Sodium fluorescein. See D&C Yellow No. 8; Fluorescein sodium

Sodium fluoride
CAS 7681-49-4; EINECS/ELINCS 231-667-8
Chemical Component Cross-Reference

UN 1690 (DOT)
Synonyms: Sodium fluoride, solid and sol’n.; Sodium hydrofluoride; Sodium monofluoride
Classification: Inorganic salt
Empirical: FNα
Formula: NaF
Properties: Wh. powd. or colorless cryst., odorless; sol. 1 in 25 of water; pract. insol. in alcohol; m.w. 41.99; dens. 2.8 kg/l; vapor pressure 1 mm (1077 C); m.p. 993 C; b.p. 1700 C
Toxicology: ACGIH TLV/TWA 2.5 mg (F)/m3; LD50 (oral, rat) 52 mg/kg, (IP, rat) 22 mg/kg, (subcut., rat) 175 mg/kg, (IV, rat) 26 mg/kg; poison by ing., skin contact, IV, IP, subcut., and intramuscular routes; human poison by ing.; human systemic effects by ing. and intradermal routes; corrosive irritant to skin, eyes, mucous membranes; questionable carcinogen; experimental tumorigen, teratogen, reproductive effector; human mutagenic data; phytotoxic; TSCA listed
Precaution: Corrosive; keep away from food
Hazardous Decomp. Prods.: Heated to decomp., emits toxic fumes of F– and Na2O
NFPA: Health 3, Flammability 0, Reactivity 0
Uses: Active fluorocomponent for tooth decay prevention in toothpaste, chewing gum, mouth rinsing agent, dental floss (impregnation), drinking water fluoridation and other dentifrices.
Regulatory: FDA 21CFR §175.105, 177.2800; USP, BP, Ph.Eur. compliance; SARA reportable; Canada DSL

Sodium fluoride, solid and sol’n. See Sodium fluoride

Sodium fluorophosphate
CAS 10163-15-2; EINECS/ELINCS 233-433-0
Synonyms: Disodium fluorophosphate; Disodium monofluorophosphate; Disodium phosphofluoridate; MFP; Phosphorofluoridic acid, disodium salt; SMFP; Sodium fluophosphate; Sodium monofluorophosphate (INCI); Sodium phosphorofluoridate; Sodium phosphorofluoridate
Classification: Inorg. salt
Empirical: FNα3O3P
Formula: FO3P • 2Na
Properties: Colorless cryst.; sol. 250 g/l in water; insol. in ethanol, ether; m.w. 143.95; m.p. 625 C; pH 6.5-8.0 (2%)
Toxicology: LD50 (oral, rat) 570 mg/kg, (IP, rat) 220 mg/kg; poison by IP route; toxic by inh., skin contact; mod. toxic by ing.; strong irritant; irritating to eyes, skin, respiratory system; questionable carcinogen; tumorigen; mutagen
Hazardous Decomp. Prods.: Heated to
Chemical Component Cross-Reference† = pharmaceutical grade

**Sodium formaldehyde hydrosulfite**  
*See Sodium formaldehyde sulfoxylate*

**Sodium formaldehyde sulfoxylate**  
CAS 149-44-0; 6035-47-8 (dihydrate); EINECS/ELINCS 295-739-4

**Synonyms:**  
Formaldehyde hydrosulfite; Formaldehyde sodium bisulfite adduct; Formaldehyde sodium sulfoxylate; Hydroxymethanesulfinic acid monosodium salt; Hydroxymethanesulfonic acid sodium salt; Methanesulfonic acid, hydroxy-, monosodium salt; Monosodium hydroxymethane sulfinate; Sodium formaldehyde hydrosulfite; Sodium hydroxymethane sulfinate; Sodium methanalsulfoxylate; Sodium sulfoxylate formaldehyde

**Definition:**  
Avail. as the dihydrate

**Empirical:**  
CH₃NaO₃S; CH₃NaO₃S • 2H₂O

**Formula:**  
HOCH₂SOONa or HOCH₂SOONa • 2H₂O

**Properties:**  
Wh. cryst., garlic odor; sol. in water; sl. sol. in alcohol, ether, chloroform, benzene; readily dec. by dil. acids; m.w. 118.09 (anhyd.), 154.11 (dihydrate); m.p. 64-68 C (dihydrate); pH 9.5-10.5 (2%)

**Toxicology:**  
LD₅₀ (oral, rat) > 2 g/kg; LD₅₀ (subcut., mouse) 3000 mg/kg; mod. toxic by ing. and subcut. routes; irritating to respiratory system; TSCA listed

**Hazardous Decomp. Prods.:**  
Heated to decomp., emits toxic fumes of SOₓ, Na₂O

**HMIS:**  
Health 2, Flammability 1, Reactivity 1

**Storage:**  
Keep well closed in cool place

**Uses:**  
Antioxidant in pharmaceuticals, parenterals, topicals; treatment of mercury poisoning

**Regulatory:**  
FDA 21CFR §175.105, 176.170, 177.1210, 177.2600; FDA approved for parenterals, topicals; USP/NF compliance; Canada DSL

**Manuf./Distrib.:**  

**Sodium glucoheptonate (INCI).**  
*See Sodium glucoheptonate*

**Sodium glucoheptonate**  
CAS 13007-85-7; 31138-65-5; EINECS/ELINCS 235-849-8

**Synonyms:**  
Gluceptate, sodium; Glucoheptonic acid, sodium salt; D-Glycero-D-gulo-heptonic acid, monosodium salt; Sodium gluceptate (INCI); Sodium D-glycero-D-gulo-heptonate

**Classification:**  
Organic salt

**Empirical:**  
C₇H₁₃NaO₈

**Formula:**  
HOCH₂(CHOH)₅COO– Na⁺

**Properties:**  
Lt. tan cryst. powd.; m.w. 248.16

**Uses:**  
Intravenous pharmaceuticals

**Regulatory:**  
FDA 21CFR §173.310, 176.150; FDA approved for intravenous; Canada DSL

**Manuf./Distrib.:**  
Sodium gluconate

CAS 527-07-1; EINECS/ELINCS 208-407-7

Synonyms: D-Gluconic acid monosodium salt; Gluconic acid sodium salt; Monosodium gluconate; Monosodium D(-)-pentahydroxy capronate; Sodium D-gluconate

Classification: Nonaromatic acid salt

Definition: Sodium salt of D-gluconic acid

Empirical: C₆H₁₁NaO₇

Formula: HOCH₂CHOHCHOHCHOHCHOHCOONa

Properties: Wh. to ylsh. cryst. powd., pleasant odor; sol. 59 g/100 ml water; sl. sol. in alcohol; insol. in ether; m.w. 218.16; m.p. 206°C (dec.)

Toxicology: LDLo (IV, rabbit) 7630 mg/kg; low toxicity by IV route; TSCA listed

Environmental: Easily biodegradable; presents no waste problem

Precaution: Avoid dust formation

Hazardous Decomp. Prods.: Heated to decomp., emits acrid smoke and irritating fumes

Storage: Keep in well-closed container in dry place

Uses: Chelating agent, nutrient, mineral source in pharmaceuticals, orals, injections

Regulatory: FDA 21CFR §178.1010, 182.6757, GRAS; Europe listed; UK approved; FDA approved for orals; Canada DSL

†=pharmaceutical grade
Sodium glyceryl olate phosphate
CAS 208539-93-9; 208539-94-0
Definition: Sodium salt of a complex mixture of phosphate esters of glyceryl monooleate
Properties: Anionic
Uses: Emulsifier for pharmaceuticals
Trade Names: Hectalite® 200
Sodium hectorite
Uses: Visc. builder, suspending agent, binder for pharmaceuticals
Trade Names: Hectalite® 200
Sodium hexametaphosphate
CAS 10124-56-8; EINECS/ELINCS 233-343-1
FEMA 3027
Synonyms: Glassy sodium; Hexametaphosphate sodium salt; Hexasodium metaphosphate; HMP; Metaphosphoric acid, hexasodium salt; Phosphate, sodium hexameta-; SHMP; Sodium polymetaphosphate
Classification: Inorganic salt
Empirical: O_{18}P_{6} • 6Na
Formula: (NaPO_{3})_{6}
Properties: Colorless to wh. powd. or flakes; odorless; sol. in water; m.w. 611.76; sp.gr. 2.181; m.p. 1184 F; pH 6.0-7.7; anionic
Toxicology: LD_{50} (oral, rat) 6200 mg/kg, (IP, mouse) 870 mg/kg, (subcut., mouse) 1300 mg/kg, (IV, mouse) 62 mg/kg; poison by IV route; mod. toxic by IP, subcut. routes; mildly toxic by ing.; may cause skin/eye/respiratory/digestive tract irritation; may cause flaccid paralysis, somnolence, convulsions, changes in tubules (incl. acute renal failure); TSCA listed
Hazardous Decomp. Prods.: Heated to decomp., emits toxic fumes of PO_{x} and Na_{2}O
HMIS: Health 1, Flammability 0, Reactivity 0
Storage: Store in cool, dry place in a tightly closed container

†=pharmaceutical grade
Uses: Pharmaceuticals (buccals)
Regulatory: FDA 21CFR §173.310, 182.90, 182.6760, 182.6769, GRAS; USDA 9CFR §318.7, 381.147; FEMA GRAS; FDA approved for buccals; Canada DSL

Sodium hyaluronate
CAS 9067-32-7; EINECS/ELINCS 232-678-0
Synonyms: Hyaluronic acid, sodium salt
Definition: Sodium salt of hyaluronic acid, found naturally in eye fluids
Empirical: (C_{14}H_{20}NO_{11}Na)_{n}
Properties: Wh. powd.; m.w. 800,000-1,600,000
Toxicology: LD_{50} (oral, rat) > 800 mg/kg, (IP, mouse) 1500 mg/kg; poison by IV route; moderately toxic by intraperitoneal route; experimental teratogen; other experimental reproductive effects
Hazardous Decomp. Prods.: Heated to decomp., emits toxic fumes of Na_{2}O
Storage: Hygroscopic; keep under argon
Uses: Humectant, moisturizer, skin conditioner, film-former, thickener, gellant

Sodium hydroxide
CAS 1310-73-2; EINECS/ELINCS 215-185-5
UN 1823 (DOT); 1824 (DOT); INS524; E524
Synonyms: Caustic soda; Lye; Soda lye; Sodium hydrate; White caustic
Classification: Alkali hydroxide
Empirical: HNaO
Formula: NaOH

Properties: Wh. solid beads or pellets; absorbs water and CO2 from air; sol. in water, alcohol, methanol, glycerin; m.w. 40.00; dens. 2.12 (20/4 C); vapor pressure 1 mm (739 C); m.p. 318 C; b.p. 1390 C

Toxicology: ACGIH TLV/CL 2 mg/m³ of air; LD50 (IP, mouse) 40 mg/kg; LDLo (oral, rabbit) 500 mg/kg; poison by IP route; mod. toxic by ing.; corrosive irritant to eyes, skin, mucous membrane; mists and dusts cause small burns; inh. can damage upper respiratory tract and lungs; mutagenic data; TSCA listed

Precaution: DOT: Corrosive material; strong base; incompat. with acids and water; may ignite or react violently with many org. compds.; dangerous material to handle

Hazardous Decomp. Prods.: Heated to decomp., emits toxic fumes of Na₂O

NFPA: Health 3, Flammability 0, Reactivity 1
Storage: Deliq.

Uses: Alkalizer, buffer in pharmaceuticals, injectables, dentals, parenterals, inhalants, ophthalmics, orals, rectals, topicals, vaginals, eyewashes

Regulatory: FDA 21 CFR §73.85, 155.191, 155.194, 163.110, 163.111, 163.112, 172.560, 172.814, 172.892, 173.310, 176.170, 176.180, 176.210, 177.1600, 177.2800, 184.1763, GRAS; USDA 9 CFR §318.7, 381.147; BATF 27 CFR §21.101, 240.1051a; Canada DSL; Japan restricted; Europe listed; UK approved; FDA approved for injectables, dentals, parenterals, inhalants, ophthalmics, orals, rectals, topicals, vaginals; USP/NF, BP, EP compliance; SARA reportable

Formula: NaI
Properties: Wh. or colorless cryst. or powd.; discolored by air; very sol. in water; sol. in alcohol and glycerin; m.w. 149.89; dens. 3.667; vapor pressure 1 mm Hg (767 C); m.p. 651 C; b.p. 1300 C
Toxicology: LD50 (oral, rat) 4340 mg/kg, (IV, rat) 1060 mg/kg, (IP, mouse) 430 mg/kg; mod. toxic by ing., IV, IP routes; primary skin and eye irritant; human teratogenic and reproductive effects by ing.; TSCA listed
Precaution: Reacts violently with BrF3, HClO4, oxidants
Hazardous Decomp. Prods.: Heated to decomp., emits toxic fumes of I- and Na2O
HMIS: Health 1, Flammability 0, Reactivity 1
Storage: Hygroscopic, deliq.; store @ R.T.
Uses: Antiseptic in pharmaceuticals, topical anti-infective prods., parenterals, vaginals; expectorant
Regulatory: FDA approved for parenterals, topicals, vaginals; BP, EP compliance; Canada DSL

Trade Names Containing: Punctilious® SDA
25A-2 190 Proof

Sodium iodine. See Sodium iodide
Sodium iron EDTA. See Sodium ferric EDTA
Sodium isopropylbenzenesulfonate. See Sodium cumenesulfonate
Sodium iso thiocyanate. See Sodium thiocyanate
Sodium lactate
CAS 72-17-3; EINECS/ELINCS 200-772-0
INS325; E325
Synonyms: 2-Hydroxypropanoic acid

†=pharmaceutical grade

monosodium salt; Lacolin; Lactic acid, monosodium salt; Lactic acid, sodium salt; Sodium-L-2-hydroxypropionate

Definition: Sodium salt of lactic acid
Empirical: C₃H₅O₃ • Na
Formula: CH₃CHOHCOONa

Properties: Colorless or ylsh. syrupy liq.,

odorless to sl. odor, sl. salt taste; misc. in

water, alcohol; m.w. 112.07; m.p. 17 C; dec. 140 C; anionic

Toxicology: LD50 (IP, rat) 2000 mg/kg; mod.
toxic by IP route; eye irritant; TSCA listed

Precaution: Combustible

Hazardous Decomp. Prods.: Heated to
decomp., emits toxic fumes of Na₂O

HMIS: Health 1, Flammability 0, Reactivity 0

Storage: Very hygroscopic

Uses: Antimicrobial, preservative, emulsifier,

flavor, humectant, pH control agent, buffer for pharmaceuticals, orals, parenterals

Regulatory: FDA 21CFR §184.1768, GRAS (not for infant formulas); USDA 9CFR §318.7;
Japan approved; Europe listed; UK approved;
FDA approved for parenterals, orals; USP/NF (in solution), BP, EP compliance; Canada DSL

Handbook of Pharmaceutical Additives, Third Edition

Trade Names: Arlac S; Galaflow SL; Purasal® S; Purasal® S/PF 60

Sodium L-lactate
CAS 867-56-1; EINECS/ELINCS 212-762-3
Synonyms: (S)-2-Hydroxypropionic acid sodium salt; L-Lactic acid sodium salt
Empirical: C3H5NaO3
Formula: CH3CH(OH)COONa
Properties: Hygroscopic; m.w. 112.06
Uses: Pharmaceuticals (injectables, parenterals)
Regulatory: FDA approved for injectables, parenterals
Manuf./Distrib.: Aldrich http://www.sigma-aldrich.com; Fluka http://www.sigma-aldrich.com; Sigma http://www.sigma-aldrich.com/belgium

Sodium laureth-5 carboxylate
CAS 33939-64-9 (generic); 38975-03-0
Synonyms: Laureth-5 carboxylic acid, sodium salt; PEG-5 lauryl ether carboxylic acid, sodium salt; 3,6,9,12,15-Pentaoxaheptacosanoic acid, sodium salt; POE (5) lauryl ether carboxylic acid, sodium salt; Sodium PEG (5) lauryl ether carboxylate; Sodium 3,6,9,12,15-pentaoxaheptacosanoate; Sodium POE (5) lauryl ether carboxylate
Definition: Sodium salt of the carboxylic acid derived from laureth-5
Empirical: C32H43NaO7
Formula: CH3(CH2)10CH2(OCH2CH2)nOCH2COONa, avg. n = 4
Properties: Anionic
Uses: Surfactant, foaming agent for medicated soaps and shampoos
Features: Mild

Sodium laureth-6 carboxylate
CAS 33939-64-9 (generic); 68987-89-3 (generic)
Synonyms: Laureth-6 carboxylic acid, sodium salt; PEG-6 lauryl ether carboxylic acid, sodium salt; Sodium POE (6) lauryl ether carboxylate
Definition: Sodium salt of the carboxylic acid derived from laureth-6
Empirical: C24H48NaO8
Formula: CH3(CH2)10CH2(OCH2CH2)nOCH2COONa, avg. n = 5
Properties: Anionic
Uses: Surfactant
Trade Names: Akypo®-Soft 45 NV

Sodium laureth sulfate
CAS 1335-72-4; 3088-31-1; 9004-82-4 (generic); 13150-00-0; 15826-16-1; 68585-34-2; 68891-38-3; EINECS/ELINCS 221-416-0
Synonyms: PEG (1-4) lauryl ether sulfate, sodium salt; Poly(oxy-1,2-ethanediyl), α-sulfo-ω-(dodecylxoy)-, sodium salt; Sodium lauryl ether sulfate; Sodium POE lauryl sulfate
Definition: Sodium salt of sulfated ethoxylated laurel alcohol
Formula: CH3(CH2)10CH2(OCH2CH2)nOSO3Na, avg. n = 1-4
Properties: Yel. liq. or paste; anionic
Toxicology: LD50 (oral, rat) 1600 mg/kg; mod. toxic by ing.; irritating to eyes and skin; TSCA listed
Hazardous Decomp. Prods.: Heated to decomp., emits toxic fumes of SOx and Na2O
Uses: Surfactant, foaming agent for pharmaceuticals, topicals
Features: Flash foamer
Regulatory: FDA approved for topicals
Trade Names: Emal 20C; Emal 270; Emal E-27C; Protachem™ ES-2
Chemical Component Cross-Reference

Trade Names Containing: [BIO-TERGE® 804; DeCONC HS-30; STEPANOL® ABHS-15C]

Sodium lauroyl sarcosinate
CAS 137-16-6; EINECS/ELINCS 205-281-5

Synonyms: N-Lauroylsarcosine, sodium salt; N-Methyl-N-(1-oxododecyl) glycine, sodium salt; Sodium-N-dodecanoyl-N-methylglycinate; Sodium N-lauroyl sarcosinate

Definition: Sodium salt of lauroyl sarcosine

Functional: Anionic

Empirical: C15H28NNaO3

Formula: CH3(CH2)10CONCH3CH2COONa

Properties: White powd.; m.w. 293.38; anionic

Toxicology: TSCA listed

Uses: Surfactant, foam builder/stabilizer, wetting agent, detergent, lubricant, bacteriostat, penetrant, enzyme inhibitor in pharmaceuticals, orals, topicals, dental care preps., surgical scrubs, depilatories

Features: Mild

Regulatory: FDA 21CFR §175.105, 177.1200; FDA approved for orals, topicals; Canada DSL

Manuf./Distrib.: [Ashland†; ChemTech Specialties; Chemplex Chems.; Croda Inc; Croda USA; Chemtech Specialties; Chemplex Chemicals; Croda Inc; Croda USA; Fluka; Sigma-Aldrich; Hampshire Chemicals; Independent Chemicals; Kraft Chemicals; Lowenstein Dyes & Cosmetics; J. Trade Names: Crodasinic LS30; Crodasinic LS30 NP; Crodasinic LS35; Crodasinic LS95; Crodasinic LS95 NP; MAPROSYL® 30-B; Oramix® L30; Sarcosinate LN

Sodium N-lauroyl sarcosinate. See Sodium sulfate

†=pharmaceutical grade

Sodium lauryl sulfate
CAS 151-21-3; 68585-47-7; 68955-19-1; 73296-89-6; EINECS/ELINCS 205-788-1; 271-557-7; 273-257-1

INS487

Synonyms: Dodecyl alcohol, hydrogen sulfate, sodium salt; Dodecyl sodium sulfate; Dodecyl sulfate sodium salt; Lauryl sulfate sodium; Lauryl sulfate sodium salt; Monododecyl sodium sulfate; SDS; SLS; Sodium dodecyl sulfate; Sodium n-dodecyl sulfate; Sodium monododecyl sulfate; Sulfuric acid monododecyl ester sodium salt

Classification: Alkyl sulfate salt

Definition: Sodium salt of lauryl sulfate

Empirical: C12H25O4S • Na

Formula: CH3(CH2)10CH2OSO3Na

Properties: Wh. to cream crystals, flakes, or powd., faint fatty odor; mod. sol. in water; m.w. 288.38; sp.gr. > 1.1 (20 C); m.p. 204-207 C; anionic

Toxicology: LD50 (oral, rat) 1288 mg/kg, (IP, rat) 210 mg/kg, (IV, rat) 118 mg/kg; poison by IV, IP routes; mod. toxic by ing.; human skin irritant; experimental eye, severe skin irritant; mild allergen; experimental teratogen, reproductive effects; mutagenic data; TSCA listed

Precaution: Burns above 93.3 C; incompat. with strong oxidizers (increases fire risk)

Hazardous Decomp. Prods.: Thermal decomp. prods.: CO, CO2, SO2, H2S; heated to decomp., emits toxic fumes of SOx and Na2O

HMIS: Health 1, Flammability 0, Reactivity 0

Storage: Store in cool, dry, well-ventilated area, out of direct sunlight, away from incompat. materials

Uses: Emulsifier, wetting agent, solubilizer, dispersant in pharmaceuticals, oral liqs. and solids, topicals, dentals, vaginals

Use Level: 0.004-0.6 mg (oral solids); 0.01-0.02% (oral liqs.); 0.1-12.7% (topical pharmaceuticals)

Regulatory: FDA 21CFR §172.210, 172.822, 175.105, 175.300, 175.320, 176.170, 176.180, 176.210, 177.1200, 177.1210, 177.1630,

Sodium lauryl sulfoacetate |
CAS 1847-58-1; EINECS/ELINCS 217-431-7 |

Synonyms: Acetic acid, sulfo-, 1-dodecyl ester, sodium salt; Acetic acid, sulfo-,
1-dodecyl ester, S-sodium salt; Dodecyl sodium sulfoacetate; Sodium 2- |
dodecylxoyloxy)-2-oxoethane-1-sulfonate; |
Sulfoacetate acid, 1-dodecyl ester, sodium |
salt; Sulfoacetate acid dodecyl ester S- |
sodium salt |

Classification: Organic salt |
Empirical: C₁₄H₂₈O₅S • Na |
Formula: CH₃(CH₂)₁₀CH₂OOCCH₂SO₃Na |
Properties: M.w. 330.46; anionic |
Toxicology: LD₅₀ (oral, rat) 700 mg/kg, (IP, rat)
Chemical Component Cross-Reference

980 mg/kg; mod. toxic by ing. and IP routes; irritating to skin and eyes; TSCA listed
Hazardous Decomp. Prods.: Heated to decomp., emits toxic vapors of SOx
Uses: Surfactant, emulsifier, wetting agent, detergent, foaming agent, thickener in pharmaceuticals, topicals, dentifrices
Regulatory: FDA approved for topicals; Canada DSL

Trade Names Containing: STEPAN-MILD® LSB

Sodium lithium magnesium silicate. See Smectite

Sodium magnesiu magnesium silicate
CAS 53320-86-8
Synonyms: Lithium magnesium sodium silicate; Silicic acid, lithium magnesium sodium salt; Synthetic magnesium lithium silicate
Definition: Synthetic silicate clay composed mainly of magnesium and sodium silicate
Properties: Dens. 20.83 lb/gal
Toxicology: TSCA listed
Precaution: Avoid exposure of dust aerosol to sparks or open flame; wear safety glasses and protective gloves; avoid breathing dust
Uses: Base, carrier for act. ingreds.; binder, suspending agent, thickener for pharmaceuticals, toothpaste; adsorbent
Features: Inert; easily dispersed at room temperature, stable in 5-12 pH range

Sodium mercaptoproacetate. See Sodium thioglycolate

Sodium merthiolate. See Thimerosal

Sodium metabisulfite
CAS 7681-57-4; EINECS/ELINCS 231-673-0
UN NA 2693 (DOT); INS223; E223
Synonyms: Disodium disulfite; Disodium pyrosulfite; Disulfurous acid disodium salt; Pyrosulfurous acid disodium salt; Sodium bisulfite; Sodium metabsulfite; Sodium pyrosulfite
Classification: Inorganic salt
Empirical: O₆S₂ • 2Na
Formula: Na₂S₂O₅
Properties: Colorless cryst. or wh. to ylsh. powd.; pungent SO₂ odor; sol. in water forming acidic sol'ns.; sol. in glycerin; sl. sol. in alcohol, oxygenated solvs.; m.w. 190.10; dens. 1.480
Toxicology: ACGIH TLV/TWA 5 mg/m³; LD50 (IV, rat) 115 mg/kg, (parenteral, mouse) 910 mg/kg; poison by IV route; mod. toxic by parenteral route; experimental reproductive effects; mutagen; tumorigen; TSCA listed

Hazardous Decomp. Prods.: Heated to decomp., emits toxic fumes of SOx and Na₂O
HMIS: Health 1, Flammability 0, Reactivity 1
Storage: Moisture-sensitive; store @ R.T.
Uses: Antioxidant, reducing agent in pharmaceuticals, ophthalmics, orals, inhalants, injectables, parenterals, primarily in sympathomimetic and aminoglycoside medications
Use Level: 0.3-0.75% (sympathomimetic/aminoglycoside medications)
Regulatory: FDA 21CFR §173.310, 177.1200, 182.3766, GRAS; Europe listed; FDA approved for inhalants, injectables, parenterals, ophthalmics, orals; NF, BP, EP compliance; Canada DSL

Sodium metaperiodate. See Sodium m-periodate

Sodium metaphosphate
CAS 10361-03-2; EINECS/ELINCS 233-782-9
Synonyms: Graham's salt; IMP; Insoluble metaphosphate; Insoluble sodium metaphosphate; Kurrol's salt; Maddrell's salt; Metaphos; Metaphosphoric acid, sodium salt; Polymeric sodium metaphosphate; Poly (sodium metaphosphate); Sodium metaphosphate, insoluble; Sodium polyphosphates, glassy; Sodium tetrapolyphosphate

Empirical: O₃P • Na
Formula: (NaPO₃)ₙ, n = 3-10 (cyclic) or larger (polymers)
Properties: Amorphous wh. solid; sol. in min. acids; pract. insol. in water and in aq. sol'ns. of pyrophosphates and hexametaphosphates; m.w. 101.96
Toxicology: LD₅₀ (IP, mouse) 830 mg/kg; mod. toxic by IP route; may cause changes in tubules incl. acute renal failure, acute tubular necrosis; TSCA listed
Hazardous Decomp. Prods.: Heated to decomp., emits toxic fumes of Na₂O and PO₃
Uses: Dental polishing agent

Sodium N-methyl-N-cocoyl taurate. See Sodium methyl cocoyl taurate

Sodium methyl 4-hydroxybenzoate; Sodium methyl p-hydroxybenzoate. See Sodium methylparaben

Sodium N-methyl-N-(1-oxotetradecyl) aminoacetate. See Sodium myristoyl sarcosinate

Sodium methylparaben
CAS 5026-62-0; EINECS/ELINCS 225-714-1
INS219; E219
Synonyms: 4-Hydroxybenzoic acid, methyl ester, sodium salt; Methylparaben sodium; Methylparaben sodium salt; Sodium 4-(methoxycarbonyl) phenolate; Sodium
Chemical Component Cross-Reference

- methyl 4-hydroxybenzoate; Sodium methyl p-hydroxybenzoate
- Sodium methyl p-hydroxybenzoate

**Definition:** Sodium salt of methylparaben

**Empirical:** C₈H₇NaO₃

**Properties:** Wh. powd.; freely sol. in water; sparingly sol. in alcohol; insol. in fixed oils; m.w. 174.14; pH 9.5-10.5 (1 in 1000)

**Toxicology:** LD₅₀ (oral, mouse) 2 g/kg, (IP, mouse) 760 mg/kg

**Storage:** Hygroscopic

**Uses:** Antimicrobial, preservative in pharmaceuticals, orals

**Regulatory:** FDA approved for orals; BP, EP compliance; Canada DSL

**Manuf./Distrib.:** AB R Lundberg [http://www.norfoods.se/lundberg; Chemacon GmbH† [http://www.chemacon.de; Spectrum Quality Prods.† [http://www.spectrumchemical.com

**Trade Names:** Nipagin M Sodium

**Trade Names Containing:** Nipacombin A; Nipasept Sodium®

---

Sodium myristyl sulfate

**CAS 1191-50-0; EINECS/ELINCS 214-737-2**

**Synonyms:** 7-Ethyl-2-methyl-4-hexadecanol sulfate sodium salt; Myristyl sulfate, sodium salt; Sodium tetradecyl sulfate; Sulfuric acid, monotetradecyl ester, sodium salt; Sulfuric acid, myristyl ester, sodium salt; 1-Tetradecanol, hydrogen sulfate, sodium salt; Tetradecyl sulfate, sodium salt

**Definition:** Sodium salt of myristyl sulfate

**Empirical:** C₁₄H₂₉O₄S • Na

**Formula:** CH₃(CH₂)₁₂CH₂OSO₃Na

**Properties:** Anionic

**Toxicology:** TSCA listed

**Uses:** Cleanser, foaming agent, penetrant, emulsifier, antistat, bactericide for dentifrices

**Trade Names:** Sarcosinate MN

---

Sodium nitrate

**CAS 7631-99-4; EINECS/ELINCS 231-554-3**

**UN 1498 (DOT); UN 1499 (DOT); INS251**

**Synonyms:** Chile saltpeter; Cubic niter; Nitric acid, sodium salt; Soda niter; Soda nitre; Sodium nitrate (1:1)

**Empirical:** NaN₃O₃

**Formula:** NaNO₃

**Properties:** Colorless transparent cryt. or gran. powd.; odorless; saline sl. bitter taste; sol. in water, glycerol; sl. sol. in alcohol, oxygenated solvs.; m.w. 85.01; dens. 2.267; m.p. 308 C; dec. @ 380 C; pH 5.5-8.3 (5%)

**Toxicology:** LD₅₀ (oral, rat) 1267 mg/kg, (IV, mouse) 56 mg/kg; poison by IP, IV routes; experimental reproductive effector; TSCA listed

**Hazardous Decomp. Prods.:** Heated to decomp., emits toxic fumes of SOₓ and Na₂O

**Uses:** Detergent, foaming agent, wetting agent, penetrant, and emulsifier for pharmaceuticals

**Regulatory:** FDA 21CFR §175.105, 177.1210, 177.2800; Canada DSL

**Manuf./Distrib.:** Aldrich [http://www.sigma-aldrich.com; Sigma [http://www.sigma-aldrich.com/belgium

**Trade Names Containing:** Niaproof® Anionic Surfactant 4
Chemical Component Cross-Reference

Sodium nitrate (1:1). See Sodium nitrate

Sodium nitrate
CAS 7632-00-0; EINECS/ELINCS 231-555-9
UN 1500 (DOT); INS250

Synonyms: Diazotizing salts; Nitrous acid
sodium salt

Empirical: \(\ce{NNaO2}\)
Formula: \(\text{NaNO}_2\)

Properties: Sl. ylsh. or wh. cryst. or powd., bitter sl. saline taste; sol. in water, sl. sol. in alcohol, ether, oxygenated solvs.; slowly oxidized by air; m.w. 69.00; dens. 2.168; m.p. 271°C; b.p. 320°C

Toxicology: LD50 (oral, rat) 85 mg/kg, (IV, rat) 65 mg/kg, (IP, mouse) 158 mg/kg; poison by ing., inh., subcut., IV, and IP routes; human poison by ing.; human systemic effects (coma, blood pressure changes, nausea, vomiting, methemoglobinemia); eye irritant; can reduce blood oxygen levels; questionable carcinogen; can produce nitrosamines associated with cancers; experimental neoplastigen, tumorigen, teratogen, reproductive effects; human mutagenic data; TSCA listed

Precaution: Flamm.; strong oxidizing agent; ignites by friction in contact with org. matter; may explode when heated above

†=pharmaceutical grade
Chemical Component Cross-Reference

100 F or on contact with cyanides, NH4+ salts, cellulose, etc.; incompat. with butadiene, phthalic acid and anhydride, reducers, etc.

Hazardous Decomp. Prods.: Heated to decomp., emits toxic fumes of NOx and Na2O

HMIS: Health 2, Flammability 0, Reactivity 3

Storage: Hygroscopic; deliq. in air; oxygen-sensitive; store @ R.T.

Uses: Pharmaceuticals (antidote for cyanide poisoning)

Regulatory: BP, EP compliance; FDA 21 CFR §172.175, 172.177, 175.105, 175.300, 176.170, 176.180, 177.121, 177.260, 178.357, 381.147; Canada DSL; Japan approved (0.005-0.07 g/kg); Europe listed; UK approved

Sodium octadecanoate. See Sodium stearate
Sodium 9-octadecenoate. See Sodium oleate
Sodium 2-[(octadecylamino) carbonyl] benzoate. See Sodium phthalate stearyl amide

Sodium octanoate; Sodium n-octanoate. See Sodium caprylate

Sodium octoxynol-2 ethane sulfonate
CAS 2917-94-4; 67923-87-9; EINECS/ELINCS 220-851-3; 267-791-4

Synonyms: Entsfon; Entsfon sodium; 2-[2-[2-Octylenoxy] ethoxy] ethoxy] ethanesulfonic acid, sodium salt; Sodium 2-[2-[4-(1,1,3,3-tetramethylbutyl) phenoxy] ethoxy] ethoxy] ethanesulfonate

Classification: Organic compd.
Empirical: C20H34O6S • Na
Formula: C8H17C6H4O(CH2CH2O)2CH2CH2SO3Na
Properties: M.w. 425.54; anionic
Uses: Surfactant, emulsifier in pharmaceuticals, topicals
Regulatory: FDA 21 CFR §176.180; FDA approved for topicals; Canada DSL

Sodium octyl sulfate
CAS 142-31-4; EINECS/ELINCS 205-535-5

Synonyms: Octyl sodium sulfate; Octyl sulfate sodium salt; Sodium capryl sulfate; SOS; Sulfuric acid, mono-octyl ester, sodium salt
Empirical: C8H17NaO4S
Formula: CH3(CH2)7OSO3Na
Properties: M.w. 425.54; anionic
Uses: Surfactant, emulsifier in pharmaceuticals, topicals
Regulatory: FDA 21 CFR §176.180; FDA approved for topicals; Canada DSL

Sodium octyl sulfate
CAS 142-31-4; EINECS/ELINCS 205-535-5

Synonyms: Octyl sodium sulfate; Octyl sulfate sodium salt; Sodium capryl sulfate; SOS; Sulfuric acid, mono-octyl ester, sodium salt
Empirical: C8H17NaO4S
Formula: CH3(CH2)7OSO3Na
Properties: M.w. 425.54; anionic
Uses: Surfactant, emulsifier in pharmaceuticals, topicals
Regulatory: FDA 21 CFR §176.180; FDA approved for topicals; Canada DSL

Sodium octyl sulfate
CAS 142-31-4; EINECS/ELINCS 205-535-5

Synonyms: Octyl sodium sulfate; Octyl sulfate sodium salt; Sodium capryl sulfate; SOS; Sulfuric acid, mono-octyl ester, sodium salt
Empirical: C8H17NaO4S
Formula: CH3(CH2)7OSO3Na
Properties: M.w. 425.54; anionic
Uses: Surfactant, emulsifier in pharmaceuticals, topicals
Regulatory: FDA 21 CFR §176.180; FDA approved for topicals; Canada DSL
Sodium oleate
CAS 143-19-1; EINECS/ELINCS 205-591-0
INS470; E470a
Synonyms: 9-Octadecenoic acid, sodium salt; Sodium 9-octadecenoate
Definition: Sodium salt of oleic acid
Empirical: C_{18}H_{33}O_2 • Na
Formula: CH_3(CH_2)_7CH=CH(CH_2)_7COONa
Properties: Wh. powd., sl. tallow-like odor; sol. in ≈ 10 parts water, ≈ 20 parts alcohol; m.w. 304.50; m.p. 232-235 C; HLB 18.0; nonionic
Toxicology: LD_{50} (IV, mouse) 152 mg/kg; poison by IV route; mutagen; TSCA listed
Precaution: Combustible when exposed to heat or flame
Hazardous Decomp. Prods.: Heated to decomp., emits acrid toxic fumes of Na_2O
Uses: Surfactant, emulsifier, visc. control agent for pharmaceuticals
Regulatory: USP/NF compliance; FDA 21CFR §172.863, 175.105, 175.320, 176.170, 176.200, 176.210, 177.1200, 177.2600, 177.2800, 178.3910, 186.1771, GRAS
Trade Names: Nofable BO-90N; Nofable BO-99N

Sodium α-olefin (C14-C16) sulfonate. See Sodium C14-16 olefin sulfonate
Sodium PCA
CAS 28874-51-3 (L); 54571-67-4 (DL); EINECS/ELINCS 249-277-1 (L); 259-234-9 (DL)
Synonyms: 5-Oxo-DL-proline, sodium salt; 5-Oxo-L-proline, sodium salt; PCA-Na; PCA Soda; Sodium 5-oxo-L-proline; Sodium pyroglutamate; Sodium DL-2-pyrrolidone-5-carboxylate; Sodium L-2-pyrrolidone-5-carboxylate
Definition: Sodium salt of pyroglutamic acid
Empirical: C₅H₇NO₃ • Na
Properties: Colorless liq., odorless, sl. salty taste; m.w. 151.1
Toxicology: No known toxicity; nonirritant to skin, eye mucosa; TSCA listed
Storage: Extremely hygroscopic
Uses: Humectant, moisturizer for dermatological soaps, medicinals, nutritive creams and lotions, dentifrices
Trade Names: Ajidew N-50

Sodium PEG (5) lauryl ether carboxylate. See Sodium laureth-5 carboxylate
Sodium pentadecanecarboxylate. See Sodium palmitate
Sodium 3,6,9,12,15-pentaoxaheptacosanoate. See Sodium laureth-5 carboxylate
Sodium m-periodate. See Sodium m-periodate

Sodium m-periodate
CAS 7790-28-5; EINECS/ELINCS 232-197-6
Synonyms: Sodium metaperiodate; Sodium periodate
Empirical: INaO₄
Formula: NaIO₄
Properties: Colorless cryst.; very sol. in water; m.w. 213.89; dens. 3.865 (16 C); m.p. 300 C (dec.); dec. on heating with O₂ evolution
Toxicology: LD₅₀ (IP, mouse) 58 mg/kg; toxic by ing.; poison by IP route; irritant; TSCA listed
Precaution: Strong oxidizer; fire risk in contact with organic materials
Hazardous Decomp. Prods.: Heated to decomp., emits toxic fumes of I⁻ and Na₂O
Storage: Hygroscopic
Uses: Oxidizing agent for pharmaceuticals
Regulatory: Canada DSL
Manuf./Distrib.: Aldrich http://www.sigma-aldrich.com; Allan http://www.allanchem.com; Atomergic
Sodium peroxide
CAS 1313-60-6
UN 1504 (DOT)

Synonyms: Disodium dioxide; Disodium peroxide; Sodium dioxide; Sodium oxide

Empirical: Na₂O₂

Properties: Ylsh.-wh. powd.; sol. in cold water; m.w. 77.98; dens. 2.805; m.p. 460 °C; b.p. 657 °C (dec.); dec. on heating with loss of O₂

Toxicology: Severe irritant to eyes, skin, mucous membranes; TSCA listed

Precaution: Dangerous fire and explosion risk in contact with water, alcohols, acids, powdered metals and organic materials; strong oxidizing agent

Hazardous Decomp. Prods.: Heated to decomp., emits toxic fumes of Na₂O

Storage: Moisture-sensitive; keep dry

Uses: Oxidizing agent for pharmaceuticals; antiseptic; germicidal soaps

Regulatory: Canada DSL

Manuf./Distrib.: Allan

Sodium phenoxy acetate
CAS 3598-16-1

Synonyms: Phenoxyacetic acid sodium salt
Classification: Organic acid, sodium salt

Definition: Reaction prod. of sodium phenolate and sodium chloro acetate

Empirical: C₈H₇NaO₃

Properties: Off-wh. odorless powd.; m.w. 174.1

Toxicology: LD₅₀ (IV, mouse) 2 g/kg; skin irritant; TSCA listed

Uses: Fermentation of penicillin V; synthesis of esters of cortical hormones

Manuf./Distrib.: Sigma
http://www.sigma-aldrich.com/belgium

Trade Names: Niacet Sodium Phenoxy Acetate

Sodium phosphate
CAS 7558-80-7 (anhyd.); 10049-21-5

<table>
<thead>
<tr>
<th>Chemical Component Cross-Reference</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>aluminum sodium salt</strong>: Sodium aluminium silicate; Sodium aluminum silicate; Sodium feldspar; Zeolite; Zeolites</td>
</tr>
</tbody>
</table>

**Definition:** Series of hydrated sodium aluminum silicates; produced by reaction of sodium silicate and kaolinite clay

| Formula: | \( \text{Na}_2\text{O} : \text{Al}_2\text{O}_3 : \text{SiO}_2 \) with mole ratio \( \approx 1:1:13.2 \) |

**Properties:** Wh. fine amorphous powd. or beads, odorless and tasteless; insol. in water, alcohol, org. solvs.; partly sol. in strong acids and alkali hydroxides @ 80-100 C; pH 6.5-10.5 (20% slurry)

**Toxicology:** Irritant to skin, eyes, mucous membranes; mutagen; TSCA listed

**Precaution:** Noncombustible

**Hazardous Decomp. Prods.:** Heated to decomp., emits toxic fumes of \( \text{Na}_2\text{O} \)

**Uses:** Visc. control agent in pharmaceuticals, orals

**Regulatory:** FDA approved for orals; Canada DSL

<table>
<thead>
<tr>
<th>Sodium starch glycolate</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>CAS:</strong> 9063-38-1</td>
</tr>
</tbody>
</table>

**Synonyms:** Carboxymethyl starch sodium salt; Sodium carboxymethyl starch; Sodium starch glycolate; Starch carboxymethyl ether sodium salt

**Definition:** Sodium salt of a carboxymethyl ether of starch

| Formula: | \( (\text{C}_6\text{H}_9\text{O}_4 \cdot \text{O} \cdot \text{CH}_2 \cdot \text{COONa})_n \) |

**Properties:** Wh. powd., odorless, tasteless; pract. insol. in water; m.w. 500,000 - 11,000,000; pH 3-5 or 5.5-7.5 (1 g/30 ml aq. susp.)

**Toxicology:** TSCA listed

**Storage:** Hygroscopic; Sodium starch glycolate is stable and should be stored in a well-closed container to protect it from wide variations in humidity and temperature that may cause caking

**Uses:** Disintegrant for pharmaceutical tablets prepared by either direct-compression or wet-granulation processes, in buccals, orals

**Regulatory:** FDA approved for buccals, orals; USP/NF, BP, EP compliance; Canada DSL

---

**Sodium stannate**

**CAS:** 12058-66-1; EINECS/ELINCS 235-030-5

**Synonyms:** Disodium tin trioxide; Sodium tin oxide; Tin sodium oxide

**Classification:** Inorganic salt

**Definition:** Avail. commercially as the trihydrate

| Empirical: | \( \text{Na}_2\text{O}_3\text{Sn} \cdot 3\text{H}_2\text{O} \); \( \text{H}_6\text{Na}_2\text{O}_6\text{Sn} \) |

**†=pharmaceutical grade**

| Formula: | \( \text{Na}_2\text{SnO}_3 \cdot 3\text{H}_2\text{O} \) or \( \text{Na}_2\text{Sn(OH)}_6 \) |

**Properties:** Wh. to lt. tan hexagonal cryst.; sol. in water forming alkaline sol'ns.; insol. in alcohol, acetone; m.w. 212.67 (anhyd.), 266.71 (trihydrate); dec. in air; loses 3H\(_2\)O @ 140 C

**Toxicology:** LD\(_{50}\) (oral, rat) 3457 mg/kg; TLV 2 mg/m\(^3\) of air; mutagen; TSCA listed

**HMIS:** Health 1, Flammability 0, Reactivity 0

**Storage:** Hygroscopic

**Uses:** Visc. control agent in pharmaceuticals, orals

**Regulatory:** FDA approved for buccals, orals; USP/NF, BP, EP compliance; Canada DSL

Sodium stearate

Synonyms: Octadecanoic acid, sodium salt; Sodium octadecanoate; Stearic acid, sodium salt

Classification: Sat. aliphatic carboxylic acid salt

Definition: Sodium salt of stearic acid

Empirical: \( \text{C}_{18}\text{H}_{35}\text{NaO}_2 \)

Formula: \( \text{CH}_3(\text{CH}_2)_{17}\text{COONa} \)

Properties: Wh. fine powd., fatty (tallow) odor; sol. in hot water and hot alcohol; slowly sol. in cold water and cold alcohol; insol. in many org. solvs.; m.w. 306.47

Toxicology: ACGIH TLV-TWA 10 mg/m\(^3\) (stearates); LD50 (oral, rat) > 5 g/kg (@ 25%), (skin, rabbit) > 3 g/kg (@ 10-25%); LDLo (IV, dog) 10 mg/kg; poison by IV and other routes; inh. of high concs. of dust may cause coughing, mild temporary irritation; nonirritating to skin; sl. eye irritant; ing. may cause irritation, nausea, diarrhea; TSCA listed

Precaution: Combustible dust; may form explosive dust-air mixts.; incompat. with acids (reacts vigorously)

Hazardous Decomp. Prods.: Thermal decomp. prods.: CO, CO\(_2\); heated to decomp., emits toxic fumes of Na\(_2\)O

HMIS: Health 1, Flammability 1, Reactivity 0

Storage: Light-sensitive; store in cool area away from ignition sources

Uses: Emulsifier, solubilizer, stiffener in pharmaceuticals, orals, topicals, glycerol suppositories; waterproofing agent, gellant in toothpaste; to treat skin diseases

Trade Names: Explosol©; Explosol® SSG-1; Explosol® SSG-2; Explotab®; Explotab® CLV

Explotab® Low pH; Glycolys®; Glycolys® LV Low viscosity; Glycolys® Low pH Acid stable; Primojel®

Sodium starch glycolate. See Sodium starch glycolate

Sodium stearate

CAS 822-16-2; EINECS/ELINCS 212-490-5

INS470; E470a

Synonyms: Octadecanoic acid, sodium salt; Sodium octadecanoate; Stearic acid, sodium salt

Classification: Sat. aliphatic carboxylic acid salt

Definition: Sodium salt of stearic acid

†=pharmaceutical grade
Trade Names:  Kemilub ES-F
Trade Names Containing:  Imwitor® 960K

Sodium stearoyl fumarate.  See Sodium stearyl fumarate

Sodium stearoyl fumarate
CAS 25383-99-7;  EINECS/ELINCS 246-929-7  
INS481(i); E481
Synonyms:  Lactic acid, bimol. ester, stearate,  
sodium salt;  Octadecanoic acid, 2-(1-carboxyethoxy)-1-methyl-2-oxoethyl ester,  
sodium salt;  Sodium 2-(1-carboxyethoxy)-1-methyl-2-oxoethyl octadecanoate;  Sodium  
stearyl-2-lactylate;  Sodium stearoyl-2-lactylate;  SSL;  Stearic acid, ester with lactic  
acid bimol. ester, sodium salt
Definition:  Sodium salt of the stearic acid ester  
of lactyl lactate
Empirical:  C24H44O6 • Na
Formula:  CH3(CH2)16COOCHCH3COOCHCH3COONa
Properties:  Wh. or cream-colored powd.;  
caramel odor; sol. in hot oil or fat; disp. in  
warm water; m.w. 450.60; m.p. 46-52 C; HLB  
10-12; anionic; HLB 10.0-12.0
Toxicology:  TSCA listed
Hazardous Decomp. Prods.:  Heated to  
decomp., emits acrid smoke and irritating  
fumes
Uses:  Emollient, emulsifier for  
pharmaceuticals
Regulatory:  FDA 21CFR §172.846, 177.1200;  
Europe listed; UK approved; Australian  
approved; Canada DSL

Sodium succinate

CAS 150-90-3; EINECS/ELINCS 205-778-7

FEMA 3277

Synonyms: Butanedioic acid disodium salt; Disodium butanedioate; Disodium succinate (INCI); Succinic acid disodium salt; Succinic acid sodium salt

Classification: Carboxylic acid salt

Definition: Disodium salt of succinic acid; avail. as the anhyd. salt or hexahydrate

Empirical: C4H4Na2O4

Formula: (CH2COONa)2 • 6H2O (hexahydrate)

Properties: Hexahydrate: Wh. gran. or cryst. powd.; sol. in 5 parts water; sol. in oxygenated solvs.; insol. in alcohol; m.w. 162.05 (anhyd.), 270.15 (hexahydrate); stable in air; loses all its water @ 120°C

Toxicology: LD50 (IV, mouse) 4.5 g/kg; sl. toxic by IV route; TSCA listed

Hazardous Decomp. Prods.: Heated to decomp., emits acrid smoke and irritating vapors

HMIS: Health 1, Flammability 0, Reactivity 0

Storage: Hygroscopic; store @ R.T.

Uses: Flavor for pharmaceuticals, orals; respiratory stimulant; urinary alkalizer; diuretic; cathartic

Regulatory: FDA approved for orals; FEMA GRAS; Japan approved; Canada DSL

Sodium sulfate

CAS 7757-82-6; EINECS/ELINCS 231-820-9

INS514(j); E514

Synonyms: Disodium sulfate; Glauber's salt; Salt cake; Sodium sulfate (2:1); Sodium sulfate anhydrous; Sulfuric acid, disodium salt

Classification: Inorganic salt

Empirical: Na2O4S

Formula: Na2SO4

Properties: Wh. cryst. or powd., odorless, bitter saline taste; sol. in water, glycerol; insol. in alcohol; m.w. 142.04; dens. 2.671; m.p. 888°C

Toxicology: LD50 (oral, mouse) 5989 mg/kg, (IV, mouse) 1220 mg/kg; mod. toxic by IV route; mildly toxic by ing.; irritant; questionable carcinogen, experimental tumorigen, teratogen, reproductive effects, mutagen; TSCA listed

Precaution: Violent reaction with Al

Hazardous Decomp. Prods.: Heated to decomp., emits toxic fumes of SOx and Na2O

HMIS: Health 1, Flammability 0, Reactivity 0

Storage: Hygroscopic; store @ R.T.

Uses: Used to reduce body water in pharmaceuticals, parenterals, ophthalmics, orals, topicals

Regulatory: FDA 21CFR §172.615, 173.310, 177.1200, 186.1797, GRAS as indirect food additive; USDA 9CFR §318.7, 381.147; Japan approved; Europe listed; UK approved; FDA approved for parenterals, ophthalmics, orals, topicals; Canada DSL; BP, EP compliance

anhdyrous. See Sodium sulfate
Sodium sulfhydrate. See Sodium bisulfite

Sodium sulfite
CAS 7757-83-7; EINECS/ELINCS 231-821-4
INS221; E221
Synonyms: Disodium sulfite; Exsiccated
sodium sulfite; Sodium sulfite (2:1); Sodium
sulfite anhydrous; Sulfurous acid disodium
salt; Sulfurous acid sodium salt (1:2)
Classification: Inorganic salt
Empirical: Na2O3S
Formula: Na2SO3
Properties: Wh. to tan or pink powd. or
hexagonal crystals, odorless, salty sulfurous
taste; sol. in 3.2 parts water; sol. in glycerol;
pract. insol. in alcohol; m.w. 126.04; dens.
2.633 (15.4 C); b.p. dec.; pH ≈ 9
Toxicology: LD50 (oral, mouse) 820 mg/kg, (IP,
mouse) 950 mg/kg, (IV, rat) 115 mg/kg
poison by IV, subcut. routes; mod. toxic by
ing., IP routes; may provoke asthma;
destroys vitamin B1; human mutagenic
data; TSCA listed
Precaution: Reducing agent
Hazardous Decomp. Prods.: Heated to
decomp., emits very toxic fumes of Na2O
and SOx
HMIS: Health 2, Flammability 0, Reactivity 1
Storage: Moisture-sensitive
Uses: Antioxidant, reducing agent, antiseptic,
preservative, topical antifungal agent in
pharmaceuticals, injectables, inhalants,
oral, topical, primarily in
sympathomimetic and aminoglycoside
medications
Use Level: 0.3-0.75%

Sodium thioglycollate. See Sodium thioglycollate
Sodium thiosulfate. See Sodium thiosulfate anhydrous
Sodium thiosulfate anhydrous
CAS 7772-98-7; EINECS/ELINCS 231-867-5
INS539
Synonyms: Disodium thiosulfate; Hypo; Sodium hyposulfite; Sodium sulfite; Sodium thiosulfate; Thiosulfuric acid disodium salt
Classification: Inorganic salt
Definition: Avail. as the anhyd. or pentahydrate salts
Empirical: Na₂O₃S₂
Formula: Na₂S₂O₃
Properties: Colorless cryst. or cryst. powd.; sol. in water; pract. insol. in alcohol; m.w. 158.11; dens. 1.667; dec. on heating
Toxicology: LD₅₀ (IP, mouse) 5200 mg/kg;
†=pharmaceutical grade
LDLo (dermal, rabbit) 4 g/kg; mod. toxic by subcut. route; mildly irritating to respiratory tract and skin (may cause dermatitis); TSCA listed
Precaution: Incompat. with oxidizers, metal nitrates, sodium nitrite; slowly dec. at R.T. and more rapidly in presence of light and heat
Hazardous Decomp. Prods.: Heated to decomp., emits very toxic fumes of Na₂O and SOₓ
HMIS: Health 1, Flammability 0, Reactivity 1
Storage: Hygroscopic; deliq. in moist air
Uses: Antioxidant in pharmaceuticals, intravenous, ophthalmics, orals; antidote for cyanide poisoning
Regulatory: FDA 21CFR §184.1807, GRAS; FDA approved for intravenous, ophthalmics, orals; USP/NF compliance; Canada DSL
Sodium tin oxide. See Sodium stannate
Sodium trideceth sulfate
CAS 25446-78-0 (n = 3); 66161-58-8 (n = 4);
EINECS/ELINCS 246-985-2
Synonyms: Ethanol, 2-(2-(tridecyloxy)ethoxy)ethoxy)-, hydrogen
Chemical Component Cross-Reference

**Sulfate, sodium salt; Sodium POE tridecyl sulfate; Sodium tridecyl ether sulfate; Sodium 2-(2-(2-(tridecyloxy)ethoxy)ethoxy)ethyl sulfate**

**Definition:** Sodium salt of sulfated ethoxylated tridecyl alcohol

**Formula:** $C_{13}H_{27}(OCH_2CH_2)_nOSO_3Na$, avg. n = 1-4

**Properties:** M.w. 435.58; anionic

**Toxicology:** TSCA listed

**Uses:** Surfactant, detergent, wetting agent, emulsifier, foaming agent for pharmaceuticals

**Regulatory:** FDA 21CFR §175.105; Canada DSL

**Manuf./Distrib.:** Cosmetic Supplies USA

**Trade Names:** CEDEPAL® TD-407; CEDEPAL® TDS 484

Sodium tridecyl ether sulfate; Sodium 2-(2-(2-(tridecyloxy)ethoxy)ethoxy)ethyl sulfate.

See Sodium trideceth sulfate

Sodium trimetaphosphate

**CAS 7785-84-4; EINECS/ELINCS 232-088-3**

**Synonyms:** Metaphosphoric acid trisodium salt; Trimetaphosphate sodium

**Classification:** Inorganic salt

**Empirical:** $O_9P_3 \cdot 3Na$

**Formula:** $(NaPO_3)_3$

**Properties:** Wh. cryst. or wh. cryst. powd.; sol. in water; m.w. 305.92

**Toxicology:** LD$_{50}$ (oral, mouse) > 100 mg/kg, (IP, rat) 3650 mg/kg; LDLo (IV, rabbit) 240 mg/kg; poison by IV route; mod. toxic by IP route; TSCA listed

**Hazardous Decomp. Prods.:** Heated to decomp., emits toxic fumes of PO$_x$ and Na$_2$O

**Uses:** Buffer, chelating agent in pharmaceuticals, intravenous

**Regulatory:** FDA 21CFR §172.892; GRAS; FDA approved for intravenous; Canada DSL

**Manuf./Distrib.:** Alfa Chem†

**Trade Names:** CEDEPAL® TD-407; CEDEPAL® TDS 484

Sodium undec-10-enoate. See Sodium undecylenate

Sodium undecylenate

**CAS 3398-33-2; EINECS/ELINCS 222-264-8**

**Synonyms:** Sodium undec-10-enoate; 10-Undecenoic acid, sodium salt

**Definition:** Sodium salt of undecylenic acid

**Empirical:** $C_{11}H_{20}O_2 \cdot Na$

**Formula:** $CH_2=CH(CH_2)_{8}COONa$

**Properties:** Wh. powd., sweaty odor; limited sol. in most org. solvs.; sol. in water; dec. above 200 C

**Toxicology:** No known toxicity; irritant; TSCA listed

**NFPA:** Health 1, Flammability 0, Reactivity 0

**Uses:** Solubilizer in pharmaceuticals, topicals

**Regulatory:** FDA 21CFR §172.892; GRAS; FDA approved for topicals; Canada DSL

**Manuf./Distrib.:** Aldrich†

**Trade Names:** CEDEPAL® TD-407; CEDEPAL® TDS 484

Sodium vinylbenzenesulfonate, polymer with divinylbenzene. See Sulfonated divinylbenzene/styrene copolymer

Sodium xylenesulfonate

**CAS 1300-72-7; EINECS/ELINCS 215-090-9**

**Synonyms:** Dimethylbenzene sulfonic acid, sodium salt; Sodium dimethylbenzenesulfonate; SXS; Xylenesulfonic acid, sodium salt

**Definition:** Sodium salt of ring sulfonated mixed xylene isomers

**Empirical:** $C_8H_9O_3S \cdot Na$

**Formula:** $(CH_3)_{2}C_6H_3SO_3Na$

**Properties:** Lt. yel. liq.; m.w. 208.21; sp.gr. 1.23; m.p. 27 C; b.p. 157 C; pH 7-10 (3%); anionic

**Toxicology:** No known toxicity; irritant; TSCA listed

**NFPA:** Health 1, Flammability 0, Reactivity 0

**Uses:** Solubilizer in pharmaceuticals, topicals

**Regulatory:** FDA 21CFR §172.892; GRAS; FDA approved for topicals; Canada DSL

**Manuf./Distrib.:** Alfa Chem†

**Trade Names:** CEDEPAL® TD-407; CEDEPAL® TDS 484

Solanum tuberosum. See Potato (Solanum tuberosum) starch

---

† = pharmaceutical grade
Chemical Component Cross-Reference

Soluble animal collagen. See Soluble collagen

Soluble collagen
Synonyms: Soluble animal collagen; Soluble native collagen
Definition: Nonhydrolyzed, native protein derived from connective tissue of young animals; consists of a mixt. of precursors of mature collagen
Properties: M.w. 285,000
Uses: Base in medicinal soaps
Manuf./Distrib.: Cognis/Care Chems.; Fluka

Soluble fluorescein. See D&C Yellow No. 8; Fluorescein sodium

Soluble gluside. See Saccharin sodium anhydrous

Soluble guncotton. See Nitrocellulose

Soluble indigo. See FD&C Blue No. 2; Acid blue 74

Soluble native collagen. See Soluble collagen

Soluble saccharin. See Saccharin sodium anhydrous

Soluble sulfur. See Sulfur

Solum diatomeae. See Diatomaceous earth

Solvent ether. See Ethyl ether

Solvent green 3
CAS 128-80-3; EINECS/ELINCS 204-909-5
Synonyms: 9,10-Anthracenedione, 1,4-bis [[4-methylphenyl] amino]--; 1,4-Bis [[4-methylphenyl]-amino]-9,10-anthracenedione; 1,4-Bis (p-tolylamino) anthraquinone; CI 61565; D&C Green No. 6; 1,4-Di-p-toluidinoanthraquinone; Green no. 2; Quinizarin green SS
Classification: Anthraquinone color
Empirical: C28H22N2O2
Properties: Dk. green cryst. or powd.; sol. in C6H6 or acids; insol. in water, ethanol; m.w. 418.50
Toxicology: LD50 (oral, rat) 3660 mg/kg; mod. toxic by ing.; eye irritant; TSCA listed
Hazardous Decomp. Prods.: Heated to decomp., emits toxic fumes of NOx
Uses: Colorant for external pharmaceuticals
Regulatory: D&C Green No. 6; FDA 21CFR §74.1206, 74.2206, 82.1206; FDA approved for topicals; permanently listed
Manuf./Distrib.: Aldrich† http://www.sigma-aldrich.com; Anar Int’l.

Solvent naphtha. See VM&P naphtha

Solvent naphtha (peroleum), medium heavy, aliphatic hydrocarbons. See Naphtha, medium aliphatic

Solvent naphtha (petroleum), light aliphatic. See Naphtha, light aliphatic

Solvent naphtha (petroleum), medium aliphatic. See Naphtha, medium aliphatic

Solvent red 23
CAS 85-86-9; EINECS/ELINCS 201-638-4
Synonyms: Benzeneazobenzeneazo-β-naphthol; CI 26100; D&C Red No. 17; Oil red; Oil scarlet; 1-[[(4-Phenylazo) phenyl] azo]-2-naphthalenol; 1-((p-Phenylazo) phenyl) azo-2-naphthol; Sudan ill; Tetrazobenzene-β-naphthol; Toney red
Classification: Diazo color
Empirical: C22H16N4O
Properties: Dk. red cryst. powd.; sol. in alcohols, ethanol, benzene; insol. in water; m.w. 352.40; m.p. 199 C (dec.)
Toxicology: LDLo (IP, rabbit) 250 mg/kg, (subcut., rabbit) 1000 mg/kg; poison by IP route; mod. toxic by subcut. and intrapleural routes; questionable carcinogen; mutagenic data; TSCA listed
Hazardous Decomp. Prods.: Heated to decomp., emits toxic fumes of NOx
Uses: Colorant for external pharmaceuticals
Regulatory: D&C Red No. 17; FDA 21CFR §74.1317, 74.2317, 82.1317
Manuf./Distrib.: Aldrich† http://www.sigma-aldrich.com; Anar Int’l.

Solvent yellow 6
CAS 144-62-7; EINECS/ELINCS 201-639-2
Synonyms: Benzeneazobenzeneazo-α-naphthol; CI 10002; D&C Yellow No. 8; Oil yellow; Oil scarlet; 1-((p-Phenylazo) phenyl) azo-2-naphthol; Sudan y; TSCA listed
Classification: Diazo color
Empirical: C22H16N4O
Properties: Dk. red cryst. powd.; sol. in alcohols, ethanol, benzene; insol. in water; m.w. 352.40; m.p. 199 C (dec.)
Toxicology: LDLo (IP, rabbit) 250 mg/kg, (subcut., rabbit) 1000 mg/kg; poison by IP route; mod. toxic by subcut. and intrapleural routes; questionable carcinogen; mutagenic data; TSCA listed
Hazardous Decomp. Prods.: Heated to decomp., emits toxic fumes of NOx
Uses: Colorant for external pharmaceuticals
Regulatory: D&C Red No. 17; FDA 21CFR §74.1317, 74.2317, 82.1317
Manuf./Distrib.: Aldrich† http://www.sigma-aldrich.com; Anar Int’l.

Solvent blue 7
CAS 128-74-6; EINECS/ELINCS 204-908-0
Synonyms: 9,10-Anthracenedione, 1,4-bis [[4-phenylamino)phenyl] azo]-2-naphthalenol; Benzeneazobenzeneazo-β-naphthol; CI 26100; D&C Blue No. 2; Oil blue; Oil scarlet; 1-((p-Phenylazo) phenyl) azo-2-naphthol; Sudan ill; Tetrazobenzene-β-naphthol; Toney blue
Classification: Diazo color
Empirical: C22H16N4O
Properties: Dk. red cryst. powd.; sol. in alcohols, ethanol, benzene; insol. in water; m.w. 352.40; m.p. 199 C (dec.)
Toxicology: LDLo (IP, rabbit) 250 mg/kg, (subcut., rabbit) 1000 mg/kg; poison by IP route; mod. toxic by subcut. and intrapleural routes; questionable carcinogen; mutagenic data; TSCA listed
Hazardous Decomp. Prods.: Heated to decomp., emits toxic fumes of NOx
Uses: Colorant for external pharmaceuticals
Regulatory: D&C Red No. 17; FDA 21CFR §74.1317, 74.2317, 82.1317
Manuf./Distrib.: Aldrich† http://www.sigma-aldrich.com; Anar Int’l.

†=pharmaceutical grade
### Chemical Component Cross-Reference

- **Solvent red 43**: See D&C Red No. 21
- **Solvent red 48**: See D&C Red No. 27
- **Solvent red 72**: See D&C Orange No. 5
- **Solvent red 73**: See D&C Orange No. 10
- **Solvent red 140**: See Acid red 51
- **Solvent violet 13**: See CI 60725; D&C Violet No. 2; Disperse blue 72
- **Solvent yellow 33**: See CI 47000; D&C Yellow No. 11
- **Solvent yellow 94**: See D&C Yellow No. 7; Fluorescein

### Sorbent-20

**CAS**: 53694-15-8 (generic)

**Synonyms**: PEG-20 sorbitol ether; PEG 1000 sorbitol ether; POE (20) sorbitol ether

**Definition**: PEG ether of sorbitol with an avg. 20 moles EO

**Properties**: Nonionic

**Uses**: Emulsifier, humectant for pharmaceuticals

**Trade Names**: Ethosperse® SL-20

### Sorbent-30 Tetraoleate

See PEG-30 sorbitan tetraoleate

### Sorbent-40 Tetraoleate

See PEG-40 sorbitan tetraoleate

### Sorbent-60 Tetraoleate

See PEG-60 sorbitan tetraoleate

### Sorbic acid

**CAS**: 110-44-1; 22500-92-1; EINECS/ELINCS 203-768-7

**INS**: 200; E200

**Synonyms**: (2-Butenylidene) acetic acid; Crotlyliden acetic acid; Hexadienic acid; Hexadienoic acid; 2,4-Hexadienoic acid; 1,3-Pentadiene-1-carboxylic acid; 2-Propenylacrylic acid

**Classification**: Organic acid; unsaturated aliphatic carboxylic acid

**Definition**: Commercial prod. is the trans,trans-isomer

**Empirical**: C\textsubscript{6}H\textsubscript{8}O\textsubscript{2}

**Formula**: CH\textsubscript{3}CH=CHCH=CHCOOH

**Properties**: Colorless needles or wh. powd., char. odor, almost tasteless; very sol. in alcohol, ether; sol. in acetone, acetic acid, hot water, oxygenated solvs.; mod. sol. in propylene glycol, ethyl ether; sl. sol. in oils, glycerol, cyclohexane, CCl\textsubscript{4}; m.w. 112.14; m.p. 134.5 C; b.p. 228 C (dec.); flash pt. (OC) 126-130 C; weakly acidic

**Toxicology**: LD\textsubscript{50} (oral, rat) 7360 mg/kg, (IP, mouse) 2820 mg/kg, (subcut., mouse) 2820 mg/kg; mod. toxic by IP, subcut. routes; mildly toxic by ing.: ing. of very lg. dose may cause nausea; severe human skin irritant; eye irritant; questionable carcinogen; experimental tumorigen, reproductive effects; mutagenic data; TSCA listed

**Precaution**: Combustible exposed to heat or flame; reactive with oxidizers

**Hazardous Decomp. Prods.**: CO, CO\textsubscript{2}; heated to decom., emits acrid smoke, irritating fumes

**HMIS**: Health 1, Flammability 0, Reactivity 0

**Storage**: Light-sensitive

**Uses**: Antimicrobial, preservative, antibacterial, antifungal for pharmaceuticals, orals, ophthalmics, topical dermatologicals incl. corticosteroid creams

**Use Level**: 0.05-0.5%; 0.1-0.13% (ophthalmics); 0.3% (oral enzyme prod., gelatin capsules)

**Regulatory**: FDA 21CFR §133.118, 133.123, 133.124, 133.169, 133.173, 133.179, 133.187, 146.115, 146.152, 146.154, 150.141, 150.161, 166.110, 172.872, 177.2260, 181.22, 181.23, 182.3089, GRAS; USDA 9CFR §318.7; Canada DSL; BATF 27CFR §240.1051; USA CIR approved, EPA reg.; JSCI approved 0.5% max.; Europe listed 0.6% max.; Japan approved with limitations; Europe listed; UK approved; FDA approved for orals, topicals; USP/NF, BP, EP compliance

**Trade Names Containing:** Dow Corning® 7-9245; Dow Corning® Q7-2587; Dow Corning® Medical Antifoam AF Emulsion; Vitamin B₁₂ 0.1% SD

**Sorbic acid ethyl ester.** See Ethyl sorbate

**Sorbic acid potassium salt.** See Potassium sorbate

**Sorbide nitrate; Sorbidinontrate.** See Isosorbide dinitrate

**Sorbimacrocolaurate 300.** See Polysorbate 20

**Sorbimacrocol palmitate 300.** See Polysorbate 40

**Sorbimacrocol stearate 300.** See Polysorbate 60

**Sorbimacrocoltrioleate 300.** See Polysorbate 85

**Sorbimacrocoltristearate 300.** See Polysorbate 65

**Sorbit.** See Sorbitol

**Sorbitan caprylate**

*Definition:* Monoester of caprylic acid and hexitol anhydrides derived from sorbitol

*Empirical:* \( C_{14}H_{26}O_6 \)

*Properties:* Nonionic

*Uses:* Emulsifier for pharmaceuticals

*Trade Names:* Nissan Nonion CP-08R

**Sorbitan dioctadecanoate.** See Sorbitan distearate
Chemical Component Cross-Reference

Sorbitan distearate
CAS 36521-89-8; EINECS/ELINCS 247-707-2
Synonyms: Anhydrosorbitol distearate; Sorbitan dioctadecanoate
Definition: Diester of stearic acid and the hexitol anhydrides derived from sorbitol
Properties: Nonionic
Uses: Emollient
Regulatory: FDA 21CFR §175.320
Trade Names: Emasol S-20

Sorbitan, esters, monododecanoate. See Sorbitan laurate
Sorbitan, esters, monohexadecanoate. See Sorbitan palmitate
Sorbitan, esters, monoocotadecanoate. See Sorbitan stearate
Sorbitan isoctadecanoate. See Sorbitan isostearate

Sorbitan isostearate
CAS 54392-26-6; 71902-01-7; EINECS/ELINCS 276-171-2
Synonyms: 1,4-Anhydro-D-glucitol, 6-isooctadecanoate; Anhydrosorbitol monoisostearate; Sorbitan monoisooctadecanoate
Definition: Monoester of isostearic acid and hexitol anhydrides derived from sorbitol
Empirical: C24H46O6
Properties: M.w. 346.52; nonionic
Toxicology: Experimental neoplastigen
Uses: Emulsifier, solubilizer, wetting agent, pigment dispersant for pharmaceuticals

**Trade Names:** Ablunol S-60; Adekaestol S-60; Arlacel® 60; Avester™ SMS sobitan ester; Crill 3

**Trade Names:** Ablunol S-85; Crill 45; Kemenst® S85; Kosteran-O/3 VH; Nissan Nonion OP-85R; Nofable SO-903; Nofable SO-993; Rheodol SP-O30; Sabosorb TO; Sorbirol TO

**Sorbitan tallate**

**Properties:** Nonionic

**Features:** Lipophilic

**Manuf./Distrib.:** Lonza [http://www.lonza.com](http://www.lonza.com)

**Uses:** Surfactant for pharmaceuticals

**Properties:** Nonionic

**Trade Names:** Ablunol S-60; Adekaestol S-60; Arlacel® 60; Avester™ SMS sobitan ester; Crill 3

**Trade Names:** Ablunol S-85; Crill 45; Kemenst® S85; Kosteran-O/3 VH; Nissan Nonion OP-85R; Nofable SO-903; Nofable SO-993; Rheodol SP-O30; Sabosorb TO; Sorbirol TO

**Sorbitan tallate**

**Properties:** Nonionic

**Features:** Lipophilic
Sorbin tristearate

CAS 26656-19-5; 72869-62-6; EINECS/ELINCS 247-891-4; 276-951-2
INS492; E492

Synonyms: Anhydrosorbitol tristearate; Sorbin trioctadecanoate; STS

Definition: Triester of stearic acid and hexitol anhydrides derived from sorbitol

Empirical: C₆₀H₁₁₄O₈

Properties: Wh. to tan waxy beads; sol. in IPA; insol. in water; m.w. 963.56; pour pt. 48 C; HLB 2.1; acid no. 12-15; sapon. no. 176-188; nonionic

Toxicology: No known toxicity; TSCA listed

Uses: Surfactant, emulsifier, lubricant, stabilizer, solubilizer, dispersant, wetting agent, visc. control agent in pharmaceuticals

Regulatory: FDA 21 CFR §175.320, 178.3400; Europe listed; UK approved; Canada DSL

Manuf./Distrib.: A&E Connock

Fluka http://www.sigma-aldrich.com; Lambent Tech.

Sigma http://www.sigma-aldrich.com/belgium; Spectrum Quality

Trade Names: Crill 35; Crill 41; Glycomul® TS; Kosteran-S/3; Lumisorb™ STS K Montane® 65; Saborsorb TS; Span® 65; Span® 65K

Sorbitol

CAS 50-70-4; 3959-43-3; EINECS/ELINCS 200-061-5

FEMA 3029; INS420; E420

Synonyms: Glucitol; D-Glucitol; Gluitol; Sorbit; Sorbite; D-Sorbit; D-Sorbitol; γ-Sorbitol; Sorbo; Sorbol

Classification: Hexahydric alcohol

Empirical: C₆H₁₄O₆

Formula: CH₂OHCOH(OH)CH(OH)CH(OH)CH₂OH

†=pharmaceutical grade

Properties: Wh. cryst. powd., gran. or flakes, odorless, sweet taste; sol. in water, hot alcohol, methanol, IPA, DMF, acetic acid, phenol, acetamide sol'n's., oxygenated solvs.; insol. in veg. and min. oils; m.w. 182.20; dens. 1.47 (-5 C); m.p. 93-97.5 C; b.p. 105 C; pH ≈ 7.0

Toxicology: LD50 (oral, rat) 15,900 mg/kg; mildly toxic by ing.; excess consumption may have laxative effect; intolerance manifested by abdominal pain, bloating, diarrhea; no known toxicity if used externally; mutagenic data; TSCA listed

Hazardous Decomp. Prods.: Heated to decomp., emits acid smoke and irritating fumes

Storage: Hygroscopic

Uses: Bodying agent for liq. pharmaceuticals; humectant, plasticizer, nutritive sweetener, vehicle, excipient in pharmaceuticals, suspensions, sol'n's, syrups, elixirs, pellets, deformants, deodorants; tablet diluent; absorp. enhancer for vitamins; improves taste and mouthfeel for chewable tablets

Features: Oleaginous

Use Level: 70-72% (suspensions); 6-35% (sol'n's.); 5-25% (syrups); 5-20% (elixirs)

Regulatory: FDA 21 CFR §100.130, 101.9, 101.80, 175.300, 175.320, 176.180, 176.210, 177.1390, 177.2420, 182.90, 184.1835, GRAS; FEMA GRAS; Canada DSL; Japan approved; Europe listed; UK approved; FDA approved for dentals, intramuscular injectables, rectals, nutraceuticals, deodorants, tablet diluents; absorbs. enhancer for vitamins; improves taste and mouthfeel for chewable tablets

**Soya oil. See Soybean (Glycine soja) oil**

**Soybean flour. See Soybean (Glycine soja) flour**

**Soybean (Glycine soja) flour**

**CAS 68513-95-1**

**Synonyms:** Flour, soy; Glycine soja; Soy flour; Soybean flour; Soy flour

**Definition:** Powd. prepared from fine grinding of soybean, Glycine max.

**Toxicology:** TSCA listed

**Uses:** Tablet disintegrant

**Regulatory:** Canada DSL

**Trade Names: Emcosoy STS IP®**

**Soybean (Glycine soja) oil**

**CAS 8001-22-7; EINECS/ELINCS 232-274-4**

**Synonyms:** Chinese bean oil; Glycine soja; Glycine soja oil; Glycine soja (soybean) lipids; Soya bean oil; Soya oil; Soybean oil; Soy oil

**Classification:** Fixed oil

**Definition:** Oil obtained from seeds of soya plant, Glycine soja, by extraction or expression; consists of triglycerides of oleic, linoleic, linolenic, and saturated acids

**Properties:** Pale yel. to brnsh. yel. oil, sl. char. odor and taste; sol. in alcohol, ether, chloroform, carbon disulfide; insol. in water; dens. 0.924-0.929; visc. 50.09 cps; vapor pressure very low; m.p. 22-31 C; iodine no. 120-141; sapon. no. 189-195; flash pt. 540 F; ref. index 1.471

**Toxicology:** May cause allergic reactions incl. hair damage and acne-like pimples; TSCA listed

**Precaution:** Combustible

**Hazardous Decomp. Prods.: CO₂ from combustion; heated to decomp., emits acrid smoke and irritating fumes**
**Chemical Component Cross-Reference**

Squalane
CAS 111-01-3; EINECS/ELINCS 203-825-6
Synonyms: Cosbiol; Dodecahydroxosqualene; Hexamethyltetrascosane; 2,6,10,15,19,23-Hexamethyltetrascosane; Perhydroxosqualene; Spinacane
Classification: Saturated hydrocarbon
Definition: Saturated branched chain hydrocarbon obtained by hydrogenation of...
Chemical Component Cross-Reference

shark liver oil or other natural oils

**Empirical:** C\textsubscript{30}H\textsubscript{62}

**Formula:**
\\[
[(\text{CH}_3)\text{2CHCH}_2\text{CH}_2\text{CH}(\text{CH}_3)\text{CH}_2\text{CH}_2\text{CH}_2\text{H}(\text{CH}_3)\text{CH}_2\text{CH}_2\text{CH}_2\text{CH}_2\text{CH}]
\\]

**Properties:** Colorless oily liq., odorless, tasteless; sol. in ether, gasoline, petrol. ether, benzene, chloroform, hydrocarbon solvs.; misc. with veg. and min. oils, org. solvs., lipophilic substances; sl. sol. in methanol, ethanol, acetone, glc. acetic acid; m.w. 422.83; dens. 0.8115 (15/4 C); m.p. -38 C; b.p. 350 C; acid no. 0.2 max.; iodine no. 4 max.; sapon. no. 2 max.; flash pt. 218 C; ref. index 1.4530 (15 C); stable to air and oxygen

**Toxicology:** No known toxicity; skin irritant; TSCA listed

**Precaution:** Combustible

**Hazardous Decomp. Prods.:** Heated to decomp., emits acrid smoke and irritating vapors

**HMIS:** Health 0, Flammability 1, Reactivity 0

**Uses:** Ointment base, bactericide, vehicle, emollient, lubricant in pharmaceuticals, topicals, carrier of lipid-sol. drugs in suppositories

**Features:** Oleaginous

**Regulatory:** FDA approved for topicals; USP/NF, BP, EP compliance; Canada DSL

---

**Squalene**

CAS 111-02-4; EINECS/ELINCS 203-826-1

**Synonyms:** 2,6,10,15,19,23-Hexamethyl-2,6,10,14,18,22-tetracosahexaene; Spinacene; trans-Squalene; 2,6,10,14,18,22-Tetracosahexene, 2,6,10,15,19,23-hexamethyl-, (all E)-

**Definition:** Unsat. branched chain isoprenoid hydrocarbon found in shark liver oil

**Empirical:** C\textsubscript{30}H\textsubscript{50}

**Properties:** Oil, faint odor; insol. in water; sl. sol. in alcohol; sol. in lipids, org. solvs.; m.w. 410.73; dens. 0.858-0.860 (20 C); m.p. -75 C; b.p. 285 C (25 mm); ref. index 1.4965 (20 C); visc. 12 cps (25 C); flash pt. 200 C; ref. index 1.496 (20 C)

**Toxicology:** LD\textsubscript{50} (oral, mouse) 5 g/kg, (IV, mouse) 1800 mg/kg; mod. toxic by IV route; sl. toxic by ing.; TSCA listed

**Precaution:** Combustible

**Hazardous Decomp. Prods.:** Heated to decomp., emits acrid smoke and irritating vapors

**HMIS:** Health 0, Flammability 1, Reactivity 0

**Uses:** Emollient, lubricant, protectant, vehicle for pharmaceuticals, topicals; pharmaceutical intermediate; pharmaceutical research

**Regulatory:** FDA approved for topicals; Canada DSL

Stannous fluoride

CAS 7783-47-3 (anhyd.); EINECS/ELINCS 231-999-3

Synonyms: Fluoristan; Tin bifluoride; Tin difluoride; Tin fluoride

Classification: Inorg. salt

Empirical: F2Sn

Formula: SnF2

Properties: Wh. lustrous cryst. powd., bitter salty taste; sol. in water; almost insol. in methanol, ether, chloroform, alcohol; m.w. 156.69; dens. 4.57; m.p. 212-214 C; pH 2.8-3.5 (0.4%); sublimes 7 C

Toxicology: ACGIH TLV/TWA 2 mg(Sn)/m3; 2.5 mg(F)/m3; LD50 (oral, rat) 377 mg/kg, (IP, mouse) 15,610 µg/kg; poison by ing., IP routes; toxic by inh., skin contact; causes burns; questionable carcinogen; mutagenic data; TSCA listed

Hazardous Decomp. Prods.: Heated to decomp., emits toxic fumes of F–

HMIS: Health 2, Flammability 0, Reactivity 1

Storage: Hygroscopic

Uses: Fluoride source, decay preventative in dentifrices, mouthwashes; intravenous pharmaceuticals

Regulatory: FDA approved for intravenous; Canada DSL

Stannous pyrophosphate

CAS 15578-26-4; EINECS/ELINCS 239-635-5

Synonyms: Diphosphoric acid, tin salt (1:2); Diphosphoric acid tin (2+) salt; Ditin diphosphate; Pyrostannous phosphate; Salt of tin

Empirical: O7P2Sn2

Formula: Sn2P2O7

Properties: Wh. powd.; insol. in water; sol. in HCl, aq. ammonia, alkaline pyrophosphate sol’n.; m.w. 411.32; dens. 4.009 (16 C)

Toxicology: Relatively nontoxic when used externally; TSCA listed

Uses: Oral care agent in dental preps.

Regulatory: FDA approved for dentals

Manuf./Distrib.: Sigma | http://www.sigma-aldrich.com/belgium

Stannous tartrate

CAS 815-85-0

Synonyms: Tin tartrate

Empirical: C4H4O6Sn

Formula: SnC4H4O6

Properties: Wh. heavy cryst. powd.; sol. in water, dil. HCl

Toxicology: TLV 0.1 mg(Sn)/m3 of air; toxic; TSCA listed

Uses: Intravenous pharmaceuticals

Regulatory: FDA approved for intravenous; Canada DSL

Manuf./Distrib.: Sigma | http://www.sigma-aldrich.com/belgium

Stannum. See Tin

Star anise. See Star anise (Illicium verum)

Star anise (Illicium verum)

CAS 977052-16-6; 8007-70-3

FEMA 2095

Synonyms: Anise, star; Illicium verum; Star anise

Definition: Derived from Illicium verum

Uses: Natural flavor for pharmaceuticals, oral hygiene prods.

Regulatory: BP, EP compliance; FDA 21CFR §101.22, 182.10, GRAS; FEMA GRAS; Japan
Star anise (Illicium verum) oil
CAS 68952-43-2; 8007-70-3
FEMA 2096

Synonyms: Anise, star; oil; Illicium verum; Illicium verum fruit oil; Illicium verum oil; Star anise oil

Definition: Oil derived from Illicium verum

Properties: Colorless to pale yel. semisolid; sol. in alcohol and dipropyl glycol; insol. in water; sp gr. 0.978-0.988; flash pt. (TCC) 182 F; ref. index .54820-1.56220

Uses: Natural flavor for pharmaceuticals

Features: Sweet, anise and fennel with a full-bodied sweetness and an herbal nuance odor

Regulatory: FEMA GRAS; Europe listed, no restrictions; Canada DSL

Manuf./Distrib.: Advanced BioTech

Star anise oil. See Star anise (Illicium verum) oil

Starch
CAS 9005-25-8; EINECS/ELINCS 232-686-4

Synonyms: Arrowroot starch; Corn starch; Potato starch; Pregelatinized starch; Rice starch; Sago starch; Sorghum gum; α-Starch; Starch, converted; Starch, corn; Starch dust; Tapioca starch; Wheat starch

Classification: Carbohydrate polymer

Definition: Complex polysaccharide composed of units of glucose consisting of about one quarter amylose and three quarters amylopectin; derived from corn, wheat, potatoes, or tapioca

Empirical: (C6H10O5)n

Properties: Wh. amorphous powd. or gran., odorless, sl. char. taste; insol. in cold water, alcohol; forms gels in hot water; m.w. 162.14n

Toxicology: ACGIH TLV/TWA 10 mg/m3 of total dust (when toxic impurities not present); LD50 (IP, mouse) 6600 mg/kg; nuisance dust; mildly toxic by IP route; skin irritant; allergen; may cause contact dermatitis, peritonitis; TSCA listed

Precaution: Flamm. exposed to flame; can react with oxidizers; mod. explosive exposed to flame

Uses: Filler, binder, disintegrant, adsorbent, diluent, carrier for pharmaceutical tablets,

†=pharmaceutical grade

buccals, parenterals, orals, rectals, topicals, vaginals; rubber glove powd.

Regulatory: FDA 21CFR §137.105, 155.130, 169.150, 169.179, 175.105, 178.1010, 182.90, GRAS; FDA approved for buccals, parenterals, orals, rectals, topicals, vaginals; USP/NF, BP, EP compliance; Canada DSL

Stearalkonium bentonite
Synonyms: Benzenemethanaminium, N, N-
dimethyl- N-octadecyl-, reaction products
with bentonite

Handbook of Pharmaceutical Additives, Third Edition
**Chemical Component Cross-Reference**

**Stearalkonium chloride**
CAS 122-19-0; EINECS/ELINCS 204-527-9
UN 1993 (DOT)

**Definition:** A synthetic compound derived from stearic acid, a fatty acid and bentonite clay

**Uses:** Visc. control agent in pharmaceuticals, creams, ointments

**Manuf./Distrib.:** Somerset Cosmetic Co. http://www.makingcosmetics.com/

**Trade Names Containing:** Miglyol® Gel T

**Synonyms:** Ammonium, benzylidimethyloctadecyl-, chloride; Benzylidimethylstearyl ammonium chloride; Benzylstearyl dimethylammonium chloride; Dimethylbenzylidloctadecylammonium chloride; N,N-Dimethyl-N-octadecylbenzenemethanaminium chloride; Dimethylidloctadecylbenzyl ammonium chloride; Dimethyl stearyl benzyl ammonium chloride; Octadecyl dimethyl benzyl ammonium chloride; Stearyl benzyl dimethyl ammonium chloride; Stearyl dimethyl benzyl ammonium chloride

**Classification:** Quaternary ammonium salt

**Empirical:** C27H50N • Cl

**Formula:** C18H37(CH3)2(C6H5CH2)NCl

**Properties:** Wh. cryst. powd.; sol. in water, chloroform, benzene, acetone, xylene; m.w. 424.23; m.p. 35-40 C; cationic

**Toxicology:** LD50 (oral, rat) 1250 mg/kg, (IP, rat) 280 mg/kg; poison by IP route; mod. toxic by ing.; human skin and severe eye irritant; TSCA listed

**Precaution:** DOT: Flamm. liq.

**Hazardous Decomp. Prods.:** Heated to decomp., emits very toxic fumes of NOx, NH3, and Cl-

**Uses:** Antimicrobial, emulsifier in pharmaceuticals, topical

**Regulatory:** FDA 21CFR §172.165 (limitation 1.5-6 ppm), 173.320 (limitation 0.05 ppm raw sugarcane or raw beets), 175.105; FDA approved for topicals; Canada DSL

**Manuf./Distrib.:** Somerset Cosmetic Co. http://www.makingcosmetics.com/

**Stearalkonium hectorite**
CAS 94891-33-5; 12691-60-0; 71011-26-2; EINECS/ELINCS 305-633-9; 275-126-4

**Definition:** Reaction prod. of hectorite and stearalkonium chloride

**Uses:** Thixotrope, gellant, thickener in pharmaceuticals, topicals

**Regulatory:** FDA 21CFR §175.300; FDA approved for topicals

**Trade Names:** Bentone® 27 V CG

**Trade Names Containing:** BTC® 885

**Stearamide AMP**
CAS 36284-86-3

**Synonyms:** N-(2-Hydroxy-1,1-dimethylethyl) octadecanamide; Octadecanamide, N-(2-hydroxy-1,1-dimethylethyl)-

**Classification:** Organic compd.

**Empirical:** C22H45NO2

**Formula:** CH3(CH2)16CONHC(CH3)2CH2OH

**Properties:** Anionic

**Toxicology:** TSCA listed

**Uses:** Visc. control agent in dermatological prods.

**Manuf./Distrib.:** Somerset Cosmetic Co. http://www.makingcosmetics.com/

**Stearamide DEA**
CAS 93-82-3; EINECS/ELINCS 202-280-1

**Synonyms:** N,N-Bis (2-hydroxyethyl) octadecanamide; N,N-Bis (2-hydroxyethyl) stearamide; Diethanolamine stearic acid amide; Stearic acid diethanolamide; Stearoyl diethanolamide

**Definition:** Mixture of ethanolamides of stearic acid

**Empirical:** C22H45NO3

**Formula:** CH3(CH2)16CON(CH2CH2OH)2

**Properties:** M.w. 371.61; nonionic

**Toxicology:** TSCA listed

**Uses:** Emulsifier, opacifier, thickener, emulsion stabilizer, lubricant, conditioner, softener, pearlescent, dye carrier, gellant, lubricant in skin care prods.,
**Chemical Component Cross-Reference**

**dermatologicals**

**Regulatory:** FDA 21 CFR §175.105, 176.180, 177.2260, 177.2800; Canada DSL

**Manuf./Distrib.:** Cosmetic Supplies USA  
http://www.cosmeticsuppliesusa.com

**Trade Names Containing:** Cetina

**Stearamide DIBA-stearate**

**Synonyms:** Octadecanoic acid, 2-hydroxymethyl-3-(1-oxooctadecyl) aminopropyl ester  
**Classification:** Substituted dihydroxyisobutylamine  
**Empirical:** C₄₀H₇₉NO₄  
**Formula:** CH₃(CH₂)₁₆CONHCH₂CHCH₂OHCH₂OOC(CH₂)₁₆CH₃  
**Properties:** Nonionic  
**Uses:** Opacifier, visc. control agent, emulsifier, pearlescent in pharmaceuticals  
**Trade Names:** Polytex 10

**Stearamide MEA**

**CAS 111-57-9;** EINECS/ELINCS 203-883-2  
**Synonyms:** N-(2-Hydroxyethyl) octadecanamide; N-(2-Hydroxyethyl) stearamide; Monoethanolamine stearic acid amide; Stearoyl monoethanolamide  
**Classification:** Amidoamine  
**Empirical:** C₂₀H₄₁NO₂  
**Formula:** CH₃(CH₂)₁₆CONH(CH₂)₂OCO(CH₂)₁₆CH₃  
**Properties:** Wh. to yel. flakes; m.w. 327.55; nonionic  
**Toxicology:** TSCA listed  
**Uses:** Delivery system for hormones in veterinary medicine  
**Regulatory:** Canada DSL  
**Trade Names:** Rewomid® S 280

**Stearamide MEA-stearate**

**CAS 14351-40-7;** EINECS/ELINCS 238-310-5  
**Synonyms:** Octadecanoic acid, 2-[1-oxooctadecyl amino] ethyl ester; 2-[1-Oxo-octadecyl] amino] ethyl octadecanoate; Stearoyl monoethanolamide stearate  
**Classification:** Substituted ethanolamide  
**Empirical:** C₃₈H₇₅NO₃  
**Formula:** CH₃(CH₂)₁₆CONH(CH₂)₃N(CH₃)₂  
**Properties:** M.w. 368.64; cationic/nonionic  
**Toxicology:** TSCA listed  
**Uses:** Antistat, softener, surfactant, emulsifier, and conditioner in pharmaceuticals, skin care prods.  
**Regulatory:** Canada DSL  
**Trade Names:** Lipamine SPA; Tegamine® 18

**Stearamidopropyl dimethylammonium chloride.** See Quaternium-70

**Stearamidopropyl PG-dimonium chloride phosphate**

**CAS 83682-78-4;** EINECS/ELINCS 280-518-3  
**Synonyms:** Phosphoric acid, 2-hydroxy-3-[3-(1-oxooctadecylamino) propylidimethylammonio] propyl triester, trichloride  
**Classification:** Quaternary ammonium salt  
**Empirical:** C₇₈H₁₄₂Cl₃N₆O₁₆P  
**Formula:** [CH₃(CH₂)₁₆CONH(CH₂)₂N(CH₃)₂CH₂CHOHC H₂O]⁺₃PO • 3Cl⁻  
**Properties:** Cationic
Chemical Component Cross-Reference

†=pharmaceutical grade

Handbook of Pharmaceutical Additives, Third Edition

2109
### Chemical Component Cross-Reference

**Regulatory:** FDA 21CFR §177.2800; FDA approved for rectals, topicals  
**Manuf./Distrib.:** Aldrich [http://www.sigma-aldrich.com](http://www.sigma-aldrich.com); Fluka [http://www.sigma-aldrich.com](http://www.sigma-aldrich.com); Sigma [http://www.sigma-aldrich.com/belgium](http://www.sigma-aldrich.com/belgium)  
**Trade Names:** Brij® 76 Pharma; Lipocol S-10; Volpo S10  
**Trade Names Containing:** Cosmowax

#### Steareth-16
- **CAS:** 9005-00-9 (generic)  
- **Synonyms:** PEG-16 stearyl ether; POE (16) stearyl ether  
- **Definition:** PEG ether of stearyl alcohol  
- **Formula:** CH₃(CH₂)₁₆CH₂(OCH₂CH₂)ₙOH, avg. n = 16  
- **Properties:** Nonionic  
- **Uses:** Surfactant, emulsifier in pharmaceuticals  
- **Regulatory:** FDA 21CFR §177.2800  
- **Trade Names Containing:** Solulan® 16

#### Steareth-20
- **CAS:** 9005-00-9 (generic)  
- **Synonyms:** PEG-20 stearyl ether; PEG 100 stearyl ether; POE (20) stearyl alcohol; POE (20) stearyl ether; Stearyl alcohol EO (20)  
- **Definition:** PEG ether of stearyl alcohol  
- **Empirical:** C₅₈H₁₁₈O₂₁  
- **Formula:** CH₃(CH₂)₁₆CH₂(OCH₂CH₂)ₙOH, avg. n = 20  
- **Properties:** HLB 15.3; nonionic  
- **Toxicology:** LD₅₀ (oral, rat) 2900 mg/kg; mod. toxic by ing.; TSCA listed  
- **Uses:** Emulsifier, gellant, stabilizer, wetting agent, dispersant, thickener for pharmaceuticals  
- **Regulatory:** FDA 21CFR §177.2800  
- **Trade Names Containing:** TEGO® Care 150

#### Steareth-21
- **CAS:** 9005-00-9 (generic)  
- **Synonyms:** PEG-21 stearyl ether; POE (21) stearyl ether  
- **Definition:** PEG ether of stearyl alcohol  
- **Empirical:** C₆₀H₁₂₂O₂₂  
- **Formula:** CH₃(CH₂)₁₆CH₂(OCH₂CH₂)ₙOH, avg. n = 21  
- **Properties:** Nonionic  
- **Toxicology:** Eye irritant; TSCA listed  
- **Uses:** Surfactant and emulsifier in pharmaceuticals, topicals; solubilizer for fragrances  
- **Regulatory:** FDA 21CFR §177.2800; FDA approved for topicals  
- **Manuf./Distrib.:** Aldrich [http://www.sigma-aldrich.com](http://www.sigma-aldrich.com); Fluka [http://www.sigma-aldrich.com](http://www.sigma-aldrich.com); Sigma [http://www.sigma-aldrich.com/belgium](http://www.sigma-aldrich.com/belgium)  
- **Trade Names:** Brij® 721; Lipocol S-21

#### Steareth-25
- **CAS:** 9005-00-9 (generic)  
- **Synonyms:** PEG-25 stearyl ether; POE (25) stearyl ether  
- **Definition:** PEG ether of stearyl alcohol  
- **Empirical:** C₆₈H₁₃₈O₂₆  
- **Formula:** CH₃(CH₂)₁₆CH₂(OCH₂CH₂)ₙOH, avg. n = 25  
- **Properties:** Nonionic  
- **Toxicology:** Eye irritant; TSCA listed  
- **Uses:** Emulsifier, dispersant, thickener for pharmaceuticals  
- **Regulatory:** FDA 21CFR §177.2800  
- **Manuf./Distrib.:** Aldrich [http://www.sigma-aldrich.com](http://www.sigma-aldrich.com); Fluka [http://www.sigma-aldrich.com](http://www.sigma-aldrich.com); Sigma [http://www.sigma-aldrich.com/belgium](http://www.sigma-aldrich.com/belgium)  
- **Trade Names Containing:** TEGO® Care 150

#### Steareth-80
- **CAS:** 9005-00-9 (generic)  
- **Properties:** Nonionic  
- **Toxicology:** TSCA listed  
- **Uses:** Surfactant, moisturizer, emulsifier  
- **Trade Names:** DeTHOX SA-80

#### Steareth-100
- **CAS:** 9005-00-9 (generic)  
- **Synonyms:** PEG-100 stearyl ether; POE (100) stearyl ether  
- **Definition:** PEG ether of stearyl alcohol  
- **Empirical:** C₂₁₈H₄₃₈O₁₀₁  
- **Formula:** CH₃(CH₂)₁₆CH₂(OCH₂CH₂)ₙOH, avg. n = 100  
- **Properties:** Nonionic

Handbook of Pharmaceutical Additives, Third Edition 2110
Stearate 40. See PEG-40 stearate

Stearic acid
CAS 57-11-4; 67701-03-5; 68424-37-3;
EINECS/ELINCS 200-313-4; 266-928-5; 270-298-7
FEMA 3035; INS570; E570
Synonyms: Carboxylic acid C18; 1-Heptadecanecarboxylic acid; Octadecanoic acid; n-Octadecanoic acid; Pearl stearic; Saturated C14-C22 fatty acid; Stearophanic acid
Classification: Fatty acid
Empirical: C18H36O2
Formula: CH3(CH2)16COOH9
Properties: Wh. to ylsh.-wh. amorphous waxy solid, tallow-like odor and taste; very sl. sol. in water; sol. in alcohol, ether, acetone, CCl4; m.w. 284.47; dens. 0.847 (70 C); m.p. 69.3 C; acid no. 195-200; iodine no. 4 max.; flash pt. (CC) 385 F; ref. index 1.4299 b.p. 383 C; acid no. 195-200; iodine no. 4 max.; flash pt. (CC) 385 F; ref. index 1.4299 (80 C)
Toxicology: LD50 (IV, rat) 21.5 ± 1.8 mg/kg; poison by IV route; human skin irritant; possible sensitizer for allergic persons; questionable carcinogen; experimental tumorigen by implant; TSCA listed
Precaution: Combustible when exposed to heat or flame; heats spontaneously
Hazardous Decomp. Prods.: Heated to decomp., emits acrid smoke and irritating fumes
HMIS: Health 1, Flammability 1, Reactivity 0
Uses: Emulsifier, solubilizer in pharmaceuticals, buccals, implants, orals, topicals, vaginals, sunscreens; tablet/capsule lubricant; lubricant/softener in suppositories, ointments; stearetes as pharmaceutical aids

Stearone
CAS 504-53-0; EINECS/ELINCS 207-993-1
Synonyms: Diheptadecyl ketone; Distearoyl ketone; 18-Pentatracontanone; Pentatracontan-18-one
Classification: Aliphatic ketone
Empirical: C_{35}H_{70}O
Formula: CH_{3}(CH_{2})_{16}CO(CH_{2})_{16}CH_{3}
Properties: Insol. in water; stable to high temps., acids, alkalis
Toxicology: TSCA listed

†=pharmaceutical grade

Precaution: Combustible
Uses: Visc. control agent in pharmaceuticals
Regulatory: Canada DSL
Manuf./Distrib.: Aceto [http://www.aceto.com]

Stearophanic acid. See Stearic acid

Stearoxy dimethicone
CAS 68554-53-0
Synonyms: Dimethyl siloxy stearoxy siloxane polymer; Poly (dimethylsilox) stearoxy siloxane; Siloxanes and silicones, dimethyl, (octadecyloxy)-terminated
Definition: Polymer of dimethylpolysiloxane endblocked with stearyloxy groups
Toxicology: TSCA listed
Uses: Spreading agent, emollient, water barrier for antiperspirants, creams, lotions
Trade Names: Abil®-Wax 2434

Stearoxytrimethylsilane
CAS 18748-98-6; EINECS/ELINCS 242-554-8
Synonyms: Silane, trimethyl (octadecyloxy)-; Trimethyl (octadecyloxy) silane; Trimethyl (stearyloxy) silane
Classification: Organo-silicon compd.
Empirical: C_{21}H_{46}OSi
Formula: CH_{3}(CH_{2})_{16}CH_{2}OSi(CH_{3})_{3}
Properties: Clear liq.; m.w. 342.69
Uses: Emollient in pharmaceutical topicals
Regulatory: Canada DSL
Manuf./Distrib.: Somerset Cosmetic Co. [http://www.makingcosmetics.com/]
Trade Names Containing: Dow Corning® Silky Wax 10

Stearoyl diethanolamide. See Stearamide DEA
Stearoyl monoethanolamide. See Stearamide MEA

Steartrimonium chloride
CAS 112-03-8; EINECS/ELINCS 203-929-1
Synonyms: Ammonium, trimethyloctadecyl-, chloride; Monostearyl trimethyl ammonium chloride; Octadecyl trimethyl ammonium chloride; Quaternium-10; STAC; Stearyl trimethyl ammonium chloride; N,N,N-Trimethyl-1-octadecanaminium chloride; Trimethyl octadecyl ammonium chloride; Trimethyl stearyl ammonium chloride
Classification: Quaternary ammonium salt
Empirical: C_{21}H_{48}N • Cl
Formula: [CH_{3}(CH_{2})_{16}CH_{2}N(CH_{3})_{3}]^+Cl^–
Properties: M.w. 348.13; cationic
Toxicology: LD50 (oral, mouse) 536 mg/kg, (skin, mouse) 1600 mg/kg; poison by ing.;
### Stearyl alcohol

**CAS:** 112-92-5; EINECS/ELINCS 204-017-6  
**Synonyms:** C18 linear alcohol; Decyl octyl alcohol; Octadecanol; 1-Octadecanol; n-Octadecanol; Octadeyl alcohol; n-Octadecyl alcohol; Stearol  
**Classification:** Fatty alcohol  
**Empirical:** C_{18}H_{38}O  
**Formula:** CH_{3}(CH_{2})_{16}CH_{2}OH  
**Properties:** Wh. unctuous flakes or gran., faint odor, bland taste; sol. in alcohol, acetone, ether; insol. in water; m.w. 270.56; dens. 0.8124 (59/4 C); m.p. 55-60 C; b.p. 210.5 C (15 mm); acid no. 2 max.; iodine no. 2 max.; hyd. no. 195-220  
**Toxicology:** LD50 (oral, rat) 20 g/kg; TDLo (implant, mouse) 1000 mg/kg; mildly toxic by ing.; irritating to skin and eyes; may cause skin sensitivity; nonallergenic; questionable carcinogen; experimental neoplastigen; TSCA listed  
**Precaution:** Flamm. when exposed to heat or flame; can react with oxidizers  
**HMIS:** Health 1, Flammability 1, Reactivity 0  
**Uses:** Surfactant, emulsifier, emulsion stabilizer, emollient, stiffener in pharmaceuticals, orals, topicals, vaginals; astringent in anti-itch preps.  
**Regulatory:** FDA 21CFR §172.755, 172.864, 175.105, 175.300, 176.200, 176.210, 177.1010, 177.1200, 177.1390, 177.2800, 178.3480, 178.3910; FDA approved for orals, topicals, vaginals; USP/NF, BP, EP compliance; Canada DSL  
**Trade Names:** Daistat SM 80  
**Trade Names:** Cachalot® S-56; Crodacol S95 EP; Crodacol S95 NF; Hetol SA; Lanette® 18

Handbook of Pharmaceutical Additives, Third Edition

2115
Chemical Component Cross-Reference

**ester; Hexanoic acid, 2-ethyl-, octadecyl ester; Octadecyl 2-ethylhexanoate; Stearyl 2-ethylhexanoate**

**Definition:** Ester of stearyl alcohol and 2-ethylhexanoic acid

**Empirical:** C₉₆H₁₈₂O₂

**Formula:** CH₃(CH₂)₁₀CH₂CH₃COO(CH₂)₁₂CH₃

**Uses:** Emollient in pharmaceuticals, topical; agent, pigment dispersant, spreading agent, solubilizer for pharmaceuticals, creams, lotions

**Regulatory:** TSCA listed

**Trade Names Containing:** Crodamol SCO; Super Refined® Crodamol SCO

### Stearyl stearate

**CAS:** 2778-96-3; 85536-04-5; EINECS/ELINCS 220-476-5, 287-484-9

**Synonyms:** Octadecanoic acid, octadecyl ester; Octadecyl stearate

**Definition:** Ester of stearyl alcohol and stearic acid

**Empirical:** C₃₆H₇₂O₂

**Formula:** CH₃(CH₂)₁₀COO(CH₂)₁₂CH₃

**Properties:** M.w. 536.98; m.p. 56 °C; flash pt. > 110 °C

**Toxicology:** TSCA listed

**Uses:** Emollient, thickener, visc. control agent, pigment dispersant, spreading agent, solubilizer for pharmaceuticals, creams, lotions

**Regulatory:** FDA 21CFR §172.510; Canada DSL

**Manuf./Distrib.:** A&E Connock

  http://www.connock.co.uk; AXO Chem.
  http://www.axochemical.com

**Trade Names:** Crodamol SCO; Super Refined® Crodamol SCO

### Stearalkonium hydroxide

**CAS:** 8046-19-3; EINECS/ELINCS 232-458-4

**Synonyms:** Gum storax; Liquidambar orientalis; Liquid storax; Storax; Storax gum; Styrax; Sweet gum; Sweet oriental gum

**Definition:** Balsam obtained from trunk of Liquidambar orientalis

**Properties:** Grayish-brn. semiliq. to semisolid, char. odor and taste; sol. in 1 part warm alcohol; sol. in ether, acetone, CS₂; insol. in water; flash pt. > 110 °C

**Toxicology:** May be harmful by inh., ing., skin absorb; mod. toxic when ingested; may cause irritation to eyes, mucus membranes, upper respiratory tract; can cause urinary problems when absorbed thru skin; can cause skin irritation, welts, and discomfort when applied topically; common allergen; TSCA listed

**Precaution:** Incompat. with strong oxidizing agents

**Hazardous Decomp. Prods.:** CO, CO₂; emits toxic fumes under fire conditions

**Storage:** Store @ R.T. in cool, dry place; keep tightly closed

**Uses:** Topical protectant in pharmaceuticals; expectorant; weak antiseptic; stimulant; parasiticide, formerly as ointment in treatment of parasitic skin diseases; embedding material in microscopy

**Regulatory:** FDA 21CFR §172.510; FEMA GRAS

**Manuf./Distrib.:** Bio-Botanica http://www.bio-botanical.com

### Stearyl trihydroxyethyl propylenediamine dihydrofluoride (INCI)

**Definition:** Ester of stearyl alcohol and dihydrofluoride (INCI)

**Synonyms:** Stearalkonium hydroxide

**Uses:** Emollient, thickener, visc. control agent, pigment dispersant, spreading agent, solubilizer for pharmaceuticals, creams, lotions

**Regulatory:** TSCA listed

**Trade Names:** Exceparl SS; Ritachol® SS

### Stearyl trimethyl ammonium chloride

**Definition:** Ester of stearyl alcohol and trimethyl ammonium chloride

**Synonyms:** Stearyl trimethyl ammonium chloride

**Uses:** Emollient, thickener, visc. control agent, pigment dispersant, spreading agent, solubilizer for pharmaceuticals, creams, lotions

**Regulatory:** TSCA listed

**Trade Names:** Exceparl SS; Ritachol® SS

### Stibine, trichloro-

**Definition:** Ester of stearyl alcohol and stearic acid

**Empirical:** C₃₆H₇₂O₂

**Formula:** CH₃(CH₂)₁₀CH₂CH₃COO(CH₂)₁₂CH₃

**Uses:** Emollient in pharmaceuticals, topical

**Regulatory:** Canad. DSL

**Manuf./Distrib.:** A&E Connock

  http://www.connock.co.uk; AXO Chem.
  http://www.axochemical.com

**Trade Names:** Crodamol SCO; Super Refined® Crodamol SCO

### Stearyl trihydroxyethyl propylenediamine dihydrofluoride (INCI)

**Definition:** Ester of stearyl alcohol and dihydrofluoride (INCI)

**Synonyms:** Stearalkonium hydroxide

**Uses:** Emollient, thickener, visc. control agent, pigment dispersant, spreading agent, solubilizer for pharmaceuticals, creams, lotions

**Regulatory:** TSCA listed

**Trade Names:** Exceparl SS; Ritachol® SS

### Stearyl trimethyl ammonium chloride

**Definition:** Ester of stearyl alcohol and trimethyl ammonium chloride

**Synonyms:** Stearyl trimethyl ammonium chloride

**Uses:** Emollient, thickener, visc. control agent, pigment dispersant, spreading agent, solubilizer for pharmaceuticals, creams, lotions

**Regulatory:** TSCA listed

**Trade Names:** Exceparl SS; Ritachol® SS

Styrax. See Gum benzoin; Storax (Liquidambar orientalis)
Styrax benzoin; Styralyx benzoin gum. See Gum benzoin

Styrene
CAS 100-42-5; EINECS/ELINCS 202-851-5
UN 2055 (DOT); FEMA 3233
Synonyms: Cinnamene; Cinnamenol; Cinnamol; Ethylenbenzene; Phenethylene; Phenylethene; Phenylethylene; Styrene monomer; Styrene monomer, inhibited; Styrol; Styrole; Styrolene; Styron; Styropor; Vinylbenzene; Vinylbenzol
Classification: Aromatic hydrocarbon; alkenylenzene
Empirical: C₈H₈
Formula: C₈H₈CH:CH₂
Properties: Colorless to ylsh. oily liq., penetrating odor; sol. in alcohol, ether, methanol, acetone, CS₂; sparingly sol. in water; m.w. 104.15; dens. 0.906 (20/4 C); m.p. -30.6 C; b.p. 145-146 C; flash pt. (CC) 31 C; ref. index 1.546 (20 C)
Toxicology: ACGIH TLV/TWA 50 ppm; STEL 100 ppm (skin); LD₅₀ (oral, rat) 5000 mg/kg, (IV, mouse) 90 mg/kg, (IP, mouse) 660 mg/kg; poison by ing., inh., IV routes; mod. toxic by IP; mildly toxic by inh. to humans; human systemic effects by inh. (eye/olfactory changes); skin, eye, mucous membrane irritant; human skin irritant; narcotic in high concns.; carcinogen; experimental teratogen, reproductive effector; human mutagenic data; TSCA listed
Precaution: Flamm.; dangerous fire hazard exposed to flame, heat, oxidizers; vapor explosive; slowly undergoes polymerization and oxidation on exposure to light and air, yielding peroxides; violent/explosive polymerizations possible;

†=pharmaceutical grade

Hazardous Decomp. Prods.: Heated to decomp., emits acrid smoke and irritating fumes
NFPA: Health 2, Flammability 3, Reactivity 2
Storage: Storage hazard above 32 C
Uses: Synthetic flavor for pharmaceuticals
Regulatory: FDA 21 CFR §172.515, 173.20, 173.25, 175.300, 175.320, 175.380, 175.390, 176.170, 176.180, 177.1010, 177.1020, 177.1030, 177.1040, 177.1210, 177.1630, 177.1640, 177.1810, 177.1820, 177.1830, 177.2260, 177.2420.; Canada DSL; 177.2600, 177.2710, 177.2800, 178.3790; FEMA GRAS; HAP

Styrene/acrylate copolymer. See Styrene/acrylates copolymer
Styrene/acrylates copolymer
CAS 9010-92-8
Synonyms: Styrene/acrylate copolymer; Styrene/acrylic; Styrene/acrylic copolymer;
Suberic acid  

**Synonyms:** Dicarboxylic acid C8; Hexane-1,6-dicarboxylic acid; Octanedioic acid; Octane-1,8-dioic acid  

**Empirical:** C8H14O4  

**Formula:** HOOC(CH2)6COOH  

**Properties:** Colorless crys.; sol. in alcohol, hot water; partly sol. in ether; sl. sol. in cold water; m.w. 174.20; m.p. 142-144 C; b.p. 230 C (15 mm); sublimes @ 300 C  

**Precaution:** Combustible  

**Uses:** Intermediate for synthesis of drugs  

**Regulatory:** Canada DSL  

**Manuf./Distrib.:** Advanced Synthesis Tech.  

**http://www.advancedsynthesis.com**

---

**Sodium cyclamate**  

**Synonyms:** Calcium cyclamate; Saccharin  

**Empirical:** C7H5O4Na  

**Formula:** HOOCCH2CH2COONa  

**Properties:** Colorless crys., odorless, sour acid taste; very sol. in alcohol, ether, acetone, glycerin; sol. 77 g/l in water; m.w. 118.09; dens. 1.552; m.p. 185 C; b.p. 235 C (dec.)  

**Toxicology:** LD50 (oral, rat) 2260 mg/kg, (IP, mouse) 2702 mg/kg; mod. toxic by subcut. route; primary irritant; severe eye irritant; mutagen; TSCA listed  

**Precaution:** Combustible  

**Hazardous Decomp. Prods.:** Heated to decomp., emits acrid smoke and irritating fumes  

**Storage:** Store @ R.T.  

**Uses:** Germicide, buffer, neutralizer for pharmaceuticals, parenterals, orals, mouthwashes; laxative  

**Regulatory:** NF compliance; FDA 21 CFR §131.111, 131.136, 131.144, 172.230, 172.275, 172.861, 184.1091, 184.1094, 582.1091, GRAS; Japan approved; Europe listed; UK approved; FDA approved for parenterals, orals; Canada DSL  

**Manuf./Distrib.:** AMRESCO†  

**http://www.sigma-aldrich.com**

---

**Sucaryl acid**  

**Synonyms:** Substituted hexa hydroxypropyridine  

**Empirical:** C8H14O4  

**Formula:** HOOC(CH2)6COOH  

**Properties:** Colorless monoclinic prisms or wh. cryst., odorless, sour acid taste; very sol. in alcohol, ether, acetone, glycerin; sol. 77 g/l in water; m.w. 118.09; dens. 1.552; m.p. 185 C; b.p. 235 C (dec.)  

**Toxicology:** LD50 (oral, rat) 2260 mg/kg, (IP, mouse) 2702 mg/kg; mod. toxic by subcut. route; primary irritant; severe eye irritant; mutagen; TSCA listed  

**Precaution:** Combustible  

**Hazardous Decomp. Prods.:** Heated to decomp., emits acrid smoke and irritating fumes

Succinic anhydride
CAS 108-30-5; EINECS/ELINCS 203-570-0

Synonyms: Butanedioic anhydride; Dihydro-2,5-furandione; 2,5-Diketotetrahydrofuran; SAA; Succinic acid anhydride; Succinyl oxide; Tetrahydro-2,5-dioxofuran

Empirical: C₄H₄O₃

Formula: OCCH₂CH₂COO

Properties: Colorless needles; sol. in chloroform, CCl₄, alcohol, chlorinated solvs.; very sl. sol. in ether, water; m.w. 100.08; dens. 1.503; vapor pressure 1 mm (92 C); m.p. 119-120 C; b.p. 261 C; sublimes @ 115 C and 5 mm pressure

Toxicology: LD₅₀ (oral, rat) 1510 mg/kg; TDLo (subcut., rat, 65 wks intermittent) 2600 mg/kg; mod. toxic by ing.; severe eye irritant; irritating to respiratory system; possible carcinogen; experimental neoplastigen and teratogen; mutagenic data; TSCA listed

Hazardous Decomp. Prods.: Heated to decomp., emits acrid smoke and irritating fumes

Storage: Hygroscopic moisture-sensitive

Uses: Mfg. of pharmaceuticals

Regulatory: FDA 21CFR §172.892, 175.300, 175.380, 175.390, 176.170, 177.1210; Canada DSL

Succinic acid anhydride. See Succinic anhydride

Succinic acid diethyl ester. See Diethyl succinate

Succinic acid, 2,3-dihydroxy-. See L-Tartaric acid

Succinic acid, dimethyl ester. See Dimethyl succinate

Succinic acid disodium salt. See Sodium succinate

Succinic acid, hydroxy-. See N-Hydroxysuccinic acid

Succinic acid sodium salt. See Sodium

†=pharmaceutical grade
Succinyl oxide. See Succinic anhydride

Sucralose

CAS 56038-13-2
INS955

Synonyms: 1,6-Dichloro-1,6-dideoxy-β-D-fructofuranosyl-4-chloro-4-deoxy-α-D-galactopyranoside; 4,1´,6´-Trichlorogalactosucrose

Definition: Selectively chlorinated deriv. of sucrose

Empirical: C12H19Cl3O8

Properties: Wh. crystals or powd.; odorless; sweet taste; sol. in water, methanol, alcohol; sl. sol. in ethyl acetate; m.w. 397.66

Toxicology: LD50 (unreported, mouse) > 16 g/kg

Uses: Nonnutritive sweetener, flavor enhancer in pharmaceuticals

Regulatory: FDA 21CFR §172.831; USP/NF compliance

Manuf./Distrib.: CarboMer

Trade Names: Splenda®

Sucralose. See Sodium cyclamate

Sucrose

CAS 57-50-1; EINECS/ELINCS 200-334-9

Synonyms: Beet sugar; Cane sugar; Confectioner's sugar; β-D-Fructofuranosyl-α-D-glucopyranoside; α-D-Glucopyranosyl β-D-fructofuranoside; (α-D-Glucosido)-β-D-fructofuranoside; Granulated sugar; Rock candy; Saccharose; Saccharum; D-Sucrose; Sugar; Table sugar

Classification: Aliphatic polyhydric alcohol; disaccharide

Definition: Sugar obtained from Saccharum officinarum, Beta vulgaris and other sources; molecule of glucose linked to one of fructose; avail. commercially as naturally occurring (+)-enantiomer

Empirical: C12H22O11

Properties: Wh. crystals or powd.; odorless; sweet taste; very sol. in water; sol. in alcohol, glycerol, pyridine; insol. in ether, chloroform; m.w. 342.30; dens. 1.587 (25/4 C); m.p. 160-186 C (dec.); ref. index 1.34783 (10%, 20 C)

Toxicology: ACGIH TLV/TWA 10 mg/m3; PEL-TWA 15 mg/m3 (total dust), 5 mg/m3 (respirable fraction); LD50 (oral, rat) 29,700 mg/kg, (IP, mouse) 14,000 mg/kg; pract. nontoxic by ing.; inh. of high concs. of dust may cause coughing, mild temporary irritation; experimental teratogen; mutagenic data; TSCA listed

Precaution: May form explosive dust-air mixts.; incompat. with oxidizers (increases fire/explosion risk); vigorous reaction with nitric acid or sulfuric acid; avoid static charge, sparks, temps. above 160 C

Hazardous Decomp. Prods.: CO, CO2; heated to decomp., emits acrid smoke and irritating fumes

HMIS: Health 0, Flammability 1, Reactivity 0

Storage: Store in tightly closed, labeled containers away from incompat. materials, @ R.T.; avoid generating dusts

Uses: Sweetener, flavor, preservative, antioxidant (in form of invert sugar) in pharmaceuticals, buccals, orals, rectals, topicals, medicinal syrups; coating agent, diluent, granulation agent, and excipient for tablets and capsules

Manuf./Distrib.: AMRESCO

Trade Names: Bacto®, Maxwell®, NED®, DE®

Succinic anhydride

D-Sucrose. See Sucrose

Sucrose acetate isobutyrate
CAS 126-13-6; 27216-37-1; EINECS/ELINCS 204-771-6

INS444

Synonyms: α-D-Glucopyranoside, O-acetyl-tris-(2-methyl-1-oxopropyl)-β-D-fructofuranosyl, acetate tris (2-methyl propanoate); Saccharose acetate isobutyrate; SAIB; Sucrose acetoisobutyrate; Sucrose, diacetate hexaisobutyrate

Classification: Sucrose derivative

Definition: Mixed ester of sucrose and acetic and isobutyric acids

Empirical: C₄₀H₆₂O₁₉

Formula: (CH₃COO)₂C₁₂H₁₄O₃[OOCCH(CH₃)₂]₆

Properties: Wh. powd. or pale straw-colored liq.; insol. in water; m.w. 846.92; dens. 1.146; dec. on heating to 288 C; flash pt. (COC) 260 C; ref. index 1.4540

Toxicology: LD₅₀ (oral, rat) 25,600 mg/kg, (IP, rat) > 25,600 mg/kg; sl. toxic by ing. and IP routes; TSCA listed

Precaution: Combustible

Hazardous Decomp. Prods.: Heated to decomp., emits acrid smoke and irritating vapors

Uses: Film-former, emulsion stabilizer, clouding agent, modifying extender for film-forming biopolymers

Regulatory: FDA 21CFR §172.833, 175.105; Canada DSL

Manuf./Distrib.: Ashland

Trade Names: Non Pareil® Seeds

Sucrose acetoisobutyrate. See Sucrose acetate isobutyrate

Sucrose benzoate
CAS 12738-64-6; EINECS/ELINCS 235-795-5

Synonyms: β-D-Fructofuranosyl-α-D-glucopyranoside benzoate

Classification: Disaccharide ester

Empirical: C₁₉H₂₆O₁₂

Properties: Sol. in aromatics, ketones, esters;
Chemical Component Cross-Reference

†=pharmaceutical grade

Sucrose distearate
CAS 27195-16-0; EINECS/ELINCS 248-317-5
Synonyms: α-D-Glucopyranoside, β-D-fructofuranosyl, diocadecanoate;
Saccharose distearate

Definition: Mixture of sucrose esters of stearic acid; consists mainly of the diester

Empirical: C_{48}H_{90}O_{13}

Properties: M.w. 875.23; HLB 3.0; nonionic

Uses: Dispersant, emulsifier, wetting agent, solubilizer, emollient, conditioner, softener, detergent, excipient, diluent, binder, filler, lubricant for pharmaceuticals

Regulatory: Canada DSL

Manuf./Distrib.: CarboMer†

http://www.carbomer.com

Trade Names: Crodesta F-10; Ryoto Sugar Ester S-570; Ryoto Sugar Ester S-770; Ryoto Sugar Ester S-970

Trade Names Containing: Crodesta F-110

Sucrose esters; Sucrose esters of fatty acids. See Acetylated sucrose estearate

Sucrose cis-13-docosenoate. See Sucrose erucate

Sucrose erucate

Synonyms: Sucrose cis-13-docosenoate

Classification: Sucrose fatty acid ester

Properties: Powd.; HLB 1.0

Uses: Disintegrant in pharmaceutical formulations

Regulatory: FDA 21CFR §172.859

Trade Names: Ryoto Sugar Ester ER-190; Ryoto Sugar Ester ER-290

Sucrose esters; Sucrose esters of fatty acids. See Sucrose fatty acid esters

Sucrose fatty acid esters

CAS 977019-37-6; INS473; E473

Synonyms: Sucrose esters; Sucrose esters of fatty acids; Sugar esters

Definition: Mono-, di-, and triesters of sucrose with fatty acids

Properties: Wh. to sl. grayish powd. (based on sat. fatty substances); ylsh. pasty to waxy substance (based on unsat. fatty acids); sol. in ethanol; sparingly sol. in water; insol. in veg. oils; nonionic

Hazardous Decomp. Prods.: Heated to decomp., emits acrid smoke and irritating fumes

Uses: Emulsion stabilizer, dispersant,
Chemical Component Cross-Reference

solubilizer for pharmaceutical tablets

Regulatory: FDA 21CFR §172.859; ADI 0-30 mg/kg body wt.; Europe listed; UK approved; FAO/WHO 8.446

http://www.dks-web.co.jp; Mitsubishi Chem.
http://www.m-kagaku.co.jp/index_en.htm; Multi-Kem http://www.multikem.com

Trade Names Containing: Ryoto Sugar Ester
POS-135

Sucrose laurate
CAS 25339-99-5; EINECS/ELINCS 246-873-3
Synonyms: α-D-Glucopyranoside, β-D-fructofuranosyl, monododecanoate
Definition: Mixture of sucrose esters of lauric acid; consists mainly of monoester
Empirical: C\textsubscript{24}H\textsubscript{44}O\textsubscript{12}
Properties: HLB 15.0; nonionic
Uses: Emulsifier, solubilizer, stabilizer, antibacterial, wetting agent, dispersant, softener, conditioner in pharmaceuticals; lubricant, disintegrant, binder, filler in tablets

Manuf./Distrib.: CarboMer†
http://www.carbomer.com; Fluka
http://www.sigma-aldrich.com

Trade Names: Ryoto Sugar Ester L-1695; Surfhope® SE Pharma D-1216

Trade Names Containing: Ryoto Sugar Ester
LWA-1570

Sucrose monodistearate. See Sucrose polyol

Sucrose monopalmitate. See Sucrose palmitate

Sucrose monostearate. See Sucrose stearate

Sucrose myristate
CAS 27216-47-3; EINECS/ELINCS 248-340-0
Definition: Monoester of myristic acid and sucrose
Empirical: C\textsubscript{26}H\textsubscript{48}O\textsubscript{12}
Properties: Nonionic
Uses: Emulsifier, solubilizer, stabilizer; tablet lubricant, disintegrant, binder, filler

Trade Names: Ryoto Sugar Ester M-1695

Sucrose octaacetate
CAS 126-14-7; EINECS/ELINCS 204-772-1
FEMA 3038
Synonyms: α-D-Glucopyranoside, 1,3,4,6-tetra-O-acetyl-β-D-fructofuranosyl-1,4-tetraacetate; Octaacetylfructose; D-(+)-Sucrose octaacetate
Empirical: C\textsubscript{28}H\textsubscript{36}O\textsubscript{19}

Properties: Wh. need., pract. odorless, intensely bitter taste; sol. in ether, methanol, chloroform, 1100 parts water, 11 parts alcohol, 22 parts CCl\textsubscript{4}, oxygenated and aromatic solvs.; m.w. 678.60; m.p. 82-85 C; b.p. 260 C (1 mm); dec. above 285 C; ref. index 1.4660
Toxicology: LD\textsubscript{50} (oral, rat) > 5 g/kg, (skin, rabbit) > 5 g/kg; sl. toxic by ing. and skin contact; irritating to skin; TSCA listed
Precaution: Combustible

Hazardous Decomp. Prods.: Heated to decomp., emits acrid smoke and irritating vapors

HMIS: Health 1, Flammability 0, Reactivity 0
Storage: Hygroscopic

Uses: Alcohol denaturant in pharmaceuticals; in preps. intended to deter nail biting

Regulatory: FDA 21CFR §172.515, 175.105, 27CFR §21.130; FEMA GRAS; USP/NF compliance; Canada DSL

D-(+)-Sucrose octaacetate. See Sucrose octaacetate

Sucrose oleate
CAS 25496-92-8; EINECS/ELINCS 247-041-2
Definition: Monoester of oleic acid and sucrose
Empirical: C\textsubscript{36}H\textsubscript{54}O\textsubscript{12}
Properties: Nonionic
Uses: Emulsifier, solubilizer, stabilizer; tablet lubricant, disintegrant, binder, filler

Regulatory: FDA 21CFR §172.859
Chemical Component Cross-Reference

† = pharmaceutical grade

Trade Names: Ryoto Sugar Ester O-1570; Ryoto Sugar Ester OWA-1570

Sucrose palmitate
CAS: 26446-38-8; EINECS/ELINCS: 247-706-7
Synonyms: β-D-Fructofuranosyl-α-D-glucopyranoside monohexadecanoate; α-D-Glucopyranosyl, β-D-fructofuranosyl, monohexadecanoate; Palmitic sucrose ester; Saccharose palmitate; Sucrose monopalmitate; Sucrose palmitic acid ester

Definition: Monoester of palmitic acid and sucrose

Empirical: C_{28}H_{52}O_{12}

Properties: M.w. 580.71; nonionic

Uses: Emulsifier, solubilizer, stabilizer; tablet lubricant, disintegrant, binder, filler

Regulatory: FDA 21CFR §172.859; Canada DSL

Trade Names: Ryoto Sugar Ester O-1570;
Ryoto Sugar Ester OWA-1570;
Surfhope® SE Pharma D-1615;
Surfhope® SE Pharma D-1616

Sucrose palmitic acid ester. See Sucrose palmitate

Sucrose polylaurate
Definition: Mixture of esters of lauric acid and sucrose

Properties: Nonionic

Uses: Emulsifier

Trade Names: Ryoto Sugar Ester L-195

Sucrose polylinoleate
CAS: 56449-51-5; EINECS/ELINCS: 260-188-7

Definition: Mixture of esters of linoleic acid and sucrose

Uses: Emulsifier for pharmaceuticals

Manuf./Distrib.: Somerset Cosmetic Co.

http://www.makingcosmetics.com/

Sucrose polyleate
Definition: Mixture of esters of oleic acid and sucrose

Properties: Nonionic

Uses: Emulsifier

Trade Names: Ryoto Sugar Ester O-170

Sucrose polystearate
Synonyms: Saccharose mono/distearate; Sucrose mono/distearate

Definition: Mixture of esters of stearic acid and sucrose

Properties: Nonionic

Uses: Emulsifier, solubilizer, stabilizer, tableting agent, lipophilic matrix in pharmaceuticals; excipient, diluent, lubricant, binder, filler for tablets

Trade Names: Ryoto Sugar Ester S-070;
Ryoto Sugar Ester S-170; Ryoto Sugar Ester S-270

Sucrose stearate
CAS: 25168-73-4; EINECS/ELINCS: 246-705-9

Synonyms: β-D-Fructofuranosyl-α-D-glucopyranoside, monooctadecanoate; α-D-Glucopyranosyl, β-D-fructofuranosyl, monooctadecanoate; Sucrose monostearate

Definition: Monoester of stearic acid and sucrose

Empirical: C_{30}H_{56}O_{12}

Properties: Wh. powd.; odorless; tasteless; nonionic

Uses: Thickener, suspending agent, dispersant, emulsifier, wetting agent, solubilizer for pharmaceuticals; lubricant, disintegrant, binder, filler in tablets

Features: Low-foaming

Regulatory: Canada DSL

Manuf./Distrib.: CarboMer†

http://www.carbomer.com

Trade Names Containing: Crodesta F-110

Sucrose tetraester triacetate
CAS: 52439-69-7; EINECS/ELINCS: 257-922-3

Definition: Mixt. of esters of stearic acid, acetic acid, and sucrose

Uses: Emulsifier, conditioner, softener, detergent for pharmaceuticals; tablet lubricant

Regulatory: Canada DSL

Manuf./Distrib.: Somerset Cosmetic Co.

http://www.makingcosmetics.com/

Sucrose tribehenate
Definition: Triester of behenic acid and sucrose

Empirical: C_{78}H_{148}O_{14}

Properties: Nonionic

Uses: Emulsifier, antibacterial, wetting agent, dispersant for pharmaceuticals; lubricant, disintegrant, binder, filler for tablets;
**Chemical Component Cross-Reference**

solubilizer, stabilizer for fat-sol. vitamins and antibiotics

*Trade Names: Ryoto Sugar Ester B-370*

**Sucrose tristearate**

*CAS 27923-63-3; EINECS/ELINCS 248-731-6*

*Synonyms: β-D-Fructofuranosyl-α-D-glucopyranoside trioctadecanoate*

*Definition: Triester of stearic acid and sucrose*

*Empirical: C₆₆H₁₂₄O₁₄*

*Properties: Nonionic*

*Uses: Emulsifier, solubilizer, stabilizer in pharmaceuticals; lubricant, disintegrant, binder, filler for tablets*

*Regulatory: FDA 21CFR §172.859*

*Manuf./Distrib.: CarboMer [http://www.carbomer.com]*

*Trade Names: Ryoto Sugar Ester S-370; Ryoto Sugar Ester S-370F*

**Sudan III**  See D&C Red No. 17; Solvent red 23

**Sudan gum**.  See Acacia

**Sugar**.  See Sucrose

**Sugar, compressible**

*Synonyms: Sucrose, compressible*

*Definition: Dried at 105 C for 4 h, contains 95-98% sucrose; may also contain starch, maltodextrin, invert sugar, and a lubricant*

*Properties: Pract. wh. cryst. powd., odorless, sweet taste; sucrose portion is very sol. in water; stable in air*

*Uses: Sweetener in pharmaceuticals; diluent for tablets and capsules*

*Regulatory: USP/NF, BP compliance*

**Sulfalone**.  See Sulfolane

**Sulfamethalazole**.  See Sulfamethoxazole

**Sulfamethizole**

*CAS 144-82-1; EINECS/ELINCS 205-641-1*

*Synonyms: 2-(p-Aminobenzenesulfonylazo)-5-methylthiadiazole; 4-Amino-N-(5-methyl-1,3,4-thiadiazol-2-yl) benzenesulfonylamine; 5-Methyl-2-sulfonanilamido-1,3,4-thiadiazole; N¹-(5-Methyl-1,3,4-thiadiazol-2-yl) sulfanilimide; Sulfameththiaziadole; 2-Sulfanilamido-5-methyl-1,3,4-thiadiazole*

*Empirical: C₉H₁₀N₄O₂S₂*

*Properties: Wh. powd.; sol. in 95% ethanol; sol.
**Chemical Component Cross-Reference**

in water @ pH 7.5, insol. @ pH 6.5; insol. in benzene; m.w. 270.35; m.p. 208-212 C; nonvolatile; probably nonflamm.

**Toxicology:** LD50 (oral, rat) 3500 mg/kg, (subcut., rat) > 6560 mg/kg, (IV, rat) 2710 mg/g may be harmful by inh., ing., skin absorpt.; may cause skin eruptions on contact, by inh. or ing.; may cause sensitization by skin contact; irritant; may cause allergic skin reaction; exposure @ elevated levels may lead to shock; may cause nausea, diarrhea, anorexia, headache, depression, hallucinations, convulsions, fever, chills, dermatitis; experimental carcinogen; TSCA listed

**Storage:** Store refrigerated

**Uses:** Antimicrobial; antibacterial; used esp. in renal infections

**Regulatory:** BP, EP compliance

sulfosuccinate

Sulfobutylether β-cyclodextrin
Synonyms: SBE–β-CD
Uses: Excipient, carrier, solubilizer, stabilizer, bioavailability enhancer for parenteral pharmaceuticals; in chiral separation of sm. molecule pharmaceuticals by capillary electrophoresis
Trade Names: Captisol®
Sulfocarbanilide. See N,N' -Diphenylthiourea
Sulfocarboxylic acid. See Phenolsulfonic acid
2-Sulfoethylamine. See Taurine
Sulfolan. See Sulfolane
Sulfolane
CAS 126-33-0; EINECS/ELINCS 204-783-1
Synonyms: Cyclic tetramethylene sulfone; Cyclotetramethylene sulfone; Dapsone; Dihydrobutadiene sulfone; 1,1-Dioxide tetrahydrothiofurane; 1,1-Dioxidotetrahydrothiophene; Diothiolan; 1,1-Dioxothiophene; Sulfolane; Sulfolan; Tetrahydrothiophene dioxide; Tetrahydrothiophene-1,1-dioxide; 2,3,4,5-Tetrahydrothiophene-1,1-dioxide; Tetramethylene sulfone; Thiacyclopentane dioxide; Thiocyclopentane-1,1-dioxide; Thiolane-1,1-dioxide; Thiophane dioxide; Thiophan sulfone
Empirical: C₄H₈O₂S
Formula: CH₂CH₂CH₂CH₂SO₂
Properties: Wh. or creamy wh. cryst. powd., odorless, sl. bitter taste; sol. in alcohol, acetone, dilute min. acids; misc. with acetone, toluene, oxygenated/aromatic solv.s.; sl. misc. with octanes, olefins, naphthenes, aliphatic hydrocarbons; very sl. sol. in water; m.w. 120.16; dens. 1.27 (20 C); b.p. 285 C; flash pt. 177 C; ref. index 1.485; surf. tens. 35.5 dynes/cm; dielec. const. 43.26
Toxicology: REL 5 ppm; LD50 (oral, rat) 1941 mg/kg, (IP, rat) 1600 mg/kg, (IV, mouse) 1080 mg/kg, (skin, rabbit) 4009 mg/kg; LC50 (inh., rat, 24 h) > 956 ppm; mod. toxic by ing., IP, IV routes; mildly toxic by inh., skin contact; eye irritant; mutagenic; target organs: skin, CNS, Gl, lungs, liver; TSCA listed
Environmental: VOC; BOD5 0.0; COD 1.75; ThOD 1.73
Precaution: Combustible
Hazardous Decomp. Prods.: Heated to
decomp., emits toxic fumes of SOx
NFPA: Health 2, Flammability 1, Reactivity 0
Uses: Solvent in pharmaceuticals; medicine (antibacterial)
Regulatory: FDA 21CFR §177.1560; Canada DSL

Sulfurated potash

CAS 39365-88-3

Synonyms: Liver of sulfur; Potash sulfurated

Definition: Mixt. of potassium polysulfides and potassium thiosulfate

Formula: K₂Sₓ

Properties: Liver-brown to greenish-yellow, irregular pieces, hydrogen sulfide odor, bitter acrid alkaline taste; soln. in water

Precaution: Decomposes on exposure to air

HMIS: Health 2, Flammability 3, Reactivity 2

Storage: Hygroscopic

Uses: Dermatologic pharmaceuticals

Spectrum Quality Prods.† http://www.spectrumchemical.com; VWR Int’l.† http://www.vwrsp.com

Sulfur dioxide

CAS 7446-09-5; EINECS/ELINCS 231-195-2

UN 1079 (DOT); FEMA 3039; INS220; E220

Synonyms: Bisulfate; Bisulfite; Sulfurous acid anhydride; Sulfurous anhydride; Sulfurous oxide; Sulfur oxide; Sulphur dioxide, liquefied

Classification: Inorganic sulfur compd.

Empirical: O₂S

Formula: O=S=O

Properties: Colorless gas, strong suffocating odor; condenses at -10 C to colorless liq.; sol. 8.5% in water, 25% in alcohol, 32% in methanol; soln. in ether, chloroform, oxygenated solvs.; m.w. 64.06; dens. 1.5 (liq.); vapor pressure 2538 mm Hg (21.1 C); m.p. -72 C; b.p. -10 C (liq.); nonflamm.

Toxicology: ACGIH TLV/TWA 2 ppm; STEL 5 ppm; LLo (inh., human, 5 min) 3000 ppm; poison gas; mildly toxic to humans by inh.; corrosive irritant to eyes, respiratory tract; gas causes skin irritation, liq. may cause burns due to freezing; human systemic effects by inh. (pulmonary changes); causes upper respiratory/bronchi effects; can cause respiratory paralysis; questionable carcinogen; experimental tumorigen, teratogen, reproductive effects; human mutagenic data; TSCA listed

Precaution: Incompat. with bases, chlorates, fluorine, interhalogens, powd. metals, metal oxides, metal acetylides, sodium hydroxide, diethyl zinc; violent reactions, ignition, explosions possible; common air contaminant

Hazardous Decomp. Prods.: Forms an acid sol’n. (sulfurous acid) on contact with moisture; heated to decomp., emits toxic gases
Chemical Component Cross-Reference

Chemical

Sulfur dioxide sol'n.  See Sulfurous acid
Sulfur flower; Sulfur flowers.  See Sulfur

Sulfuric acid

CAS 7664-93-9; EINECS/ELINCS 231-639-5
UN 1830 (DOT); UN 1832 (DOT); INS513; E513
Synonyms:  Battery acid; Dihydrogen sulfate;
Dipping acid; Electrolyte acid; Hydrogen
sulfate; Matting acid; Nordhausen acid; Oil
of vitriol; Sulphuric acid; Vitriol brown oil;
Vitriol, oil of
Classification:  Inorganic acid
Empirical:  H₂O₄S
Formula:  (HO)₂S(=O)₂
Properties:  Colorless to dk. brn. dense oily liq.;
misc. with water and alcohol; m.w. 98.08;
dens. 1.84; vapor pressure 1 mm (145.8 C);
m.p. 10.4 C; b.p. 290 C; dec. 340 C
Toxicology:  ACGIH TLV/TWA 1 mg/m³; STEL 3
ppm; LD₅₀ (oral, rat) 2.14 g/kg; LC₅₀ (inh.,
t=pharmaceutical grade
rat, 2 h) 510 mg/m³; poison by inh.; mod.
toxic by ing.; human poison; strongly
corrosive; strong irritant to tissue, eyes;
can cause severe burns, chronic bronchitis;
inhal. of conc. vapors from hot acid can cause
serious lung damage and
unconsciousness; severe exposure causes
chem. pneumonitis, tooth effects;
experimental teratogen; TSCA listed
Precaution:  Caustic; corrosive; powerful
acidic oxidizer; ignites or explodes on
contact with many materials; reacts with
water to produce heat; reactive with
oxidizing/reducing materials
Hazardous Decomp. Prods.:  Heated to
decom., emits toxic fumes of SOₓ
NFPA: Health 3, Flammability 0, Reactivity 2
Uses:  Acidifier in pharmaceuticals,
parenterals, inhalants, intramuscular
injectables, ophthalmics, orals; astringent
in diarrhea; in mixts. to stimulate appetite
Regulatory:  FDA 21CFR §73.85, 172.560,
172.892, 173.385, 176.170, 176.180, 176.210,
177.2800, 178.1010, 184.1095, GRAS; BATF
27CFR §240.1051; SARA reportable; Canada
DSL; Japan restricted; Europe listed; UK
approved; FDA approved for parenterals,
inhalants, injectables, ophthalmics, orals;
USP/NF, BP, EP compliance

Sulfuric ether. See Ethyl ether.

Sulfurous acid
CAS 7782-99-2; EINECS/ELINCS 231-973-1
UN 1833 (DOT)
Synonyms: Sulfur dioxide sol’n.
Definition: A sol’n. of sulfur dioxide in water
Empirical: H₂O₃S
Formula: H₂SO₃
Properties: Colorless liq.; suffocating sulfur odor (in sol’n.); sol. in water; m.w. 82.08; dens. 1.03; unstable; oxidizes in air to sulfuric acid.
Toxicology: TLDO (oral, human) 500 µg/kg; poison by ing. and inh.; corrosive irritant to skin, eyes, mucous membranes; human systemic effects by ing. (nausea, vomiting, hypermotility, diarrhea, other GI effects); TSCA listed
Precaution: DOT: Corrosive material; reacts violently with water
Hazardous Decomp. Prods.: Heated to decomp., emits highly toxic fumes of SOx.
Storage: Air-sensitive; handle under nitrogen
Uses: Medicine (antiseptic); used in injectables

Sulfuric acid, dodecyl ester, triethanolamine salt. See TEA-lauryl sulfate.
Sulfuric acid, iron (2+) salt (1:1). See Ferrous sulfate anhydrous.
Sulfuric acid, lauryl ester, ammonium salt. See Ammonium lauryl sulfate.
Sulfuric acid magnesium salt (1:1). See Magnesium sulfate anhydrous.
Sunflower (Helianthus annuus) flower extract

Properties: Nutty flavor
Uses: Botanical extract; astringent, diuretic and expectorant

Sunflower (Helianthus annuus) seed oil

Synonyms: Helianthus annuus; Helianthus annuus oil; Sunflower oil; Sunflower seed oil

Definition: Oil expressed from seeds of the sunflower, Helianthus annuus

Properties: Amber liq., pleasant odor, mild taste; sol. in alcohol, ether, chloroform, CS₂; negligible sol. in water; dens. 0.924-0.926; vapor pressure very low; m.p. -18 C; iodine no. 125-140; sapon. no.188-194; ref. index 1.4611

Toxicology: No known toxicity; TSCA listed

Precaution: Combustible

Hazardous Decomp. Prods.: CO₂ from combustion; heated to decom., emits acrid smoke and irritating fumes

HMIS: Health 0, Flammability 1, Reactivity 0

Uses: Diluent, carrier, emulsifier, emollient, tablet binder, nutritional supplement in pharmaceuticals; diuretic; expectorant; pharmaceutical raw material

Regulatory: FDA 21CFR §175.300, 176.200, GRAS; BP, EP compliance (refined)

Sweet almond (Prunus amygdalus dulcis) oil
CAS 8007-69-0
Synonyms: Almond oil; Almond oil, sweet; Prunus dulcis; Sweet almond oil
Definition: Fixed oil obtained from the ripe seed kernel of Prunus amygdalus dulcis, contg. chiefly glyceryl olate
Properties: Colorless or pale yel. oily liq., almost odorless, bland taste; sl. sol. in alcohol; misc. with benzene, chloroform, ether, petrol. ether; insol. in water; dens. 0.910-0.915; iodine no. 93-100; sapon. no. 191-200; ref. index 1.4593-1.4646 (40 C)
Toxicology: LD50 (oral, rat) > 5 g/kg, (skin, rabbit) > 5 g/kg; TSCA listed
HMIS: Health 1, Flammability 0, Reactivity 0
Storage: Keep cool, well closed; protect from light
Uses: Vehicle, solvent, flavor, emollient, nutritive, demulcent for pharmaceuticals; component of rose water ointment USP; softener for ear wax
Features: Oleaginous
Regulatory: NF, BP, EP compliance; Canada DSL
Chemical Component Cross-Reference

Tallamide DEA
CAS 68155-20-4; EINECS/ELINCS 268-949-5

Synonyms: Amides, tall oil fatty, N,N-bis
(hydroxyethyl); Diethanolamine tall oil acid
amide; Tall oil acid diethanolamide; Tall oil
diethanolamide; Tall oil fatty acid
diethanolamide; Tall oil fatty acid
polydiethanolamide

Definition: Mixture of ethanalamides of fatty
acids derived from tall oil acid

Formula: RCO–N(CH2CH2OH)2, RCO– rep. fatty
acids from tall oil

Properties: Amber clear liq.; anionic/nonionic

Toxicology: TSCA listed

Uses: Surfactant for pharmaceuticals

Regulatory: FDA 21CFR §175.105, 176.210,
177.2800; Canada DSL

Manuf./Distrib.: Somerset Cosmetic Co.
http://www.makingcosmetics.com/

Tallowalkonium chloride
CAS 61789-75-1; EINECS/ELINCS 263-085-5
Synonyms: Dimethyl benzyl tallow ammonium chloride; Tallow dimethyl benzyl ammonium chloride
Classification: Quaternary ammonium salt
Properties: Cationic
Uses: Additive for antibiotics mfg.
Regulatory: Canada DSL
Manuf./Distrib.: Somerset Cosmetic Co.
http://www.makingcosmetics.com/

Tallowamphopolycarboxyglycinate. See Sodium carboxymethyl tallow polypropylamine
Tallow dimethyl benzyl ammonium chloride.
See Tallowalkonium chloride

Talloweth-8
CAS 61791-28-4 (generic)
Synonyms: PEG-8 tallow ether; POE (8) tallow ether
Definition: PEG ether of tallow alcohol
Formula: R(OCH₂CH₂)₈OH, R rep. alkyl groups from tallow, avg. n = 8
Properties: Nonionic
Uses: Emulsifier and rheology control agent in pharmaceuticals
Features: Low-foaming

Talloweth-11
CAS 61791-28-4 (generic)
Synonyms: PEG-11 tallow ether; POE (11) tallow ether
Definition: PEG ether of tallow alcohol
Formula: R(OCH₂CH₂)₁₁OH, R rep. alkyl groups from tallow, avg. n = 11
Properties: Nonionic
Uses: Emulsifier and rheology control agent in pharmaceuticals

Talloweth-25
CAS 61791-28-4 (generic)
Synonyms: PEG-25 tallow ether; POE (25) tallow ether
Definition: PEG ether of tallow alcohol
Formula: R(OCH₂CH₂)₂₅OH, R rep. alkyl groups from tallow, avg. n = 25
Properties: Nonionic
Uses: Emulsifier and rheology control agent in pharmaceuticals

Tallow fatty acid. See Tallow acid

Tallow glyceride
CAS 61789-13-7; EINECS/ELINCS 263-035-2
Synonyms: Glycerides, tallow mono-, Tallow monoglyceride
Definition: Monoglyceride derived from tallow
Properties: Nonionic
Toxicology: TSCA listed
Uses: Emulsifier, stabilizer, dispersant, opacifier in pharmaceuticals
Regulatory: FDA 21CFR §175.105, 176.210; Canada DSL
Manuf./Distrib.: Somerset Cosmetic Co. http://www.makingcosmetics.com/

Tallow glycerides
CAS 91723-30-7; EINECS/ELINCS 294-535-9
Synonyms: Glycerides, tallow mono-, di- and tri-, Tallow mono, di and tri glycerides
Definition: Mixture of mono, di and triglycerides derived from tallow

†=pharmaceutical grade

Properties: Nonionic
Uses: Emulsifier, stabilizer, dispersant, emollient for pharmaceuticals
Regulatory: FDA 21CFR §175.105, 176.210
Manuf./Distrib.: Somerset Cosmetic Co. http://www.makingcosmetics.com/

Tallow, hardened; Tallow, hydrogenated. See Hydrogenated tallow
Tallow mono, di and tri glycerides. See Tallow glycerides
Tallow monoglyceride. See Tallow glycerides
Tallow, sodium salt. See Sodium tallowate
Tallow trimethyl ammonium chloride. See Tallowtrimonium chloride

Tallowtrimonium chloride
CAS 8030-78-2; 7491-05-2; 68002-61-9; EINECS/ELINCS 232-447-4
Synonyms: Quaternary ammonium compds., tallow alkyl trimethyl, chlorides; Tallow trimethyl ammonium chloride; Trimethyl tallow ammonium chloride
Classification: Quaternary ammonium salt
Formula: [R-N(CH₃)₃]⁺Cl⁻, R rep. alkyl groups derived from tallow
Properties: Cationic
Toxicology: TSCA listed
Uses: Emulsifier in pharmaceuticals
Regulatory: Canada DSL
Trade Names: Noramium® MS 50
Trade Names Containing: Arquad® T-50

Tangantangan oil. See Castor (Ricinus communis) oil

Tangerine (Citrus reticulata) oil
CAS 8016-85-1
FEMA 3041
Synonyms: Citrus reticulata; Citrus reticulata oil; Mandarin petitgrain oil; Tangerine oil; Tangerine oil, coldpressed; Tangerine oil, expressed
Definition: Oil expressed from the peels of Citrus reticulata; contains d-limonene, n-octylaldehyde, n-decylaldehyde, citral, linalool, citronella, cadinene, terpenes, aldehydes, alcohols, and esters
Properties: Red-orange to brn.-orange liq.; orange-like odor; sol. in fixed oils, min. oil; sl. sol. in propylene glycol; insol. in glycerin; sp. gr. 0.844-0.854; ref. index 1.46900-1.496
Toxicology: Skin irritant; TSCA listed
Hazardous Decomp. Prods.: Heated to decomp., emits acrid smoke and irritating fumes
Chemical Component Cross-Reference

Uses: Natural flavor for pharmaceuticals

Regulatory: FDA 21CFR §182.20, GRAS; FEMA GRAS; Europe listed, no restrictions; Canada DSL

Tannic acid

CAS 1401-55-4; 72401-53-7; EINECS/ELINCS 215-753-2; 276-638-0

FEMA 3042; INS 181

Synonyms: Gallotannic acid; Gallotannin; Glycerite; Tannin

Definition: Mixt. of organic acids occurring in the bark and fruit of many plants, e.g., oak species, sumac

Empirical: C_{76}H_{52}O_{46}

Properties: Ylsh.-wh. to lt. brn. powd. or flakes; faint char. odor, strongly astringent taste; very sol. in alcohol, acetone; pract. insol. in benzene, chloroform, ether, petrol. ether, carbon disulfide, CCl₄; m.w. 1701.23; m.p. 200 C; dec. 210-215 C; flash pt. (OC) 390 F

Toxicology: LD₅₀ (oral, rat) 2260 mg/kg, (intramuscular, mouse) 350 mg/kg; LD₃₀ (subcut., mouse) 75 mg/kg, (IV, mouse) 10 mg/kg; poison by ing., intramuscular, IV, subcut. routes; mod. toxic by parenteral route; may cause liver damage; experimental carcinogen, tumorigen, reproductive effects; mutagenic data; TSCA listed

Precaution: Combustible exposed to heat or flame; incompat. with salts of heavy metals, alkaloids, gelatin, starch, oxidizers

Hazardous Decomp. Prods.: Heated to

decomp., emits acrid smoke and irritating fumes

NFPA: Health 0, Flammability 1, Reactivity 0

Storage: Keep well closed, protect from light

Uses: Pharmaceutical rectals; eye lotions; antiperspirants; astringent; minor burns treatment

Regulatory: FDA 21CFR §173.310, 184.1097, GRAS; 9CFR §318.7; BATF 27CFR §240.1051; FEMA GRAS; FDA approved for rectals; BP, EP compliance; not permitted in food (EU); Canada DSL

Tannin. See Tannic acid

Tapioca. See Dextrin
Tapioca starch
CAS 9005-25-8; 53112-52-0; 75138-75-9; 977002-81-5
Synonyms: Cassava starch
Definition: Starch obtained from tapioca Manihot utilissima; consists primarily of amylose and amylopectin
Properties: Spherical gran.
Toxicology: LD50 (IP, mouse) 6600 mg/kg; primary irritant; TSCA listed
Uses: Diluent and disintegrant for pharmaceutical tablets; nutrient; demulcent
Regulatory: FDA 21CFR §182.70, GRAS; BP compliance
See also Starch
TAPS. See 3-[Tris-(hydroxymethyl)methylamino]-propanesulfonic acid
Tara gum
CAS 39300-88-4
INS417; E417
Synonyms: Gum tara; Tara seed powd.
Classification: Galactomannan
Toxicology: Tumorigen
Hazardous Decomp. Prods.: Heated to decomp., emits acrid smoke and irritating fumes
Uses: Natural thickener, stabilizer, film-former
Regulatory: ADI 0-12.5 mg/kg (JECFA); Canada DSL; Japan approved
Trade Names: Coyote Brand Tara Gum
Tara seed powd. See Tara gum
Taraxacum extract; Taraxacum officinale; Taraxacum officinale extract. See Dandelion (Taraxacum officinale) extract
Tar oil; Tar oil, wood. See Pine (Pinus palustris) tar oil
†=pharmaceutical grade
Tarragon. See Tarragon (Artemisia dracunculus)
Tarragon absolute. See Tarragon (Artemisia dracunculus) oil
Tarragon (Artemisia dracunculus)
CAS 977052-32-6
FEMA 3043
Synonyms: Artemisia dracunculus; Estragole
Tarragon
Definition: Dried leaves and flowering tops of the bushy perennial plant, Artemisia dracunculus
Uses: Natural flavor for pharmaceuticals
Regulatory: FDA 21CFR §101.22, 182.10, GRAS; FEMA GRAS
Manuf./Distrib.: Treatt USA http://www.rctreatt.com
Tarragon (Artemisia dracunculus) oil
CAS 8016-88-4
FEMA 2412
Synonyms: Artemisia dracunculus; Artemisia dracunculus oil; Esdragol oil; Esdragon oil; Estragol oil; Estragon absolute; Estragon oil; Tarragon absolute; Tarragon herb oil; Tarragon oil
Definition: Oil from steam distillation of leaves, stems, and flowers of Artemisia dracunculus
Properties: Pale yel. to amber liq.; spicy licorice and sweet basil odor; sol. in fixed oils, min. oil; insol. in propylene glycol, glycerin; dens. 0.933; b.p. 204 C; flash pt. 79.4 C; ref. index 1.5120
Toxicology: LD50 (oral, rat) 1900 mg/kg, (skin, rabbit) > 5 ml/kg; mod. toxic by ing.; be harmful by inh., skin absorp.; may cause irritation to eyes, skin, mucous membranes, upper respiratory tract; exposure can cause dermatitis; TSCA listed
Precaution: Combustible liq.; incompat. with strong oxidizing agents
Hazardous Decomp. Prods.: Toxic fumes of CO, CO2; heated to decomp., emits acrid smoke and irritating fumes; emits toxic fumes under fire conditions
Storage: Store in cool, dry place; keep tightly closed; keep away from heat and open flame
Uses: Natural flavor for pharmaceuticals
Regulatory: FDA 21CFR §182.20, GRAS; FEMA GRAS; Canada DSL
Manuf./Distrib.: Berje http://www.berjeinc.com; Buckton Page Ltd http://www.bucktonpage.com; Eramex Aromatics http://www.eramex.de; F.D.
Tartaric acid (INCI) - See L-Tartaric acid

L-Tartaric acid
CAS 87-69-4; EINECS/ELINCS 201-766-0
FEMA 3044; INS 3044; NF 334

Synonyms: Butanedioic acid, 2,3-dihydroxy-; 2,3-Dihydroxsuccinic acid; Dihydroxybutanedioic acid, 2,3-; Dihydroxybutanedioic acid; L-2,3-Dihydroxybutanedioic acid; Dihydroxyxuccinic acid; α,β-Dihydroxyxuccinic acid; 3-Hydroxymalic acid; Malic acid, 3-hydroxy-; Succinic acid, 2,3-dihydroxy-; Tartaric acid (INCI); L-(+)-Tartaric acid; Thearic acid

Classification: Nonaromatic carboxylic acid

Definition: The commercial prod. is the L(+)-enantiomer

Empirical: C4H6O6

Formula: COOH • CHO • CHO • COOH

Properties: Colorless translucent cryst. or wh. cryst. powd., odorless, acid taste; effervescent; sol. in water, alcohol, glycerin; partly sol. in ether; m.w. 150.09; dens. 1.0045 (1%, 15/4 C); m.p. 168-170 C; flash pt. (OC) 210 C; sol. in water, alcohol, glycerin; partly sol. in crst. powd., odorless, acid taste; effervescent;

Toxicology: LD50 (IV, mouse) 485 mg/kg; LDLo (oral, dog) 5 g/kg; mod. toxic by IV route; mildly toxic by ing.; strong sol'ns. are mildly irritating to humans; may cause convulsions, somnolence, hemorrhage; TSCA listed

Precaution: Strong organic acid; reaction with silver produces unstable silver tartrate

Hazardous Decomp. Prods.: Heated to decomp., emits acrid smoke and irritating fumes

NFPA: Health 0, Flammability 1, Reactivity 0

Uses: Acidifier, buffer in pharmaceuticals, parenterals, intravenous, orals, rectals, vaginals, denture powds., effervescent powds., grans., and tablets; ingred. in cooling drinks; saline purgative

Regulatory: FDA 21CFR §73.170, 131.111, 131.136, 131.144, 136.110, 150.141, 150.161, 184.1077, 184.1099, 582.1099, 582.6099, GRAS; FEMA GRAS; USDA 9CFR §318.7, 381.147; BATF 27CFR §240.1051, 240.364, 240.512; Canada DSL; FDA approved for parenterals, intravenous, orals, rectals, vaginals; USP/NF, BP, EP, JP compliance

Chemical Component Cross-Reference

Trade Names Containing: C.Cal-97™ Calcium Ascorbate for DC

L-(+)-Tartaric acid. See L-Tartaric acid
L-Tartaric acid disodium salt. See Sodium tartrate
L-Tartaric acid monopotassium salt. See Potassium acid tartrate

Tartrazine
CAS 1934-21-0; EINECS/ELINCS 217-699-5 INS102; E102
Synonyms: Acid yellow 23 (INCI); Acid yellow 23 trisodium salt; 3-Carboxy-5-hydroxy-1-p-sulfophenyl-4-p-sulfophenylazopyrazole trisodium salt; CI 19140; D&C Yellow No. 5; Tartrazine yellow; Trisodium-3-carboxy-5-hydroxy-1-p-sulfophenyl-4-p-sulfophenylazopyrazole

†=pharmaceutical grade

4,5-Dihydro-5-oxo-1-(4-sulfophenyl)-4-[[4-sulfophenyl] azo]-1H-pyrazole-3-carboxylic acid trisodium azo]-1H-pyrazole-3-carboxylic acid trisodium salt; FD&C Yellow No. 5; Food yellow 4; 1H-Pyrazole-3-carboxylic acid, 4,5-dihydro-5-oxo-1-(4-sulfophenyl)-4-[(4-sulfophenyl) azo]- trisodium salt; Tartrazine yellow; Trisodium-3-carboxy-5-hydroxy-1-p-sulfophenyl-4-p-sulfophenylazopyrazole

Classification: Pyrazole color
Empirical: C16H9N4O9S2
Formula: C16H9N4Na3O9S2 • 3Na

Properties: Bright orange-yel. powd., gran.; greenish-yel. in sol’n.; sol. in water, conc. sulfuric acid; sol. (oz/gal): 28 oz glycerin, 12 oz propylene glycol; m.w. 534.37

Toxicology: LD50 (oral, mouse) 12,750 mg/kg, (IP, rat) 3800 mg/kg; mildly toxic by ing.; allergen; those allergic to aspirin are often allergic to tartrazine; may cause urticaria, anaphylactoid reactions, angioedema, rhinitis, bronchial asthma, contact dermatitis, hyperactivity, thyroid tumors; experimental teratogen, reproductive effects; human mutagenic data; TSCA listed

Hazardous Decomp. Prods.: Heated to decomp., emits very toxic fumes of NOx, SOx, and Na2O

Storage: Hygroscopic

Uses: Colorant for OTC and prescription pharmaceuticals, orals, topicals, buccals, nasals, vaginals, antiallergic and antiasthmatic medications

Regulatory: Europe listed; banned in Norway, Austria; UK approved; FD&C Yellow No. 5: FDA 21CFR §74.705, 74.1705, 74.2705, 82.705, 176.170; FDA approved for buccals, orals, topicals, vaginals

Taurine
CAS 107-35-7; EINECS/ELINCS 203-483-8
FEMA 3813
Synonyms: 2-Aminoethanesulfonic acid; 2-Aminoethylsulfonic acid; Ethanesulfonic acid, 2-amino-2-Sulfoethylamine
Classification: Amino acid
Empirical: C2H7NO3S
Formula: NH2CH2CH2SO3H
Properties: Solid; sol. in water; insol. in alcohol, oxygenated solvs.; m.w. 125.15; m.p. > 300 °C; dec. above 317 °C
Toxicology: LD50 (oral, rat) > 5 g/kg, (IP, mouse) 6630 mg/kg, (IV, dog) > 2 g/kg, (subcut., mouse) 6 g/kg; toxic by ing.; irritant; mutagen; reproductive effector;
TSCA listed
Hazardous Decomp. Prods.: Heated to decomp., emits very toxic fumes of SOx and NOx
HMIS: Health 2, Flammability 0, Reactivity 0
Uses: Pharmaceutical parenteral nutritive preps. for low-birth-weight infants and in infant formulas; in treatment of hypercholesterolemia and metabolic disorders
Regulatory: Canada DSL

TEA-oleate
CAS 2717-15-9; EINECS/ELINCS 220-311-7
Synonyms: 9-Octadecenoic acid, compd. with 2,2’,2’’-nitrilotriethanol [1:1]; Triethanolamine monooleate ester; Triethanolamine oleate soap; Trihydroxyethylamine oleate
Classification: Salt of oleic acid
Empirical: C_{24}H_{48}NO_{5}
Formula: C_{18}H_{34}O_{2} • C_{6}H_{15}NO_{3}
Properties: HLB 12.0; anionic
Toxicology: TSCA listed
Precaution: Combustible
Uses: W/o emulsifier, surfactant for pharmaceuticals
Regulatory: FDA 21CFR §176.210, 177.2260; Canada DSL
Manuf./Distrib.: A&E Connock
http://www.connock.co.uk
Trade Names: Nofable BO-90T; Nofable BO-99T

TEA-stearate
CAS 4568-28-9; EINECS/ELINCS 224-945-5
Synonyms: Octadecanoic acid, compd. with 2,2’,2’’-nitrilotriethanol [1:1]; Stearic acid, compd. with 2,2’,2’’-nitrilotriethanol [1:1]; Triethanolamine stearate; Trihydroxyethylamine stearate
Definition: Triethanolamine salt of stearic acid
Empirical: C_{25}H_{51}NO_{5}
Formula: (HOCH_{2}CH_{2})_{3}N • HOOCC_{16}H_{35}
Properties: Cream-colored wax-like solid; faint fatty odor; sol. in methanol, ethanol, min. and veg. oils; disp. in hot water; dens. 0.968; m.p. 42-44 C; pH 8.8-9.2 (5% aq. disp.)
Toxicology: TSCA listed
Precaution: Combustible
Uses: Emulsifier, surfactant, solubilizer for topical pharmaceuticals
Regulatory: FDA 21CFR §176.210, 177.2260; Canada DSL
Manuf./Distrib.: A&E Connock
http://www.connock.co.uk

Tea tree. See Cajeput (Melaleuca leucadendron) oil

Tea tree (Melaleuca alternifolia) oil
CAS 68647-73-4; EINECS/ELINCS 285-377-1
FEMA 3902
Synonyms: Malaleuca alternifolia leaf oil; Malaleuca alternifolia oil; Melaleuca
Chemical Component Cross-Reference

**alternifolia; Tea tree oil**
**Classification:** Essential oil  
**Definition:** Oil distilled from leaves of Melaleuca alternifolia  
**Properties:** Lt. yel.  
**Toxicology:** LD50 (oral, rat) 1900 mg/kg; LDLo (skin, rabbit) 5 g/kg; mod. toxic by ing.; low toxicity by skin contact; TSCA listed  
**Hazardous Decomp. Prods.:** Heated to decomp., emits acrid smoke and irritating vapors  
**Uses:** Antimicrobial, mild anti-inflammatory, preservative, antiseptic for pharmaceutical ointments, skin treatment, to treat wounds, bacterial infections, fungal infections, in oral care, salves, balms, veterinary skin care  
**Features:** Penetrates the skin readily; accelerates the healing of skin disorders  
**Regulatory:** FDA approved for orals; Canada DSL

Terephthalic acid-ethylene glycol polyester.
See Polyethylene terephthalate
1,4(8)-Terpadiene. See Terpinolene
Terpene polymer resin. See Terpene resin

Terpene resin
CAS 9003-74-1
Synonyms: Polyterpene resin; Terpene polymer resin
Classification: Unsat. hydrocarbon; thermoplastic resin
Definition: Thermoplastic resin obtained by polymerization of turpentine in presence of catalysts
Properties: Sol. in most org. solvs.
Toxicology: LD50 (oral, rat) > 15 g/kg; somnolent effect; general depressed activity; TSCA listed
Hazardous Decomp. Prods.: Heated to decomp., emits acrid smoke and irritating fumes
Uses: Antiseptic in pharmaceuticals, orals
Use Level: Limitation 0.07% (of wt. of capsule) 7% (of ascorbic acid and salts)
Regulatory: FDA 21CFR §73.1, 172.280, 172.615, 175.105, 175.125, 175.300, 175.320, 177.1200, 177.2600, 178.3930; FDA approved for orals

Classification: cyclic terpene
Empirical: C10H16
Properties: Colorless oil or liq.; herbaceous citrus odor; sol. in alcohol, fixed oils; insol. in water; m.w. 136.24; dens. 0.848 (20/4 C); b.p. 183-186 C; flash pt. 50 C; ref. index 1.474 (20 C); tenacity 4 hrs. on blotter
Toxicology: LD50 (oral, rat) 3650 mg/kg; mod. toxic by ing.; primary skin irritant; TSCA listed
Precaution: Flamm.
Hazardous Decomp. Prods.: Heated to decomp., emits acrid smoke and irritating fumes
Storage: Store in cool, dry place in tightly sealed
Chemical Component Cross-Reference

Uses: Synthetic flavor and fragrance for pharmaceuticals
Features: Citrus flavor
Use Level: 1-5%

Regulatory: FDA 21CFR §172.515; FCC; FEMA GRAS; Australia; Canada DSL; Japan ENCS (no. 3-2244); Philippines PICCS

Terpineol (INCI). See α-Terpineol
4-Terpineol. See 4-Carvomenthulen

α-Terpineol
CAS 98-55-5 (mixt. of α,β,γ); 8000-41-7 (mixed isomers); 10482-56-1; EINECS/ELINCS 202-680-6; 232-268-1 (mixed isomers)
UN NA 1993; FEMA 3045

Synonyms: 3-Cyclohexene-1-methanol, α,α,4-trimethyl-; p-Menth-1-en-8-ol; 1-p-Menth-8-ol; p-Menth-1-en-8-ol; 1-Methyl-4-isopropyl-1-cyclohexen-8-ol; Pine oil synthetic; Terpineol (INCI); α-Terpineol special Pure 3-cyclohexene-1-methanol, α, α, trimethyl; α,α,4-Trimethyl-3-cyclohexene-1-methanol

Definition: Several grades avail.; lower grades are mixed isomer prods.; higher grades are used in perfumes

Empirical: C10H16O
Formula: C10H17OH

Properties: Colorless visc. liq. or solid; lilac-like odor; very sol. in alcohol, ether; sol. in propylene glycol; very sl. sol. in water; insol. in

†=pharmaceutical grade

min. oil; m.w. 154.24; dens. 0.935 (20/20 C); vapor pressure 5 mm Hg (80 C); m.p. 40-41 C; b.p. 214-224 C; flash pt. 89 C; ref. index 1.482; surf. tens. 31.6 dynes/cm; tenacity 24 hrs. on blotter

Toxicology: LD50 (oral, rat) 5170 mg/kg,
(intramuscular, mouse) 2000 mg/kg; mod. toxic by intramuscular route; harmful by ing.; may be harmful by inh., skin absorp.; vapor/mist may cause eye/mucous membrane/upper respiratory tract irritation; skin irritant; can be a sensitizer; TSCA listed

Environmental: VOC; ThOD 1.97

Precaution: Combustible; incompat. with strong oxidizing agents, acid chlorides, acid anhydrides

Hazardous Decomp. Prods.: CO, CO2; combustion: toxic fumes; heated to decomps., emits acrid smoke and irritating fumes

NFPA: Health 0, Flammability 2, Reactivity 0

Storage: Store in cool, dry place away from light, heat, open flame; keep tightly closed

Uses: Synthetic flavor, denaturant, antiseptic, disinfectant, solvent in pharmaceuticals, topicals, preps. for respiratory tract disorders

Regulatory: FDA 21CFR §172.515, 175.105. 178.1010; FEMA GRAS; FDA approved for topicals; BP compliance; Australia; Canada DSL; Japan ENCS (3-2323); Philippines PICCS

FEMA 3564
Synonyms: Cyclohexanol, 1-methyl-4-(1-methylethenyl)-; p-Menth-8-en-1-ol; t-Menth-1-en-8-ol; 1-Methyl-4-(1-methylethenyl) cyclohexanol

Empirical: C10H16

Properties: Colorless visc. liq., lilac odor; sl. sol. in water, glycerin; m.w. 136.24; dens. 0.864 (15.5/15.5 C); b.p. 183-185 C; flash pt. (CC) 37.2 C; ref. index 1.4890; tenacity 4 days on blotter

Toxicology: Mutagenic data; TSCA listed

Hazardous Decomp. Prods.: Heated to decomp., emits acrid smoke and irritating fumes

Uses: Synthetic flavor for pharmaceuticals

Regulatory: FDA 21CFR §172.515; FEMA GRAS

Manuf./Distrib.: AMC Chems.; Aldrich; Alfa Aesar; Asiamerica Int'l.; Fluka; Frutarom (UK) Fine Ingreds.; Mallinckrodt; Millennium; Penta; Spectrum Quality Prods.; VWR Int'l.; http://www.vwrsp.com

Terpineol anhyd.
CAS 8006-39-1; EINECS/ELINCS 202-680-6

Synonyms: p-Menth-1-en-8-ol; Terpineols

Definition: Mixt. of α, β, and γ isomers

Empirical: C10H18O

Properties: Colorless visc. liq., lilac odor; sl. sol. in water, glycerin; m.w. 154.28; dens. 0.930-0.936; b.p. 213-218 C; flash pt. 196 F; ref. index 1.482

Toxicology: LD50 (oral, rat) 4300 mg/kg; mildly toxic by ing.; skin irritant

Precaution: Combustible liq.

Hazardous Decomp. Prods.: Heated to decomp., emits acid smoke and irritating fumes

Uses: Synthetic flavor for pharmaceuticals

Regulatory: FDA 21CFR §172.515; FEMA GRAS

Manuf./Distrib.: AMC Chems.; Aldrich; Alfa Aesar; Asiamerica Int'l.; Fluka; Frutarom (UK) Fine Ingreds.; Mallinckrodt; Millennium; Penta; Spectrum Quality Prods.; VWR Int'l.; http://www.vwrsp.com

Terpineols. See Terpineol anhyd.

α-Terpineol special Pure 3-cyclohexene-1-methanol, α, α, trimethyl. See α-Terpineol

Terpinolene
CAS 586-62-9; 68956-56-9; EINECS/ELINCS 209-578-0; 273-309-3
UN 2541 (DOT); FEMA 3046

Synonyms: 4-Isopropylidene-1-methylcyclohexene; 1,4-(8)-p-Menthadiene; p-Menth-1,4(8)-diene; 1-Methyl-4-(1-methylethylidene) cyclohexene; 1,4(8)-Terpadiene

Classification: Nonaromatic hydrocarbon

Empirical: C10H16

Properties: Water-wh. to pale amber liq. or oil; sol. in alcohol, ether, glycol; insol. in water; m.w. 136.24; dens. 0.864 (15.5/15.5 C); b.p. 183-185 C; flash pt. (CC) 37.2 C; ref. index 1.4890; tenacity 4 days on blotter

Toxicology: LD50 (oral, rat) 4390 mg/kg; mildly toxic by ing.; TSCA listed
Chemical Component Cross-Reference

Precaution: Combustible; very dangerous fire hazard exposed to heat or flames; can react with oxidizing materials
Hazardous Decomp. Prods.: Heated to decomp., emits acrid smoke and irritating fumes
Storage: Store in cool, dry place in tightly sealed containers, protected from heat, light
Uses: Synthetic flavor for pharmaceuticals
Use Level: 1-40%
Regulatory: FDA 21CFR §172.515; FEMA GRAS; Japan approved as flavoring; Canada DSL
Trade Names: Dipentene Extra

Terpinyl acetate
CAS 80-26-2; EINECS/ELINCS 201-265-7
FEMA 3047
Synonyms: Menthen-1-yl-8 acetate; 1-p-Menth-8-en-yl acetate; p-Menth-1-en-8-yl acetate; 1-Methyl-1-(4-methylcyclohex-3-enyl) ethyl ethanoate; α-Terpineol acetate; (±)-α-Terpinyl acetate
Definition: Mixed prod., mainly α-terpinyl acetate
Empirical: C12H20O2
Formula: C10H17OOCCH3
Properties: Colorless liq.; bergamot or lavender-like odor; sol. in fixed oils, min. oil, propylene glycol, 5+ vols. of 70% alcohol; sl. sol. in glycerol; insol. in water; m.w. 196.32; dens. 0.958-0.968 (15 C); f.p. -50 C; b.p. 220 C; flash pt. 212 F; ref. index 1.4640-1.4660 (20 C)
Toxicology: LD50 (oral, rat) 5075 mg/kg, (oral, mouse) 4800 mg/kg; LDLo (oral, rat) 4160 mg/kg; mildly toxic by ing.; TSCA listed
Precaution: Combustible
Hazardous Decomp. Prods.: Heated to decomp., emits acrid smoke and irritating fumes
Uses: Synthetic flavor for pharmaceuticals
Regulatory: FDA 21CFR §172.515; FEMA GRAS; Japan approved as flavoring; Canada DSL

Terpinyl anthranilate
CAS 14481-52-8
FEMA 3048
Synonyms: Anthranilic acid 1-methyl-1-(4-methyl-3-cyclohexen-1-yl) ethyl ester; p-Menth-1-en-8-yl anthranilate; 1-Methyl-1-(4-methyl-3-cyclohexen-1-yl) ethyl anthranilate; Terpinyl ortho-aminobenzoate; α-Terpinyl anthranilate; α,α,4-Trimethyl-3-cyclohexene-1-methyl 2-aminobenzoate
Classification: floral ester
Empirical: C17H23NO2
Properties: Pale yel. to cl. liq.; sol. in alcohol; insol. in water; m.w. 273.37; sp. gr. 1.058; b.p. 365 C; acid no. 2.0 max.; ref. index 1.4800-1.4860
Uses: Synthetic flavor for pharmaceuticals
Features: Lily orangeblossom fruity odor
Regulatory: FDA 21CFR §172.515; FEMA
α-Terpinyl anthranilate. See Terpinyl anthranilate

Terpinyl butyrate
CAS 2153-28-8; EINECS/ELINCS 218-445-6
FEMA 3049
Synonyms: p-Menth-1-en-8-yl butyrate; 1-Methyl-1-(4-methyl-3-cyclohexen-1-yl) ethyl butanoate; Methyl methycyclohexenyl ethyl butrate; 1-Methyl-1-(4-methyl-3-cyclohexen-1-yl) ethyl butyrate
Classification: floral ester
Empirical: C14H24O2
Properties: Liq.; dens. 0.938; b.p. 244 °C; flash pt. > 230 °F; ref. index 1.4650
Toxicology: May be harmful by inh., ing., skin absorp.; may be irritating to eyes, skin, mucous membranes, upper respiratory tract
Precaution: Incompat. with strong oxidizing agents
Hazardous Decomp. Prods.: CO, CO2; emits toxic fumes under fire conditions
Storage: Store in cool, dry place; keep tightly closed
Uses: Synthetic flavor for pharmaceuticals
Regulatory: FDA 21CFR §172.515; FEMA GRAS; Canada DSL

Terpinyl cinnamate
CAS 10024-56-3; EINECS/ELINCS 233-023-1
FEMA 3051
Synonyms: p-Menth-1-en-8-yl cinnamate; (Z)-1-Methyl-1-(4-methyl-3-cyclohexen-1-yl) ethyl cinnamate; (S)-3-Phenyl-2-propenoic acid 1-methyl-1-(4-methyl-3-cyclohexen-1-yl) ethyl ester; Terpinyl β-phenylacrylate; Terpinyl 3-phenylpropenoate
Classification: floral ester
Empirical: C19H24O2
Properties: Colorless or pale straw-colored visc. liq.; mild, sweet, floral-balsamic odor; m.w. 284.40; misc. with oils, ethanol; insol. in water; b.p. 242 °C
Uses: Synthetic flavor for pharmaceuticals
Regulatory: FDA 21CFR §172.515; FEMA GRAS; Canada DSL
Manuf./Distrib.: Degussa

Terpinyl formate
CAS 2153-26-6; EINECS/ELINCS 218-444-0
FEMA 3052
Synonyms: Formic acid 1-methyl-1-(4-methylcyclohex-3-enyl) ethyl ester; p-Menth-1-en-8-ol formate; p-Menth-1-en-8-yl formate; 1-Methyl-1-(4-methylcyclohex-3-enyl) ethyl methanoate
Classification: floral ester
Empirical: C11H18O2
Properties: M.w. 182.27; dens. 0.981; b.p. 220 °C; ref. index 1.4410
Toxicology: Skin irritant; TSCA listed
Hazardous Decomp. Prods.: Heated to decomp., emits acrid smoke and irritating fumes
Uses: Synthetic flavor for pharmaceuticals
Features: Sweet, citrus-like flavor
Regulatory: FDA 21CFR §172.515; FEMA GRAS; Canada DSL

Terpinyl isobutyrate
CAS 7774-65-4; EINECS/ELINCS 231-878-5
FEMA 3050
Synonyms: p-Menth-1-en-8-yl isobutyrate; 1-Methyl-1-(4-methylcyclohex-3-enyl) ethyl 2-methylpropanoate; 2-Methylpropanoic acid 1-methyl-1-(4-methyl-3-cyclohexen-1-yl) ethyl ester; Propanoic acid, 2-methyl-, 1-methyl-1-(4-methyl-3-cyclohexen-1-yl) ethyl ester
Classification: floral ester
Empirical: C14H24O2
Properties: Colorless oily liq.; sol. in ethyl alcohol; very sl. sol. in water; m.w. 224.38; sp. gr. 0.940-0.950; b.p. 242 °C
Toxicology: LD50 (oral, rat) > 5 g/kg, (skin, rabbit) > 5 g/kg; low toxicity by ing. and skin contact; TSCA listed
Hazardous Decomp. Prods.: Heated to decomp., emits acrid smoke and irritating vapors
Uses: Synthetic flavor for pharmaceuticals
Features: Green floral herbal spice fatty bergamot odor
Regulatory: FDA 21CFR §172.515; FEMA GRAS; Canada DSL
Manuf./Distrib.: Lluch Essence http://www.lluch-essence.com; SAFC
Terpinyl isopentanoate. See Terpinyl isovalerate

Terpinyl isovalerate
CAS 1142-85-4
FEMA 3054
Synonyms: Isovaleric acid para-menth-1-en-8-yl ester; p-Menth-1-en-8-yl isovalerate; p-Menth-1-en-8-yl 3-methyl butanoate; 1-Methyl-1-(4-methyl-3-cyclohexen-1-yl) ethyl 3-methyl butanoate; Terpinyl isopentanoate; Terpinyl isovalerianate
Classification: floral ester
Empirical: C15H26O2
Properties: Colorless cl. oily liq.; m.w. 238.37; b.p. 248 ºC
Uses: Synthetic flavor for pharmaceuticals
Features: Sweet pine olibanum incense orange odor

Terpinyl propionate
CAS 80-27-3; EINECS/ELINCS 201-266-2
FEMA 3053
Synonyms: p-Mentha-1-en-8-ol propionate; Menthen-1-yl-8 propionate; p-Menth-1-en-8-yl propionate; 1-Methyl-1-(4-methylcyclohex-3-enyl) ethyl propanoate
Classification: floral ester
Empirical: C13H22O2
Properties: Colorless to sl. yel. liq.; green, woody, citrus, sweet floral, lavender-like odor; sol. in glycerin; misc. with alcohol, chloroform, ether, fixed oils; sl. sol. in propylene glycol; insol. in water; m.w. 210.32; dens. 0.944; flash pt. 212 F; ref. index 1.461
Precaution: Combustible
Hazardous Decomp. Prods.: Heated to decomp., emits acrid smoke and irritating fumes
Uses: Synthetic flavor for pharmaceuticals
Regulatory: FDA 21 CFR §172.515; FEMA GRAS; Canada DSL

Tetraacetyltoluestriol. See Pentaerythritol tetraacetate

Tetraammonium EDTA
Uses: Chelating agent for pharmaceuticals, drug stabilization, heavy metal poisoning treatment
Trade Names: Versene Tetraammonium EDTA
1,4,7,10-Tetraazadecane. See Triethylenetetramine
2,4,11,13-Tetraazatetradecane diimida midamide, N,N´-bis (4-chlorophenyl)-3,12-diimino-, dihydrochloride. See Chlorhexidine dihydrochloride
2´,4´,5´,7´-Tetrabromo-3´,6´-dihydroxyxipiro [isobenzofuran-1(3H),9´-[9H] xanthen]-3-one. See D&C Red No. 21
2´,4´,5´,7´-Tetrabromo-3´,6´-dihydroxyxipiro [isobenzofuran-1(3H),9´-[9H] xanthen]-3-one disodium salt. See D&C Red No. 22; Acid red 87
2,4,5,7-Tetrabromo-3,6-fluorandiol. See D&C Red No. 21
Tetrabromofluorescein. See D&C Red No. 22; D&C Red No. 21; Acid red 87
2´,4´,5´,7´-Tetrabromo-4,5,6,7-tetrachloro-3´,6´-dihydroxyxipiro [isobenzofuran-1(3H),9´-[9H] xanthen]-3-one. See D&C Red No. 27
2´,4´,5´,7´-Tetrabromo-4,5,6,7-tetrachloro-3´,6´-dihydroxyxipiro [isobenzofuran-1(3H),9´-[9H] xanthen]-3-one disodium salt. See CI 45410; D&C Red No. 28
Tetrabromotetra chlorofluorescein. See D&C Red No. 27
Tetrachlorocarbon; Tetrachloromethane. See Carbon tetrachloride
Tetrachloro tetrabromofluorescein. See D&C Red No. 27
15-Tetracosanoic acid, (Z)-. See Nervonic acid
2,6,10,14,18,22-Tetracosahexene, 2,6,10,15,19,23-hexamethyl-, (all E) -. See Squalene
Tetracosanoic acid; 15-Tetracosanoic acid; cis-15-Tetracosanoic acid. See Nervonic acid

1-Tetracosanol
CAS 506-51-4
Synonyms: Lignoceryl alcohol
Classification: Fatty alcohol
Empirical: C_{24}H_{50}O
Formula: CH_3(CH_2)_{22}CH_2OH
Properties: M.w. 354.66; m.p. 75-77 C; b.p. 190 C (0.01 mm Hg)
Uses: Ingred. in dietary supplements
Manuf./Distrib.: Acros Org.
http://www.mpbio.com; Indofine
http://www.indofinechemical.com; Sasol Germany http://www.sasol.com;
http://www.sasololefinssurfactants.com
TCI Am. http://www.tciamerica.com
Trade Names Containing: Lesstanol™ Natural Policosanol 60
cis-15-Tetracosenoic acid. See Nervonic acid
Tetradecanal; 1-Tetradecanal. See Myristaldehyde
1-Tetradecanaminium, N,N,N-trimethyl-, hydrogen sulfate, sodium salt. See Sodium myristyl sulfate
1-Tetradecanol, propanoate. See Myristyl propionate
Tetradecene. See Tetradecene-1
Tetradecene-1
CAS 1120-36-1; EINECS/ELINCS 272-493-2
Synonyms: C14 linear alpha olefin;
Tetradecene; 1-Tetradecene; α-Tetradecylene
Empirical: C_{14}H_{28}
Formula: CH_3(CH_2)_{11}CH:CH_2
Properties: Colorless liq., mild hydrocarbon odor; sl. sol. in alcohol, ether; insol. in water; m.w. 196.38; dens. 0.775; m.p. -13 C; pour pt. -18 C; b.p. 251 C; flash pt. (Seta) 226 F; ref. index 1.4360
Toxicology: Irritating to eyes and skin; low acute inhalation toxicity; low acute ingestion toxicity but ingestion may cause vomiting, aspiration of vomitus
Precaution: Combustible; avoid contact with air or oxygen; explosion danger from peroxide formation
Storage: Store under nitrogen blanket
Uses: Solvent in medicines, flavors
Regulatory: Canada DSL

Myristamine oxide
Tetradecyl dimethyl benzyl ammonium chloride. See Myristalkonium chloride

Tetradecyleicosanol
CAS 119691-49-5
Synonyms: 1-Eicosanol, 2-tetradecyl-; Myristyl eicosanol; 2-Tetradecyl-1-eicosanol
Classification: Aliphatic alcohol
Empirical: C34H70O
Properties: Lt. colored soft wax; sol. in min. oil, isopropyl myristate, oleyl alcohol, castor oil; m.p. 33-40 C
Uses: Emollient, visc. control agent for pharmaceuticals, topicals
Regulatory: Canada DSL
Manuf./Distrib.: Somerset Cosmetic Co.
http://www.makingcosmetics.com/
Trade Names: Jarcol™ I-34T

2-Tetradecyl-1-eicosanol. See Tetradecyleicosanol

Tetradecyleicosyl stearate
Synonyms: Myristyleicosyl stearate; Octadecanoic acid, 2-tetradecyl-1-eicosanyl ester
Classification: Ester
Definition: Ester of myristyl eicosanol and stearic acid
Empirical: C52H104O2
Formula: CH3(CH2)16COOCH2CH(CH2)17CH3CH3(CH2)12CH2
Uses: Stabilizer, base, lubricant, opacifier, emollient for pharmaceuticals
Manuf./Distrib.: Somerset Cosmetic Co.
http://www.makingcosmetics.com/

α-Tetradecylene. See Tetradecene-1
Tetradecyl 2-hydroxypropanoate; Tetradecyl lactate. See Myristyl lactate
Tetradecyl octadecanoate. See Myristyl stearate

2-Tetradecyloctadecanol
CAS 32582-32-4; EINECS/ELINCS 251-110-2
Synonyms: Myristyloctadecanol; 2-Tetradecyl-1-octadecanol
Classification: Aliphatic alcohol
Empirical: C32H66O
Properties: M.w. 466.88; m.p. 38-39 C; b.p. 308-310 C; hyd. no. 120
Uses: Emollient, visc. control agent in pharmaceuticals
Manuf./Distrib.: Jarchem Ind.

†=pharmaceutical grade

Tetraethyliuram monosulfide. See Tetraethyliuram sulfide
Tetraethyliuram sulfide
CAS 95-05-6
Synonyms: Bis-(diethylthiocarbamyl) sulfide; Sulfirm; Tetraethyliuram monosulfide
Empirical: C10H20N2S3
Formula: [(C2H5)2NCS]2S
Properties: Dark brn. powd.; sl. odor; m.w. 264.48; dens. 1.12; m.p. 30-32 C; b.p. 225-240 C (3 mm)
Toxicology: Toxic by ing. and inh.
Uses: Pharmaceutical ointments
Manuf./Distrib.: Chemos GmbH

Tetrafluoro dichloroethane; 1,1,2,2-Tetrafluoro-1,2-dichloroethane. See 1,2-Dichlorotetrafluoroethane
Tetrafluorodichloromethane. See Dichlorotetrafluoromethane
Tetrafluoroethane
CAS 811-97-2; EINECS/ELINCS 212-377-0
UN 1078
Synonyms: HFC 134a; Norflurane; R 134a; 1,1,1,2-Tetrafluoroethane
Classification: Nonaromatic halogenated
Chemical Component Cross-Reference

hydrocarbon

**Empirical:** C₂H₂F₄

**Formula:** CF₃CH₂F

**Properties:** Colorless liquefied gas; sol. in ether; insol. in water; m.w. 102.03; dens. 3.18 (70 F); b.p. -26.5 C; nonflamm.; noncorrosive

**Toxicology:** TLV/TWA none established: simple asphyxiant; avoid contact and inhalation; target organ: heart; TSCA listed

**Environmental:** Replacement for CFC but characterized as global warming gas by the Kyoto Conference on Climate Change

**Precaution:** Dec. at high temp. to toxic substances

**Storage:** Store away from heat

**Uses:** Aerosol propellant for asthma and nasal inhalers, topical and oral sprays

**Features:** Zero ODP

**Regulatory:** Canada DSL

**Synonyms:** Menthofuran

**Empirical:** C₁₀H₁₄O

**Properties:** Bluish liq.; menthol-like odor; sol. in oils; misc. with ethanol; insol. in water; m.w. 150.22; dens. 0.970; b.p. 196 C; flash pt. 168 F; ref. index 1.481-1.486

**Uses:** Flavor for pharmaceuticals

**Regulatory:** FEMA GRAS; Canada DSL

**Manuf./Distrib.:** Augustus Oils Ltd

SAFC Specialties

http://www.safcspecialties.com

†=pharmaceutical grade

**Tetrahydro-dimethyl benzofuran-2-one. See Mentholactone**

**Tetrahydro-1,4-dioxin; Tetrahydro-p-dioxin. See 1,4-Dioxane**

**Tetrahydro-2,5-dioxofuran. See Succinic anhydride**

**Tetrahydrofuran**

CAS 109-99-9; EINECS/ELINCS 203-726-8

UN 2056 (DOT)

**Synonyms:** Butane, 1,4-epoxy-; Butylene oxide; Cyclotetramethylene oxide; Diethylene oxide; 1,4-Epoxybutane; Furanidine; Furan, tetrahydro-; Hydrofuran; Oxacyclopentane; Oxolane; Tetramethylene oxide; THF

**Classification:** Sat. cyclic aliphatic ether

**Empirical:** C₄H₈O

**Formula:** CH₂CH₂CH₂CH₂O

**Properties:** Water-wh. volatile liq.; ethereal odor; very sol. in water; sol. in alcohols, ketones, esters, ethers, hydrocarbons, oxygenated solvs.; m.w. 72.11; dens. 0.888 (20/4 C); vapor pressure 114 mm (15 C); f.p. -65 C; m.p. -108.5 C; b.p. 66 C; flash pt. (OC) -15 C; ref. index 1.4070

**Toxicology:** ACGIH TLV/TWA 200 ppm; STEL 250 ppm; LD₅₀ (oral, rat) 1650 mg/kg, (IP, rat) 2900 mg/kg; LC₅₀ (inh., rat, 3 h) 21,000 ppm; mod. toxic by ing., IP; mildly toxic by inh.; eye/mucous membrane irritant; essentially nonirritating to skin; CNS depressant; narcotic, anesthetic at high concs.; may injure liver and kidneys; 25,000 ppm reported lethal in humans; tumorigen; mutagen; reproductive effects; TSCA listed

**Environmental:** VOC; ThOD 2.44

**Precaution:** Extremely flamm.; flamm. limits in air 2-11.8%; incompat. with strong oxidizing agents (increases fire/explosion risk), bromine (reacts vigorously with gas evolution), caustic alkalis (violent reactions possible)

**Hazardous Decomp. Prods.:** Peroxides may form and accumulate on exposure to air and light, in the absence of inhibitors; heated to decomp., emits acrid smoke and irritating fumes

**NFPA:** Health 2, Flammability 3, Reactivity 1

**Storage:** Store in cool, dry, well-ventilated area, out of direct sunlight

**Uses:** Extraction solvent for pharmaceuticals; steroid hormone prod. for use in birth
### Tetrahydro-2-furanmethanol

**Synonyms:** Tetrahydro-2-furancarbinol; Tetrahydro-2-furanmethanol acetate; Tetrahydro-2-furanmethanol

**Definition:** Ester of tetrahydrofurfuryl alcohol and acetic acid

**Empirical:** C₇H₁₂O₃

**Formula:** C₄H₇OCH₂OOCCH₃

**Properties:**
- Colorless liq.; sol. in water, alcohol, ether, chloroform; m.w. 144.17; sp.gr. 1.058-1.064 (20/0 C); b.p. 193-195 C (753 mm); flash pt. (CC) 77 C; ref. index 1.434-1.440

**Toxicology:**
- Irritating to eyes, skin; defats the skin; ing. may cause stomach pain, vomiting

**Environmental:** Prevent contamination of water sources, sewers

**Precaution:** Combustible; incompat. with strong oxidizing agents

**Storage:** Keep away from heat, sparks, open flame; keep container tightly closed

**Uses:** Synthetic flavor for pharmaceuticals

**Regulatory:**
- FDA 21CFR §172.515; FEMA GRAS; Canada DSL

**Manuf./Distrib.:**
- Advanced BioTech
- OXford Chems. Ltd
- SAFC Specialties

**Tetrahydrofurfuryl alcohol**

**Synonyms:** Tetrahydro-2-furancarbinol; Tetrahydro-2-furanmethanol; Tetrahydro-2-furylmethanol; THFA

**Classification:** Cyclic alcohol

**Empirical:** C₅H₁₀O₂

**Formula:** C₄H₇OCH₂OOCCH₃

**Properties:**
- Colorless liq., mild odor; misc. with water, alcohol, ether, acetone, chloroform, benzene, oxygenated solvs.; m.w. 102.14; dens. 1.053 (20/4 C); visc. 6.24 cp (20 C); vapor pressure 0.801 mm Hg; m.p. < -80 C; b.p. 173-177 C; flash pt. (TOC) 84 C; autoignition temp. 282 C; ref. index 1.453 (20 C); surf. tens. 37 dyne/cm; dielec. const. 13.61

**Toxicology:** LD₅₀ (oral, rat) 2500 mg/kg, (IV, rabbit) 725 mg/kg; mod. toxic by ing., IV, IP
Chemical Component Cross-Reference

Tetrahdrofurfuryl methyl N-butyrate. See Tetrahdrofurfuryl butyrate

Tetrahdrofurfuryl propionate
CAS 637-65-0; EINECS/ELINCS 211-297-3
FEMA 3058
Synonyms: Propionic acid tetrahydrofurfuryl ester; Tetrahydro-2-furyl methyl propionate; 2-Tetrahydrofurfuryl methyl propionate

Empirical: C₈H₁₄O₃
Properties: Colorless liq.; sol. in alcohol; sl. sol. in water; m.w. 158.20; dens. 1.040; b.p. 207 C; flash pt. 198 F; ref. index 1.435-1.445
Uses: Synthetic flavor for pharmaceuticals
Features: Fruity, medicinal flavor
Regulatory: FDA 21CFR §172.515; FEMA GRAS; Canada DSL

Tetrahdro-2-furylmethanol. See Tetrahdrofurfuryl alcohol

Tetrahdrofurfuryl methyl butanoate; Tetrahydro-2-furyl methyl N-butanoate; (Tetrahydro-2-furyl) methyl butyrate. See Tetrahdrofurfuryl butyrate

Tetrahydro-2-furyl methyl propionate; 2-Tetrahydrofurfuryl methyl propionate. See Tetrahdrofurfuryl propionate

Tetrahydrogeraniol. See 3,7-Dimethyl-1-octanol

Tetrahydro-1,4-isoxazine; Tetrahydro-p-isoxazine. See Morpholine

Tetrahdroalinalool
CAS 78-69-3; EINECS/ELINCS 201-133-9
FEMA 3060
Synonyms: 3,7-Dimethyloctane-3-ol; 3,7-Dimethyl-3-octanol; 3,7-Dimethyloctan-3-ol;
Chemical Component Cross-Reference

†=pharmaceutical grade

Handbook of Pharmaceutical Additives, Third Edition

2159

Linacsol; Linalool tetrahydride; 3-Octanol, 3,7-dimethyl-
Classification: Nonaromatic alcohol
Empirical: C₁₀H₂₂O
Formula: C₁₀H₂₁OH
Properties: Colorless to pale yel. liq., floral odor; sol. in alcohol, fixed oils, hydrocarbon solvs.; insol. in water; m.w. 158.29; sp.gr. 0.830-0.840; dens. 0.923; b.p. 71-73 C (6 mm); flash pt. 183 F; ref. index 1.431; tenacity 2 hrs. on blotter
Toxicology: LD₅₀ (oral, rat) > 5 g/kg, (oral, mouse) 4500 mg/kg, (skin, rabbit) > 5 g/kg; low toxicity by ing.; primary skin irritant; irritating to eyes, skin, respiratory system; may be harmful by inh., ing., skin absorp.; TSCA listed
Precaution: Combustible liq.; incompat. with strong oxidizing agents, acid chlorides, acid anhydrides, strong acids, strong bases
Hazardous Decomp. Prods.: CO, CO₂; heated to decomp., emits acrid smoke and irritating fumes; emits toxic fumes under fire conditions
Storage: Store in cool, dry place; keep tightly closed; keep away from heat, open flame; protect from light
Uses: Synthetic flavor for pharmaceuticals
Use Level: 1-20%
Regulatory: FDA 21CFR §172.515; FEMA GRAS; Australia; Canada DSL; Japan ENCS (no.2-217); Philippines PICCS
2-(Tetrahydro-5-methyl-5-vinyl-2-furyl) propan-2-ol. See Linalool oxide

Tetrahydronaphthalene
CAS 119-64-2; EINECS/ELINCS 204-340-2
Synonyms: Naphthalene-1,2,3,4-tetrahydride; 1,2,3,4-Tetrahydronaphthalene; Tetralin; Tetranap; THN
Empirical: C₁₀H₁₂
Properties: Colorless liq., pungent menthol odor; misc. with most solvs., ethanol, butanol, acetone, ether, benzene; insol. in water; m.w. 132.21; dens. 0.981 (13 C); vapor pressure 1 mm (38 C); m.p. -25 C; b.p. 206 C; flash pt. 160 F; ref. index 1.5410
Toxicology: LD₅₀ (oral, rat) 2860 mg/kg, (dermal, rabbit) 17 g/kg; mod. toxic by ing.; mildly toxic by skin contact; primary irritant to eyes, mucous membranes, respiratory system; severe skin irritant; narcotic in high concs.; may cause cataracts, kidney damage; tumorigen; TSCA listed
Precaution: Combustible exposed to heat or flame; can react with oxidizers; explosive as vapor; explosive limits 0.8% (212 F) to 5% (302 F); may be explosive on prolonged close contact with air
Hazardous Decomp. Prods.: Heated to decomp., emits acrid smoke and irritating fumes
Uses: Solvent in pharmaceuticals
Regulatory: Canada DSL
1,2,3,4-Tetrahydronaphthalene. See Tetrahydronaphthalene
Tetrahydro-1,4-oxazine; Tetrahydro-2H-1,4-oxazine; Tetrahydro-4H-1,4-oxazine; Tetrahydro-p-oxazine. See Morpholine
Tetrahydro-6-propyl-2H-pyran-2-one. See γ-Octalactone
Tetrahydro-pseudo-ionone
CAS 4433-36-7; EINECS/ELINCS 224-634-4
FEMA 3059
Synonyms: Citronellyl acetone; Dihydrogeranyl acetone; 6,10-Dimethyl-9-
Chemical Component Cross-Reference

undecen-2-one; 3,4,5,6-Tetrahydro-pseudo-ionone

Empirical: \( \text{C}_{13}\text{H}_{24}\text{O} \)

Properties: Colorless to pale yel. cl. liq.; sol in alcohol; insol in water; m.w. 196.33; sp. gr. 0.865-0.875; b.p. 234 C

Uses: Synthetic flavor for pharmaceuticals

Regulatory: FDA 21CFR §172.515; FEMA GRAS

3,4,5,6-Tetrahydro-pseudo-ionone. See Tetrahydro-pseudo-ionone Tetrahydrothiophene dioxide; Tetrahydrothiophene-1,1-dioxide; 2,3,4,5-Tetrahydrothiophene-1,1-dioxide. See Sulfolane 1,2,3,6-Tetrahydro-N-(trichloromethylthio)phthalimide. See Captan 5,6,7,7a-Tetrahydro-3,6-trimethyl-2(4H)-benzofuranone. See Erythritol 2,3,4,5-Tetrahydroxy-pentanal. See D (+)-Xylose N,N,N',N'-Tetra-(2-hydroxypropyl)-1,2-diaminoethane. See Tetrahydroxypropyl ethylenediamine

Tetrahydroxypropyl ethylenediamine

CAS 102-60-3; EINECS/ELINCS 203-041-4 Synonyms: Edetol, Ethylenedinitrilotetra-2-propanol; 1,1',1''- (Ethylenedinitriolo) tetra-2-propanol; N,N,N',N'-Tetra-(2-hydroxypropyl)-1,2-diaminoethane; N,N,N',N'-Tetrakis (2-hydroxypropyl) ethylenediamine

Classification: Substituted amine

Empirical: \( \text{C}_{14}\text{H}_{32}\text{N}_{2}\text{O}_4 \)

Formula: \((\text{HOCl}_3\text{H}_6)_2\text{NCH}_2\text{CH}_2\text{N}(\text{C}_3\text{H}_6\text{OH})\)

Properties: Water-wh. visc. liq.; sol in ethanol, toluene, ethylene glycol; misc. with water; m.w. 292.42; dens. 1.013; b.p. 175-181 C (0.8 mm); flash pt. > 230 F; ref. index 1.4812; cationic

Toxicology: LD50 (mammal) 3900 mg/kg; mod. toxic by unspecified route; may be irritating to skin and mucous membranes; may cause skin sensitization; TSCA listed

Precaution: Combustible

Hazardous Decomp. Prods.: Heated to decomp., emits toxic fumes of NOx

Uses: Solvent, preservative, chelating agent, intermediate, emulsifier for pharmaceuticals

Regulatory: FDA 21CFR §177.1680; Canada DSL

Manuf./Distrib.: Aldrich http://www.sigma-aldrich.com; Fluka http://www.sigma-aldrich.com; Sigma http://www.sigma-aldrich.com/belgium

Trade Names: Quadrol® Polyol

2',4',5',7'-Tetraiodofluorescein disodium salt. See FD&C Red No. 3; Acid red 51 Tetraiodofluorescein sodium salt. See FD&C Red No. 3; Acid red 51 Tetrairon tris (hexacyanoferrate). See CI 77510

Tetraisopropyl methylenediphosphonate

CAS 1660-95-3

Empirical: \( \text{C}_{13}\text{H}_{30}\text{O}_6\text{P}_2 \)

Properties: M.w. 344.32; b.p. 88-90 C (0.003 mm)

Uses: Pharmaceutical intermediate; reagent

N,N,N',N'-Tetrakis (2-hydroxypropyl) ethylenediamine. See Tetrahydroxypropyl ethylenediamine Tetralin. See Tetrahydronaphthalene

p-(1,1,3,3-Tetramethylbutyl) phenol polymer with ethylene oxide and formaldehyde; 4- (1,1,3,3-Tetramethylbutyl) phenol polymer with formaldehyde and oxirane. See Tyloxapol

38-[4-(1,1,3,3-Tetramethylbutyl)phenoxy]-3,6,9,12,15,18,21,24,27,30,33,36-dodecaoxaoctatriacontan-1-ol. See Octoxynol-13

2-[p-(1,1,3,3-Tetramethylbutyl) phenoxy]ethanol. See Octoxynol-1

2-[2-[p-(1,1,3,3-Tetramethylbutyl) phenoxy]ethoxy] ethoxy] ethanol. See Octoxynol-3

4-(2,5,6,6-Tetramethyl-2-cyclohexene-1-yl)-3-buten-2-one. See α-Irone
Chemical Component Cross-Reference

Tetramethylene blue trihydrate. See Methylene blue trihydrate
Tetramethylene oxide. See Tetrahydrofuran
Tetramethyleneoxirane. See Cyclohexene oxide
Tetramethylene sulfone. See Sulfone
Tetramethylenedithiam disulfide. See Tetramethylthiuram disulfide

Tetramethyl ethylcyclohexene
CAS 977045-69-4
FEMA 3061

Definition: Mixt. of 5-ethyl-2,3,4,5-tetramethyl-2-cyclohexen-1-one and 5-ethyl-3,4,5,6-tetramethyl-2-cyclohexen-1-one
Uses: Synthetic flavor for pharmaceuticals

Tetramethyl pyrazine. See 2,3,5,6-Tetramethylpyrazine

2,3,5,6-Tetramethylpyrazine
CAS 1124-11-4; EINECS/ELINCS 214-391-2
FEMA 3237
Synonyms: Tetramethyl pyrazine
Classification: 6-membered aromatic heterocyclic
Empirical: C8H12N2
Properties: Wh. crystals or powder; nutty, roast burnt odor; sol. in most org. solvs.; m.w. 136.22; vapor dens. 4.7; m.p. 72-78 C; b.p. 84-86 C; flash pt. (CC) > 99 C
Toxicology: LD50 (oral, rat) 1910 mg/kg, (IP, mouse) 800 µg/kg, (IV, mouse) 239 mg/kg; poison by IP and IV routes; mod. toxic by ing.; irritant; TSCA listed
Precaution: Wear protective gloves, splash-proof goggles; incompat. with strong oxidizers, acids
Hazardous Decomp. Prods.: Heated to decomp., emits toxic fumes of NOx, COx
HMIS: Health 1, Flammability 1, Reactivity 0
Storage: Store in cool, dry place in tightly sealed containers, protected from heat, light
Uses: Synthetic flavor for pharmaceuticals
Features: Chocolate flavor
Use Level: Traces
Regulatory: FEMA GRAS; Australia; Canada

Tetramethylthiocarbamoyldisulfide. See Tetramethylthiuram disulfide
Tetramethylthionine chloride trihydrate. See Methylene blue trihydrate
Tetramethylthioperoxydicarbonic diamide; Tetramethylthiuram bisulfide. See Tetramethylthiuram disulfide

Tetramethylthiuram disulfide
CAS 137-26-8; EINECS/ELINCS 205-286-2
UN 2771
Synonyms: Bis ((dimethylamino) carbonothioyl) disulfide; Bis (dimethylthiocarbamoyl) disulfide; Bis (dimethylthiocarbamyl) disulfide; 1,1’-Dithiobis (N,N-dimethylthio) formamide; α,α’-Dithiobis (dimethylthio) formamide; N,N’-(Dithiodicarbonothioyl) bis (N-methylmethanamine); Methyl thiram; Methyl thiuramdisulfide; Tetramethylenethiuram disulfide; Tetramethylthiuram disulfide; Thioperoxydicarbonic diamide, tetramethyl-; Thiram (INCI); Thiurad; Thiuram; TMT; TMTD; TMTDS
Classification: Organic compd.; thioamide
Empirical: C6H12N2S4
Formula: [((CH3)2NCS)2]2
Properties: Wh. cryst. powd.; char. odor; sol. in
Chemical Component Cross-Reference

acetone, alcohol, benzene, ether, chloroform, oxygenated and chlorinated solvs.; sl. sol. in carbon disulfide; insol. in water, dilute alkali, gasoline; m.w. 240.44; dens. 1.29 (20 C); vapor pressure negligible @ R.T.; m.p. 155-156 C; b.p. 129 C (20 mm); flash pt. (CC) 89 C

Hazardous Decomp. Prods.: CO, CO2, SOx, CS2

Precaution: Toxic to fish

Toxicology: May cause allergic reaction on contact; affects human pulmonary system; may cause liver/kidney/brain damage; questionable carcinogen; experimental tumorigen, teratogen, reproductive effects; TSCA listed

Environmental: Toxic to fish; nontoxic to bees

Precaution: Combustible; can form explosive mixts. with air ≥ 89 C

Hazardous Decomp. Prods.: CO, CO2, SOx, CS2

Uses: Antiseptic, antibacterial, antifungal for pharmaceutical topicals, as an aerosol in pharmaceutical grade mixts. with air

Properties: 156 C; b.p. 129 C (20 mm); flash pt. (CC) 89 C vapor pressure negligible @ R.T.; m.p. 155-156 C; b.p. 129 C (20 mm); flash pt. (CC) 89 C

N,N,N´,N´-Tetramethylthiuram disulfide; Tetramethyl thiurane disulfide See Tetramethylthiuram disulfide

Tetrasodium diphosphate. See Tetrasodium pyrophosphate

Tetrasodium edetate. See Tetrasodium EDTA

Tetrasodium EDTA

CAS 64-02-8; EINECS/ELINCS 200-573-9

Synonyms: Acetic acid, (ethylenedinitrilo) tetra-, tetrasodium salt; Edathamil tetrasodium; Edetate sodium; Edetic acid tetrasodium salt; EDTA Na4; EDTA sodium salt; EDTA tetrasodium salt; N,N´-1,2-Ethenediylbis (N-(carboxymethyl)) glycine tetrasodium salt; Ethylenebis (iminodiacetic acid) tetrasodium salt; N,N´-Ethylendiaminediacetic acid tetrasodium salt; Ethylenediaminetetraacetic acid, sodium salt; Ethylenediaminetetraacetic acid, tetrasodium salt; Sodium ethylenediaminetetraacetate; Tetrasodium edetate; Tetrasodium ethylenediamine tetraacetate; Tetrasodium (ethylenedinitrilo) tetraacetate

Classification: Substituted amine

Definition: Powdered sodium salt that reacts with metals

Empirical: C10H12N2O8 • 4Na

Formula: (NaOOCCH2)2NCH2CH2N(CH2COONa)2

Properties: Wh. amorphous powd.; freely sol. in water; m.w. 380.20; dens. 6.9 lb/gal; m.p. > 300 C

Toxicology: LD50 (IP, mouse) 330 mg/kg; poison by IP route; primary irritant; skin and eye irritant; can deplete the body of calcium if taken internally; TSCA listed

Hazardous Decomp. Prods.: Heated to decomp., emits toxic fumes of NOx and Na2O

HMIS: Health 2, Flammability 1, Reactivity 0
Tetrasodium ethylenedinitrilo tetraacetate. See Tetrasodium EDTA

Tetrasodium etidronate
CAS 3794-83-0; EINECS/ELINCS 223-267-7
Synonyms: Ethane-1-hydroxy-1,1-diphosphonic acid, tetrasodium salt; (1-Hydroxyethylidene) bisphosphonic acid, tetrasodium salt; (1-Hydroxyethylidene) diposphonic acid, tetrasodium salt; 1-Hydroxyethylidene-1,1-diphosphonic acid, tetrasodium salt; Na₄HEDP; Phosphonic acid, (1-hydroxyethylidyne) bissodium salt; Tetrasodium 1-hydroxyethane-1,1-diphosphonate; Tetrasodium (1-hydroxyethylidene) bisphosphonate; Tetrasodium 1-hydroxyethylidene-1,1-diphosphonate
Classification: Diphosphonic acid deriv.
Empirical: C₂H₄O₇P₂ • 4Na
Properties: Cl. to yel. liq.; misc. in water; m.w. 293.96; sp. gr. 1.30-1.35; m.p. -5 C; pH 10-12
Toxicology: LD₅₀ (oral, rat) 990 mg/kg; mod. toxic by ing.; TSCA listed
Hazardous Decomp. Prods.: Heated to decomp., emits toxic fumes of POₓ and Na₂O
NFPA: Health 3, Flammability 0, Reactivity 0
Uses: Chelating agent, stabilizer for pharmaceuticals, topicals
Regulatory: FDA 21CFR §173.310; Canada DSL
Manuf./Distrib.: Satyajit Chems.
http://www.satyajitchemicals.com

Tetrasodium iminodisuccinate
CAS 144538-83-0
Synonyms: Iminodisuccinate tetrasodium salt; Sodium iminodisuccinate
Empirical: C₈H₇NO₈Na₄
Properties: M.w. 337.1
Uses: Chelating agent for pharmaceuticals, topicals
Regulatory: FDA 21CFR §173.310; Canada DSL
Manuf./Distrib.: Bayer
http://www.bayerus.com
Trade Names: Baypure® CX 100

Tetrasodium pyrophosphate
CAS 7722-88-5, 13472-36-1 (decahydrate); EINECS/ELINCS 231-767-1
INS450(iii)
Chemical Component Cross-Reference

Synonyms: Diphosphoric acid tetrasodium salt; Sodium diphosphate; Sodium pyrophosphate; n-Sodium pyrophosphate; Sodium tetrapyrophosphate; Tetrasodium diphosphate; TSPP
Classification: Inorganic phosphate salt
Empirical: Na4O7P2
Formula: Na4 • (PO3OPO3)
Properties: Wh. cryst. powd., gran.; sol. 8 g/100 g water; insol. in alcohol; m.w. 265.91; dens. 2.534; m.p. 988°C; pH 10.2 (1%)
Toxicology: ACGIH TLV/TWA 5 mg/m3; LD50 (oral, rat) 4000 mg/kg, (IP, rat) 59 mg/kg, (IV, rat) 100 mg/kg; poison by ing., IP, IV, subcut. routes; not a cholinesterase inhibitor; TSCA listed
Precaution: Incompat. with strong acids (may react violently); may attack aluminum, iron, and other reactive metals; hydrolyzes under acidic conditions; slowly hydrolyzes in neutral aq. sol’n.
Hazardous Decomp. Prods.: Heated to decomp., emits toxic fumes of POx, phosphine, and/or Na2O
HMIS: Health 1, Flammability 0, Reactivity 0
Storage: Store in cool, dry, well-ventilated area, out of direct sunlight in dust-tight containers; avoid generating mist or dust
Uses: Buffer, chelating agent in pharmaceuticals, buccals, dentals
Regulatory: FDA 21CFR §133.169, 133.173, 133.179, 173.310, 175.210, 175.300, 181.22, 181.29, 182.6787, 182.6789, GRAS; Japan approved; Europe listed; UK approved; FDA approved for buccals, dentals; Canada DSL

Theine. See Caffeine

1H-Theino (3,4-d) imidazole-4-pentanoic acid, hexahydro-2-oxo-, (3αS-(3α-4-β,6α-α))-.

See α-D-Biotin

Theobroma cacao; Theobroma cacao butter; Theobroma oil. See Cocoa (Theobroma cacao) butter

Thermoplastic polyurethane elastomer. See Polyurethane elastomer, thermoplastic

THF. See Tetrahydrofuran

THFA. See Tetrahydrofururyl alcohol

Thiaben. See Thiabendazole

Thiabendazole

CAS 148-79-8; EINECS/ELINCS 205-725-8

INS233

Synonyms: 1H-Theino (3,4-d) imidazole-4-pentanoic acid, hexahydro-2-oxo-, (3αS-(3α-4-β,6α-α))-.

See α-D-Biotin

Empirical: C_{12}H_{17}ClN_{4}OS

Properties: Cryst.; m.w. 300.84; m.p. 120-122 C (dec.)

LD_{50} (oral, rat) 3010 mg/kg; LD_{50} (IV, mouse) 70 mg/kg; poison by subcut. and IV routes; high oral doses may cause gastric upsets; reproductive effector; experimental teratogen; TSCA listed

Hazardous Decomp. Prods.: Heated to decomp., emits very toxic fumes of NO_{x}, SO_{x} and Cl^{-}

Uses: Nutrient in medicine

Regulatory: FDA 21CFR §101.9, 107.100, 136.115, 137.165, 137.185, 137.260, 137.305, 137.350, 139.115, 139.117, 139.122, 139.155, 173.185; Canada DSL

Thiamine chloride. See Thiamine

Thiamine chloride hydrochloride; Thiamine dichloride. See Thiamine HCl

Thiamine HCl
CAS 67-03-8; EINECS/ELINCS 200-641-8
FEMA 3322

Synonyms: Aneurine hydrochloride; Thiamine chloride; Thiamine chloride hydrochloride; Thiamine dichloride; Thiamine hydrochloride; Thiamin hydrochloride; Thiaminium chloride hydrochloride; Vitamin B1 hydrochloride

Definition: Chloride-hydrochloride salt of thiamine

Empirical: C12H18Cl2N4OS
Formula: C12H17ClN4OS • HCl
Properties: Small whit. cryst. or cryst. powd., nut- like odor; sol. in water, glycerol; sl. sol. in alcohol; insol. in ether, benzene; m.w. 337.30;

m.p. 248 C (dec.)

Toxicology: LD50 (oral, mouse) 8224 mg/kg, (IP, mouse) 200 mg/kg, (IV, mouse) 89 mg/kg; poison by IV, IP routes; mildly toxic by ing.; TSCA listed

Precaution: The vitamin is destroyed by alkalis and alkaline drugs and by oxidizing and reducing agents

Hazardous Decomp. Prods.: Heated to decomp., emits very toxic fumes of HCl, Cl–, SOx, NOx

HMIS: Health 1, Flammability 1, Reactivity 0

Storage: Hygroscopic

Uses: Nutrient, thiamine source in pharmaceuticals

Regulatory: FDA 21CFR §184.1875, GRAS; BATF 27CFR §240.1051; FEMA GRAS; Japan approved; BP, EP compliance; Canada DSL

Trade Names: Thiamine Hydrochloride USP, FCC

Thiamine hydrochloride. See Thiamine HCl

Thiamine monochloride. See Thiamine

Thiamine mononitrate. See Thiamine nitrate
Chemical Component Cross-Reference

Thiamine nitrate
CAS 532-43-4; EINECS/ELINCS 208-537-4
Synonyms: 3-[(4-Amino-2-methyl-5-pyrimidinyl)methyl]-4-(2-hydroxyethyl)-4-methylthiazolium nitrate; Aneurine mononitrate; Thiamine mononitrate; Thiamin nitrate; Vitamin B1 mononitrate; Vitamin B1 nitrate
Classification: Organic compd.
Definition: Mononitrate salt of thiamine
Empirical: C12H17N5O4S
Formula: C12H17N4OS • NO3
Properties: Wh. cryst. or cryst. powd., sl. char. odor; pract. nonhygroscopic; sol. 2.7 g/100 ml water; sl. sol. in alcohol, chloroform; m.w. 327.36; m.p. 196-200 C (dec.); pH 6.5-7.1 (2% aq.)
Toxicology: LD50 (IV, rabbit) 113 mg/kg, (IP, mouse) 387 mg/kg; poison by IV and IP routes; TSCA listed
Precaution: Powerful oxidizer
Hazardous Decomp. Prods.: Heated to decomp., emits very toxic fumes of NOx and SOx
HMIS: Health 1, Flammability 1, Reactivity 1
Uses: Nutrient, thiamine source for pharmaceuticals, prep. of multivitamin capsules and tablets
Regulatory: FDA 21CFR §184.1878, GRAS; Japan approved; BP, EP compliance; Canada DSL

†=pharmaceutical grade

Trade Names Containing: Rocoat® Thiamine Mononitrate 33% ; Thiamin Mononitrate 98 DC

Thiamin hydrochloride; Thiaminium chloride hydrochloride. See Thiamine HCl
Thiamin nitrate. See Thiamine nitrate
5-Thianonane. See Butyl sulfide
Thia-4-pentanal. See 3-Methylthiopropionaldehyde
Thiapene. See Thiophene
2-Thiopropane. See Dimethyl sulfide
Thiazole, 2-isobutyl-; Thiazole, 2-(2-methylpropyl)-. See 2-Isobutylthiazole
Thiazole, 2,4,5-tridecen-1-yl. See Trithmethyl thiazole
2-(4-Thiazolyl) benzimidazole; 2-(Thiazol-4-yl) benzimidazole. See Thiabendazole

2-Thienyl mercaptan
CAS 7774-74-5
FEMA 3062
Synonyms: 2-Mercaptothiophene; 2-Thienylthiol; 2-Thiophenetiol; Thiphene-2-thiol
Empirical: C4H4S2
Properties: Ylsh. or colorless oily liq.; sl. sol. in water; sol. in alcohol; m.w. 116.21; b.p. 166 C
Uses: Synthetic flavor for pharmaceuticals
Regulatory: FDA 21CFR §172.515; FEMA GRAS; Canada DSL

2-Thienylthiol. See 2-Thienyl mercaptan

Thimerosal
CAS 54-64-8; EINECS/ELINCS 200-210-4
UN 2025 (DOT)
Synonyms: ((o-Carboxyphenyl) thio) ethylmercury sodium salt; Ethyl (2-mercaptobenzoato-S) mercury, sodium salt; 2-(Ethylmercuriomercapto) benzoic acid sodium salt; o-(Ethylmercurithio) benzoic acid sodium salt; Ethylmercurithiosalicylic acid sodium salt; Ethyl (sodium o-mercaptobenzoato) mercury; Mercurothiolate; Mercury, ethyl(2-mercaptobenzoato-S)-, sodium salt; Merthiolate; Merthiolate sodium; Sodium

Chemical Component Cross-Reference

Thiophen. See Thiophene

Thiophene
CAS 110-02-1; EINECS/ELINCS 203-729-4
UN 2414 (DOT)
Synonyms: Divinylene sulfide; Thiacyclopentadiene; Thiaphene; Thiofuram; Thiofurans; Thiofuransfuran; Thiole; Thiophen; Thiotetrole
Empirical: C₄H₄S
Properties: Colorless clear liq.; sl. aromatic odor similar to benzene; misc. with most org. solvs.; sol. in alcohol, ether; insol. in water; m.w. 84.14; dens. 1.051; vapor pressure 40 mm Hg (12.5 C); m.p. -38 C; b.p. 84 C; flash pt. 21.2 F; ref. index 1.5270; may be heated to 850 C without decomp.
Toxicology: LD₅₀ (oral, rat) 1400 mg/kg, (subcut., rabbit) 830 mg/kg, (IP, mouse) 100 mg/kg; LC₅₀ (inh., mouse, 2 h) 9500 mg/m³; poison by ing. and IP routes; mildly toxic by inh. and subcut. routes; TSCA listed
Precaution: DOT: Flamm. liq.; danger. fire hazard exposed to heat or flame; explosive reaction with N-nitrosoacetanilide; violent or explosive reaction with nitric acid; incompat. with oxidizers
Hazardous Decomp. Prods.: Heated to decomp., emits highly toxic fumes of SOₓ
NFPA: Health 2, Flammability 3, Reactivity 0
Uses: Organic synthesis, pharmaceutical mfg.
Regulatory: Canada DSL

Thiophen-2-thiol; Thiophene-2-thio. See 2-Thienyl mercaptan

2-Thiophenethiol; Thiophene-2-thiol. See 2-Thienyl mercaptan

Thiophenol
CAS 108-98-5; EINECS/ELINCS 203-635-3
UN 2337; FEMA 3616
Synonyms: Benzenethiol; Mercaptobenzene; Phenyl mercaptan; TP
Classification: Aromatic organic compd.
Empirical: C₆H₅S
Formula: C₆H₅SH
Properties: Water-wh. liq., repulsive penetrating garlic-like odor; very sol. in alcohol; sol. in oxygenated and aromatic solvs.; misc. with ether, benzene, CS₂; insol. in water; m.w. 110.04; dens. 1.0728 (25/4 C); m.p. 70 C; b.p. 169.5 C; flash pt. 55 C; ref. index 1.58603
Toxicology: LD₅₀ (oral, rat) 46 mg/kg, (skin, rat) 300 mg/kg; TLV/TWA 0.5 ppm; toxic by inhalation, skin contact, ing.; severe eye irritant; causes burns; exposure may cause headache and dizziness; TSCA listed
Precaution: Combustible; DOT: Flamm. liq. and poison; oxidizes in air to the disulfide; incompat. with acids
Hazardous Decomp. Prods.: Heated to decomp., emits toxic fumes of SOₓ
Uses: Pharmaceutical synthesis
Regulatory: FDA 21CFR §172.515; FEMA GRAS; Canada DSL

Thiopropane; 2-Thiopropane. See Dimethyl sulfide
β-Thiopseudourea. See Thiourea
Thiosulfuric acid disodium salt. See Sodium thiosulfate anhydrous
Thiophene. See Thiophene

Thiourea
CAS 62-56-6; EINECS/ELINCS 200-543-5
UN 2811 (DOT); UN 2877 (DOT)
Synonyms: Isothiourea; Pseudothiourea; Sulfourea; Thiocarbamide; β-Thiopseudourea; 2-Thiourea
Empirical: CH₄N₂S
Formula: NH₂CSNH₂
Properties: Wh. cryst. solid; bitter taste; sol. in water, alcohol; m.w. 76.12; dens. 1.406; m.p. 180 C
Toxicology: LD₅₀ (oral, rat) 125 mg/kg, (IP, rat) 436 mg/kg; LD₅₀ (subcut., guinea pig) 4000 mg/kg; experimental poison by ing., IP routes; human poison; skin irritant, allergenic; human systemic effects by ing.: hemorrhage, cell count changes; chronic doses cause hepatic tumors; experimental carcinogen, neoplastigen, tumorigen, teratogenic and reproductive effects; human mutagenic data; TSCA listed
Precaution: May react violently with acrolein; incompat. with acrylaldehyde, H₂O₂, HNO₃

†=pharmaceutical grade
**Chemical Component Cross-Reference**

*Hazardous Decomp. Prods.: Heated to decomp., emits very toxic fumes of NOₓ and SOₓ*

*HMIS: Health 3, Flammability 1, Reactivity 1*

*Uses: Pharmaceutical synthesis*

Handbook of Pharmaceutical Additives, Third Edition 2171
Thuja oil. See Cedar leaf (Thuja occidentalis) oil.

Thyme. See Thyme (Thymus vulgaris).

Thyme camphor. See Thymol.

Thyme extract; Thyme extract, white. See Thyme (Thymus vulgaris) extract.

Thyme oil. See Thyme oil red.

Thyme oil red
CAS 8007-46-3; EINECS/ELINCS 284-535-7
FEMA 3064, 3065
Synonyms: Red thyme oil; Spanish thyme oil; Thyme oil; Thyme oil red; Thyme oil, white; Thymus vulgaris; Thymus vulgaris oil; White thyme oil
Definition: Oil from Thymus vulgaris and T. zygis, contg. thymol, carvacrol
Properties: Reddish-yel. liq.; insol. in water; sol. in 70% ethanol; sp.gr. 0.915-0.935; flash pt. (CC) 80 C; ref. index 1.495-1.520
Toxicology: LD50 (oral, rat) 4700 mg/kg, (dermal, rabbit) > 5 g/kg; mildly toxic by ing.; severe skin irritant; mutagen; TSCA listed
Hazardous Decomp. Prods.: Heated to decomp., emits acrid smoke and irritating fumes
HMIS: Health 1, Flammability 2, Reactivity 0
Storage: Keep cool, well closed; protect from light
Uses: Natural flavoring agent
Use Level: < 2%
Regulatory: FDA 21CFR §182.20, GRAS; Australia; Canada DSL; Philippines PICCS
Thymic acid. See Thymol

Thymol
CAS 89-83-8; 3228-03-3 (m-); EINECS/ELINCS 201-944-8
FEMA 3066
Synonyms: 3-p-Cymenol; p-Cymen-3-ol; 3-Hydroxy-p-cymene; 3-Hydroxy-1-methyl-4-isopropylbenzene; Isopropyl cresol; 6-Isopropyl-m-cresol; Isopropyl-m-cresol; Isopropyl metacresol; 2-Isopropyl-5-methylenphenol; 1-Methyl-3-hydroxy-4-isopropylbenzene; 5-Methyl-2-isopropylphenol; 5-Methyl-2-(1-methylethyl)phenol; Phenol, 5-methyl-2-(1-methylethyl)-; Thyme camphor; Thymic acid; m-Thymol

Classification: Aromatic organic compd.; substituted phenol

Empirical: C10H14O
Formula: (CH3)2CHC6H3(CH3)OH

Properties: Colorless translucent cryst.; herbal, medicinal odor; pungent caustic taste; very sol. in alcohol, ether, chloroform, olive oil; sol. in water, alkali, glc. acetic acid, fixed/volatile oils, oxygenated and chlorinated solvs.; m.w. 150.24; dens. 0.972; vapor pressure 1 mm Hg (64 C); m.p. 51 C; b.p. 233 C; flash pt. 216 F; ref. index 1.523; tenacity > 1 wk. on blotter

Toxicology: LD50 (oral, rat) 980 mg/kg, (IV, mouse) 100 mg/kg; LDLo (subcut., rat) 1600 mg/kg; poison by ing., IV, IP; mod. toxic by subcut. route; local irritant; allergen; accumulation of toxic levels causes pulmonary edema; experimental reproductive effector; mutagenic data; TSCA listed

Precaution: Combustible; affected by light; incompat. with acetaldehyde

Hazardous Decomp. Prods.: Heated to decomp., emits acrid smoke and irritating fumes

HMIS: Health 2, Flammability 1, Reactivity 0

Storage: Light-sensitive

Uses: Synthetic flavor, fragrance, antimicrobial, preservative, disinfectant, deodorant, antiseptic, local anesthetic, cooling agent in pharmaceuticals, buccals, inhalants, liniments, lip balms, mouthwash, veterinary ointments/shampoos; preservative in insulin preps.; destroys mold, preserves anatomical specimens; topical antifungal agent; OTC drug; anthelmintic drug

Features: Medicinal flavor

Regulatory: FDA 21CFR §172.515, 175.105; 27CFR §21.65, 21.151; FEMA GRAS; FDA approved for buccals, inhalants; USP/NF, BP, EP compliance; Australia; Canada DSL; Japan ENCS (no. 3-521); Philippines PICCS

Manuf./Distrib.: Adrian Amer.

Hazardous Decomp. Prods.: Heated to decomp., emits acrid smoke and irritating fumes

Health 2, Flammability 1, Reactivity 0

Storage: Light-sensitive

Uses: Synthetic flavor, fragrance, antimicrobial, preservative, disinfectant, deodorant, antiseptic, local anesthetic, cooling agent in pharmaceuticals, buccals, inhalants, liniments, lip balms, mouthwash, veterinary ointments/shampoos; preservative in insulin preps.; destroys mold, preserves anatomical specimens; topical antifungal agent; OTC drug; anthelmintic drug

Features: Medicinal flavor

Regulatory: FDA 21CFR §172.515, 175.105; 27CFR §21.65, 21.151; FEMA GRAS; FDA approved for buccals, inhalants; USP/NF, BP, EP compliance; Australia; Canada DSL; Japan ENCS (no. 3-521); Philippines PICCS

Tin
CAS 7440-31-5; EINECS/ELINCS 231-141-8
Synonyms: Silver matt powder; Stannum; Tin
(α); Tin flake; Tin powder
Classification: Metallic element
Empirical: Sn
Properties: Silver-wh. ductile solid; sol. in acids,
hot KOH sol'n.; insol. in water; at.wt. 118.69;
dens. 7.29 (20 C); m.p. 232 C; b.p. 2260 C
Toxicology: ACGIH TLV/TWA 2 mg(Sn)/m³
(metal, oxide, inorg. compds.), TLV 0.1
mg(Sn)/m³ (org. compds.); STEL 0.2
mg(Sn)/m³ (skin); TDLo (implant, rat) 395
mg/kg; hazard by inh.; questionable
carcinogen; experimental tumorigen
by implant; TSCA listed
Precaution: Combustible as dust exposed to
heat or by spontaneous chem. reaction
with Br₂, BrF₃, Cl₂, CIF₃, Cu(NO₃)₂, K₂O₂, or S
Uses: Ingred. in dental amalgam; formerly as
treatment of tapeworm
Regulatory: Canada DSL

Tioserine. See L-Cysteine

Tioxolone
CAS 4991-65-5; EINECS/ELINCS 225-653-0
Synonyms: 1,3-Benzoxathiol-2-one, 6-
hydroxy-; 6-Hydro-2-oxo-1,3-benzoxathiole;
6-Hydroxy-1,3-benzoxathiol-2-one

Empirical: C₇H₄O₃S

Properties: Lt. yel. to beige powd.; pract. insol. in water. w. 168.17; m.p. 158-160 C

Toxicology: LD₅₀ (oral, rat) 633 mg/kg; LC₅₀ (inh., rat) 3710 mg/m³; harmful; irritant

Precaution: Wear safety glasses and chemical goggles if splashing is possible; avoid strong oxidants and bases

Hazardous Decomp. Prods.: irritating and toxic fumes and gases

Storage: Store in a cool, dry place; keep container closed when not in use

Uses: Antiseborrheic; antiacne; astringent

Manuf./Distrib.: Aldrich http://www.sigma-aldrich.com; Sigma http://www.sigma-aldrich.com/belgium

Trade Names Containing: Tioxolone Water

Soluble 5%

TIPA. See Triisopropanolamine

Tirpilene. See α-Terpipene

TISC. See Triisostearyl citrate

Titania; Titanium acid anhydride; Titania anhydride; Titanium earth; Titanium oxide. See Titanium dioxide

Titanium dioxide

CAS 1317-80-2; 13463-67-7; EINECS/ELINCS 236-675-5

INS171; E171

Synonyms: CI 77891; Pigment white 6; Titania; Titanium acid anhydride; Titanium anhydride; Titanium earth; Titanium oxide; Titanium peroxide; Titanium white

Classification: Inorganic oxide

Definition: Two crystalline forms: anatase and rutile

Empirical: O₂Ti

Formula: TiO₂

Properties: Wh. amorphous powd., odorless, tasteless; sol. in HF, hot conc. H₂SO₄; insol. in water, HCl, HNO₃, dil. H₂SO₄; m.w. 79.90; dens. 3.90 (anatase), 4.23 (rutile); m.p. 1855 C; Anatase: dens. 3.90; bulking value 0.031 gal/lb; oil absorp. 24; Rutile: dens. 4.23

Toxicology: ACGIH TLV/TWA 10 mg/m³ of total dust (when toxic impurities are not present); TCLo (inh., rat) 250 mg/m³; nuisance dust; common air contaminant; human skin irritant; questionable carcinogen; experimental carcinogen, neoplasitgen, tumorigen; TSCA listed

Precaution: Violent or incandescent reaction with metals (e.g., aluminum, calcium,
Chemical Component Cross-Reference

Titanium oxide; Titanium peroxide; Titanium white. See Titanium dioxide

TLA. See 2-Mercapto propionic acid

TMA. See Trimethylamine

TMPI. See Trimethyl phosphite

TMT; TMTD; TMTDS. See Tetramethylthiuram disulfide

Tocofersolan. See Tocophersolan

Tocopherol

CAS 1406-18-4; EINECS/ELINCS 215-798-8

Synonyms: D-α-Tocopherol; DL-α-Tocopherol; Vitamin E

Empirical: C₂₉H₅₀O₂

Properties: Visc. oil; sol. in oils, fats, acetone, alcohol, chloroform, ether; insol. in water; m.w. 430.79; m.p. 2.5-3.5 C; DL-form: sl. visc. pale alcohol, chloroform, ether; insol. in water; m.w. 430.79; m.p. 2.5-3.5 C; D-form: red liq., odorless; flash pt. > 110 C

Toxicology: TDLo (oral, rat) 7500 mg/kg; experimental reductive and mutagenic effects; TSCA listed

Storage: Gradually darkens on exposure to light

Uses: Antioxidant, nutrient, dietary supplement for pharmaceuticals

Features: &

Regulatory: FDA 21CFR §182.3890, 182.8890, 184.1890, GRAS; EC E306; USP/NF compliance (excipient); Canada DSL

2R,4'R,8'R-α-Tocopherol. See D-α-Tocopherol

all-rac-α-Tocopherol. See DL-α-Tocopherol

D-α-Tocopherol

CAS 59-02-9; EINECS/ELINCS 200-412-2

E306

Synonyms: 2,5,7,8-Tetramethyl-2-(4’,8’,12’-trimethyltridecyl)-6-chromanol; 2R,4'R,8'R-α-Tocopherol; (R,R,R)-α-Tocopherol; 5,7,8-Trimethyltoocol; Vitamin E

Empirical: C29H50O2

Properties: Lt. yel. to red visc. oil, nearly odorless; freely sol. in oils, fats, acetone, alcohol, chloroform, ether; pract. insol. in water; m.w. 430.72; dens. 0.950 (25/4 C); m.p. 2.5-3.5 C; b.p. 200 C; flash pt. (CC) 93 C

Toxicology: TDLo (oral, rat) 7500 mg/kg; experimental reproductive effects; mutagenic data; TSCA listed

Precaution: Incompat. with strong oxidizing agents

Hazardous Decomp. Prods.: CO, CO2; heated to decom., emits acrid smoke and irritating fumes

Storage: Store in cool, dry, well-ventilated area away from moisture, heat, direct sunlight; subject to air oxidation; keep refrigerated; keep tightly closed; store under argon; light-sensitive

Uses: Antioxidant, preservative, nutrient, dietary supplement for pharmaceuticals

Regulatory: FDA 21CFR §182.3890, 182.8890, 184.1890, GRAS; USDA 9CFR §318.7, 381.147; SARA §311/312 nonreportable; Japan approved; Europe, Australia listed; UK
Chemical Component Cross-Reference

†=pharmaceutical grade

Trade Names Containing: Beta Carotene 30% FS; Beta Carotene 1% CWS; Vitamin A and D-3 Blend

See also Tocopherol

(R,R,R)-α-Tocopherol. See D-α-Tocopherol
d,l-α-Tocopherol acetate; (±)-α-Tocopherol acetate. See dl-α-Tocopheryl acetate

α-Tocopherol acid succinate. See Tocopheryl succinate

Tocophersolan

CAS 9002-96-4; 30999-06-5

Synonyms: Butanediacid, mono [3,4-dihydro-2,5,7,8-tetramethyl-2-(4,8,12-trimethyltridecyl)-2H-1-benzopyran-6-yl] ester, polymer with oxirane (1:22); Poly (oxy-1,2-ethanediyl), α-(4-(3,4-dihydro-2,5,7,8-tetramethyl-2-(4,8,12-trimethyltridecyl)-2H-1-benzopyran-6-yl) oxy)-1,4-ioxobutyloxy)-ω-hydroxy-, (2R-(2R(4R,8R)))- Tocofersolan; α-Tocopheryl PEG 1000 succinate; d-α-Tocopheryl PEG 1000 succinate

Classification: Organic compd.

Empirical: C_33H_54O_5 \cdot (C_2H_4O)_n

Formula:

OOC(CH_2)_2COO(CH_2CH_2O)_nH, avg. n = 22

Properties: Misc. with water

Toxicology: LD50 (oral, rat) > 7 g/kg

Uses: Antioxidant, natural vitamin E source for pharmaceuticals

Trade Names: Eastman® Vitamin E TPGS NF

Tocopheryl acetate

CAS 1406-70-8; 7695-91-2; EINECS/ELINCS 231-710-0

Synonyms:  α-α-Tocopheryl acetate; DL-α-Tocopheryl acetate; Vitamin E acetate

Definition: Ester of tocopherol and acetic acid

Empirical: C_{31}H_{52}O_{3}

Uses: Antioxidant, natural vitamin E source for pharmaceuticals, capsules and liqs.

Regulatory: FDA 21 CFR §182.8892, GRAS; BP, EP compliance

Chemical Component Cross-Reference

**Trade Names:** Covitol® 1100; Covitol® 1360; Vitamin E Acetate-USP

**Trade Names Containing:** Vitamin A, C & E

**Liposomes**

2R,4´R,8´R-α-Tocopheryl acetate; α-Tocopheryl acetate. See d-α-Tocopheryl acetate

**d-α-Tocopheryl acetate**

CAS 58-95-7; EINECS/ELINCS 231-710-0

**Synonyms:** 2,5,7,8-Tetramethyl-2-(4´,8´,12´-trimethyltridecyl)-6-chromanol acetate; 2R,4´R,8´R-α-Tocopheryl acetate; α-Tocopheryl acetate; Vitamin E acetate

**Definition:** Obtained from vacuum steam distillation and acetylation of edible vegetable oil prods.

**Empirical:** C\textsubscript{31}H\textsubscript{52}O\textsubscript{3}

**Properties:** Cryst., odorless; sol. in alcohol; misc. with acetone, chloroform, ether, vegetable oil; insol. in water; m.w. 472.75; dens. 0.9533 (21.3/4 C); m.p. -27.5 C; b.p. 184 C (0.01 mm); flash pt. > 230 F; ref. index 1.4950-1.4972

**Toxicology:** TDLo (oral, rat) 182 g/kg; experimental reproductive effector; mutagenic data; TSCA listed

**Hazardous Decomp. Prods.:** Heated to decomp., emits acrid smoke and irritating fumes

**HMIS:** Health 1, Flammability 1, Reactivity 0

**Storage:** Light-sensitive

**Uses:** Nutrient, vitamin E source, dietary supplement, antioxidant for pharmaceuticals

**Regulatory:** FDA 21CFR §182.8892, GRAS; FDA approved for topicals; Canada DSL

**Trade Names:** Tri-K Vitamin E Acetate; Vitamin E Acetate Dry Powd. 50% DC/GFP; Vitamin E Acetate Dry Powd. SD 50; Vitamin E dl-alpha Tocopheryl Acetate USP

**Trade Names Containing:** Dry Vitamin E 75™ HP; Dry Vitamin E Acetate 50% SD

**See also** Tocopheryl acetate

**dl-α-Tocopheryl acetate**

CAS 133-80-2; 7695-91-2; EINECS/ELINCS 231-710-0

**Synonyms:** 2H-1-Benzopyran-6-ol, 3,4-dihydro-2,5,7,8-tetramethyl-2-(4,8,12-trimethyltridecyl)-, acetate; 6-Chromanol, 2,5,7,8-tetramethyl-2-(4,8,12-trimethyltridecyl)-, acetate; Syntopherol acetate; 2,5,7,8-Tetramethyl-2-(4,8,12-trimethyltridecyl)-6-chromanol acetate; dl-α-Tocopherol acetate; (±)-α-Tocopherol acetate

**Definition:** Ester of tocopherol and nicotinic acid

**Empirical:** C\textsubscript{35}H\textsubscript{53}NO\textsubscript{3}

**Properties:** Lt. yel. waxy solid; m.w. 535.82; m.p. 42-48 C

---

**α-Tocopherol nicotinate**

**Synonyms:** 2,5,7,8-Tetramethyl-2-(4,8,12-trimethyltridecyl)-6-chromanol-3-carboxypryidine; 2R,4´R,8´R-α-Tocopheryl nicotinate; Vitamin E nicotinate

**Definition:** Ester of tocopherol and nicotinic acid

**Empirical:** C\textsubscript{35}H\textsubscript{53}NO\textsubscript{3}

**Properties:** Lt. yel. waxy solid; m.w. 535.82; m.p. 42-48 C

---

**Tocopheryl acid succinate; α-Tocopheryl acid succinate**

**See also** Tocopheryl succinate

**2R,4´R,8´R-α-Tocopheryl nicotinate**

**See d-α-Tocopheryl nicotinate**

**d-α-Tocopheryl nicotinate**

**Synonyms:** 2,5,7,8-Tetramethyl-2-(4,8,12-trimethyltridecyl)-6-chromanol-3-carboxypryidine; 2R,4´R,8´R-α-Tocopheryl nicotinate; Vitamin E nicotinate

**Definition:** Ester of tocopherol and nicotinic acid

**Empirical:** C\textsubscript{35}H\textsubscript{53}NO\textsubscript{3}

**Properties:** Lt. yel. waxy solid; m.w. 535.82; m.p. 42-48 C
Chemical Component Cross-Reference

**Antioxidant in pharmaceuticals, topicals**

α-Tocopheryl PEG 1000 succinate; d-α-Tocopheryl PEG 1000 succinate. See Tocophersolan

**Tocopheryl succinate**

CAS 4345-03-3 (d-α); 17407-37-3; EINECS/ELINCS 224-403-8

**Synonyms:** α-Tocopherol acid succinate; Tocopheryl succinate; α-Tocopheryl acid succinate; D-α-Tocopheryl succinate; DL-α-Tocopheryl succinate; Vitamin E acid succinate; Vitamin E succinate

**Definition:** Ester of tocopherol and succinic acid

**Empirical:** C33H54O5

**Properties:** Colorless to wh. cryst. powd. or needles, odorless, tasteless; very sol. in chloroform; sol. in acetone, alcohol, ether, vegetable oil; pract. insol. in water; m.w. 530.76; m.p. 76-77°C

**Toxicology:** LD50 (oral, rat) > 7 g/kg; TSCA listed

**Hazardous Decomp. Prods.:** Heated to decomp., emits acrid smoke and irritating fumes

**Uses:** Antioxidant, nutrient, dietary supplement, Vitamin E source

**Regulatory:** FDA 21 CFR §182.8890, GRAS; Canada DSL

**Manuf./Distrib.:** Boith China†

http://www.boith.com;
http://www.sigma-aldrich.com/belgium

**Trade Names:** Covitol® 1185; Covitol® 1210

**D-α-Tocopheryl succinate; DL-α-Tocopheryl succinate.** See Tocopheryl succinate

**Tolualdehyde.** See Tolyl aldehyde

α-Tolualdehyde. See Phenylacetaldehyde

p-Tolualdehyde. See p-Tolyl aldehyde

**Tolualdehyde glyceryl acetal, mixed o, m, p**

CAS 73987-51-6; 977041-69-2

FEMA 3067

**Synonyms:** 2-(Methylphenyl)-1,3-dioxan-5-ol (mixed isomers); Tolylaldehyde glyceryl acetal

**Empirical:** C11H12O2

**Properties:** M.w. 176.23

**Toxicology:** LD50 (oral, rat) 3400 mg/kg; mod. toxic by ing.; skin irritant

**Hazardous Decomp. Prods.:** Heated to decomp., emits acrid smoke and irritating fumes

**Uses:** Synthetic flavor for pharmaceuticals

### Tolualdehyde isomers; Tolualdehydes, mixed o-, m-, p.

**See Tolyl aldehyde**

**Tolu balsam; Tolu balsam gum; Tolu balsam oil; Tolu balsam tincture.** See Balsam tolu (Myroxylon balsamum)

### Toluene

**CAS 108-88-3; EINECS/ELINCS 203-625-9**

UN 1294 (DOT)

**Synonyms:** Methylbenzene; Methylbenzol; Phenylmethane; Toluol

**Classification:** Aromatic hydrocarbon

**Empirical:** C7H8

**Formula:** C6H5CH3

**Properties:** Colorless clear liq., benzene odor; sol. in alcohol, benzene, ether, acetone, chloroform, petrol. ether, ethyl acetate; misc. with most org. solvs.; very sl. sol. in water; m.w. 92.13; dens. 0.866 (20/4°C); vapor pressure 36.7 mm Hg (30°C); m.p. -94.5°C; b.p. 110.7°C; flash pt. (CC) 4.4°C; ref. index 1.4967 (20°C); KB value 105

**Toxicology:** ACGIH TLV/TWA 100 ppm; STEL 150 ppm; LD50 (oral, rat) 7.53 g/kg, (skin, rabbit) 12,124 mg/kg; toxic by ing., inh., IP, and skin absorption; irritant to eyes, skin, respiratory tract; severe dermatitis on direct contact; ing. may cause lung aspiration; overexposure by inh. may cause CNS excitation/depression; high concns. may cause paresthesia, vision disturbances, dizziness, nausea, headache, narcosis, death; experimental teratogen, reproductive effector; mutagenic data; TSCA listed

**Environmental:** VOC; BOD5 2.15; COD 2.52; ThOD 3.13

**Precaution:** Highly flamm.; incompat. with strong oxidizers, nitric acid, sulfuric acid, nitrogen tetroxide, silver perchlorate, sulfur dichloride, etc.; fire and explosion risk; potential violent reactions; common air contaminant

**Hazardous Decomp. Prods.:** Heated to decomp., emits acrid smoke and irritating fumes

**Regulatory:** FDA 21 CFR §172.515; FEMA GRAS

**NFPA:** Health 2, Flammability 3, Reactivity 0

**Storage:** Store in cool well-ventilated area out of direct sunlight, away from heat/ignition sources, away from corrosives

**Uses:** Solvent in pharmaceuticals

**Regulatory:** FDA 21 CFR §175.105, 175.320, 176.180, 177.1010, 177.1200, 177.1440,

Toluene sulfonic acid (INCI);  4- 
Toluenesulfonic acid;  Toluene-4-sulfonic  
acid.  See p-Toluenesulfonic acid
p-Toluenesulfonic acid  
CAS 104-15-4;  EINECS/ELINCS 203-180-0  
UN 2585

Synonyms:  4-Methylbenzenesulfonic acid;  p-  
Methylbenzenesulfonic acid;  p- 
Methylphenylsulfonic acid;  PTSA;  Toluene  
sulfonic acid (INCI);  4-Toluenesulfonic acid;  
Toluene-4-sulfonic acid;  Toluene-p-sulfonic  
acid;  p-Tolysulfonic acid;  Toscic acid;  p- 
TSA

Classification:  Substituted aromatic acid; sulfonic  
acid
Empirical:  C7H8O3S
Formula:  C6H4(SO3H)(CH3)

Properties:  Colorless leaflets; pungent odor; very  
sol. in water; sol. in alcohol, ether, diethyl  
ether; m.w. 172.21; m.p. 107 C; b.p. 140 C (20  
mm); flash pt. (CC) 184 C; strong acid; anionic

Toxicology:  LD50 (oral, rat) 2480 mg/kg; mod.  
toxic by ing.; strong skin and mucous  
membrane irritant; TSCA listed

Precaution:  DOT: Corrosive material;  
combustible; potentially explosive reaction  
with acetic anhydride + water

Hazardous Decomp. Prods.:  CO, CO2; heated  
to decomp., emits toxic fumes of SOx
Chemical Component Cross-Reference

**NFPA:** Health 3, Flammability 1, Reactivity 1

**Storage:** Hygroscopic

**Uses:** Catalyst, intermediate for pharmaceuticals

**Regulatory:** FDA 21CFR §175.105; Canada DSL

**Trade Names:** Eltesol® TSX/A

**Toluene-p-sulfonic acid.** See p-Toluene sulfonic acid

**p-Toluenesulfonic acid, methyl ester.** See Methyl tosylate

p-Tolylaldehyde. See p-Tolyl aldehyde

p-Tolylacetaldehyde

CAS 104-09-6; EINECS/ELINCS 203-173-2

FEMA 3071

**Synonyms:** Benzeneacetaldehyde, 4-methyl-; 4-Methylphenylacetaldehyde; p-Methylphenylacetaldehyde; Syringaldehyde; Syringaldehyde

**Classification:** aromatic aldehyde

**Empirical:** C9H10O

**Properties:** Colorless to yel. oil, bitter almond odor, flavor; sol. in most common org. solvs.; insol. in alcohol; m.w. 134.17; dens. 1.010-1.016; b.p. 210 C; flash pt. 70 C; ref. index 1.5300-1.5350

**Uses:** Synthetic flavor and fragrance for pharmaceuticals

**Use Level:** Trace-2%

**Regulatory:** FDA 21CFR §172.515; U.S. approved as direct food additive; FEMA GRAS; Canada DSL

**Tolyl acetate.** See Methylbenzyl acetate, mixed o-, m-, p-

**o-Tolyl acetate.** See o-Cresyl acetate

**p-Tolyl acetate.** See p-Cresyl acetate

**p-Tolyl alcohol.** See p-Cresol

**Tolyl aldehyde**

CAS 1334-78-7; EINECS/ELINCS 215-615-1

FEMA 3068

**Synonyms:** Methyl benzaldehydes, mixed o-, m-, p-; Tolualdehyde; Tolualdehyde isomers; Tolualdehydes, mixed o-, m-, p-; Toluene-carboxaldehyde; Toly aldehydes, mixed o-, m-, p-

**Definition:** Mixt. of o-, m-, and p-tolyl aldehydes

**Empirical:** C8H8O

**Properties:** Colorless liq., bitter almond odor; sol. in alcohol, ether; sl. sol. in water; m.w. 120.14; dens. 1.020; b.p. 199-204 C; ref. index 1.54693 (16.6 C)

**Toxicology:** LD50 (oral, rat) 2250 mg/kg; mod. toxic by ing.; skin irritant; TSCA listed
Chemical Component Cross-Reference

Precaution: Combustible

Hazardous Decomp. Prods.: Heated to decomp., emits acrid smoke and irritating fumes

Uses: Synthetic flavor for pharmaceuticals

**Handbook of Pharmaceutical Additives, Third Edition** 2184
Tragacanth (Astragalus gummifer) gum

**Definition:** Dried gummy exudate from *Astragalus gummifer*

**Properties:** Wh. powd., wh. to pale yel. translucent, horny pieces; odorless; mucilaginous taste; insol. in alcohol; strongly hydrophilic

**Toxicology:** LD50 (oral, rat) 16,400 mg/kg; mildly toxic by ing.; mild allergen causing hay fever, dermatitis, GI distress, asthma; may cause intolerance; skin and eye irritant; linked to liver damage in test animals; TSCA listed

**Precaution:** Combustible when exposed to heat or flame

**Hazardous Decomp. Prods.:** Heated to decomp., emits acrid smoke and irritating fumes

**HMIS:** Health 0, Flammability 1, Reactivity 0

**Uses:** Suspending agent, thickener, emulsifier for pharmaceuticals, nasal sol’ns., sublingual tablets, oral suspensions, ointments, medicinal emulsions, dentifrices; excipient and binder for tablets

**Use Level:** 4.8-6.0% (oral liqs.); 0.42-100 mg (tablets)

**Regulatory:** FDA 21CFR §133.133, 133.134, 133.162, 133.178, 133.179, 150.141, 150.161, 184.1351, GRAS; FEMA GRAS; Japan approved; Europe listed; UK approved; FDA approved for orals; USP/NF, BP, EP compliance; Canada DSL

Trehalose
CAS 99-20-7; EINECS/ELINCS 202-739-6
Synonyms: Ergot sugar, α-D-Glucopyranoside, α-D-glucopyranosyl-α-D-glucopyranoside; Mycose; Natural trehalose; α-Trehalose; α,α-Trehalose; D-(+)-Trehalose; Trehalose, dihydrate
Classification: Disaccharide
Empirical: C12H22O11
Properties: Off-wh. to wh. cryst. powd.; m.w. 342.30; sp.gr. 1.54; m.p. 97 C
Uses: Compactible sugar-type filler and taste masking agent in pharmaceutical preps.; 45% that of sucrose
Regulatory: GRAS; Canada DSL

α-Trehalose; α,α-Trehalose; D-(+)-Trehalose; Trehalose, dihydrate. See Trehalose

Tri. See Trichloroethylene

Triacetin
CAS 102-76-1; EINECS/ELINCS 203-051-9
FEMA 2007; INS1518; E1518
Synonyms: Acetic, 1,2,3-propanetriyl ester; Acetin; Enzactin; Glycerine triacetate; Glycerol triacetate; Glyceryl triacetate; 1,2,3-Propanetriyl triacetate; Triacetyl glycerin; Triacetyl glycerol
Definition: Triester of glycerin and acetic acid
Empirical: C9H14O6
Formula: C3H5(OCOCH3)3
Properties: Colorless or pale yel. oily liq., sl. fatty odor, bitter taste; sol. in water, alcohol, ether, other org. solvs.; sl. sol. in CS2; m.w. 218.20; dens. 1.160 (20 C); m.p. -78 C; b.p. 258-260 C; sapon. no. 765-775; flash pt. 258-260 F; index 1.4307 (20 C)
Toxicology: LD50 (oral, rat) 3000 mg/kg, (IV, mouse) 1600 ± 81 mg/kg, (IP, rat) 2100 mg/kg, (subcut., rat) 2800 mg/kg; poison by ing.; mod. toxic by IP, IV, subcut. routes; eye irritant; TSCA listed

†=pharmaceutical grade

Precaution: Combustible exposed to heat, flame, or powerful oxidizers
Hazardous Decomp. Prods.: Heated to decomp., emits acrid smoke and irritating fumes
NFPA: Health 1, Flammability 1, Reactivity 0
Uses: Syn. flavor, plasticizer for pharmaceuticals, orals, toothpaste; topical antifungal; OTC drug
Regulatory: FDA 21CFR §175.300, 175.320, 181.22, 181.27, 184.1901, GRAS; FEMA GRAS; FDA approved for orals; USP/NF, BP, EP compliance; Canada DSL

Chemical Component Cross-Reference

†=pharmaceutical grade

Properties: Colorless oily liq., bitter taste; very sol. in alcohol, chloroform, ether; insol. in water; m.w. 302.36; dens. 1.032 (20/4 C); m.p. -75 C; b.p. 305-310 C (760 mm), 90'C (15 mm); flash pt. 345 F; ref. index 1.4358 (20'C)

Toxicology: LD50 (oral, rat) 13 g/kg, (IV, mouse) 320 mg/kg; poison by IV route; low toxic by ing.; questionable carcinogen; experimental tumorigen; TSCA listed

Precaution: Combustible liq.; can react with oxidizers

Hazardous Decomp. Prods.: Heated to decomp., emits acrid smoke and irritating fumes

Uses: Synthetic flavor for pharmaceuticals, nutritional supplements

Regulatory: FDA 21CFR §172.515, 184.1903, GRAS; FEMA GRAS; Canada DSL

Tributylinase; Tributylin esterase. See Lipase

Tributyroin. See Tributyroin

Tric. See Trichloroethylene

Tricaprin

CAS 621-71-6; EINECS/ELINCS 210-702-0

Synonyms: Glycerol tricaprate; Glyceryl tricaprylate; Glycerol tridecanoate; 1,2,3-Propanol tridecanoate; Tridecanoin

Definition: Triester of glycerin and caprylic acid

Empirical: C33H62O6

Formula: [CH3(CH2)8COOCH2]2CHOCO(CH2)8CH3

Properties: Cryst.; m.w. 554.86; dens. 0.954 (20/4 C); m.p. 9-10 C; b.p. 233 C (1 mm); ref. index 1.447

Toxicology: LD50 (oral, rat) 33,300 mg/kg, (IP, rat) 50 mg/kg, (IV, mouse) 3700 mg/kg; poison by IP route; mod. toxic by IV route; mildly toxic by ing.; experimental reproductive effects; tumorigen; mutagen; TSCA listed

Hazardous Decomp. Prods.: Heated to decomp., emits acrid smoke and irritating fumes

Uses: Emollient, lubricant, spreading agent, penetrant for pharmaceuticals; carrier, vehicle for vitamins, flavors, medicinals, nutritional prods.

Features: Nonoily

Regulatory: Canada DSL

3,4,4´-Trichlorocarbanilide

CAS 101-20-2; EINECS/ELINCS 202-924-1

Synonyms: N-(4-Chlorophenyl)-N´-(3,4-dichlorophenyl) urea; 1-(3´,4´-Dichlorophenyl)-3-(4´-chlorophenyl) urea; N-(3,4-Dichlorophenyl)-N´-(4-chlorophenyl) urea; TCC; 3,4,4´-Trichlorodiphenylurea; Triclocarbon (INCI); Urea, N-(4-chlorophenyl)-N´-(3,4-dichlorophenyl)-Classification: Substituted carbanilide

Empirical: C\(_{13}\)H\(_9\)Cl\(_3\)N\(_2\)O

Formula: C\(_{6}\)H\(_3\)Cl\(_2\)NHCONHC\(_6\)H\(_4\)Cl

Properties: Wh. powd.; heat-resistant; m.w. 315.59; m.p. 250 °C

Toxicology: LD\(_{50}\) (oral, rat) > 34,600 mg/kg, (IP, mouse) 2100 mg/kg; mod. toxic by IP route; irritating; cancer suspect agent; mutagen; target organs: nerves, heart, liver, kidneys; TSCA listed

Hazardous Decomp. Prods.: Heated to decomp., emits very toxic fumes of Cl– and NO\(_x\)

Uses: Preservative, biocide, bacteriostat, antiseptic in pharmaceuticals; topical antimicrobial; disinfectant

Regulatory: Canada DSL

Manuf./Distrib.: Aldrich http://www.sigma-aldrich.com; Goldlink Industries http://www.goldlinkindustries.com

Trade Names: Nipaguard® TC40; Nipaguard® TCC; Preventol® SB Extra; Preventol® SB Micronized

Trichloroethane (INCI). See 1,1,1-Trichloroethane

1,1,1-Trichloroethane

CAS 71-55-6; EINECS/ELINCS 200-756-3

UN 2831 (DOT)

Synonyms: Chloroethene; Chloroform, methyl-: Chlorothene; Ethane, 1,1,1-trichloro-: MCF; Methylchloroform; Methyltrichloromethane; TCE; 1,1,1-TCE; Trichloroethane (INCI); α-Trichloroethane; Trichloromethylmethane

Classification: Halogenated aliphatic hydrocarbon

Empirical: C\(_2\)H\(_3\)Cl\(_3\)

Formula: CH\(_3\)CCl\(_3\)

†=pharmaceutical grade

Properties: Colorless liq.; char. chloroform-like odor; sol. in alcohol, ether, acetone, benzene, chloroform, methanol, CCl\(_4\); pract. insol. in water; m.w. 133.42; dens. 1.3376 (20/4 °C); vapor pressure 100 mm Hg (20 °C); m.p. -32.5 °C; b.p. 74.1 °C; flash pt. none; autoignition temp. 537 °C; ref. index. 1.43838 (20 °C); surf. tens. 25.56 dynes/cm; KB value 124

Toxicology: ACGIH TLV/TWA 350 ppm; STEL 450 ppm; LD\(_{50}\) (oral, rat) 10,300 mg/kg, (IP, rat) 3593 mg/kg; poison by IV; mod. toxic by ing., inh., skin contact; primary irritant to eyes, tissue, skin, respiratory tract; vapor inh. produces CNS effects; overexposure can cause headache, lassitude, poor equilibrium, eye irritation, dermatitis, cardiac arrhythmias; narcotic in high concs. causing unconsciousness, coma; tumorigen; mutagen; reproductive effects; TSCA listed

Environmental: Ozone-depleting; ThOD 0.48

Precaution: Nonflamm., but vapor may burn in presence of oxidizers or ignition source; LEL 7.5%; UEL 12.5%; incompat. with aluminum/magnesium/potassium and alloys, sodium, NaOH, KOH, nitrogen dioxide, oxygen (gas or liq.)

Hazardous Decomp. Prods.: Hydrogen chloride, hydrochloric acid, phosgene; heated to decomp., emits toxic fumes of Cl–

NFPA: Health 2, Flammability 1, Reactivity 0

Storage: Store in cool, dry, well-ventilated, clearly identified area, out of direct sunlight, away from heat/ignition sources

Uses: Solvent in pharmaceuticals

Use Level: 1500 ppm (pharmaceuticals)

Regulatory: FDA 21CFR §175.105, 177.1650; SARA §311/312 acute health/reactivity hazard, §313 reportable; CERCLA hazardous substance; HAP; covered under Montreal Protocol; Canada DSL

Handbook of Pharmaceutical Additives, Third Edition 2189
1,1,2-Trichloroethane

CAS 79-00-5; EINECS/ELINCS 201-166-9

Synonyms: Ethane trichloride; 1,1,2-TCE; 1,2,2-Trichloroethane; β-Trichloroethane; Vinyl trichloride

Classification: Halogenated aliphatic hydrocarbon

Empirical: C2H3Cl3

Formula: Cl2CHCH2Cl

Properties: Colorless clear volatile liq.; char. sweet but sl. irritating odor; sol. in ethanol, chloroform, diethyl ether, esters, ketones; misc. with oxygenated and chlorinated solvs.; poorly sol. in water; m.w. 133.41; sp.gr. 1.44 (20 C); m.p. -36.5 C; b.p. 113.8 C; surf. tens. 32.5 dynes/cm (20 C)

Toxicology: ACGIH TLV/TWA 10 ppm (skin); LD50 (oral, rat) 880 mg/kg, (skin, rabbit) 3730 mg/kg; very toxic; poison by ing., IV, subcut. routes; mod. toxic by inh., skin contact, IP routes; eye and severe skin irritant; narcotic; may cause liver/kidney injury; suspected carcinogen; experimental reproductive effects; mutagenic data; TSCA listed

Precaution: Nonflamm., but vapor can be ignited by high-energy source; incompat. with strong oxidizers, strong alkalis, chemically active metals, potassium and alloys, sodium amide; fire and explosion risk

Hazardous Decomp. Prods.: Hydrogen chloride, hydrochloric acid; heated to decomp., emits toxic fumes of Cl⁻

NFPA: Health 2, Flammability 1, Reactivity 0

Storage: Store in clearly identified area accessible to authorized personnel only

Uses: Solvent for pharmaceuticals

Regulatory: FDA 21CFR §175.105; HAP; Canada DSL

Manuf./Distrib.: Aldrich http://www.sigma-aldrich.com; Fluka http://www.sigma-aldrich.com; Sigma http://www.sigma-aldrich.com/belgium

α-Trichloroethane. See 1,1,1-Trichloroethane

β-Trichloroethane. See 1,1,2-Trichloroethane

Trichloroethylene; 1,1,2-Trichloroethylene. See Trichloroethene

Trichloroethylene

CAS 79-01-6; EINECS/ELINCS 201-167-4

UN 1710 (DOT)

Synonyms: Acetylene trichloride; 1-Chloro-2,2-dichloroethylene; 1,1-Dichloro-2-chloroethylene; Ethynyl trichloride; Ethylene trichloride; TCE; Tri; Tric; Trichlor; Trichloran; Trichlorethylene; Trichloroethylene; 1,1,2-Trichloroethylene; 1,1,2-Trichloroethylene

Classification: Aliphatic organic compd.

Empirical: C2HCl3

Formula: CHCl:CCl2

Properties: Colorless, photoreactive liq., chloroform odor; misc. with common org. solvs.; sl. sol. in water; m.w. 131.40; dens. 1.456-1.462; vapor pressure 100 mm Hg (32 C); f.p. -86.8 C; m.p. -73 C; b.p. 86.7 C; flash pt. 89.6 F; autoignition temp. 420 C; ref. index 1.45560 (25 C); surf. tens. 28.8 dynes/cm; KB value 130; dielec. const. 3.42

Toxicology: ACGIH TLV/TWA 50 ppm; STEL 200 ppm; LD50 (oral, rat) 4.92 ml/kg, (IV, mouse) 34 mg/kg; poison by IV, subcut. route; mod. toxic by ing. and IP; mildly toxic by inh.; mildly toxic to humans by ing., inh.; human systemic effects; can cause somnolence, GI changes, jaundice, narcosis, anesthesia; eye, severe skin irritant; chronic exposure causes liver damage; suspected carcinogen; experimental tumorigen, teratogen, reproductive effects; human mutagenic data; TSCA listed

Environmental: VOC; ThOD 0.37

Precaution: Very dangerous fire hazard exposed to heat or flame; LEL 8%; UEL 10.5%; high concs. of vapor in high-temp. air can be made to burn mildly under strong flame; reacts with alkali, epoxides; violent reactions possible; can form HCl gas with
Chemical Component Cross-Reference

1,1,2-Trichloroethylene. See Trichloroethylene

Trichlorofluoromethane
CAS 75-69-4; EINECS/ELINCS 200-892-3

†=pharmaceutical grade

Synonyms: CFC 11; F 11; FC 11; Fluorocarbon 11; Fluorotrichloromethane; Freon 11; Freon HE; Halocarbon 11; Methane, trichlorofluoro-;
Monofluorotrichloromethane; Propellant 11; R 11; Trichloromonofluoromethane

Classification: Halogenated aliphatic hydrocarbon

Empirical: CCl₃F

Formula: Cl₃CF

Properties: Colorless clear volatile liq. or gas; nearly odorless @ < 20% conc., faint sweet odor at high concs.; sol. in alcohol, ether; insol. in water; m.w. 137.4; sp.gr. 1.494 (liq., 17.2 C); f.p. -111 C; b.p. 23.7 C; ref. index 1.379; surf. tens. 18 dynes/cm; dielec. const. 2.303; noncombustible

Toxicology: ACGIH TLV/CL 1000 ppm; LD50 (IP, mouse) 1743 mg/kg; TDLo (inh., human, 30 min) 50,000 ppm; poison by inh.; mod. toxic by IP route; human systemic effects; CNS effects @ > 1% conc.; can cause narcosis and anesthesia in humans; severe exposure can cause nausea, vomiting, irregular heartbeat, cardiac arrest, death; TSCA listed

Precaution: Incompat. with reactive metals, e.g., powd. aluminum, sodium, potassium (can react violently), lithium (can detonate)

Hazardous Decomp. Prods.: Heated to decomp., emits highly toxic fumes of F⁻ and Cl⁻

Storage: Store liq. in cool, dry, well-ventilated area

Uses: Aerosol propellant in pharmaceutical inhalants

Regulatory: FDA 21CFR §710.3; FDA approved for inhalants; USP/NF compliance; SARA §313 reportable; CERCLA hazardous substance; Canada DSL

†=pharmaceutical grade

Synonyms: CFC 11; F 11; FC 11; Fluorocarbon 11; Fluorotrichloromethane; Freon 11; Freon HE; Halocarbon 11; Methane, trichlorofluoro-;
Monofluorotrichloromethane; Propellant 11; R 11; Trichloromonofluoromethane

Trideceth
CAS 24938-91-8 (generic)
Synonyms: Ethoxylated tridecyl alcohol; Isotridecanol ethoxylates
Definition: PEG ether of tridecyl alcohol; commercial prods. contain 3-20 moles EO
Formula: \((\text{C}_2\text{H}_4\text{O})_x\text{C}_{13}\text{H}_{28}\text{O}, x = 3-20\)
Properties: Liq. to paste; HLB 8-16.3 (3-20 moles EO); nonionic; HLB 8.0-16.3
Toxicology: TDLo (oral, rat, 13 wk continuous) 45 g/kg; primary irritant; TSCA listed
Uses: Emulsifier, wetting agent for pharmaceuticals

Trideceth-10
CAS 24938-91-8 (generic); 78330-21-9 (generic)
Synonyms: PEG-10 tridecyl ether; PEG 500 tridecyl ether; POE (10) tridecyl ether
Definition: PEG ether of tridecyl alcohol
Empirical: \(\text{C}_{33}\text{H}_{68}\text{O}_x\)
Formula: \(\text{CH}_3(\text{CH}_2)_{11}\text{CH}_2(\text{OCH}_2\text{CH}_2)_{n}\text{OH}, \text{avg. } n = 10\)
Properties: Nonionic
Toxicology: TSCA listed
Uses: Emulsifier, detergent, wetting agent, foaming agent, solubilizer for pharmaceuticals, topicals
Regulatory: FDA 21CFR §175.105, 176.200, 176.210; FDA approved for topicals
Manuf./Distrib.: Sigma http://www.sigma-aldrich.com/belgium
Trade Names: Volpo T10

Trideceth-15
CAS 24938-91-8 (generic); 78330-21-9 (generic)
Synonyms: PEG-15 tridecyl ether; POE (15) tridecyl ether
Definition: PEG ether of tridecyl alcohol
Empirical: \(\text{C}_{43}\text{H}_{87}\text{O}_x\)
Formula: \(\text{CH}_3(\text{CH}_2)_{11}\text{CH}_2(\text{OCH}_2\text{CH}_2)_{n}\text{OH}, \text{avg. } n = 15\)
Properties: Nonionic
Toxicology: TSCA listed
Uses: Emulsifier
Regulatory: FDA 21CFR §175.105, 176.200, 176.210
Manuf./Distrib.: Sigma http://www.sigma-aldrich.com/belgium
Trade Names: Volpo T15

Trideceth-100
CAS 24938-91-8 (generic)
Synonyms: PEG-100 tridecyl ether; POE (100)
**tridecyl ether**  
*Definition:* PEG ether of tridecyl alcohol  
*Empirical:* $C_{213}H_{427}O_{101}$  
*Formula:* $\text{CH}_3(\text{CH}_2)_{11}\text{CH}_2(\text{OCH}_2\text{CH}_2)_n\text{OH}$, avg. $n = 100$  
*Properties:* Nonionic  
*Toxicology:* TSCA listed  
*Uses:* Emulsifier, wetting agent for pharmaceuticals  
*Regulatory:* FDA 21CFR §176.200  
*Manuf./Distrib.:* Sigma [http://www.sigma-aldrich.com/belgium](http://www.sigma-aldrich.com/belgium)

Trideceth-7 carboxylic acid  
*CAS:* 56388-96-6 (generic); 68412-55-5 (generic)  
*Synonyms:* PEG-7 tridecyl ether carboxylic acid; POE (7) tridecyl ether carboxylic acid  
*Classification:* Organic acid  
*Empirical:* $C_{27}H_{54}O_9$  
*Formula:* $\text{CH}_3(\text{CH}_2)_{11}\text{CH}_2(\text{OCH}_2\text{CH}_2)_n\text{OCH}_2\text{COOH}$, avg. $n = 6$  
*Toxicology:* TSCA listed  
*Uses:* Detergent, wetting agent for medicated soaps  
*Regulatory:* Canada DSL  
*Manuf./Distrib.:* Sigma [http://www.sigma-aldrich.com/belgium](http://www.sigma-aldrich.com/belgium)  
*Trade Names:* Sandopan® DTC-Acid

Tridecyl neopentanoate  
*CAS:* 106436-39-9  
*Synonyms:* Neopentanoic acid, tridecyl ester  
*Definition:* Ester of tridecyl alcohol and neopentanoic acid  
*Empirical:* $C_{18}H_{36}O_2$  
*Formula:* $(\text{CH}_3)_3\text{CCOO}(\text{CH}_2)_{11}\text{CH}_3$  
*Properties:* Colorless liq.; m.w. 466.83; nonionic  
*Toxicology:* LD50 (oral, rat) > 5 g/kg; minimal eye irritation; mild skin irritation  
*Uses:* Binder, emollient, lubricant, gloss aid, spreading agent for pharmaceuticals, topicals; SPF booster for sunscreens  
*Trade Names:* Ceraphyl® 55; Crodamol TDNP

Tridecyl stearate  
*CAS:* 31556-45-3; EINECS/ELINCS 250-696-7  
*Synonyms:* Octadecanoic acid, tridecyl ester; TDS; Tridecanol stearate  
*Definition:* Ester of tridecyl alcohol and stearic acid  
*Empirical:* $C_{31}H_{62}O_2$  
*Formula:* $\text{CH}_3(\text{CH}_2)_{16}\text{COOCH}_2(\text{CH}_2)_{11}\text{CH}_3$  
*Properties:* Colorless liq.; m.w. 466.83; nonionic  
*Toxicology:* LD50 (oral, rat) > 5 g/kg; minimal eye irritation; mild skin irritation  
*Uses:* Emulsifier, buffer, solubilizer for pharmaceuticals, rectals, topicals, vaginals  
*Use Level:* 2.5% max. in non-rinse-off finished cosmetics  
*Regulatory:* FDA 21CFR §173.315, 175.105, 175.300, 175.380, 175.390, 176.170, 176.180, 176.390, 176.400; TSCA listed

*Chemical Component Cross-Reference*  
†=pharmaceutical grade  
*Properties:* Colorless liq.; m.w. 466.83; nonionic  
*Toxicology:* TSCA listed  
*Uses:* Emollient for pharmaceuticals, creams and lotions  
*Regulatory:* Canada DSL  
*Manuf./Distrib.:* St. Lawrence [http://www.stlawrencechem.com](http://www.stlawrencechem.com)

Tridocosanoin. See Tribehenin  
Trien; Trientine. See Triethylenetetramine

Triethanolamine  
*CAS:* 102-71-6; EINECS/ELINCS 203-049-8  
*Synonyms:* 2,2´,2´´-Nitroliotriethanol; 2,2´,2´´-Nitroliotris (ethanol); TEA; TELA; Triethylolamine; Tri (2-hydroxyethyl)amine; Trihydroxytriethylamine; Tris (2-hydroxyethyl) amine; Trolamine  
*Classification:* Aliphatic amino alcohol; alkanolamine  
*Empirical:* $C_6H_{15}NO_3$  
*Formula:* $N(\text{CH}_2\text{CH}_2\text{OH})_3$  
*Properties:* Colorless to pale yel. visc. liq., sl. ammoniaca odor; sol. in water, alcohol, acetone, chloroform; sl. sol. in benzene, ether; m.w. 149.19; dens. 1.126; m.p. 21.2 °C; b.p. 335 °C (dec.); flash pt. 179 °C; ref. index 1.4835; pH 10.5 (0.1N aq.); surf. tens. 45.24 dynes/cm  
*Toxicology:* ACGIH TLV/TWA 5 mg/m³; LD50 (oral, rat) 8 g/kg; mod. toxic by IP; mildly toxic by ing. (irritation of mouth, abdominal pain, vomiting, diarrhea); human skin irritant; eye irritant; skin sensitizer; TSCA listed  
*Environmental:* VOC; BOD5 0.84; COD 1.53; ThOD 1.61  
*Precaution:* Combustible when exposed to heat or flame; LEL 1.2%; incompat. with oxidizers, strong acids; can react vigorously with oxidizing materials; increased risk of fire or explosion  
*Hazardous Decomp. Prods.:* Heated to decomp., emits toxic fumes of NOx and CN⁻  
*NFPA:* Health 2, Flammability 1, Reactivity 1  
*Storage:* Very hygroscopic; light-sensitive; store in cool, dry, well-ventilated area away from heat/ignition sources  
*Uses:* Alkalizer, buffer, emulsifier, solubilizer for pharmaceuticals, rectals, topicals, vaginals  
*Use Level:* 2.5% max. in non-rinse-off finished cosmetics  
*Regulatory:* FDA 21CFR §173.315, 175.105, 175.300, 175.380, 175.390, 176.170, 176.180, 176.390, 176.400; TSCA listed

### Synonyms
- Ethyl citrate; 2-Hydroxy-1,2,3-propanetricarboxylic acid, triethyl ester; TEC; Triethyl-2-hydroxypropan-1,2,3-tricarboxylate

### Definition
Triester of ethyl alcohol and citric acid

### Empirical
- \( C_{12}H_{20}O_7 \)

### Formula
- \( C_3H_5O(COOC_2H_5)_3 \)

### Properties
- Colorless mobile oily liq., odorless, bitter taste; sol. 65 g/100 cc water; sol. 0.8 g/100 cc oil; sol. in oxygenated solvs.; misc. with alcohol, ether; m.w. 276.32; dens. 1.136 (25 C); vapor pressure 1 mm Hg (107 C); b.p. 294 C; flash pt. (COC) 303 F; ref. index 1.4420

### Toxicology
- LD50 (oral, rat) 5900 mg/kg, (IP, mouse) 1750 mg/kg, (subcut., rat) 6600 mg/kg; LC50 (inh., rat, 6 h) 1300 ppm; mod. toxic by IP route; mildly toxic by ing., inh.; irritating to skin, eyes, respiratory system; risk of serious damage to eyes; may cause skin sensitization; may cause sensitization by inh.; TSCA listed

### Precaution
- Combustible exposed to heat or flame; wear protective clothing; incompat. with strong oxidizers, reducers

### Hazardous Decomp. Prods.
- Heated to decomp., emits acrid smoke and irritating fumes

### Storage
- Store at 40-70 F in tightly sealed original containers with minimum head space;
Chemical Component Cross-Reference

**Trade Names:** Citrofol® AI; TEC, NF

**Triethylene glycol**

CAS **112-27-6**; EINECS/ELINCS **203-953-2**

**Synonyms:** 1,2-Bis (2-hydroxyethoxy) ethane; Di-β-hydroxyethoxyethane; 3,6-Dioxoactone-1,8-diol; 2,2’-[1,2-Ethanediylbis (oxy)] bisethanol; 2,2’-Ethylendioxydiethanol; 2,2’-Ethylendioxyethanol; Ethylene glycol bis (2-hydroxyethyl ether); Ethylene glycol dihydroxydiethyl ether; Glycol bis (hydroxyethyl) ether; TEG; Triglycerol

**Classification:** Aliphatic alcohol; glycol ether

**Uses:** Flavor, plasticizer for pharmaceuticals, orals; deodorant active

**Features:** Sweet plum-like flavor

**Regulatory:** FDA 21CFR §175.300, 175.320, 181.22, 181.27, 184.1911, GRAS; FEMA GRAS; FDA approved for orals; USP/NF, BP, EP compliance; Australia AICS; Canada DSL; Japan MITI

**Empirical:** C₆H₁₄O₄

**Formula:** HOCH₂CH₂OCH₂CH₂OCH₂CH₂OH

**Properties:** Colorless clear liq., odorless; sol. in water, ethanol, toluene, benzene, oxygenated solvs.; sparingly sol. in diethyl ether; immisc. with gasoline; m.w. 150.17; sp.gr. 1.12 (20 C); visc. 49 cP; vapor pressure 1 mm Hg (114 C); f.p. -7.2 C; b.p. 278 C; flash pt. (PMCC) 166 C; autoignition temp. 371 C; ref. index 1.4550; surf. tens. 45.2 dynes/cm

**Exposure:** avoid prolonged exposure to light, heat, cold, air

**Toxicology:** LD₅₀ (oral, rat) 17 g/kg, (IV, rat) 11,700 µg/kg, (IP, mouse) 8141 mg/kg; poison by IV route; mildly toxic by ing.; skin and eye irritant; experimental reproductive effects; TSCA listed

**Environmental:** VOC; BOD₅ 0.03; COD 1.57; ThOD 1.60

**Precaution:** Combustible exposed to heat or flame; LEL 0.9%;UEL 9.2%; reactive with oxidizing materials; explosive as vapor exposed to heat, flame

**Hazardous Decomp. Prods.:** CO, CO₂; heated to decom., emits acrid smoke and irritating fumes

**NFPA:** Health 1, Flammability 1, Reactivity 0

**Storage:** Hygroscopic

**Uses:** Solvent for pharmaceuticals

**Regulatory:** FDA 21CFR §175.105, 175.300, 177.1200, 178.3740, 178.3910, 179.45; Canada DSL

Triethylene glycol dimethyl ether. See PEG-3
dimethyl ether
Triethylene glycol dodecyl ether. See
Laureth-3
Triethylenetetramine
CAS 112-24-3; EINECS/ELINCS 203-950-6
UN 2259 (DOT)
Synonyms: N,N´-Bis (2-aminoethyl)-1,2-
diaminoethane; N,N´-Bis (2-aminoethyl)-1,2-
ethanediamine; N,N´-Bis (2-aminoethyl)
ethylenediamine; N,N´-Bis (2-aminoethyl)-
1,2-ethylenediamine; 3,6-Diazaoctane-1,8-
diamine; TET; TETA; 1,4,7,10-
Tetraazadecane; Trien; Trientine
Classification: Aliphatic polyamine
Empirical: C6H18N4
Formula: NH2(C2H4NH)2C2H4NH2
Properties: Ylsh. mod. visc. oily liq.; weak
ammoniacal odor; sol. in water, alcohol,
acetone, benzene, ethyl ether; misc. with
oxygenated and aromatic solvs.; sl. sol. in
heptane; immisc. with aliphatic solvs.; m.w.
146.23; dens. 0.9818 (20/20 C); m.p. 12 C;
b.p. 277.5 C; pour pt. < -40 C; flash pt. (CC)
146.23; dens. 0.9818 (20/20 C); m.p. 12 C;
b.p. 277.5 C; pour pt. < -40 C; flash pt. (CC)
275 F; ref. index 1.4971 (20 C); pH 14
Toxicology: LD50 (oral, rat) 2.5 g/kg, (IV,
mouse) 350 mg/kg, (dermal, rabbit) 805
mg/kg; poison by IV route; mod. toxic by
ing. and skin contact; strong irritant to
tissue, mucous membranes; skin burns,
eye damage; causes skin sensitization;
experimental teratogen, reproductive
effector; mutagenic data; TWA: OSHA 3.00
ppm, ACGIH 0.46 ppm; TSCA listed
Precaution: DOT: Corrosive material;
combustible exposed to heat or flame; can
react with oxidizers; ignites on contact with
cellulose nitrate (high surf. area); may
absorb CO2 from air to form carbamate
salts
Hazardous Decomp. Prods.: CO, CO2,
hydrogen cyanide, ammonia, volatile
amines, irritating aldehydes and ketones;
heated to decomp., emits toxic fumes of
NOx

NFPA: Health 3, Flammability 1, Reactivity 0
Storage: Hygroscopic
Uses: Synthesis of pharmaceuticals;
biomaterial in topicals, slow-release and
microencapsulation prods.; treatment of
Wilson’s disease
Regulatory: FDA 21CFR §176.170, 177.2600;
Canada DSL

Tri (ethylhexyl) trimellitate. See Tri-2-
ethylhexyl trimellitate
Tri-2-ethylhexyl trimellitate
CAS 3319-31-1; EINECS/ELINCS 222-020-0
Synonyms: 1,2,4-Benzenebicarboxylic acid,
tris (2-ethylhexyl) ester; 2-Ethylhexyl
trimellitate; TEHTM; Tri (ethylhexyl)
trimellitate; Tri (2-ethylhexyl) trimellitate
ester; Trimellitate tris (2-ethylhexyl) ester;
Tris (2-ethylhexyl) benzene-1,2,4-
tricarboxylate; Tris (2-ethylhexyl) ester
1,2,4-benzencarboxylic acid; Tris (2-
ethylhexyl) trimellitate
Classification: Aromatic ester
Empirical: C33H54O6
Formula: C6H3(COOC8H17)3
Properties: Colorless to yel. clear oily liq.; mild
odor; sol. in acetone; sol. 10-50 mg/ml in
DMSO, 95% ethanol; insol. in water; m.w.
546.87; dens. 0.989 kg/l (20 C); f.p. gel @ -35
C; b.p. 415 C; flash pt. (CC) 235 F; ref. index
1.4850
Toxicology: LD50 (oral, mouse) > 60 g/kg; very
low toxicity by ing.; TSCA listed
Precaution: Combustible
Chemical Component Cross-Reference

Hazardous Decomp. Prods.: Heated to decomp., emits acrid smoke and irritating vapors

Storage: Store under freeze conditions; store away from sources of ignition

Uses: Plasticizer in medical devices

Regulatory: Canada DSL

Trade Names: Velsicol 6959

Tri (2-ethylhexyl) trimellitate ester. See Tri-2-ethylhexyl trimellitate

Triethyl-2-hydroxypropan-1,2,3-tricarboxylate. See Triethyl citrate

Triethanolamine. See Triethanolamine

Triethyl phosphonoacetate
CAS 867-13-0; EINECS/ELINCS 212-757-6

Synonyms: Acetic acid, diethylphosphono-, ethyl ester; Carbethoxymethyl diethyl phosphonate; Diethyl ethoxycarbonylmethylphosphonate; Ethyl (diethoxyphosphoryl) acetate; Triethyl carboxymethyl phosphonate; Triethyl phosphono acetate

Classification: Nonaromatic phosphorus compd.

Empirical: C9H17O5P

Properties: M.w. 224.22; dens. 1.130; b.p. 142-145 C (9 mm); ref. index 1.4310

Toxicology: LD50 (oral, rat) > 500 mg/kg; LCLo (inh., mouse, 10 min) 1180 mg/m3; mod. toxic by inh.; irritant; TSCA listed

Hazardous Decomp. Prods.: Toxic fumes of POx

Uses: Pharmaceuticals intermediate

Regulatory: FDA 21CFR §178.2010; Canada DSL

Triethyl phosphonoacetate. See Triethyl phosphonoacetate

Triethyl phosphonoformate
CAS 1474-78-8; EINECS/ELINCS 216-016-8

Classification: Nonaromatic phosphorus compd.

Empirical: C7H15O5P

Properties: M.w. 210.17; dens. 1.110; b.p. 135 C (0.1 mm); ref. index 1.4230

Toxicology: TSCA listed

Uses: Pharmaceutical intermediate

Triflic acid. See Trifluoromethane sulfonic acid

Trifluorochloromethane. See Chlorotrifluoromethane

Trifluoroethanol. See 2,2,2-Trifluoroethanol

2,2,2-Trifluoroethanol
CAS 75-89-8; EINECS/ELINCS 200-913-6

Synonyms: TFE; TFEA; Trifluoroethanol; Trifluoroethyl alcohol

Empirical: C2H3F3O

Formula: CF3CH2OH

Properties: Colorless liq.; alcoholic odor; misc. with water; m.w. 100.04; dens. 1.390 (20 C); m.p. -45 C; b.p. 72-74 C; ref. index < 1.3000

Toxicology: LD50 (oral, rat) 240 mg/kg, (IP, rat) 210 mg/kg, (IV, mouse) 250 mg/kg, (skin, rat) 1680 mg/kg; LC50 (inh., mouse) 2900 mg/m3; poison by ing., IV, IP routes; mod. toxic by inh., skin contact; severe skin and eye irritant; irritating to respiratory system; experimental reproductive effects; TSCA listed

Precaution: Flamm.

Hazardous Decomp. Prods.: Heated to decomp., emits toxic fumes of F–

Uses: Intermediate for pharmaceuticals; used

### Properties

- **Empirical:** CHF₃
- **Formula:** CHF₃
- **Properties:** Colorless to amber clear liquid; sol. in water, alcohol, dimethylformamide, acetonitrile, dimethyl sulfoxide; m.w. 70.02; sp.gr. 0.8781; dens. 1.152 (lq., -100 C); m.p. -160 C; b.p. -84 C; sol. in water; m.w. 70.02; sp.gr. 0.8781; dens. 1.708 (20/4 C); m.p. 40 C; b.p. 167-180 C; flash pt.

### Toxicology

- **Mild respiratory irritant; avoid inhalation; narcotic in high conc.; target organ: heart; mutagen; TSCA listed**

### Environmental

- **ThOD 0.23**
- **Replacement for CFC but characterized as global warming gas by the Kyoto Conference on Climate Change**

### Hazardous Decomp. Prods.

- **Heated to decompts., emits toxic fumes of F⁻ and SOₓ**

### Storage

- Store away from heat

### Uses

- Low-temp. refrigerant

### Regulatory

- FDA 21CFR §173.395; Canada DSL

### Manuf./Distrib.

### 1,3,5-Trihydroxybenzene

**CAS**: 108-73-6; 6099-90-7 (dihydrate); EINECS/ELINCS 203-611-2

**Synonyms**: Benzene-1,3,5-triol; 1,3,5-Benzenetriol; Benzene-s-triol; 3,5-Dihydroxyphenol; 5-Hydroxyresorcinol; 5-Oxyresorcinol; Phloroglucin; Phloroglucine; Phlorogluculin; s-Trihydroxybenzene; 1,3,5-Trihydroxycyclohexatriene

**Classification**: Aromatic organic compd.

**Empirical**: C₆H₆O₃

**Formula**: C₆H₃(OH)₃ • 2HOH (dihydrate)

**Properties**: Wh. to ylsh. cryst., odorless, sweet taste; sol. in alcohol, ether, oxygenated solvs.; sl. sol. in water; m.w. 126.12 (anhyd.), 162.14 (dihydrate); m.p. 218-221°C (anhyd.), sublimes with dec.

**Toxicology**: LD₅₀ (oral, rat) 5200 mg/kg, (IP, rat) 3180 mg/kg, (subcut., rat) 4850 mg/kg; mod. toxic by subcut., IP routes; mildly toxic by ing.; ing. may cause severe GI irritation, kidney/liver damage, circulatory collapse, and death; experimental reproductive effects; mutagenic data; TSCA listed

**Hazardous Decomp. Prods.**: Heated to decomp., emits acrid smoke and irritating fumes

**HMIS**: Health 1, Flammability 0, Reactivity 0

**Storage**: Light-sensitive

**Uses**: Antioxidant for pharmaceuticals

**Regulatory**: Canada DSL

**Trade Names**: Thixcin® R

### Uses

- Binder, lubricant for pharmaceuticals
- Emollient, solvent, visc. control agent for pharmaceuticals, topicals

**Regulatory**: FDA approved for topicals; Canada DSL

**Trade Names**: See Thixcin® R

---

### 1,2,6-Trihydroxyhexane

**CAS**: 139-44-6; EINECS/ELINCS 205-364-6

**Synonyms**: Glycerol tri (12-hydroxystearate); Glycerol tris-12-hydroxystearate; 12-Hydroxyoctadecanoic acid, 1,2,3-Propanetriyl ester; 1,2,3-Propanetriol tri (12-hydroxystearate); 1,2,3-Propanetriol tri (12-hydroxyoctadecanoate)

**Definition**: Triester of glycerin and hydroxystearic acid

**Empirical**: C₅₇H₁₁₀O₉

**Properties**: Ylsh. to milky wh. hard brittle wax-like solid; insol. in water; m.w. 939.50; dens. 0.899 (100/25°C); m.p. 86-88°C

**Uses**: Binder, lubricant for pharmaceutical tablets; emollient, solvent, visc. control agent for pharmaceuticals, topicals

**Regulatory**: FDA approved for topicals; Canada DSL

**Trade Names**: Thixcin® R
Chemical Component Cross-Reference
Trihydroxytriethylenamine; 2,2’,2”- Trihydroxytriethylenamine. See Triethanolamine
Triisooctadecyl trimerate. See Triisostearyl trilinoleate
Triiron tetraoxide. See Iron oxide black
Triisooctadecyl 2-hydroxypropane-1,2,3-tricarboxylate. See Triisostearyl citrate

Triisopropanolamine
CAS 122-20-3; EINECS/ELINCS 204-528-4
Synonyms: 1,1’,1’’-Nitrilotri-2-propanol; 1,1’,1’’-Nitrilotris-2-propanol; TIPA; Tri-2-propanolamine; Tris (2-hydroxypropyl) amine
Classification: Aliphatic amine; amino alcohol
Empirical: C9H21NO3
Formula: N(CH2CHOHCH3)3
Properties: Wh. cryst. solid; ammoniacal odor; very sol. in water; sol. in ethanol, oxygenated and aromatic solvs.; m.w. 191.27; dens. 0.9996 (50/20 C); vapor pressure < 0.01 mm Hg (20 C); m.p. 45 C; b.p. 305 C; flash pt. (OC) 160 C
Toxicology: LD50 (oral, rat) 6500 mg/kg; LDLo (skin, rabbit) 10 g/kg; mildly toxic by skin contact; skin and severe eye irritant; TSCA listed
Precaution: Combustible; hydrolyzes slowly in water; minimize exposure to air
Hazardous Decomp. Prods.: Heated to decom., emits toxic fumes of POx
Storage: Moisture-sensitive
Uses: Intermediate for pharmaceuticals

Triisostearin
CAS 26942-95-0; EINECS/ELINCS 248-122-5
Synonyms: Glyceryl triisostearate; 1,2,3-Propanetriyl triisooctadecanoate; 1,2,3-Propenetriol triisooctadecanoate
Definition: Triester of glycerin and isostearic acid
Empirical: C57H110O6
Properties: TSCA listed
Uses: Emollient in dermatological preps.
Trade Names: Saboderm GS

Triisostearin PEG-6 esters
Definition: Mixt. formed from the transesterification of triisostearin and PEG-6
Uses: Emollient, excipient, solvent for pharmaceuticals; amphiphilic agent improving drug delivery
Trade Names: Labrafil® Isostearique

Triisostearyl citrate
CAS 113431-54-2
Synonyms: Citric acid, triisostearyl ester; TISC; Triisooctadecyl 2-hydroxypropane-1,2,3-tricarboxylate
Definition: Triester of isostearyl alcohol and citric acid
Empirical: C60H116O7
Uses: Emollient, gloss aid in pharmaceuticals, topicals; emollient, pigment wetting agent/dispersant in skin care
Trade Names: Schercemol TISC

†=pharmaceutical grade
Classification: Nonaromatic phosphorus compd.
Empirical: C9H21O3P
Formula: [(CH3)2CH]3PO3
Properties: Colorless liq.; char. odor; misc. with most common org. solvs.; insol. in water; m.w. 208.27; dens. 0.914 (20/4 C); b.p. 94-96 C (50 mm); flash pt. (COC) 73.9 C; ref. index 1.4110
Toxicology: LD50 (oral, rat) 167 mg/kg, (IP, mouse) 500 mg/kg, (skin, rabbit) > 2 g/kg; poison by ing.; mod. toxic by IP route; irritant; mutagenic data; TSCA listed
Precaution: Combustible; hydrolyzes slowly in water; minimize exposure to air
Hazardous Decomp. Prods.: Heated to decom., emits toxic fumes of POx
Storage: Moisture-sensitive
Uses: Emollient in dermatological preps.
Trade Names: Saboderm GS
Triisostearoyl trilinoleate

CAS 103213-22-5

Synonyms: Triosoctadecyl trimerate; Triisostearyl trimerate; Trimer acid, octadecyl triester

Definition: Triester of isostearyl alcohol and trilinoleic acid

Empirical: C_{108}H_{204}O_{6}

Uses: Emollient, visc. control agent, gloss aid, moisturizer, visc. builder, binder in pharmaceuticals, topicals

Regulatory: Canada DSL

Trade Names: Schercemol TIST

Triisostearyl trimerate. See Triisostearoyl trilinoleate

Trilactin

CAS 537-32-6; EINECS/ELINCS 208-664-5

Synonyms: Glyceryl trilactate; Lactic acid, 1,2,3-propanetriyl ester; 1,2,3-Propanetriol trilactate

Definition: Triester of glycerin and lactic acid

Empirical: C_{12}H_{20}O_{9}

Formula: CH(CH_{2}OCOCH(OH)CH_{3})_{2}OCOCHOHCH_{3}

Uses: Humectant, emollient in pharmaceutical topicals

Trade Names: Pelemol® GTL

Trilaneth-4 phosphate

Synonyms: PEG-4 lanolin ether triphosphate

Definition: Predominantly the triester of phosphoric acid and ethoxylated lanolin alcohols with avg. ethoxylation level of 4

Uses: Visc. control agent in pharmaceuticals, topicals

Regulatory: FDA approved for topicals

Manuf./Distrib.: Somerset Cosmetic Co. http://www.makingcosmetics.com/

Trade Names Containing: Sedefos 75®

Trilaureth-4 phosphate

CAS 31800-90-5

Definition: Triester of laurieath-4 and phosphoric acid

Empirical: C_{60}H_{123}O_{16}P

Properties: Anionic

Uses: O/w emulsifier in pharmaceuticals, topicals

Regulatory: FDA approved for topicals

Manuf./Distrib.: Somerset Cosmetic Co. http://www.makingcosmetics.com/

Trade Names Containing: Pionier® 5300

Trilaurin

CAS 538-24-9; EINECS/ELINCS 208-687-0

†=pharmaceutical grade

Synonyms: Dodecanic acid, 1,2,3-propanetriyl ester; Glycerol trilaurate; Glyceryl tridodecanoate; Glyceryl trilaurate; Lauric acid triglyceride; 1,2,3-Propanetriol tridodecanoate

Definition: Triester of glycerin and lauric acid

Empirical: C_{39}H_{74}O_{6}

Properties: Wh. solid, sl. bay odor; sol. in ether, chloroform, petrol. ether; m.w. 639.01; m.p. 45-47 C

Toxicology: Mild irritant; TSCA listed

Uses: Emollient, solvent, visc. control agent, consistency agent, foaming agent for pharmaceuticals; tablet lubricant, binder, retarding agent

Regulatory: FDA 21CFR §177.2800

Trade Names: Dynasan® 112

Trilithium citrate. See Lithium citrate

Trimellitate tris (2-ethylhexyl) ester. See Tri-2-ethylhexyl trimellitate

Trimer acid, octadecyl triester. See Triisostearyl trilinoleate

Trimetaphosphate sodium. See Sodium trimetaphosphate

Trimethoxyphosphine. See Trimethyl phosphite

Trimethylacetyl chloride. See Pivaloyl chloride

Trimethylamine

CAS 75-50-3

UN 1083 (DOT); UN 1297 (DOT); FEMA 3241

Synonyms: N,N-Dimethylmethanamine; TMA; Trimethylamine, anhydrous; Trimethylamine, aqueous sol'n.

Empirical: C_{3}H_{9}N

Formula: (CH_{3})_{3}N

Properties: Colorless gas @ R.T.; readily liquefied; fishy oily rancid sweaty odor; saline taste; sol. in water, alcohol, ether, benzene, toluene, xylene, chloroform, chlorinated and aromatic solvs.; misc. with oxygenated solvs.; m.w. 59.11; dens. 0.932; m.p. -117 C; b.p. 2.9 C; flash pt. 38 F; ref. index 1.3443

Toxicology: ACGIH TLV/TWA 10 ppm; STEL 15 ppm; LD50 (IV, mouse) 90 mg/kg; LDLo (subcut., mouse) 1000 mg/kg; LC50 (inh., mammal) 19 g/m³; poison by IV route; mod. toxic by subcut. route; mildly toxic by inh.; corrosive; highly irritating vapor; TSCA
Chemical Component Cross-Reference

| Hazardous Decomp. Prods.: | Heated to decomp., emits toxic fumes of NOx |

### Trimethylodecatrienole

**CAS**: 142-50-7 (cis); 7212-44-4 (isomers); EINECS/ELINCS 205-540-2 (cis); 230-597-5 (isomers)

**FEMA**: 2772

**Synonyms**: Nerolidol; Peruviol; 3,7,11-Trimethyl-1,6,10-dodecatrien-3-ol; (3S,6Z)-3,7,11-Trimethyl-1,6,10-dodecatrien-3-ol

**Definition**: Found in essential oils from many flowers; mixed isomer prod.

**Empirical**: C₁₅H₂₆O

**Formula**:

$$(CH₃)₂C:CH(CH₂)₂C(CH₃):CH(CH₂)₂(CH₃) \cdot (OH)CH₂CH₂$$

**Properties**: Colorless to straw-colored liq.; odor similar to rose and apple; sol. in alcohol, most fixed oils; insol. in water, glycerol; m.w. 222.36; dens. 0.88 kg/l (20 C); b.p. 145 C (1.6 kPa); cis-; Liq.; dens. 0.876 (20/4 C); b.p. 70 C (0.1 mm); flash pt. 96 C; ref. index 1.4775; trans-; Liq.; b.p. 78 C (0.15 mm); ref. index 1.4792

**Precaution**: Combustible

**Uses**: Synthetic flavor and fragrance for pharmaceuticals

**Features**: Citrus, apple-like flavor

Empirical: C₄₅H₈₆O₆

Properties: Wh. to ylsh.-gray solid; insol. in water; sol. in alcohol, benzene, chloroform, ether; m.w. 723.14; dens. 0.885 (60/4 C); m.p. 56-57 C; ref. index 1.4429 (60 C)

Toxicology: TSCA listed

Uses: Emollient, solvent, visc. control agent, consistency agent for pharmaceuticals; binder, lubricant, mold release agent, retarding agent for tablets

Regulatory: FDA 21CFR §177.2800

Manufacturers/Distributors:
- Fluka

- Mosselman NV
  http://http://www.mosselman.be; Sigma
  http://www.sigma-aldrich.com/belgium

Trade Names: Dynasan® 114

1,2,3-Tri (cis-9-octadecenoyl) glycerol. See Triolein

Trioctanoin

CAS 7360-38-5; EINECS/ELINCS 230-896-0

Synonyms: Glycerol trioctanoate; Glyceryl tri (2-ethylhexanoate); Glycerol trioctanoate; Octanoic acid, 1,2,3-propanetriol ester; Octanoic acid, 1,2,3-propanetriyl ester; Octanoic acid triglyceride; 1,2,3-Propanetriol trioctanoate; Trioctanoylglycerol; 1,2,3-Trioctanoylglycerol

Definition: Triester of glycerin and 2-ethylhexanoic acid

Empirical: C₂₇H₅₀O₆

Formula: (CH₂OCOCHCH₂CH₃(CH₂)₃CH₃)₂HCOCOCHCH₂CH₃(CH₂)₃CH₃

Properties: M.w. 470.70

Toxicology: TSCA listed

Uses: Antistat, emollient, solvent, lubricant for pharmaceuticals; carrier for flavors; vehicle for vitamins, medicinals, nutritional prods.

Manufacturers/Distributors:
- A&E Connock
  http://www.connock.co.uk

Trade Names:
- Schercemol GTO

Trioctanoylglycerol; 1,2,3-Trioctanoylglycerol. See Trioctanoin

Trioctyldodecyl citrate

CAS 126121-35-5; 125594-44-7

Synonyms: Citric acid, tris (2-octyldodecyl) ester; 2-Hydroxy-1,2,3-propanetricarboxylic acid, tris (2-octyldodecyl) ester; Propanetricarboxylic acid, 2-hydroxy-, tris (2-octyldodecyl) ester; Tri-2-octyldodecyl citrate

Definition: Triester of octyldodecanol and citric acid

Empirical: C₆₆H₁₂₈O₇

Formula: HOC(CH₂COOR)COOR, where R rep. octyldodecyl radical

Properties: Nonionic

Uses: Emollient, film-former for pharmaceuticals, topicals

Trade Names: Pelemol® TGC

Tri-2-octyldodecyl citrate. See Trioctyldodecyl citrate

Trioctyldodecyl citrate dilinoleate

CAS 220716-32-5

Synonyms: Bis trioctyldodecyl dilinoleate citrate

Uses: Used in pharmaceutical topicals

Trade Names: Pelemol® C-150
Triolein
CAS 122-32-7; 67701-30-8; EINECS/ELINCS 204-534-7; 266-948-4

Synonyms: 2,3-Bis [(9E)-9-octadecenoyloxy] propyl (9E)-9-octadecenoate; Glycerol trioleate; Glycerlyl trioleate; 9-Octadecenoic acid, 1,2,3-propanetriyl ester; 9-Octadecenoic acid (Z)-, 1,2,3-propanetriyl ester; Olein; 1,2,3-Propanetriyl tri-(E)-9-octadecenoate; 1,2,3-Tri (cis-9-octadecenoyl) glycerol; Triolein glyceryl trioleate; Trioleoylglycerol

Classification: Triglyceride

Definition: A naturally occurring glyceride of oleic acid found in fats and oils

Empirical: C57H104O6

Formula: (CH2O)2CHO[CO(CH2)7CH=CH(CH2)7CH3]3

Properties: Colorless to ylsh. oily liq., tasteless, odorless; sol. in chloroform, ether, CCl4, chlorinated solvs.; sl. sol. in alcohol; pract. insol. in water; m.w. 885.43; dens. 0.915 (15/4 C); m.p. -4 to -5 C; b.p. 235-240 C (15 mm); HLB 0.8; sapon. no. 188-195; cloud pt. -10 C; flash pt. 330 C; ref. index 1.4676 (20 C); nonionic

Toxicology: May cause eye/skin/mucous membrane/upper respiratory tract irritation; may be harmful by ing., inh., skin absorp.; TSCA listed

Precaution: Combustible; incompat. with strong oxidizing agents

Hazardous Decomp. Prods.: CO, CO2; emits toxic fumes under fire conditions

Storage: Store @ 2-8 C in cool, dry place; keep tightly closed

Uses: Lubricant, emollient, solubilizer, stabilizer in pharmaceuticals, creams and oils; carbon source in antibiotic culture broths; solubilizer for flavors, vitamin oils

Regulatory: FDA 21CFR §177.2800; Canada DSL

Tripalmitin CAS 555-44-2; EINECS/ELINCS 209-098-1

Synonyms: Glyceril tripalmitate;
Hexadecanoic acid, 1,2,3-propanetriyl ester;
Palmitin

Definition: Triester of glycerin and palmitic acid

Empirical: C51H98O6

Formula: C3H5(OOCC15H31)3

Properties: Wh. crystalline powd. or needles; sol. in ether, chloroform, benzene; pract. insol. in alcohol; insol. in water; m.w. 807.29; dens. 0.886 (80/4 C); m.p. -8 to -5 C; b.p. 325-340 C (15 mm); HLB 8.0; sapon. no. 188-195; cloud pt. -10 C; flash pt. 330 C; ref. index 1.43807 (80 C); nonionic

Toxicology: LD (IP, mouse) > 500 mg/kg; TSCA listed

Precaution: Combustible

Storage: Refrigerate

Uses: Emollient, solvent, visc. control agent, lubricant, mold release agent, binder, retarding agent for tablets

Regulatory: FDA 21CFR §177.2800
Tripropylene glycol myristyl ether. See PPG-3 myristyl ether

Tris (hydroxymethyl) aminomethane
CAS 77-86-1; 25149-07-9; 108195-86-4; EINECS/ELINCS 201-064-4
Synonyms: 2-Amino-2-(hydroxymethyl)-1,3-propanediol; Aminotrimethylolmethane; Aminotris(hydroxymethyl) methane; THAM; Tris; Trisamine; Tris Buffer; Tris (hydroxymethyl) methanamine; Tris (hydroxymethyl) methylamine; 1,1,1-Tris(hydroxymethyl) methylamine; Trometamol; Tromethamine (INCI)
Classification: Amino alcohol
Empirical: C₄H₁₂N₂O₃
Formula: (CH₂OH)₃CNH₃
Properties: Wh. cryst. gran. or powd., sl. char. odor; sol. 80 g/100 cc water (20 C); sol. in low m.w. aliphatic alcohols; pract. insol. in chloroform, benzene, CCl₄; m.w. 121.14; m.p. 168-171 C; b.p. 219-220 C (10 mm); pH 10-11.5 (5%)
Toxicology: LD₅₀ (oral, rat) 5900 mg/kg; mod. toxic by ingestion and IV routes; irritant to skin and eyes; TSCA listed
Precaution: Combustible; attacks copper, brass, and aluminum
Hazardous Decomp. Prods.: Thermal decomp. prods.: CO, CO₂, NOₓ

Tris (hydroxymethyl) nitromethane

CAS 126-11-4; EINECS/ELINCS 204-769-5

Synonyms: (2-Hydroxymethyl)-2-nitro-1,3-propanediol; 2-Nitro-2-(hydroxymethyl)-1,3-propanediol; Nitromethylidynetrimethanol; Trimethylnitromethane

Classification: Aliphatic compd.

Empirical: C_6H_5NO_5

Formula: (CH_2OH)_3CNO_2

Properties: Wh. cryst. or amorphous solid; sol. in alcohol, water; sl. sol. in benzene, other hydrocarbons; m.w. 151.12; m.p. 175 C (tech.), 214 C (pure); b.p. dec.; pH 4.5 (0.1M aq. sol'n.)

Toxicology: LD_{50} (oral, rat) 1900 mg/kg; poison by ing.; mod. toxic by IP route; irritant to skin, eyes, mucous membranes; TSCA listed

Precaution: Mod. fire risk

Hazardous Decomp. Prods.: Heated to decomp., emits toxic fumes of NO_x

Uses: Antimicrobial

Regulatory: Canada DSL

Handbook of Pharmaceutical Additives, Third Edition 2211
Trisodium versenate

**Classification:** Substituted amine

**Empirical:** $\text{C}_{10}\text{H}_{13}\text{N}_{2}\text{O}_{8} \cdot 3\text{Na}$

**Formula:** $(\text{NaOOCCH}_{2})_{3}\text{NCH}_{2}\text{CH}_{2}\text{NCH}_{2}\text{COOH}$

**Properties:** Wh. powd.; sol. in water; m.w. 358.22

**Toxicology:** LD50 (oral, rat) 2150 mg/kg, (IP, mouse) 300 mg/kg; poison by IP route; mod. toxic by ing.; TSCA listed

**Hazardous Decomp. Prods.:** Heated to decomp., emits toxic fumes of NOx and Na2O

**HMIS:** Health 2, Flammability 1, Reactivity 0

**Uses:** Chelating agent in pharmaceuticals, topicals

**Regulatory:** FDA 21CFR §175.105, 176.150; FDA approved for topicals; Canada DSL

**Manuf./Distrib.:** Akzo Nobel

**Trade Names:** Versenol 120

---

Trisodium ethylenediaminetetraacetate

**Classification:** Substituted amine

**Empirical:** $\text{C}_{10}\text{H}_{18}\text{N}_{2}\text{O}_{7} \cdot 3\text{Na}$

**Formula:** $(\text{CH}_{2}\text{COONa})_{3}\text{NCH}_{2}\text{CH}_{2}\text{NHOCH}_{2}\text{CH}_{2}$

**Properties:** Lt. yel. liq.; sol. in water forming alkaline sol'n.; m.w. 347.27; dens. 1.285; f.p. < -5 C; b.p. 107 C

**Toxicology:** TSCA listed

---

Trisodium HEDTA

**CAS:** 139-89-9; EINECS/ELINCS 205-381-9

**Synonyms:** N-[2-[Bis(carboxymethyl) amino]ethyl]-N-(2-hydroxyethyl) glycine, trisodium salt; N-(Carboxymethyl)-N' -(2-hydroxyethyl)-N,N'-ethylenedi-, trisodium salt; HEDTANa3; HEDTA, trisodium salt; HEEDTANa3; HEEDTA, trisodium salt; Hydroxyethylendiaminetriacetic acid, trisodium salt; Trisodium hydroxyethyl ethylenediaminetriacetate; Trisodium N-hydroxyethyl ethylenediaminetriacetate

**Classification:** Substituted amine

**Empirical:** $\text{C}_{57}\text{H}_{110}\text{O}_{6}$

**Formula:** $[\text{CH}_{3}(\text{CH}_{2})_{18}\text{COOCH}_{2}]_{2}\text{CHOCO}(\text{CH}_{2})_{16}\text{CH}_{3}$

**Properties:** Colorless to wh. crystals or powd., odorless, tasteless; sol. in hot alcohol, benzene, chloroform, carbon disulfide, chlorinated and aromatic solvs.; pract. insol. in cold alcohol, ether, petrol. ether; insol. in water; m.w. 891.45; dens. 0.943 (65 C); m.p.

---

**Uses:** Chelating agent for pharmaceuticals, topicals, drug stabilization, heavy metal poisoning treatment

**Regulatory:** FDA 21CFR §175.105, 176.150; FDA approved for topicals; Canada DSL

**Manuf./Distrib.:** Akzo Nobel

**Trade Names:** Protacide™ NA3 EDTA

---

Trisodium hydrogen ethylene diaminetetraacetate; Trisodium hydrogen (ethylenedinitril) tetraacetate. See Trisodium EDTA

---

Trisodium hydrogen ethylenediaminetriacetate; Trisodium N-hydroxyethyl ethylenediamine triacetate. See Trisodium HEDTA

Tristearin

**CAS:** 555-43-1; EINECS/ELINCS 209-097-6

**Synonyms:** Glycerol tristearate; Glyceryl monotristearate; Glycerol tristearate; Octadecanoic acid, 1,2,3-propanetriyl ester; 1,2,3-Propanetriol trioctadecanoate; Stearin

**Definition:** Triester of glycerin and stearic acid

**Empirical:** $\text{C}_{57}\text{H}_{110}\text{O}_{6}$

**Formula:** $[\text{CH}_{3}(\text{CH}_{2})_{18}\text{COOCH}_{2}]_{2}\text{CHOCO}(\text{CH}_{2})_{16}\text{CH}_{3}$

**Properties:** Colorless to wh. crystals or powd., odorless, tasteless; sol. in hot alcohol, benzene, chloroform, carbon disulfide, chlorinated and aromatic solvs.; pract. insol. in cold alcohol, ether, petrol. ether; insol. in water; m.w. 891.45; dens. 0.943 (65 C); m.p.
†=pharmaceutical grade

**Triundecanoin**

CAS 13552-80-2; EINECS/ELINCS 236-935-8  
**Synonyms:** Glycerol triundecanoate; Glyceryl triundecanoate; Undecanoic acid, 1,2,3-propanetriyl ester  
**Definition:** Triester of glycerin and undecanoic acid  
**Empirical:** C_{36}H_{68}O_{6}  
**Formula:** HCO(CH_{2}OCO(CH_{2})_{9}CH_{3})_{2}CO(CH_{2})_{9}CH_{3}  
**Toxicology:** TSCA listed  
**Uses:** Emollient, lubricant, moisturizer, visc. control agent for pharmaceuticals, dermatological emulsions; carrier for flavors and fragrances; emollient, solvent, fixing agent, and extender in nutritional applics.  
**Manuf./Distrib.:** ABITEC†

**Trade Names Containing:** Precirol ATO 5  
**Trypsin**  
CAS 9002-07-7; EINECS/ELINCS 232-650-8  
**Classification:** Enzyme  
**Properties:** Wh. to ylsh. wh. cryst. or amorphous powd., odorless; readily sol. in Sorenson’s sodium phosphate buffer sol’n.; sparingly sol. in water; pract. insol. in alcohol, glycerin; m.w. ≈ 23,000; pH 3-5.5 (1%)  
**Toxicology:** LD50 (oral, rat) > 5 g/kg, (IV, rat) 36 mg/kg, (IP, rat) > 57 mg/kg; harmful solid; poison by IP and IV routes; irritant; may cause hypersensitivity reactions; mutagen; TSCA listed  
**Hazardous Decomp. Prods.:** Heated to decomp., emits acrid smoke and irritating fumes  
**HMIS:** Health 1, Flammability 1, Reactivity 0  
**Storage:** Hygroscopic (amorphous); protect from light; refrigerate; package under argon  
**Uses:** Proteolytic enzyme for pharmaceuticals, orals, inhalants, protein
Trypsin 1:75; Trypsin 1:150

Tryptophan (INCI); DL-Tryptophan. See DL-α-Tryptophan

DL-α-Tryptophan

CAS 54-12-6; EINECS/ELINCS 200-194-9

Synonyms: (±)-2-Amino-3-(3-indolyl)propionic acid; Tryptophan (INCI); DL-Tryptophan

Classification: Amino acid

Empirical: C_{11}H_{12}N_{2}O_{2}

Properties: Wh. cryst. or cryst. powd., odorless; sol. in water, dil. acids, alkalis; sl. sol. in alcohol; m.w. 204.23; m.p. 295 C (dec.); optically inactive

Toxicology: TDLo (oral, rat, 92 wks)

†=pharmaceutical grade

continuous) 844 g/kg; LD50 (IP, mouse) > 1 g/kg; experimental carcinogen; experimental reproductive effects; tumorigen; mutagen; TSCA listed

Hazardous Decomp. Prods.: Heated to decomp., emits toxic fumes of NOx

Storage: Photosensitive

Uses: Medicine; dietary supplement; nutrient; flavor

Regulatory: FDA 21CFR §172.320 (1.6% max.); Japan approved; Canada DSL

Trade Names Containing: Aminodermin CLR

p-TSA. See p-Toluenesulfonic acid

### Turnera diffusa. Turnera diffusa leaves. See Damiana (Turnera diffusa)

### Turpentine

**CAS** 8006-64-2 (steam distilled); 8052-14-0; 9005-90-7; 977022-00-6 (rectified); EINECS/ELINCS 232-350-7; 232-688-5

**UN** 1299 (DOT); 1300 (DOT); FEMA 3088; 3089

**Synonyms:** Gum turpentine; Pine balsam; Pine gum; Purified gum spirits; Spirits of turpentine; Spirit of turpentine; Terebenthine; Turpentine gum; Turpentine oil; Turpentine oil, rectified; Turpentine oil, rectifier; Turpentine, purified; Turpentine, rectified; Turpentine, steam distilled; Wood turpentine

**Classification:** Unsat. alicyclic hydrocarbon

**Definition:** Volatile essential oil obtained by distillation and rectification from turpentine, an
Chemical Component Cross-Reference

oleoresin obtained from *Pinus* spp., contg. pinene and diterpene

Formula: \( \approx C_{10}H_{16} \)

Properties: Colorless sticky visc. balsamic liq.; char. sharp penetrating piney odor; sol. in alcohol, benzene, CS2, CS2, petrol ether, ether, chloroform, glc. acetic acid; insol. in water; m.w. \( \approx 136 \); dens. 0.854-0.868; m.p. -50 to -60 C; b.p. 154-170 C; flash pt. (CC) 32-46 C; autoignition temp. 253 C; ref. index 1.463-1.483 (20 C); KB value 56

Toxicology: ACGIH TLV/TWA 100 ppm; LD50 (oral, rat) 5760 mg/kg, (IV, mouse) 1180 µg/kg; LC50 (inh., mouse, 2 h) 29 g/m³; poison by IV route; mildly toxic by ing., inh.; mod. toxic to humans by ing.; irritating to skin, eyes, respiratory tract; allergen; skin absorp. and inh. can cause CNS depression, headaches, confusion, delirium, convulsions, and death due to respiratory failure; serious kidney irritant; questionable carcinogen; experimental tumorigen; common air contaminant; TSCA listed

Environmental: VOC

Precaution: Highly flamm.; mod. explosive hazard as vapor; lower explosive limit 0.8%; incompat. with oxidizers, halogens, stannic chloride, hexachloromelamine, diatomaceous earth; violent reactions possible; avoid impregnation of combustibles with turpentine

Hazardous Decomp. Prods.: Heated to decomp., emits acrid smoke and irritating fumes

NFPA: Health 1, Flammability 3, Reactivity 0

Storage: Store in cool, dry, well-ventilated area away from heat/ignition sources; protect from light

Uses: Natural flavor, solvent for pharmaceuticals; rubefaciency; diuretic; preps. for respiratory tract disorders

Regulatory: FDA 21CFR §172.510, 175.105; FDA approved for inhalants; FEMA GRAS; BP compliance; Canada DSL

Tyloxapal

CAS 25301-02-4

Synonyms: \( p\)-Isocetylpolyoxyethylenephenol formaldehyde polymer; Oxyethylated tertiary octylphenol-formaldehyde polymer; Phenol, 4-(1,1,3,3-tetramethylybutyl)-, polymer with formaldehyde and oxirane; p-(1,1,3,3-Tetramethylybutyl) phenol polymer with ethylene oxide and formaldehyde; 4-(1,1,3,3-Tetramethylybutyl) phenol polymer with formaldehyde and oxirane; Tyloxypal

Definition: An oxyethylated-t-octylphenolpolymethylene polymer

Empirical: \( (C_{14}H_{22}O_2 \cdot C_2H_4O \cdot CH_2O)_x \)

Properties: Amber thick liq., sl. aromatic odor; freely sol. in water; sol. in benzene, glc. acetic acid, toluene, CCl₄, chloroform, CS₂; cloud pt. 92-97 C; flash pt. > 230 F; pH 4-7 (5%); nonionic

Toxicology: LD50 (oral, rat) > 5 g/kg, (IP,
L-Tyrosine

CAS: 60-18-4; EINECS/ELINCS 200-460-4

Synonyms: α-Amino-p-hydroxyhydrocinnamic acid; L-α-Amino-β-(4-hydroxyphenyl) propionic acid; (S)-2-Amino-3-(4-hydroxyphenyl) propionic acid; 3-(4-Hydroxyphenyl) alanine; l-β-(p-Hydroxyphenyl) alanine; Tyrosine; l-p-Tyrosine; p-Tyrosine

Classification: Nonessential amino acid

Definition: Avail. commercially as the naturally occurring L(-)-enantiomer

Empirical: C9H11NO3

Properties: Colorless silky need. or wh. cryst. powd.; sl. sol. in alcohol; pract. insol. in water, dil. min. acids, alkaline sol'n.; m.w. 181.21; m.p. 290-295 C; dec. 342-344 C

Toxicology: LD50 (IP, mouse) > 1450 mg/kg; irritant; experimental teratogen, reproductive effects; TSCA listed

Hazardous Decomp. Prods.: Heated to decomp., emits acrid smoke and irritating fumes

HMIS: Health 2, Flammability 1, Reactivity 1

Uses: Flavor for pharmaceuticals; infusion sol'n.; diagnostic aids; peptide drug raw material; nutrient; dietary supplement

Regulatory: FDA 21CFR §172.320 (limitation 4.3%); FEMA GRAS; Japan approved; BP, EP compliance; Canada DSL

Chemical Component Cross-Reference

2,3-Undecadione
CAS 7493-59-6
FEMA 3090
Synonyms: Acetyl nonanoyl; Acetyl nonyryl; Acetyl pelargonyl
Classification: aliphatic ketone
Empirical: C\textsubscript{11}H\textsubscript{20}O\textsubscript{2}
Properties: Yel. oily liq., strong sweet-cream warm odor; sol. in alcohol; very sl. sol. in water; m.w. 184.28; b.p. 109-111 C (10 mm)
Uses: Synthetic flavor for pharmaceuticals
Regulatory: FDA 21CFR §172.515; FEMA GRAS; Canada DSL
Manuf./Distrib.: Penta Mfg.
http://www.pentamfg.com

δ-Undecalactone
CAS 710-04-3; EINECS/ELINCS 211-915-1
FEMA 3294
Synonyms: 6-Hexyl-tetrahydropyran-2-one; 6-Hexyltetrahydro-2H-pyran-2-one; 5-Hydroxyundecanoic acid lactone; Δ-Undecalactone; Undecanoic δ-lactone; Undecanolide-1,5
Classification: Nonaromatic lactone
Empirical: C\textsubscript{11}H\textsubscript{20}O\textsubscript{2}
Properties: M.w. 184.28; dens. 0.969; b.p. 152-155 C (10.5 mm); flash pt. > 230 F; ref. index 1.4590
Toxicology: Primary irritant; irritating to eyes, skin, and respiratory system; TSCA listed
Hazardous Decomp. Prods.: Heated to decomp., emits CO, CO\textsubscript{2}, acrid smoke and irritating fumes
Storage: 12 mos. when stored at 40-70 F in tightly sealed original containers with minimum head space; avoid prolonged exposure to light, heat, air
Uses: Synthetic flavor for pharmaceuticals
Features: Peach-like flavor
Regulatory: FDA 21CFR §172.515; FEMA GRAS; Australia AICS; Canada DSL; Japan MITI

Trade Names: Aldehyde C 14 Socalled

Undecanal
CAS 112-44-7; EINECS/ELINCS 203-972-6
FEMA 3092
Synonyms: Aldehyde 14; Aldehyde C-11 undecyclic; 1-Decyl aldehyde; Hendecanal; Hendecanaldehyde; n-Undecanal; Undecanaldehyde; Undecyl aldehyde; Undecylic aldehyde; n-Undecylic aldehyde

Empirical: C_{11}H_{22}O
Formula: CH_3(CH_2)_{10}CHO
Properties: Colorless to sl. yel. liq.; sweet, fatty, floral odor; sol. in most common org. solvs., fixed oils, propylene glycol, alcohol; insol. in water; m.w. 170.30; dens. 0.825; m.p. -4 C; b.p. 118-120 C (20 mm); flash pt. 96 C; ref. index 1.430-1.435

Toxicology: LD_{50} (oral, rat) > 5 g/kg, (dermal, rabbit) > 5 g/kg; low toxicity by ing. and inh.; primary skin and tissue irritant; TSCA listed

Precaution: Combustible liq. exposed to heat or flame; tends to polymerize unless tightly sealed

Hazardous Decomp. Prods.: Heated to decomp., emits acrid smoke and irritating fumes

Storage: Store under nitrogen

Uses: Synthetic flavor for pharmaceuticals
Features: Orange-like flavor

Regulatory: FDA 21CFR §172.515; FEMA GRAS; Canada DSL

Synonyms: Acetate C-11; 10-Hendecenyl acetate; 10-Hendecen-1-yl acetate; 10-Undecenyl acetate; 10-Undecen-1-yl acetate; Undecylenic acetate
Empirical: C_{13}H_{24}O_{2}
### 10-Undecenyl acetate; 10-Undecen-1-yl acetate

**Properties:** Colorless liq. or solid; mild fatty-floral odor; sol. in water, alcohol 60%, fixed oils, oxygenated solvs.; m.w. 172.35; dens. 0.822 (35/4 C); m.p. 19 C; b.p. 248-250 C; flash pt. 93.3 C; ref. index 1.4370-1.4430; nonionic

**Toxicology:** LD50 (oral, rat) 3000 mg/kg, (skin, rabbit) 4760 µl/kg; mod. toxic by ing.; low acute inh. toxicity; primary irritant; severely irritating to eyes; mod. irritating to skin; mutagenic data; TSCA listed

**Precaution:** Combustible; avoid incompat. materials, strong oxidants

**Hazardous Decomp. Prods.:** Heated to decomp., emits acrid smoke and irritating fumes

**Storage:** Refrigerate; store in a cool, dry place; keep container closed when not in use

**Uses:** Thickener, refatting agent, antimicrobial, antimycotic for foot and skin care preps., pharmaceuticals

**Trade Names:** Olamida UD; Olamida UD 21; Rewocid® DU 185 SE

### Undecyl alcohol

**CAS:** 112-42-5; EINECS/ELINCS 203-970-5

**FEMA:** 3097

**Synonyms:** Alcohol C11; Alcohol C11 undecylic; C11 primary alcohol; Decyl carbinol; Hendecanoic alcohol; 1-Hendecanol; Hendecyl alcohol; n-Hendecylenic alcohol; Undecanol; 1-Undecanol; Undecan-1-ol; n-Undecanol; n-Undecyl alcohol

**Classification:** Aliphatic alcohol

**Empirical:** C11H24O

**Formula:** CH3(CH2)9CH2OH

**Properties:** Colorless liq. or solid; mild fatty-floral odor; sol. in water, alcohol 60%, fixed oils, oxygenated solvs.; m.w. 172.35; dens. 0.822 (35/4 C); m.p. 19 C; b.p. 248-250 C; flash pt. 93.3 C; ref. index 1.4370-1.4430; nonionic

**Toxicology:** LD50 (oral, rat) 3000 mg/kg, (skin, rabbit) 4760 µl/kg; mod. toxic by ing.; low acute inh. toxicity; primary irritant; severely irritating to eyes; mod. irritating to skin; mutagenic data; TSCA listed

**Precaution:** Combustible; avoid incompat. materials, strong oxidants

**Hazardous Decomp. Prods.:** Heated to decomp., emits acrid smoke and irritating fumes

**Storage:** Refrigerate; store in a cool, dry place; keep container closed when not in use

**Uses:** Synthetic flavor for pharmaceuticals

### Undecylenaldehyde

**Trade Names:** Exxal® 11

n-Undecyl alcohol. See Undecyl alcohol

Undecyl aldehyde; n-Undecyl aldehyde. See Undecanal

Undecylenaldehyde. See 10-Undecenal

### Undecylenamide DEA

**CAS:** 25377-64-4; 60239-68-1; EINECS/ELINCS 246-914-5; 262-114-9

**Synonyms:** N,N-Bis(2-hydroxyethyl) undecenamide; Undecylenoyl diethanolamide

**Definition:** Mixture of ethanolamides of undecylenic acid

**Empirical:** C15H29NO3

**Formula:** CH2=CH(CH2)8CON(CH2CH2OH)2

**Properties:** Nonionic

**Toxicology:** TSCA listed

**Uses:** Thickener, refatting agent, antimicrobial, antimycotic for foot and skin care preps., pharmaceuticals

**Trade Names:** Olima UD; Olima UD 21; Rewocid® DU 185 SE

### Undecylenamidopropyl betaine

**CAS:** 98510-75-9; 133798-12-6; EINECS/ELINCS 308-783-3

**Synonyms:** Bis (undecylenic amidopropyl dimethyl glycinate); (Carboxymethyl) dimethyl [3-[1-oxoundecenyl] amino] ammonium hydroxide; N-(Carboxymethyl)-N,N-dimethyl-3-[1-oxoundecylenyl] amino]-1-propanaminium hydroxide, inner salt

**Classification:** Zwitterion (inner salt), quaternary ammonium compd.

**Empirical:** C19H34N2O3

**Formula:** CH2=CH(CH2)8CONH(CH2)3N+(CH3)2CH2COO–

**Properties:** Amphoteric

**Uses:** Antimicrobial

**Trade Names:** Amphoram® U; Rewoteric® AM B U 185

### Undecylenamidopropyl trimethylammonium methyl sulfate

See Undecylenamidopropyl trimonium methosulfate
Undecylenamidopropyl trimonium methosulfate

CAS 94313-91-4; EINECS/ELINCS 304-990-8

Synonyms: Trimethyl-3-[1-oxo-10-undecenyl] amino] propylammonium methyl sulfate; Undecylenamidopropyl trimethylammonium methyl sulfate

Classification: Quaternary ammonium salt

Empirical: C₁₇H₃₅N₂O • CH₄O₄S

Formula: \[\text{[CH}_2\text{CH(CH}_2\text{)}_8\text{CONH(CH}_2\text{)}_3\text{N(CH}_3\text{)}_3\text{]}^+\text{CH}_3\text{OSO}_3^-\]

Properties: Cationic

Uses: Antimicrobial

Trade Name: Rewocid® UTM 185

10-Undecylenaldehyde. See 10-Undecenal

Undecylenic acid

CAS 112-38-9; EINECS/ELINCS 203-965-8

FEMA 3247

Synonyms: 10-Hendecenoic acid; 10-Hendecenoic acid; Undecan-10-acid-1; Undecanoic acid; Undec-10-enoi acid; 10-Undecenoic acid; 11-Undecenoic acid; 9-Undecynl acid; Undecyl-10-enic acid; 10-Undecylenic acid; n-Undecylenic acid

Classification: Aliphatic acid

Empirical: C₁₁H₂₀O₂

Formula: CH₂=CH(CH₂)₈COOH

Properties: Lt. colored liq. or cryst., fruity-rosy odor; sol. in oxygenated solvs.; misc. with alcohol, chloroform, ether, benzene; insol. in water; m.w. 184.28; dens. 0.910-0.913 (25/25 C); m.p. 22 C; b.p. 275 C; acid no. 300-305; iodine no. 135-139; flash pt. 295 F; ref. index 1.447-1.449

Toxicology: LD₅₀ (oral, rat) 2500 mg/kg, (IP, mouse) 960 mg/kg; highly toxic; mod. toxic by ing. and IP routes; ing. can cause nausea, vomiting, urticaria; severe skin irritant; readily absorbed through skin; TSCA listed

Precaution: Combustible

Hazards: Decomp. Prods.: Heated to decomp., emits acid smoke and irritating fumes

HMIS: Health 1, Flammability 1, Reactivity 0

Uses: Synthetic flavor for pharmaceuticals; antifungal agent in medicine

Features: Sweet flavor

Use Level: 0.2% max. (as acid, in finished cosmetics)

Regulatory: FEMA GRAS; BP, EP compliance; Canada DSL

Regulatory: TSCA listed

Precaution: Combustible

Hazardous Decomp. Prods.: Heated to decomp., emits acid smoke and irritating fumes

HMIS: Health 1, Flammability 1, Reactivity 0

Uses: Synthetic flavor for pharmaceuticals; antifungal agent in medicine

Features: Sweet flavor

Use Level: 0.2% max. (as acid, in finished cosmetics)

**Formula:** NH₂CONH₂

**Properties:** Colorless to wh. cryst. or powd., almost odorless; sl. ammonia odor on standing; sol. in water, boiling alcohol, benzene, oxygenated solvs.; sl. sol. in ether; insol. in chloroform; m.w. 60.06; dens. 1.335; m.p. 132.7 C; b.p. dec.

**Toxicology:** LD₅₀ (oral, rat) 14,300 mg/kg, (IV, rat) 5300 mg/kg, (subcut., rat) 8200 mg/kg; mod. toxic by ing., IV, subcut. routes; human skin irritant; experimental carcinogen, neoplastigen, reproductive effects; human reproductive effects by intraplacental route; human mutagenic data; TSCA listed

**Precaution:** Incompat. with NaNO₂, P₂Cl₅, nitrosyl perchlorate; reacts with sodium or calcium hypochlorite to form explosive nitrogen trichloride; prep. of ¹⁵N urea is hazardous

**Hazardous Decomp. Prods.:** Heated to decomp., emits toxic fumes of NOₓ

**NFPA:** Health 1, Flammability 0, Reactivity 0

**Storage:** Store @ R.T.

**Uses:** Diuretic, antiseptic in pharmaceuticals, injectables, orals; keratin softener for dry skin prods.; in ammoniated dentifrices

**Regulatory:** FDA 21CFR §175.105, 175.300, 176.180, 176.320, 177.1200, 177.1900, 184.1923, GRAS; BATF 27CFR §240.1051; Canada DSL; FDA approved for injectables, orals; BP, EP compliance

Handbook of Pharmaceutical Additives, Third Edition 2223
Urea, N-(4-chlorophenyl)-N’-(3,4-dichlorophenyl)-. See 3,4,4’-Trichlorocarbanilide

Urea dioxide. See Urea peroxide

Urea-(2,5-dioxo-4-imidazolidinone). See Allantoin

Urea hydrogen peroxide; Urea hydroperoxide. See Urea peroxide

Urea peroxide

CAS 124-43-6; EINECS/ELINCS 204-701-4

UN 1511 (DOT)

Synonyms: Carbamide peroxide; Hydrogen peroxide carbamide; Hydrogen peroxide with urea (1:1); Percarbamide; Perhydrolyzed urea; Urea dioxide; Urea hydrogen peroxide; Urea hydroperoxide

Empirical: CH₆N₂O₃

Formula: H₂NCONH₂ • H₂O₂

Properties: Wh. cryst. or cryst. powd.; sol. in water, alcohol, ethylene glycol; m.w. 94.07; m.p. 75-78 C (dec.)

Toxicology: Irritant to skin, eyes, mucous membranes; TSCA listed

Precaution: DOT: Oxidizer; dangerous fire risk in contact with org. materials; solvs. such as ether and acetone extract hydrogen peroxide and may form explosive solns.; dec. by moisture @ 40 C

Hazardous Decomp. Prods.: Heated to decomp., emits acrid smoke and irritating vapors

Storage: Moisture-sensitive; refrigerate

Uses: In determination of urea in urine, blood, and other body fluid

Regulatory: FDA 21CFR §184.1924, GRAS; Japan approved; Canada DSL

5-Ureidohydantoin. See Allantoin

Urogafin acid; Urogranoic acid. See Diatrizoic acid

Urtica dioica; Urtica dioica extract. See Nettle (Urtica dioica) extract

UV Absorber-3. See Octocrylene

VAE: VA/ethylene copolymer. See Ethylene/VA copolymer

Val. See L-Valine

Valeral; Valeraldehyde. See n-Valeraldehyde

n-Valeraldehyde

CAS 110-62-3; EINECS/ELINCS 203-784-4

UN 2058 (DOT); FEMA 3098

Synonyms: Aldehyde C-5; Amylaldehyde;

Butyl formal; Pentaldehyde; Pentanal; n-Pentanal; Valeral; Valeraldehyde; Valerianic aldehyde; Valeric acid aldehyde; Valeric aldehyde; Valerylaldehyde

Empirical: C₅H₁₀O

Formula: CH₃(CH₂)₃CHO

Properties: Colorless liq.; sol. in alcohol, ether, propylene glycol, oils; sl. sol. in water; m.w. 86.13; dens. 0.81 (20/4 C); m.p -92 C; b.p. 103.4 C; flash pt. 4 C; ref. index 1.3882

Toxicology: ACGIH TLV/TWA 50 ppm; LD₅₀ (oral, rat) 5660 µl/kg, (IP, mouse) 20 mg/kg; (skin, rabbit) 4857 mg/kg; LCLo (inh., rat, 4 h) 4000 ppm; m.d. toxic by ing.; mildly toxic by inh., skin contact; severe eye and
Valerian (Valeriana officinalis) extract

CAS: 8057-49-6; 8008-88-6; EINECS/ELINCS 232-501-7
FEMA 3099

Synonyms: Valeriana officinalis; Valeriana officinalis extract; Valeriana officinalis root extract; Valerian extract. See Valerian (Valeriana officinalis) extract

Valerianic acid. See n-Valeric acid

Valerianic aldehyde. See n-Valeraldehyde

Valerian root extract. See Valerian (Valeriana officinalis) extract

Valerian (Valeriana officinalis) extract
CAS: 8057-49-6; 8008-88-6; EINECS/ELINCS 232-501-7
FEMA 3099

Synonyms: Valeriana officinalis; Valeriana officinalis extract; Valeriana officinalis root extract; Valerian extract; Valerian root extract

Definition: Extract of rhizomes and roots of Valeriana officinalis

Properties: Powd.

Toxicology: LD50 (oral, mouse) 600 mg/kg, (IV, mouse) 1290 mg/kg, (subcut., mouse) 3590 mg/kg; LC50 (inh., mouse, 2 h) 4100 mg/m³; mildly toxic by inh.; corrosive irritant to skin, eyes, mucous membranes; TSCA listed

Precaution: Combustible liq.; DOT: corrosive material

Hazardous Decomp. Prods.: Heated to decomp., emits acrid smoke and irritating fumes

NFPA: Health 2, Flammability 1, Reactivity 0
Uses: Synthetic flavor for pharmaceuticals; pharmaceutical intermediate and reagent
Valeric acid aldehyde. See n-Valeraldehyde

Valeric acid, 2-amino-3-methyl. See L-Isoleucine

Valeric acid, 2-amino-4-methyl-. See L-Leucine

4-Valerolactone. See γ-Valerolactone

γ-Valerolactone

CAS 108-29-2; 57129-69-8; EINECS/ELINCS 203-569-5

FEMA 3103

Synonyms: 4,5-Dihydro-5-methyl-2(3H)-furanone; 4-Hydroxypentanoic acid lactone; 4-Hydroxyvaleric acid lactone; 4-Methylbutyro lactone; 4-Methyl-γ-butyrolactone; γ-Methyl-γ-butyrolactone; γ-Pentalactone; 4-Pentanolide; 4-Valerolactone

Classification: lactone

Empirical: C₅H₈O₂

†=pharmaceutical grade

Properties: Colorless mobile liq., sweet herbaceous odor; misc. with alcohol, fixed oils, water; m.w. 100.13; dens. 1.047-1.054; m.p. -31 C; b.p. 205-206.5 C; flash pt. (COC) 205 F; ref. index 1.433

Toxicology: LD₅₀ (oral, rat) 8800 mg/kg; mod. toxic by ing.; skin irritant; mutagenic data; TSCA listed

Precaution: Combustible liq. exposed to heat or flame; reactive with oxidizers

Hazardous Decomp. Prods.: Heated to decomp., emits acrid smoke and irritating fumes

Storage: Store in cool, dry place in tightly sealed containers, protected from heat, light

Uses: Synthetic flavor for pharmaceuticals

Use Level: < 1%

Regulatory: FDA 21 CFR §172.515; FEMA GRAS; Canada DSL

Vanillin
CAS 121-33-5; EINECS/ELINCS 204-465-2
FEMA 3107
Synonyms: m-Anisaldehyde, 4-hydroxy-;
Benzaldehyde, 4-, hydroxy-3-methoxy-; 4-
Hydroxy-m-anisaldehyde; p-Hydroxy-m-
anisaldehyde; 4-Hydroxy-3-
methoxybenzaldehyde; 3-Methoxy-4-
hydroxybenzaldehyde;
Methylprotocatechualdehyde;
Methylprotocatechuic aldehyde;
Protocatechualdehyde, methyl-;
Vanillaldehyde; Vanillic aldehyde; p-Vanillin
Classification: Substituted aromatic aldehyde
Definition: Methyl ether of protocatechuic aldehyde
Empirical: C_{8}H_{9}O_{3}
Formula: (CH_{3}O)(OH)C_{6}H_{3}CHO
Properties: Wh. cryst. needles; pleasant vanilla odor and taste; sol. in oxygenated and
aromatic solvs.; sol. in 125 parts water, 20
parts glycerol, 2 parts 95% alcohol, chloroform,
ether; m.w. 152.16; dens. 1.056; vapor
pressure 107; m.p. 80-81 C; b.p. 285 C; flash
pt. (TCC) 153 C
Toxicology: LD50 (oral, rat) 1580 mg/kg, (IP,
rat) 1160 mg/kg, (subcut., rat) 1500 mg/kg;
LDLo (iv, dog) 1320 mg/kg; mod. toxic by
ing., IP, subcut., IV routes; experimental
reproductive effects; human mutagenic
data; TSCA listed
Precaution: Combustible; violent reactions
with Br2, HClO4, potassium-t-butoxide, t-
chlorobenzene + NaOH, formic acid +
thallium nitrate; incompatible with strong
oxidizers, reducers
Hazardous Decomp. Prods.: Heated to
decom., emits CO, CO2, acrid smoke and
irritating fumes
HMIS: Health 1, Flammability 0, Reactivity 0
Storage: Moisture- and light-sensitive
Uses: Excipient for pharmaceuticals, orals,
topicals; synthetic flavor for
pharmaceuticals
Features: Aromatic, perfume, vanilla-like flavor
Regulatory: FDA 21CFR §135.110, 163.111,

Vinylbenzene polymer. See Polystyrene
Vinylbenzol. See Styrene

Vinyl bromide
CAS 593-60-2; EINECS/ELINCS 209-800-6  
UN 1085 (DOT)
Synonyms: Bromoethene; Bromoethylene; VBR; Vinyl bromide, inhibited
Classification: Halogenated alkene
Empirical: C\(_{2}\)H\(_{3}\)Br
Formula: CH\(_{2}\)CHBr
Properties: Colorless liq. or compressed gas; pungent odor; misc. with alcohol, ether; insol. in water; m.w. 106.96; dens. 1.51; m.p. -138 C; b.p. 100 C
Toxicology: ACGIH TLV/TWA 5 ppm; LD\(_{50}\) (oral, rat) > 18150 µl/kg; may be harmful by inh., ing., or skin absorption; may cause irritation to eyes, skin, mucous membranes, upper respiratory tract; TSCA listed
Precaution: Incompat. with strong oxidizing agents; capable of creating a dust explosion
Hazardous Decomp. Prods.: Toxic fumes of CO, CO\(_2\); emits toxic fumes under fire conditions
Storage: Hygroscopic; keep tightly closed; protect from moisture; store in cool, dry place
Uses: Excipient for pharmaceuticals
Regulatory: FDA 21CFR §175.350, 176.170; Canada DSL
Manuf./Distrib.: Aldrich http://www.sigma-aldrich.com

Vinyon. See Polyvinyl chloride
Viola odorata; Viola odorata flowers and leaves. See Violet

Violet
CAS 8024-08-6
FEMA 3110
Synonyms: Viola odorata; Viola odorata flowers and leaves; Violet flowers and leaves; Violet leaf absolute
Definition: Derived from flowers and leaves of Viola odorata
Properties: Dk. green, amber, visc. liq.; sol. in alcohol; paraffin oil; and propylene glycol; insol. in water
Uses: Natural flavor for pharmaceuticals
Features: Pleasant delicate floral odor, sl. bitter taste
Regulatory: FDA 21CFR §182.20, GRAS; FEMA GRAS (violet leaves absolute)

Violet 2. See Acid violet 49
Violet flowers and leaves; Violet leaf absolute. See Violet
Violet leaf alcohol. See 2,6-Nonadien-1-ol
Viosterol. See Ergocalciferol
Vipers bugloss (Echium plantagineum) oil CAS 84988-87-4; EINECS/ELINCS 284-877-7
Uses: Nutritional supplement; anti-irritant for skin care prod.; anti-inflammatory for joints, eczema, PMS, skin exposed to UV

- Vitamin A alcohol acetate
- Retinyl acetate
- Tocopheryl acetate
- Tocopheryl
- d-α-Tocopheryl
- DL-α-Tocopherol

**Classification:**
- Aromatic ketone

**Definition:**
- Commercial prod. is a mixt. of cis- and trans-isomers with trans-isomer predominating

**Empirical:**
- C₃₁H₄₆O₂

**Formula:**
- CH₃C₁₀H₄O₂C₂₀H₃₉

**Properties:**
- Yel. visc. oil or cryst.; odorless; insol. in water; sparingly sol. in methanol; sol. in ethanol, acetone, benzene, petrol. ether, hexane, dioxane, chloroform, ether, other fat solvs., veg. oils; m.w. 450.68; dens. 0.984; m.p. -20 C; ref. index 1.525

**Uses:**
- Component of enzyme systems associated with blood-clotting mechanism; antihemorrhagic drug; vitamin in pharmaceuticals

**Regulatory:**
- BP, EP compliance; Canada DSL

**Trade Names:**
- Vitamin K₁ Dry Powd. 1% GFP
- Vitamin K₁ Dry Powd. 5% GFP

**Vitamin K₁**
- CAS 84-80-0; EINECS/ELINCS 201-564-2
- Synonyms: Anthemorrhagic vitamin; 2-Methyl-3-phytyl-1,4-naphthoquinone; 2-Methyl-3-(3,7,11,15-tetramethyl-2-hexadecenyl)-1,4-naphthalenedione; 2-Methyl-3-(3,7,11,15-tetramethyl-hexadec-2-etyl)-(1,4) naphthoquinone; 1,4-Naphthalenedione, 2-methyl-3-(3,7,11,15-tetramethyl-2-hexadecenyl)-
- Phyloquinone; α-Phyloquinone; trans-Phyloquinone; Phyloquinone; Phytodione; Phytomenadione; Phytonadione (INCI); 3-Phytomenadione

**Classification:**
- Aromatic ketone

**Definition:**
- Commercial prod. is a mixt. of cis- and trans-isomers with trans-isomer predominating

**Empirical:**
- C₃₁H₄₆O₂

**Formula:**
- CH₃C₁₀H₄O₂C₂₀H₃₉

**Properties:**
- Yel. visc. oil or cryst.; odorless; insol. in water; sparingly sol. in methanol; sol. in ethanol, acetone, benzene, petrol. ether, hexane, dioxane, chloroform, ether, other fat solvs., veg. oils; m.w. 450.68; dens. 0.984; m.p. -20 C; ref. index 1.525

**Toxicology:**
- LD₅₀ (oral, mouse) 25 g/kg; LD₅₀ (subcut., mouse) 1 g/kg; mod. toxic by subcut. route; mildly toxic by ing.; no adverse human effects with prolonged ingestion; TSCA listed

**Precaution:**
- Unaffected by dil. acids, but destroyed by sol'n's. of alkali hydroxides and by reducing agents

**Hazardous Decomp. Prods.:**
- Heated to decomp., emits acrid smoke and irritating fumes

**Storage:**
- Keep well closed and protected from light

**Uses:**
- Component of enzyme systems associated with blood-clotting mechanism; antihemorrhagic drug; vitamin in pharmaceuticals
Vitamin B1 hydrochloride. See Thiamine HCl
Vitamin B6 hydrochloride. See Pyridoxine HCl
Vitamin B1 mononitrate. See Thiamine nitrate
Vitamin E nicotinate. See d-α-Tocopheryl nicotinate

**Definition:** Complex combination of hydrocarbons obtained by fractional distillation of petroleum; narrow boiling fraction of petroleum with distillation range 119-143 C

**Properties:** Colorless clear liq.; gasoline odor; nonfluorescent; volatile; insol. in water; dens. 0.850-0.870 (15.6/15.6 C); vapor pressure 40 mm Hg (20 C); pour pt. -56 C; b.p. 93-204 C; ref. index 1.3630

**Toxicology:** ACGIH TLV/TWA 300 ppm; LD50 (oral, rat) > 5000 mg/kg, (skin, rabbit) > 3000 mg/kg, (IV, mouse) 40 mg/kg; LC50 (inh., rat, 4 h) 3400 ppm; poison by IV; mildly toxic by inh.; eye, skin, and respiratory irritant; ing. can cause vomiting, diarrhea, drowsiness, pulmonary edema in severe cases; inh. of vapor can cause intoxication, headache; target organs: respiratory system, eyes, skin, CNS, blood, PNS; TSCA listed

**VOC Environmental:** Flamm.: LEL 1%; UEL 6%; dangerous fire hazard exposed to heat, flame, sparks, or oxidizers; explosive as fume exposed to heat or flame

**Hazardous Decomp. Prods.:** Heated to decomp., emits acrid smoke and irritating fumes

**NFPA:** Health 1, Flammability 3, Reactivity 0

**Uses:** Solvent for pharmaceuticals

**Regulatory:** FDA 21CFR §172.510; FEMA 21CFR §178.3800; SARA §311/312 acute health/chronic health/fire hazard; Canada DSL

**Walnut (Juglans regia) extract**

CAS 84012-43-1; EINECS/ELINCS 281-688-1

**FEMA 3111**

**Synonyms:** Juglans regia; Juglans regia extract; Walnut extract; Walnut hull extract

**Definition:** Extract of the husk and shells of the nut of Juglans regia

**Toxicology:** LD50 (IP, mouse) 75 mg/kg; TSCA listed

**Uses:** Natural flavor for pharmaceuticals; functional adjuvant for skin care prods. (helps relieve effects of eczema, in foot care, antiperspirants

**Regulatory:** FDA 21CFR §172.510; FEMA GRAS

**Manuf./Distrib.:** Bio-Botanica  http://www.bio-botanica.com; Grau Aromatics  http://www.grau-aromatics.de

**Trade Names Containing:** Crodamar Nut O

**Walnut (Juglans regia) oil**

CAS 8024-09-7; 84604-00-2
### Chemical Component Cross-Reference

**Synonyms:** Juglans regia; Juglans regia oil; Walnut oil

**Definition:** Oil derived from the nut meats of walnuts, Juglans regia

**Properties:** Pale yel. oily liq.; veg, odor; oil; insol. in water; dens. 0.93 kg/l; vapor dens. > 1.0; iodine no. 145-155; sapon. no. 190; flash pt. >300 F; ref. index 1.4691 (40 C)

**Toxicology:** TSCA listed

**Hazardous Decomp. Prods.:** None

**Storage:** Store away from flame, fire, and excessive heat

**Uses:** Solvent, lubricant for pharmaceuticals, topicals, ointments

**Regulatory:** FDA 21CFR §172.510, 175.300; Canada DSL

**Walnut oil.** See Walnut (Juglans regia) oil

**Washing soda.** See Sodium carbonate

**Waxes, carnauba.** See Carnauba (Copernicia cerifera) wax

Chemical Component Cross-Reference

http://www.carrubba.com; Grau Aromatics
http://www.grau-aromatics.de
Trade Names Containing: Eashave; Iricalmin

Wheat (Triticum vulgare) germ
Synonyms: Triticum vulgare; Triticum vulgare germ; Wheat germ

Definition: Natural prod. obtained from the embryo of the bran of the wheat separated in milling

Uses: Nutrient, flavor, protein source, dietary fiber, complex carbohydrate source, filler for tablets

Trade Names: Defatted Wheat Germ #3; Defatted Wheat Germ #9

Wheat (Triticum vulgare) germ oil
CAS 8006-95-9; 68917-73-7

Synonyms: Bran absolute; Triticum aestivum germ oil; Triticum vulgare; Triticum vulgare oil; Wheat germ oil; Wheat husk oil

Definition: Oil obtained by expression or extraction of wheat germ

Properties: Lt. yel. oily liq.; bland; fat-sol.; misc. with chloroform, ether, benzene, petrol. ether; sl. sol. in alcohol; insol. in water; dens. 0.93-0.94; acid no. 6-20; iodine no. 120-140; sapon. no. 179-194; hyd. no. 10-48; ref. index 1.469-1.479

Toxicology: Skin and eye irritant; TSCA listed

Hazardous Decomp. Prods.: CO2; heated to decomp., emits acrid smoke and irritating fumes

Uses: Nutritional source, topical moisturizer and lubricant in pharmaceuticals; emollient for skin care prods.; occlusive solvent; source of natural vitamin E

Regulatory: BP, EP compliance (refined and virgin)

Wintergreen (Gaultheria procumbens) extract
CAS 90045-28-6; EINECS/ELINCS 289-888-0
FEMA 3112
Synonyms: Checkerberry extract; Gaultheria procumbens; Gaultheria procumbens extract; Wintergreen extract
Definition: Extract derived from Gaultheria procumbens
Properties: Colorless to yel.-redsh. liq.
Storage: 24 mos. shelf life; store in closed container, in a dark, fresh and dry place
Uses: Natural flavor for pharmaceuticals
Features: Curative, spicy, methyl salicylate odor;

†=pharmaceutical grade

Wintergreen (Gaultheria procumbens) oil
CAS 68917-75-9
FEMA 3113
Synonyms: Checkerberry oil; Gaultheria procumbens; Gaultheria procumbens oil; Partridge vine oil China; Sweet birch oil; Teaberry oil; Wintergreen oil; Wintergreen oil, China; Wintergreen oil, Chinese
Definition: Oil derived from Gaultheria procumbens
Properties: Pale yel. to reddish brn. liq.; intensely sweet odor; sol. in paraffin oil, alcohol; sl. sol. in water; insol. in propylene glycol; sp.gr. 1.17618-1.18200; ref. index 1.52900-1.54100 (20 C)
Toxicology: Toxic; strong irritant; ing. of sm. amts. may cause severe poisoning and death; very irritating to mucous membranes and skin; absorbed readily through the skin; TSCA listed
HMIS: Health 1, Flammability 1, Reactivity 0
Uses: Natural flavor for pharmaceuticals, toothpaste and tooth powds.; aromatic; astringent; stimulant; counterirritant
Features: Nondiscoloring in most media
Regulatory: FEMA GRAS; Japan approved; BP, EP compliance; Canada DSL
Manuf./Distrib.: Advanced BioTech

Wintergreen oil. See Wintergreen (Gaultheria
Chemical Component Cross-Reference

**procumbens)** oil; Methyl salicylate
Wintergreen oil, China; Wintergreen oil, Chinese. See Wintergreen (Gaultheria procumbens) oil
Witch hazel; Witch hazel extract. See Witch hazel (Hamamelis virginiana) extract
Witch hazel (Hamamelis virginiana) extract
CAS 84696-19-5; 68916-39-2; 330190-90-0
Synonyms: Hamamelis; Hamamelis extract; Hamamelis virginiana; Winterbloom; Witch hazel; Witch hazel extract

**Definition:** Extract containing hamamelitannin obtained from the twigs, bark, and leaves of *Hamamelis virginiana*

**Properties:** Colorless to pale liq.; sol. in ethanol, silicone oil, and isononyl isononanoate; insol. in water, corn oil, olive oil, min. oil, butylene glycol, and propylene glycol

**Toxicology:** TDLo (subcut., rat, 73 wks intermittent) 2920 mg/kg; questionable carcinogen; experimental tumorigen; mutagenic data; mild irritant; TSCA listed

**Precaution:** Combustible; can react with oxidizing materials

**Hazardous Decomp. Prods.:** Heated to decomp., emits acrid smoke and fumes

**HMIS:** Health 1, Flammability 2, Reactivity 0

**Storage:** Keep tightly sealed in a dry place @ R.T.

**Uses:** Astringent in hemorrhoidal prods.

Wormwood (Artemisia absinthium) oil
CAS 8008-93-3
FEMA 3115; 3116

**Synonyms:** Absinthe oil; Absinthium oil; Armoise oil; Artemisia absinthium; Artemisia absinthium oil; Artemisia oil; Artemisia vulgaris oil; Mugwort oil; Wormwood oil

**Definition:** Volatile oil from leaves and tops of *Artemisia absinthium*, contg. thujyl alcohol and acetate, thujone, phellandrene, cadinene

**Properties:** Almost colorless, yel. amber, to dk. grn. or brn. oily liq.; very strong odor; sol. in ether, 2 vols 80% alcohol; very sl. sol. in water; dens. 0.925-0.955 (15/15 C); flash pt. 132 F; ref. index 1.460-1.4741 (20 C)

**Toxicology:** Liq. may irritate eyes and skin, cause dermatitis; repeated contact may cause allergic dermatological reactions; a narcotic poison in large or repeated doses, causing headache, trembling, and convulsions; ing. of the volatile oil may cause GI symptoms, nervousness, stupor, coma, and death

**Precaution:** Combustible; will ignite if moderately heated

**Hazardous Decomp. Prods.:** Forms CO, CO2 on burning

**Storage:** Store in cool, dry area in tightly closed containers; protect from light

**Uses:** Natural flavor for pharmaceuticals; tonic; stomachic; febrifuge; anthelmintic

**Regulatory:** FDA 21CFR §172.510; FEMA GRAS; BP, EP compliance; Canada DSL

Xanthan. See Xanthan gum

Xanthan gum
CAS 11138-66-2; EINECS/ELINCS 234-394-2
INS415; E415
Synonyms: Corn sugar gum; Xanthan
Classification: Polysaccharide gum
Definition: High m.w. hetero polysaccharide gum produced by a pure-culture fermentation of a carbohydrate with Xanthomonas campestris; contains D-glucose, D-mannose, and D-glucuronic acid and is prepared as the sodium, potassium, or calcium salt
Properties: Wh. to cream-colored powd., sl. organic odor, tasteless; sol. in hot or cold water producing visc. highly-pseudoplastic sol'n.; insol. in oils, most org. solvs.; visc. 600 cps min.; unaffected by high or low pH
Toxicology: No known toxicity; TSCA listed
Hazardous Decomp. Prods.: Heated to decomp., emits acrid smoke and irritating fumes
HMIS: Health 1, Flammability 1, Reactivity 0
Storage: Very hygroscopic
Uses: Thickener, suspending agent, stabilizer, emulsifier in pharmaceuticals, orals, rectals, topicals
Regulatory: FDA 21CFR §133.124, 133.133, 133.134, 133.162, 133.178, 133.179, 172.695, 176.170, 177.1350; USDA 9CFR §318.7 (limitation 8%), 381.147; Japan, JCID, Europe, UK approvals; FDA approved for orals, rectals, topicals; Canada DSL; USP/NF, BP, EP compliance

Synonyms: C8 aromatics; Dimethylbenzene;

Dimethylbenzene, m-, o-, and p-

Dimethylbenzene (mixed isomers); Methyl
toluene; Mixed xylenes; Xylene, mixed;

Xylenes, mixed isomers; Xylo1

Classification: Aromatic hydrocarbon

Definition: Commercial mixture of 3 isomers: o-,
Chemical Component Cross-Reference

m-, and p-xylene (1,3-dimethylbenzene, 1,2-dimethylbenzene, 1,4-dimethylbenzene)  
Empirical: C₈H₁₀
Formula: C₈H₄(CH₃)₂

Properties: Colorless clear liq., char. sweet odor; sol. in abs. alcohol, ethanol, diethyl ether, many org. liqs.; pract. insol. in water; m.w. 106.16; dens. 0.86; vapor pressure 6.72 mm Hg (21 C); b.p. 137-144 C; flash pt. (CC) 29 C; ref. index 1.4970; KB value 98

Toxicology: ACGIH TLV/TWA 100 ppm; STEL 150 ppm; LD₅₀ (oral, rat) 4300 mg/kg, (IP, rat) 2459 mg/kg; mod. toxic by IP and subcut. routes; mildly toxic by ing., inh.; irritant to eyes (severe), skin, respiratory tract; human systemic effects; may be narcotic in high concs. causing CNS depression, dizziness, nausea, unconsciousness; repeated skin contact causes defatting, dermatitis; possible liver damage; experimental teratogen, reproductive effects; mutagenic data; TSCA listed

Environmental: VOC; ThOD 2.41

Precaution: Highly flamm.; moderate fire risk; incompat. with strong oxidizing agents, nitric acid, dichlorohydantoin; increased fire and explosion risk

Hazardous Decomp. Prods.: Heated to decomp., emits acrid smoke and irritating fumes

NFPA: Health 2, Flammability 3, Reactivity 0

Storage: Store in cool well-ventilated area out of direct sunlight, away from heat/ignition sources

Uses: Solvent in pharmaceuticals

Regulatory: FDA 21 CFR §175.105, 176.180, 177.1010, 177.1650; SARA §313 reportable; CERCLA hazardous substance; HAP; Canada DSL

Yarrow. See Yarrow (Achillea millefolium)

Yarrow (Achillea millefolium)
CAS 977000-16-0
FEMA 3117
Synonyms: Achillea; Achillea millefolium; Milfoil; Yarrow; Yarrow herb
Definition: Achillea millefolium
Uses: Natural flavor for pharmaceuticals
Regulatory: FDA 21CFR §172.510; finished beverage must be thujone-free; FEMA GRAS; BP, EP compliance

Yarrow herb. See Yarrow (Achillea millefolium)

Yeast
CAS 68876-77-7; 977030-39-9
Synonyms: Barm; Faex
Definition: Class of microorganism (hemiascomycetes) with unicellular growth form, lack of photosynthetic ability; several types are: bakers' yeast, bakers' compressed yeast, active dry yeast, brewers' yeast
Properties: Ylsh-wh. viscid liq. or soft mass, flakes, or granules, consisting of cells and spores of Saccharomyces cerevisiae
Toxicology: No known toxicity
Uses: Dietary source of folic acid for pharmaceuticals
Trade Names Containing: Preregen®

Yeast extract
CAS 8013-01-2; EINECS/ELINCS 232-387-9
Synonyms: Extract of yeast; Faex
Definition: Preparation of the water-sol. fraction of autolyzed yeast
Properties: Ylsh. wh. liq. or pressed form
Toxicology: LD50 (IP, rat) 4500 mg/kg, (IP, mouse) > 8 g/kg; low toxicity by ing., skin contact, and IP routes; may cause eye/skin/mucous membrane/upper respiratory tract irritation; may be harmful by inh., ing., skin absorp.; TSCA listed
Precaution: Incompat. with strong oxidizing agents
Hazardous Decomp. Prods.: CO, CO2; heated to decomp., emits acrid smoke and irritating fumes; emits toxic fumes under fire conditions
Storage: Store in cool, dry place; keep tightly closed
Uses: Fermentation of sugars; B vitamin source, flavoring agent in brewing, baking, food supplements; activator for cell metabolism
Trade Names Containing: Preregen®

Yeast ferment extract. See Saccharomyces cerevisiae extract

Yeast polysaccharides
Definition: Polysaccharides derived from cell walls of yeast
Uses: Biological additive, skin protectant
Trade Names Containing: Uniglucan G-51
Yeast protein hydrolysate.  See Hydrolyzed yeast protein

Yucca extract. See Yucca glauca extract

Yucca glauca extract
Synonyms: Yucca extract
Definition: Extract of the root of the yucca, Yucca glauca
Uses: Moisturizer, anti-inflammatory for topical abrasion and burn treatments; ingred. in herbal tinctures, tablets, or capsules for easing arthritis pain and maintaining health of digestive system

Manuf./Distrib.: Bell Flavors & Fragrances
http://www.bellff.com; Frutarom
http://www.frutarom.com; Garuda Int’l.†
http://www.garuda.int.com
Trade Names: NAB Yucca Glauca Extract

Yucca powder. See Yucca

Zea mays. See Corn (Zea mays) bran; Corn (Zea mays) oil unsaponifiables; Corn (Zea mays) oil; Corn (Zea mays) starch
Zea mays oil. See Corn (Zea mays) oil
Zea mays starch. See Corn (Zea mays) starch
Zea mays unsaponifiables. See Corn (Zea mays) oil unsaponifiables

Zeaxanthin
CAS 144-68-3
Synonyms: Anchovyxanthin; all trans-β-carotene-3,3’-diol; β,β-Carotene-3,3’-diol; (3R,3’R)-Dihydroxy-β-carotene; Zeaxanthol
Classification: Carotenoid alcohol
Definition: Pigment of yellow corn Zea mays and in spinach, collard greens, egg yolk, etc.; occurs together and is isomeric with xanthophyll
Empirical: C_{40}H_{56}O_{2}
Properties: Yel. rhombic plates, steel-blue metallic luster; sol. in CS2, benzene, chloroform, CCl4, pyridine, ethyl acetate; sl. sol. in petrol. ether, methanol; pract. insol. in water; m.w. 568.88; m.p. 207-215 C
Uses: Dietary supplement for film-coated, chewable effervescent tablets and hard-shell capsules

Trade Names Containing: Optisharp™ (Zeaxanthin) 5% CWS/S-TG

Zeaxanthol. See Zeaxanthin

Zein
CAS 9010-66-6; EINECS/ELINCS 232-722-9
Synonyms: Zein powder
Definition: Alcohol-sol. protein obtained from corn, Zea mays; component of corn gluten
Properties: Wh. to yel. powd., odorless; sol. in aq. alcohols, glycols, glycol ethers, furfuryl alcohol, tetrahydrofurfuryl alcohol, aq. alkaline solns. with pH ≥ 11.5, oxygenated solvs.; insol. in water, acetone, all anhyd. alcohols except methanol; m.w. ≈ 38,000; dens. 1.226
Toxicology: No known toxicity
Precaution: Combustible
Hazardous Decomp. Prods.: Heated to decomp., emits acrid smoke and irritating fumes
Uses: Coating agent, binder for pharmaceutical tablets, orals; substitute for shellac
Regulatory: FDA 21CFR §175.105, 184.1984, GRAS; Japan approved; FDA approved for orals; USP/NF compliance

Zinc
CAS 7440-66-6; EINECS/ELINCS 231-175-3
UN 1435 (DOT); UN 1436 (DOT)
Synonyms: CI 77945; Granular zinc; Pigment black 16; Pigment metal 6; Zinc ashes; Zinc dust; Zinc powder
Classification: Metallic element
Empirical: Zn
Properties: Shining wh. ductile metal, bluish-gray luster; sol. in acids, alkalis; insol. in water; at.wt. 65.38; dens. 7.14; vapor pressure 1 mm (487 C); m.p. 419 C; b.p. 907 C; strongly electropositive
Toxicology: Human systemic effects by inh. (cough, dyspnea, sweating); human skin

†=pharmaceutical grade
Zinc acetate

CAS 557-34-6 (anhyd.); 5970-45-6 (dihydrate);
EINECS/ELINCS 209-170-2
UN 9153 (DOT; UN anhyd.) E650

Synonyms: Acetic acid, zinc salt;
Dicarbomethoxy zinc; Zinc diacetate

Classification: Aliphatic organic compd.
Definition: Zinc salt of acetic acid; avail. as the dihydrate

Empirical: C₄H₆O₄Zn; C₄H₆O₄Zn • 2H₂O
Formula: Zn(C₂H₃O₂)₂ • 2H₂O
Properties: Wh. cryst. lustrous plates, faint acetoic odor, astringent taste; sl. efflorescent;
sol. in water, boiling alcohol; sl. sol. in alcohol;
m.w. 183.47 (anhyd.), 219.50 (dihydrate);
dens. 1.735; loses 2H₂O @ 100 C; m.p. 200 C (dec.)
Zinc ashes. See Zinc
Zinc bis (2-pyridylthio)-N-oxide. See Zinc pyrithione
Zinc butter. See Zinc chloride
Zinc carbonate
CAS 3486-35-9; EINECS/ELINCS 222-477-6
UN 9157 (NA)
Synonyms: Carbonic acid, zinc salt (1:1); Cl 77950; Natural smithsonite; Zinc carbonate (1:1); Zinc monocarbonate
Classification: Inorganic zinc salt
Definition: Occurs in nature as the minerals smithsonite, zincspar
Empirical: CO3 • Zn
Formula: ZnCO3
Properties: Wh. cryst. powd.; sol. in dil. acids, alkalis, ammonium salt solns.; insol. in water; m.w. 125.38; dens. 4.42-4.45
Toxicology: Evolves CO2 @ 300 C
Precaution: Evolves CO2 @ 300 C
Hazardous Decomp. Prods.: Heated to decomp., emits toxic fumes of CO and Zn
Uses: Opacifier in pharmaceuticals, ointments, dusting powds.; topical antiseptics; astringent; veterinary antiseptic, astringent, topical protectant, to prevent Zn deficiency diseases
Regulatory: FDA 21CFR §175.300, 176.170, 177.1460, 177.2600, 178.3297, 582.80; Canada DSL

Zinc carbonate (1:1). See Zinc carbonate
Zinc chloride
CAS 7646-85-7; EINECS/ELINCS 231-592-0
UN 1840 (DOT); 2331 (DOT)
Synonyms: Butter of zinc; Zinc butter; Zinc chloride anhydrous; Zinc chloride fume; Zinc chloride, solution; Zinc dichloride; Zinc muriate, solution
Classification: Inorganic zinc compd.
Empirical: Cl2Zn
Formula: ZnCl2
Properties: Wh. cubic cryst., odorless; very sol. in water, alcohol, glycerol, ether; sol. in acetone; m.w. 136.27; dens. 2.91; vapor pressure 1 mm Hg (428 C); m.p. 732 C; pH 4.0 (10% aq.); noncombustible
Toxicology: ACGIH TLV/TWA 1 mg/m3 (fume); STEL 2 mg/m3 (fume); LD50 (oral, rat) 350 mg/kg; poison by ing., IV, subcut., IP routes; corrosive irritant to skin, eyes, mucous membranes; causes burns; ing. may cause vomiting, abdominal pain; human systemic effects by inh. (pulmonary changes); can cause dermatitis, boils, conjunctivitis, Gl upset on exposure to fumes or dusts; questionable carcinogen; experimental tumorigen, teratogen, reproductive effects; human mutagenic data
Precaution: DOT: Corrosive material; incompat. with cyanides, sulfides, potassium; mixts. with powd. zinc are flamm.
Hazardous Decomp. Prods.: Heated to decomp., emits toxic fumes of Cl– and ZnO
HMIS: Health 2, Flammability 0, Reactivity 2
Storage: Store in cool, dry, well-ventilated area, out of direct sunlight; hygroscopic; deliq.; use dust-tight containers; avoid generating dust
Uses: Colorant for pharmaceuticals, parenterals, mouthwashes, dentifrices, deodorant, disinfectants; antiseptic; astringent; disinfectant preservative for medical specimens and embalming
Regulatory: FDA 21CFR §182.70, 182.8985,

Zinc citrate
CAS 546-46-3; EINECS/ELINCS 208-901-2; 286-

†=pharmaceutical grade

541-5

Synonyms: Citric acid, zinc salt; Citric acid, zinc salt (2:3); 2-Hydroxy-1,2,3-propanetricarboxylic acid, zinc salt; 1,2,3-Propanetricarboxylic acid, 2-hydroxy-, zinc salt (2:3); Trizinc dicitrate

Definition: Zinc salt of citric acid

Empirical: C_{12}H_{16}O_{14} • 3Zn

Formula: [HOC(CH_{2}COO–)_{2}COO–]_{2} 3Zn^{+}

Properties: Wh. to yel powd.; sl. sol. in water (100 g/l); insol. in chloroform, ethanol, ether; m.w. 290.18; m.p. 334 C

Toxicology: LD_{50} (oral, rat) > 5,000 mg/kg; experimental reproductive effects; TSCA listed

Hazardous Decomp. Prods.: Heated to decomp., emits acrid smoke and irritating fumes

Uses: Dietary supplement in pharmaceuticals; ingred. to treat common cold and various hygienic prods.

Zinc gluconate
CAS 4468-02-4 (anhyd.); EINECS/ELINCS 224-736-9

Definition: Zinc salt of gluconic acid
### Zinc Gluconate

**Empirical:** C$_{12}$H$_{22}$O$_{4}$Zn

**Properties:** Wh. gran. or cryst. powd.; sol. in water; very sl. sol. in alcohol; m.w. 295.71; pH 5.5-7.5 (1%)

**Toxicology:** LD$_{50}$ (oral, mouse) 1290 mg/kg, (IV, mouse) 23,700 µg/kg; experimental reproductive effects; TSCA listed

**Hazardous Decomp. Prods.:** Heated to decomp., emits toxic fumes of ZnO

**Uses:** Nutrient, dietary supplement, mineral source for pharmaceuticals, vitamin tablets; act. ingred. in lozenges

**Regulatory:** FDA 21CFR §182.8988, GRAS; Japan approved with limitations; Canada DSL

Trade Names: Kemilub LZ

Zinc methionine sulfate
CAS 56329-42-1
Synonyms: Zinc monomethionine
Empirical: C_{56}H_{102}N_{6}O_{2}Zn_{2}H_{2}SO_{4}
Properties: Solid; m.w. 311.65
Precaution: Wear splash goggles and dust respirator
Hazardous Decomp. Prods.: Heated to decomp., emits very toxic fumes of SOx
HMIS: Health 2, Flammability 1, Reactivity 0
Uses: Source of dietary zinc, dietary supplement, nutrient for pharmaceuticals, vitamin tablets
Regulatory: FDA 21CFR §172.399
Manuf./Distrib.: [Sciencelab]
http://www.sciencelab.com

Zinc monocarbonate. See Zinc carbonate

Zinc oxide
CAS 1314-13-2; EINECS/ELINCS 215-222-5
Synonyms: Chinese white; Cl 77947; Flowers of zinc; Permanent white; Philosopher’s wool; Pigment white 4; Zincite; Zinc monoxide; Zincoid; Zinc white
Classification: Inorganic oxide
Empirical: OZn
Formula: ZnO
Properties: Wh. to gray amorphous powd. or crystals, odorless, bitter taste; sol. in dil. acetic or min. acids, alkalis, ammonia; insol. in water, alcohol; m.w. 81.38; dens. 5.67; bulking value 0.021 gal/lb; oil absorp. 13; m.p. 1975 C; ref. index 2.0041-2.0203; pH 6.95 (Amer. process), 7.37 (French process)

†=pharmaceutical grade

Toxicology: ACGIH TLV/TWA 5 mg/m³ (fume), STEL 10 mg/m³ (fume); 10 mg/m³ (total dust); nuisance particulate; LD50 (oral, mouse) 7950 mg/kg; (IP, rat) 240 mg/kg; mod. toxic by ing. (humans); poison by IP route; skin/eye irritant; harmful dust; inh. of fumes may cause metal fume fever with chills, fever, tightness in chest, cough, leukocytes; experimental teratogen; mutagenic data; TSCA listed
Precaution: Powd. reacts violently with chlorinated rubber @ 215 C; violent reaction with Mg, linseed oil
Hazardous Decomp. Prods.: Heated to decomp., emits toxic fumes of ZnO
HMIS: Health 1, Flammability 0, Reactivity 0
Uses: Colorant for external pharmaceuticals, eye use, parenterals, rectals; dental cements; creamy wh. ointment used medicinally as an astringent, antiseptic, and protectant in skin treatments, hemorrhoidal prods.; sunscreen agent; nutrient; dietary supplement
Regulatory: FDA 21CFR §73.1991, 73.2991, 175.300, 176.170, 177.1460, 177.1680, 177.2260, 178.3297, 182.8991, 582.80, GRAS; FDA approved for parenterals, rectals, exempt from certification, permanently listed; BP, EP compliance

Zinc pyrithione

CAS 13463-41-7; EINECS/ELINCS 236-671-3

Synonyms: Bis [1-hydroxy-2(1H)-pyridinethionato-O,S]-(T-4) zinc; Bis (2-pyridylthio) zinc, 1,1´-dioxide; 2-Pyridinethiol-1-oxide, zinc salt; Pyrithione zinc; Zinc bis (2-pyridylthio)-N-oxide; Zinc 2-pyridinethiol-1-oxide; Zinc 2-pyridinethiol-N-oxide; Zinc pyridinethione

Classification: Aromatic salt

Empirical: C_{10}H_{8}N_{2}O_{2}S_{2}Zn

Properties: Wh. powd.; sol. in DMSO, DMF; chloroform; m.w. 317.68

Toxicology: LD50 (oral, rat) 260 mg/kg, (IP, mouse) 26,800 µg/kg, (subcut., mouse) 730 mg/kg, (skin, rat) > 2 g/kg; LDLo (IV, dog) 25 mg/kg; poison by ing., skin contact, IP, IV routes; mod. toxic by subcut. route; irritating to skin; extremely irritating to eyes; experimental teratogen, reproductive effects; TSCA listed

Precaution: Incompat. with oxidizers

Hazardous Decomp. Prods.: Heated to decomp., emits very toxic fumes of NOx, SOx, and ZnO

Storage: Do not store with strong oxidizing agents

Uses: Antimicrobial in pharmaceuticals, topicals; preservative for surgical scrubs, acne preps., topical antibacterial prods.

Regulatory: FDA approved for topicals; Canada DSL

†=pharmaceutical grade

Zinc stearate

CAS 557-05-1; EINECS/ELINCS 209-151-9

Synonyms: Dibasic zinc stearate;
Octadecanoic acid, zinc salt; Stearic acid, zinc salt; Zinc distearate; Zinc octadecanoate; Zinc soap

Classification: Sat. aliphatic carboxylic acid salt

Definition: Zinc salt of stearic acid

Empirical: C_{36}H_{70}O_{4}Zn

Formula: Zn(C_{18}H_{35}O_{2})_{2}

Properties: Wh. powd., faint char. odor; sol. in acids, aromatic solvs.; insol. in water, alcohol, ether, oxygenated solvs.; dec. by dil. acids; m.w. 632.33; dens. 1.095; m.p. 130 C

Toxicology: ACGIH TLV/TWA 10 mg/m³ (total dust when toxic impurities not present); LDLo (intratracheal, rat) 250 mg/kg; poison by intratracheal route; nuisance dust; no known toxicity to skin; inh. of powd. may cause pulmonary fibrosis and produce death in infants from pneumonitis, with lesions resembling those caused by talc but more severe; TSCA listed

Precaution: Combustible dust; incompat. with acids and alkalis (may react vigorously)

Hazardous Decomp. Prods.: CO, CO₂, ZnO, stearic acid

NFPA: Health 0, Flammability 1, Reactivity 0

Storage: Store in cool, dry area away from ignition sources; mechanical exhaust required

Uses: Lubricant, filler for pharmaceutical tablets/capsules, orals, powds., ointments; protectant in diaper rash and prickly heat prods.; dietary supplement; nutrient

Regulatory: FDA 21CFR §175.105, 175.300, 176.170, 176.180, 176.200, 176.210, 177.1200, 177.1460, 177.1900, 177.2410, 176.170, 176.180, 176.200, 176.210, 177.1200, 177.1460, 177.1900, 177.2410, 178.8994, GRAS; FDA approved for orals; USP/NF, BP, EP compliance; Canada DSL

Chemical Component Cross-Reference

Zinc sulfate
CAS 7733-02-0 (anhyd.); EINECS/ELINCS 231-793-3

UN NA 9161 (DOT)

Synonyms: Sulfuric acid zinc salt (1:1); White copperas; White vitriol; Zinc vitriol

Classification: Inorganic zinc salt

Definition: Reaction prod. of sulfuric acid with zinc; avail. commercially as the monohydrate; avail. as the heptahydrate, mainly for laboratory purposes

Empirical: O₄SZn

Formula: ZnSO₄

Properties: Colorless rhombic cryst. or cryst. powd., odorless; sol. in water, glycerin; almost insol. in alcohol; m.w. 161.43 (anhyd.); dens. 3.74 (15 C); m.p. dec. @ 740 C; loses water of cryst. above 235 C; pH 4.5 (sat. sol'n.)

Toxicology: LD₅₀ (oral, rat) 2949 mg/kg, (IP, mouse) 17,750 µg/kg; LDLo (subcut., mouse) 1500 µg/kg, (IV, dog) 66 mg/kg; poison by ing., ip, subcut., IV; human systemic effects (acute pulmonary edema, GI effects, hypermotility, diarrhea); eye irritant; allergen; irritating to skin and mucous membranes; questionable carcinogen; experimental tumorigen, teratogen, reproductive effects; human mutagenic data; TSCA listed

Hazardous Decomp. Prods.: Heated to decomp., emits toxic fumes of SOₓ and ZnO

HMIS: Health 2, Flammability 0, Reactivity 0

Storage: Hygroscopic; efflorescent in dry air

Uses: Dietary supplement, nutrient, zinc source in pharmaceuticals, orals; ophthalmic astringent; eye lotions; styptics; gargle sprays; skin tonic; medicinally as an emetic

Regulatory: FDA 21CFR §182.90, 182.8997,
Zinc sulfate heptahydrate

CAS: 7446-20-0; EINECS/ELINCS: 231-793-3

Synonyms: Sulfuric acid zinc salt (1:1) heptahydrate; White vitriol; Zinc sulfate (1:1) heptahydrate; Zinc vitriol

Empirical: O₄SZn • 7H₂O

Formula: ZnSO₄ • 7H₂O

Properties: Colorless cryst. or cryst. powd., odorless, astringent taste; insol. in alcohol, glycerin; m.w. 287.54; dens. 1.97; m.p. 100 C; dec. > 500 C; loses water @ 280 C; pH 4.5

Toxicology: LD50 (oral, rat) 2150 mg/kg; (IP, mouse) 260 mg/kg; LDLo (IV, rat) 49 mg/kg, (subcut., dog) 78 mg/kg; poison by subcut., IV, IP routes; mod. toxic by ing.; human poison by unspecified route; experimental reproductive effects

Hazardous Decomp. Prods.: Heated to decomp., emits toxic fumes of SOx and ZnO

HMIS: Health 2, Flammability 0, Reactivity 0

Storage: Keep well closed

Uses: Dietary supplement, nutrient in pharmaceuticals; component of chem. treatments to prevent foot rot infections in animals

Regulatory: BP, EP compliance; FDA 21 CFR §182.90, 182.8997, 582.80, GRAS; Canada DSL

Zinc sulfate (1:1) heptahydrate. See Zinc sulfate heptahydrate

Zinc sulfate monohydrate

CAS: 7446-19-7

Synonyms: Dried zinc sulfate

Empirical: O₄SZn • H₂O

Formula: ZnSO₄ • H₂O
Chemical Component Cross-Reference

Properties: Wh. powd. or gran.; sol. in water; pract. insol. in alcohol; m.w. 179.46; loses water above 238 C
Uses: Ingred. in pharmaceuticals
Regulatory: Canada DSL

Zinc sulfocarbolate; Zinc sulfophenate. See Zinc phenolsulfonate
Zinc undecenoate. See Zinc undecyleneate

Zinc undecylenate
CAS 557-08-4; EINECS/ELINCS 209-155-0
Synonyms: 10-Undecenoic acid, zinc salt; Zinc diundec-10-enoate; Zinc undecenoate
Definition: Salt of undecylenic acid
Empirical: C22H38O4Zn
Formula: [CH=CH(CH2)8COO]2–Zn++
Properties: Wh. powd.; insol. in water, alcohol; m.w. 431.92; m.p. 115-121 C
Precaution: Combustible
HMIS: Health 1, Flammability 0, Reactivity 0
Uses: Antimicrobial, opacifier in pharmaceuticals; topical antifungal agent; fungistat for athlete’s foot medicines
Regulatory: BP, EP compliance; Canada DSL

Zinc vitriol. See Zinc sulfate heptahydrate; Zinc sulfate
Zinc white. See Zinc oxide

Zingerone
CAS 122-48-5; EINECS/ELINCS 204-548-3
FEMA 3124
Synonyms: 2-Butanone, 4-(4-hydroxy-3-methoxyphenyl)-; Gingerone, 4-(4-Hydroxy-3-methoxyphenyl)-2-butane; (4-Hydroxy-3-methoxyphenyl) ethyl methyl ketone; 3-Methoxy-4-hydroxy benzylacetone; Vanillylacetone; Zingerone; Zingiberone
Classification: aromatic alcohol
Empirical: C11H14O3
Formula: HOC6H3(OCH3)CH2CH2COCH3
Properties: Cryst.; sol. in ether, dil. alkalis; sparingly sol. in water, petrol. ether; m.w. 194.22; dens. 1.138-1.139; m.p. 40-41 C; b.p. 187-188 C (14 mm); ref. index 1.5440-1.5450
Toxicology: LD50 (oral, rat) 2580 mg/kg, (skin, rabbit) > 5 g/kg; mod. toxic by ing.; skin irritant; TSCA listed
Precaution: Flamm.
Hazardous Decomp. Prods.: Heated to decomp., emits acrid smoke and irritating fumes
Uses: Synthetic flavor for pharmaceuticals
Features: Sweet vanilla-like flavor
Regulatory: FDA 21CFR §172.515; FEMA GRAS; Canada DSL

   Gluconolactone
acidulant, mild: topicals
   Gluconolactone
acidulant, orals
   Lactic acid
acidulant, parenterals

- Lactic acid

acidulant, pharmaceutical liquids/solids

- Citric Acid Anhyd. Fine Gran. 700 USP FCC

acidulant, pharmaceuticals

- Lactic acid; Purac® HS 50; Purac® HS 88; Purac® PF 90

acidulant, topicals

- Lactic acid

acidulant, vaginals

- Lactic acid

acne control agent

- Sepicontrol A5

acne treatment

- Capryloyl collagen amino acids; Sebomine SB12; Zinc acetate

activator, cell metabolism

- Yeast extract

activator, medical rubber

- Zoco 112 USP

activator, pharmaceutical rubber

- Zoco 112 USP

addition polymer, pharmaceuticals

- Lumulse® PEG 1450; Lumulse® PEG 1450 NF

additive, functional: parenteral solutions

- Standard KCl

additive, functional: tablets

- Standard KCl

adhesion barrier, absorbable: surgical procedures

- Cellulose, oxidized, regenerated

adhesion barrier, absorbable: wound dressings

- Cellulose, oxidized, regenerated

adhesion inhibitor, medical

- Papain

adhesion preventive, medicine

- Papain

adhesion promoter, creams/lotions

- Liponyl 10 BN 6058; Liponyl 10 BN 6069

adhesion promoter, enteric coatings

- Certified® Pharmaceutical Glaze

adhesion promoter, pharmaceuticals

- Liponyl 10 BN 6058; Liponyl 10 BN 6069

adhesion promoter, skin: pharmaceuticals

- Lipomic 601 BN

adhesion promoter, water-soluble bioadhesives

- Plasdone® K-12; Plasdone® K-17

adhesive

- Spray Dried Hydrolysed Fish Gelatin

adhesive, adhesive gels

- Kollidon® 12PF; Kollidon® 17PF; Kollidon® 25; Kollidon® 30; Kollidon® 90F

adhesive agent, hard capsules

- Sammi Gelatine

adhesive agent, pharmaceutical coatings

- Sammi Gelatine

adhesive agent, pharmaceuticals

- Sammi Gelatine; Spray Dried Fish Gelatin

adhesive agent, soft capsules

- Sammi Gelatine

adhesive agent, tablets

- Sammi Gelatine

adhesive, dentures

- Gantrez® AN-119; Gantrez® AN-139; Gantrez® AN-139 BF; Gantrez® AN-149; Gantrez® AN-169

- Karaya (Sterculia urens) gum; MANUCOL® LKK; Methyl vinyl ether/maleic acid copolymer

adhesive, film-forming: pharmaceuticals

- Plasdone® S-630

adhesive, medical

- 1,3-Butanediol dimethacrylate

adhesive, medical plaster

- Heyplast NC 90 Z

adhesive, medical tablets

- Gohsenol GH-17; Gohsenol GL-05

adhesive, ostomy products

- Aqualon® Cellulose Gum; Gantrez® AN-119; Gantrez® AN-139; Gantrez® AN-139 BF; Gantrez® AN-149

- Gantrez® AN-169; Genu® Pectins; Genu® Pectin USP/100; Genu® Pectin USP/200; Genu® Pectin USP-L/200

adhesive, OTC products

- Ganex® V-216; Ganex® V-220

adhesive, pharmaceutical emulsions

- Genu® Pectins; Genu® Pectin USP/100; Genu® Pectin USP/200; Genu® Pectin USP-L/200

adhesive, pharmaceutical suspensions

- Genu® Pectins; Genu® Pectin USP/100; Genu® Pectin USP/200; Genu® Pectin USP-L/200

adhesive, pressure-sensitive: transdermal drug delivery systems

- BIO-PSA® 7-4101 Silicone Adhesive; BIO-PSA® 7-4102 Silicone Adhesive; BIO-PSA® 7-4201 Silicone Adhesive; BIO-PSA® 7-4202 Silicone Adhesive

adhesive substitute

- Edible Beef Gelatin

adhesive, sugar coatings

- Kollidon® VA 64; Kollidon® VA 64 Fine
adhesive, surgical dressings
  - Dextrin
adhesive, tablets
  - Acacia; Granular Gum Arabic Type A-1 NF Premium; Granular Gum Arabic Type A-2 NF Premium; Powdered Gum Arabic Type B-100 NF Premium; Powdered Gum Arabic Type B-200 NF Premium; Spray Dried Gum Arabic Type A-180 NF Premium; Spray Dried Gum Arabic Type A-230 NF Extra
adhesive, tissue
  - Bucrylate
adhesive, tissue: medical applications
  - Bucrylate
adhesive, transdermals
  - Kollidon® 12PF; Kollidon® 17PF; Kollidon® 25; Kollidon® 30; Kollidon® 90F
adhesive, wound care dressings
  - Genu® Pectins; Genu® Pectin USP/100; Genu® Pectin USP/200; Genu® Pectin USP-L/200
adjunct, gastroscopic exams
  - Dow Corning® Medical Antifoam AF Emulsion
adjuvant, buccals
  - Clove (Eugenia caryophyllus) oil
adjuvant, fluid: parenteral solutions
  - Rehydragel® LV
adjuvant, functional: eczema
  - Walnut (Juglans regia) extract
adjuvant, functional: eczema treatment
  - Crodarom Nut O; Walnut (Juglans regia) extract
adjuvant, functional: foot care
  - Crodarom Nut O; Walnut (Juglans regia) extract
adjuvant, impression pastes
  - Eugenol
adjuvant, orals
  - Clove (Eugenia caryophyllus) oil; Eugenol; Sodium acetate trihydrate
adjuvant, parenterals
  - Sodium acetate trihydrate
adjuvant, periodontal dressings
  - Eugenol
adjuvant, pharmaceuticals
  - Carvone; Clove (Eugenia caryophyllus) oil; Diacetyl; Dill (Anethum graveolens) seed oil; Ethyl formate; Eugenol; Fenchyl alcohol; Magnesium chloride hexahydrate; Malt extract; Sodium acetate trihydrate
adjuvant protein, nutritional supplements
  - Byco A; Byco C; Byco O; Hydrolyzed gelatin
adjuvant, synthetic flavors
  - Lumisorb™ PSMO-20 FGK
adjuvant, tablets
  - Dioctyl sodium sulfosuccinate; DSS Granular; DSS Tablet Grade
adjuvant, zinc oxide cement
  - Eugenol
adsorbent
  - Sodium magnesium silicate
adsorbent, antibiotics
  - Diaion® HP20
adsorbent, antidiarrheal products
  - Attapulgite; Bismuth subcarbonate; Bismuth subnitrate; Bismuth subsalicylate; Charcoal, activated; Kaolin; Pharmasorb® Regular; Polycarbophil
adsorbent, biological materials: human vaccines
  - Rehydragel® HPA
adsorbent, biological materials: veterinary vaccines
  - Rehydragel® HPA
adsorbent, buccals
  - Starch
adsorbent, diarrhea treatment tablets
  - Pharmasorb® Regular
adsorbent, direct compression: tablets
  - Fujicalin
adsorbent, encapsulated pharmaceuticals
  - Pectin
adsorbent, endotoxins
  - Kollidon® CL; Kollidon® CL-F; Kollidon® CL/M; Kollidon® CL-SF
adsorbent, oil
  - Cab-O-Sil® EH-5; Cab-O-Sil® H-5; Cab-O-Sil® LM-150; Cab-O-Sil® M-5; Cab-O-Sil® MS-55; Silica
adsorbent, oil: pharmaceuticals
  - Syloid® 244FP
adsorbent, ointments
  - Silica, fumed
adsorbent, orals
  - Aluminum hydroxide; Attapulgite; Starch
adsorbent, parenterals
  - Starch
adsorbent, parenteral solutions
  - Rehydragel® LV
adsorbent, pharmaceutical aerosols
  - Silica, fumed
adsorbent, pharmaceutical creams
Silica, fumed

adsorbent, pharmaceutical powders
Silica, fumed

adsorbent, pharmaceuticals
Aerosil® 90; Aerosil® 150; Aerosil® 380; Aerosil® R974; Aerosil® R8200
Aluminum hydroxide; Attapulgite; Cab-O-Sil® H-5; Charcoal, activated; Pectin
Pharmasorb® Colloidal Pharmaceutical Grade; Rehydragel® CG; Silica dimethyl silylate; Silica, fumed; Silica, hydrated
Siliporite®; Sipernat® 160PQ; Sipernat® 310; Sipernat® 320; Sipernat® 820A

adsorbent, pharmaceutical suspensions
Silica, fumed

adsorbent, polyphenols
Kollidon® CL; Kollidon® CL-F; Kollidon® CL/M; Kollidon® CL-SF

adsorbent, precompression: water-soluble ingredients
Microcrystalline cellulose

adsorbent, rectals
Starch

adsorbent, selective: specialty polymer pharmaceuticals
Selexsorb® CDO-200

adsorbent, skin protectants
Silica, hydrated

adsorbent, small proteins
Diaion® HP20

adsorbent, synthetic: antibiotic purification
Diaion HP10; Sepabeads® SP 206, SP 207

adsorbent, synthetic: bioactive substances
Diaion® HP21; Diaion® HP30; Diaion® HP40; Diaion® HP50

adsorbent, synthetic: enzymes
Diaion® HP21; Diaion® HP30; Diaion® HP40; Diaion® HP50

adsorbent, synthetic: fatty acids
Diaion® HP21; Diaion® HP30; Diaion® HP40; Diaion® HP50

adsorbent, synthetic: vitamin purification
Diaion HP10; Sepabeads® SP 206, SP 207

adsorbent, synthetic: vitamins
Diaion® HP21; Diaion® HP30; Diaion® HP40; Diaion® HP50

adsorbent, tablets
Silica, fumed; Starch

adsorbent, topicals
Pectin; Starch

adsorbent, vaginals
Starch

adsorbent, veterinary antidiarrheal products
Bismuth subsalicylate

adsorbent, water
Kollidon® CL; Kollidon® CL-F; Kollidon® CL/M; Kollidon® CL-SF

adsorption aid, nutritional products
Imwitor® 928

adsorption aid, pharmaceuticals
Imwitor® 928; Witafrol® 7420

aerating agent
Lactic acid esters of mono- and diglycerides of fatty acids

aerating agent, pharmaceutical aerosols
Nitrous oxide

aeration enhancer, pharmaceuticals
Avapol™ EMD

agar substitute
Gelrite®

air displacement agent, inhalants
Carbon dioxide

air displacement agent, pharmaceuticals
Nitrogen

alcohol denaturant, pharmaceuticals
Denatonium benzoate; Methyl isobutyl ketone; Sucrose octaacetate

algicide, antibiotics
Daistat CM 50P; Daistat CM 80; Daistat CMB 90 F; Daistat LM 80; Daistat LMB 90 F; Daistat SM 80; Daistat SMB 90 F

alimentary canal treatment
Bismuth subgallate

alkali, dentifrices
Magnesium hydroxide

alkali, implants
Calcium carbonate

alkali, orals
Calcium carbonate

alkali, otics
Calcium carbonate

alkali, pharmaceuticals
Calcium carbonate

alkalizer, dental products
Sodium hydroxide

alkalizer, effervescent tablets
Sodium bicarbonate

alkalizer, eye washes
Sodium acetate anhydrous; Sodium hydroxide

alkalizer, foot preparations
Sodium borate; Sodium borate decahydrate; Sodium carbonate

alkalizer, inhalants
Sodium hydroxide

Handbook of Pharmaceutical Additives, Third Edition 2266
alkalizer, injectables
- Sodium bicarbonate; Sodium carbonate; Sodium hydroxide

alkalizer, IV
- Potassium hydroxide
- Sodium carbonate; Sodium hydroxide

alkalizer, IV injectables
- Diethanolamine

alkalizer, ophthalmics
- Diethanolamine; Sodium acetate anhydrous; Sodium bicarbonate; Sodium borate; Sodium borate decahydrate; Sodium carbonate; Sodium hydroxide

alkalizer, orals
- Ammonia; Ammonium hydroxide; Potassium hydroxide; Sodium acetate anhydrous; Sodium bicarbonate; Sodium carbonate; Sodium hydroxide

alkalizer, parenterals
- Potassium hydroxide; Sodium acetate anhydrous; Sodium bicarbonate; Sodium carbonate; Sodium hydroxide

alkalizer, pharmaceuticals
- Ammonia; Ammonium hydroxide; Potassium hydroxide; Sodium acetate anhydrous; Sodium bicarbonate; Sodium borate; Sodium borate decahydrate; Sodium carbonate; Sodium hydroxide; Triethanolamine

alkalizer, rectals
- Sodium carbonate; Sodium hydroxide; Triethanolamine

alkalizer, scalp lotions
- Sodium borate; Sodium borate decahydrate

alkalizer, topicals
- Potassium hydroxide; Sodium acetate anhydrous; Sodium hydroxide; Triethanolamine

alkalizer, urinary
- Potassium citrate; Sodium succinate

alkalizer, urine
- Citric acid monohydrate

alkalizer, vaginal douches
- Sodium carbonate

alkalizer, vaginals
- Sodium hydroxide; Triethanolamine

alkylating agent, cephalosporin
- Semisynthesis
- Bis (trimethylsilyl) urea

alkylating agent, penicillin semisynthesis
- Bis (trimethylsilyl) urea

alkylation agent, pharmaceutical synthesis
- Vinyl bromide

alternative, sustained-releases
- Protacid™; Protanal®

amino acid source, IV applications
- Lysine acetate

ammonia source
- Ammonium carbonate

amphiphilic agent, drug delivery
- Almond oil PEG-6 esters; Corn oil PEG-6 esters; Hydrogenated palm/palm kernel oil PEG-6 esters; Labrafﬁl® Isostearique; Labrafﬁl® M 2125 CS
- Olive oil PEG-6 esters; Peanut oil PEG-6 esters; Triisostearin PEG-6 esters

amphiphilic oil, creams/lotions
- Propylene glycol caprylate/caprate

amphiphilic oil, gels
- Propylene glycol caprylate/caprate

amphiphilic oil, pharmaceuticals
- Propylene glycol caprylate/caprate

anabolic regulator, nutritional supplements
- Polyplasdone® INF-10

analeptic, pharmaceuticals
- Caffeine

analgesic
- Antipyrine; Asafetida (Ferula asafoetida) gum; BL-9EX; Cloisonné®; Cosmica®
- Custosense LAV; Custosense PM; Duocrome®; Ethyl ether; Gemtone®
- Gentisic acid; Morpholine; Piperazine; Trichloroethylene

analgesic, acne preparations
- Aloe barbadensis gel

analgesic, burn treatment
- Orange (Citrus aurantium dulcis) peel wax; Orange Wax

analgesic, cold sore preparations
- Camphor; Eugenol; Lidocaine

analgesic, creams
- Aloe barbadensis gel

analgesic, dental products
- Eugenol

analgesic, first aid preparations
- Aloe barbadensis gel

analgesic, herbal
- Actiphyte® of Queen-of-the-Meadow conc.

analgesic, lumbar
- Methyl salicylate

analgesic, medicine
- Antipyrine; Gentisic acid; Salicylamide

analgesic, mild
- L-Camphor

analgesic, mouth pain preparations
- Eugenol; Lidocaine
analgesic, ointments
   Emalex 709

antimicrobial, antidandruff shampoos
- Disodium undecylamido MEA-sulfosuccinate; Nipacide® PX-R; Rewocid® UTM 185

antimicrobial, antifungal skin medications
- Calcium propionate

antimicrobial, antifungal skin treatment
- Calcium propionate

antimicrobial, antiplaque dental products
- Chlorhexidine diacetate; Chlorhexidine digluconate

antimicrobial, antiseptics
- m-Cresol

antimicrobial, aqueous pharmaceuticals
- Dimethyl oxazolidine

antimicrobial, aqueous topicals
- Oxaban®-A

antimicrobial, bacterial infections
- Tea tree (Melaleuca alternifolia) oil

antimicrobial, balms
- Tea tree (Melaleuca alternifolia) oil

antimicrobial, biological fluids/solutions
- Chlorobutanol

antimicrobial, biologics
- Formaldehyde

antimicrobial, buccals
- Thymol

antimicrobial, cold sterilization
- Domiphen bromide

antimicrobial, corticosteroid creams
- Sorbic acid

antimicrobial, cough syrups
- Cetylpyridinium chloride

antimicrobial, creams/lotions
- Orange Wax, Deodorized

antimicrobial, dental products
- Sodium benzoate

antimicrobial, dentifrices
- p-Chloro-m-cresol; Sodium benzoate

antimicrobial, deodorants
- Orange Wax, Deodorized

antimicrobial, dermatologicals
- ONAMER® M; Sorbic acid

antimicrobial, diaper rash medicines
- Calcium undecylenate

antimicrobial, digestive aids
- Lactic acid

antimicrobial, emulsions
- Cetylpyridinium chloride

antimicrobial, erythema treatment
- NAB Hawthorn Extract

antimicrobial, external
- Pyrogallol

antimicrobial, eye drops
- Boric acid; Phenylmercuric acetate

antimicrobial, eye/ear drops
- Thimerosal

antimicrobial, eye lotions
- p-Chloro-m-cresol; m-Cresol

antimicrobial, eye washes
- Quaternium-15

antimicrobial, feminine hygiene prods
- Hexetidine

antimicrobial, folk medicine
- Ocimum sanctum

antimicrobial, foot treatment

antipruritic, topicals
  L-Camphor
antipyretic, medicine
  Salicylamide
antipyretic, pharmaceuticals
  Phenyl salicylate
antipyretic treatment
  Sodium salicylate
antirachitic treatment
  Ergocalciferol
antirheumatic treatment
  Sodium salicylate
antisagging agent, antidandruff shampoos
  Bentone® EW
antiscorbutic
  Lemon (Citrus medica limonum) juice
antiseborrheic agent
  Tioxolone; Tioxolone Water Soluble 5%
antiseborrheic agent, antidandruff shampoos
  Selenium sulfide
antiseborrheic agent, seborrheic blepharitis
  Selenium sulfide
antiseborrheic agent, skin treatment
  Capryloyl collagen amino acids; Lipacide™ C8CO
antiseptic
  Aluminum acetate; Aluminum chloride anhydrous; Ammonium alum; Asafetida (Ferula asafoetida) gum; Bay (Pimienta acris) oil
  Boric acid; Boron; Cairox® Potassium Permanganate USP Grade; Calcium iodate; L-Camphor
  Capsicum frutescens extract; Carvacrol; p-Chloro-m-cresol; Chloroxylenol;
  Cocotrimonium chloride
  Crodamor Rosemary Oil forte; Damiana (Turnera diffusa); Diazolidinyl urea;
  Dimercury dichloride; Domiphen bromide
  Eucalyptol; Gum benzoin; Hexyl alcohol; 8-Hydroxyquinoline; Magnesium acetate
  Menthalactone; Mercury oxide (ic), red; Mercury oxide (ic), yellow; Myrtrimonium bromide; ß-Naphthol
  Nipacide® MX; Oyster shell powder; PCA ethyl cocoyal arginate; Phenoxyisopropanol;
  Phenylmercuric nitrate, basic
  Polyquat 50; Potassium bisulfite;
  Potassium iodide; Potassium persulfate;
  Propyl alcohol
  Pyrocatechol; Salicylic acid; Silver nitrate;
  Sodium benzoate; Sodium bisulfite
  Sodium peroxide; Unichem ZPS; Urea peroxide; Zinc acetate; Zinc carbonate
  Zinc chloride
antiseptic, acne treatment
  Actiphyte® of Patchouli
antiseptic, aerosol wound treatment
  Tetramethyliurium disulfide
antiseptic, aminoglycoside medications
  Sodium sulfite
antiseptic, aminoglycoside pharmaceuticals
  Sodium sulfite
antiseptic, athlete's foot preparations
  Actiphyte® of Patchouli; Bardac® 2240; Bardac® 2270; Bardac® 2270E;
  Didecyldimonium chloride
antiseptic, bacterial infections
  Tea tree (Melaleuca alternifolia) oil
antiseptic, balms
  Tea tree (Melaleuca alternifolia) oil
antiseptic, bed-sores
  Clorpactin WCS-90; Oxychlorosene
antiseptic, biological fluids/solutions
  Chlorobutanol
antiseptic, botanical
  Patchouli (Pogostemon cablin) extract
antiseptic, buccals
  Methyl salicylate; Thymol
antiseptic, creams
  Myrtrimonium bromide; Pentonium 4Br40
antiseptic, cuts
  Cajeput (Melaleuca leucadendron) oil
antiseptic, dentifrices
  CAE; Methyl salicylate
antiseptic, dusting powders
  Bismuth subgallate
antiseptic enhancer
  Benzalkonium chloride
antiseptic, external
  Alcohol
antiseptic, external: veterinary medicine
  L-Camphor
antiseptic, eye lotions
  Calcium chloride
antiseptic, fungal infections
  Tea tree (Melaleuca alternifolia) oil

Handbook of Pharmaceutical Additives, Third Edition

2270E
antiseptic, topical anti-infective preparations
Cetearyl alcohol; Crodacol 1618; Isopropyl alcohol; Sodium iodide
antiseptic, topical antiplaque dental products
Chlorhexidine digluconate
antiseptic, topicals
Bardac® 2240; Bardac® 2270; Bardac® 2270E; Basic violet 3; Benzethonium chloride
Benoic acid; Bismuth; Cetethyldimonium bromide; Cetrimonium bromide; Chlorhexidine digluconate
Chlorobutanol; D&C Red No. 6; D&C Red No. 7; Dichlorobenzyl alcohol; Didecyldimonium chloride
Gum benzoin; Hexamidine diisethionate; 4-Hexylresorcinol; Hydrogen peroxide; Iodine Methyl salicylate; Oxychlorosene; Phenethyl alcohol; Phenosept PG; Phenylmercuric borate; Potassium iodate; PVP-Iodine 30/06; PVP-Iodine 30/06 M10; Resorcinol; Sodium sulfite
α-Terpineol; Tetramethylthiuram disulfide; Zinc carbonate
antiseptic, topicals: surgical
scrubs/wipes/lubricants
Chlorhexidine digluconate
antiseptic, transmucosal pharmaceuticals
Ethyl ether
antiseptic, urinary tract
Mandelic acid; Nalidixic acid
antiseptic, vaginals
Sodium iodide
antiseptic, veterinary ointments/shampoos
Thymol
antiseptic, veterinary products
Methylene blue trihydrate; 2,2′-Thiobis (4,6-dichlorophenol); Zinc acetate; Zinc carbonate
antiseptic, veterinary skin care
Tea tree (Melaleuca alternifolia) oil
antiseptic, weak
Storax (Liquidambar orientalis)
antiseptic, wound cleansing
Hydrogen peroxide
antiseptic, wound treatment
Hydrogen peroxide; Sodium hypochlorite; Tea tree (Melaleuca alternifolia) oil
antisettling agent, calamine lotion
PEG-2M; PEG-5M; PEG-7M; PEG-9M; PEG-14M
PEG-20M; PEG-23M; PEG-45M; PEG-90M
PEG-115M
Polyethylene glycol; Polyox® WSR 205; Polyox® WSR 301; Polyox® WSR 303; Polyox® WSR 308; Polyox® WSR 1105; Polyox® WSR Coagulant; Polyox® WSR N-10; Polyox® WSR N-12K; Polyox® WSR N-60K; Polyox® WSR N-80; Polyox® WSR N-750
antisettling agent, ointments
Silica, fumed; Wacker HDK® N20; Wacker HDK® V15
antisettling agent, pharmaceutical aerosols
Silica, fumed; Wacker HDK® N20
antisettling agent, pharmaceutical creams
Silica, fumed; Wacker HDK® N20; Wacker HDK® V15
antisettling agent, pharmaceutical powders
Silica, fumed; Wacker HDK® N20
antisettling agent, pharmaceuticals
Silica, fumed; Wacker HDK® N20; Wacker HDK® N20 ST; Wacker HDK® V15
antisettling agent, pharmaceutical suspensions
Silica, fumed; Wacker HDK® N20; Wacker HDK® V15
antisettling agent, tablets
Silica, fumed; Wacker HDK® N20
antispasmodic
Cajeput (Melaleuca leucadendron) oil; Damiana (Turnera diffusa); Eucalyptus globulus oil; Spearmint (Mentha viridis) oil
antispasmodic, folk medicine
Ocimum sanctum
antispasmodic, pharmaceuticals
Camphor
antispotriatic treatment
Allantoin
antistat
Cachalot® AR-20; Cachalot® M-43; Chloro-2-hydroxypropyl trimonium chloride; Dicapryl/dicaprylyl dimonium chloride; Isostearamide DEA
antistat, anhydrous systems
Ricinoleamidopropyl ethylidimonium ethosulfate
antistat, antibiotics
Daistat CM 50P; Daistat CM 80; Daistat CMB 90 F; Daistat LM 80; Daistat LMB 90 F; Daistat SM 80; Daistat SMB 90 F
antistat, antidandruff shampoos
Rewocid® UTM 185
antistat, capsules
Carbowax® PEG 400; Carbowax® PEG 600
Functional/Application Index

antistat, clear products
- Ricinoleamidopropyl ethylidimonium ethosulfate

antistat, dentifrices
- Carbowax® PEG 1450; Carbowax® PEG 3350; Nikkol Sarcosinate LN; Nikkol Sarcosinate MN; Sodium myristoyl sarcosinate

antistat, dermatologicals
- Myristamide DEA

antistat, medicated cleansers
- Ricinoleamidopropyl betaine

antistat, ointments
- MERPOL® HCS; T-Maz® 85 Special; T-Maz® 85K

antistat, opacified products
- Carbowax® PEG 1450; Carbowax® PEG 3350; Nikkol Sarcosinate LN; Nikkol Sarcosinate MN; Sodium myristoyl sarcosinate

antistat, pharmaceutical creams/lotions
- Carbowax® PEG 400; Carbowax® PEG 600

antistat, pharmaceuticals
- Abil® B 8863; Arlatone® T; Ceresine C; Ceresine K; Hyaluronic acid
- Liposorb S-20K; Liposorb TS-20A; Myristamide MEA; Paxyl CM 1000; Paxyl CS 20
- PEG-40 sorbitan peroleate; PEG-20 sorbitan palmitate; PEG-2 stearate; Pluracol® E1000; Pluracol® E2000; Pluracol® E4500; Pluracol® E8000; Poldironium chloride; Polypax IPM; Polypax IPP
- Polypax PD 6000; Polypax SMO; Polypax SMO (Tech); Polyquat 188; Polyquaternium-1 Quaternium-22; Quaternium-24; Quaternium-26; Ricinoleamidopropyl ethylidimonium ethosulfate; Ritabate 20 Ritabate 40; Ritabate 60; Ritabate 80; Stearamidopropyl dimethylamine; Tetronic® 90R4
- Triocanoin; Volpo C2; Volpo C20; Volpo L3

antistat, topicals
- Incropol CS-20; PEG-2 stearate

antisticking agent, pharmaceuticals
- Dry-Flo®

antisticking agent, sugar-coated tablets
- Lutrol® E 1500; Lutrol® E 3350; Lutrol® E 4000; Lutrol® E 6000; PEG-125

antisticking agent, tablets
- Labrafac® CC; SilLCRON® G-100; SilLCRON® G-640; SilLCRON® G-650

antitackifier, aerosols
- Altaic 500 USP

antitackifier, carbomer products
- Ceraphyl® 45

antitackifier, creams
- Crodamol PMP; PPG-2 myristyl ether propionate

antitackifier, dental waxes
- Multiwax® W-445

antitackifier, emulsions
- PPG-2 myristyl ether propionate

antitackifier, film enhancement
- Altalc 400 USP

antitackifier, medicated creams
- Multiwax® W-445

antitackifier, medicated unguents
- Multiwax® W-445

antitackifier, ointments
- Crodamol PMP

antitackifier, pharmaceuticals
- Altalc 400 USP; Cremophor® S 9; Lipomic 601 BN; Multiwax® ML-445; Multiwax® W-445
- PEG-9 stearate; PPG-2 myristyl ether propionate

antitackifier, tablet coatings
- Altalc 400 USP

antitackifier, tablets
- Altalc 500 USP

antitackifier, topicals
- Altalc 400 USP

antitackifier, oral solutions
- Dow Corning® Q7-9120 Silicone Fluid; Schercemol OHS

antitackifier, tablet coatings
- Altalc 400 USP

antitackifier, aerosols
- Altalc 500 USP

antitackifier, pharmaceuticals
- Altalc 400 USP; Cremophor® S 9; Lipomic 601 BN; Multiwax® ML-445; Multiwax® W-445
- PEG-9 stearate; PPG-2 myristyl ether propionate

antitubercular drug
- Horsetail (Equisetum arvense) extract

antitussive
- Thyme (Thymus vulgaris)

anti-ulcerative, medicine
- Oryzanol

anti-urologic
- Potassium citrate

antiwhitening agent, pharmaceuticals
- Rhodorsil® Antifoam 70452

aperient, mild laxative
- Damiana (Turnera diffusa)

aphrodisiac
- Asafetida (Ferula asafoetida) gum

API, lozenges
- Zinc gluconate

API, topicals
- Pharmalan USP

API, veterinary topicals
- Pharmalan USP

appetite control agent
- Edicol®

appetite stimulant
- Sulfuric acid

    Walocel® C 1000 A; Walocel® C 2000 A;
    Walocel® C 10000 A

binder, capsules
  - Arboce® A 300; Calcium phosphate dibasic;
    Compritol® 888 ATO;
    C*PharmMannidex DC (200 grade) 16702;
    Dritex S
  - Glyceryl behenate; Hydrogenated cottonseed oil;
    Hydrogenated palm oil;
    Kollidon® 12PF; Kollidon® 17PF
    Kollidon® 25; Kollidon® 30; Kollidon® 90F;
    Maltodextrin; Maltrin® M510
    Maltrin® QD M500; Maltrin® QD M600;
    Microcrystalline cellulose; PEG-8M; Starch;
    pregelatinized

binder, cleansers
  - Maltrin® QD M550

binder, coatings: medical applications
  - Ethylene/VA copolymer

binder, coatings: surgical applications
  - Ethylene/VA copolymer

binder, compressed tablets
  - PEG-180; Powdered Guar Gum Type A;
    Powdered Guar Gum Type AA; Powdered
    Guar Gum Type B; Powdered Guar Gum
    Type BB
binder, controlled-release preparations
Tylose® H 20 P2 PHA

binder, controlled-releases
Methocel® E4M Premium; Methocel® K4M Premium; Methocel® K15M Premium; Methocel® K100LV Premium; Methocel® K100M Premium

binder, controlled-release tablet coatings
PVM/MA copolymer, butyl ester

binder, controlled-release tablets
Ethocel™ Standard 4 Premium; Ethocel™ Standard 7 Premium; Ethocel™ Standard 14 Premium; Ethocel™ Standard 20 Premium; Ethocel™ Standard 45 Premium; Ethocel™ Standard 100 Premium; Polycarbophil

binder, controlled-release tablets: pharmaceuticals
Noveon® AA-1

binder, creams/lotions
Isostearic acid; Methocel® K4M Premium; PVP/dimethylaminoethylmethacrylate copolymer

binder, dental products
Gelatin; Magnesium aluminum silicate

binder, denture adhesives
Aqualon® 7H3XF

binder, denture retaining agents
Luviform® FA 119; Luviform® FA 139

binder, direct compression
Byco A; Byco C; Byco O; C*PharmDry 01984; C*PharmGel 12012; C*PharmMannidex DC (200 grade) 16702; Hydrolyzed gelatin; Lycatab® C; Microcel® 101; Starch 1500®; Starch 1500® G; Starch 1500® LM; Tabulose® 101

binder, direct compression: capsules
Anhydrous Emcompress®; Anhydrous Emcompress®; Emcompress®; Emcompress®; Ludipress®; Pharmatose® DCL 14; Pharmatose® DCL 22

binder, direct compression: chewable lozenges
Ludipress® LCE

binder, direct compression: chewable tablets
Candex®; Candex® Plus; Emdex®; Ludipress® LCE; Pharmatose® DCL 22; Sugartab®

binder, direct compression: effervescent tablets
Ludipress® LCE

binder, direct compression: nonchewable tablets
Emdex®

binder, direct compression: pharmaceuticals
Copolyvidone; Lycatab® Mineral; Prosolv SMCC™ 50

binder, direct compression: sachets
Pharmatose® DCL 14

binder, direct compression: solid dosages
Avicel® PH-112; Avicel® PH-113; Avicel® PH-200; Avicel® PH-301; Avicel® PH-302

binder, direct compression: tablets
Anhydrous Emcompress®; Anhydrous Emcompress®; Arboce® A 300; Avicel® PH-101; Avicel® PH-102; Avicel® PH-103; Avicel® PH-105; Avicel® PH-112; Avicel® PH-113; Avicel® PH-200; Avicel® PH-301; Avicel® PH-302; Candex®; Candex® Plus; Emcompress®; Emdex®; Ethocel™ Standard 4 Premium; Ethocel™ Standard 7 Premium; Ethocel™ Standard 14 Premium; Ethocel™ Standard 20 Premium; Ethocel™ Standard 45 Premium; Ethocel™ Standard 100 Premium; Glucidex® IT6; Glucidex® IT8; Glucidex® IT12; Glucidex® IT19; Glucidex® IT21; Glucidex® IT29; Glucidex® IT33; Glucidex® IT38; Glucidex® IT47; Kollidon® VA 64; Kollidon® VA 64 Fine; Lactopress®; Anhydrous; Lactopress® Spray-Dried Ludipress®; Maltrin® M150; Maltrin® M510; Maltrin® QD M440; Maltrin® QD M500; Maltrin® QD M550; Maltrin® QD M580; Maltrin® QD M600; Mannogem™ Mannitol Granular; Mannogem™ Mannitol Granulor; Mannogem™ Mannitol Granular 2080; Mannogem™ Mannitol Granular 3215; Pharmatose® DCL 14; Pharmatose® DCL 22; Plasdone® S-630; Prosolv SMCC™ 90; Prosolv SMCC™ HD90; Puracal® DC; Pure-Dent® B810; Sancel-101; Sancel-102; Sancel-105; Sancel-C; Sancel-W; Solka-Floc® 100; Sorbagem™ 834; Sorbogem™ 1162; Sorbogem™ 2016; Spress® B820; Sugartab®; Vivapur® 12; Vivapur® 14

binder, direct compression: vitamins
Sugartab®

binder, direct compression: water-soluble tablets
Sugartab®

binder/disintegrant, tablets
Silica
Functional/Application Index

**binder, dry compression: tablets**
Ethocel™ Standard 4 Premium; Ethocel™ Standard 7 Premium; Ethocel™ Standard 14 Premium; Ethocel™ Standard 20 Premium; Ethocel™ Standard 45 Premium; Ethocel™ Standard 100 Premium

**binder, dry granulation**
Arbocel® M 80; Arbocel® P 290; Avicel® PH-101; Avicel® PH-102; Avicel® PH-103; Avicel® PH-105; C*PharmDry 01984; C*PharmMannidex DC (200 grade) 16702; Hydrolyzed gelatin; Maltrin® M100; Maltrin® M150; Microcel® 102; Pure-Dent® B700; Pure-Dent® B810; Tabulose® 102

**binder, dry granulation: tablets**
Plasdone® S-630; Spress® B820

**binder, dry mixes**
Maltrin® M510

**binder, dry: pressure-sensitive tableting**
Ceolus® KG-802

**binder, dry: pressure-sensitive tableting: antibiotics**
Ceolus® KG-802

**binder, dry: pressure-sensitive tableting: enzymes**
Ceolus® KG-802

**binder, dry: pressure-sensitive tableting: film-coated granules**
Ceolus® KG-802

**binder, dry vitamin preparations**
Aqualon® N-7; Aqualon® N-10; Aqualon® N-14; Aqualon® N-22; Aqualon® N-50; Aqualon® N-100; Ethocel™ Standard 4 Premium; Ethocel™ Standard 7 Premium; Ethocel™ Standard 14 Premium; Ethocel™ Standard 20 Premium; Ethocel™ Standard 45 Premium; Ethocel™ Standard 100 Premium

**binder, ear drops**
Cekol® 700

**binder, emulsion: pharmaceuticals**
Sofracerine 165; Sofracerine 185

**binder, encapsulation**
Avicel® PH-101; Avicel® PH-102; Avicel® PH-103; Avicel® PH-105

**binder, encapsulation: hard gelatin capsules**
Avicel® PH-112; Avicel® PH-113; Avicel® PH-200; Avicel® PH-301; Avicel® PH-302

**binder, eye drops**
Cekol® 700

**binder, film coating: tablets**
PVP/VA S-630

**binder, fluid bed processes**
Polyalditol X110; Polyalditol X120

**binder, food**
Maltrin® QD M550; Maltrin® QD M580

**binder, foot powders**
Purity® 21C

**binder, granulation**
PVP/VA E-535; PVP/VA E-635; PVP/VA E-735; PVP/VA I-335; PVP/VA I-535; PVP/VA I-735

**binder, granulation: controlled-release coatings**

**binder, granulation: controlled-release hydrophilic matrix systems**

**binder, granulation: sustained-release orals**
Vivapharm® 50

**binder, granules**
Kollidon® 12PF; Kollidon® 17PF; Kollidon® 25; Kollidon® 30; Kollidon® 90F

**binder, hard gelatin encapsulation**
Capsulec 51-SB; Capsulec 51-UB; Capsulec 56-SB; Capsulec 56-UB; Capsulec 60-SB; Capsulec 60-UB; Capsulec 62-SB; Capsulec 62-UB

**binder, herbal pharmaceuticals**
Vivapur® 12; Vivapur® 14
binder, hypoallergenic products
  Dioctyl malate
binder, IM injectables
  Gelatin
binder, inhalants
  Gelatin
binder, IV
  Gelatin
binder, liquid dosages
  Benecel® M; Benecel® ME1; Benecel® ME2; Benecel® MP3; Benecel® MP6
  Benecel® MP8; Benecel® MP9
binder, liquid products
  Maltrin® QD M550
binder, lozenges
  Beeswax
binder, matrix: orals
  Hydroxypropyl methylcellulose phthalate
binder, matrix: pharmaceuticals
  Cellulose acetate trimellitate
binder, matrix: solid dosages
  C-A-P Enteric Coating Polymer;
  Hydroxypropyl methylcellulose phthalate
binder, medical applications
  CMP-I®; HCA-411; HLA-198; Hydrolyzed whey protein
binder, medical nutritional preparations
  Maltrin® M150; Maltrin® M180; Maltrin® M200; Maltrin® QD M550; Maltrin® QD M580
  Maltrin® QD M600
binder, medical tablets
  Gohsenol GH-17; Gohsenol GL-05
binder, medicated jellies
  Magnesium aluminum silicate
binder, medicinal skin creams
  Hectorite BC 840
binder, microencapsulation
  Byco M
binder, moisture: pharmaceuticals
  Hydrolyzed vegetable protein
binder, moisture-sensitive APIs
  Lactopress® Anhydrous
binder, moisture-sensitive pharmaceuticals
  Pharmcel® 112
binder, moisture-sensitive products
  Starch 1500® LM
binder, mouth preparations
  Beeswax
binder, nose drops
  Cekol® 700
binder, nutritional preparations
  HCA-411; HLA-198; Hydrolyzed casein;
  Hydrolyzed milk protein; Hydrolyzed whey
binder, ophthalmics
  Hydroxyethylcellulose; Hydroxypropyl methycellulose
binder, orals
  Alginic acid; Beeswax; Beeswax, white;
  Beeswax, yellow; Byco M
  Carrageenan (Chondrus crispus); Gelatin;
  Hydroxyethylcellulose;
  Hydroxypropylcellulose; Hydroxypropyl methycellulose
  Magnesium aluminum silicate; Polyvinyl acetate; Propylene glycol alginate; Spray
  Dried Fish Gelatin; Starch
  Tristearin; Zein
binder, OTC chewable formulations
  Parteck™ SI 150; Parteck™ SI 400 LRS;
  Parteck™ SI 400 PH; Parteck™ SI 500
binder, OTC effervescents
  Parteck™ SI 150; Parteck™ SI 400 LRS;
  Parteck™ SI 400 PH; Parteck™ SI 500
binder, OTC lozenges
  Parteck™ SI 150; Parteck™ SI 400 LRS;
  Parteck™ SI 400 PH; Parteck™ SI 500
binder, otics
  Hydroxyethylcellulose
binder, o/w emulsions
  Granular Gum Ghatti #1; Powdered Gum Ghatti #1
binder, parenterals
  Plasdone® C-15; Plasdone® C-30; Starch
binder, pellets
  Microcel® 101; Tabulose® 101
binder, pharmaceutical aqueous film coating
  Maltrin® QD M580
binder, pharmaceutical aqueous film coatings
  Maltrin® M100; Maltrin® M180
binder, pharmaceutical body powders
  Pure-Dent® B812; Pure-Dent® B815; Pure-Dent® B816

Natural Prosweet® Liq. #604

bitterness reducing agent, syrups
Natural Prosweet® Liq. #604; Natural Prosweet® Powd. #875

bleaching agent, hydrogen peroxide: antiseptics
Cosmetic Grade Hydrogen Peroxide 35%; Cosmetic Grade Hydrogen Peroxide 50%; Cosmetic Grade Hydrogen Peroxide 70%

bleaching agent, hydrogen peroxide: pharmaceuticals
Cosmetic Grade Hydrogen Peroxide 35%; Cosmetic Grade Hydrogen Peroxide 50%; Cosmetic Grade Hydrogen Peroxide 70%
bodying agent, absorption enhancement
  Caprol® 3GS
bodying agent, acne creams/lotions
  Crodamol SS
bodying agent, antibiotic ointments
  Crodamol SS
bodying agent, burn creams
  Crodamol SS
bodying agent, clinical nutrition
  Capmul® GMS-50; Caprol® 3GS; Dritex S; Hydrokote® 112; Hydrokote® AP5; Hydrokote® M
bodying agent, coatings
  Capmul® GMS-50; Caprol® 3GS; Dritex S; Hydrokote® 112; Hydrokote® AP5; Hydrokote® M
bodying agent, creams
  Eumulgin® B2
bodying agent, creams/lotions
  Dimethiconol panthenol; Lexemul® EGMS; Potassium alginate
bodying agent, creams: pharmaceuticals
  Cosmowax J
bodying agent, delivery/absorption enhancement
  Capmul® GMS-50; Polyglyceryl-6 distearate; Polyglyceryl-3 stearate
bodying agent, delivery enhancement
  Caprol® 3GS
bodying agent, dental impression compounds
  Potassium alginate
bodying agent, dermatological emulsions
  Capmul® GMS-50
bodying agent, dermatologicals
  Caprol® 3GS; Dritex S; Hydrokote® 112; Hydrokote® AP5; Hydrokote® M; Polyglyceryl-6 distearate; Polyglyceryl-3 stearate
bodying agent, direct compression: tablets
  Maltrin® M150
bodying agent, dry granulation
  Maltrin® M150
bodying agent, emulsions
  Lexemul® 515
bodying agent, encapsulation
  Hydrokote® 112; Hydrokote® AP5; Hydrokote® M
bodying agent, infant formulas
  Capmul® GMS-50; Caprol® 3GS
bodying agent, lotions
  PEG-2 distearate
bodying agent, nutritional/sports supplements
  Capmul® GMS-50
bodying agent, nutritional supplements
  Caprol® 3GS; Dritex S; Hydrokote® 112; Hydrokote® AP5; Hydrokote® M
bodying agent, ointments
  Eumulgin® B1; Eumulgin® B2; STEPAN® GMS Pure
bodying agent, pharmaceutical creams
  Eumulgin® B1
bodying agent, pharmaceutical creams/lotions
  Biosil Basics DL-30; Dimethiconol panthenol
bodying agent, pharmaceutical liquids
  Hystar® 8070; Sorbitol
bodying agent, pharmaceuticals
  ADM Clintose® CR 10; ADM Clintose® CR 15; ADM Clintose® CR 18; Biosil Basics DL-30; Capmul® GMS-50; Caprol® 3GS; Carbowax® Sentry® PEG 300; CC-902I; Ceteareth-12; 42/43 Corn Syrup; Cosmowax K; Dimethiconol panthenol; Ethosperse® G-26; Ethosperse® LA-4; Ethosperse® LA-12; Genu® Pectins; Genu® Pectin USP/100; Genu® Pectin USP/200; Genu® Pectin USP-L/200; Glyceryl hydroxystearate; Hydrogenated cottonseed oil; Hydrogenated palm oil; Hydrogenated soybean oil; Hydrokote® 112; Hydrokote® AP5; Hydrokote® M; Meadowfoam (Limnanthes alba) seed oil; PEG-2 distearate; Polydextrose; PPG-2-ceteareth-9; Pricerine™ 9099; Sta-Lite® 370; Sta-Lite® III; Sta-Lite® III F; STEPAN® GDS 386F; W.G.S. Handbook of Pharmaceutical Additives, Third Edition 2322
cerebral distress treatment
- 2-Pyrrolidone
chapped skin treatment
- Kukui (Aleurites moluccana) nut oil
- Chap stick, ointments
- Bentone Gel® EUG V
chelating agent
- Citric acid monohydrate; Melanin; Potassium citrate
chelating agent, antibiotics
- Edetic acid
chelating agent, antihistamines
- Edetic acid
chelating agent, buccals
- Tetrasodium pyrophosphate
chelating agent, colors
- Citric acid monohydrate
chelating agent, dental products
- Tetrasodium pyrophosphate
chelating agent, drug stabilization
- Pentasodium pentetate; Tetraammonium EDTA; Tetrasodium EDTA; Trisodium HEDTA; Versene 100
- Versene 100 EP; Versene 100 XL; Versene 220; Versene Acid; Versene CA
- Versene Diammonium EDTA; Versene Tetraammonium EDTA; Versenex 80; Versenol 120
chelating agent, ear drops
- Edetic acid
chelating agent, eye drops
- Edetic acid
chelating agent, flavors
- Citric acid monohydrate
chelating agent, heavy metal ions
- Turpinal® SL
chelating agent, heavy metal poisoning diagnosis
- Edetic acid
chelating agent, heavy metal poisoning treatment
- Edetic acid; Tetraammonium EDTA; Tetrasodium EDTA; Trisodium HEDTA
chelating agent, IM injectables
- Calcium disodium EDTA; Tetrasodium EDTA
chelating agent, inhalants
- Disodium EDTA; Tetrasodium EDTA
chelating agent, injectables
- Calcium trisodium pentetate; Disodium EDTA; Sodium gluconate
chelating agent, iron overload diagnosis
- Edetic acid
chelating agent, iron overload treatment
- Edetic acid
chelating agent, IV
- Calcium disodium EDTA; Disodium EDTA; Pentasodium pentetate; Sodium trimetaphosphate
chelating agent, IV injectables
- Calcium disodium EDTA; Tetrasodium EDTA
chelating agent, local anesthetics
- Edetic acid
chelating agent, medical
- Versene CA; Versene NA
chelating agent, metals: pharmaceuticals
- Dissolvine® E-CA-10; Dissolvine® NA-2-P
chelating agent, nose drops
- Edetic acid
chelating agent, nutritional preparations
- Hydrolyzed casein
chelating agent, ophthalmics
- Disodium EDTA; Edetic acid; Tetrasodium EDTA
chelating agent, oral care
- Potassium citrate
chelating agent, orals
- Calcium disodium EDTA; Disodium EDTA; D-Gluconic acid; Sodium gluconate; Tetrasodium EDTA
chelating agent, otics
- Disodium EDTA; Edetic acid
chelating agent, pharmaceuticals
- Bismuth citrate; Diammonium EDTA; Dipotassium EDTA dihydrate; Disodium EDTA; Edetic acid
- D-Gluconic acid; Hydrolyzed casein; Methyl-α-cyclodextrin; Methyl-β-cyclodextrin; Methyl-γ-cyclodextrin
- Pentasodium pentetate; Sodium gluconate; Sodium trimetaphosphate; Tetraammonium EDTA; Tetrahydroxypropyl ethylenediamine
- Tetrasodium EDTA; Tetrasodium etidronate; Tetrasodium iminodisuccinate; Tetrasodium pyrophosphate; TP OC 370 Trisodium EDTA; Trisodium HEDTA; Versene 100; Versene 100 EP; Versene 100 XL
- Versene 220; Versene Acid; Versene CA; Versene Diammonium EDTA; Versene NA Versene Na2; Versene Tetraammonium EDTA; Versenex 80; Versenol 120

Handbook of Pharmaceutical Additives, Third Edition 2368
Functional/Application Index

| dry blending/instantizing agent, pharmaceuticals | effervescent N-Hydroxysuccinic acid; Sodium phosphate |
| drying aid, coatings | effervescent, analgesics Effer-Soda™ |
| drying aid, sprays | effervescent, antacids Effer-Soda™ |
| dusting agent, aerosols | effervescent, cough/cold products Effer-Soda™ |
| dusting agent, film enhancement | effervescent, ophthalmics Citric acid monohydrate |
| dusting agent, medicated foot powders | effervescent, orals Citric acid monohydrate |
| dusting powder, absorbable: examination gloves | effervescent, pharmaceutical liquids Citric Acid FCC Fine Granular; Citric Acid FCC Granular; Citric Acid FCC Powder |
| dusting powder, absorbable: nonsurgical | effervescent, pharmaceutical powders Effer-Soda™ |
| dusting powder, surgical applications | effervescent, topicals Citric acid monohydrate |
| dusting powder, surgical gloves | elastomer, pharmaceuticals Polysoprene |
| dusting powder, topical starches: pharmaceuticals | electrolyte replenisher, IM injectables Magnesium chloride |
| dye, functional kidney tests | electrolyte replenisher, intraocular injectables Magnesium chloride |
| dyeing assistant, ointments | electrolyte replenisher, ophthalmics Magnesium chloride |
| dye, medicine | electrolyte replenisher, pharmaceuticals Magnesium chloride |
| dysentery treatment | embedding agent, tablets Softisan® 154 |
| Acacia | embedding material, microscopy Storax (Liquidambar orientalis) |
| ear canal infection treatment, external | embedding material, sectioning Colloidal |
| Boric acid | embolizing agent Bucrylate |
| eczema topical treatment, veterinary medicine | emetic Bucrylate |
| Selenium sulfide | zinc sulfate |
| eczema treatment | embolizing agent, medical applications Bucrylate |
| Bismuth subgallate; Crodamol Chamomile | emollient Acacia; Acetylated hydrogenated lanolin; Acetyl trioctyl citrate; Allantoin; Allyl caproate |
| O | Althea (Althea officinalis) root; Althea officinalis extract; Arachidyl alcohol |

emulsifier, w/o: emulsions
  Tego® SMO 80 V; Tego® SMS
emulsifier, w/o emulsions: health care products
  Dow Corning® Emulsifier 10
emulsifier, w/o emulsions: lotions/creams
  Polawax® GP200
emulsifier, w/o emulsions: ointments
  Polawax® GP200
emulsifier, w/o emulsions: pharmaceuticals
  Polawax® GP200
emulsifier, w/o highly polar fats/oils
  Imwitor® 780 K
emulsifier, w/o: hydrocarbon-free ointments
  Dehymuls® E
emulsifier, w/o: hydros products
  Dehymuls® E
emulsifier, w/o: hypoallergenic products
  Vilvanolin® CAB
emulsifier, w/o: infant formulas
  Caprol® 10G40
emulsifier, w/o: lipophilic ointment absorption bases
  Montane® 83
emulsifier, w/o: low-viscosity pharmaceuticals
  Imwitor® 600
emulsifier, w/o: medical products
  Emalex HC-5; Emalex HC-7; Emalex HC-10
emulsifier, w/o: microemulsions
  Caprol® 10G40
emulsifier, w/o: nutritional/sports supplements
  Caprol® 10G40
emulsifier, w/o ointments
  Dehymuls® SMO
emulsifier, w/o: pharmaceutical emulsions
  Tegin® Q; Tego® SMO V
emulsifier, w/o: pharmaceutical fluid emulsions
  Simulsol® 989
emulsifier, w/o: pharmaceutical oils
  Dehymuls® SSO
emulsifier, w/o: pharmaceuticals

  Sorbitan sesquioleate; TEA-oleate; Tego® SMO 80 V; Tego® SMO V; Tego® SMS
  Vilvanolin® CAB; Vilvanolin L-101®; White Swan; Zinc Stearate D USP
emulsifier, w/o: pharmaceutical semifluid emulsions
  Simulsol® 989
emulsifier, w/o: pharmaceutical waxes
  Dehymuls® SSO
emulsifier, w/o phases: pharmaceutical microspheres
  Canola oil glyceride; Eastman® 18-99
emulsifier, w/o phases: solubilization
  Canola oil glyceride; Eastman® 18-99
emulsifier, w/o phases: sustained-releases
  Canola oil glyceride; Eastman® 18-99
emulsifier, w/o phases: topical permeation enhancement
  Canola oil glyceride; Eastman® 18-99
emulsifier, w/o products
  Fancol™ CH
emulsifier, w/o: salves
  Beeswax, synthetic
emulsifier, w/o: suppositories
  Caprol® 10G40; Montane® 83; Montane®
emulsifier, w/o: sustained-releases
Beeswax, synthetic
emulsifier, w/o systems
Emery® 1740; Schercomid SLS; Soyamide DEA
emulsifier, w/o: therapeutic ointments
Vilvanolin® CAB
emulsifier, w/o: topical emulsions
Super Hartolan
emulsifier, w/o: topicals
Ceralan®; Crill 1 NF; Crill 3 NF; Crill 4; Crill 4 NF; Crill 6; Crill 45; Crodesta F-10; Glucate® SS; Imwitor® 780 K; Isolan® GI 34; Isolan® GO 33; Linoleamide DEA; Methyl glucose dioleate; OHlan® Oleamide DEA; Oleamide MEA; Polyglyceryl-3 isostearate; Protegin®; Protegin® W; Protegin® WX; Protegin® X; Schercomid OME; Schercomid SLE; Schercomid SO-A; Schercomid TO-2; Sorbitan sesquioleate; Span® 20; Span® 80V
emulsifier, wound ointments
Colonial Lauricidin®
emulsifier, wound treatment
Medilan™; Medilan™ Ultra
emulsifier, w/o: w/o creams
Argobase EUC 2
emulsifier, w/o: w/o emulsions
Monomuls® 90 O18; Montane® 83
emulsifier, w/o: w/o lotions
Arlacel® 989
emulsifying wax, o/w ointments
Lipobee 102 Prills; Lipowax C Prills; Lipowax D; Lipowax G; Lipowax NI; Lipowax PA Pastilles; Lipowax R2
emulsifying wax, pharmaceuticals
Lipowax C
encapsulating agent
Kleptose®
encapsulating agent, actives
Phospholipon® 80; Phospholipon® 90 G; Phospholipon® 90 H
encapsulating agent, capsules
Kleptose® DC
encapsulating agent, cell entrapment
KELTONE® LVNP
encapsulating agent, clouds: pharmaceuticals
Hi-Cap™ 100
encapsulating agent, controlled-releases
KELTONE® HV; KELTONE® LVNP
encapsulating agent, enzyme immobilization
KELTONE® HV; KELTONE® LVNP
encapsulating agent, flavoring agents: pharmaceuticals
Hi-Cap™ 100
encapsulating agent, flavors
TIC Pretested® Bright Gum Arabic FCC/NF Powder
encapsulating agent, liposoluble vitamins
Acacia
encapsulating agent, oral suspensions
Kleptose® DC
encapsulating agent, pharmaceutical solutions
Kleptose® DC
encapsulating agent, pharmaceutical syrups
Kleptose® DC
encapsulating agent, sachets
Kleptose® DC
encapsulating agent, tablets
Kleptose® DC
encapsulating agent, vitamins
Capsul®; Capsul® TA; Hi-Cap™ 100; N-Lok®; N-Lok® 1930
encapsulation agent, spray-drying
Instant Pure-Cote™ B793
energy source, biological cell processes
Adenosine triphosphate
energy source, clinical nutrition
Captex® 355 EP/NF
energy source, nutritional supplements
Captex® 200P
energy source, parenteral nutrition
D-(+)-Glucose monohydrate
energy source, pharmaceutical microemulsions
Captex® 200P
energy source, pharmaceuticals
Captex® 300EP; Captex® 355 EP/NF
energy source, pharmaceutical suspensions
Captex® 200P
energy source, soft gelatin capsules
Captex® 200P
energy source, suppositories
Captex® 200P
enhancer, esophageal reflux treatment
Protacid™; Protanal®
enhancer, oil absorption: hard capsules
Microcel® 101; Tabulose® 101
enhancer, oil absorption: hard tablets
Microcel® 101; Tabulose® 101
enzyme
Cellulase; Papain
enzyme, antibiotic ointments
  Keratinase
enzyme, biomass conversion
  Hemicellulase
enzyme, carbohydrate hydrolysis
  Pancreatin 3X USP Powd.; Pancreatin 4X USP Granular; Pancreatin 4X USP Powd.; Pancreatin 5X USP Powd.; Pancreatin 6X USP Powd.
  Pancreatin 8X USP Powd.; Pancreatin BP 98; Pancreatin USP 23; Pancrelipase USP
enzyme, carbohydrate research
  Hemicellulase
enzyme cofactor vitamin
  Riboflavin-5′-phosphate sodium
enzyme, digestive aid products
  Amylase; Aspergillus Galactosidase J-P; Biodiastase 1000; Biodiastase 2000; Diastase J-P; Lipase AP12; Lipase AP6; Newlase; Rennet
enzyme, eczema
  Catalase
enzyme, essential oil extraction
  Hemicellulase
enzyme, fat hydrolysis
  Pancreatin 3X USP Powd.; Pancreatin 4X USP Granular; Pancreatin 4X USP Powd.; Pancreatin 5X USP Powd.; Pancreatin 6X USP Powd.
  Pancreatin 8X USP Powd.; Pancreatin BP 98; Pancreatin USP 23; Pancrelipase USP
enzyme, fat-splitting
  Lipase 8 Powd.; Lipase 16 Powd.; Lipase 24 Powd.; Lipase 30 Powd.
enzyme, fat-splitting: pharmaceuticals
  Lipase
enzyme immobilization polymer, pharmaceuticals
  DVB 55; DVB 63; DVB HP
enzyme inhibitor, orals
  Crodasinic LS30; Crodasinic LS30 NP; Crodasinic LS95 NP; Sodium lauroyl sarcosinate
enzyme inhibitor, pharmaceuticals
  Sodium lauroyl sarcosinate
enzyme inhibitor, surgical scrubs
  Crodasinic LS30; Crodasinic LS30 NP; Crodasinic LS95 NP; Sodium lauroyl sarcosinate
enzyme inhibitor, topicals
  Crodasinic LS30; Crodasinic LS30 NP; Crodasinic LS95 NP; Sodium lauroyl sarcosinate
enzyme, lactose hydrolysis: digestive aids
  β-Galactosidase
enzyme, lactose hydrolysis: lactose intolerant products
  β-Galactosidase
enzyme, lactose hydrolysis: pharmaceuticals
  β-Galactosidase
enzyme, pancreatic insufficiency treatment
  SPL High Lipase Pancreatic Enzyme Conc. (PEC); SPL Pancreatin 4X USP; SPL Pancreatin 6X USP; SPL Pancreatin 8X USP; SPL Pancrelipase USP
enzyme, pharmaceuticals
  Aspergillus Galactosidase J-P; Biodiastase 1000; Biodiastase 2000; Diastase J-P; Glucose oxidase; Hemicellulase; Lipase AP12; Lipase AP6; Malt extract; Newlase; Pancreatin 3X USP Powd.; Pancreatin 4X USP Granular; Pancreatin 4X USP Powd.; Pancreatin 5X USP Powd.; Pancreatin 6X USP Powd.
  Pancreatin 8X USP Powd.; Pancreatin BP 98; Pancreatin USP 23; Pancrelipase USP; Rennet
enzyme, plant extract extraction
  Hemicellulase
enzyme, protein hydrolysis
  Pancreatin 3X USP Powd.; Pancreatin 4X USP Granular; Pancreatin 4X USP Powd.; Pancreatin 5X USP Powd.; Pancreatin 6X USP Powd.
  Pancreatin 8X USP Powd.; Pancreatin BP 98; Pancreatin USP 23; Pancrelipase USP; Rennet
enzyme, proteolytic: edema
  Trypsin
enzyme, proteolytic: GI disorders
  Trypsin
enzyme, proteolytic: inhalants
  Trypsin
enzyme, proteolytic: orals
  Trypsin
enzyme, proteolytic: pharmaceuticals
  Pepsin; Pepsin 1:3000 NF XII Powd.; Pepsin 1:6000; Pepsin 1:10,000 Powd. or Gran.; Pepsin 1:15,000 Powd.; Protease
enzyme, proteolytic: protein digestion
  Trypsin; Trypsin 1:75; Trypsin 1:150
enzyme, proteolytic: tissue culture
Trypsin; Trypsin 1:75; Trypsin 1:150
enzyme, proteolytic: wound debridement
Trypsin
enzyme, skin ulcers
Catalase
enzyme, starch-glucose sugar conversion:
pharmaceuticals
Amylase
derm
enzyme system ingredient, blood-clotting mechanism
Vitamin K1
enzyme, topical antibiotic ointments
Keratinase
enzyme, wound treatment
Catalase
etchant, dental products
Phosphoric acid
ethylating agent, pharmaceuticals
Ethyl-p-toluenesulfonate
evacuant, gall bladder
Peanut (Arachis hypogaea) oil
evaporation control agent
Cachalot® AR-20; Cachalot® M-43
evaporation inhibitor, controlled-releases
Polyethylene glycol
evaporation inhibitor, rubbing alcohol
Polyethylene glycol; Polyox® WSR 205; Polyox® WSR 301; Polyox® WSR 303; Polyox® WSR 308; Polyox® WSR 1105; Polyox® WSR Coagulant; Polyox® WSR N-10; Polyox® WSR N-12K; Polyox® WSR N-60K; Polyox® WSR N-80; Polyox® WSR N-750
exchange resin, cation: antibiotics
Polymethacrylate
exchange resin, cation: pharmaceutical purification
Polymethacrylate
exchange resin, cation: pharmaceuticals
Polymethacrylate
exchange resin, weakly acidic cation:
antibiotics
Diaion® WK10
exchange resin, weakly acidic cation:
pharmaceuticals
Diaion® WK10
exchange resin, weakly basic anion:
pharmaceuticals
Amberlite® IRA-67
excipient
Byco O; Carboxymethylcellulose sodium; Glucose; Hydroxypropyl methylcellulose phthalate; Labrafac PC
Maldex G 180; Pharmaburst; Polymgyceryl-3 diostearate; Polymgyceryl-6 distostearate; Polyslalondone® XL; Polyslalondone® XL-10; SS-10MV
excipient, aerosols
Altalc 200 USP; Altalc 300 USP; Labrafal® Isostearique
excipient, antacids
Formaxx™ CaCO₃ 70
excipient, antibiotic purification
Tulsion® CXO-17; Tulsion® CXO-18
excipient, antibiotics
Edetic acid
excipient, antibiotic suspensions
SeaSpen® PF; Viscarin® GP-109NF; Viscarin® GP-209NF
excipient, antifatulents
Dow Corning® Q7-9120 Silicone Fluid
excipient, antihistamines
Edetic acid
excipient, APIs
Pharmagum™ S
excipient, bone-loss treatment tablets
Barcroft™ CS90
excipient, calcium supplements
Calci-Press™ MD
excipient, capsule filling
C*PharmGel DC 93000; Purity® 5; Purity® 825; Purity® 826; Purity® FC
excipient, capsules
Calcium phosphate dibasic dihydrate; Compritol 888; Compritol® 888 ATO; Crodocol C-95 EP; Dextrates
Glyceryl behenate; Labrafac® CC; Labrasol®; Lactochem®; Lycatab® C; Lycatab® PGS; Maltisorb® 75/75; Sheffield Brand Anhydrdous Lactose NF; Sheffield Brand Lactose Monohydrate NF; Sucrose Tribehenin
excipient, chemically unstable APIs
Pearlitol® 25 C; Pearlitol® 50 C
excipient, chewable tablets
Barcroft™ CS90; Calci-Press™ MD; Maltisorb® 75/75; Nu-Tab™ 4001; Nu-Tab™ 4003
excipient, chewable vitamins
Advantose™ FS 95
excipient, chromatographic separation
Tulsion® CXO-17
excipient, coatings
CA-320S
excipient, compression: tablets
Purity® 826
Functional/Application Index

excipient, controlled drug delivery systems
  Purasorb®

excipient, controlled oral drug delivery
  Polyox® WSR 303; Polyox® WSR 1105; Polyox® WSR Coagulant; Polyox® WSR N-10; Polyox® WSR N-60K

Functional/Application Index

excipient, transdermals
-Crossential® O94

excipient, troches
-Carboxymethylcellulose sodium

excipient, vaginal
-Carboxymethylcellulose sodium; Polyethylene; Propylene glycol stearate

excipient, veterinary products
-Labrafil® Isostearique; Labrafil® M 1944 CS; Labrafil® M 2125 CS; Petrolatum; Sulfanilamide

excipient, veterinary topicals
-Pharmalan USP

excipient, Vitamin B12 recovery
-Tulsion® T-335

excipient, Vitamin B12 stabilization
-Tulsion® T-335

excipient, vitamins
-Silica, hydrophobic

excipient, volatile: pharmaceutical topical spray pump systems
-Hexamethyldisiloxane

excipient, water-sensitive ingredients: tablets
-Vivapur® 103; Vivapur® 112

excipient, wet granulation
-Byco A; Byco C; Kollidon® SR; Starch 1500®; Starch 1500® G; Starch 1500® LM

excipient, wet granulation: capsules
-Pharmacel® XL; Primojel®

excipient, wet granulation: granules
-Pharmacel® XL

excipient, wet granulation: solid dosages
-Pharmacel® XL

excipient, wet granulation: sustained-releases
-Eudragit® NE 40 D

excipient, wet granulation: tablets
-Lactochem®; Mannogem™ Geuc Mannitol Pyrogen Free; Mannogem™ Mannitol Powd.; Pharmaceul® XL; Sorbegom™ 712 Sorbegom™ Fines; Spress® B825; TRI-CAL WG; Vivapur® 101

excipient, wound dressings
-Polyox® WSR 303; Polyox® WSR 1105; Polyox® WSR Coagulant; Polyox® WSR N-10; Polyox® WSR N-60K; Polyox® WSR N-80; Polyox® WSR N-750

exfoliant
-Galacid Heat-Stable 90; Galacid Excel 50; Galacid Excel 80; Galacid Excel 88; Galacid Feed 80 - XT; Galacid Food 80; Galacid Food 80 Improved; Galacid Food 88; Galacid Food 88 Improved; Galacid Heat-Stable 80; Galacid Heat-Stable 88

expander, blood plasma
-Plasdone® C-15; Plasdone® C-30; PVP

expectorant
-Ammonium bicarbonate; Asafetida (Ferula asafoetida) gum; Benzoin; Cajeput (Melaleuca leucadendron) oil; Cubeb (Piper cubeba) oil; Damiana (Turnera diffusa); Ethyl ether; Eucalyptol; Guaiacol; Gum benzoin; Hydriodic acid; Iodine; Orange (Citrus aurantium dulcis) oil; Sodium iodide; Storax (Liquidambar orientalis); Sunflower (Helianthus annuus) flower extract; Sunflower (Helianthus annuus) seed oil; Thyme (Thymus vulgaris)

expectorant, cough medicines
-Licorice (Glycyrrhiza glabra) extract

expectorant, mild
-Anise (Pimpinella anisum); L-Camphor

expectorant, mild: cough preparations
-Anise (Pimpinella anisum) oil; Star anise (Illicium verum) oil

expectorant, pharmaceuticals
-Ammonium carbonate; Ammonium iodide; Trisodium citrate

extender
-Kaydol®; Tylopur® C 10000 P2

extender, APIs
-JustFiber® JF BF Granular; JustFiber® BF200; JustFiber® JF BVF65; JustFiber® WWF40; JustFiber® JF WWF 200

extender, clinical nutrition
-Captex® 350; Captex® 810D

extender, delivery/absorption enhancement
-Captex® 350; Captex® 810D

extender, dental cements
-Aluminum silicate

extender, dermatological emulsions
-Captex® 8227

extender, dermatologicals
-Captex® 350; Captex® 810D

extender, dry granulation
-Maltrin® M100

extender, flavor oils: pharmaceuticals
-Isocetyl alcohol

extender, flavors
-Ceraphyl® ICA

extender, fragrances
-Ceraphyl® ICA; Lexol® IPP

extender, infant formulas
-Captex® 350

Handbook of Pharmaceutical Additives, Third Edition 2415
extender, modifying: cellulose esters
  SAIB-SG
extender, modifying: film-forming biopolymers
  Sucrose acetate isobutyrate
extender, modifying: film-forming polymers
  SAIB-SG
extender, nutritional products

Functional/Application Index

flow aid, wet granulation: nonchewable
tablets
  Emdex®

flow aid, wet granulation: pharmaceuticals
  Avicel® PH-101; Avicel® PH-102; Avicel®
  PH-103; Avicel® PH-105

flow aid, wet granulation: tablets
  Emdex®

flow control agent, injectables: percutaneous
  Dimethicone copolyol

flow control agent, pharmaceuticals
  Cab-O-Sil® EH-5; Cab-O-Sil® M-5; Cab-O-
  Sil® M-5P; Dimethicone copolyol;
  Polyalkylene oxide modified
  polydimethylsiloxane
  Silwet® L-77; Silwet® L-720 AP; Silwet® L-
  7500; Silwet® L-7602; Sipernat® 22S

flow enhancer, capsule fillings
  Anhydrous Emcompress®

fluoride source, dentifrices
  Stannous fluoride

fluoride source, mouthwashes
  Stannous fluoride

fluorocOMPONENT, active: tooth decay
  prevention
  Sodium fluoride

foam builder, antidandruff shampoos
  Disodium undecylamido MEA-
  sulfosuccinate; Laureth; Rewocid® SB U
  185

foam builder, dental products
  Crodasinic LS35; Sodium N-oleoyl
  sarcosinate; TEGO®-Betain ZF

foam builder, dentifrices
  Hydrogen peroxide; Nikkol Sarcosinate LN;
  Nikkol Sarcosinate MN; Paxnol SLS Pure;
  Sodium cocoyl isethionate
  Sodium methyl cocoyl taurate; Sodium
  myristoyl sarcosinate; STEPANOL® ME
  Dry; STEPANOL® WA-100 NF/USP;
  Zoharpon SLS

foam builder, depilatories
  Crodasinic LS35

foam builder, dermatological liquid cleansers
  Amonyl® 265 BA; Amonyl® 380 BA

foam builder, dermatologicaLS
  PEG-10-PPG-10 glyceryl stearate

foam builder, dermopharmaceuticals
  Capryl/capryl glucoside; Decyl glucoside

foam builder, first aid creams
  Palmitoyl collagen amino acids

foam builder, germicidal scrubs
  Adinol CT95

foam builder, gum-sensitive toothpastes
  Adinol CT95

foam builder, hard capsules
  Sammi Gelatine

foam builder, medicated ointments
  STEPANOL® WA Extra; STEPANOL® WA
  Paste

foam builder, medicated soaps/shampoos
  Sodium laureth-5 carboxylate

foam builder, medicated treatments
  Disodium undecylamido MEA-
  sulfosuccinate

foam builder, medicinal soaps
  Potassium cocoate

foam builder, medicinal soaps
  Cetyl alcohol

foam builder, pharmaceutical coatings
  Sammi Gelatine

foam builder, pharmaceuticals
  Abil® B 88183; Ammonium lauryl sulfate;
  AMMONYX® DMCD-40; AMMONYX® MCO;
  AMPHOSOL® CG
  BIO-SOFT® N-300; BIO-TERGE® AS-40;
  BIO-TERGE® AS-90 Beads; CEDEPAL® TD-
  407; CEDEPAL® TDS 484
  Cetyl alcohol; Coco-betaine; Comperlan®
  COD; Crodasinic LS35; DEA-lauryl sulfate
  Disodium cocamphodiacetate; Disodium
  lauryl sulfosuccinate; Disodium PEG-4
cocamido MIPA sulfosuccinate; Disodium
  undecylamido MEA-sulfosuccinate;
  Laryrium chloride
  Lauramidopropyl PEG-dimonium chloride
  phosphate; Lauroampho PEG-glycinate
  phosphate; Lipothix™ 200-S; Magnesium
  lauryl sulfate; MAPROSYL® 30
  Myristamine oxide; NINOL® 30-LL; NINOL®
  40-CO; NINOL® 70-SL; NINOL® 96-SL
  NINOL® CMP; NINOL® GR; NINOL® L-9;
  NINOL® LMP; PEG-50 hydrogenated
  tallowamide
  PEG-80 sorbitan laurate; Rewocid® SB U
  185; Rewopol® SB Z; Sammi Gelatine;
  Sodium cocoyl isethionate
  Sodium laureth sulfate; Sodium lauryl
Functional/Application Index

- sulfoacetate; Sodium methyl cocoyl taurate; Sodium myristyl sulfate; Sodium N-oleoyl sarcosinate
- Sodium trideceth sulfate; STEOL® CA-460; STEPAN-MILD® LSB; STEPANOL® AM; STEPANOL® AM-V
- STEPANOL® ME Dry; STEPANOL® MG; STEPANOL® WA-100 NF/USP; STEPANOL® WA Extra; STEPANOL® WA Paste
- STEPANOL® WAT; Tauranol WS H.P.; TEA-dodecylbenzenesulfonate; TEA-lauryl sulfate; Trideceth-10
- Trilaurin; Vee Gee Pharmaceutical Gelatins; Zoharpon LAS; Zoharpon SLS

foam builder, quick-breaking foams
- Polawax® A31

foam builder, rectals
- Cetyl alcohol

foam builder, soft capsules
- Sammi Gelatine

foam builder/stabilizer, controlled-releases
- Methocel® E4M Premium; Methocel® K4M Premium; Methocel® K15M Premium; Methocel® K100LV Premium; Methocel® K100M Premium

foam builder/stabilizer, creams/lotions
- Methocel® K4M Premium

foam builder/stabilizer, dentifrices
- Lauroyl sarcosine; Sarkosyl® O

foam builder/stabilizer, dermatologicals
- Myristamide DEA

foam builder/stabilizer, medicated shampoos
- Polysynth HBU 185

foam builder/stabilizer, orals
- Sodium lauroyl sarcosinate

foam builder/stabilizer, pharmaceuticals
- AMMONYX® MO; AMPHOSOL® CA; Cocamide DEA; Cocamide MEA; Cocamide MIPA
- Cocamidopropyl betaine; Cocoyl sarcosine; Lauramide MEA; Lauroyl sarcosine; Methocel® A4C Premium EP
- Methocel® A4M Premium EP; Methocel® E50LV Premium; NINOL® 55-LL; NINOL® C12 LMP; NINOL® SCMP
- Sarkosyl® O; Sodium lauroyl sarcosinate

foam builder/stabilizer, pharmaceutical shampoos
- PEG-3 cocamide MEA

foam builder/stabilizer, surgical scrubs
- Sodium lauroyl sarcosinate

foam builder/stabilizer, tablet coatings
- Methocel® A15LV Premium; Methocel® E6 Premium; Methocel® E15LV Premium

foam builder/stabilizer, topicals
- Cocamide DEA; Cocamide MIPA; Schercomid SCO-Extra; Schercomid SL-Extra; Sodium lauryl sarcosinate
- Tegosoft® GC

foam builder, surgical scrubs
- Crodasinic LS30; Crodasinic LS30 NP; Crodasinic LS95 NP; Lauramine oxide

foam builder, tablets
- Sammi Gelatine; STEPANOL® ME Dry

foam builder, therapeutic shampoos
- Coco-betaine

foam builder, toothpaste
- Magnesium lauryl sulfate

foam builder, topicals
- Adinol CT95; Cetyl alcohol; Crodasinic LS30; Crodasinic LS30 NP; Crodasinic LS95 NP
- Crodesta F-160; Crodesta SL-40; PEG-50 hydrogenated tallowamide; Polawax® A31; Schercomid HT-60
- Schercomid SLM-S; Schercomid TO-2; Sodium cocoyl isethionate; Sodium laureth sulfate; Sodium lauryl sulfoacetate
- STEOL® CA-130; STEOL® CA-230D; STEOL® CA-330; TEA-lauryl sulfate; Tegamine® Oxide WS-35
- Trideceth-10

foam builder, veterinary products
- Lauramidopropyl PEG-dimonomium chloride phosphate; Lauroampho PEG-glycinate phosphate

foam control agent, medical applications
- Dow Corning® 7-9245; Dow Corning® Medical Antifoam C Emulsion

foam control agent, nonaqueous systems
- Foam Blast® 5; Foam Blast® 7; Foam Blast® 10

foam control agent, pharmaceuticals
- Dow Corning® 7-9245; Dow Corning® Antifoam 1520-US; Dow Corning® Medical Antifoam C Emulsion; Foam Blast® 5; Foam Blast® 7
- Foam Blast® 10; Sentry® Simethicone GS

foamer, dentifrices
- Sulfochem® SLP-95; Texapon® K-12 Needles

foamer, tablets
- Texapon® K-12 Needles

foaming agent
- Isostearamide DEA

foaming agent, antibacterial hand soaps
- DeCONC HS-30
Functional/Application Index

- **foaming agent, antidandruff shampoos**
  - Disodium undecylenamido MEA-sulfosuccinate; Laureth

### Functional/Application Index

- **humeectant, dentifrices**
  - Ajidew N-50; Glycerin; Hydrogenated starch hydrolysate; Hystar® CG; Liponic 70-NC
  - Liponic 76-NC; Sodium PCA; Sorbitol; Sorbitol Sol'n. Noncrystallizing

- **humeectant, dermatologicals**
  - Caprol® 10G40; Polyglyceryl-6 dioleate; Propylene glycol dioctanoate

- **humeectant, dermatological soaps**
  - Sodium PCA

- **humeectant, direct compression: tablets**
  - Maltrin® M150

- **humeectant, dry granulation: pharmaceuticals**
  - Maltrin® M150

- **humeectant, elixirs**
  - Sorbitol

- **humeectant, emulsions**
  - Glucam® E-10

- **humeectant, first aid sprays**
  - Aloe Vera Whole Leaf Gel

- **humeectant, hydrocortisone creams**
  - Aloe Vera Whole Leaf Gel

- **humeectant, hydrophilic ointments**
  - Egg oil

- **humeectant, IM injectables**
  - Glycerin; D-Mannitol; Sorbitol

- **humeectant, infant formulas**
  - Caprol® 10G40

- **humeectant, intrapleural injectables**
  - D-Mannitol

- **humeectant, IV**
  - D-Mannitol

- **humeectant, lip care**
  - Colonial LAO

- **humeectant, liquids**
  - Hyamine® 3500 80% NF

- **humeectant, lozenges**
  - Amalty®; Neosorb® 20/20 B; Neosorb® 70/70 B; Neosorb® 70/70 SB; Neosorb® 70/90 B; Neosorb® 70/90 SB; Neosorb® HDS

Moon™ Kosher Glycerine USP NK; Star™ K Glycerine USP, FCC; Star™ V Glycerine USP, FCC

intermediate, health care products
Methyl tosylate

intermediate, hypnotics
Velsicure® BTF

intermediate, keratin exfoliates:
calluses/corns
Phenoxyacetic acid
Functional/Application Index

intermediate, local anesthetics
- Picolinic acid

intermediate, lubricants: pharmaceuticals
- PPG-9; PPG-26

intermediate, medicine
- Quinaldine

intermediate, metal salts: nutritional supplements
- Picolinic acid

intermediate, organic: pharmaceuticals
- α-Picoline

intermediate, peptide drugs
- L-Methionine

intermediate, pharmaceuticals
- Acetophenone; Acetylacetone; Acetyl chloride; AEPD®; Allyl mercaptan
- p-Aminobenzoic acid
- Aminoethylpiperazine; Aminoethylpropanediol; Aminomethylpropanediol;
  Ammonium lactate
- s-Amyl alcohol; m-Anisidine; o-Anisidine;
  p-Anisidine; Anisole
- p-Anisyl alcohol; Anthranilic acid; Arsenic trichloride; Benzaldehyde; Benzoin
- N-Benzylamine; Bis (aminopropyl) piperazine; Butyl acetoacetate; n-
  Butylamine; t-Butylamine
- Butyl lactate; Butyrocolactone;
- Chloroacetophenone; m-Chloroaniline; o-
  Chloroaniline
- p-Chloroaniline; Chloroform; 2-
  Chloropyridine; Cumar; Cuminaldehyde
- Dialllyl maleate; 2,6-Diaminopyridine; 2,3-
  Dibromo-1-propanol; 1,3-Dichloro-5,5-
  dimethyl hydantoin; Diethylacetic acid
- Diethylaminoethanol; Diethyl cyanomethyphosphonate; Diethyl toluene diamine; Dimethylolpropionic acid; Diphenyl chlorophosphate
- N,N′-Diphenyl-p-phenylenediamine;
  Dodecene-1; Dytek® A; Eastman® HQMME;
  Eastman® MAA
- Epiol M-0; Epiol OH; Ethylacetoacetate; p-
  Ethylbenzaldehyde; Ethyl benzoylacetate
- Ethylene carbonate; Ethyl formate; Ethyl-p-
  toluenesulfonate; p-Fluorophenol; Furan
- Gluconolactone; Glycolid;
- Hexamethylenimine; Dytek® HMI;
- Hydrogenated coconut acid
- Hydrogenated lanolin; Hydrogenated
  menhaden oil; Hydrogenated soybean oil;
- Industrene® 206; Ionol CP
- Isatin; p-Isobutylnbenzaldehyde;
- Isopropylamine; 3-Isopropylaminopropane-
- 1,2-diol; Lauric acid
- Levulinic acid; Maleic acid; 2-
  Mercaptoethanol; p-Methoxyphenylacetic
  acid; Methyl acetoacetate
- 4′-Methyl acetoephone; Methyl
  anthranilate; 4-Methylpentanoic acid; 3-
  Methylpyridine-1-oxide; Methyl tosylate
- α-Monomethylhydantoin; NB; NEPD™;
  Neustrene® 060; Niacinamide
- Nicotinonitrile; Nitric acid; 2-Nitro-1-
  butanol; 2-Nitro-2-ethyl-1,3-propanediol; 5-
  Nitroisophthalic acid
- 2-Nitro-2-methyl-1-propanol; 1-
  Nitropropane; 2-Nitropropane; Nonanoic
  acid; Phenoxyisopropanol
- Phenyl dichlorophosphate; Phenyl glycidyl ether; N-Phenyl-p-phenylenediamine;
  Philacid 1200; Phthalimide
- Picolinic acid; Piperidine; Pluracol® E1000;
  Potassium thiocyanate; Purasolv® BL
- Pyrogallol; 2-Pyrrolidone; Quadrol® Polyol;
  Sodium bromide; Sodium thiocyanate
- Spezial C 18 ISO C; Squalene; Suberic acid;
  Tetrahydrofuran; Tetrahydroxypropyl
  ethylenediamine
- Tetraisopropyl methylendiphosphonate;
  Thioglycerin; p-Toly aldehyde; Triethyl
  phosphonoacetate; Triethyl phosphonoformate
- 2,2,2-Trifluoroethanol; Triisopropyl
  phosphite; Trimethyl phosphite;
  Tripropylene glycol; Tris (hydroxymethyl)
  aminomethane
- n-Valeric acid; Velsicure® BTF; D(+)-Xylose

intermediate, pharmaceuticals: ethambutol synthesis
- AB®

intermediate, reactive: pharmaceuticals
- Methyl butynol; Methyl pentynol

intermediate, specialty chemicals:
- pharmaceuticals
  Decene-1

intermediate, surfactants: pharmaceuticals
- Decene-1

intermediate, synthetic pharmaceuticals
- Acetonitrile

intermediate, vitamin A
- Citral

intermediate, vitamin B
- Acetonitrile

intermediate, vitamins
- Ethylacetoacetate; Methyl acetoacetate

intestinal disorder treatment
- Kaolin
Functional/Application Index

intestinal gas treatment
  Cardamom (Elettaria cardamomum)
intestinal problem treatment
  Bismuth
iodine dietary supplement
  Calcium iodate; Calcium iodide
iodine source, animal nutrition
  Calcium iodate
iodine source, dietary: pharmaceuticals
  Potassium iodine
iodine source, herbal products
  Kelp
iodine source, pharmaceuticals
  Kelp
ion exchange resin, pharmaceuticals
  Dowex™ 1 x 2; Dowex™ 1 x 4; Dowex™ 1 x 8; Dowex™ 2 x 2; Dowex™ 22
  Dowex™ 50W x 2; Dowex™ 50W x 4; Dowex™ 50W x 8; Dowex™ 66; Dowex™ 88
  Dowex Mac 3; Dowex™ Marathon A;
  Dowex™ Marathon C; Dowex™ Marathon MR-3; Dowex™ Optipore SD-2
  Dowex™ Retardion 11A8
ion exchange resin, vitamins
  Dowex™ 1 x 2; Dowex™ 1 x 4; Dowex™ 1 x 8; Dowex™ 2 x 2; Dowex™ 22

  Dowex Mac 3; Dowex™ Marathon A;
  Dowex™ Marathon C; Dowex™ Marathon MR-3; Dowex™ Optipore SD-2
  Dowex™ Retardion 11A8
ion exchange resin, weakly basic:
  pharmaceutical purification
  Diethylaminoethyl cellulose
IR absorbent, topicals
  Boron nitride
iron source, infant formulas
  Ferric pyrophosphate
iron source, iron supplements
  Ferric pyrophosphate; Ferrous sulfate anhydrous
iron source, pharmaceuticals
  Ferrous fumarate; Ferrous sulfate anhydrous
iron supplement, children’s chewable multivitamins
  Ferronyl®
iron supplement, elixirs
  Ferronyl®
iron supplement, multivitamins
  Ferronyl®
iron supplement, pharmaceuticals
  Ferronyl®
Magnesium Oxide 310-SGR Heavy
Magnesium Oxide 310-SH Heavy;
Magnesium Oxide 311-S Light; Magnesium sulfate anhydrous
laxative, veterinary products
Psyllum
leveling agent, antidandruff shampoos
Bentone® EW
leveling agent, creams/lotions
PEG-8 laurate
leveling agent, ointments
MERPOL® HCS
leveling agent, percutaneous injectables
Dimethicone copolyol
leveling agent, pharmaceuticals
Antarox® 17-R-2; Antarox® 25-R-2;
Antarox® 31-R-1; Dimethicone copolyol;
PEG-4 laurate
PEG-8 laurate; PEG-12 laurate; PEG-4 stearate; PEG-8 stearate; PEG-12 stearate
Polyalkyleneoxide modified polydimethylsiloxane; Silwet® L-77;
Silwet® L-720 AP; Silwet® L-7500; Silwet® L-7602
Volpo C2; Volpo C20; Volpo L3
leveling agent, topicals
PEG-8 stearate
liniment
Cajeput (Melaleuca leucadendron) oil
lipid-peroxidation inhibitor
VC-PMG
lipid phase, microemulsions
Labrafil® M 2125 CS
lipolytic agent, health products
Algismium C
lipophilic agent, sustained-releases
Tribehenin
lipophilic matrix
Compritol HD5 ATO
lipophilic matrix, pharmaceuticals
Sucrose polystearate
lipoprotein, foaming: antidandruff shampoos
Sodium/TEA-undecenoyl collagen amino acids
liposome, APIs: dermatologicals
Natifide® II
liposome component, pharmaceuticals
Cholesterol HP
liquefier, pharmaceuticals
SD alcohol 40; SD alcohol 40-B
liver disease treatment
L-Arginine
lubricant
Acacia; Aluminum orthophosphate;
Butylene glycol dicaprylate/dicaprate;
Cachalot® AR-20; Cachalot® M-43
Ceteareth-4; Cocoa (Theobroma cacao) butter; Crodocol C-95 EP; 1-Decene, homopolymer, hydrogenated; DeTHOX SA-80
Drakeol® 32; Jeesorb O-20-K; Jojoba (Buxus chinensis) oil; Kaydol®; Lactamide MEA
Laureth-4; Lutrajel® RC; Naturechem® GMHS; Oleyl olate; Oxidized cellulose
Polypax SMS; Tricaprylin
lubricant,
Lutrol® F micro 127; Lutrol® F micro 68
lubricant, absorption enhancement
Caprol® ET
lubricant, acne creams/lotions
Crodamol PMP; Crodamol PTC; Crodamol PTIS; Crodamol SS; Pentaerythrityl tetracaprylate/tetraprate
lubricant, acne preparations
Foamox DML
lubricant, aerosols
Altalc 200 USP; Altalc 300 USP; Caprol® 10G100; Captex® 300; Captex® 355
Captex® 1000; Tricaprin
lubricant, alcoholic compositions
Lanexol AWS
lubricant, anhydrous systems
Syncrowax ERLC
lubricant, antibiotic ointments
Crodamol PMP; Crodamol PTC; Crodamol PTIS; Crodamol SS; Pentaerythrityl tetracaprylate/tetraprate
lubricant, aqueous compositions
Lanexol AWS
lubricant, autoclavable: enema tips
Glyceryl polymethacrylate
lubricant, autoclavable: medical applications
Glyceryl polymethacrylate
lubricant, autoclavable: prelubricating catheters
Glyceryl polymethacrylate
lubricant, autoclavable: surgical
Glyceryl polymethacrylate
lubricant, autoclavable: surgical applications
Glyceryl polymethacrylate
lubricant, autoclavable: thermometers
Glyceryl polymethacrylate
lubricant, balms
EmCon™ SAF
lubricant base, pharmaceuticals
EO/PO block polymer or copolymer
lubricant, burn creams
    Crodamol PMP; Crodamol PTC; Crodamol PTIS; Crodamol SS; Pentaerythritol tetracaprylate/tetracaprate

lubricant, capsules
    Calcium stearate; Carbowax® PEG 400;
    Carbowax® PEG 600; Castor (Ricinus communis) oil; Compritol 888
    Compritol® 888 ATO; Dritex S; Glyceril behenate; Hydrogenated cottonseed oil;
    Hydrogenated palm oil
    Magnesium stearate; Microcrystalline cellulose; Mineral oil; PEG-6; PEG-8
    PEG-12; PEG-20; PEG-75; PEG-150;
    Polyethylene glycol
    Sodium stearyl fumarate; Stearic acid; Talc; Tribehenin; Zinc stearate

lubricant, capsules: orals
    Polyethylene glycol

lubricant, catheters
    Lubrajel® CG; Lubrajel® DV; Lubrajel® MS;
    Lubrajel® Oil; Lubrajel® RC
    Lubrajel® TW; Lubrajel® WA

lubricant, clinical nutrition
    Capmul® GMS-50; Caprol® 10G10O;
    Caprol® ET; Captex® 300; Captex® 355
    EP/NF
    Captex® 355; Captex® 1000; Clarity; Dritex S; Hydrokote® 112
    Hydrokote® AP5; Hydrokote® M; Pureco® 76; Sterotex® K; Tricaprin

lubricant, coatings
    Capmul® GMS-50; Caprol® ET; Captex® 300; Captex® 355; Captex® 1000
    Clarity; Dritex S; Hydrokote® 112;
    Hydrokote® AP5; Hydrokote® M
    Tricaprin

lubricant, compressed tablets
    PEG-180

lubricant, compression: pharmaceuticals
    Sterotex® NF

lubricant, contact lens fluid
    Polyethylene glycol

lubricant, controlled-releases
    Lubritab®; Methocel® E4M Premium;
    Methocel® K4M Premium; Methocel® K15M Premium; Methocel® K100LV
    Premium
    Methocel® K100M Premium; Polyethylene glycol

lubricant, cough syrups
    Pluracol® E400 NF; Pluracol® E600 NF;
    Pluracol® E1450 NF

lubricant, creams
    PPG-2 myristyl ether propionate; Sebase; Triolein

lubricant, creams/lotions
    Altalc 200 USP; Altalc 300 USP; Arachidyl alcohol; Ceraphyl® 140; Decyl oleate
    Dritex S; Eutanol® G; Glyceril isostearate;
    L-45 Series; Lanolin oil
    Liponyl 10 BN 6058; Liponyl 10 BN 6069;
    Methocel® K4M Premium; Mineral oil; PEG-8 laurate
    PEG-40 stearate; Propylene glycol stearate

lubricant, delivery/absorption enhancement
    Capmul® GMS-50; Caprol® 10G10O;
    Captex® 300; Captex® 355; Captex® 1000
    Clarity; Polylglyceryl-10 decaoleate; Pureco® 76; Tricaprin

lubricant, delivery enhancement
    Caprol® ET

lubricant, demulcent: opthalmics
    Plasdone® K-29/32

lubricant, demulcent: pharmaceuticals
    Plasdone® K-29/32

lubricant, demulcent: topicals
    Plasdone® K-29/32

lubricant, dental adhesives
    Perfecta®; Protopet® White 1S; Super White Protopet®

lubricant, dental products
    Crodasinic LS35; Lipoxol® 3350 MED; PEG-40 stearate; Sodium N-oleoyl sarcosinate

lubricant, dental waxes
    Multiwax® W-445

lubricant, dentifrices
    Carbowax® PEG 1450; Carbowax® PEG 3350; Hydrogenated starch hydrolysate;
    Hystar® CG; Laurolyl sarcosine
    Liponic 70-NC; Liponic 76-NC; Sarkosyl® O

lubricant, dermatological emulsions
    Capmul® GMS-50; Captex® 8227;
    Triundecanoin

lubricant, dermatologicals
    Caprol® 10G100; Caprol® ET; Captex® 300;
    Captex® 355; Captex® 800
    Captex® 1000; Cetina; Clarity; Dritex S;
    Hydrokote® 112
    Hydrokote® AP5; Hydrokote® M;
    Polyglyceryl-10 decaoleate; Propylene glycol diocotanoate; Shea butter
    (Butyrosperum parkii)
    Solulan® 16; Solulan® 75; Solulan® L-575;
    Stearamide DEA; Sterotex® K
    Sterotex® NF; Tricaprin
lubricant, direct compression
- Lubritab®; Starch 1500®; Starch 1500® G; Starch 1500® LM

lubricant, direct compression: tablets
- Spress® B820

lubricant, drug delivery systems
- Capmul® GMS-50K

lubricant, dry granulation
- Pure-Dent® B700

lubricant, dry granulation: tablets
- Spress® B820

lubricant, encapsulation
- Hydrokote® 112; Hydrokote® AP5; Hydrokote® M; Sterotex® NF

lubricant, enema tips
- Lubrajel® CG; Lubrajel® DV; Lubrajel® MS; Lubrajel® Oil; Lubrajel® RC; Lubrajel® TW; Lubrajel® WA

lubricant, examination gloves
- Corn (Zea mays) starch; Pure-Dent® B851; Pure-Dent® B852

lubricant, external: pharmaceuticals
- EmCon™ W; Miglyol® 812

lubricant, flavors
- Polysorbate 61

lubricant, gelatin capsules
- Captex® 1000; Clarity; Drakeol® 5; Drakeol® 7; Hydrogenated coconut oil; Tricaprin

lubricant, gel capsules
- Aldo® MCT KFG

lubricant, hypodermic needles
- Dow Corning® 360 Medical Fluid (20 cst); Dow Corning® 360 Medical Fluid (100 cst); Dow Corning® 360 Medical Fluid (350 cst); Dow Corning® 360 Medical Fluid (1000 cst); Dow Corning® 360 Medical Fluid (12,500 cst)

lubricant, IM injectables
- Castor (Ricinus communis) oil

lubricant, infant formulas
- Capmul® GMS-50; Capmul® GMS-50K; Caprol® 10G10O; Caprol® ET; Captex® 300; Captex® 355; Captex® 1000

lubricant, injection suspensions
- Olive (Olea europaea) oil

lubricant, internal: laxatives
- Kaydol®

lubricant, IV emulsions
- Super Refined® Olive NF; Super Refined® Sesame NF; Super Refined® Soybean USP

lubricant, laxatives
- Dioctyl calcium sulfosuccinate; Dioctyl sodium sulfosuccinate; Drakeol® 9; KELTOSE®; Stamere® CK-S NF FCC; Stamere® N-325 NF FCC; Stamere® N-350 NF FCC; Stamere® N-350 S NF FCC; Stamere® NI NF FCC

lubricant, liniments
- Arachidyl alcohol; Olive (Olea europaea) oil; Sesame (Sesamum indicum) oil; Super Refined® Olive NF; Super Refined® Sesame NF; Super Refined® Soybean USP

lubricant, lip balms
- Glyceryl triacetyl ricinoleate; Naturechem® CR; Naturechem® GTR

lubricant, liquid products
- Lutrol® E 300; Lutrol® E 400

lubricant, medical
- Lubrajel® CG; Lubrajel® DV; Lubrajel® MS; Lubrajel® Oil; Lubrajel® TW; Lubrajel® WA

lubricant, medical devices
- Silbione™ Oils 70047 V50

lubricant, medical plastic devices/instruments
- Dow Corning® 360 Medical Fluid (20 cst); Dow Corning® 360 Medical Fluid (100 cst); Dow Corning® 360 Medical Fluid (350 cst); Dow Corning® 360 Medical Fluid (1000 cst); Dow Corning® 360 Medical Fluid (12,500 cst)

lubricant, medical rubber devices/instruments
- Dow Corning® 360 Medical Fluid (20 cst); Dow Corning® 360 Medical Fluid (100 cst); Dow Corning® 360 Medical Fluid (350 cst); Dow Corning® 360 Medical Fluid (1000 cst); Dow Corning® 360 Medical Fluid (12,500 cst)

lubricant, medicated creams
- Multiwax® W-445

lubricant, medicated foot powders
- Altalc 200 USP

lubricant, medicated ointments
- Mineral Jelly No. 17; Perfecta®; Super White Protopet®

lubricant, medicated products
- Ceraphyl® 50

lubricant, medicated unguents
- Multiwax® W-445

lubricant, medicinalcs
- Superla® No. 5; Superla® No. 7; Superla® No. 9; Superla® No. 10; Superla® No. 13; Superla® No. 18; Superla® No. 21;

processing aid, oral solid dosages
RxCIPIENTS® FM1000
processing aid, parenterals
D-Mannitol
processing aid, pharmaceuticals
Ammonium phosphate, dibasic; t-Butyl alcohol; Distarch phosphate; Dry-Flo®
Ethyl maltol
Fonoline® White; D-Mannitol; Mineral Jelly No. 17; Rennet; Silicone Antifoam Emulsion SE 9
Tebol® 99; TIC Pretested® Ticaxan®
Xanthan 200 FCC/USP/NF Powd.
processing aid, suppositories
Mineral Jelly No. 17; Protopet® White 1S
processing aid, tablets
Docusate Calcium USP in Corn Oil NF Sol’n.; Docusate Sodium USP in Polyethylene Glycol 400 NF
production aid, pharmaceuticals
Distarch phosphate
propellant, aerosol
Hexafluoroethane; Trichlorotrifluoroethane
propellant, aerosol: asthma inhalers
Dymel® 134a; Tetrafluoroethane
propellant, aerosol: asthma metered-dose inhalers
Dymel® 227ea/P
propellant, aerosol: asthma preparations
1,1,1,3,3,3-Hexafluoropropane
propellant, aerosol: implants
Dichlorodifluoromethane
propellant, aerosol: inhalants
1,2-Dichlorotetrafluoroethane; Trichlorofluoromethane
propellant, aerosol: inhalers
Dichlorodifluoromethane
propellant, aerosol: metered-dose inhalers
Genetron® 11; Genetron® 12; Genetron® 114
propellant, aerosol: nasal inhalers
Dymel® 134a; 1,1,1,3,3,3-Hexafluoropropane
propellant, aerosol: nasal products
1,2-Dichlorotetrafluoroethane
propellant, aerosol: oral sprays
Dymel® 134a; Tetrafluoroethane
propellant, aerosol: pharmaceuticals
Dichlorodifluoromethane;
Dichlorotetrafluoroethane; 1,2-Dichlorotetrafluoroethane; Dichlorotetrafluoroethane; Propane
propellant, aerosol: rectals
Dichlorodifluoromethane; 1,2-Dichlorotetrafluoroethane
propellant, aerosol: respiratory disorder metered-dose inhalers
Dymel® 227ea/P
propellant, aerosol: topical sprays
Dymel® 134a; Tetrafluoroethane
propellant, anesthetics
Dymel® 236fa
propellant, asthma sprays
1,1,1,2,3,3,3-Heptafluoropropane

Imwitor® 988
refatting agent, pharmaceutical creams
Softigen® 701
refatting agent, pharmaceuticals
Abil® B 8852; Abil® B 8863; Abil®-Quat 3272; Cetio® HE; Hydrogenated lecithin
Imwitor® 928; Imwitor® 988; PEG-6 caprylic/capric glycerides; Phospholipids; Quaternium-80
Rewocid® DU 185 SE; Softigen® 701; Sucrose cocoate; Undecylenamide DEA; Witafrol® 7420
refatting agent, pharmaceutical soaps
Softigen® 701
refatting agent, rectals
Imwitor® 988; Softigen® 701
refatting agent, skin treatment
Rewocid® DU 185 SE; Spent grain wax; Undecylenamide DEA
refatting agent, topicals
Imwitor® 988; Octyl hydroxystearate; Softigen® 701; TEGO®-Betain HS; Tegosoft® DO
Tegosoft® GC; Tegosoft® P; Tegosoft® S; Wickenol® 171
refatting agent, vaginals
Softigen® 701
refatting agent, w/o emulsions
Monomuls® 90 O18
reforming agent, creams/lotions
Emalex HC-40; Emalex HC-50; Emalex HC-60
refrigerant
Lemon (Citrus medica limonum) juice
refrigerant, azeotropic: biomedical freezing
KLEA 508A
refrigerant, low-temp.
Trifluoromethane
refrigerant, anti-age serums
Lysidone®
refrigerant, cellular: pharmaceuticals
Lysidone®; Lysine PCA
regeneration aid, skin: health products
Algisium C
rehydrating agent, topicals
Sodium pyrrolidone carboxylate
reinforcing agent
Siloxanes and silicones, dimethyl, reaction prods. with silica
reinforcing agent, dental cements
Aluminum silicate
reinforcing agent, medical rubber
Zoco 112 USP
reinforcing agent, ointments
Silica, fumed
reinforcing agent, orals
Talc
reinforcing agent, pharmaceutical aerosols
Silica, fumed
reinforcing agent, pharmaceutical creams
Silica, fumed
reinforcing agent, pharmaceutical products
Aeroperl® 300 Pharma; Aerosil® 200
reinforcing agent, pharmaceutical emulsions
Aeroperl® 300 Pharma; Aerosil® 200
reinforcing agent, pharmaceutical powders
Silica, fumed
reinforcing agent, pharmaceutical rubber
Zoco 112 USP
reinforcing agent, pharmaceuticals
Cab-O-Sil® EH-5; Cab-O-Sil® H-5; Cab-O-Sil® HS-5; Cab-O-Sil® LM-150; Cab-O-Sil® M-5
Silica, fumed; Talc
reinforcing agent, pharmaceutical suspensions
Silica, fumed
reinforcing agent, pharmaceuticals
Silica, fumed
reinforcing agent, rectals
Talc
reinforcing agent, tablets
Silica, fumed
reinforcing agent, tooth-filling compounds
Tullanox® HM-100; Tullanox® HM-150
reinforcing agent, topicals
Talc
release agent
Alcolec® PS 20 P; Alcolec® PS 40 P; Alcolec® PS 50 P; Gelucire 44/14
release agent, APIs
Argobase EST
Functional/Application Index

release agent, capsules
Carbowax® PEG 400; Carbowax® PEG 600; Kollidon® CL; Kollidon® CL-F; Kollidon® CL/M; Kollidon® CL-SF

Macol® 85
solubilizer, medical ingredients
Emalex GWIS-110EX; Emalex GWIS-115; Emalex GWIS-115EX; Emalex GWIS-120EX; Emalex GWIS-125 Emalex GWIS-130EX; Emalex GWIS-140EX; Emalex GWIS-150EX; Emalex GWIS-160EX
solubilizer, medicaments
DREWPOL® 10-10-O; DSS Tablet Grade
solubilizer, medicated cleansers
Acconon W230; Mackanate™ UM-50
solubilizer, medicated mouthwashes
Croduret 40LD
solubilizer, medicated ointments
Nikkol BC-23
solubilizer, medicated preparations
Linoleamidopropyl PG-dimonium chloride phosphate
solubilizer, medicinals
Captex® 200; Lexol® PG-865; NEOBEE® M-5; NEOBEE® M-20
solubilizer, medicines
Cerette V; 2-Ethylhexyl tallowate; Isodecyl stearate; Isostriol IC; Isotridecyl stearate
M 2 Etil Esil Oleato; M 2 Etil Esil Oleato; M
Functional/Application Index

solubilizer, oils
Emalex HC-40; Emalex HC-50; Emalex HC-60; Jeesorb O-20-K; Liposorb S-20K
Steareth-100; Triolein
solubilizer, oil-soluble APIs
Liquid Absorption Base A; Liquid Absorption Base T; Monestriol IC; Monestriol IS-C
solubilizer, oil-soluble vitamins
Crillet 1 Super; Emalex HC-40; Emalex HC-50; Emalex HC-60; Emalex VS-31
solubilizer, ointments
Caprylic/capric triglyceride PEG-4 esters; Cremophor® A 6; Cremophor® RH 40; Docusate Sodium USP; Eumulgin® SMO 20
Eumulgin® SMS 20; Laneto 50; Laneto 100; Laneto 100-Flaked; Laneto AWS
Lipolan 31; Lipolan 31-20; Lipolan 98; Lipolan R; Lipolan Distilled
Macol® CSA-20; Mono- and diglycerides of fatty acids; Montanox® 20 DF; Pogol® 400; Ritawax Super
Simulsol® 58; Simulsol® 78; Simulsol® 98; Simulsol® CS; Simulsol® P4
Simulsol® P23; STEPAN® PEG 200 DL; STEPAN® PEG 200 DO; STEPAN® PEG 400 DL; STEPAN® PEG 400 DO
STEFAN® PEG 400 DS; STEPAN® PEG 400 ML; STEPAN® PEG 400 MO; STEPAN® PEG 400 MS; STEPAN® PEG 600 DL
STEFAN® PEG 600 DS; STEPAN® PEG 600 LS; STEPAN® PEG 600 LS; STEPAN® PEG 600 MS; STEPAN® PEG 6000 DS; STEPAN® PEG 6000 MS
Supersat AWS-4; Supersat AWS-24
solubilizer, ophthalmics
Benzalkonium chloride; Benzethonium chloride; Crillet 1 HP; Crillet 1 NF; Crillet 3 NF
Crillet 4 HP; Crillet 4 NF; Diethanolamine; Glyceryl stearate; Kollidon® 12PF
Kollidon® 17PF; Kollidon® 25; Kollidon® 30; Kollidon® 90F; Lanolin alcohol
Lipoxol® 3350 MED; Nonoxynol-4; PEG-40 stearate; Polysorbate 20; Polysorbate 80
Sorbitan laurate; Tris Amino® Ultra Pure Standard; Tris (hydroxymethyl) aminomethane
solubilizer, oral caplets
Lipoxol® 3350 MED
solubilizer, orals
Acacia; Benzyl alcohol; Captex® 200; Captex® 300; Captex® 355
Captex® 1000; Cetylpyridinium chloride;
solubilizer, oral solutions
Cremophor® EL; Lutrol® F 127

solubilizer, oral suspensions
Acconon CC-6, EP; Acconon MC-8, EP/NF; Acconon® MC-8EP; Crysmex; Kleptoese® DC
Kleptoese® HPB

solubilizer, oral tablets
Lipoxol® 3350 MED

solubilizer, otics
Benzalkonium chloride; Benzethonium chloride; Glyceril stearate; PEG-40 stearate; Polysorbate 80

solubilizer, o/w creams
Surfhope® SE D-1616; Surfhope® SE D-1816

solubilizer, o/w creams/lotions
Nikkol BC-23

solubilizer, o/w emulsions
PEG-30 glyceryl stearate; Polysorbate 10 octaoleate; Polysorbate-3 olate; Tagat® L2; Tagat® O2; Tagat® S; Tagat® S2

solubilizer, o/w products
Nikkol TS-10V; Nikkol TS-30V; Nikkol TS-106V

solubilizer, oxybenzone
Ceraphyl® 45

solubilizer, parenterals
Captisol®; Cremophor® EL; Cril 1 NF; Cril 1 HP; Cril 1 NF; Cril 3 NF; Cril 4 HP
Cril 4 NF; Crodesta F-10; Crodesta F-110; Crodesta F-160; Croduret 40 LD
Diocetyl sodium sulfosuccinate; Extra Olein™ 99; Glycerin ricinoleate; Glycerin stearate; Imwitor® 308
Imwitor® 742; Imwitor® 988; Kollidon® 12PF; Kollidon® 17PF; Kollidon® 25; Kollidon® 30; Kollidon® 90F; Labrafac® Hydrophilic; Lafranol® M 1944 CS; Labrafal® M 2125 CS
Lecithin; Lutrol® F 68; Miglyol® 810; Miglyol® 812; Miglyol® 812 N
Montanox® 80 DF; Oleic acid; PEG-20 stearate; PEG-40 stearate; Pluronic® F68NF
Pluronic® F87NF; Pluronic® F108NF; Pluronic® L44NF; Poloxamer 188; Poloxamer 331
Polysorbate 20; Polysorbate 40; Polysorbate 60; Polysorbate 80; Sodium stearate
Sorbitan laurate; Sorbitan oleate; Sorbitan stearate; Sorbitan trioleate; Stearic acid
Tris Amino® Ultra Pure Standard; Tris (hydroxymethyl) aminomethane

solubilizer, perfumes
PEG-20 glyceryl oleate; PEG-30 glyceryl stearate; PEG-150 lanolin; PEG-20 laurate; PEG-24 laurate
PEG-40 laurate; PEG-100 laurate; PEG-24 stearate; Sabosorb TSE; Scheremoi PGML
Sodium dioeth-8 phosphate; Solubilisant γ 2420; Solubilisant γ 2428; Supersat AWS-4; Supersat AWS-24
Tagat® L2; Tagat® O2; Tagat® S; Tagat® S2; Volpo CS20

solubilizer, perfumes: alcoholic tonics
Emalex HC-40; Emalex HC-50; Emalex HC-60

solubilizer, pharmaceutical actives
Simulsol® 58

solubilizer, pharmaceutical aerosols
Labrafal® M 2125 CS

solubilizer, pharmaceutical coatings
Capmul® MCMC10; Glyceril caprate

solubilizer, pharmaceutical creams
Cremophor® A 6; Eumulgin® SMO 20; Eumulgin® SMS 20; Labrafal® M 2125 CS; Meroxapol 105
Meroxapol 251; Meroxapol 252; Meroxapol 254; Meroxapol 258; Simulsol® 78
Simulsol® 98; Simulsol® CS

solubilizer, pharmaceutical creams/lotions
Caprylic/capric triglyceride PEG-4 esters; Cremophor® RH 40; Kosteran-O/1 VL; Kosteran-O/3 VH; Kotilien-L1; Kotilien-S/1; Lipo 142; Myristyl myristate

solubilizer, pharmaceutical dry formulations
Crystem; Kleptoese® HPB

solubilizer, pharmaceutical emulsions
Labrafal® M 2125 CS

Functional/Application Index

solvent, nutritive emulsions
  - Peanut (Arachis hypogaea) oil

solvent, occlusive
  - Wheat (Triticum vulgare) germ oil
  - EmCon™ Olive; EmCon™ Rice Bran

solvent, occlusive: ointments
  - EmCon™ CO; EmCon™ W; Fancol™ CB; Fancol™ CB Extra

solvent, oil products
  - Miglyol® 812 N

solvent, ointments
  - Caprylic/capric triglyceride PEG-4 esters; Citation™ 100; Crodamol PC; Dynacerin® 660; Fancol™ ALA
  - Fancorsil A; Labrafac® Lipophile; Lanolin oil; Lumulse® GMS K; Miglyol® 810
  - Miglyol® 8810; Mineral oil; Olive (Olea europaea) oil; Peanut (Arachis hypogaea) oil; PEG-20 sorbitan isostearate
  - Penreco Snow; Pogol® 400; Rice (Oryza sativa) bran oil; Sesame (Sesamum indicum) oil; Super Refined® Cottonseed NF
  - Super Refined® Olive NF; Super Refined® Safflower USP; Super Refined® Soybean USP; Walnut (Juglans regia) oil

solvent, ophthalmic ointments
  - Penreco Snow

solvent, ophthalmic ointments/suspensions
  - Mineral oil

solvent, ophthalmics
  - Acetic acid; Acetic acid, glacial; Ethyl acetate; PEG-6; Petrolatum
  - Phenethyl alcohol; Propylene glycol

solvent, oral liquids
  - PEG-4

solvent, orals
  - Acetic acid, glacial; Alcohol; Benzyl benzoate; Butyl alcohol; Corn (Zea mays) oil
  - Crodamol GTCC; Crodamol GTCC-PN; Cyclohexane; Diacetylated monoglycerides; Ethyl acetate
  - Etocas 35 NF; Extra Olein™ 99; Imwitor® 742; Isopropyl alcohol; Labrafac® Hydrophil
  - Methyl alcohol; Methylene chloride; Miglyol® 812; Miglyol® 812 N; Miglyol® 840
  - Oleic acid; Peanut (Arachis hypogaea) oil; PEG-75; Petrolatum; Polyethylene glycol
  - Polysorbate 60; Propylene glycol; Propylene glycol alginate; Safflower (Carthamus tinctorius) oil; Sesame (Sesamum indicum) oil
  - Soluphor® P; Soybean (Glycine soja) oil; Super Refined® Corn NF; Super Refined® Cottonseed NF; Super Refined® Olive NF
  - Super Refined® Peanut NF; Super Refined® Safflower USP; Super Refined® Sesame NF; Super Refined® Soybean USP

solvent, oral solutions
  - Cremophor® EL

solvent, organic compounds
  - Capmul® MCM-L; Capmul® MCM-L8; DREWMULSE® GMC-810

solvent, OTC products
  - Pluracol® E400 NF; Pluracol® E600 NF; Pluracol® E1450 NF

solvent, otics
  - Acetic acid; Acetic acid, glacial; Petrolatum; Phenethyl alcohol; Propylene glycol

solvent, parenterals
  - Cremophor® EL; Crodamol EO; Crodamol GTCC; Crodamol GTCC-PN; Diacetylated monoglycerides
  - Ethyl oleate; Etocas 35 NF; Incrosol 40; Miglyol® 812 N; Miglyol® 840
  - PEG-4; Propylene glycol; Sesame (Sesamum indicum) oil; Soluphor® P; Soybean (Glycine soja) oil
  - Super Refined® Corn NF; Super Refined® Cottonseed NF; Super Refined® Olive NF; Super Refined® Peanut NF; Super Refined® Safflower USP
  - Super Refined® Sesame NF; Super Refined® Soybean USP

solvent, perfumes
  - Captex® 300

solvent, petroleum jellies
  - Penreco Snow

solvent, pharmaceutical aerosols
  - Labrafac® Lipophile

solvent, pharmaceutical aqueous coatings
  - Tributyl citrate

solvent, pharmaceutical creams
  - Caprylic/capric/stearic triglyceride; Crodamol PC

solvent, pharmaceutical creams/lotions
  - Caprylic/capric triglyceride PEG-4 esters; Crodamol PC; Crodamol AB; Crodamol DA; Isocetyl stearate; Labrafac® Lipophile
  - Miglyol® 840; Octyl isononanoate

solvent, pharmaceutical emulsions
  - Crodamol PMP; Labrafac® Lipophile
solvent, pharmaceutical extraction
Hexane

solvent, pharmaceutical gelatin capsules
Pureco® HOS; Super Refined® PEG-300 NF; Super Refined® PEG-400 NF; Super Refined® PEG-600 NF

solvent, pharmaceutical microemulsions
PEG 300; Captex® 500P; Captex® 8227; Carbon tetrachloride

solvent, pharmaceuticals
Acetic acid; Acetic acid, glacial; Acetone; Acetonitrile; Acetylated mono- and diglycerides of fatty acids

solvent, pharmaceutical lotions
Labrafac® Lipophile

solvent, pharmaceutical liquids
Carbowax® E300 NF; Carbowax® E400 NF; Carbowax® E600 NF; Carbowax® E1000 NF; Carbowax® E1450 NF

  - PPG-5 lanolin alcohol ether; PPG-20 lanolin alcohol ether; PPG-2 myristyl ether
Functional/Application Index

spreading agent, pharmaceutical skin
- emulsions
  - Myritol® 318

spreading agent, pharmaceutical soaps
- Softigen® 701

spreading agent, pharmaceutical w/o emulsions
- Cetiol® OE

spreading agent, pigmented products
- Ceraphyl® 55; Stearyl dimethicone

spreading agent, pigmented sticks
- Lipovol SES

spreading agent, rectals
- Softigen® 701

spreading agent, skin
- Miglyol® 810; Miglyol® 812; Miglyol® 812 N; Miglyol® 818; Miglyol® 840

spreading agent, steroidal products
- Super Corona Lanolin

spreading agent, suppositories
- Fancol™ Karite Extract; Shea butter
  (Butyrospernum parkii) extract; STEPAN® PEG 200 DL; STEPAN® PEG 200 DO; STEPAN® PEG 400 DL
  STEPAN® PEG 400 DO; STEPAN® PEG 400 DS; STEPAN® PEG 400 ML; STEPAN® PEG 400 MO;
  STEPAN® PEG 600 DL; STEPAN® PEG 600 DO; STEPAN® PEG 600 DS; STEPAN® PEG 600 ML;
  STEPAN® PEG 6000 MS; Super Corona Lanolin

spreading agent, topical emulsions
- D.P.P.G.; Super Hartolan

spreading agent, topical medicinals
- Isopropyl myristate

spreading agent, topicals
- Ceraphyl® 791; Crodamol GTCC; Crodamol GTCC-PN; Crodamol SCO; Dow Corning® Dimethiconol Blend 20
  Dow Corning® QT-9120 Silicone Fluid; Estasan™ GT 8-60 3575; Estasan™ GT 8-65 3577; Estasan™ GT 8-70 3579;
  Estol IPM 1509 (BIO-IPM)

- Isocetyl stearyl stearate; Isostearyl neopentanoate; Lanogene®; Lexol® IPP; Myristyl propionate
  Octyl palmitate; Octyl stearate; PEG-150 distearate; PPG-26 oleate; Ritalan®
  Softigen® 701; Super Refined® Crodamol SCO; Tegosoft® Liquid; Tegosoft® M;
  Tegosoft® OS

- Tegosoft® P; Tridecyl neopentanoate; Volpo 3

spreading agent, vaginals
- Softigen® 701

spreading agent, w/o-o/w emulsions
- Myritol® 312

stabilizer
- Agar Agar NF MK-80-B Powdered; Agar Agar NF S-100 Powdered; Agar Agar NF S-150-B Powdered;
  Agar Agar S-100; Alcolec® PS 20 P
  Alcolec® PS 40 P; Alcolec® PS 50 P;
  Aqualon® Cellulose Gum; Ascorbyl palmitate; Blanose® Cellulose Gum
  Butyl octyl salicylate; C18 polycarbamyl polyglycol ester; Disodium cocoamphipropionate; Epiol OH;
  Fanoliv™ Butter
  Fanoliv™ Wax; Gantrez® AN-139 BF; Gelot 64®; Gelucire 33/01; Gelucire 50/13
  Gum Arabic G-150 Powdered; Gum Arabic NF/FCC Clean Amber Sorts; Klucel® 'F' Grades;
  Lactic acid esters of mono- and diglycerides of fatty acids; Lanolin acid
  Magnesium stearate; Maltose; Methocel® A15-LV; Poloxamer 217; Poloxamer 231
  Poloxamer 234; Poloxamer 235; Poloxamer 237; Poloxamer 238; Poloxamer 282

- Tylopur® CB 30000 G1; Tylopur® CB 30000 P2; Tylose® H 30000 P2 PHA; Tylose® H 100000 P2 PHA
stabilizer, pharmaceutical w/o emulsified creams
  Argobase EU
stabilizer, pharmaceutical w/o systems
  Fancor® Lanwax
stabilizer, pigments: pharmaceuticals
  Tylose® MH Grades; Tylose® MHB
stabilizer, prolonged-action preparations
  Carbomer
stabilizer, reactive compounds
  C*Cavitron 82003; C*Cavitron 82004; C*Cavitron 82005
stabilizer, rectals
  Carbomer; Edetic acid; Ethylenediamine; Magnesium aluminum silicate; Xanthan gum
stabilizer, salves
  Permulgin® D
stabilizer, secondary: emulsions
  PEG-50 hydrogenated tallowamide
stabilizer, secondary o/w emulsion: lip care
  Colonial LAO
stabilizer, secondary o/w emulsion: ointments
  Colonial LAO
stabilizer, secondary o/w emulsion: pharmaceutical creams/lotions
  Colonial LAO
stabilizer, secondary o/w emulsion: topicals
  Colonial LAO
stabilizer, skin disinfectants
  Aculyn® 46
stabilizer, skin preparations
  Etidronic acid
stabilizer, skin products
  Etidronic acid
stabilizer, slow-release capsules
  Agar
stabilizer, slow-release tablets
  Shellac
stabilizer, soft capsules
  Sammi Gelatine
stabilizer, soft gelatin capsule oily products
  Geleol®
stabilizer, solid dosages
  Benecel® M; Benecel® ME1; Benecel® ME2; Benecel® MP3; Benecel® MP6
  Benecel® MP8; Benecel® MP9; Citrocol GMS 0400
stabilizer, solid oral dosages
  Shellac
stabilizer, soluble granules
  Satialgine™ H8
stabilizer, soluble tablets
  Satialgine™ H8

stabilizer, solutions
  Tabulose® SC-200; Tabulose® SC-580;
  Tabulose® SC-601; Tabulose® SC-611;
  Tabulose® SC-612
  Tabulose® SC-613; Tabulose® SC-681;
  Viscocel® SC-580F; Viscocel® SC-601;
  Viscocel® SC-611
  Viscocel® SC-612; Viscocel® SC-613;
  Viscocel® SC-681
stabilizer, steric: pharmaceuticals
  Methoxy PEG methacrylate; Rohamere® 6850-0
stabilizer, steroid hormones
  Plasdone® C-15; Plasdone® C-30
stabilizer, sugar-free pharmaceuticals
  Sorbitol Sol’n. Noncrystallizing
stabilizer, supplements
  Calcium citrate
stabilizer, suppositories
  Agar; Crodacoil C-95 NF; Crodacoil S95 NF;
  DREW MULSEL® 200K; Edible Beef Gelatin
  KELGIN® MV
stabilizer, surgical jellies
  KELCOSOL®; KELGIN® LV; KELTONE® HV
stabilizer, surgical lubricants
  Agar
stabilizer, suspensions
  Ceko® 10000; Lanolin Pharmaceutical;
  Lanolin USP; Ritachol®; Tabulose® SC-200
  Tabulose® SC-580; Tabulose® SC-601;
  Tabulose® SC-611; Tabulose® SC-612;
  Tabulose® SC-613
  Tabulose® SC-681; Viscocel® SC-580F;
  Viscocel® SC-601; Viscocel® SC-611;
  Viscocel® SC-612
  Viscocel® SC-613; Viscocel® SC-681
stabilizer, suspensions: implants
  Crospovidone
stabilizer, suspensions: injectables
  Kollidon® 12PF; Kollidon® 17PF; Kollidon® 25;
  Kollidon® 30; Kollidon® 90F
stabilizer, suspensions: liquid orals
  Lutrol® F 68
stabilizer, suspensions: ophthalmics
  Crospovidone; Kollidon® 12PF; Kollidon® 17PF;
  Kollidon® 25; Kollidon® 30; Kollidon® 90F
stabilizer, suspensions: parenterals
  Lutrol® F 68
stabilizer, suspensions: percutaneous injectables
Crospovidone

stabilizer, suspensions: pharmaceuticals
Cremophor® S 9; Kollidon® CL; Kollidon® CL/M

stabilizer, suspensions: topicals
Crospovidone; Lutrol® F 68

stabilizer, sustained-releases
Precirol ATO 5

stabilizer, sustained-release tablets
Benecel® M; Benecel® ME1; Benecel® ME2; Benecel® MP3; Benecel® MP6; Benecel® MP8; Benecel® MP9

stabilizer, syrups
Cekol® 30000

stabilizer, tablet binding
Klucel® E Pharm; Klucel® EX Pharm; Klucel® G Pharm; Klucel® H Pharm; Klucel® HX Pharm; Klucel® J Pharm; Klucel® L Pharm; Klucel® M Pharm

stabilizer, tablet coatings
Cekol® 30; Klucel® EF Pharm; Klucel® E Pharm; Klucel® EX Pharm; Klucel® GF; Klucel® G Pharm; Klucel® HF; Klucel® H Pharm; Klucel® HX Pharm; Klucel® JF; Klucel® J Pharm; Klucel® LF Pharm; Klucel® L Pharm; Klucel® MF; Klucel® M Pharm

stabilizer, tablet excipients
Locust Bean Gum Type A-100; Locust Bean Gum Type A-250; Locust Bean Gum Type A-270

stabilizer, tablets
Calcium citrate; Compritol 888; Effer-Soda™; Gum ghatti; Jungbunzlauer Xanthan Gum; Food Grade Magnabrite® F; Polyplasdone® XL; Polyplasdone® XL-10; Potassium alginate; Sammi Gelatine; Silica, fumed

stabilizer, tannin burn ointments
Tylopur® C 600 G1

stabilizer, therapeutic ointments
Vilvanolin® CAB

stabilizer, thermal: suppositories
Cab-O-Sil® EH-5; Cab-O-Sil® H-5; Cab-O-Sil® LM-150; Cab-O-Sil® M-5; Cab-O-Sil® MS-55

stabilizer, thickener
Alginic acid

stabilizer, toothpaste
Locust bean (Ceratonia siliqua) gum

stabilizer, topical cationic systems
Lexemul® AR

stabilizer, topical creams
Ethylene diamine; Lumulse® GMS K

stabilizer, topical creams/lotions
Hest CO

stabilizer, topical emulsions
Hydrine®; Labrafil® M 2130 CS; Super Hartolan

stabilizer, topical emulsions/suspensions/gels
Carbopol® 934; Carbopol® 2984; Carbopol® 5984

stabilizer, topical gels
Acrylates/C10-30 alkyl acrylate crosspolymer; Carbopol® 971P; Carbopol® 974P

stabilizer, topical liquids
Natrosol® 250 HX; Natrosol® 250 M

stabilizer, topical lotions
Carbopol® 971P

stabilizer, topical o/w creams/lotions
Cerasynt® 840

stabilizer, topicals
Acrylates/C10-30 alkyl acrylate crosspolymer; Carbomer; Carbopol® 940; Carbopol® 1342; Carrageenan (Chondrus crispus)

Cithroi GMS 0400; Crillet 1 HP; Crillet 1 NF; Crillet 4 HP; Crillet 4 NF; Crodamol GTCC; Crodamol GTCC-PN; Diisopropyl cresol; Edetic acid; Edible Beef Gelatin

Ethylene diamine; Extra Olein™ 99; Glyceryl ricinoleate; Hydroxyethylcellulose; Hydroxylated lanolin

Isopropyl palmitate; Laneth-15; Laureth-23; Lecithin; Lexemul® 515

Lexemul® AS; Lexemul® EGMS; Lipolan; Lipolan 31; Magnesium aluminum silicate

Methylcellulose; OHlan®; Oleic acid; Pectin; PEG-2 stearate

PEG-40 stearate; Plasdone® K-25; Plasdone® K-29/32; Plasdone® K-90; Plasdone® K-90D

Promulgen® D; Promulgen® G; Sodium bisulfite; Sorbitan stearate; Span® 20

Span® 40; Span® 60; Span® 85V; Spray Dried Fish Gelatin; Syncrowax ERLC

Syncrowax HGLC; Syncrowax HRC; Tegin® 515 VA; Tetrasodium etidronate; Tris (hydroxymethyl) aminomethane

**Handbook of Pharmaceutical Additives, Third Edition** 2554
Functional/Application Index

Ricinoleamidopropyl betaine
surfactant, medicated conditioners
Chembetaine® CGF

surfactant, medicated products
Disodium undecylenamido MEA-sulfosuccinate

Chembetaine® CGF

surfactant, medicated shampoos

Disodium undecylenamido MEA-sulfosuccinate

Chembetaine® CGF

surfactant, medicated soaps/shampoos
Sodium laureth-5 carboxylate

Potassium cocoate

Crill 45

surfactant, metered-dose inhalers
Crill 45

surfactant, microbiocide topicals
Cetyl betaine

surfactant, microemulsions
Labrafac® Hydro WL 1219; Labrasol®; L.A.S.

TEGO®-Betain ZF

surfactant, medicated cleansers
Mackanate™ UM-50

surfactant, nasal dosage inhalers
Crill 45

surfactant, nutritional products
Imwitor® 928; Imwitor® 988

surfactant, ointments
Alfonic® 1012-2.5; Alfonic® 1012-3; Alfonic® 1216-1.5; Crillet 6; Docusate Sodium USP

Fancol™ CO-30; PEG-8 propylene glycol cocoate; PEG-20 sorbitan isostearate; PhosPho F-97; Potassium stearate

Sodium C12-15 alkyl sulfate; Sodium C12-18 alkyl sulfate

surfactant, ophthalmics
Benzalkonium chloride; Crillet 3 NF; Crillet 4 HP; Crillet 4 NF; Nonoxynol-4

Polysorbate 20; Polysorbate 80; Sorbitan laurate

surfactant, oral s
Ammonium glycyrrhizinate; Crill 1 NF; Crill 3 NF; Crill 4 NF; Crillet 3 NF

Crillet 4 HP; Crillet 4 NF; Crodasinic LS30; Crodasinic LS30 NP; Crodasinic LS95 NP

Crodesta F-10; Etocas 35 HV; Etocas 35 NF; Hydrogenated castor oil; Imwitor® 988

Lecithin; PEG-20 stearate; Pluronic® F68NF; Pluronic® F87NF; Pluronic® F108NF

Pluronic® L44NF; Poloxamer 188; Poloxamer 331; Polysorbate 20; Polysorbate 60

Polysorbate 80; Sodium lauroyl sarcosinate; Sorbitan laurate; Sorbitan olate; Sorbitan stearate

Sorbitan trioleate; Stearyl alcohol

surfactant, otics
Benzalkonium chloride; Polysorbate 80

surfactant, o/w emulsions
PEG-30 glyceryl stearate; Tagat® L2; Tagat® O2

surfactant, o/w: pharmaceuticals
Hydrogenated lecithin

surfactant, parenterals
Crill 1 NF; Crillet 3 NF; Crillet 4 HP; Crillet 4 NF; Etocas 35 HV

Etocas 35 NF; Incrocas 40; Polysorbate 20; Polysorbate 80

surfactant, percutaneous injectables
Dimethicone copolyol

surfactant, pharmaceutical creams/lotions
Lipocol SC-25; Polywax EW

surfactant, pharmaceutical emulsions
Hydroxystearin phosphate; Oleth-25

surfactant, pharmaceutical o/w emulsions
Lonzest® GMS-C

surfactant, pharmaceutical pastes
Polywax EW

surfactant, pharmaceuticals
Abil® B 8843; Abil® B 8852; Abil® B 8863; Abil® B 9950; Abil® B 88183

Abil® B 88184; Abil® EM 90; Adeka PEG-200; Adeka PEG-300; Adeka PEG-400

Adeka PEG-600; Adeka PEG-1000; Adeka PEG-1500; Adeka PEG-4000; Adeka PEG-6000

Adeka PEG-20,000; Adekaestrol S-60; Alkasur® CO-630 Special; Alkyl dimethyl ethylbenzyl ammonium chloride;

AMMONYX® LO

AMMONYX® SO; Arlacel® 165V; Arlatone® G; Benzalkonium chloride; BIO-TERGE® 804

CEDEPAL® TD-407; CEDEPAL® TDS 484;

Cetalkonium chloride; Ceteareth-20; Ceteareth-25

Ceteth-12; Ceteth-15; Ceteth-16; Ceteth-20; Ceteth-24

Ceteth-25; Cetrimonium bromide;

Cetrimonium chloride; Cetyl dimethicone copolyol; Cetyl myristate

Cholesteryl olate; Cocamidopropylamine

surgical aid
Bucrylate; Polyethylene terephthalate

suspending agent
Aqualon® Cellulose Gum; Bentone® MA;
Blanose® Cellulose Gum; Butylene glycol
dicaprylate/dicaprate; Cab-O-Sil® EH-5
Cab-O-Sil® H-5; Cab-O-Sil® LM-150; Cab-O-
Sil® M-5; Cab-O-Sil® MS-55; Castorwax®
MP-80
Disteardimonium hectorite; Keltrol® F;
Klucel® 'F' Grades; STEPAN® SAB-2; TIC
Pretested® Ticalose® CMC 2500 Std. Powd.
suspending agent, acidic pharmaceuticals
Magnabrite® K

suspending agent, acne lotions
Hectorite BC 840

suspending agent, acne preparations
Polawax® NF

suspending agent, analgesic rubs
Polawax® NF

suspending agent, anhydrous systems
Beeswax, synthetic; Syncrowax ERLC

suspending agent, antacids
Keltrol® T; Keltrol® TF

suspending agent, antibiotic creams/lotions
Polawax® NF

suspending agent, antibiotics
Plasdone® C-15; Plasdone® C-30

suspending agent, antidandruff shampoos
Bentone® EW; Dihydrogenated tallow
phthalic acid amide

suspending agent, anti diarrheal preparations
Attaulugite

suspending agent, antiseptics
Plasdone® C-15; Plasdone® C-30

suspending agent, aqueous pharmaceuticals
Natrosol® Plus 330 CS

suspending agent, barium sulfate: radiology
Agar Agar NF MK-80-B Powdered; Agar
Agar NF S-100 Powdered; Agar Agar NF S-
150-B Powdered; Agar Agar S-100

suspending agent, buccal
Cellulose; Guar (Cyanopsis tetragonoloba) gum; Methylcellulose

suspending agent, calamine lotion
Bentonite; Gelwhite® MAS 100(SC)

suspending agent, capsules
Caprylic/capric/disuccinic triglyceride

suspending agent, chap stick
Bentone Gel® EUG V

suspending agent, controlled-releases
Klucel® G Pharm; Klucel® HF; Klucel® H
Pharm; Klucel® HXF; Klucel® HX Pharm
Klucel® JF; Klucel® J Pharm; Klucel® LF

K100LV Premium
Methocel® K100M Premium

suspending agent, controlled-release solids
Renex® PEG 300; Renex® PEG 400;
Renex® PEG 1000; Renex® PEG 1500;
Renex® PEG 4000

suspending agent, controlled-release tablets
Carbopol® 940; Carbopol® 971P;
Carbopol® 974P

suspending agent, cough drops
Spray Dried Gum Arabic Type A-180 NF
Premium

suspending agent, cough syrups
Spray Dried Gum Arabic Type A-180 NF
Premium

suspending agent, creams
Caprylic/capric/disuccinic triglyceride;
Crillet 3 NF

suspending agent, creams/lotions
Guar (Cyanopsis tetragonoloba) gum;
Imwitor® 960; Keltrol®; Locust bean
(Ceratonia siliqua) gum; Methocel® K4M
Premium

Potassium alginate

suspending agent, dental impression
compounds
Potassium alginate

suspending agent, dental products
Carboxymethylcellulose sodium; Cellulose;
Gelatin; Magnesium aluminum silicate

suspending agent, dental releases
KELVIS®

suspending agent, dentifrices
STEPANOL® WA-100 NF/USP; Tragacanth
(Astragalus gummifer) gum

suspending agent, denture adhesives
KELTON® HV

suspending agent, elixirs
Keltrol® T

suspending agent, emollients
Sodium phthalate stearyl amide

suspending agent, emulsions
Imwitor® 960; Tabulose® SC-200;
Tabulose® SC-580; Tabulose® SC-601;
Tabulose® SC-611
Tabulose® SC-612; Tabulose® SC-613;
Tabulose® SC-681; Viscocel® SC-580F;
Functional/Application Index

- **Viscocel® SC-601**
- **Viscocel® SC-611; Viscocel® SC-612**
- **Viscocel® SC-613; Viscocel® SC-681**

suspending agent, encapsulated pharmaceuticals
- Pectin

suspending agent, encapsulation
- Klucel® EF Pharm; Klucel® E Pharm; Klucel® EX Pharm; Klucel® EFX Pharm; Klucel® EX Pharm; Klucel® GF; Klucel® G Pharm; Klucel® HF; Klucel® H Pharm; Klucel® HXF; Klucel® HX Pharm; Klucel® JF; Klucel® J Pharm; Klucel® LF Pharm; Klucel® L Pharm; Klucel® MF; Klucel® M Pharm

suspending agent, external pharmaceuticals
- Miglyol® 812

suspending agent, gels
- Crillet 3 NF

suspending agent, hard gelatin capsules
- Plurrol® Oleique

suspending agent, high-dosage pharmaceuticals
- Keltrol® CR

suspending agent, IM injectables
- Gelatin; PVP

suspending agent, infant formulas
- Dextrin

suspending agent, inhalants
- Gelatin

suspending agent, injectables
- Carboxymethylcellulose sodium; Methylcellulose; Polyvinyl alcohol

suspending agent, internal analgesics
- Gelwhite® MAS 100(SC)

suspending agent, IV
- Gelatin

suspending agent, laxative: barium sulfate
- Agar

suspending agent, laxatives
- Renex® PEG 300; Renex® PEG 400; Renex® PEG 1000; Renex® PEG 1500; Renex® PEG 4000

suspending agent, liquid antacids
- MANUCOL® LB

suspending agent, liquid dosages
- Benecel® M; Benecel® ME1; Benecel® ME2; Benecel® MP3; Benecel® MP6; Benecel® MP8; Benecel® MP9

suspending agent, liquid emulsions
- Caprylocapric/disuccinic triglyceride

suspending agent, liquid orals
- Carbopol® 71G NF Polymer; Natrosol® 250; Natrosol® 250 M

suspending agent, liquid products
- Plasdone® K-25; Plasdone® K-29/32; Plasdone® K-90

suspending agent, liquid suspensions
- TIC Pretested® Pre-Hydrated® Ticaxan® Xanthan NF Powd.

suspending agent, lotions
- TIC Pretested® Colloid 488T Powd.; TIC Pretested® Colloid 602 Powd.

suspending agent, lotions/creams
- Keltrol® T; Keltrol® TF

suspending agent, low/no-sodium pharmaceuticals
- KELMAR®

suspending agent, lozenges
- Carboxymethylcellulose sodium

suspending agent, medicated jellies
- Bentonite; Magnesium aluminum silicate

suspending agent, medicated syrups
- Keltrol® T; Keltrol® TF

suspending agent, medicinal emulsions
- Powdered Tragacanth Gum Type E-1; Powdered Tragacanth Gum Type L; Powdered Tragacanth Gum Type W; Tragacanth (Astragalus gummifer) gum; Tragacanth Gum Ribbon No. 1 NF FCC

suspending agent, medicinal skin creams
- Hectorite BC 840

suspending agent, mineral oil
- Distearly phthalic acid amide

suspending agent, moisturizing creams/lotions
- Sodium phthalate stearyl amide

suspending agent, mouth preps
- Carboxymethylcellulose sodium

suspending agent, mucoadhesives
- Carbopol® 934P; Carbopol® 940; Carbopol® 971P; Carbopol® 974P

suspending agent, multivitamin chewable tablets
- PVP

suspending agent, nasal products
- Miglyol® 829

suspending agent, nasal solutions
- Tragacanth (Astragalus gummifer) gum

suspending agent, oil droplets:
- pharmaceuticals
- Rhodigel® Clear 80

suspending agent, ointments
- Bentone® 27 V CG; Bentone Gel® EUG V; Bentonite; CMC Daicel; Gelatin

suspending agent, ointments
- Hectorite BC 840; Magnabrite® F; Magnesium aluminum silicate; Silica, fumed; Super Refined® PEG-400 NF

### Handbook of Pharmaceutical Additives, Third Edition

**Viscosity Control Agent, Pharmaceutical Sticks**
- Magnesium aluminum silicate; Meritol 121; Meritol 130; Meritol 160; Meroxapol 172
- Meroxapol 174; Meroxapol 311; Methocel® A4C Premium EP; Methocel® A4M Premium EP; Methocel® E50LV Premium
- Methyl hydroxyethylcellulose; Mira-Thik® 470; Myristamide MEA; Octyldecyl stearoyl stearate; PEG-2M
- PEG-5M; PEG-7M; PEG-9M; PEG-20M; PEG-23M
- PEG-90M; PEG-115M; PEG-5 castor oil; PEG-8 castor oil; PEG-9 castor oil
- PEG-15 castor oil; PEG-4 dilaurate; PEG-150 distearate; PEG-8 laurate; PEG-8 oleate
- PEG-10 propylene glycol; PEG-25 propylene glycol stearate; PEG-80 sorbitan laurate; PEG-75 soy glycerides; PEG-4 stearate
- PEG-8 stearate; PEG-12 stearate; Polyacrylic acid; Polysorbate 81; Powdered Gum Tragacanth T-150
- Powdered Gum Tragacanth T-200; Powdered Gum Tragacanth T-300; Powdered Gum Tragacanth T-400; Powdered Gum Tragacanth T-500; PPG-3-laureth-9
- PPG-26 oleate; PPG-15 stearyl ether; Propylene glycol alginate; Propylene glycol dicaprylate; Propylene glycol dipelargonate
- Pumice; Sodium oleate; Sodium palmitate; Sodium polycrylate; Sodium silicoaluminate
- Sodium stannate; Sorbitan tristearate; Stearalkonium bentonite; Stearamide AMP; Stearamide DBIA-stearate
- Stearamine oxide; Stearone; Stearyl stearate; Tetradecylicosanol; 2-Tetradecyloctadecanol
- Trihydroxystearin; Triisostearyl trilinoleate; Trilanth-4 phosphate; Trilaurin; Trimyristin
- Tripalmitin; Triundecanoin; Tromethamine magnesium aluminum silicate; Tylose® MH Grades; Tylose® MHB
- Van Gel® C

**Viscosity Control Agent, Pharmaceutical Suspensions**
- Lanette® 18

**Viscosity Control Agent, Rectals**
- Magnesium aluminum silicate

**Viscosity Control Agent, Suppositories**
- Octyldecyl stearoyl stearate

**Viscosity Control Agent, Topicals**
- creams/lotions: Liponate BS
- control agent, topical emulsions: Isostearyl alcohol
- control agent, topicals: Acritamer® 940; Acritamer® 941; Aluminum starch octenyl succinate; Cetareath-20; Hydrogenated castor oil
- Hydroxypropyl methylcellulose; Isocetyl stearoyl stearate; Laneth-15; Liponate MM; Magnesium aluminum silicate
- Octyldecyl stearoyl stearate; PEG-4 dilaurate; PEG-150 distearate; PEG-8 stearate; Polyacrylic acid
- PPG-26 oleate; PPG-15 stearoyl ether; Tetradecylicosanol; Trihydroxystearin; Triisostearyl trilinoleate
- Trilanth-4 phosphate

**Viscosity Control Agent, Vaginals**
- Magnesium aluminum silicate

**Viscosity Modifier**
- Calcium/sodium PVM/MA copolymer; Crodafos CS20A; Gantrez® MS-955; Gantrez® S-95; Gantrez® S-97
- PVP/VA E-535; PVP/VA E-635; PVP/VA E-735; PVP/VA I-335; PVP/VA I-535
- PVP/VA I-735; Sympatens-PEG/400; Tylopur® C 600 G1; Tylopur® C 1000 P2; Tylopur® C 6000 G1

**Viscosity Modifier, Absorption Enhancement**
- Caprol® 3GS

**Viscosity Modifier, Acid Suspensions**
- Veegum® K

**Viscosity Modifier, Aerosols**
- Captex® 300; Captex® 355; Captex® 1000; Tricaprin

**Viscosity Modifier, Alcohol-Based Gels**
- TEGO® Carbomer 140

**Viscosity Modifier, Anesthetic Spray Bandages**
- PVP/VA S-630

**Viscosity Modifier, Anhydrous Salves**
- Crodacol C-90; Crodacol CS90 EP; Crodacol S95 EP

**Viscosity Modifier, Antibiotic Aerosol Bandages**
- PVP/VA S-630

**Viscosity Modifier, Antiseptic Spray Bandages**
- PVP/VA S-630
Functional/Application Index

viscosity modifier, clear water gels
  TEGO® Carbomer 140

viscosity modifier, clinical nutrition
  Capmul® GMS-50; Caprol® 3GS; Caprol® PGE860; Captex® 300; Captex® 355 EP/NF
  Captax® 355; Captex® 1000; Hydrokote® 112; Hydrokote® AP5; Hydrokote® M; Tricaprin

viscosity modifier, clinical nutrition

  TEGO® Carbomer 134

viscosity modifier, coatings
  Capmul® GMS-50; Caprol® 3GS; Caprol® PGE860; Captex® 300; Captex® 355
  Captax® 1000; Hydrokote® 112; Hydrokote® AP5; Hydrokote® M; Tricaprin

viscosity modifier, compaction:
  pharmaceuticals
  Sterotex® NF

viscosity modifier, delivery/absorption enhancement
  Capmul® GMS-50; Caprol® PGE860; Captex® 300; Captex® 355; Captex® 1000

Polyglyceryl-6 distearate; Polyglyceryl-3 stearate; Tricaprin

viscosity modifier, delivery enhancement
  Caprol® 3GS

viscosity modifier, delivery systems
  Capmul® GMS-50K

viscosity modifier, dental products
  Magnesium aluminum silicate

viscosity modifier, dermatological emulsions
  Capmul® GMS-50; Captex® 8227

viscosity modifier, dermatological liquid cleansers
  Amonyl® 265 BA; Amonyl® 380 BA

viscosity modifier, dermatologicals
  Caprol® 3GS; Caprol® PGE860; Captex® 300; Captex® 355; Captex® 800
  Captax® 1000; Hydrokote® 112; Hydrokote® AP5; Hydrokote® M; Polyglyceryl-6 distearate
  Polyglyceryl-3 stearate; Shea butter (Butyrospermum parkii); Sterotex® NF; Tricaprin

viscosity modifier, ear drops
  Tylose® H 300 G4 PHA

viscosity modifier, encapsulation
  Hydrokote® 112; Hydrokote® AP5; Hydrokote® M; Sterotex® NF

viscosity modifier, enteric drug releases
  Polyvinyl acetate phthalate

viscosity modifier, eye drops
  Tylose® H 300 G4 PHA

viscosity modifier, gelatin capsules
  Captex® 1000; Tricaprin

viscosity modifier, infant formulas
  Capmul® GMS-50; Capmul® GMS-50K; Caprol® 3GS; Caprol® PGE860; Captex® 300
  Captex® 355; Captex® 1000

viscosity modifier, liniments
  Tylopur® C 300 P2; Tylopur® C 1000 P2

viscosity modifier, medicated jellies
  Magnesium aluminum silicate

viscosity modifier, microemulsions
  Capmul® PGE860; Captex® 800

viscosity modifier, nasal/eyes/ear drops
  Tylopur® C 600 G1; Tylose® H 4000 G4 PHA

viscosity modifier, nose drops
  Tylose® H 300 G4 PHA

viscosity modifier, nutritional products
  Captex® 100

viscosity modifier, nutritional/sports supplements
  Capmul® GMS-50; Caprol® PGE860; Captex® 1000

viscosity modifier, nutritional supplements
  Caprol® 3GS; Captex® 200P; Hydrokote® 112; Hydrokote® AP5; Hydrokote® M; Sterotex® NF

viscosity modifier, ointments
  Magnesium aluminum silicate; Permulgin® D; Super Refined® PEG-400 NF; Super Refined® PEG-600 NF; T-Maz® 85 Special
  T-Maz® 85K; Tylopur® C 300 P2; Tylopur® C 1000 P2; Tylose® H 300 G4 PHA; Tylose® H 4000 G4 PHA

viscosity modifier, orals
  Captex® 300; Captex® 355; Captex® 1000; Magnesium aluminum silicate; Super Refined® PEG-300 NF
  Super Refined® PEG-400 NF; Super Refined® PEG-600 NF

viscosity modifier, o/w creams
  TEGO® Carbomer 134

viscosity modifier, o/w lotions
  TEGO® Carbomer 141

viscosity modifier, parenterals
  Super Refined® PEG-300 NF; Super Refined® PEG-400 NF; Super Refined® PEG-600 NF

viscosity modifier, pharmaceutical creams
  Permulgin® D; Veegum®; Veegum® HV; Veegum® K

viscosity modifier, pharmaceutical creams/lotions
  Crodacol C-90; Crodacol CS90 EP; Crodacol S95 EP; Locust Bean Gum Type
viscosity modifier, pharmaceutical emulsions

- Shea butter (Butyrospermum parkii)
- Tylopur® C 300 P2; Tylopur® C 1000 P2; Tylopur® C 6000 G1; Tylose® H 4000 G4 PHA
- Tylose® H 30000 P2 PHA; Veegum®; Veegum® HV; Veegum® K

viscosity modifier, pharmaceutical gels

- Tylose® H 300 G4 PHA; Tylose® H 4000 G4 PHA

viscosity modifier, pharmaceutical liquids

- Methocel® K100 Premium LV CR EP; Methocel® K100 Premium LV EP; Methocel® K100 Premium LV LH EP; Methocel® K3 Premium LV EP; Veegum® Veegum® HV; Veegum® K

viscosity modifier, pharmaceutical microemulsions

- Captex® 200P

viscosity modifier, pharmaceutical o/w emulsions

- Tylopur® C 600 G1

viscosity modifier, pharmaceutical pastes

- Veegum®; Veegum® HV; Veegum® K

viscosity modifier, pharmaceuticals

- Alkamuls® PSML-20; BPS-15; BPSH-25; Capmul® GMS-50; Caprol® 3GS
- Caprol® PGE860; Captex® 100; Captex® 300; Captex® 300EP; Captex® 355 EP/NF; Captex® 355; Captex® 800; Captex® 1000; Captex® 8227; DEA-lauryl sulfate
- Forlan C-24; GPG™ 3565; GPG™ 7030; Hydrokote® 112; Hydrokote® AP5
- Hydrokote® M; Locust Bean Gum Type A-100; Locust Bean Gum Type A-250; Locust Bean Gum Type A-270; Magnesium aluminum silicate
- Nikkol BPS-5; Nikkol BPS-10; Nikkol BPS-20; Nikkol BPS-30; NINOL® 30-LL; PEG-300 oleate; PEG-5 phytosterol; PEG-10 phytosterol; PEG-15 phytosterol; PEG-20 phytosterol; PEG-25 phytosterol; PEG-30 phytosterol; PEG-20 sorbitan tallate; PEG-20 sorbitan tritallate; PEG-300 steareate
- PEG-1500 steareate; Powdered Guar Gum Type A; Powdered Guar Gum Type AA; Powdered Guar Gum Type BB
- PVP/VA S-630; PVP/VA copolymer; Ritabate 20; Ritabate 40; Ritabate 60
- Ritabate 80; STEOL® CA-460; TEGO® Carbomer 134; TEGO® Carbomer 140; TEGO® Carbomer 141
- T-Maz® 20; T-Maz® 28; T-Maz® 60K; T-Maz® 65K; T-Maz® 80
- T-Maz® 80K; T-Maz® 80KLM; T-Maz® 81; T-Maz® 85; T-Maz® 90
- Van Gel® C; Veegum® D; Veegum® F; Veegum® HS

viscosity modifier, pharmaceutical solutions

- Permulgin® D

viscosity modifier, pharmaceutical suspensions

- Captex® 200P; Tylopur® C 300 P2; Tylopur® C 1000 P2; Tylopur® C 6000 G1; Tylose® H 4000 G4 PHA
- Tylose® H 30000 P2 PHA; Veegum®; Veegum® HV; Veegum® K

viscosity modifier, pharmaceutical syrups

- Tylopur® C 300 P2; Tylopur® C 1000 P2; Tylopur® C 6000 G1; Tylose® H 300 G4 PHA; Tylose® H 4000 G4 PHA
- Tylose® H 30000 P2 PHA

viscosity modifier, pharmaceutical vehicles

- Agnique GLY96; Emery® 916; Emery® 917

viscosity modifier, rectals

- Magnesium aluminum silicate

viscosity modifier, soft gelatin capsules

- Captex® 200P; Captex® 300; Captex® 355; Hydrokote® 112; Hydrokote® AP5; Hydrokote® M

viscosity modifier, sports supplements

- Caprol® 3GS; Captex® 355; Hydrokote® 112; Hydrokote® AP5; Hydrokote® M

viscosity modifier, suppositories

- Capmul® GMS-50; Capmul® GMS-50K; Caprol® 3GS; Captex® PGE860; Captex® 200P
- Captex® 800; Hydrokote® 112; Hydrokote® AP5; Hydrokote® M; Polyglyceryl-6 distearate
- Polyglyceryl-3 stearate; Shea butter
Functional/Application Index

(Butyrospermum parkii); Sterotex® NF viscosity modifier, suspensions
Captex® 300; Captex® 355; Captex® 1000 viscosity modifier, sustained-releases
Hydrokote® 112; Hydrokote® AP5; Hydrokote® M viscosity modifier, tablet coatings
Capmul® GMS-50K viscosity modifier, tablet excipients
Locust Bean Gum Type A-100; Locust Bean Gum Type A-250; Locust Bean Gum Type A-270 viscosity modifier, tablets
Capmul® GMS-50; Polyvinyl acetate phthalate; Sterotex® NF viscosity modifier, tannin burn ointments
Tylopur® C 600 G1 viscosity modifier, topical creams
Crodacol C-95 EP viscosity modifier, topicals
Magnesium aluminum silicate; STEOL® CA-130; STEOL® CA-230D; STEOL® CA-330; Super Refined® PEG-300 NF; Super Refined® PEG-400 NF; Super Refined® PEG-600 NF viscosity modifier, vaginalns
Magnesium aluminum silicate viscosity reducer, drug delivery systems
Crodamol EO viscosity reducer, ointments
BGL™ 855 viscosity reducer, parenterals
Crodamol EO viscosity reducer, petrolatum bases
Liquid Medilan™; Liquid Medilan™ Ultra viscosity reducer, pharmaceuticals
Cril 1 viscosity reducer, pharmaceutical syrups
ADM Invert Blend 90% Invert/76.7% Solids viscosity reducer, topicals
Crodamol EO viscosity regulator, ear drops
Walocel® C 1000 A; Walocel® C 2000 A viscosity regulator, nose drops
Walocel® C 1000 A; Walocel® C 2000 A visual disturbance treatment
Disodium inosinate vitamin
Eastman® Propionic Anhydride, Kosher; Folic Acid 10% Trituration; Glyceryl dicaprate; Glyceryl dicaprylate; Lipase Niacin USP, FCC; Panthenyl triacetate; Pyridoxine; Vitagen™; Vitamin D5 100 Vitamin D3 100 HP; Vitamin D3 850; Vitamin A, C & E Liposomes; Yeast extract vitamin A concentrate, multivitamins
Vitamin A Palmitate USP, FCC Type P1.7 vitamin A concentrate, soft gelatin capsules
Vitamin A Palmitate USP, FCC Type P1.7 vitamin, antipellagra
Nicotinic acid vitamin, antirachitic: pharmaceuticals
Cholecalciferol vitamin, antimocorbucic
Calcium ascorbate vitamin A precursor
Carotene vitamin A source
Shark liver oil vitamin A supplement, pharmaceuticals
Cod liver oil vitamin A supplement, vitamin mixes
Lucarotin® 10 CWD O vitamin A synthesis
β-ionone vitamin B1
Methyl acrylate vitamin B12 source
Cyanocobalamin vitamin B6 derivative, oil-soluble
DK; DP vitamin C derivative, oil-soluble
CP vitamin C derivative, water-soluble
VC-PMG; VC-SS vitamin C source
Aminopropyl ascorbyl phosphate; Ascorbyl palmitate; Calcium ascorbate vitamin C source, direct compression tablets
Coated Ascorbic Acid, Type EC vitamin C source, monovitamin tablets
Coated Ascorbic Acid, Type EC vitamin C source, multivitamin tablets
Coated Ascorbic Acid, Type EC vitamin C source, pharmaceutical dry preparations
Coated Ascorbic Acid, Type EC vitamin C source, pharmaceuticals
Coated Ascorbic Acid, Type EC; Sodium Ascorbate USP, FCC vitamin derivative, pharmaceuticals
Safester A-75 vitamin, direct compression: tablets
C-90™ Ascorbic Acid 90% Granulation vitamin D supplement, pharmaceuticals
Cod liver oil vitamin E, natural: capsules
Covitol® F-1000-2
Functional/Application Index

vitamin E, natural: chewable tablets  
Covitol® 1210

vitamin E, natural: food fortification  
Covitol® F-1000-2

vitamin E, natural: multivitamins  
Covitol® 1210

vitamin E, natural: pharmaceutical drops  
Covitol® F-1000-2

vitamin E, natural: pharmaceuticals  
Covitol® 1100; Covitol® 1185; Covitol® F-350M

vitamin E, natural: pharmaceutical syrups  
Covitol® F-1000-2

vitamin E, natural: tablets  
Covitol® 1210

vitamin E source  
Blue algae (Haslea ostrearia) extract; Tocopheryl succinate

vitamin E source, chewable supplements  
Dry Vitamin E Acetate 50% SD

vitamin E source, coated dietary supplements  
Dry Vitamin E Acetate 50% SD

vitamin E source, multivitamin tablets  
Dry Vitamin E Acetate 50% SD

vitamin E source, natural  
Wheat (Triticum vulgare) germ oil

vitamin E source, natural: capsules  
Tocopheryl acetate

vitamin E source, natural: liquids  
DL-α-Tocopherol

vitamin E source, natural: pharmaceuticals  
Tocophersolan; Tocopheryl acetate

vitamin E source, pharmaceutical hard shell capsules  
Dry Vitamin E Acetate 50% SD

vitamin E source, pharmaceuticals  
Dry Vitamin E Acetate 50% SD; d-α- Tocopheryl acetate

vitamin E source, topicals  
d-α-Tocopheryl acetate

vitamin F source  
Phospholipids

vitamin, hematopoietic  
Cyanocobalamin

vitamin mineral supplement  
Crillet 4 HP; Crillet 4 NF

vitamin, orals  
Retinol 50 P

vitamin, parenterals  
Retinol 50 P

vitamin, pharmaceuticals  
DL-Panthenol; Vitamin K₃ Dry Powd. 1% GFP; Vitamin K₃ Dry Powd. 5% GFP;

Vitamin K₁

vitamin source, B-complex syrups  
Riboflavin-5’-Phosphate Sodium USP, FCC

vitamin source, direct compression: tablets  
Ascorbic Acid Fine Gran. USP, FCC

vitamin source, dry products  
Ascorbic Acid Fine Gran. USP, FCC; Calcium Ascorbate USP FCC

vitamin source, hard-shell gelatin capsules  
Dry Vitamin E 75™ HP

vitamin source, liquid orals  
Vitamin B12 Cryst. USP, FCC

vitamin source, mineral tablets  
Dry Vitamin E 75™ HP

vitamin source, multivitamin tablets  
Ascorbic Acid Fine Gran. USP, FCC; Dry Vitamin E 75™ HP

vitamin source, parenteral liquid products  
Vitamin B12 Cryst. USP, FCC

vitamin source, parenteral solutions  
Riboflavin-5’-Phosphate Sodium USP, FCC

vitamin source, pharmaceutical liquids  
Riboflavin-5’-Phosphate Sodium USP, FCC

vitamin source, pharmaceuticals  
Ascorbic Acid Fine Gran. USP, FCC; Calcium Ascorbate USP FCC; Copherol® 1250; Copherol® F-1300; Vitinc® dl-alpha Tocopheryl Acetate USP XXII

vitamin source, solid dosages  
Riboflavin-5’-Phosphate Sodium USP, FCC

vitamin source, solid dosage triturations  
Vitamin B12 Cryst. USP, FCC

vitamin supplement, gelatin capsules  
Retinyl palmitate

vitamin supplement, multivitamins  
Retinyl palmitate

vitamin supplement, pharmaceuticals  
Folic acid; Lutavit® Niacin Feed Grade; Retinyl palmitate; Vitamin A and D-3 Blend

vulcanizing agent, dentures  
SR 297

wart treatment  
Lactic acid

water absorption aid, ointments  
Crodacol C-90; Crodacol CS90 EP; Crodacol S95 EP

water absorption aid, w/o emulsions  
Crodacol C-90; Crodacol CS90 EP; Crodacol S95 EP

water activity reducer, pharmaceutical syrups  
ADM Invert Blend 90% Invert/76.7% Solids

water barrier, antiperspirants  
Stearoxy dimethicone

    STEPAN® PEG 6000 MS
wetting agent, delivery/absorption enhancement
    Caprol® 3GO; Caprol® 10G40; Caprol® PGE860; Polyglyceryl-6 dioleate
wetting agent, dental products
    Crodasinic LS35; PEG-40 stearate; Sodium lauryl sulfate; Sodium N-oleoyl sarcosinate
wetting agent, dentifrices
    Lauroyl sarcosine; Paxnol SLS Pure; Sarkosyl® O; Sodium lauryl sulfoacetate; STEPANOL® WA-100 NF/USP
    Sulfochem® SLP-95
wetting agent, dermatological emulsions
    Acconon W230
wetting agent, dermatologicals
    Caprol® 3GO; Caprol® 10G40; Caprol® PGE860; Palm kernelamide DEA; PEG-10-PPG-10 glyceryl stearate
    Polyglyceryl-6 dioleate; Solulan® 16;
    Solulan® 75; Solulan® L-575
wetting agent, dermopharmaceuticals
    Caprylyl/capryl glucoside
wetting agent, diaper rash preventives
    Colonial ALES-1; Colonial ALES-2
wetting agent, ear wax removal
    Docusate Sodium USP
wetting agent, emulsions
    Cetylpyridinium chloride
wetting agent, first aid creams
    Palmitoyl collagen amino acids
wetting agent, fixed oils
    Softigen® 767
wetting agent, flavor concentrates
    Poloxamer 105; Poloxamer 123; Poloxamer 181
wetting agent, flavors
    Tween® 81
wetting agent, gels
    Crillet 3 NF
wetting agent, germicidal hand soaps
    Lanogel® 21; Lanogel® 41
wetting agent, germicidal liquid soaps
    Palm kernelamide DEA
wetting agent, germicidal scrubs
    Adinol CT95
wetting agent, gum-sensitive toothpastes
    Adinol CT95
wetting agent, hospital disinfection
    Alkaquat® DMB-451-50; Alkaquat® DMB-451-80
wetting agent, hospital sanitization
    Alkaquat® DMB-451-50; Alkaquat® DMB-451-80
wetting agent, IM injectables
    Dioctyl sodium sulfosuccinate; Polysorbate 40; Polysorbate 80; Sorbitan palmitate
wetting agent, infant formulas
    Caprol® 3GO; Caprol® 10G40; Caprol® PGE860
wetting agent, inhalants
    Cetylpyridinium chloride
wetting agent, injectables
    Benzalkonium chloride; Benzethonium chloride
wetting agent, IV
    Poloxamer 188; Polysorbate 20; Polysorbate 80
wetting agent, laxatives
    Docusate Sodium USP
wetting agent, liposomes
    Phosphatidylcholine
wetting agent, liposome technology
    Lecithin

  - Crillet 4 HP; Crillet 4 NF; Crillet 6; Crodamol SCO; Crodasin LS30
  - Crodesin LS30 NP; Crodesin LS95 NP; Crodesta F-10; Crodesta F-110; Crodesta F-160

- Crodesta SL-40; Crovol A-70; Diocetyl sodium sulfosuccinate; Eccowet® W-50; Eccowet® W-88

- Etocas 35 NF; Hydroxylated lecithin; Incrocas 30; Incrocas 40; Labrasol®

- Laneth-15; Lanogel® 21; Lanogel® 41; Lecithin; Octoxyynol-9

- Oleth-3; PEG-4 dilaurate; PEG-150 distearate; PEG-20 sorbitan isostearate; PEG-2 stearate

- PEG-40 stearate; PEG-50 stearate; Polysorbate 20; Polysorbate 40; Polysorbate 60

- Polysorbate 80; Renex® PEG 1000; Schercomid CDO-Extra; Sodium lauroyl sarcosinate; Sodium lauryl sulfate

- Sodium lauryl sulfoacetate; Solan E50; Solulan® 16; Solulan® 75; Solulan® L-575

- Sorbitan olate; Sorbitan sesquioleate; Sorbitan stearate; Synperonic® PE/F68; Synperonic® PE/F87

- Synperonic® PE/F108; Synperonic® PE/F127; Synperonic® PE/L44; Trideceth-10; Tween® 40

- Tween® 60; Tween® 80V; Volpo 3; Volpo 5; Volpo 10

- Volpo N5; Volpo N20

- Wetting agent, topical solutions
  - Cetylpyridinium chloride

- Wetting agent, topical suspensions
  - Crill 4 Super

- Wetting agent, vaginals
  - Diocetyl sodium sulfosuccinate; Polysorbate 20; Polysorbate 60; Polysorbate 80; Sodium lauryl sulfate

- Sorbitan stearate

- Wetting agent, veterinary products
  - Lauramidopropyl PEG-dimonium chloride phosphate; Lauroampho PEG-glycinate phosphate; PEG-35 castor oil

- Wetting agent, vitamin oils

- Tween® 81
Functional/Application Index

wetting agent, vitamins
  Docusate Sodium USP
wetting agent, volatile oils
  Softigen® 767
whipping agent, pharmaceuticals
  Vee Gee Pharmaceutical Gelatins
whitener, medical formulations
  CMP-I®
whitener, tooth filling compounds
  Tullanox® HM-100; Tullanox® HM-150
whitening agent
  CP; VC-PMG; VC-SS
wicking agent, wet granulation
  Sancel-101; Sancel-102; Sancel-105; Sancel-C; Sancel-W
Wilson’s disease treatment
  Triethylenetetramine; Zinc acetate
wound healing aid
  Biodynes® TRF; Crodarom Chamomile O
wound healing aid, topicals
  Saccharomyces lysate extract
wound treatment
  Meadowsweet (Spiraea ulmaria) extract

wound treatment, medicine
  Allantoin
x-ray contrast medium
  Barium sulfate; Iodine
x-ray contrast medium, medicine
  Iodipamide
x-ray diagnostic aid
  Diatrizoic acid
yeast inhibitor, aqueous solutions
  Potassium sorbate
zinc deficiency disease preventive, veterinary products
  Zinc carbonate
zinc source
  Zinc glycinate
zinc source, dietary: pharmaceuticals
  Zinc methionine sulfate
zinc source, dietary: vitamin tablets
  Zinc methionine sulfate
zinc source, orals
  Zinc sulfate
zinc source, pharmaceuticals
  Zinc glycinate; Zinc sulfate
Part IV: Manufacturers Directory
### Manufacturers Directory

#### AAA International Corp.
515 Ogden Ave., Professional Bldg. Suite 317, Downers Grove, IL, 60515, USA (Tel: 630-964-1249; FAX: 630-964-1649; E-mail: sales@aaainternational.com; Internet: http://www.aaainternational.com)
