion, skin and facial treatment products.
Properties: Lt.-tan beads or flakes; oil-sol.; HLB 5; acid no. 6 max.; iodine no. 3 max.; sapon. no. 168-176; nonionic; 2% max. moisture

Loralan-CH [Lanaetex Prods.]
Chem. Descrip.: Cholesterol USP
CAS 57-88-5; EINECS/ELINCS 200-353-2
Uses: Emulsifier, solubilizer for pharmaceuticals

Chem. Descrip.: Polyglycerylmethacrylate and propylene glycol See Glyceryl polymethacrylate
Uses: Lubricant, moisturizer for medical and surgical use, for pre-lubricating catheters, enema tips, thermometers
Features: Autoclavable; nondrying; highest conc. grade
Properties: Clear, colorless visc. gel; water-sol.; sp.gr. 1.3 g/ml; visc. 200,000-400,000 cps; ref. index 1.415-1.435 (20-24 C); pH 5.0-6.0: 0.153-0.216% methyl paraben; 0.042-0.060% propyl paraben
Toxicology: Not considered a carcinogen
Precaution: Incompat. with strong oxidizers, cationics, salts
Hazardous Ingredients: None
Hazardous Decomp. Prods.: CO, CO₂
HMIS: Health 0, Flammability 0, Reactivity 0
Storage: Avoid contact with strong acids, alkalis or oxidizing agents

Lubrajel® DV Free [ISP http://www.ispcorp.com; United-Guardian

---
Trade Name Reference

http://www.u-g.com; S. Black
http://www.sblack.com

Chem. Descrip.: Glycerin and glyceryl acrylate/acrylic acid copolymer
CAS 56-81-5; 9003-01-4
Uses: Lubricant, moisturizer for medical and surgical use, for pre-lubricating catheters, enema tips, thermometers
Features: Autoclavable; nondrying; highest visc. grade

Properties: Clear, colorless visc. gel with characteristic odor; water-sol.; sp.gr. 1.3 g/ml; visc. 900,000-1,200,000 cps; ref. index 1.380-1.400 (20-24 C); pH 5.0-6.0; flash pt. >200 F; 0.091-0.130% methyl paraben; 0.025-0.036% propyl paraben
Toxicology: LD50 (oral, rat) > 5000 mg/kg; noncarcinogenic
Precaution: Avoid extreme temps.; incompat. with strong oxidizers, salts, strong acids or bases

HMIS: Health 0, Flammability 0, Reactivity 0

Chem. Descrip.: Glycerin, glyceryl acrylate/acrylic acid copolymer and propylene glycol
CAS 56-81-5; 9003-01-4; 57-55-6
Uses: Lubricant, moisturizer for medical and surgical use, for pre-lubricating catheters, enema tips, thermometers
Features: Autoclavable; nondrying; general purpose grade
Properties: Clear, colorless visc. gel; water-sol.; sp.gr. 1.3 g/ml; visc. 250,000-350,000 cps; ref. index 1.380-1.400 (20-24 C); pH 5.0-6.0; 0.091-0.130% methyl paraben; 0.025-0.036% propyl paraben
Precaution: Incompat. with strong oxidizers, salts, strong acids or bases

Chem. Descrip.: Polyglycerylmethacrylate, propylene glycol, and PVM/MA copolymer
See Glyceril polymethacrylate
Uses: Lubricant, moisturizer for medical and surgical use, for pre-lubricating catheters, enema tips, thermometers
Features: Liq. form with visc. similar to min. oil

Lubrajel® RC [United-Guardian http://www.u-g.com]

Chem. Descrip.: Water, glycerin, propylene glycol, polyacrylic acid, sodium polyacrylate
Uses: Lubricant for thermometers, enema tips, catheters, esp. urological catheters; lubricant, moisturizer, conditioner for skin care
Features: Sterilizable; may be applied to catheter prior to pkg. and sterilization providing convenient prelubricated device; cost-effective; pH balanced; stable
Regulatory: DOT nonregulated
Properties: Colorless cl. visc. gel; virtually odorless; completely water-sol.; dens. 1.0 g/cm³; visc. 300,000 cps; flash pt. none; pH 5.0-5.5
Toxicology: No known hazards; assumed to be > 5 g/kg orally based on similar prods.
Precaution: Incompat. with strong oxidizers, salts, strong acids or alkali; avoid extreme temps.

Lubrajel® RR [United-Guardian http://www.u-g.com]

Chem. Descrip.: Water, glycerin, propylene glycol, polyacrylic acid, sodium polyacrylate
Uses: Lubricating jelly for medical lubrication of catheters, as a sol. burn ointment on gauze pads (petrolatum replacement), as a soothing dressing
Features: γ radiation-resist.; stable
Regulatory: DOT nonregulated
Properties: Colorless cl. gel; char. odor; completely water-sol.; dens. 1.0 g/cm³; visc. 22,000 cps; flash pt. none; pH 5.2
Toxicology: No known hazards; assumed to be > 5 g/kg orally based on similar prods.
Precaution: Incompat. with strong oxidizers, salts, strong acids or alkali; avoid extreme temps.

Lubrajel® TW [ISP http://www.ispcorp.com;
Trade Name Reference

United-Guardian  [http://www.u-g.com; S. Black http://www.sblack.com]
Chem. Descrip.: Polyglycerylmethacrylate and propylene glycol  See Glyceryl polymethacrylate
Uses: Lubricant, moisturizer for medical and surgical use, for pre-lubricating catheters, enema tips, thermometers
Features: Autoclavable; nondrying
Properties: Colorless, sl. iridescent; water-sol.; sp.gr. 1.3 g/ml; visc. 200,000-275,000 cps; ref. index 1.380-1.400 (20-24 C); pH 5-6; viscid, nonirritating; odorless; very low odor; viscosity 30,000-40,000 cps; ref. sp.gr. 1.3 g/ml; pH 5.0-6.0; 0.122-0.173% methyl paraben; 0.034-0.048% propyl paraben

Chem. Descrip.: Polyglycerylmethacrylate, propylene glycol, and poloxamer 184  See Glyceryl polymethacrylate
Uses: Lubricant, moisturizer for medical and surgical use, for pre-lubricating catheters, enema tips, thermometers
Properties: Colorless, sl. iridescent; water-sol.; visc. 200,000-275,000 cps; pH 5-6; 25-70% conc.

Chem. Descrip.: Glyceryl polymethacrylate, water, cyclomethicone, dimethiconol, PEG-40 sorbitan diisostearate, imidazolidinyl urea, polysorbate 81, PEG-15 cocamine, and laureth-9
Uses: Cosmetic moisturizer for hand lotions, night creams, eye gels, shaving creams, after-sun gels, sunscreens, dandruff treatments, makeup, body moisturizers, and foot creams
Properties: Colorless sl. opalescent visc. gel; very low odor; visc. 30,000-40,000 cps; ref. index 1.4047 (20-25 C); pH 5-6
Toxicology: Nontoxic
Storage: Long shelf life

Lubritab®  [JRS Pharma http://www.jrsworth.com]
Chem. Descrip.: Hydrogenated cottonseed oil, Type 1 NF
CAS 68334-00-9; EINECS/ELINCS 269-804-9
Uses: Lubricant for pharmaceutical tablets, direct compression, controlled release applics.; aux. dry binder when tablets tend to cap or laminate

Features: Low in ash content; pract. no trace of heavy metals; less chemically reactive than other commonly used lubricants
Properties: Spray-dried free-flowing fine powd.; avg. particle size 104 µ; 25% - 200 mesh; dens. (tapped) 0.57 g/ml; m.p. 61-66 C; acid no. 2 max.; sapon. no. 188-198
Use Level: 0.5-2% (tablet lubricant); up to 5% (aux. dry binder in tablets); 20-40% (controlled release)

Lucarotin® 1 CWD [BASF AG http://www.basf.de]
Chem. Descrip.: Beta-carotene  See Carotene
CAS 7235-40-7; EINECS/ELINCS 230-636-6
Uses: Colorant for pharmaceuticals
Properties: Dry powd.

Lucarotin® 1 CWD/K [BASF AG http://www.basf.de]
Chem. Descrip.: Beta-carotene  See Carotene
CAS 7235-40-7; EINECS/ELINCS 230-636-6
Uses: Colorant and dietary supplement for pharmaceuticals
Properties: Red-orange dry powd.; disperses easily in cold water
Storage: 2 yr shelf life when stored in original unopened containers; sensitive light, heat, and moisture

Lucarotin® 10 CWD O [BASF AG http://www.basf.de]
Chem. Descrip.: Beta-carotene in a matrix of modified food starch and glucose syrup; stabilized with dl-alpha-Tocopherol with tricalcium phosphate as a flow aid  See Calcium phosphate tribasic; Carotene; Corn syrup; Food starch, modified; Tocopherol
CAS 7235-40-7; 53124-00-8; 8029-43-4; 1406-18-4; 7758-87-4; EINECS/ELINCS 230-636-6; $; 232-436-4; 215-798-8; 231-840-8
Uses: Dietary supplement for vitamin mixes as a source for Vitamin A
Features: Nonallergenic
Regulatory: Kosher
Properties: Free-flowing br. to red fine powd.; cold-water dispersible; m.w. 536.9; 10% min. act.
Storage: 2 yr shelf life when stored in tightly closed, original containers away from light and moisture @ ≤ 25 C

Lucarotin® 10 CWD S/Y [BASF AG http://www.basf.de]
Chem. Descrip.: Beta-carotene  See Carotene
CAS 7235-40-7; EINECS/ELINCS 230-636-6
Trade Name Reference

**Uses:** Colorant for pharmaceuticals  
**Properties:** Dry powd.

**Lucarotin® 20 CWD/R** [BASF AG  
[http://www.basf.de]]

Chem. Descrip.: Beta-carotene in a matrix of modified food starch and isomalt; stabilized with dl-alpha-Tocopherol, sodium ascorbate with tricalcium phosphate as an anticaking agent. See Calcium phosphate tribasic; Carotene; Food starch, modified; Isomalt; Tocopherol  
CAS: 7235-40-7; 53124-00-8; 64519-82-0; 1406-18-4; 134-03-2; 7758-87-4; EINECS/ELINCS 230-636-6; $; $; 215-798-8; 205-126-1; 231-840-8

**Uses:** Colorant for effervescent tablets and dietary supplements  
**Features:** Nonallergenic  
**Regulatory:** Kosher

**Lucarotin® 30 C** [BASF AG  
[http://www.basf.de]]

Chem. Descrip.: Beta-carotene (30%) in cottonseed oil  
CAS: 7235-40-7; 8001-29-4; EINECS/ELINCS 230-636-6; 232-280-7  
**Uses:** Gelatin capsule ingred.  
**Regulatory:** Kosher

**Properties:** Red oily disp.; odorless; sp. gr. 0.925; visc. 409 mPa*s; f.p. -5°C; flash pt. 143°C  
**Toxicology:** LD50 (oral, rat) > 2000 mg/kg; TSCA listed  
**Precaution:** Wear chemical goggles and gloves avoid heat, light, moisture, and pressure  
**Hazardous Decomp. Prods.:** None  
**Storage:** Store at mod. temp. in tight, light-resistant containers

**Lucarotin® 30 M** [BASF AG  
[http://www.basf.de]]

Chem. Descrip.: Beta-carotene dispersed in corn oil  
CAS: 7235-40-7; 8001-30-7; EINECS/ELINCS 230-636-6; 232-281-2

**Uses:** Emulsifier for topical pharmaceuticals  
**Regulatory:** Kosher

**Properties:** Yel. liq.; sol. in water, alcohol and methanol; sp.gr. 1.1; HLB 16.7; acid no. 2 max.; sapon. no. 40-50; hyd. no. 96-108; nonionic; 100% conc.; 3% max. moisture

**Lumisorb™ PSML-20 K** [Lambent Tech.  
[http://www.lambentcorp.com]]

Chem. Descrip.: Polysorbate 20  
CAS: 9005-64-5  
**Uses:** Emulsifier for topical pharmaceuticals  
**Regulatory:** Kosher

**Properties:** Yel. liq.; sol. in water, alcohol and methanol; sp.gr. 1.1; HLB 16.7; acid no. 2 max.; sapon. no. 40-50; hyd. no. 96-108; nonionic; 100% conc.; 3% max. moisture

**Lumisorb™ PSML-80** [Lambent Tech.  
[http://www.lambentcorp.com]]

Chem. Descrip.: PEG-80 sorbitan laurate

**Uses:** Gelatin capsule ingred.  
**Properties:** Oily disp.

**Ludipress®** [BASF  
[http://www.basf.com]; BASF AG  
[http://www.basf.de]]

Chem. Descrip.: Lactose monohydrate Ph.Eur. (93%), Kollidon® 30 USP (3.5%), Kollidon CL USP (3.5%); See Crospovidone; PVP  
**Uses:** Excipient, carrier, filler, binder, disintegrant for direct compression of pharmaceutical tablets, capsules; filler for hard gelatin capsules  
**Features:** Produces tablets with good hardness, low friability, rapid disintegration; provides fast release of act. ingreds.; exc. flowability  
**Properties:** Wh. free-flowing gran.: 55-75% < 200 μm, 90% min. < 400 μm; odorless; flavorless; bulk dens. 500±50 g/l; tap dens. 600±50 g/l  
**Storage:** Low hygroscopicity; store tightly closed in cool place; protect from light

**Ludipress® LCE** [BASF  
[http://www.basf.com]; BASF AG  
[http://www.basf.de]]

Chem. Descrip.: Lactose monohydrate Ph.Eur. (96.5%), Kollidon 30 (povidone) USP/Ph.Eur. (3.5%); See PVP  
**Uses:** Excipient, carrier, filler, binder for direct compression of chewable tablets and lozenges, effervescent tablets; bulking agent for modified release formulations  
**Features:** Exc. flowability; high crushing str. of tablets  
**Properties:** Wh. free-flowing gran.; 20% max. < 63 μm, 40-65% < 200 μm, 20% max. > 400 μm; odorless; neutral taste; completely sol. in water; bulk dens. 0.56±0.06 g/cm³  
**Storage:** Low hygroscopicity; 24 mos. shelf life when stored @ R.T. in tightly closed containers

**Lumisorb™ PSML-20 K** [Lambent Tech.  
[http://www.lambentcorp.com]]

Chem. Descrip.: Polysorbate 20  
CAS: 9005-64-5  
**Uses:** Emulsifier for topical pharmaceuticals  
**Regulatory:** Kosher

**Properties:** Yel. liq.; sol. in water, alcohol and methanol; sp.gr. 1.1; HLB 16.7; acid no. 2 max.; sapon. no. 40-50; hyd. no. 96-108; nonionic; 100% conc.; 3% max. moisture

**Lumisorb™ PSML-80** [Lambent Tech.  
[http://www.lambentcorp.com]]

Chem. Descrip.: PEG-80 sorbitan laurate
Trade Name Reference

(80%0 in water (28%)

CAS 9005-64-5
Uses: Emulsifier for pharmaceuticals

Properties: Yel. liq.; bland odor; water-sol.; sp.gr. 1.1; b.p. >100 C @ 760mm Hg; HLB 19.4; acid no. 3 max.; sapon. no. 7-15; hyd. no. 25-40; flash pt. >232 C (COC); nonionic; 27-29% moisture

Toxicology: May cause eye irritation; TSCA listed

Precaution: Avoid strong oxidizing agents

Hazardous Decomp. Prods.: CO, CO2 and thick smoke

NFPA: Health 1, Flammability 1, Reactivity 0

Chem. Descrip.: Polysorbate 80 FCC
CAS 9005-65-6
Uses: Solubilizer in vitamin preps.; dispersant for gelatins; syn. flavor adjuvant

Properties: Yel. cl. liq.; bland odor; sol. in water, alcohol, veg. oils, ethyl acetate, methanol, toluene; forms a gel @ 60% in water; insol. in min. oils; sp.gr. 1.07; dens. 9.0 lb/gal; visc. 400 cps; vapor pressure < 1 mm Hg; b.p. > 200 C; HLB 15; acid no. 2.0 max.; sapon. no. 45-55; hyd. no. 65-80; pour pt. -12 C; flash pt. (COC) 278 C; pH 7 (5% aq.); 3% max. moisture

Toxicology: May cause eye irritation; TSCA listed

Precaution: Keep away from oxidizing agents, excessive heat, ignition sources

Hazardous Decomp. Prods.: Combustion produces CO, CO2, thick smoke

NFPA: Health 1, Flammability 1, Reactivity 0

Storage: 1 yr. shelf life when stored in closed, factory-sealed containers at temps. >52 C

Chem. Descrip.: Sorbitan monooleate See Sorbitan olate

CAS 1338-43-8; EINECS/ELINCS 215-665-4
Uses: Surfactant; emulsifier and stabilizer for oil-based creams/lotions and ointments

Features: Lipophilic

Properties: Amber liq.; oil-sol.; sp.gr. 1.0; HLB 4.3; acid no. 7.5; sapon. no. 149-160; hyd. no. 193-209; nonionic; 100% conc.

Toxicology: Inh. of vapors or finely misted materials may cause irritation to mucosa, dizziness, and nausea; irritant to eyes, GI, and skin; TSCA listed

Hazardous Ingredients: Combustion: CO, CO2, thick smoke

NFPA: Health 1, Flammability 1, Reactivity 0

Storage: 1 yr. shelf life when stored in closed, factory sealed containers at temps. >32 C; store and use in well-ventilated area

Chem. Descrip.: Sorbitan oleate

CAS 1338-43-8; EINECS/ELINCS 215-665-4
Uses: Emulsifier, oil additive, corrosion inhibitor for pharmaceuticals

Regulatory: Also avail. kosher

Properties: Amber liq.; oil-sol.; sp.gr. 1.0; HLB 4.3; acid no. 7.5; sapon. no. 149-160; hyd. no. 193-209; nonionic; 100% conc.

Toxicology: May cause eye irritation

Precaution: Avoid strong oxidizing agents

Hazardous Decomp. Prods.: Combustion produces CO, CO2, thick smoke

NFPA: Health 1, Flammability 1, Reactivity 0

Storage: Store in well-ventilated areas @ 50-120 F; keep away from oxidizing agents, excessive heat, ignition sources

Chem. Descrip.: Sorbitan tristearate

CAS 1338-41-6; EINECS/ELINCS 215-664-9
Uses: Emulsifier for pharmaceuticals

Regulatory: FDA 21CFR §172.842, 173.310, 173.340, 175.105, 178.3400, 573.960; also avail. kosher

Properties: Cream flakes; insol. in water; sp.gr. 1.0; b.p. > 200 C (760 mm); HLB 4.7; acid no. 10 max.; sapon. no. 147-157; hyd. no. 235-260; flash pt. (COC) > 175 C; nonionic; 100% conc.

Toxicology: May cause eye irritation

Precaution: Avoid strong oxidizing agents

Hazardous Decomp. Prods.: Combustion produces CO2, CO, thick smoke

Storage: Store in well-ventilated areas @ 50-120 F; keep away from oxidizing agents, excessive heat, ignition sources

Chem. Descrip.: Sorbitan laurate

CAS 1338-41-6; EINECS/ELINCS 215-663-3
Uses: Emulsifier in pharmaceuticals

Properties: Yel. liq.; bland odor; water-disp.; oil-sol.; sp.gr. 1.0; HLB 8.6; acid no. 7 max.; sapon. no. 158-170; hyd. no. 330-358; nonionic; 100% conc.

Toxicology: May cause eye irritation; TSCA listed

Precaution: Keep away from oxidizing agents, excessive heat, ignition sources

Hazardous Decomp. Prods.: CO, CO2 and thick smoke

NFPA: Health 1, Flammability 1, Reactivity 0

Storage: 1 yr. shelf life when stored in closed, factory-sealed containers below 32 C; store and use in well-ventilated area

Chem. Descrip.: Sorbitan stearate

CAS 1338-41-6; EINECS/ELINCS 215-664-9
Uses: Emulsifier for pharmaceuticals

Regulatory: FDA 21CFR §172.842, 173.310, 173.340, 175.105, 178.3400, 573.960; also avail. kosher

Properties: Cream flakes; insol. in water; sp.gr. 1.0; b.p. > 200 C (760 mm); HLB 4.7; acid no. 10 max.; sapon. no. 147-157; hyd. no. 235-260; flash pt. (COC) > 175 C; nonionic; 100% conc.

Toxicology: May cause eye irritation

Precaution: Avoid strong oxidizing agents

Hazardous Decomp. Prods.: Combustion produces CO2, CO, thick smoke

Storage: Store in well-ventilated areas @ 50-120 F; keep away from oxidizing agents, excessive heat, ignition sources

Chem. Descrip.: Sorbitan laurate

CAS 1338-41-6; EINECS/ELINCS 215-663-3
Uses: Emulsifier in pharmaceuticals

Properties: Yel. liq.; bland odor; water-disp.; oil-sol.; sp.gr. 1.0; HLB 8.6; acid no. 7 max.; sapon. no. 158-170; hyd. no. 330-358; nonionic; 100% conc.

Toxicology: May cause eye irritation; TSCA listed

Precaution: Keep away from oxidizing agents, excessive heat, ignition sources

Hazardous Decomp. Prods.: CO, CO2 and thick smoke

NFPA: Health 1, Flammability 1, Reactivity 0

Storage: 1 yr. shelf life when stored in closed, factory sealed containers at temps. >52 C
Trade Name Reference

Chem. Descrip.: PEG-4 laurate
CAS 9004-81-3
Uses: Emulsifier, wetting agent, plasticizer for pharmaceuticals
Properties: Liq.; HLB 10.0; nonionic; 100% conc.

Chem. Descrip.: PEG-8 laurate
CAS 9004-81-3; EINECS/ELINCS 253-458-0
Uses: Emulsifier, wetting agent, plasticizer for pharmaceutical ointments
Properties: Yel. liq.; bland odor; disp. in water @ 5%; sp. gr. 1.01; vapor pressure < 1 mm Hg; b.p. > 200 C; HLB 12.8; acid no. 5 max.; sapon. no. 130-140; pour pt. 18 C; flash pt. (COC) > 175 C; pH 4.5-5.0 (3% aq.); nonionic; 100% conc.

Chem. Descrip.: PEG-8 dilaurate
CAS 9005-08-7
Uses: Emulsifier, wetting agent, plasticizer for pharmaceuticals
Properties: Waxy solid with bland odor; sol. in water @ >90% vol.; sp. gr. 1.02; vapor pressure <1 mm Hg; Sp. gr. 1.02; vapor pressure <1 mm Hg; Sp. gr. 1.02; flash pt. (COC) > 200 C @ 760mm Hg.; flash pt. 175 C (COC); nonionic; 100% conc.

Chem. Descrip.: PEG-20 stearate
CAS 9004-99-3
Uses: Emulsifier, wetting agent, plasticizer for pharmaceuticals
Properties: Paste; HLB 8.2; nonionic; 100% conc.

Chem. Descrip.: Glyceryl laurate SE
CAS 27215-38-9
Uses: Emulsifier, opacifier, stabilizer for drug industry
Properties: Also avail. in tech. grade
Regulatory: Kosher; SARA §311/312/313 nonreportable

**Toxicology:** May cause **eye irritation**; thermal burns possible on skin; if heated, vapors/finely misted material may cause **mucous membrane irritation, dizziness, nausea; TSCA listed**

**Precaution:** Spillages may be slippery; incompat. with strong oxidizing agents; keep away from excessive heat, ignition sources

**Hazardous Decomp. Prods.:** Combustion: CO, CO₂, thick smoke

**NFPA:** Health 1, Flammability 1, Reactivity 0

**Storage:** 1 yr. shelf life when stored in closed, factory-sealed containers below 90 F; store and use in well-ventilated areas; store out of sun

---

**Uses:** Emulsifier for pharmaceuticals
**Regulatory:** Kosher; 21 CFR 178.3400

**Properties:** Tan flakes; insol. in water, veg. and mineral oils; oil-sol.; sp.gr. 1.0; HLB 2.1; acid no. 15 max.; sapon. no. 175-190; hyd. no. 65-80; nonionic; 100% conc.

**Storage:** Store in closed, factory-sealed containers at temps <32 C; when stored for prolonged periods of time should be kept under a nitrogen atmosphere

Chem. Descrip.: PEG-4 laurate
CAS 9004-81-3
Uses: Emulsifier, wetting agent, plasticizer for pharmaceuticals
Properties: Tan flakes; insol. in water, veg. and mineral oils; oil-sol.; sp.gr. 1.0; HLB 2.1; acid no. 15 max.; sapon. no. 175-190; hyd. no. 65-80; nonionic; 100% conc.

Chem. Descrip.: PEG-8 laurate
CAS 9004-81-3; EINECS/ELINCS 253-458-0
Uses: Emulsifier, wetting agent, plasticizer for pharmaceutical ointments
Properties: Yel. liq.; bland odor; sol. in water @ >90% vol.; sp. gr. 1.01; vapor pressure < 1 mm Hg; b.p. > 200 C; HLB 12.8; acid no. 5 max.; sapon. no. 130-140; pour pt. 18 C; flash pt. (COC) > 175 C; pH 4.5-7.0 (3% aq.); nonionic; 100% conc.

**Toxicology:** May cause **eye irritation**; thermal burns possible on skin; if heated, vapors/finely misted material may cause **mucous membrane irritation, dizziness, nausea; TSCA listed**

Chem. Descrip.: Glyceryl laurate SE
CAS 27215-38-9
Uses: Emulsifier, opacifier, stabilizer for drug industry
Regulatory: Kosher
Properties: Cream paste; disp. in water; sp.gr. 0.95; HLB 3.0; pour pt. 23 C; nonionic; 100% conc.

Chem. Descrip.: Glyceryl oleate
CAS 25496-72-4; EINECS/ELINCS 203-827-7
Uses: Emulsifier, opacifier, stabilizer for pharmaceuticals
Regulatory: FDA 21CFR §166, 175.105, 175.320, 177.2800, 181.27; also avail. in kosher grade
Properties: Yel. opaque liq., bland odor; insol. in water; sol. in ethanol, propylene glycol, org. solvs., veg. and min. oils; sp.gr. 0.95; dens. 8.0 lb/gal; visc. 90 cSt (40 C); b.p. > 200 C; HLB 3.4; acid no. 2 max.; iodine no. 96; sapon. no. 160-170; pour pt. 0 C; flash pt. 215 C; nonionic; 100% conc.
Use Level: 0.1-0.5%
Toxicology: May cause eye irritation
Precaution: Avoid strong oxidizing agents
Storage: Store in well-ventilated areas @ 50-120 F; keep away from oxidizing agents, excessive heat, ignition sources

Chem. Descrip.: Glyceryl stearate
CAS 31566-31-1
Uses: Emulsifier, lubricant, solvent, vehicle, stabilizer, opacifier and thickener in topical creams and ointments.
Regulatory: GRAS; FDA 21CFR §166, 175.105, 175.320, 176.210, 181.27, 184.1324, 184.1505, 184.1(b)(1)
Properties: Wh. flakes; bland odor; sol. in fats, oils, waxes; insol. in water; dens. 7.6 lbs/gal; m.p. 51 C; HLB 3.9; acid no. 3 max.; iodine no. 1.0; sapon. no. 165-176; flash pt. (COC) > 175 C; nonionic
Storage: 1 yr. shelf life; store in closed, factory sealed container @ < 90 F

Chem. Descrip.: Glyceryl stearate, PEG-100 stearate
Chem. Analysis: Free glycerin 5%; mono ester content 20%
CAS 31566-31-1; 9004-99-3
Uses: Emollient, thickener, opacifier in topical creams, ointments
Features: Acid-stable
Regulatory: RCRA, CERCLA nonreportable

Properties: Off-wh. flake; Gardner color 3 max.; mild char. odor; sol. in isopropanol; sl. sol. in vegetable, minerals oils; disp. in water; sp.gr. 0.97; vapor pressure < 1 mm Hg; vapor dens. > 1; evaporation rate < 1; m.p. 50-60 C; b.p. > 200 C; acid no. 1 max.; sapon. no. 90-105; flash pt. (COC) > 350 C; pH 6.0-8.5 (1% disp.); HLB 11.2; nonionic
Hazardous Decomp. Prods.: CO, CO₂, thick smoke
NFPA: Health 1, Flammability 1, Reactivity 0
Storage: Store in closed, factory sealed container @ 50-120 F

Chem. Descrip.: PEG-25 castor oil
CAS 61791-12-6
Uses: Emulsifier, pigment dispersant, solubilizer, wetting agent in pharmaceuticals
Features: Resist. to hydrolysis; suitable in acidic and alkaline formulations
Properties: Yel. cl. liq.; sol. > 10% by vol. in water; sp.gr. 1.05; dens. 8.6 lb/gal; vapor pressure < 1 mm Hg; b.p. > 200 C; HLB 13.0; acid no. 2 max.; sapon. no. 75-88; pour pt. 5 C; flash pt. (COC) > 175 C; nonionic; 1% max. moisture
Toxicology: Vapors or finely misted materials may irritate mucous membranes and cause irritation, dizziness, nausea; may cause eye irritation; thermal burns are possible; not likely to cause significant skin irritation on prolonged/repeated contact; TSCA listed
Precaution: Incompat. with strong oxidizing agents; keep away from excessive heat, ignition sources
Hazardous Decomp. Prods.: Combustion: CO, CO₂, thick smoke
NFPA: Health 1, Flammability 1, Reactivity 0
Storage: 1 yr. shelf life when stored in closed original containers below 32 C; store and use in well ventilated areas

Chem. Descrip.: PEG-40 castor oil
CAS 61791-12-6
Uses: Emulsifier, pigment dispersant, solubilizer, wetting agent in pharmaceuticals
Lumulse® PEG 200 [Lambent Tech.  
http://www.lambentcorp.com]
Chem. Descrip.:  PEG-4
CAS 25322-68-3; EINECS/ELINCS 203-989-9
Uses: Humectant in pharmaceutical ointments
Properties: Cl. liq.; water-sol.; m.w. 190-210; sp.gr. 1.12; pH 4.5-7.5 (5%); flash pt. 224 C; pH 4.5-7.5 (5%); nonionic
Storage: Stored in closed, factory-sealed containers @ 50-120 F

Lumulse® PEG 300 [Lambent Tech.  
http://www.lambentcorp.com]
Chem. Descrip.:  PEG-6
CAS 25322-68-3; EINECS/ELINCS 220-045-1
Uses: Humectant in pharmaceutical formulation; plasticizer for spray-on bandages
Regulatory: NF, OSHA nonhazardous; CERCLA nonreportable; SARA §302/311/312/313; RCRA nonreportable
Properties: Cl. liq.; mild odor; sol. in water; m.w. 285-315; sp.gr. 1.13; visc. 5.4-6.4 cSt (210 F); vapor pressure < 1 mm Hg; vapor dens. > 1; b.p. > 200 C; flash pt. > 175 C; pH 4.5-7.5 (5%); evaporation rate < 1; nonionic
Toxicology: May cause eye irritation; TSCA listed

Lumulse® PEG 400 NF [Lambent Tech.  
http://www.lambentcorp.com]
Chem. Descrip.:  PEG-8
CAS 25322-68-3; EINECS/ELINCS 225-856-4
Uses: Humectant, coupling agent for pharmaceutical ointments
Regulatory: NF, FDA 21CFR §175.105, 177.1680, 178.3750, 178.3910, 180.1001(e)
Properties: Cl. liq.; water-sol.; m.w. 380-420; sp.gr. 1.13; visc. 6.8-8.0 cSt (210 F); m.p. 6 C; flash pt. 224 C; pH 4.5-7.5 (5%); nonionic
Storage: 1 year; store in closed container @ < 32 C; for prolonged storage, keep under nitrogen atmosphere

Lumulse® PEG 600 NF [Lambent Tech.  
http://www.lambentcorp.com]
Chem. Descrip.:  PEG-12
CAS 25322-68-3; EINECS/ELINCS 229-859-1
Uses: Humectant in pharmaceutical ointments
Properties: Liq.; water-sol.; m.w. 570-630; visc. 9.9-11.3 cSt (210 F); pH 4.5-7.5 (5%); nonionic

Lumulse® PEG 1000 [Lambent Tech.  
http://www.lambentcorp.com]
Chem. Descrip.:  PEG-20
CAS 25322-68-3; EINECS/ELINCS 203-989-9
Uses: Pharmaceutical formulation
Properties: Wh. waxy solid; water-sol.; m.w. 950-1050; visc. 16-19 cSt (210 F); f.p. 37-40 C; pH 4.5-7.5 (5%); nonionic

Lumulse® PEG 1450 [Lambent Tech.  
http://www.lambentcorp.com]
Chem. Descrip.:  PEG-32
CAS 25322-68-3; EINECS/ELINCS 203-989-9
Uses: Addition polymer in pharmaceutical formulations
Features: Available with "NF" designation
Regulatory: FDA 21CFR §175.105, 177.1680, 178.3750, 178.3910, 180.1001(e); OSHA nonhazardous; CERCLA nonreportable; SARA §302/311/312/313; RCRA nonreportable
Properties: Wh. waxy solid; mild odor; water-sol.; m.w. 1300-1600; sp.gr. 1.1; visc. 25-32 cSt
**Trade Name Reference**

(210 F); vapor pressure < 1; vapor dens. > 1; f.p. 43-46 C; m.p. 44 C; b.p. > 200 C; flash pt. 266 C; pH 4.5-7.5 (5%); evaporation rate < 1

**Toxicology:** May cause **eye irritation**; TSCA listed

**Precaution:** Use safety glasses, PVC coated gloves

**Hazardous Decomp. Prods.:** CO, CO₂, thick smoke

**NFPA:** Health 1, Flammability 1, Reactivity 0

**Storage:** 1 year; store in closed container @ 50-120 F; for prolonged storage, keep under nitrogen atmosphere; keep away from oxidizing agents, excessive heat, ignition sources; keep out of sun

**Chem. Descrip.:** PEG 1450 NF

**CAS** 25322-68-3

**Uses:** Addition polymer in pharmaceutical formulations

**Regulatory:** 21 CFR 175.105, 21 CFR 178.3750, 21 CFR 177.1680 and 21 CFR 180.1001(e)

**Properties:** Wh. solid; sol in water (10%, sl. hazy); m.w. 1305-1595; sp.gr. 1.21; visc. 25-32 cSt (210 F); m.p. 44 C; flash pt. 266 C; pH 4.5-7.5 (5% aq.)

**Storage:** Store in closed container @ 50-120 F; for prolonged storage, keep under nitrogen atmosphere; keep away from oxidizing agents, excessive heat, ignition sources; keep out of sun

**Chem. Descrip.:** PEG 3350 NF

**CAS** 25322-68-3; EINECS/ELINCS 203-989-9

**Uses:** Humectant in pharmaceutical formulation; tablet binder/lubricant

**Regulatory:** NF

**Properties:** Wh. waxy solid; water-sol.; m.w. 3015-3685; visc. 76-110 cSt (210 F); f.p. 53-56 C; pH 4.5-7.5 (5%); nonionic

**Storage:** 1 yr. shelf life when stored in closed, factory-sealed containers below 32 C; store and use in well-ventilated area

**Chem. Descrip.:** PEG-150

**CAS** 25322-68-3; EINECS/ELINCS 203-989-9

**Uses:** Pharmaceuticals

**Regulatory:** OSHA nonhazardous

**Properties:** Wh. waxy flakes; mild odor; sol. in water; avg. m.w. 7000-9000; sp.gr. 1.22; visc. 470-900 cSt @ 99 C; vapor pressure < 1 mm Hg; vapor dens. > 1; m.p. 61 C; b.p. > 200 C; flash pt. 269 C; pH 5% aq. 4.5-7.5; evaporation rate < 1; < 1% volatiles by vol.

**Toxicology:** May cause eye irritation; TSCA listed

**Precaution:** Use safety glasses, PVC coated gloves; incompat. with strong oxidizing agents

**Hazardous Decomp. Prods.:** CO, CO₂, thick smoke

**NFPA:** Health 1, Flammability 1, Reactivity 0

**Storage:** Store @ < 32 C; keep under nitrogen atmosphere for prolonged storage; avoid excessive heat, ignition sources

**Chem. Descrip.:** Triglyceryl monooleate FCC See Polyglyceryl-3 oleate

**CAS** 9007-48-1

**Uses:** Antifoam for vitamin concs.

**Regulatory:** FDA 21CFR §172.854; kosher; SARA §311/312/313 nonreportable

**Properties:** Yel. to amber liq.; bland odor and taste; disp. in water; sol. in veg. oil, min. oil, IPA; sp.gr. 0.98; dens. 8.1 lb/gal; vapor pressure < 1 mm Hg; HL 7.0; acid no. 6 max.; iodine no. 100; sapon. no. 125-150; flash pt. (COC) > 175 C; nonionic; 100% conc.; negligible volatiles

**Toxicology:** May cause eye irritation; not likely to cause significant skin irritation on prolonged/repeated contact, but thermal burns possible; inh. of vapors may irritate mucous membranes and cause dizziness, nausea

**Precaution:** Keep away from oxidizing agents, excessive heat, ignition sources

**Hazardous Decomp. Prods.:** Combustion produces CO, CO₂, thick smoke

**Storage:** 1 yr. shelf life when stored in closed, factory-sealed containers below 32 C; store and use in well-ventilated area

**Lumulse® POE (100) MS** [Lambent Tech. http://www.lambentcorp.com]

**Chem. Descrip.:** PEG-100 stearate See PEG-2 stearate

**Chem. Analysis:** Moisture 1% max.

**CAS** 9004-99-3

**Uses:** Emulsifier in pharmaceutical preps.

**Regulatory:** OSHA nonhazardous

**Properties:** Off-wh. solid; Gardner color 2 max.; bland odor; disp. in water; dens. 8.4 lbs/gal; vapor pressure < 1 mm Hg; vapor dens. >1; evaporation rate <1; m.p. 54-59 C; b.p. > 200
Trade Name Reference

Lumulse® S-2 [Lambent Tech.  
http://www.lambentcorp.com]  
Chem. Descrip.: Steareth-2  
CAS 9005-00-9  
Uses: Surfactant, coupling agent, detergent, dispersant, emulsifier, solubilizer, wetting agent in pharmaceuticals  
Features: Stable in acid and alkali ranges  
Properties: Wh. waxy solid; bland odor; insol. in water; sp.gr. 0.98; dens. 8.1 lb/gal; vapor pressure < 1 mm Hg; b.p. > 200 C; HLB 9.5; acid no. 1 max.; iodine no. 0.5; hyd. no. 155-170; pour pt. 175 C; cloud pt. 55 C (1%); flash pt. (COC) > 175 C; pH 7 (5% in 75% IPA); nonionic; 0.5% moisture  
Toxicology: May cause eye irritation; TSCA listed  
Precaution: Incompat. with strong oxidizers; keep away from excessive heat, ignition sources  
Hazardous Decomp. Prods.: Combustion: CO, CO₂, thick smoke  
NFPA: Health 1, Flammability 1, Reactivity 0  
Storage: 1 yr. shelf life when stored in closed original containers below 32 C; store and use in well-ventilated areas  

Luperox® A98 [Arkema/Organic Peroxides  
http://www.arkema.com]  
Chem. Descrip.: Benzoyl peroxide (98.5%), water and impurities  
CAS 94-36-0; EINECS/ELINCS 202-327-6  
UN 3102  
Uses: Active constituent in anti-acne creams and soaps  
Properties: Fine wh. granular solid; faint to no odor; insol. in water; sp.gr. 36 lbs/ft³; SADT 68 C; 98% act.; 6.5% act. oxygen; 0% volatile  
Toxicology: LD50 (oral, rat) > 950-500 mg/kg); LC50 (inh., rat 4 h) > 22.4 mg/l; causes eye, respiratory tract irritation; may cause allergic skin reaction; TSCA listed  
Environmental: LC50 (guppies, 96 h) 2.0 mg/l; EC50 (daphnia magna, 48 h) 2.9 mg/l, (algae, 72 h) 0.83 mg/l, (activated sludge) 35 mg/  
Precaution: Avoid contact with heat, sparks, ignition sources, contamination, strong acids, strong alkalis, strong oxidizers, amines, promoters, reducing agents  
Hazardous Ingredients: Benzoyl peroxide  
Storage: Store @ < 38 C out of direct sunlight in cool, well-ventilated area away from combustibles, incompat. materials  

LustreClear™ [FMC Biopolymer]
Trade Name Reference

http://www.fmcbiopolymer.com
Chem. Descr.: Microcrystalline cellulose, carrageenan and glycerin See Carrageenan (Chondrus crispus)
CAS 9004-34-6; 9000-07-1; 56-81-5;
EINECS/ELINCS 232-674-9; 232-524-2; 200-289-5
Uses: Clear film coating providing taste masking to tablets and other solid-dosage forms
Features: Easy-to-use, all-in-one coating allows short hydration time prior to coating and fast drying time; coats waxy matrixes or actives; easier to swallow; nonfoaming
Regulatory: USP, EP, JP; E 460(i) (microcrystalline cellulose); E 407 (carrageenan); E 422 (glycerin)
Properties: Wh. to off-wh. free-flowing powd.; sl. odor; partly sol./disp. in water; dens. 0.4-0.5 g/ml (loose), 0.6-0.8 g/ml (tapped); visc. 5000-9000 cps (9% solids); pH 5-8 (4% solids)
Hazardous Decomp. Prods.: SOx
NFPA: Health 0, Flammability 1, Reactivity 0
Lutrol® E 300 [BASF AG http://www.basf.de]
Chem. Descr.: Emulsifier, emollient, lubricant, and solvent for liq. preps.; solvent, solubilizer for act. substances and excipient in pharmaceuticals (liq. and semisolid preps.); carrier for dissolved or suspended drugs in soft gelatin capsules; base for ointments, suppositories; solvent for removal of phenol, cresol, aniline from surf. of skin burnt by any of these toxic compds.
Properties: Colorless liq.; pract. odorless and tasteless; sol. in water, ethanol, acetone, glycols, chloroform; insol. in ether, paraffin, oils, fats; m.w. 285-315; dens. 1.13 g/cm³; visc. 80-105 mPa•s (20 C); hyd. no. 340-394; pH 4.5-7.5 (5% aq.); nonionic; 100% conc.; ≤ 1% water
Storage: 24 mos. shelf life when stored dry in closed containers

Lutrol® E 400 [BASF AG http://www.basf.de]
Chem. Descr.: Nicotinic acid [BASF AG http://www.basf.de]
Chem. Descr.: Nicotinic acid
CAS 59-67-6; EINECS/ELINCS 200-441-0
Uses: Vitamin reinforcement for pharmaceuticals
Lutrol® E 600 [BASF AG http://www.basf.de]
Chem. Descr.: PEG-12
CAS 25322-68-3; EINECS/ELINCS 220-045-1
Uses: Emulsifier, emollient, lubricant, and solvent for liq. preps.; solvent, solubilizer for act. substances and excipient in pharmaceuticals (liq. and semisolid preps.); carrier for dissolved or suspended drugs in soft gelatin capsules; base for ointments, suppositories; solvent for removal of phenol, cresol, aniline from surf. of skin burnt by any of these toxic compds.
Properties: Colorless liq.; pract. odorless and tasteless; sol. in water, ethanol, acetone, glycols, chloroform; insol. in ether, paraffin, oils, fats; m.w. 380-420; dens. 1.13 g/cm³; visc. 105-130 mPa•s (20 C); hyd. no. 264-300; pH 4.5-7.5 (5% aq.); nonionic; 100% conc.
Storage: 24 mos. shelf life when stored dry in closed containers

Lutrol® E 600 [BASF AG http://www.basf.de]
Chem. Descr.: PEG-12
CAS 25322-68-3; EINECS/ELINCS 229-859-1
Uses: Solvent, solubilizer for act. substances and excipient in pharmaceuticals (liq. and semisolid preps.); carrier for dissolved or suspended drugs in soft gelatin capsules; base for ointments, suppositories; solvent for removal of phenol, cresol, aniline from surf. of skin burnt by any of these toxic compds.
Properties: Liq. or paste; sol. in water, ethanol,
Trade Name Reference

acetone, glycols, chloroform; insol. in ether, paraffin, oils, fats; m.w. 570-630; visc. 9.9-11.3 cSt; hyd. no. 178-197; pH 4.5-7.5 (5% aq.)

Storage: 24 mos. shelf life when stored dry in closed containers

Lutrol® E 1500 [BASF AG  http://www.basf.de]
Uses: Solvent, emulsifier, carrier, solubilizer, absorp. enhancer, bioavailability enhancer for drugs that are insol. or sparingly sol. in water, e.g., steroids, fat-sol. vitamins; binder in mfg. of sugar-coated and uncoated tablets; controls release in sustained-release formulations; used with buffers in laxative formulations; antisticking agent, gloss aid for sugar-coated tablets; film-former, plasticizer in tablet coatings; base for ointments and suppositories

Properties: Colorless microbeads; 100% < 1000 µm, 90% < 500 µm; almost odorless and tasteless; sol. in water, ethanol, acetone, glycols, chloroform; insol. in ether, paraffin, oils, fats; m.w. 1350-1650; bulk dens. 0.65 g/cm³; visc. 34-50 mPa•s (20 C, 50% aq.); f.p. 42-48 C; hyd. no. 70-80; pH 4.5-7.5 (5% aq.); nonionic; 100% conc.; ≤ 1% water

Storage: 24 mos. shelf life when stored dry in closed containers

Lutrol® E 3350 [BASF AG  http://www.basf.de]
Uses: Solvent, emulsifier, carrier, solubilizer, absorp. enhancer, bioavailability enhancer for drugs that are insol. or sparingly sol. in water, e.g., steroids, fat-sol. vitamins; binder in mfg. of sugar-coated and uncoated tablets; controls release in sustained-release formulations; used with buffers in laxative formulations; antisticking agent, gloss aid for sugar-coated tablets; film-former, plasticizer in tablet coatings; base for ointments and suppositories

Properties: Colorless microbeads; 99% min. < 710 µm, 85±15% < 250 µm; almost odorless and tasteless; sol. in water, ethanol, acetone, glycols, chloroform; insol. in ether, paraffin, oils, fats; m.w. 3015-3685; bulk dens. 0.60 g/cm³; visc. 83-120 mPa•s (20 C, 50% aq.);

f.p. 53-57 C; hyd. no. 30-38; pH 4.5-7.5 (5% aq.)

Storage: 24 mos. shelf life when stored dry in closed containers

Lutrol® E 4000 [BASF AG  http://www.basf.de]

Storage: 24 mos. shelf life when stored dry in closed containers

Handbook of Pharmaceutical Additives, Third Edition 410
Trade Name Reference

aq.; nonionic; 100% conc.; ≤ 1% water
Storage: 24 mos. shelf life when stored dry in closed containers

Lutrol® F 68 [BASF AG http://www.basf.de]
Chem. Descrip.: Poloxamer 188 DAC, USP/NF
CAS 9003-11-6
Uses: Emulsifier, solubilizer, suspension stabilizer, thickener, gellant in liq. oral, topical, and parenteral pharmaceuticals; coemulsifier in creams, emulsions; tablet lubricant; plasticizer, dispersant, wetting agent, solubilizer, bioavailability enhancer, absorp. enhancer for low-sol. drugs in solid oral dosage forms
Properties: Wh. to sl. ylsh. waxy micropearls; weak odor; readily sol. in ethanol; dissolves readily in water to give opalescent sol'n.; sol. 40% in chloroform, 35% in methylene chloride, 20% in acetonitrile; insol. in diethyl ether, paraffin, fatty oils; m.w. 7680-9510; m.p. 52-57 C; hyd. no. 11-15; pH 6.0-7.5 (2.5% aq.); nonionic; ≤ 1% water
Storage: 2 yrs. shelf life when stored in unopened original containers @ R.T.

Lutrol® F micro 68 [BASF AG http://www.basf.de]
Chem. Descrip.: Poloxamer 407 (contains BHT)
CAS 9003-11-6; 128-37-0
Uses: Lubricant for actives incompatible with Mg-stearate, e.g. ibuprofen; dispersing/wetting agent; polishing agent for film-coated tablets; water-soluble lubricant for effervescent tablets
Regulatory: USP/NF, EP, JPE
Properties: Wh. micr. powd., weak odor; sol. in water, ethanol (95%), and other polar solvents; insol. in ether, paraffin, fatty oils; pH 5.0-7.5 (2.5% aq.); nonionic
Storage: 2 yrs. shelf life when stored in unopened original containers ≤ 30 C

Luviform® FA 119 [BASF AG http://www.basf.de]
Chem. Descrip.: PVM/MA copolymer
CAS 9011-16-9
Uses: Stabilizing and binding agent for toothpastes, denture retaining agents

Luviform® FA 139 [BASF AG http://www.basf.de]
Chem. Descrip.: PVM/MA copolymer (26% in water)
CAS 9011-16-9
Uses: Stabilizing and binding agent for toothpastes, denture retaining agents
Features: Neutralize with alkalis before use
Properties: Ylsh. cl. visc. liq.; sl. char. odor; misc. with water, ethanol; visc. 2500-4000 mPa•s; pH 1-2; 24-28% solids
Storage: 9 mos. shelf life in original unopened containers @ 25 C

Luvitol® EHO [BASF http://www.basf.com; BASF AG http://www.basf.de]
Chem. Descrip.: Cetearyl octanoate
CAS 5996-10-1; EINECS/ELINCS 200-075-1
Uses: Emollient for pharmaceuticals, creams, lotions, ointments
Properties: Liq.; nonionic; 100% conc.

Lycadex® PF [Roquette http://www.roquette.fr]
Chem. Descrip.: D-Glucose monohydrate
CAS 5996-10-1; EINECS/ELINCS 200-075-1

Trade Name Reference

**Lycasin®** [Roquette](http://www.roquette.fr)
Chem. Descr.: Maltitol
CAS 585-88-6; EINECS/ELINCS 209-567-0
Uses: Excipient for medicinal preps.; sucrose replacement in preparations such as pharmaceutical chewing gum, sugarless syrups, suspensions, oral ampoules in particular those for pediatric use
Features: Sugarless; 70-80% sweetening power of sucrose; noncariogenic
Regulatory: USP/NF, EP
Properties: Cl., visc., colorless liq.; sweet taste; miscible in water

**Lycasin® HBC** [Roquette](http://www.roquette.fr)
Chem. Descr.: Maltitol
CAS 585-88-6; EINECS/ELINCS 209-567-0
Uses: Excipient for medicinal preps.; sucrose replacement in preparations such as lozenges
Features: Sugarless; 70-80% sweetening power of sucrose; noncariogenic
Regulatory: USP/NF, EP
Properties: Cl., visc., colorless liq.; sweet taste; miscible in water

**Lycatab® C** [Roquette](http://www.roquette.fr)
Chem. Descr.: Partially pregelatinized maize starch
Uses: Excipient, filler, disintegrant, flow aid for pharmaceutical tablets and capsules, esp. two-piece hard gelatin capsules; binder, disintegrant in direct compression; binder for wet granulation
Features: Low lubricant requirement; ensures rapid disintegration and drug release; high bulk dens. allows homogenous filling of capsules; low friability; compat. with most act. substances; vegetable origin
Regulatory: USP, EP
Properties: Wh. to off-wh. free-flowing powd.; 100 µm mean particle size; odorless; partly sol. in cold water; bulk dens. 0.64 g/cm³; dens. 0.81 g/cm³ (taped); 7% water

**Lycatab® DSH** [Roquette](http://www.roquette.fr)
Chem. Descr.: Maltodextrin
CAS 9050-36-6; EINECS/ELINCS 232-940-4
Uses: Excipient and granulation binder for filling capsules or sachets, and of dense mixtures intended for compression into tablets; diluent for direct compression of smooth tablets
Features: Where high wetting properties are important; does not impede disintegration of the tablets or the dissolution kinetics of the active ingredients
Regulatory: USP/NF, EP
Properties: Wh. odorless powd.; neutral taste; 50 µm particle size 80% min.; completely sol. in cold water
Use Level: Dry incorporation or in a solution into the granulation mixture at levels of 2-10%

**Lycatab® Mineral** [Roquette](http://www.roquette.fr)
Chem. Descr.: Calcium carbonate and GMO-free maize starch
Uses: Filler, binder in direct compression pharmaceuticals; calcium source in neutraceuticals
Features: Pleasant organoleptic properties; fast disintegration, high density
Regulatory: USP/NF. EP
Properties: Wh. crystals with pseudo-cubic shape; 200 µm mean particle size; completely sol. in cold water
Use Level: Dry incorporation or in a solution into the granulation mixture at levels of 2-10%

**Lycatab® PGS** [Roquette](http://www.roquette.fr)
Chem. Descr.: Partially pregelatinized maize starch
Uses: Excipient, filler, disintegrant, flow aid for pharmaceutical tablets and capsules; binder for wet granulation
Features: Low lubricant requirement; ensures rapid disintegration and drug release; high bulk dens. allows homogenous filling of capsules; low friability; compat. with most act. substances; vegetable origin
Regulatory: USP/NF, EP
Properties: Wh. to pale cream pregel powd.; neutral taste; particle size > 80 µm (50% min.), > 315 µm (20% max.); disp. in cold water
Use Level: 5-20% levels into the granulation mixture

**LycoVit® Dispersion 10%** [BASF AG]
Lycoat™ RS 780 [Roquette  
http://www.roquette.fr]
Chem. Descrip.: Modified starch  
Uses: Aq. film coating for pharmaceutical immediate release, solid oral dosage forms  
Features: For lower viscosity formulations; imparts a smooth, glossy surface to tablets; does not affect the disintegration time of the tablets/capsules  
Regulatory: USP, EP monograph in progress, E1440 and 21 CFR compliant

LycoVit® 10% DC [BASF AG  
http://www.basf.de]
Chem. Descrip.: Lycopene in a matrix of modified food starch and gelatin; stabilized with sucrose; stabilized with tocopherol, sodium ascorbate, and ascorbyl palmitate with tricalcium phosphate as a flow aid  
Uses: Dietary supplement for use in multivitamin-mineral, and lycopene tablets, hard capsules and antioxidant formulations  
Features: Highly stable even in the presence of minerals  
Properties: Free-flowing dk. red fine fine powd.; particle size 20 μ, min 90%; water dispersible (35-40 C); m.w. 536.9; 10% min. act.  
Storage: 2 yr shelf-life when stored in tightly closed, original containers away from light and moisture @ 8-15 C; after opening, pad with nitrogen until reuse

Lycobeads® 5% [LycoRed Israel  
http://www.lycored.com]
Chem. Descrip.: Cryst. lycopene dispersed in natural tomato lipid phase  
Chem. Analysis: 8% moisture  
CAS 502-65-8; EINECS/ELINCS 207-949-1  
Uses: Lycopene source for mfg. of tablets and two-piece hard shell capsules; may be used in nutritional and nutraceutical industries  
Regulatory: Approved by USA FDA, European and Israeli Authorities; kosher  
Properties: Dk. red free-flowing beadlets; char. odor; particle size 800 μ; 100% through #20 U.S. Std. Sieve; bulk dens. ≈ 0.6 g/ml; 5% min. lycopene  
Storage: Sl. hygroscopic; store @ 4 C for optimum stability

Lyc-O-Mato® 6% [LycoRed Israel  
http://www.lycored.com]
Chem. Descrip.: Lycopene and other natural tomato phytonutrients extracted from tomatoes  
Chem. Analysis: < 0.5% moisture  
CAS 502-65-8; EINECS/ELINCS 207-949-1  
Uses: Natural tomato oleoresin for use dietary supplements  
Regulatory: USP/NF, GRAS, E 160d, kosher  
Properties: Visc. dark red liq.; characteristic odor; 6% lycopene  
Storage: 2 yr. shelf-life; store in original sealed container at 4 C

Lyc-O-Mato® 7% [LycoRed Israel  
http://www.lycorede.com]
Chem. Descrip.: Lycopene and other natural tomato phytonutrients extracted from tomatoes  
Chem. Analysis: < 0.5% moisture  
CAS 502-65-8; EINECS/ELINCS 207-949-1  
Uses: Natural tomato oleoresin for use dietary supplements  
Regulatory: USP/NF, GRAS, E 160d, kosher  
Properties: Visc. dark red liq.; characteristic odor; 7% lycopene
Trade Name Reference

Storage: 2 yr. shelf-life; store in original sealed container at 4 C

Lyc-O-Mato® 10% [LycoRed Israel http://www.lycored.com]
Chem. Descrip.: Lycopene and other natural tomato phytonutrients extracted from tomatoes
Chem. Analysis: < 0.5% moisture
CAS 502-65-8; EINECS/ELINCS 207-949-1
Uses: Natural tomato oleoresin for use dietary supplements
Regulatory: USP/NF, GRAS, E 160d, kosher
Properties: Visc. dark red liq.; characteristic odor; 10% min. lycopene
Storage: 2 yr. shelf-life; store in original sealed container at 4 C

Lyc-O-Mato® 15% [LycoRed Israel http://www.lycored.com]
Chem. Descrip.: Lycopene and other natural tomato phytonutrients extracted from tomatoes
Chem. Analysis: < 0.5% moisture
CAS 502-65-8; EINECS/ELINCS 207-949-1
Uses: Natural tomato oleoresin for use dietary supplements
Regulatory: USP/NF, GRAS, E 160d, kosher
Properties: Visc. dark red liq.; characteristic odor; 15% lycopene
Storage: 2 yr. shelf-life; store in original sealed container at 4 C

Lysidone® [Solabia http://www.solabia.com]
Chem. Descrip.: Lysine PCA
CAS 30657-38-6; EINECS/ELINCS 250-275-8
Uses: Moisturizer, cellular regenerative agent, antioxidant, free radical scavenger for pharmaceuticals, skin care, sun care, anti-age serums
Features: Stable in aq. and hydroalcoholic phases
Properties: Yel. liq., odorless; sol. in water; pract. insol. in ethanol, ether, chloroform; m.w. 275.3; sp.gr. 1.10-1.14; visc. 16-20 cps; pH 6.5-8.0; 40% aq. sol’n.
Use Level: 1-5%
Toxicology: LD50 (oral, rat) > 2000 mg/kg; nonirritating to skin, very sl. irritating to eyes

Mack™ CSF-CG [McIntyre http://www.mcintyregroup.com]
Chem. Descrip.: Sodium cocoamphopropionate
CAS 68919-41-5; EINECS/ELINCS 298-632-7
Uses: Anti-irritant
Features: Very mild; alcohol-free; salt-free; stable over wide pH range; compat. with most surfactants
Properties: Amber cl. sl. visc. liq.; typ. lt. org. odor; visc. 500 cps; pH 9.0-9.5 (10%); amphoteric; 38-40% solids
Environmental: Biodeg.

Mackamide™ ISA-D [McIntyre http://www.mcintyregroup.com]
Chem. Descrip.: Isostearamide DEA
CAS 26650-05-5; EINECS/ELINCS 247-873-6
Uses: Anti-irritant for w/o emulsions, lotions, shampoos, skin cleansers
Features: Imparts smooth feel; exc. visc. building at very low concs.
Properties: Amber liq.; typ. odor; oil-sol.; water-disp.; 11% max. DEA; 5% max. free fatty acid

Chem. Descrip.: Glycerin propoxylate
Uses: Lubricant for pharmaceuticals
Properties: Nearly colorless somewhat visc. liq.; acid no. 1 max.; hyd. no. 107-113; nonionic; 100% conc.; 0.2% max. water
Toxicology: Low toxicity

Chem. Descrip.: M,p-Cresol propoxylate
CAS 9064-13-5
Uses: Wetting agent, dispersant, defoamer, gellant, solubilizer, lubricant base for medical and pharmaceutical applics.
Regulatory: SARA nonreportable
Properties: Cl. liq., bland odor; sol. in aromatic solvs.; disp. in water; m.w. 4600; sp.gr. 1.00; visc. 100 cps; vapor pressure < 1 mm Hg; b.p. > 300 F; HLB 16.0; acid no. 1 max.; hyd. no. 120-138; pour pt. < 10 C; cloud pt. 85 C (1%)
Chem. Descrip.: Ceteareth-20
CAS 68439-49-6
Uses: Detergent, wetting agent, emulsifier, dispersant, solubilizer, and coupling agent for pharmaceuticals, creams, lotions, ointments
Properties: Wh. waxy solid, polyol odor; sol. @ 5% in water, IPA; insol. min. oil; sp.gr. 0.98 (70 C); vapor pressure < 0.1 mm Hg; m.p. 40 C; b.p. > 300 F; HLB 15.2; acid no. 0.5 max.; iodine no. 0.5; hyd. no. 52; flash pt. (PMCC) > 350 F; nonionic; 100% conc.
Toxicology: Contact with skin or eyes may cause temporary irritation
Precaution: Incompat. with strong oxidizing materials
Hazardous Ingredients: None
NFPA: Health 1, Flammability 1, Reactivity 0
Storage: Store in well-ventilated area below 120 F

Chem. Descrip.: Laureth-23
CAS 9002-92-0
Uses: Emulsifier, wetting agent in pharmaceutical creams, lotions, ointments
Properties: Wh. waxy solid, polyol odor; sol. @ 5% in water; disp. in min. spirits; sp.gr. 0.99; vapor pressure < 0.1 mm Hg; m.p. 40 C; HLB 16.4; acid no. 1 max.; iodine no. 0.1; hyd. no. 47; flash pt. (PMCC) > 350 F; nonionic; 100% conc.
Toxicology: Not expected to cause skin or eye irritation
Precaution: Incompat. with strong oxidizing materials

Hazardous Decomp. Prods.: Thermal decomp. may produce CO
Storage: Store in well-ventilated area below 120 F

Chem. Descrip.: PEG 200 See PEG-4
Uses: Ointment base, suppository base, tablet binder, solubilizer, lubricant, moisturizer for pharmaceuticals
Features: Good affinity to skin; easily washed out with water; not sticky; compat. with and solubilizer for various chem. substances
Regulatory: JP
Properties: Sol. in hard water, aq. salt sol'ns., acids, alkalis (except extremely conc. acids/alkalis); flash pt. 196 C
Toxicology: LD50 (oral, rat) 28 g/kg; low toxicity; low skin irritation
Storage: Hygroscopic

Chem. Descrip.: PEG 400 See PEG-8
Uses: Ointment base, suppository base, tablet binder, solubilizer, lubricant, moisturizer for pharmaceuticals
Features: Good affinity to skin; easily washed out with water; not sticky; compat. with and solubilizer for various chem. substances
Regulatory: JP
Properties: Visc. liq.; sol. in hard water, aq. salt sol'ns., acids, alkalis (except extremely conc. acids/alkalis); flash pt. 230 C
Toxicology: LD50 (oral, rat) 30.2 g/kg; low toxicity; low skin irritation
Storage: Hygroscopic

Chem. Descrip.: PEG 1000 See PEG-20
Uses: Ointment base, suppository base, tablet binder, solubilizer, lubricant, moisturizer for pharmaceuticals
Features: Good affinity to skin; easily washed out with water; not sticky; compat. with and solubilizer for various chem. substances
Regulatory: JP
Properties: Sol. in hard water, aq. salt sol'ns., acids, alkalis (except extremely conc. acids/alkalis); flash pt. 250 C
Toxicology: LD50 (oral, rat) 32 g/kg; low toxicity; low skin irritation
Storage: Hygroscopic
Macrogol 1500 [Sanyo Chem. Ind.  
http://www.sanyo-chemical.co.jp]
Chem. Descrip.: PEG 1500
Uses: Ointment base, suppository base,  
tablet binder, solubilizer, lubricant,  
moisturizer for pharmaceuticals
Features: Good affinity to skin; easily washed  
out with water; not sticky; compat. with and  
solubilizer for various chem. substances
Regulatory: JP
Properties: Powd.; sol. in hard water, aq. salt  
sofns., acids, alkalis (except extremely conc.  
acids/alkalis); flash pt. 256 C
Toxicology: LD50 (oral, rat) 50 g/kg; low  
toxicity; low skin irritation
Storage: Hygroscopic

Macrogol 4000 [Sanyo Chem. Ind.  
http://www.sanyo-chemical.co.jp]
Chem. Descrip.: PEG 4000  See PEG-75
Uses: Ointment base, suppository base,  
tablet binder, solubilizer, lubricant,  
moisturizer for pharmaceuticals
Features: Good affinity to skin; easily washed  
out with water; not sticky; compat. with and  
solubilizer for various chem. substances
Regulatory: JP
Properties: Powd.; sol. in hard water, aq. salt  
sofns., acids, alkalis (except extremely conc.  
acids/alkalis); flash pt. 270 C
Toxicology: LD50 (oral, rat) 50 g/kg; low  
toxicity; low skin irritation

Macrogol 6000 Flake [Sanyo Chem. Ind.  
http://www.sanyo-chemical.co.jp]
Chem. Descrip.: PEG 6000  See PEG-150
Uses: Ointment base, suppository base,  
tablet binder, solubilizer, lubricant,  
moisturizer for pharmaceuticals
Features: Good affinity to skin; easily washed  
out with water; not sticky; compat. with and  
solubilizer for various chem. substances
Regulatory: JP
Properties: Powd.; sol. in hard water, aq. salt  
sofns., acids, alkalis (except extremely conc.  
acids/alkalis); flash pt. 256 C
Toxicology: LD50 (oral, rat) 50 g/kg; low  
toxicity; low skin irritation

Macrogol 6000 Powder [Sanyo Chem. Ind.  
http://www.sanyo-chemical.co.jp]
Chem. Descrip.: PEG 6000  See PEG-150
Uses: Ointment base, suppository base,  
tablet binder, solubilizer, lubricant,  
moisturizer for pharmaceuticals
Features: Good affinity to skin; easily washed  
out with water; not sticky; compat. with and  
solubilizer for various chem. substances
Regulatory: JP
Properties: Powd.; sol. in hard water, aq. salt  
sofns., acids, alkalis (except extremely conc.  
acids/alkalis); flash pt. 256 C
Toxicology: LD50 (oral, rat) 50 g/kg; low  
toxicity; low skin irritation

Macrogol 20000 [Sanyo Chem. Ind.  
http://www.sanyo-chemical.co.jp]
Chem. Descrip.: PEG 20000  See PEG-350
Uses: Ointment base, suppository base,  
tablet binder, solubilizer, lubricant,  
moisturizer for pharmaceuticals
Features: Good affinity to skin; easily washed  
out with water; not sticky; compat. with and  
solubilizer for various chem. substances; very  
low hygroscopicity
Regulatory: JP
Properties: Powd.; sol. in hard water, aq. salt  
sofns., acids, alkalis (except extremely conc.  
acids/alkalis); flash pt. 296 C
Toxicology: Low toxicity; low skin irritation

Macrospherical® 95 [Reheis  
http://www.reheis.com]
Chem. Descrip.: Aluminum chlorohydrate  
CAS 12042-91-0; EINECS/ELINCS 234-933-1
Uses: Antiperspirant active for aerosols with  
controlled particle size
Features: Spray-dried to a relatively thick walled  
 hollow sphere
Properties: Spherical powd., 90% min. > 10 µ  
particle size; 47% Al2O3, 16.3% Cl

Mag-Gran™ DC [Barrington  
http://www.barringtonchem.com]
Chem. Descrip.: Magnesium oxide heavy  
CAS 1309-48-4; EINECS/ELINCS 215-171-9
Uses: Excipient for pharmaceuticals
Features: Directly compressible
Properties: Gran.

Magnabrite® F [Am. Colloid  
http://www.colloid.com]
Chem. Descrip.: Magnesium aluminum silicate  
USP/NF  
CAS 12199-37-0; EINECS/ELINCS 235-374-6
Uses: Disintegrant, binder, stabilizer, and  
suspending agent for pharmaceutical  
tablets, ointments, and pastes
Features: Rec. where dry blending is essential
Properties: Wh. fine powd.; 100% through 325  
mesh; insol. in water or alcohol; surf. area >  
750 m2/g; visc. 150-450 cps (5% solids); pH 9-
Magnabrite® HS [Am. Colloid
http://www.colloid.com]
Chem. Descrip.: Magnesium aluminum silicate
USP/NF
CAS 12199-37-0; EINECS/ELINCS 235-374-6
Uses: Suspending agent, gelant, and binder for pharmaceuticals
Features: Rec. where stability in acidic systems is essential
Properties: Wh. soft flakes, 20-100 mesh particle size; insol. in water and alcohol; surf. area > 750 m²/g; visc. 40-200 cps (5% solids); pH 9.0-10.0 (5% disp.); dry brightness (GE) 70 min.; 8% max. moisture

Magnabrite® HV [Am. Colloid
http://www.colloid.com]
Chem. Descrip.: Magnesium aluminum silicate
USP/NF
CAS 12199-37-0; EINECS/ELINCS 235-374-6
Uses: Emulsifier, thickener, stabilizer, and suspending agent for pharmaceuticals
Features: Rec. for low solids formulations
Properties: Wh. soft flakes, 20-100 mesh particle size; insol. in water and alcohol; surf. area > 750 m²/g; visc. 800-2200 cps (5% solids); pH 9-10 (5% disp.); dry brightness (GE) 83-87; 8% max. moisture

Magnabrite® K [Am. Colloid
http://www.colloid.com]
Chem. Descrip.: Magnesium aluminum silicate
USP/NF
CAS 12199-37-0; EINECS/ELINCS 235-374-6
Uses: Stabilizer and suspending agent for acidic pharmaceuticals; deflocculant
Features: Acid-stable
Properties: Wh. soft flakes.; 20-100 mesh particle size; insol. in water and alcohol; surf. area > 750 m²/g; visc. 100-300 cps (5% solids); pH 9-10 (5% disp.); dry brightness (GE) 83-87; 8% max. moisture

Magnabrite® S [Am. Colloid
http://www.colloid.com]
Chem. Descrip.: Magnesium aluminum silicate
USP/NF
CAS 12199-37-0; EINECS/ELINCS 235-374-6
Uses: Stabilizer and suspending agent for pharmaceuticals
Features: Rec. where good dispersibility, high visc., and wh. color are essential
Properties: Wh. soft flakes; 20-100 mesh particle size; insol. in water and alcohol; surf. area > 750 m²/g; visc. 225-600 cps (5% solids); pH 9-10 (5% disp.); dry brightness (GE) 83-87; 8% max. moisture

Magnasweet® 100 [Mafco Worldwide
http://www.magnasweet.com]
Chem. Descrip.: Monoammonium glycyrrhizinate See Ammonium glycyrrhizinate
CAS 1407-03-0; EINECS/ELINCS 258-887-7
Uses: Sweetener, masking agent for aftertaste, bitterness inhibitor for pharmaceutical preps. such as chewable tablets, cough and cold syrups, drops and lozenges, pediatric liquids, APAP syrups and chewables; in multivitamins, chewable and liq. supplements; local oral anesthetics, mouthwashes and lip balms
Features: Improves flavor delivery; reduces metallic characteristics; minimizes or eliminates bitterness; 50 times sweeter than sucrose
Regulatory: GRAS; Kosher; Parve
Properties: Wh. crystalline powd.

Magnasweet® 110 [Mafco Worldwide
http://www.magnasweet.com]
Chem. Descrip.: Monoammonium glycyrrhizinate See Ammonium glycyrrhizinate
CAS 1407-03-0
Uses: Sweetener, masking agent for aftertaste, bitterness inhibitor for pharmaceutical preps. such as chewable tablets, cough and cold syrups, drops and lozenges, pediatric liquids, APAP syrups and chewables; in multivitamins, chewable and liq. supplements; local oral anesthetics, mouthwashes and lip balms
Features: Improves flavor delivery; reduces metallic characteristics; minimizes or eliminates bitterness; 50 times sweeter than sucrose
Regulatory: GRAS; Kosher; Parve
Properties: Liq.
Magnasweet® 118  [Mafco Worldwide 
http://www.magnasweet.com]
Chem. Descrip.:  Monoammonium 
glycyrrhizinate  See Ammonium 
glycyrrhizinate
CAS 1407-03-0
Uses:  Sweetener, masking agent for 
aftertaste, bitterness inhibitor for 
pharmaceutical preps. such as chewable 
tablets, cough and cold syrups, drops and 
lozenges, pediatric liquids, APAP syrups 
and chewables; in multivitamins, chewable 
and liq. supplements;  local oral anesthetics, 
mouthwashes and lip balms
Features:  Improves flavor delivery; reduces 
metallic characteristics; minimizes or 
eliminates bitterness; 50 times sweeter than 
sucrose
Regulatory:  GRAS; Kosher; Parve
Properties:  Liq.

Magnasweet® 120  [Mafco Worldwide 
http://www.magnasweet.com]
Chem. Descrip.:  Monoammonium 
glycyrrhizinate  See Ammonium 
glycyrrhizinate
CAS 1407-03-0
Uses:  Sweetener, masking agent for 
aftertaste, bitterness inhibitor for 
pharmaceutical preps. such as chewable 
tablets, cough and cold syrups, drops and 
lozenges, pediatric liquids, APAP syrups 
and chewables; in multivitamins, chewable 
and liq. supplements;  local oral anesthetics, 
mouthwashes and lip balms
Features:  Improves flavor delivery; reduces 
metallic characteristics; minimizes or 
eliminates bitterness; 50 times sweeter than 
sucrose
Regulatory:  GRAS; Kosher; Parve
Properties:  Wh. powd.

Magnasweet® 125  [Mafco Worldwide 
http://www.magnasweet.com]
Chem. Descrip.:  Monoammonium 
glycyrrhizinate  See Ammonium 
glycyrrhizinate
CAS 1407-03-0
Uses:  Sweetener, masking agent for 
aftertaste, bitterness inhibitor for 
pharmaceutical preps. such as chewable 
tablets, cough and cold syrups, drops and 
lozenges, pediatric liquids, APAP syrups 
and chewables; in multivitamins, chewable 
and liq. supplements;  local oral anesthetics, 
mouthwashes and lip balms
Features:  Improves flavor delivery; reduces 
metallic characteristics; minimizes or 
eliminates bitterness; 50 times sweeter than 
sucrose
Regulatory:  GRAS; Kosher; Parve
Properties:  Wh. powd.

Magnasweet® 135  [Mafco Worldwide 
http://www.magnasweet.com]
Chem. Descrip.:  Monoammonium 
glycyrrhizinate  See Ammonium 
glycyrrhizinate
CAS 1407-03-0
Uses:  Sweetener, masking agent for 
aftertaste, bitterness inhibitor for 
pharmaceutical preps. such as chewable 
tablets, cough and cold syrups, drops and 
lozenges, pediatric liquids, APAP syrups 
and chewables; in multivitamins, chewable 
and liq. supplements;  local oral anesthetics, 
mouthwashes and lip balms
Features:  Improves flavor delivery; reduces 
metallic characteristics; minimizes or 
eliminates bitterness; 50 times sweeter than 
sucrose
Regulatory:  GRAS; Kosher; Parve
Properties:  Wh. powd.

Magnasweet® 136  [Mafco Worldwide 
http://www.magnasweet.com]
Chem. Descrip.:  Monoammonium 
glycyrrhizinate  See Ammonium 
glycyrrhizinate
CAS 1407-03-0
Uses:  Sweetener, masking agent for 
aftertaste, bitterness inhibitor for 
pharmaceutical preps. such as chewable 
tablets, cough and cold syrups, drops and 
lozenges, pediatric liquids, APAP syrups 
and chewables; in multivitamins, chewable 
and liq. supplements;  local oral anesthetics, 
mouthwashes and lip balms
Features:  Improves flavor delivery; reduces 
metallic characteristics; minimizes or 
eliminates bitterness; 50 times sweeter than 
sucrose
Regulatory:  GRAS; Kosher; Parve
Properties:  Wh. powd.
Trade Name Reference

mouthwashes and lip balms

Features: Improves flavor delivery; reduces metallic characteristics; minimizes or eliminates bitterness; 50 times sweeter than sucrose

Regulatory: GRAS; Kosher; Parve

Properties: Liq.

Magnasweet® 150 [Mafco Worldwide http://www.magnasweet.com]
Chem. Descrip.: Monoammonium glycyrrhizinate See Ammonium glycyrrhizinate
CAS 1407-03-0
Uses: Sweetener, masking agent for aftertaste, bitterness inhibitor for pharmaceutical preps. such as chewable tablets, cough and cold syrups, drops and lozenges, pediatric liquids, APAP syrups and chewables; in multivitamins, chewable and liq. supplements; local oral anesthetics, mouthwashes and lip balms
Features: Improves flavor delivery; reduces metallic characteristics; minimizes or eliminates bitterness; 50 times sweeter than sucrose
Regulatory: GRAS; Kosher; Parve
Properties: Wh. powd.

Magnasweet® 165 [Mafco Worldwide http://www.magnasweet.com]
Chem. Descrip.: Monoammonium glycyrrhizinate See Ammonium glycyrrhizinate
CAS 1407-03-0
Uses: Sweetener, masking agent for aftertaste, bitterness inhibitor for pharmaceutical preps. such as chewable tablets, cough and cold syrups, drops and lozenges, pediatric liquids, APAP syrups and chewables; in multivitamins, chewable and liq. supplements; local oral anesthetics, mouthwashes and lip balms
Features: Improves flavor delivery; reduces metallic characteristics; minimizes or eliminates bitterness; 50 times sweeter than sucrose
Regulatory: GRAS; Kosher; Parve
Properties: Wh. powd.

Magnasweet® 180 [Mafco Worldwide http://www.magnasweet.com]
Chem. Descrip.: Monoammonium glycyrrhizinate See Ammonium glycyrrhizinate
CAS 1407-03-0
Uses: Flavor enhancer, sweetness potentiator for artificial sweetener systems, masking agent for bitter aftertaste for pharmaceuticals, syrups (cough/cold, oral antiseptics, antibiotics), chewables (antacids), lozenges, vitamins, powds.
Features: Synergistic with natural sweeteners
Regulatory: FDA 21CFR §184.1408 GRAS
Properties: Powd. or presolubilized forms (glycerin or propylene glycol solns.), intense lingering sweetness; hygroscopic; sol. in most solvs.
Storage: Exc. long-term shelf stability; avoid

Magnasweet® 185 [Mafco Worldwide http://www.magnasweet.com]
Chem. Descrip.: Monoammonium glycyrrhizinate See Ammonium glycyrrhizinate
CAS 1407-03-0
Uses: Sweetener, masking agent for aftertaste, bitterness inhibitor for pharmaceutical preps. such as chewable tablets, cough and cold syrups, drops and lozenges, pediatric liquids, APAP syrups and chewables; in multivitamins, chewable and liq. supplements; local oral anesthetics, mouthwashes and lip balms
Features: Improves flavor delivery; reduces metallic characteristics; minimizes or eliminates bitterness; 50 times sweeter than sucrose
Regulatory: GRAS; Kosher; Parve
Properties: Wh. powd.
unwanted moisture accumulation

Magnesium Aluminum Silicate BC 100

Chem. Descrip.: Magnesium aluminum silicate NF
Chem. Analysis: SiO₂ (56.30%); Al₂O₃ (10.50%); MgO (9.20%); Fe₂O₃ (1.80%); Na₂O (2.40%); K₂O (1.00%); TiO₂ (0.10%)
CAS 12199-37-0; EINECS/ELINCS 235-374-6
Uses: Rheology control agent, thickener, binder, suspending agent in pharmaceuticals (tablets, acne creams/lotions, analgesic creams, antidiarrheal suspensions), antiperspirants, toothpaste
Properties: Wh. soft flakes; 99.75% through 325 mesh, 100% through 200 mesh; odorless; negligible sol. in water; sp.gr. 2.6; visc. 225-600 cps (5% solids); dry brightness 78; nonflamm.; pH 9-10; 8-9% moisture; 8% max. volatiles
Toxicology: Contains sm. amt. of cryst. silica which may cause delayed respiratory disease if inhaled over prolonged period; excessive inh. of dust may cause shortness of breath, reduced pulmonary function
Precaution: Slippery when wet
Hazardous Ingredients: Cryst. quartz (1-2%); cryst. cristobalite (6-8%)
Hazardous Decomp. Prods.: None
HMIS: Health 0, Flammability 0, Reactivity 0

Magnesium Aluminum Silicate BC 101

Chem. Descrip.: Magnesium aluminum silicate NF
Chem. Analysis: SiO₂ (56.30%); Al₂O₃ (10.50%); MgO (9.20%); Fe₂O₃ (1.80%); Na₂O (2.40%); K₂O (1.00%); TiO₂ (0.10%)
CAS 12199-37-0; EINECS/ELINCS 235-374-6
Uses: Rheology control agent, thickener, binder, suspending agent in pharmaceuticals (tablets, acne creams/lotions, analgesic creams, antidiarrheal suspensions), antiperspirants, toothpaste
Properties: Wh. soft flakes; 99.75% through 325 mesh, 100% through 200 mesh; odorless; negligible sol. in water; sp.gr. 2.6; visc. 150-450 cps (5% solids); dry brightness 78; nonflamm.; pH 9-10; 8% max. moisture
Toxicology: Contains sm. amt. of cryst. silica which may cause delayed respiratory disease if inhaled over prolonged period; excessive inh. of dust may cause shortness of breath, reduced pulmonary function
Precaution: Slippery when wet
Hazardous Ingredients: Cryst. quartz (1-2%); cryst. cristobalite (6-8%)
Hazardous Decomp. Prods.: None
HMIS: Health 0, Flammability 0, Reactivity 0

Magnesium Aluminum Silicate BC 102

Chem. Descrip.: Magnesium aluminum silicate NF
Chem. Analysis: SiO₂ (56.30%); Al₂O₃ (10.50%); MgO (9.20%); Fe₂O₃ (1.80%); Na₂O (2.40%); K₂O (1.00%); TiO₂ (0.10%)
CAS 12199-37-0; EINECS/ELINCS 235-374-6
Uses: Rheology control agent, thickener, binder, suspending agent in pharmaceuticals (tablets, acne creams/lotions, analgesic creams, antidiarrheal suspensions), antiperspirants, toothpaste
Properties: Wh. soft flakes; 99.75% through 325 mesh, 100% through 200 mesh; odorless; negligible sol. in water; sp.gr. 2.6; visc. 800-2200 cps (5% solids); dry brightness 78; nonflamm.; pH 9-10; 8% max. moisture
Toxicology: Contains sm. amt. of cryst. silica which may cause delayed respiratory disease if inhaled over prolonged period; excessive inh. of dust may cause shortness of breath, reduced pulmonary function

Magnesium Carbonate 309-S Light [MPSI http://www.mp-solutionsinc.com]
Chem. Descrip.: Magnesium carbonate USP
Chem. Analysis: MgO (40-43.5%); CaO (0.45%); Fe (0.02%); EINECS/ELINCS 208-915-9
Uses: Antacid, alkaline buffer in pharmaceuticals; ingred. in toothpaste and dentifrices; prep. of magnesium citrate (pharmaceuticals)
Regulatory: USP, kosher, SARA §311/312 acute health hazard, §302/313 nonreportable
Properties: Wh. powd.; 97% through 325 mesh; 99.5% through 200 mesh; odorless; insol. in water; sp.gr. 2.22; dens. 15-22 lb/ft³ (loose); vapor pressure nil; decomp. pt. 250 C; pH sl. alkaline; > 98% NV
Toxicology: ACGIH TLV/TWA 5-10 mg/m³ respirable fraction (total particulate); nuisance dust; dust may cause eye irritation; inh. of dust may cause nose/throat irritation; ing. may cause diarrhea, abdominal pain; TSCA listed
Precaution: Incompat. with acids
Hazardous Ingredients: Magnesium carbonate (100%)
Hazardous Decomp. Prods.: If heated to high temps., may emit metallic oxides, CO, CO₂
Storage: Store in cool, dry, well-ventilated area

Magnesium Carbonate 302-S Heavy [MPSI http://www.mp-solutionsinc.com]
Chem. Descrip.: Magnesium carbonate USP
Chem. Analysis: MgO (40-43.5%); CaO (0.45%); Cl (0.07%); Fe (0.01%); SO₄ (0.30%)
CAS 546-93-0; EINECS/ELINCS 208-915-9
Uses: Antacid, alkaline buffer in pharmaceuticals; ingred. in toothpaste and dentifrices; prep. of magnesium citrate (pharmaceuticals)
Regulatory: USP, kosher, SARA §311/312 acute health hazard, §302/313 nonreportable
Properties: Wh. powd.; 97% through 325 mesh; 99.5% through 200 mesh; odorless; insol. in water; sp.gr. 2.22; dens. 15-22 lb/ft³ (loose); vapor pressure nil; decomp. pt. 250 C; pH sl. alkaline; > 98% NV
Toxicology: ACGIH TLV/TWA 5-10 mg/m³ respirable fraction (total particulate); nuisance dust; dust may cause eye irritation; inh. of dust may cause nose/throat irritation; ing. may cause diarrhea, abdominal pain; TSCA listed
Precaution: Incompat. with acids
Hazardous Ingredients: Magnesium carbonate (100%)
Hazardous Decomp. Prods.: If heated to high temps., may emit metallic oxides, CO, CO₂
Storage: Store in cool, dry, well-ventilated area

Magnesium Hydroxide 370-S7 Light [MPSI http://www.mp-solutionsinc.com]
Chem. Descrip.: Magnesium hydroxide USP
Chem. Analysis: Mg(OH)₂ (95-100.5%); CaO (0.70%); Cl (0.10%); Fe (0.03%); SO₄ (0.50%)
CAS 1309-42-8; EINECS/ELINCS 215-170-3
Uses: Antacid, alkaline buffer in

### Magnesium Hydroxide 370-S9 Medium [MPSI http://www.mp-solutionsinc.com]

**Chem. Descrip.:** Magnesium hydroxide USP  
**Chem. Analysis:** Mg(OH)\(_2\) (95-100.5%); CaO (0.70%); Cl (0.10%); Fe (0.03%); SO\(_4\) (0.50%)  
**CAS 1309-42-8; EINECS/ELINCS 215-170-3**  
**Uses:** Antacid, alkaline buffer in pharmaceuticals; mfg. of magnesium citrate, ‘milk of magnesia,’ and magnesium hydroxide tablets (pharmaceuticals)  
**Regulatory:** USP, kosher, DOT nonregulated; SARA §311/312 acute health hazard, §302/313 nonreportable  
**Properties:** Wh. powd.; odorless; insol. in water; sp.gr. 2.38; dens. 53.0-59.3 lb/ft\(^3\) (loose); vapor pressure none; decomp. pt. 350 C; > 98% NV  
**Toxicology:** ACGIH TLV/TWA 5-10 mg/m\(^3\) resolvable fraction (total particulate); nuisance dust; may cause mech. irritation to eyes; high airborne levels of dust can cause nose/throat irritation; ing. may cause diarrhea, abdominal pain; TSCA listed  
**Precaution:** Incompat. with acids  
**Hazardous Ingredients:** Magnesium hydroxide (100%)  
**Hazardous Decomp. Prods.:** If heated to high temps., may emit metallic oxides  
**Storage:** Store in cool, dry, well-ventilated area

### Magnesium Hydroxide 370-S Xtra Light [MPSI http://www.mp-solutionsinc.com]

**Chem. Descrip.:** Magnesium hydroxide USP  
**Chem. Analysis:** Mg(OH)\(_2\) (95-100.5%); CaO (0.70%); Cl (0.10%); Fe (0.03%); SO\(_4\) (0.50%)  
**CAS 1309-42-8; EINECS/ELINCS 215-170-3**  
**Uses:** Antacid, alkaline buffer in pharmaceuticals; mfg. of magnesium citrate, ‘milk of magnesia,’ and magnesium hydroxide tablets (pharmaceuticals)  
**Regulatory:** USP, kosher, DOT nonregulated; SARA §311/312 acute health hazard, §302/313 nonreportable  
**Properties:** Wh. powd.; odorless; insol. in water; sp.gr. 2.38; dens. 25-38 lb/ft\(^3\) (loose); vapor pressure none; decomp. pt. 350 C; > 98% NV  
**Toxicology:** ACGIH TLV/TWA 5-10 mg/m\(^3\) resolvable fraction (total particulate); nuisance dust; may cause mech. irritation to eyes; high airborne levels of dust can cause nose/throat irritation; ing. may cause diarrhea, abdominal pain; TSCA listed  
**Precaution:** Incompat. with acids  
**Hazardous Ingredients:** Magnesium hydroxide (100%)  
**Hazardous Decomp. Prods.:** If heated to high temps., may emit metallic oxides  
**Storage:** Store in cool, dry, well-ventilated area
Trade Name Reference

Hazardous Decomp. Prods.: If heated to high temps., may emit metallic oxides
Storage: Store in cool, dry, well-ventilated area

Magnesium Oxide 310-FCC Heavy [MPSI http://www.mp-solutionsinc.com]
Chem. Descrip.: Magnesium oxide
Chem. Analysis: MgO (99%); CaO (0.08%); Cl (0.10%); Fe (0.004%)
CAS 1309-48-4; EINECS/ELINCS 215-171-9
Uses: Antacid, alkaline buffer, and laxative in pharmaceuticals; flow aid
Regulatory: USP, DOT nonregulated; SARA §311/312 acute health hazard, §302/313 nonreportable
Properties: Wh. powd.; odorless; insol. in water; sp.gr. 3.46; dens. 25 lb/ft³ (loose); vapor pressure nil; m.p. 5792 F; b.p. 3200 C (1 atm); ≈ 100%
Toxicology: TSCA listed
Precaution: Incomp. with acids; reacts exothermically with water to form insol. magnesium hydroxide
Hazardous Ingredients: Magnesium oxide (100%)
Hazardous Decomp. Prods.: None
Storage: Store in cool, dry, well-ventilated area

Magnesium Oxide 310-SH Heavy [MPSI http://www.mp-solutionsinc.com]
Chem. Descrip.: Magnesium oxide USP
Chem. Analysis: MgO (96.0-100.5%); CaO (1.00%); Cl (0.03%); Fe (0.05%); SO₄ (0.75%)
CAS 1309-48-4; EINECS/ELINCS 215-171-9
Uses: Antacid, alkaline buffer, and laxative in pharmaceuticals; flow aid
Regulatory: DOT nonregulated; SARA §311/312 acute health hazard, §302/313 nonreportable
Properties: Wh. powd.; 99% through 325 mesh; odorless; insol. in water; sp.gr. 3.46; dens. 25-31 lb/ft³ (bulk); vapor pressure nil; m.p. 5166 F; b.p. 3200 C (1 atm); > 96% NV
Toxicology: ACGIH TLV/TWA 10 mg/m³ respirable fraction (total particulate); nuisance dust; ing. may cause nausea, vomiting, GI upset, diarrhea; inh. of dust can cause nasal/respiratory tract irritation; may cause sl. eye irritation, redness, pain; TSCA listed
Precaution: Incomp. with acids; reacts exothermically with water to form insol. magnesium hydroxide
Hazardous Ingredients: Magnesium oxide (100%)
Hazardous Decomp. Prods.: None
Storage: Store in cool, dry, well-ventilated area
Magnesium Oxide 311-S Light [MPSI http://www.mp-solutionsinc.com]
Chem. Descrip.: Magnesium oxide USP
Chem. Analysis: MgO (96.0-100.5%); CaO (1.00%); Cl (0.03%); Fe (0.05%); SO₄ (0.75%)
CAS 1309-48-4; EINECS/ELINCS 215-171-9
Uses: Antacid, alkaline buffer, and laxative in pharmaceuticals; flow aid
Regulatory: DOT nonregulated; SARA §311/312 acute health hazard, §302/313 nonreportable
Properties: Wh. powd.; 99% through 325 mesh; odorless; insol. in water; sp.gr. 3.46; dens. 12-19 lb/ft³ (loose); vapor pressure nil; m.p. 516-66 F; b.p. 3200 C (1 atm); > 96% NV
Toxicology: ACGIH TLV/TWA 10 mg/m³ respirable fraction (total particulate); nuisance dust; ing. may cause nausea, vomiting, GI upset, diarrhea; inh. of dust can cause nasal/respiratory tract irritation; may cause si. eye irritation, redness, pain; TSCA listed
Precaution: Incompat. with acids; reacts exothermically with water to form insol. magnesium hydroxide
Hazardous Ingredients: Magnesium oxide (100%)
Hazardous Decomp. Prods.: None
Storage: Store in cool, dry, well-ventilated area

Glyceryl linoleate
CAS 2277-28-3; EINECS/ELINCS 218-901-4
Uses: Excipient, carrier, vehicle, solubilizer for pharmaceutical hard and soft gelatin capsules and liq. formulations
Regulatory: EP compliance; FDA 21CFR §184.1505 GRAS, FCC, E471, JSFA compliance; DMF no. 5797
Properties: Oily liq.; faint odor; HLB 3

Chem. Descrip.: Maitake mushroom extract from Grifola frondosa with 20% dextrose carrier See Glucose
Uses: Ingre. in health foods and pharmaceuticals, capsules
Properties: Brn. fine powd.; min. 20 mesh or finer; partly sol. in water
Storage: 24 mo shelf life
Trade Name Reference

effervescent.
Features: Sucrose substitute
Regulatory: USP/NF, EP, JECFA
Properties: Powd.; sweet taste; freely sol. in water; visc. 2400 mPa.s

Maltisorb® P 200 [Roquette http://www.roquette.fr]
Chem. Descrip.: Maltitol
CAS 585-88-6; EINECS/ELINCS 209-567-0
Uses: Diluent for pharmaceutical tablets and sachets; excipient for coatings and candying of lozenges; sweetener for pharmaceutical chewing gum
Features: Low hygroscopicity; noncariogenic; 95% sweetening power of sucrose
Regulatory: EP
Properties: Wh. crystalline, odorless powd.; sweet taste; particle size 200 µm; sol. in water (153g / 100ml)

Maltisorb® P 90 [Roquette http://www.roquette.fr]
Chem. Descrip.: Maltitol
CAS 585-88-6; EINECS/ELINCS 209-567-0
Uses: Diluent for pharmaceutical tablets and sachets; excipient for coatings and candying of lozenges; sweetener for pharmaceutical chewing gum
Features: Low hygroscopicity; noncariogenic; 95% sweetening power of sucrose
Regulatory: EP
Properties: Wh. crystalline, odorless powd.; sweet taste; particle size 90 µm; sol. in water (153g / 100ml)

Maltrin® M050 [Grain Processing http://www.grainprocessing.com]
Chem. Descrip.: Maltodextrin
CAS 9050-36-6; EINECS/ELINCS 232-940-4
Uses: Nutritive polymer, film-former, visc. builder, opacifier, mouthfeel enhancer for pharmaceuticals, for wet granulation
Features: Nonsweet
Properties: Wh. powd.; can be dissolved up to 40% in water yielding opaque syrup; bulk dens. 0.56 g/cc (packed); DE 5; pH 4-5

Maltrin® M100 [Grain Processing http://www.grainprocessing.com]
Chem. Descrip.: Maltodextrin
CAS 9050-36-6; EINECS/ELINCS 232-940-4
Uses: Visc. control agent; nutritive polymer, carrier, filler, extender, bulking agent, binder, disintegrant for pharmaceuticals (aq. film coatings, creams/lotions, dry and wet granulation, liq. pharmaceuticals, cleansers, spray drying); mouthfeel enhancer for chewable tablets; sweetness regulator, cryst. growth inhibitor in throat lozenges
Features: Nonsweet
Properties: Wh. powd., bland, low sweetness; disp. readily to produce cl. sol'n. at 30%; bulk dens. 0.56 g/cc (packed); DE 10; pH 4.0-4.7 (20%); 6% max. moisture

Maltrin® M150 [Grain Processing http://www.grainprocessing.com]
Chem. Descrip.: Maltodextrin
CAS 9050-36-6; EINECS/ELINCS 232-940-4
Uses: Nutritive polymer, bulking agent, bodying agent, diluent, binder, disintegrant, filler, film-former, humectant in pharmaceuticals (creams/lotions, dry granulation, liq. preps., medical nutritionals, cleansers, spray drying, direct compr. tableting), sweetness regulator, cryst. growth inhibitor in throat lozenges; visc. control agent
### Trade Name Reference

**Features:** Very slightly sweet; directly compressible  
**Properties:** Wh. powd.; disp. to produce cl. sol'n. at 50%; bulk dens. 0.61 g/cc (packed); DE 15; pH 4.0-4.7 (20%); 6% max. moisture

**Maltrin® M180**  
[Grain Processing](http://www.grainprocessing.com)  
Chem. Descrip.: Maltodextrin  
CAS 9050-36-6; EINECS/ELINCS 232-940-4  
**Uses:** Nutritive polymer, bulking agent, bodying agent, diluent, binder, film-former in pharmaceuticals (aq. film coatings, medical nutritionals); sweetness regulator, cryst. growth inhibitor in throat lozenges  
**Features:** Slightly sweet; directly compressible  
**Properties:** Wh. powd., bland; disp. easily to produce cl. sol'n.s. up to 60%; bulk dens. 0.63 g/cc (packed); DE 18; pH 4.0-4.7; 6% max. moisture

**Maltrin® M200**  
[Grain Processing](http://www.grainprocessing.com)  
Chem. Descrip.: Corn syrup solids  
CAS 68131-37-3  
**Uses:** Coating agent, binder, mouthfeel enhancer in pharmaceuticals (medical nutritionals); visc. control agent in pharmaceutical liqs.; sweetness regulator, cryst. growth inhibitor in throat lozenges  
**Features:** For prods. where clarity, blandness, and rapid dispersibility are important; directly compressible  
**Regulatory:** FDA 21CFR §168.121, 184.1865, GRAS  
**Properties:** Wh. powd.; disp. rapidly in cold or hot water to produce cl. sol'n. at 60%; bulk dens. 0.64 g/cc (packed); DE 20; pH 4.0-4.7 (20%); 6% max. moisture

**Maltrin® M250**  
[Grain Processing](http://www.grainprocessing.com)  
Chem. Descrip.: Corn syrup solids  
CAS 68131-37-3  
**Uses:** Binder, mouthfeel enhancer for pharmaceuticals; spray drying aid  
**Features:** Dried glucose syrup; directly compressible  
**Regulatory:** FDA 21CFR §168.121, 184.1865, GRAS  
**Properties:** Wh. powd., sl. sweet, no undesirable aftertaste; disp. rapidly in hot or cold water to produce cl. sol'n. at 70%; bulk dens. 0.67 g/cc (packed); DE 25; pH 4.5-5.5; 6% max. moisture

**Maltrin® M510**  
[Grain Processing](http://www.grainprocessing.com)  
Chem. Descrip.: Maltodextrin  
CAS 9050-36-6; EINECS/ELINCS 232-940-4  
**Uses:** Nutritive polymer, binder, carrier, diluent, sweetness regulator, cryst. growth inhibitor in throat lozenges  
**Features:** Flowable form of Maltrin M100; exc. dispersibility and dissolution; directly compressible; improves hardness, friability; low hygroscopicity  
**Properties:** Wh. free-flowing fine gran., bland; disp. easily to produce cl. sol'n.s. to 30%; bulk dens. 0.56 g/cc (packed); DE 10; pH 4.0-4.7

**Maltrin® M700**  
[Grain Processing](http://www.grainprocessing.com)  
Chem. Descrip.: Agglomerated maltodextrin  
CAS 9050-36-6; EINECS/ELINCS 232-940-4  
**Uses:** Nutritive polymer, bulking agent, carrier enhancing solubility and emulsification of absorbed components in pharmaceuticals  
**Features:** Agglomerated form of Maltrin M100; exc. dissolution; inert  
**Properties:** Free-flowing gran.; neutral flavor; disp. easily to cl. sol'n. @ 30% solids, opaque sol'n. > 40% solids; bulk dens. 0.13 g/cc (packed); DE 9-12; pH 6.0-7.0 (20%); 6% max. moisture
Maltrin® QD M440 [Grain Processing http://www.grainprocessing.com]  
Chem. Descrip.: Agglomerated maltodextrin  
CAS 9050-36-6; EINECS/ELINCS 232-940-4  
Uses: Nutritive polymer, binder, diluent, flow aid for pharmaceuticals (direct compr. tableting)  
Features: Agglomerated form of Maltrin M040; exc. dispersibility and dissolution  
Properties: Wh. free-flowing gran.; 87% on 200 mesh, 4% on 20 mesh; quickly disp. up to 50% solids; bulk dens. 0.37 g/cc (packed); DE 13-17; pH 4.0-5.1; 6% max. moisture

Chem. Descrip.: Agglomerated maltodextrin  
CAS 9050-36-6; EINECS/ELINCS 232-940-4  
Uses: Nutritive polymer, binder, diluent, flow aid for pharmaceuticals (direct compr. tableting, aq. film coating, medical nutritionals), foods  
Features: Quickly disp. carbohydrate with high rate of sol'n., exc. particulate str.  
Properties: Wh. free-flowing gran., bland; 10% max. on 20 mesh, 85% min. on 20 mesh; quickly disp. in water to 60% conc.; absorbs up to 10-11% moisture remaining free-flowing; bulk dens. 0.40 g/cc (packed); DE 16.5-19.5; pH 4.0-5.1; 6% max. moisture

Maltrin® QD M600 [Grain Processing http://www.grainprocessing.com]  
Chem. Descrip.: Agglomerated corn syrup solids  
CAS 68131-37-3  
Uses: Nutritive polymer, binder, carrier, bulking agent, diluent, flow aid for pharmaceuticals (direct compr. tableting, capsules, medical nutritionals)  
Features: Agglomerated form of Maltrin M200; quick dispersing; directly compressible  
Regulatory: FDA 21CFR §168.121, 184.1865, GRAS  
Properties: Wh. free-flowing gran., bland, sl. sweet; 87% on 200 mesh, 4% on 20 mesh; quickly disp. in water to 60% conc.; bulk dens. 0.40 g/cc (packed); DE 20-23; pH 4.0-5.1 (20%); 6% max. moisture

Mannogem™ [SPI Polyols http://www.spipolyols.com]  
Chem. Descrip.: Maltitol  
Uses: Sweetener for pharmaceutical tablets  
Features: Nonhygroscopic  
Regulatory: USP, FCC, FDA 21 CFR §180.25  
Properties: Wh. crystalline powd. particle size
Mannogem™ EZ [SPI Pharma
http://www.spipharma.com]

See D-Mannitol
CAS 69-65-8; EINECS/ELINCS 200-711-8
Uses: Excipient, disintegrant, sweetener for direct compression of pharmaceutical tablets, esp. chewable tablets and tablets with water-sensitive actives
Features: Rec. for difficult-to-use actives; highly compactable; smooth mouthfeel; cool taste sensation; nonhygroscopic; chemically inert; narrow particle size distribution; nonfriable; rapid disintegration
Regulatory: USP; FCC, Eur. Ph.
Properties: Free-flowing wh. odorless granules or powd.; 60% 75-150 µm particle size; sol. in water; m.w. 182.17; sp. gr. 1.52; 96-100% assay
Toxicology: LD50 (oral, rat) 13.5 g/kg; LD50 (oral, mouse) > 22 g/kg; dust may cause sl. eye irritation; no irritation to skin on short exposure; overexposure to dusts may produce irritation of the respiratory system.; ing. of small amounts not be expected to produce toxicity; ing. of large amounts may produce GI disturbances including a laxative action
Precaution: Avoid accumulation of airborne dusts; may react with oxidizing agents
Hazardous Decomp. Prods.: CO, CO2, and/or low molecular weight hydrocarbons
HMIS: Health 0, Flammability 0, Reactivity 0
Storage: Keep container tightly closed and store at room temperature.

Mannogem™ Getec Mannitol Pyrogen Free [SPI Pharma http://www.spipharma.com]

Chem. Descrip.: Mannitol USP, EP 
See D-Mannitol
CAS 69-65-8; EINECS/ELINCS 200-711-8
Uses: Excipient for injectable pharmaceuticals; excipient, binder, sweetener in wet granulation tableting
Features: Highly compressible; nonhygroscopic; chemically inert; sl. larger crystal morphology; produces softer tablets than Mannogem Powd.; pyrogen-free
Regulatory: Pyrogen-free certified, USP, EP
Properties: 0-150 µ particle size; sweet taste; 96-100% assay

Mannogem™ Mannitol Granular [SPI Pharma
http://www.spipharma.com]

Chem. Descrip.: Mannitol USP, EP 
See D-Mannitol
CAS 69-65-8; EINECS/ELINCS 200-711-8
Uses: Excipient, binder, flow aid for direct compression of pharmaceutical tablets, pharmaceutical sachets
Features: Highly compressible; nonhygroscopic; chemically inert
Regulatory: USP, EP
Properties: Coarse free-flowing powd.; 170-1190 µ particle size; sweet taste; 96-100% assay

Mannogem™ Mannitol Granular 2080 [SPI Pharma http://www.spipharma.com]

Chem. Descrip.: Mannitol USP, EP 
See D-Mannitol
CAS 69-65-8; EINECS/ELINCS 200-711-8
Uses: Excipient, binder, flow aid for wet granulation and direct compression of conventional and chewable pharmaceutical tablets
Features: Highly compressible; nonhygroscopic; chemically inert; tightly controlled particle size distribution
Properties: Free-flowing powd.; 150-590 µ particle size; sweet taste; 96-100% assay

Mannogem™ Mannitol Granular 3215 [SPI Pharma http://www.spipharma.com]

Chem. Descrip.: Mannitol USP, EP 
See D-Mannitol
CAS 69-65-8; EINECS/ELINCS 200-711-8
Uses: Excipient, binder, flow aid for direct compression of pharmaceutical tablets
Features: Highly compressible; nonhygroscopic; chemically inert; contains more fine particles (< 74 µ) than Mannogem™ Mannitol Granular 2080 to help bind extremely fine drug substances
Properties: Free-flowing powd.; 150-590 µ and < 74 µ particle size; sweet taste; 96-100% assay

Mannogem™ Mannitol Powd. [SPI Pharma http://www.spipharma.com]

Chem. Descrip.: Mannitol USP, EP 
See D-Mannitol
CAS 69-65-8; EINECS/ELINCS 200-711-8
Uses: Excipient, binder, flow aid for direct compression of pharmaceutical tablets
Features: Highly compressible; nonhygroscopic; chemically inert
Regulatory: USP, Eur. Ph.; Canada DSL
Trade Name Reference

**MANUCOL® DM** [ISP Alginates
http://www.ispcorp.com]
Chem. Descrip.: Sodium alginate  See Algin
CAS 9005-38-3
Uses: Gellant, suspending agent, thickener, stabilizer, film-former for pharmaceuticals
Features: Hygroscopic
Regulatory: DOT not regulated; FDA 21CFR §184.1724, GRAS; EU E401 compliance; Canada DSL; Japan ENCS; Australia AICS
Properties: Wh. to tan powd., sl. odor; 250 µ particle size; water-sol.; bulk dens. ≈ 50 lb/ft³; visc. 250 cps (1%), 5500 cps (2%); pH 6.0.
Toxicology: LD50 (oral, rat) > 5 g/kg; LC50 (inh., rat, 1 h) > 4.7; dry powd. may cause eye irritation; TSCA listed
Environmental: Biodeg.
Precaution: Wear gloves, safety glasses; slippery when wet; incompat. with strong oxidizers

**MANUCOL® Ester ER/K** [ISP Alginates http://www.ispcorp.com]
Chem. Descrip.: Propylene glycol alginate
CAS 9005-37-2
Uses: Emulsifier, thickener, stabilizer for pharmaceuticals
Features: Hydrates readily in hot or cold water; surf. active
Regulatory: FDA 21CFR §172.858, EU E405 compliance; Canada DSL; Japan ENCS; Australia AICS
Properties: Wh. to tan powd., sl. odor; 355 µ particle size; water-sol.; bulk dens. ≈ 50 lb/ft³; visc. 125 cps (1%), 1120 cps (2%); pH 4.0 (1% sol’n)

**MANUCOL® LB** [ISP Alginates http://www.ispcorp.com]
Chem. Descrip.: Sodium alginate  See Algin
CAS 9005-38-3
Uses: Gellant, suspending agent, thickener, stabilizer, film-former for pharmaceuticals, liq. antacids
Regulatory: FDA 21CFR §184.1724, GRAS; EU E401 compliance
Properties: Wh. to tan powd., sl. odor; 355 µ particle size; 40 mesh; water-sol.; bulk dens. ≈ 50 lb/ft³; visc. 150 cps (1%), 1500 cps (2%); pH 6
Toxicology: LD50 (oral, rat) > 5000 mg/kg; dry powd. may cause eye irritation
Precaution: Incompat. with strong oxidizers

**MANUCOL® LKX** [ISP Alginates http://www.ispcorp.com]
Chem. Descrip.: Sodium alginate  See Algin
CAS 9005-38-3
Uses: Ingred. in denture adhesives
Features: Hygroscopic
Regulatory: USP/NF, Ph. Eur.
Properties: White to yslsh.-brown powd.; 63 µ particle size; 250 mesh; sol. in water; visc. 4 cps (1%), 12 cps (2%)
Toxicology: LD50 (oral, rat) 5000 mg/kg, LC50 (inh., rat, 1 hr) 4.7 mg/l; TSCA listed
Environmental: Biodeg.
Precaution: Minimize dust generation and accumulation; avoid strong oxidizers

**MANUCOL® DMF** [ISP Alginates http://www.ispcorp.com]
Chem. Descrip.: Sodium alginate  See Algin
CAS 9005-38-3
Uses: Gellant, suspending agent, thickener, stabilizer, film-former for pharmaceuticals
Features: Hygroscopic
Regulatory: DOT not regulated; FDA 21CFR §184.1724, GRAS; EU E401 compliance; Canada DSL; Japan ENCS; Australia AICS
Properties: Wh. to tan powd., sl. odor; 105 µ particle size; water-sol.;bulk dens. ≈ 50 lb/ft³; visc. 250 cps (1%), 5500 cps (2%); pH 6.
Toxicology: LD50 (oral, rat) > 5 g/kg; LC50 (inh., rat, 1 h) > 4.7; dry powd. may cause eye irritation; nuisance dust; TSCA listed
Environmental: Biodeg.
Precaution: Wear gloves, safety glasses; slippery when wet; incompat. with strong oxidizers

**MANUCOL® Ester ER/K** [ISP Alginates http://www.ispcorp.com]
Chem. Descrip.: Propylene glycol alginate
CAS 9005-37-2
Uses: Emulsifier, thickener, stabilizer for pharmaceuticals
Features: Hydrates readily in hot or cold water; surf. active
Regulatory: FDA 21CFR §172.858, EU E405 compliance; Canada DSL; Japan ENCS; Australia AICS
Properties: Wh. to tan powd., sl. odor; 355 µ particle size; water-sol.; bulk dens. ≈ 50 lb/ft³; visc. 125 cps (1%), 1120 cps (2%); pH 4.0 (1% sol’n)
MANUGEL® DMB [ISP Alginates
http://www.ispcorp.com]
Chem. Descrip.: Sodium alginate  See Algin
CAS 9005-38-3
Uses: Gellant, suspending agent, thickener,
stabilizer, film-former for pharmaceuticals
Regulatory: FDA 21CFR §184.1724, GRAS; EU
E401 compliance
Properties: Wh. to tan powd., sl. odor; 105 µ
particle size; water-sol.; bulk dens. ≈ 50 lb/ft³;
visc. 300 cps (1%), 3000 cps (2%); pH 6.0

Mapeg® 200 DL [BASF/Perf. Chems.
http://www.basf.com/static/988804217008.html]
Chem. Descrip.: PEG-4 dilaurate
CAS 9005-02-1
Uses: Emulsifier, spreading agent, and
dispersant in pharmaceuticals
Properties: Yel. cl. liq.; sol. in IPA, toluol,
soybean and min. oil, water disp.; sp.gr. 0.95;
m.p. 10 C; HLB 7.6; acid no. 10 max.; sapon.
o. 176-192; flash pt. (PMCC) > 350 F;
nonionic; 100% conc.

Mapeg® 200 DO [BASF/Perf. Chems.
http://www.basf.com/static/988804217008.html]
Chem. Descrip.: PEG-4 dioleate
CAS 9005-07-6
Uses: Emulsifier, emollient, and dispersant in
pharmaceuticals
Properties: Yel. cl. liq.; sol. in IPA, toluol,
soybean and min. oil, water disp.; sp.gr. 0.95;
m.p. < -10 C; HLB 8.8; acid no. 10 max.; sapon.
o. 148-158; flash pt. (PMCC) > 350 F;
nonionic; 100% conc.

Mapeg® 200 MO [BASF/Perf. Chems.
http://www.basf.com/static/988804217008.html]
Chem. Descrip.: PEG-4 oleate
CAS 9004-96-0; EINECS/ELINCS 233-293-0
Uses: Emulsifier, dispersant in
pharmaceuticals
Properties: Yel. cl. liq.; sol. in IPA, toluol,
soybean oil; disp. hot in water; sp.gr. 0.97;
m.p. < -10 C; HLB 8.3; acid no. 5 max.; sapon.
o. 115-125; flash pt. (PMCC) > 350 F;
nonionic; 100% conc.

Handbook of Pharmaceutical Additives, Third Edition 431
Trade Name Reference

**PEG-12 stearate**
Chem. Descrip.: Emulsifier, dispersant in pharmaceuticals
Properties: Wh. solid; sol. in IPA, toluol, soybean oil, water, propylene glycol; disp. hot in min. oil; m.p. 36 C; HLB 13.6; acid no. 5 max.; sapon. no. 62-70; flash pt. (PMCC) > 350 F; nonionic; 100% conc.

**PEG-150 distearate**
Chem. Descrip.: Emulsifier, thickener, dispersant in pharmaceuticals
Properties: Wh. solid or flake; sol. in IPA, toluol, propylene glycol, water; m.p. 55 C; HLB 18.4; acid no. 9 max.; sapon. no. 14-20; flash pt. (PMCC) > 350 F; nonionic; 100% conc.

**PEG-40 stearate**
Chem. Descrip.: Emulsifier, dispersant for pharmaceuticals
Properties: Gardner 2 max. flake; sol. in IPA, toluol, propylene glycol, water; congeal pt. 37-47 C; HLB 17.2; acid no. 1 max.; sapon. no. 25-35; hyd. no. 27-40; flash pt. (PMCC) > 350 F; nonionic; 100% conc.

**Sodium n-lauroyl sarcosinate**
Chem. Descrip.: Detergent, wetting agent, foaming agent for pharmaceuticals
Properties: Liq.; sp.gr. 1.03; flash pt. > 200 F; anionic; 30% act.

**Magnesium oxide heavy**
Chem. Descrip.: Antacid and mild laxative
Properties: Flat platelets; 3 µm avg. particle size; 99.5% min. through 325 mesh; dens., tamped 0.35-0.65 g/ml; 98.4% act.

**Hydrogenated cocoglycerides**
Chem. Descrip.: Suppository bases for pharmaceuticals
Properties: Wh. odorless hard fat; m.p. 33.5-35.5 C; solid. pt. 32-34.5 C; acid no. 0.3 max.; iodine no. 3 max.; sapon. no. 240-255; hyd. no. 2 max.

Chem. Descrip.: Hydrogenated
cocoglycerides  See Hydrogenated coco-
glycerides
Uses: Suppository bases for pharmaceuticals
Regulatory: USP, EP
Properties: Wh. odorless hard fat; m.p. 36-38 C;
solid. pt. 33-35 C; acid no. 0.3 max.; iodine
no. 3 max.; sapon. no. 225-235; hyd. no. 20-30

Massa Estarinum® E  [Sasol Germany
http://www.sasol.com;
http://www.sasololefinssurfactants.com;
Sasol N. Am.
http://www.sasolnorthamerica.com]
Chem. Descrip.: Hydrogenated
cocoglycerides, ceteareth-25, and beeswax
See Hydrogenated coco-glycerides
Uses: Suppository bases for pharmaceuticals
Properties: Wh. odorless hard fat; m.p. 34-36 C;
solid. pt. 29-31 C; acid no. 1 max.; iodine no. 3
max.; sapon. no. 215-230; hyd. no. 45-60

Maxiren®  [DSM Food Spec.
http://www.dsm.com]
Chem. Descrip.: Chymosin  See Rennet
CAS 9001-98-3
Uses: Thickener in pharmaceuticals

Mazawax® 163R Flake  [BASF/Perf. Chems.
http://www.basf.com/static/988804217008.htm]
Chem. Descrip.: Cetearyl alcohol and
polysorbate 60
Uses: Emulsifier, base, emollient, thickener
for pharmaceuticals
Regulatory: CERCLA nonreportable
Properties: Wh. flake; bland odor; disp. in water;
vapor dens. > 1; vapor pressure < 1 mm Hg;
m.p. 51 C; b.p. > 300 F; acid no. 1; iodine no.
0.5; sapon. no. 12; flash pt. (PMCC) > 350 F;
volatile < 1%; nonionic; 100% conc.
Toxicology: TSCA listed
Environmental: Do no discharge into
waterways, sewers
Precaution: Wear safety glasses or goggles;
wear gloves, coveralls, apron, boots as
necessary to minimize contact
NFPA: Health 1, Flammability 1, Reactivity 0

Mazol® 159  [BASF/Perf. Chems.
http://www.basf.com/static/988804217008.htm]
Chem. Descrip.: PEG-7 glyceryl cocoate
CAS 68201-46-7
Uses: Emollient, solubilizer for
pharmaceuticals
Properties: Amber liq.; sol. in water, min. oil;
disp. in min. spirits, toluene, IPA; HLB 13.0;
acid no. 5 max.; sapon. no. 82-98; flash pt.
(PMCC) > 350 F; nonionic

Mazol® 165C  [BASF/Perf. Chems.
http://www.basf.com/static/988804217008.htm]
Chem. Descrip.: Glycerol stearate and PEG-
100 stearate
Uses: Emulsifier blend, thickener, and
opacifier for pharmaceutical o/w emulsions;
acid-stable
Properties: Tan flake; sol. in IPA; disp. in water;
sol. hot in min. oil, toluene; HLB 11.2; acid no.
2 max.; sapon. no. 90-100; flash pt. (PMCC) >
350 F; nonionic; 100% conc.

Mazol® GMO  [BASF/Perf. Chems.
http://www.basf.com/static/988804217008.htm]
Chem. Descrip.: Glycerol oleate
Trade Name Reference

CAS 111-03-5; EINECS/ELINCS 203-827-7
Uses: Base for ointments
Regulatory: GRAS
Properties: Yel. liq.; sol. in soybean oil, min. oil, toluene, IPA; disp. in ethanol, propylene glycol; HLB 3.8; acid no. 2 max.; sapon. no. 150-170; flash pt. (PMCC) > 350 F; nonionic; 100% conc.

Chem. Descrip.: Glycerol stearate SE
CAS 11099-07-3
Uses: Emulsifier, emollient for pharmaceuticals
Properties: Tan flake; sol. in IPA; sol. hot in min. oil, toluene; disp. in water; HLB 6.0; acid no. 3.5 max.; sapon. no. 145-160; flash pt. (PMCC) > 350 F

Chem. Descrip.: Decaglycerol tetraoleate See Polyglyceryl-10 tetraoleate
CAS 34424-98-1; EINECS/ELINCS 252-011-7
Uses: Emulsifier for pharmaceuticals; solubilizer and carrier for essential oils and flavors
Regulatory: FDA 21CFR §172.854; kosher
Properties: Dk. liq.; sol. in IPA, min. oil, veg. oil, toluene; disp. in ethanol, propylene glycol, min. spirits; insol. in water; HLB 6.2; acid no. 8 max.; iodine no. 61; sapon. no. 125-145; flash pt. (PMCC) > 350 F

Mazu® DF 204 [Noveon http://www.carbopol.com; http://www.noveoncoatings.com]
Uses: Defoamer for pharmaceuticals; enzyme, amino acid, and citric acid defoamer for fermentation apps.
Features: Modest wetting chars.
Properties: Cl. liq.; water-disp.; sp.gr. 1.010; visc. 400 cps; flash pt. (PMCC) > 350 F

Uses: O/w emulsifier, thickener, antifoam, dispersant, base for pharmaceuticals
Properties: Yel. liq.; typical odor; disp. in water; sol. in fat; dens. 0.98; f.p. 4 C max.; flash pt. > 200 C; nonionic
Environmental: Biodeg.; keep out of sewers, drains, surface and underground water; considered to be of low toxicity for aquatic life
Precaution: Wear glove, goggles, overalls; avoid contact with flames
Hazardous Decomp. Prods.: Can generate adductors of ethylene oxide
Storage: Store in original, closed container @ R.T.; protect from dampness, heat sources

MEA Commercial Grade [Dow http://www.dow.com]
Chem. Descrip.: Monoethanolamine See Ethanolamine
CAS 141-43-5; EINECS/ELINCS 205-483-3
Uses: Emulsifier in pharmaceuticals
Properties: Sp.gr. 1.0113 (25/4 C); dens. 8.45
Trade Name Reference

lb/gal; visc. 18.9 cps; f.p. 10 C; b.p. 171 C (760 mm Hg); flash pt. (Seta CC) 201 F; fire pt. 200 F; ref. index 1.4525

MEA Low Freeze Grade [Dow http://www.dow.com]
Chem. Descrip.: Monoethanolamine See Ethanolamine
CAS 141-43-5; EINECS/ELINCS 205-483-3
Uses: Emulsifier in pharmaceuticals
Properties: Sp.gr. 1.0113 (25/4 C); dens. 8.45 lb/gal; visc. 18.9 cps; f.p. 10 C; b.p. 171 C (760 mm Hg); flash pt. (Seta CC) 201 F; fire pt. 200 F; ref. index 1.4525

MEA Low Iron Grade [Dow http://www.dow.com]
Chem. Descrip.: Monoethanolamine See Ethanolamine
CAS 141-43-5; EINECS/ELINCS 205-483-3
Uses: Emulsifier in pharmaceuticals
Properties: Sp.gr. 1.0113 (25/4 C); dens. 8.45 lb/gal; visc. 18.9 cps; f.p. 10 C; b.p. 171 C (760 mm Hg); flash pt. (Seta CC) 201 F; fire pt. 200 F; ref. index 1.4525

MEA Low Iron-Low Freeze Grade [Dow http://www.dow.com]
Chem. Descrip.: Monoethanolamine See Ethanolamine
CAS 141-43-5; EINECS/ELINCS 205-483-3
Uses: Emulsifier in pharmaceuticals
Properties: Sp.gr. 1.0113 (25/4 C); dens. 8.45 lb/gal; visc. 18.9 cps; f.p. 10 C; b.p. 171 C (760 mm Hg); flash pt. (Seta CC) 201 F; fire pt. 200 F; ref. index 1.4525

MEA NF Grade [Dow http://www.dow.com]
Chem. Descrip.: Monoethanolamine NF See Ethanolamine
CAS 141-43-5; EINECS/ELINCS 205-483-3
Uses: Emulsifier in pharmaceuticals
Properties: Sp.gr. 1.0113 (25/4 C); dens. 8.45 lb/gal; visc. 18.9 cps; f.p. 10 C; b.p. 171 C (760 mm Hg); flash pt. (Seta CC) 201 F; fire pt. 200 F; ref. index 1.4525

Mearlmaid® AA [Engelhard]
Chem. Descrip.: Water, guanine, isopropyl alcohol, methylcellulose
Uses: Pearl colorant for analgesic body lotions, sunscreens
Properties: Paste

Medilan™ [Croda Chem. Europe Ltd http://www.croda.co.uk]
Chem. Descrip.: Anhydrous lanolin USP/BP/Ph.Eur. with 150 ppm BHT (as stabilizer)
CAS 8006-54-0; EINECS/ELINCS 232-348-6
Uses: Emollient, moisturizer, emulsifier for pharmaceuticals, skin and wound care prods., esp. for use on compromised skin
Features: Medical grade; hypoallergenic; low pesticides; low free alcohols; highly compatible with human skin; holds 200% of its own weight of water
Regulatory: FDA 21CFR §172.615
Properties: Lovibond 8-14Y/0.8-20.0R color; yel. soft grease, faint char. odor; sol. in min. oil; partly sol. in ethanol, min. oil, IPA, IPM; insol. in water; m.p. 38-44 C; HLB 9.49; acid no. 1 max.; sapon. no. 90-105; flash pt. > 100 C; nonionic; 100% conc.
Use Level: 1-100%
Toxicology: Extremely low toxicity; LD50 (oral, rat) > 20 g/kg; nonirritating to skin and eyes
Environmental: Substantially biodeg.
Precaution: Nonflamm., but will burn if strongly heated
Storage: Store in well-closed containers in cool place away from direct sunlight; avoid storage over 80 C, esp. for prolonged periods; 2 yrs. storage life

Medilan™ Ultra [Croda Chem. Europe Ltd http://www.croda.co.uk]
Chem. Descrip.: Modified lanolin USP
CAS 8006-54-0; EINECS/ELINCS 232-348-6
Uses: Moisturizer, emollient, active ingredient, and excipient in pharmaceutical ointments, creams such as eczema, psoriasis and open wounds, ophthalmics, infant products and skin care formulations for nursing mothers; also used in transdermals, drug delivery systems, and protective lip balms
Features: Ultra pure grade of medical lanolin; hypoallergenic; highly compatible with human skin; holds 200% of its own weight of water
Regulatory: USP
Properties: Wh. soft solid; odorless
Toxicology: Nonirritant

Melarrest™ L [Engelhard]
Chem. Descrip.: Decamethyl cyclopentasiloxane, dodecamethyl cyclohexasiloxane, water, licorice (Glycyrrhiza glabra) extract, butylene glycol, lecithin, hydrogenated lecithin See Decamethylcyclopentasiloxane; Dodecamethylcyclohexasiloxane
Uses: Anti-inflammatory, skin lightener, vehicle...
Trade Name Reference

for skin care
Features: Complete, multi-fraction extract of Licorice Root; easy-to-use, water-dispersible vehicle
Properties: Pale straw opaque liq.; char. odor; sol. in water, oils; disp. in water; sp.gr. 0.978-1.02; pH 4-5
Toxicology: Ocular irritation assay: produced minimal irritation at use levels up to 20%.
Storage: Keep sealed at room temperature in a dry place; protect from light; store at 20-25 C; do not freeze; 12 mos. shelf life

Merezan® 8 [Frutarom http://www.frutarom.com]
Chem. Descrip.: Xanthan gum FCC from Xanthomonas campestris
CAS 11138-66-2; EINECS/ELINCS 234-394-2
Uses: High m.w. polysaccharide for the pharmaceutical industry
Properties: Cream-colored powd., ≥ 97% through 80 mesh; readily sol. in hot and cold water; visc. ≥ 1200 cps (1%); pH 6.1-8.1 (1%)
Storage: Store in clean, cool, dry area; 1 yr. min. shelf life

Merezan® 20 [Frutarom http://www.frutarom.com]
Chem. Descrip.: Xanthan gum FCC from Xanthomonas campestris
CAS 11138-66-2; EINECS/ELINCS 234-394-2
Uses: High m.w. polysaccharide for the pharmaceutical industry
Properties: Cream-colored powd., ≥ 97% through 200 mesh; readily sol. in hot and cold water; visc. ≥ 1200 cps (1%); pH 6.1-8.1 (1%)
Storage: Store in clean, cool, dry area; 1 yr. min. shelf life

Merigel 100 [Tate & Lyle UK http://www.tateandlyle.com]
Chem. Descrip.: Pregelatinized corn starch See Corn starch, pregelatinized
Uses: Carrier, excipient in solid pharmaceutical prods.

Meriten 100 [Tate & Lyle UK http://www.tateandlyle.com]
Chem. Descrip.: Corn (Zea mays) starch CAS 9005-25-8; EINECS/ELINCS 232-679-6
Uses: Carrier, excipient in solid pharmaceutical prods.; diluent and moisture absorbent in talcum powders and other pharmaceutical powders

Meriten 141 [Tate & Lyle UK http://www.tateandlyle.com]
Chem. Descrip.: Corn (Zea mays) starch CAS 9005-25-8; EINECS/ELINCS 232-679-6
Uses: Carrier, excipient in pharmaceutical prods.; diluent and moisture absorbent in talcum powders and other pharmaceutical powders
Features: Low microbial count

Meritol 121 [Tate & Lyle UK http://www.tateandlyle.com]
Chem. Descrip.: Sorbitol CAS 50-70-4; EINECS/ELINCS 200-061-5
Uses: Sugar-free pharmaceutical syrups and suspensions; substrate for vitamin C mfg.; excipient, carrier, osmolality control agent, sweetener, polarity control agent, solvent, viscosity control agent in pharmaceutical preps.
Features: High purity
Regulatory: EP, USP, FCC, E420

Meritol 130 [Tate & Lyle UK http://www.tateandlyle.com]
Chem. Descrip.: Sorbitol CAS 50-70-4; EINECS/ELINCS 200-061-5
Uses: Sugar-free pharmaceutical syrups and suspensions; substrate for vitamin C mfg.; excipient, carrier, osmolality control agent, sweetener, polarity control agent, solvent, viscosity control agent in pharmaceutical preps.
Features: Intermediate purity
Regulatory: EP, USP, FCC, E420

Meritol 160 [Tate & Lyle UK http://www.tateandlyle.com]
Chem. Descrip.: Sorbitol CAS 50-70-4; EINECS/ELINCS 200-061-5
Uses: Excipient in pharmaceutical syrups and suspensions; carrier, osmolality control agent, sweetener, polarity control agent, solvent, viscosity control agent in pharmaceutical preps.
Regulatory: EP, USP, FCC, E420

Meritose 100 [Tate & Lyle N. Am. http://www.tlna.com]
Chem. Descrip.: D-Glucose monohydrate
Chem. Analysis: 99% dextrose and 0.5% other sugars
CAS 5996-10-1; EINECS/ELINCS 200-075-1
Uses: Carrier, sweetener, and excipient in pharmaceuticals for powdered and tableted dosages
Trade Name Reference

Properties: Cryst. solid

Chem. Descrip.: D-Glucose monohydrate
Chem. Analysis: 99% dextrose and 0.5% other sugars
CAS 5996-10-1; EINECS/ELINCS 200-075-1
Uses: Carrier, sweetener, and excipient in pharmaceuticals for powdered and tableted dosages

Chem. Descrip.: D-Glucose monohydrate
Chem. Analysis: 99% dextrose and 0.5% other sugars
CAS 5996-10-1; EINECS/ELINCS 200-075-1
Uses: Carrier, sweetener, and excipient in pharmaceuticals for powdered and tableted dosages

Use Level: 4-6%
Toxicology: Nontoxic
Storage: Do not expose to temps. below 0 C or to a pH of < 4 or > 8

Methocel® 310 Series [Dow http://www.dow.com]
Chem. Descrip.: Cellulose ether
Uses: Thickener, binder, film-former, water-retention agent, suspending agent, surfactant, lubricant, protective colloid, and emulsifier for pharmaceuticals
Regulatory: Kosher
Properties: Sl. off-wh. gran.; 100-500 µ particle size; sol. in water and some org. solvs.; 8% max. moisture
Toxicology: TSCA listed

Chem. Descrip.: Methylcellulose
Chem. Analysis: 5.0% max. loss on drying
CAS 9004-67-5
Uses: Granulation binder in pharmaceutical controlled release hydrophilic matrix systems and controlled release coatings; viscosity modifier and suspending agent in pharmaceutical liq. systems
Regulatory: USP, EP, kosher
Properties: Wh. to off-wh. powd.; 99.0% min. through #40 US standardapparent visc. 12-18 mPa.s; pH 5.5-8.0 (1% sol'n.); nonionic; 27.5-31.5% methoxyl
Storage: 5 yr shelf life; store in tightly closed containers

Chem. Descrip.: Methylcellulose
Chem. Analysis: 5% max. loss on drying
CAS 9004-67-5
Uses: In pharmaceuticals (tablet binder, coating agent, emulsifier, dispersant, bulk laxative)
Properties: Firm gel structure; water-sol.; visc. 400 (2% aq.)

Chem. Descrip.: Methylcellulose
Chem. Analysis: 5% max. loss on drying
CAS 9004-67-5
Uses: Granulation binder in pharmaceutical controlled release hydrophilic matrix systems and controlled release coatings; viscosity modifier and suspending agent in pharmaceuticals
Trade Name Reference

**pharmaceutical liq. systems**

**Regulatory:** FDA GRAS 21CFR §182.1480, 9CFR 318.7, 381.147, FCC, USP, EP, JP, BP; kosher

**Properties:** Wh. to sl. off-wh. gran. powd.; 99.0% min. through # 40 US standard sieve; water-sol.; visc. 289-525 mPa•s; pH 5.5-8.0 (1% sol’n.)

**Storage:** 5 yr shelf life from date of manufacture; store in a tightly sealed container

Chem. Descrip.: Methylcellulose

Chem. Analysis: 5.0% max loss on drying

CAS 9004-67-5

Uses: Granulation binder in pharmaceutical controlled release hydrophilic matrix systems and controlled release coatings; viscosity modifier and suspending agent in pharmaceutical liq. systems

**Regulatory:** USP, EP, kosher

**Properties:** Wh. to sl. off-wh. gran. powd.; 99.0% min. through #40 US standard sieve; apparent visc. 2308-3755 mPa•s; pH 5.5-8.0 (1% sol’n.)

**Storage:** 5 yr shelf life; store in tightly closed containers

**Methocel® A15C Premium** [Dow http://www.dow.com]

Chem. Descrip.: Methylcellulose

CAS 9004-67-5

Uses: Thickener, stabilizer, emulsifier, and gellant in pharmaceuticals

**Regulatory:** FDA GRAS 21CFR §182.1480, 9CFR 318.7, 381.147, FCC, USP, EP, JP, BP; kosher

**Properties:** Visc. 1500 cps

**Methocel® A15-LV** [Dow http://www.dow.com]

Chem. Descrip.: Methylcellulose

CAS 9004-67-5

Uses: Food gums used as thickener, stabilizer, emulsifier, and gellant; also for tablet coating applies.

**Features:** Films exhibit exc. stability to UV light, oils, most solvs.

**Properties:** Film props.: sp.gr. 1.39; tens. str. 62 MPa; elong. 5-15%

**Methocel® A15LV Premium** [Dow http://www.dow.com]

Chem. Descrip.: Methylcellulose

CAS 9004-67-5

Uses: Visc. control agent, gellant, foam booster/stabilizer, film-former, dispersant, lubricant, binder, emulsion stabilizer, and suspending agent for pharmaceutical tablet coating

**Features:** Adds fat-like texture

**Regulatory:** FDA GRAS 21CFR §182.1480, 9CFR 318.7, 381.147, FCC, USP, EP, JP, BP; kosher

**Properties:** Wh./off-wh. powd.; visc. 15 mPa•s

Chem. Descrip.: Hydroxypropyl methylcellulose

CAS 9004-65-3

Uses: Granulation binder in pharmaceutical controlled release hydrophilic matrix systems and controlled release coatings; viscosity modifier and suspending agent in pharmaceutical liq. systems

**Regulatory:** USP, EP, JP, kosher

**Properties:** Wh./off-wh. powd.; 99.0% min. through #40 US standard sieve; apparent visc. 2.7-3.8 mPa•s; pH 5.5-8.0 (1% sol’n.); 28.0-30.0% methoxyl

**Storage:** 5 yr shelf life; store in tightly closed container

Chem. Descrip.: Hydroxypropyl methylcellulose

CAS 9004-65-3

Uses: Granulation binder in pharmaceutical controlled release hydrophilic matrix systems and controlled release coatings; viscosity modifier and suspending agent in pharmaceutical liq. systems

**Regulatory:** USP, EP, JP, kosher

**Properties:** Wh./off-wh. powd.; 95.0% min. through #100 US standard sieve; apparent visc. 2308-3755 mPa•s; pH 5.5-8.0 (1% sol’n.)

**Storage:** Shelf life 5 yr from date of manufacture; keep in closed containers

Chem. Descrip.: Hydroxypropyl methylcellulose
methylcellulose
Chem. Analysis: 5% max. loss on drying
CAS 9004-65-3
Uses: Visc. control agent, gellant, foam booster/stabilizer, film-former, dispersant, lubricant, binder, emulsion stabilizer, and suspending agent for controlled drug release
Properties: Wh./off-wh. powd.; 99.0% min. through #40 US standard sieve; pH 5.5-8.0 (1% sol'n.)
Storage: Shelf life 5 yr from date of manufacture; keep in closed containers

Chem. Descrip.: Hydroxypropyl methylcellulose
Chem. Analysis: 5.0% max loss on drying
CAS 9004-65-3
Uses: Granulation binder in pharmaceutical controlled release hydrophilic matrix systems and controlled release coatings; viscosity modifier and suspending agent in pharmaceutical liq. systems
Regulatory: USP, EP, kosher
Properties: Wh. to sl. off-wh. gran. powd.; 99.0% min. through #40 US standard sieve; apparent visc. 4.2-6.1 mPa.s; pH 5.5-8.0 (1% sol'n.)
Storage: 5 yr shelf life; store in tightly closed containers

Methocel® E10 Premium CR EP
Chem. Descrip.: Hydroxypropyl methylcellulose
Chem. Analysis: 5.0% max loss on drying
CAS 9004-65-3
Uses: Granulation binder in pharmaceutical controlled release hydrophilic matrix systems and controlled release coatings; viscosity modifier and suspending agent in pharmaceutical liq. systems
Features: Controlled-release grade
Regulatory: USP, EP, kosher
Properties: Wh. to sl. off-wh. gran. powd.; 99.0% min. through #40 US standard sieve; apparent visc. 4646-7070 mPa.s; pH 5.5-8.0 (1% sol'n.)
Storage: 5 yr shelf life; store in tightly closed containers

Chem. Descrip.: Hydroxypropyl methylcellulose
Chem. Analysis: 5.0% max loss on drying
CAS 9004-65-3
Uses: Granulation binder in pharmaceutical controlled release hydrophilic matrix systems and controlled release coatings; viscosity modifier and suspending agent in pharmaceutical liq. systems
Regulatory: USP, EP, JP, kosher
Properties: Wh. to sl. off-wh. gran. powd.; 99.0% min. through #40 US standard sieve; apparent visc. 12-18 mPa.s; pH 5.5-8.0 (1% sol'n.)
Storage: 5 yr shelf life; store in tightly closed containers

Methocel® E6 Premium [Dow http://www.dow.com]
Chem. Descrip.: Hydroxypropyl methylcellulose
CAS 9004-65-3
Uses: Visc. control agent, gellant, foam booster/stabilizer, film-former, dispersant, lubricant, binder, emulsion stabilizer, and suspending agent for pharmaceutical tablet coating
Properties: Wh./off-wh. powd.; visc. 6 mPa.s

Methocel® E15 Food Grade [Dow http://www.dow.com]
Chem. Descrip.: Hydroxypropyl methylcellulose

Uses: Thickener, stabilizer, emulsifier, gellant in pharmaceuticals

Regulatory: FDA, FCC, USP, EP, JP, BP; kosher

Properties: Visc. 15 cps

Methocel® E15LV [Dow http://www.dow.com]

Chem. Descrip.: Cellulose ether

Uses: Thickener, binder, film-former, water-retention agent, suspending agent, surfactant, lubricant, protective colloid, and emulsifier for pharmaceuticals

Regulatory: Kosher

Properties: Sp.gr. 1.29; tens. str. 69 MPa±10%; elong. 5-15%

Toxicology: TSCA listed

Methocel® E15LV Premium [Dow http://www.dow.com]

Chem. Descrip.: Hydroxypropyl methylcellulose

CAS 9004-65-3

Uses: Visc. control agent, gellant, foam booster/stabilizer, film-former, dispersant, lubricant, binder, emulsion stabilizer, and suspending agent for pharmaceutical tablet coating

Properties: Wh./off-wh. gran. powd.; visc. 15 mPa•s

Chem. Descrip.: Hydroxypropyl methylcellulose

Chem. Analysis: 5.0% max. loss on drying

CAS 9004-65-3

Uses: Granulation binder in pharmaceutical controlled release hydrophilic matrix systems and controlled release coatings; viscosity modifier, thickener and suspending agent in pharmaceutical liq. systems

Features: High clarity and easy filtration

Regulatory: USP, EP, kosher

Properties: Wh. to sl. off-wh. gran. powd.;
99.0% min. through #40 US standard sieve;
apparent visc. 39-59 mPa•s; pH 5.5-8.0 (1% sol'n.)

Storage: 5 yr shelf life; store in tightly closed containers

Chem. Descrip.: Hydroxypropyl methylcellulose

Chem. Analysis: 5.0% max. loss on drying

CAS 9004-65-3

Uses: Granulation binder in pharmaceutical controlled release hydrophilic matrix systems and controlled release coatings; viscosity modifier, thickener and suspending agent in pharmaceutical liq. systems

Features: High clarity and easy filtration

Regulatory: USP, EP, kosher

Properties: Wh. to sl. off-wh. gran. powd.;
99.0% min. through #40 US standard sieve;
apparent visc. 5.0-7.3 mPa•s; pH 5.5-8.0 (1% sol'n.)

Storage: 5 yr shelf life; store in tightly closed containers
suspending agent in pharmaceutical liq. systems

**Features:** High clarity and easy filtration

**Regulatory:** USP, EP, JP, kosher

**Properties:** Wh. to sl. off-wh. gran. powd.; 99.0% min. through #40 US standard sieve; apparent visc. 5.0-7.3 mPa.s; pH 5.5-8.0 (1% sol'n.)

**Storage:** 5 yr shelf life; store in tightly closed containers

**Chem. Descrip.:** Hydroxypropyl methylcellulose

**CAS 9004-65-3**

**Uses:** Thickener, stabilizer, emulsifier, gellant in pharmaceuticals

**Regulatory:** FDA 21 CFR §172.874, USDA, FCC, USP, EP, JP, BP; kosher

**Properties:** Visc. 4000 cps

**Chem. Descrip.:** Methylcellulose

**Chem. Analysis:** 5.0% max. loss on drying

**CAS 9004-67-5**

**Uses:** Granulation binder in pharmaceutical controlled release hydrophilic matrix systems and controlled release coatings; viscosity modifier and suspending agent in pharmaceutical liq. systems

**Regulatory:** USP, EP, kosher

**Properties:** Wh. to off-wh. powd.; 99.0% min. through #40 US standardapparent visc. 2308-3755 mPa.s; pH 5.5-8.0 (1% sol'n.); nonionic; 27.0-30.0% methoxyl

**Storage:** 5 yr shelf life; store in tightly closed containers

**Methocel® F Series** [Dow http://www.dow.com]

**Chem. Descrip.:** Hydroxypropyl methylcellulose

**CAS 9004-65-3**

**Uses:** Used for pharmaceutical tablet coating, granulation, controlled release applics.

**Properties:** Visc. avail. 50 and 4000 cps

**Methocel® J5MS** [Dow http://www.dow.com]

**Chem. Descrip.:** Hydroxypropyl methylcellulose

**CAS 9004-65-3**

**Uses:** Thickener, binder, film-former, water-retention agent, suspending agent, surfactant, lubricant, protective colloid, and emulsifier for pharmaceuticals

**Regulatory:** Kosher

**Properties:** Visc. 5000 mPa•s

**Toxicology:** TSCA listed

**Methocel® J Series** [Dow http://www.dow.com]

**Chem. Descrip.:** Hydroxypropyl methylcellulose

**CAS 9004-65-3**

**Uses:** Used for pharmaceutical tablet coating, granulation, controlled release applics.

**Properties:** Visc. avail. 5, 15, 100, 4000, 15,000, and 100,000 cps

**Methocel® K3 Premium** [Dow http://www.dow.com]

**Chem. Descrip.:** Hydroxypropyl methylcellulose

**CAS 9004-65-3**

**Uses:** Visc. control agent, film-former for pharmaceutical tablet coating; emulsion stabilizer, dispersant for flavor oil emulsions and encapsulation

**Regulatory:** FDA 21 CFR §172.874, USDA, FCC, USP, EP, JP, BP; kosher

**Properties:** Wh./off-wh. powd.; visc. 3 mPa•s

**Methocel® K4M Premium** [Dow http://www.dow.com; S. Black http://www.sblack.com]

**Chem. Descrip.:** Hydroxypropyl methylcellulose

**CAS 9004-65-3**

**Uses:** Visc. control agent, gellant, foam booster/stabilizer, film-former, dispersant, lubricant, binder, emulsion stabilizer, and suspending agent for creams and lotions, controlled drug release

**Regulatory:** FDA 21 CFR §172.874, USDA, FCC, USP, EP, JP, BP; kosher

**Properties:** Visc. 4000 mPa•s

**Methocel® K15M Premium** [Dow http://www.dow.com]

**Chem. Descrip.:** Hydroxypropyl methylcellulose

**CAS 9004-65-3**

**Uses:** Visc. control agent, gellant, foam booster/stabilizer, film-former, dispersant, lubricant, binder, emulsion stabilizer, and suspending agent for controlled drug release
Chem. Descrip.: Hydroxypropyl methylcellulose
Chem. Analysis: 5.0% max loss on drying
CAS 9004-65-3
Uses: Granulation binder in pharmaceutical controlled release hydrophilic matrix systems and controlled release coatings; viscosity modifier and suspending agent in pharmaceutical liq. systems
Features: Controlled-release grade
Regulatory: USP, EP, kosher
Properties: Wh. to sl. off-wh. gran. powd.; 99.0% min. through #40 US standard sieve; 90.0% min. through #100 US standard sieve; apparent visc. 78-117 mPa.s; pH 5.5-8.0 (1% sol'n.); 19.0-24.0% methoxyl
Storage: 5 yr shelf life; store in tightly closed containers

Methocel® K100 Premium LV EP [Dow http://www.dow.com]
Chem. Descrip.: Hydroxypropyl methylcellulose
Chem. Analysis: 5.0% max loss on drying
CAS 9004-65-3
Uses: Granulation binder in pharmaceutical controlled release hydrophilic matrix systems and controlled release coatings; viscosity modifier and suspending agent in pharmaceutical liq. systems
Features: Controlled-release grade
Regulatory: USP, EP, kosher
Properties: Wh. to sl. off-wh. gran. powd.; 99.0% min. through #40 US standard sieve; 90.0% min. through #100 US standard sieve; apparent visc. 78-117 mPa.s; pH 5.5-8.0 (1% sol'n.); 19.0-24.0% methoxyl
Storage: 5 yr shelf life; store in tightly closed containers

Methocel® K100 Premium LV LH EP [Dow http://www.dow.com]
Chem. Descrip.: Hydroxypropyl methylcellulose
Chem. Analysis: 5.0% max loss on drying
CAS 9004-65-3
Uses: Granulation binder in pharmaceutical controlled release hydrophilic matrix systems and controlled release coatings; viscosity modifier and suspending agent in pharmaceutical liq. systems
Features: Controlled-release grade
Regulatory: USP, EP, kosher
Properties: Wh. to sl. off-wh. gran. powd.; 99.0% min. through #40 US standard sieve; 90.0% min. through #100 US standard sieve; apparent visc. 78-117 mPa.s; pH 5.5-8.0 (1% sol'n.); 19.0-24.0% methoxyl
Storage: 5 yr shelf life; store in tightly closed containers
Trade Name Reference

Methocel® K Series [Dow
http://www.dow.com]
Chem. Descrip.: Hydroxypropyl methylcellulose
CAS 9004-65-3
Uses: Used for pharmaceutical tablet coating, granulation, controlled release applics.
Properties: Visc. avail. 3, 100, 4000, 15,000, and 100,000 cps

M 2 Etil Esil Oleato [Undesa
http://www.unesda.com; S. Black
http://www.sblack.com]
Chem. Descrip.: 2-Ethylhexyl oleate
CAS 26399-02-0; EINECS/ELINCS 247-655-0
Uses: Solubilizer, vehicle for medicines; excipient for injectable substances; emollient in antiperspirants
Features: Changes skin feel, rub out props. and greasiness; veg. oil substitute; vaseline substitute
Properties: Yel. liq.; typical odor; insol. in water; sol. in waxes, vegetable and mineral oils; dens. ≈ 0.86; f.p. ≈ 5 C.; b.p. ≈ 225; flash pt. ≈ 190 C
Toxicology: Nontoxic by inh., contact, ing.
Environmental: Biodeg.; keep out of sewers, drains, surface and underground water; considered to be of low toxicity for aquatic life
Precaution: Wear glove, goggles, overalls; avoid contact with flames; incompat. with strong oxidants
Hazardous Decomp. Prods.: CO, CO2
Storage: Store in original, closed container @ R.T.; protect from dampness, heat sources

Metolose® SM-4 [Shin-Etsu
http://www.silicone.jp/e/]
Chem. Descrip.: Methylcellulose
CAS 9004-67-5
Uses: Excipient, film coating for pharmaceuticals, fine pellet coatings
Features: Extremely low visc.; less tacky
Properties: Visc. 4 mPa•s

MGS-ASE [Nikko Chems. Co. Ltd
http://www.nikkol.co.jp/index.html]
Chem. Descrip.: Glyceryl stearate SE
CAS 11099-07-3; EINECS/ELINCS 234-325-6
Uses: Emulsifier, stabilizer for ointments
Features: Contains soap
Regulatory: JSCI listed
Properties: Wh. flake; HLB 6.0; anionic; 100% conc.
Toxicology: TSCA listed

MGS-AV [Nikko Chems. Co. Ltd
http://www.nikkol.co.jp/index.html]
Chem. Descrip.: Glyceryl stearate
CAS 11099-07-3; EINECS/ELINCS 234-325-6
Uses: Emulsifier, stabilizer for ointments
Features: Lipophilic
Regulatory: JSCI listed
Properties: Wh. flake; HLB 4.0; nonionic; 100% conc.

MGS-B [Nikko Chems. Co. Ltd
http://www.nikkol.co.jp/index.html]
Chem. Descrip.: Glyceryl stearate
CAS 11099-07-3; EINECS/ELINCS 234-325-6
Uses: Emulsifier, stabilizer for ointments
Features: Lipophilic
Regulatory: JSCI listed
Properties: Wh. flake; HLB 5.0; nonionic; 100% conc.
Toxicology: TSCA listed
Trade Name Reference

MGS-DEXV [Nikko Chems. Co. Ltd
http://www.nikkol.co.jp/index.html]
Chem. Descrip.: Glyceryl stearate, glyceryl stearate SE and PEG-10 stearate
CAS 11099-07-3; 9004-99-3; EINECS/ELINCS 234-325-6
Uses: Emulsifier, stabilizer for ointments
Features: Lipophilic
Regulatory: JSCI listed
Properties: Wh. flake; HLB 5.5; anionic; 100% conc.

MGS-F20V [Nikko Chems. Co. Ltd
http://www.nikkol.co.jp/index.html]
Chem. Descrip.: Glyceryl stearate
Chem. Analysis: Monoglyceride 20%
CAS 11099-07-3; EINECS/ELINCS 234-325-6
Uses: Emulsifier, stabilizer for ointments
Features: Lipophilic
Regulatory: JSCI listed
Properties: Wh. flake; HLB 7.0; nonionic; 100% conc.
Toxicology: TSCA listed

MGS-F40V [Nikko Chems. Co. Ltd
http://www.nikkol.co.jp/index.html]
Chem. Descrip.: Glyceryl stearate
Chem. Analysis: 40% monoglyceride
CAS 11099-07-3; EINECS/ELINCS 234-325-6
Uses: Emulsifier, stabilizer for ointments
Features: Lipophilic
Regulatory: JSCI listed
Properties: Wh. flake; HLB 4.0; nonionic; 100% conc.
Toxicology: TSCA listed

MGS-F50 [Nikko Chems. Co. Ltd
http://www.nikkol.co.jp/index.html]
Chem. Descrip.: Glyceryl stearate
Chem. Analysis: 50% monoglyceride
CAS 11099-07-3; EINECS/ELINCS 234-325-6
Uses: Emulsifier, stabilizer for ointments
Features: Lipophilic
Regulatory: JSCI listed
Properties: Wh. bead; HLB 3.5; nonionic; 100% conc.; 50% monoglyceride
Toxicology: TSCA listed

MGS-F75V [Nikko Chems. Co. Ltd
http://www.nikkol.co.jp/index.html]
Chem. Descrip.: Glyceryl stearate
Chem. Analysis: 75% monoglyceride
CAS 11099-07-3; EINECS/ELINCS 234-325-6
Uses: Emulsifier, stabilizer for ointments
Features: Lipophilic
Regulatory: JSCI listed
Properties: Wh. flake; HLB 1.5; nonionic; 100% conc.; 75% monoglyceride
Toxicology: TSCA listed

MicroMask™ Chlorpheniramine Maleate 10%
[Particle Dynamics
http://www.particledynamics.com]
Chem. Descrip.: Chlorpheniramine maleate encapsulated in an edible wax matrix
CAS 113-92-8
Uses: Tableting encapsulator for Chlorpheniramine maleate for chewable and swallowable tablets, sachets, quick-dissolve dosage
Features: Rec. where optimum tableting and free-flowing chars. are desired
Regulatory: USP, kosher
Properties: Yel. to tan relatively free-flowing powd.; 5% max. through 20 mesh, 15% max. through 40 mesh; dens. 0.6-0.9 g/m³ (tapped); 93-110 mg/g assay

Microbiotone [Am. Labs
http://www.americanlaboratories.com]
Chem. Descrip.: Peptic hydrolysate of beef tissue
Uses: Medium for growth of aerobic and anaerobic bacteria in pharmaceuticals
Regulatory: USP compliance
Properties: Gran.; completely sol. in 2% sol'n.; pH 6.8-7.2 (10%)

Microcare® QT [Thor UK
http://www.thor.com;
http://www.thor.adept.co.uk]
Chem. Descrip.: Aqueous based quaternary ammonium formulation of optimised alkyl chain length distribution
Uses: For broad spectrum preservation of pharmaceutical products
Properties: Aq.

Microcel® 101 [Blanver Farmoquimica
http://www.blanver.com.br; Blanver USA
http://www.blanver.com.br]
Chem. Descrip.: Microcrystalline cellulose
CAS 9004-34-6
Uses: Binder, disintegrant, compression agent, compaction agent in pharmaceutical tablets, wet granulation, direct compression, pellets; absorp. enhancer in liq. extracts; oil absorp. enhancer in hard capsules/tablets made with act. oils
Features: Reduces friability of the final granulation; absorbs act. sol'n. to help dissolution of insol. drugs; promotes the active
Trade Name Reference

absorp. for use in liq. extract; to produce tablets substituting the dry extract

Properties: Wh. fine cryst. powd.; 50 µ avg. particle size; 1% max. on 60 mesh, 30% max. on 200 mesh; odorless; bulk dens. 0.2-0.4 g/cm³, 0.4-0.6 g/cm³ (tapped); < 5% loss on drying

Use Level: 10-50% (wet granulation, direct compression, pellets); 30-70% (act. absorption); 20-70% (oil absorp. enhancer)

Chem. Descrip.: Microcrystalline cellulose
CAS 9004-34-6

Uses: Binder, disintegrant, compression agent, compaction agent in pharmaceutical tablets, dry granulation

Features: Reduces friability of the final granulation; promotes the active absorption for use in liquid extract; to produce tablets substituting the dry extract

Properties: Wh. fine cryst. powd.; 100 µ avg. particle size; 8% max. on 60 mesh, 45% max. on 200 mesh; odorless; bulk dens. 0.28-0.33 g/cm³, 0.45-0.52 g/cm³ (tapped); ≤ 3% loss on drying

Use Level: 10-50%

Chem. Descrip.: Microcrystalline cellulose
CAS 9004-34-6

Uses: Binder, disintegrant, compression agent, compaction agent in pharmaceutical tablets

Features: Low moisture; rec. for use with moisture-sensitive drugs

Properties: Wh. fine cryst. powd.; 100 µ avg. particle size; 8% max. on 60 mesh, 45% max. on 200 mesh; odorless; bulk dens. 0.2-0.4 g/cm³, 0.4-0.6 g/cm³ (tapped); < 3% loss on drying

Use Level: 10-50%

Chem. Descrip.: Microcrystalline cellulose
CAS 9004-34-6

Uses: Binder, disintegrant, compression agent, compaction agent in pharmaceutical tablets

Features: Low moisture; rec. for use with moisture-sensitive drugs

Properties: Wh. fine cryst. powd.; 100 µ avg. particle size; 8% max. on 60 mesh, 45% max. on 200 mesh; odorless; bulk dens. 0.28-0.33 g/cm³, 0.45-0.52 g/cm³ (tapped); ≤ 3% loss on drying

Use Level: 10-50%

Chem. Descrip.: Microcrystalline cellulose
CAS 9004-34-6

Uses: Binder, disintegrant, compression agent, compaction agent in pharmaceutical tablets; flow aid for semi-automatic capsule mfg. equip.; absorp. enhancer in liq. extracts

Features: Reduces wt. variation

Properties: Wh. fine cryst. powd.; 180 µ avg. particle size; 10% min. on 60 mesh, 45% min. on 200 mesh; odorless; bulk dens. 0.33-0.40 g/cm³, 0.4-0.6 g/cm³ (tapped); ≤ 7% loss on drying

Use Level: 10-50% (compression aid, flow aid); 30-70% (act. absorption)

Chem. Descrip.: Microcrystalline cellulose
CAS 9004-34-6

Uses: Binder, disintegrant, compression agent, compaction agent in pharmaceutical tablets; flow aid for semi-automatic capsule mfg. equip.; absorp. enhancer in liq. extracts

Features: Reduces wt. variation

Properties: Wh. fine cryst. powd.; 230 µ avg. particle size; 30% min. on 60 mesh, 60% min. on 200 mesh; odorless; bulk dens. 0.33-0.40 g/cm³, 0.4-0.6 g/cm³ (tapped); ≤ 7% loss on drying

Use Level: 10-50% (compression aid, flow aid); 30-70% (act. absorption)

Chem. Descrip.: Microfine cellulose See Cellulose
CAS 9004-34-6; EINECS/ELINCS 232-674-9

Uses: Compression aid, compaction aid for pharmaceutical powds., tablets, capsules, wet and dry granulation; compression aid,
Trade Name Reference

**filler in wet granulation** (inc. drying speed, controls dye migration, reduces amt. of binder); **flow aid, dissolution aid in capsules**

*Properties:* Wh. solid; odorless

*Use Level:* 5-40% (wet granulation); 10-30% (dry granulation); 5-20% (capsules)

**Microcel® 500** [Blanver Farmoquimica
http://www.blanver.com.br; Blanver USA
http://www.blanver.com.br]

*Chem. Descrip.:* Microcrystalline cellulose

*CAS 9004-34-6*

*Uses:* Binder, disintegrant, compression agent, compaction agent in pharmaceutical tablets; flow aid for semi-automatic capsule mfg. equip.

*Features:* Reduces wt. variation

*Properties:* Wh. fine cryst. powd.; 270 µ avg. particle size; 50% min. on 60 mesh; odorless; bulk dens. 0.2-0.4 g/cm³, 0.4-0.6 g/cm³ (tapped); < 5% loss on drying

*Use Level:* 10-50% (compression aid, flow aid)

**Micro-Cel® C TV** [Celite
http://www.worldminerals.com]

*Chem. Descrip.:* Syn. calcium silicate

*CAS 1344-95-2; EINECS/ELINCS 215-710-8*

*Uses:* Filter aid for use in pharmaceutical industry

*Properties:* Fine wh. odorless powd., negligibly sol. in water; sp.gr. 2.3; pH 7.5-9.0; 100%

**Micro-Cel® E TV** [Celite
http://www.worldminerals.com]

*Chem. Descrip.:* Synthetic calcium silicate

*CAS 1344-95-2; EINECS/ELINCS 215-710-8*

*Uses:* Filter aid for use in pharmaceutical industry

*Regulatory:* NF

*Properties:* Fine wh. odorless powd., negligibly sol. in water; sp.gr. 2.3; pH 7.5-9.0; 100%

*Toxicology:* TLV 5 mg/m³ (nuisance dust); prolonged and repeated exposure to excessive cons. of dust may cause chronic pulmonary disease; irritant to eyes and respiratory tract

*Environmental:* Inert in the environment

*Precaution:* Wear goggles or safety glasses with side shields; avoid contact with HF acid

**Microcrystalline Wax SP 16** [Strahl & Pitsch
http://www.strahlpitsch.com]

*Chem. Descrip.:* Microcrystalline wax

*CAS 63231-60-7; EINECS/ELINCS 264-038-1*

*Uses:* Wax for pharmaceuticals

*Regulatory:* FDA 21CFR §172.615, 172.886, 175.105, 178.3710; CTFA listed

*Properties:* Yel. slabs or pastilles; m.p. 180-190 F; acid no. nil; sapon. no. nil

*Toxicology:* TSCA listed

**Microcrystalline Wax SP 18** [Strahl & Pitsch
http://www.strahlpitsch.com]

*Chem. Descrip.:* Microcrystalline wax

*CAS 63231-60-7; EINECS/ELINCS 264-038-1*

*Uses:* Wax for pharmaceuticals

*Regulatory:* FDA 21CFR §172.615, 172.886, 175.105, 178.3710; CTFA listed

*Properties:* Wh. slabs or pastilles; m.p. 165-175 F; acid no. nil; sapon. no. nil

*Toxicology:* TSCA listed

**Microcrystalline Wax SP 19** [Strahl & Pitsch
http://www.strahlpitsch.com]

*Chem. Descrip.:* Microcrystalline wax

*CAS 63231-60-7; EINECS/ELINCS 264-038-1*

*Uses:* Wax for pharmaceuticals

*Regulatory:* FDA 21CFR §172.615, 172.886, 175.105, 178.3710; CTFA listed

*Properties:* Wh. slabs or pastilles; m.p. 170-180 F; acid no. nil; sapon. no. nil

*Toxicology:* TSCA listed

**Microcrystalline Wax SP 26** [Strahl & Pitsch
http://www.strahlpitsch.com]

*Chem. Descrip.:* Microcrystalline wax

*CAS 63231-60-7; EINECS/ELINCS 264-038-1*

*Uses:* Wax for pharmaceuticals

*Regulatory:* FDA 21CFR §172.615, 172.886, 175.105, 178.3710; CTFA listed

*Properties:* Wh. slabs or pastilles; m.p. 175-185 F; acid no. nil; sapon. no. nil

*Toxicology:* TSCA listed

**Microcrystalline Wax SP 60** [Strahl & Pitsch
http://www.strahlpitsch.com]

*Chem. Descrip.:* Microcrystalline wax

*CAS 63231-60-7; EINECS/ELINCS 264-038-1*

*Uses:* Wax for pharmaceuticals

*Regulatory:* FDA 21CFR §172.615, 172.886, 175.105, 178.3710; CTFA listed

*Properties:* Yel. slabs or pastilles; m.p. 175-185 F; acid no. nil; sapon. no. nil

*Toxicology:* TSCA listed

**Microcrystalline Wax SP 60W** [Strahl & Pitsch
http://www.strahlpitsch.com]

*Chem. Descrip.:* Microcrystalline wax

*CAS 63231-60-7; EINECS/ELINCS 264-038-1*

*Uses:* Wax for pharmaceuticals

*Regulatory:* FDA 21CFR §172.615, 172.886, 175.105, 178.3710; CTFA listed

*Properties:* Yel. slabs or pastilles; m.p. 175-185 F; acid no. nil; sapon. no. nil

*Toxicology:* TSCA listed
Microcrystalline Wax SP 89 [Strahl & Pitsch http://www.strahlpitsch.com]  
Chem. Descrip.: Microcrystalline wax  
CAS 63231-60-7; EINECS/ELINCS 264-038-1  
Uses: Wax for pharmaceuticals  
Regulatory: FDA 21CFR §172.615, 172.886, 175.105, 178.3710; CTFA listed  
Properties: Wh. slabs or pastilles; m.p. 195-202 F; acid no. nil; sapon. no. nil  
Toxicology: TSCA listed  

Microcrystalline Wax SP 96 [Strahl & Pitsch http://www.strahlpitsch.com]  
Chem. Descrip.: Microcrystalline wax  
CAS 63231-60-7; EINECS/ELINCS 264-038-1  
Uses: Wax for pharmaceuticals  
Regulatory: FDA 21CFR §172.615, 172.886, 175.105, 178.3710; CTFA listed  
Properties: Wh. slabs or pastilles; m.p. 145-155 F; acid no. nil; sapon. no. nil  
Toxicology: TSCA listed  

Microcrystalline Wax SP 617 [Strahl & Pitsch http://www.strahlpitsch.com]  
Chem. Descrip.: Microcrystalline wax  
CAS 63231-60-7; EINECS/ELINCS 264-038-1  
Uses: Wax for pharmaceuticals  
Regulatory: FDA 21CFR §172.615, 172.886, 175.105, 178.3710; CTFA listed  
Properties: Yel. slabs or pastilles; m.p. 191-199 F; acid no. nil; sapon. no. nil  
Toxicology: TSCA listed  

Microcrystalline Wax SP 624 [Strahl & Pitsch http://www.strahlpitsch.com]  
Chem. Descrip.: Microcrystalline wax  
CAS 63231-60-7; EINECS/ELINCS 264-038-1  
Uses: Wax for pharmaceuticals  
Regulatory: FDA 21CFR §172.615, 172.886, 175.105, 178.3710; CTFA listed  
Properties: Yel. slabs or pastilles; m.p. 195-202 F; acid no. nil; sapon. no. nil  
Toxicology: TSCA listed  

Micro-Dry® [Reheis http://www.reheis.com]  
Chem. Descrip.: Aluminum chlorohydrate  
CAS 12042-91-0; EINECS/ELINCS 234-933-1  
Uses: Antiperspirant active widely used for aerosols  
Features: Rec. where particle size and surface area are important factors  
Properties: Powd.; 44 µ particle size; 97% min. through 325 mesh; 47% Al₂O₃, 16.3% Cl  
Toxicology: Environmentally compat.  
Regulatory: USP, Ph. Eur., JPE, DMF  
Properties: Colorless liq., neutral odor; sol. in diethyl ether, petrol. ether, chloroform, IPA, toluene, alcohol, min. oil, acetone; sp.gr. 0.94-0.95; visc. 25-35 mPa·s; acid no. 0.1 max.
Trade Name Reference

iodine no. 0.5 max.; sapon. no. 335-355; pH neutral; cloud pt. 0 C; nonionic

Environmental: Environmentally compat.

Miglyol® 812 [Sasol N. Am.
http://www.sasolnorthamerica.com]
Chem. Descrip.: Caprylic/capric triglyceride
CAS 65381-09-1; EINECS/ELINCS 265-724-3
Uses: Dispersant, lubricant, anticaking agent, carrier, solvent, solubilizer, suspending agent for pharmaceuticals (oral, external, suppositories); spreading agent, penetrant on skin; solvent for lipophilic drugs; carrier, filler in capsules
Features: Stable to oxidation; environmentally compat.

Regulatory: USP, Ph. Eur., JPE, DMF
Properties: Colorless liq.; sol. in alcohol, min. oil, acetone; visc. 25-35 mPa*s; acid no. 0.1 max.; iodine no. 0.5 max.; sapon. no. 325-345; cloud pt. 10 C; nonionic; 100% conc.

Miglyol® 812 N [Sasol N. Am.
http://www.sasolnorthamerica.com]
Chem. Descrip.: Glyceryl tricaprylate/tricaprate See Caprylic/capric triglyceride
CAS 65381-09-1; EINECS/ELINCS 265-724-3
Uses: Solvent, solubilizer in pharmaceuticals (oral, topical, rectal, parenteral), creams/lotions, oil preps.; spreading agent, penetrant on skin; fat component for medical nutrition
Features: Oxidation-stable; no visible greasy coating of skin surf.

Properties: Thin oily liq.; dens. 0.95 kg/dm³; visc. 25-35 mPa*s; turbidity pt. 10 C; acid no. 0.2 max.; iodine no. 1 max.; sapon. no. 325-345

Miglyol® 818 [Sasol Germany
http://www.sasol.com;
http://www.sasololefinssurfactants.com;
Sasol N. Am.
http://www.sasolnorthamerica.com]
Chem. Descrip.: Caprylic/capric/linoleic triglyceride
Uses: Emollient, absorption promoter for pharmaceuticals, oral, nasal, parenteral, topical, rectal, topical creams, lotions, and oil formulations; spreading agent, penetrant on skin
Features: Oxidation-stable; environmentally compat.

Properties: Virtually colorless liq.; visc. 30-35 mPa*s; acid no. 0.2 max.; iodine no. 10 max.; sapon. no. 315-335; cloud pt. 10 C

Miglyol® 829 [Sasol Germany
http://www.sasol.com;
http://www.sasololefinssurfactants.com;
Sasol N. Am.
http://www.sasolnorthamerica.com]
Chem. Descrip.: Caprylic/capric/disuccinic triglyceride
Uses: Emollient, suspending agent for pharmaceuticals, oral, nasal, topicals, cream and liq. emulsions, oral suspensions, and capsules
Features: Oxidation-stable; environmentally compat.

Regulatory: JCIC
Properties: Ylsh. visc. liq.; sp.gr. 1.01; visc. 230-260 mPa*s; acid no. 1 max.; iodine no. 1 max.; sapon. no. 400-430; cloud pt. -30 C
Toxicology: Nontoxic

Miglyol® 840 [Sasol Germany
http://www.sasol.com;
http://www.sasololefinssurfactants.com;
Sasol N. Am.
http://www.sasolnorthamerica.com]
Chem. Descrip.: Propylene glycol dicaprylate/dicaprate
CAS 68583-51-7; EINECS/ELINCS 271-516-3
Uses: Emollient, dispersant, lubricant, suspending agent, solubilizer for pharmaceuticals; carrier, vehicle and solvent for pharmaceuticals (orals, parenterals, rectals, inj. prods., topical ointments, creams, lotions, suppositories); act. ingred. for pharmaceuticals; flavor fixing agent; spreading agent, penetrant on skin
Features: Oxidation-stable; no visible greasy coating of skin surf.; environmentally compat.
Regulatory: DAB, JCIC, DMF
Properties: Virtually colorless liq.; sol. in alcohol, min. oil, acetone; visc. 8-14 mPa*s; acid no. 0.1 max.; iodine no. 0.5 max.; sapon. no. 300-320; cloud pt. -30 C

Miglyol® 840 Gel B [Sasol Germany
http://www.sasol.com;
http://www.sasololefinssurfactants.com;
Sasol N. Am.
http://www.sasolnorthamerica.com]

Environmental: Environmentally compat.
Trade Name Reference

**hectorite, propylene carbonate**

*Uses:* Consistency regulator for pharmaceuticals (topicals, semisolid drug forms, ointments, creams); high temp. stabilizer esp. for w/o emulsions and anhyd. pharmaceuticals

*Features:* Chemically neutral; heat-stable; oxidation-resist.; environmentally compat.

*Properties:* Cream-colored gel; sol. in ethanol, acetone, diethyl ether; misc. with oils, fats, waxes, w/o emulsifiers; insol. in water; acid no. 0.5 max.; iodine no. 1 max.; sapon. no. 290-315; 0.5% max. water

*Toxicology:* LD50 (oral, mouse) > 5000 mg/kg; nontoxic; skin compat.; nonirritating to eyes

*Storage:* 3 yrs. shelf life when stored in tightly closed containers below 25 C, protected from light and moisture

---

*Chem. Descrip.:* Glycerol tricaprylate/tricaprate  See Caprylic/capric triglyceride

*CAS:* 65381-09-1; EINECS/ELINCS 265-724-3

*Uses:* Penetration enhancer, drug carrier for dermal use; solvent

*Regulatory:* USP, EP, JPE

*Properties:* Liq.; dens. 0.95 kg/dm³; visc. 25-35 mPa•s; turbidity pt. 0 C; acid no. 0.2 max.; iodine no. 1 max.; sapon. no. 335-355

---

*Chem. Descrip.:* Butylene glycol dicaprylate/dicaprate

*Uses:* Emollient, dispersant, lubricant, suspending agent, solubilizer for pharmaceuticals; carrier, vehicle and solvent for inj. prods., topical ointments, creams, lotions; penetrant and spreading agent on skin; act. ingred. for pharmaceuticals

*Features:* Hypoallergenic; environmentally compat.

*Properties:* Colorless liq., neutral odor; sol. in alcohol, diethyl ether, n-hexane, fatty oils; insol. in water; visc. 8-13 mPa•s; acid no. 0.1 max.; iodine no. 1.0 max.; sapon. no. 295-315; hyd. no. 5 max.

---

*Chem. Descrip.:* Caprylic/capric triglyceride, stearalkonium hectorite, propylene carbonate

*Uses:* Consistency regulator, emulsion stabilizer in anhyd. and aq. pharmaceuticals (topical, semisolid), ointments, sun care prods.

*Features:* Chemically neutral; heat-stable; oxidation-resist.; environmentally compat.

*Properties:* Pale brnsh. oily gel; sol. in ethanol, acetone, diethyl ether; misc. with oils, fats, waxes, w/o emulsifiers; insol. in water; acid no. 0.5 max.; sapon. no. 290-320; 0.5% max. water

*Toxicology:* LD50 (oral, mouse) > 5000 mg/kg; nontoxic; skin compat.; nonirritating to eyes

*Storage:* 3 yrs. shelf life when stored in tightly closed containers below 25 C, protected from light and moisture

---

*Chem. Descrip.:* Caprylic/capric triglyceride, stearalkonium bentonite, propylene carbonate

*CAS:* 52622-02-7; $; 108-32-7; EINECS/ELINCS 265-724-3; $; 203-572-1

*Uses:* Consistency regulator, emulsion stabilizer for w/o emulsions, anhyd. formulations, sun care prods., pharmaceuticals (topical, semisolid, ointments, creams)

*Features:* Chemically neutral; heat-stable; oxidation-resist.; environmentally compat.

*Properties:* Greenish hard paste; sol. in ethanol, acetone, diethyl ether; misc. with oils, fats, waxes, w/o emulsifiers; insol. in water; acid no. 0.5 max.; sapon. no. 290-315; 0.5% max. water

*Toxicology:* LD50 (oral, mouse) > 5000 mg/kg; nontoxic; skin compat.; nonirritating to eyes

*Storage:* 3 yrs. shelf life when stored in tightly closed containers below 25 C, protected from light and moisture

---

**Milipol G7** [Undesa http://www.undesa.com; http://www.undesasilica.com]
Trade Name Reference

**S. Black** [http://www.sblack.com]
Chem. Descrip.: **Glyceryl cocoate** with 7 moles of ethylene oxide
CAS 61789-05-7; 75-21-8; EINECS/ELINCS 263-027-9; 200-849-9
Uses: Vehicle for injectable substances; facilitates the incorporation of liposoluble active ingredients
Properties: Yel. visc. liq.; typical odor; sol. in water; dens. ≈ 1.05 g/ml; f.p. ≈ 0 C; flash pt. > 270 C
Toxicology: Nontoxic by ing., inh., or skin contact
Precaution: Wear goggles and gloves; avoid contact with flames and strong oxidants
Hazardous Decomp. Prods.: COx
Storage: Store in original container, @ R.T. closed and protected from damp and heat sources

**Milopol G-7** [Undesa http://www.undesa.com; S. Black http://www.sblack.com]
Chem. Descrip.: **PEG-7 glyceryl cocoate**
CAS 68201-46-7
Uses: Vehicle for injectable substances; facilitates the incorporation of liposoluble active ingredients
Properties: Yel. visc. liq.; typical odor; sol. in water; dens. ≈ 1.05 g/ml; f.p. ≈ 0 C; flash pt. > 270 C
Toxicology: Nontoxic by ing., inh., or skin contact
Environmental: Biodeg.; low toxicity to aquatic life
Precaution: Wear goggles and gloves; avoid contact with flames and strong oxidants
Hazardous Decomp. Prods.: COx
Storage: Store in original container, @ R.T. closed and protected from damp and heat sources

**Mineral Jelly No. 14** [Chemtura http://www.chemtura.com]
Chem. Descrip.: **Petrolatum**
CAS 8009-03-8; EINECS/ELINCS 232-373-2
Uses: Emollient in pharmaceuticals (medicated ointments, suppositories, sun care prods.)
Regulatory: FDA 21CFR §172.880
Properties: Lovibond 1.0Y color; visc. 2.6-5.7 cSt (100 C); m.p. 38-52 C

**Mineral Jelly No. 17** [Chemtura http://www.chemtura.com]
Chem. Descrip.: **Petrolatum**
CAS 8009-03-8; EINECS/ELINCS 232-373-2
Uses: Lubricant, processing aid in pharmaceuticals
Regulatory: FDA 21CFR §172.880
Properties: Lovibond 1.0Y color; visc. 2.6-5.7 cSt (100 C); m.p. 36-49 C

**Mineral Jelly No. 20** [Penreco http://www.penreco.com]
Chem. Descrip.: **Petrolatum**
CAS 8009-03-8; EINECS/ELINCS 232-373-2
Uses: Base in medicated creams and lotions
Regulatory: OSHA and FDA nonhazardous
Properties: Lovibond 0.5Y color; odorless; tasteless; misc. with cosmetic ingred. used in oil-base formulations; visc. 37-40 SUS (210 F); m.p. (Saybolt) 111-116 F; pour pt. 110-120 F

**MingQiong Brand** [Fujian Sanming]
Chem. Descrip.: **Agar**
CAS 9002-18-0; EINECS/ELINCS 232-658-1
Uses: Ointment base, tablet binder in pharmaceuticals
Properties: ≤ 15% moisture; ≤ 5% ash
Storage: Keep dry; store @ 18-25 C

**Miranol® C2M Conc. NP** [Rhodia HPCII http://www.rhodia-hpcii.com; Rhodia HPCII France http://www.hpcii.rhodia.com; C.P. Hall http://www.cphall.com]
Chem. Descrip.: **Disodium cocoamphodiacetate**
CAS 68650-39-5; EINECS/ELINCS 272-043-5
Uses: Emulsifier, solubilizer, and stabilizer in pharmaceuticals
Properties: Clear, visc. liq.; sol. in water; pH 8.0-8.5 (20% aq.); amphoteric; 38% act.
Trade Name Reference

Chem. Descrip.: Disodium cocoamphodipropionate
CAS 68604-71-7
Uses: Detergent used for nonirritating shampoos, medicated cosmetics
Properties: Paste at R.T., pumps and pours at 50 C; pH 9-10 (10% aq.); amphoteric; 70% act.

Chem. Descrip.: Disodium cocoamphodipropionate
Chem. Analysis: Methanol 2-5%; sodium chloride 0.02% max.
CAS 68604-71-7
Uses: Coupling agent, solubilizer, wetting agent
Features: Compat. with cationic, anionic, nonionic derivatives; exc. foam quality; reduces irritation in combination with anionic surfactants
Properties: Amber cl. liq., fruity odor; sol. in water, alcohol, polar solvs.; insol. in nonpolar solvs.; sp.gr. 1.07; f.p. < 0 C; b.p. 98 C; flash pt. 144 F; pH 9.4-9.8; amphoteric; 39% act.
Toxicology: Minimally irritating to skin and eyes; LD50 (oral, mouse) > 5 ml/kg
Environmental: Biodeg.
Storage: 730 days

Miranol® JBS [Rhodia HPCII http://www.rhodia-hpcii.com; Rhodia HPCII France http://www.hpcii.rhodia.com]
Chem. Descrip.: Disodium capryloamphodipropionate
CAS 68815-55-4
Uses: Low foaming surfactant for medicated shampoos and skin cleansers
Properties: Liq.; amphoteric; 38% conc.

Mira-Sperse® 626 [Tate & Lyle UK http://www.tateandlyle.com]
Chem. Descrip.: Food starch modified, derived from waxy maize See Food starch, modified
Uses: Carrier and viscosity control agent in pharmaceutical creams, lotions, and ointments
Features: Cold water swelling starch; exc. flow props.
Regulatory: FDA 21CFR §172.892
Properties: Agglomerated powd., good odor/flavor; 20% on 30 mesh, 30% through 120 mesh; bulk dens. 11-16 lb/ft³; pH 5-7; 6-8.5% moisture

Mira-Thik® 468 [Tate & Lyle UK http://www.tateandlyle.com]
Chem. Descrip.: Food starch modified, derived from dent corn starch See Food starch, modified
Uses: Viscosity control agent in creams, lotions, and ointments
Features: Cold water hydrating starch; provides superior smoothness, syneresis control, freeze/thaw resist.
Regulatory: FDA 21CFR §172.892
Properties: Wh. free-flowing powd., good odor/flavor; 0.5% on 60 mesh, 98% through 100 mesh; bulk dens. 30 lb/ft³; pH 6.0; 5% moisture

Mira-Thik® 469 [Tate & Lyle UK http://www.tateandlyle.com]
Chem. Descrip.: modified food starch from dent corn starch See Food starch, modified
Uses: Viscosity control agent in pharmaceuticals
Features: Cold water hydrating starch; improves texture, mouthfeel; exc. freeze/thaw stability
Regulatory: FDA 21CFR §172.892
Properties: Wh. free-flowing powd., good odor/flavor; 0.5% on 60 mesh, 98% through 100 mesh; bulk dens. 30 lb/ft³; pH 6.0; 5% moisture

Mira-Thik® 470 [Tate & Lyle UK http://www.tateandlyle.com]
Chem. Descrip.: Food starch modified, derived from waxy maize See Food starch, modified
Uses: Visc. control agent in pharmaceuticals

Mira-Thik® 606 [Tate & Lyle UK http://www.tateandlyle.com]
Chem. Descrip.: Food starch modified, derived from waxy maize See Food starch, modified
Features: Cold water swelling starch; exc. flow props.
Regulatory: FDA 21CFR §172.892
Trade Name Reference

Uses: Viscosity control agent in creams, lotions, and ointments
Features: Instant starch; exc. freeze/thaw stability
Regulatory: FDA 21CFR §172.892
Properties: Wh. free-flowing powd., good odor/flavor; 0.5% on 60 mesh, 98% through 100 mesh; bulk dens. 33 lb/ft³ (loose); pH 6.0; 7% moisture

Mira-Thik® 609 [Tate & Lyle UK http://www.tateandlyle.com]
Chem. Descrip.: Modified food starch See Food starch, modified
Uses: Viscosity control agent in creams, lotions, and ointments

Chem. Descrip.: Myristic acid
CAS 544-63-8; EINECS/ELINCS 208-875-2
Uses: Emulsifier in pharmaceuticals
Environmental: Biodeg. (28 d) > 90%
Precaution: Wear gloves, goggles, overall skin protection; avoid entry to sewers, drain and surface water
Storage: Store @ R.T. in original sealed container protected from heat sources

Chem. Descrip.: Isotridecyl diester
Uses: Solubilizer, vehicle for medicines; excipient for injectable substances; emollient in antiperspirants
Features: Changes skin feel, rub out props. and greasiness; veg. oil substitute; vaseline substitute

Chem. Descrip.: Isodecyl stearate
CAS 31565-38-5; EINECS/ELINCS 250-703-3
Uses: Solubilizer, vehicle for medicines; excipient for injectable substances; emollient in antiperspirants
Features: Changes skin feel, rub out props. and greasiness; veg. oil substitute; vaseline substitute

Chem. Descrip.: Mono-di glycerine C16-C18 fatty acids mixture
Uses: Vehicle for injectable substances; facilitates the incorporation of liposoluble active ingredients
Properties: Yel. visc. liq.; typical odor; insol. in water; sol. in fats, vegetable and mineral oils; dens. ≈ 0.92 g/ml; f.p. 10 C; flash pt. > 190 C
Toxicology: Nontoxic by ing., inh., or skin contact
Precaution: Wear goggles and gloves; avoid contact with flames

Chem. Descrip.: 2-Ethylhexyl palmitate See Octyl palmitate
CAS 29806-73-3; EINECS/ELINCS 249-862-1
Uses: Solubilizer, vehicle for medicines; excipient for injectable substances; emollient in antiperspirants
Features: Changes skin feel, rub out props. and greasiness; veg. oil substitute; vaseline substitute
Properties: Yel. liq.; typical odor; insol. in water; sol. in waxes, vegetable and mineral oils; dens. ≈ 0.86; f.p. ≈ 5 C.; b.p. ≈ 225; flash pt. ≈ 190 C
Toxicology: Nontoxic by inh., contact, ing.
Environmental: Biodeg.; keep out of sewers, drains, surface and underground water; considered to be of low toxicity for aquatic life
Precaution: Wear glove, goggles, overalls; avoid contact with flames; incompat. with strong oxidants

Chem. Descrip.: Isotridecyl alcohol ester
Uses: Solubilizer, vehicle for medicines; excipient for injectable substances; emollient in antiperspirants
Features: Changes skin feel, rub out props. and greasiness; veg. oil substitute; vaseline substitute
Trade Name Reference

Chem. Descrip.:  2-Ethylhexyl tallowate
Uses:  Solubilizer, vehicle for medicines; excipient for injectable substances; emollient in antiperspirants
Features:  Changes skin feel, rub out props. and greasiness; veg. oil substitute; vaseline substitute
Properties:  Yel. liq.; typical odor; insol. in water; sol. in waxes, vegetable and mineral oils; dens. ≈ 0.86; f.p. ≈ 5 C.; b.p. ≈ 225; flash pt. ≈ 190 C
Toxicology:  Nontoxic by inh., contact, ing.
Environmental:  Biodeg.; keep out of sewers, drains, surface and underground water; considered to be of low toxicity for aquatic life
Precaution:  Wear glove, goggles, overalls; avoid contact with flames; incompat. with strong oxidants
Hazardous Decomp. Prods.:  CO, CO2
Storage:  Store in original, closed container @ R.T.; protect from dampness, heat sources

Chem. Descrip.:  Isotridecyl diester
Uses:  Solubilizer, vehicle for medicines; excipient for injectable substances; emollient in antiperspirants
Features:  Changes skin feel, rub out props. and greasiness; veg. oil substitute; vaseline substitute

Chem. Descrip.:  Isotridecyl alcohol ester
Uses:  Solubilizer, vehicle for medicines; excipient for injectable substances; emollient in antiperspirants
Features:  Changes skin feel, rub out props. and greasiness; veg. oil substitute; vaseline substitute

Chem. Descrip.:  Isotridecyl ester
Uses:  Solubilizer, vehicle for medicines; excipient for injectable substances; emollient in antiperspirants
Features:  Changes skin feel, rub out props. and greasiness; veg. oil substitute; vaseline substitute

Chem. Descrip.:  Isotridecyl stearate
CAS 31565-37-4; EINECS/ELINCS 250-703-3
Uses:  Solubilizer, vehicle for medicines; excipient for injectable substances; emollient in antiperspirants
Features:  Changes skin feel, rub out props. and greasiness; veg. oil substitute; vaseline substitute

Chem. Descrip.:  2-Ethylhexyl stearate  See Octyl stearate
CAS 22047-49-0; EINECS/ELINCS 244-754-0
Uses:  Solubilizer, vehicle for medicines; excipient for injectable substances; emollient in antiperspirants
Features:  Changes skin feel, rub out props. and greasiness; veg. oil substitute; vaseline substitute
Properties:  Yel. liq.; typical odor; disp. in water; sol. in fat; dens. 0.98; f.p. 4 C max.; b.p. ≈ 225; flash pt. ≈ 190 C
Toxicology:  Nontoxic by inh., contact, ing.
Environmental:  Biodeg.; keep out of sewers, drains, surface and underground water; considered to be of low toxicity for aquatic life
Precaution:  Wear glove, goggles, overalls; avoid contact with flames; incompat. with strong oxidants
Hazardous Decomp. Prods.:  CO, CO2
Storage:  Store in original, closed container @ R.T.; protect from dampness, heat sources

Chem. Descrip.:  PEG-200 monooleate  See PEG-200 oleate
CAS 9004-96-0
Uses:  O/w emulsifier, thickener, antifoam, dispersant, base for pharmaceuticals
Properties:  Yel. liq.; typical odor; disp. in water; sol. in fat; dens. 0.98; f.p. 4 C max.; flash pt. > 200 C; nonionic
Environmental:  Biodeg.; keep out of sewers, drains, surface and underground water;

**Uses:** Emulsifier for pharmaceuticals

**Properties:** Lt. yel. liq.; sp.gr. 1.0; visc. 375-475 cps.; acid no. 2.2 max.; flash pt. 318 C; pH 5-7; HLB 15.0; nonionic; 3% max. moisture

**Monopol TWS-1030** [Dongnam Chem. Ind. Ltd http://www.dongnamchem.com]

Chem. Descrip.: POE (20) sorbitan monostearate See Polysorbate 60

CAS 9005-67-8

**Uses:** O/w emulsifier for pharmaceuticals

**Properties:** Lt. yel. solid; sol. in water, isopropyl alcohol, methanol, ethanol, ethylene glycol, and cottonseed oil; insol. in min. oil; acid no. 2.2 max.; pH 5-7; HLB 14.9; nonionic; 3% max. moisture

Chem. Descrip.: Propylene glycol monostearate See Propylene glycol stearate

CAS 1323-39-3; EINECS/ELINCS 215-354-3

**Uses:** Thickener, consistency agent, gellant, emulsifier, stabilizer for pharmaceutical ointments, creams, lotions, emulsions; excipient, thickener, vehicle for dermal and oral dosage forms

**Features:** Produces softer creams with lighter feel than Hydrine

**Regulatory:** EP, JSFA compliance

**Properties:** Gardner < 3 waxy solid, faint odor; drop pt. 33-36 C; HLB 4.0; acid no. < 6; iodine no. < 3; sapon. no. 165-175; nonionic; 100% conc.
Trade Name Reference

**Montane® 20** [Seppic http://www.seppic.com]
Chem. Descrip.: Sorbitan laurate
CAS 1338-39-2; EINECS/ELINCS 215-663-3
Uses: Emulsifier for pharmaceuticals (ointments, suppositories)
Regulatory: FCC, BP compliance
Properties: Liq., faint odor; sol. in ethanol; disp. in water, min. and veg. oils; visc. 4500 mPa•s; HLB 8.6; acid no. 6 max.; sapon. no. 158-170; hyd. no. 330-358; pH 7; nonionic; 100% conc.
Toxicology: Nonirritating to skin and eyes
Environmental: Biodeg.

**Montane® 40** [Seppic http://www.seppic.com]
Chem. Descrip.: Sorbitan palmitate
CAS 26266-57-9; EINECS/ELINCS 247-568-8
Uses: O/w emulsifier for pharmaceuticals (ointments, suppositories)
Regulatory: Approved for food use in U.S. and some European countries
Properties: Flakes, faint odor; sol. hot in ethanol, with turbidity in min. and veg. oils; gels in water; m.p. 49 C; HLB 6.7; acid no. 5 max.; sapon. no. 140-150; hyd. no. 275-305; pH 7; nonionic; 100% conc.
Toxicology: Nonirritating to skin and eyes
Environmental: Biodeg.

**Montane® 60** [Seppic http://www.seppic.com]
Chem. Descrip.: Sorbitan stearate
CAS 1338-41-6; EINECS/ELINCS 215-664-9
Uses: O/w emulsifier for pharmaceuticals (ointments, suppositories)
Regulatory: FCC, BP compliance; approved for food use in U.S. and some European countries
Properties: Flakes, faint odor; sol. hot in ethanol, veg. oil, turbid in min. oil; insol. in water; m.p. 55 C; HLB 4.7; acid no. 5-10; sapon. no. 147-157; hyd. no. 235-260; pH 7; nonionic; 100% conc.
Toxicology: Nonirritating to eyes, mildly irritating to skin
Environmental: Biodeg.

**Montane® 80VG** [Seppic http://www.seppic.com]
Chem. Descrip.: Sorbitan oleate
CAS 8007-43-0; EINECS/ELINCS 232-360-1
Uses: W/o emulsifier for pharmaceuticals (ointments, suppositories), esp. absorption bases of lipophilic ointments or for w/o emulsions
Regulatory: FCC, BP compliance
Properties: Liq., faint odor; sol. in ethanol, min. and veg. oils; insol. in water; visc. 1000 mPa•s; HLB 4.3; acid no. 6 max.; iodine no. 62-76; sapon. no. 145-160; hyd. no. 193-209; pH 7; nonionic; 100% conc.
Toxicology: Nonirritating to skin and eyes
Environmental: Biodeg.

**Montane® 83VG** [Seppic http://www.seppic.com]
Chem. Descrip.: Sorbitan sesquioleate
Uses: W/o emulsifier for pharmaceuticals (ointments, suppositories), esp. absorption bases of lipophilic ointments
Properties: Liq., faint odor; sol. in ethanol, min. and veg. oils; insol. in water; visc. 10,000 mPa•s; HLB 3.7; acid no. 6 max.; iodine no. 68-76; sapon. no. 150-166; hyd. no. 180-205; pH 7; nonionic; 100% conc.
Toxicology: Nonirritating to eyes
Environmental: Biodeg.

**Montane® 481VG** [Seppic http://www.seppic.com]
Chem. Descrip.: Sorbitan oleate, beeswax, and stearic acid
Uses: W/o emulsifier for pharmaceuticals (ointments, suppositories)
Features: Able to emulsify formulations with a low oily phase content.
Properties: Soft waxy paste; sol. (hot, hazy) in min. oil; disp. in ethanol; insol. in water; m.p. 50-60 C; HLB 4.5; acid no. 14-22; sapon. no. 148-163; hyd. no. 136-170; nonionic; 100% act.
Toxicology: LD50 (oral, rat) > 10 g/kg; nonirritating to skin and eyes
Environmental: Biodeg.

Handbook of Pharmaceutical Additives, Third Edition 461
**Moon™ Kosher Glycerine USP NK** [Procter & Gamble http://pgchemicals.com]

Chem. Descrip.: Glycerin USP (99-100%)

Chem. Analysis: 0.3% max. moisture

CAS 56-81-5; EINECS/ELINCS 200-289-5

Uses: Emulsifier, emollient, plasticizer, humectant, sweetener in drugs; intermediate for making glycerol derivatives

Regulatory: USP, kosher, DOT/ADR/RID/IMDG/ICAO/IATA not regulated; Canada DSL; Japan; Australia; Philippines; China; Korea

Properties: APHA 20 max. cl. visc. liq.; bland odor; sweet taste; complete sol. in water; misc. in ethanol; sl. sol. in acetone; insol. in ether, chloroform; relative dens. 1.262; visc. $\approx 1300$ mPa•s; vapor pressure < 0.008 mm Hg; m.p. $\approx 18$ C; b.p. > 288 C; flash pt. (PMCC) > 198.9 C; auto-ignition temp. $\approx 400$ C; 99-101% assay

Toxicology: LD50 (oral, rat) > 2 g/kg; may cause mild, transient eye irritation; TSCA listed

Environmental: LC50 (goldfish, 24 h) > 5 g/l; LC0 (golden orfe, 48 h) > 250 mg/l; LC100 (rainbow trout, 96 h) 51-57 g/l; NOEC (chilomonas paramecium, 48 h) > 10 g/l, (entosiphon sulcatum, 72 h) 3200 mg/l; biodeg.

Precaution: Incompat. with strong oxidizers, strong acids

**MOPS** [Raschig]

Chem. Descrip.: 3-(N-Morpholino)-propane sulfonic acid

CAS 1132-61-2; EINECS/ELINCS 214-478-5

Uses: Biological buffer for cell cultures, biological productions, electrophoresis, diagnostics, tissue studies, blotting techniques, chromatography

**MOPS-Na** [Raschig AG http://www.raschig.de]

Chem. Descrip.: 3-Morpholino propanesulfonic acid, sodium salt See Sodium 3-morpholino propane sulfonate

CAS 71119-22-7

Uses: Biological buffer for cell cultures, biological productions, electrophoresis, diagnostics, tissue studies, blotting techniques, chromatography

**Multiwax® 180-W** [Chemtura http://www.chemtura.com]

Chem. Descrip.: Microcrystalline wax NF (100%), 2,6-di-t-butyl-p-cresol (< 10 ppm)

See BHT

CAS 63231-60-7; 128-37-0; EINECS/ELINCS 264-038-1

UN 3257

Uses: Wax base, lubricant, protectant, antioxidant, carrier, corrosion inhibitor, gloss aid in pharmaceuticals; carrier for pigments and medication

Regulatory: FDA §172.886, 178.3710; SARA §311/312 nonreportable; Canada DSL, EINECS, Australia AICS, Japan ENCS listed

Properties: Wh. waxy solid; odorless; tasteless; sol. in org. solvs.; misc. with petrol. prods., many essential oils, most animal and veg. fats, oils, and waxes; insol. in water; sp.gr. < 1; visc. 14.3-18.0 cSt (99 C); vapor pressure < 0.005 hPa; m.p. 54-102 C; flash pt. (COC) > 210 C

Toxicology: Ing. unlikely to have toxic effects, but may act as intestinal lubricant and result in diarrhea; inh. of vapor/mist may be harmful; aspiration may cause pulmonary edema or aspiration pneumonia; oil deposits in lungs may lead to fibrosis; prolonged/repeated inh. of excessive amts. of oil mist/vapors may cause respiratory tract irritation; when molten, may cause thermal burns; TSCA listed

Environmental: Stable in water; can be mechanically separated from water; not expected to be acutely toxic to aquatic organisms; prevent entry to sewers, drains
Multiwax® ML-445 [Chemtura 
http://www.chemtura.com]
Chem. Descrip.: Microcrystalline wax NF
(100%), 2.6-di-t-butyl-p-cresol (< 10 ppm)
See BHT
CAS 63231-60-7; EINECS/ELINCS 264-038-1
UN 3257
Uses: Wax base, lubricant, protectant, antioxidant, antitackifier, carrier, corrosion inhibitor, gloss aid in pharmaceuticals, medicated creams and unguents, dental waxes; carrier for pigments and medication
Regulatory: FDA §172.886, 178.3710
Properties: Lt. yel. to wh. wax; odorless; tasteless; misc. with petrol. prods., many essential oils, most animal and veg. fats, oils, and waxes; sp.gr. < 1; visc. 14.3-18.0 cSt (99 C); m.p.77-82 C; flash pt. (COC) 274 C min.; 100% act.
Precaution: Incompat. with strong oxidizers such as hydrogen peroxide, bromine, and chromic acid; use heat protective impervious gloves when handling molten product; use chemical safety goggles and, if handling hot, full face shield
Hazardous Decomp. Prods.: CO, CO2
NFPA: Health 0, Flammability 1, Reactivity 0
Storage: Keep away from heat, flame and strong oxidizing agents; storage temp. < 93 C

Myacide® Pharma® BP [BASF MicroCheck 
http://www.basfbiocides.com]
Chem. Descrip.: 2-Bromo-2-nitropropane-1,3-diol
CAS 52-51-7; EINECS/ELINCS 200-143-0
UN 3241
Uses: Antibacterial preservative for pharmaceuticals, ophthalmic preps., medicated creams and lotions, anti-acne preps., antacid preps., toothpaste, oral prods., hypoallergenic prods.; wound irrigant sol’n. (Japan)
Features: Long-term preservative
Regulatory: FDA 21CFR §175.105, 176.300; BP, EU compliance; registered in France, Germany, India, Australia, Canada, Japan; food contact approved in U.S., France, Germany
Trade Name Reference

Properties: Wh. or almost wh. cryst. powd.; faint char. odor; sol. in water, alcohol, glycols, and polyols; m.w. 200; dens. 1.1 g/cm³; m.p. 130 C; pH 5-7 (1%, 20 C); 99% min. purity
Use Level: 200 ppm (pharmaceutical applcs.)

Toxicology: LD50 (oral, male rat) 307 mg/kg, (derma, rat) 1600 mg/kg; conc. sol’ns. are irritating to skin, eyes, respiratory system, harmful if swallowed; nonirritating to skin @ 0.01-0.1%; noncarcinogenic

Environmental: Rapidly biodeg.; EC50 (daphnia magna, 48 h) 1.4 ppm; LC50 (rainbow trout, 96 h) 41.2 ppm; very toxic to aquatic organisms

Precaution: Corrosive to metals (esp. aluminum) when wet; avoid temps. > 90 C to prevent risk of self-heating and rapid decomp.; decomp. temp. is lowered in presence of bases (esp. sodium hydroxide)

Hazardous Decomp. Prods.: Hydrogen bromide and NOx

Storage: 5 yr. min. stability under good storage conditions; store in original container tightly closed

Chem. Descrip.: 2,4-Dichlorobenzyl alcohol

See Dichlorobenzyl alcohol

CAS 1777-82-8; EINECS/ELINCS 217-210-5

Uses: Antifungal agent, preservative for pharmaceuticals

Features: Rec. for areas where contamination by spoilage yeast and molds is the problem; stable at pH 3-10 and to 100 C

Regulatory: SARA §311/312 Acute

Properties: Wh. to sl. yel. crystal; mild char. odor; sol. (g/100 ml): sol. 95 g in acetone, 80 g in methanol, 45 g in propylene glycol, 0.1 g in water; m.w. 177; m.p. 57-60 C; b.p. 150 C; flash pt. > 230 C; 98.5% min. act.

Toxicology: LD50 (oral, rat) > 3000 mg/kg, (oral, mouse) 2300 mg/kg, (subcutaneous, mouse) 1770 mg/kg

Environmental: LD50 (mallard duck) > 2150 mg/kg; LC50 (rainbow trout, 48h) 14.4 mg/L, (daphnia magna, 24h) 22.0 mg/L; max NOEL 3.2 ppm for 96h

Precaution: Use in well-ventilated area; wear dust mask and goggles or full-face respirator with dust filter when dust is present; use gloves; may be irritating to eyes, skin, upper respiratory tract; incompat. with oxidizing agents

Hazardous Ingredients: 2,4-Dichlorobenzyl alcohol (> 99%)

Hazardous Decomp. Prods.: Hydrogen chloride

HMIS: Health 1, Flammability 1

Chem. Descrip.: Diethylene glycol oleate

See PEG-2 olate

CAS 106-12-7; EINECS/ELINCS 203-364-0

Uses: Lipophilic w/o or o/w emulsifier for ointments

Regulatory: JSCI listed

Properties: Pale yel. liq.; HLB 4.5; nonionic; 100% conc.

Toxicology: TSCA listed

Chem. Descrip.: PEG-6 oleate

CAS 9004-96-0

Uses: W/o or o/w emulsifier for ointments

Regulatory: JSCI listed

Properties: Pale yel. liq.; HLB 8.5; nonionic; 100% conc.

Toxicology: TSCA listed

Myritol® 312 [Cognis/Care Chems.]

Chem. Descrip.: Caprylic/capric triglyceride

CAS 73398-61-5; EINECS/ELINCS 265-724-3

Uses: Spreading agent, fatting agent for pharmaceutical skin care preps., w/o and o/w emulsions

Features: Med. fatting oil component

Regulatory: JCIC, DAB, BP compliance

Properties: Sl. ylsh. cl. oil, odorless; m.w. 500; dens. 0.943-0.950 g/cm³ (20 C); visc. 28-32 mPa•s (20 C); acid no. 0.1 max.; iodine no. 0.5 max.; sapon. no. 330-340; hyd. no. 5 max.; cloud pt. < -5 C; ref. index 1.448-1.450 (20 C)

Storage: 1 yr. storage stability in orig. unopened container at temps. below 30 C, protected from moisture

Myritol® 318 [Cognis/Care Chems.]

Chem. Descrip.: Caprylic/capric triglyceride

CAS 73398-61-5; EINECS/ELINCS 265-724-3

Uses: Spreading agent, emollient, solvent, solubilizer for pharmaceutical skin care emulsions

Features: Exc. oxidative stability; compressibility; oily component with solv. capacity

Regulatory: JCIC, DAB compliance
Trade Name Reference

Myritol® 331 [Cognis/Care Chems.]
Chem. Descrip.: Cocoglycerides
CAS 68606-18-8
Uses: Emollient for sunscreen and skin care prod.; exhibits high solvency for crystalline sunscreens; inc. absorptive capacity of UV filters; readily emulsifiable; medium spreading coefficient; exc. dermatological compat.
Properties: Lt. yel. cl. oil; sl. inherent odor; m.w. 580; dens. 0.930-0.940; visc. 45 mPa•s; acid no. 0-2; iodine no. 8 max.; sapon. no. 265-295; hyd. no. 45 max.; cloud pt. < 5 C; ref. index 1.4400-1.4600
Storage: Store in sealed containers @ < 30 C

Myritol® PC [Cognis/Care Chems.]
Chem. Descrip.: Propylene glycol dicaprylate/dicaprate
CAS 68583-51-7; EINECS/ELINCS 271-516-3
Uses: Emollient, spreading agent, cosolvent for pharmaceuticals, skin care preps., aerosols, antiperspirants; solvent for active ingreds.
Features: Stable
Regulatory: DAB, JCIC compliance
Properties: Wh. cream-colored soft waxy solid; sol. in water, acetone, ether, 2-ethoxyethanol, CCl₄; methanol, ethanol, ethyl acetate; insol. in cottonseed oil, min. oil, propylene glycol; sp. gr. 1.1; vapor pressure negligible; pour pt. 38 C; HLB 16.0; nonionic; 100% conc.
Storage: Store in original containers

Chem. Descrip.: PEG-20 stearate
CAS 9004-99-3
Uses: O/w emulsifier for topical pharmaceuticals
Regulatory: SARA §311/312 nonreportable
Properties: Wh. cream pellets; sol. in isopropanol, methanol, ethanol; insol. in mineral oil, cottonseed oil, propylene glycol; f.p. ≈ 38 C; pour pt. >28 C; HLB 15.0; flash pt. > 149 C; pH 5 (10% aq. sol’n.); nonionic; 100% conc.
Toxicology: OSHA PEL 15 mg/m³
Environmental: Low toxicity to aquatic life
Precaution: Avoid strong oxidizing agents
Hazardous Decomp. Prods.: COₓ
HMIS: Health 0, Flammability 1, Reactivity 0
Storage: Store in original containers; bulk storage vessels should be adequately grounded

Chem. Descrip.: PEG-30 stearate
CAS 9004-99-3
Uses: O/w emulsifier for pharmaceuticals
Regulatory: Canada, Australia, EU, USA, Japan, China, Korea, Philippines compliant
Properties: Wh. cream solid; HLB 16.0; nonionic; 100% conc.
Toxicology: LD₅₀ (oral, rat) > 34.8 g/kg
Environmental: Substantially biodeg. in water; LC₅₀ (96 h, static, rainbow trout) 93 mg/l
Precaution: Wear safety glasses with side shields and NR gloves; avoid strong oxidizing agents
Storage: Store in original containers

Myrj® 52 Flake [Uniqema http://www.uniqema.com]
Chem. Descrip.: PEG-40 stearate
CAS 9004-99-3
Uses: Surfactant for pharmaceuticals
Regulatory: Canada, Australia, EU, USA, Japan, China, Korea, Philippines compliant
Properties: Wh.-cream waxy flakes; bland odor; sol. in water, acetone, ether, 2-ethoxyethanol, CCl₄; methanol, ethanol, ethyl acetate; insol. in cottonseed oil, min. oil, propylene glycol; sp. gr. 1.1; vapor pressure negligible; pour pt. 38 C; HLB 16.9; flash pt. > 149 C; nonionic
Toxicology: LD₅₀ (oral, rat) > 34.8 g/kg
Environmental: Substantially biodeg. in water; LC₅₀ (96 h, static, rainbow trout) 93 mg/l
Precaution: Wear safety glasses with side shields and NR gloves; avoid strong oxidizing agents
Storage: Store in original containers

Chem. Descrip.: PEG-40 stearate NF

### Nafol® 10 D

**Chemical Description:** C10 alcohol (90% C10, 10% C8) See Decyl alcohol

**Uses:** Raw material for pharmaceutical creams and lotions

**Properties:** Hazen 10 max. color; m.w. 155-162; sp.gr. 0.829 (20/4 C); solid. pt. 3 C; b.p. 215-240 C; acid no. 0.05 max.; iodine no. 0.2 max.; hyd. no. 345-365; flash pt. 95 C; 99% min. act.

### Nafol® 20+

**Chemical Description:** C20-24 alcohol (50% C20, 29% C22, 14% C24) See C20-24 alcohols

**Uses:** Raw material for pharmaceutical creams and lotions

**Properties:** Hazen 1800 max. color; sp.gr. 0.804 (80 C); solid. pt. 53-58 C; acid no. 1.0 max.; iodine no. 20 max.; hyd. no. 130-150; flash pt. 210 C; 80% act.

### Nafol® 810 D

**Chemical Description:** C8-10 alcohol (43% C8, 55% C10) See C8-10 alcohols

**Uses:** Raw material for pharmaceutical creams and lotions

**Properties:** Hazen 10 max. color; m.w. 143-148; sp.gr. 0.827 (20/4 C); b.p. 195-240 C; acid no. 0.05 max.; iodine no. 0.15 max.; hyd. no. 380-390; pour pt. 11 C; flash pt. 85 C; 99% min. act.

### Nafol® 1012

**Chemical Description:** C10-14 alcohol (= 85% C10, (≈ 8.5% C12, (≈ 6.5% C14) See C10-14 alcohols

**Uses:** Raw material for pharmaceutical creams and lotions

**Properties:** Hazen 10 max. color; m.w. 160-168; sp.gr. 0.830 (20/4 C); solid. pt. -2 to 2 C; b.p. 220-285 C; acid no. 0.03 max.; iodine no. 0.1 max.; hyd. no. 335-350; flash pt. 105 C; 99% min. act.

### Nafol® 1218 [Sasol N. Am.](http://www.sasolnorthamerica.com)

**Chemical Description:** C12-18 alcohol (40% C12, 30% C14, 18% C16, 10% C18) See C12-18 alcohols

**Uses:** Raw material for pharmaceutical creams and lotions

**Properties:** Hazen 30 max. color; m.w. 204-216; sp.gr. 0.823 (40/4 C); solid. pt. 25-28 C; b.p. 270-335 C; acid no. 0.1 max.; iodine no. 0.4 max.; hyd. no. 260-275; flash pt. 145 C; 98.5% min. act.

### Nafol® 1618 H [Sasol Germany](http://www.sasol.com; http://www.sasololefinssurfactants.com)

**Chemical Description:** Ceteryl alcohol

**Uses:** Raw material for pharmaceutical creams and lotions

**Properties:** Colorless solid; char. odor; sl. sol. in water; sp.gr. 0.804 (80 C); visc. 6.8 mPa•s (80 C); vapor pressure < 1.00 mbar; m.p. 58 C; solid. pt. 61 C; flash pt. 202 C

**Toxicology:** LD50 (oral, rat) > 2000 mg/kg

**Environmental:** Biodeg.; do not allow to enter soil, waterways, or wastewater

**Precaution:** Incompat. with oxidizing agents

**Hazardous Decomp. Prods.:** CO, CO2

**Storage:** Store in cool place away from sources of ignition

**Chemical Description:** 1-Octadecanol, 1-eicosanol, and 1-docosanol See Arachidyl alcohol; Behenyl alcohol; Stearyl alcohol

**Uses:** Raw material for pharmaceutical creams and lotions

**Properties:** Colorless solid; char. odor; sl. sol. in water; sp.gr. 0.804 (80 C); visc. 6.8 mPa•s (80 C); vapor pressure < 1.00 mbar; m.p. 58 C; solid. pt. 61 C; flash pt. 202 C

**Toxicology:** LD50 (oral, rat) > 2000 mg/kg

**Environmental:** Biodeg.; do not allow to enter soil, waterways, or wastewater

**Precaution:** Incompat. with oxidizing agents

**Hazardous Decomp. Prods.:** CO, CO2

**Storage:** Store in cool place away from sources of ignition

Hazardous Decomp. Prods.: CO, CO2
Storage: Store in cool place away from sources of ignition

Uses: Raw material for pharmaceutical creams and lotions
Properties: Colorless solid; char. odor; sl. sol. in water; sp.gr. 0.804 (80 C); visc. 6.8 mPa•s (80 C); vapor pressure < 1.00 mbar; m.p. 58 C; solid. pt. 61 C; flash pt. 202 C
Toxicology: LD50 (oral, rat) > 2000 mg/kg
Environmental: Biodeg.; do not allow to enter soil, waterways, or wastewater
Precaution: Incompat. with oxidizing agents
Hazardous Decomp. Prods.: CO, CO2
Storage: Store in cool place away from sources of ignition

Uses: Sunscreen delivery system for solar creams, gels antiaging cosmetic prods.
Features: Preservative-free
Properties: Opalescent sl. colored visc. liq.; misc. with ethylc alcohol and oils
Toxicology: LD0 (mice) > 20 ml/kg; nonirritating to skin, eyes

Uses: Pharmaceutical tablet binder, disintegrant
Features: Produces tablets that are harder and more resistant to 'capping'
Properties: Wh. to off-wh. powd.; pH 4.5-7.0; 14% max. moisture
Use Level: < 2% (tablet disintegrant)

Uses: Transparent gel containing empty liposomes ready to be loaded with actives, for dermatology; improves skin humidity and penetration
Properties: Transparent yel.-brn. semisolid vesicular gel, ethanolic odor; miscible with water; sp.gr. 1.0 g/ml; visc. 5000±2000 mPa•s (20 C); flash pt. 27.8 C; pH 6.5±1.5; 16% ethanol
Use Level: 10%
Toxicology: Harmless to eyes; nonirritating to skin; noncarcinogenic
Environmental: Biodeg.; no negative ecological reactions expected
Precaution: Flammable; vapors may cause explosive mixture; avoid oxidizers; avoid contact with eyes and prolonged contact with skin
Hazardous Decomp. Prods.: None
Storage: Store in clean, cool, dry place @ 10-25 C; protect from direct sunlight and warming

Uses: Lubricant, film-former in pharmaceuticals
Features: Forms protective film when exposed to air; sulfur-free
Regulatory: FDA 21CFR §176.170, 176.200, 176.210, 177.1200, 1778.3910, etc.; USP compliant
Properties: Pale yel. tenacious, unctuous mass; faint char. odor; sol. in IPM, ethyl acetate; sl. sol. in min. oil, propylene glycol laurate; insol. in castor oil, glycerin, propylene glycol, acetone, ethanol, water; sp.gr. 0.94-0.97 (15 C); m.p. 38-44 C; iodine no. (Hanus) 18-36; flash pt. (OC) 455 F; 100% NV; 0.25% max. water
Toxicology: No known effects from overexposure
Trade Name Reference

Natralube™ 120 [Fanning
http://www.fanncorp.com]  
Chem. Descrip.: Natural lanolin wax ester, USP  
CAS 68201-49-0; EINECS/ELINCS 269-220-4  
Uses: Water repellent, humectant, conditioner, corrosion inhibitor, emollient, lubricant for pharmaceuticals  
Features: Stable  
Properties: Lt. yel. wax; sl. odor; insol. in water; sp.gr. 0.96; vapor pressure none; m.p. 48-52 C; b.p. 35 C; iodine no. 36 max.; sapon. no. 90-110; hyd. no. 35 max.; flash pt. (OC) 560 F; COF 0.0461; nonionic; 0.56% free fatty acids  
Toxicology: No known effects from overexposure  
Precaution: Incompat. with strong oxidizing agents  
Storage: Store in cool, dry area in tightly sealed containers away from excessive heat and moisture

Natrosol® 250 H [Hercules/Aqualon
http://www.aqualon.com]  
Chem. Descrip.: Hydroxyethylcellulose NF  
CAS 9004-62-0  
Uses: Thickener, protective colloid, binder, stabilizer, suspending agent for pharmaceuticals  
Features: High visc. grade  
Regulatory: FDA 21CFR §175.105, 175.300, 176.170, 176.180, 177.1210, 182.99; EPA 40CFR §180.1001(c); DOT nonregulated; SARA §302/304/313 nonreportable, §311/312 fire hazard  
Properties: Wh. to lt. tan powd.; 0.5% max. on 60 mesh; char. odor; sol. in water and polyols; sp.gr. 0.6; dens. 11.5 lb/gal; bulk dens. 0.6 g/ml; visc. 1500-2500 cps (1%); bulking value 0.087 gal/lb; soften. pt. 135-140 C; ref. index 1.336 (2%); pH 6.0-8.5 (1%); nonionic; 5% max. moisture  
Toxicology: May cause skin irritation by mech. abrasion; may cause mild to mod. eye irritation; inh. of dust may cause respiratory tract irritation; TSCA listed  
Environmental: Biodeg.; BOD 7000 ppm  
Precaution: Flamm. dust; static charges may cause flash fire; may form flamm. dust-air mixts.; spillages may be slippery  
Hazardous Decomp. Prods.: CO, CO2, aldehydes, carboxylic acids, smoke  
HMIS: Health 1, Flammability 1, Reactivity 0  
Storage: Store in cool, dry place @ 20 C; keep container closed when not in use; blanket with inert gas when emptying bags near flamm. vapors; store away from direct sunlight, UV radiation

Natrosol® 250 HHR CS [Hercules/Aqualon
http://www.aqualon.com]  
Chem. Descrip.: Hydroxyethylcellulose  
CAS 9004-62-0  
Uses: Lubricant, rheology modifier in topical gels and ointments  
Features: Ultra-high m.w.; retarded hydration treated; faster disp. in water  
Regulatory: FDA 21CFR §175.105, 175.300, 176.170, 176.180, 177.1210, 182.99; EPA 40CFR §180.1001(c); DOT nonregulated; SARA §302/304/313 nonreportable, §311/312 fire hazard  
Properties: Wh. free-flowing granular powd.; char. odor; sol. in cold or hot water; insol. in org. solvs.; sp.gr. 1.0033 (2%); bulk dens. 0.6 g/ml; bulking value 0.087 gal/lb; soften. pt. 135-140 C; ref. index 1.336 (2%); pH 6.0-8.5 (1%); surf. tens. 66.8 dynes/cm (0.1%); nonionic; 5% max. moisture  
Toxicology: May cause skin irritation by mech. abrasion; may cause mild to mod. eye irritation; inh. of dust may cause respiratory tract irritation; TSCA listed  
Environmental: Biodeg.; BOD 7000 ppm  
Precaution: Flamm. dust; static charges may cause flash fire; may form flamm. dust-air mixts.; spillages may be slippery  
Hazardous Decomp. Prods.: CO, CO2, aldehydes, carboxylic acids, smoke  
HMIS: Health 1, Flammability 1, Reactivity 0  
Storage: Store in cool, dry place @ 20 C; keep container closed when not in use; blanket with inert gas when emptying bags near flamm. vapors; store away from direct sunlight, UV radiation

Natrosol® 250 HHX Pharm [Hercules/Aqualon
http://www.aqualon.com]  
Chem. Descrip.: Hydroxyethylcellulose NF, EP  
CAS 9004-62-0  
Uses: Thickener, protective colloid, binder, stabilizer, suspending agent for pharmaceuticals  
Regulatory: FDA 21CFR §175.105, 175.300, 176.170, 176.180, 177.1210, 182.99; EPA 40CFR §180.1001(c); DOT nonregulated; SARA §302/304/313 nonreportable, §311/312 fire hazard  
Properties: Off-wh. powd.; 0.5% max. on 60 mesh; char. odor; sol. in water and polyols;
Trade Name Reference

sp.gr. 0.6; dens. 11.5 lb/gal; bulk dens. 0.6 g/ml; visc. 3500-5000 cps (1%); bulking value 0.087 gal/lb; soften. pt. 135-140 C; ref. index 1.336 (2%); pH 5.5-8.5; 5% max. moisture

**Toxicology:** May cause skin irritation by mech. abrasion; may cause mild to mod. eye irritation; inh. of dust may cause respiratory tract irritation; TSCA listed

Uses: Base for lip balms
Features: Alternative to petroleum-based petrolatum
Properties: M.p. 135-155 F; cone penetration @

---

77 F 180 - 220

Toxicology: TSCA listed
Trade Name Reference

Chem. Descrip.: Propylene glycol ricinoleate
CAS 26402-31-3; EINECS/ELINCS 247-669-7
Uses: Visc. builder for cosmetics, creams/lotions, lipstick, lip balm, sunscreen
Properties: Pale yel. liq.; m.p. -26 C; acid no. 2.5; iodine no. 76; hyd. no. 296; nonionic; 100% act.

NB [ANGUS http://www.dow.com/angus/]
Chem. Descrip.: 2-Nitro-1-butanol
CAS 609-31-4
Uses: Pharmaceutical intermediate
Properties: M.w. 119.1; sol. 54 g/100 ml water; m.p. -48 C; b.p. 105 C; flash pt. > 200 F (TCC); pH 4.5 (0.1 M aq. sol’n.)

NE™ [ANGUS http://www.dow.com/angus/]
Chem. Descrip.: Nitroethane
CAS 79-24-3; EINECS/ELINCS 201-188-9
Uses: Raw material for synthesis of act. pharmaceutical compds., for α-methyldopa, a hypertensive drug, and for phenylpropanolamine used in bronchial decongestants and wt. control agents
Properties: Liq.; sol. 4.6% in water (20 C); m.w. 75.1; dens. 1.051 g/ml (20 C), 8.75 lb/gal; visc. 0.677 cp (20 C); vapor pressure 20.93 mm Hg; f.p. -89.52 C; b.p. 114 C; flash pt. (TCC) 87 F; 0.677 cp (20 C); vapor pressure 20.93 mm Hg; 75.1; dens. 1.051 g/ml (20 C), 8.75 lb/gal; visc. 12.8 cSt (40 C); m.p. 9 C; iodine no. 1.0; sapon.no. 356; hyd. no. 3.0; flash pt. (PMCC) 229.4 C; ref. index 1.447; surf. tens. 29.9 mN/m; 0% RVOC; 0.05% moisture
Toxicology: LD50 (oral, rat) >15,000 mg/kg; may cause very mild transient eye but not skin irritation when applied undiluted; TSCA listed
Environmental: Biodeg.

NEOBEE® 1053 [Stepan http://www.stepan.com]
Chem. Descrip.: Caprylic/capric triglyceride
CAS 73398-61-5; EINECS/ELINCS 265-724-3
Uses: Solubilizer, carrier for flavors, vitamins, antibiotics; diluent for essential oils, injectables; nutritional supplement; emollient
Features: Min. oil alternative
Regulatory: FDA 21CFR §170.30, GRAS; kosher; Europe, Japan, Canada, Australia listed
Properties: Water-wh. liq.; bland odor and taste; sol. in min. oil, acetone, alcohol; sp.gr. 0.949; visc. 15.9 cSt (100 F); f.p. 5 C; iodine no. 0.1; sapon. no. 334; hyd. no. 1.2; flash pt. (PMCC) 260 C; ref. index 1.447; surf. tens. 29.9 mN/m; 0% RVOC; 0.05% moisture
Toxicology: LD50 (rat) > 36 ml/kg; may cause very mild transient eye irritation but no skin irritation when applied undiluted
Environmental: Biodeg.
Storage: Store in sealed containers below 32 C; avoid overheating or freezing

NEOBEE® M-5 [Stepan http://www.stepan.com]
Chem. Descrip.: Caprylic/capric triglyceride
CAS 73398-61-5; EINECS/ELINCS 265-724-3
Uses: Diluent, vehicle, carrier for flavors, vitamins, antibiotics, nutritional fluids, medicinals, essential oils, colors; solubilizer, cosolvent for fragrance, flavors, medicinals, colors; source of nutritional MCT; emollient in pharmaceuticals
Features: Min. oil alternative
Regulatory: FDA 21CFR §170.30, GRAS; kosher; Europe, Japan, Canada, Australia listed
Properties: Water-wh. oily liq.; bland odor and taste; sol. in alcohol, min. oil, acetone; sp.gr. 0.958; visc. 12.8 cSt (40 C); m.p. 9 C; iodine no. 1.0; sapon.no. 356; hyd. no. 3.0; flash pt. (PMCC) 229.4 C; ref. index 1.446; 200 ppm moisture
Toxicology: LD50 (oral, rat) >15,000 mg/kg; may cause very mild transient eye but not skin irritation when applied undiluted; TSCA listed
Environmental: Biodeg.

NEOBEE® 895 [Stepan http://www.stepan.com]
Chem. Descrip.: Tricaprylin
CAS 538-23-8; EINECS/ELINCS 208-686-5
Uses: Fat source in nutritional prods.; carrier for flavors, vitamins, essential oils, and colors
Regulatory: FDA GRAS; kosher; Europe, Japan, Canada, Australia, and Korea listed
Properties: Water-wh. liq.; bland odor and taste;
Trade Name Reference

0.945; visc. 14.9 cSt (100 F); f.p. -5 C; acid no. 0.10 max.; iodine no. 0.006; sapon. no. 345; hyd. no. 1.4; flash pt. (MCC) 260 C; ref. index 1.447; surf. tens. 28.8 mN/m; 0% RVOC; 200 ppm moisture

Toxicology: LD50 (rat) > 30 ml/kg; may cause very mild transient eye but no skin irritation if applied undiluted

Environmental: Biodeg.

Storage: Store in sealed containers below 32 C; avoid prolonged storage above 32 C; avoid overheating

NEOBEE® M-20 [Stepan http://www.stepan.com]
Chem. Descrip.: Propylene glycol dicaprylate/dicaprate
CAS 68583-51-7; EINECS/ELINCS 271-516-3
Uses: Emollient for creams, lotions, and ointments; solvent, solubilizer, vehicle for antibiotics, medicinals; diluent for essential oils, injectables; deposition agent on skin
Features: Low visc.

Regulatory: FDA 21CFR §170.30, 172.856; avail. in kosher grade
Properties: Pale yel. oily liq., bland odor; sol. in alcohol containing up to 20% water; visc. 9.5 cps; f.p. -20 C; iodine no. 1 max.; sapon. no. 326; hyd. no. 0.6; flash pt. (PMCC) 176.7 C; 0.04% moisture

Toxicology: LD50 (oral, rat) >5000 - 15,000 mg/kg; eye irritant; not a primary skin irritant; ing. does not cause adverse effects

Environmental: Biodeg.
Precaution: Wear safety glasses with side shields

Hazardous Decomp. Prods.: None

HMIS: Health 1, Flammability 1, Reactivity 0

Storage: Avoid prolonged storage above 90 F; keep the container tightly closed and in a cool, well-ventilated place

Neosorb® 20/02 B [Roquette http://www.roquette.fr]
Chem. Descrip.: Sorbitol
Chem. Analysis: 70% w/w dry substance
CAS 50-70-4; EINECS/ELINCS 200-061-5
Uses: Bulk sweetener and humectant for syrups, suspensions, oral ampoules, lozenges, pastilles; excipient for pharmaceutical coatings; humectant for pharmaceutical paste and topical preps.
Features: 60% sweetening power of sucrose; noncariogenic; cooling effect in the mouth; excellent compressibility; chemically stable; flowable
Properties: Cl. visc. liq.; sweet taste; miscible with water; 98.5% min. sorbitol

Neosorb® 20/20 B [Roquette http://www.roquette.fr]
Chem. Descrip.: Sorbitol
Chem. Analysis: 70% w/w dry substance
CAS 50-70-4; EINECS/ELINCS 200-061-5
Uses: Bulk sweetener and humectant for syrups, suspensions, oral ampoules, lozenges, pastilles; excipient for pharmaceutical coatings; humectant for pharmaceutical paste and topical preps.
Features: 60% sweetening power of sucrose; noncariogenic; microbiological stability; strong tendency to crystallize
Properties: Cl. visc. liq.; sweet taste; miscible with water; 93% min. sorbitol

Neosorb® 70/70 B [Roquette http://www.roquette.fr]
Chem. Descrip.: Sorbitol
Chem. Analysis: 70% w/w dry substance
CAS 50-70-4; EINECS/ELINCS 200-061-5
Uses: Bulk sweetener and humectant for syrups, suspensions, oral ampoules, lozenges, pastilles; excipient for pharmaceutical coatings; humectant for pharmaceutical paste and topical preps.
Features: 60% sweetening power of sucrose; noncariogenic; microbiological stability; low tendency to crystallize
Properties: Cl. visc. liq.; sweet taste; miscible with water; 74% min. sorbitol
Neosorb® 70/70 SB [Roquette http://www.roquette.fr]  
Chem. Descrip.: Sorbitol  
Chem. Analysis: 70% w/w dry substance  
CAS 50-70-4; EINECS/ELINCS 200-061-5  
Uses: Bulk sweetener and humectant for syrups, suspensions, oral ampoules, lozenges, pastilles; excipient for pharmaceutical coatings; humectant for pharmaceutical paste and topical preps.  
Features: 60% sweetening power of sucrose; noncariogenic; microbiological stability; low tendency to crystallize  
Properties: Cl. visc. liq.; sweet taste; miscible with water; 74% min. sorbitol  
Neosorb® 70/90 B [Roquette http://www.roquette.fr]  
Chem. Descrip.: Sorbitol  
Chem. Analysis: 70% w/w dry substance  
CAS 50-70-4; EINECS/ELINCS 200-061-5  
Uses: Bulk sweetener and humectant for syrups, suspensions, oral ampoules, lozenges, pastilles; excipient for pharmaceutical coatings; humectant for pharmaceutical paste and topical preps.  
Features: 60% sweetening power of sucrose; noncariogenic; microbiological stability; low tendency to crystallize  
Properties: Used at marketed in NAFTA  
Neosorb® P 20/60 [Roquette http://www.roquette.fr]  
Chem. Descrip.: Crystallized sorbitol  
CAS 50-70-4; EINECS/ELINCS 200-061-5  
Uses: Excipient for direct compression for suckable and chewable tablets; diluent for sachets; sweetener for pharmaceutical chewing gum; used in combination with amino acids for parenteral nutrition  
Features: 60% sweetening power of sucrose; noncariogenic; cooling effect in the mouth; excellent compressibility; chemically stable; flowable  
Properties: Wh. odorless crystalline powd.; sweet taste; particle size 480 µm mean diameter; sol. in water (220g / 100ml)  
Neosorb® P 30/60 [Roquette http://www.roquette.fr]  
Chem. Descrip.: Crystallized sorbitol  
CAS 50-70-4; EINECS/ELINCS 200-061-5  
Uses: Excipient for direct compression for suckable and chewable tablets; diluent for sachets; sweetener for pharmaceutical chewing gum; used in combination with amino acids for parenteral nutrition  
Features: 60% sweetening power of sucrose; noncariogenic; cooling effect in the mouth; excellent compressibility; chemically stable; flowable  
Properties: Wh. odorless crystalline powd.; sweet taste; particle size 480 µm mean diameter; sol. in water (220g / 100ml)  
Neosorb® HDS [Roquette http://www.roquette.fr]  
Chem. Descrip.: Sorbitol  
Chem. Analysis: 75% w/w dry substance  
CAS 50-70-4; EINECS/ELINCS 200-061-5  
Uses: Bulk sweetener and humectant for syrup, suspensions, oral ampoules, lozenges, pastilles; excipient for pharmaceutical coatings; humectant for pharmaceutical paste and topical preps.  
Features: 60% sweetening power of sucrose; noncariogenic; microbiological stability; medium to high tendency to crystallize  
Properties: Cl. visc. liq.; sweet taste; miscible with water; 80% min. sorbitol  
Neosorb® P W [Roquette http://www.roquette.fr]  
Chem. Descrip.: Crystallized sorbitol  
CAS 50-70-4; EINECS/ELINCS 200-061-5  
Uses: Excipient for direct compression for suckable and chewable tablets; diluent for sachets; sweetener for pharmaceutical chewing gum; used in combination with amino acids for parenteral nutrition
Trade Name Reference

Features: 60% sweetening power of sucrose; noncariogenic; cooling effect in the mouth; excellent compressibility; chemically stable; flowable
Regulatory: USP/NF, EP, JP
Properties: Wh. odorless crystalline powd.; sweet taste; particle size 180 µm mean diameter; sol. in water (220 g / 100 ml )

NEPD™ [ANGUS
http://www.dow.com/angus/]
Chem. Descrip.: 2-Nitro-2-ethyl-1,3-propanediol
CAS 597-09-1
Uses: Pharmaceutical intermediate
Properties: M.w. 149.2; sol. 400 g/100 ml water; m.p. 56 C; b.p. decomposes; pH 5.5 (0.1 M aq. sol'n.)

Nerol 70 [Millennium/F&F
http://www.aromachem.com]
Chem. Descrip.: cis-3,7-Dimethyl-2,6-octadien-1-ol See Nerol
CAS 106-25-2; EINECS/ELINCS 203-378-7
Uses: Syn. flavoring agent in pharmaceuticals
Features: Fresh, floral fragrance
Regulatory: FDA 21CFR §172.515; DOT nonregulated
Properties: Cl. liq.; rose-like odor; m.w. 154.25; sp.gr. 0.875-0.880; dens. 7.32 lb/gal; b.p. 218.9 C; flash pt. (TCC) > 100 C; ref. index 1.467-1.478
Toxicology: LD50 (oral, rat) > 5000 mg/kg; (skin, rabbit) > 5000 mg/kg; undiluted liq. may irritate skin and eyes; TSCA listed

Neusilin S1 [Fuji Chem. Ind. USA]
Chem. Descrip.: Magnesium aluminometasilicate
CAS 12511-31-8
Uses: Excipient, flow aid in pharmaceuticals; tablet disintegrant; stabilizer for deliquescent drugs
Features: Compressible; amorphous structure; high adsorption capacity; stable against heat; noncombustible
Properties: Wh. spherical fine gran.; 70-110 µ mean particle size (agglomerate); odorless; tasteless; pract. insol. in water, ethanol; sp.gr. 2.0 g/ml; bulk dens. 0.33 g/ml (loose), 0.40 g/ml (tapped); surf. area 110 m²/g; oil abosrp. 1.3 ml/g; pH 9.4 (5% slurry); 16% loss on drying
Toxicology: Inh. may cause respiratory irritation, cough; may cause eye irritation; ing. of lg. amts. may cause GI irritation, nausea, vomiting, constipation
Precaution: Incomp. with strong oxidizing agents; may cause coloring
Storage: May absorb moisture; avoid high temps. and humidity during storage

Neusilin UFL2 [Fuji Chem. Ind. USA]
Chem. Descrip.: Magnesium aluminometasilicate
CAS 12511-31-8
Uses: Excipient, flow aid in pharmaceuticals; tablet disintegrant; stabilizer for deliquescent drugs
Features: Compressible; amorphous structure; high adsorption capacity; stable against heat; noncombustible
Properties: Wh. powd.; 2-8 µ mean particle size (agglomerate); odorless; tasteless; pract. insol. in water, ethanol; sp.gr. 2.2 g/ml; bulk dens. 0.08 g/ml (loose), 0.13 g/ml (tapped); surf. area 300 m²/g; oil abosrp. 3.2 ml/g; pH 7.4 (5% slurry); 1.8% loss on drying
Toxicology: Inh. may cause respiratory irritation, cough; may cause eye irritation; ing. of lg. amts. may cause GI irritation, nausea, vomiting, constipation
Precaution: Incomp. with strong oxidizing agents; may cause coloring
Storage: May absorb moisture; avoid high temps. and humidity during storage

Handbook of Pharmaceutical Additives, Third Edition
### Niaproof® Anionic Surfactant 4

[**Niacet**
http://www.niacet.com](http://www.niacet.com)

**Chem. Descrip.**: Sodium tetradeyl sulfate 
(26-28%), diethylene glycol ethyl ether (≤ 20%), sodium chloride (1-2%) and water

**Uses**: Wetting agent, penetrant, emulsifier in pharmaceuticals; enhances bactericidal properties of antiseptics, rapid fixing of histological specimens

**Regulatory**: FDA compliance

**Properties**: Colorless liq., mild char. odor; misc. with water; sp.gr. 1.031; dens. 8.58 lb/gal; b.p. 92 C; flash pt. (COC) none; pH 8.5 (0.1% aq.); surf. tens. 47 dynes/cm (0.1% aq.); Draves wetting 20 s (0.26%); Ross-Miles foam 10 mm (initial); anionic; 27% act. in water and 20% diethylene glycol ethyl ether

**Toxicology**: Moderate oral and skin toxicity; eye irritant; LD50 (oral, rats) 11 g/kg; TSCA listed

**Environmental**: Not readily biodeg.

**Precaution**: Wear safety glasses, plastic or rubber gloves; incompat. with strong oxidizers

**Hazardous Decomp. Prods.**: Sulfur oxides, CO

### Niaproof® Anionic Surfactant 08

[**Niacet**
http://www.niacet.com](http://www.niacet.com)

**Chem. Descrip.**: Sodium 2-ethylhexyl sulfate 
(38.5-40%), sodium chloride (1.5-2.5%) and water

**CAS**: 126-92-1; 7647-14-5; EINECS/ELINCS 204-812-8

**Uses**: Wetting agent, penetrant, emulsifier in pharmaceuticals; enhances bactericidal properties of antiseptics, rapid fixing of histological specimens; used in manufacture of penicillin for breaking undesired emulsions and enhancing activity

**Features**: Stable to high concs. of electrolytes

**Regulatory**: FDA compliance; OSHA nonhazardous; RCRA, CERCLA, SARA nonreportable

**Properties**: Colorless liq., mild char. odor; misc. with water; sp.gr. 1.031; dens. 8.58 lb/gal; v.p. 17.5 mm Hg; b.p. 95 C; flash pt. (COC) none; pH 7.3 (0.1% aq.); surf. tens. 63 dynes/cm (0.1% aq.); Ross-Miles foam 10 mm (initial); anionic; 39% act.

**Toxicology**: Moderate oral and skin toxicity; eye irritant; LD50 (oral, rats) 4.95 ml/kg; TSCA listed
Trade Name Reference

Regulatory: JSCI listed
Properties: Wh. cryst. powd.; 97% min. conc.
Toxicology: TSCA listed

Chem. Descrip.: Glycyrrhizic acid
CAS 1405-86-3; EINECS/ELINCS 215-785-7
Uses: Anti-inflammatory, anti-allergenic surfactant for pharmaceuticals
Regulatory: JSCI listed
Properties: Wh. powd.; water-sol.; 96% min. conc.
Toxicology: TSCA listed

Chem. Descrip.: Stearyl alcohol
CAS 112-92-5; EINECS/ELINCS 204-017-6
Uses: Base for sl. scented or unscented pharmaceuticals
Features: Fragrance-free
Regulatory: JSCI listed
Properties: Wh. cryst. solid; m.p. 56-58 C
Toxicology: TSCA listed

Chem. Descrip.: Stearyl glycyrrhetinate
CAS 13832-70-7
Uses: Anti-inflammatory, anti-allergenic for pharmaceuticals
Regulatory: JSCI listed
Properties: Wh. to pale yel. cryst. powd.; oil-sol.; 95% min. conc.

NINOL® 70-SL [Stepan http://www.stepan.com]
Chem. Descrip.: Lauramide DEA
CAS 120-40-1; EINECS/ELINCS 204-393-1
Uses: Foam booster/stabilizer, thickener for pharmaceuticals
Properties: Gel; nonionic; 100% act.

NINOL® 96-SL [Stepan http://www.stepan.com]
Chem. Descrip.: Lauramide DEA
CAS 120-40-1; EINECS/ELINCS 204-393-1
Uses: Foam booster/stabilizer, thickener for pharmaceuticals
Properties: Lt. color wax; nonionic; 100% act.

NINOL® C12 LMP [Stepan http://www.stepan.com]
Chem. Descrip.: Lauramide MEA
Chem. Analysis: > 99 % assay
CAS 142-78-9; EINECS/ELINCS 205-560-1
Uses: Visc. builder, foam booster/stabilizer, conditioner for pharmaceuticals
Regulatory: Listed in Europe, Japan, Canada, Australia
Properties: Off-wh. beads; dens. 4.9 lb/gal; m.p. 80 C; b.p. 150 C; flash pt. > 94 C; nonionic; 100% solids
Toxicology: LD50 (oral, rat ) 1720 mg/kg; causes severe eye irritation and extreme skin irritation at ≥ 1%
Environmental: Biodeq.; 0% RVOC
Precaution: Wear safety goggles and gloves; product should be used in a well ventilated area; avoid inhaling dust; may react with strong oxidizing agents.
Hazardous Decomp. Prods.: If overheating occurs, amide ester will be formed; may yield oxides of nitrogen and ammonia
HMIS: Health 1, Flammability 1, Reactivity 0
Storage: Store in sealed containers in cool, dry place below 40 C; avoid overheating or freezing

NINOL® CMP [Stepan http://www.stepan.com]
Chem. Descrip.: Cocamide MEA
CAS 68140-00-1; EINECS/ELINCS 268-770-2
Uses: Foam booster/stabilizer, visc. builder for pharmaceuticals
Features: Enhances foam stability and visc. response at low levels of electrolytes
Properties: Wh. beads; 100% act.
Trade Name Reference

NINOL® GR [Stepan http://www.stepan.com]  
Chem. Descrip.: Cocamide DEA  
CAS 61791-31-9; EINECS/ELINCS 263-163-9  
Uses: Foam booster/stabilizer, emulsifier, thickener for pharmaceuticals  
Properties: Liq.; nonionic; 100% act.

NINOL® L-9 [Stepan http://www.stepan.com]  
Chem. Descrip.: Lauramide DEA (80 - 99%) and diethanolamine (1 - 9 %)  
CAS 120-40-1; 111-42-2; EINECS/ELINCS 204-393-1; 203-868-0  
Uses: Foam booster/stabilizer, emulsifier, thickener for pharmaceuticals  
Features: Stable in neutral or slightly basic or acidic systems  
Properties: Solid wh. paste; sp. gr. 0.9856; b.p. >94 C; flash pt.(PMCC) >93 C; pH (1% aq.) 9.4; nonionic; 100% act.

Toxicology: LD50 (oral, rat) 2700 mg/kg; TSCA listed

Environmental: Biodeg.; RVOC 0%

Precaution: Wear safety goggles and gloves

Hazardous Decomp. Prods.: May yield oxides of nitrogen and ammonia

HMIS: Health 1, Flammability 1, Reactivity 0

NINOL® LMP [Stepan http://www.stepan.com]  
Chem. Descrip.: Lauramide MEA (> 93 %) and monooethanolamine (< 1 %) See Ethanolamine  
CAS 142-78-9; 141-43-5; EINECS/ELINCS 205-560-1; 205-483-3  
Uses: Foam booster/stabilizer, thickener, emollient, detergent for pharmaceuticals  
Features: Stable in neutral or slightly basic or acidic systems  
Properties: Free-flowing off-wh. beads; sp. gr. 0.9856; m.p. 79 - 81 C; b.p. 150 C; flash pt.>93.9; pH (1% aq.) 9.4; nonionic; 100% act.

Toxicology: Dust or powd. may irritate eye tissue; inh. may cause irritation of the nose, throat, and respiratory tract.; ing. of large amount may produce GI disturbances including irritation, nausea, and diarrhea

Environmental: Biodeg.

Precaution: Wear goggles and gloves; avoid dispersion of dust in air; may react with strong oxidizing agents

Hazardous Decomp. Prods.: Oxides of nitrogen and ammonia.

HMIS: Health 1, Flammability 1, Reactivity 0

Storage: Stored in sealed containers and kept at temperatures ≤ 41 C; avoid overheating or freezing

NINOL® SCMP [Stepan http://www.stepan.com]  
Chem. Descrip.: Cocamide MEA  
CAS 68140-00-1; EINECS/ELINCS 268-770-2  
Uses: Detergent, foam booster/stabilizer, thickener in pharmaceuticals  
Features: Enhances foam stability and visc. response at low levels of electrolytes  
Properties: Prilled powd.; nonionic; 100% solids

Chem. Descrip.: Isosorbide dinitrate  
CAS 87-33-2  
Uses: Preservative for pharmaceuticals

Uses: Preservative for pharmaceuticals; topical anesthetic

Chem. Descrip.: Benzylparaben  
CAS 94-18-8; EINECS/ELINCS 202-311-9  
Uses: Preservative, bactericide, fungicide for pharmaceuticals, topical, ophthalmic, oral, and injectable medicaments, ointments, creams, syrups, multi-dose injections, eye drops, vitamin sol'ns., vaccines

Regulatory: BP, NF, Eur.Ph., FCC compliance  
Properties: Wh. fine cryst. powd., odorless, tasteless; sol. (g/100 g solv.) 102 g acetone, 79 g methanol, 72 g ethanol, 60 g lanolin, 42 g ether; m.w. 228.25; m.p. 110-112 C; 99% assay

Toxicology: LD50 (oral, rat) > 5 g/kg; nonirritating to skin, sl. harmful by ingestion, sl. irritating to eyes

Chem. Descrip.: Imidazolidinyl urea  
CAS 39236-46-9; EINECS/ELINCS 254-372-6  
Uses: Preservative for dermopharmaceuticals  
Features: Effective against gram positive and negative bacteria; effective over the range pH 3.0 - 8.5

Regulatory: Not permitted in Japan  
Properties: Wh. free-flowing fine powd.; very sl. odor; highly sol. in water (> 70%); sol. (@ 20 C): 48% in glycerol, 0.01% in ethanol; m.w. 406.3; m.p. 150 C; pH 7.15 (1% aq.)

Use Level: 0.6% max. (personal care in EU)

Toxicology: LD50 (oral, rat) > 7500 mg/kg,
Trade Name Reference

-skin, rabbit) > 8000 mg/kg; nonharmful; nonirritating to eyes, skin, mucous membranes; nonsensitizing to skin

CAS 94-26-8; EINECS/ELINCS 202-318-7
Uses:  Preservative, bactericide, fungicide for pharmaceuticals, topical, ophthalmic, oral, and injectable medicaments, ointments, creams, syrups, multi-dose injections, eye drops, vitamin sol’ns., vaccines
Regulatory:  FDA GRAS; EC 0.4% max.; Japan 1%
Properties:  Wh. cryst. powd., odorless or very faint aromatic odor, tasteless; sol. (g/100 g solv.) 240 g acetone, 220 g methanol, 208 g ethanol, > 200 g IPA, 150 g ether, > 100 g lanolin; m.w. 194.23; m.p. 68-69 C; > 99% act.
Toxicology:  LD50 (oral, mouse) > 5 g/kg; nonirritating to skin; sl. irritating to eyes

Chem. Descrip.:  Potassium butylparaben  See Potassium butyl paraben
CAS 38566-94-8; EINECS/ELINCS 254-009-1
Uses:  Preservative, bactericide, fungicide for pharmaceuticals, medicinal preps.
Properties:  Wh. fine hygroscopic powd.; sol. in cold water; m.w. 232.32; pH 9.5-10.5 (0.1% aq.); > 99% act.
Toxicology:  Nonirritating to skin; sl. irritating to eyes and nasal passages

Chem. Descrip.:  Sodium butylparaben
CAS 36457-20-2; EINECS/ELINCS 253-049-7
Uses:  Preservative, bactericide, fungicide for pharmaceuticals, medicinal preps., soft gelatin capsules
Properties:  Wh. fine hygroscopic powd.; sol. in cold water; m.w. 216.21; pH 9.5-10.5 (0.1% aq.); > 99% act.
Toxicology:  LD50 (oral, mouse) > 2 g/kg; pure material irritating to skin; sl. irritating to eyes and nasal passages

Chem. Descrip.:  O-Benzyl-p-chlorophenol  See Chlorophene
CAS 120-32-1; EINECS/ELINCS 204-385-8
Uses:  Biocide in hospitals
Properties:  Cream to tan flame; sol. in water and oil; pH 4012
Environmental:  Biodegrad.
Storage:  24 mos. shelf life when stored @ 4-40 C in original containers, away from direct sunlight

Chem. Descrip.:  p-Chloro-m-xyleneol  See Chloroxyleneol
CAS 88-04-0; EINECS/ELINCS 201-793-8
UN 2261
Uses:  Antimicrobial, preservative, antiseptic for cosmetics, and disinfectant, algicide, slimicide
Regulatory:  EPA reg. no. 49403-1
Properties:  Wh. to off-wh. cryst. solid, faint phenolic odor; sol. in alcohols, glycols; sol. 0.03% w/v in water; m.w. 156; m.p. 114-116 C; flash pt. > 116 C; > 98% act.
Use Level:  0.05-0.5% (polymer emulsions), 0.1-0.5% (latex paints), 0.05-0.1% (metalworking fluids)
Toxicology:  LD50 (oral, rat) 5 g/kg, (dermal, rat) 2 g/kg; LC50 (inh., rat, 4 h) 6.7629 mg/l; low systemic toxicity, but can be harmful if ing. in quantity; skin irritant, mild eye irritant
Environmental:  Aquatic LC50 (rainbow trout, 96 h) 0.77 mg/l, (daphnia magna, 48 h) 7.7 mg/l
Hazardous Decomp. Prods.:  None
Storage:  Store in original container; exc. stability under normal storage conditions, but may darken with age

Chem. Descrip.:  O-Phenyl phenol  See o-Phenylphenol
CAS 90-43-7; EINECS/ELINCS 201-993-5
Uses:  Biocide in pharmaceuticals
Properties:  Cream to wh. flakes, sl. phenolic odor; sol. (g/100 g solv.) 800 g in methanol, 660 g acetone, 590 g ethanol, 490 g ether, 300 g propylene glycol, 275 g ethylene glycol, 270 g benzene; m.w. 170; bulk dens. 0.60-0.65; m.p. 56-58 C; b.p. 286 C; flash pt. (COC) 138 C; 99.5% min. purity
Use Level:  10-15% (disinfectant concs.), 0.1-0.2% (cooling lubricants), 0.08-2% (adhesives)
Toxicology:  LD50 (rats) 2000 mg/kg; harmful by ingestion; corrosive to skin and eyes
Storage:  Unlimited shelf life if protected from
Chem. Descrip.: P-Chloro-m-cresol
CAS 59-50-7; EINECS/ELINCS 200-431-6
Uses: Biocide and disinfectant for hospital use and temperature sterilization
Properties: Wh. cream crystalline powd.; sol in water; insol. in oil; NV residue < 0.1%
Toxicology: LD50 (acute oral, rat) 620 kg
Environmental: Biodegrad. when diluted below the minimum inhibitory concentration and does not bioaccumulate.
Storage: Store at temperatures within the range 4-40 C; do not expose to direct sunlight; shelf life of 24 months

Chem. Descrip.: P-t-Amyl phenol See p-t-Amylphenol
CAS 80-46-6; EINECS/ELINCS 201-280-9
Uses: Biocide against bacteria, yeast, and fungi in water-based antiseptic pharmaceuticals and medicated powds.
Features: Broad spectrum of activity
Properties: Crystalline solid; sparingly sol. in water; oil-insol.
Toxicology: LD50 (acute oral, rat) 1486 g/kg; low toxicity
Environmental: Biodegrad. when diluted below the minimum inhibitory concentration and does not bioaccumulate; hazardous to the environment
Precaution: Corrosive
Storage: Store at temperatures within the range 4-40 C; do not expose to direct sunlight; shelf life of 24 months

Chem. Descrip.: p-Chloro-m-xylenol See Chloroxylenol
CAS 88-04-0; EINECS/ELINCS 201-793-8
Uses: Antimicrobial for topical OTC pharmaceuticals
Features: Broad spectrum
Properties: Wh. cryst. powd.; sol. in most org. solvs.; insol. in water
Use Level: 0.5-3.75%

Chem. Descrip.: p-Chloro-m-xylenol See Chloroxylenol
CAS 88-04-0; EINECS/ELINCS 201-793-8
Uses: Antimicrobial, antiseptic base for OTC drug prods. incl. medicated powds., soaps, surgical scrubs, and antidandruff shampoos
Features: Pharmaceutical grade
Use Level: 0.5-3.75%

Chem. Descrip.: P-Chloro-m-xylenol See Chloroxylenol
CAS 88-04-0; EINECS/ELINCS 201-793-8
Uses: Antimicrobial for surgical scrubs, liq. hand soaps, skin creams, and pharmaceuticals

Chem. Descrip.: > 30% sodium propylparaben, 15-30% sodium methylparaben, 15-30% sodium ethylparaben, 5-15% sodium benzoate
Uses: Antimicrobial preservative for pharmaceuticals, esp. preservation of soft gelatin
Properties: Wh. fine cryst. powd.; sol. in cold water and in ethanol, diethyl ether; pH 9.5-10.5 (0.1% aq.)
Toxicology: LD50 (oral, rat) < 2000 mg/kg; harmful if swallowed; severe eye irritant; may cause irritation to mouth, upper digestive tract; prolonged/repeated exposure may cause skin irritation; inh. of dust may cause irritation to nose, upper respiratory tract
Environmental: Readily biodeg.; unlikely to accumulate in aquatic environment; discharge of lg. quantities may kill fish
Precaution: May react with strong oxidants; may cause dust explosion; fire may produce fumes contg. CO and CO2; spillages may be slippery
Storage: Store in cool, dry area away from strong oxidizing agents

Chem. Descrip.: Combination of sodium salts of para hydroxy benzoic acid esters
Uses: Antimicrobial preservative for oral pharmaceuticals, liq. antacid suspensions and other alkaline sol'ns.
Features: For use to pH 8.0-8.5
Properties: Sol. in cold water
Use Level: 0.05-0.20%
Trade Name Reference

http://www.fun.clariant.com]
CAS 120-47-8; EINECS/ELINCS 204-399-4
Uses: Preservative, bactericide, fungicide for pharmaceuticals, topical, opthalmic, oral, and injectable medicaments, ointments, creams, syrups, multi-dose injections, eye drops, vitamin sol'n's., vaccines
Regulatory: FDA GRAS; EC 0.4% max.; Japan 1%
Properties: Wh. fine cryst. powd., odorless or very faint aromatic odor, tasteless; sol. (g/100 g solv.): 84 g acetone, 81 g methanol, 70 g ethanol, 40 g ether, 30 g lanolin; m.w. 166.18; m.p. 115-117 C; pH 7; > 99% act.
Toxicology: LD50 (oral, rat) > 8 g/kg; sl. poisonous if swallowed; nonirritating to skin; sl. irritating to eyes; produces a sl. burning sensation of mouth and tongue
Environmental: Not very resist. to microbial degradation
Precaution: Dust in confined conditions can be a dangerous fire and explosion hazard
Hazardous Decomp. Prods.: Decomp. may produce acrid irritating thick black smoke

Nipagin A Sodium [Clariant/Functional Chems.  
http://www.fun.clariant.com]
Chem. Descrip.: Sodium ethylparaben
CAS 35285-68-8; EINECS/ELINCS 252-487-6
Uses: Antimicrobial preservative, bactericide, fungicide for pharmaceuticals, medicinal preps., soft gelatin capsules
Properties: Wh. fine powd., almost odorless, tasteless; hygroscopic; sol. in cold water; m.w. 188.16; pH 9.5-10.5 (0.1% aq.); > 99% act.
Toxicology: LD50 (oral, mouse) 2.5 g/kg; sl. poisonous if swallowed; pure material irritating to skin; severe eye irritant; sl. irritating to nasal passages; produces sl. burning sensation of mouth and tongue
Environmental: Not very resist. to microbial degradation
Precaution: Dust in confined conditions can be a dangerous fire and explosion hazard
Hazardous Decomp. Prods.: Decomp. may produce acrid irritating thick black smoke

Nipagin M [Clariant/Functional Chems.  
http://www.fun.clariant.com]
CAS 99-76-3; EINECS/ELINCS 202-785-7
Uses: Antimicrobial preservative, bactericide, fungicide for pharmaceuticals, topical, opthalmic, oral, and injectable medicaments, ointments, creams, syrups, multi-dose injections, eye drops, vitamin sol'n's., vaccines
Regulatory: FDA GRAS; EC 0.4% max.; Japan 1%
Properties: Wh. fine cryst. powd., odorless or very faint aromatic odor, tasteless; sol. (g/100 g solv.): 64 g acetone, 60 g IPA, 58 g methanol, 48 g ethanol, 35 g propylene glycol, 23 g ether; m.w. 152.15; m.p. 125-128 C; b.p. 298.6 C; pH ≤ 7; > 99% act.
Toxicology: LD50 (oral, rat) > 8 g/kg; sl. poisonous if swallowed; sl. irritating to skin; produces sl. burning sensation of mouth and tongue
Environmental: Not very resist. to microbial degradation
Precaution: Dust in confined conditions can be a dangerous fire and explosion hazard
Hazardous Decomp. Prods.: Decomp. may produce acrid irritating thick black smoke

Nipaguard® BPX [Clariant/Functional Chems.  
http://www.fun.clariant.com]
Chem. Descrip.: Phenoxyethanol, methylparaben, propylparaben, and bronopol See 2-Bromo-2-nitropropane-1,3-diol
Uses: Preservative in oral/topical pharmaceuticals
Trade Name Reference

Features: Broad-spectrum; for use at pH 4.5-8.5; readily incorporated in aq. phase
Regulatory: USA and Europe approvals
Properties: Sol. 0.5% in water; readily sol. in oil phases, many org. solvs.
Use Level: 0.25-0.5%
Toxicology: Calculated LD50 (oral, rat) > 2000 mg/kg; low toxicity; nonirritating to skin, eyes, mucous membranes at normal use concs.

Chem. Descrip.: Phenoxyethanol, methylidibromoglutaronitrile See Methylidibromo glutaronitrile
Uses: Preservative for pharmaceuticals
Features: Broad spectru m act. against Gram-negative and -positive bacteria, yeasts, molds; effective @ pH 4-8; formaldehyde-free
Properties: Pale yel. to yel. liq.; sl. char. odor; misc. with lower alcohols, glycols; sol. ≈ 0.2% in water; sp.gr. ≈ 1.20; vapor pressure ≈ 0.04 mbar; flash pt.(OC) 121 C
Use Level: 0.1-0.3%
Toxicology: Nonirritating to eyes, skin, mucous membranes

Chem. Descrip.: DMDM hydantoin
CAS 6440-58-0; EINECS/ELINCS 229-222-8
Uses: Antimicrobial for pharmaceuticals
Features: Broad-spectrum; effective against gram-negative bacteria, yeast, and molds
Properties: Water-wh. cl. liq., sl. formaldehyde odor; sol. in water; m.w. 188.12; sp.gr. 1.15 g/ml; dens. 9.68 lb/gal; f.p. -7.5 C; b.p. 108 C; flash pt. > 100 C; pH 6.7-7.5; > 54% act. in water
Use Level: 0.15-0.4%
Toxicology: LD50 (oral) 3300 mg/kg (moderately toxic); mild skin and eye irritant; respiratory irritant

Chem. Descrip.: Benzyl alcohol, methylparaben, and propylparaben
Uses: Preservative for pharmaceuticals
Features: Broad-spectrum; for use at pH 4.5-8.5; readily incorporated in aq. phase
Regulatory: USA, Japan, and Europe approvals
Use Level: 0.3-0.6%

Chem. Descrip.: Propylene glycol, methylparaben, and propylparaben
Uses: Preservative for pharmaceuticals
Features: Broad-spectrum; for use at pH 4.5-8.5; readily incorporated in aq. phase
Regulatory: USA, Japan, and Europe approvals
Use Level: 0.3-0.6%

Chem. Descrip.: 3,4,4’-Trichlorocarbanilide (40%) aq. disp.
CAS 101-20-2; EINECS/ELINCS 202-924-1
Uses: Topical antimicrobial

Chem. Descrip.: 3,4,4´-Trichlorocarbanilide CAS 101-20-2; EINECS/ELINCS 202-924-1
Uses: Topical antimicrobial for bar and liq. soaps
Properties: Fine wh. to gray-wh. powd.; char. odor; 5% max. > 20 µ particle size; 97-101% assay

Chem. Descrip.: BHT
CAS 128-37-0; EINECS/ELINCS 204-881-4
Uses: Antioxidant for pharmaceuticals
Properties: Colorless or wh. cryst. powd., odorless and tasteless; insol. in water; m.w. 220.4; f.p. 69.2 C; b.p. 265 C; flash pt. (PM) 122 C; > 99.5% act.
Toxicology: Nontoxic

Chem. Descrip.: Methylparaben (> 30%), ethylparaben (15-30%), propylparaben (5-15%)
CAS 99-76-3; 120-47-8; 94-13-3; EINECS/ELINCS 202-785-7; 204-399-4; 202-307-7
Uses: Preservative for ointments, creams, syrups, eye drops/lotions, vitamin solutions and antacid suspensions, and veterinary prods.
Toxicology: Skin and eye irritant

Chem. Descrip.: Sodium methylparaben, sodium propylparaben, and sodium ethylparaben
Uses: Preservative, bactericide, fungicide for
Trade Name Reference

aq. pharmaceuticals, medicinal preps., syrups, sol'ns., suspensions, other oral medicines

Features: Suitable for alkaline preps. to pH 8.0-8.5
Properties: Sol. in cold water

CAS 94-13-3; EINECS/ELINCS 202-307-7
Uses: Preservative, bactericide, fungicide for pharmaceuticals, topical, ophthalmic, oral, and injectable medicaments, ointments, creams, syrups, multi-dose injections, eye drops, vitamin sol'ns., vaccines
Features: Activity maintained in the presence of gums, mucilages, fats and oils

Chem. Descrip.: Sodium propylparaben
CAS 35285-69-9; EINECS/ELINCS 202-488-1
Uses: Preservative, bactericide, fungicide for pharmaceuticals, medicinal preps.
Properties: Wh. fine cryst. powd.; odorless or very faint aromatic odor; sol. (g/100 g solv.): 105 g acetone, 100 g in methanol, ethanol, 88 g IPA, 80 g lanolin, 50 g ether; m.w. 180.20; m.p. 95-98 C; > 99% act.
Toxicology: LD50 (oral, mouse) 3.7 g/kg (pract. nonharmful); nonirritating to skin; sl. irritating to eyes

Chem. Descrip.: DEA methoxycinnamate
CAS 56265-46-4; EINECS/ELINCS 260-082-0
Uses: Preservative for pharmaceuticals
Properties: Off-wh. to beige fine crystalline powd.; odorless to faint odor; sol. 10 g in 100 ml IMS; m.p. 87-90 C; pH 6.5-7.0; 98% min. assay

http://www.fun.clariant.com
Chem. Descrip.: Methylparaben (> 50%), butylparaben (> 20%), ethylparaben (<15%), and propylparaben (< 10%)
Uses: Preservative, bactericide, fungicide for pharmaceuticals, topical, ophthalmic, oral, and injectable medicaments, ointments, creams, syrups, multi-dose injections, eye drops, vitamin sol'ns., vaccines
Regulatory: USA, ECC, and Japanese approvals
Properties: Wh. fine cryst. powd., virtually odorless, tasteless; sol. 0.14% in water; m.p. 60-125 C; pH 7.0 (10% aq.)
Use Level: 0.1-0.3% (pharmaceutical creams, lotions, ointments); 0.05-0.10% (with other preservatives in eye drops); 0.05-0.15% (oral medicines, vaccines)
Toxicology: Pract. nonharmful by ingestion; nonirritating to skin; sl. irritant to eyes

Chem. Descrip.: Sodium salts of Nipastat
Uses: Preservative for pharmaceuticals

Nissan Cation AR-4 [NOF http://www.nof.co.jp]
Chem. Descrip.: 1-Hydroxyethyl 2-alkyl imidazolium chloride
Uses: Extraction agent for antibiotics
Properties: Ylsh.-brn. liq.; cationic; 35% min. act.

Nissan Monogly M [NOF http://www.nof.co.jp]
Chem. Descrip.: Glycerol stearate
CAS 123-94-4
Uses: Emulsifier for pharmaceuticals
Properties: Wh. flake; m.p. 53-61 C; HLB 3.0; nonionic; 40% min. monoglyceride content

Nissan Nonion CP-08R [NOF http://www.nof.co.jp]
Chem. Descrip.: Sorbitan caprylate
Uses: Emulsifier, o/w emulsion stabilizer, and thickener for pharmaceuticals
Properties: Liq.; oil-sol.; HLB 7.3; nonionic; 100% conc.

Nissan Nonion DN-202 [NOF http://www.nof.co.jp]
Chem. Descrip.: POE lauryl ether See Laureth
CAS 9002-92-0
Uses: Emulsifier for pharmaceuticals
Properties: Liq.; oil-sol.; HLB 6.2; nonionic; 100% conc.
**Nissan Nonion DN-203** [NOF](http://www.nof.co.jp)
Chem. Descrip.: POE lauryl ether See Laureth
CAS 9002-92-0
Uses: Emulsifier for pharmaceuticals
Properties: Liq.; oil-sol.; HLB 7.9; nonionic; 100% conc.

**Nissan Nonion DN-209** [NOF](http://www.nof.co.jp)
Chem. Descrip.: POE lauryl ether See Laureth
CAS 9002-92-0
Uses: Emulsifier for pharmaceuticals
Properties: Liq.; oil-sol.; HLB 13.2; nonionic; 100% conc.

**Nissan Nonion DS-60HN** [NOF](http://www.nof.co.jp)
Chem. Descrip.: PEG distearate
CAS 9005-08-7
Uses: Emulsifier for pharmaceuticals
Properties: Wh. flake; sol. in water, methanol, warm in diethylene glycol; m.p. 54-62 C; HLB 19; acid no. 2 max.; nonionic; 100% conc.

**Nissan Nonion LP-20R, LP-20RS** [NOF](http://www.nof.co.jp)
Chem. Descrip.: Sorbitan laurate
CAS 1338-39-2; EINECS/ELINCS 215-663-3
Uses: Emulsifier, o/w emulsion stabilizer, and thickener for pharmaceuticals
Properties: Gardner 5 max. oily liq.; sol. in methanol, ethanol, acetone, xylene, ethyl ether, kerosene, disp. in water; HLB 8.6; nonionic; 100% conc.

**Nissan Nonion LT-221** [NOF](http://www.nof.co.jp)
Chem. Descrip.: Polysorbate 20
CAS 9005-64-5
Uses: Emulsifier for pharmaceuticals
Properties: Gardner 6 max. oily liq.; sol. in water, methanol, ethanol, acetone, xylene, ethyl ether, ethylene glycol, HLB 16.7; nonionic; 100% conc.

**Nissan Nonion MP-30R** [NOF](http://www.nof.co.jp)
Chem. Descrip.: Sorbitan myristate
Uses: Emulsifier for pharmaceuticals
Properties: Solid; oil-sol.; HLB 6.6; nonionic; 100% conc.

**Nissan Nonion OP-80R** [NOF](http://www.nof.co.jp)
Chem. Descrip.: Sorbitan oleate
CAS 1338-43-8; EINECS/ELINCS 215-665-4
Uses: Emulsifier for pharmaceuticals
Properties: Gardner 5 max. waxy solid; sol. in methanol, ethanol, xylene, kerosene, ethyl ether, disp. in warm water; HLB 4.7; nonionic; 100% conc.

**Nissan Nonion OP-85R** [NOF](http://www.nof.co.jp)
Chem. Descrip.: Sorbitan sesquioleate
CAS 8007-43-0; EINECS/ELINCS 232-360-1
Uses: Emulsifier for pharmaceuticals
Properties: Gardner 9 max. oily liq.; sol. in ethanol, acetone, xylene, ethyl ether, kerosene, methanol, warm in water; HLB 3.7; nonionic; 100% conc.

**Nissan Nonion OP-88P** [NOF](http://www.nof.co.jp)
Chem. Descrip.: Sorbitan trioleate
CAS 26266-58-9; EINECS/ELINCS 247-569-3
Uses: Emulsifier for pharmaceuticals
Properties: Gardner 9 max. oily liq.; oil-sol.; HLB 1.8; nonionic; 100% conc.

**Nissan Nonion OT-221** [NOF](http://www.nof.co.jp)
Chem. Descrip.: Polysorbate-80 See Polysorbate 80
CAS 9005-65-6
Uses: Emulsifier for pharmaceuticals
Properties: Gardner 6 max. oily liq.; sol. in water, ethanol, acetone, xylene, disp. in methanol; HLB 15.0; nonionic; 100% conc.

**Nissan Nonion PP-40R** [NOF](http://www.nof.co.jp)
Chem. Descrip.: Sorbitan palmitate
CAS 26266-57-9; EINECS/ELINCS 247-568-8
Uses: Emulsifier for pharmaceuticals
Properties: Gardner 7 max. waxy solid; oil-sol.; HLB 6.7; nonionic; 100% conc.

**Nissan Nonion PT-221** [NOF](http://www.nof.co.jp)
Chem. Descrip.: POE sorbitan monopalmitate
Uses: Emulsifier for pharmaceuticals
Properties: Gardner 8 max. oily liq.; sol. in water, methanol, ethanol, acetone, xylene, ethyl ether, ethylene glycol; HLB 15.3; nonionic; 100% conc.

**Nissan Nonion SP-60R** [NOF](http://www.nof.co.jp)
Chem. Descrip.: Sorbitan stearate
CAS 1338-41-6; EINECS/ELINCS 215-664-9
Uses: Emulsifier for pharmaceuticals
Properties: Gardner 5 max. waxy solid; sol. in methanol, ethanol, xylene, kerosene, ethyl ether, disp. in warm water; HLB 4.7; nonionic; 100% conc.
Nissan Nonion ST-221  [NOF \url{http://www.nof.co.jp}]
Chem. Descrip.:  POE sorbitan monostearate
Uses:  Emulsifier for pharmaceuticals
Properties:  gardner 5 max. oily liq.; sol. in water, methanol, ethanol, acetone, xylene, ethyl ether, kerosene; HLB 14.9; nonionic; 100% conc.

N-Lok®  [Nat'l. Starch & Chem./Food Innovation \url{http://www.foodinnovation.com}]
Chem. Descrip.:  Food starch modified with corn syrup  See Food starch, modified
CAS 53124-00-8; 8029-43-4
Uses:  Encapsulant for vitamins
Features:  Low visc.; exc. resist. to oxidation; total replacement for gum Arabic, gelatin
Regulatory:  FDA 21CFR §172.892; DOT nonregulated; SARA §313 nonreportable
Properties:  Wh. powd.; starch odor; sol. in water; m.w. > 10,000; sp.gr. 1.5; pH ≈ 4 (1%); ≈ 6% moisture
Toxicology:  Possible physical irritant from dust particles; particulates may scratch eye surfs. and cause mech. irritation; possible nuisance dust by inh.; maintain below TWA 10 mg/m³; low oral toxicity; low toxicity by skin contact; TSCA listed
Precaution:  Potential for dust explosion; minimize dust generation
Hazardous Decomp. Prods.:  Does not undergo spontaneous decomp.; typ. combustion prods.: CO, CO₂, N, water
HMIS:  Health 1, Flammability 1, Reactivity 0
Storage:  Store @ ambient temps.; sensitive to static electricity

N-Lok® 1930  [Nat'l. Starch & Chem./Food Innovation \url{http://www.foodinnovation.com}]
Chem. Descrip.:  Food starch modified with corn syrup added  See Food starch, modified
CAS 53124-00-8; 8029-43-4
Uses:  Encapsulating agent for vitamins
Features:  Because of its lower viscosity, this product requires 25% less water than gum arabic
Regulatory:  FDA 21CFR §172.892; DOT nonregulated; SARA §313 nonreportable
Properties:  Wh. powd.; starch odor; dispenses in water; m.w. > 10,000; sp.gr. 1.5; pH ≈ 4 (1%); ≈ 6% moisture
Toxicology:  Possible physical irritant from dust particles; particulates may scratch eye
Trade Name Reference

Purebright MB-37 Series [NOF http://www.nof.co.jp]
Chem. Descrip.: 2-Methacryloyloxyethyl phosphorylcholine and n-Butyl methacrylate
See Butyl methacrylate
CAS 67881-98-5; 97-88-1
Uses: Solubilizer for pharmaceuticals that have low aqueous solubility
Features: Shows only slight hemolization in comparison with other solubilizers
Toxicology: LD50 (oral, mouse) > 25,600 mg/kg, (IV, rat) > 1000 mg/kg; no skin irritation

Nofable AO-90 [NOF http://www.nof.co.jp]
Chem. Descrip.: Oleyl alcohol
CAS 143-28-2; EINECS/ELINCS 205-597-3
Uses: Surfactant suitable for use in pharmaceuticals, cosmetics, foods, electronics, etc.
Properties: Colorless; odorless; nonionic

Nofable AO-99 [NOF http://www.nof.co.jp]
Chem. Descrip.: Oleyl alcohol
CAS 143-28-2; EINECS/ELINCS 205-597-3
Uses: Surfactant suitable for use in pharmaceuticals, cosmetics, foods, electronics, etc.
Properties: Colorless; odorless; nonionic

Nofable BO-90K [NOF http://www.nof.co.jp]
Chem. Descrip.: Potassium oleate
CAS 143-18-0; EINECS/ELINCS 205-590-5
Uses: Surfactant suitable for use in pharmaceuticals, cosmetics, foods, electronics, etc.
Properties: Colorless; odorless

Nofable BO-90N [NOF http://www.nof.co.jp]
Chem. Descrip.: Sodium oleate
CAS 143-19-1; EINECS/ELINCS 205-591-0
Uses: Surfactant suitable for use in pharmaceuticals, cosmetics, foods, electronics, etc.
Properties: Colorless; odorless

Nofable BO-90T [NOF http://www.nof.co.jp]
Chem. Descrip.: Triethanolamine oleate See TEA-oleate
CAS 2717-15-9; EINECS/ELINCS 220-311-7
Uses: Surfactant suitable for use in pharmaceuticals, cosmetics, foods, electronics, etc.
Properties: Colorless; odorless; anionic

Nofable BO-99K [NOF http://www.nof.co.jp]
Chem. Descrip.: Potassium oleate
CAS 143-18-0; EINECS/ELINCS 205-590-5

Uses: Surfactant suitable for use in pharmaceuticals, cosmetics, foods, electronics, etc.
Properties: Colorless; odorless; anionic

Nofable BO-99N [NOF http://www.nof.co.jp]
Chem. Descrip.: Sodium oleate
CAS 143-19-1; EINECS/ELINCS 205-591-0
Uses: Surfactant suitable for use in pharmaceuticals, cosmetics, foods, electronics, etc.
Properties: Colorless; odorless

Nofable BO-99T [NOF http://www.nof.co.jp]
Chem. Descrip.: Triethanolamine oleate See TEA-oleate
CAS 2717-15-9; EINECS/ELINCS 220-311-7
Uses: Surfactant suitable for use in pharmaceuticals, cosmetics, foods, electronics, etc.
Properties: Colorless; odorless; anionic

Nofable CO-90 [NOF http://www.nof.co.jp]
Chem. Descrip.: Cholesterol oleate See Cholesteryl oleate
CAS 303-43-5; EINECS/ELINCS 206-142-1
Uses: Surfactant suitable for use in pharmaceuticals, cosmetics, foods, electronics, etc.
Properties: Colorless; odorless

Nofable CO-99 [NOF http://www.nof.co.jp]
Chem. Descrip.: Cholesterol oleate See Cholesteryl oleate
CAS 303-43-5; EINECS/ELINCS 206-142-1
Uses: Surfactant suitable for use in pharmaceuticals, cosmetics, foods, electronics, etc.
Properties: Colorless; odorless

Nofable EAO-80 [NOF http://www.nof.co.jp]
Chem. Descrip.: POE oleyl ether See Oleth CAS 9004-98-2
Uses: Surfactant suitable for use in pharmaceuticals, cosmetics, foods, electronics, etc.
Properties: Colorless; odorless; nonionic

Nofable EAO-90 [NOF http://www.nof.co.jp]
Chem. Descrip.: POE oleyl ether See Oleth CAS 9004-98-2
Uses: Surfactant suitable for use in pharmaceuticals, cosmetics, foods, electronics, etc.
Properties: Colorless; odorless; nonionic

Nofable EAO-99 [NOF http://www.nof.co.jp]
Chem. Descrip.: POE oleyl ether See Oleth

*See Polyglyceryl-2 oleate*

**CAS 9007-48-1; EINECS/ELINCS 279-230-0**

**Uses:** Surfactant suitable for use in pharmaceuticals, cosmetics, foods, electronics, etc.

**Properties:** Colorless; odorless; nonionic

**Nofable PGO-902L** [NOF http://www.nof.co.jp]

**Chem. Descrip.:** Linear *tetraglycerol oleate*  
*See Polyglyceryl-4 oleate*

**CAS 9007-48-1; EINECS/ELINCS 256-367-4**

**Uses:** Surfactant suitable for use in pharmaceuticals, cosmetics, foods, electronics, etc.

**Properties:** Colorless; odorless; nonionic

**Nofable PGO-904L** [NOF http://www.nof.co.jp]

**Chem. Descrip.:** Linear *tetracyglycerol oleate*  
*See Polyglyceryl-4 oleate*

**CAS 9007-48-1**

**Uses:** Surfactant suitable for use in pharmaceuticals, cosmetics, foods, electronics, etc.

**Properties:** Colorless; odorless; nonionic

**Nofable PGO-904M** [NOF http://www.nof.co.jp]

**Chem. Descrip.:** Mixed *tetracyglycerol oleate*  
*See Polyglyceryl-4 oleate*

**CAS 9007-48-1**

**Uses:** Surfactant suitable for use in pharmaceuticals, cosmetics, foods, electronics, etc.

**Properties:** Colorless; odorless; nonionic

**Nofable PGO-906L** [NOF http://www.nof.co.jp]

**Chem. Descrip.:** Linear *hexaglycerol oleate*  
*See Polyglyceryl-6 oleate*

**CAS 9007-48-1**

**Uses:** Surfactant suitable for use in pharmaceuticals, cosmetics, foods, electronics, etc.

**Properties:** Colorless; odorless; nonionic

**Nofable PGO-906M** [NOF http://www.nof.co.jp]

**Chem. Descrip.:** Mixed *hexaglycerol oleate*  
*See Polyglyceryl-6 oleate*

**CAS 9007-48-1**

**Uses:** Surfactant suitable for use in pharmaceuticals, cosmetics, foods, electronics, etc.

**Properties:** Colorless; odorless; nonionic

**Nofable PGO-908L** [NOF http://www.nof.co.jp]

**Chem. Descrip.:** Linear *octaglycerol oleate*  
*See Polyglyceryl-8 oleate*

**CAS 9007-48-1**

**Uses:** Surfactant suitable for use in pharmaceuticals, cosmetics, foods, electronics, etc.

**Properties:** Colorless; odorless; nonionic

**Nofable PGO-990L** [NOF http://www.nof.co.jp]

**Chem. Descrip.:** Linear *decaglycerol oleate*  
*See Polyglyceryl-10 oleate*

**CAS 9007-48-1; EINECS/ELINCS 279-230-0**

**Uses:** Surfactant suitable for use in pharmaceuticals, cosmetics, foods, electronics, etc.

**Properties:** Colorless; odorless; nonionic

**Nofable PGO-990M** [NOF http://www.nof.co.jp]

**Chem. Descrip.:** Mixed *decaglycerol oleate*  
*See Polyglyceryl-10 oleate*

**CAS 9007-48-1; EINECS/ELINCS 279-230-0**

**Uses:** Surfactant suitable for use in pharmaceuticals, cosmetics, foods, electronics, etc.

**Properties:** Colorless; odorless; nonionic
Trade Name Reference

CAS 9007-48-1; EINECS/ELINCS 279-230-0

Uses: Surfactant suitable for use in pharmaceuticals, cosmetics, foods, electronics, etc.

Properties: Colorless; odorless; nonionic

Chem. Descrip.: Sorbitan trioleate
CAS 26266-58-0; EINECS/ELINCS 247-569-3
Uses: Surfactant suitable for use in pharmaceuticals, cosmetics, foods, electronics, etc.
Trade Name Reference

**Non-Diastatic Malt Syrup #40600** [MLG Enterprises]

*Chem. Descrip.*: Liq. extract of corn and malted barley  
*See Malt extract*

*CAS* 8002-48-0; *EINECS/ELINCS* 232-310-9

*Uses*: Sweetener, malt flavor, colorant, humectant, nutrient, shelf life extender, texturizer for pharmaceuticals

*Features*: Enriches color to a rich golden appearance; contributes to nutritional value

*Regulatory*: Kosher

*Properties*: pH 4.3-5.5 (10%); 10-25% solids

*Storage*: Store @ 40-90 F; 6 mos. max. shelf life

---

**Noramium® MS 50** [Ceca SA]

*Chem. Descrip.*: Tallow trimethyl ammonium chloride  
*See Tallowtrimonium chloride*

*CAS* 8030-78-2; *EINECS/ELINCS* 232-447-4

*Uses*: Emulsifier for pharmaceuticals

*Properties*: Liq.; cationic; 50% conc.

---

**Norgel** [United-Guardian](http://www.u-g.com); [S. Black](http://www.sblack.com); [Sederma](http://www.sederma.fr)

*Chem. Descrip.*: Glycerol polymethacrylate

*CAS* 146126-21-8

*Uses*: Antibacterial for medical field, 'preservative-free' prods.

*Features*: Nondrying high visc. aq. polymeric gel; capable of killing bacteria, yeast, and molds

*Regulatory*: DOT nonregulated

*Properties*: Colorless cl. visc. gel; char. odor; completely water-sol.; dens. 1.2 g/cc; pH 5-6

**Novata® 299 PH** [Cognis/Care Chems.]

*Chem. Descrip.*: Cocoglycerides

*CAS* 68606-18-8

*Uses*: Base for suppository and vaginal preps.; consistency giving agent for pharmaceutical ointments, creams, stick preps.

*Regulatory*: NF, DAB, Ph.Eur. compliance for hard fat

*Properties*: Wh. fatty fused, flakes, or pastille which melt to a colorless to sl. ylsh. liq. when heated; almost odorless and tasteless; dens. 0.955-0.975 (20 C); m.p. 33.5-35.5 C; solid. pt. 31.5-33.5 C; acid no. 0.3 max.; iodine no. 3 max.; sapon. no. 235-250; hyd. no. 5 max.; ref. index 1.4490 (40 C); nonionic; 100% conc.

*Storage*: 2 yr. min. storage life in original containers at temps. below 30 C under dry conditions

---

**Novata® AB PH** [Cognis/Care Chems.]

*Chem. Descrip.*: Cocoglycerides

*CAS* 68606-18-8

*Uses*: Base for suppositories and vaginal globules; consistency giving agent for pharmaceutical ointments, creams, stick preps.; esp. useful during processing of very light and bulky substances

*Regulatory*: NF, DAB, Ph.Eur. compliance for hard fat

*Properties*: Wh. fatty pellets which melt to a colorless to sl. ylsh. liq. when heated; almost odorless and tasteless; dens. 0.955-0.975 (20 C); m.p. 29-31 C; solid. pt. 26.5-28.5 C; acid no. 0.3 max.; iodine no. 3 max.; sapon. no. 230-245; hyd. no. 25-40; ref. index 1.4530 (40 C); nonionic; 100% conc.

*Storage*: 2 yr. min. storage life in original containers at temps. below 30 C under dry conditions

---

**Novata® A PH** [Cognis/Care Chems.]

*Chem. Descrip.*: Cocoglycerides

*CAS* 68606-18-8

*Uses*: Base for suppositories produced on deepfreeze automatic devices; esp. suitable for extreme cooling

*Regulatory*: NF, DAB, Ph.Eur compliance for
hard fat

Properties: Wh. fatty pellets which melt to a colorless to sl. ylsh. liq. when heated; almost odorless and tasteless; dens. 0.955-0.975 (20 C); m.p. 33.5-35.5 C; solid. pt. 29-31 C; acid no. 0.3 max.; iodine no. 3 max.; sapon. no. 225-240; hyd. no. 35-45; ref. index 1.4520 (40 C); nonionic; 100% conc.

Storage: 2 yr. min. storage life in original containers at temps. below 30 C under dry conditions

Novata® BCF PH [Cognis/Care Chems.]
Chem. Descrip.: Cocoglycerides
CAS 68606-18-8
Uses: Base for suppository and vaginal preps.; consistency giving agent for pharmaceutical ointments, creams, stick preps.
Regulatory: NF, DAB, Ph.Eur. compliance for hard fat

Properties: Wh. fatty pellets which melt to a colorless to sl. ylsh. liq. when heated; almost odorless and tasteless; dens. 0.955-0.975 (20 C); m.p. 33.5-35.5 C; solid. pt. 32-34 C; acid no. 0.3 max.; iodine no. 3 max.; sapon. no. 230-245; hyd. no. < 15; ref. index 1.4530 (40 C); nonionic; 100% conc.

Storage: 2 yr. min. storage life in original containers at temps. below 30 C under dry conditions

Novata® B PH [Cognis/Care Chems.]
Chem. Descrip.: Cocoglycerides
CAS 68606-18-8
Uses: Base for suppository and vaginal preps.; consistency giving agent for pharmaceutical ointments, creams, stick preps.
Regulatory: NF, DAB, Ph.Eur. compliance for hard fat

Properties: Wh. fatty melted, flakes, or pastille which melt to a colorless to sl. ylsh. liq. when heated; almost odorless and tasteless; dens. 0.955-0.975 (20 C); m.p. 33-35.5 C; solid. pt. 31-33 C; acid no. 0.3 max.; iodine no. 3 max.; sapon. no. 225-240; hyd. no. 20-30; ref. index 1.4530 (40 C); nonionic; 100% conc.

Storage: 2 yr. min. storage life in original containers at temps. below 30 C under dry conditions

Novata® BD PH [Cognis/Care Chems.]
Chem. Descrip.: Cocoglycerides
CAS 68606-18-8
Uses: Base for suppository and vaginal preps.; consistency giving agent for pharmaceutical ointments, creams, stick preps.

Properties: Wh. powd.; sp.gr. 1.41; bulk dens. 208 kg/m³; pH 4 max. (1% disp.)

Storage: Store in sealed, tightly closed standard Novate containers; protect from moisture and excessive temps.

**Chem. Descrip.:** Oleyl alcohol

| CAS | 143-28-2; EINECS/ELINCS 205-597-3 |
| Uses | Superfatting agent, cosolvent, lubricant, emollient in pharmaceutical topicals |
| Features | Outstanding color, odor |
| Regulatory | USP/NF, FDA Inactive Ingredients Guide listed |
| Properties | Essentially colorless oily cl. liq.; nonionic |
| Use Level | 2-30% |

**Chem. Descrip.:** Ethylene-methacrylic acid copolymer resin

| CAS | 25053-53-6 |
| Uses | Adhesive/sealant resin for use in blown and cast film extrusion for medical/pharmaceutical pkg. |
| Features | High clarity grade |
| Regulatory | FDA 21CFR §177.1330 compliant |
| Properties | Melt flow 1.5 dg/min; f.p. 81 C; m.p. 99 C; Vicat soften. pt. 75 C; ultimate tens. str. 38.6 MPa (MD); ultimate elong. 500% (MD); Spencer impact str. 27 J/mm; Dart drop str. 7.9 g/μm; Elmendorf tear str. 54 mN/μm; 12% methacrylic acid |
| Precaution | Do not use in medical applics. involving permanent implantation in human body |

**Chem. Descrip.:** Compressible sucrose, invert sugar, and magnesium stearate

| CAS | 57-50-1; 8013-17-0; 557-04-0; EINECS/ELINCS 200-334-9; $; 209-150-3 |
| Uses | Carrier, vehicle, diluent, excipient, taste masking agent for pharmaceutical tablets, especially suited for chewable tablets |
| Features | Directly compressible; compat. with flavors and colorants; avail. in colors; effective in masking harsh flavors of many active ingreds. |
| Regulatory | USP/NF |
| Properties | Wh. free-flowing gran., sweet taste; 50% max. > 250 μ; 10% max. < 125 μ |

**Chem. Descrip.:** Compressible sucrose, invert sugar, and magnesium stearate

| CAS | 57-50-1; 8013-17-0; 557-04-0; EINECS/ELINCS 200-334-9; $; 209-150-3 |
| Uses | Carrier, vehicle, diluent, excipient, taste masking agent for pharmaceutical tablets, especially suited for chewable tablets |
| Features | Directly compressible; compat. with flavors and colorants; avail. in colors; effective in masking harsh flavors of many active ingreds. |
| Regulatory | USP/NF |
| Properties | Wh. free-flowing gran., sweet taste; 3% max. > 420 μ; 8% max. < 75 μ |

**Chem. Descrip.:** Compressible sucrose and maltodextrin

| CAS | 57-50-1; 9050-36-6; EINECS/ELINCS 200- |
| Uses | Carrier, vehicle, diluent, excipient, taste masking agent for pharmaceutical tablets, especially suited for chewable tablets |
| Features | Directly compressible; compat. with flavors and colorants; avail. in colors; effective in masking harsh flavors of many active ingreds. |
| Regulatory | USP/NF |
| Properties | Wh. free-flowing gran., sweet taste; 3% max. > 420 μ; 8% max. < 75 μ |
Trade Name Reference

334-9; 232-940-4
Uses: Carrier, vehicle, diluent, excipient, taste masking agent for pharmaceutical tablets, especially suited for chewable tablets
Features: Directly compressible; compat. with flavors and colorants; avail. in colors; effective in masking harsh flavors of many active ingreds.
Regulatory: USP/NF
Properties: Wh. free-flowing gran., sweet taste; 75% min. >150 μ, 3% max. > 420 μ; 8% max. < 75 μ
NutraSweet® [NutraSweet http://www.nutrasweet.com]
Chem. Descrip.: Aspartame
CAS 22839-47-0; EINECS/ELINCS 245-261-3
Uses: Sweetener for foods, hot/cold beverage prods., pharmaceuticals
Features: Low-calorie; approx. 200 times sweeter than sugar; limited use in cooking and baking; loss of sweetness may result on prolonged exposure to high temps.; 2 calories/tsp.
Properties: Crystalline powd., gran., encapsulated, micronized, or liq.; odorless; particle size < 150 µm; bulk dens. 0.25 kg/l; 100% act.
Storage: Indefinite shelf life if kept dry, away from heat and humidity
Nutrateric™ [Colorcon http://www.colorcon.com]
Chem. Descrip.: Aq. fully plasticized liq. disp. of Surelease® (ethylcellulose) and NS Enteric
CAS 9004-57-3;
Uses: Enteric delayed-release coating system for dietary supplement tablets and gelatin capsules and other pharmaceutical products
Features: Meets dietary supplement enteric disintegration requirements
Regulatory: GRAS
Chem. Descrip.: Piroctone olamine; piroctoneolamine
CAS 68890-66-4; EINECS/ELINCS 272-574-2
Uses: Antidandruff agent, germicide, fungicide in shampoos and hair care such as tonics and cream rinses; also used in deodorants and acne preps.
Features: Good thermal stability; compatible with most surfactants, additives and active ingredients
Properties: Wh. to ylsh. crystalline powd.; faint characteristic odor; sol. in alcohol-water solns., surfactants, sl. sol. in water; ≈ 100% act.
Toxicology: Practically nontoxic
Chem. Descrip.: Hydroxylated lanolin
CAS 68424-66-8; EINECS/ELINCS 270-315-8
Uses: W/o emulsifier, aux. emulsifier, stabilizer, pigment wetting agent/dispersant, emollient, and conditioner in absorp. bases, topical pharmaceuticals
Properties: Yel.-amber to lt. tan waxy solid; misc. with common oil phase ingredients, sol. at low levels in castor oil; oil-misc.; m.p. 39-46 C; HLB 4; acid no. 10 max.; sapon. no. 95-110; nonionic; 100% conc.
Ointment Base No. 4 [Penreco http://www.penreco.com]
Chem. Descrip.: Wh. petrolatum USP
CAS 8027-32-5; EINECS/ELINCS 232-373-2
Uses: Ointment base for ophthalmic and topical ointments; carrier for medical materials
Regulatory: FDA 21CFR 172.880, 178.3700, 573.720; OSHA and FDA nonhazardous
Properties: Wh. semisolid, odorless; sol. in hydrocarbons; insol. in water; sp.gr. 0.8 (60/60 F); visc. 60-70 SUS (210 F); m.p. 118-125 F; congeal pt. 109-119 F; flash pt. (COC) 400 F
Toxicology: Pract. nontoxic by ingestion, but laxative props. may cause abdominal cramps, diarrhea; minimally irritating to eyes and skin on direct contact; STEL 10 mg/m³ (as oil mist); TSCA listed
Precaution: Combustion may produce dense smoke, CO, CO₂, other oxides; may react with strong oxidizing agents
Storage: Store in closed containers away from heat, sparks, open flame, oxidizers
Ointment Base No. 6 [Penreco http://www.penreco.com]
Chem. Descrip.: Wh. petrolatum USP
CAS 8027-32-5; EINECS/ELINCS 232-373-2
Uses: Ointment base for ophthalmic and topical ointments; carrier for medical materials
Regulatory: FDA 21CFR 172.880, 178.3700, 573.720; OSHA and FDA nonhazardous
Properties: Wh. semisolid, odorless; sol. in hydrocarbons; sp.gr. 0.864 (60/60 F); visc. 60-70 SUS (210 F); m.p. 122-133 F; congeal pt. 120-130 F; flash pt. (COC) 400 F

Toxicology: TSCA listed

Precaution: Combustion may produce dense smoke, CO, CO2, other oxides; may react with strong oxidizing agents

Storage: Store in closed containers away from heat, sparks, flame, oxidizers

Olamida UD [Fabriquimica http://www.fabriquimica.com.ar]

Chem. Descrip.: Undecylenamide DEA (1:1)
CAS 60239-68-1; EINECS/ELINCS 246-914-5
Uses: Antidandruff agent
Properties: Acid no. < 10; amine no. 35-55; pH 8-10 (5%)

Chem. Descrip.: Undecylenamide DEA (2:1)
CAS 60239-68-1; EINECS/ELINCS 246-914-5
Uses: Antidandruff agent
Properties: Acid no. < 10; amine no. 115-125; pH 9-11 (5%)

ONAMER® M [Stepan http://www.stepan.com]

Chem. Descrip.: Polyquaternium-1 and polidronium chloride
Chem. Analysis: 33% assay; 10% chlorine content; 1.5% free amine
CAS 66507-71-9; 75345-27-6
Uses: Preservative; antimicrobial for use in dermatological applications and transdermal patch pharmaceuticals, in products targeting mucus membrane or other sensitive tissue; antimicrobial for use as surface protection for medical devices
Properties: Cl. amber to dk.-brown visc. liq.; mild characteristic odor; completely sol. in water; flash pt. (PMCC) (> 93.9 C; pH 7.3; cationic; 3-040% act.
Toxicology: May cause irritation to eyes, skin, and respiratory system; ing. of large amounts may produce GI disturbances including irritation, nausea, and diarrhea; not a skin sensitizter; nonmutagenic; TSCA listed
Precaution: Wear chemical goggles and gloves; may react with strong oxidizing agents

Hazardous Decomp. Prods.: May yield oxides of nitrogen and ammonia
HMIS: Health 1, Flammability 1, Reactivity 0

Opadry® [Colorcon http://www.colorcon.com]
Chem. Descrip.: FDA-approved pigments and titanium dioxide in a solv. base
Uses: Edible monogramming ink for pharmaceuticals
Features: Finely dispersed; exc. adhesion; provides sharp, clear monograms, minimal ink buildup on rollers

Opadry® WB [Colorcon http://www.colorcon.com]
Chem. Descrip.: FDA-approved pigments and titanium dioxide in a water base
Uses: Edible monogramming ink for pharmaceuticals
Features: Provides sharp, clear monograms
Properties: Minimal odor

Opadry® [Colorcon http://www.colorcon.com]
Chem. Descrip.: Coating system combining polymer, plasticizer and pigment in dry conc.
Uses: One-step colorant and film coating system for aq. and org. solv. systems for pharmaceuticals including ibuprofen, acetaminophen, wax matrix tablets, multivitamin-mineral and calcium tablets
Features: Optimizes solution coating solids content; reduces water contact with product; eliminates the use of preservatives necessary when holding conventional aq. sol'n.

Opadry® AMB [Colorcon http://www.colorcon.com]
Chem. Descrip.: Aq. moisture barrier film coating system
Uses: Moisture barrier for coating oral and solid dosage pharmaceuticals, tablet sealing and polishing applics.
Features: Protects from environmental moisture; pH independent release; patent-pending

Opadry® Enteric [Colorcon http://www.colorcon.com]
Chem. Descrip.: Complete enteric film coating system combining polymer (PVAP), plasticizer and pigment in a dry conc.
Uses: One-step enteric film coating system for pharmaceutical org. solv. systems, providing targeted enteric drug release for tablets, hard and soft gelatin capsules
Features: High film strength and adhesion; can be used with highly moisture-sensitive materials

Opadry II® [Colorcon http://www.colorcon.com]
Chem. Descrip.: Aq. moisture barrier film coating system
Trade Name Reference

Opadry® fx™ [Colorcon http://www.colorcon.com]
Chem. Descrip.: Coating system combining polymer, plasticizer and pigment in dry conc.
Uses: One-step aq. colorant film coating system for pharmaceuticals including acetaminophen caplets, tri-buffered aspirin, multivitamin-multimineral tablets
Features: Enhanced light stability; reduces coating time; superior adhesion, sharper logo definition and improved gloss on difficult to coat cores
Regulatory: USP/NF, EP, JP/JPE

Opaglos® [Colorcon http://www.colorcon.com]
Chem. Descrip.: Coating sol’n. in a stabilized shellac base
Uses: Clear coating sol’n. for pharmaceutical tablet sealing and polishing applics.

Opaglos® 2 [Colorcon http://www.colorcon.com]
Chem. Descrip.: Aq. dry film coating system
Uses: Film coating for solid oral pharmaceutical tablets, tablet sealing and polishing applics.
Features: Clear; superior high gloss; exc. film str. and adhesion; good stability and dissolution; printable surf.; nonyellowing
Properties: Gran. powd.; disperses in ambient temp. water; visc. 250 - 450 cP (7.5% solids in sol’n.); pH 6.8-7.2 (7.5% solids in sol’n.)
Storage: After 1 yr. re-evaluate product; store in tightly closed containers @ < 30 C (in powder form); ≤ 24 h (in sol’n. form)

Opalux® [Colorcon http://www.colorcon.com]
Chem. Descrip.: Aq. color conc. of FDA-approved pigments and titanium dioxide in sugar syrup
Uses: Colorant for sugar-coated tablets
Features: Excellent batch-to-batch color reproducibility; improved light stability over comparative dye shades
Properties: Liq.

Optim™ Glycerine 99.7 [Dow http://www.dow.com]
Chem. Descrip.: Glycerin FCC, USP
CAS 56-81-5; EINECS/ELINCS 200-289-5
Uses: Humectant, solvent in foods, personal care prods., pharmaceuticals
Regulatory: FDA GRAS; E422 compliant; kosher grade; SARA §311/312 nonhazardous
Properties: Colorless visc. liq.; odorless; sweet taste; misc. with ethanol, IPA, water; immiscible with benzene, chloroform, ethyl ether, heptane; m.w. 92.09; sp.gr. 1.26201; dens. 1.25802 g/cm³; visc. 1410 cps (20 C);
vapor pressure 0.0025 mm Hg (50 C); f.p. 17 C; b.p. 290 C; flash pt. (PMCC) 195.5 C; autoignition temp. 370 C; ref. index 1.47399 (20 C); surf. tens. 63 dynes/cm (20 C); dielec. const. 41.14 (2 x 10^6 Hz, 20 C); 99.7% act.

**Toxicology:**
- LD$_{50}$ (oral, rat) 17,000-27,200 mg/kg, (skin, rabbit) > 10,000 mg/kg; may cause sl. transient eye irritation; may be absorbed through skin in potentially harmful amts. when applied in lg. quantities to severe burns; extremely low toxicity by ing.; swallowing larger amts. may cause injury, CNS effects, inc. blood sugar levels; inh. of heated material or mist may cause upper respiratory irritation; may cause kidney/liver/GI effects in very lg. doses

**Environmental:**
- High biodeg.; BOD$_5$ 0.54 p/p; low bioconcentration potential; LC$_{50}$ (fish) > 100 mg/l; pract. nontoxic to fish; prevent entry into sewers, storm drains, surf. water, soil

**Precaution:** Incompat. with strong oxidizing agents (e.g., sodium hypochlorite, hypochlorous acid)

**Hazardous Decomp. Prods.:** Acrolein; combustion: aldehydes, CO, CO$_2$

**Storage:** Store @ 64-130 F

**Optisharp™ (Zeaxanthin) 5% CWS/S-TG**
[DMS Nutritional Prods. USA http://www.nutraaccess.com]

**Chem. Descrip.:** Zeaxanthin in corn starch-coated matrix of modified food starch and sucrose See Corn (Zea mays) starch; Food starch, modified

**Chem. Analysis:** 5.0% min. zeaxanthin content; 8% loss on drying

**CAS** 144-68-3; 9005-25-8; 53124-00-8; 57-50-1

**Uses:** Dietary supplement for film-coated, chewable effervescent tablets and hard-shell capsules

**Properties:** Reddish free-flowing particles; 100% through sieve #20, 85% min. through sieve #40, 15% max. through sieve #100; disp. in cold water; m.w. 568.89

**Precaution:** Wear safety glasses and rubber gloves; avoid ing., inh., and dust

**Storage:** 36 mos. shelf life; store in original containers away from air, heat, humidity, and heat @ < 15 C; once open use contents quickly

**Uses:** Foaming surfactant, solubilizer in dermopharmaceuticals

**Properties:** Liq.; nonionic; 60% conc.

**Oramix® L30** [Seppic http://www.seppic.com]

**Chem. Descrip.:** Sodium lauroyl sarcosinate

**CAS** 137-16-6; EINECS/ELINCS 205-281-5

**Uses:** Bacteriostat in antidandruff shampoo, medicinal soaps; solubilizer for antiseptic agents; anticaries agent in toothpaste

**Features:** Mild

**Properties:** Liq.; sol. in water; pH 7.5-8.5 (10%); anionic; 28.5% min. act.

**Use Level:** 1-5% (toothpaste), 1-5% (aerosols), 5-15% (shampoos), 10-50% (bath foams), 5-30% (medicinal liq. soap)

**Toxicology:** LD$_{50}$ (oral) 2888 mg/kg; nontoxic by ing.; nonirritating to skin; irritating to eyes

**Environmental:** 100% biodeg.

**Orange Wax, Deodorized** [Koster Keunen http://www.kosterkeunen.com]

**Chem. Descrip.:** Orange waxes See Orange (Citrus aurantium dulcis) peel wax

**CAS** 144514-51-2

**Uses:** Moisturizer, emollient, UV-A and -B absorber, antioxidant, wetting agent, antimicrobial, anti-inflammatory for creams, lotions, sun care, deodorants

**Features:** Mild
Trade Name Reference

Chem. Descrip.: Nylon 6
CAS 25038-54-4
Uses: Raw material for pharmaceuticals; absorbent, carrier in personal hygiene prods.
Properties: Natural uncolored powd.; avg. particle size 20 µ

Chem. Descrip.: Nylon 6, titanium dioxide
Uses: Raw material for pharmaceuticals; absorbent, carrier in personal hygiene prods.
Properties: Wh. extra-fine powd.; avg. particle size 10 µ

Chem. Descrip.: Nylon 12
CAS 25038-74-8
Uses: Raw material for pharmaceuticals; absorbent, carrier in personal hygiene prods.
Properties: Natural uncolored powd.; avg. particle size 20 µ

Chem. Descrip.: Nylon 12
CAS 25038-74-8
Uses: Raw material for pharmaceuticals; absorbent, carrier in personal hygiene prods.
Features: Absorbs between 15-25% perfume and enables its release over a period of time
Properties: Natural uncolored extra-fine powd.; avg. particle size 10 µ

Chem. Descrip.: Nylon 12
CAS 25038-74-8
Uses: Raw material for pharmaceuticals; absorbent, carrier used in personal hygiene prods.
Features: Can be supplied impregnated with 12.5% vitamin E or other actives
Properties: Natural uncolored ultra-fine powd.; avg. particle size 5 µ

Chem. Descrip.: Origanum vulgare extract in lecithin, propylene glycol
Uses: Antioxidant for pharmaceuticals
Features: Natural; heat-stable; stable and act. at high temps. (180 C)
Regulatory: FDA GRAS
Properties: Dk. brn. liq.; mild tea-like odor; completely sol. in oil; disp. in aq. systems; 8.5% act.
Toxicology: Nontoxic
Storage: 1 yr. shelf life when stored in cool, dry place

Chem. Descrip.: Origanum vulgare extract
Uses: Anti-inflammatory agent; anti-allergic agent
Features: Natural; allows for “green” labeling; highly effective at low dosing; supports antimicrobial activity; organoleptic neutral
Properties: Sol. in water; disp. in oil

Chem. Descrip.: Origanum vulgare extract
Uses: Antioxidant in pharmaceuticals and to protect vitamins in emulsions
Features: Natural; easy skin penetration; very effective to protect oxygen-sensitive ingreds., e.g., natural fragrances, colors, flavors; stable and act. @ 180 C
Regulatory: FDA GRAS
Properties: Yel. to lt. brn. powd.; mild tea-like odor; completely sol. in water; 7% act.
Toxicology: Nontoxic
Storage: 2 yrs. shelf life when stored in cool, dry place

Chem. Descrip.: Mixt. of Organox™ WS (water soluble Origanum vulgare) and cranberry extract
Uses: Anti-inflammatory agent; anti-allergic agent

Handbook of Pharmaceutical Additives, Third Edition 505
Trade Name Reference

Features: Natural; allows for "green" labeling; highly effective at low dosing; supports antimicrobial activity; organoleptic neutral
Properties: Sol. in water; disp. in oil

Chem. Descrip.: Origanum vulgare extract
See Wild marjoram extract
Uses: Anti-inflammatory agent; anti-allergic agent
Features: Natural; allows for "green" labeling; highly effective at low dosing; supports antimicrobial activity; organoleptic neutral; used in prods. sensitive to sl. taste or color changes
Properties: Sol. in water; disp. in oil

Chem. Descrip.: Origanum vulgare extract
See Wild marjoram extract
Uses: Anti-inflammatory agent; anti-allergic agent
Features: Natural; allows for "green" labeling; highly effective at low dosing; supports antimicrobial activity; organoleptic neutral; used in prods. sensitive to sl. taste or color changes
Properties: Sol. in water; disp. in oil

Chem. Descrip.: Dimethyl oxazolidine
CAS 51200-87-4; EINECS/ELINCS 231-810-4
Uses: Antibacterial for topical pharmaceuticals
Features: Protects against bacterial growth
Properties: APHA 25 max. liq.; sol. in water, alcohols, glycols, min. oil, benzene, acetone, chlorinated hydrocarbons; sp.gr. 1.085 (30/20 C); f.p. 0 C; b.p. 71 C (15 mm Hg); flash pt. (TCC) 79 C; pH 8-9; surf. tens. 36.5 dynes/cm; 97% act.
Use Level: 500-2000 ppm
Toxicology: LD50 (oral, male rat) 5250 mg/kg, (dermal, rabbits) 1948 mg/kg; severely irritating to skin and eyes
Precaution: Combustible liq.; corrosive to copper, aluminum, or their alloys
Storage: Store in dry location away from heat, open flame; keep in original closed container

Oxyban®-E [Dow http://www.dow.com]
Chem. Descrip.: 7-Ethyl bicyclooxazolidine
CAS 7747-35-5; EINECS/ELINCS 231-810-4
Uses: Antibacterial for topical pharmaceuticals
Features: Broad spectrum; rec. @ pH 6-10.5; compat. with cationic, anionic, and nonionic surfactant systems
Properties: APHA 100 max. liq.; low odor; sol. in water, alcohols, glycols, min. oil, benzene, acetone, chlorinated hydrocarbons; sp.gr. 1.085 (30/20 C); f.p. 0 C; b.p. 71 C (15 mm Hg); flash pt. (TCC) 79 C; pH 8-9; surf. tens. 36.5 dynes/cm; 97% act.
Use Level: 0.01-0.2%
Oxynex® AP [Merck KGaA http://www.merck.de; Rona http://www.emdchemicals.com/rona/1000.asp]
Chem. Descrip.: Vegetable oil, lecithin, ascorbyl palmitate, and citric acid
Uses: Antioxidant for fatty pharmaceuticals

Chem. Descrip.: Kidney or pinto bean extract contg. kaempferol (natural antioxidant)
Uses: Free radical scavenger preventing cell degradation caused by lipid peroxidation in the human body, and fructooligosaccharides source to promote beneficial intestinal flora (bifidobacteria), for use in encapsulated or tableted nutritional supplements; flavor potentiator
Properties: Brn. powd.; sol. in water with agitation; < 10% moisture
Use Level: Up to 100% (nutritional tablets/capsules)
Storage: 2 yr. min. shelf life; store in cool (15-30 C) dry environment, protected from heat

Chem. Descrip.: BHT (20%), ascorbyl palmitate (10%), citric acid (10%), glyceryl stearate, glyceryl olate, propylene glycol
Uses: Antioxidant for pharmaceuticals; protects oil sol'n's. used for injections
Regulatory: EC and US GRAS compliance
Properties: Unctuous mass, almost odorless, prat. tasteless; sol. in many org. solvs.; insol. in water
Use Level: 0.01-0.2%

Oxyfen® AP [Merck KGaA http://www.merck.de; Rona http://www.emdchemicals.com/rona/1000.asp]
Chem. Descrip.: Vegetable oil, lecithin, ascorbyl palmitate, and citric acid
Uses: Antioxidant for fatty pharmaceuticals
Oxynex® K [Merck KGaA http://www.merck.de; Rona http://www.emdchemicals.com/rona/1000.asp]
Chem. Descrip.: PEG-8 (62%), tocopherol (30%), ascorbyl palmitate (5%), ascorbic acid (1%), and citric acid (1%) See L-Ascorbic acid
Uses: Antioxidant, stabilizer for fats and oils, free radical scavenger for pharmaceuticals, skin treatment prods.
Features: Esp. for protection of sat. and unsat. components of the oil phase and for inhibition of formation of free radicals
Regulatory: EC, GRAS compliance
Properties: Yel. to lt. brn. transparent liq., char. odor; des. 1.07 g/cm³; flash pt. > 100 C; pH 3.5 (20 g/l, water)
Use Level: 0.05-0.2%
Environmental: Sl. polluting substance

Oxynex® L [Merck KGaA http://www.merck.de; Rona http://www.emdchemicals.com/rona/1000.asp]
Chem. Descrip.: Tocopherol (30%), ascorbyl palmitate (5%), citric acid (1%), and ethanol (53%), veg. oil (20%) See; L-Ascorbic acid; Alcohol; Vegetable oil
UN 1170
Uses: Antioxidant, stabilizer for fats and oils, free radical scavenger for pharmaceuticals, skin treatment prods.
Properties: Yel. to reddish brn. transparent liq., char. odor; des. 0.89 g/cm³; flahs pt. 11 C; pH 3 - 4 (20 g/l, water)
Use Level: 0.005-0.2%
Environmental: Sl. polluting substance
Precaution: Highly flamm.
Storage: Keep container tightly closed; keep away from sources of ignition - no smoking

Chem. Descrip.: Tocopherol (25%), lecithin (25%), ascorbyl palmitate (20%), glyceryl stearate, glyceryl olate, citric acid (2.5%)
Uses: Antioxidant esp. suitable for high-grade veg. fats and fat-containing pharmaceutical preps.
Regulatory: German, EC, US GRAS compliances
Properties: Lt. brn. waxy solid; odorless and tasteless in dilution; sol. in oils and fats; sparingly sol. in water; dens. 1.04 g/cm³; m.p. ≈ 55 C
Use Level: 0.005-0.1%
Environmental: Sl. polluting substance
Storage: Store at 2 C to 8 C.

Oxynex® K [Merck KGaA http://www.merck.de; Rona http://www.emdchemicals.com/rona/1000.asp]
Chem. Descrip.: PEG-8 (62%), tocopherol (30%), ascorbyl palmitate (5%), ascorbic acid (1%), and citric acid (1%) See L-Ascorbic acid
Uses: Antioxidant, stabilizer for fats and oils, free radical scavenger for pharmaceuticals, skin treatment prods.
Features: Esp. for protection of sat. and unsat. components of the oil phase and for inhibition of formation of free radicals
Regulatory: EC, GRAS compliance
Properties: Yel. to lt. brn. transparent liq., char. odor; des. 1.07 g/cm³; flash pt. > 100 C; pH 3.5 (20 g/l, water)
Use Level: 0.05-0.2%
Environmental: Sl. polluting substance

Chem. Descrip.: Tocopherol (25%), lecithin (25%), ascorbyl palmitate (20%), glyceryl stearate, glyceryl olate, citric acid (2.5%)
Uses: Antioxidant esp. suitable for high-grade veg. fats and fat-containing pharmaceutical preps.
Regulatory: German, EC, US GRAS compliances
Properties: Lt. brn. waxy solid; odorless and tasteless in dilution; sol. in oils and fats; sparingly sol. in water; dens. 1.04 g/cm³; m.p. ≈ 55 C
Use Level: 0.005-0.1%
Environmental: Sl. polluting substance
Storage: Store at 2 C to 8 C.

Trade Name Reference

Chem. Descrip.: Cetyl palmitate
CAS 540-10-3; EINECS/ELINCS 208-736-6
Uses: Solubilizer, vehicle for medicines; excipient for injectable substances; emollient in antiperspirants
Features: Changes skin feel, rub out props. and greasiness; veg. oil substitute; vaseline substitute
Regulatory: Not regulated for transport
Properties: Wh. solid; typical odor; insol. in water; sol. in oils, chloroform, ethyl ether, most org. solvents; dens. 0.82; m.p. ≥ 50 C; flash pt. ≥ 225 C
Environmental: Biodeg. in water; considered to be of low toxicity for aquatic life
Precaution: Wear gloves, goggles, overall skin protection; avoid entry to sewers, drain, and surface water; incompat. with strong oxidizers
Hazardous Decomp. Prods.: CO, CO2
Storage: Store @ R.T. in original sealed container; protect from dampness, heat sources

Chem. Descrip.: Isopropyl palmitate
CAS 142-91-6; EINECS/ELINCS 205-571-1
Uses: Solubilizer, vehicle for medicines; excipient for injectable substances; emollient in antiperspirants
Features: Changes skin feel, rub out props. and greasiness; veg. oil substitute; vaseline substitute
Regulatory: Not regulated for transport
Properties: Colorless liq.; typical odor; insol. in water; sol. in waxes, vegetable and mineral oils; dens. 0.85; f.p. 10-12 C; flash pt. > 170 C
Toxicology: Nontoxic
Environmental: Biodeg. in water; considered to be of low toxicity for aquatic life
Precaution: Wear gloves, goggles, overall skin protection; avoid entry to sewers, drain, and surface water; avoid contact with flames; incompat. with strong oxidizers
Hazardous Decomp. Prods.: CO, CO2
Storage: Store @ R.T. in original sealed container; protect from direct sunlight

Chem. Descrip.: Palmitic acid
CAS 57-10-3; EINECS/ELINCS 200-312-9
Uses: Emollient in pharmaceuticals
Environmental: Biodeg. (28 d) > 90%
Precaution: Wear gloves, goggles, overall skin protection; avoid entry to sewers, drain and surface water
Storage: Store @ R.T. in original sealed container protected from heat sources

Panacet 810 [NOF http://www.nof.co.jp]
Chem. Descrip.: Med. chain triglyceride
Uses: Raw material, emollient for pharmaceuticals; solubilizer for vitamins, antibiotics
Properties: Liq.; nonionic; 100% conc.

Pancreatin 3X USP Powder [Am. Labs http://www.americanlaboratories.com]
Chem. Descrip.: Lipase, amylase, and protease enzymes
Uses: Enzyme for hydrolysis of proteins, carbohydrates, or fats; enzyme for pharmaceuticals; digestive aid in nutritional formulas (tablets, capsules, powds.)
Properties: Powd.
Storage: Store in a cool, dry area in tightly closed polyliners within secure containers
**Trade Name Reference**

**Pancreatin 4X USP Granular** [Am. Labs](http://www.americanlaboratories.com)  
Chem. Descrip.: Lipase, amylase, and protease enzymes  
Uses: Enzyme for hydrolysis of proteins, carbohydrates, or fats; enzyme for pharmaceuticals; digestive aid in nutritional formulas (tablets, capsules, powds.)  
Regulatory: USP  
Properties: Mottled tan, free-flowing mixture of granules and powd.  
Storage: Store in a cool, dry area in tightly closed polyliners within secure containers

**Pancreatin 4X USP Powder** [Am. Labs](http://www.americanlaboratories.com)  
Chem. Descrip.: Lipase, amylase, and protease enzymes  
Uses: Enzyme for hydrolysis of proteins, carbohydrates, or fats; enzyme for pharmaceuticals; digestive aid in nutritional formulas (tablets, capsules, powds.)  
Regulatory: USP  
Properties: Mottled tan, free-flowing mixture of granules and powd.  
Storage: Store in a cool, dry area in tightly closed polyliners within secure containers

**Pancreatin 5X USP Powder** [Am. Labs](http://www.americanlaboratories.com)  
Chem. Descrip.: Lipase, amylase, and protease enzymes  
Uses: Enzyme for hydrolysis of proteins, carbohydrates, or fats; enzyme for pharmaceuticals; digestive aid in nutritional formulas (tablets, capsules, powds.)  
Properties: Powd.  
Storage: Store in a cool, dry area in tightly closed polyliners within secure containers

**Pancreatin 6X USP Powder** [Am. Labs](http://www.americanlaboratories.com)  
Chem. Descrip.: Lipase, amylase, and protease enzymes  
Uses: Enzyme for hydrolysis of proteins, carbohydrates, or fats; enzyme for pharmaceuticals; digestive aid in nutritional formulas (tablets, capsules, powds.)  
Properties: Powd.  
Storage: Store in a cool, dry area in tightly closed polyliners within secure containers

**Pancreatin 8X USP Powder** [Am. Labs](http://www.americanlaboratories.com)  
Chem. Descrip.: Lipase, amylase, and protease enzymes  
Uses: Enzyme for hydrolysis of proteins, carbohydrates, or fats; enzyme for pharmaceuticals; digestive aid in nutritional formulas (tablets, capsules, powds.)  
Regulatory: USP  
Properties: Off-wh. to lt. tan powd.  
Storage: Store in a cool, dry area in tightly closed polyliners within secure containers

**Pancreatin BP 98** [Am. Labs](http://www.americanlaboratories.com)  
Chem. Descrip.: Lipase, amylase, and protease enzymes  
Uses: Enzyme for hydrolysis of proteins, carbohydrates, or fats; enzyme for pharmaceuticals; digestive aid in nutritional formulas (tablets, capsules, powds.)  
Properties: Powd.

**Pancreatin USP 23** [Am. Labs](http://www.americanlaboratories.com)  
Chem. Descrip.: Lipase, amylase, and protease enzymes  
Uses: Dige

**Pancreatin 8X USP Powder** [Am. Labs](http://www.americanlaboratories.com)  
Chem. Descrip.: Lipase, amylase, and protease enzymes  
Uses: Enzyme for hydrolysis of proteins, carbohydrates, or fats; enzyme for pharmaceuticals; digestive aid in nutritional formulas (tablets, capsules, powds.)  
Regulatory: USP  
Properties: Wh. to off-wh. granules  
Storage: Store in a cool, dry area in tightly closed polyliners within secure containers
Trade Name Reference

closed polyliners within secure containers

**Paraffin Wax SP 173** [Strahl & Pitsch](http://www.strahlpitsch.com)
Chem. Descrip.: Paraffin wax
CAS 8002-74-2; EINECS/ELINCS 232-315-6
Uses: Wax for pharmaceuticals
Regulatory: FDA 21CFR §172.615, 172.886, 175.105, 178.3710; CTFA listed
Properties: Wh. slabs or pastilles; m.p. 138-144 F; acid no. nil; sapon. no. nil
Toxicology: TSCA listed

**Paraffin Wax SP 192** [Strahl & Pitsch](http://www.strahlpitsch.com)
Chem. Descrip.: Paraffin wax
CAS 8002-74-2; EINECS/ELINCS 232-315-6
Uses: Wax for pharmaceuticals
Regulatory: FDA 21CFR §172.615, 172.886, 175.105, 178.3710; CTFA listed
Properties: Wh. slabs or pastilles; m.p. 124-130 F; acid no. nil; sapon. no. nil
Toxicology: TSCA listed

**Paraffin Wax SP 206** [Strahl & Pitsch](http://www.strahlpitsch.com)
Chem. Descrip.: Paraffin wax
CAS 8002-74-2; EINECS/ELINCS 232-315-6
Uses: Wax for pharmaceuticals
Regulatory: FDA 21CFR §172.615, 172.886, 175.105, 178.3710; CTFA listed
Properties: Wh. slabs or pastilles; m.p. 122-127 F; acid no. nil; sapon. no. nil
Toxicology: TSCA listed

**Paraffin Wax SP 227B** [Strahl & Pitsch](http://www.strahlpitsch.com)
Chem. Descrip.: Paraffin wax
CAS 8002-74-2; EINECS/ELINCS 232-315-6
Uses: Wax for pharmaceuticals
Regulatory: FDA 21CFR §172.615, 172.886, 175.105, 178.3710; CTFA listed
Properties: Wh. slabs or pastilles; m.p. 128-135 F; acid no. nil; sapon. no. nil
Toxicology: TSCA listed

**Paraffin Wax SP 434** [Strahl & Pitsch](http://www.strahlpitsch.com)
Chem. Descrip.: Paraffin wax
CAS 8002-74-2; EINECS/ELINCS 232-315-6
Uses: Wax for pharmaceuticals
Regulatory: FDA 21CFR §172.615, 172.886, 175.105, 178.3710; CTFA listed
Properties: Wh. slabs or pastilles; m.p. 150-156 F; acid no. nil; sapon. no. nil
Toxicology: TSCA listed

**Paraffin Wax SP 673** [Strahl & Pitsch](http://www.strahlpitsch.com)
Chem. Descrip.: Paraffin wax
CAS 8002-74-2; EINECS/ELINCS 232-315-6
Uses: Wax for pharmaceuticals
Regulatory: FDA 21CFR §172.615, 172.886, 175.105, 178.3710; CTFA listed
Properties: Wh. slabs or pastilles; m.p. 141-146 F; acid no. nil; sapon. no. nil
Toxicology: TSCA listed

**Paraffin Wax SP 674** [Strahl & Pitsch](http://www.strahlpitsch.com)
Chem. Descrip.: Paraffin wax
CAS 8002-74-2; EINECS/ELINCS 232-315-6
Uses: Wax for pharmaceuticals
Regulatory: FDA 21CFR §172.615, 172.886, 175.105, 178.3710; CTFA listed
Properties: Wh. slabs or pastilles; m.p. 156-163 F; acid no. nil; sapon. no. nil
Toxicology: TSCA listed

**Paraffin Wax SP 675** [Strahl & Pitsch](http://www.strahlpitsch.com)
Chem. Descrip.: Paraffin wax
CAS 8002-74-2; EINECS/ELINCS 232-315-6
Uses: Wax for pharmaceuticals
Regulatory: FDA 21CFR §172.615, 172.886, 175.105, 178.3710; CTFA listed
Properties: Wh. slabs or pastilles; m.p. 127-135 F; acid no. nil; sapon. no. nil
Toxicology: TSCA listed

**Paramount B** [Loders Croklaan Inc]
Chem. Descrip.: Partially hydrogenated palm kernel oil
CAS 68990-82-9; EINECS/ELINCS 273-627-2
Uses: Lauric fat for pharmaceutical applics.
Regulatory: Kosher
Properties: Solid; m.p. 93-96 F

**Paramount C** [Loders Croklaan Inc]
Chem. Descrip.: Partially hydrogenated palm kernel oil, lecithin
Uses: Lauric fat for pharmaceutical applics.
Regulatory: Kosher
Properties: Flake; m.p. 101-104 F

**Paramount H** [Loders Croklaan Inc]
Chem. Descrip.: Partially hydrogenated veg. oil (palm kernel, soybean, cottonseed) See Hydrogenated vegetable oil
CAS 68334-28-1; EINECS/ELINCS 269-820-6
Uses: Lauric fat for pharmaceutical applics.
Regulatory: Kosher
Properties: Liq.; m.p. 107-109 F

**Paramount X** [Loders Croklaan Inc]
Chem. Descrip.: Partially hydrogenated veg. oil
Trade Name Reference

(1) Trade Name Reference
Evidence: See

Handbook of Pharmaceutical Additives, Third Edition

(palm kernel, soybean, cottonseed) See
Hydrogenated vegetable oil
CAS 68334-28-1; EINECS/ELINCS 269-820-6
Uses: Lauric fat for pharmaceutical applics.
Regulatory: Kosher
Properties: Liq.; m.p. 107-109 F

Paramount XX [Loders Croklaan Inc]
Chem. Descrip.: Partially hydrogenated veg. oil
(palm kernel, soybean, cottonseed) See
Hydrogenated vegetable oil
CAS 68334-28-1; EINECS/ELINCS 269-820-6
Uses: Lauric fat for pharmaceutical applics.
Regulatory: Kosher
Properties: Flake; m.p. 117-119 F

Paratherm NF [Paratherm
http://www.paratherm.com]
Chem. Descrip.: Hydrotreated hydrocarbon
NF/USP See Mineral oil
CAS 8042-47-5
Uses: Heat transfer fluid for precise, uniform temp. control in process applics., safe for use in pharmaceuticals
Features: Non fouling; rated for optimal service range of 120-600 F; environmentally safe
Regulatory: FDA, USDA certified; DOT nonregulated; SARA §313 nonreportable
Properties: Colorless bright transparent liq.; odorless; tasteless; sol. in hydrocarbons; sol. 10 ppm in water; m.w. 350 avg.; sp.gr. 0.8746; dens. 0.40 g/cm3; vapor pressure 0.0005 psia (200 F); b.p. 343 C (10% fraction); pour pt. -43 C; flash pt. (COC) 174 C; fire pt. (COC) 196 C; surf. tens. 28 dynes/cm; dielec. str. 30-40 kV/cm (20 C); dielec. const. 2.17 (1 MHz); vol. resist. 1012 ohm; 100% act.
Toxicology: Nontoxic; nonirritating to eyes; may cause sl. dermal irritation; ing. of lg. quantities may cause laxative effect; TSCA listed Precaution: Incompat. with strong oxidizing agents
Hazardous Decomp. Prods.: Burning may produce CO2, CO, other oxides, dense smoke
NFPA: Health 0, Flammability 1, Reactivity 0
Storage: Store in closed containers away from heat, sparks, open flame

Parteck™ M 200 [Merck KGaA
http://www.merck.de]
Chem. Descrip.: Mannitol See D-Mannitol
CAS 69-65-8; EINECS/ELINCS 200-711-8
Uses: Excipient for direct compression of pharmaceutical tablets
Features: Chemically inert; directly compressible; high compaction at low compression forces; rapid disintegration and dissolution; excellent flow props.
Properties: Needle-like microstructure; particle size ≤53 µm (270 mesh, ≤10%); sol. in water (250 g/l ); dens. 0.40 g/cm3; ≥164 C; m.p. 164 - 169 C; pH 4 - 7 (10 g/100 ml, water); 98.0 - 101.5 % assay (HPLC, calc. on dried substance)

Parteck™ M 300 [Merck KGaA
http://www.merck.de]
Chem. Descrip.: Mannitol See D-Mannitol
Chem. Analysis: ≤ 0.5 % moisture
CAS 69-65-8; EINECS/ELINCS 200-711-8
Uses: Excipient for direct compression of pharmaceutical tablets
Features: Nonhygroscopic; nonreactive; compat. with amines
Properties: Dens. 0.40 g/cm3; m.p. 164-169 C; pH 4 - 7 (10 g/100ml); 98.0 - 101.5% assay

Parteck™ SI 150 [Merck KGaA
http://www.merck.de]
Chem. Descrip.: Sorbitol
CAS 50-70-4; EINECS/ELINCS 200-061-5
Uses: Excipient and binder for OTC lozenges and chewable formulations and effervescents; diluent for low-dose preps.
Features: Fine particle size; achieves high content uniformity and dust reduction during tableting and filling; excellent compressibility and flow properties; rapid disintegration and dissolution; low hygroscopicity
Regulatory: NF, EP, BP
Properties: Powd.

Parteck™ SI 400 LEX [Merck KGaA
http://www.merck.de]
Chem. Descrip.: Sorbitol
CAS 50-70-4; EINECS/ELINCS 200-061-5
Uses: Excipient specifically designed for IV formulations
Features: Low in endotoxins; achieves high content uniformity and dust reduction during tableting and filling; excellent compressibility and flow properties; rapid disintegration and dissolution; low hygroscopicity
Regulatory: NF, EP, BP
Properties: Powd.
Parteck™ SI 400 LRS [Merck KGaA
http://www.merck.de]
Chem. Descrip.:  Sorbitol
CAS 50-70-4; EINECS/ELINCS 200-061-5
Uses:  Excipient and binder for OTC lozenges and chewable formulations and effervescents; diluent for low-dose preps.
Features:  Low in residual sugars; achieves high content uniformity and dust reduction during tableting and filling; excellent compressibility and flow properties; rapid disintegration and dissolution; low hygroscopicity
Regulatory:  NF, EP, BP
Properties:  Powd.

Parteck™ SI 400 PH [Merck KGaA
http://www.merck.de]
Chem. Descrip.:  Sorbitol
CAS 50-70-4; EINECS/ELINCS 200-061-5
Uses:  Excipient and binder for OTC lozenges and chewable formulations and effervescents; diluent for low-dose preps.
Features:  Tested for microbial purity; achieves high content uniformity and dust reduction during tableting and filling; excellent compressibility and flow properties; rapid disintegration and dissolution; low hygroscopicity
Regulatory:  NF, EP, BP
Properties:  Powd.

Parteck™ SI 500 [Merck KGaA
http://www.merck.de]
Chem. Descrip.:  Sorbitol
CAS 50-70-4; EINECS/ELINCS 200-061-5
Uses:  Excipient and binder for OTC lozenges and chewable formulations and effervescents; diluent for low-dose preps.
Features:  Achieves high content uniformity and dust reduction during tableting and filling; excellent compressibility and flow properties; rapid disintegration and dissolution; low hygroscopicity
Regulatory:  NF, FCC
Properties:  Powd.

Pationic® 919 [Am. Ingreds.
http://www.americaningredients.com]
Chem. Descrip.:  Glycerol tristearate  See Tristearin
CAS 555-43-1; EINECS/ELINCS 209-097-6
Uses:  Lubricant and binder in pharmaceutical tableting and as a matrix material for ointments
Regulatory:  GRAS, FCC, kosher, SARA §311/312, 313 nonreportable

Patlac® LA USP [RITA
http://www.ritacorp.com]
Chem. Descrip.:  Lactic acid
CAS 50-21-5; EINECS/ELINCS 200-018-0
Uses:  Surfactant, humectant in pharmaceuticals
Properties:  Cl. liq.; anionic; 88% act.
Toxicology:  Irritant to eyes, skin, and mucous membranes in conc. form

Paxanate OT [Pax Group
http://www.paxgroup.com;
http://www.paxchem.com]
Chem. Descrip.:  Sodium dioctyl sulfosuccinate  See Dioctyl sodium sulfosuccinate
CAS 577-11-7; EINECS/ELINCS 209-406-4
Uses:  Emulsifier, wetting agent, dispersant, cleaning agent, solubilizer, stabilizer in pharmaceuticals
Properties:  Paste; anionic; 70% act.

Paxanate OTL [Pax Group
http://www.paxgroup.com;
http://www.paxchem.com]
Chem. Descrip.:  Sodium dioctyl sulfosuccinate  See Dioctyl sodium sulfosuccinate
CAS 577-11-7; EINECS/ELINCS 209-406-4
Uses:  Emulsifier, wetting agent, dispersant, cleaning agent, solubilizer, stabilizer in pharmaceuticals
Properties:  Liq.; anionic; 25% act.

Paxgard BNPD [Pax Chem.
http://www.paxchem.com]
Chem. Descrip.:  2-Bromo-2-nitro-1,3-propanediol  See 2-Bromo-2-nitropropane-1,3-diol
CAS 52-51-7; EINECS/ELINCS 200-143-0

Properties:  Ivory wh. fine beads; bland odor; 98% min. through 100 sieve; neg. sol. in water; sp. gr. 0.8807 (100 C); m.p. 65 C; iodine no. 3 max.; flash pt. >298 F
Toxicology:  Sl. eye irritant; skin irritant and at elevated temps. may cause thermal burns; low toxicity by ing.; sl. irritant to respiratory tract; TSCA listed
Precaution:  Wear safety glasses and protective gloves; keep away from strong oxidizers such as hydrogen peroxide, bromine, and chromic acid
Hazardous Decomp. Prods.:  COx
Storage:  Shelf life 1 yr; store in cool dry place away from combustibles @ 55-85 F
Trade Name Reference

Uses: Antimicrobial; antibacterial
Features: Broad spectrum; effective in acid and neutral pH range
Properties: Water-sol.

Chem. Descrip.: Sodium lauryl sulfate
CAS 151-21-3; EINECS/ELINCS 205-788-1
Uses: Surfactant, emulsifier, detergent, degreaser, dispersant, foaming agent, wetting agent for dentifrices
Features: Extra pure grade
Properties: Powd.; anionic; 95% act.

Chem. Descrip.: Cocobetaine See Cocobetaine
CAS 68424-94-2; EINECS/ELINCS 270-329-4
Uses: Anti-irritant in personal care prods.
Features: Cost-effective; exc. foaming in acid, alkali, and electrolyte systems
Properties: Liq.; amphoteric; 34% act.
Environmental: Completely biodeg.

Chem. Descrip.: Cetomacrogol See Ceteth
CAS 9004-95-9
Uses: Emulsifier, cleaning agent, dispersant, antistat, defoamer, lubricant, solubilizer, stabilizer in pharmaceuticals
Features: High HLB
Properties: Solid; water-sol.; nonionic; 98% act.

Chem. Descrip.: Fatty alcohol ethoxylate
Uses: Emulsifier, cleaning agent, dispersant, antistat, defoamer, lubricant, solubilizer, stabilizer in pharmaceuticals
Features: High HLB
Properties: Solid; water-sol.; nonionic; 98% act.

Chem. Descrip.: PPG-4-ceteth-10
CAS 9087-53-0
Uses: W/o emulsifier, solubilizer, dispersant used in pharmaceuticals
Regulatory: JSCI listed
Properties: Colorless liq.; HLB 10.5; nonionic; 100% conc.
Toxicology: TSCA listed

Chem. Descrip.: PPG-4-ceteth-20
CAS 9087-53-0
Uses: Hydrophilic emulsifier, solubilizer, dispersant used in pharmaceuticals
Regulatory: JSCI listed
Properties: Wh. solid; HLB 16.5; nonionic; 100% conc.
Toxicology: TSCA listed

Chem. Descrip.: PPG-8-ceteth-1
CAS 9087-53-0
Uses: W/o emulsifier, solubilizer, dispersant used in pharmaceuticals
Regulatory: JSCI listed
Properties: Colorless liq.; HLB 9.5; nonionic; 100% conc.
Toxicology: TSCA listed

Chem. Descrip.: PPG-8-ceteth-20
CAS 9087-53-0
Uses: Hydrophilic emulsifier, solubilizer, dispersant used in cosmetic, pharmaceuticals
Regulatory: JSCI listed
Properties: Pale yel. solid; HLB 12.5; nonionic; 100% conc.
Toxicology: TSCA listed

PCS® [Asahi Kasei http://www.asahi-kasei.co.jp]
Chem. Descrip.: Pregelatinized corn starch
See Corn (Zea mays) starch
Chem. Analysis: 2.0-6.0% loss on drying
Uses: Stabilizer for moisture-sensitive drugs; carrier for hygroscopic ingreds.; dissolution enhancer and granulation aid
Trade Name Reference

**Features:** Dissolves very rapidly because of its porous crystalline particles; may require higher levels of lubricants than other excipients; nonhygroscopic; flowable; chemically stable; 40% sweetening power of sucrose

**Properties:** Wh., odorless crystalline powd.; sl. sweet taste; particle size 100 µm mean diameter; sol. in water (17g / 100ml )

**Pearlitol® 160 C** [Roquette http://www.roquette.fr]

**Chem. Descr.:** Mannitol See D-Mannitol

**CAS 69-65-8; EINECS/ELINCS 200-711-8**

**Uses:** Diluent for tablets, capsules and sachets; excipient for chemically unstable or moisture sensitive actives; excipient of choice for flash-release forms; freeze-drying carrier; sweetener for pharmaceutical chewing gum; diuretic-osmotic for injectable solutions

**Features:** Cooling effect in mouth; very low hygroscopicity; chemically stable; noncariogenic

**Regulatory:** USP/NF, EP, JP

**Properties:** Wh., odorless powd.; sl. sweet taste; particle size 160 µm mean diameter; sol. in water (17g / 100ml )

**Pearlitol® 200SD** [Roquette http://www.roquette.fr]

**Chem. Descr.:** Granulated mannitol See D-Mannitol

**CAS 69-65-8; EINECS/ELINCS 200-711-8**

**Uses:** Excipient for direct compression for chewable and effervescent tablets, chemically unstable or moisture sensitive actives; diluent for capsules and sachets

**Features:** Dissolves very rapidly because of its porous crystalline particles; may require higher levels of lubricants than other excipients; nonhygroscopic; flowable; chemically stable; 40% sweetening power of sucrose

**Uses:** Diluent for tablets, capsules and sachets; excipient for chemically unstable or moisture sensitive actives; excipient of choice for flash-release forms; freeze-
Trade Name Reference

drying carrier; sweetener for pharmaceutical chewing gum; diuretic-osmotic for injectable solutions

Features: Cooling effect in mouth; very low hygroscopicity; chemically stable; noncariogenic

Regulatory: USP/NF, EP, JP

Properties: Wh., odorless powd.; sl. sweet taste; particle size 50 µm mean diameter; sol. in water (17g / 100ml )

Pearlitol® 500 DC [Roquette
http://www.roquette.fr]
Chem. Descrip.: Granulated mannitol See D-Mannitol
CAS 69-65-8; EINECS/ELINCS 200-711-8
Uses: Excipient for direct compression for chewable and effervescent tablets, chemically unstable or moisture sensitive actives; diluent for capsules and sachets
Features: Nonhygroscopic; flowable; chemically stable; 40% sweetening power of sucrose; ; chemically stable

Regulatory: USP/NF, EP, JP

Properties: Wh., odorless crystalline powd.; sl. sweet taste; particle size 520 µm mean diameter; sol. in water (17g / 100ml )
Chem. Descrip.:  
PVP/dimethylaminoethylmethacrylate/polycarbamyl polyglycol ester  See  
PVP/dimethylaminoethyl methacrylate/polycarbamyl polyglycol ester
Uses:  Polymeric hydrogel, film-former used in pharmaceutical topicals; water resist.
Properties:  Lt. to dk. straw hazy visc. liq.; sol. in propylene glycol; disp. in water, castor oil; insol. in ethanol, cyclohexane, min. oil, IPM; sp.gr. 1.016; visc. 3000-7000 cps; pH 8-9 (10%); nonflamm.; cationic; 10% aq. sol'n.
Toxicology:  Nonirritating to skin and eyes; LD50 (oral) > 5 g/kg, nontoxic orally; noncomedogenic; ingestion may cause nausea, vomiting, abdominal pain
Storage:  Keep from freezing

Pecogel® GC-1110 [Phoenix http://www.phoenix-chem.com]
Chem. Descrip.:  
PVP/dimethylaminoethylmethacrylate/polycarbamyl polyglycol ester  See  
PVP/dimethylaminoethyl methacrylate/polycarbamyl polyglycol ester
Uses:  Polymeric hydrogel used in pharmaceutical topicals; water resist.
Properties:  Visc. liq.; sol. in propylene glycol; disp. in water; insol. in castor oil, min. oil, ethanol, cyclohexane, IPM; sp.gr. 1.022; pH 8-9 (10%); nonflamm.; cationic; 10% aq. sol'n.
Toxicology:  Nonirritating to skin; minimally irritating to eyes; LD50 (oral) > 5 g/kg, nontoxic orally; noncomedogenic; ingestion may cause nausea, vomiting, gastric disturbance; overexposure may cause dizziness, headache, nausea
Precaution:  Hazardous ingreds.: 1.76% 1-methyl-2-pyrrolidone
Hazardous Decomp. Prods.:  Combustion may produce CO, CO2, NOX
Storage:  Protect from freezing

Chem. Descrip.:  
PVP/polycarbamyl polyglycol ester
Uses:  Polymeric hydrogel, film-former used in pharmaceutical topicals; water resist.
Properties:  Off-wh. to yel. hazy visc. liq.; sol. in water, propylene glycol; misc. with ethanol; insol. in castor oil, min. oil, cyclohexane, IPM; sp.gr. 1.027; visc. 4000-8000 cps; pH 8-9 (10%); nonflamm.; nonionic; 15% aq. sol'n.
Toxicology:  Pract. nonirritating to eyes; nonirritating to skin; LD50 (oral) > 5 g/kg, nontoxic orally; noncomedogenic; ingestion may cause nausea, vomiting, gastric disturbance; overexposure may cause dizziness, headache, nausea
Precaution:  Hazardous ingreds.: 3.59% 1-methyl-2-pyrrolidone
Hazardous Decomp. Prods.:  Combustion may produce CO, CO2, NOX
Storage:  Protect from freezing

Chem. Descrip.:  
PVP/polycarbamyl polyglycol ester
Uses:  Polymeric hydrogel, film-former used in pharmaceutical topicals; water resist.
Properties:  Visc. liq.; sol. in ethanol; disp. in water, propylene glycol, castor oil; insol. in cyclohexane, min. oil, IPM; sp.gr. 1.036; pH 8-9 (10%); nonflamm.; nonionic; 20% aq. sol'n.
Toxicology:  Pract. nonirritating to eyes; nonirritating to skin; LD50 (oral) > 5 g/kg, nontoxic orally; noncomedogenic; ingestion may cause nausea, vomiting, gastric disturbance; overexposure may cause dizziness, headache, nausea
Precaution:  Hazardous ingreds.: 4.73% 1-methyl-2-pyrrolidone
Hazardous Decomp. Prods.:  Combustion may produce CO, CO2, NOX
Storage:  Protect from freezing
Pecogel® S-1120 [Phoenix
http://www.phoenix-chem.com]
Chem. Descrip.: PVP/dimethiconylacrylate/polycarbamyl polyglycol ester. See
PVP/dimethiconylacrylate/polycarbamyl/polyglycol ester
Uses: Polymeric hydrogel, film-former used in sunscreens, pharmaceutical topicals; water resist.
Properties: Wh. to lt. yel. hazy visc. liq., amine-like odor; disp. in castor oil, ethanol, propylene glycol, water; insol. in cyclomethicone, min. oil, IPM; dens. 8.6 lb/gal; visc. 500-3000 cps; pH 8-9 (10%); nonflamm.; nonionic; 20% aq. sol'n.
Toxicology: Nonirritating to eyes and skin; LD50 (oral) > 5 g/kg, nontoxic orally; noncomedogenic; skin exposure can cause irritation; ingestion may cause nausea, vomiting, abdominal pain
Precaution: Incompat. with strong oxidizers and reducers
Hazardous Decomp. Prods.: Thermal decomp. prod.: COx, SiOx

Pecosil® OS-100B [Phoenix
http://www.phoenix-chem.com]
Chem. Descrip.: Dimethicone propylethlenediamine behenate
CAS 133448-12-1
Uses: Hydrophobic film-former used in pharmaceutical topicals; humectant, protective barrier
Properties: Wh. to buff very visc. paste with opal-like appearance; sol. warm in IPM; disp. warm in castor oil, ethanol, cyclomethicone, min. oil; insol. in water; sp.gr. 1.01 g/ml; pH 7 (10%); flash pt. (TCC) > 200 F; cationic; 100% act.
Toxicology: Nonirritating to skin and eyes; LD50 (oral) > 5 g/kg, nontoxic orally; noncomedogenic; skin exposure can cause irritation; ingestion may cause nausea, vomiting, abdominal pain
Precaution: Incompat. with strong oxidizers and reducers
Hazardous Decomp. Prods.: Thermal decomp. prod.: COx, SiOx

Pecosil® PS-100 [Phoenix
http://www.phoenix-chem.com]
Chem. Descrip.: Dimethicone copolyol phosphate
CAS 132207-31-9
Uses: Patented o/w emulsifier, pigment wetting and dispersing agent for topical pharmaceuticals, sunscreens
Properties: Cl. to sl. hazy visc. liq.; misc. with water, ethanol, propylene glycol; disp. in castor oil, cyclomethicone, min. oil; insol. in IPM; sp.gr. 1.01 g/ml; acid no. 37-47; flash pt. (TCC) > 200 F; pH 2-4 (1%); anionic; 100% act.
Toxicology: Nonirritating to skin and eyes; nontoxic orally; noncomedogenic; skin exposure can cause irritation; ingestion may cause nausea, vomiting, abdominal pain
Precaution: Incompat. with strong oxidizers and reducers
Hazardous Decomp. Prods.: Thermal decomp. prod.: COx, SiOx

Pecosil® PS-100K [Phoenix
http://www.phoenix-chem.com]
Chem. Descrip.: Potassium dimethicone copolyol phosphate
CAS 150522-09-1
Uses: O/w emulsifier for topical pharmaceuticals, sunscreen prods.
Properties: Yel. cl. to sl. hazy liq.; sol. in water; misc. with IPM, propylene glycol; disp. in
Trade Name Reference

castor oil, ethanol; sp.gr. 1.01 g/ml; acid no. 20 max.; pH 5-7 (10%); flash pt. (TCC) > 200 F; 55% aq. sol'n.

Toxicology: Nonprimary skin irritant; nonirritating to eyes; nontoxic orally; noncomedogenic; skin exposure can cause irritation; ingestion may cause nausea, vomiting, abdominal pain

Precaution: Incompat. with strong oxidizers and reducers

Hazardous Decomp. Prods.: Thermal decomp. prods.: COx, SiOx

Pecosil® WDS-100 [Phoenix http://www.phoenix-chem.com]
Chem. Descrip.: Dimethicone copolyol phosphate
CAS 132207-31-9
Uses: O/w emulsifier, emollient for topical pharmaceuticals; pigment wetter and disperser

Properties: Cl. to hazy liq.; misc. with ethanol, propylene glycol; disp. in water, IPM, castor oil, cyclomethicone, min. oil; sp.gr. 1.01 g/ml; acid no. 110±8; flash pt. (TCC) > 200 F; pH 3-4 (10%); anionic; 100% act.

Toxicology: Nonirritating to eyes; nonprimary skin irritant; nontoxic orally; noncomedogenic; skin exposure can cause irritation; ingestion may cause nausea, vomiting, abdominal pain

Precaution: Incompat. with strong oxidizers and reducers

Hazardous Decomp. Prods.: Thermal decomp. prods.: COx, SiOx

Chem. Descrip.: Sec. kaolin clay
Chem. Analysis: SiO2 (43.9%), Al2O3 (40%), TiO2 (1.2%)
CAS 1332-58-7; EINECS/ELINCS 296-473-8
Uses: Filler in pharmaceuticals

Features: No ozone-depleting substances

Properties: Wh. beads; sol. in ethanol, min. and veg. oil; insol. in water; HL B 1; m.p. 59 C; acid no. 6 max.; iodine no. < 1; sapon. no. 190-200; pH 5 (3%); nonionic; 100% conc.

Pegosperse® 50 DS [Lonza http://www.lonza.com]
Chem. Descrip.: Glycol distearate
CAS 627-83-8; EINECS/ELINCS 211-014-3
Uses: Emollient, lubricant and pigment dispersant in pharmaceuticals

Properties: Colorless to sl. yel. cl. liq., sl. typ. odor; misc. with castor oil, min. oil, ethanol, cyclomethicone, IPM; insol. in water, propylene glycol; sp.gr. 0.855; b.p. > 175 C; acid no. 1 max.; iodine no. 1 max.; sapon. no. 200-215; flash pt. (COC) > 150 C; 100% act.

Toxicology: Nonirritating to skin and eyes; nontoxic orally; noncomedogenic; skin exposure can cause irritation; ingestion may cause nausea, vomiting, abdominal pain; eye contact may cause irritation

Hazardous Decomp. Prods.: Burning may produce CO, CO2

Pelemol® BB [Phoenix http://www.phoenix-chem.com]
Chem. Descrip.: Behenyl behenate
CAS 17671-27-1; EINECS/ELINCS 241-646-5
Uses: Emollient, visc./body builder for topical pharmaceuticals

Properties: Off-wh. waxy flake; sol. warm in min.
Trade Name Reference

Oil, castor oil; misc. warm in IPM; disp. warm in cyclomethicone; insol. in water, propylene glycol; m.p. 68 C; b.p. > 150 C; acid no. 3 max.; iodine no. 5 max.; sapon. no. 78-98; flash pt. (PMCC) > 150 C; pH = 6; 100% act.

Toxicology: Nonirritating to eyes and skin; nontoxic orally; noncomedogenic; skin and eye exposure may cause irritation; ingestion may cause abdominal upset

Precaution: Incompat. with strong oxidizers and reducing agents

Hazardous Decomp. Prods.: Incomplete combustion produces CO

Storage: Avoid prolonged heated storage

Pelemol® C-150 [Phoenix http://www.phoenix-chem.com]

Chem. Descrip.: Bis(trioctyldodecyl citryl) dilinoleate See Trioctyldodecyl citrate dilinoleate

CAS 220716-32-5

Uses: Used in pharmaceutical topicals

Properties: Cl. oily liq.; sol. in castor oil, min. oil; disp. in cyclomethicone; misc. with IPM; insol. in water, ethanol, propylene glycol; sp.gr. 1.01 g/ml; flash pt. (TCC) > 200 F; pH 5-7 (10%); 100% act.

Toxicology: Skin exposure can cause irritation; ingestion may cause nausea, vomiting, abdominal pain

Precaution: Incompat. with strong oxidizers and reducers

Hazardous Decomp. Prods.: Thermal decomp. prod.: COx, SiOx

Storage: Protect from freezing and boiling (emulsion will break)

Pelemol® CA [Phoenix http://www.phoenix-chem.com]

Chem. Descrip.: Cetyl acetate

CAS 629-70-9; EINECS/ELINCS 211-103-7

Uses: Used in pharmaceutical topicals

Properties: Colorless cl. liq. to yel. waxy solid; misc. with castor oil, min. oil, cyclomethicone, IPM; insol. in water, ethanol, propylene glycol; sp.gr. 0.85; m.p. 18 C; b.p. > 150 C; acid no. 1 max.; iodine no. 1 max.; sapon. no. 185-205; hyd. no. 8 max.; flash pt. (PMCC) > 150 C; pH ≈ 6 (10%); 100% act.

Toxicology: Skin exposure may cause irritation; ingestion may cause abdominal upset; eye contact may cause irritation

Precaution: Incompat. with strong oxidizers and reducing agents

Hazardous Decomp. Prods.: Incomplete combustion produces CO

Storage: Avoid prolonged heated storage

Pelemol® CCT [Phoenix http://www.phoenix-chem.com]

Chem. Descrip.: Caprylic capric triglyceride

See Caprylic/capric triglyceride

EINECS/ELINCS 265-724-3

Uses: Emollient used in pharmaceutical topicals

Properties: Yel. cl. oily liq., bland odor; misc. with castor oil, min. oil, cyclomethicone, IPM; insol. in water, ethanol, propylene glycol; sp.gr. 0.9; b.p. > 500 C; acid no. 1 max.; iodine no. 2 max.; sapon. no. 338-358; hyd. no. 10 max.; flash pt. (OP) 350 C; pH 5.5-7.0 (3% aq.); 100% act.; 0.2% max. moisture

Toxicology: Skin exposure can cause irritation; ingestion may cause nausea, vomiting, abdominal pain

Precaution: Incompat. with strong oxidizing agents

Hazardous Decomp. Prods.: Combustion produces COx

Storage: Store in cool, dry location away from strong oxidizing agents; avoid excessive heat

Chem. Descrip.: Cetyl lactate

CAS 35274-05-6; EINECS/ELINCS 252-478-7

Uses: Emollient used in pharmaceutical topicals

Properties: Wh. cl. liq. to solid, faint char. odor; misc. hot in castor oil, min. oil, cyclomethicone, IPM; insol. in water, ethanol, propylene glycol; sp.gr. 0.893-0.905; b.p. 342 C; acid no. 2 max.; sapon. no. 174-189; flash pt. (COC) > 202 C; 100% act.

Toxicology: LD50 (oral, rat) 20 ml/kg; nonirritating to eyes; nonprimary skin irritant; nonsensitizing

Precaution: Incompat. with strong oxidizers

Hazardous Decomp. Prods.: CO, CO2 when heated to decomp.

Pelemol® CP [Phoenix http://www.phoenix-chem.com]

Chem. Descrip.: Cetyl palmitate

CAS 540-10-3; EINECS/ELINCS 208-736-6

Uses: Emollient, base, consistency factor used in pharmaceutical topicals

Properties: Wh. to tan flake, odorless; misc. hot in castor oil, min. oil, cyclomethicone, IPM; insol. in water, ethanol, propylene glycol; m.p. 51-55 C; b.p. > 100 C; acid no. 2 max.; sapon.
Handbook of Pharmaceutical Additives, Third Edition

Trade Name Reference

Properties: Yel. cl. liq., typ. bland odor; misc. with castor oil, min. oil, cyclomethicone, IPM; insol. in water, ethanol, propylene glycol; sp.gr. 0.86; b.p. > 200 C; acid no. 1 max.; iodine no. 65 max.; sapon. no. 130-145; flash pt. (COC) < 240 C; 100% act.

Hazardous Decomp. Prods.: CO, CO₂

Storage: Store in cool, dry place away from strong oxidizing agents; avoid excessive heat, open flames, ignition sources

Chem. Descrip.: Glycereth-7 benzoate
CAS 12804-12-8
Uses: Lubricant, emollient in pharmaceutical topicals; detackifier for antiperspirants
Features: Blooms heavily in water

Pelemol® DIPS [Phoenix http://www.phoenix-chem.com]
Chem. Descrip.: Disopropyl sebacate
CAS 7491-02-3; EINECS/ELINCS 231-306-4
Uses: Emollient, solubilizer, coupling agent used in pharmaceutical topicals

Properties: APHA 25max, colorless cl. liq.; pract. odorless; essentially odorless; misc. with castor oil, min. oil, ethylalcohol, cyclomethicone, propylene glycol, IPM; insol. in water; sp.gr. 0.93; b.p. 355 F; acid no. 1 max.; sapon. no. 380-400; flash pt. (COC) 350; 100% act.

Toxicology: Nonirritant to eyes and skin; ingestion may cause nausea, vomiting, abdominal pain

Hazardous Decomp. Prods.: Burning may produce CO, CO₂

Pelemol® DO [Phoenix http://www.phoenix-chem.com]
Chem. Descrip.: Decyl olate
CAS 3687-46-5; EINECS/ELINCS 222-981-6
Uses: Emollient used in pharmaceutical topicals

Properties: Yel. liq., colorless cl. liq.; pract. odorless; misc. in water, alcohol, propylene glycol, ethylalcohol, disp. in water; self-emulsifying; sp.gr. 1.16; vapor pressure < 0.1; b.p. > 185 C; acid no. 5 max.; sapon. no. 95-125; flash pt. (CCC) > 150 C; 100% act.

Toxicology: Nonirritating to eyes; nonprimary skin irritant; LD₅₀ (oral) > 5 g/kg, nontoxic orally; noncomedogenic; skin exposure can cause irritation; ingestion may cause nausea, vomiting, abdominal pain

Hazardous Decomp. Prods.: None

Hazardous Ingredients: None

Chem. Descrip.: Glycereth-7 triacetate
CAS 57569-76-3
Uses: Humectant, emollient, coupling agent, solubilizer used in pharmaceutical topicals; solv. for sunscreen ingreds.

Properties: Sl. yel. cl. viscl. liq., bland odor; sol. in water, alcohol, hydro-alcoholic soln.s.; misc. with propylene glycol; insol. in cyclomethicone, min. oil, IPM; sp.gr. 0.93; acid no. 1 max.; iodine no. 3.16; sapon. no. 305-330; hyd. no. 20 max.; flash pt. (PMCC) > 150 C; 100% act.

Toxicology: Nonirritating to eyes; nonprimary skin irritant; LD₅₀ (oral) > 5 g/kg, nontoxic orally; noncomedogenic; skin exposure can cause irritation; ingestion may cause nausea, vomiting, abdominal pain

Hazardous Decomp. Prods.: May form oxides of carbon

HMIS: Health 1, Flammability 0, Reactivity 0

Storage: Store in cool, dry place

Trade Name Reference

http://www.phoenix-chem.com

Chem. Descrip.: Glycereth-4.5 lactate  See Glycereth-5 lactate
CAS 125804-28-6
Uses: Emollient, humectant for pharmaceutical topicals; useful in hydro/alcoholic formulations
Properties: Water-wh. to pale yel. cl. visc. liq., mild typ. odor; sol. in water, methanol, IPA; misc. with ethanol, propylene glycol; disp. in castor oil; insol. in min. oil, IPM; sp.gr. 0.858±0.01 (20 C); b.p. dec. > 210 C; acid no. 5 max.; sapon. no. 165-185; flash pt. (COC) > 210 C; nonionic; 100% act.
Toxicology: Nonirritating to eyes and skin; nontoxic orally; skin exposure can cause irritation; ingestion may cause nausea, vomiting, abdominal pain
Precaution: Incompat. with strong oxidizing agents
Hazardous Decomp. Prods.: CO, CO2

Pelemol® GTB [Phoenix http://www.phoenix-chem.com]
Chem. Descrip.: Glycerol tribehenate  See Tribehenin
CAS 18641-57-1; EINECS/ELINCS 242-471-7
Uses: Emollient imparting body to pharmaceutical topicals
Properties: Off-wh. waxy gran., char. fatty odor; sol. hot with castor oil, min. oil; misc. hot with cyclomethicone, IPM; insol. in water, ethanol; sp.gr. 0.92; iodine no. 2 max.; flash pt. (COC) 315 C min.; 100% act.
Toxicology: Inh. hazard is negligible unless heated to produce vapors or as mist, which may cause mucous membrane irritation, dizziness, nausea; eye and prolonged/repeated skin contact may cause irritation; ingestion may irritate digestive tract
Precaution: Incompat. with strong oxidizing agents
Hazardous Decomp. Prods.: Combustion produces CO, CO2, thick smoke
Storage: Avoid prolonged heated storage

Pelemol® GTL [Phoenix http://www.phoenix-chem.com]
Chem. Descrip.: Glycereth-5 lactate  See Trilactin
CAS 537-32-6; EINECS/ELINCS 208-664-5
Uses: Emollient used in pharmaceutical topicals
Properties: Yel. oily visc. liq.; disp. in castor oil; misc. with propylene glycol; insol. in water, ethanol, cyclomethicone, min. oil, IPM; sp.gr. 0.96; b.p. > 200 C; acid no. 5 max.; sapon. no. 165-185; flash pt. (PMCC) > 150 C; pH ≈ 6 (10%); 100% act.; 0.5% max. moisture
Toxicology: Nonirritating to skin and eyes; ingestion may cause abdominal upset; eye contact may cause irritation
Precaution: Incompat. with strong oxidizers and reducing agents
Hazardous Decomp. Prods.: Incomplete combustion produces CO
Storage: Avoid prolonged heated storage

Pelemol® IB [Phoenix http://www.phoenix-chem.com]
Chem. Descrip.: Dihydroabietyl behenate
CAS 127036-29-7
Uses: Emollient for pharmaceutical topicals, sunscreens
Properties: Amber soft solid; misc. with IPM; disp. in castor oil, min. oil, cyclomethicone; insol. in water, ethanol, propylene glycol; sp.gr. 0.91 (40 C); m.p. 35 C; b.p. > 200 C; acid no. 10 max.; sapon. no. 75-95; flash pt. (TCC) > 150 C; pH ≈ 6; 100% act.
Toxicology: Nonirritating to skin and eyes; nontoxic orally; noncomedogenic; skin exposure may cause irritation; ingestion may cause abdominal upset
Precaution: Incompat. with strong oxidizers and reducing agents
Hazardous Decomp. Prods.: Incomplete combustion produces CO
Storage: Avoid prolonged heated storage
Pelemol® ICB  [Phoenix http://www.phoenix-chem.com]
Chem. Descrip.:  *Isocetyl behenate*
CAS  94247-28-6; EINECS/ELINCS 304-205-9
Uses:  *Emollient for pharmaceutical topicals*
Properties:  Lt. yel. oily cl. liq., mild char. odor; misc. with castor oil, min. oil, cyclomethicone, IPM; insol. in water, alcohol, propylene glycol; sp.gr. 0.91; f.p. 9 C; b.p. dec.; acid no. 3 max.; sapon. no. 70-95; flash pt. (COC) 345 F; 100% act.
Toxicology:  *Nonirritating to skin and eyes; nontoxic orally; noncomedogenic; skin exposure can cause irritation; ingestion may cause nausea, vomiting, abdominal pain*
Precaution:  *Incompat. with strong oxidizing agents*
Hazardous Decomp. Prods.:  CO, CO₂
Storage:  Store in cool, dry location away from strong oxidizing agents; avoid excessive heat

Pelemol® ICLA  [Phoenix http://www.phoenix-chem.com]
Chem. Descrip.:  *Isocetyl laurate*
Uses:  *Emollient used in pharmaceutical topicals*
Properties:  Pale yel. liq.; misc. with castor oil, cyclomethicone, min. oil, IPM; insol. in water, ethanol, propylene glycol; sp.gr. 0.853-0.859; visc. 32 cps; f.p. 0 C; b.p. 149 C; acid no. 3 max.; iodine no. 5 max.; sapon. no. 120-140; flash pt. (COC) 238 C; ref. index 1.455; 100% act.
Toxicology:  *Skin exposure can cause irritation; ingestion may cause nausea, vomiting, abdominal pain*
Precaution:  *Incompat. with strong oxidizing agents*
Hazardous Decomp. Prods.:  COₓ
Storage:  Store in cool place away from strong oxidizing materials

Pelemol® ICO  [Phoenix http://www.phoenix-chem.com]
Chem. Descrip.:  *Isocetyl octanoate*
CAS  125804-19-5
Uses:  *Emollient used in pharmaceutical topicals*
Properties:  Almost colorless liq.; mild typ. odor; misc. with castor oil, min. oil, cyclomethicone, IPM; insol. in water, ethanol, propylene glycol; sp.gr. 0.89; b.p. > 200 C; flash pt. (COC) > 200 C; 100% act.
Toxicology:  *Skin exposure can cause irritation; ingestion may cause nausea, vomiting, abdominal pain*
Precaution:  *Incompat. with strong oxidizing agents*
Hazardous Decomp. Prods.:  CO, CO₂
Storage:  Store in cool, dry location; avoid excessive heat

Pelemol® IDO  [Phoenix http://www.phoenix-chem.com]
Chem. Descrip.:  *Isodecyl oleate*
CAS  59231-34-4; EINECS/ELINCS 261-673-6
Uses:  *Emollient used in pharmaceutical topicals*
Properties:  Pale yel. med. visc. liq.; typ. odor; sol. in peanut oil 95% ethanol, IPM, min. oil; misc. with cyclomethicone; insol. in water, 70% ethanol, glycerin, propylene glycol; sp.gr. 0.861; f.p. < 0 C; b.p. > 240 C; acid no. 1-5; iodine no. 45-50; sapon. no. 120-140; flash pt. (COC) 238 C; ref. index 1.455; 100% act.
Precaution:  *Incompat. with strong oxidizing agents*
Hazardous Decomp. Prods.:  COₓ
Storage:  Store in cool, dry location; avoid excessive heat

Pelemol® IN-2  [Phoenix http://www.phoenix-chem.com]
Chem. Descrip.:  *Isononyl isononanoate*
CAS  42131-25-9; EINECS/ELINCS 261-665-2
Uses:  *Emollient used in pharmaceutical topicals*
Properties:  Water-wh. cl. mobile liq.; misc. with castor oil, min. oil, cyclomethicone, IPM; insol. in water, ethanol, propylene glycol; sp.gr. 0.85;
Pelemol® ISB [Phoenix http://www.phoenix-chem.com]
Chem. Descrip.: Isostearyl behenate
CAS 125804-16-2
Uses: Emollient, moisture barrier for pharmaceutical topicals
Properties: Wh. to off-wh. opaque soft paste, bland odor; sol. warm in castor oil, min. oil, cyclomethicone; misc. with IPM; insol. in water, ethanol, propylene glycol; sp.gr. 0.985; m.p. 37 C; b.p. dec.; acid no. 3 max.; sapon. no. 80-100; flash pt. (COC) 350 F; 100% act.
Toxicology: Nonirritating to eyes; nonprimary skin irritant; LD50 (oral) > 5 g/kg, nontoxic orally; noncomedogenic; skin exposure can cause irritation; ingestion may cause nausea, vomiting, abdominal pain
Hazardous Decomp. Prods.: May form toxic combustion prods.
Storage: Store in cool, dry place away from strong oxidizing agents; avoid excessive heat

Pelemol® ISL [Phoenix http://www.phoenix-chem.com]
Chem. Descrip.: Isostearl lactate
CAS 42131-28-2; EINECS/ELINCS 255-674-0
Uses: Emollient used in pharmaceutical topicals
Properties: Sl. yel. liq., mild typ. odor; misc. with castor oil, min. oil, cyclomethicone, IPM; disp. with propylene glycol; insol. in water, ethanol, propylene glycol; sp.gr. 0.85; f.p. 10-15 C; b.p. > 150 C; acid no. 5 max.; sapon. no. 46-86; flash pt. (TCC) 480 F; 100% act.
Toxicology: Nonirritating to skin and eyes; nontoxic orally; skin exposure can cause irritation; ingestion may cause nausea, vomiting, abdominal pain
Precaution: Incompat. with strong oxidizers and reducers; esters will hydrolyze at high and low pH
Hazardous Decomp. Prods.: Thermal decomp. prods.: COx
Storage: Store in cool, dry location away from strong oxidizing agents; avoid excessive heat

Chem. Descrip.: Laureth-2 acetate
CAS 32289-26-2
Uses: Emollient for pharmaceutical topicals; coupler for hydro-alcoholic systems
Properties: Water-wh. to pale yel. cl. liq., mild odor; sol. in hydro-alcoholic sol'ns., ethanol, min. oil; misc. with castor oil, propylene glycol, IPM; disp. in water, cyclomethicone; sp.gr. 1.01 g/ml; b.p. < 300 C; acid no. 5 max.; sapon. no. 40-66; flash pt. (TCC) 480 F; 100% act.
Toxicology: Skin exposure may cause irritation; ingestion may cause abdominal upset; eye contact may cause irritation
Precaution: Incompat. with strong oxidizers and reducers
Hazardous Decomp. Prods.: Incomplete combustion produces CO
Storage: Avoid prolonged heated storage

Pelemol® MM [Phoenix http://www.phoenix-chem.com]
Chem. Descrip.: Myristyl myristate
CAS 3234-85-3; EINECS/ELINCS 221-787-9
Uses: Emollient used in pharmaceutical topicals
Properties: Wh. waxy flake; misc. hot with castor oil, min. oil, cyclomethicone, IPM; insol. in water, ethanol, propylene glycol; m.p. ≈ 40 C;
Trade Name Reference

b.p. > 150 C; acid no. 1 max.; iodine no. 2 max.; sapon. no. 120-130; flash pt. (PMCC) > 150 C; pH ≈ 6 (10%); 100% act.

Toxicology: Skin exposure can cause irritation; ingestion may cause abdominal upset; eye contact may cause irritation

Precaution: Incompat. with strong oxidizers and reducing agents

Hazardous Decomp. Prods.: Incomplete combustion produces CO

Storage: Avoid prolonged heated storage

Pelemol® MS [Phoenix http://www.phoenix-chem.com]

Chem. Descrip.: Myristyl stearate

Uses: Emollient, visc. builder for pharmaceutical topicals

Properties: Wh. to off-wh. cryst. waxy flake, mild fatty odor; misc. hot with castor oil, min. oil, cyclomethicone, IPM; insol. in water, ethanol, propylene glycol; sp.gr. 0.897 (55 C); m.p. ≈ 50 C; acid no. 5 max.; iodine no. 1 max.; sapon. no. 120-125; flash pt. (PMCC) > 200 C; 100% act.

Toxicology: May cause skin or eye irritation; ingestion may cause gastric upset

Precaution: Incompat. with strong oxidizing agents

Hazardous Decomp. Prods.: May form CO

Storage: Store in cool, dry place

Pelemol® OL [Phoenix http://www.phoenix-chem.com]

Chem. Descrip.: Oleyl lactate

Uses: Emollient, softener, moisturizer for pharmaceutical topicals

Properties: Lt. amber visc. liq., mild fatty odor; sol. in hydro/alcoholic sol'n's.; misc. with castor oil, min. oil, cyclomethicone, IPM; disp. in propylene glycol; insol. in water, ethanol; sp.gr. 0.90; vapor pressure negligible; b.p. > 207 C; acid no. 10 max.; iodine no. 1 max.; flash pt. (COC) 157 C; 100% act.; 0.5% max. moisture

Toxicology: Nonirritating to skin; prac. nonirritating to eyes; nontoxic orally; noncomedogenic

Precaution: Incompat. with strong oxidizing agents; avoid open flame, ignition sources

Hazardous Decomp. Prods.: COx

Storage: Store in cool, dry location; avoid excessive heat

Pelemol® PDD [Phoenix http://www.phoenix-chem.com]

Chem. Descrip.: Propylene glycol dicaprylate/dicaprate

Uses: Emollient used in pharmaceutical topicals

Properties: APHA 50 max. liq.; misc. with castor oil, min. oil, cyclomethicone, IPM; insol. in water, ethanol, propylene glycol; dens. 7.5 lb/gal; b.p. > 300 F; iodine no. 1 max.; sapon. no. 315-335; hyd. no. 10 max.; flash pt. (PMCC) > 200 F; 100% act.; 0.1% max. moisture

Toxicology: Mist irritates nasal passages; nonprimary eye irritant, but contact may cause mild transient irritation; nonprimary skin irritant, but prolonged contact may cause mild, transient irritation

Precaution: Incompat. with strong alkali or caustic, strong oxidizing agents; avoid handling/storage near open flame; spillages may be slippery

Pelemol® PTL [Phoenix http://www.phoenix-chem.com]

Chem. Descrip.: Pentaeathyriyl tetralaurate

Uses: Hydrophobic oligomeric ester, emollient for pharmaceutical topicals, sunscreens

Properties: Yel. opalescent soft waxy paste, char. odor; disp. in castor oil, min. oil, ethanol, cyclomethicone, IPM; insol. in water, propylene glycol; sp.gr. 0.85; m.p. 30 C; b.p. > 150 C;
Trade Name Reference

- **Pelemol® TGC** [Phoenix](http://www.phoenix-chem.com)
  - **Chem. Descrip.:** Trioctyldodecyl citrate
  - **CAS:** 126121-35-5
  - **Uses:** Emollient used in pharmaceutical topicals; wetting agent for pigments
  - **Properties:** Cl. to sl. yel. sl. visc. oily liq., low odor; misc. with castor oil, min. oil, cyclomethicone, IPM; insol. in water, ethanol, propylene glycol; sp.gr. 1.01 g/ml; acid no. 5 max.; sapon. no. 135-165; flash pt. (TCC) > 200 F; nonionic; 100% act.
  - **Toxicology:** Nonirritating to skin and eyes; nontoxic orally; skin exposure can cause irritation; ingestion may cause nausea, vomiting, abdominal pain; inhalation in high concs. may cause coughing, headache, nausea
  - **Precaution:** Incompat. with strong oxidizers and reducing agents
  - **Hazardous Decomp. Prods.:** COx
  - **Storage:** Protect from freezing and boiling

- **Pellethane® 2102-55D** [Dow Plastics](http://www.dow.com/plastics)
  - **Chem. Descrip.:** Thermoplastic PU elastomer (polyester polycaprolactone resin) See Polyurethane elastomer, thermoplastic
  - **Uses:** Tough, high-performance, wear-resist. material providing clarity, chem. resist., flexibility for health care (tubing, catheter components, transdermal patches) applics.
  - **Features:** Can be used uncured or cured
  - **Properties:** Sp.gr. 1.22; melt flow 40 g/10 min (5 kg, 224 C); tens. str. 43 MPa (break); tens. elong. 450% (break); tear str. 262,650 N/m; Shore hardness 65D; mold shrinkage 0.007-0.010 mm/mm

- **Pellethane® 2102-75A** [Dow Plastics](http://www.dow.com/plastics)
  - **Chem. Descrip.:** Thermoplastic PU elastomer (polyester polycaprolactone resin) See Polyurethane elastomer, thermoplastic
  - **Uses:** Tough, high-performance, wear-resist. material providing clarity, chem. resist., flexibility for health care (tubing, catheter components, transdermal patches) applics.
  - **Features:** Can be used uncured or cured
  - **Properties:** Sp.gr. 1.17; melt flow 25 g/10 min (1.2 kg, 224 C); tens. str. 35 MPa (break); tens. elong. 550% (break); tear str. 87,550 N/m; Shore hardness 77A; mold shrinkage 0.012-0.016 mm/mm

- **Pellethane® 2102-80A** [Dow Plastics](http://www.dow.com/plastics)

  - **Uses:** Tough, high-performance, wear-resist. material providing clarity, chem. resist., flexibility for health care (tubing, catheter components, transdermal patches) applics.
  - **Features:** Can be used uncured or cured
  - **Properties:** Sp.gr. 1.18; melt flow 31 g/10 min (2.16 kg, 224 C); tens. str. 40 MPa (break); tens. elong. 550% (break); tear str. 140,060 N/m; Shore hardness 58D; mold shrinkage 0.008-0.011 mm/mm
Trade Name Reference

(1.2 kg, 224 C); tens. str. 36 MPa (break); tens. elong. 500% (break); tear str. 91,052 N/m; Shore hardness 88A; mold shrinkage 0.011-0.015 mm/mm

Chem. Descrip.: Thermoplastic PU elastomer (polyester polycaprolactone resin) See Polyurethane elastomer, thermoplastic
Uses: Tough, high-performance, wear-resist. material providing clarity, chem. resist., flexibility for health care (tubing, catheter components, transdermal patches) applics.
Features: Can be used uncured or cured
Properties: Sp.gr. 1.06; melt flow 12 g/10 min (8.7 kg, 190 C); tens. str. 26 MPa (break); tens. elong. 730% (break); tear str. 66,538 N/m; Shore hardness 72A; mold shrinkage 0.014-0.018 mm/mm

Pellethane® 2102-90AE [Dow Plastics http://www.dow.com/plastics]
Chem. Descrip.: Thermoplastic PU elastomer (polyester polycaprolactone resin) See Polyurethane elastomer, thermoplastic
Uses: Tough, high-performance, wear-resist. material providing clarity, chem. resist., flexibility for health care (tubing, catheter components, transdermal patches) applics.
Features: Can be used uncured or cured
Properties: Sp.gr. 1.20; melt flow 11 g/10 min (1.2 kg, 224 C); tens. str. 43 MPa (break); tens. elong. 440% (break); tear str. 131,325 N/m; Shore hardness 93A; mold shrinkage 0.009-0.013 mm/mm

Pellethane® 2102-90AR [Dow Plastics http://www.dow.com/plastics]
Chem. Descrip.: Thermoplastic PU elastomer (polyester polycaprolactone resin) See Polyurethane elastomer, thermoplastic
Uses: Tough, high-performance, wear-resist. material providing clarity, chem. resist., flexibility for health care (tubing, catheter components, transdermal patches) applics.
Features: Can be used uncured or cured
Properties: Sp.gr. 1.20; melt flow 28 g/10 min (1.2 kg, 224 C); tens. str. 41 MPa (break); tens. elong. 525% (break); tear str. 131,325 N/m; Shore hardness 93A; mold shrinkage 0.009-0.013 mm/mm

Pellethane® 2103-80AE [Dow Plastics http://www.dow.com/plastics]
Chem. Descrip.: Thermoplastic PU elastomer (polytetramethylene glycol ether resin) See Polyurethane elastomer, thermoplastic
Uses: Tough, high-performance, wear-resist. material providing clarity, chem. resist., flexibility for health care (tubing, catheter components, transdermal patches) applics.
Features: Can be used uncured or cured
Properties: Sp.gr. 1.13; melt flow 40 g/10 min (1.2 kg, 224 C); tens. str. 34 MPa (break); tens. elong. 600% (break); tear str. 80,546 N/m; Shore hardness 83A; mold shrinkage 0.012-0.016 mm/mm

Pellethane® 2103-80AEN [Dow Plastics http://www.dow.com/plastics]
Chem. Descrip.: Thermoplastic PU elastomer (polytetramethylene glycol ether resin) See Polyurethane elastomer, thermoplastic
Uses: Tough, high-performance, wear-resist. material providing clarity, chem. resist., flexibility for health care (tubing, catheter components, transdermal patches) applics.
Features: Can be used uncured or cured
Properties: Sp.gr. 1.13; melt flow 15 g/10 min (8.7 kg, 190 C); tens. str. 35 MPa (break); tens. elong. 580% (break); tear str. 80,546 N/m; Shore hardness 83A; mold shrinkage 0.012-0.016 mm/mm

Chem. Descrip.: Thermoplastic PU elastomer

(1.2 kg, 224 C); tens. str. 36 MPa (break); tens. elong. 500% (break); tear str. 91,052 N/m; Shore hardness 88A; mold shrinkage 0.011-0.015 mm/mm

Chem. Descrip.: Thermoplastic PU elastomer (polyester polycaprolactone resin) See Polyurethane elastomer, thermoplastic
Uses: Tough, high-performance, wear-resist. material providing clarity, chem. resist., flexibility for health care (tubing, catheter components, transdermal patches) applics.
Features: Can be used uncured or cured
Properties: Sp.gr. 1.06; melt flow 12 g/10 min (8.7 kg, 190 C); tens. str. 26 MPa (break); tens. elong. 730% (break); tear str. 66,538 N/m; Shore hardness 72A; mold shrinkage 0.014-0.018 mm/mm

Pellethane® 2102-90AE [Dow Plastics http://www.dow.com/plastics]
Chem. Descrip.: Thermoplastic PU elastomer (polyester polycaprolactone resin) See Polyurethane elastomer, thermoplastic
Uses: Tough, high-performance, wear-resist. material providing clarity, chem. resist., flexibility for health care (tubing, catheter components, transdermal patches) applics.
Features: Can be used uncured or cured
Properties: Sp.gr. 1.20; melt flow 11 g/10 min (1.2 kg, 224 C); tens. str. 43 MPa (break); tens. elong. 440% (break); tear str. 131,325 N/m; Shore hardness 93A; mold shrinkage 0.009-0.013 mm/mm

Pellethane® 2102-90AR [Dow Plastics http://www.dow.com/plastics]
Chem. Descrip.: Thermoplastic PU elastomer (polyester polycaprolactone resin) See Polyurethane elastomer, thermoplastic
Uses: Tough, high-performance, wear-resist. material providing clarity, chem. resist., flexibility for health care (tubing, catheter components, transdermal patches) applics.
Features: Can be used uncured or cured
Properties: Sp.gr. 1.20; melt flow 28 g/10 min (1.2 kg, 224 C); tens. str. 41 MPa (break); tens. elong. 525% (break); tear str. 131,325 N/m; Shore hardness 93A; mold shrinkage 0.009-0.013 mm/mm

Pellethane® 2103-80AE [Dow Plastics http://www.dow.com/plastics]
Chem. Descrip.: Thermoplastic PU elastomer (polytetramethylene glycol ether resin) See Polyurethane elastomer, thermoplastic
Uses: Tough, high-performance, wear-resist. material providing clarity, chem. resist., flexibility for health care (tubing, catheter components, transdermal patches) applics.
Features: Can be used uncured or cured
Properties: Sp.gr. 1.13; melt flow 40 g/10 min (1.2 kg, 224 C); tens. str. 34 MPa (break); tens. elong. 600% (break); tear str. 80,546 N/m; Shore hardness 83A; mold shrinkage 0.012-0.016 mm/mm

Pellethane® 2103-80AEN [Dow Plastics http://www.dow.com/plastics]
Chem. Descrip.: Thermoplastic PU elastomer (polytetramethylene glycol ether resin) See Polyurethane elastomer, thermoplastic
Uses: Tough, high-performance, wear-resist. material providing clarity, chem. resist., flexibility for health care (tubing, catheter components, transdermal patches) applics.
Features: Can be used uncured or cured
Properties: Sp.gr. 1.13; melt flow 15 g/10 min (8.7 kg, 190 C); tens. str. 35 MPa (break); tens. elong. 580% (break); tear str. 80,546 N/m; Shore hardness 83A; mold shrinkage 0.012-0.016 mm/mm

Chem. Descrip.: Thermoplastic PU elastomer

Regulatory: FDA 21CFR §177.2600; NSF Std.
Trade Name Reference

61 certified

Properties: Sp.gr. 1.13; tens. str. 28 MPa (break); tens. elong. 450% (break); tear str. 87,550 N/m; Shore hardness 83A; mold shrinkage 0.012-0.016 mm/mm

Pelletthane® 2103-80PF [Dow Plastics http://www.dow.com/plastics]
Chem. Descrip.: Thermoplastic PU elastomer (polytetramethylene glycol ether resin) See Polyurethane elastomer, thermoplastic
Uses: Tough, high-performance, wear-resist. material providing clarity, chem. resist., flexibility for health care (tubing, catheter components, transdermal patches) applics.
Features: Can be used uncured or cured
Properties: Sp.gr. 1.1; melt flow 30 g/10 min (8.7 kg, 190 C); tens. str. 26 MPa (break); tens. elong. 650% (break); tear str. 78,795 N/m; Shore hardness 83A; mold shrinkage 0.012-0.016 mm/mm

Pelletthane® 2103-85AE [Dow Plastics http://www.dow.com/plastics]
Chem. Descrip.: Thermoplastic PU elastomer (polytetramethylene glycol ether resin) See Polyurethane elastomer, thermoplastic
Uses: Tough, high-performance, wear-resist. material providing clarity, chem. resist., flexibility for health care (tubing, catheter components, transdermal patches) applics.
Features: Can be used uncured or cured
Properties: Sp.gr. 1.1; melt flow 7 g/10 min (8.7 kg, 190 C); tens. str. 37 MPa (break); tens. elong. 520% (break); tear str. 105,060 N/m; Shore hardness 91A; mold shrinkage 0.010-0.014 mm/mm

Pelletthane® 2355-85ABR [Dow Plastics http://www.dow.com/plastics]
Chem. Descrip.: Thermoplastic PU elastomer (polyester polyadipate resin) See Polyurethane elastomer, thermoplastic
Uses: For health care (tubing, catheter components, transdermal patches) applics.
Regulatory: FDA and USDA compliance
Properties: Sp.gr. 1.18; melt flow 39 g/10 min (8.7 kg, 190 C); tens. str. 31 MPa (break); tens. elong. 600% (break); tear str. 78,795 N/m; Shore hardness 87A; mold shrinkage 0.012-0.016 mm/mm

Pelletthane® 2363-55D [Dow Plastics http://www.dow.com/plastics]
Chem. Descrip.: Thermoplastic PU elastomer (polytetramethylene glycol ether) See Polyurethane elastomer, thermoplastic
Uses: Health care resin; tough, high-performance, wear-resist. material providing clarity, chem. resist., flexibility for health care (tubing, catheter components, transdermal patches) applics.
Features: Can be used uncured or cured
Properties: Sp.gr. 1.22; melt flow 13 g/10 min (8.7 kg, 190 C); tens. str. 35 MPa (break); tens. elong. 450% (break); tear str. 105,060 N/m; Shore hardness 94A
Trade Name Reference

**Regulatory:** USP Class VI compliance

**Properties:** Sp.gr. 1.15; melt flow 10 g/10 min (2.16 kg, 224 C); tens. str. 48 MPa (break); tens. elong. 390% (break); tear str. 113,815 N/m; Shore hardness 55D; mold shrinkage 0.008-0.011 mm/mm

**Pellethane® 2363-55DE** [Dow Plastics http://www.dow.com/plastics]

**Uses:** Health care resin; tough, high-performance, wear-resist. material providing clarity, chem. resist., flexibility for health care (tubing, catheter components, transdermal patches) apps.

**Features:** Can be used uncured or cured

**Regulatory:** USP Class VI compliance

**Properties:** Sp.gr. 1.14; melt flow 30 g/10 min (1.2 kg, 224 C); tens. str. 41 MPa (break); tens. elong. 560% (break); tear str. 94,554 N/m; Shore hardness 90A; mold shrinkage 0.010-0.014 mm/mm

**Pemulen® TR-1 NF Polymer** [Noveon](http://www.carbopol.com; http://www.noveoncoatings.com)

**Chem. Descrip.:** Acrylates/C10-30 alkyl acrylate crosspolymer

**Uses:** O/w emulsifier and rheology modifier for low-irritancy pharmaceutical creams, lotions, high-clarity topical gels, low or no alcohol fragrance prods., skin care prods., ophthalmic emulsions

**Regulatory:** USP/NF Carbomer Copolymer Type A compliance; JSCI compliance

**Properties:** Wh. fluffy powd., sl. acetic odor; 2-6 µ particle size; sp.gr. 1.41; bulk dens. 0.19 - 0.24 g/ml; visc. 6500-15,500 cps; acid no. 700-750; pH 2.5-3.0 (1% aq. disp.); anionic; 100% conc.

**Toxicology:** Sl. skin irritant; borderline eye irritant

**Environmental:** LC50 (daphnia magna, 96 h) 168-280 mg/l; not biodegradable; do not inhibit waste treatment bacteria; do not pass through typical wastewater treatment to the environment, removed with biomass

**HMIS:** Health 0, Flammability 1, Reactivity 0

**Storage:** 2 yr. min. shelf life stored in sealed containers, protected from moisture and extreme temps.; hygroscopic

**Pemulen® TR-2 NF Polymer** [Noveon](http://www.carbopol.com; http://www.noveoncoatings.com)

**Chem. Descrip.:** Proprietary acrylic polymer

**Uses:** O/w emulsifier and rheology modifier for virtually all hydrophobic substances, for low-irritancy pharmaceutical creams, lotions, high-clarity topical gels, low or no alcohol fragrance prods., ophthalmic emulsions

**Regulatory:** USP/NF Carbomer Copolymer Type A compliance; JSCI compliance

**Properties:** Wh. fluffy powd., sl. acetic odor; 2-6 µ particle size; sp.gr. 1.41; bulk dens. 0.19 - 0.24 g/ml; visc. 6500-15,500 cps; acid no. 700-750; pH 2.5-3.0 (1% aq. disp.); anionic; 100% conc.

**Toxicology:** Sl. skin irritant; borderline eye irritant

**Environmental:** LC50 (daphnia magna, 96 h) 168-280 mg/l; not biodegradable; do not inhibit waste treatment bacteria; do not pass through typical wastewater treatment to the environment, removed with biomass

**HMIS:** Health 0, Flammability 1, Reactivity 0

**Storage:** 2 yr. min. shelf life stored in sealed containers, protected from moisture and extreme temps.; hygroscopic

**Penreco Amber** [Penreco](http://www.penreco.com)

**Chem. Descrip.:** Petrolatum USP

**CAS 8027-32-5; EINECS/ELINCS 232-373-2**

**Uses:** Emollient, base, lubricant, binder, protective coating, and carrier for pharmaceuticals

**Regulatory:** FDA 21CFR 172.880, 178.3700, 573.720; OSHA nonhazardous; DOT nonhazardous

**Properties:** Yel. semisolid, odorless; sol. in hydrocarbons; sp.gr. 0.86 (60 F); visc. 68-82 SUS (210 F); m.p. 122-135 F; congeal pt. 123 F; solid. pt. 122 F; flash pt. (COC) 400 F; 100% act.

**Toxicology:** LD50 (oral, rat) >5 g/kg; LD50 (dermal, rat) 2 g/kg; ACGIH 5 mg/m³ TWA, 10 mg/m³ STEL; pract. nontoxic by ingestion, but laxative props. may cause abdominal cramps, diarrhea; minimally irritating to eyes and skin on direct contact; STEL 10 mg/m³ (as oil mist); TSCA listed

**Precaution:** May react with strong oxidizing agents

**Handbook of Pharmaceutical Additives, Third Edition** 530
Hazardous Decomp. Prods.: Combustion:
dense smoke, CO, CO₂, other oxides
Storage: Store in closed containers away from
heat, sparks, open flame, oxidizers

Penreco Blond [Penreco
http://www.penreco.com]
Chem. Descrip.: Petrolatum USP
CAS 8027-32-5; EINECS/ELINCS 232-373-2
Uses: Emollient, base, lubricant, binder,
protective coating, and carrier for
pharmaceuticals
Regulatory: FDA 21CFR 172.880, 178.3700,
573.720; OSHA nonhazardous; DOT
nonhazardous
Properties: Yel. semisolid, odorless; sol. in
hydrocarbons; sp.gr. 0.86 (60 F); visc. 68-82
SUS (210 F); m.p. 122-135 F; congeal pt. 123
F; solid. pt. 122 F; flash pt. (COC) 400 F;
100% act.
Toxicology: LD50 (oral, rat) >5 g/kg; LD50
(dermal, rat) 2 g/kg; ACGIH 5 mg/m³ TWA,
10 mg/m³ STEL; pract. nontoxic by
ingestion, but laxative props. may cause
abdominal cramps, diarrhea; minimally
irritating to eyes and skin on direct contact;
STEL 10 mg/m³ (as oil mist); TSCA listed
Precaution: May react with strong oxidizing
agents

Penreco Cream [Penreco
http://www.penreco.com]
Chem. Descrip.: Wh. petrolatum USP
CAS 8027-32-5; EINECS/ELINCS 232-373-2
Uses: Emollient, base, lubricant, binder,
protective coating, and carrier for
pharmaceuticals
Regulatory: FDA 21CFR 172.880, 178.3700,
573.720; OSHA nonhazardous; DOT
nonhazardous
Properties: Wh. visc. material, odorless; sol. in
hydrocarbons; sp.gr. 0.86 (60/60 F); visc. 64-
75 SUS (210 F); m.p. 122-135 F; b.p. 650 F;
(COC) 400 F
Toxicology: Pract. nontoxic by ingestion, but
laxative props. may cause abdominal
cramps, diarrhea; minimally irritating to
eyes and skin on direct contact; STEL 10
mg/m³ (as oil mist); TSCA listed
Precaution: May react with strong oxidizing
agents

Penreco Lily [Penreco
http://www.penreco.com]
Chem. Descrip.: Wh. petrolatum USP
CAS 8027-32-5; EINECS/ELINCS 232-373-2
Uses: Emollient, base, lubricant, binder,
protective coating, and carrier for
pharmaceuticals
Regulatory: FDA 21CFR 172.880, 178.3700,
573.720; OSHA nonhazardous; DOT
nonhazardous
Properties: Wh. semisolid, odorless; sol. in
hydrocarbons; sp.gr. 0.87 (60/60 F); visc. 64-

Trade Name Reference

- **eyes and skin** on direct contact; STEL 10 mg/m³ (as oil mist); TSCA listed

*Precaution:* May react with strong oxidizing agents

*Hazardous Decomp. Prods.: Combustion:*

dense smoke, CO, CO₂, other oxides

*Storage:* Store in closed containers away from heat, sparks, open flame, oxidizers

*Chem. Descrip.: 1-Pentanol (45%), 2-methyl-1-butanol (55%) See n-Amyl alcohol*

*UN 1105*

*Uses:* Extraction solvent in separation of penicillin

*Regulatory:* SARA §311 acute health/fire hazard

*Properties:* Colorless cl. liq.; char. fusel oil odor; sol. 26 g/l in water; misc. with common org. solvs.; sp.gr. 0.815 (20 C); visc. ≈ 4.3 mPa·s (20 C); vapor pressure 2.25 mm Hg (20 C); b.p. 135 C; acid no. 0.10 max.; pour pt. < -60 C; flash pt. (CC) 43 C; autoignition temp. 365 C; surf. tens. 25.6 mN/m (20 C); dielec. const. 15.3 (20 C)

*Toxicology:* LD₅₀ (oral, rat) 2.20-4.01 g/kg, (skin, rabbit) > 2000 mg/kg; LC₅₀ (inh., rat, 4 h) 2-20 mg/l, harmful by inh.; causes respiratory tract/eye irritation; mod. to severe skin irritant; may be harmful absorbed through skin; may cause CNS depression, headache, stupor, unconsciousness, nausea, dizziness, chest pain, breathing difficulty; severe mucous membrane irritant; narcotic effects if inh. in fairly high concs.; may be harmful by ing.; TSCA listed

*Environmental: Readily biodeg.; BOD₅ 0.59-0.87; low potential to bioaccumulate; EC₅₀ (daphnia magna, 24 h) 423-580 ppm, (E. coli) 961-1058 ppm; low acute toxicity to aquatic species; avoid run-off to storm sewers, ditches leading to waterways

*Precaution:* Flamm. liq. and vapor; flamm. limits in air 1.2-12.4 vol.% (1013 hPa); floats on water; may generate static charge; ground/bond equip. during transfer; avoid heat, sparks, flame, ignition sources; incompat. with sulfuric and other strong inorg. acids, aluminum, lead, oxidizing agents, peroxides, nitric acid, perchloric acid, chromium trioxide

**Hazardous Decomp. Prods.:** Thermal decomp. or combustion: CO₉

*HMIS: Health 2, Flammability 2, Reactivity 0*

*Storage:* Store away from moisture, direct sunlight, incompat. materials; keep tightly closed when not in use; open containers slowly to allow excess pressure to vent

**Pentasept M** [Trigon Chemie GmbH http://www.trigon.de.com]

*Chem. Descrip.: Cetrimide (15%) and chlorhexidine digluconate (1.5%) See Cetrimonium bromide*

*Uses:* Conc. disinfectant for pharmaceutical use

*Features:* Effective against gram positive and negative bacteria, and fungi

*Properties:* Yel. cl. liq.; sp.gr. 0.97-1.03; pH 5-7

*Use Level:* 35 ml/l liter of water (instruments, equip.); 35 ml/l 1 liter of alcohol (skin)

**Pentonium 4Br40** [Trigon Chemie GmbH http://www.trigon.de.com]

*Chem. Descrip.: Myrtrimonium bromide BP, ethanol (7-8%) See Alcohol*

*Uses:* Disinfectant; detergent sanitizer; antiseptic creams; purification of heparin

*Regulatory:* BP, EP, FP compliance

*Properties:* Colorless to pale yel. cl. visc. liq.; mild alcoholic odor; completely sol. in water; sol. in alcohol; sp.gr. 0.97-1.03; pH 5-7

**Pentonium 24-95USP** [Trigon Chemie GmbH http://www.trigon.de.com]

*Chem. Descrip.: Benzalkonium chloride CAS 8001-54-5*

*Uses:* Biocide for pharmaceuticals

*Properties:* Paste

**Pentonium 24 BP** [Trigon Chemie GmbH http://www.trigon.de.com]

*Chem. Descrip.: Alkyl (C12, C14) dimethyl benzyl ammonium chloride See Benzalkonium chloride CAS 8001-54-5*

*Uses:* Disinfectant; detergent sanitizer

*Properties: Hazen 100 max. color; pH 5.5-6.5 (2% aq.); cationic; 49-51% act.; 52-53% water

**Pentonium 24 BP** [Trigon Chemie GmbH http://www.trigon.de.com]

*Chem. Descrip.: Polyoxyethylene polyoxypropylene glycol See EO/PO block polymer or copolymer*

*Uses:* Plasticizer of tablet binders
Trade Name Reference

Peppermint Oil DMO [B D Aromatics
http://www.bdaromatics.com]
Chem. Descrip.: Mentha arvensis oil
CAS 68917-18-0; EINECS/ELINCS 290-058-5
Uses: Flavor for pharmaceuticals
Properties: Colorless to pale yel. oil; strong
penetrating peppermint odor; freely sol. in 4
volumes of 90% alcohol; sp.gr. 0.896-0.908;
ref. index 1.460-1.470

Pepsin 1:3000 Powder [Am. Labs
http://www.americanlaboratories.com]
Chem. Descrip.: Pepsin
CAS 9001-75-6; EINECS/ELINCS 232-629-3
Uses: Proteolytic enzyme for
pharmaceuticals; digests coagulated egg
albumen; enzyme for hydrolysis of
proteins; digestive aid in nutritional
formulas (tablets, capsules, powds.)
Properties: Off-wh. to lt. brn. powd.,
nonoffensive char. odor, salty taste; freely sol.
in water; pract. insol. in alcohol, chloroform,
ether; pH 3-4 (2%)
Storage: Preserve in tight containers with
moisture-proof liners, in cool, dry place

Pepsin 1:6000 [Am. Labs
http://www.americanlaboratories.com]
Chem. Descrip.: Pepsin
CAS 9001-75-6; EINECS/ELINCS 232-629-3
Uses: Proteolytic enzyme for
pharmaceuticals; digests coagulated egg
albumen; enzyme for hydrolysis of
proteins; digestive aid in nutritional
formulas (tablets, capsules, powds.)
Properties: Powd. or gran.
Storage: Preserve in tight containers with
moisture-proof liners, in cool, dry place

Pepsin 1:10,000 Powd. or Gran. [Am. Labs
http://www.americanlaboratories.com]
Chem. Descrip.: Pepsin
CAS 9001-75-6; EINECS/ELINCS 232-629-3
Uses: Proteolytic enzyme for
pharmaceuticals; digests coagulated egg
albumen; enzyme for hydrolysis of
proteins; digestive aid in nutritional
formulas (tablets, capsules, powds.)
Properties: Weak yel. to lt. brn. gran. or powd.,
nonoffensive char. odor, salty taste; freely sol.
in water; pract. insol. in alcohol, chloroform,
ether; pH 3-4 (2%)
Storage: Store @ R.T.

PeptiCLEC™-TR [Merck KGaA
http://www.merck.de]
Chem. Descrip.: Cross-linked enzyme crystals of
thermolysin
Uses: Regio- and stereoselective catalyst for
the synthesis of optically pure drugs and
peptides, esp. aspartame precursor
Properties: Dry powd. or slurry; insol. in water

Peptide CPC® [Solabia
http://www.solabia.com; Barnet Prods.
http://www.barnetproducts.com]
Chem. Descrip.: Polylysine sol’n. with
preservatives (methylparaben, ethylparaben,
propylparaben, butylparaben)
Uses: Collagen chrono-protector peptide for
prevention of skin aging; protects biomech.
integrity of collagen fibers and suppleness of
skin; rec. for day and night creams, sun prods.,
anti-aging preps.
Properties: Pale yel. cl. liq.; very sl. char. odor;
sol. in water, propylene glycol, glycerol; insol.
in ethanol; nonmisc. with oils; sp.gr. 1.160;
flash pt. > 100 C; ref. index 1.420; pH 6.5±0.7
Use Level: 0.3-2%
Toxicology: LD50 (oral, rat) > 3 g/kg; sl. eye
irritant; nonirritating to skin; very sl.
allergenic; nonmutagenic
Storage: Store in tight containers with
moisture-proof liners, in cool, dry place

Perfecta® [Chempura
http://www.chempura.com]
Chem. Descrip.: Petrolatum USP
CAS 8027-32-5; EINECS/ELINCS 232-373-2
Uses: Carrier, lubricant, moisture barrier,
protectant, softener in pharmaceuticals,
dental adhesives, medicated ointments,
Trade Name Reference

sun care prods.

Features: Lightest color, med. consistency, high m.p.

Regulatory: FDA 21CFR §172.880

Properties: Lovibond 0.3Y color; visc. 9-14 cSt (100 C); m.p. 57-60 C

Permulpin® D [Koster Keunen http://www.kosterkeunen.com]

Chem. Descrip.: Derived from plant-based fatty alcohols

Uses: Viscosity modifier, consistency improver, and stabilizer in pharmaceutical ointments, salves, and creams

Features: Self-emulsifying; highly stable in acidic and basic media; compat. with most pharmaceutical ingredients

Properties: Wh. wax; m.p. 47-55 C; acid no. 1 max.; sapon. no 2 max.; iodine no. 2.0 max.; nonionic

Petrolan USP [RITA http://www.ritacorp.com]

Chem. Descrip.: Petroleum

CAS 8009-03-8; EINECS/ELINCS 232-373-2

Uses: Ointment base, emollient

Regulatory: USP

Properties: Wh. grease; sp. gr. 0.815 - 0.880; melting range 38-60 C; flash pt. 400 F (COC)

Toxicology: Minimal eye irritation 'not likely to be absorbed through human skin

Environmental: Biodegrad.

Precaution: Avoid oxidizing agents; wear goggles and gloves

Hazardous Decomp. Prods.: None

Storage: No special precautions necessary

Petrothene® GA 818-073 [Equistar http://www.equistarchem.com]

Chem. Descrip.: Broad m.w. LLDPE See Polyethylene, linear low density

CAS 9002-88-4

Uses: Blow molding and extrusion grade for medical, beverage and drip irrigation tubing, squeeze tubes and bottles for pharmaceutical prod. pkg.

Regulatory: FDA 21CFR §177.1520 compliant

Properties: Sp.gr. 0.920; melt index 0.7 g/10 min; Vicat soften. pt. 88 C; tens. str. 2170 psi (break), 1550 psi (yield); elong. 750% (break), 15% (yield); hardness (Shore D) 51; distort. temp. 48 C (66 psi)

PG USP [Lyondell http://www.lyondell.com]

Chem. Descrip.: Propylene glycol

CAS 57-55-6; EINECS/ELINCS 200-338-0

Uses: Stabilizer, emulsifier, texturizer, antioxidant, anticaking agent, humectant for pharmaceuticals, dental whiteners

Properties: APHA 10 max. color; sol. in water; m.w. 76.1; sp.gr. 1.035 (20/20 C); dens. 8.62 lb/gal (20 C); visc. 46 cps; vapor pressure < 0.1 mm Hg (20 C); b.p. 189 C; flash pt. (Seta) 211 F; ref. index 1.431; surf. tens. 38 dynes/cm; sp. heat 0.593 Cal/g°C; 99.5% min. assay

HMIS: Health 0, Flammability 1, Reactivity 0

Pharmaburst [SPI Pharma http://www.spipharma.com]

Chem. Descrip.: Proprietary blend

Uses: Quick dissolving delivery platform for pharmaceutical actives; coprocessed excipient system; masks taste and grittiness of the actives

Features: Allows rapid disintegration and low adhesion to punch faces; highly compactable

Regulatory: USP, EP, cGMP compliant

Properties: Wh. free-flowing powd.; sol. in water; bulk dens. 0.45 g/ml; dens. 0.536 g/ml (tapped)

Use Level: 50-80%.

Toxicology: Dust can cause sl. eye irritation

Environmental: Not dangerous to the environment

Precaution: Wear safety goggles and impervious gloves; avoid acids, oxidizers and breathing dust

Hazardous Ingredients: None

Hazardous Decomp. Prods.: COx

Storage: Store in tightly closed container in a well-ventilated place

Pharma-Carb® [Chr. Hansen Inc http://www.chr-hansen.com; Eigenmann & Veronelli http://www.eigver.it]

Chem. Descrip.: Natural calcium carbonate USP

CAS 1317-65-3; EINECS/ELINCS 207-439-9

Uses: Diluent, carrier for pharmaceuticals

Properties: Powd.; 12.5 µ avg. particle size; ≥ 100% through 200 mesh; bulk dens. 75 lb/ft³ (loose), 98 lb/ft³ (packed); 98% min. assay

Chem. Descrip.: Microcrystalline cellulose

Chem. Analysis: 3.0 - 5.0 % loss on drying

CAS 9004-34-6

Uses: Diluent for pharmaceutical wet
Regulatory: USP/NF, EP, JP
Properties: 50 µ avg. particle size; bulk dens. 0.26 - 0.32 g/ml; pH 5.0-7.0

Pharmacel® 102 [DMV Int'l. Pharma http://www.dmv-international.com; Eigenmann & Veronelli http://www.eigver.it]
Chem. Descrip.: Microcrystalline cellulose Ph.Eur., USP/NF, JP
Chem. Analysis: 3.0 - 5.0 % loss on drying
CAS 9004-34-6
Uses: Diluent for pharmaceutical direct compression
Features: High compressibility
Properties: 85 µ avg. particle size; bulk dens. 0.28 - 0.33 g/ml; pH 5.0-7.0

Pharmacel® 105 [DMV Int'l. Pharma http://www.dmv-international.com]
Chem. Descrip.: Microcrystalline cellulose Ph.Eur., USP/NF, JP
Chem. Analysis: 1.0 - 5.0 % loss on drying
CAS 9004-34-6
Uses: Binder for pharmaceuticals and stabilizing blends with micronized ingreds.
Properties: Wh. odorless microfine free-flowing powd.; tasteless; 20 µ avg. particle size; bulk dens. 0.20 - 0.30 g/ml; pH 5.0-7.0

Pharmacel® 112 [DMV Int'l. Pharma http://www.dmv-international.com]
Chem. Descrip.: Microcrystalline cellulose Ph.Eur., USP/NF, JP
CAS 9004-34-6
Uses: Binder for pharmaceuticals esp. moisture-sensitive apps.
Features: Low-moisture grade
Properties: pH 5.0-7.0

Pharmacel® 200 [DMV Int'l. Pharma http://www.dmv-international.com]
Chem. Descrip.: Microcrystalline cellulose Ph.Eur., USP/NF, JP
CAS 9004-34-6
Uses: Flow aid for more consistent direct compression in pharmaceuticals
Features: High dens. grade; prevents particle segregation during blending
Properties: 175 µ avg. particle size

Pharmacel® XL [DMV Int'l. Pharma http://www.dmv-international.com; Eigenmann & Veronelli http://www.eigver.it]
Chem. Descrip.: Croscarmellose sodium CAS 74811-65-7
Uses: Excipient, disintegrant for pharmaceutical solid dosage formulations (tablets, capsules, granules) for wet granulation and direct compression
Features: High water uptake and swelling; lower concs. needed compared to conventional disintegrants like starch
Regulatory: USP/NF, EP
Properties: Wh. to sl. off-wh. free-flowing, nonfibrous powd.; odorless; insol. in water and most organic solvents; pH 5-7; 10% max. moisture
Use Level: 2-5%
Toxicology: Nontoxic; nonirritating
Storage: 2 yr. shelf life in sealed pkgs.

Pharmagum™ M [SPI Pharma http://www.spipharma.com]
Chem. Descrip.: Gum base and mannitol, and isomalt See D-Mannitol
Chem. Analysis: 2.0% max. moisture
CAS 69-65-8; 64519-82-0; EINECS/ELINCS 200-711-8
Uses: Direct compression gum excipient; bioavailability enhancer
Features: 50% increase in gum base compared to that of Pharmagum S
Regulatory: USP, EP, FCC, FDA GRAS
Properties: Free-flowing powd.; 15% max. through #200 mesh; bulk dens. 0.50-0.70 g/ml; dens. 0.60-0.86 g/ml (tapped); 64-72% polyols
Toxicology: Dust can cause sl. eye irritation
Precaution: Avoid accumulation of airborne dusts; may react with strong acids or oxidizing agents.
Hazardous Ingredients: None
Hazardous Decomp. Prods.: CO, CO2, and/or low molecular weight hydrocarbons
Storage: Store in tightly closed container in a cool, dry place

Pharmagum™ S [SPI Pharma http://www.spipharma.com]
Chem. Descrip.: Mixt. of polyols and/or sugars with a chewing gum base
Uses: Excipient, compression agent, compaction agent, bioavailability enhancer for chewing gum delivery systems for nutraceutical and pharmaceutical actives, medicated chewing gums
Features: Can be directly compressed on std. tableting machines; good to exc. flow props.
Regulatory: FCC, FDA GRAS
Properties: Free-flowing powd.; 100% through
1000 µ mesh; bulk dens. 0.68 g/ml; dens. 0.772 g/ml (tapped)

Toxicology: Ing. overexposure can produce some discomfort and GI disturbances; symptoms are reversible and usually disappear when exposure stops; no skin sensitization reactions developed following application to 50 human subjects

Precaution: Avoid accumulation of airborne dusts; may react with strong acids or oxidizing agents.

Hazardous Ingredients: None

Hazardous Decomp. Prods.: CO, CO₂, and/or low molecular weight hydrocarbons

Storage: Keep container tightly closed and store at room temperature

Pharmalan Ph Eur [Croda Chem. Europe Ltd http://www.croda.co.uk]

Chem. Descrip.: Lanolin

CAS 8006-54-0; EINECS/ELINCS 232-348-6

Uses: Moisturizer, emollient, superfatting agent, and excipient in pharmaceutical topicals, ointments; o/w coemulsifier and w/o emulsifier

Features: Rich source of cholesterol and other sterols

Regulatory: EP

Properties: Yel.; m.p. 38-44 C

Use Level: Can be used full-strength

Toxicology: Nonirritant; TSCA listed

Pharmalan USP [Croda Chem. Europe Ltd http://www.croda.co.uk]

Chem. Descrip.: Lanolin USP

CAS 8006-54-0; EINECS/ELINCS 232-348-6

Uses: Moisturizer, emollient, active ingredient, and excipient in pharmaceutical topicals for human and animal health

Regulatory: USP

Properties: Yel.; m.p. 38-44 C

Use Level: Can be used full-strength

Toxicology: Nonirritant; TSCA listed

Pharmasolve™ [ISP http://www.ispcorp.com]

Chem. Descrip.: N-Methyl-2-pyrrolidone, GMP grade

CAS 872-50-4; EINECS/ELINCS 212-828-1

UN 1993

Uses: Solvent, solubilizer for pharmaceuticals; reaction solvent in many syntheses incl. vitamin E precursor; solubilizer, bioavailability enhancer for topicals; skin penetration enhancer; bioadhesive; spray bandages; transdermals; injectables

Features: Nonaq.; increases water sol. of chloramphenicol, procaine, other therapeutic compds.; increases sol'n. stability of drugs in aq. sol'n.

Regulatory: DOT (bulk) Combustible liq.; IATA, IMO not regulated; Canada DSL; Europe EINECS; Japan ENCS; Australia AICS

Properties: Cl. liq., amine-like odor; misc. with water, most org. solvs. incl. alcohols, ketones, aromatic and chlorinated hydrocarbons; sp.gr. 1.027 (25/4 C); visc. 1.65 cp; vapor pressure 0.29 mm Hg (20 C); m.p. -24.4 C; b.p. 202 C; flash pt.(OC) 95 C; ref. index 1.465-1.470; pH sl. alkaline; 99.85% min. purity

Toxicology: CEL 100 ppm; low toxicity; LD50 (oral, rat) 4200 mg/kg, (dermal, rabbit) 8 g/kg; LC50 (inh., rat) > 400 ppm; causes eye irritation; not a primary skin irritant; nonsensitizing; prolonged or repeated exposure causes severe skin irritation; TSCA listed

Environmental: LC50 (bluegill) 832 mg/l, (fathead minnow) 1072 mg/l, (trout) 3048 mg/l; biodeg.

Precaution: Combustible; flamm. limits 1.3-9.5%; noncorrosive; Incompat. with strong oxidizing or reducing agents; heated to decomp., emits CO and NOₓ fumes

Hazardous Decomp. Prods.: CO, oxides of nitrogen

HMIS: Health 2, Flammability 2, Reactivity 0

Storage: Keep container and vapors out of direct sunlight, away from heat, sparks, flame; keep container closed

Pharmasorb® Colloidal [Engelhard]

Chem. Descrip.: Attapulgite clay

CAS 1337-76-4

Uses: Absorbent, adsorbent for dry diarrhea treatment preparations (e.g., tablets), as well as suspending, thickening and tableting

Features: High volatile matter grade

Properties: Creamy powd.; odorless and bland taste

Pharmasorb® Regular [Engelhard]

Chem. Descrip.: Attapulgite clay

CAS 1337-76-4

Uses: Absorbent, adsorbent for dry diarrhea treatment preparations (e.g., tablets), as well as suspending, thickening and tableting

Features: Low volatile matter grade; recommended for use in aqueous applications

Properties: Creamy powd.; odorless and bland taste
Pharmatone [Am. Labs
_http://www.americanlaboratories.com_
Chem. Descrip.: High proteose peptone from pork tissues
Uses: Pharmaceutical additive for tonics and elixirs; protein source; in bacteriological media
Properties: 60 mesh powd.; completely sol. in 2% sol'n.; pH 5.5-6.5; 93.75% protein, 15% N

Pharmatone® 50 M [DMV Int'l. Pharma
_http://www.dmv-international.com_
Chem. Descrip.: Sieved lactose monohydrate
Chem. Analysis: 5% max. loss on drying
EINECS/ELINCS 200-559-2
Uses: Diluent and flow aid for pharmaceutical direct compression of capsules, sachets, and powder blends; filler in hard gelatin capsules
Regulatory: USP/NF, EP, JP
Properties: Free-flowing cryst.; avg. particle size 290 μ; tapped dens. 825 g/l

Pharmatose® 80 M [DMV Int'l. Pharma
_http://www.dmv-international.com_
Chem. Descrip.: Sieved lactose monohydrate
Chem. Analysis: 5% max. loss on drying
EINECS/ELINCS 200-559-2
Uses: Diluent and flow aid for pharmaceutical direct compression and dry granulation of capsules, sachets, powder blends, triturations, and pellets; filler in hard gelatin capsules
Regulatory: USP/NF, EP, JP
Properties: Free-flowing cryst.; avg. particle size 180 μ; tapped dens. 910 g/l

Pharmatose® 90 M [DMV Int'l. Pharma
:http://www.dmv-international.com_
Chem. Descrip.: Sieved lactose monohydrate
Chem. Analysis: 5% max. loss on drying
EINECS/ELINCS 200-559-2
Uses: Diluent and flow aid for pharmaceutical direct compression and dry granulation of capsules, sachets, powder blends, triturations, and pellets; filler in hard gelatin capsules
Regulatory: USP/NF, EP, JP
Properties: Free-flowing cryst.; avg. particle size 135 μ; tapped dens. 890 g/l

Pharmatose® 100 M [DMV Int'l. Pharma
:http://www.dmv-international.com_
Chem. Descrip.: Sieved lactose monohydrate
Chem. Analysis: 0.5% max. loss on drying
EINECS/ELINCS 200-559-2
Uses: Diluent, filler for pharmaceutical wet and dry granulation
Features: Milled
Regulatory: USP/NF, EP, JP
Properties: Avg. particle size 50 μ; tapped dens. 880 g/l

Pharmatose® 110 M [DMV Int'l. Pharma
:http://www.dmv-international.com_
Chem. Descrip.: Sieved lactose monohydrate
Chem. Analysis: 5% max. loss on drying
EINECS/ELINCS 200-559-2
Uses: Diluent and flow aid for pharmaceutical direct compression and dry granulation of capsules, sachets, powder blends, triturations, and pellets; filler in hard gelatin capsules
Regulatory: USP/NF, EP, JP
Properties: Free-flowing cryst.; avg. particle size 130 μ; tapped dens. 880 g/l

Pharmatose® 125 M [DMV Int'l. Pharma
:http://www.dmv-international.com_
Chem. Descrip.: Sieved lactose monohydrate
Chem. Analysis: 5% max. loss on drying
EINECS/ELINCS 200-559-2
Uses: Diluent and flow aid for pharmaceutical direct compression, wet and dry granulation of capsules, sachets, powder blends, triturations, and pellets; filler in hard gelatin capsules
Regulatory: USP/NF, EP, JP
Properties: Free-flowing cryst.; avg. particle size 105 μ; tapped dens. 875 g/l

Pharmatose® 150 M [DMV Int'l. Pharma
:http://www.dmv-international.com_
Chem. Descrip.: Milled lactose monohydrate
Chem. Analysis: 0.5% max. loss on drying
EINECS/ELINCS 200-559-2
Uses: Diluent, filler for pharmaceutical wet granulation
Features: Milled
Regulatory: USP/NF, EP, JP
Properties: Avg. particle size 55 μ; tapped dens. 860 g/l

Pharmatose® 200 M [DMV Int'l. Pharma
:http://www.dmv-international.com_
Chem. Descrip.: Milled lactose monohydrate
Chem. Analysis: 0.5% max. loss on drying
EINECS/ELINCS 200-559-2
Uses: Diluent, filler for pharmaceutical wet and dry granulation
Features: Milled
Trade Name Reference

Regulatory: USP/NF, EP, JP
Properties: Avg. particle size 40 μ; tapped dens. 840 g/l

Pharmatose® 325 M [DMV Int’l. Pharma http://www.dmv-international.com]
Chem. Descrip.: Lactose
CAS 63-42-3; EINECS/ELINCS 200-559-2
Uses: Carrier for dry powd. inhalation pharmaceuticals
Features: Uniform; good particle size distribution; high and reproducible drug deposition
Regulatory: USP/NF, EP, JP
Properties: Avg. particle size 40 μ; tapped dens. 840 g/l

Chem. Descrip.: Milled lactose monohydrate
Chem. Analysis: 0.5% max. loss on drying
EINECS/ELINCS 200-559-2
Uses: Diluent, filler for pharmaceutical wet and dry granulation
Features: Milled
Regulatory: USP/NF, EP, JP
Properties: Avg. particle size 30 μ; tapped dens. 800 g/l

Pharmatose® 450 M [DMV Int’l. Pharma http://www.dmv-international.com]
Chem. Descrip.: Milled lactose monohydrate
Chem. Analysis: 0.5% max. loss on drying
EINECS/ELINCS 200-559-2
Uses: Diluent, filler for pharmaceutical wet granulation
Features: Milled
Regulatory: USP/NF, EP, JP
Properties: Avg. particle size 20 μ; tapped dens. 480 g/l

Chem. Descrip.: Lactose monohydrate
Chem. Analysis: 1.0% max. loss on drying
CAS 10039-26-6
Uses: Diluent for direct compression of pharmaceutical tablets
Features: Exc. flowability; uniform particle size; exc. mixing performance
Regulatory: USP/NF, EP, JP
Properties: Spray-dried spheres; tapped dens. 725 g/l

Pharmatose® DCL 14 [DMV Int’l. Pharma http://www.dmv-international.com]
Chem. Descrip.: Lactose monohydrate and amorphous lactose
Chem. Analysis: 1.0% max. loss on drying

Chem. Descrip.: Lactose monohydrate
Chem. Analysis: 1.0% max. loss on drying
CAS 10039-26-6
Uses: Excipient and binder for direct compression of pharmaceutical tablets and chewable tablets; stabilizer for moisture-sensitive act. ingreds. and their dissolution
Features: Exc. tablet str.; high binding capacity; high intrinsic sol. of anhyd. lactose; low-moisture content and high stability; suitable for moisture-sensitive pharmaceuticals
Regulatory: USP/NF, EP, JP
Properties: Microcrystals; tapped dens. 880 g/l

Pharmatose® DCL 21 [DMV Int’l. Pharma http://www.dmv-international.com]
Chem. Descrip.: Lactose monohydrate
Chem. Analysis: 1.0% max. loss on drying
CAS 63-42-3; EINECS/ELINCS 200-559-2
Uses: Filler and binder for direct compression of pharmaceutical tablets, chewable tablets, capsules, and sachets
Features: Exc. flowability and mixing props.; high compactibility; prevents drug segregation; high pharmaceutical dilution potential

Handbook of Pharmaceutical Additives, Third Edition
Trade Name Reference

Regulatory: USP/NF, EP, JP
Properties: Crystals; tapped dens. 790 g/l
Chem. Descrip.: Phenoxyethanol (> 70%), methylparaben > (15%), ethylparaben (< 5%), propylparaben (< 5%), butylparaben (< 10%)
Uses: Preservative for pharmaceuticals (proteinaceous prods., emulsions, skin antisepsics)
Features: Fully active liq. system with low toxicity and wide spectrum activity, esp. against pseudomonas
Regulatory: USA, Japan, and ECC approvals
Properties: Pract. colorless visc. liq., faint aromatic odor; sol. 0.5% in water; misc. with ethanol, IPA, acetone, propylene glycol, IPM, ethyl acetate; sp.gr. 1.124; m.p. 13 C; b.p. 224-250 C (1013 m.bar); flash pt. (OC) 130 C; ref. index 1.5415; pH 7 (20 g/l water); 100% conc.
Use Level: 0.25-0.75%
Toxicology: LD50 (oral, rat) 1.5 g/kg (sl. harmful); pure material irritating to skin, moderately irritating to eyes
Chem. Descrip.: Phenoxyisopropanol and p-chloro-m-xylenol See Chloroxylenol
Uses: Antiseptic for pharmaceuticals, skin care prods.
Chem. Descrip.: p-Chloro-m-xylanol and propylene phenoxyetol See Chloroxylenol; Phenoxyisopropanol
Uses: Antimicrobial, antiseptic in topical pharmaceuticals
Chem. Descrip.: Phenoxyethanol
CAS 122-99-6; EINECS/ELINCS 204-589-7
Uses: Antimicrobial preservative for pharmaceuticals (antiseptic creams, skin care prods.)
Features: Broad-spectrum; stable and effective over the range pH 3.0-8.5 and elevated temps>80 C
Regulatory: Permitted for use in Europe, USA, and Japan
Properties: Colorless sl. visc. liq., faint or pleasant odor; sol. 2.3% in water; misc. with acetone, ethanol, benzene, ether, propylene glycol, glycerin; m.w. 138.2; sp.gr. 1.1 (20/4 C); f.p. 11 C; b.p. 245.6 C; flash pt. (OC) 121 C; 99% min. assay
Toxicology: LD50 (oral, rat) 1.3 g/kg (sl. harmful); moderate eye irritant; pure material sl. irritating to skin
Environmental: Biodeg.
Chem. Descrip.: Lauric acid (C12)
CAS 143-07-7; EINECS/ELINCS 205-582-1
Uses: Intermediate for mfg. of pharmaceuticals
Properties: Solid, flakes; acid no. 279-282; iodine no. 0.3 max.; sapon. no. 0.5 max.; hyd. no. 230-233
Chem. Descrip.: C16 alcohols See Cetyl alcohol
CAS 36653-82-4; EINECS/ELINCS 253-149-0
Uses: Emollient, consistency agent in ointments
Properties: APHA 10 max. flakes; acid no. 0.2 max.; iodine no. 0.3 max.; sapon. no. 0.5 max.; hyd. no. 211-220
Chem. Descrip.: C16-18 alcohols See Cetearyl alcohol
CAS 8005-44-5; EINECS/ELINCS 267-008-6
Uses: Emollient, consistency agent in ointments
Properties: APHA 10 max. flakes; acid no. 0.2 max.; iodine no. 0.3 max.; sapon. no. 2 max.; hyd. no. 206-209
Chem. Descrip.: C18 alcohols See Stearyl alcohol
CAS 112-92-5; EINECS/ELINCS 204-017-6
Uses: Emollient, consistency agent in ointments
Properties: APHA 10 max. flakes; acid no. 0.2 max.; iodine no. 0.3 max.; sapon. no. 1.5 max.; hyd. no. 206-209
Phoenotaine C-35 [Phoenix http://www.phoenix-chem.com]
Chem. Descrip.: Sodium cocamidopropyl PG-dimonium chloride phosphate See Stearamidopropyl PG-dimonium chloride
Trade Name Reference

**phosphatidylcholine**
CAS: 83682-78-4; EINECS/ELINCS: 280-518-3
Uses: Emulsifier, lubricant, dispersant, emollient in pharmaceuticals

Properties: Yel. liq.; Gardner color 5 max.; sol. in water, propylene glycol, IPA; insol. in mineral oil, isopropyl myristate, silicone fluid; pH 5-7 (10% aq.); solids 34-36%

**Phenoxyol® PW** [Phoenix
http://www.phoenix-chem.com]
Chem. Descrip.: Emulsifying wax NF
CAS: 97069-99-0
Uses: Emulsifier for personal care prod.
Properties: Flake; sol. warm in min. oil; disp. warm in cyclomethicone, IPM, and water; misc. warm with castor oil, ethanol, and propylene glycol; nonionic; 100% act.

**Phosal® 35 SB** [Am. Lecithin
http://www.americanlecithin.com]
Chem. Descrip.: Sunflower seed oil, lecithin
See Sunflower (Helianthus annuus) seed oil
Chem. Analysis: Moisture 0.5% max.
Uses: Filler, phosphatidylcholine nutritional source in soft gelatin capsules
Properties: Gold yel. to brown liq.; nut-like odor; dens. 1.0 g/cm³; vis. ≤ 10,000 mPa•s; acid no. 35 max.; pH 5.5-7.5; 35% phosphatidylcholine
Toxicology: Nontoxic
Environmental: Biodegrad.
Precaution: Avoid contact with eyes; wear goggles

**Phosal® 50 SA+** [Am. Lecithin
http://www.americanlecithin.com]
Chem. Descrip.: Safflower oil and lecithin
See Safflower (Carthamus tinctorius) oil
Uses: Skin moisturizer/penetrant for dermatology; solubilizer for lipophilic substances; phosphatidylcholine source for nutritional supplements, esp. as capsule filling mass
Properties: Honey yel. fluid, typ. odor; dilutable with water; dens. 0.9-1.0 g/cm³ (20 C); vis. 5000 mPa•s max.; pH 5.5-7.5; 53 ± 3% phosphatidylcholine
Use Level: 5-15% topical appl.
Toxicology: Edible; oral and topical applicable; nontoxic
Environmental: Biodeg.
Precaution: Wear safety glasses; avoid contact with eyes

**Phosal® 53 MCT** [Am. Lecithin
http://www.americanlecithin.com]
Chem. Descrip.: Lecithin in caprylic/capric triglyceride, and alcohol (5% max.); oleic acid, and ascorbyl palmitate
CAS: 8030-76-0; 526220-27-2; 64-17-5; 112-80-1; 137-66-6; EINECS/ELINCS: 310-129-7; 265-724-3; 200-578-6; 204-007-1; 205-305-4
Uses: Skin moisturizer/penetrant for dermatology; solubilizer for lipophilic substances; prod. of liposomes; phosphatidylcholine source for dietetics, esp. as filling mass for soft gelatin capsules
Properties: Honey yel. fluid, typ. odor; dilutable with water; sp.gr. 1.0 g/ml; vis. 5000 mPa•s max.; flash pt. 30 C; pH 6-8; 56 ± 3% phosphatidylcholine; 5% ethanol
Use Level: 5-15% topical appl.
Toxicology: Avoid eye contact and ingestion; harmless by inh. and skin contact; considered nontoxic
Storage: Store in clean, dry place @ 15-20 C in well-closed containers; warming reverses sedimentation; protect from light, gross contamination with bacteria; use soon after opening

**Phosal® 50 PG** [Am. Lecithin
http://www.americanlecithin.com]
Chem. Descrip.: A preliposome system contg. 50% lecithin with propylene glycol, sunflower seed oil glycerides, soy acid, alcohol, and ascorbyl palmitate
Uses: Dispersant, coemulsifier, penetrant, and solubilizer for pharmaceuticals, creams and lotions, emulsions and liposome preps. for dermatology
Properties: Yel.-brn. liq.; char. odor, nut-like taste; dilutable with water; dens. 0.9-1.0 g/cm³ (20 C); vis. 5000 mPa•s max.; flash pt. 112 C; iodine no. ≈ 50; pH 7±3; 50% min. phosphatidylcholine
Toxicology: Harmless; edible; oral and topical applicable
Environmental: Biodeg.; completely harmless
Precaution: Wear goggles

Storage: Store in clean, cool, dry place @ 10-40 C in tightly closed container; avoid large changes in temp., gross contamination with bacteria; protect from light

**Phosal® 50 SA+** [Am. Lecithin
http://www.americanlecithin.com]
Chem. Descrip.: Safflower oil and lecithin
See Safflower (Carthamus tinctorius) oil
Uses: Skin moisturizer/penetrant for dermatology; solubilizer for lipophilic substances; phosphatidylcholine source for nutritional supplements, esp. as capsule filling mass
Properties: Honey yel. fluid, typ. odor; dilutable with water; dens. 0.9-1.0 g/cm³ (20 C); vis. 5000 mPa•s max.; pH 5.5-7.5; 53 ± 3% phosphatidylcholine
Use Level: 5-15% topical appl.
Toxicology: Edible; oral and topical applicable; nontoxic
Environmental: Biodeg.
Precaution: Wear safety glasses; avoid contact with eyes

**Phosal® 53 MCT** [Am. Lecithin
http://www.americanlecithin.com]
Chem. Descrip.: Lecithin in caprylic/capric triglyceride, and alcohol (5% max.); oleic acid, and ascorbyl palmitate
CAS: 8030-76-0; 526220-27-2; 64-17-5; 112-80-1; 137-66-6; EINECS/ELINCS: 310-129-7; 265-724-3; 200-578-6; 204-007-1; 205-305-4
Uses: Skin moisturizer/penetrant for dermatology; solubilizer for lipophilic substances; prod. of liposomes; phosphatidylcholine source for dietetics, esp. as filling mass for soft gelatin capsules
Properties: Honey yel. fluid, typ. odor; dilutable with water; sp.gr. 1.0 g/ml; vis. 5000 mPa•s max.; flash pt. 30 C; pH 6-8; 56 ± 3% phosphatidylcholine; 5% ethanol
Use Level: 5-15% topical appl.
Toxicology: Avoid eye contact and ingestion; harmless by inh. and skin contact; considered nontoxic
Storage: Store in clean, dry place @ 15-20 C in well-closed containers; warming reverses sedimentation; protect from light, gross contamination with bacteria; use soon after opening
Phosal® 75 SA [Am. Lecithin http://www.americanlecithin.com]
Chem. Descrip.: Lecithin, ethanol, and safflower (Carthamus tinctorius) oil See Alcohol
Uses: Skin moisturizer/penetrant in dermatology; solubilizer for lipophilic substances; prod. of liposomes; phosphatidylcholine source for nutritional supplements, esp. as capsule filling mass
Properties: Honey yel. fluid, nut-like odor; dilutable with water; dens. 1.0 g/cm³; visc. 5500 mPa•s max.; pH 6-8; 75 ± 3% phosphatidylcholine, 9% ethanol
Use Level: 3-10% topical applic.
Toxicology: Edible; oral and topical applicable; nontoxic
Environmental: Biodeg.
Precaution: Wear safety glasses; avoid contact with eyes; avoid sources of ignition and static discharges
Hazardous Decomp. Prods.: None
Storage: Store in clean, dry place @ 15-25 C in tightly closed containers; warming reverses sedimentation; use soon after opening; protect from light, gross contamination with bacteria

PhosPho F-97 [Fanning http://www.fanncorp.com]
Chem. Descrip.: Lecithin
CAS 8002-43-5; EINECS/ELINCS 232-307-2
Uses: Surfactant for topical pharmaceutical ointments
Properties: Lt. golden gran.; sol. in IPM, ethyl acetate, water; insol. in castor oil, propylene glycol, ethanol, min. oil, glycerol; HLB 7.0; acid no. 35 max.

PhosPho LCN-DS [Fanning http://www.fanncorp.com]
Chem. Descrip.: Lecithin
CAS 8002-43-5; EINECS/ELINCS 232-307-2
Uses: Surfactant, emulsifier, skin conditioner for pharmaceuticals
Properties: Yel. to brn. liq.; bland odor; insol. in water; sp.gr. 1.00-1.04; flash pt. > 450 F
Environmental: Biodeg.
Precaution: Spillages may be slippery
HMIS: Flammability 0
Storage: Avoid extended heating to maintain quality

Chem. Descrip.: Lecithin
CAS 8002-43-5; EINECS/ELINCS 232-307-2
Uses: Surfactant, emulsifier, skin conditioner for creams/lotions; encapsulation of active compds.; mfg. of liposomes and mixed micelles
Features: Pharmaceutical grade
Properties: Wh. odorless powd.; iodine no. 30

Phospholipon® 80 [Am. Lecithin http://www.americanlecithin.com]
Chem. Descrip.: Lecithin (soya 3-sn-phosphatidylcholine)
CAS 8002-43-5; EINECS/ELINCS 232-307-2
Uses: Moisturizer, emulsifier for pharmaceuticals, dermatology, skin care, creams/lotions; encapsulation of active compds.; mfg. of liposomes and mixed micelles
Features: Pharmaceutical grade
Properties: Yel.-brn. waxy solid plastic, typ. odor; forms emulsions in water; dens. 1.0 g/cm³ (20 C); bulk dens. 400-500 kg/m³; acid no. 10 max.; pH 7±1; 80% conc.; min. 73% phosphatidylcholine
Use Level: 1-3% (topicals)
Toxicology: Harmless; edible; oral and topical applicable
Environmental: Biodeg.; ecologically harmless; forms slippery surfs. with water; do not discharge into drains, surf. waters, groundwater
Storage: Hygroscopic; store in clean, cool, dry place @ 5-20 C in tightly closed containers; protect from light

Phospholipon® 80 H [Am. Lecithin http://www.americanlecithin.com]
Chem. Descrip.: Hydrogenated lecithin
CAS 97281-48-6; EINECS/ELINCS 306-549-5
Uses: Prep. of liposomes for pharmaceuticals; skin moisturizer
Properties: Wh. odorless powd.; iodine no. 30
Phospholipon® 85G [Am. Lecithin http://www.americanlecithin.com]
Chem. Descrip.: Purified phosphatidylcholine
See Lecithin
CAS 8030-76-0; EINECS/ELINCS 310-129-7
Uses: Emulsifier for pharmacy, dermatology and cosmetics; phosphatidylcholine source for drugs and dietetics; preparation of mixed micelles, liposomes, and microemulsions
Features: Pharmaceutical grade
Properties: Brown to yel. waxy granules; characteristic odor; disp. in water; dens. 1.0 g/cm³; min. 85% phosphatidylcholine
Toxicology: Nontoxic
Environmental: Completely harmless
Precaution: Wear goggles; avoid contact with eyes
Storage: Store under dry condition @ 5-20 C in tightly closed containers, sealed under inert gas; protect from light

Phospholipon® 90 G [Am. Lecithin http://www.americanlecithin.com]
Chem. Descrip.: Lecithin, 90% min. soya 3-sn-phosphatidylcholine
CAS 97281-48-6; EINECS/ELINCS 295-786-7
Uses: Raw material for mfg. of liposomes and mixed micelles; moisturizer, emulsifier for pharmaceuticals, dermatology; solubilizer for parenteralia; phosphatidylcholine source for drugs and dietetics; encapsulation of active compds.; mfg. of liposomes for pharmaceuticals
Features: Pharmaceutical grade
Properties: Wh. cryst. powd., odorless; forms emulsions in water; dens. 0.8 g/cm³; bulk dens. 400-500 kg/m³; acid no. 0.5 max.; iodine no. 1 max.; flash pt. > 220 C; pH 7±1; amphoteric; 94% conc.; min. 90% phosphatidylcholine
Use Level: 1-3% topical use
Toxicology: Harmless; edible; oral and topical applicable
Environmental: Biodeg.; ecologically harmless; forms slippery surfs. with water; do not discharge into drains, surf. waters, groundwater
Storage: Hygroscopic; store in clean, cool, dry place @ 5-20 C in tightly closed containers, sealed under inert gas; protect from light

Phospholipon® 90 NG [Am. Lecithin http://www.americanlecithin.com]
Chem. Descrip.: Purified phosphatidylcholine
CAS 97281-47-5
Uses: Emulsifier for pharmacy, dermatology and cosmetics; phosphatidylcholine source for drugs and dietetics; preparation of mixed micelles, liposomes, and microemulsions
Features: Pharmaceutical grade
Properties: Yel. waxy granules; characteristic odor; disp. in water; dens. 1.0 g/cm³; min. 90% phosphatidylcholine
Toxicology: Nontoxic
Environmental: Completely harmless
Precaution: Wear goggles
Hazardous Decomp. Prods.: None
Storage: Store under dry condition, sealed under inert gas

Phospholipon® 100 H [Am. Lecithin http://www.americanlecithin.com]
Chem. Descrip.: Hydrogenated lecithin (soya 3-sn-phosphatidylcholine)
CAS 97281-48-6; EINECS/ELINCS 306-549-5
Uses: Active ingred. for pharmaceuticals; prod. of liposomes
Trade Name Reference

Features: Natural
Regulatory: DMF 15480 (USA)
Properties: Cryst. powd., odorless; forms emulsions in water; dens. 0.8 g/cm³; pH 7±1; iodine no. 1 max.
Toxicology: Harmless; edible; oral and topical applicable
Environmental: Biodeg.; ecologically harmless; forms slippery surf. with water; do not discharge into drains, surf. waters, groundwater
Storage: Hygroscopic; store in clean, cool, dry place @ 5-20 C; protect from light

pHthalavin™ [Colorcon http://www.colorcon.com]
Chem. Descrip.: Polyvinyl acetate phthalate enteric polymer
Uses: Functional coating for targeted enteric drug release
Features: Good resist. to gastric fluid

Phytoderm Complex G [Cosmetochem http://www.cosmetochem.ch/index]
Chem. Descrip.: Propylene glycol and licorice (Glycyrrhiza glabra) extract
Uses: Cosmetic specialty with anti-inflammatory and soothing effect on damaged skin

Chem. Descrip.: Olive (Olea europaea) fruit oil
CAS 8001-25-0; EINECS/ELINCS 232-277-0
Uses: Emollient, moisturizer, lubricant in pharmaceuticals
Properties: Yel./lt. grn. oily liq.; mild char. odor; acid no. 3 max.; iodine no. 77-88; sapon. no. 188-195

Chem. Descrip.: Safflower (Carthamus tinctorius) seed oil
See Safflower (Carthamus tinctorius) oil
CAS 8001-23-8; EINECS/ELINCS 232-276-5
Uses: Emollient for cosmetics, pharmaceuticals
Features: Stable from oxidative rancidity
Regulatory: EU, Japan approved
Properties: Lt. color

Chem. Descrip.: Refined, bleached, deodorized soybean oil, TBHQ See t-Butyl hydroquinone; Soybean (Glycine soja) oil
Uses: Emollient, carrier, dispersant in pharmaceuticals
Regulatory: EU, Japan approved
Properties: 1.5 red max. color; bland odor

Chem. Descrip.: α-Pinene with 400 ppm Tenox GT-1 (food-grade antioxidant)
CAS 7785-26-4; EINECS/ELINCS 232-077-3
UN 2368
Uses: Useful in flavor and fragrance applics. across a broad spectrum of prods.
Regulatory: FDA 21CFR §172.515
Properties: Colorless liq., warm resinous pine-like aroma, balsamic taste; sol. 1 in 15 in 80% alcohol; m.w. 136.24; sp.gr. 0.851-0.855; dens. 7.14 lb/gal; b.p. 156.7 C; flash pt. (TCC) 29.4 C; ref. index 1.464-1.468 (20 C); 99% min. act.
Toxicology: LD50 (oral, rat) 3700 mg/kg, (dermal, rabbit) > 5000 mg/kg; mod. skin irritant; oxidized material produces some sensitization reactions; TSCA listed
Environmental: Marine pollutant

beta-Pinene P&F [Millennium/F&F http://www.aromachem.com]
Chem. Descrip.: α-Pinene with 500 ppm Tenox GT-1 (food-grade antioxidant)
CAS 18172-67-3; EINECS/ELINCS 242-060-2
UN 2319
Uses: Useful in flavor and fragrance applics. across a broad spectrum of prods.
Regulatory: FDA 21CFR §172.515
Properties: Cl. appearance, dry woody or piney resinous odor; sol. 1 in 14 in 80% alcohol; m.w. 136.24; sp.gr. 0.864-0.872; dens. 7.24 lb/gal; b.p. 165 C; flash pt. (TCC) 35 C; ref. index 1.477-1.481 (20 C); 97% min. act.
Toxicology: LD50 (oral, rat) 4700 mg/kg, (dermal, rabbit) > 5000 mg/kg; mod. skin irritant; contact may cause skin and eye irritation; TSCA listed

Pinnacle™ 170 USP White Petrolatum [Avatar http://www.avatarcorp.com]
Chem. Descrip.: Petrolatum white
See Petrolatum
CAS 8009-03-8; EINECS/ELINCS 232-373-2
Uses: Lubricant, conditioner, moisture resistance/retention aid in pharmaceuticals
Trade Name Reference

Regulatory: USP, FCC, 21CFR 172.880, 178.3700, 573.720; SARA §311/312, 313 nonreportable; CERCLA nonreportable

Properties: Opaque, white semisolid; mild odor; negligibly sol. in water; sol. in hydrocarbons; sp. gr < 1; vapor pressure < 1.0 mm Hg; 35-80 C; consistency 170 dmm

Toxicology: LD50 (oral, rat) > 2000 mg/kg, (dermal, rabbit) > 2000 mg/kg; ACGIH TLV-TWA 2 mg/m³ (oil mist), OSHA PEL 2 mg/m³ (wax fumes)

Precaution: Avoid extreme heat, chlorine, fluorine, strong oxidizers, and strong acids

Hazardous Decomp. Prods.: Paraffin fumes

NFPA: Health 0, Flammability 1, Reactivity 0

Storage: Store in sealed containers away from strong oxidizing agents or combustible material

Pinnacle™ 170A USP Amber Petrolatum

[Avatar http://www.avatarcorp.com]

Chem. Descrip.: Petrolatum amber

See Petrolatum

CAS 8009-03-8; EINECS/ELINCS 232-373-2

Uses: Lubricant, conditioner, moisture resistance/retention aid in pharmaceuticals

Regulatory: USP, FCC, 21CFR 172.880, 178.3700, 573.720; SARA §311/312, 313 nonreportable; CERCLA nonreportable

Properties: Opaque, amber semisolid; mild odor; negligibly sol. in water; sol. in hydrocarbons; sp. gr < 1; vapor pressure < 1.0 mm Hg; 35-80 C; consistency 190 dmm

Toxicology: LD50 (oral, rat) > 2000 mg/kg, (dermal, rabbit) > 2000 mg/kg; ACGIH TLV-TWA 2 mg/m³ (oil mist), OSHA PEL 2 mg/m³ (wax fumes)

Precaution: Avoid extreme heat, chlorine, fluorine, strong oxidizers, and strong acids

Hazardous Decomp. Prods.: Paraffin fumes

NFPA: Health 0, Flammability 1, Reactivity 0

Storage: Store in sealed containers away from strong oxidizing agents or combustible material

Pinnacle™ 190A USP Amber Petrolatum

[Avatar http://www.avatarcorp.com]

Toxicology: LD50 (oral, rat) > 2000 mg/kg, (dermal, rabbit) > 2000 mg/kg; ACGIH TLV-TWA 2 mg/m³ (oil mist), OSHA PEL 2 mg/m³ (wax fumes)

Precaution: Avoid extreme heat, chlorine, fluorine, strong oxidizers, and strong acids

Pinnacle™ LC 190 Petrolatum, USP

[Avatar http://www.avatarcorp.com]

Chem. Descrip.: Petrolatum

CAS 8009-03-8; EINECS/ELINCS 232-373-2

Uses: Lubricant, conditioner, moisture resistance/retention aid in pharmaceuticals

Regulatory: USP, FCC, 21CFR 172.880, 178.3700, 573.720; SARA §311/312, 313 nonreportable; CERCLA nonreportable

Properties: Opaque, white semisolid; mild odor; negligibly sol. in water; sol. in hydrocarbons; sp. gr < 1; vapor pressure < 1.0 mm Hg; 35-80 C; consistency 225 dmm

Toxicology: LD50 (oral, rat) > 2000 mg/kg, (dermal, rabbit) > 2000 mg/kg; ACGIH TLV-TWA 2 mg/m³ (oil mist), OSHA PEL 2 mg/m³ (wax fumes)

Precaution: Avoid extreme heat, chlorine, fluorine, strong oxidizers, and strong acids

**Properties:** Opaque, white semisolid; mild odor; negligibly sol. in water; sol. in hydrocarbons; sp. gr < 1; vapor pressure < 1.0 mm Hg; 35-80 C; consistency 170 dmm

**Toxicology:** LD50 (oral, rat) > 2000 mg/kg, (dermal, rabbit) > 2000 mg/kg; ACGIH TLV-TWA 2 mg/m³ (oil mist), OSHA PEL 2 mg/m³ (wax fumes)

**Precaution:** Avoid extreme heat, chlorine, fluorine, strong oxidizers, and strong acids

**Hazardous Decomp. Prods.: Paraffin fumes**

**NFPA:** Health 0, Flammability 1, Reactivity 0

**Storage:** Store in sealed containers away from strong oxidizing agents or combustible material

**Uses:** Raw material, oil binder for pharmaceuticals

**Regulatory:** USP, EP compliance

**Properties:** Wh. odorless substance; dens. 810-860 kg/m³ (60 C); visc.11-13 mPa·s (90 C); drop pt. 50-58 C; congeal pt. 47-53 C; > 50% petrolatum

**Storage:** 24 mos. shelf life when stored in original containers under suitable conditions; may darken on overheating to 90 C; may develop paraffin odor; may yel. on overexposure to light

**Uses:** Oil in pharmaceuticals

**Features:** Thermal- and UV-stable

**Regulatory:** E 907

**Properties:** Saybolt +30 color; odorless; dens. 824 kg/m³; visc. 72 mm²/s (20 C); pour pt. 50-58 C; congeal pt. 47-53 C; > 50% petrolatum

**Storage:** 24 mos. shelf life when stored in original containers under suitable conditions

**Uses:** Emulsion base for pharmaceutical w/o creams/lotions

**Environmental:** EL50 (algae, 72 h) > 1000 mg/l

**Storage:** 6 mos. min. shelf life when stored in original containers under suitable conditions

**Uses:** See Mineral oil
Trade Name Reference

Features: During transportation and storage, some components may cause sl. creaming or settling of the base; stirring can clear this settling of the base.

Properties: Wh. to ylsh. mass, gel-like; visc. 5-15 (20 C); congeal pt. 65-85 C; acid no. 1 max.; sapon. no. 70-100; hyd. no. 15-30; ref. index 1.455-1.475 (20 C).

Storage: 6 mos. min. shelf life when stored in original containers under suitable conditions.

**Pionier® 1730** [Hansen & Rosenthal http://www.hansen-rosenthal.de]

Chem. Descrip.: Mineral oil (> 50%), hydrogenated microcrystalline wax (25-50%)

CAS 8042-47-5; 92045-76-6; EINECS/ELINCS 232-455-8; 295-458-3

Uses: Oil and water binder, raw material in ophthalmic ointments and creams.

Features: Good elasticity and smoothness.

Properties: Wh., odorless; dens. 800-840 kg/m³ (70 C); visc. 4.9-6.0 mm²/s (90 C); drop pt. 50-58 C; congeal pt. 46-50 C.

Toxicology: Nonsensitizing, nonecotoxic; nonirritating to eyes and skin.

Environmental: Not ecotoxic.

Storage: Unlimited shelf life.

**Pionier® 1761** [Hansen & Rosenthal http://www.hansen-rosenthal.de]

CAS 8009-03-8; EINECS/ELINCS 232-373-2

Uses: Softener, lubricant, release agent, glossing agent, plasticizer, carrier in pharmaceuticals and veterinary preps.

Properties: Lovibond color 1.0 wh.; visc. 5.5 mm²/s (100 C); drop pt. 58 C; congeal pt. 54 C.

**Pionier® 2070 P** [Hansen & Rosenthal http://www.hansen-rosenthal.de]

Chem. Descrip.: Mineral oil

Uses: Glossing agent, moisture barrier, protective barrier, basic oil in pharmaceuticals.

Properties: Colorless transparent oily fluid, odorless, tasteless; sp.gr. 860-870 kg/m³ (20 C); visc. 170-230 mPa•s (20 C); pour pt. < -24 C; flash pt. 200 C min.; ref. index 1.473-1.479 (20 C).

Storage: 24 mos. shelf life when stored in original containers under suitable conditions; may darken on overheating and get a paraffin odor; may discolor on overexposure to light; cold may cause crystallization—warm to dissolve.

**Pionier® 2076 N** [Hansen & Rosenthal http://www.hansen-rosenthal.de]

Features: Hydrophilic
Regulatory: Complies with DAP 9 wool wax
alcohol ointment
Properties: Whitish vaseline-like mass; drop pt.
55 C; congeal pt. 53 C; acid no. 0.07; sapon.
no. < 0.1; hyd. no. 12

Pionier® MAA Weich [Hansen & Rosenthal
http://www.hansen-rosenthal.de]
Chem. Descrip.: Petrolatum (>50%), lanolin
alcohol (5-10%), cetearyl alcohol (0.1-1%)
Uses: Base for w/o pharmaceutical creams

Handbook of Pharmaceutical Additives, Third Edition 553
and ointments

Pionier® MCT [Hansen & Rosenthal http://www.hansen-rosenthal.de]
Chem. Descrip.: Caprylic/capric glycerides
Chem. Analysis: > 50% Caprylic/capric glycerides; 0.2% moisture max.
CAS 85409-09-2; EINECS/ELINCS 287-075-5
Uses: Base for pharmaceutical ointments and creams
Features: Hydrophilic

Pionier® NP 37 S [Hansen & Rosenthal http://www.hansen-rosenthal.de]
Chem. Descrip.: Acrylates/vinyl isodecanoate crosspolymer (> 50%)
Uses: Base for pharmaceutical gels; thickener for pharmaceutical o/w emulsions
Features: pH of polymer must be neutralized with a base; more tolerant against electrolytes than pure polyacrylate gels; has a coemulsifier effect and keeps dispersed components in suspension

Pionier® NP 37 G [Hansen & Rosenthal http://www.hansen-rosenthal.de]
Chem. Descrip.: Sodium carboxomer (> 50%)
Uses: Base for pharmaceutical gels; thickener for pharmaceutical o/w emulsions
Features: No supplementary neutralization of pH is necessary

Pionier® NP 37 K [Hansen & Rosenthal http://www.hansen-rosenthal.de]
Chem. Descrip.: Carbomer (>50%)
CAS 9003-01-4
Uses: Base for pharmaceutical gels; thickener for pharmaceutical o/w emulsions
Features: pH of polymer must be neutralized with a base; esp. tolerant of high alcohol conc.

Pionier® OEWA-II [Hansen & Rosenthal http://www.hansen-rosenthal.de]
Chem. Descrip.: Isopropyl palmitate (25-50%), min. oil (25-50%), stearyl alcohol (10-25%), PEG-30 glyceryl stearate (10-25%), glyceryl stearate (5-10%), paraffin (5-10%) See Mineral oil
Uses: Hydrophilic base for o/w ointments and creams
Features: Hydrophilic
Trade Name Reference

http://www.hansen-rosenthal.de

Chem. Descrip.:  **Min. oil (25-50%), isopropyl palmitate (25-50%), PEG-7 hydrogenated castor oil (5-10%), polyglyceryl-2 sesquioleostearate (5-10%), polyethylene (1-5%), magnesium stearate (1-5%), beeswax (1-5%), microcrystalline wax (1-5%), aluminum stearate (0.1-1%)** See Mineral oil

**Uses:** Emulsion base for cosmetic and pharmaceutical w/o creams/lotions

**Properties:** Wh. to ylsh. mass, paste-like/paste-like; visc. 10-20 mm²/s (100 C); congeal pt. 65-85 C; acid no. 3-7; sapon. no. 70-95; hyd. no. 10-20; ref. index 1.455-1.475 (20 C)

**Storage:** 6 mos. min. shelf life when stored in original containers under suitable conditions

**Pionier® PLW** [Hansen & Rosenthal http://www.hansen-rosenthal.de]

Chem. Descrip.:  **Polyethylene (5%) and min. oil (95%)** See Mineral oil

**Uses:** Base in cold processing of w/o emulsions for pharmaceuticals (OTC medical preps., wound treatments, mucosa preps.)

**Features:** Hydrophobic; better compat. than petrolatum; provides rapid liberation of active substances; visc. not temp.-dependent; shear stability; high water absorp. capacity

**Properties:** Wh. to colorless transparent gel; congeal pt. 68-78 C; ref. index 1.475-1.495

**Storage:** 6 mos. min. shelf life when stored in original containers under suitable conditions

**Pionier® PLW 5,5** [Hansen & Rosenthal http://www.hansen-rosenthal.de]

Chem. Descrip.:  **Min. oil (94.5%), polyethylene (5.5%)** See Mineral oil

**Uses:** Base for pharmaceuticals

**Properties:** Whitish to colorless transparent gel; congeal pt. 68-78 C; ref. index 1.475-1.95

**Storage:** 6 mos. min. shelf life when stored in original containers under suitable conditions

**Pionier® SVE** [Hansen & Rosenthal http://www.hansen-rosenthal.de]

Chem. Descrip.:  **Min. oil (25-50%), isopropyl palmitate (10-25%), petrolatum (10-25%), polyglyceryl-2 sesquioleostearate (10-25%), paraffin (5-10%), magnesium stearate (1-5%), beeswax (1-5%), microcrystalline wax (1-5%), aluminum stearate (1-5%)** See Mineral oil

**Uses:** Emulsifier for pharmaceutical w/o creams and emulsions, ointments

**Properties:** Wh. to ylsh. mass, paste-like/solid; visc. 4-8 mm²/s (100 C); congeal pt. 30-50 C; acid no. 5-15; sapon. no. 40-80; hyd. no. 5-20

**Storage:** 6 mos. min. shelf life when stored in original containers under suitable conditions

**Pionier® SVE Soft** [Hansen & Rosenthal http://www.hansen-rosenthal.de]

Chem. Descrip.:  **Min. oil (25-50%), isopropyl palmitate (10-25%), polyglyceryl-2 sesquioleostearate (10-25%), paraffin (10-25%), petrolatum (10-25%), PEG-7 hydrogenated castor oil (1-5%)** See Mineral oil

**Uses:** Base for pharmaceutical w/o creams and emulsions, ointments

**Properties:** Wh. to ylsh. mass, paste-like/solid; visc. 4-8 mm²/s (100 C); congeal pt. 35-50 C; acid no. 1 max.; sapon. no. 40-60; hyd. no. 10-30

**Storage:** 6 mos. min. shelf life when stored in original containers under suitable conditions

**Pionier® T-0145** [Hansen & Rosenthal http://www.hansen-rosenthal.de]

Chem. Descrip.:  **Isopropyl palmitate (25-50%), polyglyceryl-2 sesquioleostearate (10-25%), min. oil (5-10%), magnesium stearate (5-10%), paraffin (5-10%), beeswax (1-5%), microcrystalline wax (1-5%), aluminum stearate (1-5%)** See Mineral oil

**Uses:** Emulsifier for cosmetic and pharmaceutical w/o creams

**Properties:** Wh. to ylsh. mass, paste-like to solid; visc. 10-50 Pa•S (20 C); congeal pt. 30-50 C; acid no. 20 max.; sapon. no. 120-160; hyd. no. 20-40

**Storage:** 6 mos. min. shelf life when stored in original containers under suitable conditions

**Pionier® T-0150** [Hansen & Rosenthal http://www.hansen-rosenthal.de]

Chem. Descrip.:  **Isopropyl palmitate (25-50%), polyglyceryl-2 sesquioleostearate (10-25%), paraffin (10-25%), min. oil (5-10%), magnesium stearate (5-10%), beeswax (1-5%), microcrystalline wax (1-5%), aluminum stearate (1-5%)** See Mineral oil

**Uses:** Emulsifier for pharmaceutical w/o creams

**Properties:** Wh. to ylsh. mass, paste-like to solid; visc. 60-150 Pa•S (20 C); congeal pt. 35-55 C; acid no. 5-20; sapon. no. 110-150; hyd. no. 20-40

**Storage:** 6 mos. min. shelf life when stored in original containers under suitable conditions
Trade Name Reference

Pionier® WWH-N [Hansen & Rosenthal
http://www.hansen-rosenthal.de]
Chem. Descrip.: Min. oil (25-50%), isopropyl palmitate (25-50%), polyglyceryl-2 sesquioleate (5-10%), polyethylene (1-5%), magnesium stearate (1-5%), beeswax (1-5%), microcrystalline wax (1-5%), aluminum stearate (1-5%)
Uses: Hydrophilic base for w/o ointments and creams
Features: Hydrophilic
Properties: Whitish-ylsh. mass, visc. to vaseline-like solid; visc. 9-8 mm²/s (100 C); drop pt. 92 C; congeal pt. 77 C; acid no. 0.4; sapon. no. 29; hyd. no. 34.7; pH 7.0

Pionier® WWH-Soft [Hansen & Rosenthal
http://www.hansen-rosenthal.de]
Chem. Descrip.: Min. oil (> 50%), isopropyl palmitate (25-50%), polyglyceryl-2 sesquioleate (5-10%), polyethylene (1-5%), paraffin (1-5%), magnesium stearate (1-5%), beeswax (1-5%), microcrystalline wax (1-5%), aluminum stearate (1-5%)
Uses: Hydrophilic base for w/o ointments and creams
Features: Hydrophilic
Properties: Whitish-ylsh. mass, visc. to pastee-like solid; visc. 15-20 mm²/s (100 C); drop pt. 90.5 C; congeal pt. 75 C; acid no. 0.4; sapon. no. 29; hyd. no. 34.7; pH 7.0

Plasdone® C-15 [ISP
http://www.ispcorp.com]
Chem. Descrip.: 2-Pyrrolidinone, 1-ethenyl-, homopolymer
See PVP
CAS 9003-39-8; EINECS/ELINCNS 201-800-4
Uses: Solubilizer, stabilizer, protective colloid, suspending agent, dispersant, binder, film-former for parenteral applics., antibiotics, antiseptics, steroid hormones, vitamins; bioadhesive; blood plasma expander; detoxicant; reduces irritation at inj. site
Features: Pyrogen-free
Regulatory: USP/NF, FCC, BP, EP, JP, JPE compliance; FDA 21CFR §173.55; Canada DSL; Japan ENCS; Australia AICS
Properties: Wh. to creamy wh. powd, odorless, tasteless; 30 µ mean particle size; hygroscopic; sol. in water, aq. and org. solv. systems; bulk dens. 0.25-0.4 g/cc; flash pt. none; pH 3-7 (5% aq.); 5% max. moisture
Toxicology: LD50 (oral) > 10 g/kg; very low chronic oral toxicity; TSCA listed
Environmental: LC50 (juvenile turbot, 96 h) > 1 g/l, (corophium volutator, 10 d) > 1 g/l; EC50 (marine algae, 72 h) > 1 g/l; not readily biodeg. (11% in 28 d)
Precaution: Wear gloves, safety glasses; incompat. with strong oxidizing or reducing agents; heated to decomp., emits toxic fumes of NOx
Hazardous Decomp. Prods.: Oxides of nitrogen
Storage: Prevent excessive moisture pickup

Plasdone® K-12 [ISP
http://www.ispcorp.com]
Chem. Descrip.: PVP
See Povidone
CAS 9003-39-8; EINECS/ELINCNS 201-800-4
Uses: Solubilizer, stabilizer, protective colloid, suspending agent, dispersant, binder, film-former for parenteral applics., antibiotics, antiseptics, steroid hormones, vitamins; bioadhesive; blood plasma expander; detoxicant; reduces irritation at inj. site
Features: Pyrogen-free
Regulatory: USP/NF, FCC, BP, EP, JP, JPE compliance; FDA 21CFR §173.55; Canada DSL; Japan ENCS; Australia AICS
Properties: Wh. to creamy wh. powd, odorless, tasteless; 30 µ mean particle size; hygroscopic; sol. in water, aq. and org. solv. systems; bulk dens. 0.25-0.4 g/cc; flash pt. none; pH 3-7 (5% aq.); 5% max. moisture
Toxicology: LD50 (oral, rat) > 10 m/kg (very low toxicity); not absorbed topically; not a primary skin irritant; nonirritating to eyes; nonsensitizing; prolonged contact may cause dermatitis; nuisance dust: TLV/TWA 10 mg/m³ total, 5 mg/m³ respirable; TSCA listed
Environmental: LC50 (juvenile turbot, 96 h) > 1 g/l, (corophium volutator, 10 d) > 1 g/l; EC50 (marine algae, 72 h) > 1 g/l; not readily biodeg. (11% in 28 d)
Precaution: Wear gloves, safety glasses; incompat. with strong oxidizing or reducing agents; heated to decomp., emits toxic fumes of NOx
Hazardous Decomp. Prods.: Oxides of nitrogen
Storage: Prevent excessive moisture pickup

Plasdone® C-30 [ISP
http://www.ispcorp.com]
Chem. Descrip.: PVP (povidone USP)
CAS 9003-39-8; EINECS/ELINCNS 201-800-4
Uses: Solubilizer, stabilizer, protective colloid, suspending agent, dispersant, binder, film-former for parenteral applics., antibiotics, antiseptics, steroid hormones, vitamins; bioadhesive; blood plasma expander; detoxicant; reduces irritation at inj. site
Features: Pyrogen-free
Regulatory: USP/NF, FCC, BP, EP, JP, JPE compliance; FDA 21CFR §173.55; Canada DSL; Japan ENCS; Australia AICS
Properties: Wh. to creamy wh. powd, odorless, tasteless; 30 µ mean particle size; hygroscopic; sol. in water, aq. and org. solv. systems; bulk dens. 0.25-0.4 g/cc; flash pt. none; pH 3-7 (5% aq.); 5% max. moisture
Toxicology: LD50 (oral) > 10 g/kg; very low chronic oral toxicity; TSCA listed
Environmental: LC50 (juvenile turbot, 96 h) > 1 g/l, (corophium volutator, 10 d) > 1 g/l; EC50 (marine algae, 72 h) > 1 g/l; not readily biodeg. (11% in 28 d)
Precaution: Wear gloves, safety glasses; incompat. with strong oxidizing or reducing agents; heated to decomp., emits toxic fumes of NOx
Hazardous Decomp. Prods.: Oxides of nitrogen
Storage: Prevent excessive moisture pickup
Trade Name Reference

http://www.ispcorp.com

Chem. Descrip.: PVP (povidone USP)
Chem. Analysis: 5.0% max. moisture
CAS 9003-39-8; EINECS/ELINCS 201-800-4
Uses: Wet granulation binder for oral solid dosage forms; solubilizer and bioavailability enhancer of poorly soluble drugs; adhesion promoter in the formulation of water-soluble bioadhesives; crystal growth inhibitor, and rheological additives in soft-gelatin capsules, oral liquids and suspensions, parenterals, topical gels, creams, lotions and ophthalmic preps.
Features: Hygroscopic,
Regulatory: USP/NF, EP
Properties: Off-wh. powd., sol. in water; avg. m.w. 4,000; bulk dens. 0.42 g/cm³; K value 10.2-13.8; pH 3-5 (5% aq.); nonionic; 94-95% act.
Toxicology: LD50 (acute oral) >10,000 mg/kg; nonmutagenic; TSCA listed
Environmental: EC50 (algae, 72 h) >1,000 mg/l
Precaution: Wear safety glasses and gloves; powdered form may form explosive dust-air mixtures; avoid strong oxidizing and reducing agents
Hazardous Decomp. Prods.: NOx
HMIS: Health 0, Flammability 3, Reactivity 0
Storage: Keep containers tightly closed when not in use; store in a cool, dry place, out of direct sunlight and away from moisture

Plasdone® K-17 [ISP
http://www.ispcorp.com]

Chem. Descrip.: PVP (povidone USP)
Chem. Analysis: 5.0% max. moisture
CAS 9003-39-8; EINECS/ELINCS 201-800-4
Uses: Excipient, cohesive agent, stabilizer, protective colloid, detoxicant, vehicle, and retardant for pharmaceuticals (topicals, ophthalmics, liqs.); gellant, binder, coating agent, dye/pigment dispersant in tablets; solubilizer and suspending agent in liq. prods.; film-former in medicinal aerosols
Features: Minimizes toxic side effects of some drugs
Regulatory: FDA 21CFR §173.55; USP, FCC, BP, German Ph., French Ph., Italian Ph. compliance
Properties: Wh. or creamy wh. powd., odorless, tasteless; hygroscopic; sol. in aq. and org. solvs.; flash pt. none; pH 3-7 (5% aq.); 5% max. moisture
Toxicology: Very low chronic oral toxicity
Storage: Prevent excessive moisture pickup

Plasdone® K-25 [ISP
http://www.ispcorp.com]

Chem. Descrip.: PVP (povidone USP)
Chem. Analysis: 5.0% max. moisture
CAS 9003-39-8; EINECS/ELINCS 201-800-4
Uses: Excipient, cohesive agent, stabilizer, protective colloid, detoxicant, vehicle, and retardant for pharmaceuticals (topicals, ophthalmics, liqs.); gellant, binder, coating agent, dye/pigment dispersant for tablets; solubilizer and suspending agent in liq. prods.; film-former in medicinal aerosols
Features: Hygroscopic,
Regulatory: USP/NF, EP
Properties: Off-wh. powd., sol. in water; avg. m.w. 10,000; bulk dens. 0.44 g/cm³; K value 16.0-17.5; pH 3-5 (5% aq.); nonionic; 94-95% act.
Toxicology: LD50 (oral, rat) >100,000 mg/kg; nonmutagenic; TSCA listed
Environmental: EC50 (algae, 72 h) >1,000 mg/l
Precaution: Wear safety glasses and gloves; powdered form may form explosive dust-air mixtures; avoid strong oxidizing and reducing agents
Hazardous Decomp. Prods.: NOx
HMIS: Health 0, Flammability 3, Reactivity 0
Storage: Keep containers tightly closed when not in use; store in a cool, dry place, out of direct sunlight and away from moisture

Plasdone® K-25/32 [ISP
http://www.ispcorp.com]

Chem. Descrip.: PVP (povidone USP)
Chem. Analysis: 5.0% max. moisture
CAS 9003-39-8; EINECS/ELINCS 201-800-4
Uses: Excipient, cohesive agent, stabilizer, protective colloid, detoxicant, vehicle, and retardant for pharmaceuticals (topicals, ophthalmics, liqs.); gellant, binder, coating agent, dye/pigment dispersant in tablets; solubilizer and suspending agent in liq. prods.; film-former in medicinal aerosols
Features: Minimizes toxic side effects of some drugs
Regulatory: FDA 21CFR §173.55; USP, FCC, BP, German Ph., French Ph., Italian Ph. compliance
Properties: Wh. or creamy wh. powd., odorless, tasteless; hygroscopic; sol. in aq. and org. solvs.; flash pt. none; pH 3-7 (5% aq.); 5% max. moisture
Toxicology: LD50 (oral, rat) >100,000 mg/kg; nonmutagenic; TSCA listed

Precaution: Wear safety glasses and gloves; powdered form may form explosive dust-air mixtures; avoid strong oxidizing and reducing agents
Hazardous Decomp. Prods.: NOx
HMIS: Health 0, Flammability 3, Reactivity 0
Storage: Keep containers tightly closed when not in use; store in a cool, dry place, out of direct sunlight and away from moisture
Trade Name Reference

very low chronic oral toxicity; not absorbed topically; not a primary skin irritant; nonirritating to eyes; nuisance dust;
TLV/TWA 10 mg/m³ total, 5 mg/m³ respirable
Precaution: Incompat. with strong oxidizing or reducing agents; heated to decomp., may emit toxic fumes of NOx
Storage: Prevent excessive moisture pickup

Plasdone® K-90 [ISP
http://www.ispcorp.com]
Chem. Descrip.: PVP (povidone USP)
CAS 9003-39-8; EINECS/ELINCS 201-800-4
Uses: Excipient, cohesive agent, stabilizer, protective colloid, vehicle, and retardant for pharmaceuticals (topicals, orals, ophthalmics, liqs.); gellant, binder, coating agent, dye/pigment dispersant in tablets; detoxicant for poisons and irritants; solubilizer and suspending agent in liq. prods.; film-former in medicinal aerosols
Regulatory: FDA 21CFR §173.55; USP, FCC, JP,BP, German Ph., French Ph., Italian Ph. compliance
Properties: Wh. or creamy wh. powd., odorless, tasteless; 10% max. < 75 µ particle size; hygroscopic; sol. in water, aq. and org. solvs.; bulk dens. 0.4-0.6 g/cc; pH 3-7 (5% aq.); 5% max. moisture
Toxicology: Very low chronic oral toxicity; essentially nontoxic by inh., IV, or other parenteral routes; not a primary skin irritant; nonsensitizing; nonirritating to eyes
Storage: Prevent excessive moisture pickup

Plasdone® K-90D [ISP
http://www.ispcorp.com]
Chem. Descrip.: PVP (povidone USP), densified grade
CAS 9003-39-8; EINECS/ELINCS 201-800-4
Uses: Excipient, cohesive agent, stabilizer, protective colloid, vehicle, and retardant for pharmaceuticals (topicals, orals, ophthalmics, liqs.); gellant, binder, coating agent, dye/pigment dispersant in tablets; detoxicant for poisons and irritants; solubilizer and suspending agent in liq. prods.; film-former in medicinal aerosols
Regulatory: FDA 21CFR §173.55; USP, FCC, JP,BP, German Ph., French Ph., Italian Ph. compliance
Properties: Wh. or creamy wh. powd., odorless, tasteless; 10% max. < 75 µ particle size; hygroscopic; sol. in aq. and org. solvs.; pH 3-7 (5% aq.); 5% max. moisture
Toxicology: Very low chronic oral toxicity; essentially nontoxic by inh., IV, or other parenteral routes; not a primary skin irritant; nonsensitizing; nonirritating to eyes
Storage: Prevent excessive moisture pickup

Plasdone® S-630 [ISP
http://www.ispcorp.com]
Chem. Descrip.: Polyvinylpyrrolidone-vinylacetate copolymer See PVP/VA copolymer
CAS 25086-89-9
Uses: Film-forming adhesive, direct compression tablet binder, dry granulation tablet binder, wet granulation binder, film coating additive in pharmaceuticals; plasticizer in film coatings; soften. pt. reducer in cellulose films
Regulatory: Ph Eur, DAB, JSPI, and BP compliant
Properties: Wh. powd.; sol. in water, methanol, ethanol, propanol, isopropanol, butanol, chloroform, methylene chloride, polyethylene glycol 400, propylene glycol, 1,4-butanediol, and glycerol; bulk dens. 0.23 g/cm³; tap dens. 0.35 g/cm³; pH 3-5 (10%) Toxicology: LD50 (oral, rabbit) > 5.0 g/kg; nonirritating to skin; nonsensitizing in humans
Storage: 2 yr. shelf life in orig. container @ R.T.

Plastoid® B [Röhm GmbH
http://www.roehm.de]
Chem. Descrip.: Neutral copolymer based on butyl methacrylate and methyl methacrylate
CAS 97-88-1; 80-62-6; EINECS/ELINCS 202-615-1; 201-297-1
Uses: Film-former for external pharmaceutical prods., esp. liq. wound dressings (sprays); mfg. of matrix layers for transdermal therapy systems
Regulatory: USP, EP
Properties: Wh. coarse powd.; faint odor; sol in ethyl acetate (1g/ 9g); sol. in acetone (10% sol'n.), methyl ethyl ketone (10% sol'n.), chloroform (10% sol'n.), n-butanol (10% sol'n.) and toluene (10% sol'n.); m.w. ≈ 150,000; visc. (Brookfield Viscometer) 15 mPa.s max.
Precaution: Avoid warm temps. and moisture
Storage: 6 mos. min. storage stability @ < 8 C; 12 mos. min. storage stability @ < -15 C

Pluracol® E300 [BASF/Perf. Chems.
http://www.basf.com/static/988804217008.html]
Chem. Descrip.: PEG-6
CAS 25322-68-3; EINECS/ELINCS 220-045-1
Uses: Binder, base, coating, stabilizer, solvent, vehicle, extender, and coupling agent for pharmaceuticals
Properties: Colorless cl. liq.; m.w. 300; sol. in water and org. solvs. except aliphatic
Trade Name Reference

hydrocarbons; dens. 9.4 lb/gal; sp.gr. 1.12; 
visc. 5.9 cs (99 C); flash pt. (COC) 210 C; pour 
pt. -13 C; surf. tens. 62.9 dynes/cm (1%); pH 
5.7 (5% aq.); nonionic

flash pt. 249 C (COC); pH (5% aq.) 4.5-7.5; 
acid value 0.0-1.0; hydroxyl value 178-197; 
surface tens. (0.1% aq.) 65 dynes/cm; foam 
height (0.1% aq., 50 C) 0 mm 
Storage: 1 yr.

Pluracol® E1000 [BASF/Perf. Chems. 
http://www.basf.com/static/988804217008.htm] 
Chem. Descrip.: PEG-20 
CAS 25322-68-3; EINECS/ELINCS 203-989-9 
Uses: Chemical intermediate, base, coupling 
agent, thickener, lubricant, mold release 
agent, defoamer, softener, conditioner, 
antistat, sizing agent, dispersant for
Trade Name Reference

**pharmaceuticals**

**Properties:** Solid; m.w. 1000; visc. 17.5 cs (99 C); m.p. 38 C; flash pt. (COC) 255 C

Chem. Descrip.: PEG-32
CAS 25322-68-3; EINECS/ELINCS 203-989-9
Uses: Dispersant for pharmaceuticals

**Properties:** Solid; m.w. 1450; visc. 28.5 cs (99 C); m.p. 45 C; flash pt. (COC) 255 C; 100% act.

Chem. Descrip.: PEG-32
CAS 25322-68-3; EINECS/ELINCS 203-989-9
Uses: Excipient, carrier, solvent, base, coupling agent, thickener, lubricant, defoamer, softener, dispersant in OTC pharmaceuticals and oral care preps., e.g., mouthwashes, cough syrups

**Properties:** Solid; m.w. 600; visc. 28.5 cs (99 C); m.p. 45 C; flash pt. (COC) 255 C

Chem. Descrip.: PEG-40
CAS 25322-68-3; EINECS/ELINCS 203-989-9
Uses: Base, coupling agent, thickener, lubricant, mold release agent, defoamer, softener, conditionant, antistat, sizing agent, dispersant for pharmaceuticals

**Properties:** Solid; m.w. 2000; visc. 43.5 cs (99 C); m.p. 52 C; flash pt. (COC) > 260 C; nonionic; 100% act.

Chem. Descrip.: PEG-75
CAS 25322-68-3; EINECS/ELINCS 203-989-9
Uses: Binder, base, coating, stabilizer, solvent, vehicle, extender, and coupling agent for pharmaceuticals

**Properties:** Wh. waxy solid; sol. in water and org. solvs. except aliphatic hydrocarbons; dens. 10.0 lb/gal; sp.gr. 1.21; m.p. 61.0 C; flash pt. > 490 F; surf. tens. 62.1 dynes/cm (1%); pH 6.7 (5% aq.)

Chem. Descrip.: PEG-150
CAS 25322-68-3; EINECS/ELINCS 203-989-9
Uses: Binder, base, coating, stabilizer, solvent, vehicle, extender, coupling agent for pharmaceuticals

**Properties:** Wh. waxy solid; sol. in water and org. solvs. except aliphatic hydrocarbons; dens. 10.0 lb/gal; sp.gr. 1.21; m.p. 61.0 C; flash pt. > 490 F; surf. tens. 62.1 dynes/cm (1%); pH 6.7 (5% aq.)

Chem. Descrip.: PEG-32
CAS 25322-68-3; EINECS/ELINCS 203-989-9
Uses: Base, coupling agent, thickener, lubricant, mold release agent, defoamer, softener, conditionant, antistat, sizing agent, dispersant for pharmaceuticals

**Properties:** Wh. waxy solid; sol. in water and org. solvs. except aliphatic hydrocarbons; dens. 10.0 lb/gal; sp.gr. 1.21; m.p. 61.0 C; flash pt. > 490 F; surf. tens. 62.1 dynes/cm (1%); pH 6.7 (5% aq.)

Chem. Descrip.: PEG-150
CAS 25322-68-3; EINECS/ELINCS 203-989-9
Uses: Base, coupling agent, thickener, lubricant, mold release agent, defoamer, softener, conditionant, antistat, sizing agent, dispersant for pharmaceuticals

**Properties:** Wh. waxy solid; sol. in water and org. solvs. except aliphatic hydrocarbons; dens. 10.0 lb/gal; sp.gr. 1.21; m.p. 61.0 C; flash pt. > 490 F; surf. tens. 62.1 dynes/cm (1%); pH 6.7 (5% aq.)

**Plurol® Diisostearique** [Gattefosse France http://www.gattefosse.fr]

Chem. Descrip.: Polyglyceryl-3 diisostearate
CAS 66082-42-6; EINECS/ELINCS 291-548-1
Uses: W/o emulsifier for pharmaceutical creams for dry skin treatment, skin protection, dermatological sun care preps.; excipient for dermal/transdermal pharmaceuticals

**Features:** Cold process; exc. appearance, gloss, afterfeel, and stability at 50 C

**Regulatory:** DMF no. 11696

**Properties:** Pale yel. cl. to sl. opalescent visc. liq., faint odor; sol. in min. and veg. oils; insol. in water, alcohols; acid no. < 5; iodine no. < 8; sapon. no. 128-148; ref. index 1.471-1.475; nonionic; < 0.5% water

**Use Level:** 3% (lotions); 6% (thick creams)
Storage: Avoid moisture and air; storage below 18°C can lead to reversible opalescence

Plurol® Isostearique [Gattefosse France http://www.gattefosse.fr]
Chem. Descr.: Polyglyceryl-6 isostearate
CAS 12692-07-2
Uses: Emulsifier, cosurfactant, bioavailability enhancer for microemulsions
Properties: Gardner < 10 visc. liq., char. odor; sol. in chloroform, methylene chloride, veg. oils, ethanol; disp. in water; HLB 10.0; acid no. < 6; iodine no. < 10; sapon. no. 115-135; ref. index 1.470-1.480; nonionic; 100% conc.
Toxicology: Nonirritating to skin

Plurol® Oleique [Gattefosse France http://www.gattefosse.fr]
Chem. Descr.: Polyglyceryl-6 dioleate
CAS 76009-37-5; EINECS/ELINCS 278-358-4
Uses: Emulsifier, solubilizer, cosurfactant for pharmaceutical topical microemulsions; suspending agent for hard/soft gelatin capsules
Properties: Gardner < 10 visc. liq., char. odor; sol. in ethanol, chloroform, methylene chloride, veg. and min. oils; disp. in water; visc. 5-28 Pa•s; HLB 10.0; acid no. < 6; iodine no. 50-70; sapon. no. 110-140; pH 7.0-9.5 (10% aq.); ref. index 1.470-1.490; nonionic; 100% conc.
Toxicology: Slight irritating to skin and eyes

Plurol® Oleique CC 497 [Gattefosse France http://www.gattefosse.fr]
Chem. Descr.: Polyglyceryl-6 oleate
CAS 9007-48-1
Uses: Emulsifier for liq. self-microemulsifying drug delivery systems; solubilizer, bioavailability enhancer, absorp. enhancer for poorly-sol. drugs in liq. and capsule formulations; vehicle for dissolved or suspended drugs; wetting agent to aid wetting of suspended powds.; thickener in pharmaceuticals; coemulsifier for oral and topical microemulsions
Properties: Visc. liq.; char. odor; HLB 6; nonionic

Chem. Descr.: Polyglyceryl-6 distearate
CAS 34424-97-0; EINECS/ELINCS 252-010-1
Uses: Pharmaceutical excipient, coating agent, emulsifier, solubilizer, wetting agent
Regulatory: FCC listed
Properties: Gardner < 10 waxy solid, faint odor; sol. in chloroform, methylene chloride; partly sol. in ethanol; disp. in water; HLB 9.0; drop pt. 48-53°C; acid no. < 5; iodine no. < 3; sapon. no. 120-140; pH 7.0-9.5 (10% aq.); nonionic; 100% conc.
Toxicology: Nonirritating to eyes

Chem. Descr.: Poloxamer 188 NF
CAS 9003-11-6
Uses: Surfactant, emulsifier, solubilizer in pharmaceuticals, topical and oral care prods.; protective gel coating in burn treatments; vehicle for ointments and fluoridated dentifrices
Properties: Solid; sol. in ethanol, water; m.w. 8350; sp.gr. 1.06 (77°C); dens. 8.8 lb/gal (77°C); visc. 1000 cps (77°C); m.p. 52°C; HLB 29.0; cloud pt. > 100°C (1% aq.); flash pt. (COC) 500°F; surf. tens. 50.3 dynes/cm (0.1%); Draves wetting > 360 s (0.1%); Ross-Miles foam 35 mm (0.1% aq., 50°C); nonionic; 100% act.
Toxicology: LD50 (oral) 2 to > 15 g/kg, (dermal) > 5 g/kg; non to sl. eye and skin irritation

Chem. Descr.: Poloxamer 237 NF
CAS 9003-11-6
Uses: Surfactant, emulsifier, solubilizer in pharmaceuticals, topical and oral care prods.; protective gel coating in burn treatments; vehicle for ointments and fluoridated dentifrices
Properties: Solid; sol. in ethanol, water, toluene; m.w. 7700; sp.gr. 1.04 (77°C); dens. 8.7 lb/gal (77°C); visc. 700 cps (77°C); m.p. 49°C; HLB 24.0; cloud pt. > 100°C (1% aq.); flash pt. (COC) 472°F; surf. tens. 44.0 dynes/cm (0.1%); Draves wetting > 360 s (0.1%); Ross-Miles foam 80 mm (0.1% aq., 50°C); nonionic; 100% act.
Toxicology: LD50 (oral) 2 to > 15 g/kg, (dermal) > 5 g/kg; non to sl. eye and skin irritation

Chem. Descr.: Poloxamer 408 NF
CAS 9003-11-6
Uses: Surfactant, emulsifier, solubilizer in pharmaceuticals, topical and oral care prods.; protective gel coating in burn treatments; vehicle for ointments and fluoridated dentifrices
Properties: Solid; sol. in ethanol, water, toluene; m.w. 55,000; sp.gr. 1.01 (77°C); dens. 8.6 lb/gal (77°C); visc. 500 cps (77°C); m.p. 32°C; HLB 20.0; cloud pt. > 100°C (1% aq.); flash pt. (COC) 302°F; surf. tens. 27.8 dynes/cm (0.1%); Draves wetting > 360 s (0.1%); Ross-Miles foam 10 mm (0.1% aq., 50°C); nonionic; 100% act.
Toxicology: LD50 (oral) 2 to > 15 g/kg, (dermal) > 5 g/kg; non to sl. eye and skin irritation
Trade Name Reference

Chem. Descrip.: Poloxamer 338 NF
CAS 9003-11-6
Uses: Surfactant, emulsifier, solubilizer in pharmaceuticals, topical and oral care prods.; protective gel coating in burn treatments; vehicle for ointments and fluoridated dentifrices
Properties: Prilled; sol. in ethanol, water, m.w. 14,000; sp.gr. 1.06 (77 C); dens. 8.8 lb/gal (77 C); visc. 8000 cps (77 C); m.p. 57 C; HLB 27.0; cloud pt. > 100 C (1% aq.); flash pt. (COC) 495 F; surf. tens. 41.2 dynes/cm (0.1%); Draves wetting > 360 s (0.1%); Ross-Miles foam 40 mm (0.1% aq., 50 C); nonionic; 100% act.
Toxicology: LD50 (oral) 2 to > 15 g/kg, (dermal) > 5 g/kg; non to sl. eye and skin irritation

Chem. Descrip.: Poloxamer 407 NF
CAS 9003-11-6
Uses: Gellant for pharmaceuticals; emulsifier, solubilizer in topical and oral care prods.; protective gel coating in burn treatments; vehicle for ointments and fluoridated dentifrices
Properties: Prilled; sol. in ethanol, water, toluene, perchloroethylene; m.w. 12,500; sp.gr. 1.05 (77 C); dens. 8.8 lb/gal (77 C); visc. 3100 cps (77 C); m.p. 56 C; HLB 22.0; cloud pt. > 100 C (1% aq.); surf. tens. 40.6 dynes/cm (0.1%); Draves wetting > 360 s (0.1%); Ross-Miles foam 40 mm (0.1% aq., 50 C); nonionic; 100% act.
Toxicology: LD50 (oral) 2 to > 15 g/kg, (dermal) > 5 g/kg; non to sl. eye and skin irritation

Chem. Descrip.: Poloxamer 124 NF
CAS 9003-11-6
Uses: Surfactant, emulsifier, solubilizer in pharmaceuticals, topical and oral care prods.; protective gel coating in burn treatments; vehicle for ointments and fluoridated dentifrices
Properties: Liq.; m.w. 2200; sp.gr. 1.05; dens. 8.8 lb/gal; visc. 440 cps; HLB 16.0; pour pt. 16 C; cloud pt. 65 C (1% aq.); flash pt. (COC) 464 F; ref. index 1.4580; surf. tens. 45 dynes/cm; Draves wetting > 360 s (0.1%); Ross-Miles foam 25 mm (0.1%, 50 C); nonionic; 100% act.
Toxicology: LD50 (oral) 2 to > 15 g/kg, (dermal) > 5 g/kg; non to sl. eye and skin irritation

Chem. Descrip.: Propylene glycol stearate SE
CAS 91031-35-5; EINECS/ELINCS 292-936-3
Uses: Emulsifier, emulsion stabilizer, and dispersant for pharmaceuticals
Features: Lipophilic
Regulatory: JSCI listed
Properties: Wh. solid; HLB 4.0; anionic; 100% conc.
Toxicology: TSCA listed

Chem. Descrip.: Propylene glycol stearate
CAS 1323-39-3; EINECS/ELINCS 215-354-3
Uses: Emulsifier, emulsion stabilizer, and dispersant for pharmaceuticals
Features: Lipophilic
Regulatory: JSCI listed
Properties: Wh. solid; HLB 4.0; anionic; 100% conc.
Toxicology: TSCA listed

Pogol® 400 [Huntsman http://www.huntsman.com]
Chem. Descrip.: PEG 400 See PEG-8
CAS 25322-68-3; EINECS/ELINCS 225-856-4
Uses: Solubilizer, solv. for pharmaceutical ointments and lotions
Properties: Pt-Co < 50 color; cl. liq.; m.w. 380-420; dens. 1.1254 g/ml (20 C); visc. 42 cSt (37.8 C); f.p. -8 C; flash pt. (PMCC) 200 C; pH 5.5-7.0 (5% aq.); nonionic; 100% act.
Storage: Store in carbon steel tanks using steel pipes and pumps

Chem. Descrip.: Bentonite USP/NF
CAS 1302-78-9; EINECS/ELINCS 215-108-5
Uses: Visc. builder, disintegrant, binder, suspending agent for pharmaceuticals
Features: High visc. wh. montmorillonite
Properties: Wh. microfine powd.; 99% min. through 200 mesh; vic. 800 cps min. (5% solids); pH 9.5-10.5 (2% disp.); dry brightness (GE) 83-87; 5-8% moisture

Polargel® NF [Am. Colloid]
Che. Descrip.: Purified wh. bentonite USP/NF
CAS 1302-78-9; EINECS/ELINCS 215-108-5
Uses: Gelant, thickener, binder, and suspending agent for pharmaceuticals
Properties: Wh. fine powd.; 99% through 200 mesh; visc. 40-200 cps (5% solids); pH 9.0-10.0 (5% disp.); dry brightness (GE) 85-90; 8% max. moisture

Che. Descrip.: Bentonite USP/NF
CAS 1302-78-9; EINECS/ELINCS 215-108-5
Uses: Thickener, suspending agent, and binder for pharmaceuticals
Properties: Wh. fine powd.; 99% min. through 200 mesh; visc. 200-500 cps (5% solids); pH 9.5-10.5 (2% disp.); dry brightness (GE) 83-87; 5-8% moisture

Polinor T deo  [Cognis http://www.cognis.de]
Uses: Carrier for pharmaceutical lipophilic active ingreds.

Polawax® A31  [Croda Inc http://www.croda.com; http://www.crodausa.com; Croda Chem. Europe Ltd http://www.croda.co.uk]
Chem. Descrip.: Emulsifying wax NF
CAS 97069-99-0
Uses: O/w emulsifier and foaming agent in quick-breaking foams, oral and topical pharmaceuticals
Features: Optimized for hydroalcoholic systems
Properties: Creamy wh. flakes, mild char. odor; sol. in alcohol and aerosol propellant, disp. in water, propylene glycol; m.p. 50-54 C; iodine no. 3.5 max.; sapon. no. 14 max.; hyd. no. 178-192; pH 5.5-7.0 (3% eq.); nonionic; 100% conc.
Use Level: 1-8%
Toxicology: LD50 (oral, rat) > 5 g/kg; nonirritating to skin and eyes

Polawax® GP200  [Croda Chem. Europe Ltd http://www.croda.co.uk]
Chem. Descrip.: Self-emulsifying wax
Uses: Emulsifier producing stable w/o emulsions for pharmaceuticals, lotions, creams, ointments
Features: Self-bodying; effective at high levels of electrolytes and active ingreds.; heat-stable; stable delivery system for most actives over a wide pH range
Properties: Wh. powd.; nonionic; 97% conc.

Polawax® NF  [Croda Inc http://www.croda.com; http://www.crodausa.com; Croda Chem. Europe Ltd http://www.croda.co.uk]
Chem. Descrip.: Emulsifying wax NF
CAS 97069-99-0
Uses: Emulsifier, thickener, opacifier, suspending agent for topical pharmaceuticals, antibiotic creams and lotions, acne preps., analgesic rubs; stabilizer for o/w emulsions; emulsifier for pharmaceutical orals, creams, and lotions; controlled release capsule fill and wax matrix apps.
Features: Comp. with other emulsifiers; stable over wide pH range; autoclavable
Properties: Creamy wh. flaked waxy solid, mild char. odor; sol. in alcohol; disp. in water, propylene glycol; m.p. 48-52 C; iodine no. 3.5 max.; sapon. no. 14 max.; hyd. no. 178-192; pH 5.5-7.0 (3% eq.); nonionic; 100% conc.
Use Level: 2-25%; 2-3% (fluid emulsions); 5-10% (thick visc. emulsions); 10-25% (creams); 15-20% (controlled release capsules)
Toxicology: LD50 (oral, rat) 16 g/kg; nonirritating to skin and eyes

Polyalditol X110  [SPI Pharma http://www.spipharma.com]
Uses: Excipient providing a protective matrix for pharmaceutical actives, enzymes, proteins, etc. during spray drying, lyophilization, and coagglomeration; excipient for direct compression tableting; binder, diluent in wet granulation, fluid bed, or agglomeration processes
Features: Exc. compression props.; nonreactive; cryoprotectant props. beneficial in freeze-drying
Properties: Wh. spray-dried powd.; sl. sweet taste; water-sol.; m.w. 1600 avg.; visc. 118 (40%); 280 (50%); 5-6% loss on drying

Polyalditol X120  [SPI Pharma http://www.spipharma.com]
Uses: Excipient providing a protective matrix for pharmaceutical actives, enzymes, proteins, etc. during spray drying, lyophilization, and coagglomeration; excipient for direct compression tableting; binder, diluent in wet granulation, fluid bed, or agglomeration processes
Features: Exc. compression props.; nonreactive;
Trade Name Reference

cryoprotectant props. beneficial in freeze-drying
Properties: Wh. spray-dried powd.; sl. sweet taste; water-sol.; m.w. 900 avg.; visc. 44 (40%), 77 (50%); 5-6% loss on drying
Polyaldo® 10-1-O [Lonza http://www.lonza.com]
Chem. Descrip.: Decaglycerol monooleate See Polyglyceryl-10 olate
CAS 9007-48-1; EINECS/ELINCS 279-230-0
Uses: Emulsifier in medicinals, pharmaceuticals
Features: Polysorbate replacer
Regulatory: Made to food grade and Kosher requirements
Properties: Waxy solid; HLB 13; nonionic

PolyBeard® Microspheres [Polysciences http://www.polysciences.com]
Chem. Descrip.: Polystyrene microspheres in aq. suspending medium
CAS 9003-53-6; EINECS/ELINCS 202-851-5
Uses: Inert microparticles with controlled size, shape, and functionality for organic syntheses, immunochemistry, cell biology, diagnostic testing, flow cytometry, cancer therapy
Features: Sterilizable by gamma or alcohol treatments; stable to mod. heating; avail. with acrylated, chloromethyl, polyacrolein, carboxylated, amino, epoxy, hydroxylate, and methyl methacrylate functionality
Properties: Microparticles (0.05-90 µ); various colors and fluorescent colors avail.; dens. 1.05 g/ml; ref. index 1.6000; 2.5-20% concs.
Storage: 2 yrs. min. shelf life; store @ 4 C; protect from freezing
Chem. Descrip.: Propylene glycol
CAS 57-55-6; EINECS/ELINCS 200-338-0
Uses: Solvent, emulsifier in pharmaceuticals

Polychol 15 [Croda Inc http://www.croda.com; http://www.crodausa.com; Croda Chem. Europe Ltd http://www.croda.co.uk]
Chem. Descrip.: Laneth-5
CAS 61791-20-6
Uses: O/w emulsifier, dispersant, gellant, emollient, solubilizer for topical pharmaceuticals; coemulsifier in prod. of w/o emulsions and microemulsions for topical pharmaceuticals; cosolvent for nonmiscible oils
Features: Reduces greasy feeling of lanolin
Properties: Soft yel. wax; sol. in IPA, disp. in water, propylene glycol, min. oil; m.p. 35-48 C; HLB 5; nonionic; 1% max. moisture
Use Level: 1-10%
Toxicology: LD50 (oral, rat) 7.7 g/kg; mild skin irritant, nonirritating to eyes
Trade Name Reference

http://www.crodausa.com; Croda Chem. Europe Ltd http://www.croda.co.uk
Chem. Descrip.: Laneth-15
CAS 61791-20-6
Uses: O/w emulsifier, dispersant, solubilizer, emollient, thickener, and gellant for topical pharmaceuticals; cosolvent for nonmiscible oils
Features: Mild; reduces greasy feeling of lanolin
Properties: Yel. soft wax; sol. in water, IPA, propylene glycol; disp. in min. oil; m.p. 34-42 C; HLB 12.7; acid no. 5 max.; hyd. no. 82-92; pH 3.5-5.5 (10% aq.); nonionic; 100% conc.
Use Level: 1-10%
Toxicology: Nonirritating to skin and eyes

Uses: Solvent for pharmaceuticals
Properties: M.p. -23 C; b.p. > 270 C

Chem. Descrip.: Water, glycerin, hydroxypropyl methyl cellulose
Uses: Vehicle in topical pharmaceuticals
Features: Easily pumped for convenient processing; relatively stable @ pH 4-10; tolerant to potassium and sodium salts, most surfactants, some polar solvs.
Properties: Lt. yel. to straw visc. gel; visc. 170,000-265,000 cps; pH 4.8-5.7; ref. index 1.386-1.390
Precaution: Incompat. with strong oxidizers
Storage: Store @ R.T.; visc. reduced @ > 45 C

Polyox® WSR 205 [Dow http://www.dow.com]
Chem. Descrip.: PEG-14M
CAS 25322-68-3
Uses: Thickener, lubricant, binder, coating for pharmaceuticals; water-sol. coating for tablets; dispersant, antisettling agent in calamine lotion; lubricant, evaporation inhibitor for rubbing alcohol; controlled-release drugs
Regulatory: FDA 21CFR §172.770, 175.300, 175.380, 175.390, 176.170, 176.180, 177.1210, 177.1350; EPA 40CFR §180.1001(d)
Properties: Wh. gran. powd., mild ammoniacal odor; 100% through 10 mesh, 96% through 20 mesh; sol. in water, some chlorinated solvs., alcohols, aromatic hydrocarbons, ketones; m.w. 600,000; sp.gr. 1.15-1.26; bulk dens. 19-37 lb/ft³; visc. 4500-8800 cps (5% aq.); m.p. 62-67 C; pH 8-10 (5% aq.); nonionic
Precaution: Slippery when wet
Storage: Store in sealed containers below 25 C, away from heat; avoid dust buildup

Polyox® WSR 301 [Dow http://www.dow.com]
Chem. Descrip.: PEG-90M NF
CAS 25322-68-3
Uses: Excipient in pharmaceuticals; binder, water-sol. coating for tablets; dispersant, antisettling agent in calamine lotion; lubricant, evaporation inhibitor for rubbing alcohol; controlled-release drugs; contact lens fluid
Regulatory: FDA 21CFR §172.770, 175.300, 175.380, 175.390, 176.170, 176.180, 177.1210, 177.1350; EPA 40CFR §180.1001(d)
Properties: Wh. gran. powd., mild ammoniacal odor; 100% through 10 mesh, 96% through 20 mesh; sol. in water, some chlorinated solvs., alcohols, aromatic hydrocarbons, ketones; m.w. 4,000,000; bulk dens. 19-37 lb/ft³; visc. 1650-5500 cps (1% aq.); m.p. 62-67 C; pH 8-10 (1% aq.); nonionic
Precaution: Slippery when wet
Storage: Store in sealed containers below 25 C, away from heat; avoid dust buildup

Polyox® WSR 303 [Dow http://www.dow.com]
Chem. Descrip.: Polyethylene oxide NF
CAS 25322-68-3
Uses: Excipient for pharmaceuticals, mucosal bioadhesives, controlled oral drug delivery, transdermal drug delivery, wound dressings, lubricious coatings; pharmaceutical tablet binder; water-sol. coating for tablets; dispersant, antisettling agent in calamine lotion; lubricant, evaporation inhibitor for rubbing alcohol; controlled-release drugs; contact lens fluid
Regulatory: FDA 21CFR §172.770, 175.300, 175.380, 175.390, 176.170, 176.180, 177.1210, 177.1350; EPA 40CFR §180.1001(d)
Properties: Wh. gran. powd., mild ammoniacal odor; 100% through 10 mesh, 96% through 20 mesh; sol. in water, some chlorinated solvs., alcohols, aromatic hydrocarbons, ketones; m.w. 7,000,000; bulk dens. 19-37 lb/ft³; visc. 7500-10,000 cps (1% aq.); m.p. 62-67 C; pH 8-10 (sol'n.); nonionic
Precaution: **Slippery when wet**

Storage: Store in sealed containers below 25 C, away from heat; avoid dust buildup

**Polyox® WSR 308** [Dow](http://www.dow.com)

Chem. Descrip.: **Polyethylene oxide**

CAS 25322-68-3

Uses: Water-sol. coating for tablets; dispersant, antissettling agent in calamine lotion; lubricant, evaporation inhibitor for rubbing alc.; controlled-release drugs; contact lens fluid

Regulatory: FDA 21CFR §172.770, 175.300, 175.380, 176.170, 176.180, 177.1210, 177.1350; EPA 40CFR §180.1001(d)

Properties: Wh. gran. powd., mild ammoniacal odor; 100% through 10 mesh, 96% through 20 mesh; sol. in water, some chlorinated solvs., alcohols, aromatic hydrocarbons, ketones; m.w. 8,000,000; sp.gr. 1.15-1.26; bulk dens. 19-37 lb/ft^3; visc. 10,000-15,000 cps (1% aq.); m.p. 62-67 C; pH 8-10 (sol'n.); nonionic

Precaution: **Slippery when wet**

Storage: Store in sealed containers below 25 C, away from heat; avoid dust buildup

**Polyox® WSR 1105** [Dow](http://www.dow.com)

Chem. Descrip.: **PEG-20M NF**

CAS 25322-68-3; EINECS/ELINCS 225-856-4

Uses: Excipient for pharmaceuticals, mucosal bioadhesives, controlled oral drug delivery, transdermal drug delivery, wound dressings, lubricious coatings; binder, coating for pharmaceutical tablets; dispersant, antissettling agent in calamine lotion; lubricant, evaporation inhibitor for rubbing alcohol; controlled-release drugs; contact lens fluid

Regulatory: FDA 21CFR §172.770, 175.300, 175.380, 175.390, 176.170, 176.180, 177.1210, 177.1350; EPA 40CFR §180.1001(d)

Properties: Wh. gran. powd., mild ammoniacal odor; 100% through 10 mesh, 96% through 20 mesh; sol. in water, some chlorinated solvs., alcohols, aromatic hydrocarbons, ketones; m.w. 900,000; sp.gr. 1.15-1.26; bulk dens. 19-37 lb/ft^3; visc. 10,000-15,000 cps (1% aq.); m.p. 62-67 C; pH 8-10 (sol'n.); nonionic

Precaution: **Slippery when wet**

Storage: Store in sealed containers below 25 C, away from heat; avoid dust buildup

**Polyox® WSR N-10** [Dow](http://www.dow.com)

Chem. Descrip.: **PEG-2M**

CAS 25322-68-3

Uses: Excipient for pharmaceuticals, mucosal bioadhesives, controlled oral drug delivery, transdermal drug delivery, wound dressings, lubricious coatings; binder, coating for tablets; dispersant, antissettling agent in calamine lotion; lubricant, evaporation inhibitor for rubbing alcohol; controlled-release drugs; contact lens fluid

Regulatory: FDA 21CFR §172.770, 175.300, 175.380, 175.390, 176.170, 176.180, 177.1210, 177.1350; EPA 40CFR §180.1001(d)

Properties: Wh. gran. powd., mild ammoniacal odor; 100% through 10 mesh, 96% through 20 mesh; sol. in water, some chlorinated solvs., alcohols, aromatic hydrocarbons, ketones; m.w. 100,000; sp.gr. 1.15-1.26; bulk dens. 19-37 lb/ft^3; visc. 12-50 cps (5% aq.); m.p. 62-67 C; pH 8-10 (5% aq.); nonionic

Precaution: **Slippery when wet**

Storage: Store in sealed containers below 25 C, away from heat; avoid dust buildup

**Polyox® WSR N-12K** [Dow](http://www.dow.com)

Chem. Descrip.: **PEG-115M NF**

CAS 25322-68-3

Uses: Excipient for pharmaceuticals, mucosal bioadhesives, controlled oral drug delivery, transdermal drug delivery, wound dressings, lubricious coatings; binder, coating for tablets; dispersant, antissettling agent in calamine lotion; lubricant, evaporation inhibitor for rubbing alcohol; controlled-release drugs; contact lens fluid

Regulatory: FDA 21CFR §172.770, 175.300, 175.380, 175.390, 176.170, 176.180, 177.1210, 177.1350; EPA 40CFR §180.1001(d)

Properties: Wh. gran. powd., mild ammoniacal odor; 100% through 10 mesh, 96% through 20 mesh; sol. in water, some chlorinated solvs., alcohols, aromatic hydrocarbons, ketones; m.w. 5,000,000; sp.gr. 1.15-1.26; bulk dens. 19-37 lb/ft^3; visc. 5000-7500 cps (1% aq.); m.p. 62-67 C; pH 8-10 (sol'n.); nonionic

Precaution: **Slippery when wet**

Storage: Store in sealed containers below 25 C, away from heat; avoid dust buildup
**Polyox® WSR N-60K** [Dow http://www.dow.com]  
**Chem. Descrip.:** PEG-45M NF  
**CAS 25322-68-3**  
**Uses:** Excipient for pharmaceuticals, mucosal bioadhesives, controlled oral drug delivery, transdermal drug delivery, wound dressings, lubrificious coatings; binder, coating for tablets; dispersant, antisettling agent in calamine lotion; lubricant, evaporation inhibitor for rubbing alcohol; controlled-release drugs; contact lens fluid  
**Regulatory:** FDA 21CFR §175.300, 175.380, 175.390, 176.170, 176.180, 177.1210, 177.1350; EPA 40CFR §180.1001(d)  
**Properties:** Wh. gran. powd., mild ammoniacal odor; 100% through 10 mesh, 96% through 20 mesh; sol. in water, some chlorinated solvs., alcohols, aromatic hydrocarbons, ketones; m.w. 200,000; sp.gr. 1.15-1.26; bulk dens. 19-37 lb/ft³; visc. 600-1200 cps (5% aq.); m.p. 62-67 C; pH 8-10 (5% aq.); nonionic  
**Precaution:** Slippery when wet  
**Storage:** Store in sealed containers below 25 C, away from heat; avoid dust buildup

**Polyox® WSR N-80** [Dow http://www.dow.com]  
**Chem. Descrip.:** PEG-5M  
**CAS 25322-68-3**  
**Uses:** Excipient for pharmaceuticals, mucosal bioadhesives, controlled oral drug delivery, transdermal drug delivery, wound dressings, lubrificious coatings; binder, coating for tablets; dispersant, antisettling agent in calamine lotion; lubricant, evaporation inhibitor for rubbing alcohol; controlled-release drugs; contact lens fluid  
**Regulatory:** FDA 21CFR §175.300, 175.380, 175.390, 176.170, 176.180, 177.1210, 177.1350; EPA 40CFR §180.1001(d)  
**Properties:** Wh. gran. powd., mild ammoniacal odor; 100% through 10 mesh, 96% through 20 mesh; sol. in water, some chlorinated solvs., alcohols, aromatic hydrocarbons, ketones; m.w. 300,000; sp.gr. 1.15-1.26; bulk dens. 19-37 lb/ft³; visc. 600-1200 cps (5% aq.); m.p. 62-67 C; pH 8-10 (5% aq.); nonionic  
**Precaution:** Slippery when wet  
**Storage:** Store in sealed containers below 25 C, away from heat; avoid dust buildup

**Polypax GMS SE** [Pax Group http://www.paxgroup.com; http://www.paxchem.com]  
**Chem. Descrip.:** Glyceryl monostearate SE  
**See Glyceryl stearate SE**  
**Uses:** Emulsifier, conditioner, thickener in pharmaceuticals  
**Features:** Self-emulsifiable; contains some sodium and/or potassium stearate  
**Properties:** Solid; nonionic; 99% act.

**Polypax IPM** [Pax Group http://www.paxgroup.com;...
Trade Name Reference

Chem. Descrip.: Isopropyl myristate
CAS 110-27-0; EINECS/ELINCS 203-751-4
Uses: Solvent, emollient, lubricant, conditioner, antistat, plasticizer in pharmaceuticals
Properties: Liq.; 99% act.

Polypax IPP [Pax Group
http://www.paxgroup.com; http://www.paxchem.com]
Chem. Descrip.: Isopropyl palmitate
CAS 142-91-6; EINECS/ELINCS 205-571-1
Uses: Solvent, emollient, lubricant, conditioner, antistat, plasticizer in pharmaceuticals
Properties: Liq.; 99% act.

Polypax PD 6000 [Pax Group
http://www.paxgroup.com; http://www.paxchem.com]
Chem. Descrip.: PEG 6000 distearate See PEG-150 distearate
CAS 9005-08-7
Uses: Emulsifier, emollient, lubricant, thickener, antistat, defoamer, plasticizer in pharmaceuticals
Features: High HLB
Properties: Waxy solid; sol. in water; nonionic; 99% act.

Polypax PGMS [Pax Group
http://www.paxgroup.com; http://www.paxchem.com]
Chem. Descrip.: Propylene glycol monostearate See Propylene glycol stearate
CAS 1323-39-3; EINECS/ELINCS 215-354-3
Uses: Opacifier, pearlescent, emulsifier, solubilizer, emollient, lubricant, conditioner, defoamer, humectant, plasticizer, stabilizer in pharmaceuticals
Properties: Solid; sol. in oils and hydrocarbons; insol. in water; nonionic; 99% act.

Polypox SMO [Pax Group
http://www.paxgroup.com; http://www.paxchem.com]
Chem. Descrip.: Sorbitan monoleate See Sorbitan oleate
CAS 1338-43-8; EINECS/ELINCS 215-665-4
Uses: Emulsifier, solubilizer, emollient, lubricant, antistat, clarifier, coupling agent, stabilizer in pharmaceuticals
Properties: Liq.; sol. in oils, hydrocarbons; insol. in water; 99% act.
m.w. > 10^6; dens. 1.22 g/cc; pH 5-8 (1g/100 ml water); 0.5% max. moisture

Toxicology: Very low chronic toxicity; virtually unabsorbed in the gastrointestinal tract

Polyplasdone® XL-10 [ISP
http://www.isp corp.com]
Chem. Descrip.: Crospovidone NF
CAS 9003-39-8
Uses: Excipient; tablet binder/disintegrant/stabilizer; complexing agent for insol. polymeric iodine complexes; detoxifier; antidiarrheal agent; stabilizer for moisture-sensitive actives (vitamins, enzymes); in analgesics, antibiotics, transdermals

Properties: Wh. to off-wh. free-flowing fine powd., pract. odorless and tasteless; 95% < 75 µ particle size; insol. in water and all other common solvs.; flash pt. none; pH 5-8 (1g/100 ml water); 0.5% max. moisture

Toxicology: LD50 (oral, rat) > 100,000 mg/kg; very low chronic toxicity; virtually unabsorbed topically and in the gastrointestinal tract; not a primary skin irritant; nonirritating to eyes; nuisance dust: TLV/TWA 10 mg/m³ total, 5 mg/m³ respirable

Precaution: Incompat. with strong oxidizing or reducing agents; heated to decom., emits toxic fumes of NOx

Polyquat 50 [Pax Chem.
http://www.paxchem com]
Chem. Descrip.: Alkyldimethylbenzyl ammonium chloride See Benzalkonium chloride
Uses: Antiseptic in cosmetics, hygiene care prod.s., water treatment
Features: Broad spectrum
Properties: Liq.; cationic; 50% act.

Polyquat 188 [Pax Chem.
http://www.paxchem com]
Chem. Descrip.: 3-Chloro-2-hydroxypropyl trimethylammonium chloride See Chloro-2-hydroxypropyl trimonium chloride
CAS 3327-22-8; EINECS/ELINCS 222-048-3
Uses: Biocide, bactericide, emulsifier, emollient, conditioner, antistat, flocculant, humectant in pharmaceuticals
Properties: Liq.; cationic; 70% act.

Polyquad PA-30 [Sanyo Chem. Ind.
http://www.sanyo-chemical.co.jp]
Chem. Descrip.: Copolymer of methacrylic acid and ethyl acrylate See Methacrylic acid/ethyl acrylate copolymer
CAS 25212-88-8
Uses: Enteric-soluble coating agent for tablets
Regulatory: USP/NF

Polyquad PA-30S [Sanyo Chem. Ind.
http://www.sanyo-chemical.co.jp]
Chem. Descrip.: Copolymer of methacrylic acid and ethyl acrylate See Methacrylic acid/ethyl acrylate copolymer
CAS 25212-88-8
Uses: Enteric-soluble coating agent for tablets
Features: Lower minimum film forming temperature compared with Polyquad PA-30; suitable for coating at lower temperatures
Regulatory: USP/NF

POLYSTEP® B-3 [Stepan
http://www.stepan.com]
Chem. Descrip.: Sodium lauryl sulfate
CAS 151-21-3; EINECS/ELINCS 205-788-1
Uses: Emulsifier for pharmaceuticals
Regulatory: FDA 21CFR §175.105, 175.300, 176.170, 176.210, 177.1200, 177.1210, 177.2600, 177.2800, 178.3400
Properties: Free-flowing wh. powd.; flash pt. (PMCC) >94 C; pH (1% sol'n.) 9.0; surf. tens. 25 dynes/cm; anionic; 97.5% act.

Toxicology: LD50 0.8 - 1.1 g/kg; mild eye and skin irritant
Environmental: Biodeg.; RVOC 0%
Storage: Store in sealed containers and kept in a cool, dry place to avoid agglomeration

Polysynth HBU 185 [Pax Chem.
http://www.paxchem.com]
Chem. Descrip.: Undecylenic acid deriv.
Uses: Antimicrobial, antimycotic, antidiarrheal agent, emulsifier, foam booster/stabilizer in medicated shampoos
Properties: Liq.; anionic; 40% act.

Polysynth SIM [Pax Group
http://www.paxgroup.com;
http://www.paxchem.com]
Chem. Descrip.: Organically modified silicone oil
Uses: Silicone defoamer in pharmaceuticals
Features: Water emulsifiable
Properties: Visc. liq.; insol. in water; 98% act.

Polytex 10 [Lipo
http://www.lipochemicals.com]
Chem. Descrip.: Stearamide DIBA-stearate
| Trade Name Reference | Features: Uniform particle size  
Regulatory: NF  
Properties: Wh. to off-wh. powd.; 2% max. 
retained on 200 mesh US Standard Sieve (74 μ)  
Powdered Agar Agar Bacteriological Grade  
Chem. Descrip.: Agar agar  
Chem. Analysis: 10% max. moisture content  
CAS 9005-25-8; EINECS/ELINCS 232-679-6  
Uses: Gellant, suspending agent, emulsifier, 
bulking agent for slow-release capsules, 
suppositories, surgical lubricants, 
emulsions; carrier for topical medicaments; 
excipient, disintegrant in tablets; laxatives; 
barium sulfate (radiology); dental use  
Properties: Wh. to pale yel. powd., sl. char. odor, 
mucilaginous taste; insol. in cold water, slowly 
sol. in hot water, completely sol. in boiling 
water; insol. in alcohol and most org. solvs.  
Powdered Agar Agar Type K-60  
Chem. Descrip.: Agar agar  
Chem. Analysis: 7.5% max. moisture content  
CAS 9005-25-8; EINECS/ELINCS 232-679-6  
Uses: Gellant, suspending agent, emulsifier, 
bulking agent for slow-release capsules, 
suppositories, surgical lubricants, 
emulsions; carrier for topical medicaments; 
excipient, disintegrant in tablets; laxatives; 
barium sulfate (radiology); dental use  
Properties: Wh. to pale yel. powd., sl. char. odor, | Features: Uniform particle size  
Regulatory: NF  
Properties: Wh. to off-wh. powd.; 2% max. 
retained on 200 mesh US Standard Sieve (74 μ)  
Powdered GP USP  
Chem. Descrip.: Corn starch See Corn (Zea mays) starch  
CAS 9005-25-8; EINECS/ELINCS 232-679-6  
Uses: Topical starch dusting powder in 
pharmaceuticals  
Features: Uniform particle size  
Regulatory: USP  
Properties: Wh. powd.; 2% max. retained on 
200 mesh US Standard Sieve (74 μ)  
Powdered NF  
Chem. Descrip.: Corn starch See Corn (Zea mays) starch  
Chem. Analysis: 13.5% max. moisture content  
CAS 9005-25-8; EINECS/ELINCS 232-679-6  
Uses: Filler, binder, disintegrant and dusting 
powder in pharmaceuticals  
Features: Uniform particle size  
Properties: Wh. to off-wh. powd.; 2% max. 
retained on 200 mesh US Standard Sieve (74 μ)  
Powdered 10 NF  
Chem. Descrip.: Corn starch See Corn (Zea mays) starch  
Chem. Analysis: 10% max. moisture content  
CAS 9005-25-8; EINECS/ELINCS 232-679-6  
Uses: Filler, binder, disintegrant and dusting 
powder in pharmaceuticals  
Features: Uniform particle size  
Regulatory: NF  
Properties: Wh. to off-wh. powd.; 2% max. 
retained on 200 mesh US Standard Sieve (74 μ)  
Powdered 7.5 NF  
Chem. Descrip.: Corn starch See Corn (Zea mays) starch  
Chem. Analysis: 7.5% max. moisture content  
CAS 9005-25-8; EINECS/ELINCS 232-679-6  
Uses: Filler, binder, disintegrant and dusting 
powder in pharmaceuticals  
Features: Uniform particle size  
Regulatory: NF  
Properties: Wh. to off-wh. powd.; 2% max. 
retained on 200 mesh US Standard Sieve (74 μ)  
Powdered GP USP  
Chem. Descrip.: Corn starch See Corn (Zea mays) starch  
CAS 9005-25-8; EINECS/ELINCS 232-679-6  
Uses: Topical starch dusting powder in 
pharmaceuticals  
Features: Uniform particle size  
Regulatory: USP  
Properties: Wh. powd.; 2% max. retained on 
200 mesh US Standard Sieve (74 μ)  
Powdered NF  
Chem. Descrip.: Corn starch See Corn (Zea mays) starch  
Chem. Analysis: 13.5% max. moisture content  
CAS 9005-25-8; EINECS/ELINCS 232-679-6  
Uses: Filler, binder, disintegrant and dusting 
powder in pharmaceuticals  
Features: Uniform particle size  
Properties: Wh. to off-wh. powd.; 2% max. 
retained on 200 mesh US Standard Sieve (74 μ) |
Trade Name Reference

mucilaginous taste; insol. in cold water, slowly sol. in hot water, completely sol. in boiling water; insol. in alcohol and most org. solvs.

**Powdered Agar Agar Type K-80**  [Gumix Int’l.]
Chem. Descrip.: Agar agar
CAS 9002-18-0; EINECS/ELINCS 232-658-1
Uses: Geliant, suspending agent, emulsifier, bulking agent for slow-release capsules, suppositories, surgical lubricants, emulsions; carrier for topical medicaments; excipient, disintegrant in tablets; laxatives; barium sulfate (radiology); dental use
Properties: Wh. to pale yel. powd., sl. char. odor, mucilaginous taste; insol. in cold water, slowly sol. in hot water, completely sol. in boiling water; insol. in alcohol and most org. solvs.

**Powdered Agar Agar Type K-100**  [Gumix Int’l.]
Chem. Descrip.: Agar agar
CAS 9002-18-0; EINECS/ELINCS 232-658-1
Uses: Geliant, suspending agent, emulsifier, bulking agent for slow-release capsules, suppositories, surgical lubricants, emulsions; carrier for topical medicaments; excipient, disintegrant in tablets; laxatives; barium sulfate (radiology); dental use
Properties: Wh. to pale yel. powd., sl. char. odor, mucilaginous taste; insol. in cold water, slowly sol. in hot water, completely sol. in boiling water; insol. in alcohol and most org. solvs.

**Powdered Agar Agar Type K-150**  [Gumix Int’l.]
Chem. Descrip.: Agar agar
CAS 9002-18-0; EINECS/ELINCS 232-658-1
Uses: Geliant, suspending agent, emulsifier, bulking agent for slow-release capsules, suppositories, surgical lubricants, emulsions; carrier for topical medicaments; excipient, disintegrant in tablets; laxatives; barium sulfate (radiology); dental use
Properties: Wh. to pale yel. powd., sl. char. odor, mucilaginous taste; insol. in cold water, slowly sol. in hot water, completely sol. in boiling water; insol. in alcohol and most org. solvs.

**Powdered Guar Gum Type AA**  [Gumix Int’l.]
Chem. Descrip.: Guar gum  See Guar (Cyanopsis tetragonoloba) gum
CAS 9000-30-0; EINECS/ELINCS 232-536-8
Uses: Thickener, visc. modifier, water-binder, stabilizer, lubricant for pharmaceuticals (appetite depressant, disintegrant and binder in compressed tablets)
Properties: Wh. to ylsh. powd., nearly odorless, bland taste; disp. in cold or hot water; insol. in org. solvs.

**Powdered Guar Gum Type B**  [Gumix Int’l.]
Chem. Descrip.: Guar gum  See Guar (Cyanopsis tetragonoloba) gum
CAS 9000-30-0; EINECS/ELINCS 232-536-8
Uses: Thickener, visc. modifier, water-binder, stabilizer, lubricant for pharmaceuticals (appetite depressant, disintegrant and binder in compressed tablets)
Properties: Wh. to ylsh. powd., nearly odorless, bland taste; disp. in cold or hot water; insol. in org. solvs.

**Powdered Guar Gum Type BB**  [Gumix Int’l.]
Chem. Descrip.: Guar gum  See Guar (Cyanopsis tetragonoloba) gum
CAS 9000-30-0; EINECS/ELINCS 232-536-8
Uses: Thickener, visc. modifier, water-binder, stabilizer, lubricant for pharmaceuticals (appetite depressant, disintegrant and binder in compressed tablets)
Properties: Wh. to ylsh. powd., nearly odorless, bland taste; disp. in cold or hot water; insol. in org. solvs.

**Powdered Gum Arabic Type B-100 NF**  Premium  [Gumix Int’l.]
Chem. Descrip.: Gum Arabic  See Acacia
CAS 9000-01-5; EINECS/ELINCS 232-519-5
Uses: Protective colloid, stabilizer, suspending agent, visc. builder for pharmaceuticals (suspensions, emulsions, demulcent in cough drops/syrups, tablet binder/adhesive); flavoring agent
Properties: Powd., almost odorless and tasteless; sol. in hot or cold water

**Powdered Gum Arabic Type B-200 NF**  Premium  [Gumix Int’l.]
Chem. Descrip.: Gum Arabic  See Acacia
CAS 9000-01-5; EINECS/ELINCS 232-519-5
Uses: Protective colloid, stabilizer,
suspension agent, visc. builder for pharmaceuticals (suspensions, emulsions, demulcent in cough drops/syrups, tablet binder/adhesive); flavoring agent

**Properties:** Powd., almost odorless and tasteless; sol. in hot or cold water

**Powdered Gum Ghatti #1**  [Frutarom http://www.frutarom.com]

**Chem. Descrip.:** Gum ghatti

**CAS 9000-28-6**

**Uses:** Stabilizer, binder, emulsifier forming o/w emulsions; tablet binder and thick mucilage coatings in pharmaceuticals

**Properties:** Off-wh. to lt. amber gum; 99% through 80 mesh, ≥ 90% through 100 mesh; visc. ≥ 100 cps (5%)

**Powdered Gum Ghatti G-1**  [Importers Service http://www.iscgums.com]

**Chem. Descrip.:** Gum ghatti

**Chem. Analysis:** 15% max. moisture; 3.6% max. total ash, 2.5% acid insol. residue

**CAS 9000-28-6**

**Uses:** Emulsifier, suspending agent, emulsion stabilizer for pharmaceuticals

**Features:** Low ash

**Properties:** Lt. brn. free-flowing powd., odorless; 99.9% min. through 80 mesh, 98% min. through 140 mesh; visc. 200 cps min. (5%); pH 4.5-5.2 (5%)

**Powdered Gum Karaya Superfine #1 FCC**  [Frutarom http://www.frutarom.com]

**Chem. Descrip.:** Karaya gum FCC See Karaya (Sterculia urens) gum

**CAS 9000-36-6; EINECS/ELINCS 232-539-4**

**Uses:** Stabilizer, water binder, emulsifier in pharmaceuticals (bulk laxatives, denture adhesives)

**Properties:** Water-sol.

**Powdered Gum Karaya Superfine XXXX FCC**  [Frutarom http://www.frutarom.com]

**Chem. Descrip.:** Karaya gum NF/FCC See Karaya (Sterculia urens) gum

**CAS 9000-36-6; EINECS/ELINCS 232-539-4**

**Uses:** Stabilizer, water binder, emulsifier in pharmaceuticals (bulk laxatives, denture adhesives)

**Properties:** Powd.; 100% through 80 mesh, ≥ 60% through 200 mesh; swells rapidly in hot or cold water; insol. in alcohol; visc. ≥ 200 cps (1%); pH 4.4-4.8

**Powdered Gum Tragacanth BP**  [Gumix Int'l.]

**Chem. Descrip.:** Tragacanth gum See Tragacanth (Astragalus gummifer) gum

**CAS 9000-65-1; EINECS/ELINCS 232-552-5**

**Uses:** Emulsifier, suspending agent, thickener, stabilizer, binder in pharmaceuticals (emulsions, jellies, creams, toothpaste)

**Properties:** Ylsh. wh. to tan powd., odorless, insipid taste; swells rapidly in hot or cold water; insol. in alcohol, other org. solvs.

**Powdered Gum Tragacanth T-150**  [Importers Service http://www.iscgums.com]

**Chem. Descrip.:** Gum tragacanth USP/NF/FCC See Tragacanth (Astragalus gummifer) gum

**CAS 9000-65-1; EINECS/ELINCS 232-552-5**

**Uses:** Thickener, visc. control agent, emulsifier in pharmaceuticals (emulsions, ointments)

**Features:** Low insol. matter

**Properties:** Off-wh. free-flowing powd., bland mucilaginous odor and taste; 95% min. through 140 mesh, 65% min. through 200 mesh; visc. 1000 cps min. (1%); pH 5-6 (1%); 15% max. moisture

**Powdered Gum Tragacanth T-200**  [Importers Service http://www.iscgums.com]

**Chem. Descrip.:** Gum tragacanth USP/NF/FCC See Tragacanth (Astragalus gummifer) gum

**CAS 9000-65-1; EINECS/ELINCS 232-552-5**

**Uses:** Thickener, visc. control agent, emulsifier in pharmaceuticals (emulsions, ointments)

**Features:** Low insol. matter

**Properties:** Lt. cream to lt. yel. free-flowing powd., bland mucilaginous odor and taste; 95% min. through 140 mesh, 65% min. through 200 mesh; visc. 700 cps min. (1%); pH 5-6 (1%); 15% max. moisture

**Powdered Gum Tragacanth T-300**  [Importers Service http://www.iscgums.com]

**Chem. Descrip.:** Gum tragacanth USP/NF/FCC See Tragacanth (Astragalus gummifer) gum

**CAS 9000-65-1; EINECS/ELINCS 232-552-5**

**Uses:** Thickener, visc. control agent, emulsifier in pharmaceuticals (emulsions, ointments)

**Features:** Low insol. matter

**Properties:** Lt. cream to lt. yel. free-flowing powd., bland mucilaginous odor and taste; 95% min. through 140 mesh, 65% min. through 200 mesh; visc. 490 cps min. (1%); pH 5-6 (1%); 15% max. moisture
## Powdered Gum Tragacanth T-400

**Importers Service** [http://www.iscgums.com](http://www.iscgums.com)

**Chem. Descrip.:** Gum tragacanth USP/NF/FCC  
[See Tragacanth (Astragalus gummifer) gum](CAS 9000-65-1; EINECS/ELINCS 232-552-5)

**Uses:** Thickener, visc. control agent, emulsifier in pharmaceuticals (emulsions, ointments)

**Features:** Low insol. matter

**Properties:** Lt. cream to lt. yel. free-flowing powd., bland mucilaginous odor and taste; 95% min. through 140 mesh, 65% min. through 200 mesh; visc. 350 cps min. (1%); pH 5-6 (1%); 15% max. moisture

## Powdered Gum Tragacanth T-500

**Importers Service** [http://www.iscgums.com](http://www.iscgums.com)

**Chem. Descrip.:** Gum tragacanth USP/NF/FCC  
[See Tragacanth (Astragalus gummifer) gum](CAS 9000-65-1; EINECS/ELINCS 232-552-5)

**Uses:** Thickener, visc. control agent, emulsifier in pharmaceuticals (emulsions, ointments)

**Features:** Low insol. matter

**Properties:** Lt. cream to lt. yel. free-flowing powd., bland mucilaginous odor and taste; 95% min. through 140 mesh, 65% min. through 200 mesh; visc. 280 cps min. (1%); pH 5-6 (1%); 15% max. moisture

## Powdered Gum Tragacanth Type B-1 NF

**Premium** [Gumix Int’l.]

**Chem. Descrip.:** Tragacanth gum  
[See Tragacanth (Astragalus gummifer) gum](CAS 9000-65-1; EINECS/ELINCS 232-552-5)

**Uses:** Emulsifier, suspending agent, thickener, stabilizer, binder in pharmaceuticals (emulsions, jellies, creams, toothpaste)

**Properties:** Ylsh. wh. to tan powd., odorless, insipid taste; swells rapidly in hot or cold water; insol. in alcohol, other org. solvs.

## Powdered Gum Tragacanth Type B-12 NF

**Premium** [Gumix Int’l.]

**Chem. Descrip.:** Tragacanth gum  
[See Tragacanth (Astragalus gummifer) gum](CAS 9000-65-1; EINECS/ELINCS 232-552-5)

**Uses:** Emulsifier, suspending agent, thickener, stabilizer, binder in pharmaceuticals (emulsions, jellies, creams, toothpaste)

**Properties:** Ylsh. wh. to tan powd., odorless, insipid taste; swells rapidly in hot or cold water; insol. in alcohol, other org. solvs.

## Powdered Gum Tragacanth Type C-5 NF

**Premium** [Gumix Int’l.]

**Chem. Descrip.:** Tragacanth gum  
[See Tragacanth (Astragalus gummifer) gum](CAS 9000-65-1; EINECS/ELINCS 232-552-5)

**Uses:** Emulsifier, suspending agent, thickener, stabilizer, binder in pharmaceuticals (emulsions, jellies, creams, toothpaste)

**Properties:** Ylsh. wh. to tan powd., odorless, insipid taste; swells rapidly in hot or cold water; insol. in alcohol, other org. solvs.

## Powdered Gum Tragacanth Type G-1 NF

**Premium** [Gumix Int’l.]

**Chem. Descrip.:** Tragacanth gum  
[See Tragacanth (Astragalus gummifer) gum](CAS 9000-65-1; EINECS/ELINCS 232-552-5)

**Uses:** Emulsifier, suspending agent, thickener, stabilizer, binder in pharmaceuticals (emulsions, jellies, creams, toothpaste)

**Properties:** Ylsh. wh. to tan powd., odorless, insipid taste; swells rapidly in hot or cold water; insol. in alcohol, other org. solvs.

## Powdered Gum Tragacanth Type G-2 NF

**Premium** [Gumix Int’l.]

**Chem. Descrip.:** Tragacanth gum  
[See Tragacanth (Astragalus gummifer) gum](CAS 9000-65-1; EINECS/ELINCS 232-552-5)

**Uses:** Emulsifier, suspending agent, thickener, stabilizer, binder in pharmaceuticals (emulsions, jellies, creams, toothpaste)

**Properties:** Ylsh. wh. to tan powd., odorless, insipid taste; swells rapidly in hot or cold water; insol. in alcohol, other org. solvs.

## Powdered Gum Tragacanth Type G-2S NF

**Premium** [Gumix Int’l.]

**Chem. Descrip.:** Tragacanth gum  
[See Tragacanth (Astragalus gummifer) gum](CAS 9000-65-1; EINECS/ELINCS 232-552-5)

**Uses:** Emulsifier, suspending agent, thickener, stabilizer, binder in pharmaceuticals (emulsions, jellies, creams, toothpaste)

**Properties:** Ylsh. wh. to tan powd., odorless, insipid taste; swells rapidly in hot or cold water; insol. in alcohol, other org. solvs.

## Powdered Gum Tragacanth Type M-3 NF

**Premium** [Gumix Int’l.]

**Chem. Descrip.:** Tragacanth gum  
[See Tragacanth (Astragalus gummifer) gum](CAS 9000-65-1; EINECS/ELINCS 232-552-5)

**Uses:** Emulsifier, suspending agent, thickener, stabilizer, binder in pharmaceuticals (emulsions, jellies, creams, toothpaste)

**Properties:** Ylsh. wh. to tan powd., odorless, insipid taste; swells rapidly in hot or cold water; insol. in alcohol, other org. solvs.
Trade Name Reference
CAS 9000-65-1; EINECS/ELINCS 232-552-5
Uses: Emulsifier, suspending agent, thickener, stabilizer, binder in pharmaceuticals (emulsions, jellies, creams, toothpaste)
Properties: Ylsh. wh. to tan powd., odorless, insipid taste; swells rapidly in hot or cold water; insol. in alcohol, other org. solvs.

Powdered Locust Bean Gum Type D-200
[Frutarom http://www.frutarom.com]
Chem. Descrip.: Locust bean gum FCC  See Locust bean (Ceratonia siliqua) gum
CAS 9000-40-2; EINECS/ELINCS 232-541-5
Uses: Excipient for pharmaceutical tablets; thickener for toothpaste
Properties: Water-sol.

Powdered Tragacanth Gum Type E-1
[Frutarom http://www.frutarom.com]
Chem. Descrip.: Tragacanth gum  See Tragacanth (Astragalus gummifier) gum
CAS 9000-65-1; EINECS/ELINCS 232-552-5
Uses: Thickener, water binder, suspending agent, emulsifier for medicinal emulsions, pharmaceutical jellies and creams
Properties: Water-sol.

Powdered Tragacanth Gum Type L
[Frutarom http://www.frutarom.com]
Chem. Descrip.: Tragacanth gum  See Tragacanth (Astragalus gummifier) gum
CAS 9000-65-1; EINECS/ELINCS 232-552-5
Uses: Thickener, water binder, suspending agent, emulsifier for medicinal emulsions, pharmaceutical jellies and creams
Properties: Water-sol.

Powdered Tragacanth Gum Type W
[Frutarom http://www.frutarom.com]
Chem. Descrip.: Tragacanth gum NF  See Tragacanth (Astragalus gummifier) gum
CAS 9000-65-1; EINECS/ELINCS 232-552-5
Uses: Thickener, water binder, suspending agent, emulsifier for medicinal emulsions, pharmaceutical jellies and creams
Properties: Wh. to cream-wh. fine powd., 100% through 80 mesh; visc. 420-520 cps (1%); pH 4.8-5.8

Precirol ATO 5  [Gattefosse France http://www.gattefosse.fr]
Chem. Descrip.: Tripalmitin and tristearin
Uses: Excipient, tableting agent, binder, lubricant, stabilizer for solid/semisolid pharmaceuticals, sustained release; controlled-release agent for short half-life
Features: Lipophilic; protects the drug, improves stability of the dosage form
Regulatory: EP compliance; FDA 21 CFR §184.1329 GRAS, FCC, Japanese Stds. of Food Addit.; CMF no. 5116
Properties: Wh. to off-wh. fine powd.; faint odor; m.p. 53-57 C; HLB 2.0; acid no. < 6; iodine no. < 3; sapon. no. 175-195; nonionic; 100% conc.
Use Level: 1-3% (lubricant for tablets/capsules); 10-25% (controlled release in tablets); 2-6% (taste masking)
Toxicology: LD50 (oral, rat) > 6 g/kg

Premium Powdered Gum Arabic  [Importers Service http://www.iscgums.com]
Chem. Descrip.: Gum Arabic  See Karaya (Sterculia urens) gum
CAS 9000-01-5; EINECS/ELINCS 232-519-5
Uses: Emulsifier and tablet binder esp. for slugging operations; emulsion stabilizer in flavors
Features: Low bacteria count; low visc.
Properties: Off-wh. to buff free-flowing powd., odorless, tasteless; 98% min. through 140 mesh; pH 4-4.8 (20%); 15% max. moisture

Premium Powdered Gum Karaya No. 1 Special  [Importers Service http://www.iscgums.com]
Chem. Descrip.: Karaya gum  See Karaya (Sterculia urens) gum
CAS 9000-36-6; EINECS/ELINCS 232-539-4
Uses: Visc. control agent in dental adhesives; particle size control agent and visc. control agent in ostomy seals
Features: Low insol. matter; lt. color
Properties: Buff to lt. tan free-flowing powd., faint acetic acid-like odor; 99% min. through 80 mesh; visc. 300 cps min. (1%), 7000 cps min. (2%); pH 4.3-5.0 (1%); 19% max. moisture

Handbook of Pharmaceutical Additives, Third Edition 574
Trade Name Reference

**Premium Powdered Gum Karaya No. 2**
[Importers Service
http://www.iscgums.com]
Chem. Descrip.: Karaya gum See Karaya (Sterculia urens) gum
CAS 9000-36-6; EINECS/ELINCS 232-539-4
Uses: Visc. control agent in dental adhesives; particle size control agent and visc. control agent in ostomy seals
Features: Low insol. matter; lt. color
Properties: Buff to lt. brn. free-flowing powd., faint acetic acid-like odor; 99% min. through 80 mesh; visc. 300 cps min. (1%), 6000 cps min. (2%); pH 4.3-5.0 (1%); 19% max. moisture

**Premium Powdered Gum Karaya No. 2 HV**
[Importers Service
http://www.iscgums.com]
Chem. Descrip.: Karaya gum See Karaya (Sterculia urens) gum
CAS 9000-36-6; EINECS/ELINCS 232-539-4
Uses: Visc. control agent in dental adhesives; particle size control agent and visc. control agent in ostomy seals
Features: Low insol. matter; lt. color
Properties: Tan to lt. brn. free-flowing powd., faint acetic acid-like odor; 99% min. through 80 mesh; visc. 500 cps min. (1%), 8000 cps min. (2%); pH 4.3-5.0 (1%); 19% max. moisture

**Premium Powdered Gum Karaya No. 3**
[Importers Service
http://www.iscgums.com]
Chem. Descrip.: Karaya gum See Karaya (Sterculia urens) gum
CAS 9000-36-6; EINECS/ELINCS 232-539-4
Uses: Visc. control agent in dental adhesives; particle size control agent and visc. control agent in ostomy seals
Features: Low insol. matter; lt. color
Properties: Tan to brn. free-flowing powd., faint acetic acid-like odor; 99% min. through 80 mesh; visc. 200 cps min. (1%), 5000 cps min. (2%); pH 4.3-5.0 (1%); 19% max. moisture

**Preregen®**
[Pentapharm Ltd
http://www.pentapharm.com; Centerchem
http://www.centerchem.com]
Chem. Descrip.: Soybean (Glycine soja) protein, oxido reductases (yeast extract)
CAS 9010-10-0; 8013-01-2
Uses: Anti-irritant for skin care
Properties: Pale yel. sl. opalescent sol'n.; sol. in water; sp.gr. 1.064-1.074 (20 C); ref. index 1.3669-1.3672 (25 C); pH 5.2-6.0
Storage: 2 yr. shelf life when stored in the original sealed containers protected from light in a clean and cool place at temps. between 4-10 C; in order to avoid secondary microbial contamination after opening, containers should be handled with special care

**Preventol® SB Extra**
[Bayer AG
Chem. Descrip.: Triclocarban (97% min.) See 3,4,4´-Trichlorocarbanilide
CAS 101-20-2; EINECS/ELINCS 202-924-1
Uses: Act. ingred. for antimicrobial soaps, medicated cleansers, other antibacterial prods.
Properties: Coarse powd.

**Preventol® SB Micronized**
[Bayer AG
Chem. Descrip.: Triclocarban (97% min.) See 3,4,4´-Trichlorocarbanilide
CAS 101-20-2; EINECS/ELINCS 202-924-1
Uses: Act. ingred. for antimicrobial soaps, medicated cleansers, other antibacterial prods.
Properties: Fine micronized powd.

**Pricerine™ 9081**
[Uniqema
http://www.uniqema.com]
Chem. Descrip.: Glycerine See Glycerin
CAS 56-81-5; EINECS/ELINCS 200-289-5
Uses: Humectant in pharmaceuticals
Properties: APHA 10 color; odorless; sp.gr. 1.228; 86.5% min. act.

**Pricerine™ 9083**
[Uniqema
http://www.uniqema.com]
Chem. Descrip.: Glycerine See Glycerin
CAS 56-81-5; EINECS/ELINCS 200-289-5
Uses: Humectant in pharmaceuticals
Properties: APHA 10 color; odorless; sp.gr. 1.262; 99.5% min. act.

**Pricerine™ 9088**
[Uniqema
http://www.uniqema.com; Uniqema Am.
http://www.uniqema.com]
Chem. Descrip.: Glycerin USP
CAS 56-81-5; EINECS/ELINCS 200-289-5
Uses: Tonicity agent, emollient, humectant for pharmaceuticals
Regulatory: TDG, DOT not regulated; Canada, Australia, EU, USA, Japan, China, Korea, Philippines compliant
Properties: APHA 10 max. color, odorless; miscible in water; insol. in ether and chloroform; sp.gr. 1.2608 min.; b.p. 290 C;
Trade Name Reference

flash pt. (OC) 177 C; 99.5% min. act.
Toxicology: OSHA PEL 15 mg/m³ TWA (total dust); LD50 (oral, rat) >25,000 mg/kg; nonirritant to eyes, by ing., and inh.
Precaution: Avoid generation of mist and strong oxidizing agents
Hazardous Decomp. Prods.: Acrolein
Storage: Store in the original closed containers under dry conditions; hygroscopic

Pricerine™ 9091 [Uniqema http://www.uniqema.com]
Chem. Descrip.: Vegetable grade glycerin
CAS 56-81-5; EINECS/ELINCS 200-289-5
Uses: Humectant in pharmaceuticals
Regulatory: SARA §311/312 Immediate Hazard, §313 nonreportable; TDG, DOT not regulated; Canada, Australia, EU, USA, Japan, China, Korea, Philippines compliant
Properties: APHA 10 color; liq. odorless; misc. in ethanol; sl. sol. in acetone; insol. in ether and in chloroform; sp.gr. 1.262; b.p. 290 C; flash pt. (OC) 177 C; pH ≈ 7; 99.5% min. act.
Toxicology: OSHA PEL 15 mg/m³ TWA (total dust); LD50 (oral, rat) >25,000 mg/kg; nonirritant to eyes, by ing., and inh.
Environmental: BOD (5 d) 86%; LC50 (96 h, fish) > 5000 mg/l; low toxicity to aquatic organisms
Precaution: Wear safety glasses with side shields and impervious gloves; avoid strong oxidizing agents
HMIS: Health 0, Flammability 1, Reactivity 0
Storage: Store in the original closed containers under dry conditions; hygroscopic

Pricerine™ 9098 [Uniqema http://www.uniqema.com]
Chem. Descrip.: Glycerine See Glycerin
CAS 56-81-5; EINECS/ELINCS 200-289-5
Uses: Pharmaceuticals
Properties: APHA 15 color; sp.gr. 1.263; 99.7% min. act.

Pricerine™ 9099 [Uniqema http://www.uniqema.com]
Chem. Descrip.: Glycerin
CAS 56-81-5; EINECS/ELINCS 200-289-5
Uses: Solvent, humectant, bodying agent in pharmaceuticals
Regulatory: TDG, DOT not regulated; Canada, Australia, EU, USA, Japan, China, Korea, Philippines compliant
Properties: APHA 10 color; liq. odorless; miscible in water and ethanol; sl. sol. in acetone; insol. in ether and chloroform; sp.gr. 1.263; b.p. 290 C; flash pt. (OC) 177 C; pH ≈ 7; 99.7% min. act.
Toxicology: OSHA PEL 15 mg/m³ TWA (total dust); LD50 (oral, rat) >25,000 mg/kg; nonirritant to eyes, by ing., and inh.
Environmental: BOD (5 d) 86%; LC50 (96 h, fish) > 5000 mg/l; low toxicity to aquatic organisms
Precaution: Wear safety glasses with side shields and PVC gloves; avoid strong oxidizing agents
HMIS: Health 0, Flammability 1, Reactivity 0
Storage: Store in the original closed containers under dry conditions; hygroscopic

Chem. Descrip.: Croscarmellose sodium
Chem. Analysis: ≤ 7.0% loss on drying
CAS 74811-65-7
Uses: Disintegrant for pharmaceutical tablets (direct compression and wet granulation)
Features: Rapid water penetration into tablets
Regulatory: USP/NF, EP, JP, DMF 9662
Properties: Fine wh. powd.; pH 5.0-7.0
Storage: Store @5-25 C and a rel. humidity of 70% max.

Primojel® [DMV Int'l. Pharma http://www.dmv-international.com]
Chem. Descrip.: Sodium starch glycolate
Chem. Analysis: ≤ 6.0% loss on drying
CAS 9063-38-1
Uses: Excipient, disintegrant for tablets and capsules incl. tablet direct compression, wet granulation
Features: High swelling power; high disintegrating rate and efficiency; takes up 23 times its wt. in water
Regulatory: USP/NF, EP, JPE, DMF 3015
Properties: Fine wh. powd., bulk dens. 0.769 g/cc
Use Level: 2-4% (direct compression)
Storage: Store @5-25 C and a rel. humidity of 70% max.

Prisorine® 3505 [Uniqema http://www.uniqema.com]
Chem. Descrip.: Isostearic acid, cosmetic grade
CAS 2724-58-5; EINECS/ELINCS 220-336-3
Uses: Emollient for pharmaceutical creams and lotions, leaving rich afterfeel
Trade Name Reference

**Regulatory:** Japan approval

**Properties:** APHA 100 max. color; sp.gr. 0.89; visc. 45 mPa•s; acid no. 190-197; iodine no. 2 max.; sapon. no. 193-200; cloud pt. 8 C; flash pt. 175 C; ref. index 1.452; 0.2% max. water

**Prisorine® 3515** [Uniqema
http://www.uniqema.com]
Chem. Descrip.: Isostearyl alcohol
CAS 27458-93-1; EINECS/ELINCS 248-470-8
Uses: Emollient for pharmaceuticals
Features: Stable, will not turn rancid or increase in color or odor

**Pro D.S.B.®** [Exsymol
http://www.exsymol.com]
Chem. Descrip.: Dimethyl oxobenzodioxasilane, octyl palmitate
Uses: Anti-inflammatory, moisturizer, tissue regenerator for makeup prods., anti-aging and restructuring prods.
Properties: Yel. limpid to sl. opalescent liq.; misc. with oils; hydrolyzes rapidly in presence of water, alcohols, glycols; ref. index 1.451
Use Level: < 1%
Toxicology: Nontoxic, nonirritant

**ProEm™ 100** [Avatar
http://www.avatarcorp.com]
Chem. Descrip.: Mono-/diglycerides
Chem. Analysis: α monoglycerides [42%] and diglycerides
Uses: W/o emulsifier in pharmaceuticals
Regulatory: 21CFR 184.1505 (GRAS), kosher
Properties: Wh. to yel. semisolid; m.p. 80-85 F

**ProEm™ 300** [Avatar
http://www.avatarcorp.com]
Chem. Descrip.: Mono-/diglycerides
Chem. Analysis: α monoglycerides [46%] and diglycerides
Uses: W/o and o/w emulsifier in pharmaceuticals
Regulatory: 21CFR 184.1505 (GRAS), kosher
Properties: Cl. yel. liq.; m.p. 70 F

**ProEm™ 74** [Avatar
http://www.avatarcorp.com]
Chem. Descrip.: Mono-/diglycerides
Chem. Analysis: α monoglycerides [42%] and diglycerides
Uses: W/o and o/w emulsifier in

**Probenz® PG** [Velsicol
http://www.velsicol.com]
Chem. Descrip.: Potassium benzoate FCC
CAS 582-25-2; EINECS/ELINCS 209-481-3
Uses: Preservative in pharmaceuticals
Regulatory: GRAS, DOT nonregulated
Properties: Wh. cryst. powd.; odorless; easily sol. in cold water; very sl. sol. in methanol; m.w. 160.22; sp.gr. 1.5; b.p. > 300 C; 100% act.
Toxicology: LD50 (oral, rat) > 4800 mg/kg; may cause eye, skin, respiratory tract irritation
Precaution: May be slippery when wet; may be combustible at high temps.; may form explosive dust-air mixts.; incompat. with ferric salts, acids, oxidizers; use splash goggles, lab coat, gloves
Hazardous Decomp. Prods.: Compds. of C, H, N, and O, pungent fumes; combustion prods.: CO, CO2
HMIS: Health 1, Flammability 1, Reactivity 0
Storage: Hygroscopic; store in ventilated area away from ignition sources

**Procetyl AWS** [Croda Inc
http://www.croda.com; http://www.crodausa.com; Croda Chem. Europe Ltd http://www.croda.co.uk]
Chem. Descrip.: PPG-5-ceteth-20
CAS 9087-53-0
Uses: Solvent, emollient, and humectant in topical pharmaceuticals; emulsifier, plasticizer, coupling agent, humectant, dispersant, emollient, and fragrance solubilizer in aq. and aq. alcoholic systems, antiperspirants
Properties: Water-wh. turbid oily liq.; char. sweet odor; sol. in water, alcohol, IPM, PEG-200, glycerin, propylene glycol, lanolin oil; acid no. 1 max.; hyd. no. 35-50; HLB 16.0; pH 6.0-7.5
Trade Name Reference

(30% aq.); nonionic; 100% act.
Use Level: 0.5-5%

**Procoat AFC** [Libraw Pharma http://www.pharma-excipients.com]

**Uses:** Instant coating for pharmaceutical aq., hydroalcoholic, or solvent-based film coated preps. including moisture-sensitive drugs (calcium carbonate, Ibuprofen, certrizine, famotidine, ayurvedic prods., ranitidine, vitamins, ethambotul, rifampicin); other medications (diltiazem, norfloxacin, ciprofloxacin, metroniadazole, tinidazole, ornidazole, chloroquine phosphate, roxithromycin, azithromycin, gatifloxacin, erythromycin, cimetidine, levofoxacin, sildinafil citrate)

**Features:** High-solid content for spray apps., reducing process time; smooth, shiny film

**Properties:** Powd.

**Use Level:** 1.2-2.0% use level

**Storage:** Store in cool, dry place in tightly closed containers

**Procoat AWT** [Libraw Pharma http://www.pharma-excipients.com]

**Chem. Descrip.:** Cellulose acetate phthalate-based

**Uses:** Instant coating for pharmaceutical preps including moisture-sensitive drugs (calcium carbonate, Ibuprofen, certrizine, famotidine, ayurvedic prods., ranitidine, vitamins, ethambotul, rifampicin); other medications (diltiazem, norfloxacin, ciprofloxacin, metroniadazole, tinidazole, ornidazole, chloroquine phosphate, roxithromycin, azithromycin, gatifloxacin, erythromycin, cimetidine, levofoxacin, sildinafil citrate)

**Features:** High-solid content for spray apps., reducing process time; smooth, shiny film

**Properties:** Wh. powd.

**Use Level:** 1.2-2.0% use level

**Storage:** Store in cool, dry place in tightly closed containers

**Procoat ECC** [Libraw Pharma http://www.pharma-excipients.com]

**Chem. Descrip.:** Cellulose acetate phthalate-based

**Uses:** Instant coating for pharmaceutical solvent-based enteric preps. including moisture-sensitive drugs (calcium carbonate, Ibuprofen, certrizine, famotidine, ayurvedic prods., ranitidine, vitamins, ethambotul, rifampicin); other medications (diltiazem, norfloxacin, ciprofloxacin, metroniadazole, tinidazole, ornidazole, chloroquine phosphate, roxithromycin, azithromycin, gatifloxacin, erythromycin, cimetidine, levofoxacin, sildinafil citrate)

**Features:** High-solid content for spray apps., reducing process time; smooth, shiny film

**Use Level:** 6-8% use level

**Storage:** Store in cool, dry place in tightly closed containers

**Procoat ECM** [Libraw Pharma http://www.pharma-excipients.com]

**Chem. Descrip.:** Methacrylic acid copolymer-based

**Uses:** Instant coating for pharmaceutical preps including moisture-sensitive drugs (calcium carbonate, Ibuprofen, certrizine, famotidine, ayurvedic prods., ranitidine, vitamins, ethambotul, rifampicin); other medications (diltiazem, norfloxacin, ciprofloxacin, metroniadazole, tinidazole, ornidazole, chloroquine phosphate, roxithromycin, azithromycin, gatifloxacin, erythromycin, cimetidine, levofoxacin, sildinafil citrate)

**Features:** High-solid content for spray apps., reducing process time; smooth, shiny film

**Use Level:** 6-8% use level

**Storage:** Store in cool, dry place in tightly closed containers

**Procoat FCS** [Libraw Pharma http://www.pharma-excipients.com]

**Uses:** Instant coating for pharmaceutical aq., hydroalcoholic, or solvent-based film coated preps. including moisture-sensitive drugs (calcium carbonate, Ibuprofen, certrizine, famotidine, ayurvedic prods., ranitidine, vitamins, ethambotul, rifampicin); other medications (diltiazem, norfloxacin, ciprofloxacin, metroniadazole, tinidazole, ornidazole, chloroquine phosphate, roxithromycin, azithromycin, gatifloxacin, erythromycin, cimetidine, levofoxacin, sildinafil citrate)
Trade Name Reference

drugs (calcium carbonate, Ibuprofen, certrizine, famotidine, ayurvedic prods., ranitidine, vitamins, ethambutol, rifampicin); other medications (diltiazem, norfloxacin, ciprofloxacin, metroniadazole, tinidazole, ornidazole, chloroquine phosphate, roxithromycin, azithromycin, gatifloxacin, erythromycin, cimetidine, levofloxacin, sildinafil citrate)

Features: High-solid content for spray applics., reducing process time; smooth, shiny film
Properties: Powd.
Use Level: 1.5-2.5% use level for solvent systems; 1.2-2.0% use level for aq. systems
Storage: Store in cool, dry place in tightly closed containers

Uses: Instant coating for pharmaceutical preps including moisture-sensitive drugs (calcium carbonate, Ibuprofen, certrizine, famotidine, ayurvedic prods., ranitidine, vitamins, ethambutol, rifampicin); other medications (diltiazem, norfloxacin, ciprofloxacin, metroniadazole, tinidazole, ornidazole, chloroquine phosphate, roxithromycin, azithromycin, gatifloxacin, erythromycin, cimetidine, levofloxacin, sildinafil citrate); stabilizes pharmaceuticals
Features: High-solid content for spray applics., reducing process time; smooth, shiny film
Use Level: 3-5% use level
Storage: Store in cool, dry place in tightly closed containers

Procoat SFC [Libraw Pharma http://www.pharma-excipients.com]

Uses: Instant coating for pharmaceutical solvent-based film coated preps. including moisture-sensitive drugs (calcium carbonate, Ibuprofen, certrizine, famotidine, ayurvedic prods., ranitidine, vitamins, ethambutol, rifampicin); other medications (diltiazem, norfloxacin, ciprofloxacin, metroniadazole, tinidazole, ornidazole, chloroquine phosphate, roxithromycin, azithromycin, gatifloxacin, erythromycin, cimetidine, levofloxacin, sildinafil citrate)
Features: High-solid content for spray applics., reducing process time; smooth, shiny film
Properties: Powd.
Use Level: Dependent upon the medication
Storage: Store in cool, dry place in tightly closed containers

Uses: Polishing agent for tablets
Features: High-solid content for spray applics., reducing process time; smooth, shiny film
Properties: Powd.
Use Level: 0.5-1.0% use level
Storage: Store in cool, dry place in tightly closed containers

Uses: Instant coating for pharmaceutical sustained release formulations including moisture-sensitive drugs (calcium carbonate, Ibuprofen, certrizine, famotidine, ayurvedic prods., ranitidine, vitamins, ethambutol, rifampicin); other medications (diltiazem, norfloxacin, ciprofloxacin, metroniadazole, tinidazole, ornidazole, chloroquine phosphate, roxithromycin, azithromycin, gatifloxacin, erythromycin, cimetidine, levofloxacin, sildinafil citrate)
Features: High-solid content for spray applics., reducing process time; smooth, shiny film
Properties: Powd.
Use Level: 1.5-2.5% use level for solvent systems; 1.2-2.0% use level for aq. systems
Storage: Store in cool, dry place in tightly closed containers

Procoat UFC [Libraw Pharma http://www.pharma-excipients.com]

Uses: Instant coating for pharmaceutical aq., hydroalcoholic, or solvent-based film coated preps. including moisture-sensitive drugs (calcium carbonate, Ibuprofen, certrizine, famotidine, ayurvedic prods., ranitidine, vitamins, ethambutol, rifampicin); other medications (diltiazem, norfloxacin, ciprofloxacin, metroniadazole, tinidazole, ornidazole, chloroquine phosphate, roxithromycin, azithromycin, gatifloxacin, erythromycin, cimetidine, levofloxacin, sildinafil citrate)
Features: High-solid content for spray applics., reducing process time; smooth, shiny film
Properties: Powd.
Use Level: 1.5-2.5% use level for solvent systems; 1.2-2.0% use level for aq. systems
Storage: Store in cool, dry place in tightly closed containers

Procoat WT [Libraw Pharma http://www.pharma-excipients.com]

Uses: Instant coating for pharmaceutical aq., hydroalcoholic, or solvent-based film...
coated preps. including moisture-sensitive drugs (calcium carbonate, ibuprofen, certrizine, famotidine, ayurvedic prods., ranitidine, vitamins, ethambutol, rifampicin); other medications (diltiazem, norfloxacin, ciprofloxacin, metronidazole, tinidazole, ornidazole, chloroquine phosphate, roxithromycin, azithromycin, gatifloxacin, erythromycin, cimetidine, levofloxacin, sildinafil citrate)

Features: High-solid content for spray applics., reducing process time; smooth, shiny film
Properties: Powd.
Use Level: 1.5-2.5% use level for solvent systems; 1.2-2.0% use level for aq. systems
Storage: Store in cool, dry place in tightly closed containers

Promulgen® D [Noveon
http://www.carbopol.com;
http://www.noveoncoatings.com]
Chem. Descrip.: Cetearyl alcohol and ceteareth-20
Uses: Gellant, o/w emulsifier, emollient, and stabilizer for topical pharmaceuticals
Features: Highly resistant to acidic and alkaline conditions
Properties: Wh. waxy solid; odorless; m.p. 47-55 C; acid no. 1 max.; sapon. no. 2 max.; nonionic; 100% conc.

Promulgen® G [Noveon
http://www.carbopol.com;
http://www.noveoncoatings.com]
Chem. Descrip.: Stearyl alcohol and ceteareth-20
Uses: Gellant, o/w emulsifier, emollient, and stabilizer for topical pharmaceuticals
Features: Highly resistant to acidic and alkaline conditions
Properties: Yel. liq.; sp.gr. 0.848; visc. 35 cps; m.p. 55-63 C; acid no. 1 max.; sapon. no. 2 max.; nonionic; 100% act.

Promyr NF [Noveon
http://www.carbopol.com;
http://www.noveoncoatings.com]
Chem. Descrip.: Isopropyl myristate
Uses: Emollient and solvent for topical pharmaceuticals
Features: Nongreasy rub-in
Properties: Water-wh. low visc. liq.; odorless; oil-sol.; acid no. 1.0 max.; sapon. no. 202-211.

Promyristyl PM-3 [Croda Inc
http://www.croda.com;
http://www.crodausa.com; Croda Chem. Europe Ltd http://www.croda.co.uk]
Chem. Descrip.: PPG-3 myristyl ether
Uses: Solubilizer, coupling agent, emollient for clear analgesics
Features: Low-visc.
Properties: Gardner 1 max. cl. liq.; sol. in ethanol, min. oil, IPM, veg. oil, oleyl alcohol, castor oil, lanolin oil; essentially sol. in volatile silicone fluid; insol. in water, glycerin; acid no. 1 max.; hyd. no. 145-160; nonionic
Use Level: 5-15%

Pronalen® Licorice HSC [Provital; S. Black
http://www.sblack.com]
Chem. Descrip.: Propylene glycol and licorice
Trade Name Reference

extract See Licorice (Glycyrrhiza glabra) extract

Uses: Anti-inflammatory and healing props. in prod. for treatment of irritated or damaged skin

Properties: 1% glycyrrhetic acid

Pronalen® Sensitive Skin [Provital; Centerchem http://www.centerchem.com; S. Black http://www.sblack.com]

Chem. Descrip.: Butylene glycol, aqua, ocimum sanctum, silybum marianum, phenoxyethanol, methylparaben, propylparaben, ethylparaben, butylparaben, isobutylparaben See Lady's thistle (Silybum marianum) extract

Uses: Anti-irritant for skin care, after-sun care

Propylene Glycol USP, FCC [Eastman http://www.eastman.com]

Chem. Descrip.: 1,2-Propanediol See Propylene glycol

CAS 57-55-6; EINECS/ELINCS 200-338-0

Uses: Solvent, humectant, and preservative in pharmaceuticals

Regulatory: FDA 21CFR §184.1666; USDA approved; Kosher

Properties: Colorless cl. visc. liq.; practically odorless; sl. char. taste; completely sol. in water, acetone, ethyl ether, and methanol; m.w. 76.10; sp.gr. 1.0381; dens. 8.64 lb/gal; visc. 60.5 cP (20 C); vapor pressure < 0.1 mm Hg (20 C); f.p. -60 C; b.p. 187 C; flash pt. (TCC) 101 C; ref. index 1.4326 (20 C); 99.5% purity

Toxicology: Low toxicity

Storage: Hygroscopic; overheating for prolonged periods may result in degradation of odor and taste

Chem. Descrip.: Phenoxyisopropanol

CAS 770-35-4; EINECS/ELINCS 212-222-7

Uses: Antiseptic for skin care prod.s., pharmaceuticals

Properties: Colorless sl. visc. liq. with faint pleasant odor; sl. sol. in water; misc. with acetate and ethylene and methanol; m.w. 106.2; sp.gr. 1.0323; dens. 8.55 lb/gal; visc. 10 cP (20 C); vapor pressure < 0.1 mm Hg (20 C); f.p. -60 C; b.p. 187 C; flash pt. (OC) 121 C

Toxicology: LD50 (oral, rat) 2.4 ml/kg, sl. harmful by ing.; produces local anesthetic effect on lips, tongue, mucous membranes; pure material is mod. irritating to skin and eyes; nonirritating to skin @ 5%; nonirritating to eyes @ 1%

Precaution: Very sl. fire risk; no explosion hazard

Storage: Store in orig. container under normal indoor storage conditions; material may solidify at low temps.

Prosolv SMCC™ 50 [JRS Pharma http://www.jrspharma.com]

Chem. Descrip.: Silicified microcrystalline cellulose

CAS 9004-34-6

Uses: Binder, vehicle for pharmaceutical wet granulation and direct compression applics.

Features: Can replace granulations, while significantly reducing excipient numbers and levels

Regulatory: USP/NF, Ph. Eur.. JP

Properties: Wh. to almost wh. fine to granular powd.50 µm median particle size; pract. insol in water, acetone, ethanol, toluene, and dilute acids

Prosolv SMCC™ 90 [JRS Pharma http://www.jrspharma.com]

Chem. Descrip.: Silicified microcrystalline cellulose

CAS 9004-34-6

Uses: Binder, vehicle, flow aid for direct compression of pharmaceutical tablets

Features: Exc. compactibility and flow; can replace granulations, while significantly reducing excipient numbers and levels

Regulatory: USP/NF, Ph. Eur.. JP

Properties: Wh. to almost wh. fine to granular powd.110 µm median particle size; pract. insol in water, acetone, ethanol, toluene, and dilute acids; bulk dens. 0.25-0.37 g.cm3

Prosolv SMCC™ HD90 [JRS Pharma http://www.jrspharma.com]

Chem. Descrip.: Silicified microcrystalline cellulose

CAS 9004-34-6

Uses: Binder, vehicle, flow aid for direct compression of pharmaceutical tablets

Features: Exc. compactibility and flow; can replace granulations, while significantly reducing excipient numbers and levels

Regulatory: USP/NF, Ph. Eur.. JP

Properties: Wh. to almost wh. fine to granular powd.110 µm median particle size; pract. insol in water, acetone, ethanol, toluene, and dilute acids; bulk dens. 0.35-0.50 g.cm3

Protachem™ CTG [Protameen]
Trade Name Reference

http://www.protameen.com; S. Black
http://www.sblack.com
Chem. Descrip.: Caprylic/capric triglyceride
CAS 65381-09-1; EINECS/ELINCS 265-724-3
Uses: Emollient, emulsifier, opacifier, humectant, solubilizer, pigment dispersant, carrier in pharmaceuticals
Features: Occlusive

Protachem™ ES-2 [Protameen
http://www.protameen.com]
Chem. Descrip.: Sodium laureth sulfate
CAS 9004-82-4; EINECS/ELINCS 221-416-0
Uses: Foam stabilizer, detergent, foaming agent, wetting agent, visc. builder for detergents, pharmaceuticals

Protachem™ SMS-NF [Protameen
http://www.protameen.com]
Chem. Descrip.: Sorbitan stearate
CAS 1338-41-6; EINECS/ELINCS 215-664-9
Uses: Emulsifier/thickener for pharmaceuticals prods.
Regulatory: NF
Properties: Sol. in oils, org. solvs.; disp. or insol. in water; HLB 4.7; nonionic

Protacid™ F 120 NM Alginic Acid [FMC Biopolymer
http://www.fmcbiopolymer.com]
Chem. Descrip.: Alginic acid
CAS 9005-32-7; EINECS/ELINCS 232-680-1
Uses: Gellant, film-former, visc. builder, stabilizer for aq. pharmaceuticals; tablet binder and disintegrant; alternative for sustained-release systems; dental impression materials; creates calcium fibers for dermatology and wound healing; enhances treatment of esophageal reflux
Regulatory: GRAS; kosher
Properties: Wh. to ylsh.-wh. free-flowing powd.; odorless; pH 1.5-3.5 (in 3% aq. disp.)
Toxicology: ACGIH TWA 10 mg/m3 (inhalable particulate); LD50 (oral, rat) > 5,000 mg/kg; noncarcinogenic
Environmental: BOD(5) ≈ 400 mg O2/g; COD ≈ 650 mg O2/g
Precaution: Wear monogoggles
Storage: Store in a tight container in a cool, dry place

Protacide™ DMDMH [Protameen
http://www.protameen.com]
Chem. Descrip.: DMDM hydantoin
CAS 6440-58-0; EINECS/ELINCS 229-222-8
Uses: Shelf-life extender for pharmaceuticals

Protacide™ NA2 P [Protameen
http://www.protameen.com]
Chem. Descrip.: Disodium EDTA
CAS 139-33-3; EINECS/ELINCS 205-358-3
Uses: Shelf-life extender for pharmaceuticals

Protacide™ NA3 EDTA [Protameen
http://www.protameen.com]
Chem. Descrip.: Trisodium EDTA
CAS 150-38-9; EINECS/ELINCS 205-758-8
Uses: Shelf-life extender for pharmaceuticals

Protanal® [FMC Biopolymer
http://www.fmcbiopolymer.com]
Chem. Descrip.: Sodium alginate USP/NF, Eur.Ph., BP
See Algin
CAS 9005-38-3
Uses: Gellant, film-former, visc. builder, stabilizer for aq. pharmaceuticals; tablet binder and disintegrant; alternative for sustained-release systems; dental impression materials; creates calcium fibers for dermatology and wound healing; enhances treatment of esophageal reflux
Regulatory: GRAS; kosher

Protaphenone™- 1 [Protameen
http://www.protameen.com]
Chem. Descrip.: Benzophenone-1
CAS 131-56-6; EINECS/ELINCS 205-029-4
Uses: UV-A/B absorber for pharmaceuticals
Properties: Yel. powd.; m.p. 144 C; 98.0 min. assay
Use Level: 0.05-2.0 use level

Protaphenone™- 2 [Protameen
http://www.protameen.com]
Chem. Descrip.: Benzophenone-2
CAS 131-55-5; EINECS/ELINCS 205-028-9
Uses: UV-A/B absorber for pharmaceuticals
Properties: Yel. powd.; m.p. 195-205 C
Use Level: 0.05-2.0 use level

Protectol® KLC 50 [BASF AG
http://www.basf.de]
Chem. Descrip.: Dimethyl-n-(C12/C14)-alkylbenzlammonium chloride
See Benzalkonium chloride
CAS 85409-22-9; EINECS/ELINCS 287-089-1
Uses: Preservative for pharmaceuticals
Regulatory: FDA 21CFR §175.105, 176.300,
Trade Name Reference

178.1010; EP, DAB, BP, USP, JP, MITI, JSCI, and BGA approved

**Properties:** Cl. to ylsh. liq.; sol. in water, 5% sodium hydroxide, 5% HCl, 5% sodium chloride, alcohol, chlorinated hydrocarbons, oil, wh. spirit; dens. 0.98 g/cm³; visc. 80 mPa•s; cloud pt. -4 C; surf. tens. 37 mN/m (1 g/l); pH 6 (1% aq.); cationic; ionic act.

**Use Level:** 0.05-0.2% (wax emulsion); up to 0.5% (chain lubricants); up to 1% (masonry washes); 0.01-0.2% (cosmetics)

**Toxicology:** LD50 (oral, rat) 1500-1600 mg/kg; corrosive to skin and eyes; TSCA listed

**Environmental:** 80% biodeg.

**Protector Gelatin** [Vyse Gelatin http://www.vyse.com]

Chem. Descrip.: Type A pork-skin gelatin, 200 bloom See Gelatin

CAS 9000-70-8; EINECS/ELINCS 232-554-6

Uses: Pharmaceuticals

Features: General purpose; low bloom; low visc.

**Protegin®** [Degussa Care Spec.]

Chem. Descrip.: Mineral oil, petrolatum, ozokerite, glyceryl oleate, lanolin alcohol

Uses: Emollient, w/o emulsifier, absorption base for w/o emulsions, topical pharmaceuticals

Features: Prods. have good freeze/thaw stability and stability at elevated temps.

Regulatory: BfArM registered

Properties: Ivory soft waxy solid; sol. warm in min. oil, sol. warm with sl. turbidity in veg. oils; insol. in water; m.p. 58-65 C; HLB 3.0; acid no. 1 max.; sapon. no. 10-16; hyd. no. 25-38; nonionic; 100% conc.

**Protegin® W** [Degussa Care Spec.]

Chem. Descrip.: Petrolatum, ozokerite, hydrogenated castor oil, glyceryl isostearate, polyglyceryl-3 oleate

Uses: W/o emulsifier, emollient, absorp. base for topical pharmaceuticals

Features: Self-emulsifying; prods. have good freeze/thaw stability and stability at elevated temps.

Regulatory: BfArM registered

Properties: Ivory waxy solid; sol. warm in veg. and min. oils; disp. warm in water; m.p. 75-82 C; HLB 3.0; acid no. 1 max.; sapon. no. 18-28; hyd. no. 18-28; nonionic; 100% conc.

**Protegin® WX** [Degussa Care Spec.]

Chem. Descrip.: Petrolatum, ozokerite, hydrogenated castor oil, glyceryl isostearate, polyglyceryl-3 oleate

Uses: W/o emulsifier, emollient, absorp. base for topical pharmaceuticals

Features: Self-emulsifying; prods. have good freeze/thaw stability and stability at elevated temps.

Regulatory: BfArM registered

Properties: Ivory waxy solid; sol. warm in veg. and min. oils; disp. warm in water; m.p. 75-82 C; HLB 3.0; acid no. 1 max.; sapon. no. 18-28; hyd. no. 18-28; nonionic; 100% conc.

**Protegin® X** [Degussa Care Spec.]

Chem. Descrip.: Mineral oil, petrolatum, ozokerite, glyceryl oleate, lanolin alcohol

Uses: W/o emulsifier, emollient, absorp. base for topical pharmaceuticals

Features: Self-emulsifying; prods. have good freeze/thaw stability and stability at elevated temps.

Regulatory: BfArM registered

Properties: Ivory waxy paste; sol. warm in min. oil, sol. warm with sl. turbidity in veg. oils; insol. in water; m.p. 58-65 C; HLB 3.5; acid no. 1 max.; sapon. no. 27-37; hyd. no. 32-42; nonionic; 100% conc.

**Proteinvit** [Esperis http://www.esperis.it]

Chem. Descrip.: Hydrolyzed wheat protein

Uses: Humectant, emulsifier for pharmaceuticals

**Protelan AG 11** [Zschimmer & Schwarz http://www.zschimmer-schwarz.de]

Chem. Descrip.: Hydrolyzed wheat protein

CAS 70084-87-6; EINECS/ELINCS 305-225-0

Uses: Aid in mycotic skin disorders and dandruff regulation; used in antidandruff and problem skin preps.

Features: Substantive effect

Properties: Cl. to lt. turbid liq.; yel to amber; pleasant characteristic odor; 36% act.

Toxicology: Nonirritating to eyes

Environmental: Easily biodegrad.

**Protol®** [Chemtura http://www.chemtura.com]

Chem. Descrip.: Wh. mineral oil USP

CAS 8020-83-5; EINECS/ELINCS 232-384-2

Uses: Emollient, lubricant, carrier in pharmaceutical creams and lotions

Features: Hydrophobic; chemically inert; exc. UV and color stability

Regulatory: FDA 21CFR §172.878, §178.3620a

Properties: Water-wh., odorless, tasteless; sp.gr. 0.859-0.875; visc. 35-37 cSt (40 C); pour pt. -
Trade Name Reference

12 C; flash pt. 188 C

Protopet® Alba [Chemtura http://www.chemtura.com]
Chem. Descrip.: Petrolatum USP
CAS 8027-32-5; EINECS/ELINCS 232-373-2
Uses: Carrier, lubricant, emollient, moisture barrier, protectant, softener for pharmaceutical ointments, suppositories, sun care prods.
Features: Med. consistency and m.p.
Regulatory: FDA 21CFR §172.880
Properties: Lovibond 30Y/2.5R color, odorless; visc. 10-16 cSt (100 C); m.p. 54-60 C

Chem. Descrip.: PEG-5 cocamine
CAS 61791-14-8
Uses: Anti-irritant in shampoos
Properties: Cationic

Protopet® White 1S [Chemtura http://www.chemtura.com]
Chem. Descrip.: Petrolatum USP
CAS 8027-32-5; EINECS/ELINCS 232-373-2
Uses: Carrier, lubricant, emollient, moisture barrier, protectant, softener, process aid for pharmaceutical ointments, suppositories, dental adhesives, sun care prods.
Features: Med. consistency and m.p.
Regulatory: FDA 21CFR §172.880
Properties: Lovibond 1.5Y color, odorless; visc. 10-16 cSt (100 C); m.p. 54-60 C

Protopet® White 2L [Chemtura http://www.chemtura.com]
Chem. Descrip.: Petrolatum USP
CAS 8027-32-5; EINECS/ELINCS 232-373-2
Uses: Carrier, lubricant, emollient, moisture barrier, protectant, softener for pharmaceutical ointments
Features: Med. consistency and m.p.
Regulatory: FDA 21CFR §172.880
Properties: Lovibond 8Y0.6R color, odorless; visc. 10-16 cSt (100 C); m.p. 54-60 C

Protopet® White 3C [Chemtura http://www.chemtura.com]
Chem. Descrip.: Petrolatum USP
CAS 8027-32-5; EINECS/ELINCS 232-373-2
Uses: Carrier, lubricant, emollient, moisture barrier, protectant, softener for pharmaceutical ointments
Features: Med. consistency and m.p.
Regulatory: FDA 21CFR §172.880
Properties: Lovibond 25Y1.0R color, odorless; visc. 10-16 cSt (100 C); m.p. 54-60 C

Protopet® Yellow 2A [Chemtura http://www.chemtura.com]
Chem. Descrip.: Petrolatum USP
CAS 8027-32-5; EINECS/ELINCS 232-373-2
Uses: Carrier, lubricant, emollient, moisture barrier, protectant, softener for pharmaceutical ointments, suppositories, sun care prods.
Features: Med. consistency and m.p.
Regulatory: FDA 21CFR §172.880
Properties: Lovibond 30Y/2.5R color, odorless; visc. 10-16 cSt (100 C); m.p. 54-60 C

PROVIgel® DPC 6 [Provisco http://www.provisco.ch]
Chem. Descrip.: Depolymerized carob bean gum See Locust bean (Ceratonia siliqua) gum
CAS 9000-40-2; EINECS/ELINCS 232-541-5
Uses: Stabilizer, thickener for pharmaceuticals
Regulatory: E410 compliance
Properties: Sol. in hot water; visc. 600-900 mPa*s (1% aq., 1 h)
Storage: 12 mos. shelf life when stored in closed original pkg. at R.T. and protected from moisture and direct sunlight

PROVIgel® DPC 15 [Provisco http://www.provisco.ch]
Chem. Descrip.: Depolymerized carob bean gum See Locust bean (Ceratonia siliqua) gum
CAS 9000-40-2; EINECS/ELINCS 232-541-5
Uses: Stabilizer, thickener for pharmaceuticals
Regulatory: E410 compliance
Properties: Sol. in hot water; visc. 1200-1500 mPa*s (1% aq., 1 h)
Storage: 12 mos. shelf life when stored in closed original pkg. at R.T. and protected from moisture and direct sunlight

PROVIgel® DPG 1 [Provisco http://www.provisco.ch]
Chem. Descrip.: Depolymerized guar gum See Guar (Cyanopsis tetragonoloba) gum
CAS 9000-30-0; EINECS/ELINCS 232-536-8
Uses: Stabilizer, binder, thickener for foods and pharmaceuticals
Regulatory: E412 compliance
Properties: Visc. 800-950 mPa*s (10% aq., 1 h)
Storage: 12 mos. shelf life when stored in closed original pkg. at R.T. and protected from...
PROVIgel® DPG 3 [Provisco http://www.provisco.ch]
Chem. Descrip.: Depolymerized guar gum See Guar (Cyanopsis tetragonoloba) gum
CAS 9000-30-0; EINECS/ELINCS 232-536-8
Uses: Stabilizer, binder, thickener for pharmaceuticals
Regulatory: E412 compliance
Properties: Visc. 700-1100 mPa·s (3% aq., 1 h)
Storage: 12 mos. shelf life when stored in closed original pkg. at R.T. and protected from moisture and direct sunlight

PROVIgel® DPG 5 [Provisco http://www.provisco.ch]
Chem. Descrip.: Depolymerized guar gum See Guar (Cyanopsis tetragonoloba) gum
CAS 9000-30-0; EINECS/ELINCS 232-536-8
Uses: Stabilizer, binder, thickener for pharmaceuticals
Regulatory: E412 compliance
Properties: Visc. 4000-4500 mPa·s (3% aq., 1 h)
Storage: 12 mos. shelf life when stored in closed original pkg. at R.T. and protected from moisture and direct sunlight

PROVIgel® DPG 7 [Provisco http://www.provisco.ch]
Chem. Descrip.: Depolymerized guar gum See Guar (Cyanopsis tetragonoloba) gum
CAS 9000-30-0; EINECS/ELINCS 232-536-8
Uses: Stabilizer, binder, thickener for pharmaceuticals
Regulatory: E412 compliance
Properties: Visc. 500-700 mPa·s (3% aq., 2 h)
Storage: 12 mos. shelf life when stored in closed original pkg. at R.T. and protected from moisture and direct sunlight

PROVIgel® DPG 9 [Provisco http://www.provisco.ch]
Chem. Descrip.: Depolymerized guar gum See Guar (Cyanopsis tetragonoloba) gum
CAS 9000-30-0; EINECS/ELINCS 232-536-8
Uses: Stabilizer, binder, thickener for pharmaceuticals
Regulatory: E412 compliance
Properties: Visc. 1900-2400 mPa·s (1% aq., 2 h)
Storage: 12 mos. shelf life when stored in closed original pkg. at R.T. and protected from moisture and direct sunlight

PROVIgel® EXG 01 [Provisco http://www.provisco.ch]
Chem. Descrip.: Extracted, depolymerized guar gum See Guar (Cyanopsis tetragonoloba) gum
Uses: Stabilizer, thickener for pharmaceuticals
Properties: Sol. in cold water; visc. 80-150 mPa·s (1% aq., 1 h)

PROVIgel® EXG 05 [Provisco http://www.provisco.ch]
Chem. Descrip.: Extracted, depolymerized guar gum See Guar (Cyanopsis tetragonoloba) gum
Uses: Stabilizer, thickener for pharmaceuticals
Properties: Sol. in cold water; visc. 400-800 mPa·s (1% aq., 1 h)

PROVIgel® EXG 10 [Provisco http://www.provisco.ch]
Chem. Descrip.: Extracted, depolymerized guar gum See Guar (Cyanopsis tetragonoloba) gum
Uses: Stabilizer, thickener for pharmaceuticals
Properties: Sol. in cold water; visc. 80-150 mPa·s (1% aq., 1 h)

Guar (Cyanopsis tetragonoloba) gum
CAS 9000-30-0; EINECS/ELINCS 232-536-8
Uses: Stabilizer, binder, thickener for pharmaceuticals
Regulatory: E412 compliance
Properties: Visc. 3500-4000 mPa·s (1% aq., 1 h)
Storage: 12 mos. shelf life when stored in closed original pkg. at R.T. and protected from moisture and direct sunlight

Guar (Cyanopsis tetragonoloba) gum
CAS 9000-30-0; EINECS/ELINCS 232-536-8
Uses: Stabilizer, binder, thickener for pharmaceuticals
Regulatory: E412 compliance
Properties: Visc. 3500-4000 mPa·s (1% aq., 2 h)
Storage: 12 mos. shelf life when stored in closed original pkg. at R.T. and protected from moisture and direct sunlight
**PROVIgel® EXG 20** [Provisco http://www.provisco.ch]
Chem. Descrip.: Extracted, depolymerized guar gum See Guar (Cyanopsis tetragonoloba) gum

Chem. Descrip.: Extracted guar gum See Guar (Cyanopsis tetragonoloba) gum
CAS 9000-30-0; EINECS/ELINCS 232-536-8
Uses: Stabilizer, thickener for pharmaceuticals
Regulatory: E412 compliance
Properties: Sol. in cold water; visc. 1900-2300 mPa•s (1% aq., 1 h)
Storage: 12 mos. shelf life when stored in closed original pkg. at R.T. and protected from moisture and direct sunlight

**PROVIgel® NAG 753** [Provisco http://www.provisco.ch]
Chem. Descrip.: Guar gum with high galactomannan content See Guar (Cyanopsis tetragonoloba) gum
CAS 9000-30-0; EINECS/ELINCS 232-536-8
Uses: Thickener for pharmaceuticals
Regulatory: E412 compliance
Properties: Visc. 3300-3700 mPa•s (1% aq., 2 h)
Storage: 12 mos. shelf life when stored in closed original pkg. at R.T. and protected from moisture and direct sunlight

**PROVIgel® NAG 755** [Provisco http://www.provisco.ch]
Chem. Descrip.: Guar gum with high galactomannan content See Guar (Cyanopsis tetragonoloba) gum
CAS 9000-30-0; EINECS/ELINCS 232-536-8

**PROVIgel® NAG 903** [Provisco http://www.provisco.ch]
Chem. Descrip.: Guar gum with high galactomannan content See Guar (Cyanopsis tetragonoloba) gum
CAS 9000-30-0; EINECS/ELINCS 232-536-8
Uses: Thickener for pharmaceuticals
Regulatory: E412 compliance
Properties: Visc. 3300-3700 mPa•s (1% aq., 2 h)
Storage: 12 mos. shelf life when stored in closed original pkg. at R.T. and protected from moisture and direct sunlight

**PROVIgel® NAG 905** [Provisco http://www.provisco.ch]
Chem. Descrip.: Guar gum with high galactomannan content See Guar (Cyanopsis tetragonoloba) gum
CAS 9000-30-0; EINECS/ELINCS 232-536-8
Uses: Thickener for pharmaceuticals
Regulatory: E412 compliance
Properties: Visc. 3300-3700 mPa•s (1% aq., 2 h)
Storage: 12 mos. shelf life when stored in closed original pkg. at R.T. and protected from moisture and direct sunlight

**Pruv™** [JRS Pharma http://www.jrspharma.com]
Chem. Descrip.: Sodium stearyl fumarate NF/FCC
CAS 4070-80-8
Uses: Lubricant for pharmaceutical tablets including chewables and effervescent tablets
Features: Inert; hydrophilic; antiadherent props.; high m.p.; controlled particle size; superior hardness and less retardant effect on dissolution rate than magnesium stearate
Regulatory: NF, EP, JP compliance
Properties: Wh. fine powd. with agglomerates of flat, circular shaped particles ≤ 8 µm; sol. 20 g/100 ml of water (90 C); pract. insol. in acetone and in ethanol; dens. 0.3-0.5 g/cm (tapped); m.p. 224-245 C with decomp.; sapon. no. 142-146; 100% conc.
Punctilious® Ethyl Alcohol 190 Proof Pure

**USP [Equistar http://www.equistarchem.com]**

Chem. Descr.: Ethyl alcohol (92.5%), water (7.5%) See Alcohol

CAS 64-17-5; EINECS/ELINCS 200-578-6

UN 1170

Uses: Solvent for pharmaceuticals

Regulatory: SARA §311/312 acute health/chronic health/fire hazard, §313 nonreportable; Calif. Prop. 65 reportable (ethanol, benzene)

Properties: Colorless liq.; invisible vapor; sweet alcohol-like odor; sol. in methanol, water; misc. in ether, chloroform; sp.gr. 0.8090-0.8094 (77/77 F), 1.59 (vapor); vapor pressure 44.6 mm Hg; f.p. -144 C; b.p. 78.4 C; flash pt. (TCC) 16 C; autoignition temp. 363 C; ref. index 1.3619

Toxicology: LD50 (oral, rat) 7060 mg/kg; may be irritating to eyes, upper respiratory tract; short-term exposure above 1000 ppm by inh. may cause CNS effects, headache, eye/nose/throat irritation; exposure > 1 h may cause dizziness, drowsiness, loss of appetite, inability to conc., GI effects, nausea, vomiting; prolonged/repeated skin contact may cause dermatitis; ing. may cause drunkenness, CNS depression, nausea, vomiting, diarrhea, liver damage, death; TSCA listed

Environmental: On land, apt to volatilize, biodegrade, or leach to ground water; in water, photolysis, oxidation, biodegradation expected to occur; not expected to bioconcentrate in aquatic organisms; LC50 (rainbow trout, 96 h) 10,400 ppm; prevent entry into sewers

Precaution: Flamm. liq.; flamm. limits 3.3-19 vol.%; material can burn with little or no visible flame; vapors are heavier than air, may flash back; prevent entry into basements, confined areas; ground and bond containers; avoid static discharges; avoid strong oxidizers, excessive heat, sparks, open flame; contact with acetyl chloride or other oxidizing agents may result in violent reaction

Hazardous Decomp. Prods.: Combustion: CO

HMIS: Health 1, Flammability 3, Reactivity 0

Storage: 1 yr. shelf life; store under ambient conditions out of direct sunlight

UN 1170

Uses: Solvent for pharmaceuticals

Regulatory: SARA §311/312 acute health/chronic health/fire hazard, §313 nonreportable; Calif. Prop. 65 reportable (ethanol, chloroform)

Properties: Pt-Co 10 max. color; typ. odor; sol. in water; sp.gr. 0.8399-0.8429 (77/77 F); flash pt. (TCC) 56 F; ref. index 1.36593

Storage: 1 yr. shelf life; store under ambient conditions out of direct sunlight
Precaution: On land, apt to volatilize, Environmental: 1 yr. shelf life; store under ambient Storage:

HMIS: Combustion: CO Hazardous Decomp. Props.: Combustion: CO HMIS: Health 1, Flammability 3, Reactivity 0 Storage: 1 yr. shelf life; store under ambient conditions out of direct sunlight

Punctilious® SDA 23A Anhydrous [Equistar http://www.equistarchem.com]
Chem. Descrip.: Specially denatured alcohol

Chem. Descrip.: Specially denatured alcohol 23A: ethanol (85.7%), acetone (7.2%), water (7.0%) See Alcohol

23A: ethanol (92.6%), acetone (7.4%) See Alcohol
UN 1170
Uses: Solvent for pharmaceuticals Regulatory: SARA §311/312 acute health/chronic health/fire hazard, §313 nonreportable; Calif. Prop. 65 reportable (ethanol, benzene); TSCA export notification required (acetone)

Properties: Colorless liq.; invisible vapor; sweet alcohol-like odor; sol. in water; sp.gr. 0.8078-0.8090 (77/77 F), 1.59 (vapor); vapor pressure 44.6 mm Hg; f.p. -144 C; b.p. 78.4 C; flash pt. (TCC) 13 C; autoignition temp. 363 C; ref. index 1.36204

Toxicology: May be irritating to eyes, upper respiratory tract; short-term exposure above 1000 ppm by inh. may cause CNS effects, headache, eye/nose/throat irritation; exposure > 1 h may cause dizziness, drowsiness, loss of appetite, inability to conc., GI effects, nausea, vomiting; prolonged/repeated skin contact may cause dermatitis; ing. may cause drunkenness, CNS depression, nausea, vomiting, diarrhea, liver damage, death

Environmental: On land, apt to volatilize, biodegrade, or leach to ground water; in water, photolysis, oxidation, biodegradation expected to occur; not expected to bioconcentrate in aquatic organisms; LC50 (rainbow trout, 96 h) 10,400 ppm; prevent entry into sewers

Precaution: Flamm. liq.; flamm. limits 3.3-19 vol.%; material can burn with little or no visible flame; vapors are heavier than air, may flash back; prevent entry into basements, confined areas; ground and bond containers; avoid static discharges; avoid strong oxidizers, excessive heat, sparks, open flame; contact with acetyl chloride or other oxidizing agents may result in violent reaction

Hazardous Decomp. Props.: Combustion: CO MIBK (1.4%), water (6.9%) See Alcohol; Methyl isobutyl ketone
Handbook of Pharmaceutical Additives, Third Edition

Handbook of Pharmaceutical Additives, Third Edition
Precaution: Incompat. with oxidizing agents; avoid temps. above 200 C
Hazardous Decomp. Prods.: Thermal decomp. can produce irritating gases and vapors
Storage: Keep container tightly closed

Chem. Descrip.: L(+) Lactic acid See Lactic acid
CAS 79-33-4; EINECS/ELINCS 201-196-2
Uses: pH-regulator metal sequestrant, chiral intermediate and natural body constituent in pharmaceutical products.
Regulatory: USP, JP, EP and GRAS compliance
Properties: APHA 10 max. liq., characteric odor; bland acid taste; completely sol. in water; m.w. 90; sp.gr. 1.21-1.22; visc. 5-60 mPa.s; b.p. 110C; pH <2; decomp. temp. > 200 C; 87.5-88.5% assay
Toxicology: LD50 (oral, rat) 3730 mg/kg; LD50 (dermal, rabbit) 2000 mg/kg; irritating to skin; risk of serious damage to eyes; inhalation causes burns of the upper digestive and respiratory tracts
Environmental: Biodegradable; EC50 (daphnia, 48 h) 240 mg/l; readily biodegrad.: BOD5 = 0.45 mg O2 /mg; COD = 0.90 mg O2 /mg
Precaution: Avoid contact with skin and eyes; use personal protective equipment; avoid oxidizers
Hazardous Decomp. Prods.: Irritating gases and vapors
Storage: Keep container tightly closed and properly labeled

Purac Sanilac® [PURAC biochem http://www.purac.com]
Chem. Descrip.: Lactic acid
CAS 50-21-5; EINECS/ELINCS 200-018-0 UN 1760
Uses: Used in the food, chemical, pharmaceutical, cosmetic and detergent industries; main functions are decalcification, pH Regulation and bacterial control
Features: Antimicrobial; good cleaning properties; good material compatibility; produced for renewable sources
Regulatory: EPA FIFRA registration ; FDA GRAS compliant
Properties: Colorless/yel./lt. brn. liq. with agreeable odor; sol. in water; m.w. 90.08; dens. 1.18-1.19 g/ml; visc. 5-60 mPa.s; b.p. 110 C (40% sol.), 125 C (90% sol.); f.p. > 112 C; pH 2
Toxicology: Causes irreversible eye damage or skin burns; harmful if swallowed; inh. cause irritation of the respiratory tract; LD50 (oral, rat) 3730 mg/kg, (oral, mouse) 4875 mg/kg, (skin, rabbit) 2000 mg/kg; ing. may cause GI irritation; TSCA listed
Environmental: Biodegradable; EC50 (daphnia, 96h) 240 mg/l, (algae) 3500 mg/l; LC50 (fish, 48h) 320 mg/l; no bioaccumulation
Precaution: Do not get in eyes, on skin or on clothing; wear impervious gloves and tightly fitting safety goggles; avoid temp. above 140 C

Chem. Descrip.: Calcium lactate pentahydrate
See Calcium lactate
CAS 63690-56-2; EINECS/ELINCS 212-406-7
Uses: Filler, binder; flow aid for direct compression of pharmaceutical tablets; enhances drug release; nutrient supplement in pharmaceuticals (calcium source for calcium deficiency therapies)
Features: Nonhygroscopic; low friability; high compactibility; high sol. and bioavailability
Regulatory: GRAS, FCC, USP, EP, JSFA, EUSFA compliance
Properties: Wh. powd.; 90% min. 100-425 µm sieve; neutral odor and taste; sol. 9 g/100 ml in water; m.w. 218; pH 6.0-8.5 (10 g in 90 g water); 99-101% assay

Chem. Descrip.: Calcium lactate pentahydrate
See Calcium lactate
CAS 63690-56-2; EINECS/ELINCS 212-406-7
Uses: Calcium fortification, nutrient supplement, bioavailability enhancer for pharmaceuticals
Features: Provides good sol.
Regulatory: USA GRAS, FCC, USP, EP, E327, DAB, JSFA compliance
Properties: Wh. powd./chips; sol. 9 g/100 ml in water; m.w. 218 (anhyd.); pH 6.0-8.5 (10% aq.); 98% min. assay

Puracal® PP/USP [PURAC biochem http://www.purac.com]
Chem. Descrip.: Calcium lactate pentahydrate
Trade Name Reference

**See Calcium lactate**
CAS 63690-56-2; EINECS/ELINCS 212-406-7
Uses: Calcium fortification for pharmaceuticals

**Regulatory:** E 327, FDA GRAS, FCC, USP/EP, JSFA, EUSFA compliance

**Properties:** Wh. powd.; 90% min. 75-425 µm, 98% min. ≤ 500 µm; neutral odor and taste; sol. 9 g/100 ml water; m.w. 218; bulk dens. 300-500 kg/m³; m.p. > 200 °C; decomp. pt. > 200 °C; flash pt. not applicable; pH 6-8.5 (10% aq.); 99-101% assay; 13.4-14.5% assay (Ca); 22-27% loss on drying

**Toxicology:** LDLo (IV, mouse) 140 mg/kg; health injuries are not known or expected under normal use; avoid contact with skin and eyes; noncarcinogenic; nonmutagenic

**Environmental:** No special environmental precautions required; no bioaccumulation

**Precaution:** Incompat. with strong oxidizing agents

**Hazardous Decomp. Prods.:** COx

**Storage:** Nonhygroscopic; keep tightly closed in a dry place

---

**Puralan Pure New Lanolin EP/USP** [Croda Chem. Europe Ltd http://www.croda.co.uk]
Chem. Descrip.: Lanolin, USP
CAS 8006-54-0; EINECS/ELINCS 232-348-6
Uses: Emollient, o/w emulsifier, conditioner, and moisturizer for skin care prods., pharmaceuticals

**Properties:** Pale yel. soft mass; nonionic

**Puramex® AL** [PURAC Am. http://www.purac.com]
Chem. Descrip.: Aluminum lactate
CAS 18917-91-4; EINECS/ELINCS 242-670-9
Uses: Dietary supplement and deficiency therapies in pharmaceuticals

**Properties:** Wh. odorless powd.; sol. 26 g/100 ml in water; m.w. 294; bulk dens. 580 kg/m³; m.p. > 200 °C; pH 3-4 (4% aq. sol'n.)); 99% min. assay

**Toxicology:** LD50 (oral/rat) >2000mg/kg; noncarcinogenic; may cause Alzheimer's Disease if introduced parenterally

**Precaution:** Avoid strong oxidizers and dust formation

**Hazardous Decomp. Prods.:** COx

**Puramex® FE** [PURAC Am. http://www.purac.com]
Chem. Descrip.: Ferrous lactate
CAS 85993-25-5; EINECS/ELINCS 227-608-0
Uses: Nutrient supplement in pharmaceuticals

**Regulatory:** FDA GRAS; EU E585 compliance
**Properties:** Lt. green powd.; sl. characteristic odor; sol. 2.2 g/100 ml in water; m.w. 279; bulk dens. 680 kg/m³; m.p. 150 -170 °C; pH 4.5-6.0 (2% aq.); decomp. temp. > 200 °C; 98% min. assay

**Toxicology:** LD50 (oral, rat )> 2000mg/kg; eye irritant; TSCA listed

**Environmental:** Readily biodegrad.

**Precaution:** Insure adequate ventilation; avoid strong oxidizers

**NFPA:** Health 0, Flammability 0, Reactivity 0

**Storage:** Keep in dry place

**Puramex® MG** [PURAC Am. http://www.purac.com]
Chem. Descrip.: Magnesium lactate
CAS 18917-93-6; EINECS/ELINCS 242-671-4
Uses: Dietary supplement and deficiency therapies in pharmaceuticals

**Properties:** Wh. odorless powd.; sol. 5.2 g/100 ml in water; m.w. 238; dens. 500kg/m³; m.p. 200 °C; pH 5.0-7.0 (5% aq. sol'n.); 98% min. assay

**Toxicology:** LD50 (oral/rat) >2000mg/kg; noncarcinogenic; TSCA listed

**Precaution:** May cause dust explosion; avoid oxidizers

**Hazardous Decomp. Prods.:** COx

**Puramex® MN** [PURAC Am. http://www.purac.com]
Chem. Descrip.: Manganese lactate
CAS 16039-56-8
Uses: Nutrient supplement in pharmaceuticals

**Properties:** Pink powd.; sol. 10 g/100 ml in water; m.w. 233 (anhyd.); pH 5.0-7.0 (5% aq.); 98% min. assay

**Puramex® ZN** [PURAC Am. http://www.purac.com]
Chem. Descrip.: Zinc lactate dihydrate
CAS 63179-81-7; EINECS/ELINCS 240-178-9
Uses: Dietary supplement and deficiency therapies in pharmaceuticals

**Properties:** Wh. odorless powd.; sol. 5 g/100 ml in water; m.w. 279.4; bulk dens. 900 kg/m³; m.p. 200 °C; pH 5-8 (10% aq. sol'n.); 98% min. assay

**Toxicology:** LD50 (oral/rat) >2000mg/kg; may cause eye irritation with susceptible persons; harmful if swallowed ; noncarcinogenic

**Environmental:** EC50 (daphnia, 48 h) 8.3 mg/l

**Precaution:** Thermal decomposition releases
irritating gases and vapors; avoid dust formation; remove all sources of ignition

Storage: Keep in dry place

Chem. Descrip.: Potassium lactate
CAS 996-31-6; EINECS/ELINCS 213-631-3
Uses: Humectant, antimicrobial preservative for pharmaceuticals
Regulatory: FDA GRAS; EU E326 compliance; SARA §313 nonreportable
Properties: APHA 100 max. liq.; sl. to no odor; mildly saline taste; high sol. in water; m.w. 128 (anhyd.); sp.gr. 1.32-1.35 g/ml (20 C); dens. 11-11.3 lb/gal; b.p. 239 F (60% sol'n.); flash pt. none; ref. index 1.415-1.422; pH 5.5-7.5 (10% aq.); 58-62% assay
Toxicology: Nonhazardous; TSCA listed
Hazardous Ingredients: None
Hazardous Decomp. Prods.: None
HMIS: Health 0, Flammability 0, Reactivity 0
Storage: Keep containers tightly closed; store in cool, dry, ventilated area; avoid temps. above 239 F

Chem. Descrip.: Sodium lactate
CAS 72-17-3; EINECS/ELINCS 200-772-0
Uses: Humectant, antimicrobial preservative for pharmaceuticals
Regulatory: FDA GRAS; JSFA, EU E325 compliance; SARA §313 nonreportable
Properties: APHA 100 max. liq.; sl. to no odor; mildly saline taste; high sol. in water; m.w. 112 (anhyd.); sp.gr. 1.32-1.34 g/ml (20 C); dens. 11-11.2 lb/gal; flash pt. none; ref. index 1.422-1.425; pH 6.5-8.5 (10% aq.); 59-61% assay
Toxicology: Nonhazardous; TSCA listed
Hazardous Ingredients: None
Hazardous Decomp. Prods.: None
HMIS: Health 0, Flammability 0, Reactivity 0
Storage: Keep containers tightly closed; store in cool, dry, ventilated area; avoid temps. above 239 F

Chem. Descrip.: Sodium lactate
CAS 72-17-3; EINECS/ELINCS 200-772-0
Uses: Emulsifier, humectant, pH control agent for pharmaceuticals
Regulatory: FDA GRAS; USP, EU E325 compliance; SARA §313 nonreportable
Properties: APHA 50 max. liq.; sl. to no odor; high sol. in water; m.w. 112 (anhyd.); sp.gr. 1.32-1.34 g/ml (20 C); flash pt. none; ref. index 1.422-1.425; pH 6.5-8.5 (10% aq.); 59-61% assay
Toxicology: Nonhazardous; TSCA listed
Hazardous Decomp. Prods.: None
HMIS: Health 0, Flammability 0, Reactivity 0
Storage: Keep containers tightly closed; store in cool, dry, ventilated area; avoid temps. above 239 F

Chem. Descrip.: n-Butyl-(S)-lactate
CAS 34451-19-9; EINECS/ELINCS 252-036-3
Uses: Pharmaceutical intermediate
Features: Non-ozone depleting
Regulatory: FDA approved GRAS flavor
Properties: Colorless to lt. yel. cl. liq.; mild char. odor; partly misc. with water and most org. solvs.; m.w. 146; sp.gr. 0.975-0.985 (20 C); visc. 3.9 mPa•s; vapor pressure 0.3 mbar (20 C); b.p. 189 C; flash pt. (CC) 79 C; autoignition temp. 380 C; ref. index 1.418-1.422; 97% min. assay
Toxicology: TLV 25 mg/m3 max.; LD50 (oral, rat) > 5000 mg/kg; LC50 (inh., rat) > 5140 mg/m3; irritating to eyes, skin; risk of serious eye damage; may degrease skin; may cause coughing, headache; high concs. of vapors may cause respiratory tract irritation, narcotic effects
Environmental: BOD5 0.76 mg O2/mg; COD 1.97 mg O2/mg; readily biodeg.; unlikely to bioaccumulate; EC50 (daphnia, 48 h) 423 mg/l, (algae) 0.93 g/l; LC50 (fish, 48 h) 75 mg/l
Precaution: LEL 1% (100 C); UEL 7.9% (150 C); can be oxidized; hydrolyzes in presence of water, acids, bases; avoid temps. above 79 C
Hazardous Decomp. Prods.: Combustion: irritating fumes
Storage: Keep container tightly closed

Purasorb® [PURAC biochem http://www.purac.com]
Chem. Descrip.: Lactide and glycolide monomers and biodeg. copolymers
Uses: Excipient in controlled drug delivery systems, parenteral therapy and peritoneal dialysis, treatment of dry skin disorders, implantable medical devices; pharmaceutical synthesis

Pureco® 76 [ABITEC]
**Chem. Descrip.:** Coconut (Cocos nucifera) oil, refined, bleached, deodorized  
CAS 8001-31-8; EINECS/ELINCS 232-282-8  
*Uses:* Diluent, emollient, lubricant, vehicle, carrier in clinical nutrition, delivery/absorp. enhancement, microemulsions, soft gelatin capsules  
*Properties:* Lovibond R1.5 max. semisolid; typical odor; m.p. 74.3-80.6 F; iodine no. 10 max.; sapon. no. 248-264.  
*Storage:* Retest and requalify 12 mos. from the date of manufacture; store in dry place @ R.T.

**Chem. Descrip.:** Canola oil, refined, bleached, deodorized  
CAS 8002-13-9  
*Uses:* Lubricant for pharmaceuticals  
*Features:* Melting props.  
*Properties:* Lovibond 1.5 red max. liq.; vapor pressure > 1 mm Hg; b.p. >500 F; sapon. no. 180-193 ; flash pt. (COC) > 500 F  
*Precaution:* Wear chemical splash goggles and neoprene gloves for hot oil; avoid high temps. near flash pt. and strong oxidizers  
*Hazardous Decomp. Prods.:* COx  
*Storage:* Retest and requalify 12 months from the date of manufacture; store in a dry place @ R.T.

**Chem. Descrip.:** High oleic sunflower seed oil, refined, bleached, deodorized  
See Sunflower (Helianthus annuus) seed oil  
CAS 8001-21-6; EINECS/ELINCS 232-273-9  
*Uses:* Solvent, nutritional ingredient in supplements, and gelatin capsules; color and flavor carrier  
*Features:* Melting props.  
*Properties:* Pale yel oil; neutral odor; sp. gr. 0.92; vapor pressure <1 mm Hg; flash pt (COC) >200 C  
*Toxicology:* Not a serious eye irritant; no adverse effects to skin or by ing.  
*Environmental:* Prevent run-off to sewers, streams or other bodies of water  
*Precaution:* Avoid strong oxidizing agents  
*Hazardous Decomp. Prods.:* COx  
*Storage:* Retest and requalify 12 mos. from the date of manufacture; store in a dry place @ R.T.

**Chem. Descrip.:** Partially hydrogenated veg. oils, refined, bleached, deodorized  
See Hydrogenated vegetable oil  
EINECS/ELINCS 269-820-6  
*Uses:* Solvent, nutritional ingredient, in supplements, and gelatin capsules; color and flavor carrier  
*Features:* Melting props.  
*Properties:* Solid @ R.T.; lt.-yel. liq. above m.p.; vapor pressure <1 mm Hg  
*Toxicology:* Not a serious eye or skin irritant  
*Environmental:* Prevent run-off to sewers, streams or other bodies of water  
*Precaution:* Wear chemical splash goggles and neoprene gloves for hot oil; in presence of veg. oil mists or dusts, use of a NIOSH/OSHA approved mask and/or respirator.; avoid high temps. near flash pt. and oxidizing agents  
*Hazardous Decomp. Prods.:* COx
Trade Name Reference

pH 5.5-6.5; 9-12.5% moisture

Chem. Descrip.: Corn (Zea mays) starch NF
CAS 9005-25-8; EINECS/ELINCS 232-679-6
Uses: Binder, diluent, absorbent, disintegrant, sweetness regulator for pharmaceuticals (direct compr. tableting, dry granulations); absorbent starch for body powds.
Features: Free-flowing; inert; low hygroscopicity; improves hardness and friability
Regulatory: NF, FDA 21CFR §172.892
Properties: Wh. powd., no odor, bland flavor; pH 4.5-7.0; 8-11% moisture

Chem. Descrip.: Corn (Zea mays) starch USP
CAS 9005-25-8; EINECS/ELINCS 232-679-6
Uses: Binder, diluent, absorbent for pharmaceutical body powds. and other topical apps.
Regulatory: USP, FDA 21CFR §172.892
Properties: Wh. powd., odorless, bland flavor; pH 6.0; 11% moisture

Chem. Descrip.: Corn (Zea mays) starch NF
CAS 9005-25-8; EINECS/ELINCS 232-679-6
Uses: Binder, diluent, absorbent for pharmaceutical body powds.
Regulatory: NF, FDA 21CFR §172.892
Properties: Wh. fine powd., odorless, bland flavor; pH 4.5-7.0; 8-11% moisture

Chem. Descrip.: Topical corn (Zea mays) starch USP
CAS 9005-25-8; EINECS/ELINCS 232-679-6
Uses: Binder, diluent, absorbent for pharmaceutical body powds.
Regulatory: USP, FDA 21CFR §172.892
Properties: Wh. powd., odorless, bland flavor; pH 6.0; 11% moisture

Chem. Descrip.: Modified corn (Zea mays) starch USP contg. magnesium oxide
Uses: Absorbable dusting powd. for use as lubricant for surgical and examination gloves
Features: May be sterilized by autoclaving, ethylene oxide, or irradiation; not suitable for ingestion
Properties: Wh. flowable powd., odorless; 1.5% max. on 200 mesh, 10% max. on 325 mesh; pH 10-10.8; 8-11% moisture

Chem. Descrip.: Modified corn (Zea mays) starch USP
CAS 9005-25-8; EINECS/ELINCS 232-679-6
Uses: Absorbable dusting powd. for use as lubricant for examination gloves and other nonsurgical uses
Features: Not suitable for ingestion
Properties: Wh. powd.

Chem. Descrip.: Modified corn (Zea mays) starch NF
Uses: Binder, diluent, absorbent, and disintegrant for wet granulation of pharmaceutical tablets
Features: Low visc.; inert
Regulatory: NF, FDA 21CFR §172.892
Properties: Wh. powd., odorless, bland flavor; pH 6.0; 11% moisture

Pure-Syn™ 3E20 [ExxonMobil http://www.exxonmobilchemical.com]
Chem. Descrip.: Trimethylolpropane tricaprylate/tricaprate
CAS 11138-60-6; EINECS/ELINCS 268-595-1
Uses: Emollient, antiwhitener in antiperspirants; emollient for acne lotions
Regulatory: DOT nonregulated
Properties: Bright clear; prac. odorless; sp.gr. 0.95 (15.6 C); visc. 42.3 cst (20 C); f.p. <-25 C; HLB 6.0; acid no. 0.03; sapon. no. (mg KOH/g) 304; flash pt. 250 C; ref. index 1.4525

Pure-Syn™ 100 [ExxonMobil]
Trade Name Reference

**http://www.exxonmobilchemical.com**

**Chem. Descrip.:** Hydrogenated C6-14 olefin polymers

**CAS 163149-29-9**

**Uses: Emollient** for organic sunscreen spray

**Features:** Nonoily, nongreasy; stable in low and high pH systems

**Regulatory:** DOT nonregulated

**Properties:** Colorless fluid; odorless; sp.gr. 0.855 (15.6 C); visc. 4,230 cps (20 C); acid no. 0.02 (mg KOH/g); pour pt. -30 C; flash pt. 288 C; ref. index 1.4715

**Toxicology:** Nonirritating

**Purity® 5** [Nat'l. Starch & Chem./Food Innovation

**Chem. Descrip.:** Food starch modified See Food starch, modified

**Uses:** Excipient, anticaking agent for pharmaceutical tablet compression, capsule filling

**Features:** Low moisture content; protects moisture-sensitive ingreds.

**Properties:** Wh. powd.; pH ≈ 5; 7.5% max. moisture (as packed)

**Purity® 21C** [Nat'l. Starch & Chem./ http://www.nationalstarch.com

**Chem. Descrip.:** Corn (Zea mays) starch NF

**Chem. Analysis:** Moisture (12%)

**CAS 9005-25-8; EINECS/ELINCS 232-679-6**

**Uses:** Binder, filler, and disintegrant for pharmaceuticals, foot powds.

**Properties:** Wh. free-flowing powd.; disp. in water

**Purity® 825** [Nat'l. Starch & Chem./Food Innovation

**Chem. Descrip.:** Corn starch See Corn (Zea mays) starch

**CAS 9005-25-8; EINECS/ELINCS 232-679-6**

**Uses:** Excipient, anticaking agent for pharmaceutical tablet compression, capsule filling

**Features:** Low moisture content; protects moisture-sensitive ingreds.

**Properties:** Wh. to off-wh. powd.; pH ≈ 6; 2.5% max. moisture (as packed)

**Purity® FC** [Nat'l. Starch & Chem./Food Innovation

**Chem. Descrip.:** Food starch modified, tricalcium phosphate See Calcium phosphate tribasic; Food starch, modified

**Uses:** Excipient, anticaking agent for pharmaceutical tablet compression, capsule filling

**Features:** Low moisture content; protects moisture-sensitive ingreds.

**Properties:** Wh. free-flowing powd.; pH ≈ 6; ≈ 10% moisture

**Purity® Gum 40** [Nat'l. Starch & Chem./Food Innovation

**Chem. Descrip.:** Food starch modified derived from tapioca See Food starch, modified

**Uses:** Texturizer, gum Arabic replacement in lozenges, cough drops

**Features:** Exc. clarity, sheen, stability; low visc.; provides uniform flavor

**Regulatory:** FDA 21CFR §172.892; DOT nonregulated; SARA §313 nonreportable

**Properties:** Wh. to off-wh. fine powd.; starch odor; insol. in water; m.w. > 10,000; sp.gr. 1.5; pH ≈ 6 (1%); ≈ 11% moisture

**Toxicology:** Possible physical irritant from dust particles; particulates may scratch eye surfs. and cause mech. irritation; possible nuisance dust by inh.; maintain below TWA 10 mg/m³; low oral toxicity; low toxicity by skin contact; TSCA listed

**Precaution:** Potential for dust explosion; minimize dust generation

**Hazardous Decomp. Prods.:** Does not undergo spontaneous decomp.; typ. combustion prods.: CO, CO₂, N, water

**Storage:** Store @ ambient temps.; sensitive to static electricity

**Purox B food/pharma** [DSM Special Prods.

**Chem. Descrip.:** Benzoic acid

**CAS 65-85-0; EINECS/ELINCS 200-618-2**

**Uses:** Preservative in pharmaceutical applics.

**Features:** Ultra-pure grade

**Regulatory:** USP/NF, EP, JP, FCC; kosher

**Properties:** Wh. flakes; characteristic odor; solid. pt. 121.5-122.5 C; 99.98 min. assay

**Storage:** 2 yr shelf life

**Purtalc USP** [Charles B. Chrystal

**Chem. Descrip.:** Talc

**CAS 14807-96-6; EINECS/ELINCS 238-877-9**

**Uses:** Glidant, anticaking agent, tablet lubricant, colorant

**PVP-Iodine 30/06** [BASF

---

Handbook of Pharmaceutical Additives, Third Edition 605
PVP-Iodine 30/06 M10 [BASF]
Chem. Descrip.: PVP-iodine USP
CAS 25655-41-8
Uses: Microbicide, topical antiseptic in pharmaceuticals; surgical and hygienic hand disinfection; used in the treatment of burns, decubitus and varicose ulcers; dermatomycosis, pyoderma and acne, vaginitis
Features: Rec. for formulations in which the prod. is not dissolved
Properties: Micronized; particle size < 50 μm <100%; sol. in water, ethanol, propanol; insol. in acetone, chloroform, methylene chloride, heptane, hexane
Use Level: 1-10% solutions
Toxicology: LD50 (oral, rat) 5990 mg/kg; LD50 (IP, mouse) 360 mg/kg
Storage: 2 yr. shelf life in unopened original container @ R.T.

PVP K-15 Sol’n. [ISP]
Chem. Descrip.: PVP
CAS 9003-39-8; EINECS/ELINCS 201-800-4
Uses: Film-former, protective colloid, suspending agent, binder, stabilizer, detoxicant, complexing agent in pharmaceuticals
Properties: Cl. liq.; m.w. 12,000; 28-32% solids
Toxicology: LD50 (oral) > 100 g/kg, (IV) > 10 g/kg; very low acute toxicity

PVP K-30 [ISP]
Chem. Descrip.: PVP
CAS 9003-39-8; EINECS/ELINCS 201-800-4
Uses: Film-former, protective colloid, suspending agent, binder, stabilizer, detoxicant, complexing agent in pharmaceuticals
Properties: Off wh. powd.; sol. in water and many organic solvs., incl. alcohols, some chlorinated compds., nitroparaffins, and amines; m.w. 57,500; bulk dens. 28 lb/ft³; 95% min. act.
Toxicology: LD50 (oral) > 100 g/kg, (IV) > 10 g/kg; very low acute toxicity

PVP K-60 [ISP]
Chem. Descrip.: PVP
CAS 9003-39-8; EINECS/ELINCS 201-800-4
Uses: Film-former, protective colloid, suspending agent, binder, stabilizer, detoxicant, complexing agent in pharmaceuticals
Properties: M.w. 396,000
Trade Name Reference

PVP/VA E-335 [ISP  http://www.ispcorp.com]
Chem. Descrip.: PVP/VA copolymer with 30/70 mole ratio in ethanol sol'n.  See Alcohol
Uses:  Film-former for pharmaceuticals, antiseptic/anesthetic spray bandages, antibiotic aerosol bandages, spray or rub-on gloves and protective masks
Properties:  Very low chronic oral toxicity; safe in contact with skin

PVP/VA E-535 [ISP  http://www.ispcorp.com]
Chem. Descrip.: PVP/VA copolymer with 50/50 mole ratio in ethanol sol'n.  See Alcohol
Uses:  Film-former for pharmaceuticals, antiseptic/anesthetic spray bandages, antibiotic aerosol bandages, spray or rub-on gloves and protective masks; solubilizer; visc. modifier/stabilizer; granulation binder
Properties:  Very low chronic oral toxicity; safe in contact with skin

PVP/VA E-635 [ISP  http://www.ispcorp.com]
Chem. Descrip.: PVP/VA copolymer with 60/40 mole ratio in ethanol sol'n.  See Alcohol
Uses:  Film-former for pharmaceuticals, antiseptic/anesthetic spray bandages, antibiotic aerosol bandages, spray or rub-on gloves and protective masks; solubilizer; visc. modifier/stabilizer; granulation binder
Properties:  Very low chronic oral toxicity; safe in contact with skin

PVP/VA E-735 [ISP  http://www.ispcorp.com]
Chem. Descrip.: PVP/VA copolymer with 70/30 mole ratio in ethanol sol'n.  See Alcohol
Uses:  Film-former for pharmaceuticals, antiseptic/anesthetic spray bandages, antibiotic aerosol bandages, spray or rub-on gloves and protective masks; solubilizer; visc. modifier/stabilizer; granulation binder
Properties:  Very low chronic oral toxicity; safe in contact with skin

PVP/VA I-335 [ISP  http://www.ispcorp.com]
Chem. Descrip.: PVP/VA copolymer with 30/70

---

Chem. Descrip.: PVP
CAS 9003-39-8; EINECS/ELINCS 201-800-4
Uses:  Film-former, protective colloid, suspending agent, binder, stabilizer, detoxicant, complexing agent in pharmaceuticals
Properties:  Cl. liq.; m.w. 400,000; dens. 9.3 lb/gal; 45-49% solids
Toxicology:  LD50 (oral) > 100 g/kg, (IV) > 10 g/kg; very low acute toxicity

PVP-K-90 Sol'n. [ISP  http://www.ispcorp.com]
Chem. Descrip.: PVP
CAS 9003-39-8; EINECS/ELINCS 201-800-4
Uses:  Film-former, protective colloid, suspending agent, binder, stabilizer, detoxicant, complexing agent in pharmaceuticals
Properties:  Off-wh. powd.; m.w. 1,270,000; bulk dens. 20 lb/ft3; 95% min. act.
Toxicology:  LD50 (oral) > 100 g/kg, (IV) > 10 g/kg; very low acute toxicity

PVP-K-120 [ISP  http://www.ispcorp.com]
Chem. Descrip.: PVP
CAS 9003-39-8; EINECS/ELINCS 201-800-4
Uses:  Excipient, film-former, protective colloid, suspending agent, binder, stabilizer, detoxicant, complexing agent in pharmaceuticals
Properties:  Off-wh. powd.; m.w. 2,900,000; 95% min. act.
Toxicology:  LD50 (oral) > 100 g/kg, (IV) > 10 g/kg; very low acute toxicity

PVP/Si-10 [ISP  http://www.ispcorp.com]
Chem. Descrip.: Polymer-silicone encapsulate (dimethicone with PVP shell)
Uses:  Delivery vehicle, film-former in hair care, skin care
Properties:  Cationic

---

Properties: Liq.; sol. in aq. and most common org. solvs.; 50% act. in IPA

Toxicology: Very low chronic oral toxicity; safe in contact with skin

PVP/VA I-735 [ISP http://www.ispcorp.com]
Chem. Descrip.: PVP/VA copolymer with 70/30 mole ratios in IPA sol’n. See Isopropyl alcohol

Uses: Film-former for pharmaceuticals, antiseptic/anesthetic spray bandages, antibiotic aerosol bandages, spray or rubber gloves and protective masks; solubilizer; visc. modifier/stabilizer; granulation binder

Properties: Liq.; sol. in aq. and most common org. solvs.; 50% act. in IPA

Toxicology: Very low chronic oral toxicity; safe in contact with skin

PVP/VA S-630 [ISP http://www.ispcorp.com]
Chem. Descrip.: PVP/VA copolymer (60/40 mole ratio)
CAS 25086-89-9

Uses: Film-former, solubilizer, visc. modifier/stabilizer for pharmaceuticals, antiseptic/anesthetic spray bandages, antibiotic aerosol bandages, spray or rubber gloves and protective masks; binder and coating agent for film coating of tablets

Features: Affinity for hair, skin, and smooth surf.; solv.-sol. prod. used where absence of water or alcohol is desirable; forms stable emulsions

Properties: Dry powd.; sol. in alcohols, esters, ketones, aq. and most common org. solvs.; insol. in ethers and hydrocarbons; 100% act.

Chem. Descrip.: Pyrophyllite (hydrated aluminum silicate)
CAS 12269-78-2

Uses: Extender pigment, colorant in pharmaceuticals

Features: No ozone-depleting substances

Properties: Variable powd., 11 µ diam.; pH 6.5 (10% solids)

Chem. Descrip.: Pyrophyllite (hydrated aluminum silicate)
Chem. Analysis: SiO₂ (78.29%), Al₂O₃ (16.79%), K₂O (1.24%)
CAS 12269-78-2

Uses: Extender pigment, colorant in pharmaceuticals

Features: No ozone-depleting substances

Properties: Wh. powd.; 10 µ median particle size; 99% through 200 mesh; dens. 2.80 mg/m³; bulk dens. 52 lb/ft³ (compacted); surf. area 3 m²/g; oil absorp. 26; GE brightness 80; pH 6.9 (10% aq. slurry)

Toxicology: TSCA listed

Chem. Descrip.: Pyrophyllite (hydrated aluminum silicate)
Chem. Analysis: SiO₂ (78.29%), Al₂O₃ (16.79%), K₂O (1.24%)
CAS 12269-78-2

Uses: Extender pigment used in pharmaceuticals

Features: No ozone-depleting substances

Properties: Cream powd., 13 µ median particle size; 97% through 200 mesh; dens. 2.80 mg/m³; bulk dens. 61 lb/ft³ (compacted); surf. area 3 m²/g; oil absorp. 24; GE brightness 78; pH 6.6 (10% aq. slurry)

Toxicology: TSCA listed

Pyridoxine Hydrochloride USP, FCC [DSM Nutritional Prods. USA http://www.nutraaccess.com]
Chem. Descrip.: Vitamin B₆ hydrochloride
See Pyridoxine HCl
CAS 58-56-0; EINECS/ELINCS 200-386-2
Trade Name Reference

**Trade Name Reference**

**Uses:** Dietary supplement for mfg. of dry and liq. pharmaceuticals

**Regulatory:** FDA 21CFR §182.5676, GRAS; USP, FCC, Ph. Eur.

**Properties:** Wh. cryst. powd., odorless; 95% min. through 100 mesh; freely sol. in water (1 g/5ml); sl. sol. in alcohol (1 g/100 ml); insol. in ether; m.w. 205.64; m.p. 202-206 C; pH 2-4 (10% aq.); 98% min. assay

**Toxicology:** Ingestion of 500 mg or more daily for 6 mos. may cause ataxia and severe neuropathy

**Precaution:** Avoid exposure to excessive heat, alkali, light

**Storage:** Store in tightly closed containers away from light, moisture, excessive heat @ optimum temp. < 72 F

---

2-Pyrol® [ISP [http://www.ispcorp.com]]

**Chem. Descrip.:** 2-Pyrrolidone

**CAS 616-45-5; EINECS/ELINCS 204-648-7**

**Uses:** Solvent, solubilizer, intermediate for pharmaceuticals; synthesis of piracetam; treatment of cerebral distress; intermediate for N-phenyl amidines (diuretic, muscle relaxant, anti-inflammatory props.), γ-aminobutyric acid derivs.; injectables; tetracycline veterinary parenterals

**Properties:** Liq.; solidifies below 25 C; misc. with water, ethanol, ethyl ether, chloroform, benzene, ethyl acetate, CS2; insol. in aliphatic hydrocarbons; sp.gr. 0.11 (25/4 C); visc. 13.3 cp; m.p. 25 C; b.p. 245 C; flash pt. (OC) 130 C

**Precaution:** Noncorrosive; low fire hazard

---

Quadrol® Polyol [BASF/Perf. Chems. [http://www.basf.com/static/988804217008.html]]

**Chem. Descrip.:** Tetra (2-hydroxypropyl) ethylenediamine  See Tetrahydroxypropyl ethylenediamine

**CAS 102-60-3; EINECS/ELINCS 203-041-4**

**Uses:** Intermediate used in pharmaceuticals

**Properties:** Liq.; m.w. 292; sol. in water, ethyl alcohol, toluene, ethylene glycol, perchloroethylene; sp.gr. 1.03; ref. index 1.478; 99.2% tert. amine

---

Reach® 103 [Reheis [http://www.reheis.com]]

**Chem. Descrip.:** Aluminum chlorohydrate

**CAS 12042-91-0; EINECS/ELINCS 234-933-1**

**Uses:** Antiperspirant for increased wetness protection, esp. for aerosols

**Properties:** Powd.; 47.3% Al2O3, 16.6% Cl

**Reach® 301 O [Reheis [http://www.reheis.com]]

**Chem. Descrip.:** Aluminum chlorohydrate

**CAS 12042-91-0; EINECS/ELINCS 234-933-1**

**Uses:** Antiperspirant for clear and low residue antiperspirant systems

**Properties:** Powd.; Al2O3 (46.3%)

**Reach® 301 PG Powd. [Reheis [http://www.reheis.com]]

**Chem. Descrip.:** Aluminum chlorohydrate

**CAS 245090-52-2; EINECS/ELINCS 258-309-3**

**Uses:** Antiperspirant ingred. for clear and low residue antiperspirant systems

**Properties:** Powd.; Al2O3 (37.8%); PG (24%)
Reach® 501 Sol’n. [Reheis http://www.reheis.com]
Chem. Descrip.: Aluminum chlorohydrate
CAS 12042-91-0; EINECS/ELINCS 234-933-1
Uses: Antiperspirant for increased wetness protection, esp. for aerosols
Features: Useful in both hydro-alcoholic and aq. based systems incl. pump systems and compressed air systems
Properties: Powd.; 23.5% Al₂O₃, 8.2% Cl

Reach® AZP-855 [Reheis http://www.reheis.com]
Chem. Descrip.: Aluminum zirconium tetrachlorohydrex glycine See Aluminum zirconium tetrachlorohydrex GLY
CAS 90604-80-1; EINECS/ELINCS 292-375-4
Uses: Antiperspirant for nonaq. systems, sticks, roll-ons
Features: Enhanced efficacy
Properties: 16% Al, 10.0% Zr, 18.6% Cl, 12% Gly

Reach® AZP-902 [Reheis http://www.reheis.com]
Chem. Descrip.: Aluminum zirconium tetrachlorohydrex glycine See Aluminum zirconium tetrachlorohydrex GLY
CAS 90604-80-1; EINECS/ELINCS 292-375-4
Uses: Antiperspirant for nonaq. systems, sticks, roll-ons
Features: Enhanced efficacy
Properties: 15% Al, 14.2% Zr, 17.8% Cl, 12% Gly

Reach® AZP-908 [Reheis http://www.reheis.com]
Chem. Descrip.: Aluminum zirconium tetrachlorohydrex glycine See Aluminum zirconium tetrachlorohydrex GLY
CAS 90604-80-1; EINECS/ELINCS 292-375-4
Uses: Antiperspirant for nonaq. systems, sticks, roll-ons
Features: Enhanced efficacy
Properties: 15% Al, 14.2% Zr, 17.8% Cl, 12% Gly

Reach® AZP-908 O [Reheis http://www.reheis.com]
Chem. Descrip.: Aluminum zirconium tetrachlorohydrex glycine See Aluminum zirconium tetrachlorohydrex GLY
CAS 90604-80-1; EINECS/ELINCS 292-375-4
Uses: Antiperspirant for clear and low residue antiperspirant systems
Properties: Wh. to pale yel. powd.; char. odor; very sol. in water; pH 3.7-4.1 (15% sol’n.); Al (15.0%); Zr (14.3%)

Reach® AZP-908 PG 30 (Solution) [Reheis http://www.reheis.com]
Chem. Descrip.: Aluminum-zirconium PG complex
Uses: Antiperspirant for clear and low residue antiperspirant systems
Properties: Sl. yel. cl. sol’n.; char. glycol odor; sol. in water, glycol, and alcohol; sp.gr. 1.1-1.3; Al (3.8%); Zr (3.5%); propylene glycol (80%)

ReadyPress® C [BASF http://www.basf.com]
Chem. Descrip.: Ascorbic acid (83.3%), microcrystalline cellulose, starch, hydroxypropylcellulose, stearic acid, magnesium stearate, and silicon dioxide See L-Ascorbic acid; Silica
CAS 50-81-7; 9004-34-6; 9005-25-8; 9004-64-2; 57-11-4; 557-04-0; EINECS/ELINCS 200-066-2; 232-686-4; 200-313-4; 209-150-3
Uses: Dietary supplement in pharmaceutical tablets and nutritional supplements produced by direct compression
Features: Excellent hardness; low friability; fast disintegration; rapid dissolution; good color stability; facilitates high tablet production rates
Properties: Sl. off-wh. powd.; characteristic odor; sl. particle size US Sieve #20 (850 μ) min 99% thru; m.w. 176.1; dens., topped 0.67-0.91 g/cc; 83.3% act.
Storage: 1 yr shelf-life; store in tightly closed containers @ R.T; protect from light and in a
Trade Name Reference

ReadyPress® C w/RH  [BASF  http://www.bASF.com]
Chem. Descrip.:  Ascorbic acid (81.3%), microcrystalline cellulose, starch, hydroxypropylcellulose, stearic acid, magnesium stearate, silicon dioxide and Rose hips  See L-Ascorbic acid; Silica
CAS  50-81-7; 9004-34-6; 9005-25-8; 9004-64-2; 57-11-4; 557-04-0; EINECS/ELINCS 200-066-2; $; 232-686-4; $ 200-313-4; 209-150-3
Uses:  Dietary supplement for the direct compression into Vitamin C 500 mg and 1000 mg tablets
Features:  Excellent hardness; low friability; fast disintegration; rapid dissolution; good color stability; facilitates high tablet production rates
Properties:  Sl. off-w. powd.; characteristic odor; particle size US Sieve #20 (850 μ) min 99% thru; m.w. 176.1; dens., tapped 0.67-0.91 g/cc; 81.3% act.
Precaution:  Protect from heat and moisture which accelerates color deterioration of the blend
Storage:  1 yr shelf-life; store in tightly closed containers @ R.T; protect from light and in a dry place

redivivo™ (lycopene) 10% FS  [DSM Nutritional Prods. USA  http://www.nutraaccess.com]
Chem. Descrip.:  Lycopene crystals dispersed in corn oil  See Corn (Zea mays) oil
Chem. Analysis:  8% loss on drying
CAS  502-65-8;8001-30-7; EINECS/ELINCS 207-949-1; 232-281-2
Uses:  Fortifier and colorant for nutritional preps. and soft gelatin capsules
Properties:  Dk. red, viscous liq.; sl. sol. in oils and fats; m.w. 536.88; 10% min. lycopene content
Precaution:  Wear safety glasses and rubber gloves; avoid ing., inh. of dust or direct contact
Storage:  18 mos. shelf life; store away from air, heat, light, and humidity

554-6; 200-334-9
Uses:  Colorant and micronutrient in tablets and capsules
Properties:  Reddish, free-flowing beadlets; 100% through sieve #20, 85% min. through sieve #40, 15% max. through sieve #100; m.w. 536.88
Precaution:  Wear safety glasses and rubber gloves; avoid ing., inh. of dust or direct contact
Storage:  3 yr shelf life; store away from air, heat, light, and humidity

redivivo™ (lycopene) 10% WS  [DSM Nutritional Prods. USA  http://www.nutraaccess.com]
Chem. Descrip.:  Lycopene finely dispersed in a corn starch-coated matrix of fish gelatin, sucrose, and corn oil  See Corn (Zea mays) oil; Corn (Zea mays) starch
Chem. Analysis:  8% loss on drying
CAS  502-65-8; 9005-25-8; 9000-70-8; 57-50-1; 8001-30-7; EINECS/ELINCS 207-949-1; 232-679-6; 232-554-6; 200-334-9; 232-281-2
Uses:  Orange-red to red colorant for nutritional preps.
Properties:  Violet-brown, free-flowing beadlets; 100% through sieve #20, 50% min. through sieve #40, 15% max. through sieve #100; disp. in water; m.w. 536.88
Precaution:  Wear safety glasses and rubber gloves; avoid ing., inh. of dust or direct contact
Storage:  2 yr shelf life; store away from air, heat, light, and humidity

Rehydragel® CG  [Reheis http://www.reheis.com]
Chem. Descrip.:  Aluminum hydroxide CAS  21645-51-2; EINECS/ELINCS 244-492-7
Uses:  Adsorbent, suspension enhancer, visc. builder for pharmaceuticals; carrier for antitoxins in veterinary vaccines
Properties:  Translucent compressed gel; 9% Al2O3

Rehydragel® HPA  [Reheis http://www.reheis.com]
Chem. Descrip.:  Aluminum hydroxide CAS  21645-51-2; EINECS/ELINCS 244-492-7
Uses:  Adsorbent, protein binder for biological materials in human and veterinary vaccines
Properties:  Sterile thixotropic submicron fluid gel; 2% Al2O3

Rehydragel® LV  [Reheis http://www.reheis.com]
Trade Name Reference

**http://www.reheis.com**  
**Chem. Descrip.:** Aluminum hydroxide  
**CAS 21645-51-2;** EINECS/ELINCS 244-492-7  
**Uses:** Adsorbent, protein binder for use as a fluid adjuvant in the preparation of parenteral solutions.  
**Properties:** Low visc. gel; 2% Al₂O₃

**Rehydrol® II** [Reheis http://www.reheis.com]  
**Chem. Descrip.:** Aluminum chlorohydrate PG  
**CAS 24509-05-2;** EINECS/ELINCS 258-309-3  
**Uses:** Antiperspirant active for pumps, roll-ons and alcoholic sticks.  
**Properties:** Solid; sol. 50% max. in alcohol and water; 36% min. Al₂O₃, 12.5% min. Cl, 22% min. propylene glycol

**Reishi Mycelium Biomass REIMYC**  
**Chem. Descrip.:** Reishi mycelium biomass from *Ganoderma lucidum*  
**Uses:** Ingrd. in health foods and pharmaceutical capsules and tablets  
**Features:** Polysaccharides and peptidomannans actives  
**Properties:** Lt. rdsh.-brn. powd.; insol. in water  
**Storage:** 24 mo shelf life

**Reishi Mycelium Extract**  
**Chem. Descrip.:** Reishi mycelium extract from *Ganoderma lucidum* with 70% dextrose carrier  
**Uses:** Ingrd. in health foods, pharmaceuticals, tablets, capsules, ampules, nutritional supplements  
**Features:** Polysaccharides and lignins actives  
**Properties:** Brownish-red gran.  
**Storage:** 24 mo shelf life

**Renex® PEG 400**  
**Chem. Descrip.:** PEG-8 USP/NF  
**CAS 25322-68-3;** EINECS/ELINCS 225-856-4  
**Uses:** Surfactant, solvent for pharmaceuticals, toothpaste, suppository bases; suspending agent, consistency agent, visc. control agent, plasticizer for controlled-release solid drug forms, laxatives  
**Regulatory:** USP/NF and EP compliance  
**Properties:** Colorless liq.; sol. in water; m.w. 400; dens. 1.130 g/cc (20 C); f.p. 5 C; acid no. 0.1; hyd. no. 280; flash pt. (PMCC) > 365 F; pH 5.8 (5% aq.); nonionic; 100% conc.  
**Toxicology:** LD₅₀ (oral, rat) > 15 g/kg; TSCA listed  
**Precaution:** Wear safety glasses with side shields; avoid breathing vapors or aerosols; incompat. with oxidizers  
**Hazardous Decomp. Prods.:** CO, CO₂  
**NFPA:** Health 0, Flammability 1, Reactivity 0

**Renex® PEG 1000**  
**Chem. Descrip.:** PEG-20 USP/NF  
**CAS 25322-68-3;** EINECS/ELINCS 203-989-9  
**Uses:** Surfactant, wetting agent, consistency agent for topical pharmaceuticals; suspending agent, consistency agent, visc. control agent, plasticizer for controlled-release solid drug forms, laxatives  
**Regulatory:** USP/NF and EP compliance  
**Properties:** Wh. solid; sol. in water; m.w. 1000; dens. 1.198 g/cc (20 C); f.p. 37 C; acid no. 0.1; hyd. no. 112; pH 5.8 (5% aq.); nonionic; 100% conc.  

**Renex® PEG 1500**  
**Chem. Descrip.:** PEG-32 USP/NF  
**CAS 25322-68-3**

**Toxicology:** LD₅₀ (oral, rat) > 15 g/kg; TSCA listed  
**Precaution:** Wear safety glasses with side shields; avoid breathing vapors or aerosols; incompat. with oxidizers  
**Hazardous Decomp. Prods.:** CO, CO₂  
**NFPA:** Health 0, Flammability 1, Reactivity 0

Handbook of Pharmaceutical Additives, Third Edition 612
Trade Name Reference

**consistency agent, visc. control agent, plasticizer for controlled-release solid drug forms, laxatives**

*Regulatory:* USP/NF and EP compliance

*Properties:* Wh. solid; sol. in water; m.w. 1500; dens. 1.208 g/cc (20 C); f.p. 46 C; acid no. 0.1; hyd. no. 75; pH 5.8 (5% aq.); 100% conc.

---

**Renex® PEG 4000** [Uniqema](http://www.uniqema.com; Uniqema Am. [http://www.uniqema.com])

*Chem. Descrip.:* PEG-75 USP/NF

*CAS:* 25322-68-3

*Uses:* Surfactant, consistency agent for pharmaceuticals (suppository bases, tablet binders/lubricants/coatings); suspending agent, consistency agent, visc. control agent, plasticizer for controlled-release solid drug forms, laxatives

*Regulatory:* USP/NF and EP compliance

*Properties:* Wh. solid; sol. in water; m.w. 4000; dens. 1.217 g/cc (20 C); f.p. 55 C; acid no. 0.1; hyd. no. 28; pH 5.8 (5% aq.); nonionic; 100% conc.

---

**Renex® PEG 6000 FL** [Uniqema](http://www.uniqema.com; Uniqema Am. [http://www.uniqema.com])

*Chem. Descrip.:* PEG-150 USP/NF

*CAS:* 25322-68-3; EINECS/ELINCS 203-989-9

*Uses:* Surfactant for pharmaceuticals

*Properties:* Wh. solid; nonionic

---

**Respitose™** [DMV Int’l. Pharma [http://www.dmv-international.com]]

*Chem. Descrip.:* Lactose Ph.Eur., USP/NF, JP

*CAS:* 63-42-3; EINECS/ELINCS 200-559-2

*Uses:* Carrier for dry powd. inhalation pharmaceuticals

*Features:* Controlled particle size and particle size distribution, degree of crystallinity, amorphous lactose content, particle surf. morphology

---

**Retinol P 50** [BASF AG [http://www.basf.de]]

*Chem. Descrip.:* Retinol (50%) in polysorbate 20

*Uses:* Vitamin for pharmaceutical orals and parenterals

---

**Rewocid® DU 185 SE** [Degussa Care Spec.]

*Chem. Descrip.:* Undecylenamide DEA

*CAS:* 60239-68-1; EINECS/ELINCS 262-114-9

*Uses:* Thickener, refatting agent, antimicrobial, antmycotic for foot and skin care preps., pharmaceuticals

*Regulatory:* BfArM registered

*Properties:* Liq.; nonionic; 100% conc.

---

**Rewocid® SB U 185** [Degussa Care Spec.]

*Chem. Descrip.:* Disodium undecylenamido MEA-sulfosuccinate

*CAS:* 26650-05-5; EINECS/ELINCS 247-873-6

*Uses:* Detergent, foaming agent in antidandruff shampoos, pharmaceuticals

*Features:* Mild; good skin compat.; suitable for high concs.

*Regulatory:* BfArM and JCIC compliance

*Properties:* Pale yel. liq., sl. odor; sol. in alcohol, glycol; sp.gr. 1.0; pH 6.5-7.5 (5% solids); anionic; 50% act.

---

**Rewocid® UTM 185** [Degussa Care Spec.]

*Chem. Descrip.:* Undecylenamidopropyltrimonium methosulfate in water See Undecylenamidopropyl trimonium methosulfate

*CAS:* 94313-91-4; EINECS/ELINCS 304-990-8

*Uses:* Surfactant, antimicrobial, antistat for antidandruff shampoos

*Properties:* Low visc. liq.; cationic; 47% conc.

---

**Rewoderm® LI 63** [Degussa Care Spec.]

*Chem. Descrip.:* PEG-30 glyceryl cocoate

*CAS:* 68201-46-7

*Uses:* Surfactant, emollient, emulsifier, thickener, solubilizer, and superfatting agent for pharmaceuticals; anti-irritant for surfactants

*Features:* Hydrophilic; mild; improves mildness; good skin and mucous membrane compat.

*Regulatory:* BfArM, JCIC registered

*Properties:* Soft paste; nonionic; 100% conc.

---

**Rewoderm® LI 67-75** [Degussa Care Spec.]

*Chem. Descrip.:* PEG-80 glyceryl cocoate

*CAS:* 68201-46-7

*Uses:* Surfactant, emollient, emulsifier, thickener, solubilizer, and superfatting agent for pharmaceuticals; anti-irritant for surfactants

*Features:* Hydrophilic; mild; improves mildness; good skin and mucous membrane compat.

*Regulatory:* ADR, RID, ADNR, IMDG, ICAP/IATA not regulated; German water hazard class 1

*Properties:* Med.-visc., lt. yel. liq.; char. odor; easily sol. in water; dens. ≈ 1.1; dynamic visc.
**Rewoderm® S 1333** [Degussa Care Spec.]
Chem. Descrip.: Disodium ricinoleamido MEA-sulfosuccinate  
CAS 67893-42-9; EINECS/ELINCS 267-617-7  
Uses: Anti-irritant for alkylbenzene sulfonate and other surfactants  
Features: Suitable for high concs.  
Properties: Amber liq.; pH 6.5-7.5 (5%); surf. tens. 28 mN/m; anionic; 40% act.

**Rewomid® S 280** [Degussa Care Spec.]
Chem. Descrip.: Stearamide MEA  
CAS 111-57-9; EINECS/ELINCS 203-883-2  
Uses: Anti-inflammatory agent  
Regulatory: JCIC registered  
Properties: Wh. flakes; sl. odor; m.p. 92 C; nonionic; 100% act.

**Rewopal® PEG 6000 DS** [Degussa Care Spec.]
Chem. Descrip.: PEG-150 distearate  
CAS 9005-08-7  
Uses: Thickener for pharmaceuticals  
Features: Effective for difficult-to-thicken surfactant systems  
Regulatory: BfArM, JCIC registered; ADR,RID, ADNR, IMDG, ICAO/IATA not regulated; Germany water hazard class 1  
Properties: Waxy whitish pellets; char. odor; disp. in water; m.p. 45-51 C; flash pt. > 150 C; pH 5-7; nonionic; 100% conc.  
Toxicology: LD50 (oral, rat) > 2 g/kg  
Environmental: Do not allow to enter drains, waterways  
Precaution: Wear dust mask, PVC gloves, safety glasses, light protective clothing  
Hazardous Decomp. Prods.: CO, CO2  
Storage: Keep in original container in cool, well-ventilated place

**Rewopol® SBFA 30** [Degussa Care Spec.]
Chem. Descrip.: Disodium laureth sulfosuccinate  
CAS 68815-56-5; EINECS/ELINCS 255-062-3  
Uses: Surfactant, cleanser, detergent raw material for pharmaceuticals  
Features: Mild  
Regulatory: BfArM and JCIC compliance  
Properties: Colorless cl. liq.; visc. 100-299 cps; pH 6.5-7.5 (5% solids); anionic; 40% solids

**Rewoteric® AM B U 185** [Degussa Care Spec.]
Chem. Descrip.: Undecylenamidopropyl betaine  
CAS 133798-12-6; EINECS/ELINCS 308-783-3  
Uses: Surfactant, visc. control agent for antidandruff shampoos  
Features: Very mild; preservative-free  
Properties: Liq.; ≈ 30% act.; 5.5% NaCl

**Rewoteric® AM R40** [Degussa Care Spec.]
Chem. Descrip.: Ricinoleamidopropyl betaine  
CAS 86089-12-5; EINECS/ELINCS 289-181-7  
Uses: Surfactant for mild cosmetics, medicated cleaners  
Regulatory: JCIC registered  
Properties: Med. visc. liq.; pH 5.5-6.0 (10%); amphoteric; ≈ 30% act.; 5% NaCl

**Rewoteric® QAM 50** [Degussa Care Spec.]
Chem. Descrip.: Cocobetainamidopropyl amphopropionate  
CAS 100085-64-1; EINECS/ELINCS 309-206-8  
Uses: Surfactant for pharmaceuticals, skin disinfectants  
Features: Mild; inc. efficacy of act. ingreds. such as triclosan
Trade Name Reference

**Regulatory:** BfArM registered

**Properties:** Straw cl. liq.; pH 8-9 (10% aq.); Draves wetting 1 min 4 s; Ross-Miles foam 180/0; cationic/amphoteric; ≈ 45% act.; 6% NaCl

**Toxicology:** LD50 (oral, rat) 5100 mg/kg

**Environmental:** Biodeg.

**Rezal® 33GP** [Reheis http://www.reheis.com]

**Chem. Descrip.:** Aluminum zirconium trichlorohydrex-glycine  
See Aluminum/zirconium trichlorohydrex GLY

**CAS 90604-80-1; EINECS/ELINCS 292-375-4**

**Uses:** Antiperspirant active for suspension roll-ons and suspensoid sticks

**Properties:** Powd.; 98.5% min. through 325 mesh

**Rezal® 36G** [Reheis http://www.reheis.com]

**Chem. Descrip.:** Aluminum zirconium tetrachlorohydrex-glycine  
See Aluminum/zirconium tetrachlorohydrex GLY

**CAS 90604-80-1; EINECS/ELINCS 292-375-4**

**Uses:** Antiperspirant active for suspension roll-ons and suspensoid sticks

**Properties:** Powd.; 53 µ particle size; 95% min. through 270 mesh; 14.6% Al, 14.9% Zr, 15% glycine

**Rezal® 36G Conc.** [Reheis http://www.reheis.com]

**Chem. Descrip.:** Aluminum zirconium tetrachlorohydrex-glycine  
See Aluminum/zirconium tetrachlorohydrex GLY

**CAS 90604-80-1; EINECS/ELINCS 292-375-4**

**Uses:** Antiperspirant active for nonaerosol systems

**Properties:** Liq.; 35% act.

**Rezal® 36GP Superultrafine** [Reheis http://www.reheis.com]

**Chem. Descrip.:** Aluminum zirconium tetrachlorohydrex-glycine  
See Aluminum/zirconium tetrachlorohydrex GLY

**CAS 90604-80-1; EINECS/ELINCS 292-375-4**

**Uses:** Antiperspirant active for suspension roll-ons and suspensoid sticks

**Features:** Fine particle size results in improved aesthetics

**Properties:** Powd.; 85% min. through 10 µ

**Rezal® 67 (40% Sol’n.)** [Reheis http://www.reheis.com]

**Chem. Descrip.:** Aluminum zirconium pentachlorohydrate

**CAS 98106-54-8; EINECS/ELINCS 308-575-2**

**Uses:** Antiperspirant active for hydroalcoholic and aq. systems such as clear and emulsified roll-ons and creams

**Properties:** Liq.; 40% act.; 8% Al, 4% Zr

**Rezal® 67P** [Reheis http://www.reheis.com]

**Chem. Descrip.:** Aluminum zirconium pentachlorohydrate

**CAS 98106-54-8; EINECS/ELINCS 308-575-2**

**Uses:** Antiperspirant active for use in suspensoid sticks and suspension roll-ons

**Properties:** Powd.; 97% through 325 mesh; 20% Al, 10% Zr

**Rheodol 440** [Kao Corp. http://www.kao.co.jp]

**Chem. Descrip.:** PEG-40 sorbitan tetraoleate

**CAS 63089-86-1**

**Uses:** Emulsifier for cosmetics, pharmaceuticals

**Properties:** Lt. yel. cl. liq.; sol. in ethanol, hexane; disp. in xylene; gels in water; visc. 190 mPa•s (30 C); HLB 11.8; acid no. 5 max.; iodine no. 72-92; sapon. no. 10 max.; hyd. no. 32-42; nonionic; 100% conc.

**Rheodol 460** [Kao Corp. http://www.kao.co.jp]

**Chem. Descrip.:** PEG-60 sorbitan tetraoleate

**CAS 63089-86-1**

**Uses:** Emulsifier for cosmetics, pharmaceuticals

**Properties:** Lt. yel. paste; sol. in water, ethanol, xylene; insol. in hexane; visc. 295 mPa•s (30 C); HLB 13.8; acid no. 5 max. (when molten); iodine no. 52-72; sapon. no. 10 max.; hyd. no. 57-69; nonionic; 36% conc.

Chem. Descr.:  Sorbitan stearate  
CAS 1338-41-6; EINECS/ELINCS 215-664-9
Uses:  Emulsifier for cosmetics, pharmaceuticals
Features:  Highly lipophilic  
Regulatory:  JSCI, JHOSPA compliance
Properties:  Lt. ylsh. br. liq.; nonionic  

Rheodol TW-IS399C  [Kao Corp.  http://www.kao.co.jp]
Chem. Descr.:  POE sorbitan triisostearate
Uses:  Thickener and emulsifier for pharmaceuticals
Properties:  Lt. ylsh. br. liq.; nonionic

Rheodol TW-L106  [Kao Corp.  http://www.kao.co.jp]
Chem. Descr.:  POE 6 sorbitan laurate  See PEG-6 sorbitan laurate  
CAS 9005-64-5
Uses:  Emulsifier for pharmaceuticals
Features:  Highly hydrophilic  
Regulatory:  JSCI, JHOSPA, JHPA compliance
Properties:  Lt. yel. oily liq.; sol. in water, ethanol; disp. in xylene; insol. in n-hexane; acid no. 8 max.; HLB 15.0

Rheodol TW-L120  [Kao Corp.  http://www.kao.co.jp]
Chem. Descr.:  POE (20) sorbitan laurate  
CAS 9005-64-5
Uses:  Emulsifier for pharmaceuticals
Features:  Highly hydrophilic  
Regulatory:  JSCI, JHOSPA, JHPA compliance
Properties:  Lt. yel. oily liq.; sol. in water, ethanol; disp. in xylene; insol. in n-hexane; acid no. 9 max.; pour pt. 7.5; HLB 10.0

Rheodol TW-O106  [Kao Corp.  http://www.kao.co.jp]
Chem. Descr.:  POE 6 sorbitan monooleate  
CAS 9005-64-5
Uses:  Emulsifier for pharmaceuticals
Features:  Highly hydrophilic  
Properties:  Yel. oily liq.; sol. in ethanol, n-hexane; sl. sol. in xylene; acid no. 10-115; nonionic; 100% conc.

Rheodol TW-O120  [Kao Corp.  http://www.kao.co.jp]
Chem. Descr.:  POE 20 sorbitan monooleate  
CAS 9005-64-5
Uses:  Emulsifier for pharmaceuticals
Properties:  Yel. oily liq.; sol. in ethanol, water; sl. sol. in xylene; insol. in n-hexane; acid no. 8 max.; HLB 15.0

Rheodol TW-O320  [Kao Corp.  http://www.kao.co.jp]
Chem. Descr.:  POE 20 sorbitan trioleate  
CAS 9005-70-3
Uses:  Emulsifier for pharmaceuticals
Properties:  Yel. oily liq.; sol. in ethanol, n-hexane; hazy in xylene; f.p. -20 C; acid no. 8 max.; HLB 11.0

Rheodol TW-P120  [Kao Corp.  http://www.kao.co.jp]
Chem. Descr.:  POE 20 sorbitan
monopalmitate  See Polysorbate 40
CAS 9005-66-7
Uses:  Emulsifier for pharmaceuticals
Properties:  Ylsh. wh. solid; sol. in ethanol, water; sl. sol. in xylene; insol. in n-hexane; acid no. 2 max.; HLB 15.6; nonionic

Rheodol TW-S120  [Kao Corp.  http://www.kao.co.jp]
Chem. Descrip.:  POE 20 sorbitan monostearate  See Polysorbate 60
CAS 9005-67-8
Uses:  Emulsifier for pharmaceuticals
Properties:  Yel. oily liq.; sol. in ethanol, water; sl. sol. in xylene; insol. in n-hexane; acid no. 7 max.; HLB 14.9; nonionic

Rheodol Super SP-L10  [Kao Corp.  http://www.kao.co.jp]
Chem. Descrip.:  Sorbitan monolaurate  See Sorbitan laurate
CAS 1338-39-2; EINECS/ELINCS 215-663-3
Uses:  Defoamer, emulsifier for pharmaceuticals
Features:  Lipophilic; when combined with Rheodol TW series, produces stable o/w emulsions
Properties:  Pale yel. oily liq.; HLB 8.6; nonionic

Rheodol Super SP-S10  [Kao Corp.  http://www.kao.co.jp]
Chem. Descrip.:  Sorbitan monostearate  See Sorbitan stearate
CAS 1338-41-6; EINECS/ELINCS 215-664-9
Uses:  Defoamer, emulsifier for pharmaceuticals
Features:  Lipophilic; when combined with Rheodol TW series, produces stable o/w emulsions
Properties:  Pale ylsh. wh. beads; HLB 4.7; nonionic

Rheodol Super TW-L120  [Kao Corp.  http://www.kao.co.jp]
Chem. Descrip.:  POE-20 sorbitan monolaurate  See Polysorbate 20
CAS 9005-64-5
Uses:  Defoamer, emulsifier for pharmaceuticals
Properties:  Pale yel. oily liq.; HLB 16.7; nonionic

Rheodol Super TW-O120  [Kao Corp.  http://www.kao.co.jp]
Chem. Descrip.:  POE-20 sorbitan monooleate  See Polysorbate 80
CAS 9005-65-6
Uses:  Defoamer, emulsifier for pharmaceuticals
Properties:  Lt. yel. oily liq.; HLB 15.0; nonionic

Rhodapon® LSB  [Rhodia HPCII  http://www.rhodia-hpcii.com; C.P. Hall  http://www.cphall.com]
Chem. Descrip.:  Sodium lauryl sulfate
CAS 151-21-3; EINECS/ELINCS 205-788-1
Uses:  Detergent, emulsifier for medicinal ointments
Features:  High-foaming
Properties:  Pale cl. liq.; visc. 150 cps; HLB 40; cloud pt. 20 C; pH 8 (10%); anionic; 29% act.

Rhodasurf® L-4  [Rhodia HPCII  http://www.rhodia-hpcii.com]
Chem. Descrip.:  Laureth-4
CAS 68002-97-1; EINECS/ELINCS 226-097-1
Uses:  Emollient for pharmaceuticals
Properties:  Liq.; HLB 9.7; cloud pt. 0-5; pH 6.5 (1%); nonionic; 100% act.

Rhodasurf® LA-12  [Rhodia Canada]
Chem. Descrip.:  C12-15 pareth-12
CAS 68131-39-5
Uses:  Emollient for pharmaceuticals
Properties:  Wh. paste, low odor; water-sol.; sp.gr. 1.0; HLB 14.4; cloud pt. 90-100 C (1% aq.); nonionic; 100% act.
Environmental:  Biodeg.

Rhodasurf® ON-870  [Rhodia HPCII  http://www.rhodia-hpcii.com; Rhodia HPCII France  http://www.hpcii.rhodia.com]
Chem. Descrip.:  POE-20 sorbitan monostearate  See Polysorbate 60
CAS 9005-67-8
Uses:  Defoamer, emulsifier for pharmaceuticals
Properties:  Lt. yel. oily liq.; HLB 14.9; nonionic

Uses:  Defoamer, emulsifier for pharmaceuticals
Properties:  Pale yel. oily liq.; HLB 16.7; nonionic

Rheodol Super TW-S120  [Kao Corp.  http://www.kao.co.jp]
Chem. Descrip.:  POE-20 sorbitan monostearate  See Polysorbate 60
CAS 9005-67-8
Uses:  Defoamer, emulsifier for pharmaceuticals
Properties:  Lt. yel. oily liq.; HLB 14.9; nonionic

Rhodapon® LSB  [Rhodia HPCII  http://www.rhodia-hpcii.com; C.P. Hall  http://www.cphall.com]
Chem. Descrip.:  Sodium lauryl sulfate
CAS 151-21-3; EINECS/ELINCS 205-788-1
Uses:  Detergent, emulsifier for medicinal ointments
Features:  High-foaming
Properties:  Pale cl. liq.; visc. 150 cps; HLB 40; cloud pt. 20 C; pH 8 (10%); anionic; 29% act.

Rhodasurf® L-4  [Rhodia HPCII  http://www.rhodia-hpcii.com]
Chem. Descrip.:  Laureth-4
CAS 68002-97-1; EINECS/ELINCS 226-097-1
Uses:  Emollient for pharmaceuticals
Properties:  Liq.; HLB 9.7; cloud pt. 0-5; pH 6.5 (1%); nonionic; 100% act.

Rhodasurf® LA-12  [Rhodia Canada]
Chem. Descrip.:  C12-15 pareth-12
CAS 68131-39-5
Uses:  Emollient for pharmaceuticals
Properties:  Wh. paste, low odor; water-sol.; sp.gr. 1.0; HLB 14.4; cloud pt. 90-100 C (1% aq.); nonionic; 100% act.
Environmental:  Biodeg.

Rhodasurf® ON-870  [Rhodia HPCII  http://www.rhodia-hpcii.com; Rhodia HPCII France  http://www.hpcii.rhodia.com; C.P.
Trade Name Reference

Hall [http://www.cphall.com]
Chem. Descrip.: Oleth-20
CAS 9004-98-2
Uses: Emulsifier, stabilizer, dispersant, wetting agent, solubilizer for pharmaceuticals
Features: High foaming
Regulatory: FDA compliance; exempt from tolerance under EPA 40CFR §180.1001(c)(e)
Properties: Wh. solid wax; sol. in water, xylene, ethanol, ethylene glycol, butyl Cellosolve; sp.gr. 1.04; HLB 15.4; pour pt. 46 C; cloud pt. < 100 C (1% aq.); flash pt. (PMCC) 93 C; surf. tens. 37 dynes/cm (0.1%); nonionic; 100% act.

Rhodasurf® ON-877 [Rhodia HPCII http://www.rhodia-hpcii.com; C.P. Hall http://www.cphall.com]
Chem. Descrip.: Oleth-20
CAS 9004-98-2
Uses: Solubilizer and emulsifier for essential oils and pharmaceuticals
Properties: Liq.; HLB 15.4; cloud pt. < 100 C (1% aq.); nonionic; 70% conc.

Rhodasurf® PEG 600 [Rhodia HPCII http://www.rhodia-hpcii.com]
Chem. Descrip.: PEG-14
CAS 25322-66-3
Uses: Lubricant, binder for pharmaceuticals
Properties: Wh. liq.; m.w. 570-630; water sol.; sp.gr. 1.13 (30/15.5 C); f.p. 20-25 C; pH 5-8; 100% conc.

Rhodiaflor™ SME [Rhodia Organics http://www.rhodia-ppa.com/ppa/home.jsp]
Chem. Descrip.: Methyl salicylate
CAS 119-36-8; EINECS/ELINCS 204-317-7
Uses: Fragrance and masking agent in pharmaceutical
Regulatory: FEMA; Europe EINECS
Properties: Liq.

Rhodiaflor™ SME Extra-Pure [Rhodia Organics http://www.rhodia-ppa.com/ppa/home.jsp]
Chem. Descrip.: Methyl salicylate
CAS 119-36-8; EINECS/ELINCS 204-317-7
Uses: Fragrance and masking agent in pharmaceutical
Regulatory: FEMA; Europe EINECS
Properties: Liq.

Riboflavin High Flow [BASF AG http://www.basf.de]
Chem. Descrip.: Riboflavin
CAS 83-88-5; EINECS/ELINCS 201-507-1
Uses: Dietary supplement in pharmaceutical applics.
Features: Where a dense form is required; good flowability and dissolution props.
Regulatory: USP, EP, FCC
Properties: Yelsh. to orange-yel. free-flowing fine gran. powd., sl. characteristic odor; particle size US Sieve #60 (250 μ) min 95% thru; sl. sol. in water and dilute alkaline solutions; pract. insol. in alcohol; m.w. 376.4; m.p. 280 C (decomp.)
Precaution: Alkalis will accelerate deterioration
Storage: 3yrs. shelf life when stored @ 2-30 C in original, unopened container

Riboflavin-5’-Phosphate Sodium USP, FCC [DSM Nutritional Prods. USA http://www.nutraaccess.com]
Chem. Descrip.: Riboflavin-5’-phosphate sodium USP, FCC
CAS 130-40-5; EINECS/ELINCS 204-988-6
Uses: Vitamin source in solid pharmaceuticals in which rapidly and
Trade Name Reference

readily soluble form of riboflavin is desirable (e.g., effervescent tablets).

Regulatory: USP

Properties: Yellow to orange powd., pH (1% aq. soln.) 5.0-6.3; sol. in water ≈ 3g/100mL, very sl. sol. in alcohol, pract. insol. in ether, chloroform, and acetone; 75.0-79.0% (dry) assay

Precaution: Incompat. with sol’n/s. contg. calcium or metallic salts which form insoluble phosphates

Storage: Store in dry place at 59-86 F in tight, light-resist. containers; avoid heat and prolonged exposure to light

Ricebran Wax SP 8000 [Strahl & Pitsch http://www.strahlpitsch.com]
 Chem. Descrip.: Rice bran wax  See Rice (Oryza sativa) wax
CAS 8016-60-2; EINECS/ELINCS 232-409-7
Uses: Wax for pharmaceuticals
Properties: Tan flakes; m.p. 72-82 C; acid no. 10 max.; sapon. no. 110-140
Toxicology: TSCA listed

 Chem. Descrip.: PEG-12 ricinoleate
CAS 9004-97-1
Uses: Base for pharmaceuticals
Properties: Nonionic

RITA CA NF [RITA http://www.ritacorp.com]
 Chem. Descrip.: Cetyl alcohol NF
CAS 36653-82-4; EINECS/ELINCS 253-149-0
Uses: Thickener, opacifier, emollient for pharmaceuticals
Properties: Wh. waxy flakes; m.p. 45-50 C; acid no. 2 max.; iodine no. 5 max.; hyd. no. 218-238; flash pt. > 200 F
Precaution: Wear safety glasses, rubber gloves; incompat. with strong oxidizers, mineral acids
HMIS: Health 0, Flammability 1, Reactivity 0

Rita GMS-55G [RITA http://www.ritacorp.com]
 Chem. Descrip.: Glycerol stearate
Chem. Analysis: C16 45-52%; C18 42-50%
CAS 11099-07-3; 123-94-4; 31566-31-1; 85666-92-8; EINECS/ELINCS 250-705-4; 234-325-6; 204-664-4
Uses: Primary emulsifier for antiperspirants, sunscreens; used in topical pharmaceutical creams, ointments, lotions

Properties: Wh. to off-wh. flake; sol. in hot organic solvents such as alcohol, benzene, ether, acetone, mineral or fixed oils; m.p. 55-59 C; b.p. >300 F; HLB 3.8; acid value 2.0 max.; iodine value 1.0 max.; sapon. value 160-170; flash pt. >200 F; cationic; 91% min.
Toxicology: Nonirritant to eyes and skin
Environmental: Biodegrad.
Precaution: Avoid oxidizing agents and strong alkali or caustic materials; wear goggles and gloves
Storage: Avoid open fire or flame

Rita GMS-90 [RITA http://www.ritacorp.com]
 Chem. Descrip.: Glycerol stearate
Chem. Analysis: Monoester content 90% min.
CAS 123-94-4; 11099-07-3; 31566-31-1; EINECS/ELINCS 250-705-4; 234-325-6; 204-664-4
Uses: Emulsifier for antiperspirants, sunscreens; used in topical pharmaceutical creams, ointments, lotions
Properties: Off-wh. flake; sol. in hot organic solvents, e.g., alcohol, benzene, ether, acetone, mineral or fixed oils; m.p. ≥ 72 C; acid value 6 max.; iodine value 3 max.; sapon. value 155-170; hydroxyl no. 300-330; HLB ≈ 3.8; flash pt. >200 F; cationic; 91% min.
Toxicology: Not a primary eye or skin irritant; TSCA listed
Environmental: Biodegrad.
Precaution: Avoid strong oxidizing agents, strong alkali, and caustic material; wear goggles and gloves

Hazardous Decomp. Prods.: None
Storage: Avoid open fire or flame

RITA IPM NF [RITA http://www.ritacorp.com]
 Chem. Descrip.: Isopropyl myristate
CAS 110-27-0; EINECS/ELINCS 203-751-4
Uses: Emollient, spreading agent, solubilizer for pharmaceuticals, creams, lotions
Regulatory: NF compliance
Properties: Liq.

RITA IPP NF [RITA http://www.ritacorp.com]
 Chem. Descrip.: Isopropyl palmitate
CAS 142-91-6; EINECS/ELINCS 205-571-1
Uses: Emollient, spreading agent, solubilizer for pharmaceuticals, creams, lotions
Regulatory: NF compliance
Properties: Liq.

RITA SA NF [RITA http://www.ritacorp.com]
 Chem. Descrip.: Stearyl alcohol NF
CAS 112-92-5; EINECS/ELINCS 204-017-6
Trade Name Reference

Ritabate 20 [RITA http://www.ritacorp.com]
Chem. Descrip.: Polysorbate 20
CAS 9005-64-5
Uses: Wetting agent, viscosity modifier, antistat, stabilizer and dispersant in pharmaceuticals
Features: Hydrophilic
Properties: Yel. liq.; bland odor; sol. in water; sp. gr. 1.10; HLB 16.7; sapon. no. 40-50; hydroxyl no. 96-108; nonionic
Toxicology: Eye and skin nonirritant
Environmental: Biodegrad.
Precaution: Avoid oxidizing material; wear goggles and gloves
Storage: Store in sealed containers, away from heat or light

Ritabate 40 [RITA http://www.ritacorp.com]
Chem. Descrip.: Polysorbate 40
CAS 9005-66-7
Uses: Wetting agent, viscosity modifier, antistat, stabilizer and dispersant in pharmaceuticals
Features: Hydrophilic
Properties: Yel. liq.; bland odor; sol. in water; sp. gr. 1.10; HLB 15.8; sapon. no. 41-52; hydroxyl no. 89-105; flash pt. >300 F (PMCC); nonionic
Toxicology: Eye and skin nonirritant
Environmental: Biodegrad.
Precaution: Avoid oxidizing material; wear goggles and gloves
Storage: Store in sealed containers, away from heat or light

Ritabate 60 [RITA http://www.ritacorp.com]
Chem. Descrip.: Polysorbate 60
CAS 9005-67-8
Uses: Wetting agent, viscosity modifier, antistat, stabilizer and dispersant in pharmaceuticals
Properties: Yel. liq.; bland odor; sol. in water; sp. gr. 1.08; acid no. 2 max.; sapon. no. 45-55; hydroxyl no. 81-96; flash pt. >300 F; nonionic
Toxicology: Avoid oxidizing material; wear goggles and gloves

Ritabate 80 [RITA http://www.ritacorp.com]
Chem. Descrip.: Polysorbate 80
CAS 9005-65-6
Uses: Wetting agent, viscosity modifier, antistat, stabilizer and dispersant in pharmaceuticals
Properties: Amber. liq.; Gardner color 5 max.; bland odor; sol. in water; sp. gr. 1.08; acid no. 2 max.; sapon. no. 45-55; hydroxyl no. 65-80; HLB 15; flash pt. >300 F; nonionic
Toxicology: Avoid oxidizing material; wear goggles and gloves

Environmental: Biodegrad.
Precaution: Avoid oxidizing material; wear goggles and gloves
Hazardous Decomp. Prods.: None
Storage: Store in sealed containers, away from heat or light

Ritaceti [RITA http://www.ritacorp.com]
Chem. Descrip.: Cetyl esters
CAS 8002-23-1
Uses: Raw material, emollient, spreading agent, solubilizer for pharmaceuticals, creams, lotions
Features: Improves rub-out
Properties: Wh. to cream flakes; sol. in boiling alcohol, ether, chloroform and fixed oils; m.p. 43-47 C; acid no., 5.0 max, iodine no. 1.0 max.; sapon. no. 109-120; nonionic
Toxicology: May cause eye and skin irritation
Environmental: Biodegrad.
Precaution: Avoid oxidizing agents; wear goggles and gloves
Hazardous Decomp. Prods.: None
Storage: Store in sealed containers, away from heat or light

Ritacetyl® [RITA http://www.ritacorp.com]
Chem. Descrip.: Acetylated lanolin
CAS 61788-48-5; EINECS/ELINCS 262-979-2
Uses: Superfatting agent, emollient, spreading agent, moisture barrier, film-former for ointments, sun preps., skin care prods.
Properties: Yel./amber soft waxy semisolid, bland odor; insol. in water; oil-sol.; sp. gr. 0.96; m.p. 30-40 C; acid no. 3 max.; sapon. no. 125 max.; hyd. no. 10 max.; nonionic; 100% conc.
Use Level: 0.1-50%

Environmental: Biodegrad.
Precaution: Avoid oxidizing material; wear goggles and gloves
Hazardous Decomp. Prods.: None
Storage: Store in sealed containers, away from heat or light

Ritacetyl® [RITA http://www.ritacorp.com]
Chem. Descrip.: Acetylated lanolin
CAS 61788-48-5; EINECS/ELINCS 262-979-2
Uses: Superfatting agent, emollient, spreading agent, moisture barrier, film-former for ointments, sun preps., skin care prods.
Properties: Yel./amber soft waxy semisolid, bland odor; insol. in water; oil-sol.; sp. gr. 0.96; m.p. 30-40 C; acid no. 3 max.; sapon. no. 125 max.; hyd. no. 10 max.; nonionic; 100% conc.
Use Level: 0.1-50%
Trade Name Reference

Toxicology: LD50 (acute toxicity, albino rat) >64 cc/kg; Draize primary eye irritation index = 0.0 (rabbit)
Precaution: Avoid oxidizing materials; use goggles and gloves
Storage: Store in sealed containers, away from heat or light

Ritachlor 50% [RITA http://www.ritacorp.com]
Chem. Descrip.: Aluminum chlorohydrate
Chem. Analysis: Aluminum oxide 23.0 - 24.0%, chloride 7.9 - 8.4%; sulfate 0.025% max.; heavy metals 10 ppm max.; arsenic max.
CAS 12042-91-0; EINECS/ELINCS 234-933-1
Uses: Antiperspirant ingredient in OTC drug products
Properties: Water wh. odorless liq.; sol. in water; sp. gr. 1.33; pH 4.0-4.4 (15% w/w sol'n.)
Toxicology: Eye and skin nonirritant
Environmental: Biodegrad.
Precaution: Avoid oxidizing materials and direct sunlight; wear goggles and gloves
Hazardous Decomp. Prods.: May emit noxious fumes
Storage: Store in sealed containers, away from heat or light

Ritachol® 1000 [RITA http://www.ritacorp.com]
Chem. Descrip.: Cetearyl alcohol, polysorbate 60, PEG-150 stearate, steareth-20
Uses: Emulsifier for pharmaceuticals, skin treatment creams/lotions, antiperspirants
Properties: Wh. waxy flakes, low odor; m.p. 48-52 C; acid no. 1.5 max.; iodine no. 3.5 max.; sapon. no. 9-14; hyd. no. 178-192; pH 5.5-7.0 (3% aq.); nonionic; 100% conc.
Toxicology: Nonirritating

Ritachol® 2000 [RITA http://www.ritacorp.com]
Chem. Descrip.: Cetearyl alcohol and polysorbate 60
Uses: Emulsifier, conditioner for pharmaceuticals, powd. suspensions
Features: Stable over wide pH and temp. range
Properties: Gardner 1 max. wh. flakes; bland odor; insol. in water; m.p. 53-55 C; acid no. 0.1-1.0; iodine no. 3.5 max.; sapon. no. 9-14; hyd. no. 178-192; pH 5.5-7.0 (3% aq.); nonionic; 100% conc.
Toxicology: Nonirritating

Ritachol® SS [RITA http://www.ritacorp.com]
Chem. Descrip.: Stearyl stearate
CAS 2778-96-3; EINECS/ELINCS 220-476-5
Uses: Raw material, emollient, spreading agent, solubilizer for pharmaceuticals, creams, lotions
Features: Improves rub-out
Properties: Gardner 1 max. wh. flakes; bland odor; insol. in water; m.p. 53-55 C; acid no. 3 max; iodine no. 2 max.; sapon. no. 101-111
Toxicology: Not a primary eye or skin irritant
Environmental: Biodegrad.
Precaution: Avoid strong alkali or caustic, strong oxidizing agents; wear goggles and gloves
Hazardous Decomp. Prods.: None
Storage: Store in sealed containers, away from heat or light

Ritahydrox [RITA http://www.ritacorp.com]
Chem. Descrip.: Hydroxylated lanolin
CAS 68424-66-8; EINECS/ELINCS 270-315-8
Uses: W/o emulsifier, emollient, superfatting agent, pigment dispersant, emulsion stabilizer, thickener with high water absorp., skin wetting for ointments, sun preps., skin care prods.
Features: Hypoallergenic
Regulatory: RCRA nonreportable

Handbook of Pharmaceutical Additives, Third Edition 622
Trade Name Reference

Properties: Yel. paste; mild char. odor; insol. in water; sp.gr. 0.9; vapor dens. > 1; b.p. decomposes; HLB 4.0; m.p. 39-46 C; acid no. 10 max.; iodine no. 15-23; sapon. no. 95-110; hyd. no. 60-85; flash pt. (COC) > 500 F; volatiles < 1%; nonionic; 100% conc.
Toxicology: LD50 (oral, rat) > 40 mg/kg; TSCA listed
Precaution: Wear safety glasses, rubber gloves, rubber apron; incompat. with oxidizers
Hazardous Decomp. Prods.: Oxides of carbon
Storage: Keep away from heat, flames

Ritalan® [RITA http://www.ritacorp.com]
Chem. Descrip.: Lanolin oil USP
CAS 70321-63-0; EINECS/ELINCS 274-559-6
Uses: Moisturizer, plasticizer, penetrant, emollient, spreading agent, skin lubricant for topicals; prevents defatting
Features: Hypoallergenic; nonsensitizing
Properties: Amber cl. liq., sl. odor; sol. in lipids, min. oil; insol. in water; acid no. 2 max.; iodine no. 18-36; cloud pt. 18 C; nonionic; 100% conc.
Use Level: 0.1-50%
Toxicology: LD50 (acute toxicity, rats) >46.5 cc/kg; nonirritant to eyes and skin
Environmental: Biodegrad.
Precaution: Avoid contact with oxidizing materials; wear goggles and gloves
Hazardous Decomp. Prods.: May emit noxious fumes of CO
Storage: Store at R.T.; keep containers sealed

Ritalan® AWS [RITA http://www.ritacorp.com]
Chem. Descrip.: PPG-12-PEG-65 lanolin oil
Uses: Aux. emulsifier, moisturizer, emollient for ointments, sun preps.
Properties: Lt. amber visc. liq., odorless; sol. in water and alcohol; sp. gr. 1.07; HLB 18.0; acid no. 3 max.; iodine no. 10 max.; sapon. no. 10-25; hyd. no. 50 max.; pH 5-7 (10%); flash pt. (COC)545 C; nonionic; 100% act.
Toxicology: LD50 (ing., albino rat) 49 cc/kg
Precaution: Avoid heat, flame, and oxidizing materials; wear gloves and protective clothing

Ritapan D [RITA http://www.ritacorp.com]
Chem. Descrip.: D-Panthenol
Chem. Analysis: 98-102% assay; aminopropanol 1.0% max; heavy metals 20 ppm max
CAS 81-13-0; EINECS/ELINCS 201-327-3
Uses: Nutrient, humectant for skin care prod.; emollient for skin irritated by minor wounds, sun, insect bites, and allergic reactions
Features: Slightly hygroscopic.
Regulatory: USP
Properties: Cl. visc. liq.; m.w. 205.25; sp. gr. 1.2; pH 9.0-10.5; completely sol. in water; decomp. @ 118 - 120 C; ref. index 1.495 - 1.502
Toxicology: LD50 (acute toxicity, mouse) 15g/kg; nonirritant to eyes and skin
Environmental: Biodegrad.
Precaution: Avoid heat, flames, and oxidizing materials; may emit noxious fumes of CO
Storage: 12 mo. shelf life; store in cool, dry place
Trade Name Reference

Storage: Store in a cool, dry place

Ritasol [RITA http://www.ritacorp.com]
Chem. Descrip.: Isopropyl lanolate
CAS 63393-93-1; EINECS/ELINCS 264-119-1
Uses: Emollient, spreading agent, water-resistant film-former for ointments, sun preps.
Features: Compat. with fatty acid esters, anhydrous alcohols, min. oil, veg. oil
Properties: Yel. paste; oil-misc.; acid no. 18 max.; hyd. no. 40-60; sapon. no. 135-165; nonionic; 100% conc.; 0.2% max. moisture

Ritawax [RITA http://www.ritacorp.com]
Chem. Descrip.: Lanolin alcohol
CAS 8027-33-6; EINECS/ELINCS 232-430-1
Uses: Emulsifier, emollient, stabilizer, and thickener for pharmaceuticals, skin care prods.; hardener for wax systems
Features: Strong water absorp. props.
Properties: Amber firm waxy solid, char. odor; sol. in alcohol, IPM, other oils; insol. in water; sp.gr. 0.98; vapor dens. > 1; m.p. 53-61 C; b.p. 450 F (5 mm Hg); acid no. 2 max.; sapon. no. 10 max.; hyd. no. 118-160; nonionic; 100% conc.
Use Level: 0.1-50%
Toxicology: LD50 (oral, albino rat) 21 g/kg; TSCA listed
Precaution: Wear safety glasses, impervious gloves, apron; incompat. with oxidizers

Ritawax AEO [RITA http://www.ritacorp.com]
Chem. Descrip.: Polysorbate 80, acetylated lanolin alcohol, cetyl acetate
CAS 9005-65-6; 61788-49-6; 629-70-9; EINECS/ELINCS $; 262-980-8; 211-103-7
Uses: Emollient, lubricant, moisturizer, penetrant, solubilizer, dispersant, plasticizer, cosolvent, emulsifier for pharmaceuticals; vehicle for medicaments; used in dermatological related vehicles containing active ingredients, such as salicylic acid, steroids, and antimicrobial agents
Features: Compatible with nonionic, ionic, and amphoteric surface active materials
Properties: Lemon yel. to straw-colored cl. oily liq.; char. bland odor; sol. in water, IPA, castor oil, min. oil, veg. oil; acid no. 2 max.; sapon. no. 65-80; hyd. no. 60-70; flash pt. (COC) 340 C; nonionic; 100% conc.
Toxicology: Nonirritant to eyes and skin; wear gloves and goggles
Precaution: Avoid oxidizing agents
Hazardous Decomp. Preps.: May emit noxious fumes of CO

Ritawax ALA [RITA http://www.ritacorp.com]
Chem. Descrip.: Cetyl acetate, acetylated lanolin alcohol
CAS 629-70-9; 61788-49-6; EINECS/ELINCS 211-103-7; 262-980-8
Uses: Emollient, lubricant, moisturizer, penetrant, plasticizer, cosolvent, solubilizer, emulsifier for pharmaceuticals; vehicle for medicaments; degreaser and detackifier for emulsions
Properties: Cl. to yel. liq., char. bland odor; insol. in water; sol. in min. oil, castor oil, veg. oil, alcohol; sp. gr. 0.850-0.880; b.p. 450 F; acid no. 1 max.; iodine no. 10 max.; sapon. no. 180-200; hyd. no. 8 max.; flash pt. (COC) 340 C; nonionic; 100% conc.
Toxicology: LD50 (acute toxicity, rats) > 5 g/kg; skin (50% sol'n.) nonirritating and nonsensitizing in a 50 subject human patch test panel.
Environmental: Biodegrad.
Precaution: Avoid oxidizing agents; wear gloves and goggles
Hazardous Decomp. Preps.: May emit noxious fumes of CO

Ritawax Super [RITA http://www.ritacorp.com]
Chem. Descrip.: Lanolin alcohol
CAS 8027-33-6; EINECS/ELINCS 232-430-1
Uses: Emulsifier, emollient, conditioner, moisturizer, stabilizer, and solubilizer in ointments, sun preps., veterinary prods.
Properties: Amber solid; insol in water; m.p. 53-61 C; b.p. 450 F (mm Hg); sapon. no. 10 max.; hydroxyl no. 118-160; flash pt. 450 F (COC); nonionic
Toxicology: LD50 (acute toxicity, albino rat) 21 g/kg; primary skin irritation index: 0.0 (rabbit); Draize primary eye irritation index: 0.0 (rabbit)
Environmental: Biodegrad.
Precaution: May emit noxious fumes; avoid oxidizing agents; use goggles and gloves

Ritolet 2 [RITA http://www.ritacorp.com]
Chem. Descrip.: Oleth-2
CAS 9004-98-2
Uses: Emulsifier for pharmaceutical gels and creams
Features: Stable over wide pH range
Properties: Cl. to sl. yel. liq.; insol. in water; HLB 4.9; acid no. 0.5 max.; hydroxyl no. 150-180; flash pt. >300°F (PMCC); nonionic; 100%
Trade Name Reference

conc.
Toxicology: Nonirritant to eyes and skin
Environmental: Biodegrad.
Precaution: Avoid extreme heat and oxidizing materials; wear goggles and gloves
Hazardous Decomp. Prods.: None
Storage: Store in sealed container, away from heat or light

Ritoleth 5 [RITA http://www.ritacorp.com]
Chem. Descrip.: Oleth-5
CAS 9004-98-2
Uses: Emulsifier for pharmaceutical gels and creams
Features: Stable over wide pH range; compatible with most anionic, cationic and other nonionic surfactants
Properties: Cl. to sl. yel. liq.; insol. in water; acid no. 2.0 max.; hydroxyl no. 120-133; HLB 15.1; sapon. no. 2.0 max.; HLB 15.1; sapon. no. 2.0 max.; nonionic; 100% conc.
Toxicology: Nonirritant to eyes and skin
Environmental: Biodegrad.
Precaution: Avoid extreme heat and oxidizing materials; wear goggles and gloves
Hazardous Decomp. Prods.: None
Storage: Store in sealed container, away from heat or light

Ritoche 10 [RITA http://www.ritacorp.com]
Chem. Descrip.: Oleth-10
CAS 9004-98-2
Uses: Emulsifier for pharmaceutical gels and creams
Features: Stable over wide pH range
Properties: Colorless, odorless semisolid; insol. in water; sp. gr. 0.94; HLB 12.3; acid no. 10 max.; iodine no. 32-40; hydroxyl no. 80-90; sapon. no. 2 max.; cloud pt. 47-55 °C; flash pt. >300°F (PMCC); nonionic; 100% conc.
Toxicology: Nonirritant to eyes and skin
Environmental: Biodegrad.
Precaution: Avoid extreme heat and oxidizing materials; wear goggles and gloves
Hazardous Decomp. Prods.: None
Storage: Store in sealed container, away from heat or light

Ritoche 20 [RITA http://www.ritacorp.com]
Chem. Descrip.: Oleth-20
CAS 9004-98-2
Uses: Emulsifier for pharmaceutical gels and creams
Features: Stable over wide pH range
Properties: Wh. to yel. solid wax; insol. in water; acid no. 0.5 max.; hydroxyl no. 45 - 70; HLB 15.1; sapon. no. 2.0 max.; nonionic; 100% conc.
Toxicology: Nonirritant to eyes and skin
Environmental: Biodegrad.
Precaution: Avoid oxidizing materials; wear goggles and gloves
Hazardous Decomp. Prods.: None
Storage: Store in sealed container, away from heat or light

Rocoat® Niacinamide 33⅓% [DSM Nutritional Prods. USA http://www.nutraaccess.com]
Chem. Descrip.: Niacinamide USP FCC coated with mono and diglycerides of edible fatty acids and ≤ 1.5% silicon dioxide See Mono- and diglycerides of fatty acids; Silica
CAS 98-92-0;67701-32-0;$; EINECS/ELINCS 202-713-4;$
Uses: Nutrient for chewable multivitamin tablets and other dry dosage forms
Features: Provides taste-free and odorless form and protects the vitamin
Regulatory: FDA GRAS
Properties: Wh. relatively free-flowing powd. with some soft agglomerates, sl. char. odor, satisfactory taste; 99% min. through 20 mesh, 50% max. through 200 mesh; 32.6% assay (niacinamide)
Storage: Store below 72 F

Rocoat® Pyridoxine Hydrochloride 33⅓% [DSM Nutritional Prods. USA http://www.nutraaccess.com]
Chem. Descrip.: Pyridoxine hydrochloride USP FCC in inert coating of mono- and diglycerides of edible fatty acids See Mono- and diglycerides of fatty acids; Pyridoxine HCl
CAS 58056-0;67701-32-0;$; EINECS/ELINCS 200-386-2;$
Uses: Nutrient for chewable multivitamin tablets and other dry dosage forms
Features: Provides taste-free and odorless form and protects the vitamin
Regulatory: FDA GRAS
Properties: Wh. to off-wh. relatively free-flowing powd. with some soft agglomerates, odorless to sl. odor, satisfactory taste; 99% min. through 20 mesh, 50% max. through 200 mesh; 32.6% assay (pyridoxine HCl)
Storage: Store below 25 C in unopened container, stable to air and humidity but sensitive to light and heat
Rocoat® Riboflavin 33½% [DSM Nutritional Prods. USA http://www.nutraaccess.com]
Chem. Descrip.: Riboflavin USP-FCC and corn starch in an inert coating of mono- and diglycerides of edible fatty acids. See Corn (Zea mays) starch; Mono- and diglycerides of fatty acids
CAS 83-88-5;67701-32-0;9005-25-8;
EINECS/ELINCS 201-507-1;$;232-679-6
Uses: Nutrient for chewable tablets and solid pharmaceutical preps.
Features: Provides taste-free and odorless form and protects the vitamin
Regulatory: FDA GRAS
Properties: Orange relatively free-flowing powd. with some soft agglomerates, sl. char. odor, taste-free; 99% min. through 20 mesh, 50% max. through 200 mesh; 32.6-35.3% assay
Storage: Store below 25 C in unopened container, stable to air and humidity but sensitive to light and heat

Rocoat® Thiamine Mononitrate 33½% [DSM Nutritional Prods. USA http://www.nutraaccess.com]
Chem. Descrip.: Thiamine nitrate USP/FCC in inert coating of mono- and diglycerides of edible fatty acids. See Mono- and diglycerides of fatty acids
CAS 532-43-4; EINECS/ELINCS 208-537-4
Uses: Nutrient for chewable multivitamin tablets and other dry dosage forms
Features: Provides taste-free and odorless form and protects the vitamin
Regulatory: FDA GRAS
Properties: Wh. to off-wh. relatively free-flowing powd. with some soft agglomerates, sl. odor, taste-free; 99% min. through 30 mesh, 50% max. through 200 mesh; 32.6-35.3% assay
Storage: Store in a dry place @ 46-59 F

Chem. Descrip.: Polymer
Uses: Dental polymer for mfg. of partial and complete dentures by cold curing powd./liq. process
Properties: Bead polymer; 55-70 μm particle size; reduced visc. 145-175 cm³/g (20 C)

Chem. Descrip.: Polymer
Uses: Dental polymer for production of teeth by heat curing process
Properties: Bead polymer; 50-60 μm particle size; reduced visc. 210-250 cm³/g (20 C)

Chem. Descrip.: Polymer
Uses: Dental tray material to be used to produce molded articles by powd./liq. process
Properties: Bead polymer; 120-180 μm particle size; reduced visc. 50-60 cm³/g (20 C)

Chem. Descrip.: Polymer
Uses: Dental grade polymer for prostheses and bridges; mfg. of molded dentures
Features: Superior shape and color matching qualities
Regulatory: FDA 21CFR §177.1010
Properties: Bead polymer; 40-50 μm particle size; reduced visc. 80-100 cm³/g (20 C)

Chem. Descrip.: Polymethyl methacrylate-based polymer
Uses: Heat-sealing raw material for pkg. of pharmaceuticals
Regulatory: FDA 21CFR §175.300
Properties: Bead in powd. form; sol. in esters, ketones, aromatics, glycol ethers, glycol ether esters, glycol ether acetates, chlorinated hydrocarbons; insol. in alcohols, aliphatic hydrocarbons; m.w. ≈ 100,000; dens. 1.13 g/cm³; reduced visc. 50-60 cm³/g (20 C); acid no. 0-1
Toxicology: TSCA listed
Storage: Store cool and dry
Trade Name Reference

Chem. Descrip.: Methyl methacrylate-based polymer
Uses: Heat-sealing raw material for pkg. of pharmaceuticals
Features: Offers hardness, weather resist., lightfastness, resist. to chems. (esp. alcohol, petrol, grease)
Regulatory: FDA 21CFR §175.300
Properties: Ground bulk form; sol. in esters, ketones, glycol esters, aromatics, glycol ether acetates, chlorinated hydrocarbons; insol. in alcohols, aliphatic hydrocarbons, wh. spirits; m.w. ≈ 100,000; dens. 1.17 g/cm³; visc. 40-50 cm³/g; acid no. ≈ 2
Toxicology: TSCA listed
Storage: Store cool and dry

Rohamere® 6850-0 [Röhm Am. http://www.rohmamerica.com; Röhm GmbH http://www.roehm.de]
Chem. Descrip.: Methoxypolyethylene glycol 750-methacrylate with 100 ± 25 ppm MEHQ and 200 ± 50 ppm Topanol O inhibitors (60% sol'n. in water)
Chem. Analysis:
9% gamma-Linolenic acid content
CAS 26915-72-0
Uses: Steric stabilizer and controlled release device for pharmaceuticals; dental products
Properties: Cl. colorless to lt. ye. liq; ester-like odor; misc. in water; dens. 1.09 g/cm³; visc. 20 mPa.s; b.p. 100 C (water @1013 mbar); solid. pt -26.5 C; ref. index ≈ 1.405; 50 ± 2% water; 0.2% max. acid
Storage: 6 mos. shelf-like @ 30 C max.

Romax™ [DSM Nutritional Prods. USA http://www.nutraaccess.com]
Chem. Descrip.: Complex of ascorbic acid and niacinamide
Chem. Analysis: 73.5% ascorbic acid; 24.5% niacinamide; 0.5% max. loss on drying
CAS 50-81-7; 98-92-0; EINECS/ELINCS 200-066-2; 202-713-4
Uses: Nutrient, dietary supplement for multivitamin preps.
Regulatory: FCC, FDA 21CFR 172.315
Properties: Lemon-yel. free-flowing gran. powd.; 100% through sieve #20, 85% min. through sieve #40,135% max. through sieve #100; sol. in water (1 g/3.5 m/l) and alcohol (1 g/20 ml), very sl. sol. in chloroform and ether, sparingly sol. in glycerine; pract. insol. in benzene; m.w. 298.25; m.p. 141-145 C; 99.0% min. assay
Precaution: Wear safety glasses and rubber gloves; avoid ing., inh., and dust

Ropufa® '10' n-3 INF Powder [DSM Nutritional Prods. USA http://www.nutraaccess.com]
Chem. Descrip.: Docosahexaenoic acid and eicosapentaenoic acid in corn starch-coated matrix of fish gelatin and sucrose See Corn (Zea mays) starch
Chem. Analysis:
5% max. loss on drying; 7% min. DHA
CAS 6217-54-5; 10417-94-4; 9005-25-8; 9000-70-8; 57-50-1
Uses: Fish oil supplement for nutritional and pharmaceutical applics.
Properties: Pale brownish free-flowing beadlets; 100% through sieve #20, 85% min. through sieve #40,135% max. through sieve #100; sol. in water (1 g/3.5 m/l) and alcohol (1 g/20 ml), very sl. sol. in chloroform and ether, sparingly sol. in glycerine; pract. insol. in benzene; m.w. 298.25; m.p. 141-145 C; 99.0% min. assay
Toxicology: In high intakes may cause increased bleeding, reduction in immune activities, GI disturbances
Precaution: Wear safety glasses and rubber gloves; avoid ing., inh., and dust
Storage: 12 mos. shelf life; store in tightly sealed container away from air, heat, humidity, or light @< 15 C; once opened use quickly

Ropufa® '10' n-6 Oil [DSM Nutritional Prods. USA http://www.nutraaccess.com]
Chem. Descrip.: gamma-Linolenic acid
Chem. Analysis: 9% gamma-Linolenic acid content
CAS 506-26-3
Uses: Supplement for nutritional and
Trade Name Reference

Ross Beeswax [Frank B. Ross http://www.frankbross.com]
Chem. Descrip.: Beeswax
CAS 8012-89-3; EINECS/ELINCS 232-383-7
Uses: Wax for medicinals (ointments, salves)
Features: Avail. as crude, yel. refined, and wh. bleached grades
Properties: Lt. taffy to deep brn. wax, char.
honey odor; m.p. 62-65 C; acid no. 17-24;
cloud pt. -65 C max.

Ross Beeswax Substitute No. 30 [Frank B. Ross http://www.frankbross.com]
Chem. Descrip.: Yel. beeswax substitute
Uses: Wax for medicinals (ointments, salves)
Features: For use where pure beeswax is not required
Properties: Yel.; m.p. 130-143 F; acid no. 1-5;
sapon. no. 6-15

Ross Beeswax Substitute No. 628/5 [Frank B. Ross http://www.frankbross.com]
Chem. Descrip.: Paraffin, candelill a wax,
hydrogenated tallow glycerides, stearic acid, and cetyl alcohol See Candelilla
(Euphorbia cerifera) wax
Uses: Wax for medicinals (ointments, salves)
Features: For use where pure beeswax is not required
Properties: M.p. 140-150 F; acid no. 17-27;
sapon. no. 60-80

Ross Beeswax Substitute No. 1595 [Frank B. Ross http://www.frankbross.com]
Chem. Descrip.: Yel. beeswax substitute
Uses: Wax for medicinals (ointments, salves)
Features: For use where pure beeswax is not required
Properties: Yel.; m.p. 133-143 F; acid no. 1-5;
sapon. no. 5-14

Ross Carnauba Wax [Frank B. Ross http://www.frankbross.com]
Chem. Descrip.: Carnauba (Copernicia cerifera) wax See Carnauba (Copernica cerifera) wax
CAS 8015-86-9; EINECS/ELINCS 232-399-4
Uses: Wax for medicinals (ointments, salves, pills)
Features: Avail. as Prime or No. 1 Yel. or No. 3 North Country grades
Regulatory: FDA 21CFR §184.1978
Properties: Flakes or powd.; sp.gr. 0.996-0.998;
m.p. 181.4 F min.; acid no. 2-10; iodine no. 7-14;
sapon. no. 78-95; flash pt. 570 F min.; ref. index 1.4540

Ross Ceresine Wax [Frank B. Ross http://www.frankbross.com]
Chem. Descrip.: Ceresine wax See Ceresin
CAS 8001-75-0; EINECS/ELINCS 232-290-1
Uses: Wax for medicinals (ointments, salves)
Features: Avail. in various grades
Regulatory: FDA 21CFR §175.105
Properties: Wh., yel., tan, or orange grades;
sp.gr. 0.880-0.935; m.p. 53.3-87.8 C; acid no.
nil; sapon. no. 2 max.; ref. index 1.425-1.435

Ross Japan Wax [Frank B. Ross http://www.frankbross.com]
Chem. Descrip.: Japan (Rhus succedanea) wax
CAS 8001-39-6; EINECS/ELINCS 310-125-5
Uses: Wax for pharmaceuticals
Regulatory: FDA 21CFR §175.105, 175.300,
175.350, 176.170, 182.10
Properties: Pale cream colored wax, gummy feel; sp.gr. 0.975-0.984; m.p. 46.5-51.5 C; acid no.
6-30; iodine no. 4-15; sapon. no. 200-225;
flash pt. 385 F min.; ref. index 1.4550

Ross Spermaceti Wax Substitute #573 [Frank B. Ross http://www.frankbross.com]
Chem. Descrip.: Cetyl esters
CAS 8002-23-1
Uses: Wax for medicinals (ointments, salves)
Regulatory: FDA 21CFR §175.105, 175.300,
175.350, 176.170, 182.10
Properties: Sp.gr. 0.940-0.946; m.p. 42-50 C;
acid no. 2-8; iodine no. 3 max.; sapon. no.
117-148; flash pt. 470 F min.

Rudol® [Chemtura http://www.chemtura.com]
Chem. Descrip.: Lt. mineral oil NF
EINECS/ELINCS 232-384-2
Uses: Carrier in pharmaceuticals
Regulatory: FDA 21CFR §172.878, 178.3620a
Properties: Water-wh., odorless, tasteless; sp.gr.
RxCIPIENTS® FM1000  [Huber Engineered Materials  http://www.hubermaterials.com]
Chem. Descrip.:  Calcium silicate (99%)
sodium sulfate (1%)
Chem. Analysis:  Lead levels ≤ 10 ppb
CAS 1344-95-2; 7757-82-6; EINECS/ELINCS 215-710-8; 231-820-9
Uses:  Glidant, processing aid, and flow aid for oral solid dosage forms
Features:  Fast disintegration; nonhygroscopic for longer shelf life; low friability
Regulatory:  USP/NF, JPE, kosher
Properties:  Off-white odorless, tasteless powd.; particle size 10 μ max.; bulk dens., loose 20-50 lb/ ft³; pH (5% slurry) 8.5-9.8; noncombustible; 1.0% max. moisture loss on drying @ 105 C; 99% act.
Toxicology:  LD50 (oral, rat) > 5000 mg/kg; nonirritant to eyes; dries skin and mucous membranes; dust may irritate respiratory system; no evidence of mutagenic, reproductive or carcinogenic effects
Environmental:  Nonbiodegrad.; no risk to the environment
Precaution:  Wear safety glasses with side shields and impervious gloves; avoid contact with strong acids
Hazardous Decomp. Prods.:  None
Storage:  Store in original protective pkg. away from moisture

RxCIPIENTS® GL 100 Series Glidant  [Huber Engineered Materials  http://www.hubermaterials.com]
Chem. Descrip.:  Precipitated amorphous silica  See Silica, amorphous
CAS 112926-00-8; EINECS/ELINCS 231-545-4
Uses:  Glidant and flow aid for oral solid dosage forms
Features:  With a higher bulk density, decreases dust formation when added or blended; prevents adhesion between particles of different ingredients; stops cohesion between particles of the same type
Regulatory:  USP/NF, EP, kosher
Properties:  Wh. powd.; particle size 20 μ max.; bulk dens., loose 5-9 lb/ ft³; pH (5% slurry) 6.5-7.5; 7% moisture loss on drying @ 105 C
Storage:  1 yr shelf life when stored in original protective pkg. away from moisture, and extremes in temperature (> 90 F) and humidity (> 80% relative humidity)

Ryoto Sugar Ester B-370  [Mitsubishi-Kagaku Foods  http://www.mfc.co.jp/]
Chem. Descrip.:  Sucrose tribehenate
Uses:  Emulsifier, antibacterial, wetting agent, dispersant for pharmaceuticals; solubilizer, stabilizer for fat-sol. vitamins and antibiotics; lubricant, disintegrant, binder, and filler for tablets
Properties:  Powd.; odorless; tasteless; partly sol. in propylene glycol, glycerin, liq. paraffin, soybean oil, cottonseed oil, water; m.p. 53-63 C; decomp. pt. 241 C; HLB 3; nonionic
Toxicology:  Nontoxic; nonirritating to eyes and skin
Environmental:  Biodeg.

Ryoto Sugar Ester ER-190  [Mitsubishi-Kagaku Foods  http://www.mfc.co.jp/]
Chem. Descrip.:  Sucrose erucate
Uses:  Emulsifier, conditioner, detergent for pharmaceuticals; solubilizer, stabilizer for fat-sol. vitamins and antibiotics; lubricant, disintegrant, binder, and filler for tablets; solubilizer, dispersant for flavors and preservatives
Properties:  Liq.; odorless; tasteless; partly sol. in propylene glycol, glycerin, liq. paraffin, soybean oil, cottonseed oil, water; m.p. 53-63 C; decomp. pt. 241 C; HLB 3; nonionic
Toxicology:  Nontoxic; nonirritating to eyes and skin
Environmental:  Biodeg.

Trade Name Reference

Ryoto Sugar Ester OWA-1570  [Mitsubishi-Kagaku Foods  http://www.mfc.co.jp/]
Chem. Descrip.:  Sucrose olate
CAS 25496-92-8; EINECS/ELINCS 247-041-2
Uses:  Emulsifier, conditioner, softener, detergent for pharmaceuticals; solubilizer, stabilizer for fat-sol. vitamins and antibiotics; lubricant, disintegrant, binder, and filler for tablets
Properties:  Paste; odorless; tasteless; HLB 15.0; nonionic; 40% conc.
Toxicology:  Nontoxic; nonirritating to eyes and skin
Environmental:  Biodeg.

Ryoto Sugar Ester P-170  [Mitsubishi-Kagaku Foods  http://www.mfc.co.jp/]
Chem. Descrip.:  Sucrose palmitate
CAS 26446-38-8; EINECS/ELINCS 247-706-7
Uses:  Emulsifier, conditioner, softener, detergent for pharmaceuticals; solubilizer, stabilizer for fat-sol. vitamins and antibiotics; lubricant, disintegrant, binder, and filler for tablets; solubilizer, dispersant for flavors and preservatives
Properties:  Powd.; odorless; tasteless; HLB 1; nonionic
Toxicology:  Nontoxic; nonirritating to eyes and skin
Environmental:  Biodeg.

Ryoto Sugar Ester P-1570  [Mitsubishi-Kagaku Foods  http://www.mfc.co.jp/]
Chem. Descrip.:  Sucrose palmitate
CAS 26446-38-8; EINECS/ELINCS 247-706-7
Uses:  Emulsifier, conditioner, softener, detergent for pharmaceuticals; solubilizer, stabilizer for fat-sol. vitamins and antibiotics; lubricant, disintegrant, binder, and filler for tablets; solubilizer, dispersant for flavors and preservatives
Properties:  Powd.; odorless; tasteless; partly sol. in water, propylene glycol, glycerin, liq. paraffin, soybean and cottonseed oils; m.p. 40-48 C; decomp. pt. 235 C; HLB 16; surf. tens. 34.5 dynes/cm (0.1% aq.); Ross-Miles foam 24 mm (0.25% aq., initial); nonionic
Toxicology:  Nontoxic; nonirritating to eyes and skin
Environmental:  Biodeg.

Ryoto Sugar Ester POS-135  [Mitsubishi-Kagaku Foods  http://www.mfc.co.jp/]
Chem. Descrip.:  Sucrose ester of mixed fatty acid with sm. amt. of tocopherol (antioxidant)
See Sucrose fatty acid esters
Uses:  Emulsifier, conditioner, detergent for pharmaceuticals; solubilizer, stabilizer for fat-sol. vitamins and antibiotics; lubricant, disintegrant, binder, and filler for tablets; solubilizer, dispersant for flavors and preservatives
Properties:  Waxy; odorless; tasteless; HLB 1
Toxicology:  Nontoxic; nonirritating to eyes and skin
Environmental:  Biodeg.

Ryoto Sugar Ester S-070  [Mitsubishi-Kagaku Foods  http://www.mfc.co.jp/]
Chem. Descrip.:  Sucrose polystearate
Uses:  Emulsifier, conditioner, detergent for pharmaceuticals; solubilizer, stabilizer for fat-sol. vitamins and antibiotics; lubricant, disintegrant, binder, and filler for tablets; solubilizer, dispersant for flavors and preservatives
Properties:  Powd.; odorless; tasteless; partly sol. in glycerin; m.p. 47-54 C; decomp. pt. 237 C; HLB 15.0; surf. tens. 35.4 dynes/cm (0.1% aq.); Ross-Miles foam 15 mm (0.25% aq., initial); nonionic; 100% conc.
Toxicology:  Nontoxic; nonirritating to eyes and skin
Environmental:  Biodeg.
disintegrant, binder, and filler for tablets; solubilizer, dispersant for flavors and preservatives

**Properties:** Powd.; nonionic; 100% conc.

**Ryoto Sugar Ester S-170** [Mitsubishi-Kagaku Foods](http://www.mfc.co.jp/)

**Chem. Descr.:** Sucrose di, tristearate See Sucrose polyolesterate

**Uses:** Emulsifier, conditioner, softener, detergent for pharmaceuticals; solubilizer, stabilizer for fat-sol. vitamins and antibiotics; lubricant, disintegrant, binder, and filler for tablets

**Properties:** Powd.; odorless; tasteless; partly sol. in propylene glycol, glycerin, liq. paraffin, soybean and cottonseed oils; insol. in water; m.p. 51-61 C; decomp. pt. 260 C; HLB 1.0; nonionic; 100% conc.

**Toxicology:** Nontoxic; nonirritating to eyes and skin

**Environmental:** Biodeg.

**Ryoto Sugar Ester S-270** [Mitsubishi-Kagaku Foods](http://www.mfc.co.jp/)

**Chem. Descr.:** Sucrose di, tristearate See Sucrose polyolesterate

**Uses:** Emulsifier, conditioner, softener, detergent for pharmaceuticals; solubilizer, stabilizer for fat-sol. vitamins and antibiotics; lubricant, disintegrant, binder, and filler for tablets

**Properties:** Powd.; odorless; tasteless; partly sol. in propylene glycol, glycerin, liq. paraffin, soybean and cottonseed oils; insol. in water; m.p. 52-61 C; decomp. pt. 253 C; HLB 2.0; nonionic; 100% conc.

**Toxicology:** Nontoxic; nonirritating to eyes and skin

**Environmental:** Biodeg.

**Ryoto Sugar Ester S-370** [Mitsubishi-Kagaku Foods](http://www.mfc.co.jp/)

**Chem. Descr.:** Sucrose tristearate

**CAS:** 27923-63-3; EINECS/ELINCS 248-317-5

**Features:** Increases fluidity of raw materials and efficiency of filling in tableting machine; ultrafine version of S-370

**Properties:** Ultrafine powd.; odorless; tasteless; HLB 3; nonionic

**Toxicology:** Nontoxic; nonirritating to eyes and skin

**Environmental:** Biodeg.

**Ryoto Sugar Ester S-570** [Mitsubishi-Kagaku Foods](http://www.mfc.co.jp/)

**Chem. Descr.:** Sucrose distearate

**CAS:** 27195-16-0; EINECS/ELINCS 248-317-5

**Uses:** Emulsifier, conditioner, softener, detergent for pharmaceuticals; solubilizer, stabilizer for fat-sol. vitamins and antibiotics; lubricant, disintegrant, binder, and filler for tablets

**Properties:** Powd.; odorless; tasteless; partly sol. in propylene glycol, glycerin, liq. paraffin, soybean and cottonseed oils, water; m.p. 50-57 C; decomp. pt. 231 C; HLB 5.0; surf. tens. 38.1 dynes/cm (0.1% aq.); nonionic; 100% conc.

**Toxicology:** Nontoxic; nonirritating to eyes and skin

**Environmental:** Biodeg.
Trade Name Reference

Environmental: Biodeg.

Ryoto Sugar Ester S-970 [Mitsubishi-Kagaku Foods http://www.mfc.co.jp/]
Chem. Descrip.: Sucrose mono, distearate
See Sucrose distearate
CAS 27195-16-0; EINECS/ELINCS 248-317-5
Uses: Emulsifier, conditioner, softener, detergent for pharmaceuticals; solubilizer, stabilizer for fat-sol. vitamins and antibiotics; lubricant, disintegrant, binder, and filler for tablets
Properties: Powd.; odorless; tasteless; partly sol. in propylene glycol, glycerin, liq. paraffin, soybean and cottonseed oils, water; m.p. 49-56 C; decomp. pt. 234 C; HLB 9.0; surf. tens. 35.8 dynes/cm (0.1% aq.); nonionic; 100% conc.
Toxicology: Nontoxic; nonirritating to eyes and skin

Ryoto Sugar Ester S-1170 [Mitsubishi-Kagaku Foods http://www.mfc.co.jp/]
Chem. Descrip.: Sucrose stearate
CAS 25168-73-4; EINECS/ELINCS 246-705-9
Uses: Emulsifier, conditioner, detergent for pharmaceuticals; solubilizer, stabilizer for fat-sol. vitamins and antibiotics; lubricant, disintegrant, binder, and filler for tablets; solubilizer, dispersant for flavors and preservatives
Properties: Powd.; odorless; tasteless; partly sol. in propylene glycol, glycerin, liq. paraffin, soybean and cottonseed oils; m.p. 49-56 C; decomp. pt. 234 C; HLB 11; surf. tens. 34.7 dynes/cm (0.1% aq.); nonionic; 100% conc.
Toxicology: Nontoxic; nonirritating to eyes and skin

Ryoto Sugar Ester S-1570 [Mitsubishi-Kagaku Foods http://www.mfc.co.jp/]
Chem. Descrip.: Sucrose stearate
CAS 25168-73-4; EINECS/ELINCS 246-705-9
Uses: Emulsifier, conditioner, detergent for pharmaceuticals; solubilizer, stabilizer for fat-sol. vitamins and antibiotics; lubricant, disintegrant, binder, and filler for tablets; solubilizer, dispersant for flavors and preservatives
Properties: Powd.; odorless; tasteless; sol. in water; partly sol. in propylene glycol, glycerin, liq. paraffin, soybean and cottonseed oils; m.p. 49-55 C; decomp. pt. 234 C; HLB 15.0; surf. tens. 34.7 dynes/cm (0.1% aq.); Ross-Miles foam 11 mm (0.25% aq., initial); nonionic; 100% conc.
Toxicology: Nontoxic; nonirritating to eyes and skin

Chem. Descrip.: Sorbitan sesquioleate
CAS 8007-43-0; EINECS/ELINCS 232-360-1
Uses: Emulsifier
Properties: Yellowish-brn. liq.; HLB 3.7; surface tens. (0.1% sol'n) 59.2 mN/m @ 25 C; interfacial tens. (0.1% sol'n) 42.5 mN/m @ 25 C; nonionic; 100% conc.

S-49-H [Dai-ichi Kogyo Seiyaku http://www.dks-web.co.jp]
Chem. Descrip.: Sorbitan monooleate See Sorbitan oleate
EINECS/ELINCS 215-665-4
Uses: Emulsifier, dispersant
Properties: Yellowish-brn. liq.; HLB 4.3; nonionic; 100% conc.

Saboderm AB [Sabo SpA http://www.sabospa.it]
Chem. Descrip.: Alkyl benzoate See C12-15 alkyl benzoate
CAS 68411-27-8; EINECS/ELINCS 270-112-4
Uses: Coemulsifier, diluents, lubricant in ointments
Properties: Liq.
Saboderm AMD [Sabo SpA
http://www.sabospa.it]
Chem. Descrip.: POE 6 almond oil See Almond oil PEG-6 esters
CAS 124046-50-0
Uses: Coemulsifier, diluents, lubricant in ointments
Properties: Liq.

Saboderm CC [Sabo SpA
http://www.sabospa.it]
Chem. Descrip.: POE 6 caprylic capric glycerides
Uses: Coemulsifier, diluents, lubricant in ointments
Properties: Liq.

Saboderm CG [Sabo SpA
http://www.sabospa.it]
Chem. Descrip.: Coco triglycerides
Uses: Coemulsifier, diluents, lubricant in ointments
Properties: Liq.

Saboderm CSN [Sabo SpA
http://www.sabospa.it]
Chem. Descrip.: Cetyl stearyl isononanoate See Cetearyl isononanoate
CAS 84878-33-1; EINECS/ELINCS 284-424-3
Uses: Coemulsifier, diluents, lubricant in ointments
Properties: Liq.

Saboderm CSO [Sabo SpA
http://www.sabospa.it]
Chem. Descrip.: Cetyl stearyl octanoate See Cetearyl octanoate
CAS 59130-70-7; EINECS/ELINCS 261-620-7
Uses: Coemulsifier, diluents, lubricant in ointments
Properties: Liq.

Saboderm DBA [Sabo SpA
http://www.sabospa.it]
Chem. Descrip.: Dibutyl adipate
CAS 105-99-7; EINECS/ELINCS 203-350-4
Uses: Coemulsifier, diluents, lubricant in ointments
Properties: Liq.

Saboderm DOA [Sabo SpA
http://www.sabospa.it]
Chem. Descrip.: Dibutyl adipate
CAS 105-99-7; EINECS/ELINCS 203-350-4
Uses: Coemulsifier, diluents, lubricant in ointments
Properties: Liq./paste

Saboderm DOE [Sabo SpA
http://www.sabospa.it]
Chem. Descrip.: Dioctyl ether
CAS 629-82-3; EINECS/ELINCS 211-112-6
Uses: Coemulsifier, diluents, lubricant in ointments
Properties: Liq.

Saboderm EDL [Sabo SpA
http://www.sabospa.it]
Chem. Descrip.: Hexyldecanol and hexyldecyl laurate
Uses: Coemulsifier, diluents, lubricant in ointments
Properties: Liq.

Saboderm EO [Sabo SpA
http://www.sabospa.it]
Chem. Descrip.: Octyl oleate
Uses: Coemulsifier, diluents, lubricant in ointments
Properties: Liq.

Saboderm G 20 [Sabo SpA
http://www.sabospa.it]
Chem. Descrip.: Octyldodecanol
CAS 5333-42-6; EINECS/ELINCS 226-242-9
Uses: Coemulsifier, diluents, lubricant in ointments
Properties: Liq.

Saboderm GS [Sabo SpA
http://www.sabospa.it]
Chem. Descrip.: Glycerl triisostearate See Triisostearin
CAS 26942-95-0; EINECS/ELINCS 248-122-5
Uses: Coemulsifier, diluents, lubricant in ointments
Properties: Liq.

Saboderm HE [Sabo SpA
http://www.sabospa.it]
Chem. Descrip.: POE 7 glycerl cocoate See PEG-7 glyceryl cocoate
Uses: Coemulsifier, diluents, lubricant in ointments
Properties: Liq.

Chem. Descr.: Sorbitan tristearate  
CAS 26256-58-0; EINECS/ELINCS 247-569-3  
Uses: Emulsifier for pharmaceuticals  
Properties: Flakes; HLB 2.1

Sabosorb TSE [Sabo SpA http://www.sabospa.it]  
Chem. Descr.: POE 20 sorbitan tristearate See Polysorbate 65  
CAS 9005-71-4  
Uses: Emulsifier; solubilizer for vitamins, active ingreds., perfumes and flavors; secondary surfactant for very mild detergents  
Properties: Waxy; HLB 10.5

Sabowax AO [Sabo SpA http://www.sabospa.it]  
Chem. Descr.: Cetearyl alcohol and POE fatty alcohols  
Uses: Coemulsifier, diluents, lubricant in ointments  
Properties: Flakes

Use Level: 3-5%

Sabowax BWS [Sabo SpA http://www.sabospa.it]  
Chem. Descr.: Cetyl palmitate, paraffin and glyceryl stearate  
Uses: Coemulsifier, diluents, lubricant in ointments  
Properties: Flakes

Sabowax CP [Sabo SpA http://www.sabospa.it]  
Chem. Descr.: Cetyl palmitate  
CAS 540-10-3; EINECS/ELINCS 208-736-6  
Uses: Coemulsifier, diluents, lubricant in ointments  
Properties: Flakes

Sabowax CR [Sabo SpA http://www.sabospa.it]  
Chem. Descr.: Cetyl ricinoleate  
CAS 10401-55-5; EINECS/ELINCS 233-864-4  
Uses: Coemulsifier, diluents, lubricant in ointments  
Properties: Solid/paste

Sabowax EGDS [Sabo SpA http://www.sabospa.it]  
Chem. Descr.: Glycol distearate  
EINECS/ELINCS 211-014-3  
Uses: Coemulsifier, diluents, lubricant in ointments  
Properties: Flakes

Sabowax EGMS [Sabo SpA http://www.sabospa.it]  
Chem. Descr.: Glycol stearate  
Uses: Coemulsifier, diluents, lubricant in ointments  
Properties: Flakes

Sabowax GF [Sabo SpA http://www.sabospa.it]  
Chem. Descr.: Glycol stearate, cetyl palmitate, cetaryl alcohol, hydrogenated coconut oil  
Uses: Coemulsifier, diluents, lubricant in ointments  
Properties: Flakes

Sabowax GMS [Sabo SpA http://www.sabospa.it]  
Chem. Descr.: Glyceryl stearate  
Uses: Coemulsifier, diluents, lubricant in ointments  
Properties: Flakes
Trade Name Reference

Sabowax HCO [Sabo SpA http://www.sabospa.it]
Chem. Descrip.: Hydrogenated coconut oil
CAS 84836-98-6; EINECS/ELINCS 284-283-8
Uses: Coemulsifier, diluents, lubricant in ointments
Properties: Solid

Sabowax HRP [Sabo SpA http://www.sabospa.it]
Chem. Descrip.: Hydrogenated castor oil
CAS 8001-78-3; EINECS/ELINCS 232-292-2
Uses: Coemulsifier, diluents, lubricant in ointments
Properties: Powd.

Sabowax HRP/T [Sabo SpA http://www.sabospa.it]
Chem. Descrip.: Hydrogenated castor oil
CAS 8001-78-3; EINECS/ELINCS 232-292-2
Uses: Coemulsifier, diluents, lubricant in ointments
Properties: Talc

Chem. Descrip.: Ethyl linolate
CAS 544-35-4; EINECS/ELINCS 208-868-4
Uses: Vitamin deriv. for pharmaceuticals
Regulatory: EU, USA permitted
Properties: Yel. liq.; oil-sol.
Use Level: 0.5-3%
Storage: > 1 yr. shelf life if stored @ R.T. and protected from It.

Sag 471 [GE Silicones http://www.gesilicones.com]
Chem. Descrip.: Polyalkylene oxide (> 80%), silica filled polydimethylsiloxane (< 15%), polyalkylknoxye modified polydimethylsiloxane (< 5%) and silica (< 5%) See Allyloxypolyethyleneglycol methyl ether; Siloxanes and silicones, dimethyl, reaction prod. with silica
CAS 25322-69-4; 67762-90-7; 67762-87-2; 7631-86-9
Uses: Antifoam for vaccine mfg., antibiotic fermentations involving Actinomycetales organisms
Features: Autoclavable; sterilization stability
Regulatory: DOT nonregulated; CERCLA nonreportable; SARA nonreportable; MA Right-to-Know reportable; PA Right-to-Know reportable; NJ Right-to-Know reportable; Canada DSL; Europe EINECS; Australia AICS; Korea ECL
Properties: Visc. translucent wh.; mild polyether odor; insol. in water; water-disp.; sp.gr. 0.993; visc. 2500 cP; vapor pressure < 1.33 hPa; flash pt. 160 C; evaporation rate < 1; 100% act.
Precaution: Use protective gloves, glasses; prevent runoff
Hazardous Decomp. Prods.: COx, SiOx
HMIS: Health 0, Flammability 1, Reactivity 0
Storage: 12 mos. shelf life; keep container tightly sealed when not in use; store @ ambient temps.; prevent prolonged exposure to extreme heat or freezing, which may cause prod. separation; if separation occurs, thaw if frozen, stir contents

Sag 710 [GE Silicones http://www.gesilicones.com]
Chem. Descrip.: Dimethicone and silica
Uses: Defoamer for cosmetics (balms, lotions, moisturizers, ointments, shampoos, sunscreens)
Regulatory: FDA 21CFR §173.340, 175.105
Properties: Disp. in water; 10% act.

Sag 720 [GE Silicones http://www.gesilicones.com]
Chem. Descrip.: Silicone emulsion
Uses: Defoamer for cosmetics (balms, lotions, moisturizers, ointments, shampoos, sunscreens)
Regulatory: DOT nonregulated; FDA 21CFR §173.340, 175.105; USDA approved; CERCLA nonreportable; SARA nonreportable; MA Right-to-Know reportable (hydrogen chloride); NJ Right-to-Know reportable; Canada DSL; Australia AICS; Japan ENCS; Korea ECL; Philippines PICCS
Properties: Opaque wh. liq.; mild odor; sol. in water; sp.gr. 1.01; vapor dens > 1; vapor pressure < 26.6 hPa; m.p. 0 C; b.p. > 100 C; evaporation rate < 1; 20% act.
Toxicology: TSCA listed
Precaution: Use protective gloves and glasses
Hazardous Decomp. Prods.: COx, oxides of silicon
HMIS: Health 0, Flammability 0, Reactivity 0

Sag 730 [GE Silicones http://www.gesilicones.com]
Chem. Descrip.: Silica filled polydimethylsiloxane (< 35%) and proprietary additives (< 10%) in water
Uses: Defoamer for cosmetics (balms, lotions, moisturizers, ointments,
Shampoos, sunscreens)

Regulatory:
- DOT nonregulated; FDA 21 CFR §173.340, 175.105, 176.170, 176.180, 177.1640(b); BATF 27 CFR §240.1051; USDA approved; CERCLA nonreportable; SARA nonreportable; MA Right-to-Know reportable (hydrogen chloride); PA Right-to-Know nonreportable; NJ Right-to-Know reportable; Canada DSL; Australia AICS; Japan ENCS; Korea ECL; Philippines PICCS; Europe EINECS

Properties:
- Opaque wh. liq.; mild odor; disp. in water; sp.gr. 1.007; vapor dens > 1; vapor pressure < 26.6 hPa; m.p. 0 C; b.p. > 100 C; evaporation rate < 1; 30% act.

Toxicology:
- TSCA listed

Precaution:
- Use protective gloves and glasses

Hazardous Decomp. Prods.:
- COx, oxides of silicon

HMIS:
- Health 0, Flammability 0, Reactivity 0

Sag 5693 [GE Silicones http://www.gesilicones.com]

Uses:
- Antifoam in pharmaceuticals

Features:
- Food grade; combines foam control with low oxygen suppression; autoclavable

Regulatory:
- FDA 21 CFR §173.340

Properties:
- Sol. in lard, soybean, and vegetable oils; disp. in water

SAIB-SG [Eastman http://www.eastman.com]

Chem. Descrip.: Sucrose acetate isobutyrate, special grade

CAS 126-13-6; EINECS/ELINCS 204-771-6

Uses:
- Stabilizer for o/w emulsions in pharmaceutical syrups and suspensions; clouding agent in clear liqs.; modifying extender for film-forming polymers (e.g., cellulose esters) in solid oral dosage forms; fragrance fixing agent

Features:
- Good thermal, UV, and hydrolytic stability

Regulatory:
- Kosher

Properties:
- Gardner < 1 visc. liq., low odor; sol. in most alcohols, veg. oils, flavoring oils, animal fats, veg.-based waxes; m.w. 832-856; sp.gr. 1.146; dens. 9.55 lb/gal; visc. 100,000 cP (30 C); dec. pt. 288 C; flash pt. (COC) 260 C; ref. index 1.454 (20 C)

Storage:
- Warm drum contents to 25-40 C for ease of handling

Sammi Gelatine [Sammi Ind. Co. Ltd http://www.ec21.net/co/g/gelatin/]

Chem. Descrip.: Gelatin KP, USP/NF, JP, BP

CAS 9000-70-8; EINECS/ELINCS 232-554-6

Uses:
- Gellant, thickener, film-former, protective colloid, adhesive agent, stabilizer, emulsifier, foaming agent in pharmaceuticals (hard/soft capsules, coatings, tablets)

Properties:
- 12 mesh; visc. 23-46 mps; pH 5.0-5.5; < 12% loss on drying

Chem. Descrip.: Microcrystalline cellulose

CAS 9004-34-6

Uses:
- Binder, filler, disintegrant, flow aid for direct compression tabletting; binder, wicking agent, absorbent in wet granulation; flow aid in capsules

Features:
- Inert; free from org. and inorg. contaminants; stable

Regulatory:
- USP/NF compliance

Properties:
- Wh. to off-wh. free-flowing powd.; 90 µ particle size; 1% max. 60 mesh; 55% max. 200 mesh; odorless; tasteless; insol. in water, dil. acids, most org. solvs.; Pract. insol. in NaOH sol'n.; pH 5-7.5; 97-102% assay (cellulose); ≤ 6% loss on drying

Storage:
- No specific requirement for storage; no expiration date; may absorb moisture if exposed to > 65% r.h.

Sancel-102 [NB Entrepreneurs http://www.nbent.com]

Chem. Descrip.: Microcrystalline cellulose

CAS 9004-34-6

Uses:
- Binder, filler, disintegrant, flow aid for direct compression tabletting; binder, wicking agent, absorbent in wet granulation; flow aid in capsules

Features:
- Inert; free from org. and inorg. contaminants; stable

Regulatory:
- USP/NF compliance

Properties:
- Wh. to off-wh. free-flowing powd.; 50 µ particle size; 1% max. 60 mesh; 30% max. 200 mesh; odorless; tasteless; insol. in water, dil. acids, most org. solvs.; Pract. insol. in NaOH sol'n.; pH 5-7; 97-102% assay (cellulose); ≤ 6% loss on drying

Storage:
- No specific requirement for storage; no expiration date; may absorb moisture if exposed to > 65% r.h.

Sancel-112 [NB Entrepreneurs http://www.nbent.com]

Chem. Descrip.: Microcrystalline cellulose

CAS 9004-34-6

Uses:
- Binder, filler, disintegrant, flow aid for
Trade Name Reference

direct compression tableting; binder, wicking agent, absorbent in wet granulation; flow aid in capsules

Features: Low moisture grade; inert; free from org. and inorg. contaminants; stable

Regulatory: USP/NF compliance

Properties: Wh. to off-wh. free-flowing powd.; 60 mesh, NMT 8%; 200 mesh, NMT 45%; odorless; tasteless; insol. in water, dil. acids, most org. solvs.; pract. insol. in NaOH sol'n.; bulk dens. 0.28 - 0.33 g/cc; pH 5-7; 97-102% assay (cellulose); ≤ 3% loss on drying

Storage: No specific requirement for storage; no expiration date; may absorb moisture if exposed to > 65% r.h.
