Chem. Descrip.: Trideceth-7 carboxylic acid
CAS 56388-96-6

Uses: Detergent, wetting agent for medicated liq. and bar soaps

Properties: Cl. liq.; sol. in oils, solvs.; HLB 13.0 (@ pH 2.5); pH 2.5 (10%); surf. tens. 31.6 dynes/cm (0.01%); Ross-Miles foam 145 mm (0.1%, 40 C, initial); anionic; 90% conc.

Sanisol C [Kao Corp. SA]

Chem. Descrip.: Benzalkonium chloride
CAS 8001-54-5

Uses: Disinfectant, sanitizer for pharmaceuticals

Regulatory: JP compliance

Properties: Cl. liq.; water-sol.; cationic; 50% act.

Sarcosinate LN [Nikko Chems. Co. Ltd
http://www.nikkol.co.jp/index.html]

Chem. Descrip.: Sodium lauroyl sarcosinate
CAS 137-16-6; EINECS/ELINCS 205-281-5

Uses: Cleanser, foaming agent, penetrant, emulsifier, antistat, bactericide for dentifrices

Regulatory: JSCI listed

Properties: Wh. cryst. powd.; anionic; 93% min. conc.

Toxicology: Mild to skin and hair; TSCA listed

Environmental: Exc. biodeg.

Sarkosyl® O [Ciba Spec. Chems. GmbH]

Chem. Descrip.: Oleoyl sarcosine
CAS 110-25-8; EINECS/ELINCS 203-749-3

Uses: Detergent, corrosion inhibitor, foam booster/stabilizer, wetting agent, lubricant, emulsifier for dentifrices, pharmaceuticals
Trade Name Reference

Properties: Liq.; m.w. 340-360; sol. in org. solvs.; insol. in water; sp.gr. 0.948; 94% min. purity

Satiagel™ U Series [Cargill Texturizing Solutions
http://www.cargilltexturizing.com]
Chem. Descrip.: Carrageenan See Carrageenan (Chondrus crispus)
CAS 9000-07-1; EINECS/ELINCS 232-524-2
Uses: Excipient, dispersant, act. ingred. in pharmaceuticals

Satialgine™ H8 [J. Rettenmaier & Söhne
http://www.jrs.de]
Chem. Descrip.: Alginic acid NF/FCC
CAS 9005-32-7; EINECS/ELINCS 232-680-1
Uses: Disintegrant for direct compression or wet or dry granulation for pharmaceutical tablets; stabilizer, visc. builder for sol. and disp. tablets and granules
Features: Rapid swelling in aq. media; can absorb 200-300 times its own wt.
Regulatory: NF/FCC compliance
Properties: Wh. to ylsh. wh. fibrous powd.; 75% max. -325 mesh; acid no. ≥ 230; pH 1.5-3.5 (3% aq.)
Use Level: 1-5% (tablets)

Satialgine™ UH8 USP [JRS Pharma
http://www.jrshallpharma.com]
Chem. Descrip.: Alginic acid NF/FCC
CAS 9005-32-7; EINECS/ELINCS 232-680-1
Uses: Excipient, dispersant, act. ingred. in pharmaceuticals
Features: Hydrophilic; rapid swelling in aqueous medium
Properties: Wh. to ylsh. wh. fibrous powder; pH 1.5-3.5

Satin Sweet® 55% Maltose Corn Syrup
[Cargill Foods
http://www.cargillfoods.com]
Chem. Descrip.: High maltose (57%) corn syrup
Chem. Analysis: Moisture 18-20%; sulfated ash 0.05% max.; sulfur dioxide 2 ppm max.
CAS 8029-43-4; EINECS/ELINCS 232-436-4
Uses: Sweetener for pharmaceuticals
Features: Near absence of sodium and sulfur dioxide
Regulatory: GRAS 21CFR §184.1865
Properties: Cl. liq.; char. odor; sweet, bland taste; sp.gr. 1.4174 (100/60 F); dens. 11.82 lb/gal (100 F); visc. 25,500 cps (80 F); ref. index 1.4929 (45 C); pH 4.3 (1:1); 81% total solids

Satin Sweet® 65% Maltose Corn Syrup
[Cargill Foods
http://www.cargillfoods.com]
Chem. Descrip.: High maltose (65%) corn syrup
Chem. Analysis: Moisture 18-20%; sulfated ash 0.05% max.; sulfur dioxide 2 ppm max.
CAS 8029-43-4; EINECS/ELINCS 232-436-4
Uses: Sweetener for pharmaceuticals
Features: Near absence of sodium and sulfur dioxide
Regulatory: GRAS 21CFR §184.1865
Properties: Cl. liq.; char. odor; sweet, bland taste; sp.gr. 1.4169 (100/60 F); dens. 11.81 lb/gal (100 F); visc. 25,500 cps (80 F); ref. index 1.4927 (45 C); pH 4.0 (1:1); 81% total solids

Satin Sweet® 70% Maltose Corn Syrup
[Cargill Foods
http://www.cargillfoods.com]
Chem. Descrip.: High maltose (70%) corn syrup
Chem. Analysis: Moisture 18-20%; sulfated ash 0.05% max.; sulfur dioxide 2 ppm max.
CAS 8029-43-4; EINECS/ELINCS 232-436-4
Uses: Sweetener for pharmaceuticals
Features: Near absence of sodium and sulfur dioxide
Regulatory: GRAS 21CFR §184.1865
Properties: Cl. liq.; char. odor; sweet, bland taste; sp.gr. 1.4169 (100/60 F); dens. 11.81 lb/gal (100 F); visc. 25,500 cps (80 F); ref. index 1.4927 (45 C); pH 4.0 (1:1); 81% total solids

SB-30 [Huber Engineered Materials
http://www.hubermaterials.com]
Chem. Descrip.: Alumina trihydrate See Aluminum hydroxide
Chem. Analysis: Al₂O₃ (64.9%)
CAS 21645-51-2; EINECS/ELINCS 244-492-7
Uses: Filler in pharmaceuticals
Properties: Off-wh. unground particulate; 50 µ median particle diam.; 10% on 100 mesh, 95% on 325 mesh; sp.gr. 2.42; bulk dens. 1.2 g/cc (loose); surf. area 0.1 m²/g; brightness (TAPPI) 80; ref. index 1.57; hardness (Mohs) 2.5-3.5

SBP 40/65 LNH [Shell Netherlands]
Chem. Descrip.: Naphtha (petroleum), hydrotreated light, n-hexane (< 3%) See Hexane; Naphtha, hydrotreated light
UN 3295
Uses: Extraction solvent for medicinal purposes (skin cleaning)
Trade Name Reference

Scheremol GTO [Noveon
http://www.carbopol.com;
http://www.noveoncoatings.com; Chesham
Chems. Ltd
http://www.cheshamchemicals.co.uk]
Chem. Descrip.: Trioctanoin
CAS 7360-38-5; EINECS/ELINCS 230-896-0
Uses: Emollient, moisturizer in topical
pharmaceuticals
Features: Smooth applic. and moisture retention
Regulatory: EEC and Japan approved
Properties: Colorless cl. liq.; sol. in min. oil,
vegetable oil, ethanol, dimethicone, and
cyclomethicone; insol. in water and PG; m.w.
470.3; visc. 40 cps; f.p. -10 C; acid no. 2 max.;
iodine no. nil; sapon. no. 340-360

Scheremol ICS [Noveon
http://www.carbopol.com;
http://www.noveoncoatings.com; Chesham
Chems. Ltd
http://www.cheshamchemicals.co.uk]
Chem. Descrip.: Isooctyl stearate
CAS 25339-09-7; EINECS/ELINCS 246-868-6
Uses: Emollient in creams, lotions, topical
pharmaceuticals
Features: Nongreasy; imparts elegant feel;
remains liq. even @ low temps.
Properties: Straw-colored cl. liq., sl. typ. odor;
sol. in hydrophobic solvs.; insol. in water; m.w.
494; sp.gr. 0.850; dens. 7.1 lb/gal; f.p. -5 C;
acid no. 2 max.; iodine no. nil; sapon. no. 105-
120; flash pt. > 180 C

Scheremol IDO [Noveon
http://www.carbopol.com;
http://www.noveoncoatings.com; Chesham
Chems. Ltd
http://www.cheshamchemicals.co.uk]
Chem. Descrip.: Isodecyl oleate
CAS 59231-34-4; EINECS/ELINCS 261-673-6
Uses: Emollient, lubricant, penetrant, pigment
dispersant for topical pharmaceuticals
Properties: Cl. liq.; f.p. 10 C; acid no. 5 max.;
iodine no. 65 max.; sapon. no. 130-140

Scheremol MM [Noveon
http://www.carbopol.com;
http://www.noveoncoatings.com; Chesham
Chems. Ltd
http://www.cheshamchemicals.co.uk]
Chem. Descrip.: Myristyl myristate
CAS 3234-85-3; EINECS/ELINCS 221-787-9
Uses: Emollient, visc. builder, substantivity
agent for topical pharmaceuticals
Features: Soft, waxy; melts near body temp.;
velvety feel on skin
Regulatory: CERCAL, RCRA nonreportable
Properties: Wh. to pale yel. waxy solid; mild char
odor; sol. in hydrophobic solvs.; m.w. 424;
sp.gr. 0.839 (45 C); dens. 7.0 lb/gal (45 C);
vapor pressure < 0.02 mm Hg; vapor dens. >
1; evaporation rate < 1; m.p. 36-40 C; acid no.
2.0 max.; iodine no. nil; sapon. no. 120-135;
flash pt. (OC) > 170 C
Toxicology: May cause eye irritation; repeated,
prolonged skin contact may cause irritation;
ing. may cause irritation; TSCA listed
Environmental: Do not flush product in public
sewer, water systems, surface waters
Precaution: Wear eye protection, protective
Trade Name Reference

gloves; spills are slippery; incompat. with strong oxidizers

Hazardous Decomp. Prods.: CO, CO₂

NFPA: Health 2, Flammability 1, Reactivity 0

Storage: Store in cool, dry, well-ventilated area; protect from freezing, overheating

Schercemol MP [Noveon

http://www.carbopol.com;

CAS 9005-38-3  
Uses: Thickener, water holder, emulsion stabilizer, suspending agent, gellant, and film-former for pharmaceuticals  
Regulatory: FDA GRAS; Canada DSL; Australia AICS; China; Japan ENCS (8-237); Korea (KE-00492); Philippines PICCS  
Properties: Ivory colored granular powd.; 40 mesh; almost odorless; sol. in water; visc. 20 cps (0.5%), 60 cps (1%), 600 cps (2%), 3500 (3%); pH 6.5-8.5 (1% aq.sol'n.); autoignition temp. > 200 C

Scogin™ LV

Handbook of Pharmaceutical Additives, Third Edition 647
Chem. Descrip.: SD alcohol 12-A
Uses: Solvent for mfg. of pharmaceuticals

SDA-23H [Eastman http://www.eastman.com]
Chem. Descrip.: SD alcohol 23-H
Uses: Solvent for mfg. of pharmaceuticals

SDA-29-8 [Eastman http://www.eastman.com]
Chem. Descrip.: SD alcohol 29-8
Uses: Solvent for mfg. of pharmaceuticals

Seagel [FMC http://www.fmccompany.com]
Chem. Descrip.: Locust bean (Ceratonia siliquea) gum
CAS 9000-40-2; EINECS/ELINCS 232-541-5

Scogin™ MV [FMC Biopolymer http://www.fmcbiopolymer.com]
Chem. Descrip.: Sodium alginate See Algin
CAS 9005-38-3
Uses: Thickener, water holder, emulsion stabilizer, suspending agent, gellant, and film-former for pharmaceuticals
Regulatory: FDA GRAS; Canada DSL; Australia AICS; China; Japan ENCS (8-237); Korea (KE-00492); Philippines PICCS
Properties: Ivory colored granular powd.; 30 mesh; almost odorless; sol. in water; visc. 80 cps (0.5%), 400 cps (1%), 5000 cps (2%), 30,000 (3%); pH 6.5-8.5 (1% aq.sol'n.); autoignition temp. > 200 C
Toxicology: LD50 (oral, rat) > 5 g/kg; LC50 (inh., rat, 1 h) 4.72 mg/l; ACGIH TWA 10 mg/m³ (inhaible particulate), 3 mg/m³ (respirable particulate); TSCA listed
Environmental: BOD(5) ≈ 400 mg O₂/g; COD ≈ 650 mg O₂ g; biodeg.
Precaution: Becomes slippery when wet; incompat. with strong oxidizers, high temps., high humidity
NFPA: Health 2, Flammability 1, Reactivity 0
Storage: Store in cool, dry place in tightly closed container; avoid exposure to extreme heat

SeaSpen® PF [FMC Biopolymer http://www.fmcbiopolymer.com]
Chem. Descrip.: iota-Carrageenan (Chondrus crispus) USP/NF See Carrageenan (Chondrus crispus)
CAS 9000-07-1; EINECS/ELINCS 232-524-2
Uses: Excipient, gellant, visc. builder for pharmaceuticals (suspensions, topical lotions/creams, reconstitutable suspensions, cough/cold liqs., antibiotic suspensions, medicated shampoos); bioadhesive in oral liq. prods.; shape retention in vaulted cavity delivery systems such as otic and vaginal, suppository formulation; controlled release delivery
Features: Med. thixotropy; elastic weak gel type; delayed gel formation; effective hydration in dry, reconstitutable suspensions
Regulatory: FDA 21CFR §182.7255; GRAS
Properties: Sol. in cold water
Use Level: 0.5-1.0%

Sebace [Croda Chem. Europe Ltd http://www.croda.co.uk]
Chem. Descrip.: PEG-30 lanolin, cetearyl alcohol, mineral oil, and p-chloro-m-cresol with 150 ppm BHT (antioxidant)
Uses: Self-emulsifying base for pharmaceuticals; emollient, moisturizer, emulsifier, lubricant, visc. stabilizer for o/w emulsions, creams; carrier for therapeutically active substances for hospital/pharmacy use
Properties: Pale yel. pearly unctuous soft wax, faint char. odor; partly sol. in water, ethanol,
Trade Name Reference

**Sebomine SB12** [Sederma http://www.sederma.fr]
Chem. Descrip.: Water, potassium thiocyanate, lactoferrin, lactoperoxidase, and glucose oxidase
Uses: Treatment of oily skin with acne tendency, oily hair, dandruff
Properties: Brownish cl. liq., char. odor; sp.gr. 1.025±0.005; ref. index 1.345±0.005; pH 6.0-7.5

**Sedefos 75®** [Gattefosse http://www.gattefossecorp.com; Gattefosse Spain http://www.gattefosse.es]
Chem. Descrip.: Glycol stearate, PEG-2 stearate, and trilanol-4 phosphate
Uses: Emulsifier, base for pharmaceuticals, o/w emulsions, acidicProducts., and anhyd. cream formulations
Features: Self-emulsifying; enables prep. of stable creams contg. high amts. of alcohol (20%), acidic actives, or essential oils, and prep. of anhyd. emulsions
Properties: Gardner < 5 waxy pellets; weak odor; HLB 10-11; m.p. 43-48 C; acid no. < 6; iodine no. < 3; sapon. no. 105-120; anionic; 100% conc.
Use Level: 15-20%

**Selexsorb® CDO-200** [Engelhard]
Chem. Descrip.: Alumina
CAS 1344-28-1; EINECS/ELINCS 215-691-6
Uses: Selective adsorbent for purification of feed monomer, intermediate, or final prods. in the specialty polymer pharmaceuticals
Properties: Bulk dens., packed 770 kg/m³; surf. area 200 m²/g; 96.6% aluminum oxide

**Semiaalkaline Proteinase** [Amano Enzyme http://www.amano-enzyme.co.jp]
Chem. Descrip.: Protease
CAS 9074-07-1; EINECS/ELINCS 232-642-4
Uses: Anti-inflammatory for pharmaceuticals
Regulatory: JPC
Properties: Off-wh. to brown powd.; sl. odor; sol. in water
Toxicology: Inh. of aerosols or dust may induce sensitization and may cause allergic reactions in sensitized individuals; nontoxic
Environmental: Biodegrad.; not harmful to aquatic and marine organisms when dissolved with copious amounts of water
Precaution: Wear respirator, protective glasses, and impervious gloves; avoid dust formation

**Sentry® Dimethicone NF** [GE Silicones http://www.gesilicones.com]
Chem. Descrip.: Dimethicone USP (35%)
Uses: Soothing skin protectant for diaper rash preps. and skin protective ointments, creams, and lotions, pharmaceutical preps., certain medical devices
Features: Soothing
Regulatory: FDA 21CFR §347
Properties: Wh. free-flowing gran. solid; 20-40 mesh particle size; 95% through 20 mesh; bulk dens. 0.4 g/ml; 30% act.; 6% moisture
Trade Name Reference
Storage: Store @ cool temps.; keep cartons closed to protect from atmospheric moisture and contaminants

Uses: Syn. adsorbent for vitamins, antibiotics
Properties: Surf. area ≈ 4.00 m²/g

Sepicontrol A5 [Seppic http://www.seppic.com]
Chem. Descrip.: Capryloyl glycine, sarcosine, cinnamomum zeylanicum bark extract See Cinnamon (Cinnamomum zeylanicum) extract
CAS 14246-53-8; 107-97-1; 84649-98-9; EINECS/ELINCS 238-122-3; 203-538-6; 283-479-0
Uses: Acne control agent, sebo-regulating active in personal care

Sepifilm™ LP [Seppic http://www.seppic.com]
Chem. Descrip.: Hypromellose, microcrystalline cellulose, and stearic acid See Hydroxypropyl methylcellulose
CAS 9004-65-3; 9004-34-6; 57-11-4
Uses: Stabilizer for moisture sensitive active pharmaceutical ingredients and hygroscopic formulations; improve the moisture barrier on moisture sensitive API or hygroscopic cores
Features: Does not modify dissolution profile when compared to conventional coatings

Sepigel™ 305 [Seppic http://www.seppic.com]
Chem. Descrip.: Polyacrylamide, C13-14 isoparaffin, laureth-7
Uses: Thickeners, gellant for aq. gels and emulsions in pharmaceuticals; emulsifier, stabilizer for anti-lice conditioners, antibiotic gels
Features: Provides instantaneous gelling on addition of water
Regulatory: Japan approved for cosmetics
Properties: Fluid emulsion; visc. 60,000-90,000 mPa•s (2%); pH ≈ 6; 50% act.
Toxicology: Nonirritating to skin and eyes

Servirox® OEG 68.5 [Elementis Spec. Europe]
Chem. Descrip.: Ethoxylated castor oil See PEG castor oil
CAS 61791-12-6
Uses: Emulsifier, dispersant, solubilizer in phytopharmaceuticals
Properties: Solid; nonionic; 100% act.

Servirox® OEG 90 [Elementis Spec. Europe]
Chem. Descrip.: PEG-180 castor oil
CAS 61791-12-6
Uses: Solubilizer in phytopharmaceuticals
Properties: Liq.; nonionic; 50% act.

Servirox® OEG 90/50 [Elementis Spec. Europe]
Chem. Descrip.: PEG-180 castor oil
CAS 61791-12-6
Uses: Solubilizer in phytopharmaceuticals
Properties: Liq.; nonionic; 50% act.

Sethness AP100 [Sethness Prods. http://www.sethness.com]
Chem. Descrip.: Sulfite ammonia process caramel color See Caramel
CAS 8028-89-5; EINECS/ELINCS 232-435-9
Uses: Colorant in pharmaceuticals
Regulatory: FDA 21CFR §73.85
Properties: Dk. brn. liq.; char. bitter burnt sugar taste; sp.gr. 1.3157-1.3206 (60 F); dens. 10.95-11.00 lb/gal (60 F); pH 2.8-3.1
Storage: 2 yr. min. shelf life when stored in cool, dry environment, below 90 F

Chem. Descrip.: Ammonia process caramel color See Caramel
CAS 8028-89-5; EINECS/ELINCS 232-435-9
Uses: Colorant in pharmaceuticals
Regulatory: FDA 21CFR §73.85
Properties: Dk. brn. liq.; char. bitter burnt sugar taste; sp.gr. 1.3757-1.3809 (60 F); dens. 11.46-11.50 lb/gal (60 F); pH 3.8-4.1
Storage: 2 yr. min. shelf life when stored in cool, dry environment, below 90 F

Chem. Descrip.: Ammonia process caramel color See Caramel
CAS 8028-89-5; EINECS/ELINCS 232-435-9
Uses: Colorant in pharmaceuticals
Regulatory: FDA 21CFR §73.85
Properties: Dk. brn. liq.; char. bitter burnt sugar taste; sp.gr. 1.3757-1.3809 (60 F); dens. 11.46-11.50 lb/gal (60 F); pH 3.8-4.1
Storage: 2 yr. min. shelf life when stored in cool, dry environment, below 90 F
Trade Name Reference

taste; sp.gr. 1.3266-1.3340 (60 F); dens. 11.05-11.11 lb/gal (60 F); pH 4.1-4.7
Storage: 2 yr. min. shelf life when stored in cool, dry environment, below 90 F

Sethness SP50 [Sethness Prods. http://www.sethness.com]
Chem. Descrip.: Ammonia process caramel color See Caramel
CAS 8028-89-5; EINECS/ELINCS 232-435-9
Uses: Colorant in pharmaceuticals
Regulatory: FDA 21CFR §73.85
Properties: Dk. brn. liq.; char. bitter burnt sugar taste; sp.gr. 1.3266-1.3340 (60 F); dens. 11.05-11.11 lb/gal (60 F); pH 3.7-4.2
Storage: 2 yr. min. shelf life when stored in cool, dry environment, below 90 F

Sethness SP50 [Sethness Prods. http://www.sethness.com]
Chem. Descrip.: Ammonia process caramel color See Caramel
CAS 8028-89-5; EINECS/ELINCS 232-435-9
Uses: Colorant in pharmaceuticals
Regulatory: FDA 21CFR §73.85
Properties: Dk. brn. liq.; char. bitter burnt sugar taste; sp.gr. 1.3266-1.3340 (60 F); dens. 11.05-11.11 lb/gal (60 F); pH 3.7-4.2
Storage: 2 yr. min. shelf life when stored in cool, dry environment, below 90 F

Shea Butter [Terry Labs http://www.terrylabs.com]
Chem. Descrip.: Butyrospermum Parkii Shea Butter Fruit See Shea butter (Butyrospermum parkii)
CAS 68424-60-2; EINECS/ELINCS 293-515-7
Uses: Fatting agent in OTC pharmaceuticals including topical ointments, creams and lotions, first aid creams, anti-acne preps., rubs and liniments, topical analgesics/anesthetics, lip balms, oral ointments
Features: Natural fatty substance which is extracted from the fresh nut of the Karite tree; this crude butter is then
Properties: Pale yel. fatty matter, char. odor; sp.gr. 0.91-0.98; iodine no. 50-80; sapon. no. 160-180

SheAloe™ [Terry Labs http://www.terrylabs.com]
Chem. Descrip.: Aloe barbadensis leaf juice, shea butter See Shea butter (Butyrospermum parkii)
Uses: Fatting agent in topical ointments, creams, and lotions, topical analgesics/anesthetics, first aid creams, anti-acne preps, rubs and liniments, hydrocortisone creams, lip balms
Features: High-gloss, moist, nongreasy feel
Properties: Thick, off-wh. cream; characteristic fatty odor; sp.gr. 0.870-0.960
Use Level: ε10% use level for efficacy of preps.
Storage: Store at room temp.; may darken with age; store in a cool place, away from light; protect from oxidation

Shea Unsaponifiable [Sederma http://www.sederma.fr]
Chem. Descrip.: Shea butter unsaponifiables See Shea butter (Butyrospermum parkii) unsaponifiables
Uses: Anti-irritant, treatment for sensitive or dry skin, lip care, sun protection, face care
Properties: Green-brownish fatty matter, char. odor; sp.gr. 0.92-0.98

Chem. Descrip.: Lactose NF
CAS 63-42-3; EINECS/ELINCS 200-559-2
Uses: Excipient, filler, diluent, bulking agent for pharmaceutical tablets, capsules, powds., other preps.; nutrient and multifunctional ingred. in geriatric, dietetic, and health foods; ingred. in culture media
Properties: Wh. to creamy free-flowing powd.; two grades with various particle sizes (Direct Tabletting, 60 M); sol. 40 g/100 ml in water; m.w. 342.3; 0.11% max. moisture
Storage: Nonhygroscopic; 12 mos. min. shelf life for unopened pkgs.; store in cool, dry area in closed containers

Chem. Descrip.: Lactose monohydrate NF
CAS 10039-26-6
Uses: Excipient, filler, diluent, bulking agent for pharmaceutical tablets, capsules, powds., other preps.; nutrient and multifunctional ingred. in geriatric, dietetic, and health foods; ingred. in culture media
Properties: Wh. to creamy free-flowing powd.; three grades with various particle sizes (80 M, Capsulating, Impalpable); sol. 20 g/100 ml in water; 0.5% max. moisture
Storage: Nonhygroscopic; 12 mos. min. shelf life for unopened pkgs.; store in cool, dry area in closed containers

Chem. Descrip.: Mineral spirits
CAS 64475-85-0; EINECS/ELINCS 232-453-7
Uses: Solvent for pharmaceuticals
Features: Hydrocarbon solvent
Properties: Sp.gr. 0.783 (60 F); dens. 6.52 lb/gal (60 F); flash pt. (CC) 110 F
Shellsol® BF [Shell Netherlands]
Chem. Descrip.: Naphtha, hydrotreated light, n-hexane (< 5%) See Hexane
UN 3295
Uses: Solvent for adhesives used in medicinal plasters
Features: Highly refined; very minimal aromatics; virtually free of free radicals; chemically stable; noncorrosive; fast constant evaporating
Regulatory: EINECS, Canada DSL, Australia AICS, China IECSC, Japan MITI, Philippines PICCS, Korea TCCL listed
Properties: Water-wh. liq.; paraffinic odor; dens. 0.735 kg/l (15 C); i.b.p. 85 C; b.p. 88-105 C; flash pt. (Abel) < 0 C
Toxicology: LD50 (oral) > 2000 mg/kg, (skin) > 2000 mg/kg; LC50 (inh.) > 5 mg/l; low toxicity; aspiration into lungs may cause chem. pneumonitis which can be fatal; narcotic at high vapor concs.; causes CNS depression, headache, dizziness, nausea, respiratory tract irritation, skin irritation/dryness/dermatitis; risk of impaired fertility; TSCA listed
Environmental: Inherently biodegr.; potential to bioaccumulate; toxic to aquatic organisms; may cause long-term adverse effects in aquatic environment; prevent contamination of soil and water; prevent entry into drains, ditches, rivers
Precaution: Highly flamm.; flamm. limits in air 1-8 vol.%; may form flamm./explosive vapor-air mixt.; vapor is heavier than air, spreads along ground; distant ignition possible; electrostatic charges may be generated; prevent static discharge; ground equip.; risk of explosion
Hazardous Decomp. Prods.: Combustion: CO
Storage: Keep containers closed when not in use; store in tightly closed container @ ambient temps. in well-ventilated area away from direct sunlight, heat/ignition sources
Shellsol® B HT [Shell
http://www.shellchemicals.com;
http://www.shell-lubricants.com]
Chem. Descrip.: Solvent naphtha (petroleum), light aliphatic, contains n-hexane (22-30%), cyclohexane (0-13%) See Hexane; Naphtha, light aliphatic
UN 1268
Uses: Solvent for pharmaceuticals
Features: Fast evaporating; hydrotreating removes unwanted compds., converts unsat. hydrocarbons, results in relatively low odor; lower hexane content than typ. commercial hexanes, thus reducing worker exposure
Regulatory: SARA §311/312 acute health/chronic health/fire hazard, §313 reportable (cyclohexane, n-hexane)
Properties: Colorless liq.; hydrocarbon odor; negligible sol. in water; sp.gr. 0.674 (60/60 F); vapor pressure 140 mm Hg (68 F); b.p. 147-176 F; flash pt. (TCC) < -17.78 C; autoignition temp. 534 C; KB value 29; VOC 5.53 lb/gal; 100% act.
Toxicology: LD50 (oral, rat) 17 g/kg, (skin, rabbit) 3.4 g/kg; LC50 (inh., rat, 4 h) 73,680 ppm; if aspirated, can cause severe lung damage, chem. pneumonitis; may be fatal if swallowed; inh. of high vapor concs. may cause CNS depression, dizziness, headache, nausea, loss of coordination, unconsciousness, death; chronic abuse may cause irregular heart rhythms, cardiac arrest; may cause temporary eye irritation, sl. skin irritation; target organs: nerves, heart, reproductive system; TSCA listed
Environmental: Prevent entry into waterways, sewers
Precaution: Extremely flamm.; flamm. in air 1-7 vol.%; vapors are heavier than air, may flash back; prevent vapor accumulation; floats on water; static electricity may accumulate and create a fire hazard; bond and ground equip. and transfer containers; avoid contact with strong oxidizing agents; prevent entry into basements, confined areas
Hazardous Decomp. Prods.: Complex mixt. of airborne solids, liqs. and gases, incl. CO, CO2, other org. compds.
HMIS: Health 1, Flammability 3, Reactivity 0
Storage: Keep containers closed when not in use; keep away from heat, sparks, flame, ignition sources
Shellsol® D40 [Shell
http://www.shellchemicals.com;
http://www.shell-lubricants.com; Shell Netherlands]
Chem. Descrip.: Naphtha (petroleum), hydrotreated heavy See Naphtha, hydrotreated heavy
CAS 64742-48-9; EINECS/ELINCS 265-150-3
UN 3295
Uses: Solvent for pharmaceuticals
Features: Hydrotreating removes unwanted compds. (sulfur, nitrogen, oxygen), converts
Shellsol® D43 [Shell
http://www.shellchemicals.com;
http://www.shell-lubricants.com]
Chem. Descrip.: Solvent naphtha (petroleum),
medium aliphatic See Naphtha, medium
aliphatic
CAS 64742-88-7; EINECS/ELINCS 265-191-7
UN 1268
Uses: Solvent for pharmaceuticals
Features: Slow-evaporating; hydrotreated;
hydrotreating removes unwanted compds.
(e.g., sulfur, nitrogen, oxygen), converts unsat.
hydrocarbons (olefins, acetylenes, aromatics);
no more than trace amts. of HAPs; relatively
high solvency
Regulatory: FDA 21CFR §172.884, 178.3650;
SARA §311/312 acute health/chronic health,
fire hazard
Properties: Lt. colored liq.; low hydrocarbon
odor; negligible sol. in water; m.w. 146; sp.gr.
0.77; vapor pressure 1.1 mm Hg (68 F); i.b.p.
300 F min.; b.p. 325-401 F; flash pt. (TCC) 111
F; KB value 32; VOC 6.40 lb/gal (60 F); 100%
act.
Toxicology: LD50 (skin, rabbit) 5 ml/kg; if
aspirated, can cause severe lung damage,
chem. pneumonitis; may be fatal if
swallowed; causes skin irritation; may cause
CNS depression (dizziness,
lightheadedness, headache, nausea,
incordination, unconsciousness, death);
vapors may be irritating to respiratory
system; may cause eye irritation/temporary
discomfort, skin irritation, burning sensation,
redness, swelling, defatting; TSCA listed
Environmental: Prevent entry into waterways,
sewer
Precaution: Flamm. liq.; flamm. in air 1-7
vol.%; vapors are heavier than air; vapors
may flash back; prevent vapor
accumulation; static electricity may
accumulate and create a fire hazard; bond
and ground equip. and transfer containers;
avoid contact with strong oxidizing agents;
prevent entry into strong oxidizing agents;
prevent entry into basements, confined
areas
Hazardous Decomp. Prods.: Complex mixt. of
airborn solids, liqs. and gases, incl. CO,
CO2, other org. compds.
HMIS: Health 1, Flammability 2, Reactivity 0
Storage: Keep closed when not in use; keep
away from heat, sparks, flame
Shiitake (Lentinula edodes) Mycelium
Biomass, Certified Organic [Garuda Int’l.
http://www.garudaint.com]
Chem. Descrip.: Shiitake mycelium extract
from Lentinus edodes
Uses: Nutritional supplement in health foods,
pharmaceuticals capsules, tablets, ampules
(significant quantities of Vitamin B)
Features: Polysaccharides, lignins actives
Properties: Bron. gran.; max. 20 mesh or finer;
sol. in water
SI-10RV [Nikko Chems. Co. Ltd
http://www.nikkol.co.jp/index.html]
Chem. Descrip.: Sorbitan isostearate
CAS 54392-26-6; EINECS/ELINCS 276-171-2
| Trade Name Reference | Uses: | W/o emulsifier for pharmaceuticals
Features: Refined grade (low color/odor)
Regulatory: JSCI listed
Properties: Yel. liq.; HLB 5.0; nonionic; 100% conc. | **SI-15RV** [Nikko Chems. Co. Ltd http://www.nikkol.co.jp/index.html]
Chem. Descrip.: Sorbitan sesquiosstearate
Uses: W/o emulsifier for pharmaceuticals
Features: Refined grade (low color/odor)
Regulatory: JSCI listed
Properties: Pale yel. visc. liq.; HLB 4.5; nonionic; 100% conc. |
|----------------------|--------|-------------------------------------------------------------------------------------------------|
| S icovit® [BASF AG http://www.basf.de] | Uses: | Colorant and pigment for pharmaceuticals (tablets, capsules, coatings, sustained release)
Features: Soluble
Regulatory: Ph.Fr., USP/NF, FAO compliance |
Chem. Analysis: SiO₂ (97%); Na₂SO₄ (3%)
CAS 1343-98-2; EINECS/ELINCS 215-683-2
Uses: | **Sident® 22S** [Degussa/Fillers & Pigments http://www.degussa-krefeld.com]
Chem. Descrip.: | Syn. amorphous precipitated silica See Silica, amorphous
Chem. Analysis: SiO₂ (97%); Na₂SO₄ (3%)
CAS 112926-00-8; EINECS/ELINCS 231-545-4
Uses: Nonabrasive thickening agent for toothpastes; allows prod. of pastes and transparent gels of high brilliance
Regulatory: FDA compliance |
Chem. Analysis: SiO₂ (97%); Na₂SO₄ (3%)
CAS 1343-98-2; EINECS/ELINCS 215-683-2
Uses: |
Uses: Antifoam for pharmaceuticals; in flatulence remedies due to aerophagia; treatment of ulcers; antacid gels
Features: Efficacious in any pH, but optimum in alkaline media; chemically inert; heat stable
Regulatory: USP/NF, EP |
Chem. Analysis: SiO₂ (97%); Na₂SO₄ (3%)
CAS 1343-98-2; EINECS/ELINCS 215-683-2
Uses: |
| | Toxicology: | May cause slight brief irritation to eyes or skin; not classified as harmful by ing. inh., or absorp. through skin
Environmental: Not biodegrad. or bioaccumulable
Precaution: Wear goggles and PVC gloves
Hazardous Decomp. Prods.: CO₂ and amorphous silica
Storage: 15 mos. shelf life stored in original unopened container @ 2-30 C |

---

**Summary:**

- **SI-15RV** is a refined grade emulsifier with low color and odor, suitable for pharmaceutical applications.
- **Sicovit®** is a colorant and pigment for pharmaceuticals, offering solubility and compliance with various standards.
- **Sident® 8** and **Sident® 9** are precipitated silicas, both offering thickening properties and compliance with FDA standards.
- **Siblione™ 70426R** and **Siblione™ 70451** are polydimethylsiloxane products, used in pharmaceutical applications as antifoams and thickening agents, respectively.
Trade Name Reference

silicones.com/silicones/home.jsp

Chem. Descrip.: Mixture of polydimethylsiloxane and amorphous silica
See Diatomaceous earth, amorphous
CAS 9016-00-6; 61790-53-2
Uses: Antifoam for pharmaceuticals; in flatulence remedies due to aerophagia; treatment of ulcers; antacid gels; gastroenterological specialties.
Features: Outstanding behavior in alkaline systems
Properties: Grey-wh., opalescent visc. liq.; essentially odorless; pract. insol. in water; dilutable in aromatic, aliphatic and chlorinated hydrocarbons, water-sol. solvs., water disp. solvs.; sp.gr. 1.0; vapor pressure < 0.01 kPa; visc. ≈ 1000 mPa•s; 100% act.
Toxicology: LD50 (percut.) > 2000 mg/kg, (oral, rat) 5 g/kg; nonirritating
Hazardous Decomp. Prods.: COx and amorphous silica
Storage: 18 mos. shelf life stored in original unopened container @ -20 to 30 C

Silbione™ 70454 [Rhodia Silicones
http://www.rhodia-silicones.com/silicones/home.jsp]
Chem. Descrip.: Simethicone
CAS 8050-8-15
Uses: Antifoam for pharmaceuticals; in flatulence remedies due to aerophagia; treatment of ulcers; antacid gels; gastroenterological specialties; radiological tracers (tablets, pills, etc.)
Regulatory: USP
Properties: Creamy wh. emulsion; weak odor; dispersible in water; insol. in organic solvents; sp.gr. ≈ 1.0; vapor pressure 2.3 kPa; b.p. 100 C; pH ≈ 4.0; flash pt. > 80 C; nonionic; 30% act.
Use Level: 10-1000 mg/kg
Toxicology: LD50 (percut.) > 2000 mg/kg, (oral, rat) 5 g/kg; sl. irritating
Environmental: Not biodegrad. or bioaccumulable
Precaution: Wear goggles and gloves made of PVC
Hazardous Decomp. Prods.: COx and silica
Storage: 18 mos. shelf life stored in original unopened container @ -20 to 30 C

Silbione™ 70462 [Rhodia Silicones
http://www.rhodia-silicones.com/silicones/home.jsp]
Chem. Descrip.: Simethicone
CAS 8050-81-5
Uses: Antifoam for pharmaceuticals; in flatulence remedies; antacid gels; biotechnological processes such as bacteria, yeast and enzyme fermentations and processes for the manufacture of antibiotics
Regulatory: USP/NF, EP
Properties: Milky wh. visc. emulsion; dispersible in water; insol. in organic solvents; sp.gr. 1.0; visc. 600 cps; vapor pressure 2.3 kPa; b.p. 100 C; flash pt. > 80 C; pH 3.5; nonionic; 20% act.
Use Level: 100-300 ppm for protein, starch or latex foams, 50-100 ppm for fermentation processes
Toxicology: Not considered harmful by contact with skin or ing.
### Silbione™ 70646

**Chem. Descrip.:** Dimethicone copolyol  
**CAS:** 64365-23-7  
**Uses:** Reduces irritation of surfactants; stabilizes/improves foam and lubricity in personal care prod.; for biotechnological process such as bacteria, yeast, enzyme fermentation, manufacture of antibiotics by fermentation  
**Features:** Nongreasy  
**Properties:** Gardner 8 max. cl. liq.; odorless to sl. odor; sol. in abs. ethanol, benzyl alcohol, ethyl ether, MEK, ethyl acetate, IPM, castor oil, stearic acid; partly misc. with propylene glycol, IPP, decyl oleate, glycol, glycerol; sp.gr. ≈ 1.036; visc. 1400-2100 mm²/s; cloud pt. ≈ 45 C; flash pt. (CC) ≈ 1800 C; ref. index 1.446-1.450; pH 4.5-6.5; surf. tens. ≈ 23 mN/m  
**Use Level:** 1-3% (shampoo), 0.5-1% (hair spray), 0.1-3% (skin care prod.), 1-3% (shaving creams)  
**Toxicology:** Nontoxic  
**Environmental:** LC50 (fish: brachydanio rerio, 96 h) >100 mg/l; not biodegrad. or bioaccumulable  
**Precaution:** Wear goggles and PVC gloves  
**Hazardous Decomp. Prods.:** COx and silica  
**Storage:** 12 mos. shelf life stored in original unopened container @ 5-25 C

### Silbione™ Antifoam 70452 Compound

**Chem. Descrip.:** Dimethylpolysiloxane USP  
**CAS:** 9006-65-9  
**Uses:** Antifoam in topical pharmaceuticals; improves spreading, promotes uniform and bubble-free apps. in creams and lotions, antibiotic ointments and contraceptive gels; antiflatulent in antacids  
**Regulatory:** FDA 21CFR §173.340, 332.10, 332.15; DOT nonregulated; SARA nonreportable  
**Properties:** Off-wh. visc. liq.; sl. odor; insol. in water; sp.gr. 1.0; visc. 1300 cps; vapor pressure < 0.01 mm Hg (20 C); flash pt. (CC)) > 200 C; 100% act.  
**Toxicology:** LD50 (oral, rat) 5000 mg/kg; LD50 (dermal, rat) 2000 mg/kg; nonirritant to eyes and skin; nongenotoxic; nontoxic; TSCA listed  
**Environmental:** Nonbiodegrad.; not bioaccumulable; not harmful to aquatic organisms  
**Precaution:** Avoid strong oxidizing agents, alkalis and hot concentrated caustic prods; combustible liq.; wear safety goggles and gloves  
**Storage:** Can be stored up to 36 mos. @-20 and +50 C in original containers

### Silbione™ Oils 70047 V50

**Chem. Descrip.:** Polydimethylsiloxane  
**CAS:** 63148-62-9  
**Uses:** Vehicle for corticoid ointments for external use, pharmaceutical creams (dermatology) antibiotic dispersants; lubricant for medical devices  
**Features:** Chemically inert; low surface tension;  
**Regulatory:** EP  
**Properties:** Colorless visc. liq.; sl. to no odor; pract. insol in water; sl. sol. in ethanol, acetone; misc. with ethers, aliphatic and aromatic hydrocarbons, chlorinated solvents; dens. 958 kg/m³; kinematic visc. 50 mm²/s. vapor pressure < 0.01kPa; flash pt. 280 C (COC)  
**Toxicology:** LD50 (oral, rat) 5000 mg/kg; LD50 (dermal, rat) 2000 mg/kg; nonirritant to eyes and skin; nongenotoxic; nontoxic; TSCA listed  
**Environmental:** Nonbiodegrad.; not bioaccumulable; not harmful to aquatic organisms  
**Precaution:** Will burn under fire conditions; avoid heat, open flame, static electricity, strong bases/ acids/oxidizing agents; contains dimethylpolysiloxane which can generate formaldehyde  
**Hazardous Decomp. Prods.:** Combustion may produce formaldehyde, CO₂, cryst. silica; thermal decomp. prods.: dimethylcyclosiloxanes, methylphenylcyclosiloxanes  
**NFPA:** Health 1, Flammability 1, Reactivity 0

### Silcron® G-100

**Chem. Descrip.:** Silica gel USP (94-96%) and nonirritating to skin; pract. nontoxic by acute ing.; TSCA listed  
**Precaution:** Will burn under fire conditions; avoid heat, open flame, static electricity, strong bases/ acids/oxidizing agents; contains dimethylpolysiloxane which can generate formaldehyde  
**Hazardous Decomp. Prods.:** Combustion may produce formaldehyde, CO₂, cryst. silica; thermal decomp. prods.: dimethylcyclosiloxanes, methylphenylcyclosiloxanes  
**NFPA:** Health 1, Flammability 1, Reactivity 0  
**Storage:** 12 mos. shelf life if stored @ 40-86 F in tightly closed containers in well-ventilated area away from incompat. materials; do not allow to freeze

---

Based on the text provided, it appears to be a handbook page dedicated to pharmaceutical additives, specifically focusing on the properties, uses, and safety considerations of various silcone-based products. The information includes details on environmental impact, health and safety precautions, and storage conditions.
Trade Name Reference

water (4-6%) See Silica, amorphous
CAS 112926-00-8; EINECS/ELINCS 231-545-4
Uses: Carrier, anticaking agent, absorbent,
dispersant, grinding aid, cleansing agent,
desiccant, flow aid in pharmaceuticals;
thickener for creams, gels, and pastes;
tabling agent, anti-sticking agent, mold
release agent in pharmaceutical tablets
Features: Chemically pure; does not impart
taste, color, or odor
Regulatory: FDA approved; kosher; USP
compliance; DOT not regulated; SARA
§302/304/313, CERCLA nonreportable;
Canada DSL; Australia AICS; Japan MITI
Properties: Wh. powd.; insol. in water; sp.gr. 2.1;
m.p. ≈ 1600 C; pH 6.5-8.0 (10% slurry)
Toxicology: LD50 (oral, rat, 48 h) > 31,600
mg/kg, (dermal, rabbit, 48 h) > 2 g/kg; LC50
(inh., rat, 1 h) > 2 mg/l; TSCA listed
Precaution: Wear safety glasses, gloves for
prolonged, repeated contact; avoid breathing
dust

Chem. Descrip.: Amorphous silica gel See Silica, amorphous hydrated
CAS 63231-67-4; EINECS/ELINCS 231-545-4
Uses: Carrier, cleanser, desiccant, powd. dispersant, flow aid in pharmaceuticals
Features: Chemically stable and inert
Regulatory: FDA approved; kosher
Properties: Fine wh. odorless powd.; insol. in water; m.p. ≈ 1600 C; pH (10% slurry) 3 - 6
Toxicology: ACGIH TLV/TWA 80 mg/m3/ % SiO2; LD50 (oral, rat) > 31,600 mg/kg; LD50 (dermal, rabbit) > 2000 mg/kg; not considered an ocular irritant based on tests with rabbits.; noncarcinogenic; TSCA listed
Environmental: No known adverse effects on the aquatic environment.

Silfar® 1000 [Wacker-Chemie AG http://www.wacker.de]
Chem. Descrip.: Polydimethylsiloxane USP
CAS 9016-00-6
Uses: Antifoam agent for antiflatulence (carminative) and antacid coated and uncoated tablets
Features: Forms a protective lining on e.g. the gastric mucous membrane
Regulatory: USP, EP
Silfar® 350 [Wacker-Chemie AG http://www.wacker.de]
Chem. Descrip.: Polydimethylsiloxane USP
CAS 9016-00-6
Uses: Antifoam agent for antiflatulence (carminative) and antacid coated and uncoated tablets
Features: Forms a protective lining on e.g. the gastric mucous membrane
Regulatory: USP, EP
Silfar® 500 [Wacker-Chemie AG http://www.wacker.de]
Chem. Descrip.: Polydimethylsiloxane USP
CAS 9016-00-6
Uses: Antifoam agent for antiflatulence

Trade Name Reference

http://www.gesilicones.com; Helena
http://www.helenachemical.com

Chem. Descrip.: Polyalkylene oxide-modified polymethylsiloxane
CAS 27306-78-1

Uses: Surfactant, flow control agent, leveling agent, dispersant, wetting agent, spreading agent for pharmaceuticals

Regulatory: SARA reportable

Properties: Pale amber cl. liq.; sol. in methanol, IPA, acetone, xylene, methylene chloride; disp. in water; m.w. 600; sp.gr. 1.007; dens. 8.37 lb/gal; vis. 20 cSt; vapor pressure < 1 mm Hg; f.p. 30 F; b.p. 150 F; pour pt. 2 C; cloud pt. < 10 C (0.1%); flash pt. (PMCC) 116 C; surf. tens. 20.5 dyne/cm (0.1% aq.); Draves wetting 8 s (0.1%); Ross-Miles foam 33 mm (0.1%, initial); VOC 2.96%; nonionic; 100% act.

Use Level: 0.025-0.25%

Toxicology: Mod. toxic, severe eye and mild skin irritant

Environmental: Highly toxic to fish

Precaution: Use protective gloves, glasses, clothing; prevent runoff

Hazardous Decomp. Prods.: CO₂, SiOₓ

NFPA: Health 2, Flammability 1, Reactivity 0

Storage: Store at R.T. in tightly sealed containers

Silwet® L-720 AP [GE Silicones http://www.gesilicones.com]

Chem. Descrip.: Dimethicone copolyol

Uses: Surfactant, leveling agent, flow control agent for pharmaceuticals

Regulatory: FDA approved as antiseize agent in glass food containers

Properties: Colorless cl. liq.; sol. in water, methanol, IPA, acetone, xylene, methylene chloride; m.w. 12,000; sp.gr. 1.036; dens. 8.61 lb/gal; vis. 1100 cSt; HLB 5-8; cloud pt. < 10 C (0.1%); flash pt. (PMCC) 96 C; pour pt. -34 C; surf. tens. 29.3 dyne/cm (0.1% aq.); Draves wetting > 300 s (0.1%); Ross-Miles foam 43 mm (0.1%, initial); VOC 0.68%; nonionic; 50% act.

Storage: Store at R.T. in tightly sealed containers

Silwet® L-7500 [GE Silicones http://www.gesilicones.com]

Chem. Descrip.: Polyalkyleneoxide modified polydimethylsiloxane (< 100%) and polyalkylene oxide (< 20%) See Allyloxypolyethyleneglycol methyl ether

CAS 68938-54-5; 27252-80-8

Uses: Surfactant, defoamer, dispersant, emulsifier, leveling agent, flow control agent for pharmaceuticals

Regulatory: DOT unregulated if shipped in containers < 450 L; CERCLA nonreportable; SARA §311/312/313 nonreportable; MA Right-to-Know reportable; PA Right-to-Know nonreportable; NJ Right-to-Know reportable; Canada DSL; Europe EINECS; Australia AICS; Japan ENCS; Korea ECL; Philippines PICCS

Properties: Pale yel. cl. liq.; mild odor; sol. in methanol, IPA, acetone, xylene, hexanes, methylene chloride; insol. in water; m.w. 3000; sp.gr. 0.982; dens. 8.16 lb/gal; vis. 140 cSt; vapor pressure < 1.33 hPa; HLB 5-8; m.p. -43 C; b.p. > 150 C; flash pt. (PMCC) 93.33 C; pour pt. -15 C; surf. tens. 26.6 dyne/cm (1.1% aq.); VOC 1.29%; nonionic; 100% act.

Use Level: 0.025-0.25%

Toxicology: LD50 (oral, rat) > 5000 mg/kg, (skin, rabbit) > 2000 mg/kg; harmful if inh.; may cause lung damage, sl. skin, eye irritation; TSCA listed

Precaution: Use protective gloves, glasses, clothing; prevent runoff

Hazardous Decomp. Prods.: COx, SiOx

HMIS: Health 1, Flammability 1, Reactivity 0

Storage: Store at R.T. in tightly sealed containers; keep away from heat and flame

Silwet® L-7602 [GE Silicones http://www.gesilicones.com]

Chem. Descrip.: Polyalkyleneoxide modified polydimethylsiloxane

Uses: Surfactant, antifoam, dispersant, emulsifier, leveling agent, flow control agent for pharmaceuticals

Regulatory: DOT unregulated if shipped in containers < 450 L; CERCLA nonreportable; SARA §311/312/313 nonreportable; MA Right-to-Know reportable; PA Right-to-Know nonreportable; NJ Right-to-Know reportable; Canada DSL; Europe EINECS; Australia AICS; Japan ENCS; Korea ECL; Philippines PICCS

Properties: Pale yel. cl. liq.; mild odor; sol. in methanol, IPA, acetone, xylene, methylene chloride; disp. in water; m.w. 3000; sp.gr. 1.027; dens. 8.54 lb/gal; vis. 100 cSt; vapor pressure < 1.33 hPa; HLB 5-8; m.p. 3 C; b.p. > 150 C; flash pt. (PMCC) 93.33 C; pour pt. -15 C; surf. tens. 26.6 dyne/cm (1.1% aq.); VOC 1.29%; nonionic; 100% act.
Trade Name Reference

Skin, rabbit > 2000 mg/kg; harmful if inh.; sl. eye, skin irritation
Precaution: Use protective gloves, glasses; combustible; prevent runoff
Hazardous Decomp. Prods.: CO<sub>x</sub>, SiO<sub>x</sub>
HMIS: Health 0, Flammability 1, Reactivity 0
Storage: Store at R.T. in tightly sealed containers

Simchin® Natural [RITA http://www.ritacorp.com]
Chem. Descrip.: Jojoba oil See Jojoba (Buxus chinensis) oil
CAS 61789-91-1
Uses: Coating material and carrier for pharmaceuticals and topicals; moisturizer, emollient, conditioner, spreading agent for skin care prods.
Properties: Yel. liq.; sp.gr. 0.863-0.864; f.p. 7-10.6 C; m.p. 6.8-7 C; acid no. 2 max.; iodine no. 82-93; sapon. no. 92-95.6; ref. index 1.4650-1.4665
Toxicology: Nontoxic

Simchin® Refined [RITA http://www.ritacorp.com]
Chem. Descrip.: Jojoba oil See Jojoba (Buxus chinensis) oil
CAS 61789-91-1
Uses: Coating material and carrier for pharmaceuticals and topicals; moisturizer, emollient, conditioner, spreading agent for skin care prods.
Features: Highest quality; for use when low odor and color is important
Properties: Gardner 1 liq. wax, almost odorless; sp.gr. 0.863-0.864; f.p. 7-10.6 C; m.p. 6.8-7 C; acid no. 2 max.; iodine no. 82-93; sapon. no. 92-95.6; ref. index 1.4650-1.4665; 100% conc.
Toxicology: Nontoxic, nonirritating

Chem. Descrip.: Simethicone
CAS 8050-81-5
Uses: Antifoam in gel or tablet form antiflatulent preparations for the treatment of intestinal gas and bloating
Features: Outstanding reliability, versatility; highly effective; acceptable under most countries' regulations
Regulatory: EP
Properties: 100% act
Toxicology: Prolonged contact with skin, eyes may cause some irritation; low toxicity
Storage: 1 yr. when stored @ < 32 C in unopened container

Chem. Descrip.: Simethicone
Chem. Analysis: Silicone 30%
CAS 8050-81-5
Uses: Antifoam in antiflatulent preparations for the treatment of intestinal gas and bloating
Features: Outstanding reliability, versatility; highly effective; acceptable under most countries' regulations
Regulatory: USP
Properties: Off-wh. emulsion; disp. in hot or cold aq. systems; sp.gr. 1.0
Use Level: 100-500 ppm
Toxicology: Prolonged contact with skin, eyes may cause some irritation; low toxicity
Storage: 1 yr. when stored @ < 35 C in unopened container

Simulsol® 58 [Seppic http://www.seppic.com]
Chem. Descrip.: Ceteth-20
CAS 9004-95-9
Uses: O/w emulsifier, gellant, stabilizer, wetting agent, detergent, dispersant, solubilizer for pharmaceutical actives and essential oils for creams and ointments, depilatories, antiperspirants, skin care
Regulatory: BP compliance
Properties: Flakes; sol. @ 10% in water, ethanol 95 C; sol. hot in propylene glycol; insol. in vaseline oil; m.p. 40 C; HLB 15.7; acid no. 0.5 max.; hyd. no. 50-58; cloud pt. 91 C; pH 6.5-7.5 (10% aq.); nonionic; 100% conc.
Toxicology: LD50 (oral, rat) 2.5 g/kg; nonirritating to skin, mildly irritating to eyes

Simulsol® 78 [Seppic http://www.seppic.com]
Chem. Descrip.: Steareth-20
CAS 9004-95-9
Uses: Emulsifier, gellant, stabilizer, wetting agent, detergent, dispersant, solubilizer for pharmaceuticals (creams, ointments), skin care, depilatories, antiperspirants
Regulatory: USP
Properties: Wax; sol. @ 10% in 95 C ethanol, propylene glycol; insol. in water, vaseline oil; HLB 15.3; m.p. 44 C; acid no. 1 max.; hyd. no. 45-60; cloud pt. 90 C; pH 6.5-7.5 (10% aq.); nonionic; 100% conc.
Toxicology: LD50 (oral, rat) > 4 g/kg
Simulsol® 98  [Seppic  
http://www.seppic.com]  
Chem. Descrip.:  Oleth-20    
CAS  9004-98-2    
Uses:  Emulsifier, gellant, stabilizer, wetting agent, detergent, dispersant, solubilizer for pharmaceutical formulations (creams, ointments), skin care, depilatories, antiperspirants; solubilizer for min. oil, veg. oil, lanolin    
Properties:  Soft wax; sol. @ 10% in water, 95 C ethanol; disp. in propylene glycol; insol. in vaseline oil; m.p. 25 C; HLB 15.3; acid no. 1 max.; hyd. no. 50-60; cloud pt. 88 C; pH 6.5-7.5 (10% aq.); nonionic; 100% conc.    
Toxicology:  LD50 (oral, rat) 2.5 g/kg

Simulsol® 165  [Seppic  
http://www.seppic.com]  
Chem. Descrip.:  PEG-100 stearate, glyceryl stearate; free of dioxane and other impurities    
Uses:  O/w emulsifier, opacifier, gellant for pharmaceuticals, esp. hydrophilic anhyd. ointments; stabilizer for other emulsifying systems    
Features:  Self-emulsifying; acid-stable    
Properties:  Gardner 1 max. flakes; m.p. 55-59 C; acid no. 1 max.; sapon. no. 90-97; hyd. no. 110-130; pH 6.0-7.5 (10% aq.); nonionic; 100% act.    
Toxicology:  Nontoxic; well tolerated by skin

Simulsol® 989  [Seppic  
http://www.seppic.com]  
Chem. Descrip.:  PEG-7 hydrogenated castor oil    
CAS  61788-85-0    
Uses:  W/o emulsifier for pharmaceutical fluid and semifluid emulsions    
Features:  Lipophilic    
Properties:  Gardner 4 max. liq.; acid no. 1.5 max.; sapon. no. 120-140; hyd. no. 115-135; pH 6.0-7.5 (5% aq.); nonionic; 100% act.    
Toxicology:  LD50 (oral, rat) > 30 g/kg; very good safety for skin and mucous membranes

Simulsol® 1292  [Seppic  
http://www.seppic.com]  
Chem. Descrip.:  PEG-25 hydrogenated castor oil    
CAS  61788-85-0    
Uses:  Emulsifier, solubilizer for pharmaceuticals    
Properties:  Liq.; nonionic; 100% act.    
Simulsol® 1293  [Seppic

Simulsol® CS  [Seppic  
http://www.seppic.com]  
Chem. Descrip.:  Ceteareth-33    
CAS  68439-49-6    
Uses:  Emulsifier, gellant, stabilizer, wetting agent, detergent, dispersant, solubilizer for pharmaceuticals (creams, ointments), skin care, depilatories, antiperspirants    
Properties:  Flakes; sol. @ 10% in 95 C ethanol, propylene glycol; disp. in vaseline oil; insol. in water; m.p. 47-52 C; HLB 18.0; acid no. 1 max.; hyd. no. 32-39; nonionic; 100% act.    
Toxicology:  LD50 (oral, rat) > 15 g/kg; nonirritating to skin and eyes

Simulsol® M 52  [Seppic  
http://www.seppic.com]  
Chem. Descrip.:  PEG-40 stearate    
CAS  9004-99-3    
Uses:  O/w emulsifier for pharmaceuticals, esp. hydrophilic anhyd. ointments    
Regulatory:  USP compliance    
Properties:  Flakes; sol. @ 10% in water, ethanol; disp. in propylene glycol; insol. in vaseline oil; m.p. 47 C; HLB 16.9; acid no. 1 max.; sapon. no. 25-35; hyd. no. 27-40; pH 6.0-7.5 (10% aq.); nonionic; 100% conc.    
Toxicology:  LD50 (oral, rat) > 16 g/kg; nonirritating to skin and eyes

Simulsol® OL 50  [Seppic  
http://www.seppic.com]  
Chem. Descrip.:  PEG-40 castor oil    
CAS  61791-12-6    
Uses:  Emulsifier, solubilizer for pharmaceuticals    
Properties:  Nonionic

Simulsol® P4  [Seppic  
http://www.seppic.com]  
Chem. Descrip.:  Laureth-4    
CAS  5274-68-0; EINECS/ELINCS 226-097-1    
Uses:  O/w emulsifier, gellant, stabilizer, wetting agent, detergent, dispersant, solubilizer for pharmaceuticals (creams, ointments), skin care, depilatories, antiperspirants
Trade Name Reference

**Properties:** Liq.; sol. @ 10% in 95 C ethanol, vaseline oil, propylene glycol; disp. in water; HLB 9.7; acid no. 2 max.; hyd. no. 145-165; cloud pt. 64-69 C; pH 6.5-7.5 (10% aq.); nonionic; 100% conc.

**Toxicology:** LD50 (oral, rat) 9 g/kg; mildly skin irritant

**Simulsol® P23** [Seppic http://www.seppic.com]

Chem. Descrip.: Laureth-23

CAS 9002-92-0

Uses: O/w emulsifier, gellant, stabilizer, wetting agent, detergent, dispersant, solubilizer for pharmaceuticals (creams, ointments), skin care, depilatories, antiperspirants

**Properties:** Wax; sol. @ 10% in water, 95 C ethanol, propylene glycol; insol. in vaseline oil; m.p. 41 C; HLB 16.9; acid no. 2 max.; hyd. no. 40-60; cloud pt. 95 C; pH 6.5-7.5 (10% aq.); nonionic; 100% act.

**Toxicology:** LD50 (oral, rat) 9 g/kg; nonirritating to skin

**Sinopol 170TFH-S9** [Sino-Japan http://www.sjc.com.tw]

Chem. Descrip.: Surfactant

Uses: Surfactant for pharmaceuticals

**Properties:** Gardner < 10 liq.; sp.gr. 1.046; pH 5-7; nonionic; 10% moisture

**Sipernat® 22LS** [Degussa/Fillers & Pigments http://www.degussa-fp.com; Degussa AG/Fillers & Pigments http://www.degussa-krefeld.com]

Chem. Descrip.: Precipitated silica See Silica, hydrated

Chem. Analysis: SiO2 (99.5%), Na2SO4 (1%), Fe2O3 (0.03%), moisture (4% max.)

CAS 1343-98-2; EINECS/ELINCS 215-683-2

Uses: Thickener for pharmaceuticals; flow aid for hygroscopic materials with poor flow chars., e.g., vitamins; inert carrier for actives

**Regulatory:** FDA approved

**Properties:** 3.5 µ avg. particle size; dens. 80 g/l (tapped); BET surf. area 190 m²/g; pH 6.2

**Sipernat® 22S** [Degussa AG/Fillers & Pigments http://www.degussa-fp.com; Degussa AG/Fillers & Pigments http://www.degussa-krefeld.com]

Chem. Descrip.: Precipitated silica See Silica, hydrated

CAS 1343-98-2; EINECS/ELINCS 215-683-2

Uses: Flow control agent, anticaking agent

**Features:** Hydrophilic

Chem. Descrip.: Precipitated silica See Silica, hydrated

Chem. Analysis: SiO2 (99.5%), Na2SO4 (1%), Fe2O3 (0.03%), moisture (4% max.)

CAS 1343-98-2; EINECS/ELINCS 215-683-2

Uses: Used in pharmaceutical preps.

**Properties:** Powd.; dens. 500 g/l (tapped); pH 11.8 (5% aq. susp.)

**Sipernat® 160PQ** [Degussa AG/Fillers & Pigments http://www.degussa-krefeld.com]

Chem. Descrip.: Syn. amorphous precipitated silica See Silica, amorphous

Chem. Analysis: SiO2 content >99.0%  
CAS 112926-00-8; EINECS/ELINCS 231-545-4

Uses: Adsorbent, anticaking agent, glidant for pharmaceuticals

**Features:** Good dispersion characteristics

**Regulatory:** USP/NF, DAB, EP

**Properties:** Mean particle size 7 μ; tamped dens. 80 g/l; sp. surf. area 165 m²/g; pH 5.5 (5% sol’n.)
**Trade Name Reference**

**Sipernat® 300DS** [Degussa AG/Fillers & Pigments http://www.degussa-krefeld.com; Eigenmann & Veronelli http://www.eigver.it]
Chem. Descrip.: Precipitated silica  See Silica, hydrated
Chem. Analysis: SiO₂ (98%), Al₂O₃ (0.2%)
CAS 1343-98-2; EINECS/ELINCS 215-683-2
Uses: Glideant for pharmaceuticals
Features: Hydrophilic
Properties: Powd.; 10 nm avg. particle size; dens. 90 g/l (tapped); DBP absorp. 260%; surf. area 300 m²/g; pH 6.5 (5% aq. susp.)

**Sipernat® 310** [Degussa AG/Fillers & Pigments http://www.degussa-krefeld.com; Eigenmann & Veronelli http://www.eigver.it]
Chem. Descrip.: Precipitated silica  See Silica, hydrated
Chem. Analysis: SiO₂ (>97%), Na₂SO₄ (<3%)
CAS 1343-98-2; EINECS/ELINCS 215-683-2
Uses: Adsorbent, glidant in pharmaceuticals
Properties: Powd.; 8 nm avg. particle size; dens. 130 g/l (tapped); DBP absorp. 210%; surf. area 650 m²/g; pH 7 (5% aq. susp.); 99% assay

**Sipernat® 320** [Degussa AG/Fillers & Pigments http://www.degussa-krefeld.com; Eigenmann & Veronelli http://www.eigver.it]
Chem. Descrip.: Precipitated silica  See Silica, hydrated
Chem. Analysis: SiO₂ (98%), Na₂SO₄ (2%)
CAS 1343-98-2; EINECS/ELINCS 215-683-2
Uses: Adsorbent, glidant in pharmaceuticals
Features: Hydrophilic
Properties: Powd.; 18 nm avg. particle size; dens. 240 g/l (tapped); DBP absorp. >200%; surf. area 170 m²/g; pH 6.3 (5% aq. susp.); 98% assay

**Sipernat® 500LS** [Degussa AG/Fillers & Pigments http://www.degussa-krefeld.com]
Chem. Descrip.: Amorphous precipitated silica  See Silica, amorphous
Chem. Analysis: SiO₂ (99%), moisture (3%)
CAS 112926-00-8; EINECS/ELINCS 231-545-4
Uses: Thickener in pharmaceuticals; flow aid for hygroscopic materials with poor flow chars., e.g., vitamins; inert carrier for active substances
Regulatory: FDA approved
Properties: Powd.; 3.5 µ avg. particle size; dens 80 g/l (tapped); BET surf. area 475 m²/g; pH 6.3 (5% aq. susp.)

**Sipernat® 820A** [Degussa AG/Fillers & Pigments http://www.degussa-krefeld.com]
Chem. Descrip.: Sodium silicoaluminate
Chem. Analysis: SiO₂ (82%); 9.5% Al₂O₃ (9.5%); Na₂O (8%)
CAS 1344-00-9; EINECS/ELINCS 215-684-8
Uses: Adsorbent for pharmaceuticals
Properties: 5 µm mean particle size; dens. 300 g/l (tapped); surf. area 85 m²/g; pH 10.1 (5% aq.)
Toxicology: TSCA listed

**Sipernat® D10** [Degussa/Fillers & Pigments http://www.degussa-fp.com; Degussa AG/Fillers & Pigments http://www.degussa-krefeld.com]
Chem. Descrip.: Precipitated silica  See Silica, hydrated
Chem. Analysis: SiO₂ (98%); Na₂SO₄ (2%)
CAS 1343-98-2; EINECS/ELINCS 215-683-2
Uses: Free-flowing agent used in pharmaceutical preps.
Features: Hydrophobic
Properties: 4-7 µm avg. agglomerate size; sp.gr. 2.1; tapped dens. 100 g/l; surf. area (BET) 90 m²/g; DBP absorp. 240 g/100 g; pH 9.3-11.3; ≤4% moisture (2 h @ 105 C)

**Sipoest MO-9** [Lubrizol Perf. Prods.]
Chem. Descrip.: PEG 400 monooleate  See PEG-8 oleate
CAS 9004-96-0
Uses: Emulsifier, dispersant in pharmaceuticals
Properties: Liq.; sol. in toluene, min. oil, and isopropanol; disp. in water; HLB 12.2; acid no. 2 max.; sapon. no. 80-85; nonionic

Chem. Descrip.: Modified wheat starch  See Wheat (Triticum vulgare) starch
CAS 9005-25-8; EINECS/ELINCS 232-679-6
Uses: Flow aid, oil absorbent, moisture absorbent, feel enhancer in cosmetic powds., skin care, creams/lotions, ointments, sunscreens, antiperspirants, balms
Features: Low friction; nongreasy
Properties: Wh. powd.; 70% min. through 200 mesh; bland odor; 9-12% moisture
Storage: Store under cool, dry, sanitary conditions

**S-Maz® 60K** [BASF/Perf. Chems. http://www.basf.com/static/98804217008.h]
Sorbitan stearate
CAS 1338-41-6; EINECS/ELINCS 215-664-9
Uses: Emulsifier and coupling agent for pharmaceuticals, creams and lotions
Properties: Wh. to cream flakes, ester odor; sol. in ethanol; disp. in water; sp.gr. 0.954 (70 C); m.p. 52 C; b.p. > 300 F; acid no. 10 max.; sapon. no. 147-157; hyd. no. 235-260; flash pt. (PMCC) > 350 F; nonionic
Toxicology: LD50 (oral, rat) > 32 g/kg; nonirritating
Storage: Store in well-ventilated area below 120 F

Calcium sulfate anhyd.
CAS 7778-18-9; EINECS/ELINCS 231-900-3
Uses: Diluent and inert extender in pharmaceuticals; dietary calcium supplement
Regulatory: GRAS, FCC, and NF compliant
Properties: Wh. free-flowing powd.; low to no odor; 7 µ median particle size; sol. in water (0.26 g/100 cc); sp.gr. 2.96; bulk dens. ≈ 45-70 lb/ft³; ref. index 1.56; pH 10.4; comp. > 1450 C
Toxicology: Direct contact may cause eye, skin and/or respiratory irritation
Environmental: Zero VOC content; no known adverse effect on the ecology.
NFPA: Health 0, Flammability 0, Reactivity 0
Storage: Store @ R.T. in dry location; keep containers closed when not in use

Precipitated calcium carbonate
CAS 471-34-1; EINECS/ELINCS 207-439-9
Uses: Functional filler in pharmaceutical preps.
Features: High level of flowability
Regulatory: EP
Properties: Wh. odorless, rhombohedral solid; cube-like crystal shape; particle size (mean) 180 nm; sp. surface 10 m²/g; brightness 97%; sl. sol. in water with no CO₂; comp. temp 700-900 C
Toxicology: LD50 (oral, rat) > 2,000 mg/kg; irritant to eyes; sl. irritant to skin
Hazardous Decomp. Prods.: CaO
Storage: Room temperature, dry location; keep containers closed when not in use

Antimicrobial for pharmaceutical deodorants
Preservative, antioxidant, and vitamin C source in pharmaceuticals, esp. where neutral pH and less acid taste are important, and where free-flowing gran. prod. is required
Regulatory: FDA GRAS, USP, FCC, Ph. Eur.
Properties: Wh. to ylsh. cryst. powd., pract.
odorless, pleasantly saline taste with tart overtone; 90% through 80 mesh, 95% max. through 100 mesh; sol. 90 g/100 ml water; m.w. 198.11; bulk dens. 0.8-1.1 (tapped); pH 7-8 (10% aq.); 99-101% (dry) assay

Precaution: Oxidizes readily in sol’n.; exposure to light or atmospheric moisture may darken prod.; avoid contact with iron, copper, or nickel salts

Storage: Store in tight, light-resist. containers, optimally @ ≤ 72 F; avoid exposure to moisture and excessive heat

Chem. Descrip.: Sodium benzoate CAS 532-32-1; EINECS/ELINCS 208-534-8
Uses: Preservative for pharmaceutical and dental formulations; tableting lubricant for pharmaceuticals
Regulatory: DOT nonregulated
Properties: Wh. cryst. powd.; odorless; easily sol. in cold water; very sl. sol. in methanol; m.w. 160.22; sp.gr. 1.5; b.p. > 300 C; 100% act.

Toxicology: LD50 (oral, rat) > 4800 mg/kg, (oral, mouse) 1600 mg/kg, (oral rabbit, 2000 mg/kg, (oral, dog) 200 mg/kg; may cause eye, skin, respiratory tract irritation
Precaution: May be slippery when wet; may be combustible at high temps.; may form explosive dust-air mixts.; incompat. with ferric salts, acids, oxidizers

Hazardous Decomp. Prods.: Compds. of C, H, N, and O, pungent fumes; combustion prods.: CO, CO2
HMIS: Health 1, Flammability 1, Reactivity 0
Storage: Hygroscopic; store in ventilated area away from ignition sources

Chem. Descrip.: Sodium bicarbonate USP CAS 144-55-8; EINECS/ELINCS 205-633-8
Uses: Buffer in pharmaceuticals (antibiotic mfg.)
Regulatory: USP/FCC
Properties: Wh. free-flowing cryst., odorless;trace on 80 mesh, 2.0% max. on 100 mesh; bulk dens. 60 lb/ft3; 99% min. assay
Storage: 36mos. shelf life

Sodium Caseinate Spray F&P [Am. Casein http://www.americancasein.com]
Chem. Descrip.: Sodium caseinate CAS 9005-46-3
Uses: Binder, emulsifier for pharmaceuticals
Regulatory: Kosher
Properties: Wh. to lt. cream free-flowing powd.; clean/bland odor/flavor; pH 6.6-7.2; 6% moisture

Storage: Store in cool, dry place

Sodium Hyaluronate Bio [Kelisema Srl http://www.kelisema.it]
Chem. Descrip.: Sodium hyaluronate CAS 9067-32-7; EINECS/ELINCS 232-678-0
Uses: Natural ingred. for pharmaceuticals

Sofracerine 165 [Baerlocher France]
Chem. Descrip.: Microcrystalline wax CAS 63231-60-7; EINECS/ELINCS 264-038-1
Uses: Binder, emulsion stabilizer, opacifier, thickener in pharmaceuticals
Features: Wax derived from petroleum
Properties: Drop pt. 90-100 C; solid. pt. 78-83 C; penetration 6-11 dmm

Sofracerine 185 [Baerlocher France]
Chem. Descrip.: Microcrystalline wax CAS 63231-60-7; EINECS/ELINCS 264-038-1
Uses: Binder, emulsion stabilizer, opacifier, thickener in pharmaceuticals
Features: Wax derived from petroleum
Properties: Drop pt. 95-105 C; solid. pt. 80-90 C; penetration 7-10 dmm

Chem. Descrip.: C18 fatty acid triglyceride See C18 acid triglyceride
Uses: Compressing aid in tableting technical substances; hydrophobing agent against moisture; release agent, o/w emulsifier for topical and oral pharmaceuticals; o/w emulsifier for emulsions

Properties: Microfine powd.; neutral odor and taste; dens. 0.863 g/cm3 (80 C); visc. 17.1 mm2/s (80 C); m.p. 69-71 C; sapon. no. 188-190

Environmental: Biodeg.
Trade Name Reference

**Softigen® 701** [Sasol Germany](http://www.sasol.com); [http://www.sasololefinssurfactants.com](http://www.sasololefinssurfactants.com); Sasol N. Am. [http://www.sasolnorthamerica.com](http://www.sasolnorthamerica.com)

**Chem. Descrip.:** Glyceril ricinoleate

**CAS:** 141-08-2; EINECS/ELINCS 205-455-0

**Uses:** Emulsifier, emollient, refatting agent, spreading agent, skin protectant for pharmaceuticals (topicals, rectals, vaginals, creams, ointments, soaps, mucosal protectant in rectal/vaginal suppositories)

**Features:** Good adhesion to mucosa; environmentally compat.

**Regulatory:** JCIC

**Properties:** Ylsh.-wh. paste/cl. oily liq. @ 30-35 C, char. odor; sol. in ether, benzene, toluene, xylene, chloroform, and dichlorethylene; misc. with fats, oils; sp.gr. 0.979-0.981; visc. 500-600 mPa•s (30 C); acid no. 3 max.; iodine no. 70-80; sapon. no. 155-170; nonionic; 100% conc.

**Use Level:** 5-10%

**Softigen® 767** [Sasol Germany](http://www.sasol.com); [http://www.sasololefinssurfactants.com](http://www.sasololefinssurfactants.com); Sasol N. Am. [http://www.sasolnorthamerica.com](http://www.sasolnorthamerica.com)

**Chem. Descrip.:** PEG-6 caprylic/capric glycerides

**CAS:** 52504-24-2

**Uses:** Emulsifier, superfatting agent, wetting agent, solubilizer for volatile oils/fixed oils, emollient in pharmaceuticals (topicals, orals, treatment of psoriatic conditions)

**Features:** Environmentally compat.

**Regulatory:** Ph. Eur.

**Properties:** Ylsh. visc. oily liq., faint char. odor; sol. in water @ 1.3%; sol. in acetone, ethyl and butyl acetate, castor oil, IPA; dens. 1.080 g/ml; visc. 160 mPa•s; HLB 19; acid no. 1 max.; iodine no. 1 max.; sapon. no. 90-110; surf. tens. 29.7 dynes/cm (1%); nonionic; 100% act.

**Toxicology:** LD50 (oral, rat) > 5 g/kg (pract. nontoxic); nonirritating to skin and eyes

**Softisan® 100** [Sasol Germany](http://www.sasol.com); [http://www.sasololefinssurfactants.com](http://www.sasololefinssurfactants.com); Sasol N. Am. [http://www.sasolnorthamerica.com](http://www.sasolnorthamerica.com)

**Chem. Descrip.:** Hydrogenated coco-glycerides

**Uses:** Consistency agent, emollient, ointment base for pharmaceuticals, creams, ointments, sticks

**Features:** Cocoa butter substitute; environmentally compat.; assists penetration of skin by active ingreds.

**Properties:** Wh. pastilles; neutral odor and taste; sol. in benzene, ether, xylene, toluene, chloroform, CCl₄, dioxane; sp.gr. 0.950-0.980; visc. 30 cps (40 C); m.p. 32-34 C; solid. pt. 29-33 C; acid no. 0.2 max.; iodine no. 3 max.; sapon. no. 235-255; hyd. no. 15 max.; ref. index 1.445-1.449 (50 C)

Uses: Fat component and consistency agent in pharmaceutical creams, ointments, sticks, capsules
Features: Environmentally compat.; assists penetration of skin by active ingreds.
Properties: Wh. pastilles; neutral odor and taste; sol. in benzene, toluene, acetone, chloroform, petrol. spirit; insol. in water; m.p. 42-44 C; solid. pt. 37-42 C; acid no. 0.3 max.; iodine no. 3 max.; sapon. no. 245-260; hyd. no. 20 max.; nonionic; 100% act.

Softisan® 601 [Sasol Germany  
http://www.sasol.com;  
http://www.sasololefinssurfactants.com;  
Sasol N. Am.  
http://www.sasolnorthamerica.com]

Chem. Descrip.: Glycerol cocoate, hydrogenated coconut oil, and ceteareth-25
Uses: Emollient; self-emulsifying base for pharmaceutical o/w or anhyd. prods., washable o/w creams, wound and skin healing creams, hemorrhoidal ointments, steroid ointments, rheumatism creams
Features: Water absorption to 65%; environmentally compat.
Regulatory: USP, Ph.Eur.
Properties: Off-wh. to ylsh. pasty wax; m.p. 37-40 C; acid no. 1 max.; iodine no. 5 max.; sapon. no. 120-140; hyd. no. 230-270; nonionic; 100% conc.

Softisan® 378 [Sasol Germany  
http://www.sasol.com;  
http://www.sasololefinssurfactants.com;  
Sasol N. Am.  
http://www.sasolnorthamerica.com]

Chem. Descrip.: Bis-diglyceryl caprylate/caprate/isostearate/hydroxystearate adipate  See Bis-diglyceryl polyacyladipate-1
CAS 222722-06-7; EINECS/ELINCS 406-144-4
Uses: Neutral carrier for pharmaceutical apps.
Features: High polarity contributes to superior solvent characteristics for active drugs
Regulatory: JCIC
Properties: Ylsh. liq.; acid no. 3 max.; iodine no.
Trade Name Reference

Softisan® 649  [Sasol Germany  
http://www.sasol.com;  
http://www.sasololefinssurfactants.com;  
Sasol N. Am.  
http://www.sasolnorthamerica.com]

Chem. Descrip.: Bis diglyceryl caprylate/caprate/isostearate/stearate/hydroxystearate adipate  See Bis-diglyceryl polyacryl adipate-2
CAS 82249-33-0; EINECS/ELINCS 406-144-4
Uses: Emollient, ointment base, stabilizer for pharmaceutical creams, ointments, emulsions, skin care prod., hemorrhoidal creams, absorp. basic creams
Features: Lanolin substitute; good adhesion to skin, high water binding power; environmentally compat.
Regulatory: JCIC
Properties: Ylsh. paste; almost odorless; sol. in ether, chloroform; misc. with fats, oils; acid no. 2 max.; iodine no. 3 max.; sapon. no. 270-290; hyd. no. 55-85

Softisan® 701  [Sasol Germany  
http://www.sasol.com;  
http://www.sasololefinssurfactants.com;  
Sasol N. Am.

Chem. Descrip.: PEG-6 caprylic/capric glycerides
CAS 52504-24-2
Uses: Solubilizer for pharmaceuticals; refatting agent
Regulatory: EP
Properties: Cl. liq.; sol. in water and polar oils

Softisan® Gel  [Sasol Germany  
http://www.sasol.com;  
http://www.sasololefinssurfactants.com;  
Sasol N. Am.  
http://www.sasolnorthamerica.com]

Chem. Descrip.: Bis diglyceryl caprylate/caprate/isostearate/hydroxystearate adipate, propylene glycol dicaprylate/dicaprate, stearalkonium hectorite, propylene carbonate  See Bis-diglyceryl polyacryl adipate-1
Uses: Consistency regulator, emulsion stabilizer for sun care prod.s., topical pharmaceuticals, ointments
Features: High temp. stabilizer; emulsifiable; environmentally compat.
Properties: Flesh-colored hard paste; acid no. 1 max.; iodine no. 3 max.; sapon. no. 250-280; 0.5% max. water

Solan  [Croda Inc  
http://www.croda.com;  
http://www.crodausa.com;  Croda Chem. Europe Ltd  
http://www.croda.co.uk]

Chem. Descrip.: PEG-60 lanolin
CAS 61790-81-6
Uses: Surfactant, emollient, conditioner, superfatting agent, emulsifier, solubilizer, visc. builder, foam stabilizer, plasticizer, humectant for topical aq. pharmaceuticals; emollient and cleanser in cleansing wipes
Features: Yel. wax; sol. in water, propylene glycol; sol. warm in IPA; m.p. 46-54 C; acid no. 2 max.; iodine no. 10 max.; sapon. no. 8-16; pH 5.5-7.0 (1% aq.); nonionic; 100% act.
Use Level: 1-10%
Toxicology: LD50 (oral, rat) > 5 g/kg; nonirritating to skin

Solan 50  [Croda Inc  
http://www.croda.com;  
http://www.crodausa.com]
Chem. Descrip.: PEG-60 lanolin
CAS 61790-81-6
Uses: Surfactant, emollient, conditioner, thickener, superfatting agent, foam stabilizer, plasticizer, humectant for pharmaceuticals; solubilizer for fragrances
Features: Hydrophilic
Properties: Gardner 11 max. visc. liq.; water-sol.; acid no. 2 max.; iodine no. 6 max.; sapon. no. 8 max.; pH 5.5-7.0 (1% aq.); nonionic; 50% act.
Use Level: 1-10%

Solan E  [Croda Chem. Europe Ltd  
http://www.croda.co.uk]
Chem. Descrip.: PEG-75 lanolin
CAS 61790-81-6
Uses: Nongreas vehicle in pharmaceuticals
Properties: Yel./brn. solid; mild odor; water-sol.; drop pt. 45-50 C; HLB 16.2; acid no. 2 max.; iodine no. 4-8; sapon. no. 15-24; nonionic; 100% conc.
Solan E50 [Croda Chem. Europe Ltd http://www.croda.co.uk]
Chem. Descrip.: Pharmaceutical grade PEG-75 lanolin and water
CAS 61790-81-6; EINECS/ELINCS 231-791-2
Uses: O/w emulsifier, wetting agent, solubilizer, emollient for topical pharmaceuticals; in iodophor-based teat dips for veterinary use
Properties: Yel. cl. visc. liq.; mild odor; water-sol.; acid no. 1 max.; iodine no. 3-11; sapon. no. 6-15; HLB 16.2; 46-51% water

Solan ELD [Croda Chem. Europe Ltd http://www.croda.co.uk]
Chem. Descrip.: Pharmaceutical-grade PEG-75 lanolin
CAS 61790-81-6; EINECS/ELINCS 231-791-2
Uses: Emollient, superfatting agent, solubilizer, cleansing agent for topical pharmaceuticals; in iodophor-based teat dips for veterinary use
Properties: Yel. pastilles; water-sol.; HLB 16.2

Chem. Descrip.: 2-Bromo-2-nitropropane-1,3-diol (99% min.), BP
CAS 52-51-7; EINECS/ELINCS 200-143-0
Uses: Preservative, bactericide for cosmetics, pharmaceuticals
Features: Broad spectrum activity against gram-positive and gram-negative bacteria
Regulatory: BP compliance

Chem. Descrip.: Paraben (99.5% min.) based
Uses: Preservative for pharmaceuticals
Properties: Readily sol. in water

Chem. Descrip.: Sodium paraben (99.5% min.) based
Uses: Preservative for pharmaceuticals
Properties: Readily sol. in water

Chem. Descrip.: Paraben (99.5% min.) based
Uses: Preservative for pharmaceuticals

Chem. Descrip.: Sodium paraben (99.5% min.) based
Uses: Preservative for pharmaceuticals

Solka-Floc® 100 NF [Int'l. Fiber http://www.ifcfiber.com]
Chem. Descrip.: Cellulose
CAS 9004-34-6; EINECS/ELINCS 232-674-9
Uses: Binder, diluent, disintegrant, stabilizer, absorption aid, tablet filler for pharmaceuticals, for direct compression and wet granulations
Regulatory: USP/NF, BP, EP, JP
Properties: Avg. particle size 40 µ; 95% min. through 60 mesh; dens. (tapped) 0.46 g/ml; pH 5.0-7.5

Solka-Floc® 200 NF [Int'l. Fiber http://www.ifcfiber.com]
Chem. Descrip.: Cellulose
CAS 9004-34-6; EINECS/ELINCS 232-674-9
Uses: Binder, diluent, disintegrant, stabilizer, absorption aid, tablet filler for pharmaceuticals
Properties: Avg. particle size 35 µ; 98% min. through 60 mesh; dens. (tapped) 0.46 g/ml; pH 5.0-7.5

Solka-Floc® 2030 NF [Int'l. Fiber http://www.ifcfiber.com]
Chem. Descrip.: Cellulose
CAS 9004-34-6; EINECS/ELINCS 232-674-9
Uses: Excipient, binder, diluent, disintegrant, stabilizer, moisture absorption aid, tablet filler for pharmaceuticals
Properties: Avg. particle size 35 µ; 80% min. through 100 mesh; dens. (tapped) 0.45 g/ml; pH 5.0-7.5

Solka-Floc® SF20P [Int'l. Fiber http://www.ifcfiber.com]
Chem. Descrip.: Cellulose
Uses: Binder, diluent, disintegrant, stabilizer, absorption aid, tablet filler for pharmaceuticals
Features: Noncaloric; inert; high wh. brightness; upon ing., immediate moisture absorption for disintegration
Properties: Creamy wh. pellets; dens. (bulk) 30.0 lb/ft³; water retention 6.0 g/g

Solka-Floc® SF Special Granular [Int'l. Fiber http://www.ifcfiber.com]
Chem. Descrip.: Cellulose
Trade Name Reference

CAS 9004-34-6; EINECS/ELINCS 232-674-9
Uses: Binder, diluent, disintegrant, stabilizer, absorption aid, tablet filler for pharmaceuticals
Features: Noncaloric; inert; high wh. brightness; upon ing., immediate moisture absorption for disintegration
Regulatory: USP/NF, BP, EP, JP
Properties: Dens. (bulk) 28.0 lb/ft³; water retention 3.5 g/g

Solka-Floc® SF20 NF [Int'l. Fiber http://www.ifcfiber.com]
Chem. Descrip.: Cellulose
CAS 9004-34-6; EINECS/ELINCS 232-674-9
Uses: Binder, diluent, disintegrant, stabilizer, absorption aid, tablet filler for pharmaceuticals
Features: Noncaloric; inert; high wh. brightness; upon ing., immediate moisture absorption for disintegration
Regulatory: USP/NF, BP, EP, JP
Properties: Avg. fiber length 100 µ; 80-90% through 100 mesh; 55-75% through 200 mesh; dens. (bulk) 10.0 lb/ft³; water retention 6.5 g/g

Solka-Floc® SF40 NF [Int'l. Fiber http://www.ifcfiber.com]
Chem. Descrip.: Cellulose
CAS 9004-34-6; EINECS/ELINCS 232-674-9
Uses: Binder, diluent, disintegrant, stabilizer, absorption aid, tablet filler for pharmaceuticals
Features: Noncaloric; inert; high wh. brightness; upon ing., immediate moisture absorption for disintegration
Regulatory: USP/NF, BP, EP, JP
Properties: Avg. fiber length 60 µ; 3% through 40 mesh; 80-95% through 100 mesh; 60-95% through 200 mesh; dens. (bulk) 12.0 lb/ft³; water retention 5.5 g/g

Solka-Floc® SF900 NF [Int'l. Fiber http://www.ifcfiber.com]
Chem. Descrip.: Cellulose
CAS 9004-34-6; EINECS/ELINCS 232-674-9
Uses: Binder, diluent, disintegrant, stabilizer, absorption aid, tablet filler for pharmaceuticals
Features: Noncaloric; inert; high wh. brightness; upon ing., immediate moisture absorption for disintegration
Regulatory: USP/NF, BP, EP, JP
Properties: Avg. fiber length 110 µ; 8% through 40 mesh; 60-80% through 100 mesh; 30-55% through 200 mesh; dens. (bulk) 8.0 lb/ft³; water retention 9.5 g/g

Solkane® 134a pharma [Solvay SA http://www.solvay.com]
Chem. Descrip.: Tetrafluoroethane
Chem. Analysis: 99.99% by volume
CAS 811-97-2; EINECS/ELINCS 212-377-0
Uses: Propellant for pharmaceuticals
Properties: Colorless gas; faint ethereal odor; f.p. -101 C; b.p. -26.3 C; nonflammable
Toxicology: No appreciable toxic effect
Environmental: Zero ODP
Storage: Store liquefied gas under pressure in steel cylinders

Solkane® 227 pharma [Solvay SA http://www.solvay.com]
Chem. Descrip.: Heptafluoropropane See 1,1,1,2,3,3,3-Heptafluoropropane
CAS 431-89-0
Uses: Propellant for pharmaceuticals
Properties: Colorless gas; faint ethereal odor; f.p. -131 C; b.p. -16.5 C; nonflammable
Toxicology: No appreciable toxic effect
Environmental: Zero ODP
Storage: Store liquefied gas under pressure in steel cylinders

Solkane® 227ea [Solvay SA http://www.solvay.com]
Chem. Descrip.: HFC-227ea See 1,1,1,2,3,3,3-Heptafluoropropane
CAS 431-89-0
Uses: Pharmaceuticals (asthma sprays)

Solubilisant γ 2420 [Gattefosse http://www.gattefossecorp.com]
Chem. Descrip.: Octoxynol-11, polysorbate 20
Uses: Solubilizer for perfumes and essential oils for use in pharmaceutical/veterinary aq. sol'ns., lotions
Properties: Very pale yel. visc. transparent liq., faint odor; nonionic
Toxicology: Mild sensitizer to eyes; nonirritating to skin

Solubilisant γ 2428 [Gattefosse http://www.gattefossecorp.com]
Chem. Descrip.: PEG-40 hydrogenated castor oil, polysorbate 20
Uses: Solubilizer for perfumes and essential oils for use in pharmaceutical/veterinary aq. sol'ns., lotions
Properties: Yel. visc. liq. with possible sl. turbidity, faint odor; nonionic
Toxicology: Sl. irritating to skin and eyes

Soluble Beef Liver Powder [Am. Labs]
Soluble Pork Liver Powder

Chem. Descrip.: Enzymatic digest of liver
Chem. Analysis: 4% max. loss on drying
Uses: Nutritive pharmaceutical additive in tablets, capsules, and powders; diagnostic applications; taste masking of veterinary foods and drugs
Properties: Hygroscopic; completely sol. in water; pH 4.0-6.5 (2% sol'n.)
Storage: Store in cool, dry area in tightly closed polyliners within secure containers

Soluble Trachea CS 16 Substance

Chem. Descrip.: Defatted powd. processed from beef trachea contg. 16-17% chondroitin sulfate
Uses: Nutritive pharmaceutical additive
Properties: Off-wh. to lt. tan amorphous free-flowing powd., char. odor; sol. > 50 g/100 ml in water; 87% protein, 13% N
Precaution: Dust-air mixts. may be explosive
Storage: Hygrosopic; preserve in tight containers in cool, dry place

Solulan® 16

Chem. Descrip.: Laneth-16, ceteth-16, oleth-16 and steareth-16
Uses: Emulsifier, wetting agent, dispersant, lubricant, solvent, conditioner, plasticizer, emollient in dermatology prods., topical pharmaceuticals
Properties: Lt. tan waxy solid; sol. @ 5% in water, 30% ethanol; HLB 15; cloud pt. 64-70 C; acid no. 3 max.; sapon. no. 8 max.; pH 4.5-7.5 (10% aq.); nonionic; 100% conc.

Solulan® 75

Chem. Descrip.: PEG-75 lanolin
Uses: Emulsifier, wetting agent, dispersant, lubricant, solvent, conditioner, plasticizer, emollient in dermatology prods., topical pharmaceuticals
Properties: Lt. amber visc. liq.; faint pleasant odor; sol. @ 5% in water, ethanol; HLB 13; acid no. 3 max.; sapon. no. 10 max.; pH 4.5-7.5 (10% aq.); nonionic; 50% conc.

Solulan® 98

Chem. Descrip.: Polysorbate 80, cetyl acetate, acetylated lanolin alcohol
Uses: Dispersant, lubricant, emollient, conditioner for topical pharmaceuticals; pearlescent for stearic acid emulsions
Properties: Lt. amber visc. liq.; faint pleasant odor; sol. @ 5% in water, ethanol; HLB 13; acid no. 3 max.; sapon. no. 65-75; pH 4.5-7.5 (10% aq.); nonionic; 100% conc.

Solulan® L-575

Chem. Descrip.: PEG-75 lanolin
Uses: Emulsifier, wetting agent, dispersant, lubricant, solvent, conditioner, plasticizer, emollient in dermatology prods., topical pharmaceuticals
Properties: Lt. amber visc. liq.; faint pleasant odor; sol. @ 5% in water, ethanol; HLB 15; cloud pt. 80-87 C; acid no. 1 max.; sapon. no. 10 max.; nonionic; 50% conc.

Soluphor® P

Chem. Descrip.: Pyrrolidone-2
Uses: Solvent, antimicrobial for pharmaceutical injectables, parenterals, orals, veterinary medicine; absorp. accelerator of active substances in topicals
Features: Effective against gram-positive and gram-negative bacteria and molds
Properties: Colorless or sl. colored liq., solidifies @ R.T.; char. odor; sol. in water, many org. solvs. incl. ethanol, IPA, aromatic hydrocarbons; visc. 1-14 cSt; solid. pt. 25-26 C; ref. index 1.480-1.490; pH 8.2-10.8 (10% aq.); ≤ 0.5% moisture
Toxicology: LD50 (oral, rat) > 5 g/kg, (IV,
rabbit) ≈ 1 ml/kg, (subcut., mouse) ≈ 4 g/kg, (IP, mouse) ≈ 3.8 g/kg; nonirritating to skin, mucous membranes; nonmutagenic

Storage: 12 mos. shelf life when stored in unopened original containers @ R.T.

**Solutab®** [Blanver Farmoquimica
http://www.blanver.com.br; Blanver USA
http://www.blanver.com.br]

**Chem. Descrip.:** Croscarmellose sodium
CAS 74811-65-7

**Uses:** Dissolution agent, super disintegrant for pharmaceutical tablets, capsules, pellets, wet and dry granulation, dry blends

**Features:** High absorp. capacity; no starch or sugar; effective @ low use levels in sol. and insol. formulations

**Regulatory:** NF

**Properties:** Wh. free-flowing powd.; pH 5.0-7.0 (1 g/99 ml water); ≤ 10% loss on drying

**Use Level:** 0.5-5.0%

**Solut-U-Tein EA** [Fanning
http://www.fanningcorp.com]

**Chem. Descrip.:** Albumen
CAS 9006-50-2; EINECS/ELINCS 232-936-2

**Uses:** Binder, coagulant, film-former, skin conditioner for pharmaceuticals

**Properties:** Yel. powd.; 100% through 80 mesh; 90% through 100 mesh; bland odor; pH 6.5-8.0; 75% ovalbumin, ovoconalbumin, ovomucoid, ovomucin, ovoglobulin, lysozyme, and avidin

**Solutol® HS 15** [BASF AG
http://www.basf.de]

**Chem. Descrip.:** PEG-660 hydroxystearate
See PEG-15 hydroxystearate

**Uses:** Solubilizer, solvent for vitamins A, D, E, and K and other lipophilic actives in pharmaceuticals, aq. parenteral preps., human and veterinary injection sol'ns.

**Features:** High chem. stability

**Properties:** Ylsh. wh. paste @ R.T., liq. @ 30 C; sol. in water, ethanol, 2-propanol; visc. = 12 mPa*s (30% aq.); solid. pt. 25-30 C; acid no. ≤ 1; sapon. no. 53-63; hyd. no. 90-110; pH 6-7 (1% aq.); nonionic; ≤ 0.5% water

**Toxicology:** LD5 (oral, rat) = 20 g/kg, (IP, mouse) ≥ 8.5 mg/kg, (IV, mouse) ≥ 3.16 g/kg

**Storage:** Prolonged exposure to heat may cause physical separation into liq. and solid phases, reversible by homogenization
Sorbilene S [Cesalpinia
http://www.cesalpinia.com]
Chem. Descrip.: Polysorbate 60
CAS 9005-67-8
Uses: Emulsifier for pharmaceuticals
Properties: Liq./paste; HLB 14.8; nonionic; 100% conc.

Sorbilene TO [Cesalpinia
http://www.cesalpinia.com]
Chem. Descrip.: Polysorbate 85
CAS 9005-70-3
Uses: Emulsifier for pharmaceuticals
Properties: Liq.; HLB 11.0; nonionic; 100% conc.

Sorbirol L [Cesalpinia
http://www.cesalpinia.com]
Chem. Descrip.: Sorbitan laurate
CAS 1338-39-2; EINECS/ELINCS 215-663-3
Uses: Emulsifier for pharmaceuticals
Properties: Yel. liq.; sol. in alcohol and hydrocarbons such as min. oils and paraffins;
sp.gr. 1.04±0.05; visc. 4500-6000 cps; solid.
pt. 15-20 C; HLB 8.6; acid no. 7-10; sapon. no. 158-165;

Chem. Descrip.: PEG-20 sorbitan trioleate  See Polysorbate 85

CAS 9005-70-3

Uses: Solubilizer for water-insol. substances, vitamins, essential oils, fragrances, tannins, medicines

Regulatory: Not classified as dangerous for transport

Properties: Brown liq.; typical odor; sol. in water; insol. in fat; dens. 1.01 g/ml; flash pt. 280 C; nonionic

Environmental: Biodeg.; keep out of sewers, drains, surface and underground water; low toxicity to aquatic life

Precaution: Wear gloves, goggles, overalls; avoid contact with flames

Storage: Store in original, closed container @ R.T.; protect from dampness, heat sources

Chem. Descrip.: Sorbitol

CAS 50-70-4; EINECS/ELINCS 200-061-5

Uses: Sweetener, humectant, plasticizer, and stabilizer for pharmaceuticals

Regulatory: FDA 21CFR §175.105, 175.300, 175.320, 175.380, 176.210, 177.2420, 182.99, 184.1835; GRAS; USP, FCC compliance

Toxicology: Noncarcinogenic

Environmental: Biodeg.

Storage: Store in tightly closed container

Chem. Descrip.: Sorbitol with other polyhydric alcohols

Uses: Humectant, sweetener, visc. builder, plasticizer, stabilizer for sugar-free pharmaceuticals, dentifrices

Features: Inert; does not promote tooth decay; slowly absorbed

Regulatory: USP, FCC, FDA 21CFR §184.1835 GRAS

Properties: APHA 10 max., cl. visc. liq.; visc. 110 cps; b.p. 760 mm Hg; flash pt. >300 C; pH neutral to litmus

Toxicology: LD50 (oral, rat) > 15.9 g/kg; LD50 (oral, mouse) > 17.8 g/kg; may cause sl. irritation to eyes; no skin irritation from short-term exposure; ing. of sm. amounts are nontoxic; ing. of large amounts can cause GI disturbances including a laxative action

HMIS: Health 0, Flammability 0, Reactivity 0

Storage: Keep container tightly closed and store @ R.T.

Sorbo® 70% Sorbitol Sol’n. USP/FCC [SPI Pharma http://www.spipharma.com]

Chem. Descrip.: Sorbitol sol’n. in water

CAS 50-70-4; EINECS/ELINCS 200-061-5

Uses: Humectant, sugar crystallization in pharmaceuticals; nutritive sweetener

Features: Inert; does not promote tooth decay; slowly absorbed

Regulatory: USP, FCC, FDA 21CFR §184.1835 GRAS

Properties: APHA 10 max., cl. visc. liq.; visc. 110 cps; b.p. 760 mm Hg; flash pt. >300 C; pH neutral to litmus

Toxicology: LD50 (oral, rat) > 15.9 g/kg; LD50 (oral, mouse) > 17.8 g/kg; may cause sl. irritation to eyes; no skin irritation from short-term exposure; ing. of sm. amounts are nontoxic; ing. of large amounts can cause GI disturbances including a laxative action

HMIS: Health 0, Flammability 0, Reactivity 0

Storage: Keep container tightly closed and store

Chem. Descrip.: Trioleyl POE-20 sorbitan ester See Polysorbate 85
CAS 9005-70-3
Uses: Emulsifier for soft capsules, hair creams, milky lotions
Properties: Lt. ylsh. orange oily liq.; HLB 11.0

Chem. Descrip.: Silica
EINECS/ELINCS 231-545-4
Uses: Abrasive, polishing agent, thickener for mfg. of high clarity, med. abrasion transparent toothpaste gels
Properties: APS Malvern Mastersizer (100 mm lens) 8.5 µ particle size; low ref. index; pH 7.0 (5% aq.)
Use Level: 4-15%

Chem. Descrip.: Silica
EINECS/ELINCS 231-545-4
Uses: Abrasive, polishing agent, thickener for mfg. of high clarity, high abrasion transparent toothpaste gels
Properties: APS Malvern Mastersizer (100 mm lens) 4.0 µ particle size; low ref. index; pH 7.0 (5% aq.)

Chem. Descrip.: Silica
EINECS/ELINCS 231-545-4
Uses: Abrasive, polishing agent, thickener for mfg. of high clarity, low abrasion transparent toothpaste gels, e.g., children's formulations
Properties: APS Malvern Mastersizer (100 mm lens) 9.5 µ particle size; low ref. index; pH 7.2 (5% aq.)

Chem. Descrip.: Precipitated silica See Silica, hydrated
CAS 1343-98-2; EINECS/ELINCS 215-683-2
Uses: Abrasive, polishing agent for mfg. of toothpaste with ultra low abrasion, very high clarity gels, children's and antihypersensitivity toothpaste
Properties: Fine lt. powd.; ref. index 1.450; pH 6.5-8.0 (5% aq.)
Use Level: 10-25%
Precaution: Minimize creation of dust and buildup of static elec.
Storage: Store in dry place
Trade Name Reference

nonionic; 100% conc.

Sorgen 40 [Dai-ichi Kogyo Seiyaku
http://www.dks-web.co.jp]
Chem. Descrip.: Sorbitan oleate
CAS 1338-43-8; EINECS/ELINCS 215-665-4
Uses: Antifoamer and emulsifier for pharmaceutical prods.
Properties: Liq.; HLB 4.3; nonionic; 100% conc.

Sorgen 40V [Dai-ichi Kogyo Seiyaku
http://www.dks-web.co.jp]
Chem. Descrip.: Sorbitan monooleate See Sorbitan oleate
EINECS/ELINCS 215-665-4
Uses: Emulsifier for textiles, foods, cosmetics, pharmaceuticals
Properties: Yellowish-brown liquid; fluidity 30°C; HLB 4.3; foaming power (0.1% sol'n) 12 mm immediately @ 25°C, 11 mm in 5 min. @ 25°C; nonionic; 100% conc.

Sorgen 50 [Dai-ichi Kogyo Seiyaku
http://www.dks-web.co.jp]
Chem. Descrip.: Sorbitan stearate
CAS 1338-41-6; EINECS/ELINCS 215-664-9
Uses: Antifoamer and emulsifier for pharmaceutical prods.
Properties: Pellet; HLB 4.7; nonionic; 100% conc.

Sorgen 50V [Dai-ichi Kogyo Seiyaku
http://www.dks-web.co.jp]
Chem. Descrip.: Sorbitan monostearate See Sorbitan stearate
EINECS/ELINCS 215-664-9
Uses: Emulsifier for textiles, foods, cosmetics, pharmaceuticals
Properties: Slightly yellowish brown pellet; HLB 4.7; foaming power (0.1% sol'n) 3 mm immediately @ 25°C, 1 mm in 5 min. @ 25°C; nonionic; 100% conc.

Sorgen 90 [Dai-ichi Kogyo Seiyaku
http://www.dks-web.co.jp]
Chem. Descrip.: Sorbitan laurate
CAS 1338-39-2; EINECS/ELINCS 215-663-3
Uses: Antifoamer and emulsifier for pharmaceutical prods.
Properties: Liq.; HLB 8.6; nonionic; 100% conc.

Sorgen FS-700V [Dai-ichi Kogyo Seiyaku
http://www.dks-web.co.jp]
Chem. Descrip.: Sorbitan monostearate See Sorbitan stearate
EINECS/ELINCS 215-664-9
Uses: Emulsifier for textiles, cosmetics, pharmaceuticals; solubilizer

Properties: White to slightly yellow-brown flakes; HLB 7.0; nonionic; 100% conc.

Sorgen TW60 [Dai-ichi Kogyo Seiyaku
http://www.dks-web.co.jp]
Chem. Descrip.: POE sorbitan stearate
Uses: Solubilizer, emulsifier for cosmetics, pharmaceutical prods.
Properties: Slightly yellowish brown paste; water-sol.; HLB 14.9; nonionic; 100% conc.

Sorgen TW60V [Dai-ichi Kogyo Seiyaku
http://www.dks-web.co.jp]
Chem. Descrip.: POE sorbitan monostearate See Polysorbate 60
CAS 9005-67-8
Uses: Solubilizer, emulsifier for cosmetics, pharmaceutical prods.
Properties: Slightly yellowish brown paste; HLB 15.0; surface tens. (0.1% sol'n) 37.8 mN/m; foaming power (0.1% sol'n) 34 mm immediately @ 25°C, 31 mm in 5 min. @ 25°C; nonionic; 100% conc.

Sorgen TW80 [Dai-ichi Kogyo Seiyaku
http://www.dks-web.co.jp]
Chem. Descrip.: POE sorbitan monooleate See Polysorbate 80
CAS 9005-65-6; EINECS/ELINCS 215-665-4
Uses: Solubilizer and emulsifier for pharmaceutical prods.
Properties: Slightly yellowish brown liquid; water-sol.; HLB 15.0; surface tens. (0.1% sol'n) 37.8 mN/m; foaming power (0.1% sol'n) 40 mm immediately @ 25°C, 38 mm in 5 min. @ 25°C, 45 mm immediately @ 45°C, 40 mm in 5 min. @ 45°C; interfacial tens. (0.1% sol'n) 13.7 mN/m; nonionic; 100% conc.

Sorgen TW80V [Dai-ichi Kogyo Seiyaku
http://www.dks-web.co.jp]
Chem. Descrip.: POE sorbitan monooleate See Polysorbate 80
CAS 9005-65-6; EINECS/ELINCS 215-665-4
Uses: Solubilizer and emulsifier for pharmaceutical prods.
Properties: Yellowish brown liquid; HLB 15.0; surface tens. (0.1% sol'n) 37.2 mN/m; foaming power (0.1% sol'n) 39 mm immediately @ 25°C, 35 mm in 5 min. @ 25°C; nonionic; 100% conc.

SO/SAN® 30M [Stepan
http://www.stepan.com]
Chem. Descrip.: Myristalkonium chloride, quaternium-14 quat.
Uses: Antimicrobial in pharmaceuticals
Features: Provides residual activity against gram-negative and gram-positive organisms
Trade Name Reference

Regulatory: EPA reg. no. 1839-57
Properties: Gardner 3 liq.; dens. 8.20 lb/gal; visc. 700 cps (45 F); pour pt. < 40 F; pH 4 (10% water/IPA); 26.0 - 28.0% act.

Chem. Descrip.: Sorbitan laurate
CAS 1338-39-2; EINECS/ELINCS 215-663-3
Uses: W/o emulsifier, stabilizer, thickener, lubricant, softener for topical pharmaceuticals
Regulatory: EP
Properties: Gardner 3 liq.; dens. 8.20 lb/gal; visc. 700 cps (45 F); pour pt. < 40 F; pH 4 (10% water/IPA); 26.0 - 28.0% act.

Chem. Descrip.: Sorbitan palmitate NF
CAS 26266-57-9; EINECS/ELINCS 247-568-8
Uses: O/w coemulsifier, stabilizer, thickener, lubricant, softener for topical pharmaceuticals
Properties: Tan solid; sol. (@ 1%) in IPA, xylene; sol. (hazy) in perchloroethylene; HLB 6.7; pour pt. 48 C; nonionic; 100% act.

Chem. Descrip.: Sorbitan oleate NF
CAS 1338-43-8; EINECS/ELINCS 215-665-4
Uses: W/o emulsifier for pharmaceutical topicals and injectables
Regulatory: EP, FDA 21CFR 173.75; DOT nonregulated; SARA §311/312/313 nonreportable
Properties: Yel. to amber liq.;sol. (@ 10%) in...
IPA, perchloroethylene, xylene, cottonseed oil, ethanol, min. oil, veg. oil; insol. in acetone, ethylene glycol, propylene glycol, water; sp.gr. 1.0; visc. 1000 cps; vapor pressure < 1 mm Hg (20 C); b.p. > 100 C; HLB 4.3; acid no. 8 max.; sapon. no. 145-160; hyd. no. 193-210; pour pt. ≈ 3 F; flash pt. (COC) > 148.9 C; nonionic; 100% act.; 1-2% water

Use Level: 7.5% max. in final polymer disp.

Toxicology: LD50 (oral, rat) > 39.8 g/kg; relatively harmless by ing.; no hazards are known to be associated with exposure; not likely to cause irritation via eye contact, skin contact, inh., or ing.; not likely to cause irritation via eye contact, skin contact, inh., or ing.; not likely to cause irritation via eye contact, skin contact, inh., or ing.; not likely to cause irritation via eye contact, skin contact, inh., or ing.; not likely to cause irritation via eye contact, skin contact, inh., or ing.; not likely to cause irritation via eye contact, skin contact, inh., or ing.; not likely to cause irritation via eye contact, skin contact, inh., or ing.

Environmental: BOD (28 d) 62 %; LC50 (96 h, static, rainbow trout) > 1000 mg/l

Precaution: Incompat. with oxidizing agents; wear safety goggles with side shields and impervious gloves

Hazardous Decomp. Prods.: Combustion: CO2, CO

HMIS: Health 0, Flammability 1, Reactivity 0

Storage: Store @ 50-90 F in original closed container

Chem. Descrip.: Sorbitan trioleate

Chem. Analysis: 90-100%

CAS 26266-58-0; EINECS/ELINCS 247-569-3

Uses: O/w emulsifier, dispersant, consistency agent, and compatibility agent in pharmaceutical topicals

Regulatory: EP

Properties: Amber liq.; HLB 1.8; nonionic; 100% act.

Toxicology: May cause sl. skin irritation

Precaution: Wear safety glasses with side shields, impervious gloves; incompat. with oxidizers

Hazardous Decomp. Prods.: CO, CO2

NFPA: Health 1, Flammability 1, Reactivity 0

Storage: Store in original container

Chem. Descrip.: Hydrogenated tallow

Chem. Analysis: 90-100%

CAS 8030-12-4; EINECS/ELINCS 232-442-7

Uses: Raw material for pharmaceuticals; hydropobing agent for powd. preps.

Properties: Powd., flakes; m.p. 56-60 C; acid no. 5 max.; iodine no. 3 max.; sapon. no. 190-210

S&P Emulsifying Wax NF [Strahl & Pitsch http://www.strahlpitsch.com]

Chem. Descrip.: Emulsifying wax NF

Chem. Analysis: 90-100%

CAS 97069-99-0

Uses: Consistency improver and stabilizer for emulsions; blending agent for fats and water in pharmaceutical prods.

Features: Vegetable based, highly compatible with most pharmaceutical ingredients

Regulatory: USP/NF

Properties: M.p.50-54 C; iodine no. ≤ 3.5; sapon. no ≤ 14; hyd. no. 178-192; pH 5.5-7.0 (3:100 disp.); nonionic

Toxicology: TSCA listed

Speziol C 10/2 [Cognis http://www.cognis.de]

Chem. Descrip.: 1,10-Decanediol

Chem. Analysis: 90-100%

CAS 112-47-0; EINECS/ELINCS 203-975-2

Uses: Pharmaceuticals

Properties: Colorless pellets; mild odor; solid. pt. 68-73 C; acid no. 0-1.0; iodine no. 0-0.7; sapon. no. 0-3.0; hyd. no. 525-645; 98-100% act.

Storage: 2 yrs. shelf life when stored in sealed original bags below solid. pt.; may become pasty during longer storage
Trade Name Reference

Speziol C 18/2 [Cognis http://www.cognis.de]
Chem. Descrip.: 12-Hydroxystearyl alcohol
CAS 2726-73-0; EINECS/ELINCS 220-342-6
Uses: Pharmaceuticals
Properties: Colorless pellets; mild odor; solid. pt. 61-65 C; acid no. 0-1; iodine no. 0-0.7; sapon. no. 0-2; hyd. no. 345-360; 75-85% act.
Storage: 2 yrs. shelf life when stored in sealed original bags below solid. pt.; may become pasty during longer storage

Chem. Descrip.: Isostearyl alcohol, vegetable based
CAS 27458-93-1; EINECS/ELINCS 248-470-8
Features: Exc. oxidative stability
Properties: APHA 20 max. color; acid no. 0.1 max.; iodine no. 1 max.; sapon. no. 1 max.; hyd. no. 200-212; 0.2% max. water
Storage: 2 yrs. shelf life when stored in sealed original bags below solid. pt.

Spinomar NaSS [Tosoh http://www.tosoh.co.jp]
Chem. Descrip.: Sodium p-styrenesulfonate
CAS 2695-37-6; EINECS/ELINCS 220-266-3
Uses: Remedy for ulcers in pharmaceuticals; artificial biomembranes
Properties: Wh. powd., nil odor; sol. in water; insol. in aliphatic, halogenated, or high alcohol solvs.; m.w. 206.20; apparent sp. dens. 0.5; decomp. pt. 330 C; flash pt. nil; 81.5% act.
Toxicology: LD50 (oral, mouse) 16 g/kg (as 40% olive oil susp.)
Storage: Store in air-tight containers in dark place; if dried, subject to slow oxidation and/or polymerization

Chem. Descrip.: Sucralose
CAS 56038-13-2
Uses: Sweetener in pharmaceuticals
Features: Noncaloric; noncariogenic; made from sugar; approx. 600 times sweeter than sugar; extremely stable; maintains sweetness @ high food processing temps. (pasteurization, sterilization, etc.) and prolonged storage; stable in neutral and acidic prods.
Properties: Free-flowing cryst. powd. or 25% aq. sol'n.; sugar-like taste; water-sol.
Environmental: Biodeg.; nontoxic to fish and aquatic organisms

SPL Heparin Lithium [Scientific Protein Labs http://www.spl-pharma.com]
Chem. Descrip.: Heparin lithium
CAS 9045-22-1; EINECS/ELINCS 232-681-7
Uses: Anticoagulant in medical devices and in vitro laboratory apps. for coatings and as a reagent
Properties: Off-wh. amorphous powd.; hygroscopic; sol. in water
Storage: Preserve in tight containers in cool, dry place

SPL Heparin Sodium USP [Scientific Protein Labs http://www.spl-pharma.com]
Chem. Descrip.: Heparin sodium USP
CAS 9041-08-1; EINECS/ELINCS 232-681-7
Uses: Anticoagulant; pharmaceutical aid; coating agent to prevent coagulation in laboratory apps.
Properties: Wh. amorphous powd.; hygroscopic; sol. in water; pH 5.0-7.5 (1%)
Storage: Preserve in tight containers in cool, dry place

SPL High Lipase Pancreatic Enzyme Conc. (PEC) [Scientific Protein Labs http://www.spl-pharma.com]
Chem. Descrip.: Enzymes, principally lipase, proteases, amylase See Protease
Uses: Enzyme for treatment of pancreatic insufficiency esp. where digestion of lipids is of paramount importance
Properties: Cream-colored amorphous powd., faint char. but not offensive odor; partly sol. in water; insol. in alcohol; ≤ 5% moisture
Storage: Store in tight containers in cool, dry place

SPL Pancreatin 4X USP [Scientific Protein Labs http://www.spl-pharma.com]
Chem. Descrip.: Enzymes, principally proteases, amylase, lipase See Protease
Uses: Enzyme for treatment of pancreatic insufficiency; hydrolyzes fats to glycerol and fatty acids, changes protein into proteoses and derived substances, converts starch to dextrins and sugars
Properties: Cream-colored amorphous powd., faint char. but not offensive odor; partly sol. in water; insol. in alcohol
Storage: Store in tight containers in cool, dry place

SPL Pancreatin 6X USP [Scientific Protein Labs http://www.spl-pharma.com]
Chem. Descrip.: Enzymes, principally proteases, amylase, lipase See Protease
Uses: Enzyme for treatment of pancreatic insufficiency; hydrolyzes fats to glycerol and fatty acids, changes protein into proteoses and derived substances, converts starch to dextrins and sugars
Properties: Cream-colored amorphous powd., faint char. but not offensive odor; partly sol. in water; insol. in alcohol
Storage: Store in tight containers in cool, dry place
Trade Name Reference

proteases, amylase, lipase  See Protease

Uses: Enzyme for treatment of pancreatic insufficiency; hydrolyzes fats to glycerol and fatty acids, changes protein into proteoses and derived substances, converts starch to dextrins and sugars

Properties: Cream-colored amorphous powd., faint char. but not offensive odor; partly sol. in water; insol. in alcohol

Storage: Store in tight containers in cool, dry place

SPL Pancreatin 8X USP  [Scientific Protein Labs  http://www.spl-pharma.com]

Chem. Descrip.: Enzymes, principally proteases, amylase, lipase  See Protease

Uses: Enzyme for treatment of pancreatic insufficiency; hydrolyzes fats to glycerol and fatty acids, changes protein into proteoses and derived substances, converts starch to dextrins and sugars

Properties: Cream-colored amorphous powd., faint char. but not offensive odor; partly sol. in water; insol. in alcohol

Storage: Store in tight containers in cool, dry place

SPL Pancrelipase USP  [Scientific Protein Labs  http://www.spl-pharma.com]

Chem. Descrip.: Enzymes, principally protease

Uses: Enzyme for treatment of pancreatic insufficiency; hydrolyzes fats to glycerol and fatty acids, changes protein into proteoses and derived substances, converts starch to dextrins and sugars

Properties: Cream-colored amorphous powd., faint char. but not offensive odor; partly sol. in water; insol. in alcohol

Storage: Store in tight containers in cool, dry place

Chem. Descrip.: Frozen raw liver

Chem. Analysis: 6% max. loss on drying

Uses: Nutritive pharmaceutical additive in tablets, capsules, and powders; diagnostic applications; taste masking of veterinary foods and drugs

Storage: Store in cool, dry area in tightly closed polyliners within secure containers

Spray Dried Fish Gelatin  [Croda Inc  http://www.croda.com;  http://www.crodausa.com]

Chem. Descrip.: Gelatin NF from fish sources

CAS 9000-70-8; EINECS/ELINCS 232-554-6

Uses: Film-former, stabilizer, binder, protective colloid, adhesive agent, flocculant, crystal inhibitor in pharmaceuticals; film-former, stabilizer, binder in oral and topical pharmaceuticals

Features: Nongelling; inferior gelling chars. to mammalian gelatin

Regulatory: Kosher

Properties: Spray-dried powd.; sol. in cold water; visc. 60-85 mps; pH 5.0-6.5 (10%); 7% max. moisture

Spray Dried Gum Arabic NF/FCC CS-R  [Frutarom  http://www.frutarom.com]

Chem. Descrip.: Gum Arabic  See Acacia

CAS 9000-01-5; EINECS/ELINCS 232-519-5

Uses: Protective colloid, stabilizer, thickener, binder for pharmaceutical emulsions, antiseptics, to mask bitter or acid taste of medicaments, tablet binder, excipient

Properties: Colorless, odorless, tasteless; watersol.

Spray Dried Gum Arabic Type A-180 NF Premium  [Gumix Int'l.]

Chem. Descrip.: Gum Arabic  See Acacia

CAS 9000-01-5; EINECS/ELINCS 232-519-5

Uses: Protective colloid, stabilizer, suspending agent, visc. builder for pharmaceuticals (suspensions, emulsions, cough drops/syrups, tablet binder/adhesive); flavoring agent

Properties: Powd., almost odorless and tasteless; sol. in hot or cold water

Spray Dried Gum Arabic Type A-230 NF Extra  [Gumix Int'l.]

Chem. Descrip.: Gum Arabic  See Acacia

CAS 9000-01-5; EINECS/ELINCS 232-519-5

Uses: Protective colloid, stabilizer, suspending agent, visc. builder for pharmaceuticals (suspensions, emulsions, demulcent in cough drops/syrups, tablet binder/adhesive); flavoring agent

Properties: Powd., almost odorless and tasteless; sol. in hot or cold water

Spray Dried Hydrolysed Fish Gelatin  [Croda Inc  http://www.croda.com;  http://www.crodausa.com]

Chem. Descrip.: Gelatin from fish sources
Chem. Descrip.: Frozen raw liver
Chem. Analysis: 6% max. loss on drying
Uses: Nutritive pharmaceutical additive in foods and drugs
Storage: Store in cool, dry area in tightly closed polyliners within secure containers

Chem. Descrip.: Pregelatinized corn starch NF
Uses: Excipient, binder, disintegrant, lubricant, carrier, sweetness regulator for dry granulation and direct compression of pharmaceutical tablets
Features: Free-flowing; inert; low hygroscopicity
Regulatory: NF
Properties: Neutral flavor

Chem. Descrip.: Pregelatinized corn starch NF
Uses: Excipient, binder, diluent, disintegrant, lubricant for wet granulation of pharmaceutical tablets; regulates sweetness; improves hardness and friability in direct compression tableting
Features: Free-flowing; inert

SR 297 [Sartomer http://www.sartomer.com]
Chem. Descrip.: 1,3-Butylene glycol dimethacrylate with 200 ppm MEHQ. See 1,3-Butanediol dimethacrylate; Hydroquinone monomethyl ether
CAS 1189-08-8; EINECS/ELINCS 214-711-0
Uses: Vulcanizing agent used in dentures
Features: Low visc. difunctional monomer; polymerizes to hard, insol., infusable, thermoset resin; improves resist, to scratching, attack by oils and solvs., heat deformation, hardness
Regulatory: FDA 21CFR §175.105, 176.170 (< 5%), 176.180 (< 5%), 177.1010 (< 5%), 177.2420, 177.2600, 178.3790 (< 5%), 182.99
Properties: APHA 60 straw cl. liq., mildly disagreeable odor; sol. in alcohols, ethers, ketones, esters, aromatic and aliphatic hydrocarbons; m.w. 226; sp.gr. 1.011; dens. 8.4 lb/gal; visc. 7 cps; b.p. 290 C; acid no. 0.5; flash pt. (PMCC) 137 F; ref. index 1.449; 99% reactive esters
Storage: Store away from direct sunlight, oxidizing agents and materials which may generate free radicals; storage temps. should not be > 90 F

Chem. Descrip.: Sorbitan stearate
CAS 1338-41-6; EINECS/ELINCS 215-664-9
Uses: Lipophilic emulsifier for pharmaceutical; dispersant, excipient
Regulatory: Approved as food additive
Properties: Wh. to pale yel. flake; HLB 4.7

SS-99™ Sodium Ascorbate for DC [BASF http://www.basf.com]
Chem. Descrip.: Sodium ascorbate (99%) food starch (1%)
CAS 134-03-2; EINECS/ELINCS 205-126-1
Uses: Dietary supplement in ingestible and chewable vitamin C tablets multivitamin tablets, and multivitamin-mineral tablets by direct compression
Regulatory: USP/FCC
Properties: Yelsh.-wh. fine gran. powd.; almost odorless; sl. salty taste; particle size US Sieve #20 (850 μ) min. 95% thru; m.w. 198.1; ≥ 99% act.
Storage: 24 months shelf-life; store in tightly closed containers @ R.T; protect from light and in a dry place

Chem. Descrip.: Propylene glycol, cyclopentasiloxane, ascorbic acid, PVP, dimethicone copolyol. See L-Ascorbic acid; Cyclomethicone
Uses: Delivery system/stabilizer for vitamin C in skin care emulsions
Properties: Wh. viscous emulsion; visc. 50,000-150,000 cps
Storage: Keep tightly closed before and after use with min. head space and preferably maintained under nitrogen ≤ (20-25 C)

Sta-Lite® 370 [Tate & Lyle N. Am.
Trade Name Reference

http://www.tlna.com
Chem. Descrip.: Polydextrose
CAS 68424-04-4
Uses: Bulking agent in pharmaceuticals
Features: Nonsweet; low-calorie; provides only 1 Kcal/g
Properties: Liq.; water-sol.

Chem. Descrip.: Polydextrose
CAS 68424-04-4
Uses: Bulking agent in pharmaceuticals
Features: Nonsweet; low-calorie; provides only 1 Kcal/g
Properties: Gran.; water-sol.

Chem. Descrip.: Polydextrose
CAS 68424-04-4
Uses: Bulking agent in pharmaceuticals
Features: Nonsweet; low-calorie; provides only 1 Kcal/g
Properties: Fine gran.; water-sol.

Stamere® CK-S NF FCC [Frutarom http://www.frutarom.com]
Chem. Descrip.: Carrageenan See Carrageenan (Chondrus crispus)
CAS 9000-07-1; EINECS/ELINCS 232-524-2
Uses: Lubricant, emollient for pharmaceutical jellies, laxatives; tablet binder
Properties: Water-sol.

Stamere® N-325 NF FCC [Frutarom http://www.frutarom.com]
Chem. Descrip.: Carrageenan See Carrageenan (Chondrus crispus)
CAS 9000-07-1; EINECS/ELINCS 232-524-2
Uses: Lubricant, emollient for pharmaceutical jellies, laxatives; tablet binder
Properties: Water-sol.

Stamere® N-350 NF FCC [Frutarom http://www.frutarom.com]
Chem. Descrip.: Carrageenan See Carrageenan (Chondrus crispus)
CAS 9000-07-1; EINECS/ELINCS 232-524-2
Uses: Lubricant, emollient for pharmaceutical jellies, laxatives; tablet binder
Properties: Water-sol.

Stamere® N-350 S NF FCC [Frutarom http://www.frutarom.com]
Chem. Descrip.: Carrageenan See Carrageenan (Chondrus crispus)
CAS 9000-07-1; EINECS/ELINCS 232-524-2
Uses: Humectant in pharmaceuticals

Standard KCl [Reheis http://www.reheis.com]
CAS 7447-40-7; EINECS/ELINCS 231-211-8
Uses: Functional additive for tablet prod. and parenteral sol’n.

Standard Super-Cel [Celite http://www.worldminerals.com]
Chem. Descrip.: Diatomaceous earth
CAS 7631-86-9; EINECS/ELINCS 231-545-4
Uses: Filler, filter aid, carrier for pharmaceuticals
Properties: Buff/pink powd.; 3.5 µ median pore size; 4% 150 mesh residue; sp.gr. 2.2; dens. 8 lb/ft³ (dry); pH 7; 0.5% moisture

Star Flake® Dendritic Salt [Morton Salt http://www.mortonsalt.com]
Chem. Descrip.: Sodium chloride FCC with crystal modifying agent (sodium ferrocyanide)
Uses: Salt for pharmaceutical powds./tablets
Features: High purity; food-grade; high specific surf. area, rapid dissolution rate/flowability, high liq. adsorptive capacity and caking resist., and low apparent density
Regulatory: Sodium ferrocyanide: FDA 21CFR §172.490
Properties: Porous star-shaped cryst. cubes; 25-45% retained on 70 mesh, 16-38% on 100 mesh; mean crystal size 230 µm; mean surf. area 270 cm²/g; bulk dens. 0.85-0.93 g/ml (loose); 99.9% NaCl

Star™ Glycerine USP, FCC [Procter & Gamble http://pgchemicals.com]
Chem. Descrip.: Glycerin USP (96% min.) in water
CAS 56-81-5; EINECS/ELINCS 200-289-5
Uses: Humectant in pharmaceuticals
Regulatory: USP/FCC, DOT/ADR/RID/IMDG/ICAO/IATA not regulated; Canada DSL; Japan; Australia;
Trade Name Reference

Chem. Descrip.: Glycerin USP (96% min.) in water
CAS 56-81-5; EINECS/ELINCS 200-289-5
Uses: Humectant in pharmaceuticals; emulsifier, emollient, plasticizer, sweetener in drugs, food products; intermediate for making glycerol derivatives
Regulatory: USP/FCC, EP, DOT/ADR/RID/IMDG/ICAO/IATA not regulated; Canada DSL; Japan; Australia; Philippines; China; Korea
Properties: APHA 10 max. cl. visc. liq.; bland odor; sweet taste; completely sol. in water; misc. with ethanol; sl. sol. in acetone; insol. in ether, chloroform; sp.gr. 1.2517-1.2531; visc. ≈ 1410 mPa•s; vapor pressure < 0.1 mm Hg; b.p. > 288 C; flash pt. (PMCC) > 198.9 C; auto-ignition temp. ≈ 393 C; 4% max. moisture
Toxicology: LD50 (oral, rat) > 2 g/kg; may cause mild, transient eye irritation; TSCA listed

Precaution: Incompat. with strong oxidizers, strong acids
Hazardous Decomp. Prods.: Thermal reaction may release acrolein
Storage: Store in clean, tight containers to prevent moisture pickup from air; can be stored in aluminum, stainless steel, fiberglass or resin lined steel vessels

Chem. Descrip.: Glycerin USP (96% min.) in water
CAS 56-81-5; EINECS/ELINCS 200-289-5
Uses: Humectant in pharmaceuticals; emulsifier, emollient, plasticizer, sweetener in drugs, food products; intermediate for making glycerol derivatives

StarCap® 1500 [Colorcon http://www.colorcon.com]
Chem. Descrip.: Pregelatinized starch and corn starch See Corn (Zea mays) starch; Starch, pregelatinized
Chem. Analysis: 7% max. moisture
CAS 977050-93-3; 9005-25-8
Trade Name Reference

**Starch 1500®** [Colorcon http://www.colorcon.com]
Chem. Descrip.: Pregelatinized starch See Starch, pregelatinized
CAS 977050-93-3
Uses: Excipient, binder, disintegrant, lubricant for pharmaceutical solid oral dosage forms, direct compaction, wet granulation; capsule filler; flow aid for HPMC matrix formulations
Features: Good wet and dry binding; good disintegration/dissolution
Regulatory: USP/NF, EP
Properties: Bulk dens. 0.619 g/cc

**Starch 1500® G** [Colorcon http://www.colorcon.com]
Chem. Descrip.: Pregelatinized starch See Starch, pregelatinized
CAS 977050-93-3
Uses: Excipient, binder, disintegrant, lubricant for pharmaceutical solid oral dosage forms, direct compaction, wet granulation; capsule filler; flow aid for HPMC matrix formulations
Features: Low moisture; good wet and dry binding; good disintegration/dissolution
Regulatory: USP/NF, EP
Properties: Wh. powd., free of objectionable odor, sl. char. taste; 0.5% max. on 80 mesh, 5% max. on 325 mesh; pH 64.5-7.0.0; 9.5-12.5% moisture

**Starch 400L NF** [Roquette http://www.roquette.fr]
Chem. Descrip.: Corn starch See Corn (Zea mays) starch

**Starlac™** [Roquette http://www.roquette.fr]
Chem. Descrip.: α-Lactose monohydrate
USP/NF/Ph.Eur. (85%) and corn starch USP, Ph.Eur. (15%) See Corn (Zea mays) starch; Lactose monohydrate
CAS 10039-26-6; 9005-25-8; EINECS/ELINCS 200-559-2; 232-679-6
Uses: Direct compression agent, disintegrant for all direct compression apps., low-dosage formulations, capsule filling, cores for coating, homeopathic formulations
Features: Exc. tablet hardness and flowability
Regulatory: USP/NF, EP
Properties: Spray-dried compd.; ≤ 15% < 32 µm particle size, 35-65% < 160 µm, ≥ 80% < 250 µm; dens. 0.57 g/ml (poured), 0.69 g/ml (tapped)

**Sta-Rx® NF** [Tate & Lyle UK http://www.tateandlyle.com]
Chem. Descrip.: Corn starch NF See Corn (Zea mays) starch
CAS 9005-25-8; EINECS/ELINCS 232-679-6
Uses: Filler, absorbent, diluent, disintegrant in pharmaceutical tablets and powds.; binder in tablet wet granulations
Regulatory: FDA 21CFR §172.892; meets specs for food starch modified
Properties: Wh. powd., free of objectionable odor, sl. char. taste; 0.5% max. on 80 mesh, 5% max. on 325 mesh; pH 64.5-7.0.0; 9.5-12.5% moisture

**Stearico 92-95%** [Undesa http://www.undesa.com; S. Black http://www.sblack.com]
Chem. Descrip.: Stearic acid
CAS 57-11-4; EINECS/ELINCS 200-313-4
Uses: Emollient in pharmaceuticals
Environmental: Biodeg. (28 d) > 90%
Precaution: Wear gloves, goggles, overall skin protection; avoid entry to sewers, drain and surface water
Storage: Store @ R.T. in original sealed container protected from heat sources
**Trade Name Reference**

**STEOL® CA-130** [Stepan http://www.stepan.com]
Chem. Descrip.: Ammonium laureth sulfate
CAS 32612-48-9
Uses: Surfactant, foaming agent, visc. modifier for topical pharmaceuticals
Features: For low pH systems
Properties: Liq.; anionic; 26% conc.
Toxicology: Low skin irritation

**STEOL® CA-230D** [Stepan http://www.stepan.com]
Chem. Descrip.: Ammonium laureth sulfate
CAS 32612-48-9
Uses: Surfactant, foaming agent, visc. modifier for topical pharmaceuticals
Features: For low pH systems
Properties: Liq.; anionic; 25% conc.
Toxicology: Low skin irritation

**STEOL® CA-330** [Stepan http://www.stepan.com]
Chem. Descrip.: Ammonium laureth sulfate
CAS 32612-48-9
Uses: Surfactant, foaming agent, visc. modifier for topical pharmaceuticals
Features: For low pH systems
Properties: Liq.; anionic; 27-29% conc.
Toxicology: Mild to skin irritation

**STEOL® CA-460** [Stepan http://www.stepan.com]
Chem. Descrip.: Ammonium laureth sulfate
CAS 32612-48-9
Uses: Detergent, emulsifier, foaming agent, dispersant, visc. modifier, and wetting agent in pharmaceuticals
Properties: Pale yel. liq.; water-sol.; sp.gr. 1.016; visc. 67 cps; cloud pt. 19 C; pH 7.0; anionic; 60% conc.

**STEPAN® 653** [Stepan http://www.stepan.com]
Chem. Descrip.: Cetyl palmitate
CAS 540-10-3; EINECS/ELINCS 208-736-6
Uses: Emollient, thickener, visc. builder for pharmaceutical creams and lotions; base material for stick prods.
Features: Syn. spermaceti wax
Properties: Wh. flakes; sol. in boiling alcohol, ether, chloroform, other waxes, oils, hydrocarbons; insol. in water; m.p. 51-55 C; acid no. 2.0 max.; sapon. no. 109-117; nonionic

**STEPAN® GDS 386F** [Stepan http://www.stepan.com]
Chem. Descrip.: Glyceryl distearate
CAS 1323-87-3; EINECS/ELINCS 215-359-0
Uses: Emulsifier, opacifier, bodying agent for pharmaceuticals
Features: Food-grade
Properties: Pale yel. liq.; water-sol.; sp.gr. 1.016; visc. 67 cps; cloud pt. 19 C; pH 7.0; anionic; 60% conc.

**STEPAN® GMS 63F** [Stepan http://www.stepan.com]
Chem. Descrip.: Glyceryl monostearate (35-45 %), glyceryl distearate (50-60 %), and glycerin (1-2 %) See Glyceryl stearate
CAS 123-94-4; 1323-83-7; 56-81-5; EINECS/ELINCS 204-664-4; 215-359-0; 200-289-5
Uses: Emulsifier and emollient for pharmaceutical creams and lotions
Regulatory: DSL listed
Properties: Wh. to off-wh. waxy flake, typ. mild fatty odor; insol. in water; sol. in IPA, min. oil; partly sol. in peanut oil; m.p. 56-59 C; HLB 2.4; acid no. 5.0 max.; sapon. no. 182-188; flash pt. (COC) 450 F; nonionic; 100% conc.
Toxicology: LD50 (oral, rat) 12600 mg/kg; LD50 (dermal, rabbit) >10 g/kg; ACGIH TWA 10 mg/m³; may cause irritation to the eyes, skin, and respiratory system; not expected to be a primary skin irritant; inh. of vapors or mists of the product may be irritating to the respiratory system; ing. of large amounts may produce GI disturbances including irritation, nausea, and diarrhea; TSCA listed
Environmental: Biodeg.; 0% RVOC
Precaution: Wear gloves, dust mask, and safety goggles; may react with strong oxidizing agents
Storage: Store in sealed containers and kept in a cool, dry place; avoid prolonged storage at > 90 F

**STEPAN® GMS 63F** [Stepan http://www.stepan.com]
Chem. Descrip.: Glyceryl stearate
CAS 123-94-4; EINECS/ELINCS 204-664-4
Uses: Emulsifier and emollient in pharmaceutical creams and lotions
Properties: Wh. to off-wh. flake; insol. in water; sol. in IPA and mineral oil; partly sol. in peanut oil; sp. gr. 0.973; m.p. 58 C; b.p. 150 C; acid no. 0.70; sapon. no. 176; pH 210 C; nonionic; HLB 3.8; >99% act.
Toxicology: LD50 (oral, rat) 12600 mg/kg; LD50 (dermal, rabbit) >10 g/kg; ACGIH TWA 10 mg/m³; may cause irritation to the eyes, skin, and respiratory system; not expected to be a primary skin irritant; inh. of vapors or mists of the product may be irritating to the respiratory system; ing. of large amounts may produce GI disturbances including irritation, nausea, and diarrhea; TSCA listed
Environmental: Biodeg.; 0% RVOC
Precaution: Wear gloves, dust mask, and safety goggles; may react with strong oxidizing agents
Storage: Store in sealed containers and kept in a cool, dry place; avoid prolonged storage at > 90 F
Trade Name Reference

sapon. no. 176; flash pt. 210 C; nonionic; > 99%
Toxicology: LD50 > 5g/kg; pract. nontoxic
Environmental: Biodegrad.; RVOC 0%
Precaution: Wear dust mask, safety goggles, and gloves; avoid prolonged contact with eyes and skin

STEPAN® GMS Pure [Stepan http://www.stepan.com]
Chem. Descrip.: Glyceril stearate
CAS 123-94-4
Uses: Emollient, emulsifier, opacifier, bodying agent for pharmaceutical topical creams, lotions, ointments, antiperspirants
Properties: Wh. flakes, typ. mild fatty odor; insol. in water; sol. in IPA, min. oil; partly sol. in peanut oil; m.p. 56.5-58.5 C; HLB 3.8; acid no. 3.0; iodine no. 0.5 max.; sapon. no. 168-176; flash pt. (COC) 410 F; nonionic; 100% act.

STEPAN® IPM-NF [Stepan http://www.stepan.com]
Chem. Descrip.: Isopropyl myristate NF
CAS 110-27-0; EINECS/ELINCS 203-751-4
Uses: Solvent, emollient, feel enhancer, hair conditioner, solubilizer, blending agent for pharmaceutical topical preps.
Regulatory: NF
Properties: Cl. liq.; sol. in IPA, min. oil, peanut oil; insol. in water; sp.gr. 0.8534 g/ml; dens. 0.85 g/ml; visc. 4.5 cps (25 C); m.p. -3 C; b.p. 163 C; acid no. 0.24; iodine no. 0.19; sapon. no. 208; pour pt. 6 C; cloud pt. 4 C; flash pt. (COC) 152 C; ref. index 1.433 (25 C); pH 4.5 min. (10%); 99.9% act.
Toxicology: LD50 (oral, mouse) 49,700 mg/kg, (skin, rabbit) 5 g/kg; may be irritating to eyes, respiratory system; prolonged or excessive skin contact may cause mild skin irritation; TSCA listed
Environmental: Biodeg.
Storage: Store in sealed containers in cool, dry place; avoid prolonged storage above 32 C; avoid overheating or freezing

STEPAN® PEG 200 DO [Stepan http://www.stepan.com]
Chem. Descrip.: PEG-4 dioleate
CAS 9005-07-6
Uses: Emulsifier, thickener, solubilizer, emollient, lubricant, opacifier, spreading agent, pigment wetting agent/dispersant for pharmaceuticals (ointments, suppositories), creams, lotions
Regulatory: FDA 21CFR §175.105, 175.300, 175.170, 175.200, 177.1210, 177.2260, 177.2800; Europe, Canada, Australia, Philippines, Korea, Japan listed
Properties: Amber liq.; sol. in naphtha, kerosene, IPA, acetone, CCl4, ethyl acetate, toluol, IPM, min. oil, peanut oil, wh. oil; water-disp.; sp.gr. 0.941; dens. 7.85 lb/gal; dens. 7.9 lb/gal; f.p. < -15 C; HLB 5.0; acid no. 7.4; sapon. no. 153; pH 5.0 (3%); cloud pt. < 5 C; flash pt. (COC) 285 C; nonionic
Toxicology: Pract. nontoxic orally; causes skin and no eye irritation; avoid eye contact, prolonged skin contact; TSCA listed
Environmental: Biodeg.
Storage: Store in sealed containers in cool, dry place; avoid prolonged storage above 32 C; avoid overheating or freezing

STEPAN® PEG 400 DL [Stepan http://www.stepan.com]
Chem. Descrip.: PEG-4 dilaurate
CAS 9005-02-1
Uses: Emulsifier, thickener, solubilizer, emollient, lubricant, opacifier, spreading agent, wetting agent, dispersant for pharmaceuticals (ointments, suppositories), creams, lotions
Regulatory: FDA 21CFR §175.105, 176.170, 176.180, 176.200, 176.210, 177.1200; Europe, Japan, Canada, Australia, Korea listed
Properties: Lt. yel. liq.; typ. mild fatty odor; sol. in IPA, acetone, CCl4, ethyl acetate, toluol, IPM, min. oil, peanut oil, wh. oil; water-disp.; sp.gr. 0.952; dens. 7.93 lb/gal; dens. 7.9 lb/gal; f.p. < 9C; b.p. 150 C; HLB 5.9; acid no. 9.0; sapon. no. 168-176; flash pt. (COC) 410 F; nonionic; 100% act.
Toxicology: LD50 (oral) > 10 g/kg; pract. nontoxic orally; causes mild skin and pract. no eye irritation; avoid eye contact, prolonged skin contact; TSCA listed
Environmental: Biodeg.
Storage: Store in sealed containers in cool, dry place; avoid prolonged storage above 32 C; avoid overheating or freezing

STEPAN® PEG 200 DL [Stepan http://www.stepan.com]
Chem. Descrip.: PEG-4 dilaurate
CAS 9005-02-1
Uses: Emulsifier, thickener, solubilizer, emollient, lubricant, opacifier, spreading agent, pigment wetting agent/dispersant for pharmaceuticals (ointments, suppositories), creams, lotions
Regulatory: FDA 21CFR §175.105, 175.300, 175.170, 175.200, 177.1210, 177.2260, 177.2800; Europe, Canada, Australia, Philippines, Korea, Japan listed
Properties: Lt. yel. liq.; typ. mild fatty odor; sol. in IPA, acetone, CCl4, ethyl acetate, toluol, IPM, min. oil, peanut oil, wh. oil; water-disp.; sp.gr. 0.952; dens. 7.93 lb/gal; dens. 7.9 lb/gal; f.p. < 9C; b.p. 150 C; HLB 5.9; acid no. 9.0; sapon. no. 168-176; flash pt. (COC) 410 F; nonionic; 100% act.
Toxicology: LD50 (oral) > 10 g/kg; pract. nontoxic orally; causes mild skin and pract. no eye irritation; avoid eye contact, prolonged skin contact; TSCA listed
Environmental: Biodeg.
Storage: Store in sealed containers in cool, dry place; avoid prolonged storage above 32 C; avoid overheating or freezing

STEPAN® PEG 400 DL [Stepan http://www.stepan.com]
Chem. Descrip.: PEG-4 dilaurate
CAS 9005-02-1
Uses: Emulsifier, thickener, solubilizer, emollient, lubricant, opacifier, spreading agent, wetting agent, dispersant for pharmaceuticals (ointments, suppositories), creams, lotions
Regulatory: FDA 21CFR §175.105, 176.170, 176.180, 176.200, 176.210, 177.1200; Europe, Japan, Canada, Australia, Korea listed
Properties: Lt. yel. liq.; typ. mild fatty odor; sol. in IPA, acetone, CCl4, ethyl acetate, toluol, IPM, min. oil, peanut oil, wh. oil; water-disp.; sp.gr. 0.952; dens. 7.93 lb/gal; dens. 7.9 lb/gal; f.p. < 9C; b.p. 150 C; HLB 5.9; acid no. 9.0; sapon. no. 168-176; flash pt. (COC) 410 F; nonionic; 100% act.
Toxicology: LD50 (oral) > 10 g/kg; pract. nontoxic orally; causes mild skin and pract. no eye irritation; avoid eye contact, prolonged skin contact; TSCA listed
Environmental: Biodeg.
Storage: Store in sealed containers in cool, dry place; avoid prolonged storage above 32 C; avoid overheating or freezing
Trade Name Reference

CHEM. DESCRIPT.: PEG-8 dilaurate
CAS 9005-02-1
Uses: Emulsifier, thickener, solubilizer, emollient, opacifier, spreading agent, wetting agent, dispersant for pharmaceuticals (ointments, suppositories), creams, lotions
Properties: Lt. yel. liq.; sol. in naphtha, IPA, acetone, CCl₄, ethyl acetate, toluol, IPM, peanut oil; water-disp.; sp.gr. 0.990; dens. 8.3 lb/gal; f.p. 18 C; HLB 9.8; acid no. 10.0 max.; sapon. no. 127-137; flash pt. (COC) 480 F; nonionic

STEPAN® PEG 400 DO [Stepan]
CHEM. DESCRIPT.: PEG-8 dioleate
CAS 9005-07-7
Uses: Emulsifier, thickener, solubilizer, emollient, opacifier, spreading agent, wetting agent, dispersant for pharmaceuticals (ointments, suppositories), creams, lotions
Properties: Lt. amber liq.; sol. in naphtha, IPA, acetone, CCl₄, ethyl acetate, toluol, IPM, peanut oil; water-disp.; sp.gr. 0.977; dens. 8.1 lb/gal; f.p. < 7 C; HLB 8.5; acid no. 10.0 max.; sapon. no. 113-122; pH 5.0; flash pt. (COC) 475 F; nonionic

STEPAN® PEG 400 DS [Stepan]
CHEM. DESCRIPT.: PEG-8 distearate
CAS 9005-08-7
Uses: Emulsifier, thickener, solubilizer, emollient, conditioner, opacifier, spreading agent, wetting agent, dispersant for pharmaceuticals (ointments, suppositories), creams, lotions
Properties: Lt. yel. to yel. solid; typ. mild waxy odor; sol. in naphtha, IPA, acetone, CCl₄, ethyl acetate, toluol, IPM, min. oil, peanut oil, wh. oil; water-disp.; sp.gr. 0.977; dens. 8.1 lb/gal; f.p. < 7 C; HLB 8.5; acid no. 10.0 max.; sapon. no. 113-122; pH 5.0; flash pt. (COC) 520 F; nonionic

STEPAN® PEG 400 ML [Stepan]
CHEM. DESCRIPT.: PEG-8 laurate
CAS 9004-81-3
Uses: Emulsifier, thickener, solubilizer, emollient, opacifier, spreading agent, wetting agent, dispersant for pharmaceuticals (ointments, suppositories), creams, lotions
Properties: Lt. yel. liq.; sol. in water, IPA, acetone, CCl₄, ethyl acetate, toluol; sp.gr. 1.028; dens. 8.6 lb/gal; f.p. < 10 C; HLB 13.1; acid no. 5.0 max.; sapon. no. 86-96; flash pt. (COC) 475 F; nonionic

STEPAN® PEG 400 MO [Stepan]
CHEM. DESCRIPT.: PEG-8 oleate (100%)
CAS 9004-96-0
Uses: Emulsifier, thickener, solubilizer, emollient, opacifier, spreading agent, wetting agent, dispersant for pharmaceuticals (ointments, suppositories), sunscreens
Properties: Lt. amber liq.; sol. in IPA, acetone, CCl₄, ethyl acetate, toluol; water-disp.; sp.gr. 1.013; dens. 8.4 lb/gal; f.p. < 10 C; HLB 11.4; acid no. 5.0 max.; sapon. no. 80-89; pH 5.0 (3% disp.); flash pt. (COC) 510 F; nonionic
Toxicology: LD₅₀ (oral, rat) > 15 g/kg; may cause mild eye, skin, respiratory system irritation; ing. of large amounts may produce GI disturbances

Environmental: Biodeg.
Precaution: Wear safety glasses, chemical goggles, impervious gloves; combustible; incompat. with strong oxidizers, alkalis
NFPA: Health 1, Flammability 1, Reactivity 0
Storage: Keep container tightly closed in cool, dry, well-ventilated place; avoid freezing, excessive heat

STEPAN® PEG 400 MS [Stepan]
CHEM. DESCRIPT.: PEG-8 stearate
CAS 9004-99-3
Uses: Emulsifier, thickener, solubilizer, emollient, conditioner, opacifier, spreading agent, wetting agent, dispersant for pharmaceuticals (ointments, suppositories), creams, lotions
Toxicology: LD₅₀ (oral) > 10 g/kg; pract. nontoxic orally; causes mild skin and no eye irritation; avoid eye contact, prolonged skin contact; TSCA listed

Environmental: Biodeg.
Storage: Store in sealed containers in cool, dry place; avoid prolonged storage above 32 C; avoid overheating

Environmental: Biodeg.
Storage: Store in sealed containers in cool, dry place; avoid prolonged storage above 32 C; avoid overheating

STEPAN® PEG 400 ML [Stepan]
CHEM. DESCRIPT.: PEG-8 laurate
CAS 9004-81-3
Uses: Emulsifier, thickener, solubilizer, emollient, opacifier, spreading agent, wetting agent, dispersant for pharmaceuticals (ointments, suppositories), creams, lotions
Properties: Lt. yel. liq.; sol. in water, IPA, acetone, CCl₄, ethyl acetate, toluol; sp.gr. 1.028; dens. 8.6 lb/gal; f.p. < 10 C; HLB 13.1; acid no. 5.0 max.; sapon. no. 86-96; flash pt. (COC) 475 F; nonionic

STEPAN® PEG 400 MO [Stepan]
CHEM. DESCRIPT.: PEG-8 oleate (100%)
CAS 9004-96-0
Uses: Emulsifier, thickener, solubilizer, emollient, opacifier, spreading agent, wetting agent, dispersant for pharmaceuticals (ointments, suppositories), sunscreens
Properties: Lt. amber liq.; sol. in IPA, acetone, CCl₄, ethyl acetate, toluol; sp.gr. 1.013; dens. 8.4 lb/gal; f.p. < 10 C; HLB 11.4; acid no. 5.0 max.; sapon. no. 80-89; pH 5.0 (3% disp.); flash pt. (COC) 510 F; nonionic
Toxicology: LD₅₀ (oral, rat) > 15 g/kg; may cause mild eye, skin, respiratory system irritation; ing. of large amounts may produce GI disturbances

Environmental: Biodeg.
Precaution: Wear safety glasses, chemical goggles, impervious gloves; combustible; incompat. with strong oxidizers, alkalis
NFPA: Health 1, Flammability 1, Reactivity 0
Storage: Keep container tightly closed in cool, dry, well-ventilated place; avoid freezing, excessive heat

STEPAN® PEG 400 MS [Stepan]
CHEM. DESCRIPT.: PEG-8 stearate
CAS 9004-99-3
Uses: Emulsifier, thickener, solubilizer, emollient, conditioner, opacifier, spreading agent, wetting agent, dispersant for pharmaceuticals (ointments, suppositories), creams, lotions
Toxicology: LD₅₀ (oral) > 10 g/kg; pract. nontoxic orally; causes mild skin and no eye irritation; avoid eye contact, prolonged skin contact; TSCA listed
Trade Name Reference

**Regulatory:** FDA 21CFR §175.300, 176.170, 176.200, 176.210, 177.1200, 177.2800; Europe, Canada, Australia, Korea, Japan listed

**Properties:** Lt. yel. to yel. solid; sol. in IPA, acetone, CCl₄, ethyl acetate, toluol; sl. sol. in min. oil, peanut oil; water-disp.; sp.gr. 0.9780 (65 C); dens. 8.16 lb/gal (65 C); HLB 11.7; m.p. 32 C; acid no. 3.5; sapon. no. 88; pH 5.0 (3% disp.); cloud pt. < 5 C; flash pt. (COC) 249 C; nonionic

**Toxicology:** LD50 (oral) > 10 g/kg; pract. nontoxic orally; causes mod. skin and no eye irritation; avoid eye contact, prolonged skin contact; TSCA listed

**Environmental:** Biodeg.

**Storage:** Store in sealed containers in cool, dry place; avoid prolonged storage above 32 C; avoid overheating

**STEPAN® PEG 600 DL** [Stepan http://www.stepan.com]

**Chem. Descrip.:** PEG-12 dilaurate

**CAS 9005-02-1**

**Uses:** Emulsifier, thickener, solubilizer, emollient, opacifier, spreading agent, wetting agent, dispersant for pharmaceuticals (ointments, suppositories), creams, lotions

**Regulatory:** Europe, Japan, Canada, Australia, Korea listed

**Properties:** Yel. to lt. amber soft solid; typ. mild fatty odor; sol. in IPA, acetone, CCl₄, ethyl acetate, toluol, IPM, peanut oil; water-disp.; insol. in min. oil; sp.gr. 0.981 (65 C); dens. 8.19 lb/gal (65 C); m.p. 24 C; b.p. 150 C; HLB 11.7; acid no. 5; iodine no. 4; sapon. no. 107; cloud pt. 30 C; flash pt. (COC) 240 C; 0% RVOC; nonionic; 100% act.

**Toxicology:** Avoid eye contact, prolonged skin contact; TSCA listed

**Environmental:** Biodeg.

**Storage:** Store in sealed containers in cool, dry place; avoid prolonged storage above 32 C; avoid overheating or freezing

**STEPAN® PEG 600 DO** [Stepan http://www.stepan.com]

**Chem. Descrip.:** PEG-12 dioleate

**CAS 9005-07-6; EINECS/ELINCS 288-459-5**

**Uses:** Emulsifier, thickener, solubilizer, emollient, opacifier, spreading agent, wetting agent, dispersant for pharmaceuticals (ointments, suppositories), creams, lotions

**Regulatory:** Europe, Canada, Japan, Australia listed

**Properties:** Yel. to lt. amber liq.; typ. mild fatty odor; sol. in IPA, acetone, CCl₄, ethyl acetate, toluol, IPM, peanut oil; water-disp.; insol. in min. oil; sp.gr. 1.002; dens. 8.34 lb/gal; m.p. 19 C; b.p. 150 C; HLB 10.6; acid no. 5; iodine no. 42; sapon. no. 97; pH 5.0 (3% disp.); cloud pt. 10 C; flash pt. (COC) 256 C; 0% RVOC; nonionic

**Toxicology:** Avoid eye contact, prolonged skin contact; TSCA listed

**Environmental:** Biodeg.

**Storage:** Store in sealed containers in cool, dry place; avoid prolonged storage above 32 C; avoid overheating or freezing

**STEPAN® PEG 600 DS** [Stepan http://www.stepan.com]

**Chem. Descrip.:** PEG-12 distearate

**CAS 9005-08-7**

**Uses:** Emulsifier, thickener, solubilizer, emollient, conditioner, opacifier, spreading agent, wetting agent, dispersant for pharmaceuticals (ointments, suppositories), creams, lotions

**Regulatory:** Europe, Canada, Japan, Australia listed

**Properties:** Yel. to lt. amber soft solid; sol. in IPA, min. oil, acetone, CCl₄, ethyl acetate, toluol, IPM, peanut oil; water-disp.; sp.gr. 0.9670 (65 C); dens. 8.07 lb/gal; m.p. 39 C; b.p. 150 C; HLB 10.7; acid no. 7.4; sapon. no. 97.5; pH 5.0 (3% disp.); cloud pt. < 5 C; flash pt. (COC) 254 C; 0% RVOC; nonionic; 100% act.

**Toxicology:** LD50 (oral) > 10 g/kg; pract. nontoxic orally; causes mild skin and minimal eye irritation; avoid eye contact, prolonged skin contact

**Environmental:** Biodeg.

**Storage:** Store in sealed containers in cool, dry place; avoid prolonged storage above 32 C

**STEPAN® PEG 600 ML** [Stepan http://www.stepan.com]

**Chem. Descrip.:** PEG-12 laurate

**CAS 9004-81-3**

**Uses:** Emulsifier, thickener, solubilizer, emollient, conditioner, opacifier, spreading agent, wetting agent, dispersant for pharmaceuticals (ointments, suppositories), creams, lotions

**Regulatory:** FDA 21CFR §175.105, 175.300, 175.1200, 175.2800; Europe, Japan, Canada, Australia, Korea listed

**Properties:** Yel. to lt. amber liq.; typ. mild fatty odor; sol. in IPA, acetone, CCl₄, ethyl acetate, toluol, IPM, peanut oil; water-disp.; insol. in min. oil; sp.gr. 1.002; dens. 8.34 lb/gal; m.p. 19 C; b.p. 150 C; HLB 10.6; acid no. 5; iodine no. 42; sapon. no. 97; pH 5.0 (3% disp.); cloud pt. 10 C; flash pt. (COC) 256 C; 0% RVOC; nonionic

**Toxicology:** Avoid eye contact, prolonged skin contact; TSCA listed

**Environmental:** Biodeg.

**Storage:** Store in sealed containers in cool, dry place; avoid prolonged storage above 32 C
**Trade Name Reference**

**Properties:** Yel. liq.; sol. in water, Na$_2$SO$_4$, IPA, acetone, CCl$_4$, ethyl acetate, toluol; sl. sol. in peanut oil; insol. in min. oil; sp.gr. 1.050; dens. 8.75 lb/gal (65 C); m.p. 23 C; HLB 14.6; acid no. 4.0; sapon. no. 69; cloud pt. 68 C; flash pt. (COC) 247 C; nonionic; 100% act.

**Toxicology:** LD$_{50}$ (oral) > 10 g/kg; pract. nontoxic orally; causes minimal skin and eye irritation; avoid eye contact, prolonged skin contact; TSCA listed

**Environmental:** Biodeg.

**Storage:** Store in sealed containers in cool, dry place; avoid prolonged storage above 32 C; avoid overheating

**STEPAN® PEG 6000 DS** [Stepan](http://www.stepan.com)

**Chem. Descrip.:** PEG-150 distearate

**CAS:** 9005-08-7

**Uses:** Emulsifier, thickener, solubilizer, emollient, opacifier, spreading agent, wetting agent, dispersant for pharmaceuticals (ointments, suppositories), creams, lotions

**Properties:** Cream wax; sol. in propylene glycol, Na$_2$SO$_4$ (5%), IPA, acetone, CCl$_4$, ethyl acetate, toluol; sp.gr. 1.075 (65 C); HLB 18.4; m.p. 55 C; acid no. 9.0 max.; sapon. no. 14-20; pH 5.0 (3% disp.); flash pt. (COC) 475 F; nonionic; 100% act.

**Toxicology:** LD$_{50}$ (oral) > 5 g/kg; pract. nontoxic orally; causes sl. skin and minimal eye irritation; avoid inhaling dust

**Environmental:** Biodeg.

**Storage:** Store in sealed containers in cool, dry place; avoid prolonged storage above 32 C; avoid overheating

**STEPAN® PEG 6000 MS** [Stepan](http://www.stepan.com)

**Chem. Descrip.:** PEG-150 stearate

**CAS:** 9004-99-3

**Uses:** Emulsifier, thickener, solubilizer, emollient, opacifier, spreading agent, wetting agent, dispersant for pharmaceuticals (ointments, suppositories), creams, lotions

**Properties:** Wh. to off-wh. flakes; sol. in water, propylene glycol, Na$_2$SO$_4$ (5%), IPA, acetone, CCl$_4$, ethyl acetate, toluol; insol. in min. oil, peanut oil; sp.gr. 1.080 (65 C); dens. 9.1 lb/gal; HLB 19.1; m.p. 60 C; acid no. 1.4; sapon. no. 10; pH 5.0 (3% disp.); cloud pt. > 100 C; flash pt. (COC) 247 C; nonionic

**Toxicology:** LD$_{50}$ (oral) > 10 g/kg; pract. nontoxic orally; causes minimal skin and practically no eye irritation; avoid inhaling dust, eye contact, prolonged skin contact; TSCA listed

**Environmental:** Biodeg.

**Storage:** Store in sealed containers in cool, dry place; avoid prolonged storage above 32 C; avoid overheating

**STEPAN® PGMS Pure** [Stepan](http://www.stepan.com)

**Chem. Descrip.:** Propylene glycol stearate

**CAS:** 1323-39-3; EINECS/ELINCS 215-354-3

**Uses:** Emulsifier, emollient, and opacifier in creams, lotions, suppositories

**Features:** M.p. near body temp.

**Regulatory:** Europe, Japan, Canada, Australia listed

**Properties:** Wh. to off-wh. flakes, typ. mild fatty odor; insol. in water; sol. in IPA, min. oil, peanut oil; dens. 7.8 lb/gal (molten); m.p. 36.7 C; b.p. > 150 C; HLB 3.4; iodine no. 0.5 max.; sapon. no. 182.5; flash pt. (COC) 4 C; nonionic; 99.7% solids

**Toxicology:** LD$_{50}$ (oral) > 5 g/kg; pract. nontoxic orally; causes sl. skin and minimal eye irritation; avoid inhaling dust

**Environmental:** Biodeg.

**Storage:** Store in sealed containers in cool, dry place; avoid prolonged storage above 32 C; avoid overheating

**STEPAN® SAB-2** [Stepan](http://www.stepan.com)

**Chem. Descrip.:** Distearyl phthalic acid amide

**Use:** Surfactant for pharmaceuticals; emulsifier, suspending agent for triglycerides, min. oil, and silicones

**Properties:** Flakes

**Toxicology:** Nontoxic; nonirritating to skin; sl. conjunctival irritant; nonsensitizing

**Environmental:** Biodeg.

**Storage:** Store in sealed containers in cool, dry place; avoid prolonged storage above 32 C; avoid overheating

**STEPAN® TAB-2** [Stepan](http://www.stepan.com)

**Chem. Descrip.:** Dihydrogenated tallow phthalic acid amide

**CAS:** 127733-92-0

**Uses:** Surfactant, emulsifier, suspending agent, opacifier in pharmaceuticals, antidandruff shampoos

**Properties:** Off-wh. to sl. yel. flake, typ. mild fatty odor; sol. in min. and veg. oils, IPP, IPM; insol. in water; m.p. 45 C; flash pt. > 200 F; nonionic; 99.7% solids

**Toxicology:** Nontoxic; nonirritating to skin; sl. conjunctival irritant; nonsensitizing

**Environmental:** Biodeg.

**Storage:** Store in sealed containers in cool, dry place; avoid prolonged storage above 32 C; avoid overheating

**STEPAN-MILD® LSB** [Stepan](http://www.stepan.com)

**Chem. Descrip.:** Sodium lauryl sulfoacetate, disodium laurethsulfosuccinate

**See** Disodium laureth sulfosuccinate

Handbook of Pharmaceutical Additives, Third Edition 692
Trade Name Reference

Uses:  Surfactant, foaming agent, visc. builder for pharmaceuticals, sensitive skin prods.
Features:  Exc. mildness
Properties:  Cl. liq.; 25% act.

STEPAN-MILD® RM1  [Stepan http://www.stepan.com]
Chem. Descrip.:  Sodium stearyl phthalate amide
See Sodium phthalate stearyl amide
CAS 86432-23-7
Uses:  Rheology modifier, emulsion stabilizer for o/w emulsions, moisturizing creams and lotions, therapeutic prods., sunscreens, and water resist. sunscreens; SPF enhancer for sunscreens
Properties:  Wh. powd.; char. fatty odor; sol. in water @ 80 C; insol. in water @ R.T.; flash pt. (PMCC) > 94 C; 0% RVOC; > 98% solids
Toxicology:  LD50 (oral) > 5 ml/kg; pract. nontoxic orally; causes sl. skin and min. eye irritation as 24% slurry
Environmental:  Biodeg.

STEPAN-MILD® SL3 BA  [Stepan http://www.stepan.com]
Chem. Descrip.:  Disodium laureth sulfosuccinate
See Disodium laureth sulfosuccinate
CAS 39354-45-5; EINECS/ELINCS 255-062-3
Uses:  Surfactant for pharmaceuticals
Properties:  Liq.; anionic; 32% act.

STEPANOL® 360  [Stepan http://www.stepan.com]
Chem. Descrip.:  Sodium laurel sulfonate, lauramide DEA
CAS 151-21-3; 120-40-1
Uses:  Surfactant for pharmaceuticals
Properties:  Cl. liq.; sp. gr. 1.007 g/ml; visc. 6000 cps; flash pt. 93 C; pH 7.5; anionic/nonionic blend; 24.5% act.
Toxicology:  May cause eye and skin irritation; inh. of vapors irritating to respiratory tract; ing. of large amounts may produce GI disturbances including irritation, nausea, and diarrhea
Environmental:  0% RVOC; biodeg.

STEPANOL® ABHS-15C  [Stepan http://www.stepan.com]
Chem. Descrip.:  Water, triclosan; sodium laureth sulfate, sodium lauryl sulfate, lauramide DEA, cocamide DEA, cocamidopropyl betaine
Uses:  Antibacterial hand soap conc.
Features:  Good foaming props.
Properties:  Gardener 3 cl. liq.; sp.gr. 1.04; dens. 8.7 lb/gal; visc. 600-800 cps; f.p. -1 C; flash pt. > 94 C; pH 7-8; 34-36% solids
Use Level:  25%
Storage:  Store @ 80-100 F; freeze/thaw stable

STEPANOL® AEG  [Stepan http://www.stepan.com]
Chem. Descrip.:  Ammonium laurel sulfonate, ammonium laurate sulfonate, cocamidopropyl betaine, cocamide DEA
Uses:  Surfactant for pharmaceuticals
Properties:  Liq.; anionic; 42% act.

STEPANOL® AEM  [Stepan http://www.stepan.com]
Chem. Descrip.:  Ammonium laureth sulfonate, cocamide DEA
Uses:  Surfactant for pharmaceuticals
Properties:  Liq.; anionic; 48% act.

STEPANOL® AM  [Stepan http://www.stepan.com]
Chem. Descrip.:  Ammonium lauryl sulfonate, ammonium laureth sulfonate, cocamide MEA
Uses:  Surfactant for pharmaceuticals
Properties:  Liq.; anionic; 28% act.

STEPANOL® AM-V  [Stepan http://www.stepan.com]
Chem. Descrip.:  Sodium laurel sulfonate, lauramide DEA
CAS 151-21-3; EINECS/ELINCS 205-788-1
Uses:  Detergent, foaming agent, visc. builder in pharmaceuticals
Properties:  Pale yel. visc. liq.; water-sol.; pH 6-7 (10%); anionic; 28% act.

STEPANOL® ME Dry  [Stepan http://www.stepan.com]
Chem. Descrip.:  Sodium laurel sulfonate
CAS 151-21-3; EINECS/ELINCS 221-450-6
Uses:  Detergent, foaming agent for dentifrices, tablets, pharmaceuticals
Properties:  Wh. powd.; water-sol.; pH 7.5-1.0 (10%); anionic; 93% min. act.

STEPANOL® MG  [Stepan http://www.stepan.com]
Chem. Descrip.:  Magnesium lauryl sulfonate
CAS 151-21-3; EINECS/ELINCS 221-450-6
Uses:  Detergent, foaming agent for
Trade Name Reference

pharmaceuticals

Properties: Water-sol.; pH 6.5-7.5 (10%); anionic; 28-30% act.

STEPLANOL® PB [Stepan](http://www.stepan.com)
Chem. Descrip.: Ammonium lauryl sulfate, ammonium lauryl sulfate, cocamidopropyl betaine, cocamide DEA, glycol stearate
Uses: Surfactant for pharmaceuticals
Properties: Liq.; anionic; 32% solids

STEPLANOL® WA-100 NF/USP [Stepan](http://www.stepan.com)
Chem. Descrip.: Sodium lauryl sulfate USP/NF
CAS 151-21-3; EINECS/ELINCS 205-788-1
Uses: Surfactant, detergent, foaming agent, wetting agent, suspending agent for dentifrices, pharmaceuticals
Features: Minimal taste
Regulatory: FDA 21CFR §172.822, 176.170, 176.180, 176.210, 177.1210, 178.3400; kosher; Europe, Japan, Canada, Australia listed
Properties: Wh. powd.; water-sol.; dens. 0.48 g/ml; pH 9.6 (1% aq.); 0% RVOC; anionic; 97.45% act.; 0.1% NaCl
Toxicology: LD50 0.8-1.1 g/kg; sl. toxic orally; may cause mod. skin and eye irritation @ 10% act.; avoid inhaling dust
Environmental: Readily biodeg.
Storage: Store in sealed containers in cool, dry place to avoid agglomeration

STEPLANOL® WAC-P [Stepan](http://www.stepan.com)
Chem. Descrip.: Sodium lauryl sulfate
CAS 151-21-3; EINECS/ELINCS 205-788-1
Uses: Visc. builder and foamer for medicated ointments
Features: Compatible with alkanolamides and amphoterics maximizing optimization of foam and viscosity characteristics
Regulatory: DSL listed
Properties: Opaque visc. liq.; anionic; 30% act.
Toxicology: LD50 0.8-1.1 g/kg; moderate to severely irritating to skin and eyes; sl. toxic orally to mammals
Environmental: (LC50 (aquatic organisms) 13 mg/L); biodeg.
Storage: Store in sealed containers @ < 16 C; avoid overheating and freezing

STEPLANOL® WA Extra [Stepan](http://www.stepan.com)
Chem. Descrip.: Sodium lauryl sulfate

Chem. Analysis: 28% Sodium lauryl sulfate in water
CAS 151-21-3; EINECS/ELINCS 205-788-1
Uses: Detergent, foaming agent, visc. builder for medicated ointments, pharmaceuticals
Regulatory: FDA 21CFR 172.822, 176.170, 176.180, 176.210, 177.1210, 178.3400, kosher
Properties: Cl. liq.; water-sol.; dens. 1.03 g/ml; pH 7.7 (10% aq. sol'n.); anionic; 93.9 C; pH 7.5-8.5 (10% aq. sol'n.); anionic; 93.9 C; pH 7.5-8.5 (10% aq. sol'n.); anionic; 29% act.
Toxicology: LD50 (oral, rat) >500 - 5000 mg/kg; LD50 (dermal, rabbit) >2,000 20,000 mg/kg; slightly toxic orally; causes moderate to severe skin and eye irritation at 10% act.
Environmental: Biodeg.
Precaution: Wear safety goggles and gloves; strong acids or oxidizing agents
Hazardous Decomp. Prods.: SOx
HMIS: Health 2, Flammability 1, Reactivity 0
Storage: Store in sealed containers @ 60-110 F; avoid overheating or freezing

STEPLANOL® WA Extra PCK [Stepan](http://www.stepan.com)
Chem. Descrip.: Sodium lauryl sulfate
Chem. Analysis: 28% Sodium lauryl sulfate in water
CAS 151-21-3; EINECS/ELINCS 205-788-1
Uses: Detergent, foaming agent, visc. builder for medicated ointments, pharmaceuticals
Regulatory: FDA 21CFR 172.822, 176.170, 176.180, 176.210, 177.1210, 178.3400, kosher; DSL compliant
Properties: Cl. liq.; water-sol.; dens. 1.03 g/ml; pH 7.7 (10% aq. sol'n.); anionic; 93.9 C; pH 7.5-8.5 (10% aq. sol'n.); anionic; 29% act.
Toxicology: LD50 (oral, rat) >500 - 5000 mg/kg; LD50 (dermal, rabbit) >2,000 20,000 mg/kg; slightly toxic orally; causes moderate to severe skin and eye irritation at 10% act.
Environmental: RVOC 0%; biodeg.
Precaution: Wear safety goggles and gloves; strong acids or oxidizing agents
Hazardous Decomp. Prods.: SOx
HMIS: Health 2, Flammability 1, Reactivity 0
Storage: Store in sealed containers @ 60-110 F; avoid overheating or freezing

STEPLANOL® WA Paste [Stepan](http://www.stepan.com)
Chem. Descrip.: Sodium lauryl sulfate
CAS 151-21-3; EINECS/ELINCS 205-788-1
Uses: Detergent, foaming agent, visc. builder for medicated ointments, pharmaceuticals
Trade Name Reference

**Properties:** Water-wh. cl. paste; water-sol.; pH 7.5-8.5 (10%); anionic; 29% act.

**STEPANOL® WAT** [Stepan http://www.stepan.com]
Chem. Descrip.: TEA-lauryl sulfate
CAS 139-96-8; EINECS/ELINCS 205-388-7
Uses: Detergent, foaming agent for pharmaceuticals
Regulatory: DSL listed; kosher
Properties: Water-wh. cl. liq.; water-sol.; dens. 1.04 g/ml; visc. 456 cps; f.p. -4 C; b.p. > 100 C; pour pt. -1 C; cloud pt. 0 C; pH 7.0-8.5 (10%); anionic; 40% act.
Toxicology: LD50 0.25 ->1.95 g/kg; mod. to sl. toxic orally; mod. to severe eye irritant; skin irritant; ing. of large amounts may produce gastrointestinal disturbances including irritation, nausea, and diarrhea; noncarcinogenic
Environmental: 0% RVOC, biodeg.
Precaution: Wear safety goggles and gloves
Hazards: Oxides of nitrogen and ammonia and SOx
HMIS: Health 2, Flammability 1, Reactivity 0
Store: Store in sealed containers @ 7 C; avoid overheating or freezing

**STEPANQUAT® 65 NF** [Stepan http://www.stepan.com]
Chem. Descrip.: Benzalkonium chloride (> 50 %) and ethanol (4%) in water
CAS 63449-41-2; 64-17-5
Uses: Broad-spectrum preservative for personal care and pharmaceutical products such as eye contact lens solutions and topical antiseptics
Properties: Cl. liq.; sp. gr. 0.974; dens. 8.1 lb/gal; visc. 60cps (25 C); pout pt. -4 C; cloud pt. -3 C; 5 C; flash pt. (PMCC) > 56 C; pH (10% aq. sol'n.) 6.5; 50% act.
Toxicology: LD50 (oral, rat) >50 - 500 mg/kg; may be corrosive to eyes; may cause irritation to the respiratory system; excessive inh. causes headache, dizziness, nausea and loss of motor skills; not listed as carcinogenic
Environmental: 4% RVOC (Ethanol); biodeg.
Precaution: Corrosive and combustible; avoid contact with anionic materials, soap and sulfated oils
HMIS: Health 3, Flammability 2, Reactivity 0
Storage: Store in vessels of 316 stainless steel or fiberglass with a corrosion liner @ 85 - 120 F

**Sterotex® HM NF** [ABITEC http://www.abiteccorp.com]
Chem. Descrip.: Hydrogenated soybean oils; conforms to hydrogenated vegetable oil NF
CAS 8016-70-4; EINECS/ELINCS 232-410-2
Uses: Lubricant in pharmaceutical tableting, nutrition, powd. compression applics., suppositories
Regulatory: Kosher
Properties: Wh. fine powd., yel. oil when melted; insol. in water; sp.gr. 0.9; vapor pressure < 1 mm Hg; m.p. 67-70 C; b.p. > 500 F; acid no. 0.4 max.; iodine no. 5 max.; sapon. no. 186-196; flash pt. (COC) > 550 F
Toxicology: Veg. oil mists classified as 'nuisance particles'
Precaution: Oil-soaked materials may spontaneously combust; incompat. with strong oxidizers
Hazardous Decomp. Prods.: CO, CO2
Storage: Store in cool, dry place

**Sterotex® K, NF** [ABITEC http://www.abiteccorp.com]
Chem. Descrip.: Hydrogenated soybean oil (> 60%), hydrogenated castor oil (< 40%)
CAS 8016-70-4; 8001-78-3; EINECS/ELINCS
Trade Name Reference

232-410-3; 232-292-2
Uses: Lubricant in pharmaceutical tablet manufacturing and food supplements, sustained release applics., and as a binder
Regulatory: USP/NF; SARA §311/312, 313 nonreportable
Properties: Wh. powd.; sweet, vegetable oil-like odor; m.p. 140-145 F; b.p. > 500 F; flash pt. (COC) > 500 F
Toxicology: Not expected to be a serious irritant to eyes, skin, or by ing.; dust may be slightly irritating to the respiratory tract; noncarcinogenic; nonmutagenic; nonteratogenic
Environmental: Biodegrad.; avoid runoff into storm sewers and ditches which lead to waterways
Precaution: Combustible; incompat. with oxidizers
Hazardous Decomp. Prods.: COx
NFPA: Health 0, Flammability 1, Reactivity 0
Storage: Retest and requalify after 1 yr.; store in dry place @ R.T.; keep containers closed when not in use; provide adequate ventilation; minimize dust generation and accumulation.

Sterotex® K [ABITEC
http://www.abiteccorp.com]
Chem. Descrip.: Hydrogenated soybean oil, hydrogenated castor oil
Uses: Lubricant for pharmaceutical tablets, clinical nutrition, dermatologicals, suppositories, sustained release
Regulatory: Kosher
Properties: Wh. to lt. tan powd., odorless; insol. in water; sp.gr. 0.9; bulk dens. 0.48; m.p. 81-84 C; b.p. > 500 F; acid no. 1 max.; iodine no. 5 max.; sapon. no. 185-195; flash pt. (COC) > 600 F
Toxicology: Nontoxic; veg. oil mists classified as 'nuisance particles'
Precaution: Oil-soaked materials may spontaneously combust
Sterotex® NF [ABITEC
http://www.abiteccorp.com]
Chem. Descrip.: Hydrogenated cottonseed oil CAS 68334-00-0; EINECS/ELINCS 269-804-9
Uses: Emollient, lubricant, moisturizer, visc. modifier for tableting and compaction in pharmaceuticals, nutritional supplements, dermatologicals, encapsulation, suppositories
Regulatory: Kosher
Properties: Wh. powd. @ R.T., lt. yel. oil when melted; insol. in water; sp.gr. 0.9; m.p. 140-145 F; b.p. > 500 F; acid no. 0.4 max.; iodine no. 5 max.; sapon. no. 188-198; flash pt. (COC) > 640 F
Toxicology: Veg. oil mists classified as 'nuisance particles'; sl. irritating to eyes, skin
Environmental: Biodeg.
Precaution: Wear safety glasses, PVC gloves, work uniform; oil-soaked materials may spontaneously combust; incompat. with oxidizers
NFPA: Health 0, Flammability 1, Reactivity 0
Storage: Store in dry area; keep container closed when not in use

Stimu-Tex® AS [Pentapharm Ltd
http://www.pentapharm.com; Centerchem http://www.centerchem.com]
Chem. Descrip.: Spent grain wax, argania spinosa kernel oil, shea butter (Butyrospermum parkii) extract See Argan (Argania spinosa) kernel oil
Use: Skin protectant, anti-allergenic, anti-irritant, anti-itch agent for skin care
Properties: Pale yel., semi-solid lipidic mass; m.p. 40-50 C; acid no. <10; iodine no. 60-80; sapon. no. 170-20
Storage: 3 yr. shelf life when stored in the original sealed containers protected from light in a clean and cool place at temps. between 4-8 C; in order to avoid secondary microbial contamination after opening, containers should be handled with special care

Streptokinase Streptodornase [Amano Enzyme http://www.amano-enzyme.co.jp]
Chem. Descrip.: Streptokinase and streptodornase
Chem. Analysis: Streptokinase ≥ 1,000u/mg; streptokinase ≥ 250u/mg
CAS 9002-01-1; 9003-98-9
Uses: Anti-inflammatory for pharmaceuticals
Regulatory: JPC
Properties: Off-wh. to brown powd.; sl. odor; sol. in water
Toxicology: Inh. of aerosols or dust may induce sensitization and may cause allergic reactions in sensitized individuals; nontoxic
Environmental: Biodegrad.; not harmful to aquatic and marine organisms when dissolved with copious amounts of water
Precaution: Wear respirator, protective glasses, and impervious gloves; avoid dust formation
Hazardous Decomp. Prods.: None
Trade Name Reference

Storage: Store container in a cool and dry place
Struktol® TR 065 [Struktol
http://www.struktol.com]
Chem. Descrip.: Blend of med. m.w. resins
Uses: Moisture barrier on soft gelatin capsules
Features: Stable to 700 F processing temps.; compat. with polar and nonpolar polymers
Regulatory: FDA 21CFR §172.280, 172.615, 175.105, 175.125, 177.1200, 177.2600
Properties: Lt. tan color, resinous odor; sp.gr. 1.01; drop pt. 108 C
Storage: 2 yrs. min. stability under normal storage conditions

Sturcal® F PCC [Mins. Tech.
http://www.mineralstech.com]
Chem. Descrip.: Precipitated calcium carbonate
CAS 471-34-1; EINECS/ELINCS 207-439-9
Uses: Dentifrices; pharmaceuticals

Sturcal® H PCC [Mins. Tech.
http://www.mineralstech.com]
Chem. Descrip.: Precipitated calcium carbonate
CAS 471-34-1; EINECS/ELINCS 207-439-9
Uses: Dentifrices; pharmaceuticals; calcium source

Sugar Spheres NF Series [Chr. Hansen Inc http://www.chr-hansen.com]
Chem. Descrip.: Sucrose and starch NF
Uses: Carrier used in pharmaceutical industry in prod. of sustained or timed-release dosage forms
Features: Uniform sphere size; low friability
Regulatory: USP, NF, EP
Properties: Wh. uniform, consistent spheres; ranges in mesh size from 14/16 to 60/80; 62.5-91.5% sucrose, ≤ 4% moisture

Sugartab® [JRS Pharma
http://www.jrspharma.com]
Chem. Descrip.: Compressible sucrose (90-93%), invert sugar (6-9%)
Uses: Binder, diluent, carrier, vehicle, base, flow aid, flavor masking agent, sweetener for direct compression of pharmaceutical tablets, chewable tablets, water-sol. tablets, vitamin formulations
Features: Inert; exc. compressibility; produces hard, nonfriable, elegant tablets; relatively low hygroscopicity; smooth disintegration; noncloying sweetness; pleasant aftertaste
Properties: Wh. free-flowing powd.; 296 µ avg. particle size; 30% - 80 mesh; noncloying sweet taste; pleasant aftertaste; very sol. in water; sl. sol. in alcohol; dens. 0.6-0.9 g/ml (tapped)

Sulfochem® SLP-95 [Noveon
http://www.carbopol.com; http://www.noveoncoatings.com; C.P. Hall
http://www.cphall.com]
Chem. Descrip.: Sodium lauryl sulfate
CAS 151-21-3; EINECS/ELINCS 205-788-1
Uses: Foamer, dispersant, wetting agent, detergent for dentifrices
Properties: Wh. powd.; anionic; 95% act.

Super-Cepionate® [Zeon
http://www.zeon.co.jp]
Chem. Descrip.: Methyl dihydrojasmonate (30-33%)
CAS 24851-98-7
Uses: For flavor and fragrance applics., toiletry to perfume
Properties: Diffusive, long-lasting, jasmin-like odor; m.w. 226.3

Super Corona Lanolin [Croda Inc
http://www.croda.com]
**Superfine Lanolin** [Croda Inc](http://www.crodausa.com; http://www.croda.com)

Chem. Descrip.: Lanolin USP
CAS 8006-54-0; EINECS/ELINCS 232-348-6

Uses: Superfatting agent, emollient, emulsifier, moisturizer in topical pharmaceuticals, ointments, dressing creams, diaper rash and hemorrhoidal preps., acne formulations, ophthalmics

Properties: Yel./amber soft solid; low odor; partly sol. in min. oil; m.p. 38-44 C; acid no. 1.0 max.; iodine no. 18-36; nonionic

Toxicology: LD50 (oral, rat) > 20 g/kg; mild skin and eye irritant

**Superfine KCl** [Reheis](http://www.reheis.com)

CAS 7447-40-7; EINECS/ELINCS 231-211-8

Uses: Microencapsulant for pharmaceuticals

Properties: Powd.; 100-200 mesh

**Super Hartolan** [Croda Inc](http://www.crodausa.com; http://www.croda.com; Croda Chem. Europe Ltd http://www.croda.co.uk)

Chem. Descrip.: Lanolin alcohol NF/EP
CAS 8027-33-6; EINECS/ELINCS 232-430-1

Uses: W/o emulsifier, thickener, stabilizer, spreading agent, dispersant, plasticizer, emulsion stabilizer, emollient, plasticizer for topical pharmaceutical emulsions

Features: Enhances stability of acid-contg. emulsions

Properties: Golden solid wax; sol. in IPA, partly sol. in min. oil, disp. in propylene glycol; m.p. 60-70 C; HLB 4.0; acid no. 1.5 max.; sapon. no. 5 mg max.; nonionic; 100% conc.

**Superla® No. 5** [Chevron](http://www.chevron.com/)

Chem. Descrip.: Wh. mineral oil USP
CAS 8020-83-5; EINECS/ELINCS 232-384-2

Uses: Lubricant for pharmaceuticals, medicinal prods.

Features: Virtually free of nitrogen, sulfur, oxygen, aromatic hydrocarbons; free of water and solids

Regulatory: FDA 21 CFR §172.878, 178.3570, 178.3620, 573.680, USDA, USP, CTFA approved; kosher; pareve; RCRA, SARA §311/312/313 nonreportable; Australia AICS; Canada DSL; China ECS; Europe EINECS; Korea ECL; Philippines PICCS

Properties: Colorless, odorless, tasteless liq.; sol. in hydrocarbons; insol. in water; sp.gr. 0.831; visc. 7.84 cSt (40 C), 53 SUS (100 C); pour pt. -7 C; b.p. > 260 C; flash pt. 154 C; ref. index 1.4660; vapor pressure < 0.01 mmHg @ 100 F

Toxicology: Not expected to be eye, skin irritant; not expected to be harmful if ing., inh.; ACGIH TLV TWA 5 mg/m³, STEL 10 mg/m³; TSCA listed

Environmental: Not expected to be readily biodeg.

Precaution: Avoid release into sewage, drainage systems, bodies of water; use in well-ventilated area; incompat. with strong oxidizing agents

HMIS: Health 0, Flammability 1, Reactivity 0

Storage: Ground all containers

**Superla® No. 7** [Chevron](http://www.chevron.com/)

Chem. Descrip.: Wh. mineral oil USP
CAS 8020-83-5; EINECS/ELINCS 232-384-2

Uses: Lubricant for pharmaceuticals, medicinal prods.

Features: Virtually free of nitrogen, sulfur, oxygen, aromatic hydrocarbons; free of water and solids

Regulatory: FDA 21 CFR §172.878, 178.3570, 178.3620, 573.680, USDA, USP, CTFA approved; kosher; pareve; RCRA, SARA §311/312/313 nonreportable; Australia AICS; Canada DSL; China ECS; Europe EINECS; Korea ECL; Philippines PICCS

Properties: Colorless, odorless, tasteless liq.; sol. in hydrocarbons; insol. in water; sp.gr. 0.831

Toxicology: Not expected to be eye, skin irritant; not expected to be harmful if ing., inh.; ACGIH TLV TWA 5 mg/m³, STEL 10 mg/m³; TSCA listed

Environmental: Not expected to be readily biodeg.

Precaution: Avoid release into sewage, drainage systems, bodies of water; use in well-ventilated area; incompat. with strong oxidizing agents

HMIS: Health 0, Flammability 1, Reactivity 0

Storage: Ground all containers
Trade Name Reference

0.851; visc. 13.3 cSt (40 C), 75 SUS (100 C); pour pt. -18 C; b.p. > 260 C; flash pt. 182 C; ref. index 1.4666; vapor pressure < 0.01 mmHg @ 100 F

Toxicology: Not expected to be eye, skin irritant; not expected to be harmful if ing., inh.; ACGIH TLV TWA 5 mg/m³, STEL 10 mg/m³; TSCA listed

Environmental: Not expected to be readily biodeg.

Precaution: Avoid release into sewage, drainage systems, bodies of water; use in well-ventilated area; incompat. with strong oxidizing agents

**Superol™ K (kosher)** [Procter & Gamble](http://pgchemicals.com)
Chem. Descrip.: Glycerin USP (99.7% min.)
CAS 56-81-5; EINECS/ELINCS 200-289-5
Uses: Humectant in pharmaceuticals
Regulatory: USP/FCC, EP, DOT/ADR/RID/IMDG/ICAO/IATA not regulated; Canada DSL; Japan; Australia; Philippines; China; Korea
Trade Name Reference

**Properties:** APHA 10 max. visc. liq.; odorless; sweet taste; completely sol. in water; misc. with ethanol; sl. sol. in acetone; insol. in ether, chloroform; sp.gr. 1.2613 min.; visc. ≈ 1300 mPa•s; vapor pressure < 0.008 mm Hg; b.p. > 288 C; flash pt. (PMCC) > 198.9 C; auto-ignition temp. ≈ 400 C; 0.3% max. moisture

**Toxicology:** LD50 (oral, rat) > 2 g/kg; may cause mild, transient eye irritation; TSCA listed

**Environmental:** LC50 (goldfish, 24 h) > 5 g/l; LC0 (golden orfe, 48 h) > 250 mg/l; LC100 (rainbow trout, 96 h) 51-57 g/l; NOEC (chilomonas paramecium, 48 h) > 10 g/l; (entosiphon sulcatum, 72 h) 3200 mg/l; biodeg.

**Precaution:** Incompat. with strong oxidizers, strong acids

**Hazardous Decomp. Prods.:** Thermal reaction may release acrolein

**Storage:** Store in clean, tight containers to prevent moisture pickup from air; can be stored in aluminum, stainless steel, fiberglass or resin lined steel vessels

**Superol™ NK** [Procter & Gamble

http://pgchemicals.com]

Chem. Descrip.: Glycerin USP (99-100%)
CAS 56-81-5; EINECS/ELINCS 200-289-5

Uses: Humectant in pharmaceuticals

Regulatory: USP/FCC, EP, DOT/ADR/RID/IMDG/ICAO/IATA not regulated; Canada DSL; Japan; Australia; Philippines; China; Korea

**Properties:** APHA 10 max. visc. liq.; odorless; sweet taste; completely sol. in water; misc. with ethanol; sl. sol. in acetone; insol. in ether, chloroform; sp.gr. 1.2613 min.; visc. ≈ 1300 mPa•s; vapor pressure < 0.008 mm Hg; b.p. > 288 C; flash pt. http://www.croda.com;
http://www.crodausa.com]
Chem. Descrip.: Cottonseed oil NF/USP See Cottonseed (Gossypium) oil
CAS 8001-29-4; EINECS/ELINCS 232-280-7
Uses: Solvent, vehicle, emollient for pharmaceuticals (orals, topicals, parenteral formulations for intramuscular administration, nutritional supplements, IV emulsions, liniments, ointments)
Features: Oleaginous
Properties: APHA 50 oil, odorless, tasteless; sol. in min. oil, IPA; insol. in water, propylene glycol; HLB 7.85
Toxicology: LD50 (oral, rat) > 30 g/kg; minimal skin irritant; nonirritating to eyes

Super Refined® Crodamol IPM [Croda Inc
http://www.croda.com;
http://www.crodausa.com]
Chem. Descrip.: Isopropyl myristate NF
CAS 110-27-0; EINECS/ELINCS 203-751-4
Uses: Solvent absorption enhancer, viscosity modifier and emollient for topical pharmaceuticals
Features: Rapid absorp. into skin; highly purified
Properties: Colorless liq.; sol. in min. oil, IPA; insol. in water, propylene glycol; visc. 6.0
Use Level: 2-10%

Super Refined® Crodamol SCO [Croda Inc
http://www.croda.com;
http://www.crodausa.com]
Chem. Descrip.: Stearyl octanoate and cetyl octanoate

Super Refined® Oleic Acid NF [Croda Inc
http://www.croda.com;
http://www.crodausa.com; Croda Chem. Europe Ltd http://www.croda.co.uk]
Chem. Descrip.: Oleic acid NF
CAS 112-80-1; EINECS/ELINCS 204-007-1
Uses: Emulsifier, solubilizer, defoamer in topical pharmaceuticals; absorption enhancer in topical, transdermal and oral dosages; component of SE drug delivery systems; vehicle for parenteral and oral diagnostics; raw material for the production of other pharmaceutical ingredients
Features: Nonanimal in origin
Regulatory: NF, EP, FDA Inactive Ingredient Guide (inhalation and nasal aerosols, tablets, and transdermal preps.), 21 CFR 172
Properties: Cl. colorless liq.; insol. in water; sol. in min. oil, isopropanol, propylene glycol; HLB15.97; peroxide no. 5.0 max.; HLB 15.97; 80% min. oleic acid content
Toxicology: TSCA listed

Super Refined® Olive NF [Croda Inc
http://www.croda.com;
http://www.crodausa.com; Croda Chem. Europe Ltd http://www.croda.co.uk]
Chem. Descrip.: Olive (Olea europaea) oil NF
CAS 8001-25-0; EINECS/ELINCS 232-277-0
Uses: Solvent, vehicle, emollient, lubricant for pharmaceuticals (orals, topicals, parenteral formulations for intramuscular administration, nutritional supplements, IV emulsions, liniments, ointments)
Features: Oleaginous
Properties: APHA 30 oil, odorless, tasteless; sol. in min. oil, IPA; insol. in water, propylene glycol; HLB 7.66
Toxicology: LD50 (oral, rat) > 30 g/kg; minimal skin irritant; nonirritating to eyes

Super Refined® PEG-300 NF [Croda Inc
http://www.croda.com;
http://www.crodausa.com]
Chem. Descrip.: PEG 300 See PEG-6
CAS 2615-15-8; EINECS/ELINCS 203-989-9
Uses: Suspending agent, viscosity modifier
Trade Name Reference

in pharmaceutical topical, oral, and parenteral preps.; solvent in gelatin capsules; precipitant for DNA oligomers

Features: Nonsensitizing, hydrophilic, highly purified

Regulatory: NF, EP, JPE

Properties: Liq., water-sol.; nonionic

Super Refined® PEG-400 NF [Croda Inc http://www.croda.com; http://www.crodausa.com]

Chem. Descrip.: PEG 400 See PEG-8
CAS 5117-19-1; EINECS/ELINCS 225-856-4

Uses: Suspending agent, viscosity modifier in pharmaceutical topical (ointments), oral, and parenteral preps.; solvent in gelatin capsules; stabilizer and storage vehicle for hypericin which is used as a diagnostic tool in detecting certain TCC tumors

Features: Nonsensitizing, hydrophilic, highly purified, low peroxide value

Regulatory: NF, EP, JPE

Properties: Liq., water-sol.; m.w. 400 (avg. wt.); nonionic

Storage: Store in a cool area; after use, backfill the container with nitrogen

Super Refined® PEG-600 NF [Croda Inc http://www.croda.com; http://www.crodausa.com]

Chem. Descrip.: PEG 600 See PEG-12
CAS 6790-09-6; EINECS/ELINCS 229-859-1

Uses: Suspending agent, viscosity modifier in pharmaceutical topical (ointments), oral, and parenteral preps.; solvent in gelatin capsules; precipitant for DNA oligomers; vehicle for parenteral dosage forms (30% v/v concs.)

Features: Nonsensitizing, hydrophilic, highly purified, low peroxide value

Regulatory: NF, EP, JPE

Properties: Liq., water-sol.; m.w. 570-630; nonionic

Storage: Store in a cool area; after use, backfill the container with nitrogen

Super Refined® Peanut NF [Croda Inc http://www.croda.com; http://www.crodausa.com]

Chem. Descrip.: Peanut oil NF/USP See Peanut (Arachis hypogaea) oil
CAS 8002-03-7; EINECS/ELINCS 232-296-4

Uses: Solvent and vehicle for pharmaceuticals (orals, topicals, parenteral formulations for intramuscular administration, nutritional supplements, IV emulsions, liniments, ointments)

Features: Oleaginous

Properties: APHA 30 cl. oily liq., odorless, tasteless; sol. in min. oil, IPA; insol. in water, propylene glycol; HLB 7.78

Toxicology: LD50 (oral, rat) > 30 g/kg; minimal skin/eye irritant

Super Refined® Safflower USP [Croda Inc http://www.croda.com; http://www.crodausa.com; Croda Chem. Europe Ltd http://www.croda.co.uk]

Chem. Descrip.: Safflower oil USP See Safflower (Carthamus tinctorius) oil
CAS 8001-23-8; EINECS/ELINCS 232-276-5

Uses: Solvent, vehicle, emollient for pharmaceuticals (orals, topicals, parenteral formulations for intramuscular administration, nutritional supplements, IV emulsions, liniments, ointments)

Features: Oleaginous

Properties: APHA 30 mobile oil, odorless, tasteless; sol. in min. oil, IPA; insol. in water, propylene glycol; HLB 7.72

Toxicology: LD50 (oral, rat) > 5 g/kg; minimal skin/eye irritant

Super Refined® Sesame NF [Croda Inc http://www.croda.com; http://www.crodausa.com; Croda Chem. Europe Ltd http://www.croda.co.uk]

Chem. Descrip.: Sesame oil NF See Sesame (Sesamum indicum) oil
CAS 8008-74-0; EINECS/ELINCS 232-370-6

Uses: Solvent, vehicle, emollient, lubricant for pharmaceuticals (orals, topicals, parenteral formulations for intramuscular administration, nutritional supplements, IV emulsions, liniments, ointments); emollient in skin care preps.

Regulatory: NF, BP compliance

Properties: APHA 30 cl. oily liq., odorless, tasteless; sol. in min. oil, IPA; insol. in water, propylene glycol; sp.gr. 0.916-0.921; HLB 7.83; iodine no. 103-116; sapon. no. 188-195; hyd. no. 5 max.; ref. index 1.472-1.476; 0.05% max. moisture

Toxicology: LD50 (oral, rat) > 5 g/kg; mild skin irritant, minimal eye irritant

Super Refined® Soybean USP [Croda Inc http://www.croda.com; http://www.crodausa.com; Croda Chem. Europe Ltd http://www.croda.co.uk]

Chem. Descrip.: Soybean oil USP See Soybean (Glycine soja) oil

emulsions, liniments, ointments)
Trade Name Reference

CAS 8001-22-7; EINECS/ELINCS 232-274-4

Uses: Solvent, vehicle, nutritional source, lubricant for pharmaceuticals (orals, topicals, parenteral formulations for intramuscular administration, nutritional supplements, IV emulsions, liniments, ointments); emollient in skin care preps.

Features: Oleaginous

Properties: APHA 60 max. cl. oily liq., odorless, tasteless; sol. in min. oil, IPA; insol. in water, propylene glycol; sp.gr. 0.916-0.922; HLB 7.66; iodine no. 120-141; sapon. no. 180-200; hyd. no. 5 max.; ref. index 1.465-1.475

Toxicology: LD50 (oral, rat) > 5 g/kg; mild skin irritant, minimal eye irritant

Precaution: Wear safety glasses, rubber gloves, apron

Storage: Keep away from heat, flames

Supersat AWS-24 [RITA]
Chem. Descrip.: PEG-24 hydrog. lanolin See PEG-24 hydrogenated lanolin
CAS 68648-27-1

Uses: Emollient, plasticizer, emulsifier, visc. control agent, gellant, solubilizer for ointments, sun preps.; solubilizer for min./veg. oils and perfumes

Regulatory: RCRA nonreportable

Properties: Wh. flakes, bland odor; sol. in water; sp.gr. 0.98; vapor dens. < 1%; nonionic; 100% conc.

Toxicology: LD50 (oral, albino rat) > 54 cc/kg; primary skin irritation index 0.5 (rabbit)

Precaution: Wear safety glasses, rubber gloves, apron; incompat. with oxidizers

Hazardous Decomp. Prods.: Oxides of carbon

Storage: Keep away from heat, flames

Super Solan [Croda Inc]
Chem. Descrip.: PEG-75 lanolin
CAS 61790-81-6

Uses: Emulsifier, emollient, conditioner, superfatting agent, solubilizer, visc. builder, and plasticizer for topical pharmaceuticals

Properties: Yel. flake; sol. in water, propylene glycol; sol. warm in IPA; m.p. 46-54 C; nonionic

Use Level: 2-10%

Toxicology: LD50 (oral, rat) > 5 g/kg; skin irritant, nonirritating to eyes

Precaution: Wear safety glasses, rubber gloves, apron

Hazardous Decomp. Prods.: Oxides of carbon

Storage: Keep away from heat, flames

Supersat AWS-4 [RITA]
Chem. Descrip.: PEG-20 hydrog. lanolin See PEG-20 hydrogenated lanolin
CAS 68648-27-1

Uses: Emollient, emulsifier, visc. control agent, plasticizer, gellant, solubilizer for ointments, sun preps.; solubilizer for min./veg. oils and perfumes

Regulatory: RCRA nonreportable

Properties: Amber solid, bland odor; sl. water-sol.; sp.gr. 0.98; vapor dens. > 1; b.p. > 212 F; acid no. 1 max.; iodine no. 10 max.; sapon. no. 8 max.; hyd. no. 32-47; flash pt. (COC) > 300 F; volatiles < 1%; nonionic; 100% conc.

Toxicology: LD50 (oral, albino rat) > 50 cc/kg; mild eye irritant

Precaution: Wear safety glasses, rubber gloves, apron

Storage: Keep away from heat, flames
Trade Name Reference

white color, exhibiting elegant feel and texture

Regulatory: FDA 21CFR §172.880
Properties: Lovibond 0.5Y color; visc. 9-14 cSt (100 C); m.p. 50-56 C

Super White Protopet® [Chremtura
http://www.chemtura.com]
Chem. Descr.: Wh. petrolatum USP
CAS 8027-32-5; EINECS/ELINCS 232-373-2
Uses: Lubricant for cosmetics, pharmaceuticals, medicated ointments, dental adhesives, sun care prod.
Features: High purity, med. consistency, med. m.p. grade; rec. where extra whiteness is preferred
Regulatory: FDA 21CFR §172.880
Properties: Lovibond 1.0Y max. color; visc. 10-16 cSt (100 C); m.p. 54-60 C

Suppocire® A [Gattefosse France
http://www.gattefosse.fr]
Chem. Descr.: Semisynthetic glycerides
Uses: Excipient for pharmaceutical suppositories
Features: Self-lubricating; inert; very well tolerated; low polymorphism; rancidless
Regulatory: USP/NF, EP, JP compliance; DMF no. 5962
Properties: Waxy solid; faint odor; very sol. in diethyl oxide, chloroform, CCl₄, toluene, petrol. ether (40-60 C); sl. sol. in ethanol; insol. in water; sp.gr. 0.955 (20 C); drop pt. 33-35 C; acid no. < 0.2; iodine no. < 2; sapon. no. 225-245; hyd. no. < 6
Toxicology: LD₅₀ (oral, rat) > 20 ml/kg, nonirritating rectally; sl. irritating to eyes

Suppocire® AIM [Gattefosse France
http://www.gattefosse.fr]
Chem. Descr.: Semisynthetic glycerides
Uses: Excipient for pharmaceutical suppositories
Features: Self-lubricating; inert; very well tolerated; low polymorphism; rancidless
Regulatory: USP/NF, EP, JP compliance; DMF no. 5962
Properties: Waxy solid; faint odor; very sol. in diethyl oxide, chloroform, CCl₄, toluene, petrol. ether (40-60 C); sl. sol. in ethanol; insol. in water; sp.gr. 0.955 (20 C); drop pt. 33-35 C; acid no. < 0.5; iodine no. < 2; sapon. no. 225-245; hyd. no. < 6
Toxicology: LD₅₀ (oral, rat) > 20 ml/kg, nonirritating rectally; sl. irritating to eyes

Suppocire® AML [Gattefosse France
http://www.gattefosse.fr]
Chem. Descr.: Semisynthetic glycerides
Uses: Excipient for pharmaceutical suppositories
Features: Self-lubricating; inert; very well tolerated; low polymorphism; rancidless
Regulatory: USP/NF, EP, JP compliance; DMF no. 5962
Properties: Waxy solid; faint odor; very sol. in diethyl oxide, chloroform, CCl₄, toluene, petrol. ether (40-60 C); sl. sol. in ethanol; insol. in water; sp.gr. 0.955 (20 C); drop pt. 33-35 C; acid no. < 0.2; iodine no. < 2; sapon. no. 225-245; hyd. no. < 6
Toxicology: LD₅₀ (oral, rat) > 20 ml/kg, nonirritating rectally; sl. irritating to eyes

Suppocire® AML [Gattefosse France
http://www.gattefosse.fr]
Chem. Descr.: Semisynthetic glycerides
Uses: Excipient for pharmaceutical suppositories

Chem. Descrip.: Semisynthetic glycerides

| Uses: Excipient for pharmaceutical suppositories |
| Features: Self-lubricating; inert; very well tolerated; low polymorphism; rancidless |
| Regulatory: USP/NF, EP, JP compliance; DMF no. 5962 |
Trade Name Reference

**Suppocire® BS2X** [Gattefosse France http://www.gattefosse.fr]
Chem. Descrip.: Semisynthetic glycerides
Uses: Excipient for pharmaceutical suppositories
Features: Self-lubricating; inert; very well tolerated; low polymorphism; rancidless
Regulatory: USP/NF, EP, JP compliance; DMF no. 5962
Properties: Waxy solid; faint odor; very sol. in diethyl oxide, chloroform, CCl₄, toluene, petrol. ether (40-60 C); sl. sol. in ethanol; insol. in water; sp.gr. 0.955 (20 C); drop pt. 38-40 C; acid no. < 0.2; iodine no. < 2; sapon. no. 220-240; hyd. no. < 6
Toxicology: LD₀ (oral, rat) > 20 ml/kg; nonirritating rectally

**Suppocire® C** [Gattefosse France http://www.gattefosse.fr]
Chem. Descrip.: Semisynthetic glycerides
Uses: Excipient for pharmaceutical suppositories
Features: Self-lubricating; inert; very well tolerated; low polymorphism; rancidless
Regulatory: USP/NF, EP, JP compliance; DMF no. 5962
Properties: Waxy solid; faint odor; very sol. in diethyl oxide, chloroform, CCl₄, toluene, petrol. ether (40-60 C); sl. sol. in ethanol; insol. in water; sp.gr. 0.955 (20 C); drop pt. 38-40 C; acid no. < 0.2; iodine no. < 2; sapon. no. 220-240; hyd. no. < 6
Toxicology: LD₀ (oral, rat) > 20 ml/kg, nonirritating rectally

**Suppocire® CM** [Gattefosse France http://www.gattefosse.fr]
Chem. Descrip.: Hydrogenated palm glycerides, hydrogenated palm kernel glycerides
Uses: Excipient for pharmaceutical suppositories
Features: Self-lubricating; inert; very well tolerated; low polymorphism; rancidless
Regulatory: USP/NF, EP, JP compliance; DMF no. 5962
Properties: Waxy solid; faint odor; very sol. in diethyl oxide, chloroform, CCl₄, toluene, petrol. ether (40-60 C); sl. sol. in ethanol; insol. in water; sp.gr. 0.955 (20 C); drop pt. 42-45 C; acid no. < 0.2; iodine no. < 2; sapon. no. 220-240; hyd. no. < 6
Toxicology: LD₀ (oral, rat) > 20 ml/kg; sl. irritating to eyes, nonirritating to skin

**Suppocire® CS2X** [Gattefosse France http://www.gattefosse.fr]
Chem. Descrip.: Semisynthetic glycerides
Uses: Excipient for pharmaceutical suppositories
Features: Self-lubricating; inert; very well tolerated; low polymorphism; rancidless
Regulatory: USP/NF, EP, JP compliance; DMF no. 5962
Properties: Waxy solid; faint odor; very sol. in diethyl oxide, chloroform, CCl₄, toluene, petrol. ether (40-60 C); sl. sol. in ethanol; insol. in water; sp.gr. 0.955 (20 C); drop pt. 38-40 C; acid no. < 0.2; iodine no. < 2; sapon. no. 220-240; hyd. no. 15-25
Toxicology: LD₀ (oral, rat) > 20 ml/kg

**Suppocire® D** [Gattefosse France http://www.gattefosse.fr]
Chem. Descrip.: Semisynthetic glycerides
Uses: Excipient for pharmaceutical suppositories
Features: Self-lubricating; inert; very well tolerated; low polymorphism; rancidless
Regulatory: USP/NF, EP, JP compliance; DMF no. 5962
Properties: Waxy solid; faint odor; very sol. in diethyl oxide, chloroform, CCl₄, toluene, petrol. ether (40-60 C); sl. sol. in ethanol; insol. in water; sp.gr. 0.955 (20 C); drop pt. 42-45 C; acid no. < 0.2; iodine no. < 2; sapon. no. 220-240; hyd. no. 15-25
Toxicology: LD₀ (oral, rat) > 20 ml/kg; sl. irritating to eyes, nonirritating to skin

**Suppocire® DM** [Gattefosse France http://www.gattefosse.fr]
Chem. Descrip.: Semisynthetic glycerides
Uses: Excipient for pharmaceutical suppositories
Features: Self-lubricating; inert; very well tolerated; low polymorphism; rancidless
Regulatory: USP/NF, EP, JP compliance; DMF no. 5962
Properties: Waxy solid; faint odor; very sol. in diethyl oxide, chloroform, CCl₄, toluene, petrol. ether (40-60 C); sl. sol. in ethanol; insol. in water; sp.gr. 0.955 (20 C); drop pt. 42-45 C; acid no. < 0.2; iodine no. < 2; sapon. no. 220-240; hyd. no. < 6
**Suppocire® NA** [Gattefosse France](http://www.gattefosse.fr)

**Chem. Descrip.**: Semisynthetic glycerides

**Uses**: Excipient for pharmaceutical suppositories

**Features**: Well tolerated; exc. resist. to solvs., essential oils, or liposoluble active ingreds; high mech. resist.; low polymorphism; rancidless

**Regulatory**: USP/NF, EP, JP compliance

**Properties**: Waxy solid; faint odor; m.p. 33-36 C; hyd. no. > 30

---

**Suppocire® NAI 10** [Gattefosse France](http://www.gattefosse.fr)

**Chem. Descrip.**: Semisynthetic glycerides

**Uses**: Excipient for pharmaceutical suppositories

**Features**: Well tolerated; high mech. resist.; low polymorphism; rancidless

**Regulatory**: USP/NF, EP, JP compliance

**Properties**: Waxy solid; faint odor; m.p. 33-36 C; hyd. no. > 30

---

**Suppocire® NA 50** [Gattefosse France](http://www.gattefosse.fr)

**Chem. Descrip.**: Semisynthetic glycerides

**Uses**: Excipient for pharmaceutical suppositories

**Features**: Well tolerated; high mech. resist.; low polymorphism; rancidless

**Regulatory**: USP/NF, EP, JP compliance

**Properties**: Waxy solid; faint odor; m.p. 33-36 C; hyd. no. > 30

---

**Suppocire® NAS 40** [Gattefosse France](http://www.gattefosse.fr)

**Chem. Descrip.**: Semisynthetic glycerides

**Uses**: Excipient for pharmaceutical suppositories

**Features**: Well tolerated; exc. resist. to solvs., essential oils, or liposoluble active ingreds; high mech. resist.; low polymorphism; rancidless

**Regulatory**: USP/NF, EP, JP compliance

**Properties**: Waxy solid; faint odor; m.p. 33-36 C; hyd. no. > 30
Trade Name Reference

Chem. Descrip.: Semisynthetic glycerides

Uses: **Excipient for pharmaceutical suppositories**

Features: Well tolerated; high mech. resist.; low polymorphism; rancidless

Regulatory: USP/NF, EP, JP compliance

Properties: Waxy solid; faint odor; m.p. 33-36 C; hyd. no. > 30

---

Suppocire® NAX [Gattefosse France http://www.gattefosse.fr]

Chem. Descrip.: Semisynthetic glycerides with nonionic emulsifier

Uses: **Excipient for pharmaceutical suppositories**

Features: Well tolerated; exc. resist. to solvs., essential oils, or liposoluble active ingreds; high mech. resist.; low polymorphism; rancidless

Regulatory: USP/NF, EP, JP compliance

Properties: Pastilles; very sol. in diethyl oxide, chloroform, CCl₄, toluene, petrol. ether (40-60 C); sl. sol. in ethanol; insol. in water; sp.gr. 0.955 (20 C); drop pt. 35.5-37.5 C; acid no. < 0.5; iodine no. < 2; sapon. no. 220-240; hyd. no. < 40

---

Suppocire® NB [Gattefosse France http://www.gattefosse.fr]

Chem. Descrip.: Semisynthetic glycerides

Uses: **Excipient for pharmaceutical suppositories**

Features: Well tolerated; exc. resist. to solvs., essential oils, or liposoluble active ingreds; high mech. resist.; low polymorphism; rancidless

Regulatory: USP/NF, EP, JP compliance

Properties: Solid; very sol. in diethyl oxide, chloroform, CCl₄, toluene, petrol. ether (40-60 C); sl. sol. in ethanol; insol. in water; sp.gr. 0.955 (20 C); drop pt. 36.5-38.5 C; acid no. < 0.5; iodine no. < 2; sapon. no. 215-235; hyd. no. 20-30

---

Suppocire® NBL [Gattefosse France http://www.gattefosse.fr]

Chem. Descrip.: Semisynthetic glycerides with phospholipid

Uses: **Excipient for pharmaceutical suppositories**

Features: Well tolerated; exc. resist. to solvs., essential oils, or liposoluble active ingreds; high mech. resist.; low polymorphism; rancidless

Regulatory: USP/NF, EP, JP compliance

Properties: Waxy solid; faint odor; m.p. 38-41 C; hyd. no. 20-30

---

Suppocire® NC [Gattefosse France http://www.gattefosse.fr]

Chem. Descrip.: Semisynthetic glycerides

Uses: **Excipient for pharmaceutical suppositories**

Features: Well tolerated; exc. resist. to solvs., essential oils, or liposoluble active ingreds; high mech. resist.; low polymorphism; rancidless

Regulatory: USP/NF, EP, JP compliance

Properties: Solid; very sol. in diethyl oxide, chloroform, CCl₄, toluene, petrol. ether (40-60 C); sl. sol. in ethanol; insol. in water; sp.gr. 0.955 (20 C); drop pt. 39-41 C; acid no. < 0.5; iodine no. < 2; sapon. no. 220-240; hyd. no. 20-30

---

Suppocire® ND [Gattefosse France http://www.gattefosse.fr]
Trade Name Reference

http://www.gattefosse.fr
Chem. Descrip.: Semisynthetic glycerides
Uses: Excipient for pharmaceutical suppositories
Features: Well tolerated; exc. resist. to solvs., essential oils, or liposoluble active ingreds.; high mech. resist.; low polymorphism; rancidless
Regulatory: USP/NF, EP, JP compliance
Properties: Waxy solid; faint odor; very sol. in diethyl oxide, chloroform, CCl4, toluene, petrol. ether (40-60 C); sl. sol. in ethanol; insol. in water; sp.gr. 0.955 (20 C); drop pt. 42-45 C; acid no. < 0.5; iodine no. < 2; sapon. no. 210-230; hyd. no. 20-30

Chem. Descrip.: Platy talc USP
Chem. Analysis: SiO2 (60.4%), MgO (32%)
CAS 14807-96-6; EINECS/ELINCS 238-877-9
Uses: Filler in pharmaceuticals, antiperspirants, creams, lotions
Features: Extremely platy talc with high brightness, exc. slip; recommended for formulations with very sensitive fragrances and pigments
Properties: Wh. fine powd.; 12 µ median diam.; 99% through 200 mesh; dens. 62 lb/ft3 (tapped); TAPPI brightness 89; pH 9 (10% slurry)

Chem. Descrip.: Platy talc USP
Chem. Analysis: SiO2 (60.4%), MgO (32%), Al2O3 (3%), Fe2O3 (1%)
CAS 14807-96-6; EINECS/ELINCS 238-877-9
Uses: Filler, slip agent for pharmaceuticals, antiperspirants, creams, lotions
Features: Extra fine, extremely platy talc; exc. brightness, purity, surface passivity
Properties: Powd.; 8 µ median diam.; 99.6% through 200 mesh; tappd dens. 59 lb/ft3; TAPPI brightness 88; pH 9 (10% slurry)

Chem. Descrip.: Talc USP
CAS 14807-96-6; EINECS/ELINCS 238-877-9
Uses: Filler in pharmaceuticals (tablets, medicated foot powds., creams/lotions/ointments); lubricant, glidant in tablet coatings; release agent in tablet molds
Features: Inert
Regulatory: DOT nonhazardous
Properties: Wh. to grayish-wh. fine powd.; 5 µ median particle size; 98% through 325 mesh; sl. earthy odor; sol. in hot, conc. phosphoric acid; insol. in water, cold acids and alkalis; sp.gr. 2.7-2.8; dens. 62 lb/ft3 (tapped), 26 lb/ft3 (loose); surf. area 4.0 m2/g; oil absorp. 27; brightness 94; pH sl. alkaline; hardness (Mohs) 1.0-1.5; 0.4% max. moisture
Toxicology: ACGIH TWA/TLV 2 mg/m3 (respirable dust); inh. of lg. amts. of dust may cause mucous membranes/respiratory tract irritation; chronic exposure may cause pulmonary fibrosis, shortness of breath, chronic cough, heart failure, pneumoconiosis; tumorigen; TSCA listed
Precaution: Very slippery when wet
Hazardous Ingredients: May contain 0-3% of: dolomite, chloride, calcite, magnesite
Hazardous Decomp. Prods.: None
HMIS: Health 1, Flammability 0, Reactivity 0
Storage: Store in sealed containers

Chem. Descrip.: Talc USP
Chem. Analysis: SiO2 (59%), MgO (30%), Al2O3 (3%), Fe2O3 (1%)
CAS 14807-96-6; EINECS/ELINCS 238-877-9
Uses: Filler for pharmaceuticals, antiperspirants, creams and lotions, aerosols
Features: Extremely platy talc with high slip, brightness, and purity
Properties: Wh. fine powd.; 5 µ median diam.; 99.9% min. through 325 mesh; dens. 44 lb/ft3 (tapped); TAPPI brightness 91; pH 9 (10% slurry)

Chem. Descrip.: Talc USP
CAS 14807-96-6; EINECS/ELINCS 238-877-9
Uses: Filler in pharmaceuticals (tablets, medicated foot powds., creams/lotions/ointments); lubricant, glidant in tablet coatings; release agent in tablet molds
Features: Inert
Regulatory: DOT nonhazardous
Properties: Wh. to grayish-wh. fine powd.; 5 µ median particle size; 98% through 325 mesh; sl. earthy odor; sol. in hot, conc. phosphoric acid; insol. in water, cold acids and alkalis;
Trade Name Reference

sp.gr. 2.7-2.8; dens. 42 lb/ft³ (tapped), 16 lb/ft³ (loose); surf. area 5.5 m²/g; oil absorp. 33; brightness 95; pH sl. alkaline; hardness (Mohs) 1.0-1.5; 0.4% max. moisture

Toxicology: ACGIH TWA/TLV 2 mg/m³ (respirable dust); inh. of lg. amts. of dust may cause mucous membranes/respiratory tract irritation; chronic exposure may cause pulmonary fibrosis, shortness of breath, chronic cough, heart failure, pneumoconiosis; tumorigen; TSCA listed

Precaution: Very slippery when wet

Hazardous Ingredients: May contain 0-3% of: dolomite, chlorite, calcite, magnesite

HMIS: Health 1, Flammability 0, Reactivity 0

Storage: Store in sealed containers

Chem. Descrip.: Talc
CAS 14807-96-6; EINECS/ELINCS 238-877-9
Uses: Filler for antiperspirants
Properties: Wh. fine powd.; 7 µ median particle size; bulk dens. 22 lb/ft³ (loose); brightness (GE) 88

Surelease® [Colorcon http://www.colorcon.com]

Chem. Descrip.: Aq. fully plasticized liq. disp. of ethylcellulose
CAS 9004-57-3
Uses: Barrier coating for pharmaceutical controlled-release coatings, taste masking coatings, moisture protection, granulating apps., sealant/barrier coatings; binder for wet granulation
Properties: Provides pH-independent drug release
Regulatory: USP, EP
Environmental: Environmentally friendly

Sureteric™ [Colorcon http://www.colorcon.com]

Chem. Descrip.: Aq. blend of polyvinyl acetate phthalate, plasticizers, and other ingreds.
Uses: Enteric coating, film-former for pharmaceutical solid oral dosage forms incl. tablets, hard and soft gelatin capsules, and granules
Properties: Controlled release; provides optimum film-forming chars., resist. to gastric fluids, coated tablet stability
Storage: Re-evaluate after 1 yr from date of manufacture; keep @ 15-30 C ≤ 75% r.h.

Surfadone® LP-300 [ISP]

http://www.ispcorp.com]
Chem. Descrip.: Lauryl pyrrolidone (99%)
CAS 2687-96-9; EINECS/ELINCS 403-730-1
UN 1760
Uses: Absorption enhancer in pharmaceuticals
Features: VOC replacement

Environmental: DOT regulated; Canada DSL; ELINCS; Australia AICS

Properties: Pale yel. low visc., cl. to sl. hazy liq.; sol. in polar and nonpolar solvs. incl. ethanol, acetone, xylene, heptane, paraffin oil, Stod., perchloroethylene; sparingly sol. in water; m.w. 253; sp.gr. 0.90; b.p. 145 C (0.2 mm Hg); solid. pt. 10 C; HLB 3; flash pt. (TCC) 116 C; surf. tens. 26 dynes/cm; Draves wetting > 300 s (0.1%); Ross-Miles foam 13 mm (initial, 0.1%); nonionic; 97% min. act.

Use Level: 1-2%

Toxicology: LD50 (oral, rat) > 5 g/kg, (dermal, rabbit) > 2 g/kg; causes mouth, throat, stomach burns, permanent skin damage; not a primary skin or eye irritant; noncomedogenic; nonphotoallergenic; nonphototoxic; nonmutagenic; TSCA listed

Environmental: LC50 (bluegill sunfish, 96 h) 0.93 mg/l; EC50 (daphnia magna, 48 h) 0.27 mg/l, (elenatrum capricornutum, 96 h) 0.053 mg/l

Precaution: Corrosive; wear chemical goggles, impervious gloves

Surehope® SE Pharma D-1216 [Mitsubishi-Kagaku Foods http://www.mfc.co.jp/]

Chem. Descrip.: Sucrose laurate
CAS 25339-99-5; EINECS/ELINCS 246-873-3
Uses: Emulsifier and solubilizer for pharmaceuticals
Features: Yields heat-stable emulsions

Environmental: Environmentally friendly

Surehope® SE Pharma D-1615 [Mitsubishi-Kagaku Foods http://www.mfc.co.jp/]

Chem. Descrip.: Sucrose palmitate
CAS 26446-38-8; EINECS/ELINCS 247-706-7
Uses: Emulsifier for pharmaceuticals
Features: Yields heat-stable emulsions

Environmental: Environmentally friendly
Trade Name Reference

combined fatty acid; 70% mono ester, 30% di, tri, poly ester
Environmental: Environmentally friendly

Chem. Descrip.: Sucrose palmitate
CAS 26446-38-8; EINECS/ELINCS 247-706-7
Uses: Emulsifier, solubilizer for pharmaceuticals, microemulsions, o/w creams; dispersant for tablets
Features: Yields heat-stable emulsions
Properties: Powd.; HLB 7; nonionic; 70% purity combined fatty acid; 40% mono ester, 60% di, tri, poly ester
Environmental: Environmentally friendly

Chem. Descrip.: Sucrose stearate
CAS 25168-73-4; EINECS/ELINCS 246-705-9
Uses: Emulsifier for pharmaceuticals
Features: Yields heat-stable emulsions
Properties: Powd.; HLB 9; nonionic; 70% purity combined fatty acid; 50% mono ester, 50% di, tri, poly ester
Environmental: Environmentally friendly

Surfhope® SE Pharma D-1803 [Mitsubishi-Kagaku Foods http://www.mfc.co.jp/]
Chem. Descrip.: Sucrose stearate
CAS 25168-73-4; EINECS/ELINCS 246-705-9
Uses: Emulsifier, crystallization promoter for pharmaceuticals; lubricant for tablets
Features: Yields heat-stable emulsions
Properties: Powd.; HLB 16; nonionic; 80% purity combined fatty acid; 80% mono ester, 20% di, tri, poly ester
Environmental: Environmentally friendly

Chem. Descrip.: Sucrose stearate
CAS 25168-73-4; EINECS/ELINCS 246-705-9
Uses: Emulsifier, crystallization promoter for pharmaceuticals; lubricant for tablets
Features: Yields heat-stable emulsions
Properties: Powd.; HLB 15; nonionic; 70% purity combined fatty acid; 20% mono ester, 80% di, tri, poly ester
Environmental: Environmentally friendly

Surfhope® SE Pharma D-1815 [Mitsubishi-Kagaku Foods http://www.mfc.co.jp/]
Chem. Descrip.: Sucrose stearate
CAS 25168-73-4; EINECS/ELINCS 246-705-9
Uses: Emulsifier for pharmaceuticals; dispersant for tablets
Features: Yields heat-stable emulsions
Properties: Powd.; HLB 15; nonionic; 70% purity combined fatty acid; 30% mono ester, 30% di, tri, poly ester
Environmental: Environmentally friendly

Surfhope® SE Pharma D-1816 [Mitsubishi-Kagaku Foods http://www.mfc.co.jp/]
Chem. Descrip.: Sucrose stearate
CAS 25168-73-4; EINECS/ELINCS 246-705-9
Uses: Emulsifier, solubilizer for pharmaceuticals, microemulsions, o/w creams; dispersant for tablets
Features: Yields heat-stable emulsions
Properties: Powd.; HLB 16; nonionic; 70% purity combined fatty acid; 75% mono ester, 25% di, tri, poly ester
Environmental: Environmentally friendly
**Trade Name Reference**

**Sylysia 310P** [Fuji Silysia http://www.fuji-silysia.co.jp]
Chem. Descrip.: Syn. amorphous silica
Chem. Analysis: SiO₂ (99.5%)
CAS 112926-00-8; EINECS/ELINCS 231-545-4
Uses: Moisture control agent, anticaking agent in pharmaceuticals

Uses: Carrier, moisture control agent,

**Sylysia 320** [Fuji Silysia http://www.fuji-silysia.co.jp]
Chem. Descrip.: Syn. amorphous silica
Chem. Analysis: SiO₂ (99.5%)
CAS 112926-00-8; EINECS/ELINCS 231-545-4
Uses: Moisture control agent, anticaking agent in pharmaceuticals

Properties: Wh. powd., odorless, tasteless; 2.7 µm avg. particle size; sp.gr. 2.15; surf. area 300 m²/g; oil absorp. 310 ml/100 g; brightness 92; ref. index 1.46; pH 3.0 (5% slurry)

Toxicology: Dust may cause irritation of skin, mucous membranes; LD50 (oral, rat) > 31,000 mg/kg (48 h), (dermal, rabbit) > 2000 mg/kg (48 h); ACGIH TLV 6 mg/m³ (total dust); very low oral toxicity; not considered an ocular irritant

Environmental: Not known to have any adverse effect on aquatic environment

Precaution: Nonflamm.; reacts with HF
HMIS: Health 0, Flammability 0, Reactivity 0
Storage: Keep tightly sealed to protect quality

**Sylysia 350** [Fuji Silysia http://www.fuji-silysia.co.jp]
Chem. Descrip.: Syn. amorphous silica
Chem. Analysis: SiO₂ (99.5%)
CAS 112926-00-8; EINECS/ELINCS 231-545-4
Uses: Moisture control agent, anticaking agent in pharmaceuticals

Regulatory: FDA 21CFR §160.105, 160.182, 172.480; USDA cleared for certain uses in salt and seasonings, curing mixts. for meat/poultry

Properties: Wh. free-flowing powd., odorless, tasteless; 1.7-2.1 µm avg. particle size; 0.05% max. 45 µ sieve; insol. in water; sp.gr. 2.1; surf. area 300-350 ml/100 g (linseed oil); brightness 95 min.; ref. index 1.46; pH 6.8-8.0 (5% ag. slurry)

Toxicology: Dust may cause irritation of skin, mucous membranes; LD50 (oral, rat) > 31,000 mg/kg (48 h), (dermal, rabbit) > 2000 mg/kg (48 h); ACGIH TLV 6 mg/m³ (total dust); very low oral toxicity; not considered an ocular irritant

Environmental: Not known to have any adverse effect on aquatic environment

Precaution: Nonflamm.; reacts with HF
HMIS: Health 0, Flammability 0, Reactivity 0
Storage: Keep tightly sealed to protect quality

**Sylysia 370** [Fuji Silysia http://www.fuji-silysia.co.jp]
Chem. Descrip.: Syn. amorphous silica

Chem. Analysis: SiO₂ (99.7%)

CAS 112926-00-8; EINECS/ELINCS 231-545-4

Uses: Carrier, moisture control agent, anticaking agent in pharmaceuticals

Properties: Wh. powd., odorless, tasteless; 3.5 µm avg. particle size; sp.gr. 2.15; surf. area 700 m²/g; oil absorb. 95 ml/100 g; brightness 95; ref. index 1.46; pH 4.0 (5% slurry)

Precaution: Dissolves in HF and strong bases

Sympatens-ALM/030 [Dr. W. Kolb AG http://www.kolb.ch]

Chem. Descrip.: Laureth-3

CAS 9002-92-0; EINECS/ELINCS 221-280-2

Uses: Solubilizer, consistency-giving and cleaning agent in pharmaceuticals

Properties: Liq.; HLB 8; nonionic

Precaution: Dissolves in HF and strong bases

Sympatens-ALM/V/114/99 [Dr. W. Kolb AG http://www.kolb.ch]

Chem. Descrip.: Laureth-3

CAS 68439-50-9; EINECS/ELINCS 221-280-2
Trade Name Reference

Uses: Solubilizer, consistency-giving and cleaning agent in pharmaceuticals
Properties: Liq.; HLB 8; nonionic

Sympatens-PEG/400 [Dr. W. Kolb AG
http://www.kolb.ch]
Chem. Descrip.: PEG-8
CAS 25322-68-3; EINECS/ELINCS 225-856-4
Uses: Solubilizer, stabilizer for skin, mouth care prod., pharmaceuticals
Properties: Liq.; HLB 8; nonionic

Sympatens-TR/350 [Dr. W. Kolb AG
http://www.kolb.ch]
Chem. Descrip.: PEG-35 castor oil
CAS 61791-12-6
Uses: Emulsifier, dispersant, solubilizer for pharmaceuticals
Properties: Liq.; nonionic

Synative FA C 8/98-100 [Cognis
http://www.cognis.de]
Chem. Descrip.: Caprylic acid
CAS 124-07-2; EINECS/ELINCS 204-677-5
Uses: Pharmaceuticals; flavors
Properties: Lt. liq.; typ. odor; acid no. 387-391; iodine no. 0-0.3; sapon. no. 387-392; 0-0.2% water
Storage: 1 yr. shelf life when stored in sealed original drums @ 30 C max.; 1 mo shelf life when stored in refined steel or aluminum tanks @ 20-30 C

Synative FA U 122 [Cognis
http://www.cognis.de]
Chem. Descrip.: Erucic acid
CAS 112-86-7; EINECS/ELINCS 204-011-3
Uses: Pharmaceuticals; flavors
Properties: Wh.; lt. odor; acid no. 163-167; iodine no. 74-78; sapon. no. 163-169; 0-0.2% water
Storage: 1 yr. shelf life when stored in original sealed drums below 30 C; 1 mo shelf life when stored in refined steel or aluminum tanks @ 45-55 C; 3 mos. shelf life when kept under nitrogen blanket

Synative FA V 85 [Cognis
http://www.cognis.de]
Chem. Descrip.: Caprylic acid/capric acid

Uses: Pharmaceuticals; flavors
Properties: Colorless liq.; typ. odor; acid no. 359-367; iodine no. 0-0.5; sapon. no. 359-368; 0-0.2% water
Storage: 6 mos. shelf life when stored in sealed original drums; 2 wk shelf life when stored in refined steel tanks; 4 wks shelf life when stored under nitrogen blanket

Syncal® CaS [PMC Spec.
http://www.pmcsg.com]
Chem. Descrip.: Calcium saccharin
USP/FCC/BP
CAS 6485-34-3; EINECS/ELINCS 229-349-9
Uses: Syn. sweetening agent for toothpastes, mouthwashes, pharmaceuticals
Regulatory: FDA 21CFR §180.37; BP compliance
Properties: Wh. fine free-flowing powd.; m.w. 404.45; 98% min. assay
Storage: Avoid excessive heat and humidity on storage to prevent caking

Syncal® GS [PMC Spec.
http://www.pmcsg.com]
Chem. Descrip.: Sodium saccharin
USP/FCC/BP See Saccharin sodium anhydrous
CAS 128-44-9; EINECS/ELINCS 204-886-1
Uses: Syn. sweetening agent for toothpastes, mouthwashes, pharmaceuticals
Regulatory: FDA 21CFR §180.37; BP compliance
Properties: Wh. nondusting, free-flowing gran., uniformly sized particles, odorless; sol. 46% in water; m.w. 241.20; sp.gr. > 1; 98-101% assay
 Toxicology: LD50 (oral, rat) 14,200 mg/kg; nuisance dust ACGIH 10 mg/m³; potential for foreign body irritation to eyes, skin, respiratory tract; suspect carcinogen in rats on extreme exposure
Precaution: Incompat. with oxidizing agents; hazardous decomp. prods.: CO, NOx, SO2
Storage: Avoid excessive heat and humidity on storage to prevent caking
Chem. Descrip.: Sodium saccharin USP/FCC/BP See Saccharin sodium anhydrous
CAS 128-44-9; EINECS/ELINCS 204-886-1
Uses: Syn. sweetening agent for toothpastes, mouthwashes, pharmaceuticals
Regulatory: FDA 21CFR §180.37; BP compliance
Properties: Wh. fine cryst. powd., odorless; m.w. 205.17; sp.gr. > 1; 98-101% assay
Toxicology: LD50 (oral, rat) 14,200 mg/kg; nuisance dust ACGIH 10 mg/m3; potential for foreign body irritation to eyes, skin, respiratory tract; suspect carcinogen in rats on extreme exposure
Precaution: Incompat. with oxidizing agents; hazardous decomp. prods.: CO, NOx, SO2
Storage: Avoid excessive heat and humidity on storage to prevent caking

Chem. Descrip.: Saccharin insoluble USP/FCC/BP
CAS 81-07-2; EINECS/ELINCS 201-321-0
Uses: Syn. sweetening agent for toothpastes, mouthwashes, pharmaceuticals
Regulatory: FDA 21CFR §180.37; BP compliance
Properties: Wh. powd., odorless; sol. 0.03% in water; m.w. 183.18; sp.gr. > 1; m.p. 226-230 C; 98-101% assay
Toxicology: Nuisance dust ACGIH 10 mg/m3
Precaution: Incompat. with oxidizing agents
Storage: Avoid excessive heat and humidity to prevent caking

Chem. Descrip.: Sodium saccharin USP/FCC/BP See Saccharin sodium anhydrous
CAS 128-44-9; EINECS/ELINCS 204-886-1
Uses: Syn. sweetening agent for toothpastes, mouthwashes, pharmaceuticals; for applics. requiring free flow chars. and low degree of dust
Regulatory: FDA 21CFR §180.37; USP/FCC/BP compliance
Properties: Wh. fine free-flowing spray-dried powd.; very fine particle size; sol. 46% in water; m.w. 205.17; sp.gr. > 1; 98-101% assay
Toxicology: Nuisance dust TLV 10 mg/m3
Precaution: Incompat. with oxidizing agents
Storage: Avoid excessive heat on storage to prevent caking

Syncrowax BB4 [Croda Inc http://www.croda.com; http://www.crodausa.com; Croda Chem. Europe Ltd http://www.croda.co.uk]
Chem. Descrip.: Synthetic beeswax See Beeswax, synthetic
CAS 71243-51-1; EINECS/ELINCS 275-286-5
Uses: Viscosity builder and emulsion stabilizer in pharmaceutical creams and ointments
Properties: Pale cream waxy flakes; oil-sol.; m.p. 60-65 C
Use Level: 1-5%

Syncrowax ERLC [Croda Inc http://www.croda.com; http://www.crodausa.com; Croda Chem. Europe Ltd http://www.croda.co.uk]
Chem. Descrip.: C18-36 acid glycol ester
CAS 94944-95-3; EINECS/ELINCS 305-673-7
Uses: Emulsifier, emollient, opacifier, lubricant, stabilizer, suspending agent, thickener, gloss aid for topical pharmaceuticals, anhyd. systems; stiffener for stick formulations
Features: Similar to candelilla; reduces bleeding and sweating
Properties: Pale yel. solid; mild waxy odor; m.p. 70-75 C; HLB 5.20; acid no. 10-15; iodine no. 3 max.; sapon. no. 155-160
Use Level: 1-4%

Syncrowax HGLC [Croda Inc http://www.croda.com; http://www.crodausa.com; Croda Chem. Europe Ltd http://www.croda.co.uk]
Chem. Descrip.: C18-36 acid triglyceride
CAS 91052-08-3; EINECS/ELINCS 293-165-5
Uses: Emulsifier, emollient, opacifier, lubricant, suspending agent, strength improver, stabilizer, gloss aid for topical pharmaceuticals; stiffener for stick formulations
Features: Hard complex triglyceride wax; props. like carnauba
Properties: Lt. tan pastille; mild waxy odor; m.p.
Trade Name Reference

Syncrowax HR-C [Croda Inc
http://www.croda.com;
http://www.crodausa.com; Croda Chem.
Europe Ltd http://www.croda.co.uk]
Chem. Descrip.: Tribehenin
CAS 18641-57-1; EINECS/ELINCS 242-471-7
Uses: Emulsifier, emollient, opacifier,
suspending agent, stabilizer, stiffener,
thickener, gloss aid for oral and topical
pharmaceuticals
Features: Props. like beeswax; softest in range
Regulatory: FDA 21CFR §184.1555, GRAS
Properties:

70-75 C; HLB 6.43; acid no. 6-12; iodine no. 3
max.; sapon. no. 160-175
Use Level: 4-12%

Synperonic® L2 [Uniqema
http://www.uniqema.com; Uniqema Am.
http://www.uniqema.com]
Chem. Descrip.: Laureth-2
CAS 9002-92-0; EINECS/ELINCS 221-279-7
Uses: Detergent, emulsifier, rheology control
agent for pharmaceuticals
Properties: Colorless liq.; sol. in ethanol,
kerosene, chloroform, CCl4; insol. in water;
sp.gr. 0.901 (20 C); m.p. 8 C; HLB 5.9; acid
no. 0.2 max.; hyd. no. 203; cloud pt. 49 C
(10% in 25% BDG); nonionic; 100% act.
Environmental: Fully biodeg.

Synermonic® L11 [Uniqema
http://www.uniqema.com; Uniqema Am.
http://www.uniqema.com]
Chem. Descrip.: Laureth-11
CAS 9002-92-0
Uses: Emulsifier, rheology control agent in
pharmaceuticals
Properties: Colorless solid; sol. in water, ethanol,
chloroform, CCl4; insol. in kerosene; sp.gr.
0.983 (50 C); m.p. 25 C; HLB 14.0; acid no.
0.2 max.; hyd. no. 85; cloud pt. 87 C (1% aq.);
surf. tens. 32.8 mN/m (0.1%); Draves wetting
41 s (0.1%); Ross-Miles foam 113 mm (initial,
50 ppm CaCO3); nonionic; 100% act.
Environmental: Fully biodeg.

Synermonic® NP8 [Uniqema
http://www.uniqema.com; Uniqema Am.
http://www.uniqema.com]
Chem. Descrip.: Nonoxynol-8
CAS 9016-45-9
Uses: Emulsifier for creams, lotions;
solubilizer for topical pharmaceuticals
Properties: Pale yel. liq.; sol. in water, alcohol,
glycol ethers; dens. 1.053 g/ml; visc. 355 cps;
HLB 12.3; cloud pt. 30-34 C (1% aq.); pour pt.
< 0 C; surf. tens. 29.4 dynes/cm (0.1%); pH 6-
8 (1% aq.); nonionic; 99% min. act.

Synermonic® NP15 [Uniqema
http://www.uniqema.com; Uniqema Am.
http://www.uniqema.com]
Chem. Descrip.: Nonoxynol-15
CAS 9016-45-9
Uses: Emulsifier for creams, lotions;
solubilizer for topical pharmaceuticals
Properties: Pale yel. paste; sol. in water, alcohol,
glycol ethers; dens. 1.058 g/ml (40 C); visc.
168 cps (40 C); HLB 15.0; cloud pt. > 100 C
(1% aq.); pour pt. 30 C; surf. tens. 41.7
dynes/cm; pH 6-8 (1% aq.); nonionic; 99%
inact.

Synermonic® NP20 [Uniqema
http://www.uniqema.com; Uniqema Am.
http://www.uniqema.com]
Chem. Descrip.: Nonoxynol-20
CAS 9016-45-9
Uses: Emulsifier for creams, lotions;
solubilizer for topical pharmaceuticals
Properties: Pale yel. solid; sol. in water, alcohol,
glycol ethers; dens. 1.073 g/ml (40 C); visc.
198 cps (40 C); HLB 16.3; cloud pt. > 100 C
(1% aq.); pour pt. 30 C; surf. tens. 41.7
dynes/cm; pH 6-8 (1% aq.); nonionic; 100%
inact.

Synermonic® NP35 [Uniqema
http://www.uniqema.com; Uniqema Am.
http://www.uniqema.com]
Chem. Descrip.: Nonoxynol-35
CAS 9016-45-9
Uses: Emulsifier for creams, lotions;
solubilizer for topical pharmaceuticals
Properties: Pale yel. solid; sol. in water, alcohol,
glycol ethers; dens. 1.087 g/ml (40 C); visc.
242 cps (40 C); HLB 17.5; cloud pt. > 100 C
(1% aq.); pour pt. 40 C; surf. tens. 41.7
dynes/cm; pH 6-8 (1% aq.); nonionic; 100%
inact.
Synperonic® NP50 [Uniqema
http://www.uniqema.com; Uniqema Am.
http://www.uniqema.com]
Chem. Descrip.: Nonoxynol-50
CAS 9016-45-9
Uses: Emulsifier for creams, lotions; solubilizer for topical pharmaceuticals
Properties: Pale yel. solid; HLB 18.2; nonionic; 100% conc.

Synperonic® OP7.5 [Uniqema
http://www.uniqema.com; Uniqema Am.
http://www.uniqema.com]
Chem. Descrip.: Octoxynol-8
CAS 9002-93-1
Uses: Emulsifier for creams, lotions; solubilizer for topical pharmaceuticals
Properties: Pale yel. liq.; HLB 11.7; nonionic; 100% conc.

Synperonic® OP10 [Uniqema
http://www.uniqema.com; Uniqema Am.
http://www.uniqema.com]
Chem. Descrip.: Octoxynol-10
CAS 9002-93-1
Uses: Emulsifier for creams, lotions; solubilizer for topical pharmaceuticals
Properties: Pale yel. solid; HLB 16.2; nonionic

Synperonic® OP40 70% [Uniqema
http://www.uniqema.com; Uniqema Am.
http://www.uniqema.com]
Chem. Descrip.: Octoxynol-40
CAS 9002-93-1
Uses: Emulsifier for creams, lotions; solubilizer for topical pharmaceuticals
Properties: Liq.; HLB 17.4; nonionic; 70% conc.
**Trade Name Reference**

**consistency agent for topical pharmaceuticals, mouthwashes**

**Regulatory:** CERCLA, RCRA nonreportable; CA Prop. 65

**Properties:** Wh. flake; sol. in water, ethanol; partly sol. in toluene; m.w. 14,000; sp.gr. 1.06; m.p. 59 C; hyd. no. 7.7; cloud pt. > 100 C (10% aq.); pH 6.3 (2.5% aq.); surf. tens. 38 mN/m (0.1%, 20 C); Draves wetting > 360 s (0.1%); Ross-Miles foam 67 mm (initial, 0.1%); nonionic; 100% conc.

**Precaution:** Wear safety glasses with side shields; incompat. with oxidizers

**Hazardous Decomp. Prods.:** CO, CO2

**Storage:** Normal chemical handling and storage

Chem. Descrip.: Poloxamer 407
CAS 9003-11-6

Uses: Surfactant, wetting agent, o/w emulsifier, dispersant, solubilizer, consistency agent for topical pharmaceuticals, mouthwashes

Properties: Wh. flake; sol. in water, ethanol, toluene; m.w. 12,000; sp.gr. 1.05; m.p. 56 C; hyd. no. 10; cloud pt. > 100 C (10% aq.); pH 6.3 (2.5% aq.); surf. tens. 40.8 mN/m (0.1%, 20 C); Draves wetting > 360 s (0.1%); Ross-Miles foam 65 mm (initial, 0.1%); nonionic; 100% conc.

**Synperonic® PE/L44** [Uniqema http://www.uniqema.com]

Chem. Descrip.: Poloxamer 124
CAS 9003-11-6

Uses: Surfactant, wetting agent, o/w emulsifier, dispersant, detergent for topical pharmaceuticals and oral care

Properties: Colorless liq.; sol. in ethanol, toluene; m.w. 2200; sp.gr. 1.05; hyd. no. 51; pour pt. 16 C; cloud pt. 71 C (10% aq.); pH 6.3 (2.5% aq.); surf. tens. 34.5 mN/m (0.1%, 20 C); Draves wetting > 360 s (0.1%); Ross-Miles foam 76 mm (initial, 0.1%); nonionic; 100% conc.

Chem. Descrip.: Poloxamer 181
CAS 9003-11-6

Uses: Antifoam for fermentation, antibiotics, oral care

Features: Multiuse

Properties: Colorless liq.; sol. in ethanol, toluene; partly sol. in kerosene; insol. in water; m.w. 2100; sp.gr. 1.02; hyd. no. 53; pour pt. -30 C; cloud pt. 17 C (10% aq.); pH 6.3 (2.5% aq.); surf. tens. 36.6 mN/m (0.1%, 20 C); Ross-Miles foam 5 mm (initial, 0.1%); nonionic; 100% conc.

Chem. Descrip.: Poloxamer 231
CAS 9003-11-6

Uses: Antifoam for fermentation, antibiotics; o/w emulsifier, dispersant for topical pharmaceuticals

Features: Multiuse

Properties: Colorless liq.; sol. in ethanol, toluene; partly sol. in kerosene; insol. in water; m.w. 2750; sp.gr. 1.02; hyd. no. 41; pour pt. -27 C; cloud pt. 16 C (10% aq.); pH 6.3 (2.5% aq.); surf. tens. 35 mN/m (0.1%, 20 C); Ross-Miles foam 9 mm (initial, 0.1%); nonionic; 100% conc.

Chem. Descrip.: Poloxamer 331
CAS 9003-11-6

Uses: Antifoam for fermentation, antibiotics

Features: Multiuse

Properties: Colorless liq.; sol. in ethanol, toluene; insol. in water, ethylene glycol; m.w. 3800; sp.gr. 1.02; hyd. no. 29.5; pour pt. -9 C; cloud pt. 11 C (10% aq.); pH 6.3 (2.5% aq.); surf. tens. 32.4 mN/m (0.1%, 20 C); Ross-Miles foam 17 mm (initial, 0.1%); nonionic; 100% conc.

Chem. Descrip.: Poloxamer 401
CAS 9003-11-6

Uses: Antifoam for fermentation, antibiotics

Features: Multiuse

Properties: Colorless liq.; sol. in ethanol, toluene; insol. in water, ethylene glycol; m.w. 4400; sp.gr. 1.02; hyd. no. 25.5; pour pt. -6 C; cloud pt. 10 C (10% aq.); pH 6.3 (2.5% aq.); surf. tens. 32.5 mN/m (0.1%, 20 C); Ross-Miles foam 24 mm (initial, 0.1%); nonionic; 100% conc.
Trade Name Reference

**Chem. Descr.: Poloxamer 235**
CAS 9003-11-6

**Uses:** Surfactant, wetting agent, emulsifier, demulsifier, dispersant for pharmaceuticals, mouthwashes

**Properties:** Wh. paste; sol. in water, ethanol, toluene; m.w. 4650; sp.gr. 1.04; hyd. no. 23.5; pour pt. 29 C; cloud pt. 86 C (10% aq.); pH 6.3 (2.5% aq.); surf. tens. 37.4 mN/m (0.1%, 20 C); Draves wetting > 360 s (0.1%); Ross-Miles foam 76 mm (initial, 0.1%); nonionic; 100% conc.

**Chem. Descr.: Poloxamine 701**
CAS 11111-34-5

**Uses:** Antifoam for fermentation, antibiotics

**Properties:** Yel. liq.; insol. in water; m.w. 3700; sp.gr. 1.02; hyd. no. 61.5; pour pt. -24 C; cloud pt. 16.5 C (10% aq.); pH 10 (2.5% aq.); surf. tens. 34.2 mN/m (0.5%, 20 C); Ross-Miles foam 3 mm (initial, 0.1%); nonionic; 100% conc.

**Chem. Descr.: Poloxamine 1301**
CAS 11111-34-5

**Uses:** Antifoam for fermentation, antibiotics

**Properties:** Yel. liq.; insol. in water; m.w. 6900; sp.gr. 1.02; hyd. no. 33; pour pt. -15 C; cloud pt. 12.5 C (10% aq.); pH 10 (2.5% aq.); surf. tens. 33 mN/m (0.5%, 20 C); Ross-Miles foam 9 mm (initial, 0.1%); nonionic; 100% conc.

**Synpro® Aluminum Monostearate NF** [Ferro/Polymer Addit. http://www.ferro.com]

**Chem. Descr.: Aluminum monostearate NF**
See Aluminum stearate

**CAS 7047-84-9; EINECS/ELINCS 230-325-5**

**Uses:** Lubricant, gellant in oil-based pharmaceuticals

**Properties:** Powd.; 98% through 200 mesh; 15.3% assay (as Al2O3); 1.6% loss on drying

**Synpro® Calcium Stearate NF** [Ferro/Polymer Addit. http://www.ferro.com]

**Chem. Descr.: Calcium stearate NF**

**CAS 1592-23-0; EINECS/ELINCS 216-472-8**

**Uses:** Lubricant in pharmaceuticals, ointments, tableting operations

**Regulatory:** FDA 21CFR §177.2600, 178.2010

**Properties:** Wh. free-flowing fine powd.; 99% through 325 mesh; mild fatty odor; negligible sol. in water; sp.gr. > 1.0; apparent dens. 0.2 g/cc; m.p. 155 C; flash pt. (PMCC) > 500 F; 2.7% moisture

**Toxicology:** TLV 10 mg/m³; inh. of dust can cause discomfort of nose, throat, upper respiratory tract, coughing, choking; eye contact and prolonged skin contact may cause irritation; ingestion may cause gastrointestinal discomfort

**Precaution:** Incompat. with strong oxidizing agents; decomp. prods.: CO2, CaO; dust explosions can occur in presence of ignition source

**Storage:** Store in cool, dry area away from heat, spark or flame

**Synpro® Calcium Stearate NF Vegetable Grade** [Ferro/Polymer Addit. http://www.ferro.com]

**Chem. Descr.: Calcium stearate NF**

**CAS 1592-23-0; EINECS/ELINCS 216-472-8**

**Uses:** Excipient in pharmaceuticals; internal mold release agent, lubricant in pharmaceutical tablets
Properties: Wh. fine powd.; 99.9% through 325 mesh; 7.0 µ median particle size; 9.6% assay (as CaO); 2.8% moisture

Synpro® Magnesium Stearate NF
Chem. Descrip.: Magnesium stearate NF
CAS 557-04-0; EINECS/ELINCS 209-150-3
Uses: Lubricant in pharmaceuticals, ointments, tableting operations
Regulatory: FDA 21CFR §181.29, etc.
Properties: 85% through 200 mesh; 3.4% moisture

Synpro® Magnesium Stearate NF Veg.
Chem. Descrip.: Magnesium stearate NF
CAS 557-04-0; EINECS/ELINCS 209-150-3
Uses: Excipient in pharmaceuticals, ointments; internal mold release agent, lubricant in tableting operations; anticaking agent, flow aid in aerosols
Regulatory: FDA 21CFR §181.29
Properties: Wh. fine free-flowing powd.; 99.9% through 325 mesh; mild fatty odor; negligible sol. in water; sp.gr. > 1.0; apparent dens. 0.3 g/cc; m.p. 155 C; flash pt. (PMCC) > 500 F; 0.4% moisture
Toxicology: ACGIH TLV/TWA 10 mg/m3; inh. of dust can cause discomfort of nose, throat, upper respiratory tract, coughing, choking; ingestion can cause gastrointestinal discomfort; eye contact and prolonged skin contact can cause discomfort
Precaution: Incompat. with strong oxidizing agents; decomp. prods.: CO2, MgO; dust explosions can occur in presence of ignition source
Storage: Store in cool, dry area away from heat, sparks, or flame

Synpro® Zinc Stearate (Kosher)
Chem. Descrip.: Zinc stearate
CAS 557-05-1; EINECS/ELINCS 209-151-9
Uses: Lubricant, tablet mold release agent, flow aid in pharmaceuticals
Properties: Fine particulate; 99% through 200 mesh; apparent dens. 0.333 g/cc; m.p. 123 C; 0.2% moisture

Chem. Descrip.: Zinc stearate USP
CAS 557-05-1; EINECS/ELINCS 209-151-9
Uses: Lubricant for pharmaceuticals
Regulatory: FDA 21CFR §177.2600, 178.2010
Properties: Wh. fine free-flowing powd., mild fatty odor; 99% through 200 mesh; negligible sol. in water; sp.gr. > 1; apparent dens. 0.2 g/cc; m.p. 120-132 C; flash pt. (PMCC) > 500 F; 0.4% moisture
Toxicology: ACGIH TLV/TWA 10 mg/m3; inh. of dust can cause discomfort of nose, throat, upper respiratory tract, coughing, choking; ingestion can cause gastrointestinal discomfort; eye contact and prolonged skin contact can cause discomfort
Precaution: Incompat. with strong oxidizing agents; decomp. prods.: CO2, ZnO; dust explosions can occur in presence of ignition source
Storage: Store in cool, dry area away from heat, sparks, or flame

Synthalen® K [3V/Cosmetics; 3V Italia http://www.3v.com]
Chem. Descrip.: Polyacrylic acid (carbomer)
CAS 9003-01-4
Uses: Thickener for pharmaceuticals, skin creams, sun creams
Features: Produces high visc., very clear gels, and high visc. emulsions
Regulatory: DOT nonregulated; SARA §304/313 nonreportable
Properties: Wh. very fine powd.; sl. acetic odor; sol. in water, org. solvs.; bulk dens. 0.20-0.23 g/cm3; visc. 20,000-30,000 mPa•s (0.2%), 40,000-60,000 mPa•s (0.5%); equiv. wt. 76; m.p. 250 C; pH 2.7-3.5 (0.5% aq. disp.); anionic; 99% act.
Use Level: 0.2-1.5%
Toxicology: LD50 (oral) > 2000 mg/kg; not known to be dangerous; harmful if
Trade Name Reference

Swallowed; nonirritating to skin and eyes; TSCA listed

Environmental: Do not empty in drains or watercourses

Precaution: Combustible; can form explosive air/dust mixt.; incompat. with oxidizers and strong bases; slippery film forms with water contact

Hazardous Ingredients: 2-propenoic acid homopolymer (99%)

Hazardous Decomp. Prods.: On burning, carbon oxides and hydrocarbons can form

NFPA: Health 1, Flammability 1, Reactivity 0

Storage: Very hygroscopic; store tightly closed in cool, dry place

Synthalen® M [3V Italia http://www.3v.com]
Chem. Descrip.: Polyacrylic acid (carbomer)
CAS 9003-01-4
Uses: Thickener and stabilizer for o/w emulsions or dispersions of insol. act. principles in pharmaceuticals

Regulatory: DOT nonregulated; SARA §304/313 nonreportable

Properties: Wh. very fine powd.; sl. acetic odor; sol. in water, org. solvs.; bulk dens. 0.20-0.23 g/cm³; visc. 2000-5500 mPa•s, 30,000-40,000 mPa•s (0.5%); equiv. wt. 76; m.p. 250 C; pH 2.7-3.5 (0.5% aq.); anionic; 99% act.

Use Level: 0.2-1.5%

Toxicology: LD50 (oral) > 2000 mg/kg; not known to be dangerous; harmful if swallowed; nonirritating to skin and eyes; TSCA listed

Environmental: Do not empty in drains or watercourses

Precaution: Combustible; can form explosive air/dust mixt.; incompat. with oxidizers and strong bases; slippery film forms with water contact

Hazardous Ingredients: 2-propenoic acid homopolymer (99%)

Hazardous Decomp. Prods.: On burning, carbon oxides and hydrocarbons can form

NFPA: Health 1, Flammability 1, Reactivity 0

Storage: Very hygroscopic; store tightly closed in cool, dry place

TC-90™ Ascorbic Acid for DC [BASF http://www.basf.com]
Chem. Descrip.: Ascorbic acid (90%) and corn starch (10%)
See L-Ascorbic acid; Corn (Zea mays) starch
CAS 50-81-7; 9005-25-8; EINECS/ELINCS 200-066-2; 232-679-6
Uses: Dietary supplement in pharmaceutical tablets and nutritional supplements produced by direct compression

Features: Rapidly oxidizes in solution

Regulatory: USP/FCC

Properties: Wh. to yel. fine gran. powd.; almost odorless; sl. mild odor; m.w. 176.1; ≈ 90% act.

Storage: 30 month shelf-life; store in tightly closed containers @ R.T; protect from light and in a dry place

Chem. Descrip.: C12-15 pareth-2 phosphate
CAS 149919-05-1
Uses: Emulsifier and solubilizer for pharmaceuticals

Features: Can be neutralized with alkali

Properties: Yel. liq.; HLB 7.0; anionic; 100% conc.

Chem. Descrip.: Tri-PEG-6 alkyl ether phosphate
CAS 149919-06-2
Uses: Emulsifier and solubilizer for pharmaceuticals
### TDP-8
Chem. Descrip.: C12-15 pareth-8 phosphate
Uses: Emulsifier and solubilizer for pharmaceuticals
Features: Can be neutralized with alkali
Regulatory: JSCI listed
Properties: Yel. liq.; HLB 8.0; anionic; 100% conc.

### TDP-10
Chem. Descrip.: C12-15 pareth-10 phosphate
Uses: Emulsifier and solubilizer for pharmaceuticals
Features: Can be neutralized with alkali
Regulatory: JSCI listed
Properties: Yel. liq.; HLB 11.5; anionic; 100% conc.

### TL-10
Chem. Descrip.: Polysorbate 20
CAS 9005-64-5
Uses: Emulsifier, solubilizer, dispersant for pharmaceuticals
Features: Hydrophilic
Regulatory: JSCI listed
Properties: Pale yel. paste; HLB 14.0; anionic; 100% conc.

### TO-10V
Chem. Descrip.: Polysorbate 80
CAS 9005-65-6
Uses: Emulsifier, solubilizer, and dispersant for pharmaceuticals
Features: Hydrophilic
Regulatory: JSCI listed
Properties: Yel. liq.; water-sol.; HLB 16.9; nonionic; 100% conc.

### TP2
[**Undesa**](http://www.undesa.com); [**S. Black**](http://www.sblack.com)
Chem. Descrip.: Stearic acid
CAS 67701-03-5; EINECS/ELINCS 266-928-5
Uses: Emollient, emulsifier, thickener in pharmaceuticals
Regulatory: Not regulated for transport
Environmental: Biodeg. (28 d) > 90%
Precaution: Wear gloves, goggles, overall skin protection; avoid entry to sewers, drain and surface water
Storage: Store @ R.T. in original sealed container protected from heat sources

### TS-10V
Chem. Descrip.: Polysorbate 60
CAS 9005-67-8
Uses: Emulsifier, solubilizer, and dispersant for o/w prods., pharmaceuticals
Features: Hydrophilic
Regulatory: JSCI listed
Properties: Yel. visc. liq.; sol. in water, ethanol, ethyl acetate, toluene; HLB 15.0; nonionic; 100% conc.

### TS-30V
Chem. Descrip.: Polysorbate 85
CAS 9005-70-3
Uses: Emulsifier for pharmaceuticals, sol. oils
Features: Hydrophilic
Regulatory: JSCI listed
Properties: Yel. liq.; oil-sol.; water-disp.; HLB 11.0; nonionic; 100% conc.

### TO-106V
Chem. Descrip.: PEG-6 sorbitan oleate
CAS 9005-65-6
Uses: Emulsifier for pharmaceuticals
Features: Hydrophilic
Regulatory: JSCI listed
Properties: Yel. liq.; oil-sol.; water-disp.; HLB 10.0; nonionic; 100% conc.

### TP8
[**Undesa**](http://www.undesa.com); [**S. Black**](http://www.sblack.com)
Chem. Descrip.: Stearic acid
CAS 67701-03-5; EINECS/ELINCS 266-928-5
Uses: Emollient, emulsifier, thickener in pharmaceuticals
Regulatory: Not regulated for transport
Environmental: Biodeg. (28 d) > 90%
Precaution: Wear gloves, goggles, overall skin protection; avoid entry to sewers, drain and surface water
Storage: Store @ R.T. in original sealed container protected from heat sources

### TS-10V
Chem. Descrip.: Polysorbate 60
CAS 9005-67-8
Uses: Emulsifier, solubilizer, and dispersant for o/w prods., pharmaceuticals
Features: Hydrophilic
Regulatory: JSCI listed
Properties: Yel. visc. liq.; sol. in water, ethanol, ethyl acetate, toluene; HLB 14.9; sapon. no. 43-49; pH 5.7-7.7 (5%); nonionic; 100% conc.

### TS-30V
Trade Name Reference

http://www.nikkol.co.jp/index.html
Chem. Descrip.: Polysorbate 65
CAS 9005-71-4
Uses: Emulsifier, solubilizer for o/w prods., pharmaceuticals
Regulatory: JSCI listed
Properties: Yel. semisolid; water-disp.; HLB 10.5; nonionic; 100% conc.
Toxicology: TSCA listed

TS-106V [Nikko Chems. Co. Ltd
http://www.nikkol.co.jp/index.html]
Chem. Descrip.: PEG-6 sorbitan stearate
CAS 9005-67-8
Uses: Emulsifier, solubilizer for o/w prods., pharmaceuticals
Regulatory: JSCI listed
Properties: Yel. paste; water-disp.; HLB 9.6; nonionic
Toxicology: TSCA listed

Tablo® [Blanver Farmoquimica
http://www.blanver.com.br; Blanver USA
http://www.blanver.com.br]
Chem. Descrip.: Sodium starch glycolate
CAS 9063-38-1
Uses: Disintegrant, dissolution aid in pharmaceutical tablets, capsules, pellets, wet and dry granulation, dry blends, veterinary prods.
Features: Absorbs water rapidly; resulting swelling causes rapid disintegration of tablets and granules
Properties: Wh. to sl. yel. relatively free-flowing powd.; ≤ 10% on 200 mesh; odorless; tasteless; visc. 23 cps; pH 6.30 (1 g/30 ml water); 3.4% loss on drying
Use Level: 0.5-5%

Tabulose® 102 [Blanver Farmoquimica
http://www.blanver.com.br; Blanver USA
http://www.blanver.com.br]
Chem. Descrip.: Microcrystalline cellulose
CAS 9004-34-6
Uses: Binder, disintegrant, compression agent, compaction agent in pharmaceutical tablets, dry granulation
Features: Reduces friability of the final granulation
Properties: Wh. fine cryst. powd.; 100 µ avg. particle size; 8% max. on 60 mesh, 45% max. on 200 mesh; odorless; bulk dens. 0.2-0.4 g/cm³, 0.4-0.6 g/cm³ (tapped); < 5% loss on drying
Use Level: 2-10%

Tabulose® 103 [Blanver Farmoquimica
http://www.blanver.com.br; Blanver USA
http://www.blanver.com.br]
Chem. Descrip.: Microcrystalline cellulose
CAS 9004-34-6
Uses: Binder, disintegrant, compression agent, compaction agent in pharmaceutical tablets
Features: Low moisture; rec. for use with moisture-sensitive drugs
Properties: Wh. fine cryst. powd.; 50 µ avg. particle size; 1% max. on 60 mesh, 30% max. on 200 mesh; odorless; bulk dens. 0.2-0.4 g/cm³, 0.4-0.6 g/cm³ (tapped); < 3% loss on drying
Use Level: 10-50%

Tabulose® 122 [Blanver Farmoquimica
http://www.blanver.com.br; Blanver USA
http://www.blanver.com.br]
Chem. Descrip.: Microcrystalline cellulose
CAS 9004-34-6
Uses: Binder, disintegrant, compression agent, compaction agent in pharmaceutical tablets
Features: Low moisture; rec. for use with moisture-sensitive drugs
Properties: Wh. fine cryst. powd.; 50 µ avg. particle size; 1% max. on 60 mesh, 30% max. on 200 mesh; odorless; bulk dens. 0.28-0.33 g/cm³, 0.45-0.52 g/cm³ (tapped); < 3% loss on drying
Use Level: 10-50%
Tabulose® 200 [Blanver Farmoquimica
http://www.blanver.com.br; Blanver USA
http://www.blanver.com.br]
Chem. Descrip.: Microcrystalline cellulose
CAS 9004-34-6
Uses: Binder, disintegrant, compression agent, compaction agent in pharmaceutical tablets; flow aid for semi-automatic capsule mfg. equip.; absorp. enhancer in liq. extracts
Features: Reduces wt. variation
Properties: Wh. fine cryst. powd.; 190 μ avg. particle size; 30% min. on 60 mesh, 45% min. on 200 mesh; odorless; bulk dens. 0.2-0.4 g/cm³, 0.4-0.6 g/cm³ (tapped); < 5% loss on drying
Use Level: 10-50% (compression aid, flow aid); 30-70% (act. absorption)

Tabulose® 250 [Blanver Farmoquimica
http://www.blanver.com.br; Blanver USA
http://www.blanver.com.br]
Chem. Descrip.: Microcrystalline cellulose
CAS 9004-34-6
Uses: Binder, disintegrant, compression agent, compaction agent in pharmaceutical tablets; flow aid for semi-automatic capsule mfg. equip.; absorp. enhancer in liq. extracts
Features: Reduces wt. variation
Properties: Wh. fine cryst. powd.; 230 μ avg. particle size; 30% min. on 60 mesh, 60% min. on 200 mesh; odorless; bulk dens. 0.33-0.40 g/cm³, 0.4-0.6 g/cm³ (tapped); ≤ 7% loss on drying
Use Level: 10-50% (compression aid, flow aid); 30-70% (act. absorption)

Tabulose® 3E-150 [Blanver Farmoquimica
http://www.blanver.com.br; Blanver USA
http://www.blanver.com.br]
Chem. Descrip.: Microfine cellulose See Cellulose
CAS 9004-34-6; EINECS/ELINCS 232-674-9
Uses: Compression aid, compaction aid for pharmaceutical powds., tablets, capsules, wet and dry granulation; compression aid, filler in wet granulation (inc. drying speed, controls dye migration, reduces amt. of binder); flow aid, dissolution aid in capsules
Properties: Wh. solid; odorless
Use Level: 5-40% (wet granulation); 10-30% (dry granulation); 5-20% (capsules)

Tabulose® 500 [Blanver Farmoquimica

Trade Name Reference

**Oil**
CAS: 61788-85-0
Uses: Solubilizer for essential oils in pharmaceuticals; solubilizer for vitamins
Regulatory: Ph.Eur. listed
Properties: Solid

**Tagat® L2** [Degussa Care Spec.]
Chem. Descrip.: PEG-20 glyceryl laurate
CAS: 51248-32-9
Uses: Sec. surfactant, foaming agent, solubilizer for prep. of o/w emulsions for pharmaceuticals; solubilizer for flavors, perfumes, vitamin oils; dispersant
Regulatory: DAC, JClC registered
Properties: Ivory liq.; sol. in water; insol. in veg. and min. oils; m.p. 60-80 C; HLB 15.7; acid no. 2 max.; iodine no. 4 max.; sapon. no. 50-70; hyd. no. 60-80; nonionic; 100% conc.

**Tagat® O2** [Degussa Care Spec.]
Chem. Descrip.: PEG-20 glyceryl oleate
CAS: 51192-09-7
Uses: Sec. surfactant, foaming agent, solubilizer for prep. of o/w emulsions for pharmaceuticals; solubilizer for flavors, perfumes, vitamin oils, polar oils; dispersant
Regulatory: DAC, JClC registered
Properties: Yel. liq.; sol. in water; insol. in veg. and min. oils; m.p. 70-85 C; HLB 15.0; acid no. 2 max.; iodine no. 21-27; sapon. no. 40-55; hyd. no. 70-85; nonionic; 100% conc.

**Tagat® S** [Degussa Care Spec.]
Chem. Descrip.: PEG-30 glyceryl stearate
CAS: 51158-08-8
Uses: Solubilizer, emulsifier for prep. of o/w emulsions for pharmaceuticals; solubilizer for flavors, perfumes, vitamin oils; dispersant; emulsifier for o/w creams/lotions
Regulatory: DAC, JClC registered
Properties: Ivory solid, partially liq.; sol. with sl. turbidity in water; insol. in veg. and min. oils; HLB 16.4; acid no. 2 max.; iodine no. 2 max.; sapon. no. 30-47; hyd. no. 53-70; nonionic; 100% conc.

**Tagat® S2** [Degussa Care Spec.]
Chem. Descrip.: PEG-20 glyceryl stearate
CAS: 51158-08-8
Uses: Solubilizer for prep. of o/w emulsions for pharmaceuticals; solubilizer for flavors, perfumes, vitamin oils; emulsifier for o/w creams/lotions; dispersant
Regulatory: DAC, JClC registered
Properties: Ivory solid, partially liq.; sol. with sl. turbidity in water; insol. in veg. and min. oils; m.p. 65-85 C; HLB 15.0; acid no. 2 max.; iodine no. 2 max.; sapon. no. 40-60; hyd. no. 65-85; nonionic; 100% conc.

**Takalophane** [Nikko Chems. Co. Ltd
http://www.nikkol.co.jp/index.html]
Chem. Descrip.: Synthesized aluminum silicate
CAS: 1327-36-2; EINECS/ELINCS 215-475-1
Uses: Anti-acne ingred.
Properties: Wh. powd.
Toxicology: TSCA listed

**Talin®** [RFI Ingreds.
http://www.rfiingredients.com]
Chem. Descrip.: Thaumatin
CAS: 53850-34-3
Uses: Masks bitter and unpleasant aftertastes associated with vitamins and minerals
Features: Unusually stable to heat and pressure
Regulatory: FEMA GRAS 3732; EEC compliance
Properties: Freely sol. in water; sol. in aq. alcohol, glycerol, propylene glycol, sugar alcohols; sol. in 66% ethanol; 100%
Toxicology: JECFA classified as safe, no max. ADI

**TAPS** [Raschig AG http://www.raschig.de]
Chem. Descrip.: 3-[Tris-[hydroxymethyl]-methylamino]-propanesulfonic acid
 CAS: 29915-38-6; EINECS/ELINCS 249-954-1
Uses: Biological buffer for cell cultures, biological productions, electrophoresis, diagnostics, tissue studies, blotting techniques, chromatography

**Taste Masking Agent - 104** [Libraw Pharma
http://www.pharma-excipients.com]
Chem. Descrip.: Derived from crosslinked polymer of acrylic acid
Chem. Analysis: 10% max. moisture content
Uses: Taste masking agent for norfloxacin and ofloxacin; sustained release agent for nicotine
Regulatory: USP/NF, EP
Properties: Off-wh. flowing powd.; particle size 1% max retained on 100 BSS mesh; insol. in water and common solvents
Toxicology: Nontoxic
Hazardous Decomp. Prods.: None

**Taste Masking Rosin - 134** [Libraw Pharma
http://www.pharma-excipients.com]
Trade Name Reference

http://www.pharma-excipients.com
Chem. Descrip.: Crosslinked polymer of methacrylic acid
Chem. Analysis: 10% max. moisture content
Uses: Taste masking agent for palatable and chewable tablets, dispersible tablets and suspensions of bitter tasting drugs
Features: High purity polymer
Regulatory: USP/NF EP
Properties: Off-wh. flowing powd.; particle size 1% max retained on 100 BSS mesh; insol. in water and common solvents; noncombustible
Toxicology: Nontoxic
Storage: Store in tightly closed container away from moisture

Tauranol WS H.P. [Finetex http://www.finetexinc.com]
Chem. Descrip.: Sodium methyl cocoyl taurate
CAS 12765-39-8; EINECS/ELINCS 235-802-1
Uses: Foaming agent, detergent for pharmaceuticals
Features: Tolerant to electrolytes, hard water
Properties: Powd.; anionic; 95% conc.

TBC, NF [Morflex http://www.morflex.com]
Chem. Descrip.: Tri-n-butyl citrate
CAS 77-94-1; EINECS/ELINCS 201-071-2
Uses: Plasticizer for aq. pharmaceutical coatings including controlled sustained release, immediate release, and enteric; taste masking agent
Features: Protects drugs from gastric juices but allows its release into the intestine
Regulatory: NF, DMF, FDA 21 CFR §175.105
Properties: APHA 50 max., insol. in water; miscible in acetone, ethanol, toluene, heptane, and veg. oil; m.w. 360.4; sp.gr. 1.037-1.045; dens. 6.5 lb/gal; visc. 3.3 cps (30 C); vapor pressure ≤31 mm Hg; i.b.p. 81.5 C (760 mm Hg); f.p. 24.5 C; flash pt. (TCC) <11 C; 99.3% act.
Toxicology: LD50 (inh, rat), 4h 14,100 ppm, LD50 (oral, rat) 2,733 mg/kg, (skin, rabbit) > 2000 mg/kg; mod. to severe eye irritant; mildly irritating to skin; ing. of high doses may cause discomfort and irritation to GI tract and CNS depression (fatigue, dizziness and loss of concentration, collapse, coma and death in cases of severe overexposure
Precaution: Extremely flammable; avoid heat, sparks, open flame, other ignition sources, severe oxidizing conditions, elevated temperature with dehydrating conditions
Storage: Store in tightly closed/properly vented containers away from heat/sparks/open flame and strong oxidizing agents/acids; vapor space above stored liquid may be flammable/explosive unless blanketed with inert gas; protect from freezing

Teavigo™ TG [DSM Nutritional Prods. USA http://www.nutraaccess.com]
Chem. Descrip.: (−)-Epigallocatechin gallate granulated with pectin
Chem. Analysis: 5% max. loss on drying
CAS 989-51-5; 9000-69-5; EINECS/ELINCS $; 232-553-0
Uses: Dietary supplement and antioxidant in direct compression tablets
Properties: Off-wh. to pinkish-grey gran. powd.
Precaution: Wear safety glasses and rubber gloves; avoid ing., inh. of dust or direct contact

Storage: 36 mos. shelf life; store away from air, heat, light, and humidity in original containers @ < 25 C

Tebo® 99 [Lyondell http://www.lyondell.com]
Chem. Descrip.: High purity tert. butyl alcohol
See t-Butyl alcohol
CAS 75-65-0; EINECS/ELINCS 200-889-7
Uses: Solvent, cosolvent, compatibilizer, coupling agent, processing aid for pharmaceuticals; solvent and compatibilizer for diagnostic kits for the medical profession; denaturant for ethanol
Properties: Cl. colorless liq.; camphor-like odor; Pt-Co ≤ 10 color; sol. in water; misc. with most org. solvs.; sp.gr. 0.78; dens. 6.5 lb/gal; visc. 3.3 cps (30 C); vapor pressure ≤31 mm Hg; i.b.p. 81.5 C (760 mm Hg); f.p. 24.5 C; flash pt. (TCC) <11 C; 99.3% act.
Toxicology: LD50 (inh, rat), 4h 14,100 ppm, LD50 (oral, rat) 2,733 mg/kg, (skin, rabbit) > 2000 mg/kg; mod. to severe eye irritant; mildly irritating to skin; ing. of high doses may cause discomfort and irritation to GI tract and CNS depression (fatigue, dizziness and loss of concentration, collapse, coma and death in cases of severe overexposure
Precaution: Extremely flammable; avoid heat, sparks, open flame, other ignition sources, severe oxidizing conditions, elevated temperature with dehydrating conditions
Storage: Store in tightly closed/properly vented containers away from heat/sparks/open flame and strong oxidizing agents/acids; vapor space above stored liquid may be flammable/explosive unless blanketed with inert gas; protect from freezing

TEC, NF [Morflex http://www.morflex.com]
Chem. Descrip.: Triethyl citrate
CAS 77-93-0; EINECS/ELINCS 201-070-7
Uses: Plasticizer for aq. pharmaceutical coatings including controlled sustained release, immediate release, and enteric; taste masking agent
Features: Protects drugs from gastric juices but allows its release into the intestine
Regulatory: NF, DMF, FDA 21 CFR §175.105
Properties: APHA 50 max., sol. 6.5 g/100 ml water; miscible in acetone, ethanol; partly sol in toluene, heptane; insol. in veg. oil; m.w.
Tefose® 63 [Gattefosse
http://www.gattefossecorp.com; Gattefosse
Spain http://www.gattefosse.es]

Chem. Descrip.: PEG-6-32 stearate and glycol stearate See PEG-6 stearate; PEG-32 stearate
Uses: O/w emulsifier, base for pharmaceutical o/w emulsions, ointments, elegant cream formulations, esp. for antifungal, contraceptive; excipient for dermal/transdermal pharmaceuticals
Features: Self-emulsifying; produces emulsions with exc. skin and mucosal tolerance
Regulatory: FDA inact. ingreds. guide; DMF no. 6074
Properties: Gardner < 5 pasty solid; weak odor; sol. in chloroform, methylene chloride; sparingly sol. in ethanol; disp. in water, n-hexane; insol. in min. oils; m.p. 32-37 C; HLB 11.0; acid no. < 5; iodine no. < 3; sapon. no. 65-85; nonionic; 100% conc.
Use Level: 5-15%
Toxicology: Nonirritating to skin; sl. irritating to eyes

Tefose® 1500 [Gattefosse
http://www.gattefossecorp.com; Gattefosse
Spain http://www.gattefosse.es]

Chem. Descrip.: PEG-6-32 stearate See PEG-6 stearate; PEG-32 stearate
Uses: O/w emulsifier, base for pharmaceutical o/w emulsions (lotions and light creams); excipient for dermal/transdermal pharmaceuticals
Features: Self-emulsifying
Regulatory: JP compliance; DMF no. 6074
Properties: Gardner < 5 pasty solid; weak odor; sol. in ethanol, chloroform, methylene chloride; insol. in water, min. oils; m.p. 40-45 C; drop pt. 46-53 C; HLB 10.0; acid no. < 6; iodine no. < 3; sapon. no. 110-120; nonionic; 100% conc.
Use Level: 5-15%
Toxicology: Nonirritating to skin

Tefose® 2561 [Gattefosse
http://www.gattefossecorp.com; Gattefosse
Spain http://www.gattefosse.es]

Chem. Descrip.: PEG-6 stearate, glyceryl stearate, and ceteth-20
Uses: Base for pharmaceutical o/w emulsions, creams, lotions, ointments
Properties: Gardner < 3 pasty solid; acid stable; broad pH range
Use Level: 5-15%
Toxicology: LD0 (oral, rat) > 2 g/kg; sl. irritating to skin

Tegacid® Special [Goldschmidt AG
http://www.goldschmidt.com]

Chem. Descrip.: Glyceryl stearate, sodium lauryl sulfate
Uses: Forms very stable topical pharmaceuticals, emulsions, creams, lotions
Features: Acid stable; broad pH range
Properties: Flake; HLB 4.9; anionic; 100% conc.

Tegamine® 18 [Goldschmidt AG
http://www.goldschmidt.com]

Chem. Descrip.: Stearamidopropyl dimethylamine
CAS 7651-02-7; EINECS/ELINCS 231-609-1
Uses: Surfactant, conditioner for topical pharmaceuticals; aux. emulsifier for creams and lotions
Features: Good skin feel
Properties: Flake; cationic; 100% act.

Tegamine® Oxide WS-35 [Goldschmidt AG
http://www.goldschmidt.com]

Chem. Descrip.: Cocamidopropyl dimethylamine oxide
CAS 68155-09-9; EINECS/ELINCS 268-938-5
Uses: Foam booster/stabilizer, visc. builder for topical pharmaceuticals
Trade Name Reference

Properties: Liq.; nonionic; 35% conc.

**Tegin® [Degussa Care Spec.]**
Chem. Descrip.: Glyceryl stearate SE
CAS 11099-07-3
Uses: O/w emulsifier and raw material for pharmaceutical o/w emulsions
Features: Self-emulsifying; stable creams from pH 6.8-8.2; vegetable-based
Regulatory: JSCI, BfArM registered
Properties: Ivory pellets.; sl., typical odor
HLB 5.5; flash pt. >200 C; anionic; 100% conc.

**Toxicology:** No adverse health effects have been observed

**Environmental:** Biologically degradable; considered to be a weak water pollutant (German law).

Hazardous Decomp. Prods.: None

**Tegin® 90 [Degussa Care Spec.]**
Chem. Descrip.: Glyceryl stearate
CAS 123-94-4
Uses: Stabilizer for creamy and liq. o/w emulsions in pharmaceuticals
Regulatory: JSCI registered
Properties: Wh.-ivory powd.; sol. warm in min. and veg. oils; insol. in water; m.p. 67-72 C; HLB 4.5; acid no. 3 max.; iodine no. 2 max.; sapon. no. 155-170; nonionic; 100% conc.

**Tegin® 515 VA [Goldschmidt AG http://www.goldschmidt.com]**
Chem. Descrip.: Glyceryl stearate
CAS 123-94-4
Uses: Emulsifier, stabilizer, opacifier for topical pharmaceuticals, skin care creams and lotions
Features: Improved afterfeel for leave-on conditioners
Properties: Flake; HLB 3.8; nonionic; 100% conc.

**Tegin® 4100 [Degussa Care Spec.]**
Chem. Descrip.: Glyceryl stearate
CAS 31566-31-1
Uses: Stabilizer, consistency agent, coemulsifier for pharmaceuticals, o/w creams and lotions
Features: Vegetable-based
Regulatory: JSCI, DAB, Ph.Eur. registered
Properties: Wh.-ivory powd.; sol. warm in veg. and min. oils; insol. in water; m.p. 58-63 C; HLB 3.8; acid no. 2 max.; iodine no. 3 max.; sapon. no. 164-180; nonionic; 100% conc.; ≈ 45% monoester

**Tegin® G [Degussa Care Spec.]**
Chem. Descrip.: Glycol stearate SE
CAS 86418-55-5
Uses: O/w emulsifier, gloss aid, opacifier for pharmaceuticals, o/w emulsions
Features: Self-emulsifying; stable creams from pH 6.8-8.2; vegetable-based
Regulatory: JCIC, BfArM registered
Properties: Wh.-ivory waxy powd.; sol. warm in veg. and min. oils; disp. warm in water; m.p. 48-53 C; HLB 12.0; acid no. 36-38; iodine no. 3 max.; sapon. no. 150-165; anionic; 100% conc.

**Tegin® G 1100 [Degussa Care Spec.]**
Chem. Descrip.: Glycol distearate
CAS 627-83-8; EINECS/ELINCS 211-014-3
Uses: Gloss aid, pearlescent, opacifier for pharmaceuticals
Features: Non self-emulsifying; broad solidification range results in good processability
Regulatory: JCIC, BfArM registered
Properties: Wh.-ivory powd.; sol. warm in min. and veg. oils; insol. in water; m.p. 59-63 C; acid no. 6 max.; iodine no. 3 max.; sapon. no. 192-208; ≈ 90% diester

**Tegin® M [Degussa Care Spec.]**
Chem. Descrip.: Glyceryl stearate
CAS 123-94-4
Uses: Coemulsifier, stabilizer, consistency agent for o/w pharmaceuticals, creams, lotions
Features: Vegetable-based
Regulatory: JSCI, BfArM, DAC registered
Properties: Wh.-ivory powd.; sol. warm in veg. and min. oils; insol. in water; m.p. 58-63 C; HLB 3.8; acid no. 4 max.; iodine no. 3 max.; sapon. no. 192-208; ≈ 60% diester

**Tegin® O [Degussa Care Spec.]**
Chem. Descrip.: Glyceryl oleate
CAS 111-03-5; EINECS/ELINCS 203-827-7
Uses: W/o emulsifier for pharmaceutical emulsions
Features: Forms emulsions with good freeze/thaw and elevated temp. stability; PEG-free; based on natural raw materials
Regulatory: JCIC, DAC registered
Properties: Pale yel. paste; sol. in veg. and min. oils; insol. in water; HLB 3.3; acid no. 2 max.; iodine no. 70-76; sapon. no. 158-175; nonionic; 100% conc.
### Trade Name Reference

**Teginacid®** [Degussa Care Spec.]
*Chem. Descrip.: Glyceryl stearate and ceteareth-20*
*Uses: O/w emulsifier for pharmaceuticals, emulsions, skin care*
*Features: Stable emulsions from pH 4.0-8.5*
*Regulatory: BfArM registered*
*Properties: Powd.; HLB 12.0; nonionic; 100% conc.*

**Teginacid® C** [Degussa Care Spec.]
*Chem. Descrip.: Ceteareth-25 USP, NF*
*CAS 68439-49-6*
*Uses: O/w emulsifier for pharmaceutical creams*
*Features: Good elevated temp. and freeze/thaw stability; stable creams @ pH 4.5-8.5*
*Regulatory: JCIC, USP reg.*
*Properties: Powd.; HLB 11.2; nonionic; 100% conc.*

**Tego® Acid S 40 P** [Degussa Care Spec.]
*Chem. Descrip.: PEG-40 stearate USP*
*CAS 9004-99-3*
*Uses: O/w emulsifier for pharmaceutical emulsions*
*Features: Compat. with higher concs. of electrolytes; vegetable-based*
*Regulatory: USP, Ph.Eur. listed*
*Properties: Pellets*

**Tego® Acid S 100 P** [Degussa Care Spec.]
*Chem. Descrip.: PEG-100 stearate*
*CAS 9004-99-3*
*Uses: O/w emulsifier for pharmaceutical emulsions*
*Features: Compat. with higher concs. of electrolytes; vegetable-based*
*Regulatory: Ph.Eur. listed*
*Properties: Pellets*

**TEGO® Alkanol 16** [Degussa Care Spec.]
*Chem. Descrip.: Cetyl alcohol*
*CAS 36653-82-4; EINECS/ELINCS 253-149-0*
*Uses: Consistency agent, stabilizer in o/w emulsions, pharmaceuticals; structural surfactant for antiperspirant sticks*
*Features: Vegetable-based*
*Regulatory: DAB, Ph.Eur. listed*
*Properties: Wh. pellets; m.p. ≈ 49 C*
*Use Level: 1-5%*

**TEGO® Alkanol 18** [Degussa Care Spec.]
*Chem. Descrip.: Stearyl alcohol*
*CAS 112-92-5; EINECS/ELINCS 204-017-6*
*Uses: Consistency agent, stabilizer in o/w emulsions, pharmaceuticals; structural surfactant for antiperspirant sticks*
*Features: Vegetable-based*
*Regulatory: JCIC registered*
*Properties: Yel. liq.; pH 5-7; amphoteric; 30% act.; 15% NaCl*
*Use Level: 1-5%*

**TEGO® Alkanol 1618** [Degussa Care Spec.]
*Chem. Descrip.: Cetearyl alcohol*
*CAS 8005-44-5; EINECS/ELINCS 267-008-6*
*Uses: Consistency agent, stabilizer in o/w emulsions, pharmaceuticals; structural surfactant for antiperspirant sticks*
*Features: Vegetable-based*
*Regulatory: DAB, Ph.Eur. listed*
*Properties: Powd.; m.p. ≈ 54 C*
*Use Level: 1-5%*

**TEGO® Alkanol L 4** [Degussa Care Spec.]
*Chem. Descrip.: Laureth-4*
*CAS 9002-92-0; EINECS/ELINCS 226-097-1*
*Uses: Thickener, solubilizer for pharmaceuticals*
*Features: Optimal taste for oral care prod.; preservative-free*
*Regulatory: JCIC, BfArM listed*
*Properties: Powd.; amphoteric; ≈ 82% act.; ≈ 15% NaCl*

**TEGO®-Betain CK** [Degussa Care Spec.]
*Chem. Descrip.: Cocamidopropyl betaine*
*CAS 61789-40-0; EINECS/ELINCS 263-058-8*
*Uses: Anti-irritant for anionic surfactants*
*Features: Mild*
*Properties: Liq.; amphoteric; 30% act.; 5% NaCl*

**TEGO®-Betain CKD** [Degussa Care Spec.]
*Chem. Descrip.: Cocamidopropyl betaine*
*CAS 61789-40-0; EINECS/ELINCS 263-058-8*
*Uses: Surfactant for water-free formulations such as oral care prod.; pharmaceuticals*
*Features: Optimal taste for oral care prod.; preservative-free*
*Regulatory: JCIC, BfArM listed*
*Properties: Powd.; amphoteric; ≈ 82% act.; ≈ 15% NaCl*

**TEGO®-Betain F** [Degussa Care Spec.]
*Chem. Descrip.: Cocamidopropyl betaine*
*CAS 61789-40-0; EINECS/ELINCS 263-058-8*
*Uses: Surfactant for hygiene prod.; topical pharmaceuticals; anti-irritant for anionic surfactants*
*Features: Vegetable-based*
*Regulatory: JCIC registered*
*Properties: Yel. liq.; pH 5-7; amphoteric; 30% act.; 5% NaCl*

**TEGO®-Betain F 50** [Degussa Care Spec.]
*Chem. Descrip.: Cocamidopropyl betaine*
*CAS 61789-40-0; EINECS/ELINCS 263-058-8*
*Uses: Surfactant, thickener for pharmaceuticals; anti-irritant for anionic surfactant for antiperspirant sticks*
*Regulatory: Ph.Eur., DAB listed*
*Properties: Pellets; m.p. ≈ 59 C*
*Use Level: 1-5%*
**Trade Name Reference**

**surfactants**

**Features:** Conc.; microbiologically stable without preservatives; compat. with all surfactants

**Regulatory:** JCIC, DAC listed

**Properties:** Liq.; amphoteric; 38% act.; 6% NaCl

**TEGO®-Betain HS** [Degussa Care Spec.]
*Chem. Descrip.: Cocamidopropyl betaine and glyceryl laurate*

**Uses:** Surfactant, thickener, refatting agent for skin care prods., topical pharmaceuticals

**Features:** Mild

**Properties:** Yel. liq.; pH 6-7; amphoteric; 30% act.; 5% NaCl

**TEGO®-Betain L-7** [Degussa Care Spec.]
*Chem. Descrip.: Cocamidopropyl betaine*
*CAS 61789-40-0; EINECS/ELINCS 263-058-8*

**Uses:** Surfactant, detergent, emulsifier, foam stabilizer, visc. builder in topical pharmaceuticals; anti-irritant for anionic surfactants

**Regulatory:** JCIC, DAC registered

**Properties:** Yel. liq.; sp.gr. 1.040-1.050; pH 5; amphoteric; 30% act.; 5% NaCl

**Toxicology:** LD50 (acute oral) > 5 g/kg

**Environmental:** Do not allow to enter drains

**Precaution:** Wear PVC gloves, goggles or face shield; avoid dust formation

**Hazardous Decomp. Prods.:** CO, CO2

**Storage:** Store in cool, dry place; protect from heat, direct sunlight

**TEGO®-Betain ZF** [Degussa Care Spec.]
*Chem. Descrip.: Cocamidopropyl betaine*
*CAS 61789-40-0; EINECS/ELINCS 263-058-8*

**Uses:** Mild surfactant, visc. and foam booster for use in dental prods.

**Features:** Mild

**Regulatory:** JCIC registered

**Properties:** Yel. liq.; sp.gr. 1.040-1.050; pH 5; amphoteric; 30% act.; 5% NaCl

**Toxicology:** LD50 (acute oral) 8.10 ml/kg; nonirritating to eyes

**TEGO®-Betain 12** [Degussa Care Spec.]
*Chem. Descrip.: Carbomer USP*
*CAS 9003-01-4*

**Uses:** Gellant, emulsion stabilizer, visc. builder, visc. modifier for pharmaceuticals, low visc. formulations (o/w lotions)

**Features:** High electrolyte compat.

**Regulatory:** JSCI, Ph.Eur., USP registered

**Properties:** Powd.; anionic

**TEGO®-Betain 12** [Degussa Care Spec.]
*Chem. Descrip.: Carbomer USP*
*CAS 9003-01-4*

**Uses:** Gellant, emulsion stabilizer, visc. builder, visc. modifier for pharmaceuticals, high visc. formulations (o/w creams)

**Features:** Benzene-free

**Regulatory:** JSCI, Ph.Eur. registered

**Properties:** Wh. powd.; sl. acetic acid-like odor; dens. 1.4; dynamic visc. 15,000-30,000 mPa•s @ 6 g/l in water, 40,000-60,000 mPa•s @ 5 g/l in water; pH 2.7-3.3 @ 50 g/l in water; anionic

**Toxicology:** LD50 (oral, rat) > 5 g/kg

**Environmental:** Do not allow to enter drains

**Precaution:** Wear PVC gloves, goggles or face shield; avoid dust formation

**Hazardous Decomp. Prods.:** CO, CO2

**Storage:** Store in cool, dry place; protect from heat, direct sunlight

**TEGO®-Carbomer 141** [Degussa Care Spec.]
*Chem. Descrip.: Glyceryl stearate, steareth-25, ceteth-20, stearyl alcohol*

**Uses:** O/w emulsifier for topical pharmaceuticals, skin care creams and lotions

**Features:** Wax-like; balanced system; optimized for ease of formulation; produces creams with elevated temp. and freeze/thaw stability

**Regulatory:** BfArM registered

**Properties:** Ivory powd.; sol. warm in veg. and min. oils, cosmetic alcohol, 1,2-propylene glycol (sl. turbid); disp. warm in water; m.p. 52-58 C; HLB 12; acid no. 3 max.; sapon. no. 90-106; nonionic; 100% conc.

**Use Level:** 7-10%

**TEGO®-Care 450** [Degussa Care Spec.]
*Chem. Descrip.: Polyglyceryl-3 methyl glucose distearate*

**Uses:** O/w emulsifier, moisturizer for creams/lotions, sun prods., topical pharmaceuticals

**Features:** Produces stable emulsions with cosmetics oils and waxes; good elevated temp. and freeze/thaw stability; high skin mildness; for systems with pH of 6-9; PEG-free

**Properties:** Ivory pellets; sol. warm in paraffin and veg. oils; disp. warm in water; HLB 11.5±1; acid no. 12 max.; iodine no. 5 max.; sapon. no. 120-140; nonionic

**Use Level:** 3%

Trade Name Reference

Tegosoft® DO [Degussa Care Spec.]
Chem. Descrip.: Decyl olate
CAS 3687-46-5; EINECS/ELINCS 222-981-6
Uses: Emollient, refatting agent, skin softener, and moisture retention aid in dry skin treatment, creams/lotions, topical pharmaceuticals; solvent for lipophilic act. ingreds.
Features: Lipophilic
Regulatory: JSCI registered
Properties: Colorless liq.; insol. in water; dens. ≈0.86 g/cm³; visc. ≈14 mPas; pour pt. ≈6 C (DIN ISO 3016); flash pt. > 93 C; nonionic
Toxicology: Proper use provided, no adverse health effects observed
Environmental: Do not allow to enter drains or waterways or discharge into the subsoil/soil; considered to be a strong water pollutant (German law)
Hazardous Ingredients: None

Tegosoft® GC [Degussa Care Spec.]
Chem. Descrip.: PEG-7 glyceryl cocoate
CAS 68201-46-7
Uses: Surfactant, emollient, refatting agent, conditioner, foam booster/stabilizer for topical pharmaceuticals; anti-irritant for surfactants; solubilizer for lipophilic substances
Features: Hydrophilic; mild; rinses clean; leaves pleasant skinfeel; gives dense, creamy foam
Regulatory: Ph.Eur., JSCI registered
Properties: Liq.; very sol. in water; nonionic

Tegosoft® Liquid [Degussa Care Spec.]
Chem. Descrip.: Cetearyl octanoate
CAS 59130-70-7; EINECS/ELINCS 261-620-7
Uses: Emollient, spreading agent, skin softener, and moisture retention aid in creams/lotions, topical pharmaceuticals
Regulatory: JSCI registered
Properties: Liq.

Tegosoft® LSE 65 K [Degussa Care Spec.]
Chem. Descrip.: Sucrose cocoate
CAS 91031-88-8; EINECS/ELINCS 292-993-4
Uses: Anti-irritant for topical preparations
Features: Hydrophilic; exhibits pleasant refatting effect
Regulatory: JSCI registered
Properties: Lt. yel. odorless waxy solid; dispersible in water; dens. ≈1.21 g/cm³; m.p. ≈48 C; flash pt. > 180 C; pH ≈ 7.5 (50 g/l methanol/water); nonionic
Toxicology: LD50 (oral, rat) > 2 g/kg; sl. irritant to skin; nonirritant to eyes; no mutagenic activity (Ames Test); proper use provided, no adverse health effects observed

Tegosoft® M [Degussa Care Spec.]
Chem. Descrip.: Isopropyl myristate
CAS 110-27-0; EINECS/ELINCS 203-751-4
Uses: Emollient, spreading agent, skin softener, and moisture retention aid in topical pharmaceuticals, creams/lotions; solvent for lipophilic additives, act. ingreds., oil-sol. UV filters and pigments
Features: Very high spreadability; oxidation stable; excellent solvency for waxes, lipophilic UV filters and pigments; high polarity
Regulatory: JSCI, Ph.Eur. registered
Properties: Colorless to lt. yel. liq.; insol. in water; dens. ≈0.85 g/cm³; visc. ≈5 mPas; f.p. <0 C; b.p. ≈192 C; pour pt. 8 C (DIN ISO 3016); flash pt. > 110 C; surf. tens. (Ring method) ≈ 28 mN/m; nonionic

Tegosoft® OP [Degussa Care Spec.]
Chem. Descrip.: Octyl palmitate
CAS 29806-73-3; EINECS/ELINCS 249-862-1
Uses: Emollient, skin softener, and moisture retention aid in creams/lotions, topical pharmaceuticals; solubilizer for act. ingreds.
Regulatory: JSCI registered
Properties: Liq.

Tegosoft® OS [Degussa Care Spec.]
Chem. Descrip.: Octyl stearate
CAS 22047-49-0; EINECS/ELINCS 244-754-0
Uses: Emollient, spreading agent, skin softener, and moisture retention aid in creams/lotions, topical pharmaceuticals
Features: High polarity; excellent solvency for waxes, lipophilic UV filters and pigments; excellent spreading props.; oxidation stable
Regulatory: DAB 10. BP 1993, JSCI registered
Properties: Colorless to lt. yel. liq.; insol. in water; dens. ≈0.85 g/cm³; visc. ≈12 mPas; pour pt. 8 C (DIN ISO 3016); flash pt. > 100 C; surf. tens. (Ring method) ≈ 30 mN/m; nonionic
Toxicology: Proper use provided, no adverse health effects observed
Trade Name Reference

Environmental: Considered to be a weak water pollutant (German law); do not allow to enter soil, waterways or waste water canal.

**Tegosoft® P** [Degussa Care Spec.]
Chem. Descrip.: Isopropyl palmitate
CAS **142-91-6**; EINECS/ELINCS **205-571-1**
Uses: Emollient, spreading agent, refatting agent, skin softener, and moisture retention aid in creams/lotions, topical pharmaceuticals; solubilizer for act. ingreds.; solvent for lipophilic additives
Features: Oxidation stable; medium polarity; very high spreadability
Regulatory: JSCI registered
Properties: Colorless odorless liq.; insol. in water; dens. ≈0.85 g/cm³; visc. ≈6 mPas); b.p. ≈300 C; pour pt. 12 C (DIN ISO 3016); flash pt. > 170 C (ISO 2592 c.o.c.); surf. tens. (Ring method) ≈ 29 mN/m; nonionic
Environmental: LC50 (fish) >100 mg/l; EC50 (bacteria) >100 mg/l; not considered to be a water pollutant (German law); do not allow to enter soil, waterways or waste water canal.

**Tegosoft® S** [Degussa Care Spec.]
Chem. Descrip.: Isopropyl stearate
CAS **112-10-7**; EINECS/ELINCS **203-934-9**
Uses: Emollient, refatting agent, skin softener, and moisture retention aid in creams/lotions, topical pharmaceuticals; solubilizer for essential oils and lipophilic act. ingreds.
Properties: Liq.; nonionic

**Tegosoft® SH** [Degussa Care Spec.]
Chem. Descrip.: Stearyl heptanoate
CAS **66009-41-4**; EINECS/ELINCS **266-065-4**
Uses: Emollient, skin softener, and moisture retention aid in creams/lotions, topical pharmaceuticals; pharmaceutical ointment bases
Features: Lipophilic; melts at skin temp.; quickly absorbed, water-resistant; oxidation stable; gives silky, nonoily skinfeel
Regulatory: JCIC registered
Properties: Waxy solid; sl. typical odor; sol. in water; m.p. ≈23 - 27 C; dens. 0.9 g/cm³; flash pt. >100 C (DIN 51758)
Toxicology: LD50 (oral, mouse rat) 951 mg/kg, (skin, guinea pig) > 1000 mg/kg; causes mod. to strong eye/mod. skin irritation; extended contact may cause temporary skin discoloration; sl. skin sensitization; TSCA listed
Environmental: BOD5 70 mg/g; BOD20 2000 mg/g; COD 2200 mg/g; ThOD 2450 mg/g; LC50 (fathead minnow, 96 h) 0.6 mg/l, (daphnid, 96 h) 3.2 mg/l
Precaution: Powd. material may form explosive dust/air mixts.; minimize dust generation/accumulation; incompat. with strong oxidizing agents
HMIS: Health 2, Flammability 1, Reactivity 0
Storage: 6 mos. shelf life; store in closed container away from contamination

**Terathane® 650** [Invista]
Chem. Descrip.: Polytetramethylene ether glycol
CAS **25190-06-1**
Uses: Soft segment in PU resins used for catheters and other medical devices
Regulatory: FDA 21CFR §175.105, 177.1680
Properties: Wh. waxy solid melting to a cl.
Trade Name Reference

colorless liq. near R.T., odorless; sol. in alcohols, esters, ketones; m.w. 600-700; sp.gr. 0.978 (40 C); dens. 8.1 lb/gal; visc. 100-200 cP (40 C); m.p. 11-19 C; hyd. no. 172; flash pt. (TOC) > 163 C; ref. index 1.462; 100% conc.

Toxicology: LD50 (oral, rat) > 11,000 mg/kg; very low oral toxicity; mod. skin irritant; mild eye irritant; TSCA listed

Environmental: Aquatic toxicity: LC50 (96 h, fathead minnows) 7.8 mg/l

Precaution: Incompat. with strong oxidizers; thermal decomp. produces extremely flamm. tetrahydrofuran, CO; temps. as low as 100 C can cause dangerous pressure buildup in stored drums

Storage: Hygroscopic; can oxidize; store in completely enclosed tanks under a dry nitrogen blanket; store above 45 C to prevent solid.; do not store in materials with a low barrier to oxygen

Terathane® 1000 [Invista http://www.invista.com]

Chem. Descrip.: Polytetramethylene ether glycol

CAS 25190-06-1

Uses: Soft segment in PU resins used for catheters and other medical devices

Regulatory: FDA 21CFR §175.105, 177.1680

Properties: Wh. waxy solid melting to a cl. colorless liq. near R.T., odorless; sol. in alcohols, esters, ketones; m.w. 950-1050; sp.gr. 0.974 (40 C); dens. 8.1 lb/gal; visc. 260-320 cP (40 C); m.p. 25-33 C; hyd. no. 112; flash pt. (TOC) > 163 C; ref. index 1.463-1.465; 100% conc.

Toxicology: LD50 (oral, rat) > 11,000 mg/kg; very low oral toxicity; mod. skin irritant; mild eye irritant; TSCA listed

Environmental: Aquatic toxicity: LC50 (96 h, fathead minnows) 7.8 mg/l

Precaution: Incompat. with strong oxidizers; thermal decomp. produces extremely flamm. tetrahydrofuran, CO; temps. as low as 100 C can cause dangerous pressure buildup in stored drums

Storage: Hygroscopic; can oxidize; store in completely enclosed tanks under a dry nitrogen blanket; store above 45 C to prevent solid.; do not store in materials with a low barrier to oxygen

Terathane® 1400 [Invista http://www.invista.com]

Chem. Descrip.: Polytetramethylene ether glycol

CAS 25190-06-1

Uses: Soft segment in PU resins used for catheters and other medical devices

Regulatory: FDA 21CFR §175.105, 177.1680

Properties: Wh. waxy solid melting to a cl. colorless liq. near R.T., odorless; sol. in alcohols, esters, ketones; m.w. 1350-1450; sp.gr. 0.973 (40 C); dens. 8.1 lb/gal; visc. 525-600 cP (40 C); m.p. 27-35 C; hyd. no. 77-83; flash pt. (TOC) > 163 C; ref. index 1.464; 100% conc.

Toxicology: LD50 (oral, rat) > 11,000 mg/kg; very low oral toxicity; mod. skin irritant; mild eye irritant; TSCA listed

Environmental: Aquatic toxicity: LC50 (96 h, fathead minnows) 7.8 mg/l

Precaution: Incompat. with strong oxidizers; thermal decomp. produces extremely flamm. tetrahydrofuran, CO; temps. as low as 100 C can cause dangerous pressure buildup in stored drums

Storage: Hygroscopic; can oxidize; store in completely enclosed tanks under a dry nitrogen blanket; store above 45 C to prevent solid.; do not store in materials with a low barrier to oxygen

Teric™ X40L [Huntsman
http://www.huntsman.com]
Chem. Descrip.: Octoxynol-40
CAS 9002-93-1
Uses: Emulsifier, detergent, wetting agent, dispersant, solubilizer, coupling agent for pharmaceuticals
Properties: APHA 100 color; sp.gr. 1.098; visc. 975 cps; HL 17.6; pour pt. 5 C; pH 7-9; surf. tens. 36.4 dynes/cm (0.1%); nonionic; 70% act.

Terra Alba [Allied Custom Gypsum
http://www.alliedcustomgypsum.com]
Chem. Descrip.: Calcium sulfate dihydrate (> 90%), calcium sulfate (< 10%), calcium carbonate (< 3%), crystalline silica (< 0.5%)
See Quartz
CAS 13397-24-5; 7778-18-9; 471-34-1; 14808-60-7; EINECS/ELINCS 231-900-3
Uses: Diluent in pharmaceutical tablets
Regulatory: FDA 21CFR §184.1230, GRAS
Properties: Wh. fine free-flowing powd., odorless, tasteless; 95% through 325 sieve; sl. sol. in water; m.w. 172.17; sp.gr. 2.32; bulk dens. 45 lb/ft3 (loose); pH 7-7.5; 98% min. assay
Toxicology: Nuisance particulate; high exposure to dust may cause eye and respiratory system irritation
Precaution: Incompat. with aluminum, strong acids
HMIS: Health 0, Flammability 0, Reactivity 0

Terra-Pure™ Certified Freeze Dried Aloe Vera Powder 200X [Terry Labs
http://www.terrylabs.com]
Chem. Descrip.: Aloe barbadensis leaf juice
Chem. Analysis: 100% aloe solids; 8% max. moisture
Uses: Moisturizer, soothing agent for OTC pharmaceuticals (topical analgesics/anesthetics, hydrocortisone creams, first aid sprays, anti-acne preps., medicated talcs)
Regulatory: USDA (NOP)/IFOAM certified organic
Properties: Wh. to lt. beige fine cryst. powd.; After reconstitution 1:199: sp.gr. 0.997-1.004; pH 3.5-5.0
Storage: Store in a cool, dry place; preserve after reconstitution; may darken with age

Terra-Pure™ Certified Spray Dried Aloe Vera Powder, 200X [Terry Labs
http://www.terrylabs.com; S. Black
http://www.sblack.com]
Chem. Descrip.: Aloe barbadensis leaf juice
Chem. Analysis: 100% aloe solids; 8% max. moisture
Uses: Moisturizer, soothing agent for OTC pharmaceuticals (topical analgesics/anesthetics, hydrocortisone creams, first aid sprays, anti-acne preps., medicated talcs)
Properties: Lt. cream to beige fine powd., mod. veg. odor; disperses rapidly in most aq. sol’ns.; After reconstituting 1:199 with DI water: sp.gr. 0.997-1.004; pH 3.5-5.0
Storage: Highly hygroscopic; store in cool, dry place with desiccant; add preservatives on reconstitution

Terra-Pure™ Non-Preserved Freeze Dried Aloe Vera Powder Decolorized, 200X [Terry...
Trade Name Reference

Labs [http://www.terrylabs.com]
Chem. Descrip.: Aloe vera powder See Aloe barbadensis leaf juice
Chem. Analysis: 100% aloe solids
Uses: Soothing agent and moisturizer OTC pharmaceuticals (topical analgesics/anesthetics, hydrocortisone creams, first aid sprays, anti-acne preps., medicated talcs, toothpaste)
Properties: Lt. cream to beige, fine crystalline powd.; sp.gr. 0.997-1.004 (25 C); pH 3.5-5.0
Storage: Store in a cool, dry place; preserve after reconstitution; may darken with age

Terra-Pure™ Non-Preserved Freeze Dried Aloe Vera Powder Reg., 200X [Terry Labs http://www.terrylabs.com]
Chem. Descrip.: Aloe barbadensis leaf juice
Chem. Analysis: 100% aloe solids
Uses: Soothing agent and moisturizer OTC pharmaceuticals (topical analgesics/anesthetics, hydrocortisone creams, first aid sprays, anti-acne preps., medicated talcs, toothpaste)
Properties: Lt. cream to beige, fine crystalline powd.; sp.gr. 0.997-1.004 (25 C); pH 3.5-5.0
Storage: Store in a cool, dry place; preserve after reconstitution; may darken with age

Terra-Pure™ Non-Preserved Spray Dried Aloe Vera Powder Reg., 200X [Terry Labs http://www.terrylabs.com]
Chem. Descrip.: Aloe barbadensis leaf juice
Chem. Analysis: 100% aloe solids
Uses: Moisten in OTC pharmaceuticals (topical analgesics/anesthetics, hydrocortisone creams, first aid sprays, anti-acne preps., medicated talcs, as moisturizing agent)
Properties: Lt. cream to beige, fine crystalline powd.; sp.gr. 0.997-1.004 (25 C); pH 3.5-5.0
Storage: Store in a cool, dry place; preserve after reconstitution; may darken with age

Terra-Spray™ Spray Dried Aloe Vera Powder 100X Regular [Terry Labs http://www.terrylabs.com; S. Black http://www.sblack.com]
Chem. Descrip.: Aloe barbadensis leaf juice, maltodextrin
Uses: Emollient in OTC pharmaceuticals (topical analgesics/anesthetics, hydrocortisone creams, first aid sprays, anti-acne preps., medicated talcs, as moisturizing agent)
Properties: Lt. cream to beige fine powd.; sp.gr. 0.997-1.004; pH 3.5-5.0; 50% min. aloe solids; 8% max. moisture
Storage: Once reconstituted, prod. will darken with age; preservatives must be added after reconstitution as this prod. is not preserved

Tetraglyme [Ferro http://www.ferro.com]
Chem. Descrip.: Tetraethylene glycol dimethyl ether See PEG-4 dimethyl ether
CAS 24991-55-7
Uses: Solvent for pharmaceuticals; drug carrier, stabilizer
Features: Tends to solvate cations
Properties: Colorless clear; mild, nonresidual odor; water-sol.; misc. with ethanol, acetone, benzene, diethyl ether, octane; m.w. 222.28; sp.gr. 1.0132; dens. 8.45 lb/gal; visc. 4.1 cP; f.p. -29.7 C; b.p. 275 C; flash pt. (CC) 141 C; ref. index 1.4330 (20 C); pH neutral; surf. tens. 33.8 dynes/cm (20 C); 98.0% min. purity
Toxicology: LD50 5100 mg/kg; low to mod. acute toxicity; chronic exposure may cause reproductive effects
Trade Name Reference

Environmental: Slowly biodeg.

**Tetronic® 50R1** [BASF http://www.basf.com]
Chem. Descrip.: EO/PO ethylene diamine block copolymer See EO/PO ethylenediamine block copolymer
Uses: Surfactant in the pharmaceutical industry
Properties: Liq.; m.w. 2640; visc. 670 cps; HLB 1-7; pour pt. -18 C; cloud pt. 29 C (1% aq.); surf. tens. 40 dynes/cm (0.1%); nonionic; 100% act.
Toxicology: LD50 (oral) > 10 g/kg, (dermal) > 5 g/kg; minimal skin and minimal to mild eye irritation

Chem. Descrip.: EO/PO ethylene diamine block copolymer See EO/PO ethylenediamine block copolymer
CAS 26314-40-5
Uses: Surfactant, emulsion stabilizer, solubilizer, dispersant, wetting agent, antistat, penetrant, plasticizer, defoamer, demulsifier in pharmaceuticals
Features: R series for low foaming applics.
Properties: Liq.; m.w. 7240; visc. 3870 cps; HLB 1-7; pour pt. 12 C; cloud pt. 43 C (1% aq.); surf. tens. 43 dynes/cm (0.1%); nonionic; 100% act.
Toxicology: LD50 (oral) > 10 g/kg, (dermal) > 5 g/kg; minimal skin and minimal to mild eye irritation

Chem. Descrip.: EO/PO ethylene diamine block copolymer See EO/PO ethylenediamine block copolymer
CAS 26314-40-5
Uses: Detergent, oil emulsifier, defoamer for pharmaceuticals
Features: Low foaming
Properties: Colorless liq.; m.w. 8000; visc. 1840 cps; HLB 1; pour pt. -17 C; cloud pt. 20 C (1% aq.); surf. tens. 33 dynes/cm (0.1%); nonionic; 100% act.
Toxicology: LD50 (oral) > 10 g/kg, (dermal) > 5 g/kg; minimal skin and minimal to mild eye irritation

Chem. Descrip.: Poloxamine 304
CAS 11111-34-5
Uses: Emulsifier, thickener, wetting agent, dispersant, solubilizer, stabilizer for pharmaceuticals
Properties: Colorless liq.; water-sol.; mild polyol odor; m.w. 3400; sp.gr. 1.02; visc. 575 cps; HLB 3; pour pt. -21 C; cloud pt. 22 C (1% aq.); surf. tens. 36.1 dynes/cm; Draves wetting 24 s (0.1%); Ross-Miles foam 2 mm (0.1% aq., 50 C); nonionic; 100% act.
Toxicology: LD50 (oral) > 10 g/kg, (dermal) > 5 g/kg; none to mild eye and minimal to moderate skin irritation; TSCA listed
Precaution: Wear chemical safety goggles; wear gloves, coveralls, apron, boots as necessary to minimize contact; use approved vapor mist respirator as necessary
NFPA: Health 1, Flammability 1, Reactivity 0

Chem. Descrip.: Poloxamine 701
CAS 11111-34-5
Uses: Detergent, oil emulsifier, thickener, wetting agent for pharmaceuticals
Features: Low foaming
Properties: Colorless liq.; m.w. 3400; sp.gr. 1.02; visc. 575 cps; HLB 3; pour pt. -21 C; cloud pt. 22 C (1% aq.); surf. tens. 36.1 dynes/cm; Draves wetting 24 s (0.1%); nonionic; 100% act.
Toxicology: LD50 (oral) > 10 g/kg, (dermal) > 5 g/kg; none to mild eye and minimal to moderate skin irritation

Chem. Descrip.: Poloxamine 704
CAS 11111-34-5
Uses: Emulsifier, thickener, wetting agent, dispersant, solubilizer, stabilizer for pharmaceuticals
Properties: Colorless liq.; m.w. 5500; ref. index 1.4613; water-sol.; sp.gr. 1.04; visc. 850 cps; HLB 15; pour pt. 65 C (1%); surf. tens. 40.3 dynes/cm (0.1%); nonionic; 100% act.
Trade Name Reference

Chem. Descrip.: Poloxamine 901
CAS 11111-34-5
Uses: Detergent, oil emulsifier, thickener, wetting agent, defoamer, dispersant, solubilizer, stabilizer for pharmaceuticals
Features: Low foaming
Regulatory: Kosher
Properties: Colorless liq.; moderate sol. in water; m.w. 4750; sp.gr. 1.02; visc. 700 cps; HLB 2.5; pour pt. -23 C; cloud pt. 20 C (1%); flash pt. (COC) > 468 F; ref. index 1.4545; pH 8-11 (2.5% aq. sol'n.); surf. tens. 36 dynes/cm (0.1%); nonionic; 100% act.
Toxicology: LD50 (oral) > 10 g/kg, (dermal) > 5 g/kg; none to mild eye and minimal to moderate skin irritation; TSCA listed
Precaution: Wear chemical safety goggles; wear gloves, coveralls, apron, boots as necessary to minimize contact
NFPA: Health 1, Flammability 1, Reactivity 0

Chem. Descrip.: Poloxamine 904
CAS 11111-34-5
Uses: Emulsifier, thickener, wetting agent, dispersant, solubilizer, stabilizer for pharmaceuticals
Properties: Colorless liq.; high polyol odor; water-sol.; m.w. 7500; sp.gr. 1.04; visc. 6000 cps; HLB 14.5; cloud pt. 64 C (1%); pour pt. 29 C; flash pt. (COC) > 468 F; ref. index 1.4604; pH 8-11 (2.5% aq. sol'n.); surf. tens. 45.7 dynes/cm (0.1%); nonionic; 100% act.
Toxicology: LD50 (oral) > 10 g/kg, (dermal) > 5 g/kg; none to mild eye and minimal to moderate skin irritation; TSCA listed
Precaution: Wear chemical safety goggles; wear gloves, coveralls, apron, boots as necessary to minimize contact
NFPA: Health 1, Flammability 1, Reactivity 0

Chem. Descrip.: Poloxamine 908
CAS 11111-34-5
Uses: Emulsifier, thickener, wetting agent, dispersant, solubilizer, stabilizer for pharmaceuticals
Properties: Flakes; m.w. 27,000; water-sol.; m.p. 58 C; HLB 30.5; cloud pt. > 100 C (1%); surf. tens. 45.7 dynes/cm (0.1%); nonionic; 100% act.
Toxicology: LD50 (oral) > 10 g/kg, (dermal) > 5 g/kg; none to mild eye and minimal to moderate skin irritation; TSCA listed
Precaution: Wear chemical goggles; wear gloves, coveralls, apron, boots as necessary to minimize contact
Environmental: Do not discharge into waterways
Storage: Store at moderate temps. in tightly closed container

Chem. Descrip.: Poloxamine 1107
CAS 11111-34-5
Uses: Emulsifier, thickener, wetting agent, dispersant, solubilizer, stabilizer for pharmaceuticals
Properties: Solid; mild polyol odor; water-sol.; m.w. 14,500; sp.gr. 1.04; visc. 1.1 poise; m.p. 51 C; HLB 24; cloud pt. > 100 C; flash pt. (COC) > 469 F; pH 8-11 (2.5% aq. sol'n.); surf. tens. 42.9 dynes/cm (0.1%); nonionic; 100% act.
Toxicology: LD50 (oral) > 10 g/kg, (dermal) > 5 g/kg; none to mild eye and minimal to moderate skin irritation; TSCA listed
Precaution: Wear chemical goggles; wear gloves, coveralls, apron, boots as necessary to minimize contact
NFPA: Health 1, Flammability 1, Reactivity 0

Chem. Descrip.: Poloxamine 1301
CAS 11111-34-5
Uses: Emulsifier, thickener, wetting agent, dispersant, solubilizer, stabilizer for pharmaceuticals
Properties: Colorless liq.; mild polyol odor; sl. sol. in water; m.w. 6800; sp.gr. 1.02; visc. 1000 cps; f.p. = -9 C; HLB 1.5; cloud pt. 16 C (1%); pour pt. -9 C; flash pt. (COC) > 476 F; ref. index 1.4545; pH 8-11 (2.5% aq. sol'n.); surf. tens. 33.4 dynes/cm; nonionic; 100% act.
Toxicology: LD50 (oral) > 10 g/kg, (dermal) > 5 g/kg; none to mild eye and minimal to moderate skin irritation; TSCA listed

Precaution: Wear chemical safety goggles; wear gloves, coveralls, apron, boots as necessary to minimize contact
NFPA: Health 1, Flammability 1, Reactivity 0

**Tetronic® 1304** [BASF http://www.basf.com]
Chem. Descrip.: Poloxamine 1304  CA$ 11111-34-5
Uses: Emulsifier, thickener, wetting agent, dispersant, solubilizer, stabilizer for pharmaceuticals
Properties: Paste; m.w. 10,500; water-sol.; m.p. 36 C; HLB 13.5; cloud pt. 78 C (1%); surf. tens. 35.5 dynes/cm (0.1%); nonionic; 100% act.
Toxicology: LD50 (oral) > 10 g/kg, (dermal) > 5 g/kg; none to mild eye and minimal to moderate skin irritation

Chem. Descrip.: Poloxamine 1307  CA$ 11111-34-5
Uses: Emulsifier, thickener, wetting agent, dispersant, solubilizer, stabilizer for pharmaceuticals
Properties: Solid; m.w. 18,600; water-sol.; m.p. 54 C; HLB 23.5; cloud pt. > 100 C (1%); surf. tens. 43.8 dynes/cm (0.1%); nonionic; 100% act.
Toxicology: LD50 (oral) > 10 g/kg, (dermal) > 5 g/kg; none to mild eye and minimal to moderate skin irritation

**Tewax TC 65** [Cesalpinia http://www.cesalpinia.com]
Chem. Descrip.: Glyceryl stearate and PEG-100 stearate
Uses: Emulsifier for pharmaceuticals
Properties: Flakes; HLB 11.0; nonionic; 100% conc.

**Texapon® K-12 Needles** [Cognis/Care Chems.; Cognis http://www.cognis.de]
Chem. Descrip.: Sodium lauryl sulfate
CAS 151-21-3; EINECS/ELINCS 205-788-1
Uses: Foamer for dentifrices, tablets
Regulatory: FDA 21CFR §176.170, 178.3400, BGA, NF, JP compliance
Properties: Wh. to lt. yel. needles, almost odorless; dens. 400-500 g/l; pH 6.5-9.0 (1%); anionic; 90% min. act.
Storage: 1 yr. min. storage life in orig. unopened containers at temps. below 40 C, protected from moisture

**Thiamine Hydrochloride USP, FCC** [DSM Nutritional Prods. USA http://www.nutraaccess.com]
CAS 67-03-8; EINECS/ELINCS 200-641-8
Uses: Nutrient, thiamine source in pharmaceutical liqs. (polyvitamin drops), dry prods
Features: Not rec. for dry prods. with high moisture content
Regulatory: USP, FCC, Ph. Eur.
Properties: Wh. or almost wh. powd.; freely sol. in water
Precaution: Avoid heat, alkalis, prolonged light exposure
Storage: Store in dry place in tightly closed container

**Thiamine Mononitrate 98 DC** [DSM Nutritional Prods. USA http://www.nutraaccess.com]
Chem. Descrip.: Vitamin B1 mononitrate
Thiolsome (P) [CLR http://www.clr-berlin.de; Actives Int'l.]
Chem. Descrip.: Water, phospholipids, acetyl methionine, acetyl cysteine See Acetylcysteine; N-Acetyl-L-methionine
Uses: For aq. gels and emulsions for appl. to skin and scalps with excess sebum secretion, and to stressed and damaged hair
Properties: Ivory suspension; char. odor; < 150 nm mean particle size of liposomes; dens. 1.010-1.020 g/ml (20 C); pH 5.6-6.5
Use Level: 5-10%

Chem. Descrip.: Trihydroxystearin
CAS 139-44-6; EINECS/ELINCS 205-364-6
Uses: For topical ointments
Features: For use in aliphatic solv. systems
Regulatory: FDA approved; DOT nonregulated; SARA §313 nonreportable; Canada DSL, EU, Australia, Japan, Korea, Philippine listed
Properties: Wh. fine powd.; fineness 99.8% min. through 200 mesh; odorless; sp.gr. 1.023; dens. 8.51 lb/gal; m.p. 86 C; 100% NV
Use Level: 0.2-0.8% on total wt.
Toxicology: ACGIH TLV/TWA (8 h) 10 mg/m³ (total), 5 mg/m³ (respirable); nuisance dust; may cause sl. eye/skin irritation; may cause sl. irritation on inh.; chronic exposure may damage lungs
Precaution: Minimize dusting; prevent static discharges; spillages may be slippery when wet; incompat. with strong oxidizers
HMIS: Health 1, Flammability 0, Reactivity 0

Thymo 50 [S. Black http://www.sblack.com]
Chem. Descrip.: Myristyl myristate
CAS 221-787-9; EINECS/ELINCS 221-787-9
Uses: Solubilizer, vehicle for medicines; emollient in antiperspirants
Features: Changes skin feel, rub out props. and greasiness; veg. oil substitute; vaseline substitute

Thymol 3X USP [Am. Labs http://www.americanlaboratories.com]
Chem. Descrip.: Thyroid
Uses: Pharmaceutical additive, drug
Regulatory: USP compliance
Properties: Ylsh. to buff-colored amorphous powd., sl. char. meat-like odor, saline taste
Storage: Store in tight containers

Thymol 10X USP [Am. Labs http://www.americanlaboratories.com]
Chem. Descrip.: Thyroid
Uses: Pharmaceutical additive, drug

Chem. Descrip.: Glyceryl myristate
CAS 589-66-4; EINECS/ELINCS 248-329-0
Uses: Vehicle for injectable substances; facilitates the incorporation of liposoluble active ingredients
Properties: Nonionic

Thyroid 3X USP [Am. Labs http://www.americanlaboratories.com]
Chem. Descrip.: Thyroid
Uses: Pharmaceutical additive, drug
Regulatory: USP compliance
Properties: Ylsh. to buff-colored amorphous powd., sl. char. meat-like odor, saline taste
Storage: Store in tight containers

Thyroid USP [Am. Labs http://www.americanlaboratories.com]
Chem. Descrip.: Thyroid
Uses: Pharmaceutical additive, drug
Trade Name Reference

Regulatory: USP compliance
Properties: Ylsh. to buff-colored amorphous powd., sl. char. meat-like odor, saline taste
Storage: Store in tight containers

Ticaxan® Regular [TIC Gums http://www.ticgums.com]
Chem. Descrip.: Xanthan gum
CAS 11138-66-2; EINECS/ELINCS 234-394-2
Uses: Stabilizer, thickener, emulsifier, suspending agent, binder, moisture control agent in pharmaceuticals (ointments, lotions, suspensions)

TIC Pretested® Agar Agar 100 FCC/NF Powder [TIC Gums http://www.ticgums.com]
Chem. Descrip.: Agar agar gum See Agar
CAS 9002-18-0; EINECS/ELINCS 232-658-1
Uses: Gellant for dental impressions
Features: Rigid gel which must boil to hydrate; stable under low pH conditions; tolerates large percentages of salts without changes in gel structure
Regulatory: Kosher
Properties: Med. mesh powd.; 90% through 100 mesh; m.w. 5000-30,000; visc. forms gel on heating; gel pt. 88-103 F; pH 4-7; 20% max. moisture

TIC Pretested® Agar Agar 110 FCC/NF Powd. [TIC Gums http://www.ticgums.com]
Chem. Descrip.: Agar
CAS 9002-18-0; EINECS/ELINCS 232-658-1
Uses: Gellant in pharmaceuticals
Regulatory: Kosher
Properties: 100 mesh powd.; sol. in water @ 212 F for 5 min

TIC Pretested® Agar Agar 150 FCC/NF Powd. [TIC Gums http://www.ticgums.com]
Chem. Descrip.: Agar
CAS 9002-18-0; EINECS/ELINCS 232-658-1
Uses: Gellant in pharmaceuticals
Regulatory: Kosher
Properties: 150 mesh powd.; sol. in water @ 212 F for 5 min

TIC Pretested® Agar RS-100 Powder [TIC Gums http://www.ticgums.com]
Chem. Descrip.: Agar
CAS 9002-18-0; EINECS/ELINCS 232-658-1
Uses: Gellant in pharmaceuticals
Regulatory: Kosher
Properties: Powd.; sol. in water @ 150-180 F

Uses: Gellant in pharmaceuticals
Regulatory: Kosher
Properties: Powd.; sol. in water @ 150-180 F

TIC Pretested® Arabic FT-1 Powder [TIC Gums http://www.ticgums.com]
Chem. Descrip.: Gum Arabic See Acacia
CAS 9000-01-5; EINECS/ELINCS 232-519-5
Uses: Carrier, antioxidant, flavor retention aid for spray-dried flavors
Features: Provides clean taste; may be labeled 'natural'
Regulatory: Kosher
Properties: Powd.; 85% min. dietary fiber, 15% max. moisture

TIC Pretested® Bright Gum Arabic FCC/NF Powder [TIC Gums http://www.ticgums.com]
Chem. Descrip.: Gum Arabic See Acacia
CAS 9000-01-5; EINECS/ELINCS 232-519-5
Uses: Film-former, starch replacer, excipient in pharmaceutical tablets; encapsulant for flavors; flavor carrier
Features: Good adhesion and water binding; superior white/bright color chars. in finished prods.
Properties: Bright wh. freeflowing powd.; odorless; bland taste; 80% min. through USS #80 mesh; low visc.

TIC Pretested® Bright Gum Arabic NF/USP Powder [TIC Gums http://www.ticgums.com]
Chem. Descrip.: Gum Arabic See Acacia
CAS 9000-01-5; EINECS/ELINCS 232-519-5
Uses: Tablet binder, excipient, wet granulating agent, flavor carrier, film-former in pharmaceuticals; sugar coating plasticizer
Features: Rec. for light colored applics.
Regulatory: Kosher
Properties: Sol. in cold water
Use Level: 3-30%

TIC Pretested® Bright Gum Arabic Pre-Hydrated® [TIC Gums http://www.ticgums.com]
Chem. Descrip.: Gum Arabic See Acacia
CAS 9000-01-5; EINECS/ELINCS 232-519-5
Uses: Flavoring agent in pharmaceuticals
Features: Dust-free; rapid hydration
Regulatory: Kosher
Properties: Wh. coarse powd.; sol. in cold water
TIC Pretested® CMC 2500 S [TIC Gums http://www.ticgums.com]
Chem. Descrip.: Sodium carboxymethylcellulose See Carboxymethylcellulose sodium
CAS 9004-32-4; EINECS/ELINCS 265-995-8
Uses: Thickener for pharmaceuticals
Regulatory: FDA GRAS, FCC
Properties: Off-wh. to tan free-flowing powd., odorless, bland flavor; 25% min. on 140 mesh, 65% max. through 140 mesh; sol. in cold or hot water; visc. 1400-2400 cps; pH 6.0-8.5; 99.5% min. purity, 8% max. moisture

TIC Pretested® Colloid 688T Powd. [TIC Gums http://www.ticgums.com]
Chem. Descrip.: Sodium alginate See Algin
CAS 9005-38-3
Uses: Gellant, film-former, emulsifier, suspending agent for pharmaceuticals (lotions, vitamin suspensions)
Features: Reactive with milk, calcium ions
Properties: Powd.; sol. in cold water; med. visc.

TIC Pretested® Colloid 602 Powder [TIC Gums http://www.ticgums.com]
Chem. Descrip.: Propylene glycol alginate
CAS 9005-37-2
Uses: Gellant, film-former, emulsifier, suspending agent for pharmaceuticals (lotions, vitamin suspensions)
Features: Reactive with milk
Properties: Powd.; sol. in cold water

TIC Pretested® Colloid 10002-M Powd. [TIC Gums http://www.ticgums.com]
Uses: Gellant in pharmaceuticals
Regulatory: Kosher

TIC Pretested® Gum Arabic #1 Powder [TIC Gums http://www.ticgums.com]
Chem. Descrip.: Gum Arabic See Acacia
CAS 9000-01-5; EINECS/ELINCS 232-519-5
Uses: Flavoring agent in pharmaceuticals
Properties: Sol. in cold water

Chem. Descrip.: Gum Arabic See Acacia
CAS 9000-01-5; EINECS/ELINCS 232-519-5
Uses: Flavoring agent in pharmaceuticals
Features: Easy dispersing, but takes longer to hydrate
Properties: Gran.; sol. in cold water

TIC Pretested® Gum Arabic BEV-101 GR Powd. [TIC Gums http://www.ticgums.com]
Chem. Descrip.: Gum Arabic See Acacia
CAS 9000-01-5; EINECS/ELINCS 232-519-5
Uses: Flavoring agent in pharmaceuticals
Features: Dust-free; rapid hydration; high in sol.

Handbook of Pharmaceutical Additives, Third Edition
**Trade Name Reference**

- adding visc.; high in sol. dietary fiber (typically 85%)
- Regulatory: Kosher
- Properties: Powd.; sol. in cold water

Chem. Descrip.: Pectin, low methoxyl
CAS 9000-69-5; EINECS/ELINCS 232-553-0
Uses: Gellant in foods, fruit gels, yogurt, pharmaceuticals; thickener
Features: Good at pH 2.8-6.5; sets @ 50-70 C; synergistic with locust bean gum
Regulatory: Kosher

**TIC Pretested® Pectin LM 35 Powd.** [TIC Gums http://www.ticgums.com]

Chem. Descrip.: Pectin, amidated low methoxyl
CAS 9000-69-5; EINECS/ELINCS 232-553-0
Uses: Gellant in pharmaceuticals
Features: Best at pH 3.2-3.6; sets @ 40-70 C; synergistic with locust bean gum
Regulatory: Kosher

**TIC Pretested® Pre-Hydrated® Bright Gum Arabic** [TIC Gums http://www.ticgums.com]

Chem. Descrip.: Gum Arabic See Acacia
CAS 9000-01-5; EINECS/ELINCS 232-519-5
Uses: Excipient in pharmaceutical tablets; carrier for flavors; flavoring agent
Features: Dust-free; rapid hydration; high in sol. dietary fiber
Regulatory: Kosher

**TIC Pretested® Pre-Hydrated® Gum Arabic FT Powd.** [TIC Gums http://www.ticgums.com]

Chem. Descrip.: Gum Arabic See Acacia
CAS 9000-01-5; EINECS/ELINCS 232-519-5
Uses: Excipient in pharmaceutical tablets; carrier for flavors; flavoring agent
Features: Dust-free; rapid hydration; high in sol. dietary fiber
Regulatory: Kosher

**TIC Pretested® Pre-Hydrated® Ticalose® CMC PH-2500 Powd.** [TIC Gums http://www.ticgums.com]

Chem. Descrip.: Cellulose gum USP/FCC See Carboxymethylcellulose sodium
CAS 9004-32-4; EINECS/ELINCS 265-995-8
Uses: Thickener, stabilizer in pharmaceuticals
Features: Prehydrated; synergistic with casein, most proteins; stable over pH 4-10
Properties: Dust-free powd., odorless, tasteless; 60% min. on 100 mesh; sol. in hot or cold water; visc. 1500-2500 cps (1%); pH 6.0-8.5; 99.5% min. purity

**TIC Pretested® Pre-Hydrated® Ticagel® 550-PT Powd.** [TIC Gums http://www.ticgums.com]

Chem. Descrip.: Xanthan NF See Xanthan gum
CAS 11138-66-2; EINECS/ELINCS 234-394-2
Uses: Suspending agent, stabilizer, thickener, emulsifier in pharmaceuticals, liq. suspensions
Regulatory: Kosher
Properties: Sol. in cold water
Use Level: 0.05-0.35%

**TIC Pretested® Ticagel® 550-PT Powd.** [TIC Gums http://www.ticgums.com]

Chem. Descrip.: Hydrocolloid
Uses: Gellant in pharmaceuticals
Trade Name Reference

**Features:** Forms rigid gel @ 1.5% gum level when heated to 180 F and cooled to ambient temps.; resultant gel is heat reversible and relatively stable with minimal syneresis during prolonged storage

**Regulatory:** Kosher

**Properties:** Sol. in water @ 180 F

**TIC Pretested® Ticage® 795 Powd.** [TIC Gums http://www.ticgums.com]
**Chem. Descrip.:** Carrageenan See Carrageenan (Chondrus crispus)
**CAS 9000-07-1; EINECS/ELINCS 232-524-2**
**Uses:** Gelant, binder, film-former for pharmaceuticals, toothpaste
**Features:** Yields soft, flexible gel that forms a stable film after drying; compat. with polyols and other bulking agents

**Regulatory:** Kosher

**Properties:** Powd.; sol. in water @ 180 F

**TIC Pretested® Ticaloid® Lite Powd.** [TIC Gums http://www.ticgums.com]
**Uses:** Gelant in pharmaceuticals

**Regulatory:** Kosher

**Properties:** Powd.; sol. in cold water

**TIC Pretested® Ticalose® CMC 15 Fine Powd.** [TIC Gums http://www.ticgums.com]
**Chem. Descrip.:** Cellulose gum See Carboxymethylcellulose sodium
**CAS 9004-32-4; EINECS/ELINCS 265-995-8**
**Uses:** Thickener, moisture retention aid, binder, lubricant, film-former for pharmaceuticals, vitamins
**Features:** Low-visc. grade; rec. where high solids levels, encapsulation, or film-forming are desirable; stable @ pH 4-10

**Properties:** Fine particle size (120 mesh); odorless; tasteless; visc. 10-15 cps (1%), 25-50 cps (2%); anionic

**TIC Pretested® Ticalose® CMC 2500 Std. Powd.** [TIC Gums http://www.ticgums.com]
**Chem. Descrip.:** Cellulose gum See Carboxymethylcellulose sodium
**CAS 9004-32-4; EINECS/ELINCS 265-995-8**
**Uses:** Thickener, suspending agent, stabilizer, visc. builder, mouthfeel enhancer for pharmaceuticals
**Features:** High-visc.; stable @ pH 4-10

**Properties:** Std. particle size (80 mesh); odorless; tasteless; visc. 1500-2500 cps (1%); anionic

**TIC Pretested® Ticaxan® Xanthan 200**

**FCC/USP/NF Powd.** [TIC Gums http://www.ticgums.com]
**Chem. Descrip.:** Xanthan gum
**CAS 11138-66-2; EINECS/ELINCS 234-394-2**
**Uses:** Stabilizer, thickener, processing aid for pharmaceuticals
**Features:** Features pseudoplasticity, heat and pH stability, high visc., good sol

**Regulatory:** FDA approved

**Properties:** Cream-colored free-flowing powd., nearly odorless, typ. bland flavor; 95% min. through 200 mesh, 70% min. through 270 mesh; sol. in cold water; visc. 1000 cps; pH 6.5-7.5; 15% max. moisture
**Use Level:** 0.05-0.35%

**TIC Pretested® Ticaxan® Xanthan NF Powd.** [TIC Gums http://www.ticgums.com]
**Chem. Descrip.:** Xanthan gum
**CAS 11138-66-2; EINECS/ELINCS 234-394-2**
**Uses:** Thickener, suspending agent, stabilizer, emulsifier in pharmaceuticals

**Regulatory:** Kosher

**Properties:** Sol. in cold water

**Tilol 161** [Undesa http://www.undesa.com; S. Black http://www.sblack.com]
**Chem. Descrip.:** PEG-4 oleate
**CAS 10108-25-5; EINECS/ELINCS 233-293-0**
**Uses:** O/w emulsifier, thickener, antifoam, dispersant, base for pharmaceuticals
**Features:** Certified organic; replaces maltodextrin and modified food starch in spray-dried flavors, flavor emulsions, confections; replaces corn syrup and high fructose corn syrup as binder, viscosifier

**Regulatory:** Kosher

**Properties:** Sol. in cold water

**Precaution:** Wear glove, goggles, overalls;
Trade Name Reference

Chem. Descrip.: PEG-6 oleate
CAS 9004-96-0
Uses: O/w emulsifier, thickener, antifoam, dispersant, base for pharmaceuticals
Regulatory: Not considered to be dangerous for transport
Properties: Yel. liq.; typical odor; disp. in water; sol. in fat; dens. 1.00; f.p. 0 C max.; flash pt. > 232 C; nonionic
Environmental: Biodeg.; keep out of sewers, drains, surface and underground water; considered to be of low toxicity for aquatic life
Precaution: Wear glove, goggles, overalls; avoid contact with flames
Hazardous Decomp. Prods.: Can generate adductors of ethylene oxide
Storage: Store in original, closed container @ R.T.; protect from dampness, heat sources

Chem. Descrip.: PEG-10 oleate
CAS 9004-96-0
Uses: O/w emulsifier, thickener, antifoam, dispersant, base for pharmaceuticals
Regulatory: Not considered to be dangerous for transport
Properties: Yel. liq.; typical odor; disp. in water; sol. in fat; dens. ≈ 1.02; f.p. 6 C.; flash pt. > 265 C; nonionic
Environmental: Biodeg.; keep out of sewers, drains, surface and underground water; considered to be of low toxicity for aquatic life
Precaution: Wear glove, goggles, overalls; avoid contact with flames
Hazardous Decomp. Prods.: Can generate adductors of ethylene oxide
Storage: Store in original, closed container @ R.T.; protect from dampness, heat sources

Chem. Descrip.: PEG-8 dioleate
CAS 9005-07-6
Uses: O/w emulsifier, thickener, antifoam, dispersant, base for pharmaceuticals
Regulatory: Not considered to be dangerous for transport
Properties: Yel. liq.; typical odor; insol. in water; sol. in waxes, vegetable and mineral oils; dens. ≈ 0.86; f.p. ≈ 5 C.; b.p. ≈ 225; flash pt. ≈ 190 C
Toxicology: Nontoxic by inh., contact, ing.
Trade Name Reference

Environmental: Biodeg.; keep out of sewers, drains, surface and underground water; considered to be of low toxicity for aquatic life
Precaution: Wear glove, goggles, overalls; avoid contact with flames; incompat. with strong oxidants
Hazardous Decomp. Prods.: CO, CO₂
Storage: Store in original, closed container @ R.T.; protect from dampness, heat sources

Chem. Descrip.: Ethyl olate
CAS 111-62-6; EINECS/ELINCS 203-889-5
Uses: Vehicle for injections; solubilizer for vitamin oils, hormones; vehicle for medicines; excipient for injectable substances
Features: Veg. oil substitute; vaseline substitute
Properties: Low visc. oil
Toxicology: Low toxicity

Chem. Descrip.: Polyglyceryl polyricinoleate
Uses: Vehicle for injectable substances; facilitates the incorporation of liposoluble active ingredients
Properties: Nonionic

Chem. Descrip.: Glycerol olate
CAS 111-03-5; EINECS/ELINCS 203-827-7
Uses: Vehicle for injectable substances; facilitates the incorporation of liposoluble active ingredients
Properties: Nonionic

Chem. Descrip.: Isopropyl olate
CAS 112-11-8; EINECS/ELINCS 203-935-4
Uses: Solubilizer, vehicle for medicines; excipient for injectable substances; emollient in antiperspirants
Features: Changes skin feel, rub out props. and greasiness; veg. oil substitute; vaseline substitute
Regulatory: Not considered to be dangerous for transport
Properties: Yel. liq.; typical odor; insol. in water; sol. in mineral oils, most org. solvs.; dens. ≈ 0.86; f.p. < 5 C.; flash pt. ≈ 180 C

Toxicology: Nontoxic by inh., contact, ing.
Environmental: Biodeg.; keep out of sewers, drains, surface and underground water; considered to be of low toxicity for aquatic life
Precaution: Wear glove, goggles, overalls; avoid contact with flames; incompat. with strong oxidants
Hazardous Decomp. Prods.: CO, CO₂
Storage: Store in original, closed container @ R.T.; protect from dampness, heat sources

Tiolisina Complex® [Sinerga Srl http://www.sinerga.it]
Chem. Descrip.: Lysine carboxymethyl cysteinate and lysine thiazolidine carboxylate
CAS 79458-68-7; 444-27-9; EINECS/ELINCS 279-164-2; 207-104-6
Uses: Sebum normalizer esp. on scalp, for use in greasy hair shampoos and lotions, skin care
Properties: Liq.; characteristic odor; dens. 1.05 - 1.15 g/ml; ref. index 1.378 - 1.398; pH 6.5-7.5

Tioxolone Water Soluble 5% [Provital; S. Black http://www.sblack.com]
Chem. Descrip.: Alcohol, PEG-40 castor oil, and tioxolone
CAS 64-17-5; 61791-12-6 (generic); 4991-65-5; EINECS/ELINCS 200-578-6; $; 225-653-0
Uses: Antiseborrheic and anti-acne props.

TIPA 99 [Dow http://www.dow.com]
Chem. Descrip.: Triisopropanolamine
CAS 122-20-3; EINECS/ELINCS 204-528-4
Uses: Used to produce pharmaceuticals
Properties: Sp.gr. 0.988 (70/4 C); dens. 8.24 lb/gal (70 C); visc. 100 cps (60 C); f.p. 44 C; b.p. 306 C (760 mm Hg); flash pt. (COC) 320 F; ref. index 1.4595 (30 C)

Tixosil® 63 [Rhodia HPCII http://www.rhodia-hpacci.com]
Chem. Descrip.: Hydrated silica See Silica, hydrated
CAS 1343-98-2; EINECS/ELINCS 215-683-2
Uses: Cleaning agent, abrasive in dentifrices
Properties: Wh. powd.; density, tapped =0.34
Storage: 24 mo. shelf life

Tixosil® 73 [Rhodia HPCII http://www.rhodia-hpacci.com]
Chem. Descrip.: Hydrated silica See Silica, hydrated
Chem. Analysis: ≥ 97.0
CAS 1343-98-2; EINECS/ELINCS 215-683-2
Trade Name Reference

**Tixosil® 123**  [Rhodia HPCIi](http://www.rhodia-hpcii.com)

Chem. Descr.: Hydrated silica  See Silica, hydrated

CAS 1343-98-2; EINECS/ELINCS 215-683-2

Uses: Polishing agent in dentifrices

Features: Low abrasivity

**Tixosil® 331**  [Rhodia HPCIi](http://www.rhodia-hpcii.com)

Chem. Descr.: Hydrated silica, amorphous  See Silica, hydrated

CAS 1343-98-2; EINECS/ELINCS 215-683-2

Uses: Rheology control agent for solv. and water-based systems; used in toothpaste, pharmaceuticals

Properties: Wh. powd.; 3 µ avg. particle size; < 0.1% retained 325 mesh; Hegman grind 7; dens. 17.1 lb/gal; surf. area 310 m²/g; oil absorp. 320%; ref. index 1.45; pH 7; 96% SiO₂

**T-Maz® 20**  [BASF/Perf. Chems.](http://www.basf.com/static/988804217008.html)

Chem. Descr.: Polysorbate 20

CAS 9005-64-5

Uses: Emulsifier, solubilizer, wetting agent, stabilizer, dispersant, visc. modifier, suspending agent for pharmaceuticals; emulsifier for skin care emulsions

Regulatory: Kosher

Properties: Yel. liq.; sol. in water, ethanol, acetone, toluene, veg. oil, propylene glycol; sp.gr. 1.1; visc. 400 cps; HLB 16.7; acid no. 2 max.; sapon. no. 40-50; hyd. no. 96-108; flash pt. (PMCC) > 350 F; nonionic; 97% act.

**T-Maz® 28**  [BASF/Perf. Chems.](http://www.basf.com/static/988804217008.html)

Chem. Descr.: PEG-80 sorbitan laurate

CAS 9005-64-5

Uses: Emulsifier, solubilizer, wetting agent, visc. modifier, stabilizer, dispersant for pharmaceuticals; emulsifier for skin care emulsions

Properties: Pale yel. liq.; sol. in water; sp.gr. 1.0; visc. 1100 cps; HLB 19.2; acid no. 2 max.; sapon. no. 5-15; hyd. no. 25-40; flash pt. (PMCC) > 350 F; 30% max. water

**T-Maz® 60K**  [BASF/Perf. Chems.](http://www.basf.com/static/988804217008.html)

Chem. Descr.: Polysorbate 60

CAS 9005-67-8

Uses: Wetting agent, visc. modifier, emulsifier, stabilizer, dispersant, solubilizer, suspending agent for pharmaceuticals

Properties: Yel. to amber cl. gel, bland odor; sol. in water, ethanol, min. spirits, toluene; disp. in propylene glycol; sp.gr. 1.08; m.p. 23-25 C; b.p. > 300 F; HLB 14.9; acid no. 2 max.; sapon. no. 45-55; hyd. no. 81-96; flash pt. (PMCC) > 350 F; nonionic; 100% conc.

**T-Maz® 65K**  [BASF/Perf. Chems.](http://www.basf.com/static/988804217008.html)

Chem. Descr.: Polysorbate 65

CAS 9005-71-4

Uses: Wetting agent, visc. modifier, emulsifier, stabilizer, dispersant, solubilizer, suspending agent for pharmaceuticals

Properties: Tan waxy paste, char. ester odor; sol. @ 2% in ethanol, veg. oil, disp. in water, insol. in min. oil, propylene glycol; m.p. 30-32 C; b.p. > 300 F; HLB 10.5; acid no. 2 max.; sapon. no. 88-98; hyd. no. 44-60; flash pt. (PMCC) > 350 F; nonionic; 100% conc.

Toxicology: LD₅₀ (oral, rat) > 39.8 g/kg; nonirritating, nonsensitizing

Storage: Store in well-ventilated area below 120 F

**T-Maz® 80**  [BASF/Perf. Chems.](http://www.basf.com/static/988804217008.html)

Chem. Descr.: Polysorbate 80

CAS 9005-65-6

Uses: Emulsifier, solubilizer, wetting agent, stabilizer, dispersant, visc. modifier, suspending agent for pharmaceuticals; emulsifier for skin care emulsions; solubilizer for fragrances and emollients

Features: Mild
Trade Name Reference

Properties: Yel. liq.; sol. in water, ethanol, veg. oil, toluol; sp.gr. 1.0; visc. 400 cps; HLB 15.0; sapon. no. 45-55; hyd. no. 65-80; flash pt. (PMCC) > 350 F; nonionic; 97% min. act.

T-Maz® 80K  [BASF/Perf. Chems.  
http://www.basf.com/static/988804217008.html]
Chem. Descrip.:  Polysorbate 80
CAS  9005-65-6
Uses:  Wetting agent, visc. modifier, stabilizer, dispersant, emulsifier, solubilizer for pharmaceuticals; solubilizer, emulsifier for vitamins, edible oils, essential oils, fragrances
Properties:  Yel. cl. liq., bland odor; sol. in water, ethanol, veg. oil; disp. in propylene glycol, toluene; sp.gr. 1.09; b.p. > 300 F; HLB 15.0; acid no. 2 max.; sapon. no. 45-55; hyd. no. 65-80; flash pt. (PMCC) > 350 F; nonionic; 100% conc.
Toxicology:  LD50 (oral, rat) > 30 ml/kg (mild); nonirritating, noncomedogenic
Storage:  Store in well-ventilated area below 120 F

T-Maz® 80KLM  [BASF/Perf. Chems.  
http://www.basf.com/static/988804217008.html]
CAS  9005-65-6
Uses:  Emulsifier, solubilizer, wetting agent, stabilizer, dispersant, visc. modifier, suspending agent for pharmaceuticals
Regulatory:  Kosher
Properties:  Gardner 5 liq.; sol. @ 5% in water, veg. oil, @ 2% in ethanol; disp. in toluene, propylene glycol, toluene; sp.gr. 1.09; b.p. > 300 F; HLB 15.0; acid no. 2 max.; sapon. no. 45-55; hyd. no. 65-80; flash pt. (PMCC) > 350 F; nonionic; 100% conc.

T-Maz® 81  [BASF/Perf. Chems.  
http://www.basf.com/static/988804217008.html]
Chem. Descrip.:  Polysorbate 81
CAS  9005-65-6
Uses:  Emulsifier, solubilizer, wetting agent, stabilizer, dispersant, visc. modifier, suspending agent for pharmaceuticals
Properties:  Gardner 6 liq.; sol. in min. spirits; disp. in water, min. oils, toluene, veg. oils; HLB 10.0; sapon. no. 96-104; hyd. no. 134-150; flash pt. (PMCC) > 350 F; nonionic; 100% conc.

Properties: Amber liq.; sol. in water, ethanol, toluol, veg. oil; sp.gr. 1.0; visc. 500 cps; HLB 14.9; sapon. no. 45-55; hyd. no. 65-80; flash pt. (PMCC) > 350 F; nonionic; 97% min. act.

Chem. Descrip.: Dl-α-Tocopherol
CAS 10191-41-0; EINECS/ELINCS 233-466-0
Uses: Antioxidant in pharmaceuticals
Regulatory: Kosher
Properties: Yel. to amber visc. oil; sl. mild odor; m.w. 430.69; 96% act.
Precaution: Rapidly turns dk. in presence of oxygen and high temps.; degrades rapidly
Storage: 2 yr shelf-life; store in closed containers under inert gas at R.T. or below; protect from light

Toho PEG #200 [Toho Chem. Ind. http://www.toho-chem.co.jp]
Chem. Descrip.: Polyethylene glycol
Uses: Base for creams/lotions, face cleansing foams, pharmaceutical ointments, suppositories, tablets
Properties: Cl. liq.; hyd. no. 534-590

Toho PEG #300 [Toho Chem. Ind. http://www.toho-chem.co.jp]
Chem. Descrip.: Polyethylene glycol
Uses: Base for creams/lotions, face cleansing foams, pharmaceutical ointments, suppositories, tablets
Properties: Cl. liq.; hyd. no. 356-393

Toho PEG #400 [Toho Chem. Ind. http://www.toho-chem.co.jp]
Chem. Descrip.: Polyethylene glycol
Uses: Base for creams/lotions, face cleansing foams, pharmaceutical ointments, suppositories, tablets
Properties: Cl. liq.; hyd. no. 268-294

Toho PEG #600 [Toho Chem. Ind. http://www.toho-chem.co.jp]
Chem. Descrip.: Polyethylene glycol
Uses: Base for creams/lotions, face cleansing foams, pharmaceutical ointments, suppositories, tablets
Properties: Cl. liq.; hyd. no. 178-196

Toho PEG #1000 [Toho Chem. Ind. http://www.toho-chem.co.jp]
Chem. Descrip.: Polyethylene glycol
Uses: Base for creams/lotions, face cleansing foams, pharmaceutical ointments, suppositories, tablets
Properties: Wh. solid; hyd. no. 107-118

Baypure® CX 100 [Bayer http://www.bayerus.com]
Chem. Descrip.: Iminodisuccinate, tetrasodium salt (26% min.) See Tetrasodium iminodisuccinate
Uses: Chelating agent for metal ions for use in pharmaceuticals
Properties: Colorless to lt. yel. sol'n.; sl. odor; misc. with water; sp.gr. 1.3 (20 C); visc. 30-60 mPa•s (20 C); b.p. 100 C (1013 mbar); pH 10.3-11.4; 33-35% act.
Toxicology: LD50 (oral, rat) > 2000 mg/kg; no indication of mutagenic or clatogenic effects
Environmental: Readily degrad.; LC0 (Brachydanio rerio, 96 h) > 82.6 mg/l
Hazardous Decomp. Prods.: Upon thermal decomp. COx, NOx, and other toxic gases
Storage: Store tightly sealed in original container; protect from temperatures <5 C

Tragacanth Gum Ribbon No. 1 NF FCC [Frutarom http://www.frutarom.com]
Chem. Descrip.: Tragacanth gum See Tragacanth (Astragalus gummifer) gum
CAS 9000-65-1; EINECS/ELINCS 232-552-5
Uses: Thickener, water binder, suspending agent, emulsifier for toothpastes, medicinal emulsions, pharmaceutical jellies and creams
Properties: Water-sol.
Chem. Descrip.: Glycerlyl triacetate See Triacetin
CAS 102-76-1; EINECS/ELINCS 203-051-9
Uses: Vehicle for injectable substances; facilitates the incorporation of liposoluble active ingredients
Properties: Nonionic

Tri-CAL WG [Innophos http://www.innophos.com/updates.asp?show=107]
Chem. Descrip.: Tricalcium phosphate anhyd. NF, FCC See Calcium phosphate tribasic
CAS 7758-87-4; EINECS/ELINCS 231-840-8
Uses: Excipient for wet granulation of tablets; mineral supplement
Features: Noncombustible
Regulatory: NF, FCC, FDA 21CFR §182.1217; DOT nonregulated; SARA nonreportable
Properties: Wh. gran. solid; odorless; 1% on 40 mesh, 54% on 100 mesh, 15% through 325 mesh; odorless; tasteless; sol. in dill. min. acid; pract. insol. in water; insol. in alcohol; m.w. 1004.6; m.p. 1670 C; pH 6.8 (20%); 100% act.; < 9% max. loss on ignition; 17.3% P, 37.6% Ca
Toxicology: LD50 (oral, rat) > 5000 mg/kg, (skin, rabbit) > 2000 mg/kg; dusts may cause eye irritation, upper respiratory tract irritation; low acute dermal and oral toxicity; ing. of lg. amts. may cause abdominal pain/cramps, nausea, vomiting, diarrhea; TSCA listed
Hazardous Decomp. Prods.: None known
HMIS: Health 0, Flammability 0, Reactivity 0
Storage: 24 mos. shelf life; store in tightly closed containers in cool, dry, sanitary area; avoid contamination of storage containers

Chem. Descrip.: Glycerin tricaprylate/tricaprate See Caprylic/capric triglyceride
CAS 73398-61-5; EINECS/ELINCS 277-452-2
Uses: Vehicle for pharmaceutical injections, oral suspensions, and suppositories
Regulatory: Not regulated for transport
Properties: Colorless liq.; typical odor; insol. in water; sol. in fat; dens. ≈ 0.95; flash pt. > 200 C
Trade Name Reference

Environmental: Keep our of sewers, drains, surface and underground water
Precaution: Wear gloves, goggles, overall skin protection; avoid contact with flames

Chem. Descrip.: Glycerol trioleate See Triolein
CAS 122-32-7; EINECS/ELINCS 204-534-7
Uses: Vehicle for injectable substances; facilitates the incorporation of liposoluble active ingredients
Properties: Nonionic

Tri Amino® 40% [ANGUS http://www.dow.com/angus/]
Chem. Descrip.: Tris (hydroxymethyl) aminomethane
CAS 77-86-1; EINECS/ELINCS 201-064-4
Uses: Buffer in pharmaceuticals, diagnostics, and biochemical apps.
Properties: Misc. with water; 40% act.

Tri Amino® Crystals [ANGUS http://www.dow.com/angus/]
Chem. Descrip.: Tris (hydroxymethyl) aminomethane
CAS 77-86-1; EINECS/ELINCS 201-064-4
Uses: Buffer in pharmaceuticals, diagnostics, and biochemical apps.
Properties: Sol. 80 g/100 ml water (20 C); m.w. 121.14; m.p. 171-172 C; b.p. 219-220 C (10 mm); pH 10.4 (0.1M aq., 20 C); 60% water

Tri Amino® Ultra Pure Standard [ANGUS http://www.dow.com/angus/]
Chem. Descrip.: Tris (hydroxymethyl) aminomethane
CAS 77-86-1; EINECS/ELINCS 201-064-4
Uses: Buffer for diagnostic/biological apps., contact lens cleaners, in prod. of enzymes; buffer and solubilizer in pharmaceuticals (injectables, orals, topicals, ophthalmics); CO2 scavenger/buffer for blood plasma; treats/prevents acidosis
Regulatory: USP, German, Japanese pharmacopoeia compliance
Properties: Wh. cryst. solid; sol. 80 g/100 ml in water (20 C); sol. in alcohols, glycols; m.w. 121.14; m.p. 168-172 C; b.p. 219 C; pH 10.0-11.5 (5% aq.); 99.9-100.1% purity
Precaution: Mildly alkaline

Tri Nitro® [Dow http://www.dow.com]
Chem. Descrip.: Tris (hydroxymethyl) nitromethane
CAS 126-11-4; EINECS/ELINCS 204-769-5
Uses: Antibacterial agent for cosmetics
Properties: 100% act. solid or 50% aq. sol'n.

NF, FCC See Calcium phosphate tribasic
CAS 7758-87-4; EINECS/ELINCS 231-840-8
Uses: Excipient for direct compression of tablets; mineral supplement
Regulatory: NF, FCC , DMF no. 5670
Properties: Wh. gran. solid; 0% on 20 mesh, 15% max. on 30 mesh, 5% max. through 30 mesh; odorless; tasteless; sol. in dil. min. acid; pract. insol. in water; insol. in alcohol; m.w. 1004.6; m.p. 1670 C; pH 7.2 (20% aq. slurry); 99.9-100.1% purity
Toxicology: LD50 (dermal, rabbit) > 2000 mg/kg; dust may cause eye irritation; low acute dermal toxicity; ing. of large quantities may cause abdominal pain, abdominal cramps, nausea, vomiting, diarrhea; not a suspected carcinogen; TSCA listed
Storage: 24 mos. shelf life; store in tightly closed containers in an area that is isolated from all toxic and harmful substances, sanitary, dry, cool

Triton® X-100 [Dow http://www.dow.com]
Chem. Descrip.: Octoxynol-9 (9-10 EO)
CAS 9002-93-1
Uses: Excipient in pharmaceuticals
Regulatory: FDA 21CFR §172.710, 175.105, 176.210, 178.3400, EPA compliance
Properties: Cl. liq.; sol. in water, toluene, xylene, trichlorethylene, ethylene glycol, alcohols; m.w. 628; sp.gr. 1.065; dens. 8.9 lb/gal; visc. 240 cps; HLB 13.5; cloud pt. 65 C (1% aq.); flash pt. > 300 F (TOC); pour pt. 45 F; pH 6 (5% aq.); surf. tens. 30 dynes/cm (1%); Ross-Miles foam 110 mm (0.1%, 120 F); nonionic; 100% act.

Trypsin 1:75 [Am. Labs http://www.americanlaboratories.com]
Chem. Descrip.: Trypsin
CAS 9002-07-7; EINECS/ELINCS 232-650-8
Uses: Proteolytic enzyme for pharmaceuticals, protein digestion, in tissue culture
Properties: Cream-colored amorphous powd.,
Trade Name Reference

char. nonoffensive odor
Storage: Preserve in tight containers in cool, dry place

Trypsin 1:150 [Am. Labs
http://www.americanlaboratories.com]
Chem. Descrip.: Trypsin
CAS 9002-07-7; EINECS/ELINCS 232-650-8
Uses: Proteolytic enzyme for pharmaceuticals, protein digestion, in tissue culture
Properties: Cream-colored amorphous powd., char. nonoffensive odor
Storage: Preserve in tight containers in cool, dry place

Trypsin 1:150 [Am. Labs
http://www.americanlaboratories.com]
Chem. Descrip.: Trypsin
CAS 9002-07-7; EINECS/ELINCS 232-650-8
Uses: Proteolytic enzyme for pharmaceuticals, protein digestion, in tissue culture
Properties: Cream-colored amorphous powd., char. nonoffensive odor
Storage: Preserve in tight containers in cool, dry place

Tullanox® HM-100 [Tulco
http://www.tulcocorp.com]
Chem. Descrip.: Precipitated silica See Silica, hydrated
CAS 1343-98-2; EINECS/ELINCS 215-683-2
Uses: Provides reinforcement, whiteness and water repellency in tooth filling compound
Features: Same base as Tullanox HM-250, but with different rheology
Properties: Wh. powd.

Tullanox® HM-150 [Tulco
http://www.tulcocorp.com]
Chem. Descrip.: Precipitated silica See Silica, hydrated
CAS 1343-98-2; EINECS/ELINCS 215-683-2
Uses: Provides reinforcement, whiteness and water repellency in tooth filling compound

Tullanox® HM-250 [Tulco
http://www.tulcocorp.com]
Chem. Descrip.: Hydrophobic precipitated silica, modified by org. silazane compd. See Silica, hydrated
CAS 1343-98-2; EINECS/ELINCS 215-683-2
Uses: Provides reinforcement, whiteness and water repellency in tooth filling compound
Features: High surf. area, high water repellency; hydrophobic
Properties: Wh. powd., extremely fine particle size; 0.3 µ particle diam.; sp.gr. 2.2; bulk dens. 5-6 lb/ft³; surf. area 125±20 m²/g; ref. index 1.45-1.46; pH > 9 (4% in 50/50 IPA/water)
Use Level: 0.1-2.0%
Toxicology: May cause eye irritation

Tulsion® CXO-18 [Thermax India
http://www.thermaxindia.com]
Chem. Descrip.: Ion exchange resin (polyacrylic copolymer matrix, carboxylic functional group, weak acid type)
Uses: Excipient for antibiotic purification
Features: Specially purified
Properties: Lt. colored free-flowing powd.; 0.08-0.15 mm particle size; 100-200 mesh size; pH 5-14; 52% moisture

Tulsion® T-44 [Thermax India
http://www.thermaxindia.com]
Chem. Descrip.: Ion exchange resin (polystyrene copolymer matrix, sulfonic functional group, strong acid type)
Uses: Excipient for antibiotic purification
Features: Specially purified
Properties: Lt. colored free-flowing powd.; 0.3-1.2 mm particle size; 16-50 mesh size; pH 5-14; 52% moisture

Tulsion® T-335 [Thermax India
http://www.thermaxindia.com]
Chem. Descrip.: Ion exchange resin (polyacrylic copolymer matrix, carboxylic functional group, weak acid type)
Uses: Excipient for pharmaceutical sustained-release formulations
Properties: 0.1-0.3 mm particle size; 50-140 mesh size; pH 0-14; cationic; < 5% moisture

Tulsion® T-339 [Thermax India
http://www.thermaxindia.com]
Chem. Descrip.: Ion exchange resin (polyacrylic copolymer matrix, carboxylic functional group, weak acid type)
Uses: Excipient, stabilizer, taste masking agent for pharmaceuticals, Vitamin B12 recovery and stabilization
Features: No side reactions
Properties: Powd.; < 0.15 mm particle size; < 100 mesh size; pH 5-14; < 10% moisture

Tulsion® T-343 [Thermax India
http://www.thermaxindia.com]
Chem. Descrip.: Ion exchange resin (polystyrene copolymer matrix, sulfonic functional group, strong acid type)
Uses: Excipient, taste masking agent, tablet disintegrant for pharmaceuticals
Features: No side reactions
Properties: Powd.; < 0.15 mm particle size; < 100 mesh size; pH 5-14; < 10% moisture

Tulsion® T-339 [Thermax India
http://www.thermaxindia.com]
Chem. Descrip.: Ion exchange resin (polyacrylic copolymer matrix, carboxylic functional group, weak acid type)
Uses: Excipient, taste masking agent for
Trade Name Reference

**pharmaceutical sustained-release formulations**

Properties: Lt. brn. free-flowing powd.; < 0.15 mm particle size; < 100 mesh size; pH 0-14; < 10% moisture

**Tulsion® T-344** [Thermax India http://www.thermaxindia.com]

Chem. Descrip.: Ion exchange resin (polystyrene copolymer matrix, sulfonic functional group, strong acid type)

Uses: Excipient, taste masking agent for pharmaceutical sustained-release formulations

Properties: Lt. colored free-flowing powd.; < 0.15 mm particle size; < 100 mesh size; pH 0-14; < 10% moisture

**Turpinal® SL** [Cognis/Care Chems.]

Chem. Descrip.: Etidronic acid (CAS 2809-2-1; EINECS/ELINCS 220-552-8)

Uses: Chelating agent for heavy metal ions; stabilizer, antioxidant for pharmaceuticals

Properties: Colorless to sl. ylsh. liq., neutral inherent odor; sp.gr. 1.445-1.458; 58-61% conc.

Use Level: 0.1-2%

Toxicology: Protect skin and eyes from contact

Precaution: Corrosive

Chem. Descrip.: Polysorbate 20 NF

CAS 9005-64-5

Uses: Solubilizer, o/w emulsifier in topical pharmaceuticals; emulsifier for flavors

Regulatory: USP/NF, EP compliance; FDA 21CFR §172.515

Properties: Pale yel. liq.; sol. in water, methanol, ethanol, IPA, propylene glycol, ethylene glycol, cottonseed oil; sp.gr. 1.1; visc. 400 cps; HLB 16.7; flash pt. > 300 F; sapon. no. 40-50; nonionic; 100% act.

Chem. Descrip.: Polysorbate 40 NF

CAS 9005-66-7 (generic)

Uses: O/w emulsifier, solubilizer in pharmaceuticals

Regulatory: USP/NF, EP compliance

Properties: Solid; HLB 9.6

Chem. Descrip.: Polysorbate 80

CAS 9005-65-6

Uses: O/w emulsifier, wetting agent, dispersant, solubilizer for topical pharmaceuticals

Properties: Yel. brn. liq.; sol. in water, at low levels in cottonseed oil; visc. 460 cps; HLB 15.0; nonionic

Chem. Descrip.: Polysorbate 81

CAS 9005-65-6

Uses: Emulsifier, wetting agent, dispersant, solubilizer for flavors, vitamin oils

Regulatory: SARA §311/312, 313 nonreportable
Trade Name Reference

**Properties:** Yel. brn. oily liq.; sol. in min. and corn oil, dioxane, Cellosolve, methanol, ethanol, ethyl acetate, aniline; disp. in water; sp.gr. 1; visc. 450 cps; HLB 10.0; flash pt. > 300 F; sapon. no. 96-104; nonionic; 100% act.

**Environmental:** BOD (28 d) 50%; COD 2.2g

**Precaution:** Wear safety goggles with side shields and impervious gloves; avoid strong oxidizing agents

**Hazardous Decomp. Prods.:** COx

**HMIS:** Health 0, Flammability 1, Reactivity 0

**Storage:** Store in original containers

**Tylopur® C 300 P2** [Clariant http://www.clariant.com; http://www.clariant-northamerica.com]

Chem. Descrip.: Sodium carboxymethylcellulose, normal etherification See Carboxymethylcellulose sodium

CAS 9004-32-4; EINECS/ELINCS 265-995-8

**Uses:** Binder for toothpaste; emulsifier, stabilizer, visc. modifier in pharmaceutical syrups, emulsions, suspensions, ointments, liniments

**Features:** Highly purified

**Properties:** Powd.; 95% min. through 80 mesh, 60% min. through 140 mesh; sol. in water; visc. 300 mPa•s (1.8%, 20 C); pH 6-8 (1%); anionic; 99.5% min. act.; 10% max. moisture

**Storage:** Long shelf life if stored in closed bags under dry conditions

**Tylopur® C 3000 P2** [Clariant http://www.clariant.com; http://www.clariant-northamerica.com]

Chem. Descrip.: Sodium carboxymethylcellulose, normal etherification See Carboxymethylcellulose sodium

CAS 9004-32-4; EINECS/ELINCS 265-995-8

**Uses:** Binder, crystallization control agent in ice cream; visc. modifier, stabilizer in yogurt, sour milk drinks, fruit and vegetable juices; visc. modifier, stabilizer in pharmaceutical syrups, emulsions, suspensions; binder, disintegrant in pharmaceutical tablets

**Features:** Highly purified

**Properties:** Gran.; 95% min. through 18 mesh; 20% max. through 80 mesh; sol. in water; visc. 6000 mPa•s (1.8%, 20 C); pH 6-8 (1%); anionic; 99.5% min. act.; 10% max. moisture

**Storage:** Long shelf life if stored in closed bags under dry conditions

**Tylopur® C 1000 P2** [Clariant http://www.clariant.com]

Chem. Descrip.: Sodium carboxymethylcellulose, See Carboxymethylcellulose sodium

CAS 9004-32-4; EINECS/ELINCS 265-995-8

**Uses:** Thickener, binder for sauces, soups, gravies; stabilizer, shelf-life extender in bakery and dough prods.; thickener, stabilizer in pharmaceutical syrups, emulsions, suspensions; binder, disintegrant in pharmaceutical tablets

**Features:** Highly purified

**Properties:** Powd.; 95% min. through 80 mesh, 60% min. through 140 mesh; sol. in water;
Trade Name Reference

visc. 10,000 mPa•s (1.8%, 20 C); pH 6-8 (1%);
anionic
Storage: Long shelf life if stored in closed bags under dry conditions

Tylopur® CB 30000 G1 [Clariant
http://www.clariant.com;
http://www.clariant-northamerica.com]
Chem. Descrip.: Sodium carboxymethylcellulose, highly etherified
See Carboxymethylcellulose sodium
CAS 9004-32-4; EINECS/ELINCS 265-995-8
Uses: Thickener, stabilizer in pharmaceutical syrups
Features: Highly purified
Properties: Wh. to pale ylsh. gran.; 95% min. through 18 mesh, 20% max. through 80 mesh; sol. in water; visc. 30,000 mPa•s (1.8%, 20 C); pH 6-8 (1%); anionic; 99.5% min. act.; 10% max. moisture
Storage: Long shelf life if stored in closed bags under dry conditions

Chem. Descrip.: Sodium carboxymethylcellulose, highly etherified
See Carboxymethylcellulose sodium
CAS 9004-32-4; EINECS/ELINCS 265-995-8
Uses: Thickener, stabilizer in pharmaceutical syrups
Features: Highly purified
Properties: Powd.; 95% min. through 80 mesh, 60% min. through 140 mesh; sol. in water; visc. 30,000 mPa•s (1.8%, 20 C); anionic; 99.5% min. act.; 10% max. moisture
Storage: Long shelf life if stored in closed bags under dry conditions

Tylose® H 20 P2 PHA [Shin-Etsu http://www.silicone.jp/e/]
CAS 9004-62-0
Uses: Binder, controlled release agent in pharmaceutical gran., tablets, controlled-release preps.; film-former, protectant in pharmaceutical coatings
Features: Highly purified
Properties: Powd.; 95% min. through 80 mesh, 40% min. through 140 mesh; sol. in water; visc. 20 mPa•s (1.9%, 20 C); pH 6.0-8.5 (1%); nonionic; 10% max. moisture
Storage: Long shelf life if stored in closed bags under dry conditions

Tylose® H 300 G4 PHA [Shin-Etsu http://www.silicone.jp/e/]
CAS 9004-62-0
Uses: Film-former, protectant in pharmaceutical coatings; visc. modifier, water retention aid, film-former in pharmaceutical ointments, gels, syrups, nasal, eye, and ear drops
Features: Highly purified
Properties: Wh. to sl. yel. gran.; odorless; 98% min. through 35 mesh, 25% max. through 120 mesh; sol. in water; insol. in fat; dens. 1.38-1.4; bulk dens. 400 kg/m³; visc. 300 mPa•s (1.9%, 20 C); ignition temp. > 360 C; self-ignition temp. > 190 C; pH 6.0-8.5 (1%); octanol/water partition < 3; nonionic; 10% max. moisture
Toxicology: LD50 (oral, rat) > 2 g/kg
Environmental: LC50 (zebra fish, 96 hr) > 500 mg/l; EC50 (bacteria) > 1 g/l; biodeg. 10-30% (OCED 302 B); DOC 500 mg/g; COD 1200 mg/g; do not allow to enter drains, waterways
Precaution: Wear rubber gloves, safety glasses; slippery when wet
Storage: Long shelf life if stored in closed bags under dry conditions

Tylose® H 30000 P2 PHA [Shin-Etsu http://www.silicone.jp/e/]
CAS 9004-62-0
Uses: Binder, controlled release agent in pharmaceutical gran., tablets, timed-release preps.; visc. modifier, emulsifier, water retention aid, film-former in pharmaceutical ointments, gels, syrups, emulsions, suspensions, nasal/eye/ear drops
Features: Highly purified
Properties: Gran.; 98% min. through 35 mesh, 25% max. through 120 mesh; sol. in water; visc. 4000 mPa•s (1.9%, 20 C); pH 6.0-8.5 (1%); nonionic; 10% max. moisture
Storage: Long shelf life if stored in closed bags under dry conditions

Tylose® H 30000 P2 PHA [Shin-Etsu http://www.silicone.jp/e/]
CAS 9004-62-0
Uses: Emulsifier, visc. modifier, thickener,
Tylose® H 100000 P2 PHA [Shin-Etsu http://www.silicone.jp/e/]
CAS 9004-62-0
Uses: Thickener, stabilizer in pharmaceutical syrups, emulsions, suspensions; emulsifier, binder
Features: Highly purified
Properties: Wh. to sl. yel. powd.; odorless; 95% min. through 80 mesh, 40% min. through 140 mesh; sol. in water; insol. in fat; dens. 1.38-1.40; bulk dens. ≈ 450 k/m³; visc. 30,000 mPa•s (1.9%, 20 C); ignition temp. > 360 C; self-ignition temp. > 190 C; pH 6.0-8.5 (1%); nonionic; 10% max. moisture
Toxicology: LD50 (oral, rat) > 2 g/kg; non-irritating to skin, eyes
Environmental: LC50 (zebra fish, 96 h) > 500 mg/l; EC50 (activated sludge) > 1000 mg/l; biodeg. 10-30%; do not allow to enter drains or waterways; dissolved org. carbon 500 mg/g; chemical oxygen demand 1200 mg/g
Precaution: Wear rubber gloves, dust mask, safety glasses; forms slippery surfaces with water
Storage: Long shelf life if stored in closed bags under dry conditions

Tylose® MH Grades [Shin-Etsu http://www.silicone.jp/e/]

Chem. Descrip.: Methyl hydroxyethylcellulose
CAS 9032-42-2
Uses: Binder, thickener, pigment/foam/filler stabilizer, dispersant, emulsifier, plasticizer, visc. control agent, protective colloid for pharmaceuticals
Properties: Gran.; water-sol.; nonionic; 100% act.
Toxicology: LD50 (oral, rat) > 2 g/kg; non-irritating to skin, eyes
Environmental: LC50 (zebra fish, 96 h) > 500 mg/l; EC50 (activated sludge) > 1000 mg/l; biodeg. 10-30%; do not allow to enter drains or waterways; dissolved org. carbon 500 mg/g; chemical oxygen demand 1200 mg/g
Precaution: Wear rubber gloves, dust mask, safety glasses; capable of dust explosion; forms slippery surfaces with water
Storage: Long shelf life if stored in closed bags under dry conditions

Tylose® MHB [Shin-Etsu http://www.silicone.jp/e/]
Chem. Descrip.: Methyl hydroxyethylcellulose
CAS 9032-42-2
Uses: Binder, thickener, pigment/foam/filler stabilizer, dispersant, emulsifier, plasticizer, visc. control agent, protective colloid for pharmaceuticals
Properties: Gran.; water-sol.; nonionic
Toxicology: LD50 (oral, rat) > 2 g/kg; non-irritating to skin, eyes
Environmental: LC50 (zebra fish, 96 h) > 500 mg/l; EC50 (activated sludge) > 1000 mg/l; biodeg. 10-30%; do not allow to enter drains or waterways; dissolved org. carbon 500 mg/g; chemical oxygen demand 1200 mg/g
Precaution: Wear rubber gloves, dust mask, safety glasses; capable of dust explosion; forms slippery surfaces with water
Storage: Long shelf life if stored in closed bags under dry conditions

Type CG6/AW 8x30 [Cameron Carbon http://www.cameroncarbon.com/]
Chem. Analysis: Moisture 5%; ash 8%
CAS 7440-44-0; EINECS/ELINCS 231-153-3
Uses: Pharmaceutical purification
Properties: Gran.; mesh size 8x30; sp.gr. 0.45; iodine no. 950; hardness 76

Type CG6/AW 12x40 [Cameron Carbon http://www.cameroncarbon.com/]
Chem. Analysis: Moisture 5%; ash 8%
CAS 7440-44-0; EINECS/ELINCS 231-153-3
Uses: Pharmaceutical purification
Properties: Gran.; mesh size 12x40; sp.gr. 0.49; iodine no. 1000; hardness 76

Type SG6 [Cameron Carbon http://www.cameroncarbon.com/]
Chem. Descrip.: Activated coconut shell carbon See Carbon, activated
Chem. Analysis: Moisture 5%; ash 8%
CAS 7440-44-0; EINECS/ELINCS 231-153-3
Uses: For dechlorination of water and ultra pure water applics. that involve low concs. of low m.w. organics; also for precious metal recovery; pharm. purification
Properties: Gran.; sp.gr. 0.49; surf. area 1100 B.E.T./N2; iodine no. 1050; hardness 97; 60% act.; 2% moisture

Chem. Descrip.: Polyol alkoxylate
Trade Name Reference

**Uses:** Antifoam for fermentation, antibiotics

**Properties:** Colorless liq.; sp. gr. 1.04; hyd. no. 50; pour pt. -28 C; cloud pt. 40 C (1% aq.); pH 5.5 (10% in 10/1 methanol/water); surf. tens. 41 mN/m (0.5%, 20 C); nonionic; 100% act.

**Ultrafino®** [Luzenac Am.](http://www.luzenac.com)

**Chem. Descrip.:** Talc USP/FCC

**Chem. Analysis:** SiO₂ (62%), MgO (32%)

**CAS** 14807-96-6; EINECS/ELINCS 238-877-9

**Uses:** Filler for pharmaceuticals, formulations with sensitive fragrances and pigments, antiperspirants, and aerosols

**Features:** Highly refined, extra-fine talc with exc. slip and lustrous, translucent appearance

**Properties:** Powd.; 99.96% through 325 mesh; median diam. 4 µ; tapped dens. 35 lb/ft³; TAPPI brightness 89; pH 9 (10% slurry)

**Ultrapeg 300 USP** [Oxiteno](http://www.oxiteno.com.br/in/index.htm)

**Chem. Descrip.:** Polyethyleneglycol 300 See PEG-6

**Chem. Analysis:** Water 1.0% max.

**CAS** 25322-68-3

**Uses:** Carrier, lubricant, and humectant in ointments and pharmaceutical creams; solubilizer in liq. preps.

**Regulatory:** USP

**Properties:** Cl. liq.; avg. m.w. 285-315; pH 4.5-7.5 (5% aq. sol'n); acid value 0.5 max.; hydroxyl value 356-394; ash content 0.1% max

**Toxicology:** Sl. toxic

**Precaution:** Wear safety goggles, PVC gloves, apron

**Hazardous Decomp. Prods.:** Irritating fumes

**Storage:** 24 mos. when stored in original packaging in dry, covered area away from heat sources on cemented floor

**Ultrapeg 400 USP** [Oxiteno](http://www.oxiteno.com.br/in/index.htm)

**Chem. Descrip.:** Polyethyleneglycol 400 See PEG-8

**Chem. Analysis:** Water 1.0% max.

**CAS** 25322-68-3; EINECS/ELINCS 225-856-4

**Uses:** Carrier, lubricant, and humectant in ointments and pharmaceutical creams; carrier and lubricant in suppositories

**Regulatory:** USP

**Properties:** Solid; avg. m.w. 950-1050; pH 4.5-7.5 (5% aq. sol'n); acid value 0.5 max.; hydroxyl value 107-118; ash content 0.1% max

**Toxicology:** Sl. toxic

**Precaution:** Wear safety goggles, PVC gloves, apron

**Hazardous Decomp. Prods.:** Irritating fumes

**Storage:** 24 mos. when stored in original packaging in dry, covered area away from heat sources on cemented floor

**Ultrapeg 600 USP** [Oxiteno](http://www.oxiteno.com.br/in/index.htm)

**Chem. Descrip.:** Polyethyleneglycol 600 See PEG-12

**Chem. Analysis:** Water 1.0% max.

**CAS** 25322-68-3; EINECS/ELINCS 229-859-1

**Uses:** Carrier, lubricant, and humectant in ointments and pharmaceutical creams; solubilizer in liq. preps.

**Regulatory:** USP

**Properties:** Liq.; avg. m.w. 570-630; pH 4.5-7.5 (5% aq. sol'n); acid value 0.5 max.; hydroxyl value 178-197; ash content 0.1% max

**Toxicology:** Sl. toxic

**Precaution:** Wear safety goggles, PVC gloves, apron

**Hazardous Decomp. Prods.:** Irritating fumes

**Storage:** 24 mos. when stored in original packaging in dry, covered area away from heat sources on cemented floor

**Ultrapeg 1000 USP** [Oxiteno](http://www.oxiteno.com.br/in/index.htm)

**Chem. Descrip.:** Polyethyleneglycol 1000 See PEG-20

**Chem. Analysis:** Water 1.0% max.

**CAS** 25322-68-3; EINECS/ELINCS 203-989-9

**Uses:** Carrier, lubricant, and humectant in ointments and pharmaceutical creams; carrier and lubricant in suppositories

**Regulatory:** USP

**Properties:** Solid; avg. m.w. 950-1050; pH 4.5-7.5 (5% aq. sol'n); acid value 0.5 max.; hydroxyl value 107-118; ash content 0.1% max

**Toxicology:** Sl. toxic

**Precaution:** Wear safety goggles, PVC gloves, apron

**Hazardous Decomp. Prods.:** Irritating fumes

**Storage:** 24 mos. when stored in original packaging in dry, covered area away from heat sources on cemented floor

**Ultrapeg 1500 F USP** [Oxiteno](http://www.oxiteno.com.br/in/index.htm)

**Chem. Descrip.:** Polyethyleneglycol 1500 See PEG-32

**Chem. Analysis:** Water 2.0% max.

**CAS** 25322-68-3; EINECS/ELINCS 203-989-9

**Uses:** Carrier, lubricant, and humectant in ointments and pharmaceutical creams; carrier and lubricant in suppositories

**Regulatory:** USP

**Properties:** Solid; avg. m.w. 950-1050; pH 4.5-7.5 (5% aq. sol'n); acid value 0.5 max.; hydroxyl value 107-118; ash content 0.1% max

**Toxicology:** Sl. toxic

**Precaution:** Wear safety goggles, PVC gloves, apron

**Hazardous Decomp. Prods.:** Irritating fumes

**Storage:** 24 mos. when stored in original packaging in dry, covered area away from heat sources on cemented floor
**Trade Name Reference**

carrier and lubricant in suppositories

Regulatory: USP

Properties: Wh. flakes; avg. m.w. 1425-1575; pH 4.5-7.5 (5% aq. sol'n); acid value 0.5 max.; hydroxyl value 71-78; ash content 0.1% max

Toxicology: Sl. toxic

Precaution: Wear safety goggles, PVC gloves, apron

Hazardous Decomp. Prods.: Irritating fumes

Storage: 24 mos. when stored in original packaging in dry, covered area away from heat sources on cemented floor

Ultrapeg 1500 USP [Oxiteno](http://www.oxiteno.com.br/in/index.htm)

Chem. Descrip.: Polyethyleneglycol 1500 See PEG-32

Chem. Analysis: Water 1.0% max.

CAS 25322-68-3; EINECS/ELINCS 203-989-9

Uses: Carrier, lubricant, and humectant in ointments and pharmaceutical creams; carrier and lubricant in suppositories

Regulatory: USP

Properties: Solid; avg. m.w. 1425-1575; pH 4.5-7.5 (5% aq. sol'n); acid value 0.5 max.; hydroxyl value 71-78; ash content 0.1% max

Toxicology: Sl. toxic

Precaution: Wear safety goggles, PVC gloves, apron

Hazardous Decomp. Prods.: Irritating fumes

Storage: 24 mos. when stored in original packaging in dry, covered area away from heat sources on cemented floor

Ultrapeg 4000 F USP [Oxiteno](http://www.oxiteno.com.br/in/index.htm)

Chem. Descrip.: Polyethyleneglycol 4000 See PEG-75

Chem. Analysis: Water 1.0% max.

CAS 25322-68-3; EINECS/ELINCS 203-989-9

Uses: Carrier, lubricant, and humectant in ointments and pharmaceutical creams; carrier and lubricant in suppositories

Regulatory: USP

Properties: Wh. flakes; avg. m.w. 3600-4400; pH 4.5-7.5 (5% aq. sol'n); acid value 25-31; ash content 0.1% max

Toxicology: Sl. toxic

Precaution: Wear safety goggles, PVC gloves, apron

Hazardous Decomp. Prods.: Irritating fumes

Storage: 24 mos. when stored in original packaging in dry, covered area away from heat sources on cemented floor

Ultrapeg 6000 F USP [Oxiteno](http://www.oxiteno.com.br/in/index.htm)

Chem. Descrip.: Polyethyleneglycol 6000 See PEG-150

Chem. Analysis: Water 1.0% max.

CAS 25322-68-3; EINECS/ELINCS 203-989-9

Uses: Carrier, lubricant, and humectant in ointments and pharmaceutical creams; carrier and lubricant in suppositories

Regulatory: USP

Properties: Wh. flakes; avg. m.w. 5400-6600; pH 4.5-7.5 (5% aq. sol'n); acid value 0.5 max.; hydroxyl value 17-21; ash content 0.1% max

Toxicology: Sl. toxic

Precaution: Wear safety goggles, PVC gloves, apron

Hazardous Decomp. Prods.: Irritating fumes

Storage: 24 mos. when stored in original packaging in dry, covered area away from heat sources on cemented floor

Ultrapure ES Liquid [Ultra Chemical](http://www.ultrachem.com)

Chem. Descrip.: White petrolatum USP

Chem. Analysis: Lovibond 2Y max. color; sp. gr. 0.815-0.855; visc. 50-60 SUS (210 F); m.p. 105-115 F

Features: Used where extra-soft, low melting point petrolatum is desired

Regulatory: USP

Properties: Lovibond 2Y max. color; sp. gr. 0.815-0.855; visc. 50-60 SUS (210 F); m.p. 105-115 F
Trade Name Reference

Ultrapure L [Ultra Chemical
http://www.ultrachem.com]
Chem. Descr.: White petrolatum USP
CAS 8027-32-5; EINECS/ELINCS 232-373-2
Uses: Base, skin protectant, penetrant,
moisture retention aid for skin care prods.,
pharmaceuticals
Regulatory: USP
Properties: Lovibond 2Y max. color; sp. gr.
0.815-0.855; visc. 50-60 SUS (210 F); m.p. 52-
60 C

Ultrapure Liquid [Ultra Chemical
http://www.ultrachem.com]
Chem. Descr.: White petrolatum USP
CAS 8027-32-5; EINECS/ELINCS 232-373-2
Uses: Base, skin protectant, penetrant,
moisture retention aid for skin care prods.,
pharmaceuticals
Features: Used where extra-soft, low melting
point petrolatum is desired
Regulatory: USP
Properties: Lovibond 2Y max. color; sp. gr.
0.815-0.855; visc. 50-60 SUS (210 F); m.p.
105-115 F

Ultrapure SC [Ultra Chemical
http://www.ultrachem.com]
Chem. Descr.: White petrolatum USP
CAS 8027-32-5; EINECS/ELINCS 232-373-2
Uses: Base, skin protectant, penetrant,
moisture retention aid for skin care prods.,
pharmaceuticals
Features: Less greasy afterfeel; no drag; easy to
emulsify
Regulatory: USP
Properties: Lovibond 1Y max. color; visc. 50-60
SUS (210 F); m.p. 52-60 C

http://www.nationalstarch.com]
Chem. Descr.: Corn starch See Corn (Zea
mays) starch
CAS 9005-25-8; EINECS/ELINCS 232-679-6
Uses: Binder, filler, disintegrant for
pharmaceutical tablets and preps.; volume
adjuster in hard capsules; lubricant
Features: High whiteness
Regulatory: USP/NF
Properties: Wh. free-flowing powd.; pH 4.5-7;
14% max. moisture

http://www.nationalstarch.com]
Chem. Descr.: Corn starch NF See Corn
(Zea mays) starch
CAS 9005-25-8; EINECS/ELINCS 232-679-6
Uses: Excipient, anticaking agent for
pharmaceutical tablet compression,
capsule filling
Features: Low moisture content; protects
moisture-sensitive ingreds.
Regulatory: USP/NF
Properties: Wh. powd.; pH 4.5-7.0; 2% max.
moisture

Unicerin C-30 [Induchem AG
http://www.induchem.com]
Chem. Descr.: Lactose, cellulose, sericin,
hydroxypropyl methylcellulose, Cl 77492
Uses: Protectant, anti-irritant for cosmetic
prods. such as transparent or semi-transparent
gels or emulsions
Regulatory: EEC, Japan, U.S. approved
Features: Low moisture content; protects
moisture-sensitive ingreds.
Regulatory: USP/NF
Properties: Wh. powd.; pH 4.5-7.0; 2% max.
moisture

Unichem BZBN [Universal Preserv-A-Chem
http://www.upichem.com]
Chem. Descr.: Benzyl benzoate
CAS 120-51-4; EINECS/ELINCS 204-402-9
Uses: External medicine

Unichem ZPS [Universal Preserv-A-Chem
http://www.upichem.com]
Chem. Descr.: Zinc phenolsulfonate
CAS 127-82-2; EINECS/ELINCS 204-867-8
Uses: Antiseptic
Trade Name Reference

**Trade Name Reference**

**Properties:** Colorless solid; sol. in water  
**Use Level:** 0.1-0.4%  
**Storage:** > 1 yr. shelf life if stored @ R.T. and protected from it.

**Unifilter U-41** [Induchem AG  
http://www.induchem.com; Lipo  
http://www.lipochemicals.com]

Chem. Descrip.: Butyl methoxydibenzoylmethane, octyl methoxycinnamate, 3-benzylidene camphor  
See Butyl methoxy dibenzoyl methane

Uses: Broad spectrum sunscreen and uv-absorbers for suntan prods., stabilization of light-sensitive prods.

Features: Broad spectrum  
Regulatory: EU permitted

**Properties:** Ylsh. liq.; oil-sol.

**Use Level:** 1-13%

**Storage:** > 1 yr. shelf life if stored @ R.T. and protected from lt.

**Unifluorid D 401** [Induchem AG  
http://www.induchem.com]

Chem. Descrip.: Propylene glycol, olaflur

Uses: Pharmaceutical ingred. for caries prophylaxis; for toothpastes, gels, and mouthwashes  
Regulatory: EU permitted

Properties: Ylsh. liq.; water-sol.; 33% act.

**Use Level:** Up to 6%

**Storage:** > 1 yr. shelf life if stored @ R.T. and protected from lt.

**Unifluorid H 101** [Induchem AG  
http://www.induchem.com]

Chem. Descrip.: Cetylamine hydrofluoride  
CAS 3151-59-5; EINECS/ELINCS 221-588-7

Uses: Pharmaceutical ingred. for caries prophylaxis, toothpastes, gels, mouthwashes  
Regulatory: EU permitted

Properties: Yel. liq.; water-sol.

**Use Level:** Up to 2%

**Storage:** > 1 yr. shelf life if stored @ R.T. and protected from it.

**Uniglucan G-51** [Induchem AG  
http://www.induchem.com; Lipo  
http://www.lipochemicals.com]

Chem. Descrip.: Butylene glycol, yeast polysaccharides

Uses: Immune system activator, anti-irritant, protectant for skin and body care prods., sun protection prods., after sun prods.

Regulatory: EEC, Japan, U.S. approved

**Unipabol U-17** [Induchem AG  
http://www.induchem.com; Lipo  
http://www.lipochemicals.com]

Chem. Descrip.: PEG-25 PABA  
CAS 113010-52-9

Uses: UV-B sunscreen for pharmaceuticals, skin care prods., stabilization of light-sensitive prods.

Regulatory: USA, EU, and Japan permitted

Properties: Yel. liq.; water-sol.

**Use Level:** 5-10%

**Storage:** > 1 yr. shelf life if stored @ R.T. and protected from lt.

**Unipectine™ UHM Series** [Cargill Texturizing Solutions  
http://www.cargilltexturizing.com]

Chem. Descrip.: Pectin  
CAS 9000-69-5; EINECS/ELINCS 232-553-0

Uses: Excipient, dispersant, act. ingred. in pharmaceuticals

**Unipertan P-24** [Induchem AG  
http://www.induchem.com; Lipo  
http://www.lipochemicals.com]

Chem. Descrip.: Hydrolyzed collagen, acetyl tyrosine, riboflavin

*See Cetylpyridinium chloride*  
*CAS 123-03-5; EINECS/ELINCS 204-593-9  
*Uses:* Emulsifier; antibacterial, preservative for pharmaceuticals  
*Properties:* Cationic

**Unisol S-22**  
[Induchem AG  
http://www.induchem.com]

*Chem. Descrip.:* 3-Benzylidene camphor  
*CAS 15087-24-8; EINECS/ELINCS 239-139-9  
*Uses:* Uv-B sunscreen for suntan prods., stabilization of light-sensitive prods.  
*Regulatory:* EU permitted  
*Properties:* Colorless solid; oil-sol.  
*Use Level:* 1-5%
Trade Name Reference

Storage: > 1 yr. shelf life if stored @ R.T. and protected from it.

Chem. Descrip.: Lauryl alcohol 23 EO See Laureth-23
CAS 9002-92-0
Uses: Detergent for medicinal, mild shampoos
Properties: Solid; cloud pt. 70 C; acid value 0.5 max.; hydroxyl value 39-48; pH 6.0-8.0; HLB 16.9
Toxicology: Sl. toxic; can cause skin irritation
Precaution: Wear personal protection equipment
Storage: 24 mos. when stored in original packaging under adequate conditions

Chem. Descrip.: Farnesyl acetate, farnesol, panthenyl triacetate
Uses: Emollient, skin moisture regulator, cell regenerator for pharmaceuticals, skin and lip care prods.
Features: A bioactive complex; smoothes wrinkles, improves skin elasticity, regulates skin moisture and sebaceous levels
Regulatory: EU and USA permitted
Properties: Ylsh. liq.; oil-sol.
Use Level: 2-8%
Storage: > 1 yr. shelf life if stored @ R.T. and protected from it.

Chem. Descrip.: Calcium sulfate dihydrate (90-98%)
CAS 10101-41-4; EINECS/ELINCS 231-900-3
Uses: Filler for pharmaceuticals
Regulatory: FCC, NF, GRAS compliance
Properties: Off-wh. to wh. powd.; low to no odor; 12 µ median particle size; low odor; sol. in water ≈ 0.21 g/100 g sol’n.; sp.gr. 2.32-2.96; bulk dens. ≈ 45-150 lb/ft³; m.p. 1450 C (dec.); pH 7.3
Toxicology: Exposure to high dust levels may irritate the skin, eyes, nose, throat, or upper respiratory tract; TSCA listed
Environmental: Zero VOC content; no known adverse effect on the ecology
Hazardous Decomp. Prods.: CaO, SO₂
NFPA: Health 0, Flammability 0, Reactivity 0
Storage: Store @ R.T. in dry location; keep containers closed when not in use

Chem. Descrip.: Magnesium ascorbyl phosphate
CAS 114040-31-2
Uses: Water-sol. vitamin C deriv.; whitening agent for skin lightening creams; promotes collagen synthesis; inhibits lipid-peroxidation; for cosmetics use
Regulatory: JSCI listed
Properties: Wh. cryst. powd.; water-sol.; 85% min. conc.

Chem. Descrip.: Disodium ascorbate sulfate See Disodium ascorbyl sulfate
CAS 53910-28-4
Uses: Water-sol. vitamin C deriv.; whitening agent; promotes collagen synthesis; for cosmetics use
Regulatory: JSCI listed
Properties: Wh. cryst. powd.; water-sol.; 98% min. conc.

Chem. Descrip.: Colloidal magnesium aluminum silicate (smectite) (94-97%), opal CT (3-6%) See Noncrystalline hydrated silica
CAS 12199-37-0; 20243-18-9; EINECS/ELINCS 235-374-6
Uses: Absorbent, opacifier, visc. control agent, thixotrope, thickener, visc. modifier, emulsion stabilizer for pharmaceuticals; spreading agent for ointments
Regulatory: RCRA nonreportable; DOT not regulated
Properties: Off-wh. grans.; insol. in cold water; sp.gr. 2.6
Toxicology: May cause mechanical eye, skin irritation; TSCA listed
Precaution: Wear splash goggles, dust respirator; slippery when wet; avoid generating dust; avoid breathing dust; incompat. with strong oxidizers
NFPA: Health 0, Flammability 0, Reactivity 0
Storage: Keep container closed
Trade Name Reference

**Trade Name Reference**

**CAS 18472-51-0; EINECS/ELINCS 242-354-0**

**UN 3082**

**Uses:** Bactericide for hand washes and scrubs (for hospitals, veterinary establishments, food processing plants, dental surgeries, domestic/household use), oral care (mouthwashes), veterinary applics. (teat dips, udder washes), skin care

**Features:** Broad spectrum; fast acting; limited compat. with anionic surfactants, alkyl sulfonates and inorg. salts such as saline; compat. with nonionic surfactants, glycols, glycol ethers, EDTA and most strong acids

**Regulatory:** EINECS, Australia ACOIN/AICS, Japan MITI, Canada DSL, Korea, China listed; EP compliance; Drug Master File listed (Europe)

**Properties:** Colorless to pale yel. liq., odorless; sol. in acetone, ethanol; misc. in water; sp.gr. 1.06-1.07; b.p. ≈ 105 C; flash pt. none; pH 5.5-7.0; 20% act. w/w

**Use Level:** 15-20% (hand wash/scrubs for intact skin), 5% (hand wash/scrubs for damaged skin), 0.6-1.0% (mouthwashes); 1.5-2.0% (veterinary applics.); 1.0-1.5% (cosmetics preservative)

**Toxicology:** STEL 0.1 mg/m^3^; may cause skin irritation in sensitive individuals; may cause skin irritation on repeated/prolonged contact; causes irritation to eyes; ing. causes irritation to mucosa

**Environmental:** LC50 (rainbow trout, 96 h) 3.2 mg/l; environmentally hazardous; toxic to aquatic organisms, sewage microorganisms; may cause long-term adverse effects in aquatic environment; prevent entry into drains, sewers, watercourses

**Storage:** Keep container tightly closed; stable when stored @ 0-25 C; if frozen, allow to thaw at room temp. and stir thoroughly before use; protect from light

**Vanzan NF** [R.T. Vanderbilt http://www.rtvanderbilt.com]

**Chem. Descrip.:** Xanthan gum

Properties: Wh. dry powd.; sol. in water

Vee Gee Bone Hydrolysate Gelatin [Vyse Gelatin
Chem. Descrip.: Hydrolyzed gelatin derived from ossein
CAS 68410-45-7; EINECS/ELINCS 270-082-2
Uses: Film-former in pharmaceuticals (microencapsulation, arthritis relief formulas, tableting, nutritional formulas); protein source
Features: Nongelling
Regulatory: USP/NF, GRAS
Properties: Off-wh. to amber spray-dried powd.; typ. bouillon-like odor and flavor; bulk dens. 300-500 g/l; sol. in cold water; pH 5-6 (10% sol'n.); 8% max. moisture

Vee Gee Fish Hydrolysate Gelatin [Vyse Gelatin
Chem. Descrip.: Hydrolyzed gelatin derived from fish collagen
CAS 68410-45-7; EINECS/ELINCS 270-082-2
Uses: Film-former in pharmaceuticals (microencapsulation, arthritis relief formulas, tableting, nutritional formulas); protein source
Features: Nongelling
Regulatory: USP/NF, GRAS
Properties: Off-wh. to lt. amber spray-dried powd.; typ. bouillon-like odor and flavor; bulk dens. 250-500 g/l; sol. in cold water; pH 5-6 (10% sol'n.); 10% max. moisture

Vee Gee Pharmaceutical Gelatins [Vyse Gelatin
Chem. Descrip.: Gelatin NF
CAS 9000-70-8; EINECS/ELINCS 232-554-6
Uses: Tablet binder, gellant, protective colloid, film-former, stabilizer, binder, dispersant, softener, tenderizer, foaming/whipping agent, water imbiber, flocculant, clarifier, protein source for pharmaceuticals, health foods
Regulatory: USP/NF, GRAS
Properties: Lt. straw coarse gran. to fine powds., sl. typ. bouillon-like odor and flavor; insol. in cold water, but swells and softens on immersion; dissolves in hot water; insol. in
Veegum® [R.T. Vanderbilt
http://www.rtvanderbilt.com]
Chem. Descrip.: smectite clay (96-98%), opal CT (2-4%); see Magnesium aluminum silicate; Noncrystalline hydrated silica
CAS 12199-37-0; 20243-18-9; EINECS/ELINCS 235-374-6
Uses: Thickener, visc. modifier, emulsion stabilizer for pharmaceuticals
Features: Microfine grade; no ozone-depleting substances
Regulatory: RCRA nonreportable; DOT not regulated
Properties: Wh. microfine powd., odorless, tasteless; insol. in water or alcohol; swells to many times original vol. in water to form colloidal disp.; dens. 2.6 mg/m³; visc. 250 cps±25% (5% aq. disp.); pH 9.5 (5% aq. disp.); < 8% moisture
Toxicology: May cause mechanical eye, skin irritation; TSCA listed
Precaution: Wear splash goggles, dust respirator; avoid dust generation; slippery when wet
NFPA: Health 0, Flammability 0, Reactivity 0
Storage: Keep container closed

Veegum® D [R.T. Vanderbilt
http://www.rtvanderbilt.com]
Chem. Descrip.: Magnesium aluminum silicate (96-98%), opal CT (2-4%); quartz (0.15%); see Noncrystalline hydrated silica
CAS 12199-37-0; 20243-18-9; 14808-60-7; EINECS/ELINCS 235-374-6
Uses: Thickener, visc. modifier, emulsion stabilizer for pharmaceuticals
Features: Fast dispersing, fluoride compat. grade; good for dentifrice binder systems; no ozone-depleting substances
Regulatory: SARA §311/312 Acute, Chronic Health Hazard; RCRA nonreportable; DOT not regulated; PA, MA Right-to-Know
Properties: Wh. gran., odorless, tasteless; insol. in water; sp.gr. 2.6; visc. 100-300 cps (5% aq. disp.)
Toxicology: May cause mechanical eye, skin irritation in high concs.; prolonged inh. may cause lung injury; TSCA listed
Precaution: Wear splash goggles, dust respirator; slippery when wet
NFPA: Health 0, Flammability 0, Reactivity 0
Storage: Keep container closed

Veegum® F [R.T. Vanderbilt
http://www.rtvanderbilt.com]
Chem. Descrip.: Magnesium aluminum silicate (96-98%), opal CT (2-4%); see Noncrystalline hydrated silica
CAS 12199-37-0; 20243-18-9; EINECS/ELINCS 235-374-6
Uses: Thickener, visc. modifier, emulsion stabilizer for pharmaceuticals
Features: Microfine grade; no ozone-depleting substances
Regulatory: RCRA nonreportable; DOT not regulated
Properties: Wh. microfine powd., odorless, tasteless; insol. in water or alcohol; swells to many times original vol. in water to form colloidal disp.; sp.gr. 2.6; visc. 187-312 cps (5.5% disp.); pH 9.5 (5% aq. disp.); < 8% moisture
Toxicology: May cause mechanical skin, eye irritation; TSCA listed
Precaution: Wear splash goggles, dust respirator; avoid dust generation; incompatible with strong oxidizers
NFPA: Health 0, Flammability 0, Reactivity 0
Storage: Keep container closed
Veegum® HS [R.T. Vanderbilt
http://www.rtvanderbilt.com]
Chem. Descrip.: Magnesium aluminum silicate
(96-98%), opal CT (2-4%) See Noncrystalline hydrated silica
CAS 12199-37-0; 20243-18-9; EINECS/ELINCS 235-374-6
Uses: Thickener, visc. modifier, emulsion stabilizer for pharmaceuticals
Features: Max. electrolyte stability; no ozone-depleting substances
Regulatory: RCRA nonreportable; DOT not regulated
Properties: Wh. flakes, odorless, tasteless; insol. in water or alcohol; swells to many times original vol. in water to form colloidal disp.; sp.gr. 2.6; visc. 75-225 cps (5.5% disp.); pH 9 (5% aq. disp.); < 8% moisture
Toxicology: May cause mechanical skin, eye irritation; TSCA listed
Precaution: Wear splash goggles, dust respirator; avoid dust generation; incompat. with strong oxidizers
NFPA: Health 0, Flammability 0, Reactivity 0
Storage: Keep container closed

Veegum® K [R.T. Vanderbilt
http://www.rtvanderbilt.com]
Chem. Descrip.: Magnesium aluminum silicate (92-96%), opal CT (4-8%), quartz (0.68%) See Noncrystalline hydrated silica
CAS 12199-37-0; 20243-18-9; 14808-60-7; EINECS/ELINCS 235-374-6
Uses: Thickener, visc. modifier, emulsion stabilizer for pharmaceutical emulsions, suspensions, sol’ns., liqs., creams, pastes, and esp. acid suspensions, and for toothpaste
Features: Has low acid demand and high acid compatibility; no ozone-depleting substances
Regulatory: SARA §311/312 Acute, Chronic Health Hazard; OSHA hazardous; RCRA nonreportable; DOT not regulated; PA, MA Right-to-Know
Properties: Wh. flakes, odorless, tasteless; insol. in water or alcohol; swells to many times original vol. in water to form colloidal disp.; sp.gr. 2.6; visc. 165-275 cps (5.5% disp.); pH 9.5 (5% aq.); < 8% moisture
Toxicology: May cause mechanical skin, eye irritation; TSCA listed
Precaution: Wear splash goggles, dust respirator; avoid dust generation; slippery when wet; incompat. with strong oxidizers
NFPA: Health 0, Flammability 0, Reactivity 0
Storage: Keep container closed

Veegum® HV [R.T. Vanderbilt
http://www.rtvanderbilt.com]
Chem. Descrip.: Magnesium aluminum silicate (96-98%), opal CT (2-4%) See Noncrystalline hydrated silica
CAS 12199-37-0; 20243-18-9; EINECS/ELINCS 235-374-6
Uses: Thickener, visc. modifier, emulsion stabilizer for pharmaceutical emulsions, suspensions, sol’ns., liqs., creams, pastes, toothpaste; suspending agent, binder, dispersant for powds. and pigments; disintegrand for tablets; spreading agent for lotions, creams, and ointments
Features: High visc. at low solids is desired; emulsification and suspension are obtained at low solids; no ozone-depleting substances
Regulatory: RCRA nonreportable; DOT not regulated
Properties: Wh. flakes, odorless, tasteless; insol. in water or alcohol; swells to many times original vol. in water to form colloidal disp.; sp.gr. 2.6; visc. 187-312 cps (4% aq. disp.); < 8% moisture
Toxicology: May cause mechanical skin, eye irritation; TSCA listed
Precaution: Wear splash goggles, dust respirator; avoid dust generation; slippery

Veegum® PRO [R.T. Vanderbilt
http://www.rtvanderbilt.com]
Chem. Descrip.: 2-Amino-2-(hydroxymethyl)-1,3-propanediol modified hectorite (100%)
CAS 68511-77-3
Uses: Emulsion stabilizer, suspending agent for pharmaceuticals, veterinary prods.
Features: Hydrates rapidly in cold or hot water to form high visc. disps.; superior soap and surfactant compatibility; no ozone-depleting substances
Regulatory: RCRA nonreportable; DOT not regulated
Properties: Wh. flakes, odorless, tasteless; insol. in cold water; swells many times the original volume when added to water; sp.gr. 2.2; visc. 300-500 cps (1.5% aq. disp.); pH 8.5
Toxicology: Eye irritant; may cause skin irritation in high concs.; prolonged inh. may cause lung injury; TSCA listed

Trade Name Reference

Veegum® HS [R.T. Vanderbilt

Handbook of Pharmaceutical Additives, Third Edition 770
Trade Name Reference

**Precaution:** Wear splash goggles, dust respirator; slippery when wet  
**NFPA:** Health 1, Flammability 0, Reactivity 0  
**Storage:** Keep container closed

**Vegetable Protein Extract** [Carrubba http://www.carrubba.com]

**Uses:** Odor neutralizer for perspiration, human waste, vomit, ostomies, menstruation, depilatories

**Properties:** pH 3-5

**Velsicol 6959** [Velsicol http://www.velsicol.com]

**Chem. Descrip.:** Tri (2-ethylhexyl) trimellitate  
See Tri-2-ethylhexyl trimellitate  
**CAS** 3319-31-1; EINECS/ELINCS 222-020-0  
**Uses:** Plasticizer for PVC for medical applics. incl. blood bags, dialysis tubing, catheters  
**Features:** High purity; exc. clarity, low temp. flexibility, low extractability  
**Properties:** APHA 100 max. cl. liq.; m.w. 546; sp.gr. 0.980-0.990; m.p. -50 F; acid no. 0.1 max.; flash pt. (COC) 500 F; ref. index 1.4848; 99% act.

**Versagel™ R 500** [Penreco http://www.penreco.com]

**Chem. Descrip.:** Hydrocarbon  
**Uses:** Emollient and occlusivity agent in lip balms and pharmaceuticals  
**Features:** Stable and compat. with most chemicals  
**Properties:** Cl. solid gel; Saybolt color 27 min.; visc. 100 cps (110 C); vapor pressure <0.1 mm Hg; m.p. 160-200 F; flash pt. (COC) 425 F  
**Toxicology:** ACGIH TWA 5 mg/m³; nontoxic  
**Precaution:** Avoid sources of ignition and strong oxidizers  
**Hazardous Decomp. Prods.:** COx

**NFPA:** Health 1, Flammability 0, Reactivity 0  
**Storage:** Store in tightly closed containers cool, dry, well-ventilated area away from heat and all sources of ignition

**Versagel™ R 750** [Penreco http://www.penreco.com]

**Chem. Descrip.:** Hydrocarbon  
**Uses:** Emollient and occlusivity agent in lip balms and pharmaceuticals  
**Features:** Stable and compat. with most chemicals  
**Properties:** Cl. solid gel; Saybolt color 27 min.; visc. 200 cps (110 C); vapor pressure <0.1 mm Hg; m.p. 160-200 F; flash pt. (COC) 425 F  
**Toxicology:** ACGIH TWA 5 mg/m³ (oil mist); nontoxic  
**Precaution:** Avoid sources of ignition and strong oxidizers  
**Hazardous Decomp. Prods.:** COx

**NFPA:** Health 1, Flammability 0, Reactivity 0  
**Storage:** Store in tightly closed containers cool, dry, well-ventilated area away from heat and all sources of ignition

**Versagel™ R 1600** [Penreco http://www.penreco.com]

**Chem. Descrip.:** Hydrocarbon  
**Uses:** Emollient and occlusivity agent in lip balms and pharmaceuticals  
**Features:** Stable and compat. with most chemicals  
**Properties:** Cl. semi-solid, odorless gel; Saybolt color 27 min.; sp. gr. 0.87; m.p. 160-200 F; flash pt. (COC) 425 F  
**Toxicology:** ACGIH TWA 5 mg/m³; nontoxic  
**Precaution:** Avoid sources of ignition and strong oxidizers  
**Hazardous Decomp. Prods.:** COx

Environmental: LC50 (daphnia magna, 24h)  
0.27 mg/l, (fathead minnow, 96h) 15 mg/l  
**HMIS:** Health 1, Flammability 1, Reactivity 0

**Velsicure® BTF** [Velsicol http://www.velsicol.com]

**Chem. Descrip.:** Benzophenone  
**CAS** 119-61-9; EINECS/ELINCS 204-337-6  
**Uses:** Intermediate for pharmaceuticals (antihistamines, hypnotics)  
**Regulatory:** Clean Air Act §111 Potential Human Health Hazard (40CFR 60.489); Hazardous Organic NESHAP (HON) Synthetic Organic Chemicals (40CFR 63.100-106)  
**Properties:** APHA 0.1 max. off-wh. solid flake; insol. in cold water, sol. in chloroform, ethyl alcohol; m.w. 182.21; sp.gr. 1.08 (54/4 C); m.p. 47-49 C; b.p. 306.1 C; vapor pressure 1.1; flash pt. 138 C; 99.9% min. assay  
**Toxicology:** ACGIH TWA 5 mg/m³ (oil mist); nontoxic  
**Precaution:** Avoid sources of ignition and strong oxidizers  
**Hazardous Decomp. Prods.:** COx

**NFPA:** Health 1, Flammability 0, Reactivity 0  
**Storage:** Store in tightly closed containers cool, dry, well-ventilated area away from heat and all sources of ignition

**Versagel™ Benzophenone** [Velsicol http://www.velsicol.com]

**Chem. Descrip.:** Benzophenone perfume grade  
**CAS** 119-61-9; EINECS/ELINCS 204-337-6  
**Uses:** Preservative  
**Regulatory:** SARA §311/312, 313 nonreportable  
**Properties:** Cl. solid gel; Saybolt color 27 min.; m.p. 160-200 F; flash pt. (COC) 425 F  
**Toxicology:** ACGIH TWA 5 mg/m³; nontoxic  
**Precaution:** Avoid sources of ignition and strong oxidizers  
**Hazardous Decomp. Prods.:** COx
Trade Name Reference

NFPA: Health 1, Flammability 0, Reactivity 0
Storage: Store in tightly closed containers cool, dry, well-ventilated area away from heat and all sources of ignition

Versagel™ RE 750 [Penreco http://www.penreco.com]
Chem. Descrip.: Hydrogenated polybutene
CAS 68937-10-0
Uses: Emollient and occlusivity agent in lip balms and pharmaceuticals
Features: Stable and compat. with most chemicals

Regulatory: SARA §311/312, 313 nonreportable
Properties: Cl. elastic solid; Saybolt color 27 min.; insol. in water; visc. 200 cps (110 C); flash pt. (COC) > 280 F
Toxicology: ACGIH TWA 5 mg/m3 (oil mist);
LD50 (oral, rat) 34,600 mg/kg, (dermal, rat) 10, 250 mg/kg); minimally irritating to the eyes; nonirritant to skin; nontoxic; TSCA listed

Environmental: Not biodegrad.
Precaution: Avoid breathing vapors or mist Hazardous Decomp. Prods.: COx
HMIS: Flammability 1, Reactivity 1
Storage: Store in a tightly closed container in well-ventilated area away from heat, sparks, open flame, or oxidizing materials

Versene 100 [Dow http://www.dow.com; Dow Europe]
Chem. Descrip.: Tetrasodium EDTA
CAS 64-02-8; EINECS/ELINCS 200-573-9
Uses: Chelating agent controlling trace metal ions in pharmaceuticals, for heavy metal poisoning treatment and drug stabilization (deactivates metal ions that interfere with drug performance)
Features: High purity, crystal form of Versene 100
Properties: Wh. cryst.; m.w. 452; dens. 45 lb/ft3; pH 10.5-11.5 (1% aq.); chel. value 219; 99% act.

Versene 100 XL [Dow http://www.dow.com]
Chem. Descrip.: Tetrasodium EDTA
CAS 64-02-8; EINECS/ELINCS 200-573-9
Uses: Chelating agent controlling trace metal ions in pharmaceuticals, for heavy metal poisoning treatment and drug stabilization (deactivates metal ions that interfere with drug performance)
Features: Low NTA version of Versene 100
Properties: Cl. liq.; m.w. 380; sp.gr. 1.255-1.290; bulk dens. 10.5 lb/gal; pH 11.0-11.8 (1% aq.); chel. value 100; 38% min. act.

Versene 220 [Dow http://www.dow.com]
Chem. Descrip.: Tetrasodium EDTA tetrahydrate
CAS 64-02-8; EINECS/ELINCS 200-573-9
Uses: Chelating agent controlling trace metal ions in pharmaceuticals, for heavy metal poisoning treatment and drug stabilization (deactivates metal ions that interfere with drug performance)
Features: High purity, crystal form of Versene 100
Properties: Cl. liq.; m.w. 380; sp.gr. 1.255-1.290; bulk dens. 10.5 lb/gal; pH 11.0-11.8 (1% aq.); chel. value 219; 99% act.

Versene CA [Dow http://www.dow.com]
Chem. Descrip.: Calcium-disodium EDTA See Calcium disodium EDTA
CAS 62-33-9; EINECS/ELINCS 200-529-9
Uses: Chelating agent controlling trace metal ions in pharmaceuticals and medical appls., for heavy metal poisoning treatment and drug stabilization (deactivates metal ions that interfere with drug performance)
Properties: Wh. powd.; m.w. 292; dens. 54 lb/ft3; pH 2.5-3.0 (sat. aq. sol'n.); chel. value 339; 99% act.

Versene Acid [Dow http://www.dow.com]
Chem. Descrip.: EDTA See Edetic acid
CAS 60-00-4; EINECS/ELINCS 200-449-4
Uses: Chelating agent controlling trace metal ions in pharmaceuticals, for heavy metal poisoning treatment and drug stabilization (deactivates metal ions that interfere with drug performance); intermediate for prep. of other salt forms of EDTA
Properties: Wh. powd.; m.w. 452; dens. 45 lb/ft3; pH 2.5-3.0 (sat. aq. sol'n.); chel. value 339; 99% act.
Versene Diammonium EDTA [Dow http://www.dow.com]
Chem. Descrip.: Diammonium EDTA
CAS 20824-56-0; EINECS/ELINCS 244-063-4
Uses: Chelating agent controlling trace metal ions in pharmaceuticals, for heavy metal poisoning treatment and drug stabilization (deactivates metal ions that interfere with drug performance)
Features: Used when very sol. chelates are required or where sodium ions are undesirable
Properties: Lt. straw-colored liq.; m.w. 326;
sp.gr. 1.19-1.22; dens. 10.0 lb/gal; pH 4.6-5.2;
chel. value 137; 44.6% act.

Versene NA [Dow http://www.dow.com]
Chem. Descrip.: Disodium EDTA dihydrate
USP, FCC
CAS 6381-92-6; EINECS/ELINCS 205-358-3
Uses: Chelating agent controlling trace metal ions in pharmaceuticals and medical applics., for heavy metal poisoning treatment and drug stabilization (deactivates metal ions that interfere with drug performance); preservative in ocular care products; stabilizes colors and ingreds. in syrups; prevents and slows oxidative rancidity in creams and ointments
Regulatory: FCC, USP, and Kosher compliance
Properties: Wh. cryst.; m.w. 372; dens. 67 lb/ft³;
pH 4.3-4.7 (1%); chel. value 267; 99% act.

Versene Na₂ [Dow http://www.dow.com]
Chem. Descrip.: Disodium EDTA dihydrate
USP, FCC
CAS 6381-92-6; EINECS/ELINCS 205-358-3
Uses: Chelating agent in pharmaceuticals
Properties: Wh. cryst.; m.w. 372; dens. 67 lb/ft³;
pH 4.3-4.87 (1%); chel. value 267; 99% min. act.

Versene Tetraammonium EDTA [Dow http://www.dow.com]
Chem. Descrip.: Tetraammonium EDTA
Uses: Chelating agent controlling trace metal ions in pharmaceuticals, for heavy metal poisoning treatment and drug stabilization (deactivates metal ions that interfere with drug performance)
Features: Used when very sol. chelates are required or where sodium ions are undesirable; for chelation of iron to pH 9.5
Properties: Lt. straw-colored liq.; m.w. 360;
sp.gr. 1.16-1.19; dens. 9.7 lb/gal; pH 9.0-9.5;
chel. value 130; 46.8% act.

Versenex 80 [Dow http://www.dow.com]
Chem. Descrip.: Pentasodium DTPA  See Pentasodium pentetate
CAS 140-01-2; EINECS/ELINCS 205-391-3
Uses: Chelating agent controlling trace metal ions in pharmaceuticals, for heavy metal poisoning treatment and drug stabilization (deactivates metal ions that interfere with drug performance)
Features: Used when oxidative conditions exist or when chelates of greater stability are required
Properties: Lt. straw-colored liq.; m.w. 503;
sp.gr. 1.26-1.31; dens. 10.7 lb/gal; pH 11.0-11.8 (1% aq.); chel. value 80; 40.2% act.

Chem. Descrip.: Precipitated calcium carbonate USP
CAS 471-34-1; EINECS/ELINCS 207-439-9
Uses: Neutralizer, colorant, opacifier in pharmaceuticals
Features: Preferred for its smoothness, taste, and feel
Regulatory: USP
Properties: Prismatic cryst.; 0.7 µ size

Chem. Descrip.: Precipitated calcium carbonate
CAS 471-34-1; EINECS/ELINCS 207-439-9
Uses: Neutralizer, colorant, opacifier in chewable tablets
Features: Similar tapped dens. and surf. areas to ViCALity™ Medium
Properties: Prismatic cryst.; 0.8 µ size

Chem. Descrip.: Precipitated calcium carbonate
Trade Name Reference

CAS **471-34-1**; EINECS/ELINCS **207-439-9**

Uses: Calcium source in antacid preps.,
calcium supplement tablets, toothpaste

Features: Low surf. area; high tapped dens.

Properties: Cubic cryst.; 4.5 µ median particle size

ViCALity® Extra Light PCC [Mins. Tech. 
http://www.mineralstech.com]

Chem. Descrip.: Precipitated calcium carbonate USP

CAS **471-34-1**; EINECS/ELINCS **207-439-9**

Uses: Neutralizer, colorant, opacifier in visc.
gels, creams, pastes, pharmaceuticals

Features: High surf. area; low tapped dens.

Properties: Scalenohedral cryst.; 1.8-2.6 µ median particle sizes

ViCALity® Heavy PCC [Mins. Tech. 
http://www.mineralstech.com]

Chem. Descrip.: Precipitated calcium carbonate USP

CAS **471-34-1**; EINECS/ELINCS **207-439-9**

Uses: Calcium source in antacid preps.,
calcium supplement tablets, toothpaste

Features: Low surf. area; high tapped dens.

Properties: Cubic cryst.; 3 µ median particle size

ViCALity® Light PCC [Mins. Tech. 
http://www.mineralstech.com]

Chem. Descrip.: Precipitated calcium carbonate USP

CAS **471-34-1**; EINECS/ELINCS **207-439-9**

Uses: Neutralizer, colorant, opacifier in visc.
gels, creams, pastes, pharmaceuticals

Features: High surf. area; low tapped dens.

Properties: Scalenohedral cryst.; 1.8-2.6 µ median particle sizes

ViCALity® Medium PCC [Mins. Tech. 
http://www.mineralstech.com]

Chem. Descrip.: Precipitated calcium carbonate USP

CAS **471-34-1**; EINECS/ELINCS **207-439-9**

Uses: Neutralizer, colorant, opacifier in visc.
gels, creams, pastes, pharmaceuticals

Features: High surf. area; low tapped dens.

Properties: Scalenohedral cryst.; 1.8-2.6 µ median particle sizes

Vigilan™ [Fanning 
http://www.fanncorp.com]

Chem. Descrip.: Lanolin oil

CAS **8038-4**; EINECS/ELINCS **274-559-6**

Uses: Emulsifier, emollient, conditioner,
misturizer for pharmaceuticals, o/w and/or
w/o emulsions; coupling agent for castor
and min. oils; spreading agent

Properties: Pale yel.-cream soft solid, slight,
char. sterol odor; oil sol.; m.p. 40-46 C; b.p.
316 C; HLB 9.5; acid no. 1.0 max.; sapon. no.

Vigilan™ AWS [Fanning 
http://www.fanncorp.com]

Chem. Descrip.: PPG-12-PEG-65 lanolin oil

Uses: O/w emulsifier, plasticizer, emollient,
solubilizer, and wetting agent in pharmaceuticals

Properties: Gardner 9-11 color; sol. in water,
ethanol, castor oil, propylene glycol laurate,
acetone, ethyl acetate; HLB 13.5; acid no. 3.0
max.; iodine no. 15 max.; sapon. no. 10-25; pH
7 max. (10%); nonionic; 100% conc.

Vigilan™ Super [Fanning 
http://www.fanncorp.com]

Chem. Descrip.: Lanolin oil

CAS **8038-4**; EINECS/ELINCS **274-559-6**

Uses: Counter-irritant for skin (counteracts
drying caused by alkaline soaps and
detergents); moisturizer, emollient in
cosmetics, pharmaceuticals

Features: Lighter color than Vigilan; unique fluid
appearance due to low m.p.; compat. with aerosol propellants; cholesterol source

Properties: Gardner 8 max. color; mild pleasant
odor; sol. in IPM, castor oil, min. oil, propylene
glycol laurate, ethyl acetate, silicone fluids;
insol. in water, aceotne, glycerin; sp.gr. 0.94-
0.97 (15 C); b.p. 350 F; acid no. 2 max.; iodine
no. 36 max.; sapon. no. 105 max.; cloud pt. 20
C; flash pt. (OC) 500 F; 0.25% moisture

Toxicology: No effects from overexposure

Vilvanolin® C [Noveon 
http://www.carbopol.com; 
http://www.noveoncoatings.com]

Chem. Descrip.: Petrolatum (69%), lanolin (21%), lanolin alcohol (10%)

CAS **8027-32-5**; **8006-54-0**; **8027-33-6**;
EINECS/ELINCS **232-373-2**; **232-348-6**; **232-430-1**

Uses: Absorp. base, aux. emulsifier and
stabilizer for o/w systems, conditioner,
emollient, moisturizer, vehicle for
pharmaceuticals (creams, ointments,
dermatologicals, lotions)

Properties: Pale yel.-cream soft solid, slight,
char. sterol odor; oil sol.; m.p. 40-46 C; b.p.
316 C; HLB 9.5; acid no. 1.0 max.; sapon. no.

Handbook of Pharmaceutical Additives, Third Edition 774
Trade Name Reference

Vilvanolin® CAB [Noveon
http://www.carbopol.com;
http://www.noveoncoatings.com]
Chem. Descrip.: Petrolatum, lanolin alcohol
Uses: Emollient, w/o emulsifier, moisturizer, stabilizer, plasticizer for therapeutic ointments, burn preps., dermatological prods., hypoallergenic preps., pharmaceuticals, absorp. bases
Properties: Pale cream soft solid, faint, char. sterol odor; oil sol.; HLB 9.0; m.p. 40-46 C; acid no. 1 max.; sapon. no. 1.0 max.; nonionic; 100% conc.

Vilvanolin L-101® [Noveon
http://www.carbopol.com;
http://www.noveoncoatings.com]
Chem. Descrip.: Mineral oil (88%), lanolin alcohol (12%)
CAS 8012-95-1; 8027-33-6
Uses: Emollient, penetrant, w/o emulsifier, moisturizer, softener, stabilizer, vehicle for pharmaceuticals
Features: Improves emulsion appearance; provides emollience
Properties: Pale yel. oily liq., faint char. sterol odor; oil sol.; sp.gr. 0.840-0.860; sp. gr. 0.85; visc. 20-30 cps; b.p. 316 C; acid no. 1 max.; sapon. no. 1 max.; flash pt. (COC) 179 C; nonionic; 100% conc.

Viobin Octacosanol [Viobin
http://www.viobinusa.com/viohome.htm]
Chem. Descrip.: Octacosanol
CAS 557-61-9
Uses: High potency direct compression prod., suitable for tableting/capsules/powd. mixes

Viscarin® GP-109NF [FMC Biopolymer
http://www.fmcbiopolymer.com]
Chem. Descrip.: lambda-Carrageenan USP/NF
See Carrageenan (Chondrus crispus)
CAS 9000-07-1; EINECS/ELINCS 232-524-2
Uses: Excipient, gellant, visc. builder for pharmaceuticals (cough/cold liqs., antibiotic suspensions, topical creams/lotions, medicated shampoos)
Features: Med. visc.; nongelling; protein reactive; polyol reactive
Properties: Sol. in hot water; partly sol. in cold water
Use Level: 0.1-1.0%

Viscocel® SC-580F [Blanver Farmoquimica
http://www.blanver.com.br; Blanver USA
http://www.blanver.com.br]
Chem. Descrip.: Cellulose gel (microcrystalline cellulose and cellulose gum) See Carboxymethylcellulose sodium
Chem. Analysis: Microcrystalline cellulose (86-92%), cellulose gum (8-14%)
Uses: Suspending agent, visc. builder, thickener, compatibilizer, stabilizer in pharmaceuticals, suspensions, sol'ns., emulsions
Features: Hydrates rapidly; generates colloidal
Trade Name Reference

Chem. Descrip.: Cellulose gel (microcrystalline cellulose and cellulose gum) See Carboxymethylcellulose sodium Chem. Analysis: Microcrystalline cellulose (89-93%), cellulose gum (7-11%) Uses: Suspending agent, visc. builder, thickener, compatibilizer, stabilizer in pharmaceuticals, suspensions, solns., emulsions Features: Hydrates rapidly; generates colloidal disp. with thixotropic props. in concs. as low as 1%; stable across wide temp. range Properties: Wh. to lt. cream fine powd.; ≤ 1% on 60 mesh, ≤ 45% on 200 mesh; odorless; insol. in water, org. solvs., dil. acids; visc. 72-168 cps (1.2% solids); pH 6-8 (1.2 g/100 ml water); 8.3-13.8% CMC content; ≤ 8% loss on drying Storage: Hygroscopic

Chem. Descrip.: Cellulose gel (microcrystalline cellulose and cellulose gum) See Carboxymethylcellulose sodium Chem. Analysis: Microcrystalline cellulose (81-89%), cellulose gum (11-19%) Uses: Suspending agent, visc. builder, thickener, compatibilizer, stabilizer in pharmaceuticals, suspensions, solns., emulsions Features: Hydrates rapidly; generates colloidal disp. with thixotropic props. in concs. as low as 1%; stable across wide temp. range Properties: Wh. to lt. cream fine powd.; ≤ 1% on 60 mesh, ≤ 45% on 200 mesh; odorless; insol. in water, org. solvs., dil. acids; visc. 51-150 cps (2.6% solids); pH 6-8 (1.2 g/100 ml water); 11.3-18.8% CMC content; ≤ 8% loss on drying Storage: Hygroscopic

Chem. Descrip.: Cellulose gel (microcrystalline cellulose and cellulose gum) See Carboxymethylcellulose sodium Chem. Analysis: Microcrystalline cellulose (86-92%), cellulose gum (8-14%) Uses: Suspending agent, visc. builder, thickener, compatibilizer, stabilizer in pharmaceuticals, suspensions, solns., emulsions Features: Hydrates rapidly; generates colloidal disp. with thixotropic props. in concs. as low as 1%; stable across wide temp. range Properties: Wh. to lt. cream fine powd.; ≤ 1% on 60 mesh, ≤ 45% on 200 mesh; odorless; insol. in water, org. solvs., dil. acids; visc. 340-540 cps (2.6% solids); pH 6-8 (1.2 g/100 ml water); 11.3-18.8% CMC content; ≤ 8% loss on drying Storage: Hygroscopic

Handbook of Pharmaceutical Additives, Third Edition 776
Trade Name Reference

Features: Wh. to lt. cream fine powd.; ≤ 1% on 60 mesh, ≤ 45% on 200 mesh; odorless; insol. in water, org. solvs., dil. acids; visc. 72-168 cps (1.2% solids); pH 6-8 (1.2 g/100 ml water); 8.3-13.8% CMC content; ≤ 8% loss on drying
Storage: Hygroscopic

Vitagen™ [Engelhard]
Chem. Descrip.: Aminopropyl ascorbyl phosphate
CAS 220644-17-7
Uses: Vitamin C source, antioxidant, skin conditioner, collagen synthesis promoter, cell growth promoter, melanin formation inhibitor for skin care
Features: Reduces the appearance of fine-lines, wrinkles, and age spots
Properties: Wh. to pale ylsh. powd.; sl. char. odor; sol. in water; pH 1.7-3.7
Toxicology: Nontoxic; nonirritating to the skin
Storage: Keep sealed at room temperature in a dry place; keep in a dry place.; shelf life 5 yrs.

Vitamin A Acetate/D2 500/50 [BASF AG http://www.basf.de]
Chem. Descrip.: Vitamin A acetate and Vitamin D2 in a modified food starch matrix of gelatin and sucrose, stabilized with BHT and sodium aluminum silicate as a flow aid See Ergocalciferol; Food starch, modified; Retinyl acetate; Sodium silicoaluminate
CAS 127-47-9; 50-14-6; 53124-00-8; 9000-70-8; 57-50-1; 128-37-0; 1344-00-9;
EINECS/ELINCS 204-844-2; 200-014-9; $; 232-554-6; 200-334-9; 204-881-4; 215-684-8
Uses: Dietary supplement for multivitamin-mineral tablets and hard gelatin capsules
Features: Very good stability even in the presence of minerals
Regulatory: USP, EP, FCC
Properties: Lt. yel. powd., spherical particles; particle size US Sieve #40 (425 μ) min 94.5% thru; sol. in water (35-40 C) forming a milky emulsion; m.w. 328.5 (Vitamin A acetate), 384.7 (Vitamin D3); 500,000 IU/g Vitamin A acetate; 50,000 or 100,000 IU/g of Vitamin D3 assay
Storage: 2 yrs. shelf life when stored in unopened original containers @ 8-15 C

Vitamin A and D-3 Blend [DSM Nutritional Prods. USA http://www.nutraaccess.com]
Chem. Descrip.: Retinyl palmitate, cholecalciferol, in corn (Zea mays) oil, and dl-α-tocopherol as an antioxidant See Corn (Zea mays) oil unsaponifiables
CAS 79-81-2; 67-97-0; 8001-30-7; 1406-18-4;
EINECS/ELINCS 201-228-5; 200-673-2; 232-281-2; 215-798-8
Uses: Vitamin supplement for pharmaceutical preps.
Properties: Greenish yel. to golden yel., oil liq.; acid value 2.0 (max); Vitamin A 1.0 million UI/g and Vitamin D3 100,000 IU/g
Toxicology: Sustained daily intakes of Vitamin A exceeding 50,000 IU in adults and 20,000 IU in infants and young children may cause toxic manifestations
Storage: May crystallize on storage, sensitive to air, heat and light; keep container sealed tightly and store below 15 C

Vitamin A Palmitate 1.0 in Sunflower Oil [BASF AG http://www.basf.de]
Chem. Descrip.: Vitamin A palmitate in sunflower oil and an antioxidant See Retinyl palmitate; Sunflower (Helianthus annuus) flower extract
CAS 79-81-2; 8001-21-6; EINECS/ELINCS 201-228-5; 232-273-9
Uses: Dietary supplement in liquid pharmaceutical preps. e.g., soft gelatin capsules
Features: Potency degrades over time; once
Trade Name Reference

opened use as rapidly as possible

Regulatory: USP, EP, FCC
Properties: Visc. yel, oil; sol. in fats, oils, and hydrocarbons; m.w. 524.9
Storage: 2 yrs. shelf life when stored in unopened original containers @ 8-15 °C

Vitamin A Palmitate 1.7 USP/EP/FCC [BASF AG http://www.basf.de]
Chem. Descrip.: Vitamin A palmitate See Retinyl palmitate
CAS 79-81-2; EINECS/ELINCS 201-228-5
Uses: Dietary supplement in liquid pharmaceutical preps. e.g., soft gelatin capsules
Features: Potency degrades over time; once opened use as rapidly as possible
Regulatory: USP, EP, FCC
Properties: Visc. yel, oil; sol. in fats, oils, and hydrocarbons; m.w. 524.9
Storage: 2 yrs. shelf life when stored in unopened original containers @ 8-15 °C

Vitamin A Palmitate 500 [BASF AG http://www.basf.de]
Chem. Descrip.: Vitamin A palmitate in a modified food starch coated matrix of gelatin and sucrose; stabilized with BHT and sodium aluminum silicate as a flow aid See Food starch, modified; Retinyl palmitate; Sodium silicoaluminate
CAS 79-81-2; 53124-00-8; 9000-70-8; 57-50-1; 128-37-0; 1344-00-9; EINECS/ELINCS 201-228-5; $; 232-554-6; 200-334-9; 204-881-4; 215-684-8
Uses: Dietary supplement for multivitamin-mineral tablets and hard gelatin capsules
Features: Stable in dry powder form; even in presence of minerals; good compression characteristics; recommended for preps. that are to be stored in climates with high relative humidity
Regulatory: USP, EP, FCC
Properties: Lt. yel. powd, spherical particles; particle size US Sieve #20 (850 μ) min 99.5% thru; m.w. 524.9
Storage: 2 yrs. shelf life when stored in unopened original containers @ 8-15 °C

Vitamin A Palmitate USP, FCC Type P1.7 [DSM Nutritional Prods. USA http://www.nutraaccess.com]
Chem. Descrip.: Vitamin A palmitate USP-FCC See Retinyl palmitate
CAS 79-81-2; EINECS/ELINCS 201-228-5
Uses: Used when max. vitamin A conc.

Vitamin B12 0.1% SD [DSM Nutritional Prods. USA http://www.nutraaccess.com]
Chem. Descrip.: Cyanocobalamin stabilized in a matrix of modified food starch with sodium citrate, citric acid, preservatives (sodium benzoate, sorbic acid), silicon dioxide See Food starch, modified; Silica
Uses: Easy blending and distribution in pharmaceuticals, premixes, dry prods., liq. mixts. or suspensions
Properties: Pink fine powd.; sl. hygroscopic; 98% min. through 40 mesh; disperses in cold or warm water; insol. in org. solvs.
Storage: Store in cool dry place in tightly closed container, optimally @ 46-59 °C; avoid excessive heat

Vitamin B12 1% Trituration [DSM Nutritional Prods. USA http://www.nutraaccess.com]
Chem. Descrip.: Cyanocobalamin USP with carrier (calcium phosphate dibasic)
Uses: Used in dry formulations, pharmaceutical tablets/capsules where water sol. is not critical and reducing agents or moisture are not present
Regulatory: USP, FCC, Ph. Eur.
Properties: Lt. pink fine powd.; 99% min. through 100 mesh; insol. in water and org. solvs.; m.w. 1355.38
Storage: Store in cool dry place in tightly closed container, optimally @ 46-59 °C

Vitamin B12 Cryst. USP, FCC [DSM Nutritional Prods. USA http://www.nutraaccess.com]
Chem. Descrip.: Cyanocobalamin USP, FCC, EP
CAS 68-19-9; EINECS/ELINCS 200-680-0
Uses: Vitamin source in solid and
Trade Name Reference

**pharmaceutical liq. preps.**

**Regulatory:** USP, FCC, Ph. Eur.

**Properties:** Red to purplish-red cryst. powd., pract. odorless and begins to darken at about 200 C without melting; 100% through 100 mesh; highly hygroscopic; sparingly sol. in water; sl. sol. in alcohol, and insol. in acetone, chlorine, and ether; m.w. 1355.38; pH neutral; 96-100.5% assay

**Precaution:** Loses activity in presence of alkalis or strong acids; in aq. sol'ns., deteriorates in presence of ascorbic acid, ferrous sulfate, and other reducing agents

**Storage:** Store in cool, dry place at below 25 C; keep container tightly closed

**Vitamin D 2 850** [BASF AG http://www.basf.de]

**Chem. Descrip.:** Vitamin D 2 in a modified food starch matrix of gelatin and sucrose, stabilized with BHT and sodium aluminum silicate as a flow aid See Ergocalciferol; Food starch, modified; Sodium silicoaluminate

**CAS** 50-14-6; 53124-00-8; 9000-70-8; 57-50-1; 128-37-0; 1344-00-9; EINECS/ELINCS 200-014-9; $; 232-554-6; 200-334-9; 204-881-4; 215-684-8

**Uses:** Dietary supplement for direct compression of multivitamin-mineral tablets and hard gelatin capsules

**Features:** Excellent flow and tableting properties

**Properties:** Off-wh. powd., spherical particles; particle size US Sieve #40 (600 μ) min 100% thru; disp. in warm water (35-40 C) forming a milky emulsion; m.w. 396.7; 850,000 IU/g of Vitamin D 2 assay

**Storage:** 2 yr shelf life when stored in tightly closed, original containers away from light, and moisture @ ≤ 25 C

**Vitamin D 3 100 HP** [BASF AG http://www.basf.de]

**Chem. Descrip.:** Vitamin D 3 and a modified food starch coated with a matrix of gelatin and sucrose, stabilized with BHT and sodium aluminum silicate as a flow aid See Cholecalciferol; Food starch, modified; Sodium silicoaluminate

**CAS** 67-97-0; 53124-00-8; 9000-70-8; 57-50-1; 128-37-0; 1344-00-9; EINECS/ELINCS 200-673-2; $; 232-554-6; 200-334-9; 204-881-4; 215-684-8

**Uses:** Dietary supplement for multivitamin-mineral tablets and hard gelatin capsules; for the manufacture of Vitamin D tablets

**Features:** Very good stability even in the presence of minerals

**Properties:** Free-flowing wh. powd., spherical particles; particle size US Sieve #30 (600 μ) min 100% thru; sol. in water (35-40 C) forming a milky emulsion; m.w. 384.7; 100,000 IU/g of Vitamin D 3 min. assay

**Storage:** 2 yr shelf life when stored in tightly closed, original containers away from light, and moisture @ ≤ 25 C

**Vitamin D 3 850** [BASF AG http://www.basf.de]

**Chem. Descrip.:** Vitamin D 3 and a modified food starch coated with a matrix of gelatin and sucrose, stabilized with BHT and sodium aluminum silicate as a flow aid See Cholecalciferol; Food starch, modified; Sodium silicoaluminate

**CAS** 67-97-0; 53124-00-8; 9000-70-8; 57-50-1; 128-37-0; 1344-00-9; EINECS/ELINCS 200-673-2; $; 232-554-6; 200-334-9; 204-881-4; 215-684-8

**Uses:** Dietary supplement for direct compression multivitamin-mineral tablets and hard gelatin capsules; for the manufacture of Vitamin D tablets

**Features:** High potency grade; very good stability even in the presence of minerals

**Properties:** Free-flowing wh. powd., spherical particles; particle size US Sieve #30 (600 μ) min 100% thru; sol. in water (35-40 C) forming a milky emulsion; m.w. 328.5 (Vitamin A acetate), 384.7 (Vitamin D3); 100,000 IU/g of Vitamin D 3 min. assay

**Storage:** 2 yr shelf life when stored in tightly closed, original containers away from light, and moisture @ ≤ 25 C
Vitamin F Water-Soluble CLR [CLR http://www.clr-berlin.de; Actives Int'l.]
Chem. Descrip.: Polysorbate 20, linoleic acid, and linolenic acid
Uses: For treatment of dry skin and hair and preventive care of skin and scalps
Properties: Yel. liq.; weak char. odor; sol. in water, water-alcohol mixts. (< 30% v/v alcohol), surfactants; dens. 1.074-1.084 g/ml (20 C); acid no. 19-22; ref. index 1.470-1.472 (20 C); pH 4-5 (10% aq.)
Use Level: 1-5%

Vitamin K₁ Dry Powd. 1% GFP [BASF AG http://www.basf.de]
Chem. Descrip.: Vitamin K₁
CAS 84-80-0; EINECS/ELINCS 201-564-2
Uses: Vitamin for pharmaceuticals
Features: Gelatin-free
Properties: Dry powd.

Vitamin K₁ Dry Powd. 5% GFP [BASF AG http://www.basf.de]
Chem. Descrip.: Vitamin K₁
CAS 84-80-0; EINECS/ELINCS 201-564-2
Uses: Vitamin for pharmaceuticals
Features: Gelatin-free
Properties: Dry powd.

Vitamin A, C & E Liposomes [Engelhard]
Chem. Descrip.: Water, phospholipids, tocopheryl acetate, retinyl palmitate, ascorbyl palmitate
Uses: Delivery system for antioxidants (Vitamins C and E) and Vitamin A in sunscreens
Features: Reduces melanin levels in skin

Vivapharm® 3 [JRS Pharma http://www.jrspharma.com]
Chem. Descrip.: Hydropromellose See Hydroxypropyl methylcellulose
CAS 9004-65-3
Uses: Film coating for oral sustained-release pharmaceutical prods.

Vivapharm® 5 [JRS Pharma http://www.jrspharma.com]
Chem. Descrip.: Hydropromellose See
Hydroxypropyl methylcellulose
CAS 9004-65-3
Uses: Film coating for oral sustained-release pharmaceutical prods.
Regulatory: USP, EP
Properties: Wh. to off-wh. gran. powd.; sol. in most polar solvs., cold water; swells in water to produce a clear to opalescent visc. colloidal sol'n.; insol. in hot water and in anhyd. alcohol, ether, chloroform; visc. 6 mPa•s

Vivapharm® 6 [JRS Pharma]
http://www.jrspharma.com
Chem. Descrip.: Hypromellose See Hydroxypropyl methylcellulose
CAS 9004-65-3
Uses: Film coating for oral sustained-release pharmaceutical prods.
Regulatory: USP, EP
Properties: Wh. to off-wh. gran. powd.; sol. in most polar solvs., cold water; swells in water to produce a clear to opalescent visc. colloidal sol'n.; insol. in hot water and in anhyd. alcohol, ether, chloroform; visc. 6 mPa•s

Vivapharm® 15 [JRS Pharma]
http://www.jrspharma.com
Chem. Descrip.: Hypromellose See Hydroxypropyl methylcellulose
CAS 9004-65-3
Uses: Film coating and suspension thickener for oral sustained-release pharmaceutical prods.
Regulatory: USP, EP
Properties: Wh. to off-wh. gran. powd.; sol. in most polar solvs., cold water; swells in water to produce a clear to opalescent visc. colloidal sol'n.; insol. in hot water and in anhyd. alcohol, ether, chloroform; visc. 15 mPa•s

Vivapharm® 50 [JRS Pharma]
http://www.jrspharma.com
Chem. Descrip.: Hypromellose See Hydroxypropyl methylcellulose
CAS 9004-65-3
Uses: Film coating and binder in granulation for oral sustained-release pharmaceutical prods.
Regulatory: USP, EP
Properties: Wh. to off-wh. gran. powd.; sol. in most polar solvs., cold water; swells in water to produce a clear to opalescent visc. colloidal sol'n.; insol. in hot water and in anhyd. alcohol, ether, chloroform; visc. 50 mPa•s

Vivapur® 12 [JRS Pharma]
http://www.jrspharma.com
Chem. Descrip.: Microcrystalline cellulose
CAS 9004-34-6; EINECS/ELINCS 232-674-9
Uses: Excipient, binder, flow aid for pharmaceutical tableting, esp. direct compression, prod. of herbal drugs
Features: Coarse grade; good compactibility and outstanding flow; provides content uniformity at low weight variation, even when used with low concentrations of fine actives.
Regulatory: NF, EP, JP
Properties: Powd.; 180 µm avg. particle size; bulk dens. 0.30-0.36 g/cm³; 5% max. moisture

Vivapur® 14 [JRS Pharma]
http://www.jrspharma.com
Chem. Descrip.: Microcrystalline cellulose
CAS 9004-34-6; EINECS/ELINCS 232-674-9
Uses: Excipient, binder, flow aid for pharmaceutical tableting, esp. direct compression, prod. of herbal drugs
Features: Equal quality to Vivapur®12, but very low moisture content (<1.5%) for processing water-sensitive actives
Regulatory: NF, EP, JP
Properties: Powd.; 180 µm avg. particle size; bulk dens. 0.34-0.42 g/cm³; 5% max. moisture

Vivapur® 101 [JRS Pharma]
http://www.jrspharma.com
Chem. Descrip.: Microcrystalline cellulose
CAS 9004-34-6; EINECS/ELINCS 232-674-9
Uses: Excipient for pharmaceutical tableting, esp. for wet granulation and spheronization
Features: Indigestible; high chemical and microbial purity; pleasant mouthfeel
Regulatory: DAB, Ph.Eur., NF, JP compliances; kosher
Properties: Wh. powd.; 50 µm particle size; neutral flavor and odor; bulk dens. 320 g/l; water-binding capacity 255%; pH 5.5-7.0 (10% susp.); 99.5% act.

Vivapur® 102 [JRS Pharma]
http://www.jrspharma.com
Chem. Descrip.: Microcrystalline cellulose
CAS 9004-34-6; EINECS/ELINCS 232-674-9
Uses: Excipient for pharmaceutical tableting, esp. direct compression; flow aid for capsule filling
Features: Indigestible; high chemical and microbial purity; pleasant mouthfeel
Regulatory: DAB, Ph.Eur., NF, JP compliances; kosher
Properties: Wh. powd.; 100 µm particle size; neutral flavor and odor; bulk dens. 350 g/l;
Trade Name Reference

Vivapur® 103 [JRS Pharma
http://www.jrspharma.com]
Chem. Descrip.: Microcrystalline cellulose
CAS 9004-34-6; EINECS/ELINCS 232-674-9
Uses: Excipient for pharmaceutical tableting, esp. for tableting of water-sensitive ingreds.
Features: Very low moisture
Regulatory: DAB, Ph.Eur., NF, JP compliances; kosher
Properties: Powd.; 50 µm avg. particle size; bulk dens. 0.32 g/cm³; 3% max. moisture

Vivapur® 105 [JRS Pharma
http://www.jrspharma.com]
Chem. Descrip.: Microcrystalline cellulose
CAS 9004-34-6; EINECS/ELINCS 232-674-9
Uses: Carrier for noncrystalline substances and herbal extracts; helps avoid tears and craters in suppositories
Features: Indigestible; high chemical and microbial purity; pleasant mouthfeel; very good absorp. of oily substances
Regulatory: DAB, Ph.Eur., NF, JP compliances; kosher
Properties: Wh. powd.; 20 µm particle size; neutral flavor and odor; bulk dens. 0.20-0.26 g/cm³; water-binding capacity 270%; pH 5.5-7.0 (10% susp.); 99.5% act.

Vivapur® 112 [JRS Pharma
http://www.jrspharma.com]
Chem. Descrip.: Microcrystalline cellulose
CAS 9004-34-6; EINECS/ELINCS 232-674-9
Uses: Excipient for pharmaceutical tableting, esp. tableting of water-sensitive ingreds.
Features: Very low moisture
Regulatory: DAB, Ph.Eur., NF, JP compliances; kosher
Properties: Powd.; 90 µm avg. particle size; bulk dens. 0.30-0.36 g/cm³; 3% max. moisture

Vivapur® 200 [JRS Pharma
http://www.jrspharma.com]
Chem. Descrip.: Microcrystalline cellulose
CAS 9004-34-6; EINECS/ELINCS 232-674-9
Uses: Excipient, flow aid for pharmaceutical tableting, esp. direct compression
Features: Large size MCC grade with excellent flow properties for a variety of direct compression formulations
Regulatory: NF, EP, JP
Properties: Wh. powd.; 250 µm particle size; neutral flavor and odor; bulk dens. 0.31-0.37 g/cm³; water-binding capacity 244%; pH 5.5-7.0 (10% susp.); 99.5% act.

Vivapur® 301 [JRS Pharma
http://www.jrspharma.com]
Chem. Descrip.: Microcrystalline cellulose
CAS 9004-34-6; EINECS/ELINCS 232-674-9
Uses: Excipient for pharmaceutical tableting
Features: Higher bulk dens. and better flow than Vivapur 101 with same particle size distribution
Regulatory: NF, EP, JP
Properties: Powd.; 65 µm avg. particle size; bulk dens. 0.35-0.46 g/cm³; 5% max. moisture

Vivapur® 302 [JRS Pharma
http://www.jrspharma.com]
Chem. Descrip.: Microcrystalline cellulose
CAS 9004-34-6; EINECS/ELINCS 232-674-9
Uses: Excipient for pharmaceutical tableting especially suited for high speed tableting and processing high density actives.
Features: Higher bulk dens. and better flow than Vivapur 102
Regulatory: NF, EP, JP
Properties: Powd.; 100 µm avg. particle size; bulk dens. 0.35-0.50 g/cm³; 5% max. moisture

Vivasol® [JRS Pharma
http://www.jrspharma.com]
Chem. Descrip.: Croscarmellose sodium
Ph.Eur., NF
CAS 74811-65-7
Uses: Superdisintegrant for all tableting processes in pharmaceuticals, especially good for medium soluble actives
Features: Provides good results for tablet disintegration and dissolution
Regulatory: Ph.Eur., NF
Properties: Almost wh. powd.; 2% max. > 75 µm, 10% max. > 46 m; pract. insol. in acetone, ethanol, ether, toluene; pH 5-7; 6% max. moisture
Use Level: 1 - 2% only
Storage: Very hygroscopic; store dry at R.T. or below

Vivastar® M 1500 [JRS Pharma
http://www.jrspharma.com]
Chem. Descrip.: Sodium starch glycolate
(produced from corn starch) Eu.Ph., USP/NF
CAS 9063-38-1
Uses: Disintegrant for pharmaceuticals, aq. granulation, reconstitutible dry suspensions
Properties: Almost wh. fine, free-flowing powd.;
Trade Name Reference

pract. insol. in methylene chloride; visc. ≥ 1500 mPa•s; pH 5.5-7.5; 7% max. moisture; 1% max. NaCl
Storage: Very hygroscopic

Vivastar® P [JRS Pharma
http://www.jrspharma.com]
Chem. Descrip.: Sodium starch glycolate (produced from potato starch) Eu.Ph., USP/NF
CAS 9063-38-1
Uses: Superdisintegrant for rapid and high degree of swelling for pharmaceutical capsules
Features: Especially for poor water soluble actives and tablet matrices with lower pH value
Properties: Almost wh. fine, free-flowing powd.; pract. insol. in methylene chloride; nonvisc.; pH 5.5-7.5; 7% max. moisture; 7% max. NaCl
Storage: Very hygroscopic

Vivastar® P 1000 [JRS Pharma
http://www.jrspharma.com]
Chem. Descrip.: Sodium starch glycolate (produced from potato starch) Eu.Ph., USP/NF
CAS 9063-38-1
Uses: Disintegrant for pharmaceuticals, aq. granulation, reconstitutable dry suspensions
Properties: Almost wh. fine, free-flowing powd.; pract. insol. in methylene chloride; visc. ≤ 2000 mPa•s; pH 5.5-7.5; 7% max. moisture; 1% max. NaCl
Storage: Very hygroscopic

Vivastar® P 3500 [JRS Pharma
http://www.jrspharma.com]
Chem. Descrip.: Sodium starch glycolate (produced from potato starch) Eu.Ph., USP/NF
CAS 9063-38-1
Uses: Disintegrant for pharmaceuticals, aq. granulation, reconstitutable dry suspensions
Properties: Almost wh. fine, free-flowing powd.; pract. insol. in methylene chloride; visc. ≥ 2000-5000 mPa•s; pH 5.5-7.5; 7% max. moisture; 1% max. NaCl
Storage: Very hygroscopic

Vivastar® PSF [JRS Pharma
http://www.jrspharma.com]
Chem. Descrip.: Sodium starch glycolate (produced from potato starch without crosslinking) Eu.Ph., USP/NF
CAS 9063-38-1
Uses: Superdisintegrant for rapid and high degree of swelling for pharmaceutical capsules
Features: Hygroscopic; special grade with very low methanol content; especially suited for alcohol and moisture sensitive actives
Regulatory: USP, EP
Properties: Almost wh. fine, free-flowing powd.; pract. insol. in methylene chloride; translucent suspension in water; pH 5.5-7.5
Storage: Very hygroscopic

VM&P Naphtha HT [Shell
http://www.shellchemicals.com;
http://www.shell-lubricants.com]
Chem. Descrip.: Solvent naphtha (petroleum), light aliphatic, contains ethylbenzene (0.12-0.25%) See Naphtha, light aliphatic
CAS 64742-89-8; EINECS/ELINCS 265-192-2
UN 1268
Uses: Solvent for pharmaceuticals
Features: Fast/med.-evaporating, high solvency; hydrotreating removes unwanted compds. (e.g., sulfur, nitrogen, oxygen), converts unsat. hydrocarbons (olefins, acetylenes, aromatics), results in relatively low odor; no more than trace amts. of HAPs
Regulatory: SARA §311/312 acute health/fire hazard, §313 nonreportable
Properties: Lt. colored liq.; hydrocarbon odor; negligible sol. in water; sp.gr. 0.743 (60 F); vapor pressure 10 mm Hg (68 F); b.p. 253-282 F; flash pt. (TCC) 13.89 C; KB value 35; VOC 6.2 lb/gal (60 F); 100% act.
Toxicology: LD50 (oral, rat) 5840 mg/kg, (skin, rat) 2920 mg/kg; LC50 (inh., rat) 3400 ppm; if aspirated, can cause severe lung damage, chem. pneumonitis; may be fatal if swallowed; may cause CNS depression,
Trade Name Reference

dizziness, lightheadedness, headache, nausea, loss of coordination, unconsciousness, death; may cause temporary eye irritation, sl. skin irritation; TSCA listed

Environmental: Prevent entry into waterways, sewers

Precaution: Flamm.; flamm. in air 1-7 vol.%; vapors are heavier than air, may flash back; prevent vapor accumulation; floats on water; static electricity may accumulate and create a fire hazard; bond and ground equip. and transfer containers; avoid contact with strong oxidizing agents; prevent entry into basements, confined areas

Hazardous Decomp. Prods.: Complex mixt. of airborne solids, liqs., and gases incl. CO, CO₂, other org. compds.

HMIS: Health 1, Flammability 3, Reactivity 0

Storage: Keep containers closed when not in use; keep away from heat, sparks, flame

Chem. Descrip.: Bentonite USP/NF
Chem. Analysis: SiO₂ (63.02%), Al₂O₃ (21.08%), moisture (5-8%), Fe₂O₃ (3.25%), MgO (2.67%), Na₂O (2.57%)
CAS 1302-78-9; EINECS/ELINCS 215-108-5
Uses: Suspending agent, gellant, binder for pharmaceuticals
Features: Rec. where color is not critical
Properties: Gray to tan air-floated powd.; odorless; tasteless; 99% through 200 mesh; insol. in water, alcohol; sp.gr. 2.6; visc. 8-30 cps (6.25% solids); pH 9.5-10.5 (2% disp.)

Volpo 3 [Croda Inc http://www.croda.com; http://www.crodausa.com]

Chem. Descrip.: Oleth-3
CAS 9004-98-2
Uses: Dispersant, emollient, lubricant, w/o emulsifier, solubilizer, wetting agent, gellant, spreading agent for topical pharmaceuticals; petrolatum emulsifier with Volpo S series
Properties: Off-wh. hazy liq.; sol. in alcohols, glycols, ketones, and chlorinated and aromatic solvs., min. oil, and nonpolar oils; disp. in water; HLB 6.6; acid no. 2.0 max.; iodine no. 57-62; hyd. no. 135-150; pH 5-7 (3% aq.); nonionic
Use Level: 0.5-5%
Toxicology: LD50 (oral, rat) 12.2 g/kg; skin irritant; nonirritating to eyes

Volpo 5 [Croda Inc http://www.croda.com; http://www.crodausa.com]
Chem. Descrip.: Oleth-5
CAS 9004-98-2
Uses: Dispersant, emollient, lubricant, emulsifier, solubilizer, wetting agent, gellant for topical pharmaceuticals; petrolatum emulsifier with Volpo S series
Properties: Off-wh. hazy liq.; sol. in alcohols, glycols, ketones, and chlorinated and aromatic solvs., min. oil, and nonpolar oils; disp. in water; HLB 8.8; acid no. 2.0 max.; iodine no. 40-52; hyd. no. 120-135; pH 5-7 (3% aq.); nonionic; 100% conc.
Use Level: 0.5-5%
Toxicology: LD50 (oral, rat) 5 g/kg; mild skin irritant, moderate eye irritant

Volpo 10 [Croda Inc http://www.croda.com; http://www.crodausa.com]
Chem. Descrip.: Oleth-10 NF
CAS 9004-98-2
Uses: Dispersant, emollient, lubricant, o/w emulsifier, solubilizer, wetting agent, gellant for topical pharmaceuticals, clear gels
Properties: Off-wh. semisolid; sol. in alcohols, glycols, ketones, and chlorinated and aromatic solvs., and water; HLB 12.4; acid no. 2.0 max.; iodine no. 31-37; hyd. no. 79-91; pH 5-7 (3% aq.); nonionic; 100% conc.
Use Level: 0.5-5%
Toxicology: LD50 (oral, rat) 4.3 g/kg; skin irritant, nonirritating to eyes

Volpo 20 [Croda Inc http://www.croda.com; http://www.crodausa.com]
Chem. Descrip.: Oleth-20
CAS 9004-98-2
Uses: Dispersant, emollient, lubricant, o/w emulsifier, fragrance solubilizer for topical pharmaceuticals, clear gels
Features: Works well with carnauba wax
Properties: Off-wh. soft solid; sol. in water, IPA, propylene glycol; insol. in min. oil; HLB 15.4; cloud pt. 100 C (1% aq.); acid no. 2.0 max.; iodine no. 18-25; hyd. no. 50-58; pH 5-7 (3% aq.); nonionic; 100% conc.
Use Level: 0.5-5%
Toxicology: LD50 (oral, rat) 15.1 g/kg; mild skin and eye irritant
Volpo C2  [Croda Chem. Europe Ltd  
http://www.croda.co.uk]  
Chem. Descrip.: Ceteth-2  
CAS 9004-95-9  
Uses: Surfactant, antistat, detergent, dispersant, emulsifier, leveling agent, plasticizer, scouring agent, solubilizer, and wetting agent in pharmaceuticals  
Properties: Wh. waxy solid; sol. in ethanol, trichloroethylene, butyl stearate, methyl oleate, xylene; partially sol. in min. oil and rapeseed oil; insol. in water, kerosene; HLB 5.3; acid no. 1.0 max.; hyd. no. 160-180; nonionic  
Toxicology:  
Storage: Hygroscopic  

Volpo C20  [Croda Inc  
http://www.croda.com;  
http://www.crodausa.com]  
Chem. Descrip.: Ceteareth-20  
CAS 68439-49-6 (generic)  
Uses: Emulsifier, dispersant, wetting agent, gellant for pharmaceuticals  
Properties: Off-wh. hard waxy solid; sol. in water, ethanol, trichloroethylene, oleic acid, xylene; HLB 15.4; acid no. 1 max.; hyd. no. 45-55; cloud pt. 78 C (1% aq.); surf. tens. 41.5 dynes/cm (0.1% aq.); pH 6.0-7.5 (3%); nonionic; 97% conc.  
Toxicology: LD50 (oral, rat) 2.1 g/kg; mild skin irritant, moderate eye irritant  

Volpo CS2  [Croda Chem. Europe Ltd  
http://www.croda.co.uk]  
Chem. Descrip.: Ceteareth-2  
CAS 9004-95-9  
Uses: Emulsifier, wetting agent, solubilizer for pharmaceuticals  
Properties: Wh. waxy solid; sol. in ethanol, kerosene, trichloroethylene, xylene; partially sol. in butyl stearate; insol. in min. oil, methyl oleate, rapeseed oil, kerosene; HLB 15.4; acid no. 1.0 max.; hyd. no. 45-60; nonionic  
Toxicology:  
Precaution: Avoid use in prods. used near eyes or in high conc. in skin cosmetics  
Storage: Hygroscopic  

Volpo CS20  [Croda Inc  
http://www.croda.com;  
http://www.crodausa.com]  
Chem. Descrip.: PEG-25 Cetostearyl ether  
See Ceteareth-25  
CAS 68439-49-6 (generic)  
Uses: Emulsifier, dispersant and wetting agent in pharmaceutical creams and lotions  
Features: Stable to moderately strong acids and alkalis  
Regulatory: FDA Inactive Ingredients Guide listed  
Properties: Wh. waxy pastilles; HLB 16.2; nonionic  

Volpo CS25  [Croda Inc  
http://www.croda.com;  
http://www.crodausa.com]  
Chem. Descrip.: PEG-3 lauryl alcohol  
See Laureth-3  
CAS 9002-92-0; EINECS/ELINCS 221-280-2  
Uses: Surfactant, antistat, detergent, dispersant, emulsifier, leveling agent, plasticizer, scouring agent, solubilizer, and wetting agent in pharmaceuticals  
Properties: Essentially colorless cl. liq.; sol. in trichloroethylene, xylene, rapeseed oil, min oil, butyl stearate, kerosene, methyl oleate; insol. in water; HLB 7-8; acid no. 1.0 max.; hyd. no. 165-180; nonionic  
Toxicology:  
Storage: Hygroscopic

**Laureth-3**

CAS **9002-92-0**; EINECS/ELINCS **221-280-2**  
*Uses:* Emulsifier, wetting agent, spreading agent, dispersant in medically prescribed dispersible bath oils  
*Features:* Chemically stable to strong acids and alkalis and high levels of electrolytes  
*Regulatory:* EP, FDA Inactive Ingredients Guide listed  
*Properties:* Colorless cl. liq.; sol. in lipophilic materials; readily disp. in solvs.; HLB 8.0; acid no. 1; hyd. no. 165-180; nonionic  
*Use Level:* 1%  
*Toxicology:* Essentially nonirritating to skin

**Volpo L4** [Croda Chem. Europe Ltd  
[http://www.croda.co.uk]]  
*Chem. Descrip.:* C12-13 pareth-4  
*CAS* **66455-14-9**  
*Uses:* Emulsifier, wetting agent, spreading agent, dispersant in medically prescribed dispersible bath oils  
*Features:* Chemically stable to strong acids and alkalis and high levels of electrolytes  
*Regulatory:* EP, FDA Inactive Ingredients Guide listed  
*Properties:* Essentially colorless cl. liq.; sol. in min. oil, kerosene, trichloroethylene, butyl stearate, rapeseed oil, methyl oleate, xylene; insol. in water; HLB 9.5; acid no. 1 max.; hyd. no. 145-160; nonionic; 97% conc.  
*Volpo L23* [Croda Chem. Europe Ltd  
[http://www.croda.co.uk]]  
*Chem. Descrip.:* C12-13 pareth-23  
*CAS* **66455-14-9**  
*Uses:* Spreading agent, foaming agent, dispersant, o/w emulsifier and solubilizer for pharmaceutical topicals  
*Features:* Chemically stable to strong acids and alkalis and high levels of electrolytes  
*Regulatory:* FDA Inactive Ingredients Guide listed  
*Properties:* Wh. to off-wh. opaque liq.; sol. in water, ethanol, min. oil, trichloroethylene, rapeseed oil, methyl oleate, xylene; partly sol. in butyl stearate, kerosene, butyl stearate; HLB 12.4; acid no. 0.5 max.; iodine no. 33-38; hyd. no. 75-90; nonionic; 97% conc.  

**Volpo N5** [Croda Chem. Europe Ltd

Storage: Store in clean, dry area; minimize or avoid dust generation

Chem. Descrip.: Fumed silica (100%) See Silica, fumed
CAS 112945-52-5; EINECS/ELINCS 231-545-4
Uses: Thickener, thixotrope, antisetting agent for pharmaceuticals (toothpaste, tablets, powds., aerosols, suspensions, ointments, creams); flow aid for powds., pigments, and salts
Features: Hydrophilic
Regulatory: DOT not regulated; CERCLA nonreportable; Canada DSL; China IECSC; Japan ENCS; Philippines PICCS; Korea ECL; Australia AICS; New Zealand HSNO; MA, NJ, PA Right-to-Know
Properties: Wh. powd.; virtually insol. in water; dens. ≈ 2.2; bulk dens. 40 g/l (tamped); m.p. 1700 C; surf. area 200±30 m2/g; ref. index 1.45; pH 3.6-4.3 (4% aq.)
Use Level: 5-35% (rubber), 15-35% (high temp. curing silicone rubber), 0.8-1.2% (adhesives)
Toxicology: LD50 (oral, rat) > 5 g/kg, (dermal rabbit) > 5 g/kg; LC50 (inh., rat, 4 h) > 0.139 mg/l; nuisance dust; use barrier cream to prevent drying of skin; TSCA listed
Environmental: EC50 (daphnia magna, 24 h) > 10 g/l; LC50 (zebra fish, 96 h) > 10 g/l
Precaution: Wear rubber gloves, safety glasses with side shields or chemical safety goggles; avoid dust formation; take precautions against electrostatic charging
HMIS: Health 1, Flammability 0, Reactivity 0
Storage: 1 yr. storage stability in dry area in unopened containers

Chem. Descrip.: Fumed silica See Silica, fumed
CAS 112945-52-5; EINECS/ELINCS 231-545-4
Uses: Thickener, thixotrope, excipient, flow aid for pharmaceutical powds.
Features: Hydrophobic
Properties: Wh. powd.; bulk dens. 40 g/l (tamped); surf. area 170±30 m2/g; ref. index 1.45; pH 3.8-4.5 (4% in 1:1 water/methanol disp.)
Storage: 1 yr. storage stability in unopened containers

Chem. Descrip.: Fumed silica See Silica, fumed
CAS 112945-52-5; EINECS/ELINCS 231-545-4
Uses: Thickener, thixotrope for toothpaste
Properties: Pure wh. powd.; odorless; < 0.04% > 40 µm sieve residue; bulk dens. 105 g/l (tamped); surf. area 200±30 m2/g; ref. index 1.45; pH 3.6-4.3 (4% disp. in water)
Storage: 1 yr. shelf life in closed containers

Chem. Descrip.: Fumed silica See Silica, fumed
CAS 112945-52-5; EINECS/ELINCS 231-545-4
Uses: Thickener, thixotrope for toothpaste
Properties: Pure wh. powd.; odorless; < 0.04% > 40 µm sieve residue; bulk dens. 105 g/l (tamped); surf. area 200±30 m2/g; ref. index 1.45; pH 3.6-4.3 (4% disp. in water)
Storage: 1 yr. shelf life in closed containers

Handbook of Pharmaceutical Additives, Third Edition 788
Trade Name Reference

Chem. Descrip.: Fumed silica (100%) See Silica, fumed
CAS 112945-52-5; EINECS/ELINCS 231-545-4
Uses: Thickener, thixotropic agent, filler, antissettling agent for pharmaceuticals (suspensions, ointments, creams); flow aid for powds.
Properties: Wh. powd.; odorless; insol. in water; dens. ≈ 2.2; bulk dens. 50 g/l (tamped); m.p. 1700 C; surf. area 150±30 m²/g; ref. index 1.45; pH 3.6-4.3 (4% aq.)
Regulatory: DOT, TDG, IMDG, ICAO, IATA non regulated; CERCLA, SARA §302/311/312/313 nonreportable; MA, PA, NJ Right-to-Know; Canada DSL; China IECSC; Japan ENCS; Philippines PICCS; Korea ECL; Australia AICS; New Zealand HSNO
Toxicology: LD50 (oral, rat) > 5000 mg/kg, (skin, rabbit) > 5000 mg/kg, (inh., rat, 4 h) > 0.139 mg/l; use barrier cream to prevent drying of skin; nuisance dust

Precaution: Wear rubber gloves, safety glasses with side shields or chemical safety goggles; avoid dust formation; take precautions against electrostatic charging
HMIS: Health 1, Flammability 0, Reactivity 0
Storage: 1 yr. storage stability in dry area in unopened containers

Chem. Descrip.: Carboxymethylcellulose sodium, high purity
CAS 9004-32-4; EINECS/ELINCS 265-995-8
Uses: Excipient, disintegration aid, film former, thickener, and stabilizer in creams, gels, and ointments; binder and phase separation inhibitor in bulk laxatives; thickener and suspending agent in syrups and pharmaceutical suspensions; viscosity regulator in nose and ear drop, injections and infusion preps.
Regulatory: USP, EP, GRAS, kosher
Properties: Solid; visc. 30 cps
Storage: Store in its original packaging in a clean and dry place, away from heat source

</table>
Trade Name Reference

methylcellulose

Uses: Film former, shelf life extender, hardener, taste masking agent in coatings for pills/tablets
Features: Does not affect active substance release; compatible with colorants, pigments and emollients
Use Level: 5-15% use level

Walocel® HM 5 PPA 2910 [Wolff Walsrode AG](http://www.wolff-walsrode.de)
Chem. Descrip.: Hydroxypropyl methylcellulose
Uses: Film former, shelf life extender, hardener, taste masking agent in hard capsules for sustained release
Features: Very rapidly dissolving HPMC; does not affect active substance release; compatible with colorants, pigments and emollients

Walocel® HM 6 PPA 2910 [Wolff Walsrode AG](http://www.wolff-walsrode.de)
Chem. Descrip.: Hydroxypropyl methylcellulose
Uses: Film former in coatings for pills/tablets
Features: Gluten-free; BSE/TSE- and GMO-free; good freeze/thaw stability; very stable in systems with high salt content
Regulatory: Kosher; FDA 21 CFR §172.874; EU E 464
Properties: Odorless; tasteless; Brookfield visc. 80-120 mPa*s

Walocel® HM 15 PA [Wolff Walsrode AG](http://www.wolff-walsrode.de)
Chem. Descrip.: Hydroxypropyl methylcellulose
Uses: Film former, shelf life extender, hardener, taste masking agent in hard capsules for sustained release
Features: Gluten-free; BSE/TSE- and GMO-free; good freeze/thaw stability; very stable in systems with high salt content
Regulatory: Kosher; FDA 21 CFR §172.874; EU E 464
Properties: Odorless; tasteless; Brookfield visc. 12-18 mPa*s
Use Level: 5-15% use level

Walocel® HM 15 PPA 2910 [Wolff Walsrode AG](http://www.wolff-walsrode.de)
Chem. Descrip.: Hydroxypropyl methylcellulose
Uses: Film former, shelf life extender, hardener, taste masking agent in hard capsules for sustained release
Features: Very rapidly dissolving HPMC; does not affect active substance release; compatible with colorants, pigments and emollients

Walocel® HM 50 PA [Wolff Walsrode AG](http://www.wolff-walsrode.de)
Chem. Descrip.: Hydroxypropyl methylcellulose
Uses: Used in coatings for pills/tablets
Features: Gluten-free; BSE/TSE- and GMO-free; good freeze/thaw stability; very stable in systems with high salt content
Regulatory: Kosher; FDA 21 CFR §172.874; EU E 464
Properties: Odorless; tasteless; Brookfield visc. 1200-1800 mPa*s

Walocel® HM 1500 PA [Wolff Walsrode AG](http://www.wolff-walsrode.de)
Chem. Descrip.: Hydroxypropyl methylcellulose
Uses: Used in coatings for pills/tablets
Features: Gluten-free; BSE/TSE- and GMO-free; good freeze/thaw stability; very stable in systems with high salt content
Regulatory: Kosher; FDA 21 CFR §172.874; EU E 464
Properties: Odorless; tasteless; Brookfield visc. 320-480 mPa*s

Walocel® HM 4000 PA [Wolff Walsrode AG](http://www.wolff-walsrode.de)
Chem. Descrip.: Hydroxypropyl methylcellulose
Uses: Used in coatings for pills/tablets
Features: Gluten-free; BSE/TSE- and GMO-free; good freeze/thaw stability; very stable in systems with high salt content
Regulatory: Kosher; FDA 21 CFR §172.874; EU E 464
Properties: Odorless; tasteless; Brookfield visc. 1200-1800 mPa*s
methylcellulose

**Uses:** Film former, shelf life extender, hardener, taste masking agent in coatings for pills/tablets

**Features:** Gluten-free; BSE/TSE- and GMO-free; good freeze/thaw stability; very stable in systems with high salt content

**Regulatory:** Kosher; FDA 21 CFR §172.874; EU E 464

**Properties:** Odorless; tasteless; Brookfield visc. 3200-4800 mPa•s

**Walocel® HM 4000 PPA 2208** [Wolff Walsrode AG http://www.wolff-walsrode.de]

**Chem. Descrip.:** Hydroxypropyl methylcellulose

**Uses:** Matrix former for hard matrix tablets, vitamin sustained release tablets; stabilizer in antacids

**Properties:** Solid

**Walocel® HM 15000 PA** [Wolff Walsrode AG http://www.wolff-walsrode.de]

**Chem. Descrip.:** Hydroxypropyl methylcellulose

**Uses:** Film former, shelf life extender, hardener, taste masking agent in coatings for pills/tablets

**Features:** Gluten-free; BSE/TSE- and GMO-free; good freeze/thaw stability; very stable in systems with high salt content

**Regulatory:** Kosher; FDA 21 CFR §172.874; EU E 464

**Properties:** Odorless; tasteless; Brookfield visc. 12,000-18,000 mPa•s

**Walocel® HM 100000 PPA 2208** [Wolff Walsrode AG http://www.wolff-walsrode.de]

**Chem. Descrip.:** Hydroxypropyl methylcellulose

**Uses:** Rheology control agent for aq. sol’n.; fat/protein replacer, coatings for pills/tablets

**Features:** Gluten-free; BSE/TSE- and GMO-free; good freeze/thaw stability; very stable in systems with high salt content

**Regulatory:** Kosher; FDA 21 CFR §172.874; EU E 464

**Properties:** Odorless; tasteless; Brookfield visc. 80,000-120,000 mPa•s

**Water Lock® A-100** [Grain Processing http://www.grainprocessing.com]

**Chem. Descrip.:** Starch/acrylates/acrylamide copolymer

**Uses:** Superabsorbent polymer for wound dressings, topical apps.

**Features:** Able to absorb or immobilize large quantities of aq. fluids, such as alkalis, dilute acids, body fluids

**Properties:** 98% through 20 mesh; pH 7.8

**Water Lock® A-120** [Grain Processing http://www.grainprocessing.com]

**Chem. Descrip.:** Starch/acrylates/acrylamide copolymer

**Uses:** Superabsorbent polymer for wound dressings, topical apps.

**Features:** Able to absorb or immobilize large quantities of aq. fluids, such as alkalis, dilute acids, body fluids

**Properties:** 98+% through 40 mesh; pH 7.8

**Water Lock® A-140** [Grain Processing http://www.grainprocessing.com]

**Chem. Descrip.:** Starch/acrylates/acrylamide copolymer

**Uses:** Superabsorbent polymer for wound dressings, topical apps.

**Features:** Able to absorb or immobilize large quantities of aq. fluids, such as alkalis, dilute acids, body fluids

**Properties:** 98+% through 80 mesh; pH 7.8

**Water Lock® A-180** [Grain Processing http://www.grainprocessing.com]

**Chem. Descrip.:** Starch/acrylates/acrylamide copolymer

**Uses:** Superabsorbent polymer for wound dressings, topical apps., pharmaceutical body and aerosol powds.

**Features:** Able to absorb or immobilize large quantities of aq. fluids, such as alkalis, dilute acids, body fluids

**Properties:** 98+% through 200 mesh; pH 7.8

**Water Lock® A-220** [Grain Processing http://www.grainprocessing.com]

**Chem. Descrip.:** Starch/acrylates/acrylamide copolymer

**Uses:** Superabsorbent polymer for wound
Trade Name Reference

dressings
Features: Able to absorb or immobilize body fluids

**Water Lock® C200** [Grain Processing http://www.grainprocessing.com]
Uses: Superabsorbent polymer, filler, humectant, cryst. growth inhibitor for pharmaceutical creams/lotions
Features: Nonirritating; builds solids

**Water Lock® G400** [Grain Processing http://www.grainprocessing.com]
Uses: Superabsorbent polymer for pharmaceutical spill kits
Features: Nonirritating; builds solids

**WECOBEE® FS** [Stepan http://www.stepan.com]
Chem. Descrip.: Hydrogenated vegetable oil
CAS 68334-28-1; EINECS/ELINCS 269-820-6
Uses: Cocoa butter replacement, excipient, emollient, base for pharmaceuticals (suppositories, creams, ointments), antiperspirant sticks
Features: Exc. mold release
Regulatory: FDA 21CFR §170.30, 175.105, 176.210, GRAS; kosher; Europe, Canada, Australia, Philippines, Korea listed
Properties: Wh. to off-wh. solid; bland odor and taste; sp.gr. 0.90; dens.7.5 lb/gal; visc. 14.0 cps (150 F); m.p. 44 C; acid no. 0.20 max.; iodine no. 3; sapon. value 240; flash pt. (PMCC) > 282 C; 0% RVOC; 300 ppm moisture
Toxicology: LD50 > 5 ml/kg; may cause minimal eye but no skin irritation; TSCA listed
Environmental: Biodeg.
Storage: Store in sealed containers below 32 C; avoid overheating

**WECOBEE® M** [Stepan http://www.stepan.com]
Chem. Descrip.: Hydrogenated vegetable oil
Chem. Analysis: 100% Hydrogenated vegetable oil
CAS 68938-37-4; EINECS/ELINCS 269-820-6
Uses: Cocoa butter replacement, excipient, emollient, base for pharmaceuticals (suppositories, creams, ointments), antiperspirant sticks
Features: Exc. mold release
Regulatory: FDA 21CFR §170.30, 175.105, 176.210, GRAS; kosher; conforms to USP/NF (hard fat); Europe, Korea, Canada, Australia listed
Properties: Wh. cryst. flakes, typ. waxy odor; negligible sol. in water; sp.gr. 0.82-0.84 (50 C); m.p. 43-47 C; acid no. 2 max.; iodine no. 1 max.; sapon. no. 109-120; flash pt. (COC) 450 F
Toxicology: Nontoxic; passes LD50 toxicity and rabbit eye and skin irritation tests; inh. may cause respiratory irritation; ingestion may cause gastrointestinal irritation
Environmental: Readily biodeg.
Precaution: Incompat. with oxidizing agents
Hazardous Decomp. Prods.: Oxides of carbon, smoke

**W.G.S. Synaceti 116** [Werner G. Smith http://www.wernergsmith.com]
Chem. Descrip.: Cetyl esters (syn. spermaceti)
CAS 8002-23-1
Uses: Emollient, bodying agent for pharmaceuticals
Features: Extremely stable; environmentally friendly
Regulatory: FDA 21CFR §175.105, 175.300
Properties: Wh. cryst. flakes, typ. waxy odor; negligible sol. in water; sp.gr. 0.82-0.84 (50 C); m.p. 43-47 C; acid no. 2 max.; iodine no. 1 max.; sapon. no. 109-120; flash pt. (COC) 450 F
Toxicology: Nontoxic; passes LD50 toxicity and rabbit eye and skin irritation tests; inh. may cause respiratory irritation; ingestion may cause gastrointestinal irritation
Environmental: Readily biodeg.
Trade Name Reference

Storage: Keep away from heat, sources of ignition; keep container closed when not in use.

**Wheat Germ Oil CLR** [CLR [http://www.clr-berlin.de; Actives Int'l.]

Chem. Descrip.: Wheat (Triticum vulgare) germ oil

CAS 8006-95-9

Uses: Emulsified and oily cosmetics for preventive skin and hair care; also for skin and scalpS poorly supplied with blood.

Properties: Brn. oil; weak char. odor; sol. in oils and fats; dens. 0.922-0.929 g/ml (20 C); acid no. < 12; iodine no. 120-140; ref. index 1.475-1.478 (20 C)

Use Level: 2-5%

**Wheat Starch TB** [Roquette [http://www.roquette.fr]

Chem. Descrip.: Wheat starch  See Wheat (Triticum vulgare) starch

CAS 9005-25-8; EINECS/ELINCS 232-679-6

Uses: Diluent and disintegrant for pharmaceutical tablets and capsules.

Features: Uniform particle size

Regulatory: USP/NF, EP, JP

Properties: Wh. to grayish-wh. fine powd.; 92% through 325 mesh; 3-5 µ median particle size; 38-45 lb/ft³ (tapped), 14-18 lb/ft³ (loose); oil absorp. 30-45; dry brightness 90; decomp. pt. 900-1000 C; pH 9.0; 97-100% conc.; 0.5% max. moisture; 6.5% max. loss on ignition.

**White Swan** [Croda Chem. Europe Ltd [http://www.croda.co.uk]

CAS 8006-54-0; EINECS/ELINCS 232-348-6

Uses: Conditioner, moisturizer, w/o emulsifier, and emollient for pharmaceuticals; pigment dispersant

Properties: Yel. unctuous mass; nonionic

Chem. Descrip.: Talc USP

Chem. Analysis: SiO₂ (59-62%); MgO (28-31%); Al₂O₃ (2-4%); Fe₂O₃ (0.1-0.4%); CaO (0.60-1.40%)

CAS 14807-96-6; EINECS/ELINCS 238-877-9

Uses: Filler in pharmaceutical tablets, medicated foot powds., creams, lotions, ointments; lubricant, glidant in tablet coatings; release agent in tablet molds.

Features: Inert

Regulatory: USP, DOT nonregulated; SARA §313 nonreportable

Properties: Wh. to grayish-wh. fine powd.; 92% through 325 mesh; 10-12 µ median particle size; sl. earthy odor; sol. in conc. hot H₃PO₄; insol. in water, cold acids/alkalis; sp.gr. 2.70; dens. 63-70 lb/ft³ (tapped), 25-30 lb/ft³ (loose); oil absorp. 26-30; dry brightness 90; decomp. pt. 900-1000 C; pH 9.0; 97-100% conc.; 0.5% max. moisture; 6.5% max. loss on ignition.

**Whittaker IMP1885L** [MPSI [http://www.mp-solutionsinc.com; Luzenac Am. [http://www.luzenac.com]

Chem. Descrip.: Talc USP

Chem. Analysis: SiO₂ (61-63%); MgO (30-33%); Al₂O₃ (1-2.5%); Fe₂O₃ (0.1-0.5%); CaO (0.05-0.30%)

CAS 14807-96-6; EINECS/ELINCS 238-877-9

Uses: Filler in pharmaceutical tablets, medicated foot powds., creams, lotions, ointments; lubricant, glidant in tablet coatings; release agent in tablet molds.

Features: Inert

Regulatory: USP, DOT nonregulated; SARA §313 nonreportable

Properties: Wh. to grayish-wh. fine powd.; 99.7% through 325 mesh; 3-5 µ median particle size; sl. earthy odor; sol. in conc. hot H₃PO₄; insol. in water, cold acids/alkalis; sp.gr. 2.70; dens. 38-45 lb/ft³ (tapped), 14-18 lb/ft³ (loose); oil absorp. 30-45; dry brightness 88; decomp. pt. 900-1000 C; pH 8.9-9.9; 97-100% conc.; 0.5% max. moisture; 6.5% max. loss on ignition.

Toxicology: ACGIH TWA 2 mg/m³ (respirable dust); inh. may cause irritation of mucous membranes, respiratory tract; skin contact may cause mild irritation, dryness; eye contact may cause irritation, inflamm.; harmless and inert if ing.; TSCA listed

HMIS: Health 1, Flammability 0, Reactivity 0

**Whittaker IMP1889L** [MPSI [http://www.mp-solutionsinc.com; Luzenac Am. [http://www.luzenac.com]

Handbook of Pharmaceutical Additives, Third Edition 794
Trade Name Reference

Properties: Wh. to grayish-wh. fine powd.; 99.9% through 325 mesh; 100% through 200 mesh; 3-5 µ median particle size; sl. earthy odor; sol. in conc. hot H₃PO₄; insol. in water, cold acids/alkalis; sp.gr. 2.85; dens. 38-46 lb/ft³ (tapped), 14-18 lb/ft³ (loose); oil absorb. 33-39; dry brightness 90; decomp. pt. 900-1000 C; 97-100% conc.; 6.5% max. loss on ignition

Toxicology: ACGIH TWA 2 mg/m³ (respirable dust); inh. may cause irritation of mucous membranes, respiratory tract; skin contact may cause mild irritation, dryness; eye contact may cause irritation, inflammm.; harmless and inert if ing.; TSCA listed

HMIS: Health 1, Flammability 0, Reactivity 0

Chem. Descrip.: Talc USP
Chem. Analysis: SiO₂ (61-63%); MgO (32-34%); Al₂O₃ (0.4-0.5%); Fe₂O₃ (0.4-0.5%); CaO (0.4-0.60%)
CAS 14807-96-6; EINECS/ELINCS 238-877-9

Uses: Filler in pharmaceutical tablets, medicated foot powds., creams, lotions, ointments; lubricant, glidant in tablet coatings; release agent in tablet molds

Features: Inert

Regulatory: USP, DOT nonregulated; SARA §313 nonreportable

Properties: Wh. to grayish-wh. fine powd.; 97% through 325 mesh, 99% through 200 mesh; 5-8 µ median particle size; sl. earthy odor; sol. in conc. hot H₃PO₄; insol. in water, cold acids/alkalis; sp.gr. 2.70; dens. 53-63 lb/ft³ (tapped), 21-26 lb/ft³ (loose); oil absorb. 27-32; dry brightness 88; decomp. pt. 900-1000 C; pH 8.2-9.5; 97-100% conc.; 0.5% max. moisture; 6.5% max. loss on ignition

Toxicology: ACGIH TWA 2 mg/m³ (respirable dust); inh. may cause irritation of mucous membranes, respiratory tract; skin contact may cause mild irritation, dryness; eye contact may cause irritation, inflammm.; harmless and inert if ing.; TSCA listed

HMIS: Health 1, Flammability 0, Reactivity 0

Wickenol® 142 [Alzo http://www.alzointernational.com]
Chem. Descrip.: Octyl decyl myristate
CAS 22766-83-2; EINECS/ELINCS 255-623-2

Uses: Emollient, plasticizer for pharmaceuticals

Properties: Gardner 2+ color; sol. in alcohol, animal, veg., and wh. oils; insol. in water; pour pt. 0 C; acid no. 0.1; ref. index 1.460

Wickenol® 155 [Alzo http://www.alzointernational.com]
Chem. Descrip.: Octyl palmitate
CAS 29806-73-3; EINECS/ELINCS 249-862-1

Uses: Emollient, moisturizer, pigment wetting agent/dispersant in topical pharmaceuticals

Features: Increases water vapor porosity of fatty components

Properties: Gardner -1 color; sol. in alcohol, animal, veg., and min. oils; insol. in water; pour pt. -3 C; acid no. 0.10; ref. index 1.445

Wickenol® 156 [Alzo http://www.alzointernational.com]
Chem. Descrip.: Octyl stearate
CAS 22047-49-0; EINECS/ELINCS 244-754-0

Uses: Emollient, moisturizer, pigment wetting agent/dispersant in topical pharmaceuticals

Features: Increases water vapor porosity of fatty components

Properties: Gardner -1 color; sol. in alcohol, animal, veg., and min. oils; pour pt. 5 C; acid...
**Wickenol® 158 [Alzo](http://www.alzointernational.com)**

Chem. Descrip.: Dioctyl adipate
CAS 103-23-1; EINECS/ELINCS 203-090-1
Uses: Emollient, moisturizer, pigment wetting agent/dispersant, cosolvent in topical pharmaceuticals
Features: Increases water vapor porosity of fatty components
Properties: Gardner -1 color; sol. in alcohol, animal, veg., and min. oils; pour pt. -20 C; acid no. 0.10; ref. index 1.445

**Wickenol® 159 [Alzo](http://www.alzointernational.com)**

Chem. Descrip.: Dioctyl succinate
CAS 2915-57-3; EINECS/ELINCS 220-836-1
Uses: Emollient, moisturizer, pigment wetting agent/dispersant in topical pharmaceuticals
Features: Increases water vapor porosity of fatty components
Properties: Gardner 2+ color; sol. in alcohol, animal, veg., and min. oils; pour pt. -18 C; acid no. 0.7; ref. index 1.443

**Wickenol® 160 [Alzo](http://www.alzointernational.com)**

Chem. Descrip.: Octyl pelargonate
CAS 59587-44-9; EINECS/ELINCS 261-819-9
Uses: Emollient, moisturizer, pigment wetting agent/dispersant in topical pharmaceuticals, stick formulations
Features: Increases water vapor porosity of fatty components
Properties: Gardner 2+ color; sol. in alcohol, animal, veg., and min. oils; pour pt. -18 C; acid no. 0.10; ref. index 1.437

**Wickenol® 161 [Alzo](http://www.alzointernational.com)**

Chem. Descrip.: Dioctyl adipate, octyl stearate, octyl palmitate
Uses: Emollient, moisturizer, pigment wetting agent/dispersant in topical pharmaceuticals
Features: Increases water vapor porosity of fatty components
Properties: Gardner -1 color; sol. in alcohol, animal, veg., and min. oils; pour pt. -12 C; acid no. 0.1; ref. index 1.446

**Wickenol® 535 [Alzo](http://www.alzointernational.com)**

Chem. Descrip.: Wheat germ glycerides
CAS 68990-07-8
Uses: Anti-irritant for skin care prods.
Features: Hydrophilic/hydrophobic
Properties: Gardner 2+ liq.; sol. in acetone, castor, corn, and min. oil, IPA, acetone, chloroform; insolv. in water; acid no. 0.8; iodine no. 118; 100% act.
### Trade Name Reference

**Storage:** Do not store in close proximity to excessive heat, open flames, strong acids or strong bases; keep container tightly closed when not in use; exposure to air causes degradation

Chem. Descrip.: Caprylic/capric glycerides  
CAS 85409-09-2; EINECS/ELINCS 287-075-5

Uses: Surfactant, emulsifier, solubilizer, dispersant, plasticizer, lubricant, consistency regulator, skin/mucous membrane protectant, refatting agent, penetrant, carrier, adsorp. promoter for pharmaceuticals  
Properties: Sl. ylsh. oil; sol. in water/ethanol (50/50), acetone; sol. cloudy in ether, heptane; dens. 1.02 kg/dm⁴; visc. 190 mPa·s; acid no. 2 max.; iodine no. 1 max.; sapon. no. 230-260; flash pt. > 180 C; nonionic; 40-42% monoglycerides

**Witepsol® E75** [Sasol Germany](http://www.sasol.com; http://www.sasololefinssurfactants.com; Sasol N. Am. http://www.sasolnorthamerica.com]

Chem. Descrip.: Hydrogenated coco-glycerides and beeswax  
Uses: Hard fat base for suppositories and capsules  
Properties: Pellets; m.p. 37-39 C; solid. pt. 32-36 C; acid no. 1.3 max.; iodine no. 3 max.; sapon. no. 220-230; hyd. no. 15 max.

WS-3 [Millennium/F&F
http://www.aromachem.com]
Chem. Descrip.: Cyclohexanecarboxamide, N-ethyl-5-methyl-2-(1-methylethyl)- See N-Ethyl-p-menthane-3-carboxamide
CAS 39711-79-0; EINECS/ELINCS 254-599-0
Uses: Coolant in medicinal preps., oral care prods.
Regulatory: DOT: Chemicals n.o.i.
Properties: Wh. cryst.; sl. menthol-like odor; >0.1% sol. in water; 100% sol. in alcohol; 0.1% max. sol. in water; m.p. 87-102 C; flash pt. (TCC) 212 F; pH 6.1; nonmutagenic (Ames test); 99% min. purity
Toxicology: LD50 (oral, rat) > 3000 mg/kg; similar menthane derivs. have caused temporary local anesthetic action on the eye
Environmental: SARA Title III Section 311/312 Hazardous Decomp. Prods.: CO, CO2, NOx, acrid fumes
NFPA: Health 1, Flammability 1, Reactivity 1
Storage: Do not store near excessive heat, open flames, strong acids or bases; avoid exposure to air; keep in tightly closed containers

Xantural® 11K [CP Kelco
http://www.cpkelco.com]
CAS 11138-66-2; EINECS/ELINCS 234-394-2
Uses: Excipient, thickener in pharmaceuticals for controlled release, dry blend, and reconstitutable powd. applics.
Features: Provides stable visc. over wide temp. range; compat. with high ionic environments
Properties: Agglomerated grade

Xantural® 75 [CP Kelco
http://www.cpkelco.com]
CAS 11138-66-2; EINECS/ELINCS 234-394-2
Uses: Excipient, thickener in pharmaceuticals for controlled release, dry blend, and reconstitutable powd. applics.
Features: Provides stable visc. over wide temp. range; compat. with high ionic environments
Properties: Fine mesh grade

Xantural® 180 [CP Kelco
http://www.cpkelco.com]
CAS 11138-66-2; EINECS/ELINCS 234-394-2
Uses: Excipient, thickener in pharmaceuticals for controlled release, dry blend, and reconstitutable powd. applics.
Features: Provides stable visc. over wide temp. range; compat. with high ionic environments
Properties: Fine mesh grade

Xylisorb® 90 [Roquette
http://www.roquette.fr]
Chem. Descrip.: Xylitol
CAS 87-99-0; EINECS/ELINCS 201-788-0
Uses: Sweetener, cooling agent for sugarless, pharmaceutical chewing gums; nutrient in parenteral pharmaceuticals; excipient for coatings, candying of lozenges; diluent for tablets, sachets
Features: Noncariogenic; cooling effect in
Trade Name Reference

Xylisorb® 300 [Roquette http://www.roquette.fr]
Chem. Descrip.: Xylitol
CAS 87-99-0; EINECS/ELINCS 201-788-0
Uses: Sweetener, cooling agent for sugarless, pharmaceutical chewing gums; nutrient in parenteral pharmaceuticals; excipient for coatings, candying of lozenges; diluent for tablets
Features: Noncariogenic; cooling effect in mouth; sweetening power equal to sucrose
Regulatory: USP/NF, EP, JP
Properties: Wh. crystalline powd.; odorless; sweet taste; mean particle diameter 90 µm; sol. 168 g/100 ml

Xylisorb® 700 [Roquette http://www.roquette.fr]
Chem. Descrip.: Xylitol
CAS 87-99-0; EINECS/ELINCS 201-788-0
Uses: Sweetener, cooling agent for sugarless, pharmaceutical chewing gums; nutrient in parenteral pharmaceuticals; excipient for coatings, candying of lozenges; diluent for tablets
Features: Noncariogenic; cooling effect in mouth; sweetening power equal to sucrose
Regulatory: USP/NF, EP, JP
Properties: Wh. crystalline powd.; odorless; sweet taste; mean particle diameter 250 µm; sol. 168 g/100 ml

Xylisorb® PF [Roquette http://www.roquette.fr]
Chem. Descrip.: Xylitol
CAS 87-99-0; EINECS/ELINCS 201-788-0
Uses: Sweetener, cooling agent for sugarless, pharmaceutical chewing gums; nutrient in parenteral pharmaceuticals; excipient for coatings, candying of lozenges; diluent for tablets
Features: Pyrogen-free; noncariogenic; cooling effect in mouth; sweetening power equal to sucrose
Regulatory: USP/NF, EP, JP
Properties: Wh. crystalline powd.; odorless; sweet taste; sol. in water (168 g/100 ml)

Xylitab® 100 [Danisco Sweeteners http://www.daniscosweeteners.com]
Chem. Descrip.: Xylitol (95% min.) with polydextrose (3.5% max.) as binder
Uses: Nutritive sweetener and excipient for pharmaceutical tablets
Features: Stable to air and heat
Regulatory: USP/NF, Ph. Eur, JP, FCC
Properties: Wh. cryst. gran.; pract. odorless; very sweet, cool taste; highly sol. in water; pract. insol. in most org. solvs.; bulk dens. 0.5-0.7 g/ml; 0.5% max. moisture
Toxicology: Relatively nontoxic by ing.; may cause skin/eye irritation; prolonged inh. (nuisance particle) may cause respiratory irritation; excessive consumption can cause laxation
Precaution: Sl. fire hazard when exposed to heat or flame; may burn but does not ignite readily; dust-air mixts. may ignite or explode; avoid contact with strong oxidizers, excessive heat, sparks, flame
Hazardous Decomp. Prods.: Thermal decomp. may release toxic/hazardous gases, CO, CO₂, furfural
Storage: 3 mos. shelf life when stored in original sealed pkg. below 25 C and < 65% r.h.; marginally hygroscopic

Xylitab® 200 [Danisco Sweeteners http://www.daniscosweeteners.com]
Chem. Descrip.: Xylitol (96.5% min.) with sodium carboxymethyl cellulose (2% max.) as binder See Carboxymethylcellulose sodium
Uses: Nutritive sweetener and excipient for pharmaceutical tablets
Features: Stable to air and heat
Regulatory: USP/NF, Ph. Eur, JP, FCC
Properties: Wh. cryst. gran.; pract. odorless; very sweet, cool taste; highly sol. in water; pract. insol. in most org. solvs.; bulk dens. 0.5-0.7 g/ml; 0.5% max. moisture
Toxicology: Relatively nontoxic by ing.; may cause skin/eye irritation; prolonged inh. (nuisance particle) may cause respiratory irritation; excessive consumption can cause laxation
Precaution: Sl. fire hazard when exposed to heat or flame; may burn but does not ignite readily; dust-air mixts. may ignite or explode; avoid contact with strong oxidizers, excessive heat, sparks, flame
Hazardous Decomp. Prods.: Thermal decomp. may release toxic/hazardous gases, CO,
Trade Name Reference

CO₂, furfural
Storage: 3 mos. shelf life when stored in original sealed pkg. below 25 C and < 65% r.h.; marginally hygroscopic

Xylitol 300 [Danisco Sweeteners
http://www.daniscosweeteners.com]
Chem. Descrip.: Xylitol (98.5-101%)
CAS 87-99-0; EINECS/ELINCS 201-788-0
Uses: Nutritive sweetener and excipient for pharmaceutical tablets
Features: Stable to air and heat
Regulatory: USP/NF, Ph. Eur, JP, FCC
Properties: Wh. cryst. gran.; pract. odorless; very sweet, cool taste; highly sol. in water; pract. insol. in most org. solvs.; bulk dens. 0.4-0.7 g/ml; 0.5% max. moisture
Toxicology: LD₅₀ (oral, mouse) 22 g/kg, (IP, mouse) 22,100 mg/kg; relatively nontoxic by ing.; may cause skin/eye irritation; prolonged inh. (nuisance particle) may cause respiratory irritation; excessive consumption may cause laxation
Precaution: Si. fire hazard when exposed to heat or flame; may burn but does not ignite readily; dust-air mixts. may ignite or explode; avoid contact with strong oxidizers, excessive heat, open flame
Hazardous Decomp. Prods.: Thermal decomp. may release toxic/hazardous gases
Storage: 3 mos. shelf life when stored in original sealed pkg. below 25 C and < 65% r.h.; marginally hygroscopic

Xylitol CFP [Danisco Sweeteners
http://www.daniscosweeteners.com]
Chem. Descrip.: Xylitol (96.5% min.)
CAS 87-99-0; EINECS/ELINCS 201-788-0
Uses: For parenteral pharmaceuticals
Features: Pyrogen free; marginally hygroscopic
Regulatory: FCC, USP, NF, Ph.Eur.
Properties: Wh. cryst. powd.; pract. odorless; very sweet

Xylitol CG [Danisco Sweeteners
http://www.daniscosweeteners.com]
Chem. Descrip.: Xylitol (96.5% min.)
CAS 87-99-0; EINECS/ELINCS 201-788-0
Uses: Nutritive sweetener and excipient for pharmaceutical tablets
Features: Food grade; stable to air and heat
Regulatory: FCC, USP, NF, Ph.Eur.
Properties: Wh. cryst. gran.; pract. odorless; very sweet, cool taste; highly sol. in water; pract. insol. in most org. solvs.; bulk dens. 0.5-0.7 g/ml; 0.5% max. moisture
Toxicology: LD₅₀ (oral, mouse) 22 g/kg, (IP, mouse) 22,100 mg/kg; relatively nontoxic by ing.; may cause skin/eye irritation; prolonged inh. (nuisance particle) may cause respiratory irritation; excessive consumption may cause laxation
Precaution: Sl. fire hazard when exposed to heat or flame; may burn but does not ignite readily; dust-air mixts. may ignite or explode; avoid contact with strong oxidizers, excessive heat, open flame
Hazardous Decomp. Prods.: Thermal decomp. may release toxic/hazardous gases
Storage: 3 yr. shelf life when stored in original sealed pkg. below 25 C and < 65% r.h.; marginally hygroscopic

Yelkin® F [ADM Lecithin
http://www.admworld.com]
Chem. Descrip.: Deoiled lecithin
CAS 8030-76-0; EINECS/ELINCS 232-307-2
Uses: Emulsifier, wetting agent, emollient, binder for pharmaceuticals
Properties: Lt. gold fine gran.

Yelkin® G [ADM Lecithin
http://www.admworld.com]
Chem. Descrip.: Deoiled lecithin
CAS 8030-76-0; EINECS/ELINCS 232-307-2
Uses: Emulsifier, wetting agent, emollient, binder for pharmaceuticals
Properties: Lt. gold gran.

Yelkinol F [ADM Lecithin
http://www.admworld.com]
Chem. Descrip.: Deoiled lecithin
CAS 8002-43-5; EINECS/ELINCS 232-307-2
Uses: Emulsifier for w/o or o/w emulsions, dispersant, dietary supplement for pharmaceuticals, salves, ointments
Properties: Lt. gold fine gran.; HLB 7.0; 1% max. water

Yelkinol G [ADM Lecithin
http://www.admworld.com]
Chem. Descrip.: Deoiled lecithin
CAS 8002-43-5; EINECS/ELINCS 232-307-2
Uses: Emulsifier for w/o or o/w emulsions, dispersant, dietary supplement for pharmaceuticals, salves, ointments
Properties: Lt. gold gran.; HLB 7.0; 1% max. water

Yelkinol P [ADM Lecithin
http://www.admworld.com]
Chem. Descrip.: Deoiled lecithin

**Zinc Oxide USP-511** [Horsehead Corp.](http://www.horsehead.com)

**Chem. Descr.:** Zinc oxide USP (99.8%)
**Chem. Analysis:** 99.9% zinc oxide
**CAS 1314-13-2; EINECS/ELINCS 215-222-5**

- **Uses:** Opacifier, protective astringent in dermatological ointments and lotions, e.g., calamine lotion, coal tar ointment, zinc gelation, zinc oxide ointment, zinc oxide paste, and in zinc-eugenol dental cement
- **Features:** Fast curing; high activity; the high reactivity prevents formation of blk. tin and iron sulfides that discolor foods
- **Regulatory:** USP/NF, EP, JP, BP
- **Properties:** Wh. odorless powd.; 0.12 µ mean particle size; 99.99% through 325 mesh; odorless; negligibly sol. in water; sp.gr. 5.6; pkg. dens. 30 lb/ft³; surf. area 9.5 m²/g; oil absorp. 12 lb oil/100 lb ZnO
- **Toxicology:** TWA 15 mg/m³ (total dust); inh. of high levels of zinc oxide may result in tightness of chest, metallic taste, cough, dizziness, fever, chills, headache, nausea, and dry throat; overexposure may produce symptoms known as metal fume fever or zinc shakes; an acute, self-limiting condition without recognized complications
- **Precaution:** Wear goggles and gloves

**Zinc Omadine® 48% Fine Particle Size** [Arch Biocides](http://www.archbiocides.com)

**Chem. Descr.:** Zinc pyrithione
**CAS 13463-41-7; EINECS/ELINCS 236-671-3**

- **Uses:** Antidandruff agent for shampoos; preservative for acne preps., topical antibacterial prods.
- **Features:** Inhibits growth of gram-negative and gram-positive bacteria, fungi, mold and yeast
- **Regulatory:** EPA reg. no. 1258-840, 1258-841
- **Properties:** Off-wh. disp. (particle size 90% < 1 µ), mild odor; m.w. 317.7 (zinc pyrithione); dens. 10 lb/gal; pH 6.5-8.5 (5% aq.); 48-50% ac.
- **Storage:** Store in dry place at 10-54 C; keep containers tightly closed when not in use; do not store with strong oxidizing agents; shake or stir before use; protect from freezing

**Zinc Omadine® Powd.** [Arch Biocides](http://www.archbiocides.com)

**Chem. Descr.:** Zinc pyrithione

---

**Handbook of Pharmaceutical Additives, Third Edition** 803
Trade Name Reference

CAS 13463-41-7; EINECS/ELINCS 236-671-3
Uses: Antidandruff agent for shampoos; preservative for acne preps., topical antibacterial prods.
Features: Inhibits growth of gram-negative and gram-positive bacteria, fungi, mold and yeast
Regulatory: EPA reg. no. 1258-840, 1258-841
Properties: Off-wh. powd., mild odor; 70 < 25 \( \mu \) particle size; insol. in water; m.w. 317.7 (zinc pyrithione); sp.gr. 1.782; bulk dens. 0.35 g/ml; m.p. ≈ 240 C (dec.); pH 6.5-8.5 (5% aq.); 95-99% assay
Storage: Store in dry place at 10-54 C; keep containers tightly closed when not in use; do not store with strong oxidizing agents

Zinc Omadine® 48% Std. Disp. [Arch Biocides http://www.archbiocides.com]

Chem. Descrip.: Zinc pyrithione
CAS 13463-41-7; EINECS/ELINCS 236-671-3
Uses: Antidandruff agent for shampoos; preservative for acne preps., topical antibacterial prods.
Features: Inhibits growth of gram-negative and gram-positive bacteria, fungi, mold and yeast
Regulatory: EPA reg. no. 1258-840, 1258-841
Properties: Off-wh. disp. (particle size 90% < 5 \( \mu \)), mild odor; m.w. 317.7 (zinc pyrithione); dens. 10 lb/gal; pH 6.5-8.5 (5% aq.); 48-50% act.
Storage: Store in dry place at 10-54 C; keep containers tightly closed when not in use; do not store with strong oxidizing agents; shake or stir before use; protect from freezing

Zinc Oxide 66 [MPSI http://www.mp-solutionsinc.com]

Chem. Descrip.: Zinc oxide USP
Chem. Analysis: ZnO (99.0-100.5%)
CAS 1314-13-2; EINECS/ELINCS 215-222-5
Uses: Protectant, astringent in pharmaceuticals (dermatological ointments/lotions, calamine lotions, phenolated calamine lotions, coal tar ointment, zinc oxide ointment and pastes); dental cements
Regulatory: USP, DOT nonregulated; SARA §313 reportable
Properties: Wh. powd.; 0.12 \( \mu \) avg. particle size; 99.9% through 325 mesh, 100% through 200 mesh; odorless; sol. 0.00016 g/cc in water; sp.gr. 5.60; dens. 30 lb/ft\(^3\) (tapped); surf. area 9.0 m\(^2\)/g; oil absorp. 14-18; dry brightness 97-100; m.p. 3587 F; nonflamm.; pH 6.8-7.8; 0% volatiles
Toxicology: ACGIH TWA (8 h) 10 mg/m\(^3\); inh. may cause metallic taste, cough, dizziness, fever, chills, headache, nausea; overexposure may produce metal fume fever; skin/eye irritant; chronic exposure may cause respiratory irritation; TSCA listed
Precaution: Reacts violently with magnesium when heated resulting in explosion; mixts. with chlorinated rubber explode when heated above 215 C
Hazardous Ingredients: Zinc oxide (99.9%); lead (0.0025%); cadmium (0.005%)
Hazardous Decomp. Prods.: None; toxic fumes are produced in fire
HMIS: Health 0, Flammability 0, Reactivity 0
Storage: Store in cool, dry, well-ventilated area; keep containers tightly closed; handle in well-ventilated areas only

Zinc Oxide 6601 [MPSI http://www.mp-solutionsinc.com]

Chem. Descrip.: Zinc oxide USP
Chem. Analysis: ZnO (99.0-100.5%)
CAS 1314-13-2; EINECS/ELINCS 215-222-5
Uses: Protectant, astringent in pharmaceuticals (dermatological ointments/lotions, calamine lotions, phenolated calamine lotions, coal tar ointment, zinc oxide ointment and pastes); dental cements
Regulatory: USP, DOT nonregulated; SARA §313 reportable
Properties: Wh. powd.; 0.12 \( \mu \) avg. particle size; 99.9% through 325 mesh, 100% through 200 mesh; odorless; sol. 0.00016 g/cc in water; sp.gr. 5.60; dens. 30 lb/ft\(^3\) (tapped); surf. area 9.0 m\(^2\)/g; oil absorp. 14-18; dry brightness 97-100; m.p. 3587 F; nonflamm.; pH 6.8-7.8; 0% volatiles
Toxicology: ACGIH TWA (8 h) 10 mg/m\(^3\); inh. may cause metallic taste, cough, dizziness, fever, chills, headache, nausea; overexposure may produce metal fume fever; skin/eye irritant; chronic exposure may cause respiratory irritation; TSCA listed
Precaution: Reacts violently with magnesium when heated resulting in explosion; mixts. with chlorinated rubber explode when heated above 215 C
Hazardous Ingredients: Zinc oxide (99.9%); lead (0.0025%); cadmium (0.005%)
Hazardous Decomp. Prods.: None; toxic fumes are produced in fire
HMIS: Health 0, Flammability 0, Reactivity 0
Storage: Store in cool, dry, well-ventilated area; keep containers tightly closed; handle in well-ventilated areas only

Handbook of Pharmaceutical Additives, Third Edition 804
Trade Name Reference

keep containers tightly closed; handle in well-ventilated areas only

Zinc Oxide 6605 [MPSI http://www.mp-solutionsinc.com]
Chem. Descrip.: Zinc oxide USP
Chem. Analysis: ZnO (99.9%)
CAS 1314-13-2; EINECS/ELINCS 215-222-5
Uses: Protectant, astringent in pharmaceuticals (dermatological ointments/lotions; calamine lotions; phenolated calamine lotions; coal tar ointment; zinc oxide ointment and pastes); dental cements
Regulatory: USP, FCC, BP, EP, JP, DOT nonregulated; SARA §313 reportable
Properties: Wh. odorless powd.; 99.9% through 325 mesh; sol. 0.00016 g/cc in water; sp.gr. 5.61; dens. 30.0 lb/ft³ (apparent); m.p. 3587 F; nonflamm.; 0.20 max. moisture
Toxicology: ACGIH TWA (8 h) 10 mg/m³; inh. may cause metallic taste, cough, dizziness, fever, chills, headache, nausea; overexposure may produce metal fume fever; skin/eye irritant; chronic exposure may cause respiratory irritation; TSCA listed
Precaution: Reacts violently with magnesium when heated resulting in explosion; mixts. with chlorinated rubber explode when heated above 215 C
Hazardous Ingredients: Zinc oxide (99.9%); lead (0.0025%); cadmium (0.005%)
Hazardous Decomp. Prods.: None; toxic fumes are produced in fire
HMIS: Health 0, Flammability 0, Reactivity 0
Storage: Store covered in cool, dry, well-ventilated area

Chem. Descrip.: Zinc oxide
CAS 1314-13-2; EINECS/ELINCS 215-222-5
Uses: Supplement in pharmaceuticals
Regulatory: DOT nonregulated
Properties: Wh. fine powd.; odorless; 99.9% min. on 325 mesh; 0.51 µ particle size (Fisher); sol. 1.6 mg in water (29 C); sol. in ammonia, ammonium chloride, diluted acetic acid, or min. acids and strong bases; insol. in alcohol, ether, diluted sulfuric acid; m.w. 81.37; sp.gr. 5.6; surf. area 4.5 m²/g; m.p. 1975 C; pH 6
Toxicology: May irritate eyes; no skin irritation with short exposure; toxic by absorp. through peritoneum; inh. of fumes may cause fume fever
Precaution: Incompat. with chlorinated rubber, flax oil, magnesium, and strong bases and acids
Hazardous Decomp. Prods.: When heated can produce toxic fumes
HMIS: Health 0, Flammability 0, Reactivity 0
Storage: Store covered in cool, dry, well-ventilated area

Zinc Oxide Grade AZO 66USP [U.S. Zinc http://www2.uszinc.com]
Chem. Descrip.: Zinc oxide
CAS 1314-13-2; EINECS/ELINCS 215-222-5
Uses: Pigment, filler in pharmaceuticals, ointments
Features: Rec. where purity and uniformity are required
Regulatory: USP, FDA certified
Properties: Bright wh. free-flowing granular powd.; 0.17-0.27 µ mean particle size; ≥ 99.9% through 325 mesh; apparent dens. 25-45 lb/ft³;
Trade Name Reference

surf. area 4.0-6.0 m²/g; vapor pressure 12 mm Hg; m.p. 1975 C; ≤ 0.2% moisture; ZnO (≥ 99.7%), Pb (≤ 0.002%), Cd (≤ 0.0015%), Fe (≤ 0.001%), As (≤ 0.0003%)

Toxicology: Acute respiratory irritant
Precaution: Incomp. with heated magnesium and chlorinated rubber > 215 C

Hazardous Ingredients: Zinc oxide

HMIS: Health 1, Flammability 0, Reactivity 0
Zinc Oxide NDM [Symrise USA http://www.symrise.com]

Chem. Descrip.: Zinc oxide, dimethicone
Uses: UV absorber for dermatologicals
Features: Transparent on the skin's surface and shows no unacceptable whitening effect
Regulatory: FDA approved
Properties: Wh. to ylsh. powd. (20 C), pract. odorless; dispersible in oil; sp.gr. ≈ 4.9 g/cm³; bulk dens. 200-400 kg/m³ (20 C); m.p. ≈ 1,970 C
Toxicology: TSCA listed
Storage: 1 yr. min. shelf life when stored in a cool, dark and dry place

Zinc Stearate 695 [MPSI http://www.mp-solutionsinc.com]

Chem. Descrip.: Zinc stearate USP
CAS 557-05-1; EINECS/ELINCS 209-151-9
Uses: Lubricant, mold release agent for pharmaceuticals
Properties: 99% max. through 325 mesh; bulk dens. 0.20 g/ml; m.p. 120 C; 0.4% max. moisture; 12.5-14.0% oxide
Toxicology: LD50 (oral, rat) >2,000 mg/kg, (dermal, rat) >2,000 mg/kg
Environmental: Biodegrad. (28 days) 93%
Precaution: Wear protective glasses and solvent-proof gloves; avoid contact with strong oxidizers and acids, halogens
Hazardous Decomp. Prods.: COx, ZnO
HMIS: Health 0, Flammability 1, Reactivity 0
Storage: Store in a clean, dry, well-ventilated area @ ambient temp. away from ignition sources

Zinc Stearate 916-G [MPSI http://www.mp-solutionsinc.com]

Chem. Descrip.: Zinc stearate
CAS 557-05-1; EINECS/ELINCS 209-151-9
Uses: Binder, lubricant, and mold release agent for pharmaceutical tablets
Regulatory: USP, kosher
Properties: Solid wh. odorless powd.; 99.5% max. through 200 mesh; bulk dens. 28.1-40.6 lb/ft³; m.p. 244-251 F; pH 7-9; acid no. 195-210; 12.5-14.0% oxide
Toxicology: LD50 (oral, rat) >2,000 mg/kg, (dermal, rat) >2,000 mg/kg
Environmental: Biodegrad. (28 days) 93%
Precaution: Wear protective glasses and solvent-proof gloves; avoid contact with strong oxidizers and acids, halogens
Hazardous Decomp. Prods.: COx, ZnO
HMIS: Health 0, Flammability 1, Reactivity 0
Storage: Store in a clean, dry, well-ventilated area @ ambient temp. away from ignition sources

Zinc Stearate 921-G [MPSI http://www.mp-solutionsinc.com]

Chem. Descrip.: Zinc stearate
CAS 557-05-1; EINECS/ELINCS 209-151-9
Uses: Binder, lubricant, and mold release agent for pharmaceutical tablets
Regulatory: USP, kosher
Properties: Solid wh. odorless powd.; 99.5% max. through 200 mesh; bulk dens. 18.7 lb/ft³; m.p. 244-251 F; pH 7-9; acid no. 195-210; 1.0% max. moisture; 12.5-14.0% oxide
Toxicology: LD50 (oral, rat) >2,000 mg/kg, (dermal, rat) >2,000 mg/kg
Environmental: Biodegrad. (28 days) 93%
Precaution: Wear protective glasses and solvent-proof gloves; avoid contact with strong oxidizers and acids, halogens
Hazardous Decomp. Prods.: COx, ZnO
HMIS: Health 0, Flammability 1, Reactivity 0
Storage: Store in a clean, dry, well-ventilated area @ ambient temp. away from ignition sources
Trade Name Reference

area @ ambient temp. away from ignition sources

Zinc Stearate 925 [MPSI https://www.mp-solutionsinc.com]
Chem. Descrip.: Zinc stearate USP
CAS 557-05-1; EINECS/ELINCS 209-151-9
Uses: Lubricant for pharmaceuticals
Features: Vegetable grade; eliminates BSE concern
Properties: 99% max. through 200 mesh; bulk dens. 0.12 g/ml; m.p. 118-122 C; 0.4% max. moisture; 13.8% oxide

Zinc Stearate D USP [Chemtura http://www.chemtura.com]
Chem. Descrip.: Zinc stearate
CAS 557-05-1; EINECS/ELINCS 209-151-9
Uses: Anticaking agent, colorant, visc. builder, lubricant, mold release agent, water repellent, w/o emulsifier for pharmaceuticals
Properties: Wh. powd.; 99.9% through 325 mesh; sol. in hot turpentine, benzene, toluene, xylene, CCl4, veg. and min. oils, waxes; sp.gr. 1.09; soften. pt. 120 C

Zoco 112 USP [ZOCHEM http://www.zochem.com]
Chem. Descrip.: French process zinc oxide (99.7%), USP
CAS 1314-13-2; EINECS/ELINCS 215-222-5
Uses: Colorant, protectant in pharmaceutical salves, creams, lotions, and ointments; activator, reinforcing agent, hiding pigment for medical and pharmaceutical rubber
Features: High purity
Properties: Wh. fine powd.; odorless; 99.995% through 325 mesh; sp.gr. 5.6; apparent dens. 18 lb/ft³; bulk dens. 50 lb/ft³; surf. area 4.75 m²/g
Toxicology: Nontoxic

Zohar GLST [Zohar Detergent Factory http://www.zohardalia.com]
Chem. Descrip.: Glyceryl stearate
CAS 123-94-4
Uses: Emulsifier, thickener, superfatting agent for pharmaceuticals
Properties: Wh. flakes; m.p. 55-60 C; acid no. 5 max.; sapon. no. 165-175; nonionic; 100% conc.
Storage: Store under cover

Chem. Descrip.: Glyceryl stearate SE
CAS 11099-07-3
Uses: Emulsifier, coemulsifier, thickener, opacifier, and superfatting agent for pharmaceuticals
Features: Self-emulsifying
Properties: Wh. flakes; m.p. 55-60 C; acid no. 5; sapon. no. 155-170; anionic/nonionic; 100% conc.
Storage: Store under cover

Zoharpon LAS [Zohar Detergent Factory http://www.zohardalia.com]
Chem. Descrip.: Sodium lauryl sulfate USP/BP
CAS 151-21-3; EINECS/ELINCS 205-788-1
Uses: Raw material, foaming agent for toothpaste, pharmaceuticals
Features: Mild to skin
Regulatory: USP and BP approved
Properties: Liq. to paste; pH 7-8.5 (10%); anionic; 30% conc.
Storage: Store under cover

Chem. Descrip.: Sodium lauryl sulfate USP/BP
CAS 151-21-3; EINECS/ELINCS 205-788-1
Uses: Surfactant, raw material for toothpaste, pharmaceuticals
Properties: Powd.; anionic; 92% conc.
Storage: Store under cover

Zoharpon SLS [Zohar Detergent Factory http://www.zohardalia.com]
Chem. Descrip.: Sodium lauryl sulfate USP/BP
CAS 151-21-3; EINECS/ELINCS 205-788-1
Uses: Surfactant, foaming agent, raw material for toothpaste, dentifrices, pharmaceuticals
Features: Mild to skin
Properties: Free-flowing nondusty compact gran.; bulk dens. 600-800 g/l; pH 6-9 (1%); anionic; 95% conc.
Storage: Store under cover
Part II: Chemical Component Cross-Reference
AA. See Adipic acid
Abies balsamea; Abies balsamea balsam; Abies balsamea oleoresin. See Balsam Canada (Abies balsamea)
Absinthe oil; Absinthium oil. See Wormwood (Artemisia absinthium) oil
Absolute alcohol; Absolute ethanol. See Alcohol
ACAC. See Acetylacetone

Acacia
CAS 9000-01-5; EINECS/ELINCS 232-519-5
FEMA 2001; INS414; E414
Synonyms: Acacia farnesiana; Acacia gum; Acacia senegal; Acacia syrup; Arabic gum; Australian gum; Gum Arabic; Gum hashab; Gum ovaline; Gum senegal; Indian gum; Kordofan gum; Senegal gum; Sudan gum
Classification: Water-sol. gum
Definition: Dried gummy exudate from stems and branches of Acacia farnesiana or A. senegal
Properties: Ylsh.-wh. angular fragments, odorless; sol. in water; insol. in alcohol; m.w. 240,000
Toxicology: LD50 (oral, rat) 18 g/kg; very low toxicity by ing.; inh. or ing. may produce hives, eczema, angioedema, asthma; allergic responses; people prone to allergies should avoid acacia; severe eye irritant; experimental reproductive effects; mutation data; TSCA listed
Precaution: Combustible
Hazardous Decomp. Prods.: Heated to decomp., emits acrid smoke
Uses: Emulsifier, solubilizer, flavor, suspending agent, stabilizer, thickener for pharmaceuticals, orals; lubricant; emollient; adhesive, binder, coating, excipient for tablets; film-former for coated pills; protective colloid; mfg. of spray-dried flavors; gellant in medicated cough drops; encapsulation for liposol. vitamins; suspending agent in syrups; demulcent in cough drops and syrups; treatment of diarrhea, dysentery, catarrh
Regulatory: FDA 21CFR §169.179, 169.182, 172.230, 172.510, 184.1330, GRAS; FEMA GRAS; Japan approved; Europe listed; UK approved; ADI not specified (JECFA);
USP/NF, EP, BP compliance

**Botanicals**

Acacia farnesiana. See Cassie (Acacia farnesiana) flowers; Acacia farnesiana flowers. See Cassie (Acacia farnesiana) flowers

Acacia gum; Acacia senegal; Acacia syrup. See Acacia

Aceite de Algodon. See Cottonseed (Gossypium) oil

Aceite de ricino. See Castor (Ricinus communis) oil

Acesulfame K. See Acesulfame potassium

Acesulfame potassium

CAS 55589-62-3; EINECS/ELINCS 259-715-3

**Synonyms:** Acesulfame K; 6-Methyl-1,2,3-oxathiazine-4 [3H]-one 2,2 dioxide, potassium salt; Potassium acesulfame; Potassium 6-methyl-1,2,3-oxathiazine-4(3H)-1,2,2-dioxide; Sunnette

**Definition:** Potassium salt of 6-methyl-1,2,3-oxathiazine-4(3H)-one-2,2-dioxide

**Empirical:** C4H4NO4S • K

**Properties:** Wh. cryst. solid, odorless, sweet taste, very sl. bitter aftertaste; very sol. in water, DMF, DMSO; sol. in alcohol, glycerin-water; m.w. 201.24; about 200 times sweeter than sucrose; m.p. 250 C
Acetaldehyde diethyl acetal; 1,1-Diethoxyacetal; 1,1-Diethoxyethane; Diethyl acetal; Ethylidene diethyl ether

**Properties:** Colorless volatile liq.; agreeable green woody solvent odor; fruity green flavor; very sol. in ethanol, diethyl ether; sol. in heptane, methycyclohexane, ethyl acetate, acetone, chloroform, propyl alcohol, butyl alcohol, IPA; sl. sol. in water; m.w. 118.18; dens. 0.831; vapor pressure 10 mm Hg (8 C); m.p. -100 C; b.p. 107-112 C; flash pt. (CC) 36 C

**Toxicology:** LD50 (oral, rat) 4.57 g/kg, (IP, rat) 900 mg/kg; moderately toxic by ingestion and IP route; skin and eye irritant; narcotic; TSCA listed

**Precaution:** Highly flamm.; dangerous fire hazard exposed to heat or flames; tends to polymerize on standing; can react vigorously with oxidizers; forms heat-sensitive explosive peroxides on contact with air; readily decomposed by dil. acids

**Hazardous Decomp. Prods.:** CO, CO2; heated to decomp., emits acrid smoke and fumes

**NFPA:** Health 2, Flammability 3, Reactivity 0

**Storage:** Keep away from ignition sources; light-sensitive, heat-sensitive, moisture-sensitive

**Uses:** Synthetic flavor for pharmaceuticals

**Regulatory:** FDA §172.515; FEMA GRAS; Canada DSL

---

**Acetaldehyde phenethyl propyl acetal**

**CAS:** 75-07-0; EINECS/ELINCS 200-836-8

**UN 1089 (DOT); FEMA 2003**
### Chemical Component Cross-Reference

**Synonyms:** Acetic aldehyde; Ethanal; Ethyl aldehyde  
**Classification:** Aldehyde  
**Empirical:** $\text{C}_2\text{H}_4\text{O}$  
**Formula:** $\text{CH}_3\text{CHO}$  

**Properties:** Colorless fuming liq. or gas; pungent fruity odor; misc. in water, alcohol, ether, oxygenated and aromatic solvs.; m.w. 44.06; dens. 0.788 (16/4 C); m.p. -123.5 C; b.p. 20.8 C; flash pt. (CC) -38 C; ref. index 1.3316 (20 C)  

**Toxicology:** ACGIH TLV/TWA 100 ppm; STEL 150 ppm; LD50 (oral, rat) 1930 mg/kg, (subcut., rat) 640 mg/kg, (skin, rabbit) 3540 mg/kg; poison by intratracheal/IV routes; human systemic irritant by inh.; narcotic; lachrymator; irritating to eyes, respiratory system; confirmed carcinogen; human mutagenic data; experimental tumorigen, teratogen; skin and severe eye irritant; TSCA listed  

**Precaution:** Flamm. liq. (DOT); can react violently with acid anhydrides, alcohols, ketones, phenols, NH$_3$, halogens, etc.; reaction with oxygen may lead to detonation; common air contaminant  

**Hazardous Decomp. Prods.:** Heated to decomp., emits acrid smoke and fumes  

**NFPA:** Health 3, Flammability 4, Reactivity 2  

**Storage:** Air-sensitive; store below 4 C  

**Uses:** Synthetic flavor in pharmaceuticals  

**Regulatory:** FDA 21 CFR §177.2410, 182.60, 27 CFR §21.93, GRAS; FEMA GRAS; HAP; mfg. of pharmaceuticals

Acetaldehyde benzyl β-methoxyethyl acetal. See Benzyl methoxyethyl acetal  

Acetaldehyde diethyl acetal. See Acetaldehyde, ((3,7-dimethyl-6-octenyl) oxy)-. See Citronelloxyacetaldehyde  

Acetaldehyde, methylethyl-. See 2-Methylbutyraldehyde  

Acetaldehyde phenethyl propyl acetal  
CAS 7493-57-4; EINECS/ELINCS 231-327-9  

FEMA 2004  

**Synonyms:** Acetal R; Acetaldehyde phenyl ethyl propyl acetal; Benzene, (2-(1-propoxyethoxy) ethyl); Pepital; 1-Phenethoxy-1-propoxyethane; [2-(1-Propoxyethoxy) ethyl] benzene; Propyl phenethyl acetal  

**Definition:** From acetaldehyde with a mixture of propyl and β-phenyl ethyl alcohols  

**Empirical:** $\text{C}_{13}\text{H}_{20}\text{O}_2$  

**Properties:** Colorless to pale yel. stable liquid; strong odor of green leaves; m.w. 208.30; dens. 0.951; flash pt. 95 C  

**Toxicology:** LD50 (oral, rat) > 5 g/kg, (skin, rabbit) > 5 g/kg; low toxicity by ing. and skin contact; primary eye irritant; TSCA listed  

**Hazardous Decomp. Prods.:** Heated to decomp., emits acrid smoke and irritating vapors  

**Uses:** Synthetic flavor for pharmaceuticals
Acetaldehyde phenyl ethyl propyl acetal. See Acetaldehyde phenethyl propyl acetal

Acetamide
CAS 60-35-5; EINECS/ELINCS 200-473-5
Synonyms: Acetic acid amide; Acetic acid amine; Acetimidic acid; Ethanamide; Ethanolamide; Methanecarboxamide
Classification: Nonaromatic amide
Empirical: C₂H₅NO
Formula: CH₃CONH₂
Properties: Wh. cryst.; odorless when pure, but frequently has mousy odor; sol. in water, alcohol, chloroform, glycerol, hot benzene; m.w. 59.07; dens. 1.159; vapor pressure negligible; m.p. 82 C; b.p. 221 C; ref. index 1.4274; neutral reaction
Toxicology: LD₅₀ (oral, rat) 7 g/kg, (IP, rat) 10,300 mg/kg, (subcut., rat) 10 g/kg; eye/skin/respiratory tract irritant; may cause sleep disturbances, muscle weakness, dyspnea, spastic paralysis, lacrimation, change in heart rate; cancer suspect agent; tumorigen; reproductive effector; mutagen; target organ: liver; TSCA listed
Precaution: Incompat. with strong oxidizers, metals, halogenated materials; avoid ignition sources, excess heat, elec. sparks
Hazardous Decomp. Prods.: CO, CO₂, NOₓ
Storage: Hygroscopic, deliq.; store under nitrogen in cool, dry, well-ventilated area away from incompat. substances
Uses: Vehicle in pharmaceuticals; antidote; drug intermediate in mfg. of ampicillin, cephaclor, etc.
Regulatory: HAP; Canada DSL

†=pharmaceutical grade
Mallinckrodt Baker† http://www.mallbaker.com; McIntyre http://www.mcintyregroup.com
VWR Int’l.† http://www.vwrsp.com

Acetamide, 2-chloro-. See Chloroacetamide

Acetamide MEA
CAS 142-26-7; EINECS/ELINCS 205-530-8
Synonyms: 2-Acetamidoethanol; N-Acetyl ethanolamine; N-Ethanolacetamide; Hydroxyethyl acetamide; β-Hydroxyethylacetamide; N-(2-Hydroxyethyl) acetamide; N-β-Hydroxyethylacetamide
Classification: Aliphatic amide
Empirical: C₄H₉NO₂
Formula: CH₃CONHCH₂CH₂OH
Properties: Brn. visc. liq.; misc. with water; m.w. 103.14; dens. 1.12 (20/4 C); f.p. 15.8 C; b.p. 195-196 C; flash pt. (OC) 355 F; dec. on heating; nonionic
Toxicology: LD₅₀ (oral, rat) 26,950 mg/kg; mildly toxic by ing.; skin and severe eye irritant; TSCA listed
Precaution: Combustible exposed to heat or flame; can react vigorously with oxidizers
Hazardous Decomp. Prods.: Heated to decomp., emits toxic fumes of NOₓ
Uses: Solubilizer, humectant, conditioner, coupling agent, pigment dispersant in topical pharmaceuticals
Regulatory: FDA 21CFR §175.105; Canada DSL

Trade Names: Schercomid AME-70; Schercomid AME-100
Trade Names Containing: Lipomectant AL
3-Acetamido-5-(acetamidomethyl)-2,4,6-triodobenzoic acid. See Iodamide

#### Definitions and Classification

**Empirical:**

- **2-Acetamidoethanol:** $\text{C}_2\text{H}_10\text{O}_2$
- **Formula:** $\text{CH}_3\text{COCH}_3$
- **Properties:** Colorless to ylsh.-wh. cryst.; pleasant floral odor; bitter, unpleasant taste; sol. in fixed oils, propylene glycol, most org. solvs.; misc. with glycerin; sl. sol. in water; m.w. 150.18; dens. 1.08 kg/l (41 C); m.p. 38 C; b.p. 265 C
- **Toxicology:** LD50 (oral, rat) 1720 mg/kg, (skin, rabbit) > 5 g/kg; mod. toxic by ing.; human systemic effects by inh. (pulse rate and blood pressure changes); primary skin irritant; TSCA listed
- **Precaution:** Flamm.
- **Flash point:** 43 C; autoignition temp. 463 C; vapor pressure 11.4 mm Hg (20 C)
- **Incompatibility:** incompat. with many chems. and explosive or violent reactions
- **Health effects:** corrosive; strong irritant to eyes, skin, and tissue; caustic; can cause burns, lachrymation; human systemic effects by inh.; experimental reproductive effects; mutation data possible; incompatible with many chems.; a common air pollutant

**Quality Prods.:**

- **Acetate C-1**
- **Acetate C-7**
- **Acetate C-8**
- **Acetate C-9**
- **Acetate C-10**
- **Acetate C-11**
- **Acetate C-12**

**Regulatory:**

- **FDA:** 21CFR §172.515; FEMA 2005; INS260; E260
- **UN:** 2789 (DOT); UN 2790 (DOT); FEMA 2006; INS260; E260
- **TSCA listed:**
- **EINECS/ELINCS:**
- **ACGIH:** TLV/TWA 10 ppm, STEL 15 ppm
- **LD50:** (oral, rat) 3310 mg/kg, (skin, rabbit) 1060 mg/kg; mod. toxic by ingestion, inhalation; corrosive; strong irritant to eyes, skin, and tissue; caustic; can cause burns, lachrymation; human systemic effects by inh.; experimental reproductive effects; mutation data reported; TSCA listed

**Environmental:**

- **VOC:**
- **BOD5:** 0.65
- **COD:** 1.09
- **ThOD:** 1.07

**Precaution:** Flamm.; moderate fire and explosion hazard exposed to heat or flame; can react vigorously with oxidizers; explosive or violent reactions possible; incompatible with many chems.; a common air pollutant

**Hazardous Decomp. Prods.:** Heated to heats, emits acrid smoke and irritating fumes
Acetic acid, aluminum salt. See Aluminum

†=pharmaceutical grade

Acetic acid amide; Acetic acid amine.  See Acetamide
Acetic acid, amino-s-butyl-.  See L-Isoleucine
Acetic acid ammonium salt.  See Ammonium acetate

Acetic acid cyclohexyl ester.  See Cyclohexyl acetate
Acetic acid, cyclohexylethyl ester.  See Cyclohexylethyl acetate
Acetic acid, diethylphosphono-, ethyl ester.  See Triethyl phosphonoacetate
Acetic acid, dimethyl-.  See Isobutyric acid
Acetic acid dimethylamide.  See Dimethyl acetamide
Acetic acid 3,7-dimethyl-octa-2,6-dienyl ester.  See Neryl acetate
Acetic acid-3,7-dimethyl-6-octen-1-yl ester.  See Citronellyl acetate
Acetic acid, dodecyl ester.  See Lauryl acetate
Acetic acid, esters with lanolin alcohols.  See Acetylated lanolin alcohol
Acetic acid esters of mono- and diglycerides; Acetic acid esters of mono- and diglycerides of fatty acids.  See Acetylated mono- and diglycerides of fatty acids
Acetic acid, ethenyl ester, homopolymer.  See Polyvinyl acetate
Acetic acid, ethenyl ester, polymer with ethene.  See Ethylene/VA copolymer
Acetic acid ethenyl ester, polymer with ethenol.  See Polyvinyl alcohol (partially hydrolyzed)
Acetic acid ethenyl ester, polymer with 1-ethenyl-2-pyrrolidinone.  See PVP/VA copolymer
Acetic acid 2-ethylbutyl ester.  See 2-Ethylbutyl acetate
Acetic acid, (ethylene dinitrilo) tetra-, calcium disodium salt.  See Calcium disodium

EDTA
Acetic acid, (ethylenedinitrilo) tetra-, sodium salt.  See Sodium ferric EDTA
Acetic acid, (ethylenedinitrilo) tetra-, tetrasodium salt.  See Tetrasodium EDTA
Acetic acid, (ethylenedinitrilo) tetra-, trisodium salt.  See Trisodium EDTA
Acetic acid, ethyl ester.  See Ethyl acetate
Acetic acid geraniol ester.  See Geranyl acetate
Acetic acid, glutaric
CAS 64-19-7; EINECS/ELINCS 200-580-7
UN 2789; UN 2790; FEMA 2006; INS260; E260
Synonyms:  Concentrated acetic acid; Ethanoic acid; Ethanolic acid; Glacial acetic acid; Vinegar acid
Classification:  Aliphatic organic acid
Definition:  Pure compd. (99.8% min.) as distinguished from the usual aq. sol'n's.
Empirical:  C₂H₄O₂
Formula:  CH₃COOH
Properties:  Clear colorless liq., pungent char. odor, acid taste when dil. with water; misc. with water, alcohol, acetone, glycerol, ether; insol. in chloroform; m.w. 60.05; dens. 1.049 (20/4 C); m.p. 16.2 C; b.p. 118 C; flash pt. 40 C; ref. index 1.3720
Toxicology:  TLV/TWA 10 ppm; human poison by unspecified routes; mod. toxic by various routes; corrosive; severe eye and skin irritant; can produce lung obstruction; TSCA listed
Precaution:  DOT: Corrosive material
NFPA:  Health 3, Flammability 2, Reactivity 0
Uses:  Acidifier, buffer, solvent in pharmaceuticals, injectables, ophthalmics, orals,otics
Regulatory:  USP/NF, BP, EP compliance; Canada DSL

- Acetic acid propyl ester; Acetic acid n-propyl ester. See Propyl acetate
- Acetic acid, retinyl ester. See Retinyl acetate
- Acetic acid sodium salt anhydrous. See Sodium acetate anhydrous
- Acetic acid sodium salt trihydrate. See Sodium acetate trihydrate
- Acetic acid, strontium salt. See Strontium acetate
- Acetic acid, sulfo-, 1-dodecyl ester, sodium salt; Acetic acid, sulfo-, dodecyl ester, Sodium salt. See Sodium lauryl sulfoacetate
- Acetic acid, tetraester with 2,2-bis (hydroxymethyl)-1,3-propanediol. See Penterythrityl tetraacetate
- Acetic acid, o-tolyl ester. See o-Cresyl acetate
- Acetic acid, 3,5,5-trimethylhexyl ester. See 3,5,5-Trimethylhexyl acetate
- Acetic acid, vinyl ester, polymer; Acetic acid vinyl ester polymers. See Polyvinyl acetate
- Acetic acid, zinc salt. See Zinc acetate
- Acetic aldehyde. See Acetaldehyde
- Acetic anhydride
  - CAS 108-24-7; EINECS/ELINCS 203-564-8
  - UN 1715 (DOT)
  - Synonyms: Acetanhydride; Acetic acid, anhydride; Acetic oxide; Acetyl anhydride; Acetyl ether; Acetyl oxide; Ethanoic anhydride
  - Classification: Carboxylic acid anhydride
  - Empirical: C₄H₆O₃
  - Formula: (CH₃CO)₂O
  - Properties: Colorless liq., strong acetic odor; sol.
Chemical Component Cross-Reference

in chloroform, ether; sol. in ethanol forming ethyl acetate; misc. in benzene, acetic acid; sl. sol. in water; dec. in hot water, hot alcohol; m.w. 102.09; dens. 1.08 (15/4 C); m.p. -73 C; b.p. 138-140 C; flash pt. 49 C; ref. index 1.3904 (20 C)

Toxicology: ACGIH TLV/CL 5 ppm; LD50 (oral, rat) 1.78 g/kg, (skin, rabbit) 4000 mg/kg; corrosive; produces irritation and necrosis of tissues in liq. or vapor state; can cause severe lung damage, which could be fatal; mod. toxic by inh., ing., skin contact; skin and severe eye irritant; lachrymator; TSCA listed

Precaution: DOT: Corrosive material; flamm.; fire/explosion hazard exposed to heat or flame; explosive and violent reactions possible; can react vigorously with oxidizers; incompat. with aniline, chlorosulfonic acid, ethylenediamine, HF, water, H2SO4, etc.

Hazardous Decomp. Prods.: CO, CO2, ketone, ethene; heated to decomp., emits toxic fumes

NFPA: Health 3, Flammability 2, Reactivity 1

Uses: Dehydrating agent, acetylating agent, acidifier for pharmaceuticals, orals, prod. of aspirin and acetaminophen

Regulatory: FDA 21CFR §172.892, esterifier for food starch, in combination with adipic anhydride (0.12% max. adipic anhydride, 5% max. acetic anhydride); BP compliance; Canada DSL

Acetoacetic acid, butyl ester. See Butyl acetoacetate
Acetoacetic acid ethyl ester. See Ethylacetoacetate
Acetoacetic acid isobutyl ester. See Isobutyl acetoacetate
Acetoacetic acid methyl ester. See Methyl acetoacetate
Acetoacetic ester. See Ethylacetoacetate
Acetoacetone. See Acetylacetone
Acetocumenel. See p-Isopropylacetophenone
Acetodiphosphonic acid. See Etidronic acid
Acetoglycerides. See Acetylated mono- and diglycerides of fatty acids
Acetoin. See Acetyl methyl carbinol
β-Acetonaphthalene; Acetonaphthone. See 2'-Acetonaphthone
2'-Acetonaphthone
CAS 93-08-3; EINECS/ELINCS 202-216-2
FEMA 2723
Synonyms: β-Acetonaphthalene; Acetonaphthone; 2-Acetonaphthone; β-Acetinaphthalene; Methyl naphthy ketone; Methyl 2-naphthyl ketone; Methyl β-naphthyl ketone; β-Methyl naphthyl ketone; 1-(2-Naphthalenyl) ethanone; 2-Naphthyl methyl ketone; β-Naphthyl methyl ketone; Orange crystals
Classification: aliphatic ketone
Empirical: C12H16O
Properties: Wh. or nearly wh. cryst. solid, orange blossom odor, strawberry-like flavor; sol. in most common org. solvs., fixed oils; sl. sol. in propylene glycol; insol. in water, glycerin; m.w. 170.21; m.p. 53 C; b.p. 301-303 C; flash pt. 168 C
Toxicology: LD50 (oral, mouse) 599 mg/kg; mod. toxic by ing.; human skin irritant; TSCA listed
Precaution: DOT: Flamm. liq.
Hazardous Decomp. Prods.: Heated to decomp., emits acrid smoke and fumes
Uses: Synthetic flavor for pharmaceuticals
Regulatory: FDA 21 CFR §172.515; FEMA GRAS; Japan approved as flavoring; Canada DSL
Manufact./Distrib.: ABCR UK http://www.abcr.de

2-Acetonaphthone; β-Acetonaphthone. See 2'-Acetonaphthone

Acetone
CAS 67-64-1; EINECS/ELINCS 200-662-2
UN 1090 (DOT); UN 1091 (DOT); FEMA 3326
Synonyms: Acetone oils; Dimethyl formaldehyde; Dimethyletal; Dimethyleketone; DMP; Ketone, dimethyl; Ketone propane; β-Ketopropane; Methyl ketone; Propanone; 2-Propanone; Pyroacetic acid; Pyroacetic ether
Classification: Aliphatic ketone
Empirical: C₃H₆O
Formula: CH₃COCH₃
Properties: Colorless volatile transparent liq., sweetish odor, pungent sweetish taste; sol. in water, alcohol, chloroform, dimethylformamide, ether, most volatile oils; m.w. 58.09; sp.gr. 0.792 (20/20 C); vapor pressure 400 mm Hg (39.5 C); m.p. -94.3 C; b.p. 56.2 C; flash pt. (CC) -18 C
Toxicology: ACGIH TLV/TWA 750 ppm; STEL 1000 ppm; LD50 (oral, mouse) 3000 mg/kg; narcotic in high conc.; moderately toxic by ingestion and inhalation; lg. doses may cause narcosis; extreme concs. may cause collapse, coma, death; inh. irritates lungs; ing. may cause throat, esophagus, and stomach irritation; peeling and splitting of nails, skin rashes; eye irritant; common air contaminant; TSCA listed
Environmental: BOD5 0.85; COD 1.12-2.07; ThOD 2.21
Precaution: DOT: flamm. liq.; dangerous fire risk; explosive limit in air 2.6-12.8%; reacts violently with oxidizing agents, chlorinated solv./alkali mixts.; reacts vigorously with sulfur dichloride, potassium t-butoxide, hexachlorodimethane
Hazardous Decomp. Prods.: Complete combustion yields CO₂, water vapor;

**Acetone oils.** See Acetone
Acetylbenezene; Benzoyl methide; Hypnone; Ketone methyl phenyl; Methyl phenyl ketone; 1-Phenylethanone; 1-Phenyl-1-ethanone; Phenyl methyl ketone

Classification: Aromatic ketone

Empirical: C₈H₈O

Formula: C₆H₅COCH₃

Properties: Colorless to lt. yel. liq. or plates; sweet pungent odor and taste; sol. in alcohol, chloroform, ether, fatty oils, glycerol; sl. sol. in water; m.w. 120.15; dens. 1.030 (20/20 C); b.p. 201.7 C; flash pt. 82.2 C; ref. index 1.5339 (20 C)

Toxicology: LD50 (oral, rat) 815 mg/kg; poison by IP, subcut. routes; moderate toxicity by ing.; skin and severe eye irritant; narcotic in high concs.; a hypnotic; may cause allergic reaction; mutagenic data; TSCA listed

Precaution: DOT: Combustible liq.; flamm. exposed to heat, flames, or oxidizers

Hazardous Decomp. Prods.: Heated to decom., emits acrid smoke and fumes

NFPA: Health 1, Flammability 2, Reactivity 0

Uses: Synthetic flavor for pharmaceuticals; intermediate for pharmaceuticals

Features: Sweet flavor

Regulatory: FDA 21CFR §172.515; FEMA GRAS; HAP; Japan approved for flavoring; Canada DSL

†=pharmaceutical grade

Acetophenone, 2'-hydroxy- See o-Hydroxyacetoephonene

Acetophenone, 4'-isopropyl- See p-Isopropylacetophenone

Acetose. See Cellulose acetate

p-Acetotoluene. See 4'-Methyl acetophenone

Acetoxyethane. See Ethyl acetate

1-Acetoxyhexadecane. See Cetyl acetate

Acetoxy. See Benzoyl peroxide

9-Acetoxy-1-para-menthene. See p-Menth-1-en-9-yl acetate

(Acetoxymercuri) benzenes. See Phenylmercuric acetate

1-Acetoxy-2-methoxy-4-allylbenzene. See Eugenyl acetate

4-Acetoxy-3-methoxybenzaldehyde. See Vanillin acetate

3-(4-Acetoxy-3-methoxyphenyl) propene. See Eugenyl acetate

4-Acetoxy-3-methoxy-1-propenylbenzene. See Acetisoegenol

Acetoxyethylbenzene. See Benzyl acetate

Acetoxyphenylmercury. See Phenylmercuric acetate

1-Acetoxypropane. See Propyl acetate

2-Acetoxypropane. See Isopropyl acetate

4-[3-Acetoxypropyl] amino]-2,2-dimethyl-4-oxobutane-1,3-diyl diacetate. See Panthenyl triacetate
### Chemical Component Cross-Reference

| 4-Acetoxytoluene | See p-Cresyl acetate |
| α-Acetoxytoluene | See Benzyl acetate |
| o-Acetoxytoluene | See o-Cresyl acetate |
| p-Acetoxytoluene | See p-Cresyl acetate |
| Acetyl butyrate | See Butan-3-one-2-yl butyrate |

#### Acetylacetone

| CAS 123-54-6; EINECS/ELINCS 204-634-0 UN 2310 (DOT) |
| Synonyms: ACAC; Acetoacetone; Acetylacetonate; Acetyl 2-propanone; Diacetylmethane; Pentan-2,4-dione; 2,4-Pentanedione; Pentanedione-2,4 |
| Empirical: C₅H₈O₂ |
| Formula: CH₃COCH₂COCH₃ |
| Properties: Colorless to sl. yel. liq., pleasant odor; misc. with alcohol, benzene, ether, chloroform, acetone, glc. acetic acid, propylene glycol; insol. in water; m.w. 100.13; dens. 0.952-0.962; m.p. -23.2°C; b.p. 139°C (746 mm); flash pt. (TOC) 40.5°C |
| Toxicology: LD₅₀ (oral, rat) 1000 mg/kg, (IP, mouse) 750 mg/kg; mod. toxic by ingestion, IP, inh. routes; skin and severe eye irritant; narcotic in high doses; TSCA listed |
| Precaution: Flamm. exposed to heat or flame; incompat. with oxidizing materials |
| NFPA: Health 2, Flammability 2, Reactivity 0 |
| Storage: Light-sensitive; refrigerate |
| Uses: Synthetic flavor in pharmaceuticals; synthesis of vitamin B₆ and K; intermediate for drugs |
| Regulatory: Canada DSL |

#### Acetylated glycerin monostearate

| See Acetylated glycerin monostearate |

#### Acetylated glycerin monostearate

| Synonyms: Glycerides, cottonseed-oil, monohydrogenated, acetates |
| Definition: Acetyl ester of the monoglyceride derived from hydrogenated cottonseed oil |
| Properties: Nonionic |
| Uses: Plasticizer in pharmaceutical film coatings; taste masking agent; sustained release solid dosage forms |
| Regulatory: FDA 21CFR §172.828, 175.230 |

#### Acetylated hydrogenated cottonseed glyceride

| See Acetylated hydrogenated cottonseed glyceride |

#### Acetylated hydrogenated cottonseed glyceride

| Synonyms: Glycerides, cottonseed-oil, monohydrogenated, acetates |
| Definition: Acetyl ester of hydrogenated linolein |
| Uses: Emollient |
| Trade Names: Monestriol DM |

#### Acetylated hydrogenated linolein

| CAS 91053-41-7; EINECS/ELINCS 293-306-0 |
| Synonyms: Lanolin, hydrogenated, acetylated |
| Definition: Acetyl ester of hydrogenated linolein |
| Uses: Emollient |
| Trade Names: Lipocerina |

#### Acetylated hydrogenated soybean oil glycereides

| See Acetylated hydrogenated soybean oil glycereides |

#### Acetylated hydrogenated vegetable glycereides

| Properties: Nonionic |
| Uses: Plasticizer in pharmaceutical film coatings; taste masking agent; sustained-release solid dosage forms |

#### Acetylated lanolin

| CAS 61788-48-5; EINECS/ELINCS 262-979-2 |
| Synonyms: Lanolin, acetate, Lanolin, acetates |
| Definition: Acetyl ester of lanolin |
Chemical Component Cross-Reference

Properties: Yel. soft solid; sapon. no. 95-120; nonionic
Toxicology: TSCA listed
Uses: Superfatting agent, emollient, emulsifier, conditioner, lubricant for pharmaceuticals; film-former for creams and lotions, water-resistant films
Features: Lipid; repels water better than regular lanolin
Regulatory: Canada DSL
Trade Names: Acyan; Modulan®; Ritacetyl®

Acetylated lanolin alcohol
CAS 61788-49-6; EINECS/ELINCS 262-980-8
Synonyms: Acetic acid, esters with lanolin alcohols; Lanolin, alcohols, acetates
Definition: Acetyl ester of lanolin alcohol
Properties: Pale yel. liq.; HLB 1.0; sapon. no. 180-200; nonionic
Toxicology: TSCA listed
Uses: Surfactant, emulsifier, emollient, spreading agent for pharmaceutical creams and lotions
Regulatory: Canada DSL
Trade Names Containing: Crodalan AWS; Crodalan LA; Fancol™ ALA; Ritawax AEO; Solulan® 98

Acetylated mono- and diglycerides. See Acetylated mono- and diglycerides of fatty acids

Acetylated mono- and diglycerides of fatty acids
CAS 68990-55-6
INS472a; E472a
Synonyms: Acetic acid esters of mono- and diglycerides; Acetic acid esters of mono- and diglycerides of fatty acids; Acetoglycerides; Acetylated mono- and diglycerides; Mono- and diglycerides, acetic acid esters
Definition: Partial or complete esters of glycerin with a mixture of acetic acid and edible fat-forming fatty acids
Properties: Wh. to pale yel. oily to waxy liq.; bland taste; sol. in alcohol, acetone; disp. to sol. in edible oils and fats; insol. in water; HLB 2-3; nonionic; HLB 2.0-3.0
Hazardous Decomp. Prods.: Heated to decomp., emits acrid smoke and fumes
Uses: Emulsifier, coating agent, stabilizer, lubricant, solvent, texturizer for pharmaceuticals; plasticizer for fats
Regulatory: FDA 21CFR §172.828; Europe listed; UK approved

Acetylated POE (10) lanolin alcohol. See Laneth-10 acetate

Acetylated sucrose distearate
cas 121684-92-2
Synonyms: α-D-Glucopyranoside, β-D-fructofuranosyl, acetate dioctadecanoate; Sucrose distearate, acetates
Definition: Acetyl ester of sucrose distearate
Properties: Nonionic
Uses: Emollient, emulsifier, wetting agent, dispersant for pharmaceuticals

Acetylbenezene. See Acetophenone

Acetylbenzoyl. See 1-Phenyl-1,2-propanedione

Acetyl butyl citrate. See Acetyl tributyl citrate

Acetyl butyryl
CAS 3848-24-6; EINECS/ELINCS 223-350-8
UN 1993; FEMA 2558
Synonyms: Acetyl-n-butyryl; 2,3-Hexanedione; Hexane-2,3-dione; Methyl propyl diketone
Classification: Nonaromatic ketone
Empirical: C₆H₁₀O₂
Formula: CH₃CH₂CH₂COCOCH₃
Properties: Yel. oily liq., powerful creamy sweet buttery odor, butter cheese taste; sol. in alcohol, propylene glycol; sl. sol. in water; m.w. 114.15; dens. 0.934 (20/4 C); b.p. 128 C; flash pt. 83 F; ref. index 1.412 (20 C)
Toxicology: LD50 (oral, rat) > 5 g/kg, (skin, rabbit) > 5 g/kg; primary irritant; irritating to eyes, skin, respiratory system; TSCA listed
Precaution: Flammable
Uses: Synthetic flavor for pharmaceuticals
Features: Sweet flavor
Regulatory: FDA 21CFR §172.515; FEMA GRAS; Canada DSL

†=pharmaceutical grade
Acetyl-n-butyl. See Acetyl butyryl
Acetyl-L-carnitine chloride; acetylcarcinine L-form hydrochloride. See Acetyl-L-carnitine hydrochloride

Acetyl-L-carnitine hydrochloride
CAS 5080-50-2
Synonyms: Acetyl-L-carnitine chloride; acetylcarcinine L-form hydrochloride; o-Acetyl-L-carnitine hydrochloride; 1-Propanaminium, 2-(acetyloxy)-3-carboxy-N,N,N-trimethyl-chloride, (R)- (9CI)
Classification: Carnitine derivative
Empirical: C9H17NO4HCl
Properties: Colorless liq., pungent odor; misc. with benzene, chloroform, ether; m.w. 239.70; m.p. 187 C
Uses: Antioxidant in dietary supplements
Trade Names: L-Carnipure® ALC

Acetyl chloride
CAS 75-36-5; EINECS/ELINCS 200-865-6
Synonyms: Acetic acid chloride; Acetic chloride; Ethanol chloride
Empirical: C2H3ClO
Formula: CH3COCI
Properties: Colorless liq., pungent odor; misc. with benzene, chloroform, ether; m.w. 78.50; dens. 1.104; m.p. -112 C; b.p. 52 C; flash pt. 40 F; ref. index 1.398; fumes in moist air; hydrolyzed by water and alcohol
Toxicology: LD50 (oral, rat) 910 mg/kg; poison by inh.; mod. toxic by ing.; corrosive; human systemic irritant by inh.; extremely irritating to eyes; causes severe burns; TSCA listed
Precaution: DOT: Flammable; fire and explosion hazard; dec. violently by water or alcohol; may dec. during prep.
Hazardous Decomp. Prods.: Heated to decomp., emits highly toxic fumes of phosgene and Cl\(^{-}\)
NFPA: Health 3, Flammability 3, Reactivity 2
Storage: Dangerous when wet

Acetylcitrlic acid, tributyl ester. See Acetyl tributyl citrate
Acetyl o-cresol. See o-Cresyl acetate
Acetyl p-cresol. See p-Cresyl acetate
p-Acetyl cumol. See p-Isopropylacetophenone

Acetylcysteine
CAS 616-91-1; EINECS/ELINCS 210-498-3
Synonyms: L-2-Acetamido-3-mecaptopropionic acid; Acetin; N-Acetyl-L-cysteine; L-Cysteine, N-acetyl-
Classification: Organic compd.
Empirical: C5H9NO3S
Properties: M.w. 163.20; m.p. 104-110 C; pH 2.0-2.8 (1%)
Storage: Keep under argon; sensitive to air
3-Acetyl-2,5-dimethyl furan. See 3-Acetyl-2,5-dimethyl furan

Acetylene dichloride. See cis-trans-1,2-Dichloroethylene (mixed isomers)

Acetylene trichloride. See Trichloroethylene

N-Acetyl ethanolamine. See Acetamide MEA

Acetyl ether. See Acetic anhydride

Acetyl eugenol. See Eugenyl acetate

Acetyl formaldehyde. See Pyruvaldehyde

Acetylformic acid. See Pyruvic acid

Acetylformyl. See Pyrvaldehyde

Acetyl guaiacol. See Guaiacyl acetate

Acetyl hydroperoxide. See Peracetic acid

3-Acetyl-5-hydroxy-3-oxo-4-hexenoic acid Δ-lactone. See Dehydroacetic acid

Acetyl isobutyryl. See 4-Methyl-2,3-pentanedione

Acetyl isoeugenol. See Acetisoegenol

1,4-Acetyl-isopropyl benzol. See p-Isopropylacetophenone

Acetyl methionine (INCI); N-Acetylmetionine. See N-Acetyl-L-methionine

N-Acetyl-L-methionine

CAS 65-82-7; 1115-47-5; EINECS/ELINCS 200-617-7; 214-224-3

Synonyms: N-Acetyl-L-2-amino-4-(methylthio)butyric acid; Acetyl methionine (INCI); N-Acetylmetionine; Methionamine; L-Methionine, N-acetyl-

Classification: Substituted amino acid

Definition: Deriv. of the amino acid methionine; free or anhyd. form, or as sodium or potassium salts

Empirical: C7H13NO2S

Formula: CH3CH2CH2CH(NHCOCH3)COOH

Properties: Colorless or lustrous wh. cryst. or powd., odorless; sol. in water, alcohol, alkali, dil. min. acids; insol. in ether; m.w. 191.24; m.p. 104-107 C
Chemical Component Cross-Reference

**Acetyl methyl carbinol**
CAS 513-86-0; EINECS/ELINCS 208-174-1
UN 2621 (DOT); FEMA 2008

**Synonyms:** Acetoin; 2,3-Butanalone; 2-Butan-3-one; Dimethylketol; 3-Hydroxy-2-butane; 1-Hydroxymethyl methyl ketone; γ-Hydroxy-β-oxobutane

**Classification:** Aliphatic organic compd.

**Empirical:** C₄H₈O₂

**Formula:** CH₃CO(OH)CH₃

**Properties:** Colorless to sl. yel. liq. or cryst. solid; buttery odor; sol. in ethanol; sl. sol. in ether; misc. with water, alcohol, propylene glycol; insol. in veg. oil; m.w. 88.12; dens. 1.016; m.p. 15 C; b.p. 147-148 C; flash pt. 106 F; ref. index 1.417

**Toxicology:** LD₅₀ (oral, rat) > 5 g/kg; TDLo (oral, rat, 42 days) 12,600 mg/kg; LDLo (subcut., rat) 14 g/kg; mildly toxic by subcut. route; moderate skin irritant; experimental reproductive effects; TSCA listed

**Precaution:** DOT: flamm. liq.; wear protective gloves, splash-proof eye goggles; incompat. with strong oxidizers, alkalies

**Hazardous Decomp. Prods.:** Heated to decomp., emits COₓ, acrid smoke and fumes

**Storage:** Keep in original, tightly closed container; keep away from heat, sparks, open flame

**Uses:** Flavor, aroma carrier in pharmaceuticals; prep. of flavors and essences

**Features:** Buttery creamy flavor

**Regulatory:** FDA §182.60, GRAS; FEMA GRAS; Australia AICS; Canada DSL; Japan MITI

3-Acetyl-6-methyl-1,2-pyran-2,4(3H)-dione; 3-Acetyl-6-methyl-2,4-pyridandione; 3-Acetyl-6-methylpyrandonde-2,4; 3-Acetyl-6-methyl-2H-pyran-2,4(3H)-dione. See Dehydroacetic acid
2-Acetylpyrazine
CAS 22047-25-2; EINECS/ELINCS 244-753-5
UN 1325; FEMA 3126
Synonyms: Acetyl pyrazine; Methyl pyrazinyl ketone; Methyl 2-pyrazinyl ketone; 1-Pyrazinylethanone; Pyrazin-1-ylethan-1-one; 1-Pyrazin-2-yl-ethanone
Classification: pyrazine
Empirical: C9H7N2O
Properties: Colorless to pale yel. cryst. or liq.; nutty odor; sol. in acids, alcohol, ether, water @ 230 C; m.w. 122.13; dens. 1.100-1.115 (20 C); m.p. 76-80 C; ref. index 1.530-1.540
Toxicology: Irritating to eyes, skin, respiratory system; TSCA listed
Environmental: Keep run-off water out of sewers, water sources
Precaution: Flamm. solid; wear protective gloves, splash-proof eye goggles; incompat. with strong oxidizers, acids, alkalies
Hazardous Decomp. Prods.: Heated to decomp., emits toxic fumes of NOx
HMIS: Health 1, Flammability 2, Reactivity 0
Storage: Keep in original, tightly closed container; keep away from heat, sparks, open flame
Uses: Flavor for pharmaceuticals
Regulatory: FEMA GRAS; Canada DSL

Acetyl tri-n-butyl citrate. See Acetyl tributyl citrate

Acetyl triethyl citrate
CAS 77-89-4; EINECS/ELINCS 201-066-5
Synonyms: 2-(Acetyloxy)-1,2,3-
propanetricarboxylic acid, triethyl ester; ATEC; Tricarballylic acid-β-acetoxytributyl ester; Triethyl acetylcitrate; Triethyl o-acetylcitrate

Classification: Aliphatic ester
Empirical: C_{14}H_{22}O_{8}
Formula: CH_{3}COOC_{3}H_{4}(COOC_{2}H_{5})_{3}
Properties: Colorless liq.; odorless; sl. sol. in water; m.w. 318.36; dens. 1.135 (25 C); m.p. -50 C; flash pt. 187 C
Toxicology: Moderate toxicity by IP route; mild toxicity by ing.; TSCA listed
Precaution: Combustible
Uses: Solvent for pharmaceuticals; plasticizer for aq. coatings, sustained-release drugs
Regulatory: USP/NF compliance; FDA 21CFR §175.105, 175.300, 175.320, 178.3910, 181.22, 181.27; Canada DSL
Trade Names: ATEC, NF; Citrofol® All; Uniplex 82

Acetyl triethylhexyl citrate. See Acetyl trioctyl citrate

Acetyl trioctyl citrate

CAS 144-15-0; EINECS/ELINCS 205-617-0
Synonyms: 2-(Acetoxy)-1,2,3-propanetricarboxylic acid, tris (2-ethylhexyl) ester; Acetyl triethylhexyl citrate; 1,2,3-Propanetricarboxylic acid, 2-(acetoxy)-, tris (2-ethylhexyl) ester; Tris (2-ethylhexyl) 2-(acetoxyloxy) propane-1,2,3-tricarboxylate
Classification: Aliphatic ester
Empirical: C_{32}H_{58}O_{8}
Uses: Emollient
Trade Names: Citrofol® AHII

Acetytyrosine
CAS 537-55-3; EINECS/ELINCS 208-671-3
Synonyms: (S)-2-Acetamido-3-(4-hydroxyphenyl) propanoic acid; N-Acetyl-L-tyrosine

Classification: Organic compd.
Empirical: C_{11}H_{13}NO_{4}
Properties: Wh. cryst. powd.; pract. odorless; m.w. 223.23; very sol. in water; m.p. 145-150 C
Toxicology: May be harmful by inh., ing., or skin absorp.; may cause eye/skin/mucous membrane/upper respiratory tract irritation; TSCA listed
Precaution: Incompat. with strong oxidizing agents; avoid raising dust
Hazardous Decomp. Prods.: Toxic fumes of CO, CO_{2}, NO_{x}; emits toxic fumes under fire conditions
Storage: Store in cool, dry place; keep tightly closed
Uses: Biological additive in nutritional sol'ns.; absorption enhancer; ingred. in tanning accelerator complexes
Regulatory: BP, EP compliance
Trade Names Containing: Unipertan P-24; Unipertan P-242; Unipertan P-2002

N-Acetyl-L-tyrosine. See Acetytyrosine
Acetyl valeryl. See 2,3-Heptanedione
Acetyl vanillin. See Vanillin acetate
Achillea; Achillea millefolium. See Yarrow (Achillea millefolium)
Achillea millefolium. See Yarrow (Achillea millefolium)
Achilleic acid. See Aconitic acid

**See also** FD&C Blue No. 1

**Acid blue 74**

**CAS:** 860-22-0; EINECS/ELINCS: 212-728-8

**Synonyms:** Blue X; Ceruleinum; CI 73015; 2-(1,3-Dihydro-3-oxo-5-sulfo-2H-indol-2-ylidene)-2,3-dihydro-3-oxo-1H-indole-5-sulfonic acid disodium salt; Disodium indigo-5,5-disulfonate; FD&C Blue No. 2; Food blue 1; Indigo carmine; Indigo

**†=pharmaceutical grade**

- Carmine disodium salt: 5,5´-Indigotin disulfonic acid; Indigotin disodium salt; Sodium 5,5´-indigotidisulfonate; Soluble indigo

**Classification:** Indigoid color

**Definition:** Disodium salt of 5,5´-indigotin disulfonic acid

**Empirical:** C_{16}H_{8}N_{2}O_{8}S_{2} • 2Na

**Properties:** Blue-brn. to red-brn. powd.; sol. in water, conc. sulfuric acid; sl. sol. in alcohol; m.w. 466.36

**Toxicology:** LD_{50} (oral, rat) 2 g/kg, (IV, rat) 93 mg/kg; poison by IV route; mod. toxic by ing., subcut. routes; may cause brain tumors, asthma, rashes, hyperactivity; IV use may produce severe headache, acute pulmonary edema with cardiac arrest, hypertension; questionable carcinogen; experimental neoplastigen; mutagenic data; TSCA listed

**Precaution:** Sensitive to oxidizing agents

**Hazardous Decomp. Prods.:** Heated to decomp., emits very toxic fumes of NO_{x}, Na_{2}O, and SO_{x}

**Uses:** Colorant in oral and topical drugs, buccals; biological stain

**Storage:** Light-sensitive

**Regulatory:** Europe listed; banned in Norway; FD&C Blue No. 2: FDA 21CFR §74.102, 74.1102, 81.1; FDA approved for orals, buccals; not permitted in food (EU)

Acid red 26
CAS 3761-53-3; EINECS/ELINCS 223-178-3
Synonyms: Acid red 26, disodium salt; CI 16150; D&C Red No. 5; 4-(1,4-Dimethylphenyl) azo)-3-hydroxy-2,7-naphthalenedisulfonic acid, disodium salt; Disodium (2,4-dimethylphenylazo)-2-hydroxynaphthalene-3,6-disulfonate; Food Red 5; 3-Hydroxy-4-(2,4-xyllylazo)-3,7-naphthalenedisulfonic acid, disodium salt; 2,7-Naphthalenedisulfonic acid, 3-hydroxy-4-(2,4-xyllylazo)-, disodium salt; Ponceau MX; Ponceau red; Xylidine ponceau; Xylidine red; 1-Xyllylazo-2-naphthol-3,6-disulfonic acid, disodium salt; 1-(2,4-Xyllylazo)-2-naphthol-3,6-disulfonic acid, disodium salt
Classification: Azobenzene
Empirical: C₁₈H₁₄N₂Na₂O₇S₂
Properties: Dk. red cryst.; sol. (mg/ml): 1-10 mg water (20 C), < 1 mg in DMSO, 95% ethanol, methanol, acetone, toluene (20 C); very sl. sol. in ether; insol. in oil, org. solvs.; m.w. 480.44; m.p. > 300 C
Toxicology: LD₅₀ (oral, rat) 23,160 mg/kg, (IP, rat) > 1 g/kg, (IV, mouse) 1530 mg/kg; harmful by inh., skin contact; danger of cumulative effects; may cause somnolence, muscle weakness, ataxia, convulsions, antipsychotic behavior, changes in liver/kidney/spleen wt.; suspected carcinogen; tumorigen; mutagen; TSCA listed
Precaution: Probably combustible; incompat. with strong oxidizing agents
Hazardous Decomp. Prods.: Heated to decomp., emits toxic fumes of CO, CO₂, NOₓ, SOₓ
Storage: Store @ ambient temps.
Uses: Colorant in pharmaceuticals
Regulatory: Canada DSL

Acid red 27 (INCI). See Amaranth
Acid red 33. See CI 17200; D&C Red No. 33
Acid red 51
CAS 16423-68-0; EINECS/ELINCS 240-474-8
INS127; E127
Synonyms: 9-(o-Carboxyphenyl)-6-hydroxy-2,4,5,7-tetraiodo-3-isoxanthone; CI 45430;
Chemical Component Cross-Reference

3,6'-Dihydroxy-2',4',5',7'-tetrabromodiphenyl [2H]-fluorene-3-one disodium salt; Erythrocin; Erythrosin B; Erythrosine; FD&C Red No. 3; Fluorescein, 2',4',5',7'-tetrabromo-, disodium salt; Food red 14; Iodoesoin; Solvent red 140; Spiro [isobenzofuran-1(3H),9'-[9H] xanthene]-3-one, 3',6'-dihydroxy-2',4',5',7'-tetrabromo-, disodium salt; 2',4',5',7'-Tetraiodofluorescein disodium salt; Tetraiodofluorescein sodium salt

Classification: Xanthene color; azobenzene

Definition: Disodium salt of 2',4',5',7'-tetrabromofluorescein

Empirical: C_{20}H_{6}I_{4}Na_{2}O_{5}

Formula: C_{20}H_{6}I_{4}Na_{2}O_{5} • 2Na

Properties: Bluish pink to brown powd. or gran.; sol. (oz/gal): 30 oz glycerin, 28 oz propylene glycol, 12 oz dist. water, 2 oz 95% ethanol; m.w. 879.84

Toxicology: LD_{50} (oral, rat) 1840 mg/kg, (IP, rat) 300 mg/kg, (IV, rat) 200 mg/kg; by IV route; mod. toxic by ing.; harmful if swallowed; may cause convulsions, GI changes, changes in thyroid wt. and blood (leukocyte count), thyroid tumors, chromosomal damage, asthma, rashes, hyperactivity; tumorigen; neoplastigen; reproductive effector; mutagen; human mutagenic data; TSCA listed

Precaution: Photosensitizer

Hazardous Decomp. Prods.: Heated to decomp., emits very toxic fumes of Na_{2}O and I\(^{-}\)

Storage: Hygroscopic

Uses: Colorant in ingested pharmaceuticals; biological stain; as plasma stain for nerve cells (with methylene blue); as a phosphorescent triple probe for studying diffusion of membrane proteins

Regulatory: FD&C Red No. 3: FDA 21CFR §74.303, 74.1303; cosmetic use terminated

Hazardous Decomp. Prods.: Heated to decomp., emits acrid smoke and fumes
Uses: Natural flavor in pharmaceuticals
Regulatory: FDA 21CFR §184.1007, 184.2010, 582.60, GRAS; FEMA GRAS; Canada DSL
Manuf./Distrib.: Aesar
http://www.alfa.com; Biosynth Int'l.
http://www.biosynth.com; CTC Orgs.; Degussa AG/Health & Nutrition; SAFC
Specialties http://www.saftcspecialties.com
Acorus calamus; Acorus calamus oil. See Calamus oil
Acoraldehyde. See Acrolein
Acrolein
CAS 107-02-8; EINECS/ELINCS 203-453-4
UN 1092 (DOT); UN 2607
Synonyms: Acraldehyde; Acrylaldehyde; Acrylic aldehyde; Allyl aldehyde; Ethylene aldehyde; Prop-2-enal; 2-Propenal; Propylene aldehyde
Classification: Acrylic aldehyde
Empirical: C3H4O
Formula: CH2:CHCHO
Properties: Colorless to yel. liq.; pungent, burnt sweet odor; sol. in water, ethanol, diethyl ether, petrol. ether, acetone, oil; m.w. 56.06; dens. 0.8389 (20 C); m.p. -88 C; b.p. 52.5 C
Health 4, Flammability 3, Reactivity 3
Regulatory: FDA 21CFR §172.892, 176.300; SARA reportable; HAP; Canada DSL
Manuf./Distrib.: Atofina UK http://www1.arkemagroup.com/uk/gb/f_elf_2.cfm
Dow http://www.dow.com; Fisher Scientific UK http://www.fisher.co.uk; Fluka
http://www.sigma-aldrich.com

Acrylaldehyde. See Acrolein
Acrylamide homopolymer; Acrylamide, polymers. See Polyacrylamide
Acrylamide/sodium acrylate copolymer
CAS 25085-02-3
Synonyms: Acrylamide/sodium acrylate resin; Poly (acrylamide-sodium acrylate); 2-Propenamide, polymer with 2-propenoic acid, sodium salt; 2-Propenoic acid, sodium salt, polymer with 2-propenamide
Definition: Polymer of acrylamide and sodium acrylate monomers
Formula: (C3H5NO • C3H4O2 • Na)x
Toxicology: TSCA listed
Uses: Thickener, film-former for pharmaceuticals
Regulatory: FDA 21CFR §172.710, 173.5,
Acrylamide/sodium acrylate resin. See Acrylamide/sodium acrylate copolymer
2-Acrylamido-2-methylpropane sulfonic acid sodium salt. See Sodium 2-acrylamido-2-methylpropanesulfonate

Acrylates/C10-30 alkyl acrylate crosspolymer
Definition: C10-30 alkyl acrylates and monomer(s) of acrylic or methacrylic acid or esters crosslinked with an allyl ether of sucrose or pentaerythritol
Properties: Anionic
Uses: Emulsifier, rheology control agent, film-former, stabilizer, moisturizer, thickener, gellant for topical pharmaceuticals, low-irritancy creams and lotions, topical gels, skin care prods.; emulsion stabilizer
Trade Names: Carbopol® 1342 NF; Carbopol® 1382
Trade Names Containing: Aloe Vera Gel Thickened

Acrylates copolymer
CAS 25133-97-5; 28572-98-7
Synonyms: Acrylic/acrylate copolymer; Acrylic copolymer; 2-Propenoic acid, 2-methyl-; polymer with ethyl 2-propenoate and methyl 2-methyl-2-propenoate
Definition: Polymers of two or more monomers consisting of acrylic acid, methacrylic acid, or their simple esters
Properties: Anionic
Uses: Film-former
Regulatory: FDA 21CFR §175.105, 175.210, 175.300, 175.320, 176.170, 176.180, 177.1010, 178.3790; Canada DSL

†=pharmaceutical grade
Thibaut & Walker; Tri-Iso http://www.triiso.com
Trade Names: Eastacryl 30D

Acrylates copolymer. See Methacrylic acid/ethyl acrylate copolymer

Acrylates/ vinyl isodecanoate crosspolymer
Definition: Copolymer of ester of vinyl isodecanoate and one or more monomers of acrylic acid, methacrylic acid, or their esters crosslinked with polyalkenyl polyether
Properties: Anionic
Uses: Film-former
Trade Names: Pionier® NP 37 S

Acrylic. See Acrylic resin

Acrylic acid/acylonitrogens copolymer
CAS 61788-40-7; 136505-00-5; 136505-01-6
Synonyms: 2-Propenenitrile, homopolymer, hydrolyzed, block, reaction prods. with N,N-dimethyl-1,3-propanediamine
Definition: Copolymer formed by the controlled hydrolysis of polyacrylonitrile
Uses: Emulsifier, thickener, gellant, film-former for pharmaceuticals

Acrylic acid, ethyl ester. See Ethyl acrylate
Acrylic acid homopolymer. See Polyacrylic acid

Acrylic acid, 2-methyl-. See Methacrylic acid
Acrylic acid methyl ester. See Methyl acrylate
Acrylic acid 6-methylheptyl ester. See Isooctyl acrylate

Acrylic acid, 2-methyl-, methyl ester. See Methyl methacrylate
Acrylic acid polymer; Acrylic acid, polymers. See Polyacrylic acid
Acrylic acid, polymer with sucrose-polyallyl ether. See Carbomer
Acrylic acid resin. See Polyacrylic acid
Acrylic/acrylate copolymer. See Acrylates copolymer
Chemical Component Cross-Reference

Acrylic aldehyde. See Acrolein
Acrylic copolymer. See Acrylates copolymer
Acrylic polymer; Acrylic polymer resins. See Polyacrylic acid

Acrylic resin
Synonyms: Acrylic; Acrylic fiber; Acrylic polymer; Acrylic sheet
Definition: Thermoplastic polymer or copolymer of acrylic acid, methacrylic acid, esters of these acids, or acrylonitrile
Properties: Varies from hard to brittle solids to fibrous elastomeric structures, to viscous liqs.; able to transmit light for sheet and rod forms
Toxicology: Dust may cause skin, eye, and respiratory tract irritation; TSCA listed
Precaution: Combustible
Uses: Excipient for pharmaceutical tablets, coatings
Regulatory: FDA 21CFR §177.1010
Manuf./Distrib.: Air Prods./Polymers

Trade Names: Eudragit® E 100; Eudragit® E PO; Eudragit® FS 30 D
Trade Names Containing: Eudragit® E 12.5
See also Polyacrylic acid

Acrylic sheet. See Acrylic resin

Acrylonitrile copolymer
Synonyms: Propenenitrile copolymer; Vinyl cyanide copolymer
Uses: Porous membrane for dialysis
Regulatory: FDA 21CFR §175.105

Actin hydrolysate. See Hydrolyzed actin
Activated alumina; Activated aluminum oxide. See Alumina
Activated attapulgite. See Attapulgite
Activated carbon. See Carbon, activated
Activated charcoal. See Charcoal, activated
Active amyl alcohol. See 2-Methyl-1-butanol
Active carbon. See Carbon, activated
Active primary amyl alcohol. See 2-Methyl-1-butanol
Active valeric acid. See 2-Methylbutyric acid
N-(Aclycolaminoformulmethyl) pyridinium chloride. See Lapyrium chloride
Adenosine, 5´-(tetrahydrogen triphosphate). See Adenosine triphosphate

Adenosine triphosphate
CAS 56-65-5; EINECS/ELINCS 200-283-2
Synonyms: Adenosine, 5´-(tetrahydrogen triphosphate); Adenosine-5´-triphosphate; Adenosine-5´-triphosphoric acid; Adenylpyrophosphoric acid; 9-β-d-Arabinoofuranosyladenine 5´-triphosphate; ATP; Triphosphoric acid adenosine ester
Classification: Organic compd.
Empirical: C₁₀H₁₆N₅O₁₃P₃
Properties: Solid; sol. in water; m.w. 507.22; m.p. 143-145 C (dec.)
Toxicology: LD₅₀ (IP, rat) 200 mg/kg; poison by IP route; human mutation data reported; TSCA listed
Hazardous Decomp. Prods.: Heated to decomp., emits toxic fumes of POₓ and NOₓ
Uses: Biochemical research; energy carrier in plants and animals; energy source within the cell for biological processes such as photosynthesis, muscle contraction, and the synthesis of proteins; neurotransmitter; ingred. in tanning accelerator complexes
Adenosine-5′-triphosphate; Adenosine-5′-triphosphoric acid; Adenylypyrophosphoric acid. See Adenosine triphosphate

Adips lanae. See Lanolin

Adips solidus. See Lanolin wax

Adips suillus. See Lard

Adermine hydrochloride. See Pyridoxine HCl

Adipic acid
CAS 124-04-9; EINECS/ELINCS 204-673-3
UN NA 9077 (DOT); FEMA 2011; INS355
Synonyms: AA; 1,4-Butanedicarboxylic acid; Butane-1,4-dicarboxylic acid; Dicarboxylic acid C6; Hexanedioic acid; 1,6-Hexanediolic acid
Classification: Organic dicarboxylic acid
Empirical: C8H10O4
Formula: HOOC(CH₂)₄COOH
Properties: Wh. monoclinic prisms, prct. odorless; very sol. in alcohol; sol. in acetone, oxygenated solvs.; sl. sol. in water; m.w. 146.16; dens. 1.360 (25/4 C); vapor pressure 1 mm Hg (159.5 C); m.p. 152 C; b.p. 337.5 C; flash pt. (CC) 385 F
Toxicology: LD50 (oral, mouse) 1900 mg/kg; ACGIH TLV/TWA 5 mg/m³; poison by IP route; mod. toxic by other routes; severe eye irritant; may cause occupational asthma; TSCA listed
Precaution: Combustible; can react with oxidizing material
Hazardous Decomp. Prods.: Heated to decomp., emits acrid smoke and fumes

†=pharmaceutical grade

NFPA: Flammability 1, Reactivity 0
Uses: Buffer, neutralizer for pharmaceutical slow-release and microencapsulation prods.

Regulatory: NF, BP, EP compliance; FDA 21CFR §131.111, 131.136, 131.144, 175.300, 175.320, 176.170, 176.180, 177.1200, 177.1390, 177.1500, 177.1630, 177.1680, 177.2420, 177.2600, 184.1009, 582.1009, GRAS; FEMA GRAS; Canada DSL; USDA 9CFR §318.7; Japan approved; Europe listed (ADI 0-5 mg/kg, free acid basis); UK approved

Albumen
CAS 9006-50-2; EINECS/ELINCS 232-936-2
Synonyms: Albumin; Dried egg white; Egg albumin

Definition: Dried whites of chicken eggs
Properties: Yel. amorphous lumps, scales, or powd.; swells in water, then dissolves gradually; decomp. in moist air; dens. 1.035; m.p. -0.42 C; coagulating temp. 61 C; ref. index 1.356; pH 7.6
Toxicology: May cause allergic reactions in people allergic to milk or eggs; TSCA listed
Uses: Emulsifier; binder, coagulant, film-former in pharmaceuticals; in tablet film for erythromycin; antidote to mercury poisoning; in pharmaceutical compounding to make various albumates; microencapsulation
Regulatory: FDA 21CFR §160.145

Trade Names: Sol-U-Tein EA

Albumin
CAS 70024-90-7; EINECS/ELINCS 274-272-6
Synonyms: Human albumin; Human serum
albumin

Classification: Plasma protein

Definition: Protein derived from human sources

Toxicology: May cause immune responses, anaphylactoid reactions

Precaution: Incompat. with strong oxidizing agents

Uses: Buffer in pharmaceuticals; used intravenously as plasma extenders; in microencapsulation, oral formulations; diluent for prep. of allergy extracts

Regulatory: FDA 21CFR §133.124, 166.110; BP compliance for albumin sol'n.

Manuf./Distrib.: AMRESCO†

ALCA. See Alcloxa

Alcalase. See Protease

(-)-Alcanfor. See L-Camphor

Alcloxa

CAS 1317-25-5; EINECS/ELINCS 215-262-3

Synonyms: ALCA; Aluminum, chloro [(2,5-dioxo-4-imidazolidinyl) ureato] tetrahydroxydi-; Aluminum chlorohydroxylallantoinate; Aluminum, chlorotetrahydroxy (2-hydroxy-5-oxo-2-imidazolin-4-yl) ureato) di-; Chlorhydroxyaluminum allantoinate; Chloro

†=pharmaceutical grade

[(2,5-dioxo-4-imidazolidinyl) ureato] tetrahydroxydialuminum;
Chlorohydroxyaluminum allantoinate;
Chlorotetrahydroxy ((2-hydroxy-5-oxo-2-imidazolin-4-yl) ureato) dialuminum;
Dialuminum tetrahydroxychloro allantoinate

Classification: Heterocyclic org. compd.

Empirical: C_{4}H_{9}Al_{2}ClIN_{4}O_{7}

Properties: M.w. 314.58

Toxicology: LD50 (oral, rat) > 8 g/kg, (subcut., mouse) > 8 g/kg; sl. toxic; primary irritant; eye irritant; TSCA listed

Hazardous Decomp. Prods.: Heated to decomp., emits toxic vapors of NOx and Cl–

Uses: Soothing and healing agent with mild bacteriostatic effect used in anti-acne, hemorrhoidal, and foot preps. for athlete's foot, onychomycosis, hyperhydrosis, dermatophytosis, epidermal macerations.; in treatment of diaper rash; in oral prods. for periodontal and gum diseases (like gingivitis, irritable and bleeding gums

Features: Nonsensitizing and nonirritating; stable in the pH 3-8 range and to 80 C process heating

Regulatory: Canada DSL

Manuf./Distrib.: Akema Fine Chems.† http://www.akema.it/contacts.htm

Alcohol

CAS 64-17-5; EINECS/ELINCS 200-578-6

UN 1170 (DOT); UN 1986 (DOT); UN 1987 (DOT); FEMA 2419

Synonyms: Absolute alcohol; Absolute ethanol; Distilled spirits; Ethanol; Ethanol, undenatured; Ethyl alcohol; Ethyl alcohol, undenatured; Ethyl hydrate; Ethyl hydroxide; EtOH; Grain alcohol; IMS; Industrial methylated spirit; Methylcarbinol; Spirits of wine

Definition: Undenatured ethyl alcohol

Empirical: C_{2}H_{6}O

Formula: CH_{3}CH_{2}OH

Properties: Colorless limpid, volatile liq., vinous odor, pungent taste; misc. with water, methanol, ether, chloriform, 95% acetone, oxygenated/chlorinated solvs.; m.w. 46.08; dens. 0.816 (15.5 C); vapor pressure 44.6 mm Hg (20 C); f.p. -117.3 C; b.p. 78.3 C; flash pt. (CC) 12.7 C; autoignition temp. 362 C; ref. index 1.365 (15 C); surf. tens. 21.99 dynes/cm

Toxicology: ACGIH TLV/TWA 1000 ppm; LD50 (oral, rat) 7060 mg/kg, (IP, rat) 3750 mg/kg;

sodium salt; Algin (polysaccharide);
Sodium alginate; Sodium polypeamnuronate

Classification: Hydrophilic polysaccharide

Definition: Purified carbohydrate prod. extracted
from brown seaweed; sodium salt of alginic
acid

Empirical: \((C_6H_7NaO_6)_n\)

Properties: Cream-colored powd., pract.
oodorless and tasteless; sol. in water forming a
gel; insol. in alcohol, ether, chloroform; m.w.
198.11; dens. 1.59 kg/l; dec. on heating above
150 C

Toxicology: LD50 (oral, rat) > 5 g/kg, (IV, rat)
1000 mg/kg, (IP, cat) 250 mg/kg; poison by
IV and IP routes; causes blood hemorrhage
in mice; TSCA listed

Hazardous Decomp. Prods.: Heated to
decom., emits toxic fumes of Na2O

HMIS: Health 1, Flammability 0, Reactivity 0

Uses: Suspending agent, gellant, thickener,
emulsifier, excipient, tablet binder,
stabilizer in pharmaceutical orals; film-
former for microencapsulation

Regulatory: FDA 21CFR §133.133, 133.134,
133.162, 133.178. 133.179, 150.141, 150.161,

**Toxicology:** LD\(_{50}\) (oral, rat) 339 mg/kg, (subcut., rat) 92 mg/kg, (skin, rabbit) 88 mg/kg; poison by ing., inh., skin contact, IV, subcut., and IP routes; lachrymator; allergen; eye irritant; may cause contact dermatitis; mutagen; suspected carcinogen; experimental teratogenic/reproductive effects; TSCA listed

**Precaution:** Volatile; combustible liq.; fire risk; highly reactive

**Hazardous Decomp. Prods.:** Heated to decom. or on contact with acid or acid fumes, emits highly toxic fumes of CN\(^-\), SO\(_x\), and NO\(_x\)

**Uses:** Synthetic flavor for pharmaceuticals; counter-irritant in external analgesic prods.; ointments

**Regulatory:** FDA 21CFR §172.515; FEMA GRAS; Japan approved as flavoring; Canada DSL

Allyl isovalerate
CAS 2835-39-4; EINECS/ELINCS 220-609-7
FEMA 2045

Synonyms: Allyl isovalerianate; Allyl 3-methylbutyrate; Isovaleric acid allyl ester; 3-Methylbutanoic acid, 2-propenyl ester; 3-Methylbutyric acid, allyl ester; 2-Propenyl isovalerate; 2-Propenyl 3-methylbutanoate

Empirical: C₈H₁₄O₂

Properties: Colorless to pale yel. liq., apple aroma; m.w. 142.20; b.p. 89-90 C; ref. index 1.4162

Toxicology: LD₅₀ (oral, rat) 230 mg/kg, (skin, rabbit) 560 mg/kg; poison by ing.; mod. toxic by skin contact; experimental carcinogen, tumorigen; skin irritant; TSCA listed

Precaution: Wear protective gloves, splash-proof eye goggles; incompat. with strong oxidizers, acids

Hazardous Decomp. Prods.: Heated to decomp. emits COₓ, acid smoke and fumes

Storage: Keep in original, tightly closed container; keep away from heat, sparks, open flame

Uses: Synthetic flavor for pharmaceuticals

Regulatory: FDA 21CFR §172.515; FEMA GRAS; Canada DSL

Allyl methacrylates crosspolymer
CAS 182212-41-5

Properties: Fine wh. powd.

Uses: Adsorbent microporous polymer, delivery system for pharmaceutical controlled-release applics.

4-Allyl-1-methoxybenzene. See Estragole
4-Allyl-2-methoxyphenol. See Eugenol
4-Allyl-2-methoxyphenyl acetate. See Eugenyl acetate
4-Allyl-2-methoxyphenyl benzoate. See Eugenyl benzoate
4-Allyl-2-methoxyphenyl formate. See Eugenyl formate
4-Allyl-2-methoxyphenyl tiglate. See Allyl tiglate
4-Allyl-3-methylbutyrate. See Allyl isovalerate
4-Allyl trans-2-methyl-2-butoanoate. See Allyl tiglate
4-Allyl nonanoate
CAS 7493-72-3; EINECS/ELINCS 231-334-7
FEMA 2036

Synonyms: Allyl pelargonate; 2-Propenyl tiglate
Chemical Component Cross-Reference

**nonanoate**
- **Empirical:** C\(_{12}\)H\(_{22}\)O\(_2\)
- **Formula:** C\(_3\)H\(_5\)OOC(CH\(_2\))\(_7\)CH\(_3\)
- **Properties:** Mobile liq., pineapple odor; m.w. 198.31; b.p. 151 C; ref. index 1.4302
- **Precaution:** Combustible
- **Uses:** Synthetic flavor for pharmaceuticals
- **Features:** Sweet, fruity flavor
- **Regulatory:** FDA 21CFR §172.515; FEMA GRAS; Canada DSL

**Allyl octanoate**
- **CAS:** 4230-97-1; EINECS/ELINCS 224-184-9
- **FEMA:** 2037
- **Synonyms:** Allyl caprylate; Allyl octylate; Octanoic acid allyl ester; Octanoic acid-2-propenyl ester
- **Empirical:** C\(_{11}\)H\(_{20}\)O\(_2\)
- **Properties:** Colorless liq., fruity odor; sol. in alcohol, fixed oils; sl. sol. in propylene glycol; insol. in glycerin, water; m.w. 184.31; dens. 0.8550; b.p. 87-88 C; flash pt. > 100 C; ref. index 1.5131 (25.5 C)
- **Toxicology:** LD\(_{50}\) (oral, rat) 475 mg/kg, (skin, rabbit) 820 mg/kg; mod. toxic by ingestion and skin contact; TSCA listed
- **Hazardous Decomp. Prods.:** Heated to decomps., emits acrid smoke and fumes
- **Uses:** Synthetic flavor for pharmaceuticals
- **Features:** Honey, pineapple-like flavor
- **Regulatory:** FDA 21CFR §172.515; FEMA GRAS; Canada DSL

**Allyl phenylacetate**
- **CAS:** 1797-74-6; EINECS/ELINCS 217-281-2
- **FEMA:** 2039
- **Synonyms:** Allyl α-toluate; Benzeneacetic acid 2-propenyl ester; 2-Propenyl benzenecacetate
- **Empirical:** C\(_{11}\)H\(_{12}\)O\(_3\)
- **Properties:** Colorless to lt. yel. liq., fruity banana honey odor; m.w. 176.22; b.p. 89-93 C; ref. index 1.5122
- **Toxicology:** LD\(_{50}\) (oral, rat) 650 mg/kg; mod. toxic by ing.; human skin irritant; TSCA listed
- **Hazardous Decomp. Prods.:** Heated to decomps., emits acrid smoke and irritating fumes
- **Uses:** Synthetic flavor for pharmaceuticals
- **Features:** Sweet, honey-like flavor
- **Regulatory:** FDA 21CFR §172.515; FEMA GRAS; Canada DSL
Chemical Component Cross-Reference

Regulatory: FDA 21CFR §172.515; FEMA GRAS; Canada DSL

Allyl-3-phenylacrylate. See Allyl cinnamate
Allyl propanoate. See Allyl propionate

Allyl propionate
CAS 2408-20-6; EINECS/ELINCS 219-307-8
FEMA 2040
Synonyms: Allyl propanoate; 2-Propenyl propanoate
Empirical: C6H10O2
Properties: Colorless liq.; apricot-apple odor; m.w. 114.15; sp.gr. 0.914; b.p. 122-123 C; ref. index 1.4105 (20 C), 1.4142 (14 C)
Uses: Synthetic flavor for pharmaceuticals
Features: Imitation apricot aroma
Regulatory: FDA 21CFR §172.515; FEMA GRAS; Canada DSL

Allyl sorbate
CAS 7493-75-6; 30895-79-5
FEMA 2041
Synonyms: Allyl 2,4-hexadienoate
Empirical: C9H12O2
Properties: M.w. 152.19
Uses: Synthetic flavor for pharmaceuticals
Regulatory: FDA 21CFR §172.515; FEMA GRAS; Canada DSL

Allyl sulfhydrate. See Allyl mercaptan

Allyl sulfdie
CAS 592-88-1; EINECS/ELINCS 209-775-1
FEMA 2042
Synonyms: Allyl monosulfide; Diallyl monosulfide; Diallyl sulfide;

†=pharmaceutical grade

Diallylthioether; ‘Oil garlic’; Thioallyl ether; 3,3’-Thiobis-1-propene
Empirical: C6H10S
Formula: (CH2:CHCH2)2S
Properties: Colorless liq.; garlic odor; misc. with alcohol, ether, chloroform, CCl4; insol. in water; m.w. 114.20; dens. 0.887 (20/4 C); m.p. -83 C; b.p. 138 C; flash pt. 23 C; ref. index 1.4877 (27 C)
Toxicology: LD50 (oral, rat) 2980 mg/kg, (skin, rabbit) > 5 g/kg; poison by IV route; mod. toxic by ing.; irritating to skin, eyes, mucous membranes; TSCA listed
Precaution: Flamm.; explosive reaction with N-bromosuccinimide
Hazardous Decomp. Prods.: Heated to decomp., emits toxic SOx, CO, CO2
Storage: Store at 40-70 F in tightly sealed original containers with minimum head space; avoid prolonged exposure to light, heat, air
Uses: Synthetic flavor for pharmaceuticals
Regulatory: FDA 21CFR §172.515; FEMA GRAS; Australia AICS; Canada DSL; Japan MITI

Alllyl thiocarbonimide. See Allyl isothiocyanate

Allylthiol. See Allyl mercaptan

Alllyl tiglate
CAS 7493-71-2; EINECS/ELINCS 231-333-1
FEMA 2043
Synonyms: Allyl trans-2,3-dimethylacrylate; Allyl trans-2-methyl-2-butenoate
Empirical: C8H12O2
Properties: Fruity odor; m.w. 140.18; dens. 0.926; flash pt. 140 F
Uses: Synthetic flavor for pharmaceuticals
Features: Berry, jam-like flavor
Regulatory: FDA 21CFR §172.515; FEMA
**Chemical Component Cross-Reference**

GRAS; Canada DSL

**Manuf./Distrib.:** SAFC Specialties

http://www.saftcspecialties.com

**All**yl α-toluate. See Allyl phenylacetate

**All**yl 10-undecenoate

CAS 7493-76-7

**FEMA** 2044

**Synonyms:** Allyl hendecenoate; Allyl undecylenate; Allyl-2-undecylenate; Allyl undecylenoate

**Empirical:** C14H24O2

**Properties:** Liq., pineapple odor; misc. with most org. solvs.; insol. in water; m.w. 224.34; b.p. 180 C; ref. index 1.4448

**Uses:** Synthetic flavor for pharmaceuticals

**Regulatory:** FDA 21CFR §172.515; FEMA GRAS; Canada DSL

**Manuf./Distrib.:** ABCR

http://www.abcr.de

Advanced Synthesis Tech.

Almond oil. See Sweet almond (Prunus amygdalus dulcis) oil

Almond oil, bitter. See Bitter almond (Prunus amygdalus amara) oil

Almond oil PEG-6 esters

CAS 124046-50-0

**Definition:** Mixt. from the transesterification of almond oil and PEG-6

**Uses:** Emollient in pharmaceuticals; amphiphilic agent improving drug delivery

**Trade Names:** Saboderm AMD

Almond oil, sweet. See Sweet almond (Prunus amygdalus dulcis) oil

A**l**nose. See 4-Hydroxy-2,5-dimethyl-3(2H) furanone

Aloe barbadensis

CAS 8001-97-6; EINECS/ELINCS 232-295-9

**Synonyms:** Aloe vera

**Definition:** Plant material derived from the leaves of the aloe, Aloe barbadensis

**Toxicology:** LD50 (oral, rat) > 5 g/kg, (oral, mouse) > 10 g/kg; mutagen

**Storage:** Store @ R.T. protected from oxidation

**Uses:** Emollient in topical pharmaceuticals

**Regulatory:** FDA 21CFR §172.510

**Manuf./Distrib.:** Alfa Chem

Aloe barbadensis leaf juice

Synonyms: Barbadensis leaf juice
Uses: Moisturizer, soothing agent
Regulatory: BP, EP compliance

Trade Names: Aloe Vera Gel Regular 1X; Aloe Vera Gel Regular 10X; Terra-Pure™ Non-Preserved Freeze Dried Aloe Vera Powder, 200X; Terra-Pure™ Non-Preserved Freeze Dried Aloe Vera Powder Reg., 200X
Trade Names Containing: SheAloe™; Terra-Spray™ Spray Dried Aloe Vera Powder 100X Regular; Terra-Spray™ Spray Dried Aloe Vera Powder 100X

Aloe extract
CAS 84837-08-1; 85507-69-3; EINECS/ELINCS 305-181-2
FEMA 2047
Synonyms: Aloe barbadensis extract; Barbados aloe extract; Curacao aloe extract
Definition: Extract of leaves of one or more species of Aloe
Properties: Bitter char. flavor
Uses: Natural flavor, thickener, stabilizer, emollient for pharmaceuticals and health
Regulatory: FDA 21CFR §172.510 (roots and flowers); FEMA GRAS; Canada DSL

See also Althea officinalis extract

Althea (Althea officinalis) root
CAS 977005-75-6
Synonyms: Hibiscus moscheutos; Marshmallow
Definition: Dried root of Althea officinalis
Toxicology: Nontoxic
Uses: Flavor in oral pharmaceuticals; emollient; boiled root used as demulcent in ointments to soothe mucous membranes; externally as a poultice
Regulatory: FDA 21CFR §172.510
Manuf./Distrib.: Frutarom http://www.frutarom.com

Althea extract; Althea officinalis. See Althea officinalis extract

Althea officinalis extract
CAS 97676-24-9
FEMA 2048
Synonyms: Althea extract; Althea officinalis; Marshmallow root extract
Definition: Extract of the roots of the marshmallow, Althea officinalis
Uses: Natural flavor for pharmaceuticals; emollient
Regulatory: FDA 21CFR §172.510 (roots and flowers); FEMA GRAS; Canada DSL
Chemical Component Cross-Reference
dodecahydrate

Alumina
CAS 1344-28-1; 1333-84-2 (hydrate);
EINECS/ELINCS 215-691-6
Synonyms: Activated alumina; Activated aluminum oxide; Alumina, activated;
Alumina, calcined; Alumina, tabular;
Aluminium oxide alumite; Aluminium oxides C; Aluminum oxide; Aluminum oxide (2:3);
Alumite; Alundum; Calcined alumina;
Tabular alumina
Classification: Inorganic compd.
Definition: Occurs in nature as the minerals bauxite, bayerite, boehmite, corundum,
diaspore, gibbsite
Empirical: Al2O3
Properties: Wh. cryst. powd., balls, or lumps,
odorless, tasteless; pract. insol. in water; very
sl. sol. in min. acids; m.w. 101.96; dens. 3.5-4;
vapor pressure 1 mm Hg (2158 C); bulking
value 0.032 gal/lb; m.p. 2050 C; b.p. 2977 C;
oil absorp. 13; hardness (Mohs) 8.8
Toxicology: TLV/TWA 10 mg/m3 (dust); toxic
by inhalation of dust; inh. may cause
Shaver's disease; may be irritating to
respiratory tract; eye irritant by mech.
abrasion; skin drying, peeling; experimental
tumorigen and neoplastigen by implant;
TSCA listed
Precaution: Noncombustible; incompat. with
hot chlorinated rubber
Hazardous Decomp. Prods.: Exothermic
reaction above 200 C with halocarbon
vapors produces toxic HCl and phosgene
Storage: Very hygroscopic
Uses: Colorant, dispersant in pharmaceutical
orals; abrasive; opacifier; visc. control
agent; dental cements
Regulatory: FDA 21CFR §73.1010, 177.1460;
exempt from certification, permanently listed;
Canada DSL

**CAS**: 7429-90-5; EINECS/ELINCS 231-072-3  
**UN**: 1309 (DOT); 1396 (DOT); NA 9260; INS 173; E173

**Synonyms**: Alumínium; Aluminium bronze; Aluminum dehydrated; Aluminum flake; Aluminum metal; Aluminum powder (INCI); CI 77000; Pigment metal 1

**Classification**: Metallic element

**Empirical**: Al

**Properties**: Silvery wh. cryst. solid; sol. in HCl, sulfuric acid; insol. in water, alcohol; a.w. 26.98; dens. 2.708; m.p. 660°C; b.p. 2450°C

**Toxicology**: ACGIH TLV/TWA 10 mg/m³ (dust), 2 mg/m³ (sol. salt), 5 mg/m³ (welding fumes); inh. of fine powds. can cause pulmonary fibrosis; overexposure may cause irritation to skin, eye, and respiratory tract; TSCA listed

**Precaution**: Flamm. in air; dust is explosive by heat, flame, or reaction with oxidizers; reactive; no stable isotopes; dangerous when wet

**HMIS**: Health 1, Flammability 0, Reactivity 3

**Storage**: Moisture-sensitive

**Uses**: Colorant for external pharmaceuticals, incl. those for eye area use

**Regulatory**: FDA 21CFR §175.105, 176.170, 178.3297; exempt from certification; permanently listed for drug use; Japan approved

### Aluminum acetate

**CAS**: 139-12-8; EINECS/ELINCS 205-354-1

**Synonyms**: Acetic acid, aluminum salt; Aluminum acetate, basic; Aluminum hydroxide acetate; Aluminum subacetate; Hydroxyaluminum di (acetate)

**Definition**: Aluminum salt of acetic acid

**Empirical**: C₂H₄O₂ • 1/3Al

**Formula**: (CH₃COO)₃Al

**Properties**: Wh. powd.; water-sol.; m.w. 69.02; m.p. 54°C

**Toxicology**: Harmful if swallowed, inhaled, or absorbed through skin; irritant; inh. of dust may cause irritation to upper respiratory tract; dust may irritate eyes

**Hazardous Decomp. Prods.**: CO, CO₂

**Storage**: Keep in tightly closed containers

**Uses**: Antiseptic; astringent; wet dressing for skin inflammations; antiperspirant

**Regulatory**: BP compliance; FDA 21CFR §175.105, 176.170; Canada DSL

**Manuf./Distrib.**: Alemark

**See also**: Aluminum diacetate; Aluminum acetate; Aluminum diacetate basic; Aluminum diacetate; Aluminum, (allantoinato) dihydroxy-; Aldioxo; Aluminum ammonium bis (sulfate); Aluminum
Aluminum chloride (INCI). See Aluminum chloride anhydrous

Aluminum chloride anhydrous
CAS 7446-70-0; EINECS/ELINCS 231-208-1
UN 1726 (DOT); UN 2581 (DOT)

Synonyms: Aluminum chloride (INCI);
Aluminum trichloride; Trichloroaluminum

Classification: Inorganic salt

Empirical: AlCl3

Properties: Wh. or ylsh. cryst. powd. or solid, hydrochloric acid type odor, sweet, very astringent taste; very sol. in water; freely sol. in alcohol; sol. in glycerin, ether, benzene, HCl; m.w. 133.34; dens. 2.44; m.p. 190 C (2.5 atm); b.p. 182.7 C (752 mm)

Toxicology: LD50 (oral, rat) 3450 mg/kg, (skin, rabbit) 72 g/kg; irritant; lethal to mammals when ingested in large doses; allergic reactions in susceptible persons; TSCA listed

Precaution: Corrosive

Hazardous Decomp. Prods.: HCl

NFPA: Health 3, Flammability 0, Reactivity 2

Storage: Hygroscopic, deliq.; moisture-sensitive

Uses: Mfg. of pharmaceuticals; antiseptic; antiperspirant

Regulatory: Canada DSL

Aluminum chloride basic. See Aluminum chlorohydrate

Aluminum chloride hexahydrate
CAS 7784-13-6; EINECS/ELINCS 231-208-1

Synonyms: Aluminum (III) chloride, hexahydrate; Aluminum chloride hydrated; Aluminum trichloride hexahydrate

Classification: Inorganic salt

Empirical: AlCl3H12O6

Formula: AlCl3 • 6H2O

Properties: Wh. to pale yel. moist cryst. or powd.; sol. in water; m.w. 241.43; dens. 2.398 g/ml; vapor pressure 1 mm Hg (100 C)

Toxicology: ACGIH TLV/TWA 2 mg/m3 (Al);
LD50 (oral, mouse) 1990 mg/kg, (IP, rat) 728 mg/kg; corrosive; causes burns; irritating to skin, eyes, mucous membranes, upper respiratory tract; may be harmful if swallowed, by skin absorp., inh.; inh. may cause spasm, inflamm./edema of larynx/bronchi, chem. pneumonitis, pulmonary edema; may cause burning sensation, coughing, wheezing, laryngitis, shortness of breath, headache, nausea, vomiting; TSCA listed

Precaution: Avoid moisture; may dec. on exposure to moist air or water; incompat. with strong acids

Hazardous Decomp. Prods.: Hydrogen chloride gas, aluminum oxide; thermal
Aluminum (III) chloride, hexahydrate; Aluminum chloride hydrated. See Aluminum chloride hexahydrate

Aluminum chloride hydroxide. See Aluminum sesquichlorohydrate; Aluminum chlorohydrate

Aluminum, chloro [(2,5-dioxo-4-imidazolidinyl) ureato] tetrahydroxydi- . See Alcloxa

Aluminum chlorohydrate

CAS 12042-91-0; EINECS/ELINCS 234-933-1

Synonyms: Aluminum chlorohydrate; Aluminum chlorohydrol; Aluminum chlorohydroxide; Aluminum chloride basic; Aluminum chloride hydroxide; Aluminum chlorohydrol; Aluminum chlorohydroxide; Aluminum hydroxide chloride; Aluminum hydroxychloride; Basic aluminum chloride; Basic aluminum chloride; Chlorohydrol; Chloropentahydroxydialuminum; Dialuminum chloride pentahydroxide; PAC

Classification: Inorganic salt

Definition: Prod. with OH:Al ratio of 2.5 (basic aluminum chloride prods. with lower OH:Al ratios are called polyaluminum chloride)

Empirical: H₅Al₂ClO₅; H₅Al₂ClO₅ • 2H₂O (dihydrate)

Formula: Al₂(OH)₅Cl; Al₂(OH)₅Cl • 2H₂O (dihydrate)

Properties: Wh. powd. (dihydrate) or sol'n.; dissolves in water forming sl. turbid colloidal sol'n. (up to 55% w/w); m.w. 174.46 (anhyd.), 210.48 (dihydrate); pH 4.0-4.4 (15%)

Toxicology: ACGIH TLV/TWA 2 mg(Al)/m³;

TDL0 (oral, rat) 13 g/kg; mild human skin irritant; TSCA listed

Hazardous Decomp. Prods.: Heated to comp., emits toxic fumes of Cl⁻

HMIS: Health 2, Flammability 0, Reactivity 0

Uses: Antiperspirant active, deodorant; astringent

Regulatory: BP, EP compliance; DOT nonregulated

Aluminum, chloro [(2,5-dioxo-4-imidazolidinyl) ureato] tetrahydroxydi- . See Alcloxa

Aluminum chlorohydrate

CAS 12042-91-0; EINECS/ELINCS 234-933-1

Synonyms: Aluminum chlorohydrate; Aluminum chlorohydrol; Aluminum chlorohydroxide; Aluminum chloride basic; Aluminum chloride hydroxide; Aluminum chlorohydrol; Aluminum chlorohydroxide; Aluminum hydroxide chloride; Aluminum hydroxychloride; Basic aluminum chloride; Basic aluminum chloride; Chlorohydrol; Chloropentahydroxydialuminum; Dialuminum chloride pentahydroxide; PAC

Classification: Inorganic salt

Definition: Prod. with OH:Al ratio of 2.5 (basic aluminum chloride prods. with lower OH:Al ratios are called polyaluminum chloride)
### Chemical Component Cross-Reference

**Aluminum chlorohydrex PG**

**CAS**: [245090-52-2](#); **EINECS/ELINCS**: [258-309-3](#)

**Synonyms**: Aluminum chlorohydrex propylene glycol complex; 1,2-Propanediol, reaction prods. with aluminum chloride hydroxide (Al₂Cl(OH)₃)

**Definition**: Coordination complex of aluminum chlorohydrate and propylene glycol in which some of the water molecules have been displaced by the propylene glycol

**Properties**: Sol. in alcohol

**Uses**: Antiperspirant; OTC active

**Trade Names**: Reach® 301 PG Powd.; Rehydrol® II

---

**Aluminum chlorohydrex propylene glycol complex**: See Aluminum chlorohydrex PG

**Aluminum chlorohydrol**: See Aluminum chlorohydrex PG

**Aluminum chlorohydroxide**: See Aluminum chlorohydrex PG

**Aluminum chlorohydroxyallantoinate**: See Alcloxa

**Aluminum, chlorohydroxy lactate sodium complexes**: See Sodium aluminum chlorohydroxy lactate

**Aluminum, chlorotetrahydroxy ((2-hydroxy-5-oxo-2-imidazolin-4-yl) ureato) dihydroxy**: See Aldioxa

**Aluminum diacetate**

**CAS**: [142-03-0](#); **EINECS/ELINCS**: [205-518-2](#)

**Synonyms**: Aluminum acetate; Aluminum acetate basic; Aluminum, bis (acetato-O) hydroxy-; Aluminum diacetate hydroxide; Aluminum hydroxyacetate; Aluminum subacetate; Basic aluminum acetate; Bis (acetato-O) hydroxyaluminum; Hydroxyaluminum diacetate; Mordant rouge

**Classification**: Salt

**Empirical**: C₄H₇AlO₅

**Formula**: Al(OH)(CH₃CO₂)₂

**Properties**: Wh. amorphous powd.; insol. in water, alcohol, ether; forms gel w/ aliphatic and aromatic hydrocarbons; m.w. 162.08; dens. 1.009; m.p. 145°C

**Toxicology**: ACGIH TLV/TWA 10 mg/m³; nuisance dust; TSCA listed

**Hazardous Decomp. Prods.**: Heated to decomp., emits acrid smoke and irritating vapors

**HMIS**: Health 1, Flammability 0, Reactivity 0

**Uses**: Emulsion stabilizer; opacifier; visc. control agent

**Trade Names**: Aluminum Stearate 22; Kemilub EA

---

**Aluminum diacetate hydroxide**: See

---

**Aluminum distearate**

**CAS**: [300-92-5](#); **EINECS/ELINCS**: [206-101-8](#)

**Synonyms**: Aluminum hydroxide distearate; Aluminum, hydroxybis (octadecanoato-o) -; Aluminum, hydroxybis (stearato)-; Aluminum hydroxydistearate; Monohydroxyaluminum distearate

**Definition**: Aluminum salt of stearic acid

**Empirical**: C₃₆H₇₁AlO₅

**Formula**: [CH₃(CH₂)₁₆COO]₂Al(OH)

**Properties**: Wh. powd.; insol. in water, alcohol, ether; forms gel w/ aliphatic and aromatic hydrocarbons; m.w. 611.05; dens. 1.009; m.p. 145°C

**Hazardous Decomp. Prods.**: Heated to decomp., emits acrid smoke and irritating vapors

**HMIS**: Health 1, Flammability 0, Reactivity 0

**Uses**: Emulsion stabilizer; opacifier; visc. control agent

**Trade Names**: Aluminum Stearate 22; Kemilub EA

---

**Aluminum diacetate**

**Aluminum, dihydroxy (octadecanoato-o) -**

**See Aluminum stearate**

**Aluminum, [[2,5-dioxo-4-imidazolidiyl] ureato] dihydroxy-**

**See Aldioxa**

---

**Aluminum flake**: See Aluminum

---

**Aluminum formate**

**CAS**: [7360-53-4](#); **EINECS/ELINCS**: [230-898-1](#)

**Synonyms**: Aluminum formate, trihydrate; Aluminum triformal; Formic acid, aluminum salt

**Definition**: Aluminum salt of formic acid

**Empirical**: C₃H₉AlO₆

**Formula**: [CH₃CO₂]₃Al(OH)

**Properties**: Wh. cryst.; m.w. 152.03

**Toxicology**: Aq. sol'n. explodes when heated in air

**Precaution**: Aq. sol'n. explodes when heated in air

**Uses**: Antimicrobial in pharmaceuticals; in antiperspirants

**Regulatory**: Canada DSL

**Manuf./Distrib.**: Aldrich [http://www.sigma-aldrich.com](http://www.sigma-aldrich.com); Fluka [http://www.sigma-aldrich.com](http://www.sigma-aldrich.com); Sigma [http://www.sigma-aldrich.com/belgium](http://www.sigma-aldrich.com/belgium)

**Aluminum diacetate**

**Aluminum diacetate hydroxide**

**†=pharmaceutical grade**
**Chemical Component Cross-Reference**

**Aluminum formate, trihydrate.** See Aluminum formate

**Aluminum hydrate.** See Aluminum hydroxide

**Aluminum hydroxide**

**CAS** 21645-51-2; EINECS/ELINCS 244-492-7

**Synonyms:** Alumina hydrate; Alumina hydrated; Alumina trihydrate; Aluminic acid; Aluminum hydrate; Aluminum oxide hydrate; Aluminum trihydrate; Aluminum trihydroxide; ATH; Hydrated alumina; Hydrated aluminum oxide; Trihydrated alumina

**Classification:** Inorganic compd.

**Empirical:** Al(H₃O)₃

**Formula:** Al(OH)₃

**Properties:** Wh. cryst. powd. or gran.; odorless; insol. in water, alcohol; sol. in min. acids, caustic soda; m.w. 78.01; dens. 2.42; bulkling value 0.050 gal/lb; m.p. loses water @ 300 C; oil absorp. 32-38; GE brightness 93-99; ref. index 1.57; hardness (Mohs) 2.5-3.5

**Toxicology:** TLV/TWA 2 mg (Al)/m³; LDLo (IP, rat) 150 mg/kg; poison by IP route; human systemic effects by ing. (fever, GI effects); irritant; no known skin toxicity; mutagenic data; TSCA listed

**Precaution:** Incompat. with chlorinated rubber; when coprecipitated with bismuth hydroxide, and reduced by H₂, it is violently flammable in air; incompat. with strong acids, strong bases

**HMIS:** Health 1, Flammability 0, Reactivity 1

**Storage:** Store in closed containers; avoid generating dust

**Uses:** Emollient, humectant, visc. control agent, stabilizer, filler, abrasive, mild astringent, adsorbent, protein binder in pharmaceuticals, orals; antiperspirants; dusting powds.; gastric antacid in medicine; polishing agent, abrasive in dentifrices

**Regulatory:** FDA 21CFR §73.1010, 175.300, 176.170, 176.210, 177.1200, 177.2600, 178.3297, 182.90; Canada DSL

- CAS 18917-91-4; EINECS/ELINCS 242-670-9
- Synonyms: **Aluminophosphoric acid**;
  - **Aluminum phosphate**;
  - **Aluminum phosphate tribasic**;
  - **Aluphos**;
  - **Phosphoric acid, aluminum salt (1:1)**

### Empirical:
- $\text{C}_9\text{H}_{15}\text{AlO}_9$

### Formula:
- $\text{AlPO}_4$

### Properties:
- Wh. cryst.; insol. in water and alcohol; sl. sol. in HCl, nitric acid; m.w. 121.95; dens. 2.566; m.p. > 300 C; isomorphous with quartz

### Toxicology:
- Sol’ns. are corrosive to tissue; can cause severe irritation and burns to eyes and skin; inh. can irritate nose, throat, lungs and cause coughing, shortness of breath; avoid contact and inh.; prolonged/repeated exposure can irritate lungs, cause bronchitis; TSCA listed

### Hazardous Decomp. Prods.:
- Produces poisonous gases in fire

### Uses:
- Lubricant; pharmaceuticals; dental cements; antacid

### Regulatory:
- Canada DSL

Chemical Component Cross-Reference

†=pharmaceutical grade

Aluminum sesquichlorohydrate PEG
Aluminum sesquichlorohydrate, complex with 1,2-propanediol. See Aluminum sesquichlorohydrate PG

Aluminum sesquichlorohydrate PG
Synonyms: Aluminum sesquichlorohydrate, complex with oxyirane polymer; Aluminum sesquichlorohydrax polyethylene glycol complex

Definition: Coordination complex of aluminum sesquichlorohydrate and polyethylene glycol in which some of the water molecules have been displaced by the polyethylene glycol

Uses: Antiperspirant active; OTC drug active

Aluminum sesquichlorohydrax propylene glycol complex
Synonyms: Aluminum sesquichlorohydrate, complex with 1,2-propanediol; Aluminum sesquichlorohydrax propylene glycol complex

Definition: Coordination complex of aluminum sesquichlorohydrate and propylene glycol in which some of the water molecules have been displaced by the propylene glycol

Uses: Antiperspirant active; OTC drug active

Aluminum silicate
CAS 1327-36-2; EINECS/ELINCS 215-475-1
INS559

Synonyms: Aluminum oxide silicate; CI 77004; Pyrophyllite; Willinite

Definition: Complex inorganic salt with 1 mole alumina, 1-3 moles silica; naturally occurring forms: andalusite, cyanite, sillimanite; other aluminum silicate mins. incl. kaolinite, kochite, mullite, newtonite, pyrophyllite, etc.

Properties: Varying proportions of Al₂O₃ and SiO₂: wh. mass, crystals, or whiskers; high str.; insol. in water; dens. 2.63; oil absorp. 35-45; GE brightness 82-92; ref. index 1.56; hardness (Mohs) 2

Toxicology: Essentially harmless when given orally or applied to skin; questionable carcinogen with experimental tumorigenic data by implantation

Uses: Thickener, absorbent, opacifier for pharmaceuticals, orals; mild abrasive for dentifrices; reinforcing agent, extender,
pigment in dental cements; protective agent for stomach mucosa

Regulatory: FDA 21 CFR §175.300, 177.1200, 177.1460, 177.2600, 184.1155; Canada DSL

Trade Names: Kaopolite® 1147; Kaopolite® SF; Sipernat® 44; Takallophane
See also Pyrophylite

Aluminum silicate dihydrate; Aluminum silicate hydrated; Aluminum silicate hydrous; Aluminum silicate hydroxide. See Kaolin

Aluminum sodium silicate. See Sodium silicoaluminate

Aluminum starch octenyl succinate

CAS 9087-61-0

†=pharmaceutical grade

Synonyms: Starch aluminum octenyl succinate; Starch, hydrogen octenylbutanedioate, aluminum salt; Starch, octenylbutanedioate, aluminum salt

Definition: Aluminum salt of the prod. of octenylsuccinic anhydride with starch

Properties: Free-flowing wh. powd.

Toxicology: TSCA listed

Uses: Absorbent, visc. control agent in pharmaceutical topicals and ointments

Regulatory: FDA Inactive Ingredients Guide listed, FDA 21CFR §172.892, 175.105; Canada DSL

Aluminum stearate

CAS 7047-84-9; EINECS/ELINCS 230-325-5

INS470

Synonyms: Aluminum, dihydroxy (octadecanoato-o-); Aluminum monobasic stearate; Aluminum monostearate; Aluminum stearate, monobasic; Dihydroxyaluminum monostearate; Dihydroxyaluminum stearate; Octadecanoic acid, aluminum salt; Stearic acid, aluminum dihydroxide salt; Stearic acid, aluminum salt

Classification: Aliphatic organic; sat. aliphatic carboxylic acid salt

Definition: Aluminum salt of stearic acid

Empirical: C_{18}H_{37}AlO_4

Formula: CH_3(CH_2)_{16}COOAl(OH)_2

Properties: Wh. to ylsh. fine powd., faint char. odor; sol. in alkali, petrol., turpentine oil; insol. in water, alcohol, ether; m.w. 344.48; dens. 1.070; m.p. 115 C

Toxicology: ACGIH TWA 10 mg/m^3; TLV/TWA 2 mg(Al)/m^3; LD50 (oral, rat) > 5 g/kg; essentially nontoxic; nuisance dust; inh. of high concs. of dust may cause coughing and mild temporary irritation; sl. eye irritant; TSCA listed

Precaution: Combustible dust; may form explosive dust-air mixts.; incompat. with acids (reacts vigorously)

Hazardous Decomp. Prods.: Thermal decomp. prods.: CO, CO_2, aluminum oxide; heated to decomp., emits acrid smoke and irritating fumes

HMIS: Health 1, Flammability 1, Reactivity 0

Storage: Store in cool area away from ignition sources

Uses: Suspending agent, emollient, emulsion stabilizer, opacifier, visc. builder, gellant in pharmaceuticals
Chemical Component Cross-Reference

Regulatory: FDA §121.1099, 172.863, 173.340, 175.105, 175.210, 175.300, 176.170, 176.200, 176.210, 177.1200, 177.1460, 177.2260, 177.2800, 178.3297, 178.3910, 179.45, 181.22, 181.29; USP/NF compliance; Canada DSL

Trade Names: Alugel 30DF; Synpro® Aluminum Monostearate NF; Synpro® Aluminum Monostearate NF Gellant

Trade Names Containing: Dehymuls® E; Pionier® L-15; Pionier® SVE; Pionier® T-0145; Pionier® T-0150; Pionier® WWH-N; Pionier® WWH-Soft

Aluminum stearate, monobasic. See Aluminum stearate

†=pharmaceutical grade

Aluminum subacetate. See Aluminum acetate; Aluminum diacetate

Aluminum sulfate

CAS 10043-01-3 (anhyd.); 17927-65-0 (hydrate); EINECS/ELINCS 233-135-0
UN 1760 (sol'n.) (DOT); INS520

Synonyms: Alum; Aluminum trisulfate; Cake alum; Dialuminum sulfate; Dialuminum trisulfate; Papermakers' alum; Patent alum; Pearl alum; Sulfuric acid aluminum salt; Sulfuric acid, aluminum salt (3:2)

Classification: Inorganic salt

Empirical: Al₂O₃S₃

Formula: Al₂(SO₄)₃ • 14H₂O

Properties: Wh. cryst. powd., odorless, sweet taste; sol. 36.4% in water (20 C); insol. in alcohol; m.w. 342.14 (anhyd.); dens. 2.71; b.p. dec. @ 770 C; stable in air

Toxicology: ACGIH TLV-TWA 2 mg/m³; LD50 (oral, mouse) 6207 mg/kg; mod. toxic by ing. and IP routes; irritating to skin, eyes, respiratory tract; ing. causes nausea, vomiting, abdominal pain; hydrolyzes to form sulfuric acid which irritates tissue, esp. lungs; TSCA listed

Precaution: Forms sulfuric acid with water; dec. to sulfur oxides at high temps.

Hazardous Decomp. Prods.: SOₓ

HMIS: Health 1, Flammability 0, Reactivity 0

Storage: Hygroscopic

Uses: Firming agent in pharmaceuticals, otics; antiseptic, astringent, and detergent in antiperspirants, skin treatments; 20% sol'n. for treatment of insect or marine organism venom

Regulatory: FDA 21CFR §172.892, 173.3120, 182.1125, GRAS; BP, EP compliance; Canada DSL

### Aluminum, tris (lactato)‐
See **Aluminum lactate**

### Aluminum trisulfate
See **Aluminum sulfate**

### Aluminum zirconium chlorohydrax glycine
**CAS 134-58-7**; EINECS/ELINCS **205-146-1**

**Synonyms:** 5-Amino-1,4-dihydro-7H-1,2,3-triazolo(4,5-d)pyrimidin-7-one; 2-Amino-6-hydroxy-8-azapurin; 2-Amino-6-oxy-8-azapurin; AZG

**Formula:** C₄H₄N₆O

**Properties:** Lt.-orange powd. or wh. to off-wh. crystalline powd.; insol. in water; m.w. 152.1152; m.p. > 300 C (decomposes); assay > 99%

**NFPA:** Health 1, Flammability 1, Reactivity 0

**Uses:** Antiperspirant active

**Regulatory:** FDA GRAS

**Trade Names:** AAZG-507; AAZG-6313; AAZG-7160; AAZG-7167; AAZG-7168; AAZG-368; AAZG-369; AAZG-370; AAZG-417; AAZG-442

### Aluminum zirconium octachlorohydrax GLY
**CAS 90064-80-1; 174514-58-0**; EINECS/ELINCS **292-375-4**

**Synonyms:** Aluminum zirconium octachlorohydrax glycine complex

**Definition:** Coordination complex of aluminum zirconium octachlorohydrax and glycine in which some of the water molecules have been displaced by the glycine

**Uses:** Antiperspirant active; OTC drug active

### Aluminum zirconium octachlorohydrax glycine complex
See **Aluminum zirconium octachlorohydrax GLY**

### Aluminum zirconium pentachlorohydrax
**CAS 98106-54-8**; EINECS/ELINCS **308-575-2**

**Synonyms:** Octa(Aluminum zirconium pentachlorohydrax GLY)

**Definition:** Polymeric, complex basic aluminum zirconium chloride, loosely hydrated, with aluminum to zirconium atomic ratios from 6.0 up to and including 10.0 to 1 and total metals to chloride ratios from 2.1 down to but not
Aluminum zirconium pentachlorohydrex GLY

**Definition:** Coordination complex of aluminum zirconium trichlorohydrate and glycine where glycine replaces water molecule

**Uses:** Antiperspirant active; OTC drug active

**Trade Names:** Rezal® 67 (40% Sol’n.); Rezal® 67P

**Manuf./Distrib.:** Reheis†

**CAS:** 90604-80-1; 125913-22-6; EINECS/ELINCS 292-375-4

**Synonyms:**
- Aluminum zirconium pentachlorohydrex glycine complex;
- Zirconium, chloro glycine hydroxy aluminum complexes

**Definition:** Coordination complex of aluminum zirconium pentachlorohydrate and glycine in which some of the water molecules have been displaced by the glycine

**Uses:** Antiperspirant active; OTC drug active

**Aluminum zirconium pentachlorohydrex glycine complex.** See Aluminum/zirconium trichlorohydrrex GLY

**Aluminum zirconium tetrachlorohydrex GLY**

**Definition:** Coordination complex of aluminum/zirconium tetrachlorohydrate and glycine where glycine replaces water molecule

**Uses:** Antiperspirant active; OTC drug active

**Manuf./Distrib.:** Reheis†

**CAS:** 90604-80-1; 134910-86-4; EINECS/ELINCS 292-375-4

**Synonyms:**
- Aluminum zirconium tetrachlorohydrex glycine complex;
- Zirconium, chloro glycine hydroxy aluminum complexes

**Aluminum/zirconium trichlorohydrex GLY**

**Definition:** Coordination complex of aluminum zirconium trichlorohydrate and glycine where glycine replaces water molecule

**Uses:** Antiperspirant active; OTC drug active

**Manuf./Distrib.:** Reheis†

**CAS:** 915-67-3; EINECS/ELINCS 213-022-2

**Synonyms:**
- Acid amaranth; Acid red 27 (INCI);
- Acid red 27, trisodium salt; Azorubin S; CI 16185; D&C Red No. 2; Fast red; FD&C Red No. 2; Food red 2; Food red 9; 2-Hydroxy-1,1′-azonaphthalene-3,6,4′-trisulfonic acid trisodium salt; 3-Hydroxy-4-(4-sulfo-1-naphthalenyl) azo]-2,7-naphthalenesulfonic acid trisodium salt; 3-Hydroxy-4-(4-sulfo-1-naphthyl) azo)-2,7-naphthalenedisulfonic acid, trisodium salt; Naphthol red; Naphthylamine red; Red cockscomb; Red dye no. 2; Red no. 2; 1-(4-Sulfo-1-naphthylazo)-2-naphthol-3,6-disulfonic acid trisodium salt

**Classification:** Monoazo dye

**Empirical:** C_{20}H_{11}N_{2}Na_{3}O_{10}S_{3}

**Formula:** NaSO_{3}C_{10}H_{5}N=NC_{10}H_{4}(SO_{3}Na)_{2}OH

**Properties:** Dk. red to purple powd.; pract. odorless; saline taste; sol. in water, glycerol, propylene glycol, citric acid, tartaric acid; very sl. sol. in alcohol, Cellosolve; insol. in oil, fat, most org. solvs.; m.w. 604.48; dens. ≈ 1.50; m.p. > 300 C; pH = 10.8 (1% aq.); anionic

**Toxicology:** LD_{50} (IP, rat) 1 g/kg, (IV, rat) 1 g/kg; harmful by inh., ing., skin contact; irritating to eyes, skin, respiratory system; may cause anaphylactic symptoms, urticaria; possible carcinogen; reproductive effector; tumorigen; mutagen; TSCA listed

**Precaution:** Probably combustible
Ambretolide
CAS 123-69-3; 7779-50-2; EINECS/ELINCS 204-644-5; 231-929-1
FEMA 2555
Synonyms: ω-6-Hexadecenolactone; 6-Hexadecenolide; 6-Hexadecen-16-olide; 7-Hexadec-7-en-16-olide; 16-Hydroxy-6-hexadecenoic acid, ω-lactone; Natural musk ambrette; 1-Octacycloheptadec-7-en-2-one; Oxacycloheptadec-8-en-2-one, (Z)-
Classification: lactone; macrocyclic musk
Empirical: C_{16}H_{28}O_2
Properties: Colorless liq.; powerful musk odor; m.w. 252.44; dens. 0.956; b.p. 185-190 C (16 mm); flash pt. > 110 C; ref. index 1.4790
Toxicology: LD_{50} (oral, rat) 339 mg/kg; LD_{50} (oral, mouse) 1600 mg/kg; poison by ing.; eye irritant; may be irritating to skin, mucous membranes, upper respiratory tract; may be harmful by inh., ing., or skin absorp.; TSCA listed
Precaution: Incompat. with strong oxidizing agents, strong acids, strong bases
Hazardous Decomp. Prods.: Toxic fumes of CO, CO_{2}; heated to decomp., emits acrid smoke and irritating vapors; emits toxic fumes under fire conditions
Storage: Store in cool, dry place; keep tightly closed
Uses: Synthetic flavor for pharmaceuticals
Regulatory: FDA 21CFR §172.515; FEMA GRAS; Canada DSL
Manuf./Distrib.: Givaudan Fragrances, Givaudan, Givaudan; Penta Mfg., Penta Mfg.; SAFC Specialties, SAFC Specialties, SAFC Specialties

---

### Handbooks and Databases

- **H: Vitamin BX**
- **Classification:** Aromatic acid
- **Definition:** A compound of the vitamin B complex that is necessary for folic acid synthesis, but not essential for the human diet
- **Empirical:** C₇H₇NO₂
- **Formula:** NH₂C₆H₄CO₂H
- **Properties:** Colorless to yel. monoclinic prisms; sol. in oxygenated solvs., ethyl acetate, glacial acetic acid, water; sl. sol. in benzene; insol. in petrol. ether; m.w. 137.13; dens. 1.374; m.p. 187 C
- **Toxicology:** LD₅₀ (oral, mouse) 2850 mg/kg, (IV, rabbit) 2000 mg/kg; mod. toxic by ing., IV routes; ingesting lg. amts. can cause nausea, vomiting, skin rash, methemoglobinemia, possibly toxic hepatitis; irritant; can cause allergic eczema and lt. sensitivity in susceptible persons; experimental reproductive effects; mutation data; TSCA listed
- **Precaution:** Combustible, Hazardous Decomp. Prods.: Heated to decom., emits toxic fumes of NOx
- **HMIS:** Health 2, Flammability 1, Reactivity 0
- **Storage:** Light-sensitive
- **Uses:** OTC drug active; UV absorber in pharmaceuticals; local anesthetic in sunburn prods.; pharmaceutical intermediate; to treat arthritis; nutrition
- **Regulatory:** BP, EP compliance; GRAS; Canada DSL

Chemical Component Cross-Reference

Aminoethyl propanediol
CAS 115-70-8; EINECS/ELINCS 204-101-2
Synonyms: AEPD; Aminoamylene glycol; 2-Amino-2-ethyl-1,3-propanediol; 2-Ethyl-2-amino-1,3-propanediol; 2-Ethyl-2-amino-1,3-propanediol; 1,3-Propanediol; 2-Amino-2-ethyl
Classification: Aliphatic diol; amino glycol
Empirical: C₅H₁₅NO₂
Formula: CH₂OHC(C₂H₅)NH₂CH₂OH
Properties: Cryst. solid or viscous liq.; nearly odorless (solid), mild amine odor (liq.); sol. in alcohols; misc. in water; sl. sol. in aromatic hydrocarbons; m.w. 119.16; sp.gr. 1.099 (20/20 C); m.p. 38 C; b.p. 153 C (10 mm Hg); sol. in hydrocarbons; m.w. 119.16; sp.gr. 1.099 (20/20 C); m.p. 38 C; b.p. 153 C (10 mm Hg); flash pt. > 110 C
Precaution: Can burn if strongly heated
Hazardous Decomp. Prods.: Thermal decomp. prods.: CO, CO₂, NOₓ; during a fire, irritating/toxic NOₓ fumes may be generated
Uses: Pharmaceutical intermediate
Regulatory: Canada DSL
Manuf./Distrib.: ANGUS

1-Amino-2-propanol; 1-Aminopropan-2-ol.  See Isopropanolamine
Aminopropyl ascorbyl phosphate
CAS 220644-17-7
Empirical: C₉H₁₆NO₇P
Properties: Wh. or sl/ yel. powd.; sol. in deionized water; insol. in ethanol, corn oil, olive oil, and mineral oil
Uses: Vitamin C source, antioxidant, skin conditioner, collagen synthesis promoter, cell growth promoter
Trade Names: Vitagen™
N-(3-Aminopropyl) diethanolamine
CAS 4985-85-7
UN 1760 (DOT)
Synonyms: APDEA; Ethanol, 2,2´-((3-aminopropyl)lmino)bis-
Classification: Alkanolamine
Properties: Colorless clear liq.; ammonia-like odor; sol. > 10% in water; sp.gr. 1.07; vapor pressure < 1 mm Hg (68 F); b.p. 167 C (760 mm); flash pt. (COC) 340 F; ref. index 1.4965
Toxicology: LD₅₀ (oral, rat) 3.50 ml/kg (sl. toxic), (dermal, rabbit) > 2.50 ml/kg (sl. toxic); causes eye and skin burns; harmful or fatal if swallowed; harmful if absorbed through skin; causes respiratory tract irritation and can cause damage; TSCA listed
Environmental: LC₅₀ (96 h) > 100-1000 ppm; pract. nontoxic
Precaution: Corrosive; reacts violently with acids
Hazardous Decomp. Prods.: Burning in limited air supply may produce combustion prods. of nitrogen, CO, CO₂, irritating aldehydes and ketones, and toxic levels of ammonia
HMIS: Health 3, Flammability 1, Reactivity 0
Storage: Minimize exposure to high temps.; avoid water contamination
Uses: Mfg. of pharmaceuticals
Regulatory: SARA §311 acute hazard; Canada DSL
Manuf./Distrib.: Huntsman
http://www.huntsman.com
Chemical Component Cross-Reference

(+)-Aminosuccinic acid; L-Aminosuccinic acid; L-α-Aminosuccinic acid. See L-Aspartic acid

Aminotris(hydroxymethyl) methane. See Tris (hydroxymethyl) aminomethane

Ammonia
CAS 7664-41-7; EINECS/ELINCS 231-635-3
UN 1005 (anhyd.); UN 2672; UN 2073 (sol’ns.)
Synonyms: Ammonia anhydrous; Ammonia gas; Anhydrous ammonia
Classification: Inorganic nitrogen compd.
Empirical: \( \text{H}_3\text{N} \)
Formula: \( \text{NH}_3 \)

Properties: Colorless gas or liq., sharp, intensely irritating odor; easily liquefied by pressure; sol. in water, alcohol, ether; m.w. 17.03; sp.gr. 0.682 (-33.4 C); f.p. -77 C; b.p. -33.5 C; pH 11.6 (1N aq.)

Toxicology: ACGIH TLV/TWA 25 ppm; STEL 35 ppm; LD50 (inh., mouse, 1 h) 4837 ppm, (oral, rat) 350 mg/kg (ammonium hydroxide); corrosive; inh. of conc. fumes may be fatal; irritating to eyes and mucous membranes; shown to produce cancer of the skin in human doses of 1000 mg/kg of body wt.; TSCA listed

Precaution: Moderate fire risk; caustic

Hazardous Decomp. Prods.: Exposed to heat, emits toxic fumes of \( \text{NH}_3 \) and NOx

NFPA: Health 3, Flammability 1, Reactivity 0
Uses: Alkalizer, buffer for pharmaceuticals, orals; microbial fermentation nutrient

Regulatory: BP, EP compliance; FDA 27CFR §21.95; SARA reportable (anhyd.); Canada DSL; Japan approved

†=pharmaceutical grade

Ammonio methacrylate copolymer
Definition: Fully polymerized copolymer of acrylic and methacrylic acid esters with a low content of quat. ammonium groups
Properties: Colorless clear to wh.-opaque gran., faint amine odor; sol. in methanol, alcohol, IPA, acetone, ethyl acetate, methylene chloride; insol. in water, petrol. ether
Uses: Excipient in pharmaceuticals; film coating agent for sustained-release pharmaceuticals; membrane transport for drugs
Regulatory: BP, EP, USP/NF compliance
Trade Names: Eudragit® RL 30 D; Eudragit® RL 100; Eudragit® RS 30 D; Eudragit® RS 100; Eudragit® RS PO
Trade Names Containing: Eudragit® RL 12.5; Eudragit® RS 12.5

Ammonium acetate
CAS 631-61-8; EINECS/ELINCS 211-162-9
INS264
Synonyms: Acetic acid ammonium salt
Classification: Aliphatic organic compd.
Empirical: C2H7NO2
Formula: CH3COONH4
Properties: Colorless or wh. crystals, sl. acetous odor; sol. in alcohol, oxygenated solvs.; sl. sol. in acetone; very sl. sol. in water; m.w. 77.08; dens. 1.07; m.p. 114 C; pH 6.7-7.3 (5%)
Toxicology: LD50 (IP, rat) 632 mg/kg, (IV, mouse) 386 mg/kg; poison by IV route; mod. toxic by IP route; gastric irritant; TSCA listed
Precaution: Combustible
Hazardous Decomp. Prods.: Heated to decomp., emits toxic fumes of NOx and NH3
HMIS: Health 2, Flammability 0, Reactivity 0
Storage: Hygroscopic, deliq.; store @ 2-8 C
Uses: Buffer in pharmaceuticals; diuretic/diaphoretic drug; in injectables; microbial fermentation nutrient
Regulatory: Canada DSL

Ammonium acid phosphate. See Ammonium phosphate

Ammonium alginate
CAS 9005-34-9
FEMA 2015; INS403; E403
Synonyms: Alginic acid, ammonium salt; Ammonium polymannuronate
Chemical Component Cross-Reference

Classification: Hydrophilic colloid
Definition: Ammonium salt of alginic acid
Empirical: \((C_6H_7O_6NH_4)_n\)
Properties: Filamentous, grainy, granular, or powd.; colorless or sl. yel.; sl. smell or taste; slowly sol. in water forming visc. sol'n.; insol. in alcohol; pH 5-6 (1%)
Toxicology: TSCA listed
Hazardous Decomp. Prods.: Heated to decomp., emits toxic fumes of NOx
Uses: Emulsifier, thickener, gellant, stabilizer, humectant, film-former, color diluent in pharmaceuticals
Regulatory: FDA 21CFR §173.310, 178.3900, 184.1133, GRAS; FEMA GRAS; USDA 9CFR 318.7; Europe listed; UK approved; Canada DSL
Manuf./Distrib.: AB R Lundberg
Trade Names Containing: KELTOSE®

Ammonium, alkylbenzyltrimethyl-, saccharinate. See Benzalkonium saccharinate

Ammonium, alkyldimethyl (phenylmethyl)-, chloride. See Benzalkonium chloride

Ammonium alum
CAS 7784-25-0; 7784-26-1; EINECS/ELINCS 232-055-3

INS523
Synonyms: Alum, ammonium; Aluminum ammonium bis (sulfate); Aluminum ammonium sulfate; Ammonium aluminum alum; Ammonium aluminum sulfate; Burnt ammonium alum; Exsiccated ammonium alum; Sulfuric acid, aluminum ammonium salt (2:1:1), dodecahydrate
Classification: Inorganic aluminum compd.
Empirical: Al • H3N • 2H2O4S • 12H2O
Formula: AlNH4(SO4)2 • 12H2O
Properties: Wh. cryst. powd., odorless, strong sweet astringent taste; freely sol. in glycerol; pract. insol. in alcohol; sol. 1 g/7 ml in water;

†=pharmaceutical grade

m.w. 453.33; dens. 1.645; m.p. 94.5 C; b.p. dec. > 280 C; noncombustible
Toxicology: TLV/TWA 2 mg/m³ (sol. salts, as Al); irritating if inhaled or ingested; causes redness and irritation to skin and eyes when sulfuric acid forms in presence of moisture
Precaution: Incompat. with strong bases (can react vigorously)
Hazardous Decomp. Prods.: On decomp., emits toxic fumes of NOx and SOx
HMIS: Health 1, Flammability 0, Reactivity 0
Storage: Store in cool, dry area in labeled dust-tight containers; keep closed when not in use
Uses: Astringent; antiseptic; antiperspirant
Regulatory: FDA 21CFR §178.3120, 182.90, 182.1127, GRAS; Japan approved except for miso; Canada DSL
Manuf./Distrib.: AMRESCO†

Ammonium aluminum alum; Ammonium aluminum sulfate. See Ammonium alum

Ammonium benzoate
CAS 1863-63-4; EINECS/ELINCS 217-468-9
Synonyms: Benzoic acid, ammonium salt
Classification: Aromatic amino acids and acid salts

Handbook of Pharmaceutical Additives, Third Edition 880
Chemical Component Cross-Reference

Empirical: C7H9NO2
Formula: C6H5COONH4
Properties: Wh. cryst. or powd.; odorless or faint benzoic acid odor; sol. in water, alcohol, glycerol; m.w. 139.17; dens. 1.26; sublimes @ 160 C; m.p. 198 C (dec.)
Toxicology: LD50 (oral, rat) 825 mg/kg, (oral, mouse) 235 mg/kg; LDLo (IV, rabbit) 400 mg/kg; poison by ing. and IV routes; irritant; TSCA listed
Hazardous Decomp. Prods.: Heated to decomp., emits toxic vapors of NOx and NH3
Storage: Keep well sealed; hygroscopic
Uses: Preservative in pharmaceuticals; medicine
Regulatory: FDA 21CFR §175.105; Canada DSL

Ammonium, benzyldiethyl ((2,6-xyllylcarbamoyl) methyl)-, benzoate. See Denatonium benzoate
Ammonium, benzyldimethylctoacetadecyl-, chloride. See Stearalkonium chloride
Ammonium, benzylmethyl (2-(2-(4-(1,1,3,3-tetramethylbutyl) tolyloxy) ethoxy) ethyl)-, chloride. See Methylbenzethonium chloride
Ammonium, benzyldecosylmethyl-, chloride. See Behenalkonium chloride
Ammonium, benzylhexadecylmethyl-, chloride. See Cetalkonium chloride

†=pharmaceutical grade

Ammonium bicarbonate
CAS 1066-33-7; EINECS/ELINCS 213-911-5
UN NA 9081 (DOT); INS503(ii); E503
Synonyms: Acid ammonium carbonate; Ammonium bicarbonate (1:1); Ammonium carbonate; Ammonium hydrogen carbonate; Carbonic acid monoammonium salt; Monoammonium carbonate
Classification: Inorganic salt
Empirical: CH2O3 • H3N
Formula: NH4HCO3
Properties: Colorless or wh. hard cryst. or cryst. powd., faint ammonia odor; sol. 17.4% in water (20 C); dec. by hot water; insol. in alcohol, acetone; m.w. 79.1; dens. 1.586; m.p. dec. 36-60 C; pH 7.0-7.8 (5%)
Toxicology: LD50 (IV, mouse) 245 mg/kg; poison by intravenous route; TSCA listed
Precaution: Can cause skin rashes of scalp, forehead, or hands; evolves irritating fumes on heating to 35 C
Hazardous Decomp. Prods.: Heated to decomp., emits toxic fumes of NOx and NH3
HMIS: Health 1, Flammability 0, Reactivity 0
Uses: Prod. of pharmaceuticals; medicinally as expectorant and to break up intestinal gas; buffer
Regulatory: FDA 21CFR §73.85, 163.110, 163.111, 163.112, 182.1135, 184.1135, GRAS; Japan approved; Europe listed; UK approved; BP, EP compliance; Canada DSL
Ammonium carbonate

CAS 506-87-6; 8000-73-5†; 10361-29-2;
EINECS/ELINCS 233-786-0
UN 9084; INS503(i); E503

Synonyms: Carbonic acid, ammonium salt;
Carbonic acid, diammonium salt;
Diammonium carbonate; Hartshorn

Definition: Mixt. of ammonium bicarbonate and ammonium carbamate

Empirical: CH₈N₂O₃
Formula: (NH₄)₂CO₃

Properties: Wh. powd. or wh. or translucent hard mass, strong ammonia odor, sharp taste; slowly sol. in 4 parts water; dec. by hot water; m.w. 96.11; m.p. 58 C

Toxicology: LD₅₀ (IV, mouse) 96 mg/kg; poison by subcutaneous and IV routes; TSCA listed

Precaution: Dec. on exposure to air; volatilizes at 60 C; incompat. with acids, acid salts, salts of iron and zinc, alkaloids, alum, tartar emetic

Hazardous Decomp. Prods.: Heated to decomp., emits toxic fumes of NOₓ and NH₃

HMIS: Health 2, Flammability 0, Reactivity 1

Storage: Light-sensitive; keep tightly closed in cool place

Uses: Alkalizer, buffer for pharmaceuticals; ammonia source; medicine (expectorant)

Regulatory: FDA 21CFR §73.85, 163.110, 163.111, 163.112, 184.1137, GRAS; BATF

See also: Ammonium bicarbonate

Ammonium, (carboxymethyl) trimethyl-, chloride. See Betaine hydrochloride Ammonium, (9-(o-carboxyphenyl)-6-(diethylamino)-3H-xanthen-3-ylidene) diethyl-, chloride. See Basic violet 10; D&C Red No. 19

Ammonium, didecyldimethyl-, chloride. See Didecylammonium chloride Ammonium dihexadecylmethyl-, chloride. See Dicetyltrimmonium chloride Ammonium dihydrogen orthophosphate; Ammonium dihydrogen phosphate. See Ammonium phosphate

†=pharmaceutical grade

Ammonium, (4-(p-(dimethylamino)-α-(p-ethyl (m-sulfobenzyl) amino) phenyl) benzylidene)-2,5-cyclohexadien-1-ylidene) ethyl (m-sulfobenzyl)-, hydroxide, inner salt, sodium salt. See Acid violet 49

Ammonium, didecyl sulfate; Ammonium-N-dodecyl sulfate. See Ammonium lauryl sulfate

Ammonium, ethyl(4-(p-(ethyl)-(m-sulfobenzyl) amino)-α-(o-sulfophenyl) benzylidene)-2,5-cyclohexadien-1-ylidene)(m-sulfobenzyl)-, hydroxide, inner salt, diammonium salt. See D&C Blue No. 4

Ammonium, ethylhexadecyldimethyl-, bromide. See Cetyltrimethylammonium bromide

Ammonium ferric citrate. See Iron ammonium citrate

Ammonium-ferric-cyanoferrate (II); Ammonium-ferric-ferrocyanide. See Ferric ammonium ferrocyanide

Ammonium fluorosilicate (INCI); Ammonium fluosilicate. See Ammonium silicofluoride

Ammonium glycyrrhizinate

CAS 53956-04-0; EINECS/ELINCS 258-887-7

Synonyms: Ammoniated glycyrrhizin; α-D-Glucopyranosiduronic acid, (3β,20β)-20-carboxy-11-oxo-30-norlecan-12-en-3-yl-2-O-β-D-glucopyranuronosyl-, ammoniate; α-D-Glucopyranosiduronic acid, (3β,20β)-20-carboxy-11-oxo-30-norlecan-12-en-3-yl-2-O-β-D-glucopyranuronosyl-, monoammonium salt; Glycamil; Glycyrrh; Glycyrrhizic acid, ammonium salt; Glycyrrhizic acid, monoammonium salt; Glycyrrhizin, ammoniated; MAG; Monoammonium glycyrrhizinate; Monoammonium glycyrrhizinate

Definition: Ammonium salt of glycyrrhizin acid

Empirical: C_{42}H_{62}O_{16} • H_{3}N

Properties: Wh. powd.; m.w. 840.08; m.p. 209 C (dec.)

Toxicology: LD50 (oral, rat) > 10 g/kg, (IP, rat) > 300 mg/kg, (IV, mouse) 540 mg/kg; harmful by ing.; may be harmful by inh., skin absorp.; may cause eye/skin irritation, changes in heart/bladder/adrenal wt., hepatitis, changes in blood count; overexposure can cause sodium retention and potassium loss leading to hypertension, water retention, and electrolyte imbalance; mutagen; reproductive effector; target
Ammonium glycyrhrizinate
CAS 1407-03-0
FEMA 2528
Synonyms: Monoammonium glycyrhrizinate
Definition: Obtained by extraction from ammoniated glycyrrhizin, derived from roots of Glycyrrhiza glabra
Empirical: C42H65NO16 • 5H2O
Properties: Wh. powder; sweet taste; sol. in ammonia; insol. in glacial acetic acid; m.w. 839.91
Toxicology: LD50 (IV, mouse) 540 mg/kg; mutagen; reproductive effector; TSCA listed
Hazardous Decomp. Prods.: Heated to decomp., emits acrid smoke and irritating fumes
Uses: Flavor, flavor enhancer, sweetness potentiator, surfactant, masking agent for pharmaceuticals, orals
Regulatory: FDA 21CFR §184.1408, GRAS; not permitted for use as nonnutritive sweetener in sugar substitutes; FEMA GRAS; FDA approved for orals; BP compliance
Manuf./Distrib.: ADA Int'l.

Ammonium hydroxide
CAS 1336-21-6; EINECS/ELINCS 215-647-6
UN NA 2672 (DOT); INS527; E527
Synonyms: Ammonia aqua; Ammonia aqueous; Ammonia solution; Ammonia solution, strong; Ammonia water; Aqua ammonia; Aqua ammonium; Aqueous ammonia; Spirit of Hartshorn; Strong ammonia solution
Classification: Inorganic base
Empirical: H5NO
Formula: NH4OH
Properties: Clear colorless liq., very pungent odor, acrid taste; sol. in water; m.w. 35.06; dens. 0.90; m.p. -77 C; flash pt. none; pH 13.6
Toxicology: LD50 (oral, rat) 350 mg/kg; LDLo (IV, rabbit) 10 mg/kg; human poison by ing.; experimental poison by inh. and ing.; inhalation irritant; severe eye irritant; liq.
Ammonium-L-2-hydroxy propionate. See Ammonium lactate

Ammonium iodide
CAS 12027-06-4; EINECS/ELINCS 234-717-7
Classification: Inorganic salt
Empirical: $\text{H}_4\text{IN}$
Formula: $\text{NH}_4\text{I}$
Properties: Wh. cryst. or powd.; sol. in water, alcohol; m.w. 145; dens. 2.56; vapor pressure 1 mm (210.9 C); m.p. sublimes with decomp. (551 C); b.p. 220 C (vac)
Toxicology: Mod. toxic
Precaution: Incomp. with BrF$_3$, IF$_7$, K
Hazardous Decomp. Prods.: Heated to decomp., emits toxic fumes of I–, NH$_3$, NO$_x$
Storage: Hygroscopic; light-sensitive
Uses: Antimicrobial in pharmaceuticals; medicine (expectorant)
Regulatory: Canada DSL

Ammonium phosphate, dibasic
CAS 7783-28-0; EINECS/ELINCS 231-987-8

Synonyms: Ammonium phosphate; DAP; Diammonium hydrogen orthophosphate; Diammonium hydrogen phosphate; Diammonium phosphate; Dibasic ammonium phosphate; Phosphoric acid diammonium salt; Secondary ammonium phosphate

Classification: Inorganic salt

Empirical: \( \text{H}_3\text{N}_2\text{O}_4\text{P} \)

Formula: \((\text{NH}_4)_2\text{HPO}_4\)

Properties: Wh. cryst. or powd., odorless, cooling salty taste; mildly alkaline in reaction; sol. 1 g/1.7 ml in water; pract. insol. in alcohol, acetone; m.w. 132.07; dens. 1.619; m.p. 155 \(^\circ\)C (dec.); pH \(\approx 8\) (1%); noncombustible

Toxicology: \(LD_{50}\) (oral, rat) 3160-4500 mg/kg; low to moderate toxicity; TSCA listed

Hazardous Decomp. Prods.: Heated to comp., emits very toxic fumes of PO\(_x\), NO\(_x\), and NH\(_3\)

HMIS: Health 1, Flammability 0, Reactivity 0

Storage: Store @ R.T.; keep well closed

Uses: Buffer, processing aid for pharmaceuticals; in ammonical dentifrices; microbial fermentation nutrient

Regulatory: FDA 21 CFR §73.85, 184.1141b, 573.320, GRAS; BATF 27 CFR 240.1051, limitation 0.17% as yeast nutrient in wine

Ammonium phosphate

Ammonium phosphate monobasic. See Ammonium phosphate

Ammonium polymannuronate. See Ammonium alginate

Ammonium polysulfide. See Ammonium sulfide

Ammonium saccharin

CAS 6381-61-9; EINECS/ELINCS 228-971-8
Synonyms: 1,2-Benzisothiazolin-3-one 1,1-dioxide ammonium salt; Saccharin ammonium; Saccharinate ammonium
Empirical: C7H8N2O3S
Properties: Wh. cryst. or cryst. powd., intense sweet taste; sol. in water; m.w. 200.21
Toxicology: Severe eye irritant
Hazardous Decomp. Prods.: Heated to decomp., emits toxic fumes of NOx
Uses: Sweetener for chewable vitamin tablets; sugar substitute
Features: Noncaloric
Regulatory: FDA 21CFR §180.37; USDA 9CFR §318.7 (limitation 0.01%)

Ammonium silicofluoride

CAS 1309-32-6; 16919-19-0; EINECS/ELINCS 240-968-3
UN 2854 (DOT)
Synonyms: Ammonium fluorosilicate (INCI); Ammonium fluosilicate; Ammonium hexafluorosilicate; Silicate (2-), hexafluoro-, diammonium
Empirical: F6H8N2Si
Formula: (NH₄)₂SiF₆
Properties: Wh. cryst. powd.; odorless; sol. in alcohol, water; m.w. 178.19; dens. 2.011; dec. on heating
Toxicology: TLV 2.5 mg(F)/m³ of air; LD50 (oral, mouse) 70 mg/kg; corrosive; toxic; breathing dust may irritate nose and throat and cause coughing and chest discomfort; poison by ing. and subcut. routes; strong irritant to eyes and skin; TSCA listed
Hazardous Decomp. Prods.: Heated to decomp., emits very toxic fumes of F⁻, NH₃, and NOx
Uses: Oral care agent
Regulatory: FDA 21CFR §73.85, 177.1200, 184.1143, GRAS; Japan approved; Canada DSL

Ammonium sulfate

CAS 7783-20-2; EINECS/ELINCS 231-984-1
UN 2506 (DOT); INS517; E517
Synonyms: Diammonium sulfate; Mascagnite; Sulfate of ammonia; Sulfuric acid diammonium salt
Classification: Inorganic salt
Empirical: H₈N₂O₄S
Formula: (NH₄)₂SO₄
Properties: Colorless or wh. cryst. or gran., odorless; sol. in water; insol. in alcohol, acetone; m.w. 132.16; dens. 1.77; m.p. > 280 C (dec.)
Toxicology: LD50 (oral, rat) 2840 mg/kg, (oral, mouse) 640 mg/kg; moderately toxic by several routes; TSCA listed
Precaution: Incandescent reaction on heating with potassium chlorate; reaction with sodium hypochlorite gives the unstable explosive nitrogen trichloride
Hazardous Decomp. Prods.: Heated to decomp., emits very toxic fumes of NOx, NH₃, and SOx
HMIS: Health 2, Flammability 0, Reactivity 0
Storage: Store @ R.T. in dry location; sl. hygroscopic; keep container well sealed
Uses: Reducing agent, visc. control agent in pharmaceuticals; microbial fermentation nutrient
Regulatory: FDA 21CFR §73.85, 177.1200, 184.1143, GRAS; Japan approved; Canada DSL
### Ammonium sulfide

**CAS**: 12135-76-1 (sol’n.); 12124-99-1; EINECS/ELINCS 235-223-4

**UN**: 2683 (DOT; UN sol’n.); FEMA 2053

**Synonyms**: Ammonium bisulfide; Ammonium hydrogen sulfide; Ammonium hydrosulfide; Ammonium mercaptan; Ammonium monosulfide; Ammonium polysulfide; Ammonium sulfhydrate; Monoammonium sulfide

**Empirical**: H₈N₂S

**Formula**: (NH₄)₂S

**Properties**: Yel. cryst.; liq. @ R.T.; sol. in alcohol, ammonia, cold water; m.w. 68.15; dens. 0.997 (20/4 C); m.p. dec.; flash pt. 90 F

**Toxicology**: LDLo (oral, mouse) 80 mg/kg, (skin mouse) 2457 mg/kg, IP (mouse) 10 mg/kg; poison by ing., skin contact, subcut., IV, IP routes; corrosive; strong irritant to skin and mucous membranes; readily absorbed through skin; sol’n.: fatal poisoning has been reported from use in hair waves; TSCA listed

**Precaution**: Flamm. liq.; unstable except in absence of moisture and below 0 C; incompat. with zinc

**Hazardous Decomp. Prods.**: Heated to decomp., emits very toxic fumes of SOₓ, NOₓ, and NH₃

**Storage**: Hygroscopic cryst.

**Uses**: Synthetic flavor for pharmaceuticals

**Regulatory**: FDA 21 CFR §172.515; FEMA GRAS; Canada DSL

**Manuf./Distrib.**: Alfa Aesar

**Ammonium sulfite**

**CAS**: 10196-04-0; EINECS/ELINCS 233-484-9

**Synonyms**: Sulfurous acid, diammonium salt

**Classification**: Inorganic salt

**Empirical**: H₈N₂O₃S

**Formula**: (NH₄)₂SO₃ • H₂O (commercial form)

**Properties**: Colorless cryst., acrid sulfurous taste; sol. in water; m.w. 116.14; dens. 1.41; sublimes @ 150 C with decomp.
### Chemical Component Cross-Reference

**Amyl acetate**  
CAS: 628-63-7; EINECS/ELINCS 211-047-3  
UN: 1104 (DOT)  
**Synonyms:** Acetic acid amyl ester; Acetic acid pentyl ester; n-Amyl acetate; Amylacetic ester; Amylacetic ether; Pear oil; Pentacetic acid; 1-Pentanol acetate; Pentyl acetate; 1-Pentyl acetate; n-Pentyl acetate; Pentyl ethanoate; Primary amyl acetate  
**Classification:** Carboxylic acid ester  
**Definition:** Ester of amyl alcohol and acetic acid  
**Empirical:** C₇H₁₄O₂  
**Formula:** CH₃COOC₅H₁₁  
**Properties:** Colorless liq. (pure), yel. liq. (commercial); pear or banana-like odor; completely sol. in alcohol, ether; sl. sol. in water; m.w. 130.19; sp.gr. 0.876 (20 C); vapor pressure 3.5 mm Hg; m.p. -70.8 C; b.p. 149 C; flash pt. (CC) 25 C; autoignition temp. 360 C; ref. index 1.4013; surf. tens. 25.13 dynes/cm; dielec. const. 4.475  
**Toxicology:** ACGIH TLV/TWA 100 ppm; LD₅₀ 6500 mg/kg; mod. toxic by IP route; skin and eye irritant; inh. of vapor can irritate nose/throat; higher exposure may cause breathing difficulty, increased heart rate, CNS depression; severe exposures may cause unconsciousness; low order of chronic toxicity; TSCA listed  
**Environmental:** VOC; BOD₅ 0.72; ThOD 2.34  
**Precaution:** Flamm.; LEL 1.1%; UEL 7.5%; dangerous fire hazard exposed to heat or flame; mod. explosive as vapor exposed to flame; incomp. with reducing agents, strong acids, strong bases (decomp. can occur), oxidizing agents (increased risk of fire and explosion)  
**Hazardous Decomp. Prods.:** Heated to decomp., emits acrid smoke and irritating fumes  
**NFPA:** Health 1, Flammability 3, Reactivity 0  
**Storage:** Store in cool, dry, well-ventilated area, out of direct sunlight; avoid generating mist  
**Uses:** Flavor for pharmaceuticals; anti-inflammatory agent; solvent; extraction of penicillin  
**Features:** Banana-like flavor  
**Regulatory:** FDA 21CFR §175.105; FEMA GRAS; CERCLA hazardous substance; Canada DSL

n-Amyl acetate; Amylactic ester; Amylactic ether.  See Amyl acetate

n-Amyl alcohol
CAS 71-41-0; EINECS/ELINCS 200-752-1
UN 1105 (DOT); FEMA 2056
Synonyms: Alcohol C-5; Amyl alcohol, normal; n-Butyl carbinol; 1-Pentanol; Pentanol-1; Pentan-1-ol; n-Pentanol; Pentyl alcohol; n-Pentyl alcohol; Primary amyl alcohol
Classification: Primary aliphatic alcohol
Empirical: C₅H₁₂O
Formula: CH₃(CH₂)₄OH
Properties: Colorless clear liq., somewhat sweet balsamic odor; sl. sol. in water; misc. with alcohol, ether, m.w. 88.15; sp.gr. 0.812 (20/4 C); vapor pressure 2.2 mm Hg; m.p. -79 C; b.p. 137-139 C; flash pt. (CC) 38 C; autoignition temp. 300 C; ref. index 1.409; surf. tens. 25.6 dynes/cm; dielec. const. 13.9
Toxicology: LD₅₀ (oral, rat) 3030 mg/kg, (skin, rabbit) 4490 mg/kg; highly toxic; corrosive; narcotic; ingestion of 30 mg can cause death in humans; irritating to respiratory tract; severe eye and skin irritant; can be absorbed through skin in toxic amts.; inh. can cause nose/throat irritation, CNS depression; extreme exposure may cause double vision, deafness, delirium, fatalities; may cause severe lung damage, respiratory/cardiac arrest, or death if aspirated into lungs; TSCA listed
Environmental: VOC; BOD₅ 1.55; TThOD 2.73
Precaution: DOT: Flamm. liq.; incompat. with oxidizing agents (increases fire/explosion risk)
NFPA: Health 1, Flammability 3, Reactivity 0
Storage: Store in cool, dry, well-ventilated area, out of direct sunlight
Uses: Solvent, synthetic flavor for pharmaceuticals; raw material for pharmaceutical preps.
Features: Sweet flavor
Regulatory: FDA 21CFR §172.515, 176.180, 176.210; FEMA GRAS; Canada DSL
Trade Names Containing: Pentanol 45

s-Amyl alcohol
CAS 6032-29-7; EINECS/ELINCS 227-907-6
UN 1105 (DOT); FEMA 3316
Synonyms: 2-Hydroxypentane; 1-Methyl-1-butanol; Methyl propyl carbinol; Pentan-2-ol; 2-Pentanol; Pentanol-2; s-Pentyl alcohol
Classification: Sec. aliphatic alcohol
Empirical: C₅H₁₂O
Formula: CH₃CH₂CH₂CH(OH)CH₃
Properties: Colorless liq.; mild winery, ethereal

†=pharmaceutical grade
Chemical Component Cross-Reference

odor; sol. in water, alcohol, ether m.w. 88.15; sp.gr. 0.8098 (20 C); f.p. -50 C; m.p. -75 C; b.p. 118-119 C; flash pt. (CC) 33 C; ref. index 1.403-1.409 (20 C)

Toxicology: LD50 (oral, rat) 1470 mg/kg; mod. toxic by ing., IP route; narcotic; skin and severe eye irritant; can be absorbed through skin; inh. may cause nose/throat irritation, headache, dizziness, coughing, nausea, vomiting; severe exposure may cause double vision, deafness, delirium, severe nervous symptoms, fatalities; ing. may cause 'alcohol' intoxication symptoms; may cause severe lung damage, respiratory failure, cardiac arrest, death if aspirated into lungs; TSCA listed

Precaution: Flamm. exposed to heat or flame; severe explosion hazard exposed to heat or flame; incomp. with oxidizing agents (increases fire/explosion hazard), hydrogen trisulfide (explosive reaction possible)

Hazardous Decomp. Prods.: Heated to decomp., emits acrid smoke and irritating fumes

NFPA: Health 0, Flammability 2, Reactivity 0

Storage: Store in cool, dry, well-ventilated area out of direct sunlight

Uses: Intermediate for pharmaceuticals

Regulatory: FEMA GRAS; Canada DSL

s-n-Amyl alcohol. See 3-Pentanol

t-Amyl alcohol

CAS 75-85-4; EINECS/ELINCS 200-908-9

UN 1105 (DOT)

Synonyms: Amylene hydrate; Dimethyl ethyl carbinol; 2-Methyl-2-butanol; 2-Methylbutanol-2; 3-Methylbutan-3-ol; t-Pentanol; t-Pentyl alcohol

Classification: Tert. aliphatic alcohol

Empirical: C₅H₁₂O

Formula: CH₃CH₂C(CH₃)₂OH

Properties: Colorless clear volatile liq., char. camphoraceous odor, burning taste; sol. in 8 parts water; misc. with alcohol, ether, benzene, chloroform, glycerin, oils; m.w. 88.15; sp.gr. 0.808 (20/4 C); vapor pressure 10 mm Hg (17.2 C); m.p. -9 C; b.p. 100-103 C; flash pt. (CC) 19 C; ref. index 1.405

Toxicology: LD50 (oral, rat) 1 g/kg; mod. toxic

†=pharmaceutical grade

by ing., IP, subcut. routes; mod. irritating to human mucous membranes; inh. of vapors may cause nose/throat irritation, headache, dyspnea, coughing, nausea, vomiting; drying to skin; can be absorbed thru skin; narcotic in high concs.; a hypnotic agent; ing. may cause 'alcohol' intoxication symptoms; may cause severe lung damage, respiratory and cardiac arrest, death if aspirated into lungs; TSCA listed

Precaution: Flamm. exposed to heat, flame, or oxidizing materials; mod. explosive as vapor exposed to heat or flame

Hazardous Decomp. Prods.: Heated to decomp., emits acrid smoke and irritating fumes

NFPA: Health 0, Flammability 3, Reactivity 0

Storage: Store in cool, well-ventilated area; keep tightly closed; protect from light

Uses: Solvent for pharmaceuticals; medicine (hypnotic, sedative)

Regulatory: USP/NF compliance; Canada DSL

Amyl alcohol, active. See 2-Methyl-1-butanol

Amyl alcohol, commercial. See Fusel oil refined

Amyl alcohol, normal. See n-Amyl alcohol

Amyl alcohols, mixed. See Fusel oil refined

Amylaldehyde. See n-Valeraldehyde

Amylamine; n-Amylamine. See Pentalamine

Amylase

CAS 9000-92-4; EINECS/ELINCS 232-567-7

INS1100

Synonyms: 1,4-D-Glucan glucanohydrolase; Glycogenase

Classification: Enzyme

Definition: Mixt. of enzymes that catalyze the hydrolysis of glycosidic linkages of
chemical component cross-reference

polysaccharides such as glycogen, starch, or their degradation prod.

Properties: Off-wh. powd. or suspension

Toxicology: LD50 (oral, rat) > 15 g/kg; may produce hypersensitivity reactions; TSCA listed

Storage: Hygroscopic; keep under argon

Uses: Enzyme for conversion of starch-glucose sugars in pharmaceuticals; ingred. in digestive enzyme preps.; reduces respiratory tract inflammation and local swelling

Manufacturer/Distributor: Fluka http://www.sigma-aldrich.com; Pangaea Sciences http://www.pangaeaasciences.com

Trade Names: Diastase J-P

Trade Names Containing: Biodiastase 1000; Biodiastase 2000; Pancreatin 3X USP Powder; Pancreatin 4X USP Granular; Pancreatin 5X USP Powder; Pancreatin 6X USP Powder; Pancreatin BP 98; Pancreatin USP 23; Pancreatin USP Powder; Pancrelipase USP Powder; SPL High Lipase Pancreatic Enzyme Conc. (PEC); SPL Pancreatin 4X USP; SPL Pancreatin 6X USP; SPL Pancreatin 8X USP; SPL Pancrelipase USP

Amyl butyrate

CAS 540-18-1; EINECS/ELINCS 208-739-2

UN 2620; FEMA 2059

Synonyms: n-Amyl butyrate; Butanoic acid pentyl ester; Pentyl butanoate; Pentyl butyrate

Empirical: C9H18O2

Formula: CH3(CH2)2CH2COOCH2(CH2)3CH3

Properties: Colorless liq.; strong, penetrating apricot-like odor, sweet taste; very sol. in alcohol, ether; sol. 0.54 g/l in water (50 C); m.w. 158.24; dens. 0.8713 (15/4 C); m.p. 73.2 C; b.p. 185-186 C; ref. index 1.4110 (20 C)

Toxicology: LD50 (oral, rat) 12,210 mg/kg; mildly toxic by ing.; TSCA listed

Hazardous Decom. Prods.: Heated to decomp., emits acrid smoke and irritating fumes

NFPA: Health 1, Flammability 2, Reactivity 0

Uses: Synthetic flavor for pharmaceuticals

Features: Imitation banana flavor; also in apricot, cherry, pear, plum, and pineapple flavors

Regulatory: FDA 21CFR §172.515; FEMA GRAS; Japan approved as flavoring; Canada DSL

†=pharmaceutical grade

n-Amyl butyrate. See Amyl butyrate

γ-N-Amylbutyrolactone. See γ-Nonalactone

Amyl caproate; Amyl capronate. See Amyl hexanoate

Amyl caprylate. See Amyl octanoate

Amylcarbinol. See Hexyl alcohol

Amyl cinnalaldehyde. See α-Amylcinnamaldehyde

α-Amylcinnamaldehyde CAS 122-40-7; EINECS/ELINCS 204-541-5

FEMA 2061

Synonyms: Amyl cinnamal (INCI); Amyl cinnamaldehyde; Amyl cinnamic aldehyde; α-Amyl cinnamic aldehyde; α-Amyl phenylacetolein; 2-Benzylideneheptanal; Heptanal, 2-(phenylmethylene); Jasminaldehyde; Jasmine aldehyde; α-Pentylaldehyde; α-Pentylcinnamaldehyde; 3-Pentyl-3-phenyl-2-propenal; 2-(Phenylmethylene) heptanal

Classification: Organic aromatic compd.

Empirical: C14H18O

Formula: C6H4CH:C(CHO)CH2(CH2)3CH3

Properties: Yellow clear oily liq.; floral (jasmine) odor; sol. in most fixed oils; sol. in 6 vols. of 80% alcohol; m.w. 202.30; dens. 0.970; b.p. 153-154 C (10 mm); flash pt. > 230 F; ref. index 1.5552 (20 C)

Toxicology: LD50 (oral, rat) > 15 g/kg; may produce hypersensitivity reactions; TSCA listed

Precaution: Combustible

Hazardous Decom. Prods.: Heated to decomp., emits acrid smoke and fumes

Uses: Synthetic flavor, fragrance for pharmaceuticals

Regulatory: FDA 21CFR §172.515; FEMA GRAS; Japan approved as flavoring; Canada DSL
α-Amyl cinnamaldehyde

CAS 91-87-2; EINECS/ELINCS 202-104-3
FEMA 2062

Synonyms: Amylcinnamaldehyde; α-N-Amyl cinnamaldehyde; α-N-Amyl-β-phenyl acrolein dimethyl acetal; 1,1-Dimethoxy-2-amyl-3-phenyl-2-propene; (2-(Dimethoxymethyl)-1-heptenyl) benzene

Empirical: C_{16}H_{22}O_2

Formula: C_6H_5CH=CH(CH_2)_4CH_3CH(OCH_3)_2

Properties: Pale yel. liq.; sol. in alcohol; insol. in water; m.w. 248.37; sp. gr. 0.953-0.963; b.p. 300 C; acid no. 1.0 max.; ref. index 1.508-1.513

Uses: Synthetic flavor for pharmaceuticals

Regulatory: FDA 21CFR §172.515; FEMA GRAS; Canada DSL

CAS 101-85-9; EINECS/ELINCS 202-982-8
FEMA 2065

Synonyms: α-Aryl cinnamic alcohol; n-Aryl cinnamic alcohol; 2-Aryl-3-phenyl-2-propen-1-ol; 2-Benzylidene-heptan-2-ol; 2-Benzylidene-1-heptanol; α-Pentylcinnamyl alcohol; 2-Pentyl-3-phenylprop-2-en-1-ol

Empirical: C_{14}H_{20}O

Properties: Ylsh. liq.; m.w. 204.31; flash pt. > 100 C; ref. index 1.5330-1.5400 (20 C)

Toxicology: LD50 (oral, rat) 4 g/kg, (skin, rabbit) > 5 g/kg; mod. toxic by ing.; TSCA listed

Hazardous Decomp. Prods.: Heated to decomp., emits acrid smoke and irritating fumes

Uses: Synthetic flavor for pharmaceuticals

Regulatory: FDA 21CFR §172.515; FEMA GRAS; Canada DSL

Handbook of Pharmaceutical Additives, Third Edition 895
α-Amylcinnamyl formate
CAS 7493-79-0; EINECS/ELINCS 231-341-5
FEMA 2066
Synonyms: α-n-Amyl-β-phenylacryl formate; 2-Benzylidene-1-heptyl for; α-Pentylcinnamyl formate; 2-(Phenyl methylene) heptyl formate

Empirical: C15H20O2

Properties: Colorless cl. liq., herbaceous odor; sol. in alcohol; m.w. 232.33
Uses: Synthetic flavor for pharmaceuticals
Features: Sweet oily herbal green odor
Regulatory: FDA 21CFR §172.515; FEMA GRAS; Canada DSL

α-Amylcinnamyl isovalerate
CAS 7493-80-3
FEMA 2067
Synonyms: α-n-Amyl-β-phenylacryl isovalerate; Floxin isovalerate; α-Pentylcinnamyl isovalerate

Empirical: C19H28O2

Properties: Colorless liq., mild fruity odor, somewhat spicy flavor; sol. in alcohol; m.w. 288.43
Uses: Synthetic flavor for pharmaceuticals
Regulatory: FDA 21CFR §172.515; FEMA GRAS; Canada DSL

2-Amylecyclopentanoneacetic acid methyl ester. See Methyl dihydrojasmonate
Amylene hydrate. See t-Amyl alcohol
Amyl ethyl carbinol. See 3-Octanol
Amyl ethyl ketone; n-Amyl ethyl ketone. See 3-Octanone

Amyl formate
CAS 638-49-3; EINECS/ELINCS 211-340-6
UN 1109 (DOT); FEMA 2068
Synonyms: n-Amyl formate; Formic acid, pentyl ester; Pentyl formate; n-Pentyl formate

Empirical: C6H12O2
Formula: HCOOC5H11

Properties: Colorless liq.; plum-like odor; misc. with oils, hydrocarbons, alcohols, ether, ketones; sl. sol. in water; m.w. 116.16; dens. 0.880-0.885; m.p. -73.5 C; b.p. 123.5 C; flash pt. 26.6 C

Toxicology: LD50 (oral, rat) > 5 g/kg, (skin, rabbit) > 5 g/kg; toxic by inh. and ing.; mod. irritant by skin contact; TSCA listed
Precaution: Flamm.; dangerous fire risk;
-reacts vigorously with heat, flame, oxidizing materials
NFPA: Health 1, Flammability 3, Reactivity 0
Uses: Synthetic flavor for pharmaceuticals
Features: Fruity flavor
Regulatory: FDA 21CFR §172.515; FEMA GRAS; Canada DSL

Manuf./Distrib.: Grau Aromatics

Amyl heptanoate
CAS 7493-82-5
FEMA 2073
Synonyms: n-Amyl heptanoate; Amyl heptatel; Amyl heptylate; Pentyl heptanoate

Empirical: C12H24O2

Properties: Colorless liq., fruity odor; sol. in most organic solvents; m.w. 200.32; b.p. 245.4 C; ref. index 1.42627 (20 C)

Toxicology: TSCA listed
Hazardous Decomp. Prods.: Heated to decomp., emits acrid smoke and fumes
Uses: Flavor for pharmaceuticals
Regulatory: FDA 21CFR §172.515; FEMA GRAS; Canada DSL

Manuf./Distrib.: Grau Aromatics
http://www.grau-aromatics.de; Lluch Essence http://www.lluch-essence.com

n-Amyl heptanoate; Amyl heptatel; Amyl heptylate. See Amyl heptanoate

Angelica (Angelica archangelica) extract
CAS 84775-41-7; 977032-49-7; 8015-66-3; EINECS/ELINCS 283-871-1
FEMA 2087
Synonyms: Angelica archangelica; Angelica archangelica extract; Angelica extract; Angelica root extract; Archangelica officinalis; European angelica extract; Garden angelica extract

Definition: Extract of roots of Angelica archangelica
Properties: Pale yel. to amber liq., pungent odor, bitter-sweet taste; sol. in fixed oils; sl. sol. in min. oil
Toxicology: May cause skin rash or swelling when exposed to light
Hazardous Decomp. Prods.: Heated to decomp., emits acrid smoke and irritating fumes
Uses: Natural flavor for toothpaste, mouthwashes; medicinally for gas, to increase sweating, and reduce body water; aromatic, stimulant, carminative, diuretic, diaphoretic
Use Level: 0.78% max. in skin cosmetics likely exposed to sunlight
Regulatory: FDA 21CFR §182.20, GRAS; FEMA GRAS

**Properties:** Colorless or pale yel. liq.; crushed fruit odor, sweet aromatic taste; freely sol. in chloroform, ether; sol. in DMSO, 95% ethanol, acetone; sol. in 3 vols. alcohol; sol. < 1 mg/ml in water; dens. 0.978-0.988 (25/25 C); m.p. 17 C; solid. pt. 15 C min.; b.p. 232 C; flash pt. 92.8 C; ref. index 1.553-1.560; tenacity 20 hrs. on blotter

**Toxicology:** LD50 (oral, rat) 2250 mg/kg, (skin, rabbit) > 5 g/kg; mod. toxic by ing.; may be harmful by inh., ing., skin absorp.; may cause eye/skin/respiratory tract irritation; may cause allergic skin reaction; weak sensitizer; may cause contact dermatitis due to anethole content; anethole is quite toxic in animals, but considered safe in humans @ 2.5 mg/kg dose; mutation data reported; TSCA listed

**Precaution:** Combustible; exposure to air causes polymerization, some oxidation; incomp. with strong oxidizing agents

**Hazardous Decomp. Prods.:** CO, CO2; heated to decomp., emits acrid smoke and irritating fumes; emits toxic fumes under fire conditions

**Storage:** Store @ ambient temps. in well-closed containers; keep under inert atmosphere; may be light-sensitive; protect from light; do not store in PVC bottles

**Uses:** Natural flavor for pharmaceuticals, orals, buccals, toothpaste; carminative; mild expectorant in cough preps.

**Regulatory:** FDA 21CFR §182.10, 182.20, 582.20, GRAS; 27CFR §21.65, 21.151; FEMA GRAS; BP, EP compliance; Australia; Canada DSL; Philippines PICCS

**Handbook of Pharmaceutical Additives, Third Edition**

903
Chemical Component Cross-Reference

**Classification:** Aromatic organic compd.

**Empirical:** C₇H₉NO

**Properties:** M.w. 123.16; dens. 1.102 (20/4 C); b.p. 251 C; flash pt. 126 C; ref. index 1.581 (20 C)

**Toxicology:** LD₅₀ (oral, quail) 562 mg/kg; mod. toxic by ing.; mutagen; anisidine and its hydrochloride may reasonably be expected to be carcinogens; TSCA listed

**Hazardous Decomp. Prods.:** Heated to decomp., emits toxic fumes of NOₓ

**Storage:** Photosensitive

**Uses:** Pharmaceutical intermediate

**o-Anisidine**

CAS 90-04-0; EINECS/ELINCS 201-963-1

**UN 2431 (DOT)**

**Synonyms:** 2-Aminoanisole; o-Anisidine; 1-Amino-2-methoxybenzene; 2-Anisidine; o-Anisylamine; Benzenamine, 2-methoxy-; 2-Methoxy-1-aminobenzene; 2-Methoxyaniline; o-Methoxyaniline; 2-Methoxybenzenamine; o-Methoxybenzenamine

**Classification:** Aromatic organic compd.

**Empirical:** C₇H₉NO

**Properties:** Lt. yel. liq.; sol. in water, dil. acid, org. solvs.; insol. in water; m.w. 123.16; sp.gr. 1.098 (15/15 C); m.p. 5 C; b.p. 225 C; flash pt. 100 C; ref. index 1.575 (20 C)

**Toxicology:** ACGIH TLV/TWA 0.5 mg/m³ (skin); LD₅₀ (oral, rat) 1320 mg/kg, (dermal, rat) 3200 mg/kg, (IP, rat) 1400 mg/kg; mod. toxic; mild sensitizer; can cause contact dermatitis; may cause eye irritation; inh. of dust can irritate nose and throat, and cause methemoglobinemia, cyanosis, headache, shortness of breath, nausea, vomiting, dizziness, drowsiness, irregular heartbeat; tumorigen; mutagen; TSCA listed

**Hazardous Decomp. Prods.:** CO, CO₂; heated to decomp., evolves toxic fumes of NOₓ

**Storage:** Photosensitive

**Uses:** Pharmaceutical intermediate

**Regulatory:** Canada DSL

**p-Anisidine**

CAS 104-94-9; EINECS/ELINCS 203-254-2

UN 2431; UN 3143

**Synonyms:** 4-Aminoanisole; p-Aminoanisole; 1-Amino-4-methoxybenzene; 4-Anisidine; p-Anisylamine; 4-Methoxy-1-aminobenzene; 4-Methoxyaniline; p-Methoxyaniline; 4-Methoxybenzenamine; 4-Methoxybenzenamine

**Classification:** Aromatic organic compd.; Substituted aromatic amine

**Empirical:** C₇H₈NO

**Properties:** Wh. fused cryst. solid; may darken on exposure to light and air; char. amine odor; very sol. in ethanol, methanol, diethyl ether; sol. in hot water, acetone, benzene, ether, org. solvs.; m.w. 123.16; dens. 1.089 (55/55 C); m.p. 56-59 C; b.p. 246 C; flash pt. 122 C

**Toxicology:** ACGIH TLV/TWA 0.5 mg/m³ (skin); LD₅₀ (oral, rat) 1320 mg/kg, (dermal, rat) 3200 mg/kg, (IP, rat) 1400 mg/kg; mod. toxic; can cause contact dermatitis; may cause eye irritation; inh. of dust can irritate nose and throat, and cause methemoglobinemia, cyanosis, irregular heartbeat; tumorigen; mutagen; TSCA listed

**Hazardous Decomp. Prods.:** CO, CO₂; heated to decomp., evolves toxic fumes of NOₓ

**Storage:** Photosensitive

**Uses:** Pharmaceutical intermediate

**Regulatory:** Canada DSL

Chemical Component Cross-Reference

Anisketone. See 1-(p-Methoxyphenyl)-2-propanone
p-Anisol alcohol. See p-Anisyl alcohol

Anisole
CAS 100-66-3; EINECS/ELINCS 202-876-1; UN 2222 (DOT); FEMA 2097
Synonyms: Benzene, methoxy; Ether, methyl phenyl; Methoxybenzene; Methylphenyl ether; Phenol methyl ether; Phenyl methylether
Classification: Ether
Empirical: C7H8O
Formula: CH3OC6H5
Properties: Colorless or straw liq.; anise-like odor; sol. in alcohol, ether, oxygenated solvs.; insol. in water; m.w. 108.13; dens. 0.992; vapor pressure 10 mm (42.2 C); m.p. -37 C; b.p. 154 C; flash pt. 42 C; autoignition temp. 475 C; ref. index 1.515-1.518; surf. tens. 35 dynes/cm; dielec. const. 4.33
Toxicology: LD50 (oral, rat) 3700 mg/kg; LC50 (inh., mouse, 2 h) 3021 mg/m3; mod. toxic by ing. and inh.; skin irritant; target organs: CNS, respiratory system; TSCA listed
Environmental: VOC; ThOD 2.52
Precaution: Flamm. liq.; mod. flamm. exposed to heat, flame, or oxidizers
Hazardous Decomp. Prods.: Heated to decomp., emits acrid fumes
NFPA: Health 1, Flammability 2, Reactivity 0
Uses: Solvent, synthetic flavor for pharmaceuticals; pharmaceutical intermediate
Regulatory: FDA 21CFR §172.515; FEMA GRAS; Canada DSL

†=pharmaceutical grade

Anisole, p-methoxy-. See p-Dimethoxybenzene
Anisole, o-methyl-. See o-Methylanisole
Anisyl acetate. See p-Anisyl acetate

p-Anisyl acetate
CAS 104-21-2; EINECS/ELINCS 203-185-8; FEMA 2098
Synonyms: Acetic acid 4-methoxybenzyl ester; Anisyl acetate; 4-Methoxybenzyl acetate; p-Methoxybenzyl acetate
Classification: Aromatic ester
Empirical: C10H12O3
Formula: CH3OC6H4CH2COCH3
Properties: Colorless to sl. yel. liq.; floral, fruit-like odor; sweet taste; sol. in org. solvs., alcohol, most oils; insol. in water, glycerin, propylene glycol; m.w. 180.21; dens. 1.104; b.p. 270 C; flash pt. 210 F; ref. index 1.511-1.516 (20 C)
Toxicology: TSCA listed
Precaution: Combustible liq.
Hazardous Decomp. Prods.: Heated to decomp., emits acrid smoke and irritating fumes
Uses: Synthetic flavor for pharmaceuticals
Features: Vanilla, plum-like flavor
Regulatory: FDA 21CFR §172.515; FEMA GRAS; Canada DSL
2-(p-Anisyl) acetic acid. See \( p\)-Methoxyphenylacetic acid

Anisyl acetone. See 4-p-Methoxyphenyl-2-butanoate

### p-Anisyl formate

**Chemical Component Cross-Reference**

- Chemical Name: p-Anisyl formate
- CAS Number: 102-17-0
- EINECS/ELINCS: 203-010-5
- FEMA: 3740
- Synonyms: p-Anisyl phenylacetate; Anisyl α-toluate; p-Methoxybenzyl phenyl acetate; Phenylacetic acid, p-methoxybenzyl ester

**Properties:**
- Colorless, oily liq.; honey-like odor; sol. in alcohol; m.w. 256.30; b.p. 370 °C

**Toxicology:**
- LD50 (oral, rat) > 5 g/kg, (skin, rabbit) > 5 g/kg; low toxicity by ing. and skin contact; skin irritant

**Hazardous Decomp. Prods.:**
- Heated to decomp., emits acrid smoke and irritating fumes

**Uses:**
- Synthetic flavor for pharmaceuticals

**Regulatory:**
- FDA 21CFR §172.515; FEMA GRAS; Canada DSL

**Manuf./Distrib.:**
- Penta Mfg. [http://www.pentamfg.com](http://www.pentamfg.com)

### p-Anisyl phenylacetate

**Chemical Component Cross-Reference**

- Chemical Name: p-Anisyl phenylacetate
- CAS Number: 57-59-8
- EINECS/ELINCS: 203-010-5
- FEMA: 3740
- Synonyms: p-Anisyl propionate; 4-Methoxybenzyl propanoate; p-Methoxybenzyl propionate

**Properties:**
- Herbaceous odor; fruity taste; m.w.194.23; dens. 1.070; b.p. 277 °C; flash pt. >230 °F; ref. index 1.5490 (20 °C)

**Uses:**
- Synthetic flavor for pharmaceuticals

**Regulatory:**
- FDA 21CFR §172.515; FEMA GRAS; Canada DSL

Annatto (Bixa orellana) extract
CAS 1393-63-1; 8015-67-6
FEMA 2103; INS160b; E160b
Synonyms: Achiote; Annatto extract; Annatto tree extract; Annotta extract; Bixa orellana; Bixin; CI 75120; Natural orange 4
Definition: Carotenoid color contg. bixin (oil/fat extract) or norbixin (alkaline aq. extract), derived from Bixa orellana
Properties: Yel.-red sol'ns. or powd.
Toxicology: LD50 (IP, mouse) 700 mg/kg; mod. toxic by IP route; human systemic effects by skin contact; may cause asthma, rashes
Hazardous Decomp. Prods.: Heated to decomp., emits acrid smoke and irritating fumes
Uses: Colorant for pharmaceuticals, incl. those for eye area use
Regulatory: FDA 21CFR §73.30, 73.1030, 73.2030; permanently listed as a color in 1977; exempt from certification, permanently listed for drug use; FEMA GRAS; Japan restricted use
Manuf./Distrib.: Bio-Botanica http://www.biobotanica.com; Chr. Hansen Inc http://www.chr-hansen.com; Degussa AG/Health & Nutrition
See also Norbixin
Annatto extract. See Annatto (Bixa orellana) extract

9,10-Anthracenedione, 1,4-bis [(4-methylphenyl) amino]-. See CI 61565; D&C Green No. 6; Solvent green 3
Antranilic acid
CAS 118-92-3; EINECS/ELINCS 204-287-5
Synonyms: o-Amidobenzoic acid; 2-Aminobenzoic acid; o-Aminobenzoic acid; 1-Amino-2-carboxybenzene; Carboxyaniline; 2-Carboxyaniline; o-Carboxyaniline; Vitamin L
Classification: Aromatic organic compd.
Empirical: C7H7NO2
Formula: C9H4(NH2)(CO2H)
Properties: Wh. to ylsh. cryst. powd., sweetish taste; sol. in hot water, alcohol, ether, oxygenated solvs.; m.w. 137.14; m.p. 144-146 C (sublimes)
Toxicology: LD50 (oral, mouse) 1400 mg/kg, (IP, mouse) > 500 mg/kg; TDLo (oral, rat) 16 g/kg; mod. toxicity by ing. and IP route; irritant; experimental tumorigen and reproductive effects; possible carcinogen; TSCA listed
Precaution: Combustible
Hazardous Decomp. Prods.: Thermal decomp. prods.: NOx
Uses: Intermediate for pharmaceuticals
Regulatory: BP, EP compliance; Canada DSL
Chemical Component Cross-Reference

Anthranilic acid cinnamyl ester. See Cinnamyl anthranilate

Anti-infective vitamin. See Retinol
Antimonous chloride; Antimony butter; Antimony chloride; Antimony (III) chloride. See Antimony trichloride

Antimony trichloride
CAS 10025-91-9; EINECS/ELINCS 233-047-2 UN 1733 (DOT)
Synonyms: Antimonous chloride; Antimony butter; Antimony chloride; Antimony (III) chloride; ATC; Butter of antimony; Caustic antimony; CI 77056; Stibine, trichloro-; Trichlorostibine
Empirical: Cl₃Sb
Formula: SbCl₃
Properties: Wh. to lt. yel. orthorhombic cryst.; sol. in alcohol, benzene, ether, acetone, carbon disulfide, chloroform; sol. 99 g/l in water; insol. in pyridine, quinoline; fumes in air; m.w. 228.13; dens. 3.14; vapor pressure 1 mm Hg (49.2 C); m.p. 73 C; b.p. 223.5 C; ref. index 1.4600

†=pharmaceutical grade

Toxicology: ACGIH TLV/TWA 0.5 mg (Sb)/m³; LD₅₀ (oral, rat) 525 mg/kg; mod. toxic by ing.; human pulmonary effects by inh.; irritant; corrosive; experimental reproductive effects; mutation data reported; TSCA listed
Precaution: DOT: Corrosive material; reacts violently with aluminum, potassium, sodium

Hazardous Decomp. Prods.: Heated to decomp., emits very toxic fumes of chlorine and antimony

Storage: Hygroscopic, deliq.; moisture-sensitive
Uses: Chlorinating agent in pharmaceuticals
Regulatory: Canada DSL

Anti-pellagra vitamin. See Nicotinic acid

Antipyrine
CAS 60-80-0; EINECS/ELINCS 200-486-6
Synonyms: Analgesine; Anodynine; Dimethoxychinizin; Dimethoxyquinazine; 2,3-Dimethyl-1-phenyl-3-pyrazolin-5-one; 2,3-Dimethyl-1-phenyl-5-pyrazolone; Oxydimethylquinazine; Phenazone; 1-Phenyl-2,3-dimethylpyrazole-5-one; 1-Phenyl-2,3-dimethyl-5-pyrazolone
Empirical: C₁₁H₁₂N₂O
Formula: (CH₃)₂(C₆H₅)C₃HN₂O
Properties: Wh. powd., odorless, sl. bitter taste; sol. in water, chloroform, alcohol; sl. sol. in ether; m.w. 188.22; dens. 1.19; m.p. 111 C; b.p. 319 C
Toxicology: LD₅₀ (rat) 1.8 g/kg, (IP, mouse)
**Chemical Component Cross-Reference**

750 mg/kg, (subcut., mouse) 1000 mg/kg, (IV, mouse) 500 mg/kg; human poison; mod. toxic by ing., subcut., IV routes; irritant; possible carcinogen, tumorigen, mutagen; TSCA listed

Hazardous Decomp. Prods.: Heated to decomp., emits toxic fumes of NOx

Uses: In ophthalmic pharmacy; medicine (analgesic)

Regulatory: Canada DSL

**Antixerophthalmic vitamin. See Retinol**

**Apafurane**. See 1,1,1,2,3,3-Heptafluoropropane

**APDEA. See N-(3-Aminopropyl)diethanolamine**

**Apium graveolens oil; Apium graveolens seed oil. See Celery (Apium graveolens) seed oil**

**APM. See Aspartame**

**Apple acid. See N-Hydroxysuccinic acid**

**Apple essence. See Isoamyl isovalerate**

**Apple extract. See Apple (Pyrus malus) extract**

**Apple oil. See Isoamyl isovalerate**

**Apple pectin**

Properties: Lt. beige powd.; neutral odor; sol. in water (visc., colloidal sol'n.); insol. in org. solvs.; pH 2.8

Uses: Dietary fiber for pharmaceuticals

**Apple (Pyrus malus) extract**

CAS 85251-63-4; 89957-48-2; EINECS/ELINCS 286-475-7; 289-567-5

†=pharmaceutical grade

**Synonyms:** Apple extract; Pyrus malus; Pyrus malus extract

**Definition:** Extract of the fruit of the apple, Pyrus malus

**Uses:** Antioxidant; free radical scavenger; anti-inflammatory

**Trade Names Containing:** Micromerol™

**Apricot kernel oil. See Apricot (Prunus armeniaca) kernel oil**

**Apricot kernel oil PEG-6 esters**

CAS 97488-91-0

**Definition:** Complex mixture formed from the transesterification of apricot kernel oil and PEG-6

**Properties:** Nonionic

**Uses:** Solvent, solubilizer, emulsifier, vehicle, excipient for pharmaceuticals

**Features:** Hydrophilic

**Trade Names:** Labrafil® M 1944 CS

**Apricot ketone. See Pentyl 2-furyl ketone**

**Apricot nut oil. See Apricot (Prunus armeniaca) kernel oil**

**Apricot (Prunus armeniaca) kernel oil**

CAS 72869-69-3

**FEMA 2105**

**Synonyms:** Apricot kernel oil; Apricot nut oil; Persic oil; Prunus armeniaca; Prunus armeniaca oil

**Definition:** Fixed oil expressed from kernels of Prunus armeniaca

**Properties:** Colorless or pale straw clear oily liq., nearly odorless, bland taste; sl. sol. in alcohol; misc. with chloroform, ether, petrol. spirit; insol. in water; sp.gr. 0.910-0.923; acid no. 1 max.; iodine no. 90-115; sapon. no. 185-195; ref. index 1.4635-1.4655 (40 C)

**Toxicology:** No known toxicity

**Uses:** Oily vehicle, emollient, lubricant, softener, conditioner for pharmaceuticals

**Regulatory:** FDA 21CFR §182.40, GRAS; FEMA GRAS; Canada DSL

Handbook of Pharmaceutical Additives, Third Edition
Arabinogalactan
CAS 9036-66-2; EINECS/ELINCS 232-910-0
FEMA 3254; INS409
Synonyms: (+)-Arabinogalactan;
Arabinogalactoglycan; Larch gum; Larch turpentine; Polyarabinogalactan; Stractan; Venetian turpentine
Classification: Natural oleoresin
Definition: Polysaccharide extracted from Western larch wood, Larix occidentalis, having galactose and arabinine units in approx. ratio 6:1
Properties: Lt. yel. to amber very visc. liq.; balsam pine odor; sol. in water; m.p. > 200°C (dec.)
Toxicology: TSCA listed
Hazardous Decomp. Prods.: Heated to decomp., emits acrid smoke and irritating fumes
Storage: Hygroscopic; keep under argon
Uses: Flavor for pharmaceuticals
Regulatory: FDA 21CFR §172.230, 172.610; FEMA GRAS; Japan approved

Arabinoascorbic acid; d-Araboscorbic acid. See Erythorbic acid

Arachidyl alcohol
CAS 629-96-9; EINECS/ELINCS 211-119-4
Synonyms: Alcohol C20; Eicosanol; 1-Eicosanol
Classification: Nonaromatic fatty alcohol
Empirical: C20H42O
Formula: CH3(CH2)18CH2OH
Properties: Wh. wax-like solid; insol. in water; sol. in alcohol, hot benzene; m.w. 298.56; m.p. 66.5°C; b.p. 369°C
Toxicology: TSCA listed
Precaution: **Combustible**

Uses: Raw material; emollient; lubricant, consistency agent for pharmaceutical topicals, creams, ointments, liniments, lotions, sticks

Regulatory: Canada DSL

Trade Names: Cachalot® AR-20; Nacol® 20-95; NafoL® 1822; Nafol® 1822 B; NafoL® 1822 C

Arachidyl-behenyl alcohol
EINECS/ELINCS 292-327-2
Uses: Emollient in pharmaceuticals
Trade Names Containing: Montanov® 202

Arachidyl glucoside
CAS 100231-68-3; EINECS/ELINCS 309-369-5
Synonyms: D-Glucoyparyanoside, C20 straight chain monoalkyl-; D-glucoside, eicosyl
Empirical: C26H52O6
Properties: White flakes; m.w. 460; m.p./f.p. 74-78°C; Density 859 kg/m3 at 20°C; water solubility >100 g/L at 20°C; flash point >100°C at 101.3 kPa
Toxicology: Nonirritating to eyes, skin at normal use concentrations; nonhaemolysing; slight evidence of reactions indicative of skin sensitisation; noncomedogenic

Environmental: Readily biodegradable; with alkyl polyglycosides of C8-16: LC50 (96 h, zebra fish) 7.8 mg/L, EC50 (daphnia magna, 48 h) >85 mg/L; with alkyl polyglycosides of C12-14: LC50 (96 h, zebra fish) 2.5-5.0 mg/L; EC50 (daphnia magna, 48 h) >7-12 mg/L
Uses: Used at levels of less than 1.5% as an emulsifier and to contribute to qualities of smoothness, thickness and creamy consistency in cosmetic cream and lotion products
Trade Names Containing: Montanov® 202

Arachidyl propionate
CAS 65591-14-2; EINECS/ELINCS 265-839-9
Synonyms: Eicosanyl propanoate; Eicosanyl propionate; Icosanyl propionate
Definition: Ester of arachidyl alcohol and behenic acid

Empirical: C23H46O2
Formula: CH3CH2COOCH2(CH2)18CH3
Toxicology: TSCA listed
Uses: Wax and emollient used to soothe the skin in pharmaceuticals
Regulatory: Canada DSL

Arachis hypogaea; Arachis oil. See Peanut (Arachis hypogaea) oil
Arbanol. See (exo)-2-Camphanyl-β-hydroxyethyl ether
Arborvitae; Arborvitae oil. See Cedar leaf (Thuja occidentalis) oil
Archangelica officinalis. See Angelica (Angelica archangelica) extract
Argan (Argania spinosa) kernel oil
CAS 91080-23-8
Synonyms: Argania spinosa kernel oil; Argan oil
Uses: Emollient, moisturizer, free radical scavenger, protectant in nutraceuticals
Trade Names Containing: Stimu-Tex® AS

Argania spinosa kernel oil; Argan oil. See Argan (Argania spinosa) kernel oil
Argentum. See Silver
Argeol. See Santalol
Arginine (INCI). See L-Arginine

L-Arginine
CAS 74-79-3; EINECS/ELINCS 200-811-1
FEMA 3819
Synonyms: 1-1-Amino-4-guanidovaleric acid; L-Amino-4-guanidovaleric acid; Arginine (INCI)
Classification: Amino acid
Empirical: C6H14N4O2
Formula: H2NCNHNHCH2CH2CH2CHNH2COOH
Properties: Wh. cryst. powd.; sol. in water; sl. sol. in alcohol; insol. in ether; m.w. 174.20; m.p. 235°C (dec.); strongly alkaline
Toxicology: Mutagen; TSCA listed
Hazardous Decomp. Prods.: Heated to decompose, emits toxic fumes of NOx
Uses: Pharmaceuticals (injectables); medicine (raw material for peptide drugs); in treatment of liver disease; ammonia detoxicant (hepatic failure); diagnostic aid (pituitary function)
Regulatory: FDA 21CFR §172.320, limitation 6.6%; Japan approved; USP/NF, BP, EP compliance; Canada DSL
L-Arginine monohydrochloride

CAS 1119-34-2; EINECS/ELINCS 239-674-8
FEMA 3819

Synonyms: L-1-Amino-4-guanidovaleric acid monohydrochloride; Arginine HCl; Arginine hydrochloride; L-Arginine hydrochloride; Arginine monohydrochloride; 1-Hydrochloride arginine

Empirical: C_{6}H_{15}ClN_{4}O_{2}

Formula: C_{6}H_{14}N_{4}O_{2} • HCl

Properties: Wh. cryst. powd., odorless; sol. in water, sl. sol. in hot alcohol; insol. in ether; m.w. 210.66; dec. 235 C

Toxicology: LD_{50} (oral, rat) 12 g/kg, (IP, rat) 3793 mg/kg; mod. toxic by IP route; mildly toxic by ing.; experimental teratogen; TSCA listed

Hazardous Decomp. Prods.: Heated to decomp., emits toxic fumes of NO_{x} and HCl

Uses: Dietary supplement, nutrient in pharmaceuticals

Regulatory: Canada DSL

Manuf./Distrib.: AMRESCO†

http://www.amresco-inc.com; Aceto
http://www.aceto.com; Adept Sol'n's†; Advanced Synthesis Tech.
VWR Int'l.† http://www.vwrsp.com; Voigt Global Distrib.† http://www.vgdlc.com

Arginine HCl; Arginine hydrochloride; L-Arginine hydrochloride; Arginine monohydrochloride. See L-Arginine monohydrochloride
Aromatic elixir
UN 1170
Synonyms: Elixir aromaticum
Definition: A sol’n. of various chemicals (e.g., syrup, talc) in ethanol
Properties: Pale yel. liq.; sol. in water; sp.gr. 1.06; vapor pressure 5.7 kPa (20 C); m.p. may start to solidify @ -114.1 C; b.p. 778.5 C; flash pt. (CC) 12.78 C; pH 5.5-6.0
Toxicology: LD50 (oral, rat) 7060 mg/kg; skin/eye/respiratory irritant; sl. hazardous by ing., inh.; nonpermeator by skin; toxic to reproductive system (ethyl alcohol); mod. toxic and narcotic in high concs.; experimental tumorigen; TSCA listed
Precaution: DOT: Flamm. liq.; sl. reactive to reactive with oxidizing agents
Hazardous Decomp. Prods.: Combustion: CO, CO2
HMIS: Health 1, Flammability 2, Reactivity 0
Storage: Store in segregated approved area; keep container in cool, well-ventilated area; keep container closed; avoid ignition sources
Uses: Vehicle, flavor for pharmaceutical orals; carminative
Regulatory: NF compliance
Manuf./Distrib.: Spectrum Quality Prods.† http://www.spectrumchemical.com

Arrowroot starch. See Starch

Arsenic butter; Arsenic chloride; Arsenic (III) chloride. See Arsenic trichloride

Arsenic trichloride
CAS 7784-34-1; EINECS/ELINCS 232-059-5
UN 1560 (DOT)
Synonyms: Arsenic butter; Arsenic chloride; Arsenic (III) chloride; Arsenious chloride; Arsenous chloride; Arsenous trichloride; Butter of arsenic; Fuming liquid arsenic; Trichloroarsine
Classification: Inorg. compd.
Empirical: AsCl3
Properties: Colorless oily liq.; misc. with chloroform, CCl4, ether, iodine, P, S, alkali iodides, fats, oils; fumes in air; dec. in water and by UV light; m.w. 181.28; dens. 2.1497; vapor pressure 10 mm (23.5 C); m.p. -16 C; b.p. 130 C; ref. index 1.6006
Toxicology: ACGIH TLV/TWA 0.2 mg(As)/m3; LCLo (inh., mouse, 10 min 336 ppm; DOT: Poisonous material; poison by inh.; strong irritant to eyes and skin; mutation data; TSCA listed
Precaution: Dec. by UV rays; highly reactive;
Asafetida (Ferula asafoetida) gum

CAS 9000-04-8; EINECS/ELINCS 232-522-1
FEMA 2107

Synonyms: Asafetida; Asafoetida gum; Asafoetida; Asafoetida oil; Asant; Devil's dung; Ferula: Ferula asafoetida; Ferula asafoetida gum; Food of the gods; Stinking gum

Definition: Gum resin exudate from rhizome and roots of Ferula asafoetida

Properties: Strong garlic odor; sl. bitter acrid taste

Toxicology: Mutagen; TSCA listed

Uses: Natural flavor for pharmaceuticals; topicals; antispasmodic carminative in flatulent colic, laxatives; stimulant; aromatic; digestive; expectorant; sedative; anthelmintic; aphrodisiac; antiseptic; analgesic

Regulatory: FDA 21CFR §182.20, GRAS; FEMA GRAS; Japan approved; Canada DSL

Manuf./Distrib.: Buckton Page Ltd

http://www.bucktonpage.com

Asafetida fluid extract

CAS 90028-70-9; 9000-04-8; EINECS/ELINCS 297-382-6
FEMA 2106

Synonyms: Asafetida extract; Asafetida fluid extract; Ferula asafoetida; Ferula asafoetida gum extract; Ferula asafoetida gum extract; Ferula foetida; Ferula foetida extract

Definition: Brown, gum resin obtained from the roots of Ferula foetida

Uses: Natural flavor for pharmaceuticals

Regulatory: FDA 21CFR §182.20, GRAS; FEMA GRAS

Manuf./Distrib.: Chart

http://www.chartcorp.com

Asafetida gum

CAS 9000-04-8; EINECS/ELINCS 232-522-1
FEMA 2107

Synonyms: Asafetida; Asafoetida gum; Asafoetida; Asafoetida oil; Asant; Devil's dung; Ferula: Ferula asafoetida; Ferula asafoetida gum; Food of the gods; Stinking gum

Definition: Gum resin exudate from rhizome and roots of Ferula asafoetida

Properties: Strong garlic odor; sl. bitter acrid taste

Toxicology: Mutagen; TSCA listed

Uses: Natural flavor for pharmaceuticals; topicals; antispasmodic carminative in flatulent colic, laxatives; stimulant; aromatic; digestive; expectorant; sedative; anthelmintic; aphrodisiac; antiseptic; analgesic

Regulatory: FDA 21CFR §182.20, GRAS; FEMA GRAS; Japan approved; Canada DSL

Manuf./Distrib.: Buckton Page Ltd

http://www.bucktonpage.com

Asafetida fluid extract. See Asafetida (Ferula foetida) extract
**A**safetida gum.  See *Asafetida (Ferula asafoetida) gum*

Asafoetida; Asafoetida oil; Asant.  See *Asafetida (Ferula asafoetida) gum*

**Ascorbic acid (INCI); 1-Ascorbic acid.**  See *L-Ascorbic acid*

**L-Ascorbic acid**

CAS 50-81-7; EINECS/ELINCS 200-066-2

FEMA 2109; INS300; E300

Synonyms:  Ascorbic acid (INCI); 1-Ascorbic acid; Cetivamin; Civitamic acid; 3-Keto-L-gulofuranolactone; 1-3-Ketothreohexuronic acid lactone; L-Lyxoascorbic acid; 3-Oxo-1-gulofuranolactone; Vitamin C; 1-Xyloascorbic acid

Classification:  Organic compd.

Empirical:  C6H8O6

Properties:  Wh. or sl. yel. cryst. or powd.; sol. in water; sl. sol. in alcohol; insol. in ether, chloroform, benzene, petrol. ether, oils, fats; m.w. 176.14; m.p. 192 C; flash pt. 99 C

Toxicology:  LD50 (oral, rat) 11,900 mg/kg, (IV, mouse) 518 mg/kg; mod. toxic by ing., IV routes; human blood systemic effects by IV route; extremely high repeated doses may cause nausea, diarrhea, GI disturbances, flatus; acute renal failure and tubular necrosis; experimental teratogen, reproductive effects; mutagenic data; TSCA listed

Precaution:  Combustible liq.

Hazardous Decomp. Prods.:  Heated to decomp., emits acrid smoke and irritating fumes

HMIS:  Health 1, Flammability 0, Reactivity 0

Storage:  Light-sensitive, oxygen-sensitive; store @ R.T.

Uses:  Antioxidant in pharmaceuticals, injectables, inhalers, orals, ophthalmics; buffer

Regulatory:  FDA 21CFR §101.9, 101,14, 107.100, 137.105, 137.155, 137.160, 137.165, 137.170, 137.175, 137.180, 137.185, 137.200, 137.205, 145.110, 145.115, 145.116, 145.135, 145.136, 145.170, 145.171, 146.113, 146.185, 146.187, 150.141.; Canada DSL; 150.161, 155.200, 155.201, 156.145, 161.175, 172.280, 182.3013, 182.3041, 182.8013, 240.1044, GRAS; BATF 27CFR §240.1051; USDA 9CFR §318.7; FEMA GRAS; Japan approved; Europe listed; UK approved; USP/NF, BP, EP compliance

- L(+) Ascorbic acid sodium salt. [See Sodium ascorbate]
- L-Ascorbic acid, sulfate monoester, disodium salt. [See Disodium ascorbyl sulfate]

**Ascorbyl dipalmitate**
- CAS 28474-90-0
- Synonyms: L-Ascorbic acid, dihexadecanoate
- Definition: Diester of ascorbic acid and palmitic acid
- Empirical: \( \text{C}_{38}\text{H}_{68}\text{O}_8 \)
- Uses: Antioxidant

**Ascorbyl palmitate**
- CAS 137-66-6; EINECS/ELINCS 205-305-4
- INS304; E304
- Synonyms: L-Ascorbic acid, 6-hexadecanoate; Ascorbic acid palmitate; L-Ascorbic acid palmitate; L-Ascorbic acid 6-palmitate; 6-O-Palmitoylascorbic acid; Palmitoyl L-ascorbic acid
### Chemical Component Cross-Reference

**Definition:** Ester of ascorbic acid and palmitic acid

**Empirical:** $C_{22}H_{38}O_7$

**Properties:** Wh. or yel.-wh. powd., citrus odor; sol. in alcohol, animal and veg. oils; sl. sol. in water; m.w. 414.54; m.p. 107-117 C

**Toxicology:** LD50 (oral, mouse) 25 g/kg; TSCA listed

**Hazardous Decomp. Prods.:** Heated to decomp., emits acrid smoke and irritating fumes

**Storage:** Preserve in tight containers in cool, dry place

**Uses:** Antioxidant, preservative in pharmaceutical creams and lotions to prevent rancidity; Vitamin C source; stabilizer; emulsifier; sequestrant

**Regulatory:** FDA 21CFR §166.110, 182.3149, 582.3149, GRAS; USDA 9CFR §318.7 (0.02% max. in margarine); Japan approved; Europe listed; UK approved; USP/NF, BP, EP compliance; Canada DSL

**Trade Names Containing:**
- Lutein DC
- LycoVit® 10% DC
- Oxynex® 2004; Oxynex® AP
- Oxynex® K
- Oxynex® L; Oxynex® LM
- Phosal® 50 PG; Phosal® 53 MCT; Vitamin A, C & E
- Liposomes

**Asparagic acid; L-Asparagic acid. See L-Aspartic acid**

### Aspartame

**CAS:** 22839-47-0; EINECS/ELINCS 245-261-3

**INS:** 991

**Synonyms:** 3-Amino-N-(α-carboxyphenethyl) succinamic acid N-methyl ester; APM; Aspartylphenylalanine methyl ester; N-l-α-Aspartyl-l-phenylalanine l-methyl ester; Methyl aspartylphenylalanate; 1-Methyl N-L-α-aspartyl-L-phenylalanine

**Classification:** Dipeptide

**Definition:** Consists of L-aspartic acid and the methyl ester of L-phenylalanine; artificial sweetener

**Empirical:** $C_{14}H_{18}N_2O_5$

**Formula:** HOOCCH$_2$CH(NH$_2$)CONHCH(CH$_2$C$_6$H$_5$)COOCH$_3$

**Properties:** Wh. cryst. powd. or colorless need., odorless, sweet taste, prolonged sweet aftertaste; sl. sol. in water, alcohol; m.w. 294.34; m.p. 246-248 C; 160 times sweeter than sucrose

**Toxicology:** Human systemic effects by ingestion (allergic dermatitis); possible link to neural problems; headaches; experimental reproductive effects; should not be used by individuals with PKU; TSCA listed

**Hazardous Decomp. Prods.:** Heated to decomp., emits toxic fumes of NOx, CO, CO$_2$

**Storage:** Preserve in well-closed containers; 5 yr. min. shelf life

**Uses:** Artificial sweetener in OTC pharmaceuticals such as analgesics, antibiotics, anti-inflammatories

**Features:** Contain no carbohydrates

**Regulatory:** FDA 21CFR §172.804; Japan, Canada approved; USP/NF, BP, EP compliance; Canada DSL

**Manuf./Distrib.:** AAA Int’l. [http://www.aaainternational.com](http://www.aaainternational.com); AB R Lundberg
Aspartic acid (INCI). See L-Aspartic acid

**L-Aspartic acid**

**CAS 56-84-8; EINECS/ELINCS 200-291-6**

**FEMA 3656**

**Synonyms:** (S)-Aminobutanedioic acid; (+)-Aminosuccinic acid; L-Aminosuccinic acid; L-α-Aminosuccinic acid; Asparagic acid; L-Asparaginic acid; Aspartic acid (INCI); (S)-Aspartic acid

**Classification:** Amino acid

**Empirical:** C₄H₇NO₄

**Formula:** HOOCCH₂CHNH₂COOH

**Properties:** Colorless to wh. cryst., acid taste; sol. in acids, alkalis; sl. sol. in water; insol. in alcohol, ether; m.w. 133.11; dens. 1.661 (12.5 C); m.p. 270 C

**Toxicology:** LD₅₀ (IP, mouse) 6 g/kg; low toxicity by IP route; possible brain damage; mutagen; TSCA listed

**Hazardous Decomp. Prods.:** Heated to decomp., emits toxic fumes of NOₓ

**Storage:** Store @ R.T.

**Uses:** Excipient in pharmaceuticals, injectables; raw material in peptide drugs

**Regulatory:** FDA 21CFR §172.320, 7% max. by wt.; FEMA GRAS; Japan approved; BP, EP

Attapulgite
CAS 1337-76-4; 12174-11-7

Synonyms: Activated attapulgite; Colloidal activated attapulgite; Dioctahedral smectite; Fuller's earth; Palygorskite; Palygorskite; Palygorskite, calcined

Definition: A hydrated aluminum-magnesium silicate, chief ingredient in Fuller's earth

Properties: Wh. or gray cryst.

Toxicology: Nuisance dust when < 1% cryst. silica is present (PEL 5.00 mg/m³, TLV/TWA 10 mg/m³ total dust, 5 mg/m³ respirable); tumorigenic; questionable carcinogen with experimental neoplastigenic and tumorigenic data by implant route; TSCA listed

Hazardous Decomp. Prods.: Heated to decomp., emits acrid smoke and irritating fumes

Uses: Suspending agent, thickener, adsorbent in pharmaceuticals, orals, antidiarrheal prods.

Regulatory: FDA 21CFR §582.99, GRAS; USP/NF, BP compliance (activated)

Balm mint extract; Balm mint leaf extract. 
See Balm mint (Melissa officinalis) extract

Balm mint (Melissa officinalis) extract
CAS 977051-08-3; 8014-71-9
FEMA 2111
Synonyms: Balm; Balm mint; Lemon balm; Melissa; Melissa officinalis
Definition: Leaves of balm mint, Melissa officinalis contg. chiefly citral
Properties: Citral odor, tonic-like flavor
Toxicology: May cause hypersensitivity reactions
Uses: Natural flavor for pharmaceuticals; carminative; in herbal remedies
Regulatory: FDA 21CFR §182.10, GRAS; FEMA GRAS
Manuf./Distrib.: Essential7 http://www.essential7.com

Balm mint (Melissa officinalis) oil
CAS 8014-71-9
FEMA 2113
Synonyms: Balm mint oil; Balm oil; Lemon balm; Melissa officinalis oil; Melissa oil
Definition: Volatile oil obtained from leaves and tops of Melissa officinalis
Properties: Yel. to ylsh.-grnsh. liq.; sol. in alcohol; pract. insol. in water; dens. 0.89-0.925 (15/15 C)
Storage: Keep well closed, cool; protect from light
Uses: Natural flavor for pharmaceuticals
Features: Sweet citurs citronella java herbal odor
Regulatory: FDA 21CFR §182.20, 582.20, GRAS; FEMA GRAS; Canada DSL
Manuf./Distrib.: Fleurchem http://www.fleurchem.com; Sigma http://www.sigma-aldrich.com/belgium

Balsam of fir; Balsam fir; Balsam fir oleoresin. 
See Balsam Canada (Abies balsamea)
Balsam Canada. See Balsam Canada (Abies balsamea)

Balsam Canada (Abies balsamea)
CAS 8007-47-4; 977017-81-4; EINECS/ELINCS 232-362-2
FEMA 2115
Synonyms: Abies balsamea; Abies balsamea balsam; Abies balsamea oleoresin; Balsam Canada; Balsam of fir; Balsam fir; Balsam fir oleoresin; Balsams, Abies balsamea; Balsams, Canada; Canada turpentine; Canadian balsam; Fir balsam absolute
Definition: Liq. oleoresin obtained from Abies balsamea
Properties: Ylsh.-grnsh. liq., pine-like odor, bitter taste; sol. in ether; misc. with benzene, chloroform; insol. in water; dens. 0.987-0.994; acid no. 80-95; ref. index 1.5190-1.5240 (20 C)
Toxicology: LD50 (oral, rat) > 5 g/kg, (skin, rabbit) > 5 g/kg; low toxicity by ing. and skin contact; TSCA listed
Hazardous Decomp. Prods.: Heated to decomp., emits acrid smoke and irritating vapors
Uses: Natural flavor for pharmaceuticals
Regulatory: FDA 21CFR §172.510; FEMA GRAS; Japan approved; Canada DSL

Balsam Oregon (Pseudotsuga menziesi)
CAS 8050-89-3
Synonyms: Balsam fir Oregon; Balsam Oregon. See Balsam Oregon (Pseudotsuga menziesi)
Balsam Oregon (Pseudotsuga menziesi)

**Balsam Peru. See Balsam Peru (Myroxylon pereirae)**

**Balsam Peru (Myroxylon pereirae)**

**Definition:** Oleoresin obtained from *Pseudotsuga menziesi*

**Uses:** Pharmaceutical topicals

**Regulatory:** Approved for use in topicals; Canada DSL

**Synonyms:** Balsam Peru; Balsams, Myroxylon pereirae; Black balsam; China oil; Indian balsam; Meroxylon pereirae balsam; Myroxylon pereirae oleoresin; Peruvian balsam

**Properties:** Dark brown viscous liquid, pleasant vanilla odor; sol. in fixed oils; sl. sol. in propylene glycol; insol. in water, glycerin; dens. 1.150-1.170

**Toxicology:** LD50 (oral, rat) > 5 g/kg, (skin, rabbit) > 10 g/kg; low toxicity by ing. and skin contact; skin irritant; mild allergen; can cause contact dermatitis and stuffy nose; common sensitizer; may cross-react with benzoin, rosin, benzoic acid, benzyl alcohol, cinnamic acid, essential oils, storax, etc.; TSCA listed

**Precaution:** Combustible when heated

**Hazardous Decomp. Prods.:** Heated to decomp., emits acrid smoke and irritating fumes

**Uses:** Natural flavor for pharmaceuticals; mild antiseptic; scabicide; skin ulcer therapy

**Regulatory:** FDA 21CFR §182.20, GRAS; FEMA GRAS; Japan approved; BP, EP compliance; Canada DSL

**†=pharmaceutical grade**

**See Balsam Peru (Myroxylon pereirae)**

Barium hydroxide lime
CAS 17194-00-2 (anhyd.); 12230-71-6 (octahydrate); EINECS/ELINCS 241-234-5
Synonyms: Barium dihydroxide; Barium hydroxide; Caustic baryta
Definition: Mixt. of barium hydroxide octahydrate and calcium hydroxide
Empirical: BaH₂O₂
Formula: Ba(OH)₂
Properties: Wh. or grayish wh. gran.; sl. sol. in water; m.w. 171.36 (anhyd.), 315.48 (octahydrate); dens. 2.20; m.p. > 300°C
Toxicology: Highly toxic; corrosive; target organs: nerves, heart, kidneys, GI system; TSCA listed
Precaution: Incompat. with chlorinated rubber
Uses: Sorbent for carbon dioxide in pharmaceuticals; aesthetic apparatus
Regulatory: USP/NF compliance; Canada DSL
Synasia† http://www.synasia.com; VWR Int'l.† http://www.vwrsp.com

Barium stearate
CAS 6865-35-6; EINECS/ELINCS 229-966-3

UN 1564
Synonyms: Barium distearate; Octadecanaoic acid, barium salt; Stearic acid, barium salt
Empirical: C₃₆H₇₀BaO₄
Formula: Ba(C₁₈H₃₅O₂)₂
Properties: Wh. cryst. solid; insol. in water or alcohol; m.w. 704.3; dens. 1.145; m.p. 160°C
Toxicology: LD₅₀ (oral, rat) 2506 mg/kg, (IP, mouse) 319 mg/kg; moderately toxic by ing.; avoid prolonged/repeated contact; do not breathe dust; TSCA listed
Precaution: Combustible
Hazardous Decomp. Prods.: Heated to decomp., emits acrid smoke and fumes
NFPA: Health 2, Flammability 1, Reactivity 0
Storage: Keep containers sealed
Uses: Lubricant and compactant in pharmaceutical prods.
Regulatory: Canada DSL
Trade Names: Kemilub EB

Barium sulfate
CAS 7727-43-7; EINECS/ELINCS 231-784-4
UN 1564 (DOT)
Synonyms: Artificial barite; Artificial heavy spar; Barite; Barium sulfate (1:1); Baryta white; Barytes; Blanc fixe; Blanc fixe (artificial, precipitated); CI 77120; Enamel white; Heavy spar; Permanent white; Pigment white 21; Precipitated barium sulfate; Process white; Sulfuric acid barium salt (1:1)
Classification: Inorganic salt
Empirical: BaO₄S
Formula: BaSO₄
Properties: Wh. or ylsh. fine powd. free from grittiness, odorless, tasteless; sol. in conc. sulfuric acid; pract. insol. in water, dilute acids,
Chemical Component Cross-Reference

alcohol; m.w. 233.40; dens. 4.25-4.5; bulking value 0.027 gal/lb; oil absorp. 7-14; GE brightness 80-95; m.p. 1580 C; ref. index 1.64; hardness (Mohs) 3.0-3.5

Toxicology: ACGIH TLV/TWA 10/mg3 (total dust); poisonous when ingested; frequently causes skin reactions when applied; possible carcinogen; experimental tumorigen; mutagenic data; TSCA listed

Precaution: Heating with aluminum can cause explosion; incompat. with Al, P

Hazardous Decomp. Prods.: Heated to decomp., emits toxic fumes of SOx

NFPA: Health 0, Flammability 0, Reactivity 0

Uses: X-ray contrast media; intrauterine pharmaceuticals

Regulatory: FDA 21CFR §175.105, 175.300, 176.170, 177.1460, 177.2600, 178.3297; FDA approved for use in intrauterine prods.; BP, EP compliance; Canada DSL

### Basic violet 3

**CAS:** 548-62-9; EINECS/ELINCS 208-953-6  
**Synonyms:** Ammonium, (4-(bis (p-(dimethylamino) phenyl) methylene)-2,5-cyclohexadien-1-ylidene) dimethyl-, chloride; Aniline violet; N-[4-Bis [4-(dimethylamino) phenyl] methylene]-2,5-cyclohexadien-1-ylidene]-N-methylmethanaminium chloride; Bismuth violet; CI 42555; Crystal violet; Gentian violet; Hexamethylpararosaniline chloride; Hexamethyl p-rosaniline chloride; Hexamethyl p-rosaniline hydrochloride; Hexamethyl violet; Methylrosaniline chloride; Methyl violet; Pararosaniline, N,N,N’,N’’,N’’’,N’’’-hexamethyl-; chloride  
**Classification:** Triphenylmethane color  
**Empirical:** C25H30ClN3  
**Properties:** Dk. grn. solid; sol. 0.01-0.1 g/100 ml in water (15.5 C); sol. in chloroform; sol. 1 g/10 ml alcohol, 1 g/15 ml glycerin; pract. insol. in ether; m.w. 407.98; dens. 1.050; vapor pressure negligible; m.p. 215 C  
**Toxicology:** LD50 (oral, mouse) 420 mg/kg, (IP, rat) 8900 µg/kg; LDLo (IV, mouse) 20 mg/kg; toxic by inh., ing.; primary irritant; irritating to eyes, skin, respiratory system; cancer suspect agent; may cause heritable genetic damage; tumorigen; reproductive effector; mutagen; TSCA listed  
**Storage:** Light-sensitive; protect from light; store in cool, dry place in tightly closed container  
**Uses:** Topical antiseptic, anti-infective, antimicrobial; anthelmintic; biological stain  
**Regulatory:** Not permitted in food (EU); Canada DSL  

### Basic violet 10

**CAS:** 81-88-9; EINECS/ELINCS 201-383-9  
**Synonyms:** Ammonium, (9-(o-carboxyphenyl)-6-(diethylamino)-3H-xanthen-3-ylidene) diethyl-, chloride; 9-o-Carboxyphenyl-6-
Basil (Ocimum basilicum) oil

**CAS**: 8015-73-4
**FEMA**: 2119

**Synonyms**: Basil oil; Basil oil, European type; Basil oil, sweet; Ocimum basilicum oil; Ocimum basilicum

**Definition**: Volatile oil obtained from leaves of Ocimum basilicum, contg. methylchavicol, eucalyptol, linalool, estragol.

**Properties**: Pale yel. to greenish liq., floral spicy odor; sol. in fixed oils, propylene glycol; misc. with ether, chloroform; insol. in glycerin, water; dens. 0.905-0.930 (20/20 C); vapor pressure 2; b.p. 410 F; flash pt. 167 F.

**Toxicology**: LD50 (oral, rat) 1400 mg/kg; moderately toxic by ing.; skin, eye irritant; TSCA listed.

**Precaution**: Combustible liq.

**Hazardous Decomp. Prods.**: Heated to decomp., emits acrid smoke and irritating fumes.

**Storage**: Keep well closed; protect from light.

**Uses**: Natural flavor for pharmaceuticals.

**Regulatory**: FDA 21CFR §182.20, GRAS; FEMA GRAS; Canada DSL.

**Manuf./Distrib.**: Acme-Hardesty; Adept Sol'ns.; Advanced BioTech; Astral Extracts; BDH; Buckton Page Ltd; Chart; Chemtex International; Citrus and Allied Essences; Danisco Seillans; Eramex Aromatics; Essence Nat. Prods.; F.D. Copeland; Fleurchem; George Uhe; Hindustan Mint & Agro Products; Koster Keunen; Lebermuth; Penta Mfg.; Polarome Int'l.; R.W. Greff; SAFC Specialties; Spectrum Quality Prods.; V. Mane Fils SA; Voigt Global Distrib.; Zetapharm.

**Trade Names**: Batyl Alcohol 100, EX.

**Batyl alcohol**

**CAS**: 544-62-7; EINECS/ELINCS: 208-874-7

**Synonyms**: Batylol; Glycerol monooleate; Monooleate ether of glycerol; α-Octadecylether of glycerol; 1-Octadecylglycerol; 3-Octadecyloxy-1,2-propanediol; 1,2-Propanediol, 3-(octadecyloxy)-; Stearyl glyceryl ether.

**Definition**: Monooleate ether of glycerol.

**Empirical**: C21H44O3
**Formula**: HOCH2CHOHCH2OCH2(CH2)16CH3

**Properties**: Sol. in common fat solvs.; m.w. 344.58; m.p. 71-73 C; nonionic.

**Toxicology**: LD50 (IP, mouse) 750 mg/kg, (subcut., mouse) > 3032 mg/kg; mod. toxic by IP route; irritant; TSCA listed.

**Hazardous Decomp. Prods.**: Heated to decomp., emits acrid smoke and irritating vapors.

**Uses**: Emulsifier, emollient, hydrotrope, thickener for pharmaceuticals.

**Regulatory**: FDA 21CFR §182.20, GRAS; FEMA GRAS; Canada DSL.

**Manuf./Distrib.**: Aldrich; Fluka; Sigma Aldrich; Sigma Aldrich Belgium.

**Trade Names**: Batyl Alcohol 100, EX.
ester

Classification: Ester

Empirical: C_{39}H_{78}O_{4}

Formula: C_{17}H_{35}COOCH_{2}CHOHCH_{2}OCH_{2}(CH_{2})_{16}CH_{3}

Uses: Emollient, emulsion stabilizer, texturizer for medicated ointments; solubilizer for sl. sol. materials

Trade Names: GM-18IS

Batyl monoisostearate. See Batyl isostearate

Batyl monostearate. See Batyl stearate

CAS 13232-26-3

Synonyms: Batyl monostearate; Stearic acid, 2-(octadecyloxy)-3-hydroxypropyl ester

Definition: Ester of batyl alcohol and stearic acid

Empirical: C_{39}H_{78}O_{4}

Formula: CH_{3}(CH_{2})_{16}COOCH_{2}CHOHCH_{2}OCH_{2}(CH_{2})_{16}C

Uses: Emollient, emulsion stabilizer, texturizer for medicated ointments; solubilizer for sl. sol. materials

Trade Names: GM-18IS

Bay leaf oil; Bay leaves, West Indian, oil; Bay oil. See Bay (Pimenta acris) oil

Bay (Pimenta acris) oil

CAS 8006-78-8

FEMA 2122

Synonyms: Bay leaf oil; Bay leaves, West Indian, oil; Bay oil; Myrica oil; Pimenta acris oil; Pimenta racemosa oil; West Indian bay leaf oil

Definition: Volatile oil distilled from leaves of Pimenta acris, contg. 40-55% eugenol, myrcene, chavicol, etc.

Properties: Yel. to brnsh.-yel. liq., pleasant odor, sharp spicy taste; very sol. in alcohol, CS_{2}, gluc. acetic acid; insol. in water; dens. 0.962-0.990 (25/25 C); ref. index 1.500-1.520

Toxicology: LD_{50} (oral, rat) 1800 mg/kg; mod. toxic by ing.; may cause human skin irritation and intolerance reaction; TSCA listed

Hazardous Decomp. Prods.: Heated to decomp., emits acrid smoke

Storage: Light-sensitive

Uses: Natural flavor for pharmaceuticals; astringent; antiseptic

Regulatory: FDA 21CFR §182.20, GRAS; 27CFR §21.65, 21.75, 21.151; FEMA GRAS; Canada DSL

Beeswax

CAS 8006-40-4 (white); 8012-89-3 (yellow); EINECS/ELINCS 232-383-7

FEMA 2126 (wh.); INS901; E901

Synonyms: Cera alba; White beeswax; White wax; Yellow beeswax; Yellow wax

Definition: Purified wax from the honeycomb of the bee, Apis mellifera; commonly called white wax when bleached, yellow wax when not bleached

Properties: Brown or wh. (bleached) solid with faint odor; sl. balsamic taste; pract. insol. in water; sl. sol. in cold alcohol; sol. in hot alcohol, chloroform, benzene, ether, CS_{2}, and oils; dens. 0.95; m.p. 62-65 C; acid no. 17-24; sapon. no. 84

Toxicology: Essentially nontoxic; mild allergen; may cause contact dermatitis, human intolerance reaction; TSCA listed

Precaution: Combustible when heated

Storage: Store away from heat

Uses: Filler, binder, coating agent, stiffener, emulsifier in pharmaceuticals (orals, topicals, ointments, suppositories, vaginals, adhesive plasters, mouth and
Chemical Component Cross-Reference

**throat preps., troches, lozenges; tablet coating agent; pharmaceutical aid**

Behenalkonium chloride
CAS 16841-14-8; EINECS/ELINCS 240-865-3
Synonyms: Ammonium, benzyldocosyldimethyl-, chloride; Behenyl dimethyl benzyl ammonium chloride; Benzyldocosyldimethylammonium chloride
Classification: Quaternary ammonium salt
Empirical: C_{31}H_{58}N • Cl
Properties: M.w. 480.26; cationic
Uses: Emulsifier, softener, emollient for topical pharmaceutical creams and emulsions
Regulatory: Canada DSL
Trade Names Containing: Incroquat B65C

Beheneth-5
CAS 26636-40-8 (generic); 136207-49-3
Synonyms: PEG-5 behenyl ether; 3,6,9,12,15-Pentaoxaheptatriacontan-1-ol; POE (5) behenyl ether
Definition: PEG ether of behenyl alcohol
Empirical: C_{32}H_{66}O_6
Formula: CH_3(CH_2)_{20}CH_2(OCH_2CH_2)_nOH, avg. n = 5
Properties: Nonionic
Uses: Emulsifier for medicated ointments
Trade Names: BB-5

Beheneth-10

Decaoadopentacontan-1-ol; PEG-10 behenyl ether; PEG 500 behenyl ether; POE (10) behenyl ether
Definition: PEG ether of behenyl alcohol
Empirical: C_{42}H_{86}O_{11}
Formula: CH_3(CH_2){20}CH_2(OCH_2CH_2)_nOH, avg. n = 10
Properties: Nonionic
Uses: Emulsifier for medicated ointments
Trade Names: BB-10

Beheneth-20
CAS 26636-40-8 (generic)
Synonyms: PEG-20 behenyl ether; PEG 1000 behenyl ether; POE (20) behenyl ether
Definition: PEG ether of behenyl alcohol
Formula: CH_3(CH_2){20}CH_2(OCH_2CH_2)_nOH, avg. n = 20
Properties: Nonionic
Uses: Emulsifier for medicated ointments
Trade Names: BB-20

Beheneth-30
CAS 26636-40-8 (generic)
Synonyms: PEG-30 behenyl ether; POE (30) behenyl ether
Definition: PEG ether of behenyl alcohol
Formula: CH_3(CH_2){20}CH_2(OCH_2CH_2)_nOH, avg. n = 30
Properties: Nonionic
Uses: Emulsifier for medicated ointments
Trade Names: BB-30

Behenic acid
CAS 112-85-6; EINECS/ELINCS 204-010-8
Synonyms: Docosanoic acid
Classification: Fatty acid
Empirical: C_{22}H_{44}O_2
Formula: CH_3(CH_2){20}COOH
Properties: Colorless waxy solid; faint odor; water-sol.; m.w. 340.57; dens. 0.8221 (100/4 C); m.p. 80°C; b.p. 306°C (60 mm), 265°C (15 mm); ref. index 1.4270 (100 C)
Toxicology: No known toxicity; TSCA listed
Uses: Lubricant, emulsifier, plasticizer, opacifier in pharmaceuticals
Regulatory: Canada DSL

CAS 100-52-7; EINECS/ELINCS 202-860-4
UN 1989 (DOT); UN 1990; UN NA 1993; FEMA 2127
Synonyms: Almond artificial essential oil;
Chemical Component Cross-Reference

**Artificial almond oil; Benzencarbaldehyde; Benzene carbonal; Benzene carboxaldehyde; Benzene methylal; Benzin aldehyde; Benzoic aldehyde; Phenylmethanal; Synthetic oil of bitter almond**

**Classification:** Aromatic aldehyde

**Empirical:** C₇H₆O

**Formula:** C₆H₅CHO

**Properties:** Colorless to yel. oily liq., bitter almond odor, burning taste; very sol. in alcohol, ether, benzene, acetone, petrol. ether, conc. sulfuric acid, liq. CO₂, liq. ammonia; sl. sol. in water; m.w. 106.13; sp.gr. 1.041; vapor pressure 1 mm Hg (26.2 C); m.p. -26 C; b.p 179 C; flash pt. (CC) 62 C; ref. index 1.544

**Toxicology:** LD₅₀ (oral, rat) 1300 mg/kg, (IP, mouse) 9 mg/kg, (subcut., rabbit) 5000 mg/kg; highly toxic; poison by ing. and IP routes; allergen; feeble local anesthetic; skin and eye irritant; vapors can irritate nose, throat, lungs; CNS depressant (nausea, vomiting, headache, dizziness, abdominal pain); 1 g/kg may be fatal in humans; mutagenic data; TSCA listed

**Precaution:** DOT: Combustible liq.; a strong reducing agent; acts violently with oxidizers; incompat. with strong bases, strong reducing agents, alkaline cyanide sol'n., heavy metal salts

**NFPA:** Health 2, Flammability 2, Reactivity 0

**Storage:** Light-sensitive; store in cool, dry, well-ventilated area, protected from light; store under nitrogen or other inert atm.; keep tightly closed when not in use

**Uses:** Synthetic flavor, odorant for pharmaceuticals; elixir as vehicle; pharmaceutical intermediate

**Regulatory:** FDA 21CFR §182.60, GRAS; 27CFR §21.65, 21.151, GRAS; FEMA GRAS; Japan approved as flavoring; USP/NF, BP compliance; Canada DSL; Australia AICS

Benzaldehyde dimethyl acetal
CAS 1125-88-8; EINECS/ELINCS 214-413-0
FEMA 2128
Synonyms: Dimethoxymethylbenzene; Dimethoxyphenylmethane; α,α-Dimethoxytoluene
Empirical: C₉H₁₂O₂
Formula: C₆H₅CH(OCH₃)₂
Properties: Liq.; floral odor; m.w. 152.19; dens. 1.014 (20/4 C); b.p. 198 C; flash pt. 55 C; ref. index 1.4950 (20 C)
Toxicology: LD₅₀ (oral, rat) 1220 mg/kg; mod. toxic by ing.; skin irritant; TSCA listed
Precaution: Flamm.
Hazardous Decomp. Prods.: Heated to decomp., emits acrid smoke and irritating fumes
Uses: Synthetic flavor for pharmaceuticals
Regulatory: FDA 21CFR §172.515; FEMA GRAS; Canada DSL

Benzaldehyde glyceryl acetal
CAS 1319-88-6; 1708-39-0; EINECS/ELINCS 219-906-4
FEMA 2130
Synonyms: Benzaldehyde propylene acetal; 4-Methyl-2-phenyl-1,3-dioxolane; 4-Methyl-2-phenyl-m-dioxolane
Empirical: C₁₀H₁₂O₂
Formula: C₁₀H₁₀O₂(CH₃)ₓ
Properties: Colorless to pale yel. oily liq.; sol. in alcohol; insol. in water; m.w. 164.21; sp. gr. 1.06-1.066; b.p. 83-85 C @ 4.00 mm; flash pt. 98 C; ref. index 1.500-1.506
Toxicology: TSCA listed
Uses: Synthetic flavor for pharmaceuticals
Features: Bitter narcissus sweet naphthalic woody odor
Regulatory: FDA 21CFR §172.515; FEMA GRAS; Canada DSL

Benzalkonium chloride
CAS 8001-54-5; 61789-71-7; 63449-41-2; 68391-01-5; 68424-85-1; 68989-00-4; 85409-22-9; EINECS/ELINCS 204-479-9; 263-080-8; 264-
Chemical Component Cross-Reference

151-6, 269-919-4; 270-325-2; 273-544-1; 287-089-1

UN 1760 (DOT)

Synonyms: Alkylbenzyldimethylammonium chloride; Alkyl dimethyl benzyl ammonium chloride; Alkyldimethyl (phenylmethyl) quaternary ammonium chlorides; Alkyl ((ethylphenyl) methyl) dimethyl quaternary ammonium chlorides; Ammonium, alkyldimethyl (phenylmethyl)-, chloride; Octyl-octadecyl dimethyl ethylbenzyl ammonium chlorides; Quaternary ammonium compds., benzyl-C8-18-alkyldimethyl, chlorides

Definition: Quaternary ammonium salt

Formula: C₆H₅CH₂N(CH₃)₂RCl, R = C₈H₁₇ to C₁₈H₃₇

Properties: Wh. or ylsh.-wh. amorphous powd. or gelatinous pieces; aromatic odor; bitter taste; very sol. in water, alcohol, acetone; sl. sol. in benzene; insol. in ether; m.p. 34-37 C; cationic

Toxicology: LD₅₀ (oral, rat) 240 mg/kg, (IP, rat) 14,500 µg/kg; highly toxic; poison by parenteral, ing., IP, IV routes; human poison by ing.; large systemic doses can cause nausea, vomiting, muscle paralysis, CNS depression, local tissue damage; human skin and severe eye irritant; experimental teratogen, reproductive effects; mutagenic data; TSCA listed

Precaution: DOT: Corrosive material; incompat. with anionic detergents

Hazardous Decomp. Prods.: Heated to decomp., emits toxic fumes of Cl⁻, NH₃, and NOₓ

HMIS: Health 2, Flammability 0, Reactivity 1

Uses: Surfactant, antimicrobial, preservative, disinfectant, wetting agent, solubilizer in pharmaceuticals, ophthalmics, injectables, otics, topicals; antiseptic enhancer; preservative in contact lens soaking sol'ns., nebulizer sol'ns.

Use Level: 0.1-0.3%

Regulatory: USA not restricted; FDA 21CFR §175.105, 176.300, 178.1010; FDA approved for ophthalmics, injectables, otics, topicals; Japan, Europe listed; USP/NF, BP, EP compliance; Canada DSL

dimethylphenyl)[amino]-2-oxoethyl]-N,N-diethyl-, saccharide:
Benzenemethanaminium, N-[2-[(2,6-dimethylphenyl) amino]-2-oxoethyl]-N,N-diethyl-, salt with 1,2-benzisothiazol-3(2H)-one 1,1-dioxide. See Denatonium saccharide
Benzenemethanaminium, N,N-dimethyl-N-tetradecyl-, chloride. See Myristalkonium chloride
Benzenemethanaminium, N-ethyl-N-[4-[4-[ethyl [[(3-sulfophenyl) methyl] amino] phenyl] (2-sulfophenyl) methylene]-2,5-cyclohexadien-1-ylidene]-3-sulfo-, hydroxide, inner salt, aluminum salt. See FD&C Blue No. 1 Aluminum Lake
Benzenemethanaminium, N-hexadecyl-N,N-dimethyl-, chloride. See Cetalkonium chloride
Benzenemethanethiol. See Benzyl mercaptan
Benzenemethanol. See Benzyl alcohol
Benzenemethanol, α-ethyl-. See 1-Phenyl-1-propanol
Benzenemethanol, 4-methoxy-. See p-Anisyl alcohol
Benzenemethanol, α-methyl-. See α-Methylbenzyl alcohol
Benzenemethanol, α-methyl-, acetate. See α-Methylbenzyl acetate
Benzen, methoxy. See Anisole
Benzene, 1-methoxy-2-methyl-. See α-Methylalanisole
Benzen, 2-methoxy-1-(phenylmethoxy)-4-(1-propenyl)-. See Isoeugenyl benzyl ether
Benzen, 1-methoxy-4-(1-propenyl)-. See Anethole
Benzen methylal. See Benzaldehyde
Benzen, 1,2-(methylenedioxy)-4-propenyl. See Isosafrole
Benzen, 1,2-(methylenedioxy)-4-propyl-. See Dihydrosafrole
Benzen, 1-methyl-4-(1-methylethyl) -. See p-Cymene
Benzen monochloride. See Chlorobenzene
Benzenepropanol. See Hydrocinnamaldehyde
Benzenepropanol, α-methyl-4-(1-methylethyl) -. See Cyclamen aldehyde
Benzenepropanoic acid. See Hydrocinnamic acid
Benzenepropanoic acid, β-oxo-, ethyl ester. See Ethyl benzoylecetate
Benzenepropanol; 3-Benzene propanol. See

†=pharmaceutical grade

Hydrocinnamic alcohol
Benzenepropanol, propanoate. See 3-Phenylpropyl propionate
Benzenepropanoic acid. See Hydrocinnamic acid
Benzen, (2-(1-propoxyethoxy) ethyl) -. See Acetaldehyde phenethyl propyl acetal
Benzenesulfonic acid, 5-benzoyl-4-hydroxy-2-methoxy-. See Benzophenone-4
Benzenesulfonic acid, 5-chloro-2[(2-hydroxy-1-naphthalenyl) azo]-4-methyl, monosodium salt. See D&C Red No. 8
Benzenesulfonic acid, 4-[[3-[[2,4-dimethylphenyl] azo]-2,4-dihydroxyphenyl] azo]-, monosodium salt. See D&C Brown No. 1
Benzenesulfonic acid, dodecyl-, compd. with 2,2',2'-nitrotris (ethanol) (1:1). See TEA-dodecylbenzenesulfonate
Benzenesulfonic acid, dodecyl-, sodium salt. See Sodium dodecylbenzenesulfonate
Benzenesulfonic acid, hydroxy-. See Phenolsulfonic acid
Benzenesulfonic acid, hydroxy-, aluminum salt. See Aluminum phenolsulfonate
Benzenesulfonic acid, 4-((2-hydroxy-1-naphthalenyl) azo)-, monosodium salt. See D&C Orange No. 4; Acid orange 7
Benzenesulfonic acid, 4-hydroxy-, zinc salt (2:1). See Zinc phenolsulfonate
Benzenesulfonic acid, 4-methyl-, methyl ester. See Methyl tosylate
Benzenethiol. See Thiophenol
1,2,4-Benzenetricarboxylic acid, tris (2-ethylhexyl) ester. See Tri-2-ethylhexyl trimellitate
1,2,3-Benzenetriol. See Tri-2-ethylhexyl trimellitate
Benzen-1,3,5-triol; 1,3,5-Benzenetriol; Benzene-s-triol. See 1,3,5-Trihydroxybenzene
Benzenol. See Phenol
Benzenetrimethylethyl. See Phenol
Benzenethonium chloride
CAS 121-54-0; EINECS/ELINCS 204-479-9
Synonyms: Benzylidimethyl (2-(2-(p-(1,1,3,3-tetramethylbutyl) phenoxy) ethoxy) ethyl) ethyl) ammonium chloride; Diphenylhexoxyethoxyethyl dimethyl benzyl ammonium chloride; N,N-Dimethyl-N-[2-[4-(1,1,3,3-tetramethylbutyl) phenoxy] ethoxy] ethyl] benzenemethanaminium chloride; Phermerol chloride
Classification: Quaternary ammonium salt
Chemical Component Cross-Reference

Empirical: $\text{C}_{27}\text{H}_{42}\text{ClNO}_2$

Formula:

$$[(\text{CH}_3)_3\text{CCH}_2\text{C(CH}_3)_2\text{CH}_2\text{OCH}_2\text{CH}_2\text{CH}_2\text{N(CH}_3)_2\text{CH}_2\text{C}_6\text{H}_4\text{OCH}_2\text{CH}_2\text{OCH}_2\text{CH}_2\text{N(CH}_3)_2\text{CH}_2\text{C}_6\text{H}_5]^{+} \text{Cl}^-$$

Properties:

- Colorless, odorless plates, bitter; sol. in water, alcohol, acetone, chloroform; m.w. 448.15; m.p. 164-166 C; cationic
- Toxicology: LD50 (oral, rat) 368 mg/kg; poison by oral, subcut., IP, IV routes; severe eye irritant; questionable carcinogen with experimental neoplastigenic data; TSCA listed
- Hazardous Decomp. Prods.: Heated to decomp., emits very toxic fumes of Cl–, NH3, and NOx
- HMIS: Health 2, Flammability 0, Reactivity 1
- Storage: Light-sensitive
- Uses: Antimicrobial, preservative, germicide, wetting agent, solubilizer, disinfectant for pharmaceuticals, injectables, ophthalmics, otics, topicals, tinctures; germicide, disinfectant for veterinary, surgical topicals; topical anti-infective and antiseptic
- Use Level: 1000 ppm
- Regulatory: FDA 21CFR §175.105, EPA registered, Japan approved, Europe listed; approved for use in injectables, ophthalmics, otics; USP/NF, BP, EP compliance; Canada DSL

Benzohydroquinone. See Hydroquinone

Benzoic acid

CAS 65-85-0; EINECS/ELINCS 200-618-2

FEMA 2131; INS 2510; E210

Synonyms: Benzene carboxylic acid; Benzene formic acid; Carboxybenzene; Dracylic acid; Phenylcarboxylic acid; Phenylformic acid
Chemical Component Cross-Reference

Classification: Aromatic acid
Empirical: C₇H₆O₂
Formula: C₆H₅COOH

Properties:
- Wh. scales, needles, crystals, benzoin odor; sol. in alcohol, ether, chloroform, benzene, carbon disulfide; sl. sol. in water;
- m.w. 122.13; dens. 1.2659; m.p. 121.25 C; b.p. 249.2 C; subl. at 100 C; flash pt. 121.1 C

Toxicology:
- LD₅₀ (oral, rat) 2530 mg/kg, (IP, mouse) 1460 mg/kg; mod. toxic by ingestion, IP routes; poison by subcut. route; severe eye/skin irritant; may cause human intolerance reaction, asthma, hyperactivity in children; TSCA listed

Precaution:
- Combustible when exposed to heat or flame; reactive with oxidizing materials

Hazardous Decomp. Prods.:
- Heated to decomp., emits acrid smoke and irritating fumes

HMIS: Health 2, Flammability 1, Reactivity 0

Storage:
- Store @ R.T.

Uses:
- Antimicrobial, preservative, antiseptic, antifungal, flavor, buffer in pharmaceuticals, orals, parenterals, rectals, topicals

Use Level:
- 0.5% max. in finished cosmetics

Regulatory:
- FDA 21CFR §150.141, 150.161, 166.40, 166.110, 175.300, 177.1390, 184.1021, GRAS 0.1% max. in foods; USA EPA registered; Japan 0.2% max.; Europe listed 0.5% max.; FEMA GRAS; cleared by MID to retard flavor reversion in oleomargarine at 0.1%; Japan approved with limitations; Europe listed; UK approved; approved for orals, rectals, topicals; USP/NF, BP, EP compliance; Canada DSL

Trade Names: BP; Velsicure® BTF; Velsicure® Benzophenone

Benzophenone-1
CAS 131-56-6; EINECS/ELINCS 205-029-4
Synonyms: Benzoresorcinol; 4-Benzoyl resorcinol; BP1; DHBP; 2,4-
Dihydroxybenzophenone; (2,4-
Dihydroxyphenyl) phenylmethanone;
Methanone, (2,4-dihydroxphenyl) phenyl-
Classification: Organic benzophenone deriv.
Empirical: C_{13}H_{10}O_{3}
Formula: C_{6}H_{5}CO_{6}H_{3}(OH)_{2}
Properties: Off-wh. to lt. yel. cryst. solid; sol. in ethanol, methanol, MEK, ethyl acetate; insol. in water; m.w. 214.23; m.p. 142 C; b.p. 194 C (1
mm)
Toxicology: LD50 (oral, rat) 7220 mg/kg, (IP, mouse) 100 mg/kg, (IV, mouse) 85 mg/kg;
poison by IV and IP routes; mildly toxic by
ing.; eye irritant; TSCA listed
Hazardous Decomp. Prods.: Heated to
decom., emits acrid smoke and irritating
fumes
Uses: UV-A/B absorber for pharmaceuticals
Regulatory: Canada DSL

Trade Names: Protaphenone™ - 1

Benzophenone-2
CAS 131-55-5; EINECS/ELINCS 205-028-9
Synonyms: Bis (2,4-dihydroxyphenyl)
 methanone; 2,2',4,4'-
Tetrahydroxybenzophenone; THBP
Chemical Component Cross-Reference

**Classification:** Organic benzophenone deriv.

**Empirical:** C_{13}H_{10}O_{5}

**Properties:** Powd.; m.w. 246.23; m.p. 200-203 C

**Toxicology:** LD50 (oral, rat) 1220 mg/kg; mod. toxicity by ing.; eye irritant; mutagenic data; TSCA listed

**Hazardous Decomp. Prods.:** Heated to decomp., emits toxic fumes of NOx

**Uses:** UV-A/B absorber for pharmaceuticals

**Regulatory:**

**Trade Names:** Protaphenone™ - 2

---

**Benzophenone-3**

**CAS** 131-57-7; EINECS/ELINCS 205-031-5

**Synonyms:** 2-Hydroxy-4-methoxybenzophenone; (2-Hydroxy-4-methoxyphenyl) phenylmethanone; Methanone (2-hydroxy-4-methoxyphenyl) phenyl-; 4-Methoxy-2-hydroxybenzophenone; Oxybenzone

**Classification:** Organic benzophenone deriv.

**Empirical:** C_{14}H_{12}O_{3}

**Properties:** Ylsh. cryst., rose-like odor; sol. in most fixed oils and min. oil; m.w. 228.26; m.p. 62-63.5 C

**Toxicology:** LD50 (oral, rat) 7400 mg/kg, (IP, mouse) 300 mg/kg; poison by IP route; mild toxicity by ing.; experimental reproductive effector; mutagenic data; TSCA listed

**Hazardous Decomp. Prods.:** Heated to decomp., emits acrid smoke and irritating fumes

**Uses:** UV absorber/stabilizer in pharmaceuticals

**Features:** Prevents deterioration of ingreds. that could be affected by UV light

**Regulatory:**
- **Manuf./Distrib.:** Aceto† [http://www.aceto.com]; Aldrich† [http://www.sigma-aldrich.com]; BCH Brühl [http://www.bch-bruehl.de];

---

**Benzophenone-4**

**CAS** 4065-45-6; 71776-12-0 (trihydrate); EINECS/ELINCS 223-772-2

**Synonyms:** Benzenesulfonic acid, 5-benzoyl-4-hydroxy-2-methoxy-; 5-Benzoyl-4-hydroxy-2-methoxybenzene sulfonic acid; 2-Hydroxy-4-methoxybenzophenone-5-sulfonic acid; 2-Hydroxy-4-methoxy-5-sulfo benzophenone; Sulisobenzone

**Classification:** Organic benzophenone deriv.

**Empirical:** C_{14}H_{12}O_{6}S

**Properties:** Wh. flaky solid, rose-like odor; sol. in most fixed oils and min. oil; m.w. 308.32; acid no. 190 max.; pH 1-2 (1%)

**Toxicology:** LD50 (oral, rat) 3530 mg/kg; mod. toxic by ing.; toxic when injected; may induce hives and contact sensitivity, photoallergic reaction; irritating to eyes; TSCA listed

**Hazardous Decomp. Prods.:** Heated to decomp., emits toxic vapors of SOx

**Uses:** UV absorber in pharmaceuticals, sunscreens

**Features:** Prevents deterioration of ingreds. that might be affected by UV rays

**Regulatory:**

**Trade Names:** Escalol® 567

Benzyl acetate
CAS 140-11-4; EINECS/ELINCS 205-399-7
FEMA 2135
Synonyms: Acetic acid benzyl ester; Acetic acid phenylmethyl ester;
Acetoxymethylbenzene; α-Acetoxytoluene;
Benzyl ethanoate; Phenylmethyl acetate
Classification: Carboxylic acid ester
Definition: Ester of benzyl alcohol and acetic acid
Empirical: C9H10O2
Formula: CH3COOCH2C6H5
Properties: Colorless liq., sweet floral fruity odor;
sol. in alcohol, chloroform, benzene, most fixed oils, propylene glycol; pract. insol. in water, glycerin; m.w. 150.19; sp.gr. 1.06; m.p. -51.5°C; b.p. 213.5°C; flash pt. (CC) 90°C; ref. index 1.501
Toxicology: ACGIH TLV/TWA 10 ppm; LD50 (oral, rat) 2490 mg/kg; LCLo (inh., mouse, 22 h) 1300 mg/m3; mod. toxic by ingestion and subcutaneous routes; poison by inhalation; may be sl. absorbed through skin; mild eye irritant; antipsychotic; inh. of vapors can probably cause nose/throat irritation; high concs. can cause CNS depression, drowsiness, poor coordination, unconsciousness; TSCA listed
Precaution: Combustible liq.; incompat. with strong oxidizing agents (increases

†=pharmaceutical grade

Hazardous Decomp. Prods.: Benzyl alcohol, benzoic acid, acetic acid; heated to decomp., emits irritating fumes
NFPA: Health 1, Flammability 1, Reactivity 0
Storage: 24 mos. when stored at 40-70°F in tightly sealed original containers with minimum head space; avoid prolonged exposure to light, heat, air
Uses: Synthetic flavor for pharmaceuticals
Features: Apple, apricot, cherry, plum-like flavor
Regulatory: FDA 21CFR §172.515; FEMA GRAS; Australia AICS; Japan approved as flavoring; Canada DSL

### Benzylacetonic acid. See Hydrocinnamic acid

**Benzyl acetoacetate**

CAS 5396-89-4; EINECS/ELINCS 226-416-4

**Uses:** Synthetic flavor for pharmaceuticals; intermediate for drugs (anti-inflammatory)

**Regulatory:** Canada DSL

**Manuf./Distrib.:** Acros Org.

**Formula:** CH₃COCH₂COOCH₂C₆H₅

**Properties:** Ylsh. oily liq.; weak odor; sol. in alkali solutions at room temp.; m.w. 192.22; dens. 1.112; b.p. 156–159 °C (10 mm); flash pt. >230 F

**Toxicology:** Irritating to skin, eyes

**Features:** Fruity flavor

**Regulatory:** FDA 21 CFR §172.515; FEMA GRAS; Canada DSL

**Manuf./Distrib.:** Advanced Synthesis Tech.

**Formula:** C₁₁H₁₂O₃

**Properties:** Aromatic ketone

**Classification:** Aromatic alcohol

**Empirical:** C₇H₆O

**Formula:** C₆H₅CH₂CH₂COCH₃

**Properties:** Colorless liq.; faint aromatic odor; sharp burning taste; misc. with alcohol, chloroform, ether, water @ 206 °C (dec.); m.w. 108.15; sp.gr. 1.042; vapor pressure 1 mm Hg (58 °C); m.p. -15.3 C; b.p. 205.7 °C; flash pt. (CC) 93 C; ref. index 1.540

**Toxicology:** LD₅₀ (oral, rat) 1230 mg/kg, (IP, rat) 400 mg/kg, (skin, rabbit) 2000 mg/kg; poison by ing., IP, IV routes; mod. toxic by inh., skin contact; mod. skin and severe eye irritant; may cross-react with balsam Peru

---

### Benzyl alcohol

**CAS 100-51-6; EINECS/ELINCS 202-859-9**

**FEMA 2137**

**Synonyms:** Bentanol; Benzal alcohol; Benzenecarbinol; Benzenemethanol; Benzoyl alcohol; (Hydroxymethyl) benzene; Hydroxytoluene; α-Hydroxytoluene; Phenolcarbinol; Phenylcarbinol; Phenylmethyl alcohol; Phenylmethyl alcohol; α-Toluolen

**Classification:** Aromatic alcohol

**Empirical:** C₇H₈O

**Formula:** C₆H₅CH₂OH

**Properties:** Water-wh. liq., faint aromatic odor, sharp burning taste; misc. with alcohol, chloroform, ether, water @ 206 °C (dec.); m.w. 108.15; sp.gr. 1.042; vapor pressure 1 mm Hg (58 °C); m.p. -15.3 C; b.p. 205.7 °C; flash pt. (CC) 93 C; ref. index 1.540

**Toxicology:** LD₅₀ (oral, rat) 1230 mg/kg, (IP, rat) 400 mg/kg, (skin, rabbit) 2000 mg/kg; poison by ing., IP, IV routes; mod. toxic by inh., skin contact; mod. skin and severe eye irritant; may cross-react with balsam Peru
Chemical Component Cross-Reference

sensitive persons; TSCA listed

Precaution: Combustible liq.; incompat. with oxidizers (increased fire and explosion risk), acids (exothermic polymerization), sulfuric acid

Hazardous Decomp. Prods.: Dec. explosively at 180 C with sulfuric acid; heated to decomp., emits acrid smoke and fumes

NFPA: Health 2, Flammability 1, Reactivity 0

Storage: Store in cool, dry, well-ventilated area, away from heat and ignition sources; light-sensitive

Uses: Antimicrobial, preservative, solubilizer, flavor for pharmaceuticals, multiple-use parenterals, orals, topical antiseptics, vaginals, mouth/throat preps.; disinfectant; local anesthetic; astringent in poison ivy preps.

Features: Citrus berry cherry-like flavor

Use Level: 10% (disinfectant, local anesthetic), 1% (additive to injectables), 1% max. (sols., perfumes, and flavorings in finished prods.)

Regulatory: FDA 21CFR §172.515, 175.105, 175.300, 177.1210; FEMA GRAS; USA EPA registered; Japan approved as flavoring; Europe listed; Canada DSL; FDA approved for use in injectables, parenterals, orals, topicals; USP/NF, BP, EP compliance

Benzyl benzene carboxylate. See Benzyl benzoate

Benzyl benzoate

CAS 120-51-4; EINECS/ELINCS 204-402-9
UN 2810; FEMA 2138
Synonyms: Benylate; Benzoic acid, benzyl ester; Benzoic acid phenylmethyl ester; Benzyl benzene carboxylate; Phenylmethyl benzoate
Classification: aromatic compd.
Definition: Ester of benzyl alcohol and benzoic acid
Empirical: C\(_{14}\)H\(_{12}\)O\(_2\)
Formula: C\(_6\)H\(_5\)COOCH\(_2\)C\(_6\)H\(_5\)
Properties: Colorless oily liq., sl. aromatic odor; sol. in oxygenated/chlorinated solvs.; misc. with alcohol, chloroform, ether; insol. in water, glycerin; m.w. 212.26; sp.gr. 1.116-1.120; m.p. 21 C; b.p. 324 C; flash pt. (CC) 298 F; ref. index 1.568
Toxicology: LD50 (oral, rat) 500 mg/kg, (skin, rabbit) 4000 mg/kg; mod. toxic by ingestion, skin contact; TSCA listed
Precaution: Combustible liq.; reactive with oxidizing materials
Hazardous Decomp. Prods.: Heated to decomp., emits CO, CO\(_2\), acrid and irritating fumes and smoke
NFPA: Health 1, Flammability 1, Reactivity 0
Storage: 6 mos. when stored at 40-70 F in tightly sealed original containers with minimum head space; avoid prolonged exposure to light, heat, air
Uses: Solvent, preservative for pharmaceuticals, injectables, orals, topicals, external medicine; syn. flavor for pharmaceuticals; scabicide; pediculicide
Features: Sweet, cherry, pineapple, strawberry-like flavor
Use Level: 0.5% max. (finished cosmetics)
Regulatory: FDA 21CFR §172.515, 175.105; FEMA GRAS; FDA approved for injectables, orals; USP/NF, BP, EP compliance; Canada DSL; Australia AICS; Japan MITI

Benzyl alcohol cinnamic ester. See Benzyl cinnamate

Benzyl alcohol, ether with isoeugenol. See Isoeugenyl benzyl ether

Benzyl alcohol, α-ethyl-. See 1-Phenyl-1-propanol

Benzyl alcohol formate. See Benzyl formate

Benzyl alcohol, α-methyl-, acetate. See α-Methylbenzyl acetate

Benzyamine. See N-Benzyamine

N-Benzyamine

CAS 100-46-9; EINECS/ELINCS 202-854-1
Synonyms: Aminotoluene; α-Aminotoluene; Benzylamine; Monobenzylamine; (Phenylmethyl) amine
Classification: Aromatic amine
Empirical: C\(_7\)H\(_9\)N
Formula: C\(_6\)H\(_5\)CH\(_2\)NH\(_2\)
Properties: Lt. amber liq.; sol. in alcohol, ether, water; misc. with oxygenated solvs.; m.w. 107.17; dens. 0.9813; m.p. 10 C; b.p. 184.5 C; ref. index 1.540 (20 C)
Toxicology: LD50 (IP, mouse) 600 mg/kg, (oral, mammal) 700 mg/kg; irritant to skin, eyes, mucous membranes; lachrymator; TSCA listed
Precaution: Combustible; corrosive; avoid contact with acid; absorbs CO\(_2\) from air
Hazardous Decomp. Prods.: Heated to decomp., emits toxic fumes
Storage: Store under nitrogen
Uses: Stabilizer in antibiotics; chemical intermediate for pharmaceuticals
Regulatory: Canada DSL

Benzyl butanoate; Benzyl n-butanoate. See Benzyl butyrate

Benzylbutyl alcohol. See α-Propylphenethyl alcohol

Benzyl butyl ether
CAS 588-67-0; EINECS/ELINCS 209-626-0
FEMA 2139
Synonyms: Benzene, (butoxymethyl)-; Benzyl n-butyl ether; Butyl benzyl ether; n-Butyl benzyl ether; Ether, benzyl butyl
Empirical: C_{11}H_{16}O
Properties: Colorless liq., misc. with alcohol, ether; insol. in water; m.w.164.25; sp.gr. 0.931 (10 C); b.p. 220-221 C (744 mm)
Uses: Synthetic flavor for pharmaceuticals
Features: Floral rose odor
Regulatory: FDA 21CFR §172.515; FEMA GRAS; Canada DSL

Benzyl n-butyl ether. See Benzyl butyl ether

Benzyl butyrate
CAS 103-37-7; EINECS/ELINCS 203-105-1
FEMA 2140
Synonyms: Benzyl butanoate; Benzyl n-butanoate; Benzyl n-butyrate; Butyric acid, benzyl ester
Empirical: C_{11}H_{14}O_2
Properties: Colorless liq.; fruity odor; sol. in alcohol, fixed oils; insol. in glycerin, propylene glycol, water @ 239 C; m.w. 178.23; dens. 1.009; b.p. 240 C; flash pt. 225 F; ref. index 1.490-1.495
Toxicology: LD50 (oral, rat) 2330 mg/kg, (skin, rabbit) > 5 g/kg; mod. toxic by ing.; TSCA listed
Precaution: Combustible
Hazardous Decomp. Prods.: Heated to decomp., emits acrid smoke and irritating fumes
Uses: Flavor for pharmaceuticals
Features: Apricot, berry, peach, pear, plum-like flavor
Regulatory: FDA 21CFR §172.515; FEMA GRAS; Canada DSL
Manuf./Distrib.: Advanced BioTech
http://www.adv-bio.com; Asiamec Int’l.;

Benzylchlorophenol; 2-Benzyl-4-chlorophenol; o-Benzyl-p-chlorophenol. See Chlorophene

Benzylicinnamate
CAS 103-41-3; EINECS/ELINCS 203-109-3
FEMA 2142
Synonyms: Benzyl alcohol cinnamic ester; Benzyl γ-phenylacrylate; Benzyl 3-phenylpropenoate; Benzyl 3-phenyl-2-propenoate; Cinnamyl; trans-Cinnamic acid benzyl ester; Phenylmethyl 3-phenyl-2-propenoate; 3-Phenyl-2-propenonic acid phenylmethyl ester
Definition: Ester of benzyl alcohol and cinnamic acid, found in balsams of Peru, Tolu, Styrax, Copaiba and others
Empirical: C16H14O2
Properties: Wh. cryst., aromatic balsam-like odor; sol. in alcohol, fixed oils; insol. in glycerin, propylene glycol, water; m.w. 238.30; vapor pressure 1 mm (173.8 C); m.p. 39 C; b.p. 350 C; flash pt. 100 C
Toxicology: LD50 (oral, guinea pig) 3760 mg/kg; mod. toxic by ing.; mild allergen and skin irritant; TSCA listed
Precaution: Combustible liq.
Hazardous Decomp. Prods.: Heated to decomp., emits acrid smoke and irritating fumes
Uses: Synthetic flavor, fragrance for pharmaceuticals
Features: Chocolate, apricot, cherry, peach, pineapple-like flavor
Regulatory: FDA 21CFR §172.515; FEMA GRAS; Canada DSL

### Benzalacetone

**Synonyms:** Benzalacetone; Benzilidene acetone; Benzylacetone; Cinnamyl methyl ketone; Methyl styryl ketone; 4-Phenylbutenone; 4-Phenyl-3-buten-2-one; trans-4-Phenyl-3-buten-2-one; Styryl methyl ketone

**Classification:** Aromatic compd.

**Empirical:** C₁₀H₁₀O

**Formula:** C₆H₅CH:CHCOCH₃

**Properties:** Colorless cryst., odor of coumarin, sweet pungent floral flavor; sol. in alcohol, ether, benzene, H₂SO₄, chloroform; insol. in water; m.w. 146.19; dens. 1.0097; m.p. 39-42 C; b.p. 260-262 C; flash pt. 150 F

**Toxicology:** LD₅₀ (oral, rat) 2031 mg/kg; mod. toxic by ing.; primary skin irritant; TSCA listed

**Precaution:** Flamm. liq.

**Hazardous Decomp. Prods.:** Heated to decomp., emits acrid smoke and irritating fumes

**Uses:** Synthetic flavor for pharmaceuticals

**Features:** Sweet flavor

**Regulatory:** FDA 21CFR §172.515; FEMA GRAS; Canada DSL

**See also** Benzylacetone

---

### 3-Benzylidene camphor

**CAS:** 15087-24-8; EINECS/ELINCS 239-139-9

**Synonyms:** 1,7,7-Trimethyl-3-(phenylmethylene) bicyclo [2.2.1] heptan-2-one

**Classification:** Polycyclic org. compd.

**Empirical:** C₁₇H₂₀O

**Toxicology:** TSCA listed

**Uses:** UV-B sunscreen for suntan prods., stabilization of light-sensitive prods.

**Regulatory:** Canada DSL

**Trade Names:** Unisol S-22

**Trade Names Containing:** Unifilter U-41 Benzylidene glycerol; 1,3-O-Benzylidene glyceryl acetate See Benzaldehyde glyceryl acetal

---

### Benzylidene glycerol; 1,3-O-Benzylidene glycerol

### Benzyl isobutyrate

**CAS:** 103-28-6; EINECS/ELINCS 203-095-9

**FEMA:** 2141

**Synonyms:** Benzyl 2-methyl propanoate; Benzyl-2-methylpropionate; Isobutyric acid benzyl ester

**Empirical:** C₁₁H₁₄O₂

**Properties:** Colorless liq., fruity floral jasmine odor; sol. in alcohol, fixed oils; sl. sol. in propylene glycol; insol. in glycerin; m.w. 178.25; dens. 1.001-1.005; b.p. 105-108 C (4 mm); flash pt. 100 C; ref. index 1.489-1.4920 (20 C)

**Toxicology:** LD₅₀ (oral, rat) 2850 mg/kg; mod. toxic by ing.; TSCA listed

**Precaution:** Combustible liq.

**Hazardous Decomp. Prods.:** Heated to decomp., emits acrid smoke and fumes

**Uses:** Synthetic flavor for pharmaceuticals

**Features:** Fruity flavor

**Regulatory:** FDA 21CFR §172.515; FEMA
Benzyl isoeugenol: Benzylisoeugenol ether.  
See Isoeugenyl benzyl ether

Benzyl isovalerate
CAS 103-38-8; EINECS/ELINCS 203-106-7
FEMA 2152

**Synonyms:** Benzyl 3-methyl butanoate; Benzyl 3-methyl butyrate; Isopentanoic acid, phenylethyl ester; Isopropyl acetic acid, benzyl ester; Isovaleric acid, benzyl ester; 3-Methylbutanoic acid, phenylethyl ester

**Classification:** aromatic compd.

**Empirical:** C₁₂H₁₆O₂

**Properties:** Colorless liq.; apple, pineapple odor; sol. in alcohol, most fixed oils; sl. sol. in propylene glycol; insol. in water, glycerin; m.w. 192.26; dens. 0.988; b.p. 245 C; flash pt. >230 F; ref. index 1.486-1.490

**Toxicology:** LD₅₀ (oral, rat) 493 mg/kg, (IP, rat) 373 mg/kg; LC₅₀ (inh., mouse, 4 h) 178 ppm; poison by ing., inh., IP routes; eye irritant; mild mucous membrane irritant; lachrymator; questionable carcinogen; experimental tumorigen; TSCA listed

**Precaution:** Combustible liq.

**Hazardous Decomp. Prods.:** Heated to decomp., emits acrid smoke and fumes

**Uses:** Synthetic flavor for pharmaceuticals

**Features:** Apple, pineapple-like

**Regulatory:** FDA 21CFR §172.515; FEMA GRAS; Canada DSL

**Benzyl mercaptan**
CAS 100-53-8; EINECS/ELINCS 202-862-5
UN 1228 (DOT); UN 3071 (DOT); FEMA 2147

**Synonyms:** Benzenemethanethiol; Benzyl hydrosulfide; Benzylthiol; (Mercaptomethyl) benzene; α-Mercaptotoluene; Methanethiol, phenyl-; Phenylmethanethiol; Phenylmethyl mercaptan; Thiobenzyl alcohol; α-Toluenethiol; α-Tolyl mercaptan

**Classification:** Aromatic mercaptan; aromatic thiol

**Empirical:** C₇H₈S

**Formula:** C₆H₅CH₂SH

**Properties:** Colorless liq.; strong leek-like odor; very sol. in ethanol, ether; sol. in CS₂; sol. in oxygenated solvs.; insol. in water; m.w. 124.19; dens. 1.058 (20 C); b.p. 194-195 C; flash pt. (CC) 70 C; ref. index 1.576 (20 C)

**Toxicology:** LD₅₀ (oral, rat) > 5 g/kg, (skin, rabbit) > 5 g/kg; low toxicity by ing. and skin contact; primary skin irritant; TSCA listed

**Precaution:** Flamm. exposed to heat or flame; oxidizes in air to dibenzyl disulfide; vigorous reaction with oxidizers; wear safety glasses or goggles, rubber gloves, apron

**Hazardous Decomp. Prods.:** CO, CO₂, SOₓ, hydrogen sulfide; heated to decom. or on contact with acid or acid fumes, emits highly toxic fumes of SOₓ

**NFPA:** Health 2, Flammability 2

**Storage:** 6 mos. when stored at 40-70 F in tightly sealed original containers with minimum head space; avoid prolonged exposure to light, heat, air

**Uses:** Synthetic flavor for pharmaceuticals

**Definition:** Mixture of isomers of tertiary butyl-substituted 4-methoxyphenols  
**Empirical:** C₁₁H₁₆O₂  
**Properties:** Wh. or sl. yel. cryst. or waxy solid, faint char. aromatic odor; sol. in ethanol, petrol. ether, 50% or higher alcohol, propylene glycol, chloroform, fats, oils; insol. in water; m.w. 180.27; m.p. 48-55 °C; b.p. 264-270 °C (733 mm)  
**Toxicology:** LD₅₀ (oral, mouse) 2000 mg/kg; mod. toxicity by ing., IP routes; may cause rashes, hyperactivity; confirmed carcinogen; experimental neoplastigen, tumorigen, reproductive effects; mutagenic data; TSCA listed
Precaution: **Combustible**

Hazardous Decomp. Prods.: Heated to decomp., emits acrid and irritating fumes

HMIS: Health 1, Flammability 1, Reactivity 0

Uses: Antioxidant, preservative for pharmaceuticals, orals, rectals, topicals

Use Level: 0.02% max. (preservation of fixed oils, fats, vitamin oil concs.)

Regulatory: FDA 21CFR §166.110, 172.110, 172.515, 172.615, 173.340, 175.105, 175.125, 175.300, 175.380, 175.390, 176.170, 176.210, 177.1010, 177.1210, 177.1350, 178.3120, 178.3570, 179.45; Canada DSL; 181.22, 181.24 (0.005% migrating from food pkg.), 182.3169 (0.02% max. of fat or oil), GRAS; FEMA GRAS; USDA 9CFR 318.7, 381.147; Japan approved 0.2-1 g/kg; Europe approved; FEMA GRAS; USDA 182.3169 (0.02% max. of fat or oil), GRAS; 181.24 (0.005% migrating from food pkg.), GRAS; 181.22, 181.24 (0.005% migrating from food pkg.), 182.3169 (0.02% max. of fat or oil), GRAS; USDA 9CFR 318.7, 381.147; Japan approved 0.2-1 g/kg; Europe approved; UK approved; approved for orals, rectals, topicals; USP/NF, BP, EP complianc

Trade Names Containing: Amerol® 4 Liquid;
Amerol® 4A Liquid; Amerol® 4B Liquid;
Amerol® A Liquid; Crystal® Crown

BHT
CAS 128-37-0; EINECS/ELINCS 204-881-4
FEMA 2184; INS321

Synonyms: 2,6-Bis (1,1-dimethylethyl)-4-methylphenol; Butylated hydroxytoluene; 2,6-t-butyl-4-methylphenol; DBPC; 2,6-Di-t-butyl-p-cresol; Di-t-butyl-p-cresol; 2,6-Di-t-butyl-4-methylphenol; Hydroxytoluene, butylated; 4-Methyl-2,6-di-t-butylphenol; Methyl di-t-butylphenol

Classification: Substituted toluene

Empirical: C₁₅H₂₄O

Formula: [C(CH₃)₃]₂CH₃C₆H₂OH

Properties: Wh. cryst. solid, faint char. odor; sol. in toluene, alcohols, MEK, acetone, Cellosolve, petrol. ether, chloroform, benzene, most HC solvs.; insol. in water, propylene glycol; m.w. 220.39; sp.gr. 1.048 (20/4 C); m.p. 68 C; b.p. 265 C; flash pt. (TOC) 260 F

Toxicology: ACGIH TLV 10 mg/m³; LD50 (oral, rat) 890 mg/kg, (IP, mouse) 138 mg/kg, IV, mouse) 180 mg/kg; mod. toxic by ing.; poison by IP, IV routes; suspected carcinogen; human skin irritant; eye irritant; may cause rashes, hyperactivity; experimental teratogen, reproductive effects; TSCA listed

Precaution: Combustible exposed to heat or flame; reactive with oxidizing materials

Hazardous Decomp. Prods.: Heated to decomp., emits acrid smoke and fumes

HMIS: Health 1, Flammability 0, Reactivity 0

Uses: Antioxidant, preservative for pharmaceuticals, orals, injectables, rectals, topicals

Use Level: 0.02% max. (preservation of fixed oils, fats, vitamin oil concs.)

Regulatory: FDA 21CFR §137.350, 166.110, 172.115, 172.615 (0.1% max.), 172.185, 173.340 (0.1% of defoamer), 175.105, 175.125, 175.300, 175.380, 175.390, 176.170, 176.210, 177.1010, 177.1210, 177.1350, 177.2260, 177.2600, 178.2010, 178.3120, 178.3570, 179.45, 181.22, 181.24 (0.1% max. of defoamer), 175.105, 175.125, 175.300, 175.380, 175.390, 176.170, 176.210, 177.1010, 177.1210, 177.1350, 177.2260, 177.2600, 178.2010, 178.3120, 178.3570, 179.45, 181.22, 181.24 (0.005%

Biotin (INCI); (+)-Biotin. See d-Biotin

**d-Biotin**

**CAS** 58-85-5; EINECS/ELINCS 200-399-3

**Synonyms:** Biotin (INCI); (+)-Biotin; d-(+)-Biotin; Coenzyme R; [3aS-(3a-α,4b,6aα)]-Hexahydro-2-oxo-1H-thieno [3,4-d] imidazole-4-pentanoic acid; cis-Hexahydro-2-oxo-1H-thieno (3,4)-imidazole-4-valeric acid; 1H- Theino (3,4-d) imidazole-4-pentanoic acid, hexahydro-2-oxo-, (3aS-(3a-α-4-β,6a-α))-; Vitamin B7; Vitamin H

**Classification:** Organic compd.

**Empirical:** C₁₀H₁₆N₂O₃S

**Properties:** Wh. cryst. powd.; sol. in water, alcohol; insol. in common org. solvs.; m.w. 244.31; m.p. 231-233 C

**Toxicology:** No human toxic symptoms reported on heavy dosage; experimental teratogen, reproductive effects; TSCA listed

**Hazardous Decomp. Prods.:** Heated to decomp., emits toxic fumes of NOₓ, SOₓ

**Uses:** Nutrient, dietary supplement for pharmaceuticals; in enzyme systems; microbial fermentation nutrient

**Regulatory:** FDA 21CFR §101.9, 107.100, 182.8159, GRAS; BP, EP compliance; Canada DSL

ethylenediamine. See Triethylenetetramine

Bis (aminopropyl) piperazine
CAS 7209-38-3
UN 1760 (DOT)
Synonyms: BAPP; 1,4-Bis (aminopropyl) piperazine; 1,4-Bis-(3-aminopropyl) piperazine
Classification: Heterocyclic organic compd.
Empirical: C10H24N4
Properties: Clear liq.; m.w. 200.38; sp.gr. 0.97; m.p. 15 C; b.p. 295 C; flash pt. (COC) 325 F; ref. index 1.5001
Toxicology: LD50 (IV, mouse) 3500 µg/kg; poison by IV route; corrosive; irritating to eyes, skin, mucous membranes; TSCA listed
Precaution: Corrosive
Hazardous Decomp. Prods.: Heated to decomp., emits toxic fumes of NOx
Uses: Pharmaceutical intermediate; dietary supplement
Regulatory: Canada DSL
Manuf./Distrib.: Aceto http://www.aceto.com; Aldrich† http://www.sigma-aldrich.com; BASF AG http://www.basf.de

1,4-Bis (aminopropyl) piperazine; 1,4-Bis-(3-aminopropyl) piperazine. See Bis (aminopropyl) piperazine
N,N-Bis[2-[bis (carboxymethyl) amino] ethyl] glycine, pentasodium salt. See Pentasodium HEDTA

Bis (butoxyethyl) ether; Bis (2-butoxyethyl) ether. See Diethylene glycol dibutyl ether
Bis (n-butyl) sebacate. See Dibutyl sebacate
N-[2-[Bis(carboxymethyl) amino] ethyl]-N-(2-hydroxyethyl) glycine, trisodium salt. See Trisodium HEDTA

3,6-Bis (carboxymethyl)-3,5-diazooctanedioic acid. See Edetic acid
1,6-Bis (5-(p-chlorophenyl) biguanido) hexane diglucnate. See Chlorhexidine diglucnate
1,6-Bis (5-(p-chlorophenyl) biguanido) hexane diacetate. See Chlorhexidine diacetate
N,N´-Bis (4-chlorophenyl)-3,12-diimino-2,4,11,13-tetraazatetradecane-diimidamide compd. with D-gluconic acid. See Chlorhexidine diglucnate
N,N´-Bis (4-chlorophenyl)-3,12-diimino-2,4,11,13-tetraazatetradecanediimidamide, dihydrochloride. See Chlorhexidine dihydrochloride

†=pharmaceutical grade

Bis-(diethylthiocarbamyl) sulfide. See Tetaethylthiuram sulfide
Bis-diglyceryl caprylate/caprate/isostearate/hydroxystearate adipate. See Bis-diglyceryl polyaclyladiapate-1
Bis-diglyceryl caprylate/caprate/isostearate/stearate/hydroxystearate adipate. See Bis-diglyceryl polyaclyladiapate-2
Bis-diglyceryl polyaclyladiapate-1
CAS 222722-06-7; EINECS/ELINCS 406-144-4
Synonyms: Adipic acid, oxybispropanediol diester, esters with mixed caprylic, capric, isostearic, and hydroxystearic acids; Bis-diglyceryl caprylate/caprate/isostearate/hydroxystearate adipate; Caprylic/capric/isostearic adipic triglycerides; Hexanediol dicaclate, mixed diesters with decanoic acid, 12-hydroxyoctadecanoic acid, isostearic acid, octanoic acid and oxybis (propanediol)
Definition: Adipic acid diester of mixed diglyceryl ester of caprylic, capric, hydroxystearic and isostearic acids
Uses: Lanolin oil substitute; emollient
Trade Names: Softisan® 645
Trade Names Containing: Softisan® Gel

Bis-diglyceryl polyaclyladiapate-2
CAS 82249-33-0; EINECS/ELINCS 406-144-4
Synonyms: Bis-diglyceryl caprylate/caprate/isostearate/stearate/hydroxystearate adipate
Definition: Adipic acid diester of a mixed diglyceryl ester of caprylic, capric, stearic, isostearic and hydroxystearic acids
Uses: Emollient, ointment base, stabilizer for pharmaceuticals, creams
Features: Lanolin substitute
Trade Names: Softisan® 649

1,4-Bis (3,4-dihydroxyphenyl)-2,3-dimethylbutane. See Nordihydroguaiaretic acid
Bis (2,4-dihydroxyphenyl) methanone. See Benzophenone-2
Bis ((dimethylamino) carbonothioyl) disulfide. See Tetramethylthiuram disulfide
3,7-Bis (dimethylamino) phenazathionium chloride trihydrate; 3,7-Bis (dimethylamino) phenothiazin-5-ium, chloride, trihydrate. See Methylene blue trihydrate
N-[4-Bis [4-(dimethylamino) phenyl]
**Chemical Component Cross-Reference**

methylen-[2,5-cyclohexadien-1-ylidene]-N-methylmethanaminium chloride. See Basic violet 3
2,6-Bis (1,1-dimethylethyl)-4-methylphenol. See BHT
Bis (dimethylthiocarbamoyl) disulfide; Bis (dimethylthiocarbamyl) disulfide. See Tetramethyliuram disulfide
Bis (dodecyloxycarbonylhexyl) sulfide. See Dilauryl thiopropionate
Bis (2-ethoxyethyl) ether. See Diethylene glycol diethyl ether
Bis (2-ethylhexyl) adipate. See Dioctyl adipate
Bis (2-ethylhexyl) butanedioate. See Dioctyl succinate
1,3-Bis (2-ethylhexyl) cyclohexane. See Dicyclopentyl cyclohexane
1,3-Bis (2-ethylhexyl) hexahydro-5-methyl-5-pyrimidiamine. See Hexetidine
Bis (2-ethylhexyl) hexanedioate. See Dioctyl adipate
Bis (2-ethylhexyl) malate. See Diethyl malate
Bis (2-ethylhexyl) sodium sulfosuccinate; 1,4-Bis (2-ethylhexyl) sulfobutanedioic acid sodium salt. See Diocetyl sodium sulfosuccinate
Bis (D-gluconoato) copper. See Copper gluconate (ic)
Bis (D-gluconoato-O\(^{1}\),O\(^{2}\))-iron. See Ferrous gluconate
Bis (D-gluconoato-O\(^{1}\),O\(^{2}\))-iron dihydrate. See Ferrous gluconate dihydrate
Bis (D-gluconoato-O\(^{1}\),O\(^{2}\)) manganese. See Manganese gluconate
Bis (2-hydroxy-3,5-dichlorophenyl) sulfide. See 2,2'-Thiobis (4,6-dichlorophenol)
1,2-Bis (2-hydroxyethoxy) ethane. See Triethylene glycol
Bis [2-(2-hydroxyethoxy) ethyl] ether. See PEG-4
Bis (2-hydroxyethyl) amine; N,N-Bis (2-hydroxyethyl) amine. See Diethanolamine
Bis (hydroxyethyl) aminopropyl-N-hydroxyethyl-octadecylaminiumhydrofluoride. See Olafur
Bis (2-hydroxyethyl) ammonium decyl sulfate. See DEA-lauryl sulfate
Bis (2-hydroxyethyl)-ammonium hexadecylphosphate. See DEA-cetyl phosphate
N,N-Bis (2-hydroxyethyl) coco amides; N,N-Bis (2-hydroxyethyl) coco fatty acid amide.

2,2-Bis (hydroxymethyl) propionic acid; α,α-Bis (hydroxymethyl) propionic acid. See Dimethylolpropionic acid
Bis (2-hydroxypropyl) amine. See
Diisopropanolamine
Bis [1-hydroxy-2(1H)-pyridinethionato-O,S]- (T-4) zinc. See Zinc pyrithione
Bis (8-hydroxyquinolinium) sulfate. See 8-Hydroxyquinoline sulfate
Bis (2-hydroxy-3,5,6-trichlorophenyl) methane. See Hexachlorophene
Bis (isobutyl) hydroaluminum. See Diisobutylaluminum hydride
2,2-Bis [(1-isooctadecyl) ox] methyl]-1,3-propanediyl isooctadecanoate. See Pentacyrthrytilyl tetraisostearate
Bis (lactato) magnesium. See Magnesium lactate
Bis (2-methoxyethyl) ether. See Diethylene glycol dimethyl ether
Bis (1-methylethyl) decanedioate. See Diisopropyl sebacate
Bis (1-methylethyl) hexanedioate. See Diisopropyl adipate
Bismuth carbonate basic; Bismuth (III) carbonate basic. See Bismuth subcarbonate
Bismuth chloride oxide. See CI 77163; Bismuth oxychloride
Bismuth citrate
CAS 813-93-4; EINECS/ELINCS 212-390-1
Synonyms: 1,2,3-Propanetricarboxylic acid, 2-hydroxy-, bismuth (3+) salt (1:1)
Definition: Bismuth salt of citric acid
Empirical: C₆H₅BiO₇
Formula: BiC₆H₅O₇
Properties: Wh. powd.; sol. in ammonia or alkali citrates; sl. sol. in alcohol; insol. in water; m.w. 398.09; dens. 3.458; m.p. dec.
Uses: Buffer, chelating agent in pharmaceuticals; medicine
Regulatory: FDA 21CFR §73.2110
St. Lawrence http://www.stlawrencechem.com
Bismuth gallate basic; Bismuth (III) gallate, basic. See Bismuth subgallate
Chemical Component Cross-Reference

Bismuth hydroxide nitrate oxide; Bismuth nitrate, basic. See Bismuth subnitrate
Bismuth oxycarbonate. See Bismuth subcarbonate

Bismuth oxychloride
CAS 7787-59-9; EINECS/ELINCS 232-122-7
Synonyms: Basic bismuth chloride; Bismuth chloride oxide; Bismuth subchloride; Chlorooxobismuthine; CI 77163; Pearl white; Pigment white 14; Synthetic pearl
Classification: Inorganic pigment
Empirical: BiClO
Formula: BiOCl
Properties: Wh. cryst. powd.; sol. in acids; insol. in water; m.w. 260.48; dens. 7.717; high m.p.
Toxicology: Irritant; toxic if ingested; TSCA listed
HMIS: Health 1, Flammability 0, Reactivity 0
Uses: Colorant for external pharmaceuticals incl. those for eye area use; skin protectant
Regulatory: FDA 21CFR §73.1162, 73.2162; exempt from certification, permanently listed for drug use

†=pharmaceutical grade
See also CI 77163
Bismuth oxynitrate. See Bismuth subnitrate
Bismuth salicylate basic; Bismuth (III) salicylate basic. See Bismuth subsalicylate

Bismuth subcarbonate
CAS 5892-10-4; EINECS/ELINCS 227-567-9
Synonyms: Bismuth carbonate basic; Bismuth (III) carbonate basic; Bismuth oxycarbonate
Empirical: Bi₂CO₅
Formula: (BiO)₂CO₃
Properties: Wh. or pale yel. powd., odorless; tasteless; sol. in nitric acid, conc. ethanol, conc. acetic acid; insol. in water, alcohol; m.w. 510.01; dens. 6.860; stable in air but affected slowly by light
HMIS: Health 1, Flammability 0, Reactivity 0
Storage: Light-sensitive
Uses: Pharmaceutical health care prods.; orals; adsorbent in anti-diarrheal prods.
Regulatory: BP, EP compliance; FDA approved for orals; Canada DSL

Bismuth subchloride. See Bismuth oxychloride

Bismuth subgallate
CAS 99-26-3; 12263-40-0
Synonyms: Basic bismuth gallate; Bismuth gallate basic; Bismuth (III) gallate, basic; Bismuth 3,4,5-trihydroxybenzoate, basic;
**Gallic acid, bismuth basic salt**

Empirical: C₇H₅BiO₆

Formula: C₆H₂(OH)₃COOBi(OH)₂

Properties: Hydrate, bright yel. powd., odorless, tasteless; dissolves readily with decomp. in warm, mod. dil. hydrochloric, nitric, or sulfuric acids; pract. insol. in water, alcohol, chloroform, ether; insol. in very dil. min. acids; m.w. 354.09; stable in air

HMIS: Health 2, Flammability 1, Reactivity 1

Storage: Light-sensitive

Uses: Protectant, antiseptic, astringent, antacid for pharmaceuticals, rectals, dusting powds.; gastrointestinal/antieczema drug; treatment of alimentary canal

Regulatory: BP, EP compliance; FDA approved for rectals; Canada DSL

Bitter ash. See Quassia
Bitter fennel oil. See Fennel (Foeniculum vulgare) oil

Bitter orange (Citrus aurantium amara) oil
CAS 68916-04-1
FEMA 2823
Synonyms: Bitter orange oil; Bitter orange peel oil; Citrus amara; Citrus aurantium; Citrus aurantium amara; Neroli bigarade oil; Orange, bitter, oil; Orange oil, bitter; Orange peel, bitter, oil

Definition: Volatile oil expressed from peel of Citrus aurantium, contg. about 90% d-limonene and citral, decyl aldehyde, methyl anthranilate, linalool, terpineol

Properties: Pale yel. to yel.-brn. liq., char. orange odor, bitter taste; sol. in fixed oils, min. oil; misc. with abs. alcohol, in 1 vol. gl. acetic acid; very sl. sol. in water; dens. 0.845-0.851; ref. index 1.470 (20 C)

Toxicology: Skin irritant; TSCA listed

Hazardous Decomp. Prods.: Heated to decomp., emits acrid smoke and irritating fumes

Storage: Keep cool, well closed; protect from light

Uses: Natural flavor for pharmaceuticals

Regulatory: FDA 21CFR §182.20, GRAS; FEMA GRAS; Canada DSL

Manuf./Distrib.: Citrus and Allied Essences

Bitter orange oil; Bitter orange peel oil. See Bitter orange (Citrus aurantium amara) oil
Bitter root. See Gentian (Gentiana lutea)
Bitter salts. See Magnesium sulfate heptahydrate
Bitter wood. See Quassia
Bixa orellana. See Annatto (Bixa orellana) extract
Bixin. See Annatto (Bixa orellana); Annatto

Black balsam. See Balsam Peru (Myroxylon pereirae)

Blackberry extract. See Blackberry (Rubus fruticosus) extract; Blackberry (Rubus villosus) extract

Blackberry fruit extract. See Blackberry (Rubus fruticosus) extract

Blackberry (Rubus fruticosus) extract
CAS 84787-69-9; EINECS/ELINCS 287-110-6
FEMA 2155
Synonyms: Blackberry extract; Blackberry fruit extract; Dewberry extract; Rubus extract; Rubus fruticosus; Rubus fruticosus extract

Definition: Extract of fruit of Rubus fruticosus

Uses: Natural flavor for pharmaceuticals

Regulatory: FDA 21CFR §172.510; FEMA GRAS

Manuf./Distrib.: Carrubba http://www.carrubba.com

Blackberry (Rubus villosus) extract
CAS 93165-71-0; EINECS/ELINCS 296-958-4
Synonyms: Blackberry extract; Rubus villosus extract

Definition: Extract of fruit of Rubus villosus

Uses: Natural flavor for pharmaceuticals

Regulatory: FDA 21CFR §172.510; FEMA GRAS

Black birch oil. See Birch (Betula alba) oil

Black caraway (Nigella sativa)
CAS 977017-84-7; 8000-42-8
FEMA 2237
Synonyms: Black caraway; Black cumin; Caraway, black; Nigella sativa

Definition: Derived from Nigella sativa

Properties: Dark yel.; flash pt. 55C

Storage: Shelf life 6 mos.; store @16 C in dark glass, aluminum. plastic, or steel containers

Uses: Natural flavor for pharmaceuticals

Features: Characteristic odor of black cumin seeds

Regulatory: FDA 21CFR §182.10, GRAS; FEMA GRAS

Manuf./Distrib.: Ferlow Botanicals http://www.ferlowbotanicals.com

Black caraway; Black cumin. See Black caraway (Nigella sativa)

Black magnetic oxide; Black oxide, precipitated. See Iron oxide black

Black pepper oil. See Black pepper (Piper nigrum) oil
Black pepper oleoresin, Pepper oleoresin. See Oleoresin black pepper

Black pepper (Piper nigrum) oil
CAS 8006-82-4; 84929-41-9; EINECS/ELINCS 284-524-7
FEMA 2844; 2845
Synonyms: Black pepper oil; Pepper, black, oil; Pepper oil, black; Piper nigrum; Piper nigrum oil
Definition: Derived from Piper nigrum; main constituents incl. \( \alpha \) and \( \beta \)-pinene, \( \beta \)-caryophyllene, \( \beta \)-limonene, d-hydrocarveol, piperidine
Properties: Spicy, warm odor; sol. in alcohol; insol. in water
Toxicology: Primary irritant; mod. skin irritant; mutagenic data; TSCA listed
Hazardous Decomp. Prods.: Heated to decomp., emits acrid smoke and fumes
Storage: Store in lt.-resistant containers
Uses: Natural flavor for pharmaceuticals
Regulatory: FDA 21CFR §182.10, 182.20, GRAS; FEMA GRAS; Canada DSL

CAS 76-49-3; EINECS/ELINCS 200-964-4
FEMA 2159

Synonyms: Bicyclo (2.2.1) heptan-2-ol, 1,7,7-trimethyl-, acetate, endo-; Borneol acetate; levo-Bornyl acetate; Bornyl acetic ether; Bornyl ethanoate; 2-Camphanol acetate; endo-2-Camphanyl ethanoate; 2-Hydroxycamphane; Mayalan camphor; Sumatra camphor; DL-1,7,7-Trimethylbicyclo [2.2.1] heptan-2-ol; endo-1,7,7-Trimethylbicyclo [2.2.1] heptan-2-ol acetate

Empirical: \( \text{C}_{12} \text{H}_{20} \text{O}_2 \)

Properties: Colorless liq. or wh. cryst. solid; piney odor; fresh, burning taste; sol. in alcohol, most fixed oils; sl. sol. in water; insol. in propyl glycol; m.w. 196.29; dens. 0.981-0.985; m.p. 27.5 C; b.p. 225-226 C; flash pt. 89 C; ref. index 1.462-1.466; tenacity 4 hrs. on blotter

Toxicology: TSCA listed

Precaution: Combustible liq.

Hazardous Decomp. Prods.: Heated to decomp., emits acrid smoke and fumes

HMIS: Health 1, Flammability 1, Reactivity 0
Chemical Component Cross-Reference

Storage: Store in cool, dry place in tightly sealed containers, protected from heat and light

Uses: Synthetic flavor, solvent for pharmaceuticals, in aromatic preps. for treatment of coughs, other respiratory-tract disorders, musculoskeletal and joint disorders

Use Level: < 10%

Regulatory: FDA 21CFR §172.515; FEMA GRAS; Australia; Canada DSL; Japan ENCS (no. 4-1216); Philippines PICCS

levo-Bornyl acetate; Bornyl acetic ether. See Bornyl acetate
Bornyl alcohol. See DL-Borneol
Bornyl ethanoate. See Bornyl acetate

Bornyl formate
CAS 7492-41-3; EINECS/ELINCS 231-319-5; FEMA 2161
Synonyms: Bicyclo [2.2.1] heptan-2-ol, 1,7,7-trimethyl-, formate, endo-; Borneol, formate; Bornyl methanoate

Empirical: C₁₁H₁₈O₂
Formula: C₁₀H₁₇OOCH
Properties: Colorless, oily liq.; piney odor; m.w. 182.26; dens. 1.007-1.009; b.p. 106-108 C (21 mm); ref. index 1.4689
Precaution: Combustible
Uses: Synthetic flavor for pharmaceuticals
Features: Green earthy herbal balsam odor
Regulatory: FDA 21CFR §172.515; FEMA GRAS; Canada DSL

Bornyl isovalerate
CAS 76-50-6 (D-); 53022-14-3; 59672-05-8; EINECS/ELINCS 200-966-5 (D-); 261-849-2; FEMA 2165
Synonyms: Bornyl isovalerate; d-Bornyl isovalerate; 2-Bornyl 3-methylbutyrate; Bornyval; Isovaleric acid, 2-bornyl ester; (1R-endo)-3-Methylbutanoic acid 1,7,7-trimethylbicyclo [2.2.1] hept-2-yl ester; (1R-endo)-1,7,7-Trimethylbicyclo [2.2.1] hept-2-
Empirical: C₁₅H₂₆O₂
Formula: (CH₃)₂CHCH₂COOC₁₀H₁₇
Properties: Liq.; odor and taste of valerian and camphor; sol. in alcohol, ether; pract. insol. in water; m.w. 238.36; dens. 0.955; b.p. 255-260 C
Uses: Synthetic flavor for pharmaceuticals; medicine
Regulatory: FDA 21CFR §172.515; FEMA GRAS; Canada DSL

### Boron

**CAS:** 7440-42-8; EINECS/ELINCS 231-151-2  
**Classification:** Nonmetallic element  
**Empirical:** B

**Properties:** Blk. hard solid, brn. amorphous powd., or cryst.; sol. in conc. nitric and sulfuric acids; insol. in water, alcohol, ether; amphoteric; a.w. 10.81; dens. 2.45; m.p. 2300 C; hardness (Mohs) 9.3

**Toxicology:** LD50 (oral, rat) 650 mg/kg, (IP, mouse) 11 g/kg; poison by ing.; TSCA listed

**Precaution:** Relatively inert except as powd. or when exposed to strong oxidizers; dust ignites spontaneously in air; severe fire and explosion hazard; reacts exothermically with metals above 900 C; explodes with hydrogen iodide; many incompatibilities

**Uses:** In pharmaceuticals, antiseptics; prod. of boron compds. for cancer therapy, anti-fungal treatment, management of epilepsy and the control of anemia

**Regulatory:** Canada DSL  
**Manuf./Distrib.:**

### Boron nitride

**CAS:** 10043-11-5; EINECS/ELINCS 233-136-6  
**Classification:** Inorganic compd.

**Empirical:** BN

**Properties:** Wh. hard cryst. powd.; m.w. 24.82; dens. 2.290; m.p. 3000 C (sublimes); high elec. and heat-shock resist.; compressed, becomes hard as diamond; noncombustible

**Toxicology:** TSCA listed

**Storage:** Hygroscopic

**Uses:** IR absorbent in pharmaceutical topicals

**Regulatory:** Canada DSL  
**Manuf./Distrib.:**  
- Aldrich [http://www.sigma-aldrich.com](http://www.sigma-aldrich.com)

Handbook of Pharmaceutical Additives, Third Edition

Sweetener in pharmaceuticals

Uses:

Trade Names:

Synonyms:

Uses:

Storage:

Properties:

Definition:

Inorganic metal consisting of powdered bronze

Properties:

Colorant for external pharmaceuticals, incl. those for eye area use

Regulatory:

FDA 21CFR §73.1646, 73.2646; exempt from certification, permanently listed for drug use

See also CI 77400; Copper

Brown acetate. See Calcium acetate

Brown rice syrup

Uses: Sweetener in pharmaceuticals

Trade Names: CNP BRSHM; CNP BRSHMCL

Brown rice syrup solids

Synonyms: BRSS

Properties: Creamy color; sl. caramel flavor note

Storage: Store in cool, dry area, below 95 F, air conditioned preferred

Uses: Sweetener in pharmaceuticals

†=pharmaceutical grade

Trade Names: CNP BRSSHM; CNP BRSHMCL

Brown SK. See Vat brown 1

BRSS. See Brown rice syrup solids

Brucite. See Magnesium hydroxide

BSA. See Bis (trimethylsilyl) acetamide

BSU. See Bis (trimethylsilyl) urea

Buchu leaf oil. See Buchu leaves oil

Buchu leaves oil

CAS 68650-46-4; 84649-93-4; EINECS/ELINCS 283-474-3

FEMA 2169

Synonyms: Barosma betulina; Barosma betulina oil; Barosma crenulata; Barosma crenulata oil; Barosma serratifolia; Barosma serratifolia oil; Buchu leaf oil

Definition: Derived from Barosma betulina, B. crenulata, or B. serratifolia

Properties:

Yel. to brnsh. yel. visc. oily liq.; strong bitter sweet mint camphor woody fruity odor, fresh bitter flavor; sol. in ethanol, fixed oils; insol. in water, propylene glycol; sp.gr. 0.890-0.951; ref. index 1.467-1.480 (20 C)

Uses: Natural flavor for pharmaceuticals

Regulatory:

FDA 21CFR §172.510; FEMA GRAS; Canada DSL

Bucrilate. See Bucrylate

Bucrylate

CAS 1069-55-2

Synonyms: Bucrilate; Isobutyl 2-cyanoacrylate

Classification: Liquid polymer

Definition: Cyanoacrylate tissue adhesive

Empirical: C₈H₁₃NO₂

Properties: M.w. 153.18

Uses: Tissue adhesive, embolizing agent,
Chemical Component Cross-Reference

surgical aid for medical use; also used to occlude blood vessels supplying neoplastic or other diseased tissues

Manuf./Distrib.: Sigma http://www.sigma-aldrich.com/belgium

Bulgarian rose oil. See Rose oil
Burnt ammonium alum. See Ammonium alum
Burnt lime. See Calcium oxide
Burnt sugar; Burnt sugar coloring. See Caramel

1,3-Butadiene, 2-methyl-, homopolymer. See Polyisoprene

Butadione. See Diacetyl
Butal; Butaldehyde; Butylyde; Butanal; n-Butanal. See n-Butyraldehyde
Butanal, 2-ethyl-. See 2-Ethylbutyraldehyde
Butanal, 3-methyl-. See Isovaleraldehyde
Butanal, 2-methyl-. See 2-Methylbutyraldehyde
1-Butanamine. See n-Butylamine

Butane

CAS 106-97-8; EINECS/ELINCS 203-448-7
UN 1011 (DOT); INS943a; E943a

Synonyms: Alkane C4; n-Butane; Butyl hydrde; Diethyl; Liquefied petroleum gas; Methylethylmethane

Classification: Alkane; hydrocarbon

Empirical: C4H10

Formula: CH3CH2CH2CH3

Properties: Colorless gas; faint disagreeable odor; easily liquefied under pressure @ R.T.; sol. in ethanol, ether, chloroform; sl. sol. in water; m.w. 58.12; sp.gr. 0.599; vapor pressure 1620 mm Hg (17 psig, 21 C); f.p. -138 C; b.p. -0.5 C; flash pt. (CC) -60 C

Toxicology: ACGIH TLV/TWA 800 ppm; LC50 (inh., rat, 4 h) 658 g/m³; mildly toxic by inh.; causes drowsiness; anesthetic and asphyxiant props.; narcotic in high concs.; liq. may cause burns or frostbite to skin and eyes; TSCA listed

Precaution: Flamm. gas; very dangerous fire hazard exposed to heat, flame, oxidizers; highly explosive; explosive limits 1.9-8.5%; incompat. with strong oxidizing agents (increases fire/explosion risk)

Hazardous Decomp. Prods.: Heated to decomp., emits acrid smoke and fumes

NFPA: Health 1, Flammability 4, Reactivity 0

Storage: Store at or above ground level in a cool, dry, well-ventilated area, out of direct sunlight; cylinder temp. should not exceed 51 C; limit quantities

†=pharmaceutical grade

Uses: Aerosol propellant in pharmaceutical topicals

Regulatory: FDA 21CFR §173.350, 184.1165, GRAS; approved for topicals; USP/NF compliance; Canada DSL

n-Butane. See Butane

Butanecarboxylic acid; 1-Butanecarboxylic acid. See n-Valeric acid

1,4-Butanedicarboxylic acid; Butane-1,4-dicarboxylic acid. See Adipic acid

Butanedioic acid; 1,4-Butenedioic acid. See Succinic acid

Butanedioic acid, bis(2-ethylhexyl) ester. See Dioctyl succinate

Butanedioic acid diethyl ester. See Diethyl succinate

Butanedioic acid, 2,3-dihydroxy-. See L-Tartaric acid

Butanedioic acid, 2,3-dihydroxy-, monopotassium salt. See Potassium acid tartrate

Butanedioic acid, 3-(2,3-dihydroxypropoxy)-2-hydroxypropyl ester, mixed esters with octanoic acid and decanoic acid. See Caprylic/capric diglyceryl succinate

Butanedioic acid, dimethyl ester. See Dimethyl succinate

Butanedioic acid disodium salt. See Sodium succinate

Butanedioic acid, esters with isooctadecanol and glycerol dimer. See Isostearyl diglyceryl succinate

Butanedioic acid, hydroxy-. See N-Hydroxy succinic acid

Butanedioic acid, hydroxy-, bis(2-ethylhexyl) ester. See Dioctyl malate

Butanedioic acid, mono [3,4-dihydro-2,5,7,8-tetramethyl-2-(4,8,12-trimethyltridecyl)-2H-1-benzopyran-6-yl] ester, polymer with oxirane (1:2). See Tocophersolan

Butanedioic acid, sulfon-, 1-[2-[(12-hydroxy-1-oxo-9-octadecenyl) amino] ethyl] ester, disodium salt; Butanedioic acid, sulfon-, 4-[2-[(12-hydroxy-1-oxo-9-octadecenyl)

**Chemical Component Cross-Reference**

**Butanol; 1-Butanol; Butan-1-ol. See Butyl alcohol**

**2-Butanol**

CAS 78-92-2; EINECS/ELINCS 201-158-5
UN 1120 (DOT)

**Synonyms:** Butan-2-ol; s-Butanol; 2-Butyl alcohol; s-Butyl alcohol; Butylene hydrate; Ethylmethyl carbinol; 2-Hydroxybutane; Methyl ethyl carbinol; 1-Methyl propanol; SBA; Secondary butyl alcohol

**Classification:** Sec. aliphatic alcohol

**Empirical:** C₄H₁₀O

**Formula:** CH₃CH₂CH(OH)CH₃

**Properties:** Colorless liq.; strong pleasant sweet odor; sol. in water, ethanol, ether, acetone, benzene; m.w. 74.12; sp.gr. 0.807 (20/4 C); vapor pressure 18.3 mm Hg; m.p. -89C; b.p. 99-100 C; flash pt. 23 C; autoignition temp. 405 C; ref. index 1.3972 (20 C); surf. tens. 23.37 dynes/cm; dielec. const. 16.56

**Toxicology:** ACGIH TLV/TWA 100 ppm; LD₅₀ (oral, rat) 6480 mg/kg, (IP, rabbit) 277 mg/kg; poison by IV and IP routes; mildly toxic by ing.; skin and eye irritant; excessive inh. may cause nose/throat irritation, headache, nausea, fatigue, dizziness; unconsciousness, coma in extreme cases; if aspirated into lungs, may cause severe lung damage, respiratory and cardiac arrest, possibly death; TSCA listed

**Environmental:** VOC; BOD₅ 1.76; COD 2.49; ThOD 2.59

**Precaution:** Flamm.; incompat. with alkali metals (increases fire/explosion risk, forms flamm. hydrogen gas), acids, acid chlorides, acid anhydrides (vigorouse reactions), chlorine, isocyanates, ethylene oxide

**Hazardous Decomp. Prods.:** Unstable peroxides may form after prolonged storage

**NFPA:** Health 1, Flammability 3, Reactivity 0

**Storage:** Store in cool, well-ventilated area out of direct sunlight

**Uses:** Solvent in pharmaceuticals

**Regulatory:** FDA 21CFR §172.515, 176.180; SARA §313 reportable; Canada DSL

2-Butanone, 4-phenyl-. See Benzylacetone

2-Butanone, 4-(2,6,6-trimethyl-1-cyclohexen-1-yl) -. See Dihydro-β-ionone

**Butan-3-one-2-yl butyrate**

CAS 84642-61-5; EINECS/ELINCS 283-438-7
FEMA 3332

**Synonyms:** Acetoxy butyrate; Butanoic acid 1-methyl-2-oxypropyl ester; Butan-3-one-2-butyrate; sec-Butan-3-onyl butyrate; 1-Methyl-2-oxypropyl butyrate; 3-Oxobutan-2-yl butyrate

**Empirical:** C₈H₁₄O₃

**Formula:** CH₃CH₂CH₂CO₂CH(CH₃)COCH₃

**Properties:** Wh. to sl. yel. liq., red berry odor; sol. in alcohol, propylene glycol, most oils; insol. in water; m.w. 158.19; dens. 0.972-0.992; flash

**pt. 179 F; ref. index 1.408-1.429**

**Toxicology:** May be **harmful by inh., ing., skin absorp.**; may cause irritation

**Precaution:** **Combustible liq.**; **incompat. with strong oxidizing agents, strong bases**

**Hazardous Decomp. Prods.:** Toxic fumes of CO, CO₂; **heated to decomp., emits acrid smoke and irritating fumes; emits toxic fumes under fire conditions**

**Storage:** Store in cool, dry place; keep tightly closed; keep away from heat and open flame

**Uses:** **Synthetic flavor for pharmaceuticals**

**Features:** Creamy mouthfeel with creamy and custard-like notes taste

**Regulatory:** FDA GRAS; FEMA GRAS; Canada DSL

Butter of zinc. See Zinc chloride
Button lac. See Shellac
Butyl acetate (INCI); 1-Butyl acetate. See n-Butyl acetate

n-Butyl acetate
CAS 123-86-4; EINECS/ELINCS 204-658-1
UN 1123 (DOT); FEMA 2174
Synonyms: Acetic acid, butyl ester; Acetic acid n-butyl ester; Butyl acetate (INCI); 1-Butyl acetate; Butyl ethanoate
Classification: Carboxylic acid ester
Definition: Ester of butyl alcohol and acetic acid
Empirical: C6H12O2
Formula: CH3COOC4H9
Properties: Colorless liq., fruity odor; sol. in alcohol, ether, benzene, hydrocarbons; sl. sol. in water; m.w. 116.18; sp.gr. 0.8826 (20/20 C); vapor pressure 15 mm Hg; f.p. -75 C; b.p. 126.3 C; flash pt. (TOC) 36.6 C; ref. index 1.2951 (20 C)
Toxicology: ACGIH TLV/TWA 150 ppm; STEL 200 ppm; LD50 (oral, rat) 14.13 g/kg, (IP, mouse) 1230 mg/kg; mildly toxic by inh., ing.; mod. toxic by IP route; skin irritant; severe eye irritant; mild allergen; inh. or ing. can cause CNS depression, headache, nausea, unconsciousness; experimental teratogen; TSCA listed
Environmental: VOC; BOD5 0.52; COD 2.32; ThOD 2.21
Precaution: Flamm.; dangerous fire hazard

†=pharmaceutical grade
exposed to flame; mod. explosive when exposed to flame; incompat. with strong oxidizers (increases fire risk), strong acids or strong bases (decomp. can occur), potassium t-butyate (ignition can occur)
Hazardous Decomp. Prods.: Heated to decomp., emits acrid and irritating fumes
NFPA: Health 1, Flammability 3, Reactivity 0
Storage: Store in cool, dry, well-ventilated area, out of direct sunlight; ground drums and bond transfer containers
Uses: Solvent, synthetic flavor in pharmaceuticals; defoamer in acute pulmonary edema extractants
Regulatory: FDA 21CFR §172.515, 175.105, 175.320, 177.1200; FEMA GRAS; CERCLA hazardous substance; Japan approved as flavoring; Canada DSL

Butylacetic acid. See Caproic acid

Butyl acetooacetate
CAS 591-60-6; EINECS/ELINCS 209-722-2
FEMA 2176
Synonyms: Acetoacetic acid, butyl ester; Butyl-β-ketobutyrate; Butyl-3-oxobutanooate; 3-Oxo-butanolic acid butyl ester
Empirical: C₉H₁₄O₃
Formula: CH₃COCH₂COOCH₂CH₂CH₂CH₃
Properties: Colorless liq.; sol. in alcohol, ether; insol. in water; m.w. 158.20; dens. 0.9694 (20/20 C); vapor pressure 5.5 mm Hg (20 C); b.p. 117.7 C; m.p. -90 C; flash pt. 85 C; ref. index 1.4245
Toxicology: LD₅₀ (oral, rat) 11,260 mg/kg; primary irritant; mildly toxic by ing.; eye irritant; TSCA listed
Precaution: Combustible
Hazardous Decomp. Prods.: Heated to decom., emits acrid and irritating fumes
NFPA: Health 1, Flammability 3, Reactivity 0
Uses: Synthetic flavor for pharmaceuticals; pharmaceutical intermediate
Regulatory: FDA 21 CFR §172.515; FEMA GRAS; Canada DSL

Butylacetone. See Methyl n-amyl ketone
Butyl adipate. See Dibutyl adipate

Butyl alcohol
CAS 71-36-3; EINECS/ELINCS 200-751-6
UN 1120 (DOT); FEMA 2178
Synonyms: Butanol; 1-Butanol; Butan-1-ol; n-Butanol; n-Butyl alcohol; Butyl hydroxide; Butyric alcohol; 1-Hydroxybutane; Methylolpropene; Propyl carbinol; Propylmethanol
Classification: Primary aliphatic alcohol
Empirical: C₄H₁₀O
Formula: CH₃(CH₂)₂CH₂OH
Properties: Colorless clear mobile liq., char. penetrating vinous odor; sol. in water; misc. with alcohol, ether, many org. solvs.; m.w. 74.14; sp.gr. 0.8109 (20/20 C); vapor pressure 5.5 mm Hg (20 C); m.p. -90 C; b.p. 117.7 C; flash pt. 35 C; ref. index 1.3993 (20 C)
Toxicology: ACGIH TLV/CL 50 ppm (skin); LD₅₀ (oral, rat) 790 mg/kg, (IV, mouse) 377 mg/kg, (skin, rabbit) 3400 mg/kg; poison by IV route; mod. toxic by skin contact, ing., subcut., IP routes; skin and severe eye irritant; CNS depressant; TSCA listed
Environmental: BOD₅ 1.66; COD 2.46; ThOD 2.59
Precaution: Flamm.; dangerous fire hazard exposed to heat, flame, oxidizers; mod. explosive exposed to flame; incompat. with oxidizing materials, aluminum, chromium trioxides; increased fire and explosion hazard; reacts at elevated temps. with Al
Hazardous Decomp. Prods.: Heated to decom., emits acrid smoke and fumes
NFPA: Health 1, Flammability 3, Reactivity 0
Storage: Store in cool, well-ventilated area, out of direct sunlight
Uses: Solvent in pharmaceuticals, orals; synthetic flavor for pharmaceuticals
Regulatory: FDA 21 CFR §73.1, 172.515, 172.560, 175.105, 175.320, 176.180, 176.200, 176.210, 177.1200, 177.1440, 177.1650, 177.2800, 27CFR §21.99; FEMA GRAS; FDA approved for orals; USP/NF compliance; Canada DSL; SARA §313 reportable; CERCLA hazardous substance; VOC

2-Butyl alcohol. See 2-Butanol
n-Butyl alcohol. See Butyl alcohol
s-Butyl alcohol. See 2-Butanol
t-Butyl alcohol
CAS 75-65-0; EINECS/ELINCS 200-889-7
UN 1120 (DOT)

Synonyms: t-Butanol; t-Butyl hydroxide; Dimethylethanol; 1,1-Dimethylethanol; Methyl-2-propanol; 2-Methyl-2-propanol; 2-Methylpropan-2-ol; 2-Propanol, 2-methyl-; TBA; Trimethyl carbinol; Trimethyl methanol
Classification: Tertiary aliphatic alcohol
Empirical: C₄H₁₀O
Formula: (CH₃)₂COH
Properties: Colorless liq. or rhombic prisms; unpleasant camphor-like odor; sol. in ethanol, ether, water; m.w. 74.12; sp.gr. 0.786 (20 C); vapor pressure 40 mm Hg (24.5 C); m.p. 25-26 C; b.p. 83 C; flash pt. (CC) 11 C; autoignition temp. 343 C; ref. index 1.3870 (20 C)

Toxicology: ACGIH TLV/TWA 100 ppm; STEL 150 ppm; LD50 (oral, rat) 3500 mg/kg; toxic; irritant to mucous membranes; inh. of 25 ppm causes pulmonary problems in man; CNS depressant; inh. of high concs. can cause headache, drowsiness, unconsciousness; ing. can cause headache, dizziness, drowsiness; may cause severe lung damage, respiratory/cardiac arrest, and death if aspirated into lungs; skin contact can cause contact dermatitis, possible allergic reactions; eye irritant; mutagenic data; TSCA listed

Precaution: Flamm.; dangerous fire hazard exposed to heat, flame; mod. explosive as vapor; incompat. with strong oxidizers, potassium-sodium alloy, hydrogen peroxide and sulfuric acid (fire/explosion risk), strong min. acids (can dec. to flamm. isobutylene gas)

NFPA: Health 1, Flammability 3, Reactivity 0

Storage: Store in cool, dry, well-ventilated area, out of direct sunlight

Uses: Solvent, coupling agent, processing aid, denaturant for pharmaceuticals

Regulatory: FDA 21CFR §176.200, 178.3910, 27CFR §21.100; Canada DSL

t-Butylamine
CAS  75-64-9; EINECS/ELINCS  200-888-1
UN 1125 (DOT); 1993
Synonyms: 2-Aminoisobutane; 2-Amino-2-methylpropane; Dimethylethylamine; 1,1-Dimethylethylamine; 2-Methyl-2-aminopropane; 2-Methyl-2-propanamine; Trimethylaminomethane; Trimethylcarbinylamine
Classification: Sat. aliphatic amine
Empirical: C₄H₁₁N
Formula: (CH₃)₃CNH₂
Properties: Colorless clear liq.; ammonia-like odor; sol. in water, many org. solvs. incl. ethanol, methanol, diethyl ether, dimethyl sulfoxide; m.w. 73.14; dens. 0.700 (15 C); f.p. -72 C; b.p. 44-46 C; flash pt. ≈ 10 C; ref. index 1.3794 (18 C)
Toxicology: LD₅₀ (oral, rat) 78 mg/kg; highly

Handbook of Pharmaceutical Additives, Third Edition  987
Chemical Component Cross-Reference

toxic; poison by ing.; can cause burning of mouth, throat, and digestive tract, and CNS effects; inh. can cause nose/throat/lung irritation, coughing, chest pain, difficulty breathing; high concs. can cause potentially fatal pulmonary edema; skin and severe eye irritant; severe exposure can cause serious skin burns, eye burns, permanent eye injury; may cause 'halo vision'; TSCA listed

Precaution: Flamm.; dangerous fire risk; corrosive; very exothermic reaction with 2,2-dibromo-1,3-dimethylcyclopropanoic acid

Hazardous Decomp. Prods.: Heated to decomp., emits toxic fumes of NOx, CO2, CO

NFPA: Health 2, Flammability 4, Reactivity 0

Storage: Handle and store under nitrogen

Uses: Pharmaceutical intermediate

Regulatory: Canada DSL

Butyl-2-aminobenzoate; Butyl-o-aminobenzoate. See Butyl anthranilate

Butyl anthranilate

CAS 7756-96-9; EINECS/ELINCS 231-816-7

FEMA 2181

Synonyms: 2-Aminobenzoic acid, butyl ester; Benzoic acid, 2-aminobenzoate; Butyl-2-aminobenzoate; Butyl-o-aminobenzoate; n-Butyl anthranilate

Empirical: C11H15NO2

Properties: Lt. yel. to dk. brn. liq.; pleasant grape odor, wh. flower note; sol. in alcohol, DMSO; insol. in water; m.w. 193.25; sp.gr. 1.060 (15.5 C); m.p. < 0 C; b.p. 182 C; flash pt. 110 C; ref. index 1.5420 (20 C)

Toxicology: LD50 (oral, rat) > 5 g/kg, (skin, rabbit) > 5 g/kg; irritating to eyes, skin, respiratory system; TSCA listed

Environmental: Prevent contamination of soil, ground- and surf.-water

Precaution: Probably combustible; incompat. with strong oxidizing agents; will hydrolyze under high and low pH conditions

Hazardous Decomp. Prods.: CO, CO2, NOx

NFPA: Health 1, Flammability 1, Reactivity 0

Storage: Sensitive to air and light; store in cool, well-ventilated area in tightly closed container under an inert atmosphere; refrigerate

Uses: Synthetic flavor for pharmaceuticals

Features: Sweet plum-like flavor

Regulatory: FDA 21CFR §172.515; FEMA GRAS; Canada DSL

### n-Buty1 n-butyryl lactate

**See** Buty1 butyryl lactate

**Buty1 caproate; Buty1 capronate.** See Buty1 hexanoate
dl-s-Butylcarbinol. See 2-Methyl-1-butanol
n-Butyl carbinol. See n-Amyl alcohol
s-Butyl carbinol. See 2-Methyl-1-butanol

**α-Butylcinnamaldehyde**

CAS 7492-44-6; EINECS/ELINCS 231-320-0

**FEMA 2191**

**Synonyms:** 2-Benzylidene hexanal; Butyl cinnamic aldehyde; α-Butyl cinnamic aldehyde; α-Butyl-β-phenylacrolein; 2-
Chemical Component Cross-Reference

(Phenylmethylene) hexanal
Empirical: C\textsubscript{13}H\textsubscript{16}O
Formula: C\textsubscript{6}H\textsubscript{5}CH=C(C\textsubscript{4}H\textsubscript{9})CHO
Properties: Pale yel. liq., lily-like odor; m.w. 188.27; sp.gr. 0.825 (15.5 C); b.p. 265 C; flash pt. > 200 F; ref. index 1.563-1.569
Toxicology: LD\textsubscript{50} (oral, rat) 4400 mg/kg; mildly toxic by ing.; severe skin irritant
Hazardous Decomp. Prods.: Heated to decomp., emits acrid smoke and irritating fumes
HMIS: Health 1, Flammability 1, Reactivity 0
Uses: Synthetic flavor for pharmaceuticals
Regulatory: FDA 21CFR §172.515; FEMA GRAS; Canada DSL

Buty l cinnamate
CAS 538-65-8; EINECS/ELINCS 208-699-6
FEMA 2192
Synonyms: n-Butyl cinnamate; Butyl \(\beta\)-phenyl acrylate; n-Butyl phenylacrylate; Butyl 3-phenyl propenoate; Butyl 3-phenyl-2-propenoate; Cinnamic acid-n-butyl ester
Empirical: C\textsubscript{13}H\textsubscript{16}O\textsubscript{2}
Properties: Colorless, mobile liq., cocoa-like odor; sol. in 95% alcohol, chloroform, benzene, ether; insol. in water; m.w. 204.27; sp.gr. 1.007-1.013; vapor dens. 7; b.p. 279-280 C (@ 1013 mBar); flash pt. (CC) > 99 C; ref. index 1.541-1.546
Toxicology: LD\textsubscript{50} (oral, rat) > 5 g/kg, (skin, rabbit) > 5 g/kg; low toxicity by ing. and skin contact; skin, eye irritant
Precaution: Incompat. with strong oxidizers, acids
Hazardous Decomp. Prods.: Heated to decomp., emits acrid smoke and irritating fumes
Storage: Keep away from heat, sparks, open flame; keep in original, tightly closed container
Uses: Synthetic flavor for pharmaceuticals
Regulatory: FDA 21CFR §172.515; FEMA GRAS; Canada DSL

n-Butyl cinnamate. See Butyl cinnamate
Butyl cinnamic aldehyde. See \(\alpha\)-Butylcinnamaldehyde
Butyl citrate. See Tributyl citrate
2-Butyl-1-decanol
CAS 21078-81-9
Uses: Ingred. in pharmaceuticals
Trade Names Containing: Jarcol™ I-14T

Butyl 2-decanoate
CAS 7492-45-7
FEMA 2194
Synonyms: n-Butyl decylenate; 2-Decenoic acid butyl ester
Empirical: C\textsubscript{14}H\textsubscript{26}O\textsubscript{2}
Properties: Colorless liq., peach/apricot odor, fruity green taste; sol. in alcohol; insol. in water; m.w. 226.36
Uses: Synthetic flavor for pharmaceuticals
Regulatory: FDA 21CFR §172.515; FEMA GRAS; Canada DSL

n-Butyl decylenate. See Butyl 2-decanoate
Butyl diglyme. See Diethylene glycol dibutyl ether
5-Butyl-dihydro-furan-2-one. See \(\gamma\)-Octalactone
Butyl dodecanoate; Butyl dodecylate. See Butyl laurate
Butylene glycol
CAS 107-88-0; EINECS/ELINCS 203-529-7
Synonyms: 1,3-Butanediol; Butane-1,3-diol; 1,3-Butylene glycol; \(\beta\)-Butylene glycol; 1,3-Dihydroxybutane; Methyltrimethylene glycol
Classification: Aliphatic diol; polyhydric alcohol
Empirical: C\textsubscript{4}H\textsubscript{10}O\textsubscript{2}
Formula: HOCH\textsubscript{2}CH\textsubscript{2}CHOHCH\textsubscript{3}
Properties: Pract. colorless visc. liq., sweet flavor with bitter aftertaste; sol. in water, alcohol, oxygenated solvs.; m.w. 90.12; dens. 1.004-1.006 (20/20 C); vapor pressure 0.06 mm Hg (20 C); f.p. < -50 C; b.p. 207.5 C; flash pt. 121 C; ref. index 1.4401 (20 C)
Toxicology: LD\textsubscript{50} (oral, rat) 23 g/kg, (subcut., rat) 20 g/kg, (IP, mouse) 10,276 mg/kg, (skin, rabbit) > 20 g/kg; mildly toxic by ing. and subcut. routes; primary eye irritant; temp. nervous system stimulation, depression; may cause gastric upset,
Chemical Component Cross-Reference

1,3-Butylene glycol; β-Butylene glycol.  See Butylene glycol

Butylene glycol dicaprylate/dicaprate
Synonyms: 1,2-Butanediol, diesters with octanoic and decanoic acids
Definition: Mixt. of the butylene glycol diesters of caprylic and capric acids

†=pharmaceutical grade

Uses: Emollient, dispersant, lubricant, suspending agent, solubilizer, carrier, vehicle, penetrant, spreading agent
Trade Names: Miglyol® 8810

1,3-Butylene glycol dimethacrylate.  See 1,3-Butanediol dimethacrylate
1,3-Butylene glycol monomethyl ether.  See 3-Methoxybutanol

Butylene hydrate.  See 2-Butanol
Butylene oxide.  See Tetrahydrofuran
Butyl ester of PVM/MA copolymer (INCI).  See PVM/MA copolymer, butyl ester
ButyIethanoate.  See n-Butyl acetate
Butyl ethyl carbinol.  See 3-Heptanol
Butyl ethyl ketone; n-Butyl ethyl ketone.  See 3-Heptanone

Butyl ethyl malonate
CAS 17373-84-1
FEMA 2195
Synonyms: Butyl ethyl propionate; Ethyl butyl malonate; Malonic acid butyl ethyl ester; Propylene dioic acid butyl ethyl ester
Empirical: C₉H₁₈O₄
Formula: (CH₃)₂CO₂CH₂CO₂C₂H₅
Properties: Colorless cl. liq.; sol. in alcohol; insol. in water; m.w. 188.22; dens. 0.994; b.p. 222 C; acid no. 1 max.; flash pt. 189 F
Uses: Synthetic flavor for pharmaceuticals
Regulatory: FDA 21CFR §172.515; FEMA GRAS; Canada DSL

Butyl ethyl maleate
CAS 32864-38-3
Synonyms: Ethyl t-butyl malonate; Malonic acid, t-butyl ethyl ester
Empirical: C₉H₁₆O₄
Formula: C₉H₁₆O₄
Properties: M.w. 188.22
Uses: Synthetic flavor for pharmaceuticals
Manuf./Distrib.: ABCR http://www.abcr.de; Fluka http://www.sigma-aldrich.com

Butyl ethyl propionate.  See Butyl ethyl malonate
Butyl formal.  See n-Valeraldehyde

Butyl formate
CAS 592-84-7; EINECS/ELINCS 209-772-5
UN 1128 (DOT); FEMA 2196
Synonyms: n-Butyl formate; Formic acid butyl
ester
Classification: Nonaromatic ester
Empirical: C₅H₁₀O₂
Formula: HCOO(CH₂)₃CH₃

Properties: Colorless liq., plum-like odor; sl. sol. in water; misc. with alcohol, ether; m.w. 102.14; dens. 0.892; m.p. -90°C; b.p. 106.8°C; flash pt. (CC) 64°C; ref. index 1.3890-1.3891

Toxicology: LD₅₀ (oral, rabbit) 2656 mg/kg; mod. toxic by ing.; mildly toxic by inh.; human systemic effects by inh.; irritant; narcotic in high concs.; TSCA listed

Precaution: Flamm. liq.; dangerous fire risk; incompat. with oxidizing materials

Hazardous Decomp. Prods.: Heated to decomp., emits acrid and irritating fumes

NFPA: Health 2, Flammability 3, Reactivity 0

Uses: Synthetic flavor for pharmaceuticals

Features: Plum-like flavor

Regulatory: FDA 21CFR §172.515; FEMA GRAS; Canada DSL

n-Butyl formate. See Butyl formate

Butyl glycol ether. See Diethylene glycol dibutyl ether

Butyl 10-hendecenoate. See Butyl 10-undecenoate

Butyl heptanoate
CAS 5454-28-4; EINECS/ELINCS 226-707-6
FEMA 2199

Synonyms: Butyl heptanoate; Butyl heptylate

Empirical: C₁₁H₂₂O₂

Properties: Colorless liq., sl. fruity odor; sol. in most org. solvs.; m.w. 186.30; sp.gr. 0.8623; m.p. -63 to -64°C; b.p. 208°C; flash pt. 76°C; ref. index 1.4153

Toxicology: LD₅₀ (oral, rat) > 5 g/kg; low toxicity by ing. and skin contact; primary skin irritant; TSCA listed

Precaution: Combustible liq.

Hazardous Decomp. Prods.: Heated to decomp., emits acrid smoke and irritating fumes, COₓ

Storage: Keep away from heat, sparks, open flame; keep in original, tightly sealed container

Uses: Synthetic flavor for pharmaceuticals

Features: Fruity flavor

Regulatory: FDA 21CFR §172.515; FEMA GRAS; Canada DSL

n-Butyl hexanoate
Butyl hexylate. See Butyl hexanoate

Butyl hydride. See Butane

t-Butyl hydroquinone
CAS 1948-33-0; EINECS/ELINCS 217-752-2
INS319

Synonyms: 2-(1,1-Dimethylethyl)-1,4-benzenediol; Mono-t-butyl hydroquinone; Mono-tertiarybutylhydroquinone; MTBHQ; TBHQ
Chemical Component Cross-Reference

**Classification:** Aromatic organic compd.; phenol; hydroquinone

**Empirical:** \( \text{C}_{10}\text{H}_{14}\text{O}_2 \)

**Properties:** Wh. to lt. tan cryst. solid; sol. in ethyl alcohol, ethyl acetate, acetone, ether; sl. sol. in water; m.w. 166.24; m.p. 126.5-128.5 C; flash pt. (COC) 171 C

**Toxicology:** LD50 (oral, rat) 700 mg/kg, (IP, rat) 300 mg/kg; poison by IP route; mod. toxic by ing.; irritant; tumorigen and mutagen; TSCA listed

**Hazardous Decomp. Prods.:** Heated to decomp., emits acrid smoke and irritating fumes

**Uses:** Antioxidant, preservative, stabilizer for pharmaceuticals

**Regulatory:** FDA 21CFR §172.185 (limitation 0.02% of oil), 177.2420; USDA 9CFR §318.7 (limitation 0.003% in dry sausage, 0.006% with BHA/BHT, 0.02% of oil), 177.147; USDA 9CFR §318.7 (limitation 0.003% in dry sausage, 0.006% with BHA/BHT, 0.01% in rendered animal fat, 0.02% with BHA and/or BHT, 0.02% in margarine), 381.147 (limitation 0.01% on fat in poultry; Canada DSL

**Trade Names:** Tenox® TBHQ

**Trade Names Containing:** Phyto™ SOY

**Butyl hydroxide.** See Butyl alcohol

**t-Butyl hydroxide.** See t-Butyl alcohol

**Butylhydroxyanisole; 2(3)-t-Butyl-4-hydroxyanisole; t-Butylhydroxyanisole; t-Butyl-4-hydroxyanisole.** See BHA

**Butyl 4-hydroxybenzoate; n-Butyl 4-hydroxybenzoate; n-Butyl p-hydroxybenzoate; Butyl p-hydroxybenzoate.** See Butylparaben

**n-Butyl-4-hydroxybenzoate potassium salt.** See Potassium butyl paraben

**4-Butyl-4-hydroxyoctanoic acid, γ-lactone.** See 4,4-Dibutyl-γ-butylrolactone

**Butyl 2-hydroxypropanoate; Butyl α-hydroxypropionate; n-Butyl-S(-)-2-hydroxypropionate.** See Butyl lactate

**Butyl-(S)-(−)-2-hydroxy propionate; Butyl-(S)-2-hydroxy propionate.** See Butyl-(S)-lactate

**Butylhydroxytin oxide.** See Hydroxybutyltin oxide

**Butyl-3-iodo-2-propynylcarbamate.** See Iodopropynyl butylcarbamate

**Butyl isobutyrate**

CAS 97-87-0; EINECS/ELINCS 202-614-6

UN 3272; FEMA 2188

**Synonyms:** Butyl 2-methylpropanoate; n-Butyl 2-methyl propanoate; Butyl 2-methylpropionate

**Empirical:** \( \text{C}_8\text{H}_{16}\text{O}_2 \)

**Properties:** Colorless liq., fruity odor, pineapple taste; misc. with alcohol, ether, fixed oils; insol. in water, glycerin, propylene glycol; m.w. 144.21; dens. 0.862; vapor dens. 4.9; b.p. 155-156 C; flash pt. 110 F; ref. index 1.4025

**Toxicology:** Eye, skin, respiratory system irritant; TSCA listed

**Precaution:** Flamm. liq.

**Hazardous Decomp. Prods.:** heated to decomp., emits acrid smoke and fumes

**Storage:** Keep away from heat, sparks, open flame; keep in original, tightly closed container

**Uses:** Synthetic flavor for pharmaceuticals

**Features:** Apple, banana-like

**Regulatory:** FDA 21CFR §172.515; FEMA GRAS; Canada DSL

### Buty Isophenylacetate

**Synonyms:** Buty Isophenylacetate; Buty Isophenylacetate; Buty Isophenylacetate; Buty Isophenylacetate; Buty Isophenylacetate; Buty Isophenylacetate

**CAS:** 138-19-3; EINECS/ELINCS 203-654-7

**UN:** 3272; FEMA 2218

**Synonyms:** n-Butyl isophenylacetate; Buty Isophenylacetate; Buty Isophenylacetate; Buty Isophenylacetate; Buty Isophenylacetate; Buty Isophenylacetate

**NFPA:** Health 1, Flammability 2, Reactivity 0

**Properties:** Water-wh. liq., mild odor; misc. with many lacquer solvs., diluents, oils, alcohol, ether; sl. sol. in water; hydrolyzed in acids and alkalis; m.w. 146.19; dens. 0.974-0.984 (20/20 C); vapor pressure 0.4 mm Hg (20 C); m.p. -43 C; b.p. 188 C; flash pt. 75.5 C; ref. index 1.407

**Toxicology:** LD50 (oral, rat) 8200 mg/kg, (skin, rabbit) > 5 g/kg; low toxicity by ing. and skin contact; skin, eye, respiratory system irritant; TSCA listed

**Precaution:** Wear protective gloves, splash-proof goggles; flamm. when exposed to heat, flames, sparks, oxidizers; incompatible with strong oxidizers

**Hazardous Decomp. Prods.:** Heated to decomp., emits acrid smoke and fumes

**NFPA:** Health 0

**Uses:** Synthetic flavor for pharmaceuticals

**Features:** Apple, peach-like flavor

**Regulatory:** FDA 21CFR §172.515; FEMA GRAS; Canada DSL

### Buty Isovalerate

**Synonyms:** Buty Isovalerate; Buty Isovalerate; Buty Isovalerate; Buty Isovalerate; Buty Isovalerate; Buty Isovalerate

**CAS:** 109-19-3; EINECS/ELINCS 203-654-7

**UN:** 3272; FEMA 2218

**Synonyms:** n-Butyl isovalerate; Buty Isovalerate; Buty Isovalerate; Buty Isovalerate; Buty Isovalerate; Buty Isovalerate

**NFPA:** Health 1, Flammability 2, Reactivity 0

**Properties:** Colorless to pale yel. liq., fruity odor; misc. with alcohol, fixed oils; sl. sol. in propylene glycol; insol. in water; m.w. 158.27; dens. 0.851-0.857; vapor dens. 5.4; b.p. 150 C; flash pt. 58 C; ref. index 1.407

**Toxicology:** LD50 (oral, rat) 200 mg/kg; toxic conc. 4 ppm in air (humans); TSCA listed

**Precaution:** Flamm. exposed to heat or flame; can react with oxidizing materials

**Hazardous Decomp. Prods.:** Heated to decomp., emits acrid smoke and irritating fumes

**NFPA:** Health 1, Flammability 2, Reactivity 0

**Uses:** Synthetic flavor for pharmaceuticals

**Features:** Non-ozone depleting; sweet flavor

**Regulatory:** FDA 21CFR §172.515, 175.105; FEMA GRAS; Canada DSL

**Lambda:** A&E Connock

**Ciba Spec. Chems./Water & Paper**

Butylic L-lactate. See Butyl-(S)-lactate
n-Butyl lactate. See Butyl lactate
n-Butyl-(S)-lactate. See Butyl-(S)-lactate

**Butyl-(S)-lactate**

CAS 34451-19-9; EINECS/ELINCS 252-036-3

**Synonyms:** Butyl-(S)-(→)-2-hydroxy propionate; Butyl-(S)-2-hydroxy propionate; Butyl L-lactate; n-Butyl-(S)-lactate; Butyl-(S)-(→)-lactate; Lactic acid butyl ester

**Classification:** Lactate ester

**Empirical:** C7H14O3

**Properties:** Colorless liq.; sweet fruity fermented odor; sol. in alcohol; insol. in water; m.w. 146.19; sp.gr. 0.97800-0.99200; dens. 8.138-8.254 lb/gal; m.p. -28 C; b.p. 185-187 C; flash pt. 157 F; ref. index 1.4190-1.429 (20 C)

**Toxicology:** LD50 (oral, rat) > 5 g/kg, (skin, rabbit) > 5 g/kg, irritating to eyes, skin, respiratory system; may be harmful by ing., inh., skin absorb.; vapor/mist irritating to eyes, mucous membranes, upper respiratory tract; TSCA listed

**Precaution:** Combustible; incompat. with strong oxidizing agents, strong bases

**Hazardous Decomp. Prods.:** CO, CO2; emits toxic fumes under fire conditions

**Storage:** Store in cool, dry place away from heat, open flame; keep tightly closed

**Uses:** Solvent

**Butyl levulinate**

CAS 2052-15-5; EINECS/ELINCS 218-143-4

**Synonyms:** Butyl γ-butyrolactone; Butyl laevulinate; n-Butyl laevulinate; n-Butyl levulinate; Butyl 4-oxopentanoate; 4-Ketopentanoic acid butyl ester; Levulinic acid, butyl ester; Pentanoic acid, 4-oxo-, butyl ester

**Empirical:** C9H16O3

**Properties:** Liq., bitter taste; sol. in ether, alcohol, chloroform; sl. sol. in water; m.w. 172.23; dens. 0.974; b.p. 197 F; flash pt. 197 F; ref. index 1.4283 (20 C)

**Toxicology:** LD50 (oral, rat) > 5 g/kg, (skin, rabbit) > 5 g/kg; low toxicity by ing. and skin contact; primary skin irritant; TSCA listed

**Precaution:** Combustible liq.

**Hazardous Decomp. Prods.:** Heated to decomp., emits acrid smoke and irritating vapors

**Uses:** Synthetic flavor for pharmaceuticals

**Features:** Waxy, soapy fruity peanut odor

**Regulatory:** FDA 21CFR §172.515, 177.2600; FEMA GRAS; Canada DSL

**Manuf./Distrib.:** Aldrich http://www.sigma-aldrich.com; Lluch Essence http://www.lluch-essence.com

**Trade Names:** Purasolv® BL
n-Butyl levulinate. See Butyl levulinate

Butyl methacrylate
CAS 97-88-1; EINECS/ELINCS 202-615-1
UN 2227 (DOT)
Synonyms: BMA; Butyl-2-methacrylate; N-Butyl methacrylate; Butyl 2-methyl-2-propenoate; Methacrylic acid butyl ester; 2-Methyl butylacrylate

Definition: Ester of n-butyl alcohol and methacrylic acid

Empirical: C8H14O2
Formula: CH2:C(CH3)COO(CH2)3CH3

Properties: Colorless liq., ester odor; insol. in water; m.w. 142.22; dens. 0.895 (20/4 C); vapor pressure 4.9 mm (20 C); b.p. 163 C; flash pt. (TOC) 126 F

Toxicology: LD50 (oral, rat) 22,600 mg/kg, (IP, rat) 2304 mg/kg; (skin, rabbit) 11,300 mg/kg; mod. toxic by IP route; mildly toxic by ing., inh., skin contact; skin irritant; experimental teratogen, reproductive effector; TSCA listed

Precaution: Combustible; mod. fire risk; violent polymerizations can be caused by heat, moisture, oxidizers; explosive as vapor exposed to heat or flame

Hazardous Decomp. Prods.: Heated to decomp., emits acrid smoke and irritating fumes

NFPA: Health 2, Flammability 2, Reactivity 0
Uses: Ingredient in drug solubilizers
Regulatory: FDA 21CFR §175.300, 177.2420; Canada DSL

2-Butyloctanol; 2-Butyl-1-octanol; 2-Butyl-1-octanol-1-ol; 2-Butyloctyl alcohol. See Butyloctanol

Butyl octadecanoate; n-Butyl octadecanoate. See Butyl stearate

Butyl 9-octadecenoate. See Butyl oleate

2-Butyloctyl alcohol

CAS 3913-02-8; EINECS/ELINCS 223-470-0
Synonyms: Butyl 9-octadecenoate; n-Butyl oleate; 9-Octadecenoic acid, butyl ester
Definition: Ester of butyl alcohol and oleic acid
Empirical: C_{32}H_{64}O_2
Formula: CH_{3}(CH_{2})_{7}CH(CH(CH_{2})_{7}COOC_{4}H_{9}
Properties: Pale yel. oleaginous liq.; mild odor; misc. with alcohol, ether, veg. and min. oils; insol. in water; m.w. 546.88; dens. 0.874; f.p. opaque @ 12 C; solid @ -26.4 C; b.p. 173-227 C (2 mm); iodine no. 76.8; flash pt. 204 C;

†=pharmaceutical grade

Toxicology: LD50 (oral) > 500 mg/kg; not expected to cause skin/eye irritation; may be harmful if swallowed; may irritate mouth, throat, and stomach by ing.; inh. may cause dizziness

Environmental: May cause long-term adverse effects in the aquatic environment; avoid release to environment

Precaution: Incompat with oxidizing materials
HMIS: Health 1, Flammability 1, Reactivity 0
Storage: Store in tightly closed container in well-ventilated area
Uses: Emollient, moisturizer, sunscreen actives stabilizer, solvent
Regulatory: SARA §311/312/313 nonreportable
Trade Names: HallBrite® BHB

Butyloctanol

CAS 142-77-8; EINECS/ELINCS 205-559-6
Synonyms: Butyl 9-octadecenoate; n-Butyl oleate; 9-Octadecenoic acid, butyl ester
Definition: Ester of butyl alcohol and oleic acid
Empirical: C_{22}H_{44}O_2
Formula: CH_{3}(CH_{2})_{7}CH(CH(CH_{2})_{7}COOC_{4}H_{9}
Properties: Pale yel. oleaginous liq.; mild odor; misc. with alcohol, ether, veg. and min. oils; insol. in water; m.w. 338.58; dens. 0.873; f.p. opaque @ 12 C; solid @ -26.4 C; b.p. 173-227 C (2 mm); iodine no. 76.8; flash pt. 204 C;

†=pharmaceutical grade

n-Butyl pentanoate. See Butyl valerate

Butyl phenylacetate
CAS 122-43-0; EINECS/ELINCS 204-543-6
FEMA 2209
Synonyms: Acetic acid, phenyl-, butyl ester;
Benzeneacetic acid, butyl ester; Butyl benzene acetate; n-Butyl phenyl acetate;
Butyl α-toluate; Phenylethanoic acid butyl ester
Empirical: C_{12}H_{16}O_2
Formula: C_4H_9OOCCH_2C_6H_5
Properties: Colorless liq., honey-like odor; sol. in 2 vols. 80% alcohol; m.w. 192.26; dens. 0.991-
0.994 (25/25 C); b.p. 260 C; flash pt. 74 C; ref. index 1.488-1.490 (20 C)
Toxicology: LD50 (oral, rat) > 5 g/kg, (skin, rabbit) > 5 g/kg; low toxicity by ing.;
primary skin irritant; TSCA listed
Precaution: Combustible
Hazardous Decomp. Prods.: Heated to decomp., emits acrid smoke and irritating fumes
Uses: Synthetic flavor for pharmaceuticals
Features: Honey-like flavor
Regulatory: FDA 21CFR §172.515; FEMA GRAS; Canada DSL
Manuf./Distrib.: Chr. Hansen Inc
http://www.chr-hansen.com; Grau Aromatics
http://www.grau-aromatics.de; Lluch Essence http://www.lluch-essence.com; SAFC Specialties
http://www.safcspecialties.com

Methyl p-t-butylphenylacetate
α-Butyl-β-phenylacrolein. See α-Butylcinnamaldehyde
Butyl β-phenyl acrylate; n-Butyl phenylacrylate; Butyl 3-phenyl propenoate;
Butyl 3-phenyl-2-propenoate. See Butyl cinnamate
Butyl phthalate; n-Butyl phthalate. See Dibutyl phthalate
Butyl propanoate; Butyl propionate. See n-Butyl propionate
n-Butyl propionate
CAS 590-01-2; EINECS/ELINCS 209-669-5
UN 1914 (DOT); FEMA 2211
Synonyms: Butyl propanoate; Butyl propionate; Propanoic acid butyl ester
Empirical: C_7H_{14}O_2
Formula: CH_3CH_2COOC_4H_9
Properties: Colorless liq., earthy faintly sweet
odor, apricot-like taste; very sol. in alcohol, ether; sol. in oxygenated solvs.; very sl. in water; m.w. 130.19; dens. 0.8754 (20/4 C); f.p. 32 C; m.p. -89 C; b.p. 145-146 C; flash pt. 90
F; ref. index 1.401 (20 C)
Toxicology: LD50 (oral, rat) 5000 mg/kg; mildly toxic by ing.; skin and eye irritant; TSCA listed
Precaution: Flamm.; dangerously flamm.
exposed to heat or flame; incompat. with oxidizers, reducers; wear safety glasses or
goggles, rubber gloves, apron
Hazardous Decomp. Prods.: CO, CO_2, acrid fumes
NFPA: Health 2, Flammability 3, Reactivity 0
Storage: 6 mos. when stored at 40-70 F in tightly
sealed original containers with minimum head space; avoid prolonged exposure to light, heat,
air
Uses: Synthetic flavor for pharmaceuticals
Features: Banana-like flavor
Regulatory: FDA 21CFR §172.515; FEMA GRAS; Australia AICS; Canada DSL; Japan MITI
Manuf./Distrib.: Advanced BioTech

Butylnanoic acid. See Hydroxybutyltin oxide

Butyl stearate
CAS 123-95-5; EINECS/ELINCS 204-666-5
FEMA 2214
Synonyms: Butyl octadecanoate; n-Butyl octadecanoate; n-Butyl stearate; Octadecanoic acid butyl ester
Definition: Ester of butyl alcohol and stearic acid
Empirical: C_{22}H_{44}O_{2}
Formula: CH_{3}(CH_{2})_{16}COO(CH_{2})_{3}CH_{3}
Properties: Colorless liq., solidifying @ 19 C; pract. odorless; sol. in alcohol, ether, hydrocarbon oils; sl. sol. in water; m.w. 340.60; dens. 0.86 (20/4 C); m.p. 17-22 C; b.p. 1343 C; flash pt. (CC) 160 C; ref. index 1.4430 (20 C)
Toxicology: LD_{50} (oral, rat) 32 g/kg; low toxicity by ing.; skin irritant; experimental reproductive data; TSCA listed
Precaution: Combustible
Hazardous Decomp. Prods.: Heated to decomp., emits acrid smoke and irritating fumes
NFPA: Health 1, Flammability 1, Reactivity 0
Uses: Syn. flavor for pharmaceuticals; emollient for pharmaceutical topicals
Regulatory: FDA 21CFR §172.515, 173.340, 175.105, 175.300, 176.200, 176.210, 177.1200, 177.2260, 177.2600, 177.2800, 178.3910, 181.22, 181.27; FDA approved for topicals; FEMA GRAS; Canada DSL

†=pharmaceutical grade

Butyl stearate
CAS 123-95-5; EINECS/ELINCS 204-666-5
FEMA 2214
Synonyms: Butyl octadecanoate; n-Butyl octadecanoate; n-Butyl stearate; Octadecanoic acid butyl ester
Definition: Ester of butyl alcohol and stearic acid
Empirical: C_{22}H_{44}O_{2}
Formula: CH_{3}(CH_{2})_{16}COO(CH_{2})_{3}CH_{3}
Properties: Colorless liq., solidifying @ 19 C; pract. odorless; sol. in alcohol, ether, hydrocarbon oils; sl. sol. in water; m.w. 340.60; dens. 0.86 (20/4 C); m.p. 17-22 C; b.p. 1343 C; flash pt. (CC) 160 C; ref. index 1.4430 (20 C)
Toxicology: LD_{50} (oral, rat) 32 g/kg; low toxicity by ing.; skin irritant; experimental reproductive data; TSCA listed
Precaution: Combustible
Hazardous Decomp. Prods.: Heated to decomp., emits acrid smoke and irritating fumes

†=pharmaceutical grade

Butyl sulfide
CAS 544-40-1; EINECS/ELINCS 208-870-5
FEMA 2215
Synonyms: Butyl monosulfide; n-Butyl sulfide; Butylthiobutane; Dibutyl sulfide; n-Dibutyl sulfide; Dibutyl thioether; 5-Thianonane; 1,1’-Thiobisbutane
Classification: Nonaromatic mercaptan
Empirical: C_{8}H_{18}S
Formula: CH_{3}(CH_{2})_{3}S(CH_{2})_{3}CH_{3}
Properties: Liq.; very sol. in alcohol, ether; sol. in most org. solvs.; insol. in water; m.w. 146.30; dens. 0.839 (16/0 C); vapor dens. 5; m.p. -80 C; b.p. 182 C; flash pt. (CC) 76 C; ref. index
†=pharmaceutical grade

Butyltris ((2-ethyl-1-oxohexyl) oxy) stannane.

See Butyltin tris (2-ethylhexoate)

Butyl undecenoate. See Butyl 10-undecenoate

Butyl 10-undecenoate
CAS 109-42-2; EINECS/ELINCS 203-670-4
FEMA 2216

Synonyms: Butyl 10-hendecenoate; Butyl undecenoate; Butyl undecylenoate; 10-Undecenoic acid, butyl ester

Empirical: C_{15}H_{28}O_2

Properties: Colorless liq.; sol. in alcohol; insol. in water; m.w. 240.39; sp.gr. 0.8751 (20 C); b.p. 125-128 C (3 mm); ref. index 1.4426 (20 C)

Toxicology: LD50 (oral, rat) 5 g/kg; mildly toxic by ing.; skin irritant; TSCA listed

Hazardous Decomp. Prods.: Heated to decomp., emits acrid smoke and irritating fumes

Uses: Synthetic flavor for pharmaceuticals

Features: Fatty butter wine floral fruity odor

Regulatory: FDA 21CFR §172.515; FEMA GRAS; Canada DSL

Manuf./Distrib.: SAFC Specialties
http://www.safcspecialties.com

Butyl undecylenoate. See Butyl 10-undecenoate

Butyl valerate
CAS 591-68-4; EINECS/ELINCS 209-728-5
FEMA 2217

Synonyms: n-Butyl pentanoate; n-Butyl valerate; n-Butyl-n-valerianate

Empirical: C_{9}H_{18}O_2

Properties: Colorless liq.; fruity odor; sol. in propylene glycol, most org. solvs.; sl. sol. in water; m.w. 158.24; dens. 0.868 (20 C); vapor dens. 5.4; b.p. 186-187 C; flash pt. 152 F; ref. index 1.408-1.416

Toxicology: Eye, skin, respiratory system irritant; TSCA listed

Environmental: Keep run-off water out of sewers, water sources

Storage: Keep away from heat, sparks, open flame; keep in original, tightly closed container

Uses: Synthetic flavor for pharmaceuticals

Features: Apple, raspberry-like flavor

Regulatory: FDA 21CFR §172.515; FEMA GRAS; Canada DSL

Manuf./Distrib.: Grau Aromatics
http://www.grau-aromatics.de; Oxford Chems. Ltd
SAFC Specialties
http://www.safcspecialties.com

n-Butyl valerate; n-Butyl-n-valerianate. See Butyl valerate

Butynoic acid, 3-phenyl-2-propenyl ester.
See Cinnamyl butyrate
1-Butyn-3-ol, 3-methyl-. See Methyl butynol
Butyral; Butyraldehyde. See n-Butyraldehyde

n-Butyraldehyde
CAS 123-72-8; EINECS/ELINCS 204-646-6
UN 1129 (DOT); FEMA 2219
Synonyms: Butal; Butylaldehyde; Butyraldehyde; Butanal; n-Butanal; n-Butylaldehyde; Butyl; Butyraldehyde; Butyric aldehyde
Classification: Aldehyde
Empirical: C₄H₈O
Formula: CH₃CH₂CH₂CHO

Properties: Colorless liq.; sol. in water; misc. with ether @ 75 C, org. solvs.; m.w. 72.10; sp.gr. 0.800; m.p. -99 C; f.p. 12 F; b.p. 75-76 C; flash pt. (CC) 20 F; ref. index 1.3843

Toxicology: LD₅₀ (oral, rat) 2490 mg/kg, (IP, rat) 800 mg/kg, (skin, rabbit) 3560 mg/kg; LC₅₀ (inh., rat, 4 h) 8000 ppm; mod. toxic by ing., inh., skin contact, IP, and subcut. routes; severe skin and eye irritant; delayed hypersensitivity; suspected carcinogen; TSCA listed

Precaution: DOT: Flamm. liq.; dangerous fire hazard when exposed to heat and flame; incompat. with oxidizing materials; reacts vigorously with chlorosulfonic acid, HNO₃, H₂SO₄

Hazardous Decomp. Prods.: Heated to decomp., emits acrid smoke and fumes
NFPA: Health 3, Flammability 3, Reactivity 2
Uses: Synthetic flavor for pharmaceuticals
Features: Fruity flavor
Regulatory: FDA 21CFR §172.515, 175.105, 176.170; FEMA GRAS; Canada DSL

Butyraldehyde, 2-methyl-. See 2-Methylbutyraldehyde
Butyric acid. See n-Butyric acid

n-Butyric acid
CAS 107-92-6; EINECS/ELINCS 203-532-3
UN 2820 (DOT); FEMA 2221
Synonyms: Butyric acid; Butanoic acid; n-Butanoic acid; Butyric acid; Carboxylic acid C4; Ethylacetic acid; 1-Propanecarboxylic acid; Propyformic acid
Classification: Aliphatic carboxylic acid
Empirical: C₄H₈O₂
Formula: CH₃CH₂CH₂COOH

Properties: Colorless liq., strong rancid butter odor; sol. in water, alcohol, ether; misc. with oxygenated solvs.; m.w. 88.12; dens. 0.9590 (20/20 C); vapor pressure 0.84 mm Hg (20 C); f.p. -5.5 C; m.p. -7.9 C; b.p. 163.5 C; flash pt. 72 C; ref. index 1.397

Toxicology: LD₅₀ (oral, rat) 2940 mg/kg, (IP, mouse) 3180 mg/kg, (skin, rabbit) 3180 mg/kg, (subcut., mouse) 3180 mg/kg, (IV, mouse) 800 mg/kg, (skin, rabbit) 530 mg/kg; mod. toxic by ing., inh., skin contact, subcut., IP, and IV routes; severe skin and eye irritant; human mutagenic data; TSCA listed

Environmental: Do not discharge into lakes, streams, ponds, public waters
Precaution: Corrosive material; combustible liq.; may react with oxidizers; incandescent reaction with chromium trioxide above 100°C

Hazardous Decomp. Prods.: Combustion
prod.: CO, CO₂; heated to decomp., emits acrid smoke and irritating fumes
NFPA: Health 3, Flammability 2, Reactivity 0
Storage: 12 mos. when stored at 40-70 F in
Chemical Component Cross-Reference

Butyrolin. See 5-Hydroxy-4-octanone
Butyrolactam; γ-Butyrolactam. See 2-Pyrrolidone

Butyrolactone
CAS 96-48-0; EINECS/ELINCS 202-509-5
FEMA 3291
Synonyms: BLO; 1,2-Butanoldiol; 1,4-Butanoldiol; Butyric acid lactone; 4-Butyrolactone; α-Butyrolactone; γ-Butyrolactone; Butyl lactone; 4-Deoxytetronic acid; Dihydro-2(3H)-furanone; GBL; 4-Hydroxybutanoic acid lactone; γ-Hydroxybutyric acid cyclic ester; 4-Hydroxybutyric acid γ-lactone; γ-Butyrolactone; Butyrolactone; Tetrahydro-2-furanone
Classification: Lactone
Empirical: C₄H₆O₂
Properties: Colorless oily liq., mild caramel odor; sol. in methanol, ethanol, acetone, ether, benzene. misc. with water; insol. in aliphatic hydrocarbons; m.w. 86.09; dens. 1.120; m.p. -45 C; b.p. 204-205 C; flash pt. (OC) 98 C; ref. index 1.4348; volatile with steam; hydrolyzed by hot alcohol sol'n.s.
Toxicology: LD₅₀ (oral, rat) 1800 mg/kg, (IP, rat) 1000 mg/kg; mod. toxic by ingestion, IV, IP routes; suspected carcinogen, tumorigen; experimental reproductive effects; mutagenic data; TSCA listed
Environmental: VOC; ThOD 1.67
Precaution: Combustible when exposed to heat or flame; reactive with oxidizing materials
Hazardous Decomp. Prods.: Heated to decomp., emits acrid and irritating fumes
NFPA: Health 0, Flammability 1, Reactivity 0
Storage: Hygroscopic
Uses: Solvent, stabilizer for pharmaceuticals; pharmaceutical intermediate

- **C8 acid triglyceride**
- **C18-36 acid triglyceride**
- **Caffeine**
- **Florence Green Seal-8**
- **Calamata oil**

### Additional Information

- **Cadmium**
  - CAS 7440-43-9
  - EINECS/ELINCS 231-152-8
  - UN 3089
  - Synonyms: CI 77180; Colloidal cadmium
  - Classification: Metallic element
  - Empirical: \( \text{Cd} \)
  - Properties: Blue-wh., soft hexagonal crystals, malleable metal or grayish-white powd.; sol. in acids; a.w. 112.41; dens. 8.642; m.p. 320.9 C; b.p. 767 C; ref. index 1.13; hardness (Mohs) 2.0
  - Toxicology: TLV 0.05 mg/m³ in air; TLV/TWA 0.01 mg (Cd)/m³ (dust); LD50 (oral, rat) 225 mg/kg, (IP, mouse) 5700 µg/kg; LC50 (inh., rat, 30 min) 25 mg/m³; highly toxic; human poison by inh.; probable poison by ing., inh., IP, IV, subcut. routes; probable human carcinogen; can cause blood, kidney, calcium disorders, bone problems; experimental teratogen, reproductive effects; mutagenic data; TSCA listed
  - Precaution: Flamm. in powd. form; dust ignites spontaneously in air; explosive exposed to heat, flame, oxidizers, metals; violent reactions possible
  - Hazardous Decomp. Prods.: Heated to high temps., emits toxic fumes of Cd
  - Uses: Colorant for topical pharmaceuticals in trace amounts
  - Regulatory: SARA reportable; Canada DSL
- **Caffeine**
  - CAS 58-08-2; EINECS/ELINCS 200-362-1
  - FEMA 2224

---

**Handbook of Pharmaceutical Additives, Third Edition 1005**
Chemical Component Cross-Reference

**Synonyms:** Coffeine; 3,7-Dihydro-1,3,7-trimethyl-1H-purine-2,6-dione; Guaramine; Methyltheobromide; Methyltheobromine; 1-Methyltheobromine; 7-Methyltheophylline; 1H-Purine-2,6-dione, 3,7-dihydro-1,3,7-trimethyl-; Theine; 1,3,7-Trimethyl-2,6-dioxopurine; 1,3,7-Trimethylxanthine

**Classification:** Heterocyclic organic compd.

**Empirical:** C_{8}H_{10}N_{4}O_{2}

**Properties:** Wh. fleecy mass, powd. or need., odorless, bitter taste; freely sol. in chloroform; sl. sol. in water, alcohol, ether; m.w. 194.22; dens. 1.23; m.p. 238 C; sublimes @ 178 C; pH neutral; hydrate is efflorescent in air

**Toxicology:** LD_{50} (oral, rat) 192 mg/kg, (IP, rat) 260 mg/kg, (subcut., rat) 170 mg/kg, (IV, rat) 105 mg/kg; poison by ing., subcut., IV, IP, intramuscular, rectal routes; human poison by ing.; human systemic effects; diuretic effect; can cause blood pressure/heart rate changes, heartburn, upset stomach, diarrhea; 200-500 mg can cause headache, tremors, nervousness, and irritability; human teratogen; mutagenic data; questionable carcinogen; TSCA listed

**Hazardous Decomp. Prods.:** Heated to decomp., emits toxic fumes of NO_{x}

**HMIS:** Health 2, Flammability 1, Reactivity 0

**Uses:** Flavor, synergist for pharmaceuticals; medicine (CNS stimulant, diuretic/analeptic drug)

**Regulatory:** FDA 21CFR §182.1180 (limitation 0.02%), GRAS; FEMA GRAS; BP, EP compliance; Canada DSL

Cajeput (Melaleuca leucadendron) oil

CAS 8008-98-8
UN NA 1993; FEMA 2225

Synonyms: Cajeput oil; Cajeput oil; Melaleuca leucadendron; Melaleuca leucadendron oil; Tea tree; White tea tree

Definition: Volatile oil from fresh leaves and twigs of Melaleuca leucadendron, contg. 50-60% eucalyptol and l-pinene, terpineol, and aldehydes

Properties: Colorless of ylsh. liq., agreeable camphor odor, bitter aromatic taste; misc. with alcohol, chloroform, ether, CS₂; very sl. sol. in water; sol. in 1 vol. 80% alcohol; dens. 0.912-0.925; ref. index 1.4660-1.4710 (20 C)

Toxicology: LD50 (oral, rat) 3870 mg/kg

Precaution: DOT: Flamm. liq.

HMIS: Health 2, Flammability 2, Reactivity 0

Storage: Keep well closed, cool, protected from light

Uses: Natural flavor for pharmaceuticals; expectorant; counterirritant; scabicide; rubefacient; topical antmycotic; to treat fungus infections such as athlete's foot; liniment; antiseptic for cuts; stimulant; antispasmodic; diaphoretic

Regulatory: FDA 21CFR §172.510; FEMA GRAS; Japan approved; Canada DSL

Calcium alginate
CAS 9005-35-0
FEMA 2015; INS404; E404
Synonyms: Alginic acid, calcium salt
Classification: Aliphatic organic compd.
Definition: Calcium salt of alginic acid
Empirical: (C_{12}H_{14}CaO_{12})_n
Formula: [(C_6H_7O_6)_{2}Ca]_n
Properties: Wh. or cream-colored powd. or filaments, sl. odor and taste; sol. in alkaline sol'n.; insol. in water, acid, org. solvs.; m.w. 195.16
Toxicology: LD50 (IP, rat) 1407 mg/kg, (IV, rat) 64 mg/kg; poison by IV route; mod. toxic by IP route; TSCA listed
Precaution: Flamm.

Hazardous Decomp. Prods.: Heated to decomp., emits acrid smoke and irritating fumes
Uses: Antioxidant, color fixative, preservative in pharmaceuticals, orals; vitamin C source; antiscorbutic vitamin
Regulatory: FDA 21CFR §182.3189, GRAS; approved for orals; Europe listed; UK approved; BP, EP compliance; Canada DSL

Trade Names Containing: KELTOSE®

Calcium ascorbate
CAS 5743-27-1; 5743-28-2 (dihydrate); EINECS/ELINCS 227-261-5
INS302; E302
Synonyms: Ascorbic acid calcium salt
Empirical: C_{12}H_{14}CaO_{12} (anhyd.); C_{12}H_{14}CaO_{12} • 2H_2O (dihydrate)
Formula: Ca(C_6H_7O_6)_2 • 2H_2O (dihydrate)
Properties: Wh. to sl. yel. cryst. powd., pract. odorless; freely sol. in water; sl. sol. in alcohol; insol. in ether, methanol, ethanol; m.w. 390.31 (anhyd.), 426.35 (dihydrate); m.p. 16 C (dec.) (dihydrate); pH 6.8-7.4 (10% sol'n.)

Hazardous Decomp. Prods.: Heated to decomp., emits acrid smoke and irritating fumes
Uses: Antioxidant, color fixative, preservative in pharmaceuticals, orals; vitamin C source; antiscorbutic vitamin
Regulatory: FDA 21CFR §182.3189, GRAS; approved for orals; Europe listed; UK approved; BP, EP compliance; Canada DSL

Trade Names: Calcium Ascorbate USP FCC

Trade Names Containing: C.Cal-97™ Calcium Ascorbate for DC

Calcium bentonite
Synonyms: Calcium montmorillonite
Classification: Nonswelling bentonite
Properties: Tan to yelsh. fine powd.; pH 7-9
Uses: Carrier in pharmaceutical topicals
Features: Nonswelling
Manuf./Distrib.: Cimbar Perf. Mins.
Chemical Component Cross-Reference

http://www.cimbar.com

Trade Names Containing: Cal-Ben™

Calcium benzoate
CAS 2090-05-3; EINECS/ELINCS 218-235-4
INS213; E213
Synonyms: Benzoic acid calcium salt; Calcium dibenzoate
Definition: Calcium salt of benzoic acid
Empirical: C₁₄H₁₀CaO₄ (anhyd.); C₁₄H₁₀CaO₄ • 3H₂O (trihydrate)
Properties: Avail. as the trihydrate; wh. orthorhombic cryst. or powd.; sl. sol. in water; m.w. 282.31 (anhyd.), 374.26 (trihydrate); dens. 1.44 kg/l
Toxicology: May cause an intolerance reaction in some people
Precaution: Combustible exposed to heat or flame
Hazardous Decomp. Prods.: Heated to decomp., emits acrid smoke and irritating fumes
Uses: Preservative for pharmaceuticals
Regulatory: FDA 21CFR §166.110, 178.2010; USDA 9CFR §318.7; Europe listed; Canada DSL
Trade Names: Gluconal® CAMB
Calcium carbonate
CAS 471-34-1; 1317-65-3; EINECS/ELINCS 207-439-9
INS170i; E170i
Synonyms: Agricultural limestone; Allied whiting; Calcite; Calcium carbonate (INCI); Calcium carbonate (1:1); Calcium carbonate, precipitated; Calcium monobasic carbonate; Carbonic acid calcium salt; Carbonic acid calcium salt (1:1); Chalk; CI 77220; Dolomite; Drop chalk; English white; Franklin; Limestone; Lithographic stone; Marble; Monocalcium carbonate; Natural calcium carbonate; Paris white; Pigment white 18; Portland stone; Precipitated calcium carbonate; Precipitated chalk; Prepared chalk; Vaterite; Vienna white; White powder; Whiting
Classification: Inorganic salt
Definition: Found in nature as the minerals limestone, marble, aragonite, calcite, and vaterite
Empirical: C₇C₆O₃
Formula: CO₃ • Ca
Properties: Wh. powd. or colorless crystals; odorless; tasteless; sol. in dil. acids; very sl. sol. in water; insol. in alcohol; m.w. 100.09; dens. 2.7-2.95; bulking value 0.045 gal/lb; oil absorb. 63; m.p. 825 C (dec.); stable in air; noncombustible
Toxicology: ACGIH TLV/TWA 10 mg/m³ of air (nuisance particulate); LD₅₀ (oral, rat) 6450 mg/kg; mildly toxic by ing.; severe eye and mod. skin irritant; irritating to respiratory system; common air contaminant; may cause kidney damage, CNS effects; TSCA listed
Precaution: Ignites on contact with F₂; Incompat. with acids, alum, ammonium salts
Hazardous Decomp. Prods.: Heated to decomp., emits acrid smoke and irritating vapors
HMIS: Health 1, Flammability 0, Reactivity 0
Storage: Hygroscopic; store in a cool, dry, well-ventilated area away from incompatible
Chemical Component Cross-Reference

substances

Uses: Alkali, neutralizer, colorant, opacifier in pharmaceuticals, implants, orals, otics; tablet/capsule diluent; tooth polish in dentifrices; filler in deodorants; gastric antacid; anti diarrheal medicine

†=pharmaceutical grade

carboxymethyl ether calcium salt

Definition: Calcium salt of a polycarboxymethyl ether of cellulose

Properties: Wh. to lt. yel. powd., odorless

Toxicology: LD50 (oral, rat) 4400 mg/kg, (oral, mouse) 6800 mg/kg; TSCA listed

Storage: Preserve in tight containers

Uses: Thickener, stabilizer, gellant, suspending agent for pharmaceuticals, orals; tablet disintegrant

Regulatory: USP/NF compliance; Japan approved; restricted; 2% max. in foods; FDA approved for orals

Trade Names Containing: Descote® Thiamine Mononitrate 33½%; Thiamine Mononitrate 98 DC

Calcium carrageenan

CAS 9049-05-2

Synonyms: Algin gum; Calcium carrageenin; Calcium carragheenan; Carrageenan, calcium salt; Carrageenan, calcium (II) salt

Definition: Calcium salt of carrageenan; mixt. of highly sulfated polygalactosides, extracted from seaweed

Toxicology: LD50 (oral, rat) 5140 mg/kg, (oral, mouse) 8710 mg/kg; mod. toxic by ing.; experimental reproductive effects; TSCA listed

Hazardous Decomp. Prods.: Heated to decomp., emits toxic fumes of SOx

Uses: Emulsifier, stabilizer, thickener for pharmaceuticals, orals

Calcium carbonate (INCI); Calcium carbonate (1:1); Calcium carbonate, precipitated. See Calcium carbonate

Calcium carboxymethyl cellulose

CAS 9050-04-8

Synonyms: Calcium cellulose glycolate; Carboxymethylcellulose calcium; Carmellose calcium; Cellulose
Calcium carrageenin; Calcium carragheenate.  
See Calcium carrageenan

Calcium caseinate  
CAS 9005-43-0  
Synonyms: Casein, calcium salt; Casseins, calcium complexes  
Definition: Calcium salt of casein  
Properties: Wh. or sl. yel. powd., nearly odorless; insol. in cold water  
Uses: Dietary supplement for pharmaceuticals  
Features: Milky appearance, smooth feel in the mouth  
Regulatory: FDA 21CFR §135.110, 135.140, 172.840, GRAS; Canada DSL  
Manuf./Distrib.: Alfa Chem  
http://www.alfachem1.com; Am. Casein  
http://www.americancasein.com; Blossom Farm Prods.; DMV USA  
http://www.dmv-international.com; Excelpro  
Pangaea Sciences  
http://www.pangaeasciences.com; Premium Ingreds.  
http://www.premiumingredients.com  
Trade Names: CC-901; CC-902I

Calcium cellulose glycolate.  See Calcium carboxymethyl cellulose

Calcium chloride  
CAS 10043-52-4 (anhyd.); 10035-04-8 (dihydrate); 7774-34-7 (hexahydrate); EINECS/ELINCS 233-140-8  
INS509; E509  
Synonyms: Calcium chloride anhydrous  
Classification: Inorganic salt  
Empirical: CaCl2 (anhyd.); CaCl2 • 2H2O (dihydrate)  
Properties: Grayish-wh. cryst., granules, lumps, or flakes; odorless; freely sol. in water and alcohol; m.w. 110.99 (anhyd.), 147.01 (dihydrate); dens. 2.16 (anhyd.), 1.83 (dihydrate); m.p. 772 C (anhyd.), 176 C (dihydrate); b.p. > 1600 C; pH 4.5-9.2 (5%)  
Toxicology: LD50 (oral rat) 1000 mg/kg, (IP, rat) 264 mg/kg; poison by IV, intramuscular, IP, subcut. routes; mod. toxic by ing. causing stomach and heart disturbances; severe eye irritant; human systemic effects; tumorigen; mutagen; questionable carcinogen; TSCA listed  
Precaution: Reacts violently with BrF3, (B2O3 + CaO); reaction with zinc releases  
†=pharmaceutical grade  
explosive hydrogen gas; exothermic reaction with water  
Hazardous Decomp. Prods.: Heated to decomp., emits toxic fumes of Cl⁻  
HMIS: Health 1, Flammability 0, Reactivity 0  
Storage: Hygroscopic; deliq.; store @ R.T.; keep well closed  
Uses: Firming agent, antimicrobial, desiccant in pharmaceuticals, injectables, ophthalmics, orals; antiseptic in eye lotions; diuretic; urinary acidifier  
Regulatory: FDA 21 CFR §133.102, 133.108, 133.111, 133.113, 133.118, 133.127, 133.136, 133.138, 133.141, 145.145, 150.141, 150.161, 172.560, 178.1010, 184.1193, GRAS; USDA 9CFR §318.7, 381.147, 3% max.; Canada DSL; Japan approved (1% max.); Europe listed (ADI not specified); UK approved; WHO limitation: 350-800 mg/kg (canned fruits/veg.), 200 mg/kg (preserves, processed cheese); approved for injectables, ophthalmics, orals; USP/NF, BP, EP compliance

Calcium chloride anhydrous. See Calcium chloride

Calcium citrate
CAS 813-94-5 (anhydrous); 5785-44-4 (tetrahydrate); EINECS/ELINCS 212-391-7

INS 333; E333
Synonyms: Calcium citrate tertiary; Dicalcium citrate; Lime citrate; Tricalcium citrate; Tricalcium dicitrate
Empirical: C_{12}H_{10}Ca_{3}O_{14} • 4H_{2}O
Formula: Ca_{3}(C_{6}H_{5}O_{7})_{2} • 4H_{2}O (tetrahydrate)
Properties: Wh. fine powd., odorless; sl. sol. in water; pract. insol. in alcohol; sol. in dil. HCl and nitric acid; m.w. 570.50 (tetrahydrate);

‡=pharmaceutical grade
loses water of cryst. @ 100 C, dec. @ 230 C

Hazardous Decomp. Prods.: Heated to decomp., emits acrid smoke and irritating fumes

HMIS: Health 1, Flammability 0, Reactivity 0
Uses: Dietary supplement, nutrient, calcium source, sequestrant, antioxidant, buffer, pH control agent, stabilizer in pharmaceuticals, orals, supplements, tablets; cleaning agent in dentificries

Regulatory: FDA 21CFR §133.169, 133.173, 133.179, 150.141, 150.161, 182.6195, 184.1195, GRAS; Japan approved (1% max. as calcium); Europe listed; UK approved; approved for orals; Canada DSL

Manuf./Distrib.: AAA Int'l.

## Calcium citrate tertiary

### See Calcium citrate

#### Calcium cycamate

- **CAS**: 139-06-0
- **INS952**

#### Synonyms:

- Calcium cyclohexanesulfamate
- Calcium cyclohexyl sulfamate
- Cyclamate calcium
- Cyclamate, calcium salt
- Cyclamic acid calcium salt
- Cyclamic acid hemicalcium salt
- Cyclohexanesulfamic acid calcium salt
- Sucaryl calcium

#### Empirical:

- C₆H₁₂NO₃S • ½Ca

#### Formula:

- \((C₆H₁1NH₂SO₃)₂Ca • 2H₂O\)

#### Properties:

- Wh. cryst. powd.; odorless; sweet taste; freely sol. in water; pract. insol. in alcohol, benzene, chloroform; m.w. 198.3

#### Toxicology:

- LD₅₀ (oral, rat) 10 mg/kg; poison by ing. and IV routes; questionable carcinogen; experimental tumorigen and neoplastigen; experimental reproductive effects; human mutagenic data; TSCA listed

#### Hazardous Decomp. Prods.:

- Heated to decomp., emits very toxic fumes of SOₓ and NOₓ

#### Uses:

- Nonnutritive sweetener in pharmaceuticals

#### Regulatory:

- FDA 21CFR §189.135; prohibited from direct addition or use in human food;
Calcium disodium edathamil; Calcium disodium edetate; Calcium disodium ethylenediamine tetraacetic acid; Calcium EDTA; Disodium calcium ethylenediaminetetraacetate; Edetate calcium disodium; Edetic acid calcium disodium salt; EDTA calcium disodium salt; Ethylenediaminetetraacetic acid, calcium disodium salt; Sodium calcium edetate

Classification: Substituted diamine

Definition: Mixt. of calcium disodium ethylenediaminetetraacetate dihydrate (predominantly) and trihydrate

Empirical: $\text{C}_{10}\text{H}_{12}\text{CaN}_{2}\text{Na}_2\text{O}_8$

Formula: $\text{CaNa}_2\text{C}_{10}\text{H}_{12}\text{N}_2\text{O}_8$

Properties: Wh. cryst. powd. or gran., odorless, faint salt taste; sol. in water; insol. in org. solvs.; m.w. 374.27 (anhyd.), 410.30 (dihydrate); bulk dens. 0.67; pH 6.5-8.0; stable in air

Toxicology: LD50 (oral, rat) 10 g/kg, (IP, rat) 3850 mg/kg; mod. toxic by IP route; mildly toxic by ing. and IV routes; possible link to liver damage in test animals; TSCA listed

Hazardous Decomp. Prods.: Heated to decom., emits toxic vapors of NOx

Storage: Sl. hygroscopic

Uses: Sequestrant, chelating agent for control of trace metal contamination in pharmaceuticals, injectables (IM, IV), intravenous, orals; preservative; medicine (treating lead poisoning)

Regulatory: FDA 21CFR §73.1, 155.200, 155.201, 161.173, 166.110, 169.115, 169.140, 169.150, 172.120, 172.135, 175.105, 176.170; USDA 9CFR §318.7; Canada DSL; Japan approved (0.035 g/kg max.); m.p. 1360 C; b.p. $\approx 2500$ C

Toxicology: LD50 (oral, rat) 4250 mg/kg, (IP, mouse) 2638 mg/kg; mildly toxic by ing.; mod. toxic by IP route; irritant; mutagen; experimental teratogen; TSCA listed

Hazardous Decomp. Prods.: Heated to decom., emits toxic fumes of F–

NFPA: Health 1, Flammability 0, Reactivity 0

Storage: Hygroscopic; store in a tightly closed container in a cool, dry place

Uses: Oral care agent; used in the mfg. of a wide range of pharmaceuticals

Regulatory: Canada DSL

†=pharmaceutical grade

Trade Names: Dissolvine® E-CA-10; Versene CA

Calcium disodium ethylenediamine tetraacetic acid. See Calcium disodium EDTA

Calcium distearate. See Calcium stearate

Calcium diundec-10-enoate. See Calcium undecylenate

Calcium DTPA. See Calcium trisodium pentetate

Calcium EDTA. See Calcium disodium EDTA

Calcium fluoride

CAS 7789-75-5; EINECS/ELINCS 232-188-7

Synonyms: Acid-spar; Calcium difluoride; Fluoritel; Fluorspar

Empirical: CaF$_2$

Properties: Color or wh. cryst. powd.; luminous when heated; insol. in water; sol. in ammonium salts, acids; pract. insol. in water; m.w. 78.08; dens. 3.180; m.p. 1360 C; b.p. $\approx 2500$ C

Toxicology: LD50 (oral, rat) 4250 mg/kg, (IP, mouse) 2638 mg/kg; mildly toxic by ing.; mod. toxic by IP route; irritant; mutagen; experimental teratogen; TSCA listed

Hazardous Decomp. Prods.: Heated to decom., emits toxic fumes of F–

NFPA: Health 1, Flammability 0, Reactivity 0

Storage: Hygroscopic; store in a tightly closed container in a cool, dry place

Uses: Oral care agent; used in the mfg. of a wide range of pharmaceuticals

Regulatory: Canada DSL

†=pharmaceutical grade

Calcium fumarate
CAS 3416-22-6; 19855-56-2; EINECS/ELINCS 243-376-3

INS367
Synonyms:  Fumarate, calcium
Empirical:  CaH2CaO4
Properties:  Wh. powd.; pract. odorless; sol. 1%
in water; m.w. 154.14; pH 5.5-7.5
Uses:  Dietary supplement; calcium source in
        tablets for mineral enrichment
Regulatory:  FDA 21CFR §172.350
Manuf./Distrib.:  ABCR [http://www.abcr.de];
                Gadot Biochem. Ind.
                Research Prods.  [http://www.mpbio.com];

Calcium 4-((β-d-galactosido)-d-gluconate.  See
Calcium lactobionate

Calcium glubionate
CAS 12569-38-9
Synonyms:  Calcium D-gluconate lactobionate monohydrate; Calcium glucono galacto
         gluconate
Classification:  Calcium salt
Empirical:  C18H32O19Ca • H2O
Properties:  Wh. cryst. or gran. powd.; m.w. 610.53; freely sol. in boiling water; pH ± 1
           (above 5% w/v sol'n.)
Toxicology:  Absorption inhibited by high phosphate intake; high osmotic load of syrup
         may cause diarrhea
Storage:  Store in well-closed container in dry place @ ambient temps.
Uses:  Calcium source, dietary supplement for pharmaceuticals, orals, injections, syrups,
         low-birth-wt. infants, treatment of hypocalcemia, calcium deficiency, hypoparathyroidism,
         osteoporosis, rickets
Regulatory:  USP compliance
Manuf./Distrib.:  Shan Par Ind.†
                [http://www.shanpar.com]

Calcium D-gluarate (1:1) tetrahydrate.  See
Calcium saccharate

Calcium gluceptate
CAS 17140-60-2; 29039-00-7 (dihydrate);
EINECS/ELINCS 241-203-6

†=pharmaceutical grade

Synonyms:  Calcium glucoheptonate (1:2);
Calcium α-D-heptagluconate;
Glucoheptonic acid, calcium salt (2:1); α-D-
Glucoheptonic acid, calcium salt
Definition:  Calcium salt of the alpha epimer of
         glucoheptonic acid
Empirical:  C14H26CaO16 (anhyd.); C14H26CaO16 •
2H2O (dihydrate)
Properties:  Wh. to very lt. yel. amorphous powd.;
           sol. in water; insol. in alcohol, many org. solvs.;
           m.w. 490.43 (anhyd.), 526.46 (dihydrate); pH
           6-8 (10%)
Toxicology:  LD50 (IV, mouse) 1170 mg/kg;
            TSCA listed
Precaution:  Stable in air, but hydrous forms may
            lose part of their water of hydration on standing
Uses:  Nutritional supplement, mineral,
        calcium source in pharmaceuticals,
        injectables
Regulatory:  Approved for injectables; Canada
            DSL
Manuf./Distrib.:  Ferro Pfanstiehl Europe†;
                Fluka [http://www.sigma-aldrich.com];

Synonyms: Calcium diiodide; Calcium iodide anhydrous; Calcium iodide hexahydrate; Calcium iodide hydrate; Calcium iodide tetrahydrate

Formula: CaI₂ (anhyd.), CaI₂ • 6H₂O (hexahydrate)

Properties: Ylsh.-wh. cryst.; very sol. in water, methanol, ethanol, acetone; sol. in pentanol; pract. insol. in ether, dioxane; m.w. 293.89 (anhyd.), 402.00 (hexahydrate); dens. 2.55 (anhyd.); m.p. 740 C; b.p. 1100 C

Toxicology: Mutagen; TSCA listed

Storage: Very hygroscopic; deliquescent; keep tightly closed and protected from light

Uses: Pharmaceutical raw material; iodine dietary supplement; medicine

Manuf./Distrib.: AICMA; Alfa Aesar; Alfa Int'l; Asiamerica Int'l; Calgon Carbon; Helm NY; Int'l. Mfg.; Mutchler; Penta Mfg.; RIA Int'l; Robeco; Universal Preserv-A-Chem; Varal Int'l;

Calcium iodide anhydrous; Calcium iodide hexahydrate; Calcium iodide hydrate; Calcium iodide tetrahydrate. See Calcium iodide
Calcium lactate

CAS 814-80-2 (anhyd.); 5743-47-5; 41372-22-9 (monohydrate, trihydrate); 63690-56-2 (pentahydrate); 28305-25-1 (calcium S-lactate); EINECS/ELINCS 212-406-7; 248-953-3

INS327; E327

Synonyms: Calcium dilactate; Calcium 2-hydroxypropionate; Calcium-L-2-hydroxypropionate; 2-Hydroxypropanoic acid, calcium salt; 2-Hydroxypropanoic acid, calcium salt (2:1); Propanoic acid, 2-hydroxy-, calcium salt

Empirical: CaH10CaOs • xH2O

Formula: [CH3CH(OH)COO]2Ca • xH2O, x < 5

Properties: Wh. to cream-colored cryst. powd. or granules containing up to 5 moles of water of crystallization, almost odorless; pentahydrate is somewhat efflorescent, is sol. in water, pract. insol. in alcohol; becomes anhyd. at 120 C; m.w. 218.22 (anhyd.); 236.24 (monohydrate), 272.27 (trihydrate), 308.30 (pentahydrate)

Toxicology: LDLo (IV mouse) 140 mg/kg; poison by IV route; may cause GI and cardiac disturbances; TSCA listed

Hazardous Decomp. Prods.: Heated to decomps., emits acrid smoke and irritating fumes

HMIS: Health 1, Flammability 0, Reactivity 0

Uses: Nutrient supplement, calcium source in pharmaceuticals, dentifrices; medicine (blood coagulation, metabolism, water-electrolyte and calcium-phosphoric balance disorders)

Regulatory: FDA 21CFR §145.145, 150.141, 150.161, 184.1207, GRAS except for infant foods/formulas; USDA 9CFR §318.7 (0.6% max.); Japan approved (1% max. as calcium); Europe listed; UK approved; Canada DSL; BP, EP compliance (pentahydrate, trihydrate)

Trade Names: Galaxium; Galaxium Pentahydrate Powder; Puracal® DC; Puracal® PP/FCC; Puracal® PP/USP

Calcium lactate gluconate. See Calcium lactoglobulonate

Calcium lactobionate

CAS 5001-51-4; EINECS/ELINCS 225-668-2

INS399

Synonyms: Calcium 4-(β-d-galactosido)-d-gluconate
Definition: Calcium salt of lactobionic acid
Empirical: C_{24}H_{42}CaO_{24}
Properties: Wh. gran. powd.; sol. in water; insol. in alcohol, ether; m.w. 754.66; m.p. 120 C (dec.)
Hazardous Decomp. Prods.: Heated to decomp., emits acrid smoke and irritating fumes
Storage: Store in well-closed container in a dry place at ambient temperatures around 20 C; retest after storage for three yrs.
Uses: Therapeutic or a nutritional supplement for diseases where calcium deficiency conditions may occur, such as rickets, post menopausal and senile osteoporosis or to prevent calcium deficiencies; suspending agent in pharmaceuticals
Regulatory: FDA 21CFR §172.720
Manuf./Distrib.: Fluka http://www.sigma-aldrich.com; Reliable Biopharmaceutical† http://www.reliablebiopharm.com; Sigma http://www.sigma-aldrich.com/belgium

Calcium lactogluconate
CAS 52080-72-5
Synonyms: Calcium lactate gluconate
Empirical: C_{27}H_{74}Ca_{5}O_{46} • 2H_{2}O
Properties: Wh. cryst. or gran. powd.; sl. char. odor; sol. in water; freely sol. in boiling water; m.w. 1551.44; pH 8 ± 1 (above 5% w/v sol'n.)
Storage: Store in well-closed container in dry place @ ambient temps.
Uses: Calcium source for pharmaceuticals, tablets, syrups, treatment of calcium deficiency
Regulatory: USP compliance
Manuf./Distrib.: Shan Par Ind.† http://www.shanpar.com

</tr>
</tbody>
</table>
**Definition:** Calcium salt of pantothenic acid

**Empirical:** C₁₉H₃₄N₂O₁₀ • Ca

**Properties:** Wh. powd., odorless, sweetish taste with sl. bitter aftertaste; stable in air; sol. in water, glycerol; insol. in alcohol, chloroform, ether; m.w. 490.63; m.p. 170-172 C; dec. 195-196 C

**Toxicology:** LD₅₀ (oral, mouse) 10 g/kg, (IP, rat) 820 mg/kg, (IV, rat) 830 mg/kg; toxic by IP, subcut., and IV routes; mildly toxic by ing.; TSCA listed

**Hazardous Decomp. Prods.:** Heated to decomp., emits toxic fumes of NOₓ

**Trade Names:** Calcium Pantothenate USP, FCC

d-Calcium pantothenate; Calcium d-pantothenate. See Calcium D-pantothenate

Calcium phosphate (INCI). See Calcium phosphate monobasic anhydrous

Calcium phosphate dibasic | CAS 7757-93-9; EINECS/ELINCS 231-826-1 |
| INS341(ii) |
| Synonyms: | Bicalcium phosphate; Calcium hydrogen orthophosphate; Calcium hydrogen phosphate; Calcium hydrogen phosphate anhydrous; Calcium monohydrogen phosphate; DCP-0; Dicalcium orthophosphate; Dicalcium orthophosphate anhydrous; Dicalcium phosphate; Phosphoric acid calcium salt (1:1); Secondary calcium phosphate |
**Classification:** Inorganic salt

**Empirical:** H₃CaO₄P

**Formula:** CaHPO₄

**Properties:** Wh. cryst. powd., odorless, tasteless; sol. in dilute HCl, nitric, and acetic acids; insol. in alcohol; sl. sol. in water; m.w. 136.07; dens. 2.306; loses water at 109 C; stable in air

**Toxicology:** No known toxicity; skin and eye irritant; nuisance dust

**HMIS:** Health 1, Flammability 0, Reactivity 0
Chemical Component Cross-Reference

Storage: Deliq.; store @ R.T.

Uses:
- Binder, diluent, dispersant for pharmaceutical tablets and capsules;
- mineral supplement, nutrient source in pharmaceuticals, multivitamins; abrasive in dentifrices; in dentals, orals

Regulatory:
- FDA 21CFR §137.105, 175.300, 181.29, 182.1217, 182.8217, GRAS; Japan approved (1% max. as calcium); Europe listed; UK approved; FDA approved for dentals, orals; USP/NF compliance; Canada DSL

See Hydroxyapatite
See Calcium phosphate monobasic anhydrous

Calcium phosphate monobasic anhydrous
CAS 7758-23-8; EINECS/ELINCS 231-837-1
INS341(i)

Synonyms: Acid calcium phosphate; Calcium biphosphate; Calcium dihydrogen phosphate; Calcium phosphate (INCI); Calcium phosphate monobasic; Calcium tetrahydrogen diorthophosphate; MCP/A; Monocalcium orthophosphate; Monocalcium phosphate; Monocalcium phosphate anhydrous; Phosphoric acid calcium salt (2:1)

Empirical: H₄CaO₈P₂
Formula: Ca(H₂PO₄)₂

Properties: Wh. powd.; sl. sol. in water; insol. in alcohol; m.w. 234.05; dens. 2.22 kg/l (16 C); releases water of cryst. above 100 C; dec. @ 200 C

Toxicology: LD₅₀ (oral, rat) 17,500 mg/kg; low toxicity by ing.; a nuisance dust; TSCA listed

Uses: Mineral supplement, buffer, visc. control agent in pharmaceuticals; oral care agent

Regulatory: FDA 21CFR §136.110, 136.115, 136.130, 136.160, 136.165, 136.180, 137.80, 137.165, 137.175, 137.180, 137.270, 150.141, 150.161, 155.200, 175.300, 181.29, 182.1217, 182.6215, 182.8217; Europe listed; Canada DSL

Trade Names: Calstar™, DI-TAB, Emcompress®

Trade Names Containing: Dry Vitamin D₃ Type 100 SD
Calcium phosphate tertiary. See Calcium phosphate tribasic

Calcium phosphate tribasic

CAS 7758-87-4; EINECS/ELINCS 231-840-8

Synonyms: Calcium orthophosphate; Calcium phosphate tertiary; Phosphoric acid, calcium salt (2:3); Precipitated calcium phosphate; TCP; Tertiary calcium phosphate; Tribasic calcium phosphate; Tricalcium bis (orthophosphate); Tricalcium orthophosphate; Tricalcium phosphate

Classification: Inorganic salt

Definition: Variable mixt. of calcium phosphates; occurs in nature as minerals oxydapatit, voelicherite, whitlockite; tech. prod. is bone ash

Empirical: Ca₃O₈P₂

Formula: Ca₃(PO₄)₂

Properties: Wh. cryst. powd., odorless, tasteless; sol. in dil. HCl or HNO₃; pract. insol. in water, alcohol, acetic acid; m.w. 310.18; dens. 3.18; m.p. 1670 °C; flash pt. (CC) 230 °C; ref. index 1.63; stable in air; nonflamm.

Toxicology: May cause irritation by ing., inh., eye/skin contact; inh. may cause flu-like illness; may cause eye redness, tearing, blurred vision, skin reddening, itching, inflamm.; overexposure may cause bone damage, nausea, vomiting, headache; may aggravate ulcers; target organs: stomach, kidneys, liver; TSCA listed

Precaution: Incompat. with strong oxidizing agents

Hazardous Decomp. Prods.: Phosphine, POx, calcium oxide; may emit toxic fumes under fire conditions

HMIS: Health 1, Flammability 0, Reactivity 0

Storage: Store @ R.T. in cool, dry place; avoid excessive heat; keep tightly closed when not in use

Uses: Nutrient source in pharmaceuticals, orals; diluent for tablets and capsules; abrasive in dentificies; medicine

Regulatory: FDA 21 CFR §137.105, 137.155, 137.160, 137.165, 137.170, 137.175, 137.180, 137.185, 169.179, 169.182, 175.300, 181.29, 182.1217, 182.8217, GRAS; USDA 9CFR §318.7; FEMA GRAS; DOT nonregulated; Canada DSL; SARA §302/304/313 nonreportable; Japan approved (1% max. as calcium), restricted; Europe listed; UK approved; FDA approved for orals; USP/NF, BP, EP compliance

Calcium phyrate
CAS 7776-28-5
Synonyms: Hexacalcium phyrate;
Phytocalcium
Empirical: C₆H₆Ca₆O₂₄P₆
Formula: Ca₆H₆(CaPO₄)₆
Properties: Wh. free-flowing powd.; sl. sol. in water; m.w. 888.42; pH neutral (sat. sol'n.)
Uses: Calcium source in pharmaceuticals and nutrition; in colloidgs for diagnostic pharmaceuticals (liver/spleen imaging)
Manuf./Distrib.: Fabrichem
http://www.fabricheminc.com; Maypro Ind.
http://www.maypro.com

Calcium polycarbophil
CAS 9003-97-8; 25987-55-7

Synonyms: Carbofil
Definition: Calcium salt of polyacrylic acid crosslinked with divinyl glycol
Empirical: (C₂₀H₁₈Ca₄O₁₆)n
Properties: Wh. to creamy wh. powd.; insol. in water, dil. acids, dil. alkalis, common org. solvs.
Toxicology: LD₅₀ (oral, rat) 20 g/kg
Uses: Bulking agent for pharmaceutical laxatives

Calcium polysilicate. See Calcium silicate

Calcium propionate
CAS 4075-81-4 (anhyd.); EINECS/ELINCS 223-
795-8
INS282; E282
Synonyms: Calcium dipropionate; Propanoic acid, calcium salt; Propionic acid, calcium salt
Definition: Calcium salt of propionic acid
Empirical: C₆H₁₀CaO₄
Formula: Ca(OOCCH₂CH₃)₂
Properties: Wh. cryst. or cryst. powd., faint odor of propionic acid; sol. in water; sl. sol. in alcohol; m.w. 186.23; m.p. > 300 C
Toxicology: LD₅₀ (oral, rat) 3920 mg/kg, (oral, mouse) 2350 mg/kg; mod. toxic by ing.; irritant; TSCA listed
Precaution: Hygroscopic
Hazardous Decomp. Prods.: Heated to decomp., emits acrid smoke and irritating fumes
HMIS: Health 1, Flammability 0, Reactivity 0
Storage: Store in cool, dry location; keep container closed when not in use
Uses: Antimicrobial, preservative in antifungal skin medications; mold inhibitor in pharmaceuticals

Calcium D-saccharate.  See Calcium saccharate

Calcium saccharin
CAS 6485-34-3 (anhyd.); 6381-91-5 (hydrate);
EINECS/ELINCS 229-349-9

Synonyms: 1,2-Benzisothiazol-3(2H)-one, 1,1-dioxide, calcium salt; 1,2-Benzisothiazol-3(2H)-one, 1,1-dioxide, calcium salt hydrate; Calcium 2-benzosulfimide; Calcium o-benzosulfimide; Calcium saccharinate; Saccharin calcium; Sulfobenzoic imide calcium salt
Classification: Organic compd.
Empirical: C_{14}H_{10}CaN_{2}O_{6}S_{2}
Properties: Wh. cryst. powd., faint aromatic odor, intensely sweet taste; sol. in water; sl. sol. in alcohol; m.w. 406.46 (anhyd.), 467.48 (hydrate)
Toxicology: Confirmed carcinogen; tumorigen; mutagenic data; TSCA listed
Hazardous Decomp. Prods.: Heated to decomp., emits toxic fumes of NOx and SOx
HMIS: Health 1, Flammability 0, Reactivity 0
Storage: Preserve in well-closed containers
Uses: Nonnutritive sweetener for pharmaceuticals, orals; oral care agent
Regulatory: FDA 21CFR §150.141, 150.161, 180.37; USDA 9CFR §318.7 (limitation 0.01% in bacon); FDA approved for orals

Calcium salicylate
CAS 824-35-1; EINECS/ELINCS 212-525-4
Synonyms: Benzoic acid, 2-hydroxy-, calcium salt; Calcium disalicylate; Calcium 2-hydroxybenzoate; Salicylic acid, calcium salt
Definition: Calcium salt of salicylic acid
Empirical: C_{7}H_{6}O_{3} • ½Ca
Uses: Preservative in pharmaceuticals, orals
Regulatory: Approved for orals
Manuf./Distrib.: Camida Ltd http://www.camida.com

Calcium silicate
CAS 1344-95-2; EINECS/ELINCS 215-710-8

Synonyms: Calcium hydrosilicate; Calcium monosilicate; Calcium polysilicate; Okenite; Silicic acid, calcium salt
Classification: Carbonates
Definition: Hydrous or anhydrous silicate with varying proportions of calcium oxide and silica
Empirical: (1) CaO_{3}Si; (2) Ca_{2}O_{4}Si; (3) Ca_{3}O_{5}Si
Properties: Wh. or cream-colored powd.; odorless; sol. in nitritriatic acid; pract. insol. in water; forms a gel with min. acids; m.w. 116.16 (1); dens. 2.10; bulk dens. 15-16 lb/ft³; absorp. power 600% (water); surf. area 95-175 m²/g; m.p. 1540 C; pH 8.4-10.2 (5% aq. susp.); nonflamm.
Toxicology: ACGIH TLV/TWA 10 mg/m³ (total dust); nuisance particulate; pract. nontoxic orally, but inh. may cause respiratory tract irritation; TSCA listed
Precaution: Avoid prolonged contact with water (sol'n. reverts to sol. calcium salts and amorphous silica)
Uses: Filler, glidant, anticaking agent, filter aid for pharmaceuticals, orals; antacid (pharmacology)
Regulatory: FDA 21CFR §169.179, 172.410, 175.300, 176.170, 177.1460, 177.1680, 177.2260, 177.2355, 182.2227, 182.2906, 573.260, GRAS (limitation 2% in table salt, 5% in baking powd.); Canada DSL; Europe listed; UK approved; approved for orals; USP/NF compliance
Manuf./Distrib.: Aldrich† http://www.sigma-aldrich.com; Cary http://www.thecarycompany.com; Celite http://www.worldminerals.com; Chem-

| Calcium sodium caseinate | Properties: Wh. to lt. cream powd.; clean, bland odor; highly soluble | Uses: Solubilizer in pharmaceuticals and nutritional apps. | Trade Names: CS-922 |
| Calcium/sodium PVM/MA copolymer | CAS 62386-95-2 | Synonyms: 2-Butenedioic acid (Z)-, polymer with methoxyethene, calcium, sodium salt | Definition: Mixed calcium and sodium salt of PVM/MA copolymer | Formula: \((\text{C}_4\text{H}_4\text{O}_4 \cdot \text{C}_3\text{H}_6\text{O})n \cdot \text{Ca}_x\text{Na}_y\) | Uses: Film-former in spray bandages; bioadhesives; visc. modifier/stabilizer; enteric sustained-release tablet coating; dentifrices | Regulatory: Canada DSL | Trade Names: Gantrez® MS-955 |
| Calcium sorbate | CAS 7492-55-9; EINECS/ELINCS 231-321-6 | INS203; E203 | Synonyms: Calcium 2,4-hexadienoate; 2,4-Hexadienoic acid, calcium salt | Definition: Calcium salt of sorbic acid | Empirical: \(\text{C}_{12}\text{H}_{14}\text{CaO}_4\) | Formula: \(\text{Ca}((\text{OOC})_5\text{H}_7)_2\) | Properties: Solid; sl. sol. in water | Hazardous Decomp. Prods.: Heated to decomp., emits acrid smoke and irritating fumes | Uses: Preservative in pharmaceuticals | Regulatory: FDA 21CFR §166.110, 182.3225, GRAS; USDA 9CFR §318.7 (not allowed in cooked sausage); Europe listed |

†=pharmaceutical grade

**Calcium stearate**

CAS 1592-23-0; EINECS/ELINCS 216-472-8

INS470; E470a

Synonyms: Calcium distearate; Calcium octadecanoate; Octadecanoic acid calcium salt; Stearic acid, calcium salt

Classification: Aliphatic organic compd.

Definition: Calcium salt of stearic acid

Empirical: \(\text{C}_{36}\text{H}_{70}\text{CaO}_4\)

Formula: \(\text{Ca}(\text{C}_{18}\text{H}_{35}\text{O}_2)_2\)

Properties: Wh. impalpable powd., sl. char. odor; insol. in water, alcohol, ether; sl. sol. in hot alcohol, hot veg. and min. oils; m.w. 607.04; bulk dens. 20 lb/ft³; m.p. 149 C

Toxicology: ACGIH TLV/TWA 10 mg/m³ (total dust); nuisance dust; TSCA listed

Hazardous Decomp. Prods.: Heated to decomp., emits acrid smoke and irritating fumes

HMIS: Health 1, Flammability 0, Reactivity 0

Uses: Conditioner in pharmaceuticals; tablet/capsule lubricant for implants, orals, rectals, topicals

Calcium stearoyl lactylate
CAS 5793-94-2; EINECS/ELINCS 227-335-7
INS482(i); E482

Synonyms: Calcium stearyl-2-lactylate;
Calcium stearoyl-2-lactylate; Calcium stelate;
Octadecanoic acid, 2-(1-carboxyethoxy)-1-methyl-2-oxoethyl ester, calcium salt;
Stearic acid ester with lactate of lactic acid calcium salt

Definition: Calcium salt of stearic acid ester of lactyl lactate

Empirical: C₄₈H₇₆CaO₁₂

Properties: Cream-colored nonhygroscopic powd., caramel odor; sparingly sol. in water;
m.w. 895.30; m.p. 45-60 C; HLB 5.1; acid no. 50-86; pH 4.7 (2% aq. susp.); anionic

Toxicology: No known toxicity; TSCA listed

Hazardous Decomp. Prods.: Heated to decomp., emits acrid smoke and irritating fumes

Uses: Emulsifier for pharmaceuticals

Regulatory: FDA 21CFR §172.844, 176.170, 177.1200; must conform to FDA specs for fats or fatty acids derived from edible oils; Japan approved with restrictions; Canada DSL; Europe listed; UK approved

Calcium sulfate
CAS 7778-18-9; EINECS/ELINCS 231-900-3
INS516; E516
Synonyms:  
Anhydrite (natural form); 
Anhydrous calcium sulfate; Anhydrous gypsum; Calcium sulfate (1:1); Calcium sulfonate; Gypsum; Plaster of Paris; 
Sulfuric acid, calcium salt; Sulfuric acid, calcium salt (1:1)
Classification: Inorganic salt
Empirical: CaO4S
Formula: Ca • H2O4S
Properties:  
Wh. to sl. yel.-wh. powd. or crystals; odorless, tasteless; sl. sol. in water; sol. in 3 N HCl; m.w. 136.14; dens. 2.964; bulking value 0.052 gal/lb; oil absorp. 10; m.p. 145 C; anionic
Toxicology:  
ACGIH TLV/TWA 10 mg/m³ (total dust); nuisance dust; ingestion may result in intestinal obstruction because it absorbs water and hardens; no known toxicity on the skin; irritant; TSCA listed
Precaution: Reacts violently with aluminum; when heated; mixts. with phosphorus ignite at high temps.
Hazardous Decomp. Prods.: Heated to decomp., emits toxic fumes of SOx
HMIS: Health 1, Flammability 0, Reactivity 0
Storage: Hygroscopic; store in cool, dry location; keep containers well closed when not in use
Uses: Excipient, tablet/capsule diluent, desiccant for direct compression of pharmaceutical tablets, oral.; abrasive and firming agent in dentifrices; tooth powds.; surgical casts
Regulatory: FDA 21CFR §133, 133.102, 133.106, 133.111, 133.141, 133.165, 133.181, 133.183, 133.195, 137.105, 137.155, 137.160, 137.165, 137.170, 137.175, 137.180, 137.185, 150.141, 150.161, 155.200, 175.300, 176.170, 177.1460, 178.3297, 184.1230.; Canada DSL; GRAS; BATF 27CFR §240.1051, limitation 16.69 lb/1000 gal; Japan approved with restrictions (1% max.); Europe listed; UK approved; FDA approved for orals; USP/NF, BP, EP compliance; not permitted in food (EU)

Calcium sulfate (1:1). See Calcium sulfate
dihydrate

Calcium sulfate dihydrate
CAS 10101-41-4; 13397-24-5; EINECS/ELINCS 231-900-3
Synonyms: Alabaster; Calcium (II) sulfate dihydrate (1:1:2); CI 77231; Cl pigment white 25; Gypsum; Gypsum stone; Land plaster; Light spar; Magnesia white; Mineral white; Native calcium sulfate; Pigment white 25; Precipitated calcium sulfate; Terra alba
Classification: Calcium compd.; sulfate salt
Empirical: CaO4S • 2H2O
Formula: CaSO4 • 2H2O
Properties: Wh. lumps or powd.; odorless; sol. in water; very slowly sol. in glycerol; pract. insol. in most org. solvs.; m.w. 172.10; dens. 2.32; m.p. 128 C (loses 1.5 H2O); b.p. 163 C (loses ½ water to form anhyd. material); nonflamm.

Uses: Excipient, filler, desiccant, tablet/capsule diluent for pharmaceuticals, orals; white pigment, filler, extender, glaze in pharmaceuticals; in plaster casts
Regulatory: FDA approved for orals; NF, BP, EP, JP compliance
Manuf./Distrib.: ABCR http://www.abcr.de; ADM Arkady http://www.admworld.com;

Trade Names Containing: Terra Alba
calcium sulfate dihydrate (1:1:2). See Calcium sulfate dihydrate
calcium sulfate hemihydrate
CAS 10034-76-1; 26499-65-0; EINECS/ELINCS 231-900-3
Synonyms: Dried calcium sulfate; Dried gypsum; Gypsum hemihydrate; Plaster of Paris
Formula: CaO4S • ½H2O
Properties: Wh. or almost wh. fine powd., odorless, tasteless; sl. sol. in water; sol. in dil. min. acids; pract. insol. in alcohol; m.w. 145.15; m.p. 163 C (loses ½ water to form anhyd. material); nonflamm.

Toxicology: ACGIH TLV/TWA 10 mg/m3 (calcium sulfate); ing. of large amts. may cause blockage of upper intestinal tract;
**Calcium undecylenate**

CAS 1322-14-1; EINECS/ELINCS 215-331-8

Synonyms: Calcium diundec-10-enoate; Calcium 10-undecenoate; 10-Undecenoic acid, calcium salt; 10-Undecenoic acid, calcium (2+) salt

**Empirical:** C_{22}H_{38}CaO_{4}

**Formula:** [CH_{2}CH(CH_{2})_{6}COO]_{2}Ca

**Properties:** Wh. fine powd.; limited sol.; m.w. 406.62; m.p. 155 C

**Uses:** Preservative, bacteriostat, and fungistat in pharmaceuticals; antimicrobial in diaper rash and prickly heat medicines

**Precaution:** Nonhazardous reaction with water to produce gypsum

**Storage:** Hygroscopic

**Uses:** Prep. of plaster of Paris bandages for orthopedic and dental casts, immobilization of limbs and fractures; in orals

**Regulatory:** FDA approved for orals; JP compliance

**Manuf./Distrib.:** Aldrich† [http://www.sigma-aldrich.com]; Fluka [http://www.sigma-aldrich.com]

**Calcium sulfonate.** See Calcium sulfate

**Calcium tetrahydrogen dithophosphate.** See Calcium phosphate monobasic anhydrous

**Calcium trisodium diethylene triamine pentacetate.** See Calcium trisodium pentetate

**Calcium trisodium pentetate**

CAS 12111-24-9

Synonyms: Calcium diethylene triamine pentaacetate; Calcium DTPA; Calcium pentetate; Calcium trisodium diethylene triamine pentacetate; Diethylenetriamine pentacetate acid, calcium trisodium salt; Pentetate calcium trisodium; Pentetate trisodium calcium; Trisodium [[carboxymethyl] imino] bis (ethylenenitrilo) tetraacetate

**Empirical:** C_{14}H_{18}CaN_{3}Na_{3}O_{10}

**Formula:** CaNa_{3}C_{14}H_{18}N_{3}O_{10}

**Properties:** Solid; sol. in water; insol. in alcohol; m.w. 497.36

**Toxicology:** LD_{50} (IV, rat) 2512 mg/kg, (IP, mouse) 7269 mg/kg; mod. toxic by IV and IP routes; mutagen; experimental teratogen; TSCA listed

**Hazardous Decomp. Prods.:** Heated to decomp., emits toxic fumes of Na_{2}O and NO_{x}

**Uses:** Chelating agent in pharmaceutical injectables; antidote for lead poisoning

**Regulatory:** FDA approved for injectables; Canada DSL

**C10 alcohol.** See Decyl alcohol

**C12-15 alcohol benzoate.** See C12-15 alkyl benzoate

**C8 alcohols.** See Caprylic alcohol

**C8-10 alcohols**

CAS 85566-12-7

Synonyms: Alcohols, C8-10

**Uses:** Intermediate

**Trade Names:** Nafol® 810 D

**C10-14 alcohols**

EINECS/ELINCS 283-066-5

Synonyms: Alcohols, C10-14

**Uses:** Emollient

**Trade Names:** Nafol® 1012

**C12-18 alcohols**

CAS 67762-25-8; EINECS/ELINCS 267-006-5

Synonyms: Alcohols, C12-18

**Uses:** Emollient

**Regulatory:** Canada DSL

**Trade Names:** Nafol® 1218

**C16-18 alcohols.** See Cetearyl alcohol

**C20-24 alcohols**

EINECS/ELINCS 307-145-1

Synonyms: Alcohols, C20-24

**Uses:** Intermediate

**Trade Names:** Nafol® 20+

**C12-15 alcohols benzoate.** See C12-15 alkyl benzoate

**C12-15 alcohols lactate.** See C12-15 alkyl lactate

**C-8 aldehyde.** See n-Octanal

**C-9 aldehyde.** See Nonanal

**C10 aldehyde.** See Decanal

**C-16 aldehyde.** See Ethyl methylphenylglycidate

**C-12 aldehyde, lauric.** See Lauric aldehyde

**C-14 aldehyde, myristic.** See Myristaldehyde
Chemical Component Cross-Reference

Calendula. See Calendula officinalis
Calendula extract. See Calendula officinalis extract

Calendula officinalis
CAS 977001-93-6
FEMA 2658
Synonyms: Calendula; Marigold, pot; Pot marigold
Definition: Derived from flowers of Calendula officinalis

Properties: Volatile oil
Uses: Natural flavor for pharmaceuticals
Regulatory: FDA 21CFR §182.10, GRAS; FEMA GRAS; BP, EP compliance

See also Calendula officinalis extract

Calendula officinalis extract
CAS 84776-23-8; EINECS/ELINCS 283-949-5
Synonyms: Calendula extract; Calendula officinalis; Marigold extract; Marigold flower extract
Definition: Extract of flowers of Calendula officinalis

Toxicology: LD50 (IP, mouse) 300 mg/kg
Uses: Anti-inflammatory and colorant in sun care and eye care products.
Regulatory: FDA GRAS; not listed as approved colorant for cosmetics under FDA 21CFR §73 and 74

†=pharmaceutical grade

Trade Names Containing: Crodamol Calendula O
See also Calendula officinalis

Calgluconol; Calglucon. See Calcium gluconate
California buckthorn. See Cascara (Rhamnus purshiana) extract
C14-16-alkanediolsulfonic and C14-16-alkene derivs., sodium salts. See Sodium C14-16 olefin sulfonate
C12-15 alkyl benzoate
CAS 68411-27-8; EINECS/ELINCS 270-112-4
Synonyms: Alkyl (C12-15) benzoate; Benzoic acid, C12-15 alkyl esters; C12-15 alcohol benzoate; C12-15 alcohols benzoate
Definition: Ester of benzoic acid and C12-15 alcohols
Empirical: C20H32O2
Properties: M.w. 304; sp.gr. 0.915-0.935; acid no. ≤ 0.5; ref. index 1.483-1.487
Storage: Preserve in tight, light-resistant containers
Uses: Emollient in pharmaceuticals; vehicle in pharmaceutical topical products
Regulatory: NF listed; Canada DSL
Trade Names: Crodamol AB; Saboderm AB; Tegosoft® TN

(C6-12) Alkyl carboxylic acid, trimethylolpropane triester. See Trimethylolpropane tricaprylyl/tricaprate
C12-15 alkyl 2-hydroxypropanoate. See C12-15 alkyl lactate
C12-15 alkyl lactate
CAS 93925-36-1; EINECS/ELINCS 300-338-1
Synonyms: C12-15 alcohols lactate; C12-15 alkyl 2-hydroxypropanoate; Propanoic acid, 2-hydroxy-, C12-15 alkyl esters
Definition: Ester of lactic acid and C12-15 alcohols
Formula: CH3CHOHCOOR, R rep. C12-15 alkyl group
Properties: Liq.; sol. in oil, ethanol, propylene glycol, IPM, oleyl alcohol; partly sol. in water, glycerin; sp.gr. 0.900-0.920; ref. index 1.4430-1.4450
Toxicology: LD50 (oral, rat) 21 ± 9.2 ml/kg; moderately irritating to eyes and skin
Uses: Emollient for topical pharmaceuticals; detackifier in antiperspirants
Trade Names: Ceraphyl® 41

Calluna vulgaris; Calluna vulgaris extract. See Heather (Calluna vulgaris) extract
C12 alpha olefin. See Dodecene-1
Chemical Component Cross-Reference

Chemical Component: 2-Camphanol

Empirical: C_{12}H_{22}O_2

Properties: Pale yel. liq.; woody, cedar, pine, balsamic odor; sol. in 60% alcohol; m.w. 198.31; sp.gr. 0.9880-0.9950; b.p. 121 C; ref. index 1.4730-1.4800; tenacity 1 wk. on blotter

Storage: Store in cool, dry place in tightly sealed containers, protected from heat and light

Uses: Synthetic flavor for pharmaceuticals

†=pharmaceutical grade

Chemical Component: Camphene

CAS 7070-15-7; EINECS/ELINCS 230-364-8

Synonyms: Arbanol; Cedanol; Ethanol; 2-[1,7,7-trimethylbicyclo[2.2.1]hept-2-yl]oxy, exo-β-hydroxyethyl isobornyl ether; 2-isobornyl-oxy; ethanoate; exo-2-((1,7,7-trimethylbicyclo[2.2.1]hept-2-yl)oxy)ethanol

Empirical: C_{10}H_{16}

Properties: Colorless cubic cryst., oily odor, terpene camphoraceous taste; sol. in alcohol,
Chemical Component Cross-Reference

camphora; Formosa camphor; Gum camphor; Japan camphor; 2-Keto-1,7,7-trimethylbicyclo[2.2.1]-2-heptanone; Laurel camphor; Matricaria camphor; 2-Oxoborne: 1,7,7-Trimethylbicyclo [2.2.1]-2-heptanone; 1,7,7-Trimethylbicyclo [2.2.1] heptan-2-one; 1,7,7-Trimethylnorcamphor

Classification: Aliphatic cyclohexyl compd.

Definition: Ketone derived from wood of the camphor tree, Cinnamomum camphora or prepared synthetically

Empirical: \( \text{C}_{10}\text{H}_{16}\text{O} \)

Properties: Colorless or wh. translucent cryst. mass, char. fragrant penetrating odor, sl. bitter cooling taste; sol. in alcohol, chloroform, ether, fixed/volatile oils; sl. sol. in water; m.w. 152.24; dens. 0.992 (25/4 C); m.p. 179.7 C; b.p. 204 C; subl. @ ambient temp./pressure; flash pt. 150 F

Toxicology: LD50 (oral, mouse) 1310 mg/kg, (IP, mouse) 3000 mg/kg; LCLo (inh., mouse, 3 h) 400 mg/m\(^3\); human poison by ing.; experimental poison by inh., subcut., IP routes; local irritant; ingestion by humans may cause nausea, vomiting, vertigo, mental confusion, delirium, convulsions, coma, respiratory failure, death; chronic exposure may cause transient hepatic and renal damage; mutagenic data; TSCA listed

Precaution: Combustible; incompat. with potassium permanganate; can react with oxidizers; vapor is explosive exposed to heat, flame, or CrO\(_3\)

HMIS: Health 2, Flammability 2, Reactivity 0

Storage: Keep tightly closed away from heat

Uses: Medicinal-type flavor; active OTC drug prod. ingred.; topical anti-infective, anti-itching agent, cooling agent in liniments and for inhalation; medicine (sedative, anodyne, antispasmodic, diaphoretic, anthelmintic); anesthetic, analgesic in cold sore prods.

Features: Medicinal-type flavor

Empirical: C_{10}H_{16}O
Properties: Colorless or wh. cryst.; fragrant penetrating odor; sl. bitter and cooling taste; sol. in aniline, nitrobenzene, CS_{2}, tetralin, decalin, petrol. ether, higher alcohols, fixed and volatile oils; sol. 1 g/0.4 ml in acetone and benzene, 1 g/0.5 ml in chloroform, 1 g/1 ml in alcohol, 1 g/800 ml in water; m.w. 152.24; sp.gr. 0.992 (25/4 C); vapor pressure 1 mm Hg (41.5 C); m.p. 178.6 C; b.p. 204 C (subl.); flash sp.gr. 0.992 (25/4 C); vapor pressure 1 mm Hg (41.5 C); m.p. 178.6 C; b.p. 204 C (subl.); flash pt. 66 C; very volatile in steam
Toxicology: ACGIH TLV/TWA 2 ppm; STEL 3 ppm; LD50 (IV, mouse) 320 mg/kg; LDLo (oral, rat) 800 µg/kg; deadly poison by ing.; poison by IV route; harmful by inh., skin absorp.; can be absorbed through mucous membranes; may cause nausea, burning sensation, coughing, wheezing, laryngitis, headache, vomiting, vertigo, mental confusion, convulsions, GI/kidney/brain effects, CNS depression, coma, respiratory failure, death, etc.; severe irritant to eyes, skin, respiratory system
Precaution: Flamm.; uel 3.5%, lel 0.6%; incompat. with strong oxidizing agents, strong reducing agents, chlorinated solvs., potassium permanganate; reacts violently with chromic anhydride; should not be mixed with any salts in water
Hazardous Decomp. Prods.: Heated to decomp., emits toxic fumes of CO, CO_{2}
NFPA: Health 0, Flammability 2, Reactivity 0
Storage: May be sensitive to heat and direct sunlight; store under ambient temps.; protect from light
Uses: Preservative in pharmaceuticals; topical anti-infective and antipruritic; mild analgesic and rubefacient; in liniments; counter-irritant in treatment of fibrosis and neuralgia; mild expectorant; mild local anesthetic; veterinary medicine (internally as stimulant and carminative, externally as antiseptic)

L-(-)-Camphor. See L-Camphor
Camphora. See Camphor

Camphor (Cinnamomum camphora) oil
CAS 8008-51-3; EINECS/ELINCS 295-980-1
UN 1130 (DOT); FEMA 2231
Synonyms: Camphor, Japanese, white oil; Camphor oil; Camphor oil brown; Camphor oil light; Camphor oil, rectified; Camphor oil white; Camphor oil white Japanese; Camphor oil yellow; Camphor white oil; Cinnamomum camphora oil; Formosa camphor oil; Formose oil of campor; Japanese camphor oil; Light camphor oil; Liquid camphor; White camphor oil
Definition: Oil extracted from the wood of the camphor tree, Cinnamomum camphora
Properties: Colorless to yel.-brn. liq.; camphor or safrole odor; sol. in paraffin oil; insol. in water; dens. 0.87 kg/l (white), 0.97 kg/l (yel.), 1.07 kg/l (brown); b.p. > 200 C (yel.); flash pt. (TCC) ref. index 1.46700-1.47200 (20 C)
Toxicology: LD50 (oral, rat) 3730 mg/kg; TDLo (oral, human) 29 mg/kg; primary irritant; mild skin irritant; may be harmful if swallowed; may be irritating if inhaled; may cause tremors, convulsions in humans; TSCA listed
Precaution: DOT: Flamm. liq.; avoid contact or contamination with strong acids, alkalis, or oxidizing agents
Hazardous Decomp. Prods.: CO and unidentified org. compds. may be formed during combustion
Uses: Cough medicine ingred.; topical analgesic drug
Regulatory: FDA 21CFR §172.510; FEMA GRAS; Canada DSL
Manuf./Distrib.: Alfa Chem†

<table>
<thead>
<tr>
<th>FEMA 2800</th>
<th>†=pharmaceutical grade</th>
</tr>
</thead>
</table>

### Properties

- **Empirical:** C8H18O
- **Classification:** Primary aliphatic alcohol
- **Health 1, Flammability 2, Reactivity 0**
- **NFPA:** Manuf./Distrib.:
  - Synthetic flavor for pharmaceuticals
  - Store in cool, dry area away from heat

### Toxicology

- **Toxicology:** LD50 (oral, mouse) 1790 mg/kg, (IV, mouse) 69 mg/kg; poisoning by IV route; mod. toxic by ing.; skin and eye irritant; does not readily form a vapor; vapors may cause CNS depression; can probably cause 'alcohol' intoxication effects; may cause severe lung damage, respiratory and/or cardiac arrest and death if aspirated into lungs; mutagenic data; TSCA listed
- **Environmental:** VOC; BOD5 1.58; ThOD 2.95

### Precaution:

- Flamm. exposed to heat or flame; can react with oxidizers

### Hazardous Decomp. Prods.: Thermal decomp. prod.: CO, CO2

### NFPA:

- Health 1, Flammability 2, Reactivity 0
- Storage: Store in cool, dry area away from heat and ignition sources

### Uses:

- Synthetic flavor for pharmaceuticals
- Features: Citrus flavor
- Regulatory: FDA 21 CFR §172.230, 172.515 (only for encapsulating lemon, dist. lime, orange, peppermint, and spearmint oils), 172.864, 173.280, 175.105, 175.300, 177.1010, 177.1200, 177.1390, 177.2800, 178.3480; FEMA GRAS; Canada DSL

triglycerides of caprylic and capric acids

**Properties:** Nonionic

**Uses:** Solvent for lipophilic ingreds.; solvent, coemulsifier, solubilizer, carrier for lipophilic drugs

**Regulatory:** Canada DSL

**Trade Names:** Akoline HH; Akoline LL; Akoline MCM; Akoline R; Imwitor® 742; Witafrol® 7420

**Captan**

CAS 133-06-2; EINECS/ELINCS 205-087-0

**Synonyms:** 1H-Isoindole-1,3(2H)-dione, 3a,4,7a-tetrahydro-2-((trichloromethyl)thio)-1,2,3,6-Tetrahydro-N-(trichloromethylthio) phthalimide; N-Trichloromethylmercapto-4-cyclohexene-1,2-dicarboximide; N-Trichloromethylthio-4-cyclohexene-1,2-dicarboximide; N-Trichloromethylthiotosretahydrophthalimide

**Classification:** Organic compd.

**Empirical:** C9H8Cl3NO2S

**Properties:** Crystal, odorless; pract. insol. in water; partly sol. in benzene, chloroform, tetrachloroethane; m.w. 300.59; dens. 1.74; m.p. 178 C

**Toxicology:** ACGIH TLV/TWA 5 mg/m³; LD50 (oral, rat) 9000 mg/kg; LC50 (inh., mouse, 2 h) 5000 mg/m³; LDLo (IP, rat) 25 mg/kg; poison by IP route; mod. toxic to humans by ing.; mod. toxic by inh.; irritant; tumorigen; experimental teratogen; questionable carcinogen; human mutation data; TSCA listed

**Hazardous Decomp. Prods.:** Heated to decomp., emits acrid smoke and irritating fumes

**Uses:** Synthetic flavor, sweetener, and colorant for pharmaceuticals, orals, rectals, topicals, cough syrups, placebo sol'ns.; emollient in skin lotions

**Regulatory:** FDA 21CFR §73.85, 73.1085, 73.2085, 182.1235, 582.1235, GRAS; FEMA GRAS; Japan restricted; Europe listed; UK approved; FDA approved for orals, rectals, topicals, permanently listed; USP/NF compliance; Canada DSL

**Caramel**

CAS 8028-89-5; EINECS/ELINCS 232-435-9

†=pharmaceutical grade

**FEMA 2235; INS150a; E150a**

**Synonyms:** Burnt sugar; Burnt sugar coloring; Caramel color; Natural brown 10; Plain caramel

**Definition:** Conc. sol'n. obtained from heating sucrose or glucose sol'ns.

**Properties:** Dk. brn. to black liq. or solid, char. burnt sugar odor, pleasant bitter taste; sol. in water (colloidal); sol. in dil. alcohol up to 55% (v/v); insol. in most org. solvs.; sp.gr. 1.25-1.38

**Toxicology:** Mutagenic data; may reduce wh. blood cells and destroy vitamin B₆; TSCA listed

**Hazardous Decomp. Prods.:** Heated to decomp., emits acrid smoke and irritating fumes

**Uses:** Synthetic flavor, sweetener, and colorant for pharmaceuticals, orals, rectals, topicals, cough syrups, placebo sol'ns.; emollient in skin lotions

**Regulatory:** FDA 21CFR §73.85, 73.1085, 73.2085, 182.1235, 582.1235, GRAS; FEMA GRAS; Japan restricted; Europe listed; UK approved; FDA approved for orals, rectals, topicals, permanently listed; USP/NF compliance; Canada DSL

Caraway (Carum carvi) oil
CAS 8000-42-8; 85940-31-4; EINECS/ELINCS 288-921-6
FEMA 2238
Synonyms: Caraway oil; Carum carvi; Carum carvi fruit oil; Carum carvi oil
Definition: Volatile oil distilled from the dried ripe fruit of Carum carvi, contg. carvone, d-limonene
Properties: Colorless to pale yel. clear oily liq., caraway odor and taste; darkens and thickens with age; sol. in 8 vols. 80% alcohol; pract. insol. in water; dens. 0.900-0.910 (25/25 C); ref. index 1.485-1.497 (20 C)
Toxicology: LD50 (oral, rat) 3500 mg/kg, (skin, rabbit) 1780 mg/kg, (skin contact; skin irritant; mutagenic data; TSCA listed
Hazardous Decomp. Prods.: Heated to decomp., emits acrid smoke and irritating fumes
HMIS: Health 1, Flammability 2, Reactivity 0
Storage: Keep cool, well closed; protect from light
Uses: Natural flavor for pharmaceuticals; carminative expelling gas from alimentary canal; relieves colic, flatulence; stimulant
Regulatory: FDA 21CFR §182.10, 182.20, 582.20GRAS; FEMA GRAS; Japan approved; BP compliance; Canada DSL

Carbomer
CAS 9003-01-4 (generic); 9007-16-3 (generic);
9007-17-4 (generic); 9007-20-9; 9062-04-8;
54182-57-9; 76050-42-5
Synonyms: Acrylic acid, polymer with
sucrose-polyallyl ether;
Carboxypolymethylene
Definition: Homopolymer of acrylic acid
crosslinked with an allyl ether of pentaerythritol
or an allyl ether of sucrose
Properties: Wh. fluffy powd., odorless; dens.
1.41; anionic
Toxicology: LD50 (oral, rat) 4100 mg/kg; mod.
toxic by ingestion; TSCA listed
Carbomer 934P
CAS 9003-01-4 (generic)
Synonyms: Carpolene
Definition: Polymer of acrylic acid crosslinked with allyl ether of succrose
Properties: Wh. fluffy powd., sl. char. odor; when neutralized with alkali hydroxides or with amines, dissolves in water, alcohol, and glycerin; m.w. nominally 3,000,000; vis. 29,400-39,400 cps (0.5% aq. disp.); pH 3 (1% disp.); anionic
Toxicology: TSCA listed
Storage: Hygroscopic
Uses: Emulsifier, suspending agent, thickener for pharmaceuticals
Regulatory: USP/NF compliance
Trade Names: Carbopol® 934P NF Polymer
Trade Names Containing: Carbopol® 934P

Carbomer 940
CAS 9003-01-4 (generic); 9007-17-4 (generic)
Definition: Polymer of acrylic acid crosslinked with allyl ether of pentaerythritol
Chemical Component Cross-Reference

†=pharmaceutical grade

Properties: Wh. fluffy powd., sl. char. odor; when neutralized with alkali hydroxides or with amines, dissolves in water, alcohol, and glycerin; m.w. nominally 4,000,000; visc. 40,000-60,000 cps (0.5% aq. disp.); pH 3 (1% disp.); anionic

Toxicology: No known toxicity; TSCA listed

Storage: Hygroscopic; preserve in tight containers

Uses: Suspending agent, thickener for pharmaceuticals

Regulatory: USP/NF compliance

Manuf./Distrib.: Spectrum Quality Prods.† http://www.spectrumchemical.com

Trade Names: Acritamer® 940; Carbopol® 940 NF; Carbopol® 980 NF Polymer

Carbomer 941

CAS 9003-01-4 (generic)

Definition: Polymer of acrylic acid crosslinked with allyl ether of pentaerythritol

Properties: Wh. fluffy powd., sl. char. odor; when neutralized with alkali hydroxides or with amines, dissolves in water, alcohol, and glycerin; m.w. nominally 1,250,000; visc. 4000-11,000 cps (0.5% aq. disp.); pH 3 (1% disp.); anionic

Toxicology: No known toxicity; TSCA listed

Storage: Hygroscopic; preserve in tight containers

Uses: Thickener, suspending agent, dispersant, emulsifier in pharmaceuticals, ophthalmics, topicals

Features: Reacts with fat particles to form thick stable emulsions of oils in water

Regulatory: FDA approved for ophthalmics, topicals; USP/NF compliance

Trade Names: Acritamer® 941; Carbopol® 941 NF; Carbopol® 981 NF; Carbopol® 71G NF Polymer

Trade Names Containing: Carbopol® 971P NF

Carbomer 1342

CAS 96827-24-6

Definition: Polymer of acrylic acid crosslinked with allyl ether of pentaerythritol

Properties: Wh. fluffy powd., sl. char. odor; when neutralized with alkali hydroxides or with amines, dissolves in water, alcohol, and glycerin; visc. 9500-26,500 cps (1% aq. disp.); pH 3 (1% disp.)

Storage: Hygroscopic; preserve in tight containers

Uses: Thickener, suspending agent for pharmaceuticals

Regulatory: USP/NF compliance

Manuf./Distrib.: Spectrum Quality Prods.† http://www.spectrumchemical.com

Trade Names: Acritamer® 940; Carbopol® 940 NF; Carbopol® 980 NF Polymer

Carbona. See Carbon tetrachloride

Carbon, activated

CAS 7440-44-0; 64365-11-3; EINECS/ELINCS 231-153-3

UN NA 1361 (DOT); UN 1362 (DOT)

Synonyms: Activated carbon; Active carbon; CI 77265; Decolorizing carbon; Graphite; Pigment black 10

Empirical: C

Properties: Black porous solid, coarse gran., or powd.; odorless; tasteless; insol. in water, org. solvs.; m.w. 12.01; dens. 0.08-0.5

Toxicology: Toxic by inh. of dust; dust irritant, esp. to eyes and mucous membranes; TSCA listed

Precaution: Flamm. solid; DOT: spontaneously combustible; dust is flamm. and explosive when exposed to heat, flame, or oxides

HMIS: Health 0, Flammability 1, Reactivity 0

Uses: Refining of pharmaceutical chemicals

Regulatory: FDA 21CFR §177.1210, 240.361, 240.365, 240.401, 240.405, 240.527, 240.527a, GRAS; BATF 27CFR §240.1051; USDA 9CFR §318.7

Carbon tetrachloride
CAS 56-23-5; EINECS/ELINCS 200-262-8
UN 1846 (DOT)
Synonyms: Benzinoform; Carbona; Carbon chloride; Carbon tet; CTC; Methane tetrachloride; Perchloromethane; Tetrachlorocarbon; Tetrachloromethane
Classification: Chlorinated hydrocarbon
Empirical: CCl₄
Properties: Colorless liq., sweetish distinct ether-like odor; misc. with alcohol, ether, chloroform, benzene, solv. naphtha; insol. in water; m.w. 153.84; dens. 1.585 (25/4 C); vapor pressure 115 mm Hg; m.p. -23 C; b.p. 76.74 C; flash pt. none; ref. index 1.457; surf. tens. 26.92 dynes/cm; KB value 104; dielec. const. 2.29
Toxicology: ACGIH TLV/TWA 5 ppm; STEL 30 (skin); LD50 (oral, rat) 2800-2920 mg/kg, (IP, rat) 1500 mg/kg, (skin, rat) 5070 mg/kg; toxic by ing., inh., IV, and skin absorption; human systemic effects (nausea, vomiting, coma, tremors, anorexia, GI effects; narcotic; eye and skin irritant; can cause contact dermatitis; damages liver, kidneys, lungs; confirmed teratogen; experimental carcinogen; experimental mutagen; data; TSCA listed

Environmental: VOC; BOD5 0; ThOD 0
Precaution: Forms impact-sensitive explosive mixts. with many metal particulates; other explosive mixts. possible
Hazardous Decomp. Prods.: Heated to decomp., emits toxic fumes of Cl– and phosgene
NFPA: Health 3, Flammability 0, Reactivity 0
Uses: Solvent in pharmaceuticals
Use Level: 4 ppm (pharmaceuticals)
Regulatory: SARA §313 reportable; HAP; CERCLA hazardous substance; FDA banned from household use; Canada DSL

Carboxymethylcellulose
CAS 9004-32-4; EINECS/ELINCS 265-995-8
INS466; E466
Synonyms: Carboxymethylcellulose, calcium. See Calcium carboxymethyl cellulose
Carboxymethylcellulose sodium
CAS 9000-11-7
FEMA 2239
Synonyms: Cellulose carboxymethyl ether
Classification: Synthetic gum
Toxicology: LD (oral, rat) > 5 g/kg; LD50 (IV, mouse) 47 mg/kg; shown to cause cancer in animals when ingested; toxicity on skin not known; may cause immune responses; TSCA listed
Uses: Flavor for pharmaceuticals, orals, dentifrices. May be used as a suspending agent, excipient, thickener in pharmaceuticals, dentals, injectables. Migrates to food from pkg. materials; TSCA listed
†=pharmaceutical grade

See also Carboxymethylcellulose sodium

Carboxymethylcellulose calcium. See Calcium carboxymethyl cellulose

Carboxymethylcellulose sodium
CAS 9000-11-7
FEMA 2239
Synonyms: Carboxymethylcellulose, calcium salt; Carboxymethyl ether cellulose sodium salt; Carmellose sodium; Cellulose carboxymethyl ether; Cellulose carboxymethyl ether sodium salt; Cellulose glycolic acid sodium salt; Cellulose gum (INCI); Cellulose, polyanionic; Cellulose sodium glycolate; CMC; CMC sodium salt; NaCMC; SCMC; Sodium carboxymethylcellulose; Sodium cellulose glycolate; Sodium CMC; Sodium CM-cellulose
Classification: Synthetic cellulose gum
Definition: Sodium salt of the polycarboxymethyl ether of cellulose
Formula: R₂OCH₂COONa
Properties: Colorless or wh. powd. or gran., odorless; water sol. depends on degree of substitution; insol. in org. liqs.; m.w. 21,000-500,000; visc. various; m.p. > 300 C; pH 6.5-8.5 (1%); anionic
Toxicology: LD50 (oral, rat) 27,000 mg/kg; LC50 (inh., 4 h, rat) > 5800 mg/m³; mildly toxic by ing.; questionable carcinogen; experimental reproductive effects, neoplastigenic data; tumorigen; migrates to food from pkg. materials; TSCA listed
Hazardous Decomp. Prods.: Heated to decomp., emits toxic fumes of Na₂O
HMIS: Health 1, Flammability 1, Reactivity 0
Storage: Hygroscopic
Uses: Pharamaceutic aid; coating agent, suspending agent, excipient, thickener in pharmaceuticals, dentals, injectables,
Chemical Component Cross-Reference

Carmine (Coccus cacti)

CAS 1390-65-4; EINECS/ELINCS 215-724-4

Synonyms: Alum carmine; Aluminum calcium lake; Alum lake; Alum lake of carminic acid; Carmine; Carmine alum lake; Carmine, certified; Carmine extract; Carmine, high purity biological stain; B Rose Liq.

Definition: Aluminum lake of the coloring agent, cochenial; cochenial is a natural pigment derived from the dried female insect Coccus cacti

Empirical: C_{22}H_{20}O_{13}

Properties: Bright red cryst., easily powdered; sol. in alkali, borax; sl. sol. in hot water; pract. insol. in cold water, dilute acids; m.w. 492.39; decomp. @ 250 C

Toxicology: May be harmful by inh., ing., or skin absorption; may cause eye/skin irritation; suspected of causing food intolerance; may cause allergic cheilitis, occupational asthma in sensitive patients

Precaution: Incompat. with strong oxidizing agents

Hazardous Decomp. Prods.: Toxic fumes of CO, CO_{2}, aluminum oxide; emits toxic fumes under fire conditions

Storage: Store in cool, dry place; keep tightly closed

Uses: Colorant for pharmaceuticals, orals, medicine (pill coatings); as marker to measure gastrointestinal transit time (up to 500 mg dose); nuclear stain in animal tissue sections

Regulatory: FDA 21CFR §73.100, must be pasteurized to destroy Salmonella, 73.1100, 73.2087; FEMA GRAS; Europe listed; UK approved; FDA approved for orals, exempt from certification, permanently listed; JEFCA compliance; Canada DSL from certification, permanently listed; JEFCA approved; FDA approved for orals, exempt 73.2087; FEMA GRAS; Europe listed; UK

See also Carminic acid

Carmine extract; Carmine, high purity biological stain. See Carmine (Coccus cacti)

Carmines. See Carminic acid

Carmine solution

CAS 8001-80-7

Properties: Forms cloudy mixture in water

Uses: Colorant for ointments, tooth powders,
Carminic acid
CAS 1260-17-9; EINECS/ELINCS 215-023-3; FEMA 2330; INS120; E120

Synonyms: 2-Anthracenecarboxylic acid, 7-α-D-glucopyranosyl-9,10-dihydro-5,6,8-tetrahydroxy-1-methyl-9,10-dioxo-; 2-Anthracenecarboxylic acid, 7-β-D-glucopyranosyl-9,10-dihydro-5,6,8-tetrahydroxy-1-methyl-9,10-dioxo-2-anthracenecarboxylic acid; 7-Glucopyranosyl 3,4,5,8-tetrahydroxy-1-methylanthraquinone-2-carboxy acid; Natural red 4

Classification: Anthraquinone

Definition: Naturally derived color from the insect, Coccus cacti, the essential constituent of carmine

Empirical: C_{22}H_{20}O_{13}

Properties: Dk. purplish-brn. mass or red prisms; darkens at 120 C; sol. in alcohol, conc. H_{2}SO_{4}, DMSO; sl. sol. in ether; pract. insol. in petrol. ether, benzene, chloroform; sol. < 1 mg/ml in water; m.w. 492.39; m.p. 136 C (dec.)

Toxicology: May be harmful by inh., ing., or skin absorption; may cause eye/skin irritation; TSCA listed

Precaution: Probably combustible; incompat. with strong oxidizing agents

Hazardous Decomp. Prods.: Toxic fumes of CO, CO_{2}; emits toxic fumes under fire conditions

Storage: Store in cool, dry place; keep tightly closed

Uses: Colorant for pharmaceuticals; bacteriological stain

Regulatory: FDA approved for orals

Carnauba. See Carnauba (Copernica cerifera) wax

Carnauba (Copernica cerifera) wax
CAS 8015-86-9; EINECS/ELINCS 232-399-4

Synonyms: Brazil wax; Carnauba; Carnauba wax; Cera carnauba; Copernica cerefera wax; Copernicia cerifera wax; Waxes, carnauba

Definition: Wax obtained from leaves and leaf buds of the carnauba palm, Copernica cerifera

Properties: Yel. greenish brown lumps, solid, char. odor; sol. in ether, alkalis, warm benzene, warm chloroform, toluene; sl. sol. in boiling alcohol; insol. in water; dens. 0.995 (15/15 C); m.p. 82-85.5 C; acid no. 2-7; sapon. no. 78-89; ref. index 1.4500

Toxicology: Essentially nontoxic; TSCA listed

Hazardous Decomp. Prods.: Heated to decomp., emits acrid smoke and irritating fumes

NFPA: Health 0, Flammability 1, Reactivity 0

Storage: Protect from light

Uses: Pharmaceutical aid; coating agent for pharmaceuticals, orals, topicals; plasticizer for dental compds.

Regulatory: FDA 21CFR §175.320, 184.1978, GRAS; Japan approved; Europe listed (permitted only in chocolate prods.); UK approved; approved for orals, topicals; USP/NF, BP, EP, JP compliance; Canada DSL

CAS 7235-40-7; EINECS/ELINCS 230-636-6
INS160a; E160a(ii)
Synonyms: β-Carotene; Beta-carotene (INCI); CI 40800; CI 75130; Food orange 5; Natural yellow 26; Provitamin A
Classification: Carotenoid pigment
Definition: A precursor of Vitamin A occurring naturally in plants
Empirical: C40H56
Properties: Purple hexagonal prisms, red leaflets; sol. in carbon disulfide, benzene, chloroform, veg. oils; mod. sol. in ether, petrol. ether, oils; pract. insol. in water; m.w. 536.89; m.p. 178-179 C
Toxicology: Nontoxic on skin; massive doses may cause yellowing of the skin; mutagen; TSCA listed
Precaution: Sensitive to alkali, air, and light
Hazardous Decomp. Prods.: Heated to decomp., emits acrid smoke and irritating fumes
Storage: Refrigerate
Uses: Colorant for pharmaceuticals, eye use;
Carotene
all trans-β-carotene-3,3´-diol; β,β-Carotene-3,3´-diol. See Zeaxanthin

Carrageenan (Chondrus crispus)
CAS 9000-07-1; EINECS/ELINCS 232-524-2
FEMA 2596; INS407
Synonyms: 3,6-Anhydro-d-galactan;
Carrageen; Carrageenan; Carrageenan gum; Carrageenin; Carragheenan;
Carraghennan; Chondrus; Gum carrageenan; Irish gum; Irish moss
Classification: Sulfated polysaccharide
Definition: Hydrocolloid obtained from various members of the Gigartinaceae or Solieriae families of the red seaweed, Rhodophyceae; consists of sulfite esters of galactose and 3,6-anhydrogalactose copolymers
Properties: Yel. wh. powd., odorless, tasteless; sol. in hot water, hot conc. NaCl sol'n.; insol. in oils and org. solvs.
Toxicology: LDLo (IV, rabbit) 5 mg/kg; poison by IV route; experimental tumorigen; suspected carcinogen; linked to ulcers in colon, fetal damage in test animals; TSCA listed
Hazardous Decomp. Prods.: Heated to decomp., emits acrid smoke and fumes
Uses: Emulsifier, binder, extender, stabilizer, thickener, gellant, suspending agent in pharmaceuticals, orals, topicals, toothpaste; bulk laxative; emollient in skin care
Use Level: 1-5%
Regulatory: FDA 21CFR §133.133, 133.134, 133.162, 133.178.133.179, 136.110, 136.115, 136.130, 136.160, 136.180, 139.121, 139.122, 150.141, 150.161, 172.620, 172.623, 172.625, 172.626, 176.170, 182.7255, GRAS; Canada DSL; USDA 9CFR §318.7, 381.147; Japan approved; JSCI, European listed; UK approved; FDA approved for orals, topicals; USP/NF compliance

Synonyms: (+)-Carvone; d(+)-Carvone; (S)-Carvone; d-p-Mentha-6,8,(9)-dien-2-one; d-1-Methyl-4-isopropenyl-6-cyclohexen-2-one; (S)-2-Methyl-5-(1-methylethenyl)-2-cyclohexen-1-one

Empirical: C_{10}H_{14}O

Properties: Colorless liq., caraway odor; sol. in propylene glycol, fixed oils; misc. in alcohol; insol. in glycerin; m.w. 150.24; dens. 0.956-0.960; ref. index 1.496-1.499
(S)-Carvone. See d-Carvone

Carvyl acetate
CAS 97-42-7; EINECS/ELINCS 202-580-2
FEMA 2250
Synonyms: p-Mentha-6,8-dien-2-ol, acetate; 1-p-Mentha-6(8,9)-dien-2-yl acetate; 2-Methyl-5-(1-methylethenyl)-2-cyclohexen-1-ol acetate
Empirical: C₁₂H₁₈O₂
Properties: Colorless liq., spearmint-like odor; m.w. 194.27; dens. 0.976; b.p. 115-116°C; flash pt. 208°F; ref. index 1.4750
Toxicology: Primary skin irritant; TSCA listed
Hazardous Decomp. Prods.: Heated to decomp., emits acrid smoke and irritating fumes
Uses: Synthetic flavor for pharmaceuticals
Features: Minty flavor
Regulatory: FDA 21CFR §172.515; FEMA GRAS; Canada DSL

L-Carvyl propionate. See Carvyl propionate

Caryophyllene. See β-Caryophyllene

β-Caryophyllene
CAS 87-44-5; EINECS/ELINCS 201-746-1
FEMA 2252
Synonyms: Caryophyllene; (-)-trans-Caryophyllene; 8-Methylene-4,11,11-(trimethyl) bicyclo (7.2.0) undec-4-ene; trans-(1R,9S)-8-Methylene-4,11,11-trimethylbicyclo[7.2.0] undec-4-ene; 4,11,11-Trimethyl-8-methylene, bicyclo[7.2.0] undec-4-ene
Definition: A mix of sesquiterpenes occurring in many essential oils (clove oil, lavender oil, cinnamon leaves, copaiba balsam)
Empirical: C₁₅H₂₄
Properties: Colorless oil, terpene odor; sol. in alcohol, ether; insol. in water; m.w. 204.36; dens. 0.902 (20/4°C); b.p. 262-264°C; flash pt. (CC) 116°C; ref. index 1.429 (20°C); tenacity 72 hrs. on blotter
Toxicology: Skin irritant; TSCA listed
Precaution: Combustible liq.
Hazardous Decomp. Prods.: Heated to decomp., emits acrid smoke and fumes
Storage: Store in cool, dry place in tightly sealed containers, protected from heat and light
Uses: Synthetic flavor for pharmaceuticals
Regulatory: FDA 21CFR §172.515; FEMA GRAS; Australia; Canada DSL; Japan ENCS (no. 4-592); Philippines PICCS
Manuf./Distrib.: Augustus Oils Ltd http://www.augustus-oils.ltd.uk; Axxence

Cascara (Rhamnus purshiana) extract
CAS 8015-89-2; 84650-55-5; 8007-06-5; EINECS/ELINCS 232-400-8; 283-515-5
UN 1197 (DOT); FEMA 2253
Synonyms: California buckthorn; Cascara bark extract; Cascara, bitterless, extract; Cascara extract; Cascara sagrada bark extract; Cascara sagrada extract; Chittembark; Rhamnus purshiana; Rhamnus purshiana bark extract; Rhamnus purshiana extract
Definition: Extract of dried bark of Rhamnus purshiana
HMIS: Health 2, Flammability 2, Reactivity 0
Uses: Natural flavor for pharmaceuticals; stimulant in laxative prods.
Regulatory: FDA 21CFR §172.510; FEMA GRAS; Japan approved

Cascara sagrada. See Cascara sagraga
Cascara sagrada bark extract. See Cascara (Rhamnus purshiana) extract
Cascara sagrada extract. See Casanthranol; Cascara (Rhamnus purshiana) extract

Cascara sagraga
Synonyms: Cascara sagrada
Definition: Derived from Rhamnus purshiana
Properties: Bitter tonic flavor
Uses: Natural flavor in pharmaceuticals
Regulatory: FDA 21CFR §172.510

Cascarilla bark oil. See Cascarilla oil

Cascarilla oil
CAS 8007-06-5; EINECS/ELINCS 284-284-3
FEMA 2255

**Casein**

CAS 9000-71-9; EINECS/ELINCS 232-555-1

Synonyms: Milk protein, casein; Proteins, milk

Definition: Mixt. of phosphoproteins obtained from cow's milk

Properties: Wh. powd.; sol. in alkaline sol'ns.

Toxicology: Mild sensitive reactions in persons allergic to cow's milk; TSCA listed

Storage: Hygroscopic

Uses: Nutrient, flavor in pharmaceuticals; in slow-release and microencapsulation prods.; dietary base for evaluation of vitamins

Features: Low in fat and cholesterol

Regulatory: FDA 21CFR §101.4, 135.110, 135.140, 166.110, 182.90, GRAS; Japan restricted; Canada DSL

Manuf./Distrib.: AMRESCO†

**Cassia**. See Cinnamon (Cinnamomum cassia)

**Cassia aldehyde**. See Cinnamal

**Cassia bark oil**. See Cinnamon (Cinnamomum cassia) oil

**Cassia gum** E499

Synonyms: Gum cassia

Classification: Galactomannan

Definition: Purified flour from the endosperm of the seeds of Cassia tora/obtusifolia and is comprised of at least 75% polysaccharide consisting primarily of a linear chain of 1,4-α-D-mannopyranose units with 1,6-linked α-D-galactopyranose units.

Properties: Swells in water and forms high-viscosity aqueous colloids after it is boiled

Uses: Natural thickener, stabilizer for pharmaceuticals; medicine (tonic, stomachic, carminative)

Regulatory: Japan approved; FDA approved for buccals
Cassie (Acacia farnesiana) flowers
CAS 977017-58-5; 89958-31-6
FEMA 2260
Synonyms: Acacia farnesiana; Acacia farnesiana flowers; Cassie absolute; Cassie flowers
Definition: Flowers from Acacia farnesiana
Properties: Warm floral intense odor with a balsamic undertone
Uses: Natural flavor for pharmaceuticals
Regulatory: FDA 21CFR §172.510; FEMA GRAS; Japan approved

Cassie flowers. See Cassie (Acacia farnesiana) flowers
Castor; Castorem oil. See Castoreum
Castoreum
CAS 8023-83-4; EINECS/ELINCS 232-427-5
Synonyms: Castor; Castorem oil; Castoreum absolute; Castoreum oil; Castoreum resinoid; Castoreum tincture; Hyperabsolute castoreum
Definition: Dried preputial or vaginal follicles of the beaver, Castor fiber L. and C. canadensis
Properties: Char. odor
Uses: Natural flavor for pharmaceuticals
Regulatory: FDA 21CFR §182.50, GRAS; Japan approved
Manuf./Distrib.: Augustus Oils Ltd http://www.augustus-oils.ltd.uk

Castoreum absolute. See Castoreum extract; Castoreum
Castoreum extract
CAS 8023-83-4; EINECS/ELINCS 232-427-5
FEMA 2261
Synonyms: Castoreum absolute; Castorium extract
Definition: Derived from Castor fiber L. and C. canadensis
Uses: Natural flavor for pharmaceuticals
Regulatory: FDA 21CFR §182.50, GRAS; FEMA GRAS; Japan approved; Canada DSL
Manuf./Distrib.: V. Mane Fils SA http://www.mane.com

†=pharmaceutical grade

Castoreum oil; Castoreum resinoid; Castoreum tincture. See Castoreum
Castor oil. See Castor (Ricinus communis) oil
Castor oil, acetylated. See Glyceryl triacetyl ricinoleate
Castor oil acid. See Ricinoleic acid
Castor oil aromatic. See Castor (Ricinus communis) oil
Castor oil ethoxylate. See PEG castor oil
Castor oil, hydrogenated. See Hydrogenated castor oil
Castor oil sulfated; Castor oil, sulfonated. See Sulfated castor oil
Castor (Ricinus communis) oil
CAS 1323-38-2; 8001-79-4; EINECS/ELINCS 232-293-8
FEMA 2263; INS1503
Synonyms: Aceite de ricino; Aromatic castor oil; Castor oil; Castor oil aromatic; Huile de ricini; Oil of Palma Christi; Oleum ricini; Ricini oleum; Ricinus communis oil; Ricin oil; Tangantangan oil
Classification: Vegetable oil
Definition: Fixed oil obtained from seeds of Ricinus communis
Properties: Colorless to pale yel. viscous oily liq., char. odor; sol. in alcohol; misc. with glacial acetic acid, chloroform, ether; negligible sol. in water; dens. 0.961; m.p. -12 C; b.p. 313 C; acid no. < 4; iodine no. 83-88; sapon. no. 176-187; hyd. no. 160-168; flash pt. 230 C; ref. index 1.478; surf. tens. 39 dynes/cm (20 C)
Toxicology: Moderately toxic by ing.; allergen; eye irritant; mild skin irritant; mist may cause sl. irritation of nose and throat; purgative, laxative in large doses; TSCA listed
Precaution: Combustible when exposed to heat; spontaneous heating may occur; incompat. with acids and bases (hydrolysis can occur), strong oxidizing agents (increased fire hazard)
Hazardous Decomp. Prods.: @ 340-400 C, pyrolysis occurs yielding heptaldehyde and undecylenic acids; further decomp. yields CO, CO2, possibly acrolein
NFPA: Health 0, Flammability 1, Reactivity 0
Storage: Store in cool, dry, well-ventilated area, out of direct sunlight; avoid generating mist
Uses: Vehicle, emollient, lubricant, plasticizer, solvent, cosolvent in
Chemical Component Cross-Reference

pharmaceuticals, intramuscular injectables, solid oral dosage forms, topicals, capsules, emulsions; soothing to eyes; cathartic; purgative; laxative; embalming fluids; stimulant

Features: Oleaginous

Use Level: 0.08-23 mg (solid oral dosage forms); 5-12.5% (topicals)

Cedar leaf oil. See Cedar leaf (Thuja occidentalis) oil

Cedar leaf (Thuja occidentalis) oil
CAS 8007-20-3
FEMA 2267
Synonyms: Arborvitaes; Arborvitae oil; Cedar leaf oil; Cedar, white, leaf oil; Thuja oil; White cedarleaf oil; White cedar oil
Definition: Volatile oil obtained by steam distillation from fresh leaves of Thuja occidentalis, not a true cedar; mainly contg. d-α-thujone
Properties: Ylsh. oil, strong camphoraceous odor reminiscent of sage; sol. in fixed oils, min. oil, propylene glycol; insol. in glycerin; dens. 0.910-0.920; ref. index 1.4560-1.4590

Toxicology: LD50 (oral, rat) 830 mg/kg, (skin, rabbit) 4100 mg/kg; mod. toxic by ing. and skin contact; skin irritant; ing. of large quantities causes hypertension, bradycardia, tachypnea, convulsions, death; TSCA listed

Hazardous Decomp. Prods.: Heated to decomp., emits acrid smoke and fumes
HMIS: Health 1, Flammability 1, Reactivity 0
Storage: Light-sensitive
Uses: Natural flavor for pharmaceuticals
Regulatory: FDA 21CFR §172.510; FEMA GRAS; Canada DSL

**α-Cellulose.** See Cellulose

### Cellulose acetate

**CAS 9004-35-7**

**Synonyms:** Acetate cotton; Acetate ester of cellulose; Acetic acid, cellulose ester; Acetose; Acetylcellulose; CA; Cellulose, acetate; Cellulose 2,5-acetate; Cellulose acetate ester; Cellulose, 2,5-diacetate; Cellulose monoacetate; Monoacetylcellulose; Secondary cellulose acetate

**Classification:** Cellulosics; thermoplastic resin

**Properties:** Triacetate insol. in water, alcohol, ether, sol. in glacial acetic acid; tetraacetate insol. in water, alcohol, ether, glacial acetic acid, methanol; pentaacetate insol. in water, sol. in alcohol; m.w. ≈ 37,000; dens. 1.300

**Storage:** Preserve in tight containers

**Uses:** Polymer membrane, coating agent for pharmaceuticals

**Regulatory:** FDA 21CFR §175.300, 182.90, GRAS; USP/NF, BP, EP compliance; Canada DSL

**Trade Names:** CA-320S; CA-398-10NF; CA-398-30NF; Eastman® CA

**Cellulose, acetate; Cellulose 2,5-acetate.** See Cellulose acetate

**Cellulose, acetate, 1,2-benzene dicarboxylate.** See Cellulose acetate phthalate

**Cellulose acetate butanoate.** See Cellulose acetate butyrate

**Cellulose acetate butyrate**

**CAS 9004-36-8**

**Synonyms:** CAB; Cellaburate; Cellulose, acetate butanoate; Cellulose acetates, butanoates; Cellulose acetobutyrate

**Classification:** Thermoplastic resin

**Definition:** Butyric acid ester of a partially acetylated cellulose

**Properties:** Wh. pellets or gran.; sol. in ketones, org. acetates, lactates, methylene, ethylene, and propylene chlorides, high-boiling solvs.; dens. 1.250; exc. weathering props.; high dielec. str.; high resist. to oil and grease; high transparency
Chemical Component Cross-Reference

Precaution: **Combustible**

Classification: **Thermoplastic**

Definition: Propionic acid ester of a partially acetylated cellulose

Properties: Wh. powd.; m.w. (avg.) 75,000; dens. 1.18-1.23 kg/l; high transparency; scratch resist.; tough; m.p. 200-210 C

Toxicology: **TSCA listed**

Precaution: Wear chemical goggles, protective clothing to avoid skin contact, and impervious gloves; avoid strong oxidizing agents

Hazardous Decomp. Prods.: **Irritating and toxic fumes and gases**

Storage: Store a tightly closed container in a cool, dry place

Uses: **Excipient for pharmaceuticals**

Regulatory: FDA 21CFR §175.105, 175.230, 175.300, 177.1200; Canada DSL

**Manuf./Distrib.:** Aldrich [http://www.sigma-aldrich.com](http://www.sigma-aldrich.com); Allchem Ind. Cellulose hydroxyethylate; Cellulose hydroxyethyl ether; Cellulose, 2-hydroxyethyl ether. See Hydroxyethylcellulose

Cellulose, 2-hydroxyethyl methyl ether. See Methyl hydroxyethylcellulose

Cellulose, 2-hydroxypropyl ether. See Hydroxypropylcellulose

Cellulose hydroxypropyl methyl ether; Cellulose 2-hydroxypropyl methyl ether. See Hydroxypropyl methylcellulose

Cellulose, 2-hydroxypropyl methyl ether, acetate hydrogen butanedioate. See Hydroxypropyl methylcellulose acetate succinate

Cellulose methyl; Cellulose methylether; Cellulose methyl ether. See

†=pharmaceutical grade

Methylcellulose

Cellulose monoacetate. See Cellulose acetate

Cellulose nitrate. See Nitrocellulose

Cellulose, oxidized. See Oxidized cellulose

Cellulose, oxidized, regenerated

Synonyms: ORC

Uses: Absorbable adhesion barrier in surgical procedures, as wound dressing

Cellulose, polyanionic. See Carboxymethylcellulose sodium

Cellulose powder; Cellulose, powdered. See Cellulose

Cellulose propionate. See Cellulose acetate propionate

Cellulose pulp. See Cellulose

Cellulose sodium glycolate. See Carboxymethylcellulose sodium

Cellulose tetranitrate. See Nitrocellulose

Cellulosic acid. See Oxidized cellulose

Centella asiatica; Centella asiatica extract. See Hydrocotyl (Centella asiatica) extract

Cephrol. See ß-Citronellol

Cera alba. See Beeswax

Cera carnauba. See Carnauba (Copernica cerifera) wax

Cera microcristallina. See Microcrystalline wax

Ceratonia. See Locust bean (Ceratonia siliqua) gum

Ceratonia siliqua. See Carob (Ceratonia siliqua) extract; Locust bean (Ceratonia siliqua) gum

Ceratonia siliqua extract. See Carob (Ceratonia siliqua) extract

Ceratonia siliqua gum. See Locust bean (Ceratonia siliqua) gum

Ceresin

CAS 8001-75-0; EINECS/ELINCS 232-290-1

Synonyms: Ceresine; Ceresine wax; Ceresin wax; Cerin, Earth wax; Mineral wax; White ceresin wax; White ozokerite wax

Definition: Waxy mixture of hydrocarbons obtained by purification of ozokerite

Properties: Wh. or yel. waxy cake; tasteless; odorless (wh.), sl. odor (yel.); sol. in benzene, chloroform, naphtha, hot oils, petrol. ether, 30 parts abs. alcohol, most org. solvs.; insol. in water; dens. 0.92-0.94; m.p. 68-72 C

Toxicology: May cause allergic reactions;

TSCA listed

Precaution: Combustible

Uses: Thickener in pharmaceutical protective
**Chemical Component Cross-Reference**

**creams:** dental wax compds.

Handbook of Pharmaceutical Additives, Third Edition 1076
### Ceteareth-16

**CAS:** 68439-49-6 (generic)
**Synonyms:** PEG-16 cetyl/stearyl ether; POE (16) cetyl/stearyl ether
**Definition:** PEG ether of cetearyl alcohol
**Formula:** \(R(OCH_2CH_2)_nOH, R = \text{blend of cetyl and stearyl radicals, avg. } n = 16\)
**Properties:** Nonionic
**Toxicology:** TSCA listed
**Uses:** Emollient in pharmaceuticals, topicals

### Ceteareth-18

**CAS:** 68439-49-6 (generic)
**Synonyms:** PEG-18 cetyl/stearyl ether; POE (18) cetyl/stearyl ether
**Definition:** PEG ether of cetearyl alcohol
**Formula:** \(R(OCH_2CH_2)_nOH, R = \text{blend of cetyl and stearyl radicals, avg. } n = 18\)
**Properties:** Nonionic
**Toxicology:** TSCA listed
**Uses:** Emulsifier and solubilizer for pharmaceuticals

### Ceteareth-20

**CAS:** 68439-49-6 (generic)
**Synonyms:** PEG-20 cetyl/stearyl ether; POE (20) cetyl/stearyl ether; Polyoxyl 20 cetostearyl ether
**Definition:** PEG ether of cetearyl alcohol
**Formula:** \(R(OCH_2CH_2)_nOH, R = \text{blend of cetyl and stearyl radicals, avg. } n = 20\)
**Properties:** Cream-colored waxy unctuous mass, melting to brnsh. yel. clear liq.; sol. in water, alcohol, acetone; insol. in hexane; HLb 15.6; acid no. 0.5 max.; sapon. no. 2 max.; hyd. no. 42-60; pH 4.5-7.5 (10%); nonionic
**Toxicology:** TSCA listed
**Uses:** Surfactant, emulsifier, dispersant, solubilizer, wetting agent, detergent, visc. control agent for pharmaceuticals, topicals
**Regulatory:** FDA 21CFR §177.2800; FDA approved for topicals; USP/NF compliance

### Ceteareth-25

**CAS:** 68439-49-6 (generic)
**Synonyms:** PEG-25 Cetostearyl ether; PEG-25 cetyl/stearyl ether; POE (25) cetyl/stearyl ether
**Definition:** PEG ether of cetearyl alcohol
**Formula:** \(R(OCH_2CH_2)_nOH, R = \text{blend of cetyl and stearyl radicals, avg. } n = 25\)
**Properties:** Nonionic
**Toxicology:** TSCA listed
**Uses:** Surfactant, emulsifier, stabilizer for pharmaceuticals
**Regulatory:** FDA 21CFR §177.2800
**Trade Names Containing:** Cremporph® A 25; Lipocol SC-25; Sabopal TA 25; Teginacid® C; Volpo CS25

### Ceteareth-30

**CAS:** 68439-49-6 (generic)
**Synonyms:** PEG-30 cetyl/stearyl ether; POE (30) cetyl/stearyl ether
**Definition:** PEG ether of cetearyl alcohol
**Formula:** \(R(OCH_2CH_2)_nOH, R = \text{blend of cetyl and stearyl radicals, avg. } n = 30\)
**Properties:** Nonionic
**Toxicology:** TSCA listed
**Uses:** Emulsifier and emollient in pharmaceuticals, topicals
**Regulatory:** FDA 21CFR §177.2800; approved for topicals
**Trade Names Containing:** Eumulgin® B3; Lipocol SC-30

### Ceteareth-33

**CAS:** 68439-49-6 (generic)
**Synonyms:** PEG-33 cetyl/stearyl ether; PEG (33) cetyl/stearyl ether; POE (33) cetyl/stearyl ether

†=pharmaceutical grade

### Cetearyl alcohol

**CAS Number:** 8005-44-5, 67762-27-0; EINECS/ELINCS 267-008-6, 267-009-1

**Synonyms:** Alcohols, C16-18; n-Alkanol (C16-C18); C16-18 alcohols: Cetostearyl alcohol; Cetyl-stearyl alcohol; Stearyl-cetyl alcohol

**Definition:** Mixture of fatty alcohols, predominantly cetyl and stearyl alcohols

**Empirical:** \( C_{18}H_{35}O \)

**Formula:** \( \text{CH}_3(\text{CH}_2)_n\text{OH}, n = 15-17 \)

**Properties:** Wh. unctuous flakes or gran., faint char. odor, bland mild taste; sol. in alcohol, ether; insol. in water; m.w. 270.50; m.p. 48-55 C; acid no. ≤ 2; iodine no. ≤ 4; hyd. no. 208-228; nonionic

**Toxicology:** TSCA listed

**Storage:** Preserve in well-closed containers

**Uses:** Emulsifying wax, cosolvent, emollient, stiffener, consistency agent for pharmaceuticals, creams, orals, otics, topicals; antiseptic in topical anti-infective prods.

**Regulatory:** FDA 21 CFR §175.105; FDA approved for orals, otics, topicals; USP/NF, BP, EP compliance

**Manuf./Distrib.:** A&E Connock†

**Trade Names Containing:** Aquabase NF; Argobase EST; Argobase EUC 2; Cire Lanol® CTO; Cosmowax BP; Cosmowax J; Crodacos CES; Crodacos CS20A; Crodex A; Crodex C; Crodex N; Dragowax SE; Emulgade® 1000 Nl; Emulgade® F; Emulgade® PL 68/50; Emulgade® SE; Emulgade® SE-PF; Fancor® Uni-enbase; Fattylan; Galenol® 1618 AE; Galenol® 1618 CS; Galenol® 1618 DSN; Galenol® 1618 KS; Incroquat Behenyl TMS; Koster Keunen Emulsifying Wax; Lanette® NPH; Lanette® SX; Lanette® W; Lanette® Wax AO; Lipowax AO; Lipowax D; Lipowax D-AT Pastilles; Lipowax ES; Lipowax ES-C; Lipowax NI; Lipowax PA; Lipowax PA Pastilles; Lipowax R2; Mazawax® 163R Flake; Montanov® 068; Montanov® 082; Pionier® MAA; Pionier® MAA Weich; Promulgen® D; Ritachol® 1000; Ritachol® 2000; Sabowax AO; Sabowax GF; Sebase

**Ceteryl ethylhexanoate.** See Ceteryl octanoate

**Ceteryl glucoside**

**CAS Number:** 246159-33-1

**Synonyms:** Ceteryl polyglucose; D-Glucopyranose, C16-C18 alkyl glycosides; D-Glucoside, C16-C18 alkyl

**Definition:** Prod. obtained by condensation of ceteryl alcohol with glucose

**Properties:** Nonionic

**Uses:** Surfactant, o/w emulsifier for dermopharmaceutical prods.

**Trade Names Containing:** Emulgade® PL 68/50; Montanov® 068

**Ceteryl isononanoate**

**CAS Number:** 84878-33-1; EINECS/ELINCS 284-424-3

---

Handbook of Pharmaceutical Additives, Third Edition 1078
Chemical Component Cross-Reference †=pharmaceutical grade

Synonyms: Isononanoic acid, cetearyl ester; Isononanoic acid, cetyl/stearyl ester
Definition: Ester of cetearyl alcohol and a branched chain of nanoic acid
Uses: Emollient for pharmaceuticals, skin care and sun protection prod.; solvent for lipophilic ingreds.
Trade Names: Cetiol® SN; Saboderm CSN; Tegosoft® CI

Cetearyl octanoate
CAS 59130-70-7; EINECS/ELINCS 261-620-7
Synonyms: Cetearyl ethylhexanoate; Cetyl-stearyl 2-ethyl hexanoate; Cetyl/stearyl octanoate; 2-Ethylhexanoic acid, cetyl-stearyl ester; Hexanoic acid, 2-ethyl-, C15-18-alkyl esters
Definition: Ester of cetearyl alcohol and octanoic acid
Uses: Emollient, waterproofing agent in pharmaceuticals, skin care preps.
Manuf./Distrib.: A&E Connock http://www.connock.co.uk
Trade Names: Luvitol® EHO; Saboderm CSO; Tegosoft® Liquid
Trade Names Containing: Crodamol CAP

Ceteth-2
CAS 9004-95-9 (generic); 5274-61-3
Synonyms: 2-[2-Hexadecyloxy] ethanol; PEG-2 cetyl ether; PEG 100 cetyl ether; POE (2) cetyl ether
Classification: Nonaromatic ether
Definition: PEG ether of cetyl alcohol
Empirical: C20H42O3
Formula: CH3(CH2)14CH2(OCH2CH2)nOH, avg. n = 2
Properties: Nonionic
Toxicology: TSCA listed
Uses: Emulsifier for pharmaceuticals, topicals
Regulatory: Approved for topicals
Manuf./Distrib.: Aldrich http://www.sigma-aldrich.com; Sigma http://www.sigma-aldrich.com/belgium
Trade Names: BC-2; Brij® 52; Volpo C2
Chemical Component Cross-Reference

Ceteth-5
CAS 9004-95-9 (generic); 4478-97-1
Synonyms: PEG-5 cetyl ether; 3,6,9,12,15-Pentaoxahentriacontan-1-ol; POE (5) cetyl ether
Classification: Nonaromatic ether
Definition: PEG ether of cetyl alcohol
Empirical: C_{28}H_{54}O_{6}
Formula: CH_3(CH_2)_{14}CH_2(OCH_2CH_2)_nOH, avg. n = 5
Properties: Nonionic
Toxicology: TSCA listed
Uses: Emulsifier, dispersant for pharmaceutical creams and lotions
Regulatory: FDA 21CFR §176.200
Manuf./Distrib.: Aldrich http://www.sigma-aldrich.com; Fluka http://www.sigma-aldrich.com; Sigma http://www.sigma-aldrich.com/belgium
Trade Names Containing: Cromul EM 0685
†=pharmaceutical grade

Ceteth-10
CAS 9004-95-9 (generic); 14529-40-9
Synonyms: 3,6,9,12,15,18,21,24,27,30-Dexaoxahexatetracontan-1-ol; PEG-10 cetyl ether; PEG 500 cetyl ether; POE (10) cetyl alcohol; POE (10) cetyl ether
Classification: Nonaromatic ether
Definition: PEG ether of cetyl alcohol
Empirical: C_{36}H_{74}O_{11}
Formula: CH_3(CH_2)_{14}CH_2(OCH_2CH_2)_nOH, avg. n = 10
Properties: HLB 12.9; nonionic
Toxicology: TSCA listed
Uses: Emulsifier for pharmaceuticals, creams, lotions
Regulatory: FDA 21CFR §176.200, 177.2800
Manuf./Distrib.: Aldrich http://www.sigma-aldrich.com; Sigma http://www.sigma-aldrich.com/belgium
Trade Names: BC-10TX

Ceteth-15
CAS 9004-95-9 (generic)
Synonyms: PEG-15 cetyl ether; POE (15) cetyl ether
Classification: Nonaromatic ether
Definition: PEG ether of cetyl alcohol
Formula: CH_3(CH_2)_{14}CH_2(OCH_2CH_2)_nOH, avg. n = 15
Properties: Nonionic
Chemical Component Cross-Reference

**Toxicology:** TSCA listed

**Uses:** Surfactant, emulsifier, dispersant for pharmaceuticals, creams, lotions

**Regulatory:** FDA 21CFR §176.200, 177.2800

**Manuf./Distrib.:** Aldrich [http://www.sigma-aldrich.com](http://www.sigma-aldrich.com); Fluka [http://www.sigma-aldrich.com](http://www.sigma-aldrich.com); Sigma [http://www.sigma-aldrich.com/belgium](http://www.sigma-aldrich.com/belgium)

**Trade Names:** BC-15TX

---

**Ceteth-16**

**CAS:** 9004-95-9 (generic)

**Synonyms:** PEG-16 cetyl ether; POE (16) cetyl ether

**Classification:** Nonaromatic ether

**Definition:** PEG ether of cetyl alcohol

**Formula:** \( \text{CH}_3(\text{CH}_2)_{16}\text{CH}_2(\text{OCH}_2\text{CH}_2)_n\text{OH} \), avg. \( n = 16 \)

**Properties:** Nonionic

**Toxicology:** TSCA listed

**Uses:** Surfactant, emulsifier, lubricant for pharmaceuticals

**Regulatory:** FDA 21CFR §176.200

**Manuf./Distrib.:** Aldrich [http://www.sigma-aldrich.com](http://www.sigma-aldrich.com); Fluka [http://www.sigma-aldrich.com](http://www.sigma-aldrich.com); Sigma [http://www.sigma-aldrich.com/belgium](http://www.sigma-aldrich.com/belgium)

**Trade Names Containing:** Solulan® 16

---

**Ceteth-20**

**CAS:** 9004-95-9 (generic)

**Synonyms:** Cetomacrogol 1000; PEG-20 cetyl ether; PEG 1000 cetyl ether; PEG 1000 monocetyl ether; POE (20) cetyl ether

**Classification:** Nonaromatic ether

**Definition:** PEG ether of cetyl alcohol

**Formula:** \( \text{CH}_3(\text{CH}_2)_{14}\text{CH}_2(\text{OCH}_2\text{CH}_2)_n\text{OH} \), avg. \( n = 20 \)

**Properties:** Waxy solid; sol. in water; HLB 15.7; pour pt. ≈ 39 C; cloud pt. ≈ 45 C; nonionic

**Toxicology:** TSCA listed

**Uses:** Surfactant, emulsifier, wetting agent, solubilizer, defoamer, detergent, lubricant, emulsion stabilizer for pharmaceuticals, topicals

**Regulatory:** FDA 21CFR §176.200, 177.2800; FDA approved for topicalss

**Manuf./Distrib.:** Aldrich [http://www.sigma-aldrich.com](http://www.sigma-aldrich.com); Fluka [http://www.sigma-aldrich.com](http://www.sigma-aldrich.com); Sigma [http://www.sigma-aldrich.com/belgium](http://www.sigma-aldrich.com/belgium)

**Trade Names Containing:** Forlan C-24

---

**Ceteth-25**

**CAS:** 9004-95-9 (generic)

**Synonyms:** PEG-25 cetyl ether; POE (25) cetyl ether

**Classification:** Nonaromatic ether

**Definition:** PEG ether of cetyl alcohol

**Formula:** \( \text{CH}_3(\text{CH}_2)_{14}\text{CH}_2(\text{OCH}_2\text{CH}_2)_n\text{OH} \), avg. \( n = 25 \)

**Properties:** Nonionic

**Toxicology:** TSCA listed

**Uses:** Surfactant, emulsifier for pharmaceuticals

**Regulatory:** FDA 21CFR §176.200, 177.2800

**Manuf./Distrib.:** Aldrich [http://www.sigma-aldrich.com](http://www.sigma-aldrich.com); Fluka [http://www.sigma-aldrich.com](http://www.sigma-aldrich.com)
Ceteth-30
CAS 9004-95-9 (generic)
Synonyms: PEG-30 cetyl ether; POE (30) cetyl ether
Classification: Nonaromatic ether
Definition: PEG ether of cetyl alcohol
Formula: CH₃(CH₂)₁₄CH₂(OCH₂CH₂)nOH, avg. n = 30
Properties: Nonionic
Toxicology: TSCA listed
Uses: Emulsifier for pharmaceuticals
Regulatory: FDA 21CFR §176.200, 177.2800
Manuf./Distrib.: Aldrich http://www.sigma-aldrich.com; Fluka http://www.sigma-aldrich.com; Sigma http://www.sigma-aldrich.com/belgium
Trade Names: BC-30TX; Emalex 130

Ceteth-40
CAS 9004-95-9 (generic)
Synonyms: PEG-40 cetyl ether; POE (40) cetyl ether
Classification: Nonaromatic ether
Definition: PEG ether of cetyl alcohol
Formula: CH₃(CH₂)₁₄CH₂(OCH₂CH₂)nOH, avg. n = 40
Properties: Nonionic
Toxicology: LD₅₀ (oral, mouse) 2602 mg/kg; TSCA listed
Uses: Emulsifier for pharmaceuticals
Regulatory: FDA 21CFR §176.200
Manuf./Distrib.: Aldrich http://www.sigma-aldrich.com; Fluka http://www.sigma-aldrich.com; Sigma http://www.sigma-aldrich.com/belgium
Trade Names: BC-40TX

Ceteth-10 phosphate
CAS 50643-20-4
Synonyms: PEG-10 cetyl ether phosphate; POE (10) cetyl ether phosphate
Definition: Complex mixture of esters of phosphoric acid and a PEG ether of cetyl alcohol
Uses: Surfactant
Trade Names Containing: Crodafos CES

Ceteth-20 phosphate
Trade Names Containing: Crodafos CS20A

Cetethylidonium bromide
CAS 124-03-8; EINECS/ELINCS 204-672-8
Synonyms: Ammonium,
†=pharmaceutical grade
ethylhexadecyldimethyl-, bromide; CDA; Cetyl dimethylethyl ammonium bromide; Cetyl ethyl dimethylammonium bromide; Dimethyl ethyl hexadecyl ammonium bromide; Ethyl cetab; N-Ethyl-N,N-dimethyl-1-hexadecanaminium bromide; Ethylhexadecyldimethylammonium bromide; Hexadecylethylidimethylammonium bromide; Quaternium-17
Classification: Quaternary ammonium salt
Empirical: C₂₀H₄₄N • Br
Formula: C₁₆H₃₃(CH₃)₂H₅NBr
Properties: Wh. cryst. powd. or paste; sol. in water, alcohol; sl. sol. in chloroform, benzene, ether; m.w. 378.49; cationic
Toxicology: LD₅₀ (oral, rat) 500 mg/kg; poison by ing.; irritant; TSCA listed
Hazardous Decomp. Prods.: Heated to decomp., emits toxic fumes of NOₓ, NH₃, Br⁻
Storage: Store @ R.T.
Uses: Topical antiseptic; disinfectant for pharmaceuticals (germicidal cleansers, antiseptic shampoo and toothpaste, feminine hygiene prods.), veterinary and surgical instruments; veterinary disinfectant for treatment of cuts, wounds, skin infections
Regulatory: Canada DSL

Cetin. See Cetyl palmitate
Cetivamin. See L-Ascorbic acid
Cetolet-22
CAS 8065-81-4 (generic); 68920-66-1 (generic)
Synonyms: PEG-22 cetyl/oleyl ether; POE (22) cetyl/oleyl ether
Definition: PEG ether of cetyl alcohol and oleyl alcohol

Handbook of Pharmaceutical Additives, Third Edition
Chemical Component Cross-Reference

Formula: R(OCH2CH2)nOH, R rep. cetyl/oleyl radicals, avg. n = 22
Properties: Nonionic
Uses: Emulsifier for pharmaceuticals

Cetomacrogol. See Cetath
Cetomacrogol 1000. See Ceteth-20
Cetone V. See Allyl α-ionone
α-Cetone. See Methyl α-ionone; α-Iodomethylionone
β-Cetone. See Methyl β-ionone
Cetostearyl alcohol. See Cetearyl alcohol
Cetrimide. See Cetrimonium bromide

Cetrimonium bromide
CAS 57-09-0; EINECS/ELINCS 200-311-3
Synonyms: CETAB; Cetrime; Cetyltributylammonium bromide; CTAB; Hexadecyltrimethylammonium bromide; HTAB; Trimethylcetylmonium bromide; N,N,N-Trimethyl-1-hexadecanaminium bromide; Trimethylhexadecylammonium bromide
Classification: Quaternary ammonium salt
Empirical: C19H42BrN
Formula: CH3(CH2)15N(CH3)3Br
Properties: Wh. cryst. powd.; sol. in 10 parts water; sol. in oxygenated solvs., alcohol, chloroform; sparingly sol. in acetone; pract. insol. in ether, benzene; m.w. 364.46; m.p. > 230 C (dec.); cationic
Toxicology: LD50 (oral, rat) 410 mg/kg, (IV, rat) 44 mg/kg; poison by ing., IV, IP, and subcut. routes; harmful; skin and severe eye irritant; large systemic doses may cause nausea, vomiting, muscle paralysis, CNS depression, hypotension, local tissue damage; experimental teratogen, reproductive effects; TSCA listed
Precaution: Corrosive

Hazardous Decomp. Prods.: Heated to decomp., emits very toxic fumes of NH3, NOx, and Br-.
HMIS: Health 2, Flammability 0, Reactivity 0
Storage: Store @ R.T.
Uses: Surfactant for pharmaceuticals; topical antiseptic in higher concs., preservative in lower concs.
Regulatory: USP/NF compliance; USA EPA registered, Japan approved, Europe listed; Canada DSL

1-hexadecanaminium hydroxide, inner salt; (Carboxymethyl) hexadecylidimethylammonium hydroxide, inner salt; N,N-Dimethyl-N-hexadecylglycine; 1-Hexadecanaminium, N-(carboxymethyl)-N,N-dimethyl-, hydroxide, inner salt; Hexadecylbetaine

Classification: Zwitterion (inner salt)
Empirical: C20H41NO2
Properties: M.w. 327.62; amphoteric

Toxicology: LD50 (oral, rat) 1620 mg/kg, (IP, rat) 150 mg/kg; poison by IP route; mod. toxic by ing.; TSCA listed

Hazardous Decomp. Prods.: Heated to decomp., emits toxic vapors of NOx

Uses: Surfactant ingred. in microbiocide topicals

Regulatory: Canada DSL

Trade Names Containing: DeCONC HS-30

Cetyl DEA phosphate. See DEA-cetyl phosphate

Cetyl dimethicone

Classification: Dimethyl siloxane polymer
Formula: (CH3)3SiO-[CH2SiO(CH2)15CH3]x[CH2SiOCH3]y-Si(CH3)3
Properties: Nonionic
Uses: Emollient, spreading agent, pigment solubilizer/grinding aid/dispersant for antiperspirants

Trade Names: Abil®-Wax 9801; Abil®-Wax 9814

Cetyl dimethicone copolyol

Definition: Copolymer of cetyl dimethicone and dimethicone copolyol
Properties: Nonionic
Uses: Surfactant, emollient, emulsifier for pharmaceuticals, creams, lotions

Trade Names: Abil® EM 90
Trade Names Containing: Abil® WE 09

Cetyl dimethyl amine oxide. See Palmitamine oxide

Cetyl dimethyl benzyl ammonium chloride. See Cetalkonium chloride

Cetyl dimethylethyl ammonium bromide. See Cetethyldimonium bromide

Cetyl esters

CAS 8002-23-1; 136097-97-7
INS909

Synonyms: Cetyl esters wax; Spermaceti; Spermaceti synthetic; Spermaceti wax; Spermaceti wax, refined; Synthetic spermaceti; Synthetic spermaceti wax

Classification: Synthetic wax

†=pharmaceutical grade

Definition: A mixt. of sat. fatty alcohols (C14 to C18) and sat. fatty acids (C14 to C18)

Properties: Wh. to off. wh. translucent flakes, faint odor, bland mild taste; sol. in boiling alcohol, ether, chloroform; insol. in water; dens. 0.820; m.p. 43-47 C; acid no. 5 max.; iodine no. 1 max.; sapon. no. 109-120; nonionic

Toxicology: TSCA listed

Uses: Emollient, slip agent, stiffener, and visc. builder for pharmaceuticals, orals, topicals

Regulatory: FDA 21CFR §175.105, 175.300, 175.320, 177.1200; FDA approved for orals, topicals; USP/NF compliance; Canada DSL

Definition: Ester of cetyl alcohol and 2-ethylhexanoic acid
Empirical: C30H60O2
Formula: CH3(CH2)3CH(CH2CH3)COOCH2(CH2)14CH3
Properties: Clear liq.; m.w. 368.72
Toxicology: Primary irritant; TSCA listed
Uses: Emollient, skin softener, and moisture retention aid in topical pharmaceuticals, creams and lotions
Regulatory: Canada DSL
Manuf./Distrib.: A&E Connock
http://www.connock.co.uk; Sigma
http://www.sigma-aldrich.com/belgium; Yasho Ind.
http://www.yashoindustries.com
Trade Names: Exceparl HO; Hest CO; Tegosoft® CO
Trade Names Containing: Crodamol SCO; Super Refined® Crodamol SCO
## Cetyl palmitate

**CAS:** 540-10-3; EINECS/ELINCS: 208-736-6

**Synonyms:** Cetin; Hexadecanoic acid, hexadecyl ester; Hexadecyl hexadecanoate; n-Hexadecyl hexadecanoate; Hexadecyl palmitate; Palmitic acid, hexadecyl ester; Palmitic acid, n-hexadecyl ester; Palmitic acid palmityl ester; Palmityl palmitate

**Definition:** Ester of cetyl alcohol and palmitic acid

**Empirical:** C<sub>32</sub>H<sub>64</sub>O<sub>2</sub>

**Formula:** C<sub>15</sub>H<sub>31</sub>COOC<sub>16</sub>H<sub>33</sub>

**Properties:** Wh. cryst. waxy solid; sol. in abs. alcohol, ether, oxygenated solvs.; pract. insol. in water; m.w. 480.86; dens. 0.832; m.p. 50 C; b.p. 360 C; acid no. max.; iodine no. 5 max.; sapon. no. 110-130; ref. index 1.4398; nonionic

**Toxicology:** Skin irritant; may cause eye irritation; may be harmful by ing., inh., skin absorp.; TSCA listed

**Precaution:** Combustible; incompat. with strong oxidizing agents

**Hazardous Decomp. Prods.:** Toxic fumes of CO, CO<sub>2</sub>; heated to decomp., emits acrid smoke and irritating vapors; emits toxic fumes under fire conditions

**HMIS:** Health 1, Flammability 0, Reactivity 0

**Storage:** Store @ 2-8 C in cool, dry place; keep tightly closed

**Uses:** Excipient, emollient, thickener, visc. builder, consistency agent, ointment base for pharmaceuticals, topicals

**Regulatory:** USP/NF, BP, EP compliance; FDA approved for topicals; Canada DSL

## Cetyl phosphate

**CAS:** 3539-43-3; EINECS/ELINCS: 222-581-1

**Synonyms:** 1-Hexadecanol, dihydrogen phosphate; Hexadecyl dihydrogen phosphate; Hexadecyl phosphate

**Classification:** Organic phosphate ester

**Definition:** Mixt. of esters of phosphoric acid and cetyl alcohol

**Empirical:** C<sub>16</sub>H<sub>35</sub>O<sub>4</sub>P

**Properties:** Anionic

**Toxicology:** TSCA listed

**Uses:** Emulsifier

**Regulatory:** Canada DSL

**Trade Names:** Amphisol® A

**Trade Names Containing:** Crodacos CP-50

## Cetyl poly (oxyethylene) ether

See Ceteth

## Cetylpyridinium chloride

**CAS:** 123-03-5 (anhyd.); 6004-24-6 (monohydrate); EINECS/ELINCS: 204-593-9

**UN 2811 (DOT)**

**Synonyms:** 1-Cetylpyridinium chloride; N-Cetylpyridinium chloride; CPC; Hexadecylypyridinium chloride; 1-Hexadecylypyridinium chloride; n-Hexadecylypyridinium chloride

**Classification:** Quaternary ammonium salt

**Empirical:** C<sub>21</sub>H<sub>38</sub>CIN; C<sub>21</sub>H<sub>38</sub>CIN • H<sub>2</sub>O

**Formula:** C<sub>21</sub>H<sub>38</sub>CIN (anhyd.); C<sub>21</sub>H<sub>38</sub>CIN • H<sub>2</sub>O

**Handbook of Pharmaceutical Additives, Third Edition**

**1089**

**Properties:**
- Wh. powd.; sol. in water, alcohol, chloroform, oxygenated and chlorinated solvs.; m.w. 339.99 (anhyd.), 358.01 (monohydrate); m.p. 77-83 C; cationic

**Toxicology:**
- LD50 (oral, rat) 200 mg/kg, (IV, rat) 20 mg/kg, (IP, rat) 6 mg/kg; poison by ing., IP, subcut., IV routes; mod. toxic by skin contact; skin and eye irritant; TSCA listed

**Hazardous Decomp. Prods.:**
- Heated to decomp., emits very toxic fumes of NOx and Cl-

**HMIS:**
- Health 2, Flammability 1, Reactivity 1

**Storage:**
- Store @ R.T.

**Uses:**
- Antimicrobial, preservative, wetting agent, solubilizer in pharmaceuticals, orals, inhalants, emulsions, cough syrups, lozenges, topical sol'n's.; topical antiseptic in oral rinse and hemorrhoidal prods.

**Use Level:**
- 0.1%

**Regulatory:**
- U.S. not restricted; Japan not approved, Europe listed; FDA approved for inhalants, orals; USP/NF, BP, EP compliance; Canada DSL

Chamomile (Anthemis nobilis) extract
CAS 84649-86-5; 8015-92-7; EINECS/ELINCS 283-467-5
FEMA 2274

Synonyms: Anthemis nobilis; Anthemis nobilis extract; Camomile extract; Chamomile, English, extract; Chamomile extract; Chamomile flower extract; Chamomile, Roman, extract; English chamomile extract; Roman chamomile extract

Definition: Extract of flowers of Anthemis nobilis
Properties: Cl. amber liq.; sol. in cold water
Toxicology: Irritating to eyes, skin, respiratory and GI tract
Precaution: Reactive with oxidizing agents; do not breathe gas, fumes, vapor, spray; wear splash goggles, lab coat, and vapor respirator

HMIS: Health 2, Flammability 1, Reactivity 0
Storage: Keep container tightly closed in a cool, well-ventilated area
Uses: Natural flavor for pharmaceuticals
Regulatory: BP, EP compliance; FDA 21 CFR §182.20, GRAS; FEMA GRAS; DSL listed
Manuf./Distrib.: Bell Flavors & Fragrances http://www.belfff.com; Bio-Botanica http://www.bio-botanica.com; Citrus and Allied Essences

†=pharmaceutical grade

http://www.citrusandallied.com; Frutarom http://www.frutarom.com

Chamomile, English, extract; Chamomile extract. See Chamomile (Anthemis nobilis) extract
Chamomile extract, German; Chamomile extract Hungarian. See Matricaria (Chamomilla recutita) extract
Chamomile flower extract; Chamomile, Roman, extract. See Chamomile (Anthemis nobilis) extract
Chamomilla recutita; Chamomilla recutita extract. See Matricaria (Chamomilla recutita) extract
Charcoal. See Charcoal, activated
Charcoal, activated
CAS 16291-96-6
UN 1362
Synonyms: Activated charcoal; Charcoal
Definition: The residue from the destructive distillation of various org. materials (wood and vegetables), treated to increase its adsorptive power
Empirical: C
Properties: Blk. fine powd. free from gritty matter; odorless; tasteless; at.wt. 12.01
Precaution: DOT: Spontaneously combustible material
Uses: Adsorbent, deodorizing agent for pharmaceuticals, antidiarrheal prods.; antidote for poison treatment; refining of pharmaceutical chems.
Regulatory: USP/NF, BP, EP compliance; Canada DSL

See also Carbon, activated

Chavicol methyl ether; Chavicyl methyl ether. See Estragole

Checkerberry extract. See Wintergreen (Gaultheria procumbens) extract
Checkerberry oil. See Wintergreen (Gaultheria procumbens) oil

Chemical mace. See Chloroacetophenone

Cherry butyrate. See Isoamyl-2-methylbutyrate

Cherry juice
CAS 8012-99-5
Cherry laurel oil. See Cherry laurel (Prunus laurocerasus) oil

Cherry laurel (Prunus laurocerasus) oil
CAS 8000-44-0
FEMA 2277
Synonyms: Cherry laurel oil; Prunus laurocerasus; Prunus laurocerasus oil
Definition: Volatile oil derived from leaves of Prunus laurocerasus, contg. HCN, benzaldehyde, etc.
Properties: Colorless to pale yel. liq., odor and taste similar to bitter almond oil; sol. in 2 vols 70% alcohol, in benzene, chloroform, ether; sl. sol. in water; dens. 1.054-1.066 (20/20 C)
Toxicology: Very poisonous; contains hydrogen cyanide (very toxic)
Hazardous Decomp. Prods.: Heated to decomp., emits toxic fumes of CN–
Storage: Keep cool, well closed; protect from light
Uses: Natural flavor for pharmaceuticals
Regulatory: FDA 21CFR §172.510; FEMA GRAS; Japan approved; Canada DSL
Manuf./Distrib.: Carrubba
http://www.carrubba.com

Cherry pit extract
CAS 977038-54-2; 8000-44-0
FEMA 2278
Synonyms: Cherry pit oil extract; Cherry pits, extract; Prunus avium; Prunus cerasus
Definition: Extract derived from Prunus avium (sweet cherry) or P. cerasus (sour cherry)
Uses: Natural flavor for pharmaceuticals
Regulatory: FDA 21CFR §172.510; FEMA GRAS

Cherry pit oil extract; Cherry pits, extract.
See Cherry pit extract

Chervil. See Chervil (Anthriscus cerefolium)

Chervil (Anthriscus cerefolium)
CAS 1338-80-3
FEMA 2279
Synonyms: Anthriscus cerefolium; Chervil
Definition: Derived from Anthriscus cerefolium
Properties: Sweet and aromatic
Uses: Natural flavor for pharmaceuticals
Regulatory: FDA 21CFR §101.22, 182.10, GRAS; FEMA GRAS; Japan approved

Chicory (Cichorium intybus) extract
CAS 68650-43-1; EINECS/ELINCS 272-045-6
FEMA 2280
Synonyms: Cichorium intybus extract; Chicory extract; Cichorium intybus
Definition: Extract of roots of the chicory, Cichorium intybus
Properties: Bitter tonic flavor
Toxicology: TDLo (oral, rat) 600 mg/kg; TSCA listed
Uses: Natural flavor for pharmaceuticals
Regulatory: FDA 21CFR §182.20, GRAS; FEMA GRAS; Japan restricted
Manuf./Distrib.: Bio-Botanica http://www.biobotanica.com; Frutarom http://www.frutarom.com

Chicory extract. See Chicory (Cichorium intybus) extract

Chile saltpeter. See Sodium nitrate

Chimyl alcohol
CAS 506-03-6; EINECS/ELINCS 208-026-6
Synonyms: 3-(Hexadecyloxy)-1,2-propanediol; Monocetyl glyceryl ether
Classification: Organic compd.
Empirical: C₁₉H₄₀O₃
Formula: CH₃(CH₂)₁₅OCH₂CHOHCH₂OH
Properties: Nonionic
Uses: Emulsifier, hydrotrope, emollient, emulsion thickener for pharmaceuticals
Trade Names: Chimyl Alcohol 100

China bark extract. See Quillaja (Quillaja saponaria)
China clay. See Kaolin
Chinaldine. See Quinaldine
China oil. See Balsam Peru (Myroxylon pereirae)

Chinese bean oil. See Soybean (Glycine soja) oil

Chinese blue. See Ferric ferrocyanide

Chinese cinnamon. See Cinnamon (Cinnamomum cassia)

Chinese cinnamon leaf oil. See Cinnamon (Cinnamomum zeylanicum) leaf oil

Chinese cinnamon oil. See Cinnamon (Cinnamomum cassia) oil

Chinese ginger. See Galanga
Chinese isinglass. See Agar
Chinese seasoning. See MSG
Chinese white. See Zinc oxide

Chinoleine; Chinolin; Chinoline. See Quinoline

Chinese w. See Zinc oxide

Chinoleine

Chinosol. See 8-Hydroxyquinoline sulfate
Chitin

CAS 1398-61-4; EINECS/ELINCS 215-744-3

**Synonyms:** N-[2-(5-Acetylamino-4,6-dihydroxy-2-hydroxymethyl-tetrahydropyran-3-xyloxy)-4,5-β-Chitin; Poly (N-acetyl-D-glucosamine)

**Classification:** Biopolymer

**Definition:** Glucosamine polysaccharide; consists chiefly of N-acetyl-D-glucosamine residues; found in yeasts, fungi, marine invertebrates and arthropods

**Empirical:** (C8H13NO5)n

**Properties:** Wh., amorphous, semitransparent mass; sol. in conc. HCl, H2SO4; insol. in the common solvs.; m.w. ≈ 400,000

**Toxicology:** LD50 (IV, rat) 50 mg/kg

**Storage:** Hygroscopic

**Uses:** Biological research; source of chitosan; biological additive

**Regulatory:** Japan approved

Chittembark. See Cascara (Rhamnus purshiana) extract

Chloracetamide. See Chloroacetamide

Chloracetic chlroide. See Chloracetyl chloride

Chloracetophenone. See Chloroacetophenone

Chloracetyl chloride
CAS 79-04-9
UN 1752
Synonyms: CAC; Chloracetic chlroide; Chloroacetic acid chloride; Chloroacetamide; Monochloroacetyl chloride
Empirical: C₂H₂Cl₂O
Formula: ClCH₂COCl
Properties: Colorless to sl. yel. liq.; strong pungent odor; insol. in water, dec.; m.w. 112.94; sp.gr. 1.41; dens. 11.7 lb/gal; vapor pressure 19 mm Hg (20 C); f.p. -22 C; b.p. 106 C; flash pt. none
Toxicology: NIOSH REL TWA 0.05 ppm; toxic; corrosive; may cause eye irritation/damage, severe skin burns; ing. of lg. amts. can be fatal; inh. may irritate respiratory tract, nasal passages, lungs; may cause coughing, wheezing, dyspnea; lachrymator
Environmental: Toxic to animals incl. fish; keep away from sewers and all water resources
Precaution: Dec. in water to form monochloracetic acid and hydrochloric acid; incompat. with water, alcohols, bases, metals (corrosive), amines
Storage: Moisture-sensitive
Uses: Solvent in synthesis of pharmaceuticals
Regulatory: Canada DSL

Chlorhexidine acetate. See Chlorhexidine diacetate

Chlorhexidine diacetate
CAS 56-95-1; EINECS/ELINCS 200-302-4
Synonyms: 1,6-Bis (5-(p-chlorophenyl) biguanidino) hexane diacetate; Chlorhexidine acetate; 1,6-Di (4'-chlorophenylbiguanidino) hexane diacetate; 1,1´-Hexamethylene bis [5-(4-chlorophenyl) biguanide] diacetate; 1,1´-Hexamethylenebis (5-(p-chlorophenyl) biguanide) diacetate
Definition: Salt of chlorhexidine and acetic acid
Formula: C₂₂H₂₆Cl₂N₁₀ • 2C₂H₄O₂
Properties: Crystals; sol. 1.5 g in 100 ml water; sol. in alcohols, glycerol, propylene glycol, polyethylene glycols; m.w. 643.56; m.p. 154-156 C (dec.)
Toxicology: LD₅₀ (oral, mouse) 2 g/kg, (IP, mouse) 38 mg/kg, (subcut., mouse) 325 mg/kg, (IV, mouse) 25 mg/kg; poison by subcut., IV, IP routes; mod. toxic by ing., skin irritant
Hazardous Decomp. Prods.: Heated to decomp., emits toxic fumes of Cl– and NOₓ
Regulatory: BP, EP compliance; Canada DSL
Manuf./Distrib.: Alfa Chem† http://www.alfachem1.com; Fluka
Chemical Component Cross-Reference

Chlorhexidine digluconate
CAS 18472-51-0; 14007-07-9; EINECS/ELINCS 242-354-0
Synonyms: Biguanide, 1,1´-hexamethyenebis (5-(p-chlorophenyl))-, digluconate; 1,6-Bis (5-(p-chlorophenyl)) biguanido) hexane digluconate; N,N´-Bis (4-chlorophenyl)-3,12-dimino-2,4,11,13-tetraazatetradecane-diimidamide compd. with D-gluconic acid; Chlorhexidine gluconate; D-Gluconic acid, compd. with N,N´´-bis (4-chlorophenyl)-3,12-diimino-2,4,11,13-tetraazatetradecanediimidamide (2:1); 1,1´-Hexamethyenebis (5-(p-chlorophenyl) biguanide) digluconate
Definition: Salt of chlorhexidine and gluconic acid
Formula: C\textsubscript{22}H\textsubscript{30}Cl\textsubscript{2}N\textsubscript{10} • 2C\textsubscript{6}H\textsubscript{12}O\textsubscript{7}
Properties: Sol. > 50% in water; m.w. 897.76
Toxicology: LD\textsubscript{50} (oral, rat) 2 g/kg, (subcut., rat) 3320 mg/kg, (IV, rat) 24,200 μg/kg; poison by IV route; mod. toxic by ing. and subcut. routes; may cause contact dermatitis; mutagenic data; TSCA listed
Hazardous Decomp. Prods.: Heated to decomp., emits very toxic fumes of NO\textsubscript{x} and Cl\textsuperscript{−}
HMIS: Health 2, Flammability 0, Reactivity 0
Storage: Light-sensitive
Uses: Preservative, bactericide, topical antiseptic, antimicrobial in pharmaceuticals, mouthwashes, feminine hygiene sprays, surgical scrubs/wipes/lubricants, antiplaque dental prods.; skin sterilizing agent
Use Level: 0.01-0.1%
Regulatory: Japan approved; Europe listed; BP, EP compliance; Canada DSL

Chlorhexidine digluconate

Chloroacetamide
CAS 79-07-2; EINECS/ELINCS 201-174-2
Synonyms: Acetamide, 2-chloro-; Chloracetamide; 2-Chloroacetamide; α-Chloroacetamide; 2-Chloroethanamide
Classification: Chlorinated compd.
Empirical: C₂H₄ClNO
Formula: ClCH₂CONH₂
Properties: Colorless to pale yel. cryst.; sol. in water, alcohol; insol. in ether; m.w. 93.51; m.p. 116-118 C; b.p. 220 C (dec.)
Toxicology: LD₅₀ (oral, rat) 70 mg/kg, (IP, mouse) 100 mg/kg, (IV, mouse) 180 mg/kg; poison by ing., IV, IP routes; strong eye/tissue irritant; lachrymator; human systemic effects by inh. (lacrimation, conjunctiva irritation, cough, dyspnea); questionable carcinogen; tumorigen; mutagen; TSCA listed
Hazardous Decomp. Prods.: Heated to decomp., emits very toxic Cl⁻ and NOₓ
Uses: Antimicrobial, preservative for pharmaceuticals, topicals (in Europe)
Regulatory: FDA 21CFR §175.105, 176.170; U.S. EPA registered; Europe listed; not registered or approved for use in the U.S. (pharmaceuticals); Canada DSL

2-Chloroacetamide; α-Chloroacetamide. See Chloroacetamide

Chloroacetic acid chloride. See Chloracetyl chloride

Chloroacetophenone
CAS 532-27-4; EINECS/ELINCS 208-531-1
UN 1697 (DOT)
Synonyms: CAF; CAP; Chemical mace; Chloracetophenone; 2-Chloroacetophenone; α-Chloroacetophenone; Chloromethyl phenyl ketone; 2-Chloro-1-phenylethanone; Mace; Phenaclyl chloride; Phenylchloromethylketone
Empirical: C₈H₇ClO
Formula: C₆H₅COCH₂Cl
Properties: Wh. cryst., floral odor; sol. in oxygenated/aromatic solvs., acetone, benzene; insol. in water; m.w. 154.60; dens. 1.324; m.p. 54-56 C; b.p. 244-245 C
Toxicology: ACGIH TLV/TWA 0.05 ppm; LD₅₀ (oral, rat) 127 mg/kg, (IP, rat) 36 mg/kg, (IV, mouse) 81 mg/kg; human poison by inh.; experimental poison by ing., inh., IP, IV routes; strong eye/tissue irritant; lachrymator; human systemic effects by inh. (lacrimation, conjunctiva irritation, cough, dyspnea); questionable carcinogen; tumorigen; mutagen; TSCA listed
Hazardous Decomp. Prods.: Heated to decomp., emits very toxic fumes of Cl⁻
NFPA: Health 2, Flammability 1, Reactivity 0
Uses: Pharmaceutical intermediate
Regulatory: HAP

2-Chloroaniline. See o-Chloroaniline
3-Chloroaniline; Chloro-3-aniline. See m-Chloroaniline
4-Chloroaniline. See p-Chloroaniline
m-Chloroaniline

CAS 108-42-9; EINECS/ELINCS 203-581-0
UN 2018; UN 2019

Synonyms: 1-Amino-3-chlorobenzene; 3-Amino-1-chlorobenzene; m-Aminochlorobenzene; m-Chloraniline; 3-Chloroaniline; Chloro-3-aniline; 3-Chlorobenzenamine; 3-Chlorophenylamine; m-Chlorophenylamine

Classification: Halogenated aromatic amine
Empirical: C₆H₆ClN
Formula: CIC₆H₄NH₂

Properties: Colorless to lt. amber liq.; very sol. in ethanol, acetone, benzene, diethyl ether; sol. in CCl₄, most common org. solvs.; insol. in water; m.w. 127.57; dens. 1.206; m.p. -11 to -9 C; b.p. 95-96 C (11 mm); flash pt. (CC) 123 C; ref. index 1.5940

Toxicology: LD₅₀ (oral, rat) 256 mg/kg, (skin, rat) 250 mg/kg; LC₅₀ (inh., mouse, 4 h) 550 mg/m³; highly toxic; poison by ing., skin contact, subcut., and IV routes; eye irritant; readily absorbed through skin; sensitizer; target organ: blood; tumorigen; mutagen; TSCA listed

Hazardous Decomp. Prods.: CO, CO₂, hydrogen chloride gas, phosgene; heated to decomp., emits toxic fumes of Cl⁻ and NOₓ

Storage: Keep tightly closed; sensitive to light and air; tends to darken on storage

Uses: Pharmaceutical intermediate
Regulatory: Canada DSL

p-Chloroaniline

CAS 106-47-8; EINECS/ELINCS 203-401-0
UN 2018; UN 2019

Synonyms: 1-Amino-4-chlorobenzene; 4-Amino-1-chlorobenzene; p-Aminochlorobenzene; p-Chloraniline; 4-Chloroaniline; 4-Chlorobenzenamine; p-Chlorobenzenamine; 4-Chlorophenylamine

Classification: Substituted aniline
Empirical: C₆H₆ClN
Formula: CIC₆H₄NH₂

Properties: Wh. or pale yel. solid; sl. sweetish char. amine odor; freely sol. in ethanol, diethyl ether, acetone, CS₂; sol. in hot water, other org. solvs.; insol. in water; m.w. 127.57; m.p. 68-71 C; b.p. 232 C; flash pt. (CC) > 188 C

Toxicology: LD₅₀ (oral, rat) 300 mg/kg, (skin, rat) 3200 mg/kg, (IP, rat) 420 mg/kg; LDLo (subcut., cat) 125 mg/kg; poison by inh., ing., skin contact, subcut., IV routes; mod. toxic by inh., IP; skin and severe eye irritant; readily absorbed through skin; target organ: blood; confirmed carcinogen; tumorigen; mutagen; TSCA listed

Hazardous Decomp. Prods.: CO, CO₂, hydrogen chloride gas, phosgene; heated to decomp., emits toxic fumes of Cl⁻ and NOₓ

Storage: Keep tightly closed; sens. to light and air; tends to darken on storage

Uses: Pharmaceutical intermediate
Regulatory: Canada DSL

### Chlorobenzene

**CAS:** 108-90-7; EINECS/ELINCS 203-628-5  
**UN 1134 (DOT)**

**Synonyms:** Benzene chloride; Benzene monochloride; Chlorobenzene; Chlorobenzol; Chlorobenzol; MCB; Monochlorobenzene; Monochlorobenzene; Phenyl chloride  
**Classification:** Halogenated aromatic hydrocarbon  
**Empirical Formula:** C₇H₅Cl  
**Properties:** Clear volatile liq., faint almond-like not unpleasant odor; sol. in alcohol, benzene, chloroform, ether; misc. with most org. solvs.; insol. in water; m.w. 112.50; sp.gr. 1.105; vapor pressure 10 mm Hg (22.2°C); m.p. -45°C; b.p. 131.6°C; flash pt. (CC) 29.4°C; ref. vapor pressure 10 mm Hg (22.2°C); m.p. -45°C; b.p. 131.6°C; flash pt. (CC) 29.4°C; ref. index 1.5  
**Toxicology:** ACGIH TLV/TWA 10 ppm; LD50 (oral, rat) 2910 mg/kg; toxic; poison by ing., mod. toxic by IP route; strong narcotic; inh. causes CNS depression, headaches, nausea, dizziness, drowsiness, confusion, experimental teratogen, reproductive effects; mutagenic data; may cause kidney/liver damage; TSCA listed  
**Precaution:** Flamm.; moderate fire risk; explosive limits 1.8-9.6% in air; incompat. with oxidizers, nitric acid, sodium, dimethyl sulfoxide, silver perchlorate; fire/explosion risk; potential violent reactions  
**NFPA:** Health 2, Flammability 3, Reactivity 0  
**Storage:** Store in cool, dry, well-ventilated area, out of direct sunlight, away from heat/ignition sources, away from corrosives  
**Uses:** Solvent in pharmaceuticals  
**Regulatory:** FDA 21CFR §175.105, 177.1580, 177.1655; SARA reportable; HAP; Canada DSL  
**Manuf./Distrib.:** Aarti Ind. Ltd

### Chlorobutanol

**CAS:** 57-15-8; EINECS/ELINCS 200-317-6  
**Synonyms:** Acetone chloroform; Anhydrous chlorobutanol; Chlorbutanol; Chlorbuto; Chlore; Chlorbut; t-Trichloro-t-buty alcohol; Trichloro-t-butyl alcohol; t-Trichlorobutyl alcohol; 1,1,1-Trichloro-2-methyl-2-propanol  
**Empirical Formula:** C₄H₇Cl₃O  
**Formula:** C₃Cl₃(CH₃)₂OH  
**Properties:** Colorless to wh. cryst., camphoraceous odor; sol. in chloroform, ether, volatile oils; sl. sol. in water; m.w. 177.46; m.p. 76 C; b.p. 167 C  
**Toxicology:** LDLo (oral, rabbit) 213 mg/kg; poison by ing.; narcotic; CNS depressant; hypersensitivity and toxic reactions have occurred; skin and eye irritant; mutagenic data; TSCA listed  
**Precaution:** Combustible exposed to heat or flame; unstable in alkali; can react with oxidizing materials  
**Hazardous Decomp. Prods.:** Heated to decom., emits toxic fumes of Cl⁻  
**HMIS:** Health 2, Flammability 1, Reactivity 1  
**Uses:** Antimicrobial, preservative, antiseptic for pharmaceuticals, biological fluids and sol'n's., parenterals, ophthalmics, topicals, otics, inhalants; anesthetic in dentistry; mild sedative; topical analgesic  
**Use Level:** 0.0001-0.5% (parenterals); 0.2-0.65% (ophthalmics)  
**Regulatory:** USA EPA registered; Europe listed; FDA approved for injectables, inhalants, nasals, ophthalmics, otics, topicals; USP/NF, BP, EP compliance; Canada DSL

Chlorobutanol hemihydrate
CAS 6001-64-5; EINECS/ELINCS 200-317-6
Synonyms: Acetone chloroform, β,β,β-Trichloro-t-butyl alcohol; 1,1,1-Trichloro-2-methyl-2-propanol hemihydrate
Empirical: C₆H₇ClO •½H₂O
Formula: Cl₃CC(CH₃)₂OH •½H₂O
Properties: M.w. 186.46
Uses: Antimicrobial, preservative for pharmaceuticals, intramuscular injectables
Regulatory: FDA approved for injectables; BP, EP, NF compliance

6-Chloro-2-(6-chloro-4-methyl-3-oxobenzo [b] thien-2(3H)-ylidene)-4-methylbenzo [b] thiophen-3(2H)-one. See D&C Red No. 30; CI 73360; Vat red 1

Chlorocresol; 4-Chloro-m-cresol; p-Chlorocresol. See p-Chloro-m-cresol
p-Chloro-m-cresol
CAS 59-50-7; EINECS/ELINCS 200-431-6
UN 2669 (DOT)
Synonyms: p-Chlor-m-cresol; Chlorocresol; 4-Chloro-m-cresol; p-Chlorocresol; 2-Chlorohydroxytoluene; 2-Chloro-5-hydroxytoluene; 4-Chloro-3-methylphenol; 3-Methyl-4-chlorophenol; Parachlorometacresol; PCMC
Classification: Substituted phenol
Empirical: C₇H₇ClO
Properties: Colorless dimorphous cryst., mild phenolic odor; very sol. in org. solvs., alcohol; sol. in ether, fixed oils, hot water; m.w. 142.59; m.p. 65-68 C; b.p. 235 C

Toxicology: LD₅₀ (oral, rat) 1830 mg/kg, (subcut., rat) 400 mg/kg, (subcut., mouse) 350 mg/kg, (IV, mouse) 70 mg/kg; poison by IV, subcut, IP routes; mod. toxic by ing.; weak irritant; allergen; may produce digestive disturbances, nervous disorders, fainting, dizziness, mental changes, skin eruptions; skin and eye irritant; mutagenic data; TSCA listed
Precaution: Incompat. with sodium hydroxide
Hazardous Decomp. Prods.: Heated to decomp., emits toxic fumes of Cl– and phosgene
HMIS: Health 3, Flammability 1, Reactivity 1
Uses: Antimicrobial, preservative for pharmaceuticals, injectables (intravenous heparin prods.), topical creams and lotions, eye lotions, dentifrices, mouthwashes; antiseptic
Use Level: 0.1-0.15% (injectables), 0.075-0.12% (topicals)
Regulatory: FDA 21CFR §175.105, 176.200, 176.210, 178.3120; FDA approved for topicals; USP/NF, BP, EP compliance; Canada DSL

Chlorofluorocarbon 113. See Trichlorotrifluoroethane
Chloroform
CAS 67-66-3; EINECS/ELINCS 200-663-8
UN 1888 (DOT)
Synonyms: Formyl trichloride; Methane trichloride; Methane, trichloro-; Methenyl chloride; Methenyl trichloride; Methyl trichloride; Trichloroform; Trichloromethane
Classification: Halogenated aliphatic hydrocarbon
Empirical: CHCl3
Properties: Colorless clear mobile liq., ethereal odor, sweet burning taste; misc. with alcohol, benzene, hexane, acetone, diethyl ether, naphtha, fixed and volatile oils; sl. sol. in water; m.w. 119.38; sp.gr. 1.474-1.478; vapor pressure 197 mm Hg; m.p. -63 C; b.p. 61 C; flash pt. none; ref. index 1.4460
Toxicology: ACGIH TLV/TWA 10 ppm; LDLo (oral, human) 2514 mg/kg; human poison by ing., inh.; experimental poison by IV; mod. toxic by IP, subcut. routes; prolonged skin contact may produce irritation, burning; may be absorbed through skin; vapor may cause stinging of eyes; respiratory and skin allergies; inh. affects CNS, heart, liver, kidneys; poisonous in large doses; very high doses can cause severe narcosis, respiratory or heart failure, liver/ kidney damage; suspected carcinogen; TSCA listed
Environmental: VOC; ThOD 0.13
Precaution: DOT: Poisonous material; incompat. with strong bases, reactive metals, alkali metals, strong oxidizers, nitromethane, potassium t-butoxide; vigorous reactions, ignition, explosions possible
Hazardous Decomp. Prods.: Slowly decomp. to produce hydrogen chloride; reacts with oxidizers to form highly toxic phosgene gas and chlorine
NFPA: Health 2, Flammability 0, Reactivity 0
Storage: Store in cool, dry, well-ventilated area out of direct sunlight, away from corrosives; light-sensitive
Uses: Preservative, solvent for pharmaceuticals; extraction solvent for pharmaceuticals; flavor in aq. ('chloroform water'), alcoholic ('spirits'), and emulsion formulations; systemic anesthetic; drug intermediate and ingred.
Features: Sweet pleasant flavor
Regulatory: FDA 21CFR §175.105, 177.1580, 177.1585; SARA §302a extremely hazardous substance, §311/312 acute health/chronic health hazard, §313 reportable; Calif. Prop. 65 reportable; HAP; BP compliance; Canada DSL

2-Chloropyridine
CAS 109-09-1; EINECS/ELINCS 203-646-3
UN 2822 (DOT)
Synonyms: α-Chloropyridine; o-Chloropyridine; 2-CP
Empirical: CsH4ClN
Properties: Colorless oily liq. or cryst.; sol. in oxygenated solvs.; sol. 2.5 g/100 g water; m.w. 113.55; dens. 1.205 (15 C); vapor pressure 1 mm (13.3 C); m.p. 65 C; b.p. 168-170 C; ref. index 1.532
Toxicology: LD50 (oral, mouse) 110 mg/kg, (IP, mouse) 130 mg/kg, (skin, rabbit) 64 mg/kg; LCLo (inh., rat, 4 h) 100 ppm; poison by ing., inh., skin contact, IP routes; TSCA listed
Precaution: Combustible exposed to heat or flame; can react with oxidizers
Hazardous Decomp. Prods.: Heated to decomp., emits very toxic fumes of Cl–, NOx, and phosgene
Uses: Pharmaceutical intermediate; prod. of antihistamines

α-Chloropyridine; o-Chloropyridine. See 2-Chloropyridine

Chloropyriene. See Chlorothen

1-(4-Chloro-o-sulfo-5-tolylazo)-2-naphthol barium salt; 1-(4-Chloro-o-sulfo-5-tolylazo)-2-naphthol monobarium salt. See D&C Red No. 9

Chemical Component Cross-Reference

monosodium salt. See D&C Red No. 8
Chlorosulthiadil. See Hydrochlorothiazide
Chlorotetrahydroxy ((2-hydroxy-5-oxo-2-imidazolin-4-yl) ureato) dialuminum. See Alcloxa

Chlorothen
CAS 148-65-2
Synonyms: Chloromethaprylene; Chloropyrilene; 2-((5-Chloro-2-thenyl) (2-dimethylaminoethyl) amino) pyridine; Chlorothenylpyramine; N,N-Dimethyl-N’-(2-pyridyl)-N’-(5-chloro-2-thenyl) ethylenediamine
Empirical: C14H18ClN3S
Properties: Sol. in water; insol. in ether, chloroform, benzene; m.w. 295.85; b.p. 155-156 C (10 mm)
Toxicology: LD50 (IP, mouse) 105 mg/kg; poison by IP route
Hazardous Decomp. Prods.: Heated to decomp., emits very toxic fumes of Cl–, NOx, SOx
Uses: Pharmaceutical orals
Regulatory: Approved for orals

Chlorothene
6-Chlorothymol. See Chlorothymol

Chlorotrifluoromethane
CAS 75-72-9; EINECS/ELINCS 200-894-4
UN 1022 (DOT)
Synonyms: CFC 13; Freon 13; Monochlorotrifluoromethane; R 13; Trifluorochloromethane; Trifluoromethyl chloride; Trifluoromonochlorocarbon
Empirical: CCIF3
Formula: CF3Cl
Properties: Colorless liquefied gas; ethereal odor; m.w. 104.5; sp.gr. 0.9224; vapor pressure 27,100 mm Hg; f.p. -181 C; b.p. -81.4 C; ref. index 1.199; surf. tens. 0.574 dynes/cm; dielec. const. 2.32; nonflamm.
Toxicology: Toxic by inhalation, sl. irritant; avoid contact and inh.; narcotic in high concs.; target organ: heart; TSCA listed
Environmental: VOC
Precaution: Violent reaction with Al
Hazardous Decomp. Prods.: Heated to decomp., emits highly toxic fumes of F– and Cl–
Uses: Pharmaceutical processing
Regulatory: Canada DSL

Chlorotriphenylsilane
CAS 76-86-8; EINECS/ELINCS 200-989-0
Synonyms: Triphenylchlorosilane; Triphenylsily chloride
Classification: Silane
Empirical: C15H15ClSi
Properties: Ylsh. cryst.; pungent odor; m.w. 294.86; m.p. 88-91 C; b.p. 378 C; flash pt. > 200 C
Toxicology: LD50 (IV, mouse) 56 mg/kg; corrosive; causes burns; skin and eye irritant; TSCA listed
Precaution: Flamm.; incompat. with strong
### Chloroxylenol

**CAS** 88-04-0; EINECS/ELINCS 201-793-8  
**Synonyms:** Benzytol; 4-Chloro-3,5-dimethylphenol; 2-Chloro-5-hydroxy-m-xylene; 4-Chloro-3,5-xyleneol; p-Chloro-m-xyleneol; Parachlorophenol; PCMX  
**Classification:** Organic compd.  
**Empirical:** C8H9ClO  
**Formula:** C8H9ClO \(\cdot\) (dimethylamino)ethyl\]benzyl\]pyridine  
**Synonyms:** 2-(p-Chloro-a-[2-((dimethylamino)ethyl]benzyl]pyridine maleate; 2-Pyridinepropanamine,γ-(4-chlorophenyl)-N,N-dimethyl-, (2)-2-butenedioate(1:1) (9CI)  
**Formula:** C16H19ClN2•C4H4O4  
**Properties:** Solid; m.w. 390.9; sol. in cold water; m.p. 132.5 C; noncorrosive  
**Toxicology:** Very hazardous by ing.; sl. hazardous by skin contact  
**Precaution:** Wear splash goggles, lab coat, dust respirator, gloves  
**HMIS:** Health 2, Flammability 1, Reactivity 0  
**Storage:** Store in a tightly closed container in a cool, well-ventilated place away from extreme heat and strong oxidizers  
**Uses:** Antihistamine  
**Manuf./Distrib.:** Sciencelab  
http://www.sciencelab.com  
**Trade Names Containing:** MicroMask™  
Chlorpheniramine Maleate 10%  

### Chlorothymol

**See Chlorothymol**  

### Cholecalciferol

**CAS** 67-97-0; EINECS/ELINCS 200-673-2  
**Synonyms:** Calcio; 5,7-Cholesten-3-β-ol; 7-Dehydrocholesterol; 9,10-Secocholestra-5,7,10(19)-trien-3-ol, (3β,5z,7E)-; 9,10-Seco(5Z,7E)-5,7,10(19)-cholestratrien-3-ol; Vitamin D \(\beta\)  
**Classification:** Organic compd.; sterol; vitamin  
**Empirical:** C27H44O  
**Properties:** Colorless to wh. cryst., odorless; unstable in light and air; sol. in acetone, alcohol, chloroform, fatty oils; insol. in water; m.w. 384.71; m.p. 84-88 C
### Chemical Component Cross-Reference

**Toxicology:** LD50 (oral, rat) 42 mg/kg; poison by ing.; experimental teratogen; TSCA listed

**Precaution:** Affected by air and light

**Hazardous Decomp. Prods.:** Heated to decomp., emits acrid smoke and irritating fumes

**Uses:** Nutrient; pharmaceutical ingred.; medicine (antirachitic vitamin); mfg. of human and veterinary specialties for oral and parenteral use

**Regulatory:** FDA 21CFR §107.10, 166.110, 184.1950, GRAS; Japan approved; BP, EP compliance; Canada DSL

**Manuf./Distrib.:**

**Trade Names Containing:**
- Dry Vitamin D3 Type 100 SD; Liquid Vitamin D3; Vitamin A Acetate/D3; Vitamin A and D-3 Blend

### Toxicology

**Vitamin D3 100**

**Vitamin D3 100 HP; Vitamin D3 850**

**5,7-Cholestadien-3-β-ol. See Cholecalciferol**

**Cholesten-5-en-3-β-ol; 5-Cholesten-3-β-ol:**
- Cholesteric esters; Cholesterin. **See Cholesterol**

### Cholesterol

**CAS 57-88-5; EINECS/ELINCS 200-353-2**

**Synonyms:** Cholesten-5-en-3-β-ol; 5-Cholesten-3-β-ol; Cholesteric esters; Cholesterin; Cholesterly alcohol; 3-β-Hydroxycholestr-5-ene

**Classification:** Steroid alcohol

**Definition:** Mono-unsaturated sec. alcohol of the cyclopentenophenanthrene system

**Empirical:** C27H46O

**Formula:** C27H46O

**Properties:** Wh. or faintly yel. pearly granules or crystals, almost odorless; yel. to tan color on prolonged exposure to light; sol. in ethers, acetone, chloroform, dioxane, ethyl acetate, hexane, benzene, petrol. ether, oils, fats; sl. sol. in water, alcohol; m.w. 386.67; dens. 1.067; m.p. 148.5 C; b.p. 360 C (dec.)

**Toxicology:** TDL0 (oral, rabbit) 2100 mg/kg, (IP, rat) 800 mg/kg; questionable carcinogen; mutagen; reproductive effector; TSCA listed

**HMIS:** Health 2, Flammability 1, Reactivity 0

**Storage:** Light-sensitive; refrigerate

**Uses:** Emulsifier, solubilizer, moisturizer, emollient, film-former in pharmaceuticals, ophthalmics, topicals; carrier for nutrients in skin care

**Regulatory:** Japan approved; approved for ophthalmics, topicals; USP/NF, BP, EP compliance; Canada DSL

Chemical Component Cross-Reference

†=pharmaceutical grade

http://www.sigma-aldrich.com/belgium
Trade Names: Nofable CO-90; Nofable CO-99

Choleth-24
CAS 27321-96-6 (generic)
Synonyms: PEG-24 cholesteryl ether; POE (24) cholesteryl ether
Definition: PEG ether of cholesterol with avg. ethoxylate value of 24
Properties: HLB 14.0; nonionic
Toxicology: TSCA listed
Uses: Emulsifier, solubilizer, dispersant, thickener for pharmaceuticals, topicalcs, creams and lotions
Regulatory: Approved for topicals
Trade Names Containing: Forlan C-24

Cholic acid, monosodium salt; Cholic acid sodium salt. See Ox bile extract

Choline alfloscerate. See Glycerophosphocholine

Choline bitartrate
CAS 87-67-2
INS1001(v)

Synonyms: Choline hydrogen tartrate; Choline tartrate; Choline, tartrate (1:1) salt;
Ethanaminium, 2-hydroxy-N,N,N-trimethyl-, salt with (R-(R+)-)-2,3-dihydroxybutanedioic acid (1:1);
Ethanaminium, 2-hydroxy-N,N,N-trimethyl-, salt with (R-(R,R))-2,3-dihydroxybutanedioic acid (1:1);
(2-Hydroxyethyl) trimethyl ammonium bitartrate
Empirical: C₉H₁₉NO₇
Formula: (C₅H₁₄NO) • C₄H₅O₆
Properties: Wh. cryst. powd.; odorless or lt. trimethylamine odor; sour acetic taste; sol. in water; sl. sol. in alcohol; insol. in ether, chloroform, benzene; m.w. 253.25; m.p. 151-153 C

Trade Names: Cholesterol HP; Fancol™ CH; Loralan-CH

Cholesteryl alcohol. See Cholesterol

Cholesteryl olate
CAS 303-43-5; EINECS/ELINCS 206-142-1
Classification: Steroid
Empirical: C₄₅H₇₆O₂
Properties: M.w. 651.12; m.p. 44-47 C
Toxicology: TSCA listed
Uses: Surfactant for pharmaceuticals
Regulatory: Canada DSL
Manuf./Distrib.: Aldrich http://www.sigma-aldrich.com; Fluka http://www.sigma-aldrich.com; Nantong ChangChem http://www.changchem.com; Sigma

[Handbook of Pharmaceutical Additives, Third Edition] 1106
Choline chlorhydrate. See Choline chloride

Choline chloride
CAS 67-48-1; EINECS/ELINCS 200-655-4
INS1001(iii)

Synonyms: Choline chlorhydrate; Choline hydrochloride; Cholinium chloride; Hepacholine; (2-Hydroxyethyl)trimethylammonium chloride

Empirical: C5H14NO • Cl
Formula: (CH3)3N(Cl)CH2CH2OH

Properties: Colorless to wh. cryst., sl. odor of trimethylamine; sol. in water and alcohol; m.w. 139.65

Toxicology: LD50 (oral, rat) 9 g/kg, (IP, rat) 400 mg/kg, (IV, mouse) 53 mg/kg; poison by IP and IV routes; moderately toxic by ing., subcut. routes; high dosages may cause adverse effects; suspected carcinogen; mutagenic data; TSCA listed

Hazardous Decomp. Prods.: Heated to decomp., emits toxic fumes of Cl–, NOx, NH3

HMIS: Health 2, Flammability 1, Reactivity 0
Uses: Dietary source of choline

Choline dihydrogen citrate
CAS 77-91-8

Synonyms: Chothen; Citracholine; (2-Hydroxyethyl)trimethylammonium citrate

Empirical: C11H21NO8
Formula: C5H14NO • C6H7O7

Properties: Gran.; acrid taste; freely sol. in water; very sl. sol. in alcohol; pract. insol. in benzene, chloroform, ether; m.w. 295.29; m.p. 105-107.5 C

Toxicology: LD50 (oral, rat) > 4800 mg/kg; TSCA listed

HMIS: Health 0, Flammability 1, Reactivity 0
Uses: Dietary source of choline

Choline hydrochloride. See Choline chloride

Choline hydrogen tartrate. See Choline bitartrate

D-Choline hydroxide 2,3-dihydroxypropyl hydrogen phosphate inner salt. See Glycerophosphocholine

Choline tartrate; Choline, tartrate (1:1) salt. See Choline bitartrate

Cholinium chloride. See Choline chloride

Cholinphosphoric acid diglyceride ester. See Hydrogenated lecithin

Chondroitin polysulfate. See Chondroitin sulfate
### Chemical Component Cross-Reference

 Handbook of Pharmaceutical Additives, Third Edition 1109
Chemical Component Cross-Reference

Green cinnabar; Green rouge; Leaf green; Oxide of chromium; Pigment green 17; Ultramarine green
Classification: Inorganic color
Empirical: \( \text{Cr}_2\text{O}_3 \)
Properties: Ylsh. grn. hard cryst. solid; turns brn. on heating, reverts to grn. on cooling; sl. sol. in acids, alkalis; pract. insol. in water, alcohol, acetone; m.w. 151.99; dens. 5.21; m.p. 2435 C; b.p. 4000 C
Toxicology: ACGIH TLV/TWA 0.5 mg(Cr)/m\(^3\); TDLo (IP, rat) 90 mg/kg; TCLo (inh., rat, 4 h, 6 wks intermittent) 150 mg/m\(^3\); harmful solid; toxic by ing. and inh.; probably severely irritating to eyes, skin, mucous membranes; sensitizer; avoid contact and inh.; confirmed carcinogen; tumorigen; mutagenic data
Precaution: Powerful oxidizer; violent reactions with ClF\(_3\)
Storage: Hygroscopic
Uses: Colorant for external pharmaceuticals, eye use, contact lenses
Regulatory: FDA 21CFR §72.2327, 73.1327, 178.3297; exempt from certification, permanently listed for drug use and medical devices; Canada DSL

†=pharmaceutical grade

Chromium picolate
CAS 14639-25-9
Synonyms: Chromium picolinate; Chromium 2-pyridine-carboxylate; Chromium tripicolinate; 2-Pyridinecarboxylic acid, chromium salt; Tris(picolinato)chromium
Definition: Chromium (III) salt of picolinic acid
Empirical: \( \text{C}_{18}\text{H}_{12}\text{N}_{3}\text{O}_{6}\text{Cr} \)
Formula: \( \text{Cr(C}_6\text{H}_4\text{NO}_2)_3 \)
Properties: Red solid; m.w. 418.33
Storage: Preserve in tightly sealed containers
Uses: Dietary supplement in pharmaceuticals
Features: Lipophilic
Regulatory: NF compliance
Manuf./Distrib.: Sciencelab http://www.scienclab.com

Chromium picolinate; Chromium 2-pyridine-carboxylate. See Chromium picolate
Chromium sesquioxide; Chromium (3+) trioxide. See Chromium oxide (ic)

Chemical Component Cross-Reference

Uses: Colorant for external pharmaceuticals
Regulatory: Canada DSL
Manuf./Distrib.: Aldrich http://www.sigma-aldrich.com; Fluka http://www.sigma-aldrich.com; Sigma http://www.sigma-aldrich.com/belgium

See also D&C Green No. 8
CI 59105. See CI vat orange 1

CI 60725
CAS 81-48-1; EINECS/ELINCS 201-353-5
Synonyms: D&C Violet No. 2; N-(4-Hydroxy-1-anthraquinonyl)-4-methylaniline; N-(4-Hydroxy-1-anthraquinonyl)p-toluidine; 1-Hydroxy-4-[4-(4-methylphenyl) amino]-9,10-anthracenedione; 1-Hydroxy-4-(p-toluidino)anthraquinone; Solvent violet 13; N-(p-Tolyl)-4-hydroxy-1-anthraquinonylamine
Classification: Anthraquinone color
Empirical: C_{21}H_{15}NO_{3}
Properties: Cryst.; sol. in conc. H_{2}O; m.w. 329.35
Toxicology: LD_{50} (intratracheal, rat) 250 mg/kg; poison by intratracheal route; mutagenic data; TSCA listed
Hazardous Decomp. Prods.: Heated to decompr., emits toxic fumes of NOx
Uses: Colorant for external pharmaceuticals
Manuf./Distrib.: Sigma http://www.sigma-aldrich.com/belgium

See also D&C Violet No. 2; Disperse blue 72

CI 61565
CAS 128-80-3; EINECS/ELINCS 204-909-5
Synonyms: 9,10-Anthracenedione, 1,4-bis [[4-methylphenyl] amino]-; 1,4-Bis [[4-methylphenyl] amino]-9,10-anthracenedione; 1,4-Bis (p-tolylamino)anthraquinone; Solvent green 3
Classification: Anthraquinone color
Empirical: C_{28}H_{22}N_{2}O_{2}
Properties: Blue to dk. purple solid; sol. in water (1g/100 ml of water); m.w. 466.35
Toxicology: LD_{50} (oral, rat) 2000 mg/kg; intravenous use may produce severe headache, acute pulmonary edema with cardiac arrest, hypertension; TSCA listed
Precaution: Incompatible with nitric acid, chlorates, and other strong oxidizing agents; wear protective gloves, lab coat, and dust respirator
HMIS: Health 2, Flammability 1, Reactivity 0
Storage: Store un tightly closed, light-resistance containers in a cool, well-ventilated area
Uses: Colorant for ingested pharmaceuticals and nylon sutures; diagnostic marker in urology

**Handbook of Pharmaceutical Additives, Third Edition** 1117
Chemical Component Cross-Reference

Cinnamal

CAS 104-55-2; 14371-10-9; EINECS/ELINCS 203-213-9
FEMA 2286

Synonyms: Benzylideneacetaldehyde; Cassia aldehyde; Cinnamaldehyde; Cinnamic aldehyde; Cinnamyl alcohol; Phenylacrolein; 3-Phenylpropenal; 3-Phenyl-2-propenal; 2-Propenal, 3-phenyl-

Classification: Aromatic aldehyde

Definition: A syn. liq. with strong cinnamon odor isolated from a wood-rotting fungus; found in Ceylon and Chinese cinnamon oils

Empirical: C_{9}H_{8}O

Formula: C_{9}H_{8}O-CHO

Properties: Ylsh. oily liq., strong cinnamon odor, burning aromatic taste; misc. with oxygenated and chlorinated solvs., alcohol, ether, chloroform, fixed oils; very sl. sol. in water; m.w. 132.16; dens. 1.048-1.052; m.p. -7.5 C; b.p. 246 C; flash pt. 248 F; ref. index 1.619-1.623 (20 C); thickens on exposure to air

Toxicology: LD_{50} (oral, rat) 2220 mg/kg, (IP, mouse) 200 mg/kg, (IV, mouse) 75 mg/kg; poison by IV and parenteral routes; mod. toxic by ing. and IP routes; severe human skin irritant; one of the most common allergens; mutagenic data; TSCA listed

Precaution: Combustible liq.; may ignite after delay in contact with NaOH; volatile with steam; incompat. with strong oxidizers, reducers

Hazardous Decomp. Prods.: Heated to decomp., emits CO, CO_{2}, acrid smoke and fumes

HMIS: Health 1, Flammability 2, Reactivity 0

Storage: 6 mos. when stored at 40 F in tightly sealed original containers with minimum head space; avoid prolonged exposure to light, heat, air

Uses: Synthetic flavor for pharmaceuticals, orals, mouthwashes, and toothpaste; topical sunscreens; ointments

Features: Cinnamon-, vanilla-like flavor

Regulatory: FDA 21 CFR §172.60; GRAS; Japan approved as flavoring; FDA approved for orals; Canada DSL; Australia AICS

### Cinnamon (Cinnamomum cassia)

FEMA 2256

**Synonyms:** Cassia; Chinese cinnamon; Cinnamomum cassia; Cinnamon; Cinnamon, Chinese

**Definition:** Plant material derived from dried bark of *Cinnamomum cassia*

**Uses:** Natural flavor for pharmaceuticals

### Cinnamon (Cinnamomum cassia) oil

CAS 8007-80-5

FEMA 2258

**Synonyms:** Artificial cinnamon oil; Cassia bark oil; Cassia oil; Chinese cinnamon oil; Cinnamomum cassia; Cinnamomum cassia oil; Cinnamon bark oil; Cinnamon oil; Saigon cinnamon

**Definition:** Volatile oil distilled from the leaves and twigs of *Cinnamomum cassia*, contg. 80-90% cinnamaldehyde, plus cinnamyl acetate, eugenol

**Properties:** Ylsh. to brnsh. liq., cinnamon odor, spicy burning taste; darkens and thickens on exposure to air; sol. in alcohol, fixed oils, propylene glycol; sl. sol. in water; insol. in glycerin, min. oil; dens. 1.045-1.063; ref. index 1.6020-1.6060 (20 C)

**Toxicology:** LD50 (oral, rat) 2800 mg/kg, (IP, mouse) 500 mg/kg, (skin, rabbit) 320 mg/kg; poison by skin contact; mod. toxic by ing., IP routes; primary irritant; human skin irritant; may cause respiratory stimulation; acute pulmonary edema; suspected weak carcinogen; mutagenic data; TSCA listed

**Hazardous Decomp. Prods.:** Heated to decomp., emits acrid smoke and irritating fumes

**HMIS:** Health 1, Flammability 1, Reactivity 0

**Storage:** Keep cool, well closed; protect from light

**Uses:** Natural flavor for pharmaceuticals, orals, dentifrices, mouthwashes; mild anesthetic in dentistry; carminative; aromatic; astringent; stimulant

Cinnamon (Cinnamomum zeylanicum) extract
CAS 84649-98-9; 8015-91-6; EINECS/ELINCS 283-479-0
FEMA 2290
Synonyms: Cinnamomum zeylanicum; Cinnamomum zeylanicum extract; Cinnamon bark extract; Cinnamon, crude extract; Cinnamon extract
Definition: Extract of the dried bark of the cinnamon, Cinnamomum zeylanicum
Properties: Yel. liq.; char., sweet-spicy, burning, strong odor; essentially insol. in water; dens. 1.010-1.030; flash pt. ≈ 88 C; ref. index 1.534-1.591
Toxicology: LD50 (IP, mouse) 4980 mg/kg; may cause convulsions, ataxia, respiratory stimulation
Uses: Natural flavor for pharmaceuticals
Regulatory: FEMA 182.20, 582.20, GRAS
Trade Names Containing: Sepicontrol A5

Cinnamon (Cinnamomum zeylanicum) leaf oil
CAS 8015-91-6; EINECS/ELINCS 283-479-0
FEMA 2292
Synonyms: Ceylon cinnamon leaf oil; Chinese cinnamon leaf oil; Cinnamon leaf oil; Cinnamon leaf oil, Ceylon; Cinnamon leaf oil, Seychelles; Saigon cinnamon leaf oil; Seychelles cinnamon leaf oil
Definition: Oil obtained by steam distillation of leaves from Cinnamomum zeylanicum
Properties: Lt. to dk. brn. liq., spicy cinnamon, clove odor and taste; sol. in oxygenated solvs., fixed oils, propylene glycol, min. oil; insol. in glycerin, water; dens. 1.05 kg/l (20 C); flash pt. 194 F
Toxicology: May irritate eyes, skin
Precaution: wear oil/solv. resistant gloves, chemical splash goggles or face shield
Hazardous Decomp. Prods.: Heated to decomp., emits acrid smoke and irritating fumes
Storage: Store in full, sealed containers in cool, dry place away from sources of ignition, heat, direct sunlight
Uses: Natural flavor for pharmaceuticals
Use Level: 0.1% max. in finished cosmetics
Regulatory: FDA 21CFR §182.20, 582.20, GRAS; FEMA GRAS
Manuf./Distrib.: AMC Chems.; Buckton Page

Cinnamon, crude extract; Cinnamon extract.

See Cinnamon (Cinnamomum zeylanicum) extract

Cinnamon leaf oil; Cinnamon leaf oil, Ceylon; Cinnamon leaf oil, Seychelles. See Cinnamon (Cinnamomum zeylanicum) leaf oil

Cinnamon oil. See Cinnamon (Cinnamomum cassia) oil

Cinnamyl acetate
CAS 103-54-8; EINECS/ELINCS 203-121-9
FEMA 2293
Synonyms: Acetic acid, cinnamyl ester; Cinnamic acid; 3-Phenylallyl acetate; γ-Phenylallyl acetate; 2-Phenyl-2-propan-1-ol acetate; 3-Phenyl-2-propan-1-y1 acetate
Definition: Ester of cinnamyl alcohol and acetic acid
Empirical: C11H12O2
Properties: Colorless liq., sweet floral odor; misc. with chloroform, ether, fixed oils; insol. in glycerin, water @ 264 C; m.w. 176.23; dens. 1.047-1.051; b.p. 265 C; flash pt. 244 F; ref. index 1.539-1.543
Toxicology: LD50 (oral, rat) 3300 mg/kg, (IP, mouse) 1200 mg/kg; mod. toxic by ingestion and IP routes; skin irritant; TSCA listed
Precaution: Combustible liq.
Hazardous Decomp. Prods.: Heated to decomp., emits acrid smoke and fumes
Uses: Synthetic flavor for pharmaceuticals
Regulatory: FDA 21CFR §172.515; FEMA GRAS; Japan approved as flavoring; Canada DSL
Cinnamyl alcohol

CAS 104-54-1; EINECS/ELINCS 203-212-3
FEMA 2294

Synonyms: Cinnamic alcohol; 3-Phenylallyl alcohol; γ-Phenylallyl alcohol; 3-Phenyl-2-propenol; 3-Phenyl-2-propen-1-ol; Styrene; Styrly alcohol; Styryl carbinol

Classification: Organic compd.

Empirical: C9H10O

Properties: Wh. to ylsh. needles or cryst. mass, hyacinth odor; sol. in water, glycerol, propylene glycol, alcohol, ether, other common org. solvs.; m.w. 134.19; dens. 1.0397 (35/35 C); vapor dens. 4.6; m.p. 33 C; b.p. 250 C; flash pt. > 100 C; ref. index 1.58190

Toxicology: LD50 (oral, rat) 2000 mg/kg; mod. toxic by ing.; skin irritant; can cause allergic reaction; mutagenic data; TSCA listed

Environmental: Do not discharge into lakes, streams, ponds, public waters

Precaution: Wear safety glasses or goggles, rubber gloves, apron, incomapt. with strong oxidizers, reducers

Hazardous Decomp. Prods.: CO, CO2; heated to decomp., emits acid smoke and fumes

Storage: 6 mos. when stored at 40-70 F in tightly sealed original containers with minimum head space; avoid prolonged exposure to light, heat, air

Uses: Flavor and fragrance for pharmaceuticals, deodorants

Features: Balsamic, sweetly floral fragrance and flavor

Use Level: 0.8% max. in finished cosmetics

Regulatory: FDA 21CFR §172.515; FEMA GRAS; Australia AICS; Japan approved as flavoring; Canada DSL

Manuf./Distrib.: Advanced BioTech
http://www.adv-bio.com; Augustus Oils Ltd
http://www.basf.com; Degussa AG/Health & Nutrition

Cinnamyl alcohol anthranilate. See Cinnamyl anthranilate

Cinnamyl alcohol, cinnamate. See Cinnamyl cinnamate

Cinnamyl alcohol, formate. See Cinnamyl formate

Cinnamyl alcohol, α-pentyl, acetate. See α- Amyliccinnamyl acetate

Cinnamyl aldehyde. See Cinnamal

Cinnamyl-2-aminobenzoate; Cinnamyl-o-aminobenzoate. See Cinnamyl anthranilate

Cinnamyl anthranilate

CAS 87-29-6
FEMA 2295

Synonyms: 2-Aminobenzoic acid-3-phenyl-2-propenyl ester; Anthranilic acid cinnamyl ester; Cinnamyl alcohol anthranilate; Cinnamyl-2-aminobenzoate; Cinnamyl-o-aminobenzoate; 3-Phenyl-2-propenylanilinate; 3-Phenyl-2-propen-1-yl anthranilate

Empirical: C16H15NO2

Properties: Reddish yel. powd., balsamic odor; sol. in alcohol, chloroform, ether; insol. in water; m.w. 253.32; dens. 1.180 (15.5 C); m.p. 60 C; b.p. 332 C; flash pt. > 100 C

Toxicology: LD50 (oral, rat) 5000 mg/kg; (skin, rabbit) 5000 mg/kg; suspected carcinogen; experimental neoplastigen; mutation data; TSCA listed

Precaution: Combustible liq.

Hazardous Decomp. Prods.: Heated to decomp., emits toxic fumes of NOx
Cinnamyl butyrate

CAS 103-61-7; EINECS/ELINCS 203-128-7
FEMA 2296

Synonyms: Butyanoic acid, 3-phenyl-2-propenyl ester; Butyric acid, cinnamyl ester; 3-Phenylallyl butanoate; 3-Phenyl-2-propenyl butanoate; Phenyl propenyl-n-butyrate

Empirical: C13H16O2

Properties: Colorless to ylsh. liq.; fruity sl. floral odor, honey-like taste; insol. in water; m.w. 204.27; dens. 1.010-1.015 (25/25 C); b.p. 300 C; flash pt. > 100 C

Toxicology: Primary skin irritant; TSCA listed

Uses: Synthetic flavor for pharmaceuticals
Features: Fruity flavor

Regulatory: FDA 21CFR §172.515; FEMA GRAS; Canada DSL

Cinnamyl cinnamate

CAS 122-69-0; EINECS/ELINCS 204-566-1
FEMA 2298

Synonyms: Cinnamic acid cinnamyl ester; Cinnamyl alcohol, cinnamate; Cinnyl cinnamate; Phenylallyl cinnamate; 3-Phenyl-2-propenoic acid 3-phenyl-2-propenyl ester; 3-Phenyl-2-propen-1-yl cinnamate; 3-Phenyl-2-propenyl 3-phenyl-2-propenoate; 2-Propenoic acid, 3-phenyl-3-phenyl-2-propenyl ester; Styracin

Empirical: C18H16O2

Formula: C6H5CH=CHCOOCH2CH=CHC6H5

Properties: Cryst.; sweet resinous odor; sol. in alcohol, benzene; m.w. 264.31; dens. 1.1565 (4 C); trans-trans: needles; pract. insol. in water; sol. 1 g/3 ml ether; m.p. 44 C

Toxicology: LD50 (oral, rat) 2900 mg/kg; mod. toxic by ingestion; TSCA listed

Precaution: Combustible liq.

Hazardous Decomp. Prods.: Heated to decomp., emits acrid smoke and irritating fumes

Uses: Synthetic flavor for pharmaceuticals

Regulatory: FDA 21CFR §172.515; FEMA GRAS; Canada DSL

Manuf./Distrib.: Degussa AG/Health & Nutrition; SAFC Specialties http://www.safcspecialties.com

Cinnamyl formate

CAS 104-65-4; EINECS/ELINCS 203-223-3
FEMA 2299

Synonyms: Cinnamyl alcohol, formate; Cinnamyl methanoate; Formic acid, cinnamyl ester; 3-Phenylallyl methanoate; 3-Phenyl-2-propen-1-yl formate

Empirical: C10H10O2

Properties: Colorless to ylsh. liq.; balsamic fruity-floral odor; sol. in most org. solvs.; insol. in water; m.w. 162.19; dens. 1.080; b.p. 250-254 C; flash pt. > 230 F; ref. index 1.5500-1.5560 (20 C)

Toxicology: LD50 (oral, rat) 2900 mg/kg; mod. toxic by ingestion; TSCA listed

Precaution: Combustible liq.

Hazardous Decomp. Prods.: Heated to decomp., emits acrid smoke and fumes

Uses: Synthetic flavor for pharmaceuticals

Regulatory: FDA 21CFR §172.515; FEMA GRAS; Canada DSL

Manuf./Distrib.: Degussa AG/Health & Nutrition; SAFC Specialties http://www.safcspecialties.com

Cinnamyl isobutyrate

CAS 103-59-3; EINECS/ELINCS 203-126-6
FEMA 2297

Synonyms: Isobutyric acid, cinnamyl ester; 2-Methylpropanoic acid, 3-phenyl-2-propenyl ester; 3-Phenylallyl 2-methylpropanoate; 3-Phenyl-2-propenyl 2-methylpropanoate

Classification: Aromatic ester

Empirical: C13H16O2

### Citral diethyl acetate

**CAS 7492-66-2; EINECS/ELINCS 231-323-7**

- **FEMA 2304**
- **Synonyms:** Citral diethyl acetate; 1,1-Diethoxy-3,7-dimethyl-2,6-octadiene; 3,7-Dimethyl-2,6-octadienal diethyl acetal; 2,6-Octadienal, 3,7-dimethyl-, diethyl acetal; 2,6-Octadiene, 1,1-diethoxy-3,7-dimethyl-
- **Classification:** Nonaromatic acetal
- **Empirical:** C\textsubscript{14}H\textsubscript{26}O\textsubscript{2}
- **Properties:** Colorless liq., mild green citrus odor; sol. in propylene glycol; insol. in water; m.w. 226.36; dens. 0.8745-0.8790 (15 °C); b.p. 230 C; flash pt. 79 C; ref. index 1.4520-1.4545

| Toxicology: | LD\textsubscript{50} (oral, rat) > 5 g/kg, (skin, rabbit) > 5 g/kg; low toxicity by ing. and skin contact; primary skin irritant; mutagen; TSCA listed |
| Precaution: | Combustible liq. |
| Hazardous Decomp. Prods.: | Heated to d

### Citral dimethyl acetal

**CAS 7549-37-3; EINECS/ELINCS 231-434-0**

- **FEMA 2305**
- **Synonyms:** 1,1-Dimethoxy-3,7-dimethyl-2,6-octadiene; 3,7-Dimethyl-2,6-octadienal dimethyl acetal; 3,7-Dimethyl-2,6-octadien-1-ol dimethyl acetal
- **Classification:** Nonaromatic acetal
- **Empirical:** C\textsubscript{12}H\textsubscript{22}O\textsubscript{2}
- **Properties:** Colorless to ylsh. liq., fresh lemon-like odor; m.w. 198.31; dens. 0.885; b.p. 198 C; flash pt. 180 F; ref. index 1.4560-1.4630 (20 C)

| Toxicology: | Primary skin irritant; TSCA listed |
| Precaution: | Combustible liq. |

### Citral natural

- **See Citral**
- **Citrem.** See Citric acid esters of mono- and diglycerides of fatty acids

### Citric acid

**CAS 77-92-9** (anhyd.); EINECS/ELINCS 201-
Chemical Component Cross-Reference

FEMA 2306; INS330; E330

Synonyms: 2-Hydroxy-1,2,3-propanetricarboxylic acid; 2-Hydroxypropane-1,2,3-tricarboxylic acid; β-Hydroxytricarballylic acid

Classification: Organic acid

Empirical: C₆H₈O₇

Formula: HOC(COOH)(CH₂COOH)₂

Properties: Colorless translucent crystals or powd., odorless, strongly acidic tart taste; very sol. in water, alcohol, and ether; very sl. sol. in ether; m.w. 192.43; dens. 1.542; m.p. 153°C; flash pt. 212°F

Toxicology: LD₅₀ (oral, rat) 6730 mg/kg; poison by IV; mod. toxic by subcut. and IP routes; poison by IV route; mildly toxic by ing.; primary irritant; severe eye, mod. skin irritant; some allergenic props.; erodes tooth enamel; TSCA listed

Precaution: Combustible; potentially explosive reaction with metal nitrates

Hazardous Decomp. Prods.: Heated to decomp., emits acrid smoke, fumes

HMIS: Health 1, Flammability 0, Reactivity 0

Uses: Prep. of citrates; acidifier, buffer, pH adjuster, anticoagulant, flavor for pharmaceuticals, flavoring extracts, injectables, buccals, inhalants, nasals, ophthalmics, orals, otics, topicals, effervescent tablets; stabilizer for colors, flavors, vitamins; citrate soln. as blood anticoagulant; keratin softener

Regulatory: FDA 21CFR §131.111, 131.112, 131.136, 131.138, 131.144, 131.146, 133, 145.131, 145.145, 146.187, 150.141, 150.161, 155.130, 161.190, 166.40, 166.110, 169.115, 169.140, 169.150, 172.755, 173.160, 173.165, 173.280, 182.6033, GRAS; Canada DSL; USDA 9CFR §318.7, 381.147; BATF 27CFR §240.1051, limitation 5.8 lb/1000 gal; FEMA GRAS; Japan approved; Europe listed; UK approved; FDA approved injectables, buccals, inhalants, nasals, ophthalmics, topicals, orals, otics; USP/NF, BP, EP compliance

**Citric acid, ammonium iron (3+) salt.** See [Iron ammonium citrate](#)

**Citric acid, 1,2-dodecyl ester, ester with bis (coco acyl) pentaerythritol.** See [Dicocoyl pentaerythritol diestearil citrate](#)

**Citric acid esters of mono- and diglycerides of fatty acids**

CAS 68990-05-6; 91744-38-6

INS472c; E472c

**Synonyms:** Citrem; Citroglycerides; Fatty acid mono- and diglycerides, citric acid esters; Mono- and diglycerides citrates; Mono- and diglycerides, citric acid esters

**Definition:** Mixt. of esters of citric acid and edible fatty acids with glycerol

**Properties:** Wh. to ivory oily to waxy material; sol. in edible oils and fats; disp. in hot water; insol. in cold water; HLB 10.0-12.0

**Uses:** Emulsifier, stabilizer for pharmaceuticals

**Regulatory:** FDA 21 CFR §172.832; Europe listed; UK approved

**Manuf./Distrib.:** AB R Lundberg

**Trade Names Containing:** Imwitor® 377; Imwitor® 380

**Citric acid hydrous.** See [Citric acid monohydrate](#)

**Citric acid monohydrate**

CAS 5949-29-1; EINECS/ELINCS 201-069-1

FEMA 2306

**Synonyms:** Citric acid hydrous; Hydrous citric acid; 2-Hydroxy-1,2,3-propanetricarboxylic acid monohydrate

**Empirical:** C₆H₈O₇ • H₂O

**Properties:** Wh. or colorless cryst. or powd., odorless; sol. in water, alcohol (1:1.5); sl. sol. in ether; m.w. 210.14; efflorescent in dry air

**Toxicology:** LD50 (IP, rat) 375 mg/kg; irritant; may cause dental erosion or local irritation if ingested frequently or in large anms.

**Precaution:** Airtight storage

**HMIS:** Health 1, Flammability 0, Reactivity 0

**Uses:** Acidifier, buffer, effervescent in pharmaceuticals, ophthalmics, orals, topicals; antioxidant, chelating agent for flavor and color stability; synergist for antioxidants; to dissolve renal calculi,
Chemical Component Cross-Reference

alkalize the urine; in anticoagulant sol'ns.;
treatment of GI disturbances

3,7-Dimethyl-6-octen-1-al

†=pharmaceutical grade

Citronellal
CAS 106-23-0; EINECS/ELINCS 203-376-6
FEMA 2307

Synonyms: (±)-Citronallal; 3,7-Dimethyl-6-octenal; 3,7-Dimethyl-6-octen-1-ol; Rhodinal
Classification: Organic compd.; acrylic terpene aldehyde

Empirical: C_{10}H_{18}O

Properties: Colorless to sl. yel. liq., strong lemon-citronella-rose odor; sol. in alcohol, most oils; sl. sol. in propylene glycol; insol. in glycerin, water; m.w. 154.25; dens. 0.850-0.860; b.p. 83-85 C (11 mm); flash pt. 170 F; ref. index 1.446-1.456; tenacity 8 hrs. on blotter

Toxicology: TSCA listed
Environmental: Do not discharge lakes, streams, ponds, public waters

Precaution: Combustible liq.; wear safety glasses or goggles, rubber gloves, apron; incompat. with strong oxidizers, reducers

Hazardous Decomp. Prods.: Heated to decomp., emits acrid smoke and irritating fumes

Storage: Store in cool, dry place in tightly sealed containers, protected from heat and light

Uses: Synthetic flavor for pharmaceuticals

Regulatory: FDA 21CFR §172.515; FEMA GRAS; Australia; Japan approved as flavoring (ENCS no. 2-514); Japan MITI; Canada DSL; Philippines PICCS

Classification: Nonaromatic alcohol

Empirical: C10H20O

Formula: (CH3)2C:CHCH2CH2CH(CH3)CH2CH2OH

Properties: Colorless oily liq., rose odor; sol. in fixed oils, propylene glycol; sl. sol. in water; insol. in glycerin @ 225 C; m.w. 156.30; dens. 0.850-0.860; b.p. 222 C; flash pt. 215 F; ref. index 1.454-1.462; tenacity 24 hrs. on blotter

Toxicology: LD50 (oral, rat) 3450 mg/kg, (subcut., mouse) 880 mg/kg, (LM, mouse) 4 g/kg, (skin, rabbit) 2650 mg/kg; LDLo (IV, mouse) 100 mg/kg; poison by IV route; mod. toxic by ing., skin contact, intramuscular routes; primary irritant; severe skin irritant; may cause spastic paralysis; TSCA listed

Precaution: Combustible liq.; wear safety glasses or goggles, rubber gloves, apron; incompat. with strong oxidizers, reducers

Hazardous Decomp. Prods.: Heated to decomp., emits CO, CO2, acrid smoke and irritating fumes

NFPA: Health 0, Flammability 1, Reactivity 0

Storage: Store in cool, dry place in tightly sealed containers, protected from heat and light

Uses: Fragrance and flavor for pharmaceuticals

Features: Fresh floral, rose-like fragrance and flavor
Chemical Component Cross-Reference

rose, aldehydic, ozone-like odor; m.w. 198.28; sp.gr. 0.921-1.020; b.p. 130 C (12 mm); flash pt. > 100 C; ref. index 1.450-1.490

Toxicology: LD50 (oral, rat) > 5 g/kg, (skin, rabbit) > 5 g/kg; low toxicity by ing. and skin contact; TSCA listed

Hazardous Decomp. Pros.: Heated to decomp., emits acrid smoke and irritating vapors

Uses: Synthetic flavor for pharmaceuticals

Use Level: Up to 10%

Regulatory: FDA 21CFR §172.515; FEMA GRAS; Canada DSL

Citronellyl acetate

CAS 150-84-5; 67650-82-2; EINECS/ELINCS 205-775-0

FEMA 2311

Synonyms: Acetic acid, citronellyl ester; Acetic acid-3,7-dimethyl-6-octen-1-yl ester; 2,6-Dimethyl-2-octen-8-ol acetate; 3,7-Dimethyl-6-octen-1-ol acetate; 3,7-Dimethyl-6-octen-1-yl acetate; 6-Octen-1-ol, 3,7-dimethyl-, acetate

Classification: floral ester

Definition: Ester of citronellol and acetic acid; found in oils of Citronella Ceylon, geranium, etc.

Empirical: C12H22O2

Properties: Colorless liq., fruity rose-like odor; sol. in alcohol, fixed oils; insol. in glycerin, propylene glycol, water @ 229 C; m.w. 198.34; dens. 0.883-0.893; b.p. 240 C; flash pt. > 212 F; ref. index 1.440-1.450

Toxicology: LD50 (oral, rat) 6800 mg/kg, (dermal, rabbit) > 5 g/kg; mildly toxic by ing.; human skin irritant; TSCA listed

Precaution: Combustible liq.; wear safety glasses or goggles, rubber gloves, apron; incompat. with strong oxidizers, reducers

Hazardous Decomp. Pros.: Heated to decomp., emits CO, CO2, acrid smoke and irritating fumes

Storage: 12 mos. when stored at 40-70 F in tightly sealed original containers with minimum head space; avoid prolonged exposure to light, heat, air

Uses: Synthetic flavor for pharmaceuticals

Regulatory: FDA 21CFR §172.515; FEMA GRAS; Australia AICS; Japan approved as flavoring; Canada DSL; China listed; Philippines PICCS

α-Citronellyl acetate. See Rhodinyl acetate

Citronellyl acetone. See Tetrahydro-pseudo-ionone

Citronellyl butyrate

CAS 141-16-2; EINECS/ELINCS 205-463-4

FEMA 2312

Synonyms: Butanoic acid, 3,7-dimethyl-6-octenyl ester; 3,7-Dimethyl-6-octen-1-yl butyrate

Classification: floral ester

Empirical: C14H26O2

Properties: Colorless liq., rose-like odor, sweet plum-like taste; misc. with alcohol, ether, chloroform, most oils; insol. in water @ 224 C; m.w. 226.36; dens. 0.880-0.886; vapor dens. 7.7; b.p. 134-135 C (12 mm); flash pt. (CC) 110 C; ref. index 1.444-1.448; tenacity 24 hrs. on blotter

Toxicology: LD50 (oral, rat) 8400 mg/kg, (dermal, rabbit) > 5 g/kg; primary irritant; may be irritating to eyes and skin; TSCA listed

Environmental: Prevent contamination of soil, ground- and surf.-water

Precaution: Combustible liq.; incompat. with strong oxidizing agents
Citronellyl formate

CAS 105-85-1; EINECS/ELINCS 203-338-9
FEMA 2314

Synonyms: l-Citronellyl formate; Citronellyl methanoate; 3,7-Dimethyl-6-octen-1-ol formate; 2,6-Dimethyl-2-octen-8-yl formate; 3,7-Dimethyl-6-octen-1-yl formate; Formic acid, citronellyl ester; Formic acid-3,7-dimethyl-6-octen-1-yl ester

Classification: floral ester; acyclic terpene ester

Properties: Colorless liq., sweet fruity rose-like odor, apricot-like taste; misc. with alcohol, chloroform, ether, most oils; insol. in water; m.w. 226.36; dens. 0.8760-0.8830; vapor dens. 7.7; b.p. 249 C; flash pt. 100 C; ref. index 1.4400-1.4480

Toxicology: Skin, eye irritant; TSCA listed

Environmental: Keep run-off water out of sewers, water sources

Precaution: Combustible liq.; incompat. with strong oxidizers, acids

Hazardous Decomp. Prods.: Heated to decomp., emits acrid smoke and irritating fumes

Storage: Keep away from heat, sparks, open flame; keep in original, tightly closed container

Cl vat orange 1
CAS 1324-11-4
Synonyms: CI vat orange 1
Empirical: C24H10Br2O2
Uses: Colorant for contact lenses
Regulatory: FDA 21CFR §73.3112, exempt from certification, permanently listed for use in medical devices; Canada DSL

Civet
CAS 68916-26-7; EINECS/ELINCS 272-826-1
FEMA 2319
Synonyms: Civet absolute; Zibet; Zibeth; Zibetum
Definition: Derived from civet cats, Viverra civetta and V. zibetha
Uses: Natural flavor for pharmaceuticals
Regulatory: FDA 21CFR §182.50, GRAS; FEMA GRAS; Japan approved; Canada DSL
Manuf./Distrib.: Payan & Bertrand http://www.payanbertrand.com/

Civet absolute. See Civet
Clarified honey. See Honey
Clary oil; Clary sage oil. See Clary (Salvia sclarea) oil

Clary (Salvia sclarea) oil
CAS 8016-63-5; 8022-56-8; EINECS/ELINCS 283-911-8
FEMA 2321
Synonyms: Clary oil; Clary sage oil; Muscatel oil; Muscatel sage oil; Sage oil clary; Salvia sclarea
Definition: Oil from steam distillation of flowering tops and leaves of Salvia sclarea
Properties: Pale yel. liq., herbaceous odor; sol. in fixed oils, min. oil; insol. in glycercin, propylene glycol; dens. ≈ 0.90 kg/l; vapor dens. > air; flash pt. > 174 F; ref. index 1.45-1.48
Toxicology: LD50 (oral, rat) 5600 mg/kg; low toxicity by ing.; primary skin irritant; TSCA listed
Hazardous Decomp. Prods.: Heated to decomp., emits acrid smoke and irritating fumes
Storage: 24 mos. when stored in dk., fresh, dry place
Uses: Natural flavor for pharmaceuticals
Regulatory: BP, EP compliance; FDA 21CFR §182.20, GRAS; FEMA GRAS; Japan approved; Canada DSL
Manuf./Distrib.: Buckton Page Ltd

Cleland’s reagent. See Dithiothreitol
Climbazol. See Climbazole
Climbazole
CAS 38083-17-9; EINECS/ELINCS 253-775-4
Synonyms: 2-Butanone, 1-(p-chlorophenoxy)-3,3-dimethyl-1-(1-imidazolyl)-2-butanone; 2-Butanone, 1-(4-chlorophenoxy)-1-(1H-imidazol-1-yl)-3,3-dimethyl-1-(p-Chlorophenoxy)-3,3-dimethyl-1-(1-imidazolyl)-2-butanone; 1-(4-Chlorophenoxy)-1-(imidazol-1-yl)-3,3-dimethylbutanone; 1-(4-Chlorophenoxy)-1-(1H-imidazolyl)-3,3-dimethyl-2-butanone; Climbazol
Classification: Heterocyclic organic compd.
Empirical: C15H17ClN2O2
Properties: M.w. 292.79
Toxicology: LD50 (oral, rat) 400 mg/kg; harmful by ing.
Uses: Preservative
Manuf./Distrib.: Bayer AG http://www.bayer-ag.de; http://www.bayer.com; Riedel-deHaën
Trade Names: Crinipan® AD
C18 linear alcohol. See Stearyl alcohol
C14 linear alpha olefin. See Tetradecene-1

C16 linear primary alcohol. See Cetyl alcohol
Clorophene. See Chlorophene
Clove
CAS 977007-79-6
FEMA 2327
Synonyms: Cloves
Definition: Eugenia spp.
Properties: Spicy, clove-like aroma; warm flavor
Uses: Natural flavor for pharmaceuticals; carminative
Regulatory: FDA 21CFR §101.22, 184.1257; GRAS; FEMA GRAS; Japan approved; BP, EP compliance
Manuf./Distrib.: Biolandes
Clove bud extract. See Clove (Eugenia caryophyllus) extract
Clove bud oil. See Clove (Eugenia caryophyllus) oil

Clove (Eugenia caryophyllus) extract
CAS 84961-50-2; EINECS/ELINCS 284-638-7
FEMA 2322
Synonyms: Clove bud extract; Clove extract; Eugenia caryophyllus; Eugenia caryophyllus extract

Definition: Extract derived from dried flower buds of the clove, Eugenia caryophyllus; the main constituents are eugenol, caryophyllene, eugenyl acetate and small quantities of furfural and traces of vanillin and methyl aryl ketone

Properties: Clear, pale yel. to yel. liq.; spicy odor; sp. gr. 1.045-1.057; ref. index 1.513-1.533
Uses: Natural flavor for pharmaceuticals; topical anesthetic, carminative

Regulatory: FDA 21CFR §184.1257, GRAS; FEMA GRAS; Japan approved

Clove (Eugenia caryophyllus) oil
CAS 8000-34-8; EINECS/ELINCS 215-185-5
FEMA 2323
Synonyms: Caryophyllus oil; Clove bud oil; Eugenia caryophyllus; Eugenia caryophyllus oil

Definition: Volatile oil distilled from the dried flower buds of Eugenia caryophyllus, contg. 82-87% eugenol, 10% acetyleugenol, caryophyllene, etc.

Properties: Colorless to pale yel. volatile liq.; char. odor and taste of clove; becomes darker and thicker with age; very sol. in strong alcohol, ether, glac. acetic acid; insol. in water; dens. 1.036-1.060; b.p. 250 C; ref. index 1.527-1.538 (20 C)
Toxicology: LD50 (oral, rat) 1370 mg/kg, (skin, rabbit) 1200 mg/kg; mod. toxic by ing. and skin contact; severe skin irritant; TSCA listed

Hazardous Decomp. Prods.: Heated to decomp., emits acrid smoke and fumes
HMIS: Health 1, Flammability 0, Reactivity 0
Uses: Natural flavor for pharmaceuticals
Regulatory: FDA 21CFR §184.1257, GRAS; FEMA GRAS
Chemical Component Cross-Reference

vapors

Storage: Keep cool, well closed; protect from light

Uses: Natural flavor and adjuvant for pharmaceuticals, buccals, orals; carminative in treatment of flatulence; local anesthetic (toothache); counterirritant

Regulatory: FDA 21CFR §184.1257, GRAS; 27CFR §21.65, 21.151; FEMA GRAS; Council of Europe listed; FDA approved for buccals, orals; BP, EP compliance; Canada DSL

Manuf./Distrib.: Clover (Trifolium pratense) extract; Clover blossom extract; Clove extract; Clove leaf oil; Cobaltous dichloride; Cobalt chloride; Cobalt muriate; Carboxymethylcellulose sodium; Carboxymethylcellulose anhydrous; Methylchloroisothiazolinone.†

†=pharmaceutical grade

Synonyms: Clover blossom extract; Clover extract; Clover tops extract; Clover tops, red, extract solid; Trifolium pratense; Trifolium pratense extract

Definition: Extract of the flowers of Trifolium pratense

Uses: Natural flavor for pharmaceuticals

Regulatory: FDA 21CFR §182.20, GRAS; FEMA GRAS

Manuf./Distrib.: Bio-Botanica http://www.biobotanica.com; Carrubba http://www.carrubba.com

Clove. See Clove

CMC: CMC sodium salt. See Carboxymethylcellulose sodium

Coal naphtha. See Benzene

Cobalt chloride (INCI); Cobalt (II) chloride. See Cobalt chloride (ous)

Cobalt chloride (ous)

CAS 7646-79-9 (anhyd.); EINECS/ELINCS 231-589-4

Synonyms: Cobalt chloride (INCI); Cobalt (II) chloride; Cobalt dichloride; Cobalt muriate; Cobaltous chloride; Cobaltous dichloride

Classification: Inorganic salt

Empirical: Cl₂Co

Formula: CoCl₂

Properties: Blue powd. or cryst.; turns pink on exposure to moist air; sol. in water, alcohols, acetone, ether, glycerol, pyridine, polar org. solvs.; m.w. 129.83; dens. 3.367 (25/4 C); m.p. 724 C; b.p. 1049 C; dec. 400 C on long heating in air; sublimes @ 500 C in HCl gas

Toxicology: LD₅₀ (oral, rat) 80 mg/kg, (IV, rat) 20 mg/kg, (IP, mouse) 49 mg/kg; LDLo (subcut., mouse) 100 mg/kg; poison by ing., skin contact, IP, IV, subcut. routes; mod. toxic to humans by ing.; may cause death in children; human systemic effects by ing. (anorexia, goiter, wt. loss); experimental carcinogen, teratogen, reproductive effects; tumorigen; human mutagenic data; TSCA listed

Precaution: Incompat. with metals (e.g., sodium, potassium)

Hazardous Decomp. Prods.: Heated to decomp., emits toxic fumes of Cl⁻

Storage: Hygroscopic

Clove extract. See Clove (Eugenia caryophyllus) extract

Clove leaf oil; Clove leaf oil Madagascar. See Clove (Eugenia caryophyllus) leaf oil

Clove bud extract; Clove extract; Clove tops extract; Cobaltous chloride; Cobaltous dichloride; Carboxymethylcellulose sodium; Carboxymethylcellulose anhydrous; Methylchloroisothiazolinone.

Clove (Trifolium pratense) extract

CAS 85085-25-2; EINECS/ELINCS 285-356-7

FEMA 2326
Chemical Component Cross-Reference

†=pharmaceutical grade

Cobalt dichloride. See Cobalt chloride (ous)

Cobalt gluconate
CAS 71957-08-9; EINECS/ELINCS 276-206-1
Synonyms: Gluconic acid, cobalt salt
Definition: Cobalt salt of gluconic acid
Empirical: C_{12}H_{22}CoO_{14}
Properties: Powd.; sol. in cold water; m.w. 449.3
Toxicology: Irritant by skin contact, ing., or inh.

Precaution: Keep away from heat and sources of ignition; ground all equipment containing this material; do not breathe in dust; wear dust respirator, protective gloves, and lab coat
HMIS: Health 1, Flammability 1, Reactivity 0
Storage: Store in a tightly closed container in a cool, well-ventilated area
Uses: Mineral source for pharmaceuticals

Manuf./Distrib.: Adept Sol’ns.; Alfa Chem

Cobalt muriate; Cobaltous chloride; Cobaltous chloride anhydrous; Cobaltous dichloride. See Cobalt chloride (ous)

Cocamide DEA
CAS 8051-30-7; 61791-31-9; 68603-42-9; EINECS/ELINCS 263-163-9; 271-657-0
Synonyms: Amides, coco, N,N-bis (2-hydroxyethyl) coco amides; N,N-Bis (2-hydroxyethyl) coco fatty acid amide; Coco DEA; Coconut acid diethanolamide; Coconut acid polydiethanolamide (2:1 type); Coconut acid superamide (1:1 type); Coconut diethanolamide; Cocoyl diethanolamide; Diethanolamine coconut fatty acid condensate

Definition: Ethanolamides of coconut acid
Formula: RCO–N(CH₂CH₂OH)₂, RCO– represents the coconut acid radical

Properties: Amber liq.

TSCA listed
Uses: Detergent, thickener, emulsifier, foam booster/stabilizer, wetting agent, solubilizer for pharmaceuticals, topicals
Features: Mild

Regulatory: FDA 21CFR §172.710, 173.322 (0.2% max.), 175.105, 176.180, 176.210, 177.120, 177.2260, 177.2800; FDA approved for topicals; Canada DSL

Manuf./Distrib.: Cosmetic Supplies USA

Cocamide MEA
CAS 68140-00-1; 68606-27-3; EINECS/ELINCS 268-770-2
Synonyms: Coconut acid monoethanolamide; Coconut fatty acid monoethanolamide; Coconut monoethanolamide; N-(2-Hydroxyethyl) coco fatty acid amide

Definition: Mixture of ethanolamides of coconut acid

Formula: RCO–NHCH₂CH₂OH, RCO– represents the coconut acid radical

Properties: Cream flakes to ylsh. waxy solid; sol. in ethanol, propylene glycol, oleyl alcohol; disp. in min. oil, IPM; insol. in water; m.p. 70-74 C
Chemical Component Cross-Reference

TSCA listed

†=pharmaceutical grade

Uses: 
Surfactant, emulsifier for pharmaceuticals

Regulatory: 
Canada DSL

Trade Names: 
Aminoxid WS 35; Tegamine® Oxide WS-35

Trade Names Containing: 
Anti-Dandruff Usnate AO

Cocamidopropyl betaine

CAS 61789-40-0; 70851-07-9; 83138-08-3;
EINECS/ELINCS 263-058-8; 274-923-4

Synonyms: 
CADG; Cocamidopropyl dimethyl glycine; N-Cocamidopropyl-N,N-dimethylglycine, hydroxide, inner salt; 
Cocoamido betaine; Cocamidopropyl betaine; N-(Cocoamidopropyl)-N,N-dimethyl-N-carboxymethyl ammonium, betaine; N-(3-Cocoamidopropyl)-N,N-dimethyl-N-carboxymethylammonium hydroxide, inner salt; Coconut oil amidopropyl betaine; Cocoyl amide propyldimethyl glycine; 1-Propanaminium, 3-amino-N-(carboxymethyl)-N,N-dimethyl-N-coco acyl derivs., hydroxides, inner salts

Classification: 
Zwitterion (inner salt)

Uses: 
Ointment base, surfactant, emulsifier, foam booster/stabilizer for pharmaceuticals

Regulatory: 
Canada DSL

Manuf./Distrib.:

Cocamidopropyl dimethylamine oxide. See Cocamidopropylamine oxide

Cocamidopropyl dimethyl glycine; N-Cocamidopropyl-N,N-dimethylglycine, hydroxide, inner salt. See Cocamidopropyl betaine

(3-Cocamidopropyl) (2-hydroxy-3-sulfopropyl)dimethyl quaternary ammonium compounds, hydroxides, inner salt. See Cocamidopropyl hydroxysultaine

Cocamidopropyl hydroxysultaine
CAS 68139-30-0; 70851-08-0; EINECS/ELINCS 268-761-3
Synonyms: (3-Cocamidopropyl) (2-hydroxy-3-sulfopropyl)dimethyl quaternary ammonium compounds, hydroxides, inner salt; Cocamidopropyl sulfobetaine; 1-Propanaminium, N-(3-aminopropyl)-2-hydroxy-N,N-dimethyl-3-sulfo-N-coco acyl derivs., hydroxides, inner salts
Classification: Zwitterion (inner salt)
Formula: RCHO–
NH(CH2)3N+(CH3)2CH2CHOHCH2SO3–, where RCHO– represents fatty acids derived from coconut oil
Properties: Amphoteric
Toxicology: TSCA listed
Uses: Surfactant in eczema baby wash preps.
Regulatory: Canada DSL

Cocamidopropyl PG-dimonium chloride
Synonyms: Cocamidopropyl phosphatidyl PG-dimonium chloride; Phosphoric acid, triester with N-(2,3-dihydroxypropyl)-N,N-dimethyl-3-[(1-oxococo-alkyl) amino-1-propanaminium chloride
Classification: Quaternary ammonium salt
Formula: [RCO–
NH(CH2)3N(CH3)2CH2CHOHCH2O]3PO • 3Cl–, where RCO– rep. fatty acids from coconut oil
Properties: Cationic
Uses: Substantivity agent, cleanser, foaming agent, hydrotopre, visc. builder, wetting agent, surf. tension reducer, bactericide, anti-irritant for ophthalmic preps.
Trade Names: Colalipid C

Cocoa butter. See Cocoa (Theobroma cacao) butter

**Cocoa (Theobroma cacao) butter**

**CAS**: 8002-31-1; EINECS/ELINCS 310-127-6

**Synonyms**: Cacao butter; Cacao resinoin; Cocoa butter; Theobroma cacao; Theobroma cacao butter; Theobroma oil

**Definition**: Ylsh. wh. solid obtained from roasted seeds of *Theobroma cacao*; contains chiefly glycerides of stearic, palmitic, oleic, arachidic, and linoleic acids

**Properties**: Ylsh.-wh. solid, chocolate-like odor and taste; very sol. in ether, chloroform, benzene, petrol. ether; sol. in boiling abs. alcohol; sl. sol. in alcohol; insol. in water; dens. 0.858-0.864 (100/25 C); m.p. 30-35 C; iodine no. 33-42; sapon. no. 188-195; ref. index 1.4537-1.4585 (40 C)

**Toxicology**: May cause allergic skin reactions

**Precaution**: Combustible

**HMIS**: Health 0, Flammability 1, Reactivity 0

**Storage**: Preserve in well-closed containers

**Uses**: Emollient, carrier, filler, ointment and suppository base in pharmaceuticals, orals, rectals, topicals; lubricant in massage oils and suppositories because it melts at body temp.; protectant in hemorrhoidal prods.; skin conditioner, occlusive solvent, skin protectant for OTC drug prods., sun preps.

**Regulatory**: FDA 21CFR §182.20, GRAS; FDA approved for orals, rectals, topicals; NF, BP compliance; Canada DSL

**Cocobenzyl dimethylammonium chloride**. See Cacoalkonium chloride

**Cocobetainamido amphotropionate**

**CAS**: 100085-64-1; EINECS/ELINCS 309-206-8

**Classification**: Zwitterion (inner salt)

**Formula**: RN+(CH3)2CH2CONHCH2CH2NCH2CH2OHCH2COO– where R rep. alkyl groups derived from coconut oil

**Properties**: Amphoteric/cationic

**Uses**: Surfactant for pharmaceuticals, skin disinfectants

**Trade Names**: Rewoteric® QAM 50

**Coco-betaine**

**CAS**: 68424-94-2; 85409-25-2; EINECS/ELINCS 270-329-4

**Synonyms**: Alkyl dimethyl betaine; Betaines, coco alkylammonium; Cocoamino betaine; Cocodimethylammonium betaine; Coco dimethyl betaine; Coco dimethyl glycin; Coconut betaine; Dimethylcocoamino betaine; Quaternary ammonium compds., carboxymethyl (coco alkyl) dimethyl hydroxides, inner salts

**Classification**: Zwitterion (inner salt)

**Formula**: RN+(CH3)2CH2CONHCH2CH2NCH2CH2OHCH2COO– where R rep. alkyl groups derived from coconut oil

**Properties**: Amphoteric

**Toxicology**: TSCA listed

**Uses**: Surfactant, detergent, wetting agent,
Chemical Component Cross-Reference
emulsifier, foaming agent, solubilizer, biocide, bactericide, conditioner, visc. builder in pharmaceuticals, therapeutic shampoos

Regulatory: Canada DSL
Trade Names: Amonyl® 265 BA; Dehyton® AB-30; Paxogen COB

Cocobetaine. See Cocoyl sarcosine

Coco caprylate/caprate
Synonyms: Alcohols, coco, mixed esters with octanoic and decanoic acids
Definition: Mixture of esters of coconut alcohol with caprylic acid and capric acid
Uses: Emollient, carrier, superfatting agent in pharmaceuticals
Trade Names: Cetiol® LC

Coco DEA. See Cocamide DEA

Cocodimethylamino betaine. See Cocobetaine

Coco dimethyl benzyl ammonium chloride. See Cocoaalkonium chloride

Coconut (Cocos nucifera) oil

CAS 8001-31-8; EINECS/ELINCS 232-282-8
UN 1363 (DOT)

Synonyms: Coconut butter; Coconut oil; Coconut palm oil; Cocos nucifera; Copra oil

Classification: Saturated fat

Definition: Fixed oil obtained from kernels of seeds of Cocos nucifera

Properties: Wh. fatty solid or liq., sweet nutty taste; sol. in oxygenated and chlorinated solvs.; very sol. in chloroform, ether, CS2; pract. insol. in water; dens. 0.903 (0/4 C); m.p. 21-27 C; acid no. < 6; iodine no. 8-9.5; sapon. no. 255-258; ref. index 1.4485-1.4495; flash pt. (CC) 550 F; surf. tens. 33.4 dynes/cm

Toxicology: May cause allergic skin reaction; TSCA listed

Precaution: Flamm. solid when exposed to heat or flame; may spontaneously heat and ignite if stored wet and hot

Hazardous Decomp. Prods.: CO2 from combustion

HMIS: Health 0, Flammability 1, Reactivity 0

Uses: Emollient, solvent, superfatting agent, clouding agent, detergent, wetting agent, emulsifier, excipient, ointment base, coating agent for pharmaceuticals, orals, topicals, massage creams; delivery/absorp. enhancement; diluent

Regulatory: FDA 21CFR §175.105, 175.300, 176.200, 176.210, 177.2800, 182.70; GRAS; FDA approved for orals, topicals; BP, EP compliance; Canada DSL

Manuf./Distrib.: ABITEC

Trade Names: Pureco® 76

Trade Names Containing: Aloe Vera Oil CG; Dry Vitamin D3 Type 100 SD

Classification: Quaternary ammonium salt
Formula: [RN(CH₃)₃]⁺Cl⁻, R rep. alkyl groups from coconut oil
Properties: Cationic
Toxicology: TSCA listed
Uses: Antiseptic and preservative
Regulatory: Canada DSL
Trade Names: Daistat LM 80

Cocoamidopropyl betaine
N₂Cocoyl-L-arginine ethyl ester DL-pyrrolidone carboxylic acid salt. See PCA ethyl cocoyl arginate
Cocoyl diethanolamide. See Cocamide DEA
Cocoyl glucoside. See Coco glucoside
N-Coco-N-methyl glycine. See Cocoyl sarcosine

Cocoyl sarcosine
CAS 68411-97-2; EINECS/ELINCS 270-156-4
Synonyms: Cocobetaine; N-Cocoyl-N-methyl glycine; N-Cocoyl sarcosine; N-Methyl-N-(1-coconut alkyl) glycine; N-Methyl-N-(1-oxococnut alkyl) glycine
Definition: N-cocoyl deriv. of sarcosine
Empirical: C₁₅H₂₉NO₃
Formula: C₁₅H₂₉CON(CH₃)CH₂COOH
Properties: Yel. liq.; dens. 0.970; m.p. 22-28 C; anionic
Toxicology: No known toxicity; TSCA listed
Uses: Foam booster/stabilizer, emulsifier, lubricant in pharmaceuticals; to make antienzyme agents for toothpaste to prevent decay
Regulatory: FDA 21CFR §178.3130; Canada DSL

Cod liver oil
CAS 8001-69-2; EINECS/ELINCS 232-289-6
Synonyms: Gadidae oil; Gadi lecur; Gadus morrhua; Gadus morrhua liver oil; Morrhua oil
Definition: Fixed oil expressed from fresh livers of Gadus morrhua and other species of codfish, contg. vitamins A and D, omega 3 fatty acid
Properties: Amber thin oily liq., sl. fishy odor and taste; sol. in ether, chloroform, ethyl acetate, carbon disulfide, petroleum ether; sl. sol. in alcohol; negligible sol. in water; dens. 0.918-0.927; iodine no. 145-180; sapon. no. 180-192; ref. index 1.4705-1.4745
Toxicology: No known toxicity
Precaution: Combustible
Hazardous Decomp. Prods.: CO₂ from combustion
HMIS: Health 1, Flammability 0, Reactivity 0
Uses: Medicine (vitamin A and D content); dietary supplement in pharmaceuticals; in skin ointments and special skin creams to promote healing; protectant in diaper rash ointment
Regulatory: BP, EP compliance; FDA 21CFR §175.105, 176.200, 176.210, 177.2800; GRAS for use in dietary supplements; Canada DSL

Manuf./Distrib.: Alfa Chem† http://www.alfachem1.com; Allan http://www.allanchem.com; Amerol http://www.amerolcorp.com; Arista Ind.†
Coenzyme R. See d-Biotin

Coenzyme Q10
CAS 303-98-0
Synonyms: CoQ10; Ubiquinone
Uses: Antioxidant and dietary supplement
Regulatory: USP
Trade Names: Coenzyme Q10 10% DC

Caffeine. See Caffeine

Cognac oil. See Ethyl heptanoate; Cognac oil, green or white

Cognac oil, green or white
CAS 8016-21-5; EINECS/ELINCS 232-403-4
FEMA 2331 (green), 2332 (white)
Synonyms: Cognac oil; 'Ethyl oenanthate'; Wine yeast oil
Properties: Yel. liq.; char. cognac aroma with a fruity note; sol. in alcohol; insol. in water; sp.gr. 0.87; ref. index 1.4275-1.4295 (20 C)
Hazardous Decomp. Prods.: Heated to decomp., emits acrid smoke and fumes
Uses: Natural flavor for pharmaceuticals
Regulatory: FDA 21CFR §182.50, GRAS; FEMA GRAS; Canada DSL

Cola acuminata nut extract; Cola acuminata; Cola acuminata nut extract; Cola nut extract. See Kola (Cola acuminata) extract

Collagen
CAS 9007-34-5; EINECS/ELINCS 232-697-4
Synonyms: Collagen fiber; Ossein
Definition: Fibrous protein derived from connective tissues in animals; a polypeptide contg. three peptide chains; rich in proline and hydroxyproline
Properties: Clear to hazy, colorless; m.w. ≈ 130,000
Storage: Sensitive to humidity; keep under argon
Uses: Forms tissue-compat. sheets and fibers for medical and health-care prods., e.g., implants, skin substitutes; fiber in sutures
Regulatory: BP compliance (collagen suture, sterile reconstituted)
Collagen fiber. See Collagen
Collagen hydrolysates. See Hydrolyzed collagen

Collodion
UN 2059 (DOT)
Synonyms: Pyroxylin solution
Classification: Polymer
Definition: A solution of pyroxylin (chiefly nitrocellulose) (6%) in ether (70%) and alcohol (24%)
Properties: Colorless or pale yel. syrupy liq., ether odor; immiscible with water; sp.gr. 0.765-0.775; b.p. 83 C; flash pt. -45 C
Toxicology: May cause allergic skin reactions; TSCA listed
Precaution: DOT: Flamm. liq.; very dangerous fire hazard exposed to heat, flames, oxidizers
Hazardous Decomp. Prods.: Heated to decom., emits toxic fumes of NOx
NFPA: Health 1, Flammability 4, Reactivity 0
Storage: Store in a cool place, below 30 C
Uses: Solvent for drugs, corn removers; coating wounds and abrasions; embedding tissues for sectioning

Coltsfoot extract; Coltsfoot flowers extract. See Coltsfoot (Tussilago farfara) extract

Coltsfoot (Tussilago farfara) extract
CAS 84625-50-3; EINECS/ELINCS 283-420-9
Synonyms: Coltsfoot extract; Coltsfoot flowers extract; Tussilago farfara; Tussilago farfara extract
Definition: Extract of the flowers of the coltsfoot, Tussilago farfara
Uses: Botanical
Manuf./Distrib.: Bio-Botanica http://http://www.biobotanica.com; Carrubba
http://http://www.carrubba.com; Grau Aromatics
Trade Names Containing: Hair Complex Aquosum

Columbian spirits. See Methyl alcohol
Colza oil. See Canola oil; Rapeseed (Brassica campestris) oil
Commiphora myrrha; Commiphora myrrha oil. See Myrrh (Commiphora myrrha) oil
Common salt. See Sodium chloride
Common thyme. See Thyme (Thymus vulgaris)
Concentrated acetic acid. See Acetic acid, glacial
Concrete rose Bulgarian; Concrete rose Morocco; Concrete rose Turkish. See Rose oil

**Coomassie violet. See Acid violet 49**

**Copernica cerefera wax; Copernicia cerifera wax. See Carnauba (Copernica cerifera) wax**

**Copolyvidon. See Copolyvidone**

**Copolyvidone**

**CAS 25086-89-9**

**Synonyms:** Copolyvidon; Copolyvidonum; Copovidon; Copovidone; Copovidonum; Vinylpyrrolidone-vinyl acetate copolymer; 1-vinyl-2-pyrrolidone and vinyl acetate copolymer (6:4 ratio by mass)

**Classification:** Polyvinylpyrrolidone-vinylacetate copolymer

**Definition:** Copolymer obtained by free-radical polymerization of 6 parts of vinylpyrrolidone and 4 parts vinyl acetate in IPA

**Formula:** \((\text{C}_6\text{H}_9\text{NO})_n(\text{C}_4\text{H}_6\text{O}_2)_m\)

**Properties:** Wh. powd.; water-sol.

**Uses:** Binder for pharmaceutical direct compression and compacting; binder for wet granulation in tablets, capsules, and granules; film-former for tablet coatings and topical sprays

**Regulatory:** JSPI, BP, EP, DAB compliance; Canada DSL

**Manuf./Distrib.:** BASF [http://www.bASF.com](http://www.bASF.com);
Blagden Spec. Chems. Ltd [http://www.blagdenspecchem.co.uk](http://www.blagdenspecchem.co.uk)

**Trade Names Containing:** Kollicoat® IR White

**Copolyvidonum. See Copolyvidone; PVP/VA copolymer**

**Copolyvidone; Copovidone; Copovidonum. See Copolyvidone**

**Copper**

**CAS 7440-50-8; EINECS/ELINCS 231-159-6**

**UN 3089 (DOT)**

**Synonyms:** Arwood copper; Bronze powder; CI 77400; Copper-airborne; Copper bronze; Copper-milled; Copper slag-airborne; Copper slag-milled; Gold bronze; Kafar copper; Pigment metal 2; Raney copper

**Classification:** Element

**Empirical:** Cu

**Properties:** Reddish lustrous metal; insol. in water, org. solvs.; sol. in nitric acid (reacts); very slowly sol. with HCl, sulfuric acid; a.w. 63.54; dens. 8.96; vapor pressure 1 mm Hg (1628 C); m.p. 1083 C; b.p. 2595 C; high elec. and thermal conductivity

**Toxicology:** ACGIH TLV/TWA 0.2 mg/m³

**Uses:** Ingd. in dental amalgam; dietary supplement

**Regulatory:** FDA 21CFR §193.90, herbicides residue tolerance 1 ppm in potable water; GRAS for use in dietary supplements; Japan restricted; Canada DSL

**Copper chloride; Copper (II) chloride; Copper (2+) chloride; Copper (II) chloride (1:2). See Copper chloride (ic)**

**Copper chloride (ic)**

**CAS 7447-39-4 (anhyd.); 10125-13-0 (dihydrate); EINECS/ELINCS 231-210-2**
**Chemical Component Cross-Reference**

**UN 2802 (DOT)**

**Synonyms:** Copper bichloride; Copper chloride; Copper (II) chloride; Copper (2+) chloride; Copper (II) chloride (1:2); Cupric chloride; Cupric dichloride

**Classification:** Halide

**Empirical:** $\text{Cl}_2\text{Cu}$

**Properties:** Yel. to brown powd. (anhyd.), grn. needles (dihydrate); sol. in water, alcohol, acetone; m.w. 134.45 (anhyd.), 170.48 (dihydrate); dens. 3.39 (anhyd., 25/4 C), 2.54 (dihydrate); partially dec. above 300 C; m.p. 498 C

**Toxicology:** LD50 (IP, mouse) 7400 µg/kg, (IV, mouse) 17,500 µg/kg; poison by IV and IP routes; irritating to eyes, skin, respiratory system; experimental reproductive effector; mutagenic data; TSCA listed

**Precaution:** Corrosive; can react violently with K and Na

**Hazardous Decomp. Prods.:** Heated to decom., emits toxic fumes of Cl–

**Storage:** Hygroscopic

**Uses:** Micronutrient in biosynthesis

**Regulatory:** Canada DSL

**Copper digluconate; Copper di-D-gluconate; Copper gluconate (INCI). See Copper gluconate (ic)**

**Copper gluconate (ic)**

**CAS 527-09-3; EINECS/ELINCS 208-408-2**

**Synonyms:** Bis (D-gluconato) copper; Copper digluconate; Copper di-D-gluconate; Copper gluconate (INCI); Cupric gluconate

**Definition:** Copper salt of gluconic acid; avail. as the monohydrate

**Empirical:** $\text{C}_12\text{H}_22\text{CuO}_{14}$

**Formula:** \([\text{HOOC–CHOHCHHOCH}_{2}\text{OH}]^2\text{Cu}^{++}\)

**Properties:** Lt. blue powd., odorless; sol. in water; sl. sol. in alcohol; insol. in acetone, ether; m.w. 453.85

**Toxicology:** TSCA listed

**Hazardous Decomp. Prods.:** Heated to decom., emits acrid smoke and irritating fumes

**Uses:** Mineral source, nutrient, dietary supplement for pharmaceuticals; synergist; mouth deodorant ingred.

**Regulatory:** FDA 21CFR §184.1260, GRAS; Japan approved (0.6 mg/L as copper in milk); Canada DSL

**Trade Names:** Gluconal® CU-P

**Trade Names Containing:** Descote® Copper Glucone 20%
Copper (I) iodide. See Copper iodide (ous)

Copper iodide (ous)
CAS 7681-65-4; EINECS/ELINCS 231-674-6
Synonyms: Copper (I) iodide; Cuprous iodide
Empirical: Cul
Properties: Wh. cryst. powd.; sol. in ammonia and KI sol’ns.; insol. in water; dens. 5.653; m.p. 606 C; b.p. 1290 C
Toxicology: TSCA listed

Copper metallic powder
CAS 7440-50-8; EINECS/ELINCS 231-159-6
UN 3089
Synonyms: CI 77400; Copper metallic powder
Definition: Color additive consisting of powdered metallic copper
Empirical: Cu
Properties: Powd.; a.w. 63.54
Toxicology: TLV 0.2 mg/m³ (fume), 1 mg/m³ (dusts and mists); poison to humans by ingestion; TSCA listed
Precaution: DOT: Flamm. solid
Uses: Colorant for external pharmaceuticals, eye use
Regulatory: FDA 21CFR §73.1647, 73.2647; exempt from certification, permanently listed for drug use

Copper phthalocyanine blue
CAS 147-14-8; EINECS/ELINCS 205-685-1
Synonyms: CI 74160; Copper phthalocyanine; Phthalo blue; Phthalocyanine blue; Pigment blue 15 (INCI)
Definition: Bright blue copper phthalocyanine pigment; avail. in the α or β crystal modification
Empirical: C_{32}H_{16}CuN_{8}

CAS  8008-52-4; 84775-50-8; EINECS/ELINCS 446-229-6; 84775-50-8
FEMA 2334
Synonyms: Coriander oil; Coriandrum sativum; Coriandrum sativum oil
Definition: Volatile oil from steam distillation of ripe fruit of Coriandrum sativum, contg. d-linalool and its acetate
Properties: Colorless to pale yel. liq., char. odor and taste; very sol. in chloroform, ether, gluc. acetic acid; sol. in stronger alcohol; pract. insol. in water; dens. 0.863-0.875 (25/25 C); ref. index 1.4620-1.4720 (20 C)
Toxicology: LD50 (oral, rat) 4130 mg/kg; mod. toxic by ing.; skin irritant; can cause allergic reaction, esp. of the skin; mutagenic data; TSCA listed
Hazardous Decomp. Prods.: Heated to decomp., emits acrid smoke and fumes
Storage: Keep cool, well closed; protect from light
Uses: Natural flavor for pharmaceuticals, orals; aromatic; stimulant; carminative
Regulatory: FDA 21CFR §182.20, GRAS; FEMA GRAS; Japan approved; Council of Europe listed; FDA approved for orals; BP, EP compliance; Canada DSL

Corn bran.  See Corn (Zea mays) bran
Corn dextrin.  See Dextrin
Corn gluten amino acids
CAS 65072-01-7
Synonyms: Glutens, corn, hydrolyzed; Maize gluten amino acids
Definition: Mixt. of amino acids resulting from the complete hydrolysis of corn gluten protein
Uses: Botanical in pharmaceuticals
Regulatory: Canada DSL
Trade Names Containing: Aminogluten MG
Corn oil.  See Corn (Zea mays) oil
Corn oil, nonsaponifiable fraction.  See Corn (Zea mays) oil unsaponifiables
Corn oil PEG-6 complex.  See Corn oil PEG-6 esters
**Corn oil PEG-6 esters**

**CAS:** 61789-25-1  
**Synonyms:** Corn oil PEG-6 complex  
**Definition:** Complex mixture formed from the transesterification of corn oil and PEG-6  
**Properties:** Nonionic  
**Uses:** Emollient, emulsifier, solubilizer, cosurfactant in pharmaceuticals; amphiphilic agent improving drug delivery  
**Features:** Hydrophilic  
**Trade Names:** Labrafil® M 2125 CS

**Corn oil PEG-8 esters**

**CAS:** 61789-25-1  
**Definition:** Complex mixture formed from transesterification of corn oil and PEG-8  
**Properties:** Nonionic  
**Uses:** Bioavailability enhancer, solubilizer, excipient, emulsifier for pharmaceuticals  
**Features:** Hydrophilic  
**Trade Names:**

**Corn oil unsaponifiables.** See Corn (Zea mays) oil unsaponifiables

**Corn starch.** See Starch; Corn (Zea mays) starch

**Corn starch/acrylamide/sodium acrylate copolymer**  
**Definition:** Polymer of corn starch, acrylamide, and sodium acrylate monomers  
**Uses:** Excipient in pharmaceuticals

**Corn starch, pregelatinized**

**CAS:** 9005-25-8  
**Synonyms:** Maize starch, pregelatinized  
**Uses:** Tablet binder, tablet disintegrant, and tablet and/or capsule diluent in pharmaceuticals  
**Use Level:** 3-15% (tablet disintegrant)

**Corn sugar syrup.** See Corn syrup

**Corn syrup**

**CAS:** 8029-43-4; 977004-12-8; EINECS/ELINCS 232-436-4  
**Synonyms:** Corn sugar syrup; Glucose syrup; Syrups, hydrolyzed starch  
**Definition:** Mixture of D-glucose, maltose, and maltodextrins; obtained by partial hydrolysis of corn starch  
**Properties:** Aq. syrup  
**Toxicology:** May cause allergic reaction  
**Uses:** Sweetener in pharmaceuticals, orals; texturizer; carrier; in aspirin; dietary supplement  
**Regulatory:** FDA 21CFR §131.112, 133.124, 133.178, 133.179, 145.3, 145.134, 145.180, 146.3, 146.145, 146.146, 155.200, 169.175, 184.1865, GRAS; cleared by MID to flavor sausage, hamburger, meat loaf, luncheon meat, chopped or pressed ham; for use alone at 2% or in combination with corn syrup solids or glucose syrup, with combination totaling 2% on dry basis; approved for orals

Corn (Zea mays) silk
CAS 977000-79-5
FEMA 2335
Definition:  Fresh styles and stigmas of Zea mays
Properties:  Nearly odorless; faintly sweetish
taste
Hazardous Decomp. Prods.:  Heated to
decomp., emits acrid smoke and irritating
fumes
Uses:  Natural flavor for pharmaceuticals
Regulatory:  FDA 21CFR §184.1262, GRAS;
FEMA GRAS
Manuf./Distrib.:  Am. Ingreds.

Corn (Zea mays) starch
CAS 9005-25-8; 53112-52-0; 75138-75-9;
977050-51-3; EINECS/ELINCS 232-679-6
Synonyms:  Corn starch; Maize starch; Starch,
corn; Starch, zea mays; Zea mays; Zea
mays starch
†=pharmaceutical grade

Definition:  Granules obtained from mature grains
of corn, Zea mays; carbohydrate polymer
consisting primarily of amyllose and
amylopectin
Formula:  (C6H10O5)n
Properties:  Wh. powd. or spheroidal gran.; pract.
insol. in cold water and in ethanol (95%)
Toxicology:  LD50 (IP, mouse) 6600 mg/kg;
primary irritant; no ill effects unless
massive doses are given; use of powd. in
rubber gloves may cause contact urticaria;
TSCA listed
HMIS:  Health 0, Flammability 1, Reactivity 0
Uses:  Excipient, filler, tablet-disintegrant in
pharmaceuticals, solid oral medicinals;
source of glucose; thickener; lubricant in
surgical and examination gloves; dietary
supplement
Regulatory:  FDA 21CFR §175.105, 178.3520,
182.70, 182.90; GRAS for use in dietary
supplements

Cottonseed oil; Cottonseed oil, winterized.
See Cottonseed (Gossypium) oil

Coumaric acid; cis-o-Coumaric acid lactone.
See Coumarin

Coumarin
CAS 91-64-5; EINECS/ELINCS 202-086-7
UN 2811 (DOT)
Synonyms: 1-Benzopyran-2-one; 2H-1-
Benzopyran-2-one; 2H-1-Benzopyran, 2-
oxo-; Benzopyrone; 1,2-Benzopyrone;
Benzo-α-pyrone; Chromen-2-one; Cinnamic
acid, o-hydroxy-, 8-lactone; Coumaric acid;
cis-o-Coumarinic acid lactone; cis-o-
Coumarinic acid lactone; Coumarinic
anhydride; Cumarin; o-Hydroxycinnamic
acid lactone; o-Hydroxycinnamic acid
8-lactone; o-Hydroxycinnamic lactone; 2-Oxo-
1,2-benzopyran; 2-Propenoic acid, 3-(2-
hydroxyphenyl)-8-lactone; Tonka bean
camphor

Classification: Aromatic lactone

Empirical: C9H6O2

Properties: Colorless to wh. cryst., flakes, or
powd.; pleasant, fragrant odor resembling
vanilla beans; burning taste; freely sol. in
alcohol, chloroform, ether, oils; sol. inaq.
alkali, oxygenated and chlorinated solvs.; sl.
sol. in hot water; m.w. 146.15; dens. 0.935;
m.p. 68-70 C; b.p. 298 C; flash pt. 162 C

Toxicology: LD50 (oral, rat) 293 mg/kg, (IP,
mouse) 220 mg/kg, (subcut., mouse) 242
mg/kg; TDLo (oral, man, 17 wks
intermittent) 87 mg/kg; toxic by inh., ing.,
skin contact; possible risk of irreversible
effects; skin/eye/respiratory/digestive tract
irritant; may cause somnolence, analgesia,
enzyme inhibition, wt. loss, change in
blood/tissue levels, CNS depression;
possible carcinogen; tumorigen;
reproductive effector; mutagen; target
organ: liver; TSCA listed

Precaution: Incompat. with strong oxidizing
agents, strong acids, strong bases; avoid
incompat. materials, light, excess heat

Hazardous Decomp. Prods.: COx
HMIS: Health 1, Flammability 1, Reactivity 0
Storage: Light-sensitive; store in cool, dry, well-
ventilated area, in tightly closed container,
protected from light, away from incompat.
substances

Uses: Fragrance, flavor in pharmaceuticals
Regulatory: FDA 21CFR §189.130; prohibited
from direct addition or use in human food;

C10-12 pareth-3
CAS 66455-15-0 (generic)
Classification: Linear alcohol ethoxylate
Properties: Nonionic
Uses: Emulsifier
Trade Names: Alfonic® 1012-2.5; Alfonic® 1012-3

C12-13 pareth-4
CAS 66455-14-9 (generic)
Classification: Linear alcohol ethoxylate
Definition: PEG ether of a mixt. of syn. C12-13 fatty alcohols with avg. 4 moles EO
Properties: Nonionic
Uses: Emulsifier
Trade Names: Volpo L4

C12-13 pareth-23
CAS 66455-14-9 (generic)
Classification: Linear alcohol ethoxylate
Definition: PEG ether of a mixt. of syn. C12-13 fatty alcohols with avg. 23 moles EO
Properties: Nonionic
Toxicology: TSCA listed
Uses: O/w emulsifier, solubilizer for pharmaceuticals
Manuf./Distrib.: Aldrich http://www.sigma-aldrich.com; Fluka http://www.sigma-aldrich.com; Sigma http://www.sigma-aldrich.com/belgium
Trade Names: Volpo L23

C12-15 pareth-12
CAS 68131-39-5 (generic)
Synonyms: Pareth-25-12; PEG-12 C12-15 alcohol
Classification: Linear alcohol ethoxylate
Definition: PEG ether of a mixt. of syn. C12-15 fatty alcohols with avg. 12 moles EO
Properties: Nonionic
Toxicology: TSCA listed
Uses: Emollient in pharmaceuticals; coupling agent; solubilizer
Trade Names: Rhodasurf® LA-12

C12-16 pareth-1
CAS 68551-12-2 (generic)
Classification: Linear alcohol ethoxylate
Properties: Nonionic
Uses: Surfactant
Trade Names: Alfonic® 1216-1.5

C12-15 pareth-2 phosphate
CAS 149919-05-1
Synonyms: Pareth-25-2 phosphate; PEG-2-C12-15 alcohols phosphate

†=pharmaceutical grade

Definition: Complex mixt. of esters of phosphoric acid and C12-15 pareth-2
Properties: Anionic
Uses: Surfactant, emulsifier, solubilizer for pharmaceuticals
Trade Names: TDP-2

C12-15 pareth-8 phosphate
Definition: Mixt. of esters of phosphoric acid and a syn. C12-15 ethoxylated alcohol with avg. 8 moles EO
Properties: Anionic
Uses: Surfactant, emulsifier, solubilizer for pharmaceuticals
Trade Names: TDP-8

C12-15 pareth-10 phosphate
Definition: Mixt. of esters of phosphoric acid and a syn. C12-15 ethoxylated alcohol with avg. 10 moles EO
Properties: Anionic
Uses: Emulsifier and solubilizer for pharmaceuticals
Trade Names: TDP-10

CPC. See Cetylpyridinium chloride

C18 polycarbamyl polyglycolol ester
Uses: Thickener, stabilizer
Trade Names Containing: Aculyn® 46

C11 primary alcohol. See Undecyl alcohol

Cranberry (vaccinium macrocarpon) fruit extract
CAS 91770-88-6; EINECS/ELINCS 294-875-8
Uses: Botanical extract
Regulatory: Canada DSL
Manuf./Distrib.: Carrubba http://www.carrubba.com
Trade Names Containing: Origanox™ WS-CR

Crataegus extract; Crataegus monogina. See Crataegus monogina extract

Crataegus monogina extract
CAS 8057-51-0; 84603-61-2; 90045-52-6; EINECS/ELINCS 283-262-0; 289-914-0
Synonyms: Crataegus extract; Crataegus monogina; Crataegus monogyna extract; Crataegus oxyacantha extract; Esbericard; Hawthorne berries extract; Hawthorne extract
Definition: Extract of the berries of the crataegus, Crataegus monogina
Toxicology: LD50 (oral, rat) 33,800 mg/kg; LDLo (IV, rat) 1000 mg/kg; poison by IV route; mildly toxic by ing.
Uses: Botanical, tonic, astringent
Chemical Component Cross-Reference

Creosol; p-Cresol. See 2-Methoxy-4-methylphenol

2-Cresol. See o-Cresol

3-Cresol. See m-Cresol

4-Cresol. See p-Cresol

m-Cresol
CAS 108-39-4; EINECS/ELINCS 203-577-9

UN 2076 (DOT); FEMA 3530

Synonyms: 3-Cresol; m-Cresylic acid; 1-Hydroxy-3-methylbenzene; 3-Hydroxytoluene; m-Hydroxytoluene; 3-Methylphenol; m-Methylphenol; m-Oxytoluene; m-Toluol

Classification: Phenol

Empirical: C7H8O

Formula: CH3C6H4OH

Properties: Colorless to yel. liq., phenolic odor; sol. in water, ethanol, chloroform, diethyl ether, acetone, benzene, other common org. solvs.; misc. with glycerin; m.w. 108.14; dens. 1.034 (20/4 C); vapor pressure 1 mm (52 C); m.p. 12 C; b.p. 203 C; flash pt. (CC) 86 C; ref. index 1.5400

Toxicology: LD50 (oral, rat) 2.02 g/kg, (skin, rat) 1100 mg/kg, (IP, mouse) 168 mg/kg; poison by ing., IV, IP, subcut. routes; mod. toxic by skin contact; chronic poisoning may occur from oral ingestion or absorption through the skin; severe eye
and skin irritant; can produce digestive disturbances, skin eruptions, jaundice, uremia; human mutagenic data; TSCA listed
Precaution: Corrosive; combustible; mod. explosive in form of vapor when exposed to heat or flame
NFPA: Health 3, Flammability 2, Reactivity 0
Storage: Hygroscopic; sensitive to light and air
Uses: Antimicrobial, preservative in pharmaceuticals, injectables, eye lotions, antiseptic, insulin prods.; medicinal flavor
Properties: Wh. cryst. mass, phenolic odor; solvs.; sl. sol. in water; m.w. 108.14; dens. 1.048; vapor pressure 1 mm (38.2 C); m.p. 30-34 C; b.p. 191 C; flash pt. 178 F
Toxicology: ACGIH TLV/TWA 5 ppm; LD50 (oral, rat) 1.8 g/kg, (IP, mouse) 25 mg/kg, (skin, rabbit) 301 mg/kg; poison by ing., skin contact, subcut., IV, and IP routes; severe skin and eye irritant; questionable carcinogen; experimental neoplastigen; TSCA listed
Precaution: Combustible exposed to heat or flames; mod. explosive as vapor when exposed to heat or flame

Chemical Component Cross-Reference

ο-Cresol
CAS 95-48-7; EINECS/ELINCS 202-423-8
UN 2076 (DOT); FEMA 3480
Synonyms: 2-Cresol; o-Cresylic acid; 1-Hydroxy-2-methylbenzene; o-Hydroxytoluene; 2-Methylphenol; o-Methylphenol; Orthocresol; o-Oxytoluene; o-Tolual
Classification: Aromatic phenol
Empirical: C7H8O
Properties: Cryst. or liq.; darkens on exposure to air or light; m.w. 108.14; dens. 1.048; vapor pressure 1 mm (38.2 C); m.p. 30-34 C; b.p. 191 C; flash pt. 178 F
Toxicology: ACGIH TLV/TWA 5 ppm; LD50 (oral, rat) 121 mg/kg, (skin, rat) 620 mg/kg; highly toxic; poison by ing., inh., subcut., IV, IP routes; readily absorbed through skin; severe eye and skin irritant; experimental neoplastigen; questionable carcinogen; human mutagenic data; target organs:

ν=pharmaceutical grade
nerves, lungs, liver, kidneys; TSCA listed
Precaution: Corrosive; flamm. exposed to heat, flame, or oxidizers

### Croscarmellose sodium

**CAS:** 74811-65-7  
**INS:** E468

**Synonyms:** Croscarmellose (INCI); Crosslinked carboxymethyl cellulose; Crosslinked cellulose gum; Crosslinked CMC; Crosslinked NaCMC; Crosslinked sodium carboxymethylcellulose; Crosslinked sodium CMC; Sodium salt of crosslinked carboxymethyl ether cellulose

**Definition:** Sodium salt of thermally crosslinked carboxymethylated cellulose

**Properties:** Wh. to off-wh. free-flowing powd.; odorless; partly sol. in water; insol. in ether, alcohol, org. solvs.; pH 5-7 (1% disp.); hydrophilic

**Storage:** Hygroscopic; store in a well-closed container in a cool, dry, place

**Uses:** Disintegrant in pharmaceutical tablets, capsules, and granules; in intramuscular injectables, orals

**Use Level:** 2% w/w used in tablets prepared by direct compression; 3% w/w in tablets prepared by a wet-granulation process

**Regulatory:** FDA approved for intramuscular injectables, orals; USP/NF compliance

**Trade Names:** Ac-Di-Sol®; Kiccolate® ND-2HS; Kiccolate® ND-200; Pharmacei® XL; Primellose®; Solutab®; Vivasol®

**Chemical Component Cross-Reference †=pharmaceutical grade**

- **CAS:** 74811-65-7  
- **Synonyms:** Crospovidone; Crospovidinum

**Definition:** Water-insol. synthetic crosslinked homopolymer of N-vinyl-2-pyrrolidinone

**Empirical:** (C₉H₇NO)ₖ

**Properties:** Wh. powd., faint odor; insol. in water but swells instantly on contact; insol. in most org. solvs.

**Toxicology:** TSCA listed

**Storage:** Hygroscopic

**Uses:** Excipient, suspension stabilizer in pharmaceuticals, implants, ophthalmics, orals, injectables (percutaneous), topicals; tablet binder, disintegrant

**Regulatory:** FDA approved for implants, ophthalmics, orals, injectables, topicals; USP/NF, BP, EP compliance

Chemical Component Cross-Reference

Polyplasdone® INF-10
Polyplasdone® XL; Polyplasdone® XL-10
Trade Names Containing: Ludipress®

Crosslinked carboxymethyl cellulose; Crosslinked cellulose gum; Crosslinked CMC; Crosslinked NaCMC. See Croscarmellose sodium
Crosslinked PVP. See Crospovidone
Crosslinked sodium carboxymethylcellulose; Crosslinked sodium CMC. See Croscarmellose sodium
Croton bark oil; Croton cascarilla; Croton cascarilla oil; Croton eluteria; Croton eluteria oil; Croton extract. See Cascarilla oil

Crotonic acid
CAS 3724-65-0; EINECS/ELINCS 223-077-4
UN 2823 (DOT)

Synonyms: 2-Butenoic acid; α-Butenoic acid; α-Crotonic acid; β-Methacrylic acid; 3-Methylacrylic acid; β-Methylacrylic acid
Classification: Aliphatic organic compd.
Definition: The commercial prod. is a mixt. of the cis and trans isomers
Empirical: C₄H₆O₂
Formula: CH₃CH:CHCOOH
Properties: Colorless needle-like cryst.; sol. 555 g/l in water (20 C); m.w. 86.09; dens. 1.018 (15/4 C); vapor pressure 0.19 mm (20 C); m.p. 72 C; b.p. 185 C; flash pt. (COC) 190 F
Toxicology: LD₅₀ (oral, rat) 1000 mg/kg, (IP, rat) 100 mg/kg, (subcut., mouse) 3590 mg/kg, (skin, rabbit) 600 mg/kg; poison by IP route; mod. toxic by ing., skin contact, subcut. routes; powerful irritant to tissue; corrosive; TSCA listed
Precaution: DOT: Corrosive material; flamm. when exposed to heat and flames
Hazardous Decomp. Prods.: Heated to decomp., emits acrid smoke and irritating fumes
NFPA: Health 3, Flammability 2, Reactivity 0
Uses: Synthesis of drugs
Regulatory: Canada DSL
Manuf./Distrib.: Aldrich http://www.sigma-aldrich.com; Allchem Ind.

Cubeb oil. See Cubeb (Piper cubeba) oil
Cubeb (Piper cubeba) oil
CAS 8007-87-2; 90082-59-0; EINECS/ELINCS 290-148-4
FEMA 2339

Synonyms: Cubeb oil; Cubebs oil; Java pepper; Piper cubeba; Piper cubeba fruit oil; Piper cubeba oil; Tailed pepper
Definition: Volatile oil from unripe fruit of Piper cubeba, contg. dipentene, cadinene, cubeb camphor
Properties: Colorless, pale grn. or ylsh. liq.; spicy odor; sl. acrid taste; sol. in fixed oils, min. oil, 10 vols alcohol; misc. with abs. alcohol, chloroform; insol. in water, glycerin, propylene glycol; dens. 0.905-0.925; ref. index 1.492-1.502 (20 C)
Toxicology: Skin irritant
Hazardous Decomp. Prods.: Heated to decomp., emits acrid smoke and irritating fumes
Storage: Keep cool, well closed; protect from light
Uses: Natural flavor for pharmaceuticals; stimulant and diuretic for chronic bladder

### Cucumber (Cucumis sativus) extract

**CAS**: 89998-01-6; EINECS/ELINCS 289-738-4  
**Synonyms**: Cucumber extract; Cucumis sativus; Cucumis sativus extract  
**Definition**: Extract of the fruit of the cucumber, Cucumis sativus  
**Properties**: Water wh.; cucumber odor; completely sol. in water; flash pt. 144 F  
**Uses**: Emollient  
**Trade Names Containing**: Uninontan U 34

### Cucumber (Cucumis sativus) extract

**Cumaldehyde**. See Cuminaldehyde  
**o-Cumaric aldehyde methyl ether**. See o-Methoxycaffemaldehyde  
**Cuminin**. See Cuminar

### Cumene

**CAS**: 98-82-8  
**UN**: 1918 (DOT)  
**Synonyms**: Benzene isopropyl; Isopropylbenzene; Isopropyl benzol; (1-Methylethyl) benzene; 2-Phenylpropane  
**Empirical**: C₈H₁₂  
**Formula**: C₈H₆(CH(CH₃)₂  
**Properties**: Colorless liq.; misc. with oxygenated and chlorinated solvs.; insol. in water; m.w. 120.21; dens. 0.864 (20/4 C); vapor pressure 10 mm Hg (38.3 C); m.p. -96 C; b.p. 152 C; flash pt. 111 F  
**Toxicology**: ACGIH TLV/TWA 50 ppm (skin); LD₅₀ (oral, rat) 1400 mg/kg, (skin, rabbit) 12,300 mg/kg; TCL₀ (inh., human) 200 ppm; mod. toxic by ing.; mildly toxic by inh., skin contact; primary eye and skin irritant; human systemic effects; may cause somnolence, antipsychotic effects, irritability; potential narcotic action; CNS depressant; human mutagen; TSCA listed  
**Precaution**: Flamm. exposed to heat or flame; can react with oxidizing materials; violent reaction with HNO₃, chlorosulfonic acid, oleum  
**NFPA**: Health 2, Flammability 3, Reactivity 1  
**Uses**: Solvent in pharmaceuticals  
**Regulatory**: HAP; Canada DSL  
**Cumene aldehyde**. See 2-Phenylpropanal  
**Cumene, monosulfo deriv., sodium salt**. See Sodium cumenesulfonate  
**o-Cumenol**. See o-Isopropylphenol  
**p-Cumenol**. See p-Isopropylphenol  
**3-p-Cumeryl-2-methylpropionaldehyde**. See Cyclamen aldehyde  
**3-(p-Cumeryl) propionaldehyde**. See 3-(p-Isopropylphenyl) propionaldehyde  
**Cumic alcohol**. See Cuminic alcohol  
**Cumic aldehyde**. p-Cumic aldehyde, Cuminal. See Cuminaldehyde  
**Cumin alcohol**. See Cuminic alcohol  
**Cuminaldehyde**  
**CAS**: 122-03-2; EINECS/ELINCS 204-516-9  
**FEMA**: 2341  
**Synonyms**: Cumaldehyde; Cuminic aldehyde; p-Cuminic aldehyde; Cuminic aldehyde; p-Cuminic aldehyde; 4-Isopropylbenzaldehyde; p-Isopropylbenzaldehyde; p-Isopropylbenzenecarboxaldehyde; 4-(1-Methylethyl) benzaldehyde  
**Definition**: Constituent of eucalyptus, myrrh, cassia, cumin, and other essential oils or prepared synthetically  
**Empirical**: C₁₀H₁₂O  
**Formula**: (CH₃)₂CH₆H₄CHO  
**Properties**: Colorless to ylsh. oily liq., strong
Chemical Component Cross-Reference

Persistent aromatic odor, acrid burning taste; sol. in alcohol, ether, toluene, oxygenated solvs.; pract. insol. in water; m.w. 148.21; dens. 0.978 (20 C); b.p. 235-236 C; flash pt. (COC) 104 C; ref. index 1.5301 (20 C)

Toxicology: LD50 (oral, rat) 1390 mg/kg, (skin, rabbit) 2800 mg/kg; mod. toxic by ing. and skin contact; skin and eye irritant; TSCA listed

Precaution: Combustible liq.

Hazardous Decomp. Prods.: Heated to decomp., emits acrid smoke and irritating fumes

Uses: Synthetic flavor for pharmaceuticals; pharmaceutical intermediate

Regulatory: FDA 21CFR §172.515; FEMA GRAS; Canada DSL

Manuf./Distrib.: Augustus Oils Ltd
http://www.augustus-oils.ltd.uk; Degussa AG/Health & Nutrition; Fluka
http://www.rctreatt.com; SAFC Specialties http://www.safcspecialties.com

Trade Names: Cumal

Cumin (Cuminum cyminum) oil
CAS 8014-13-9; 84775-51-9; EINECS/ELINCS 283-881-6
FEMA 2343

Synonyms: Cumin oil; Cumin seed oil; Cuminum cyminum; Cuminum cyminum fruit oil; Cuminum cyminum oil; Cummin

Definition: Volatile oil from fruit of Cuminum cyminum, contg. 30-40% cuminaldehyde, p-cymene, β-pinene, dipentene

Properties: Colorless to yel. liq.; strong odor; sol. in fixed oils, min. oil, 10 vols 80% alcohol; very sol. in chloroform, ether, glycerin, propylene glycol; pract. insol. in water; dens. 0.900-0.935 (25/25 C); ref. index 1.4950-1.5090 (20 C)

Toxicology: LD50 (oral, rat) 2500 mg/kg, (skin, rabbit) 3560 mg/kg; mod. toxic by ingestion and skin contact; skin irritant; mutagenic data; TSCA listed

Precaution: Combustible

Hazardous Decomp. Prods.: Heated to decomp., emits acrid smoke and fumes

Storage: Keep cool, well closed; protect from light

Uses: Natural flavor for pharmaceuticals

Use Level: 0.4% max. as cumin oil in skin cosmetics exposed to sunlight

Cuminic acetaldehyde. See p-Isopropylphenylacetaldehyde

Cuminic alcohol
CAS 536-60-7; EINECS/ELINCS 208-640-4
FEMA 2933

Synonyms: Cuminic alcohol; Cumin alcohol; Cuminal; Cuminaly alcohol; Cumyl alcohol; p-Cymen-7-ol; 4-Isopropylbenzyl alcohol; p-Isopropylbenzyl alcohol

Classification: Aromatic alcohol

Empirical: C10H14O

Formula: CH2OH(C6H4)CH(CH3)2

Properties: Colorless liq.; caraway-like odor; aromatic taste; sol. in oxygenated solvs.; misc. with alcohol, ether; insol. in water; m.w. 150.22; dens. 0.982; b.p. 135-136 C (26 mm); flash pt. > 230 F; ref. index 1.522 (24 C)

Toxicology: LD50 (oral, rat) 1020 mg/kg, (skin, rabbit) 2500 mg/kg; harmful liq.; mod. toxic by ing. and skin contact; primary skin irritant; TSCA listed

Precaution: Combustible

Hazardous Decomp. Prods.: Heated to decomp., emits acrid smoke and irritating fumes

Uses: Synthetic flavor for pharmaceuticals

Features: Strong cumin caraway spicy herbal leather odor

Regulatory: FDA 21CFR §172.515; FEMA GRAS; Canada DSL

Manuf./Distrib.: Lluch Essence http://www.lluch-essence.com; R.C. Treatt
Cupric chloride; Cupric dichloride. See Copper chloride (ic)

Cupric gluconate. See Copper gluconate (ic)

Cupric sulfate. See Cupric sulfate pentahydrate

Cupric sulfate anhydrous

Cupric sulfate anhydrous

CAS 7758-98-7; EINECS/ELINCS 231-847-6

UN NA 9109 (DOT); INS519

Synonyms: Basic copper sulfate; Blue copper; Bluestone; Blue vitriol; Copper monosulfate; Copper sulfate; Copper (II) sulfate; Copper sulfate (ic); Cupric sulfate (INCI); Sulfuric acid, copper salt

Classification: Inorganic copper salt

Definition: Copper salt of sulfuric acid; avail. commercially as the monohydrate or pentahydrate

Empirical: CuO₄S

Formula: CuSO₄

Properties: Blue cryst. or cryst. gran. or powd.; odorless; nauseous metallic taste; sol. in water; insol. in alcohol; m.w. 159.60; dens. 3.6; m.p. dec. @ 560 C

Toxicology: LD50 (oral, rat) 300 mg/kg; strong irritant; experimental tumorigen; human poison, systemic effects by ingestion: gastritis, diarrhea, nausea, vomiting, hemolysis; eye irritant; no known skin toxicity; mutagen; TSCA listed

Environmental: Hazardous to the environment

Precaution: Reacts violently with hydroxylamine, magnesium

†=pharmaceutical grade

Hazardous Decomp. Prods.: Heated to decomp. emits toxic fumes of SOx

HMIS: Health 2, Flammability 0, Reactivity 0

Storage: Hygroscopic

Uses: Fungicide in pharmaceuticals, orals; antidote to phosphorus

Regulatory: FDA 21CFR §184.1261, GRAS, 582.80; FDA approved for orals; SARA reportable; Japan approved (0.6 mg/L as copper in milk); BP, EP compliance; Canada DSL

Cupric sulfate pentahydrate

CAS 7758-99-8; EINECS/ELINCS 231-847-6

Synonyms: Blue copperas; Bluestone; Blue vitriol; Copper sulfate (ic); Copper sulfate
Chemical Component Cross-Reference

pentahydrate; Copper (II) sulfate
pentahydrate; Cupric sulfate

Classification: Inorganic copper salt
Empirical: CuO₄S • 5H₂O
Formula: CuSO₄ • 5H₂O

Properties: Blue cryst. or cryst. gran. or powd., odorless; nauseous metallic taste; very sol. in water; sol. in methanol, glycerin; sl. sol. in ethanol; m.w. 249.70; dens. 2.286 (15.6/4 C); converts to monohydrate @ 110 C and to anhyd. salt @ 250 C

Toxicology: LD₅₀ (oral, rat) 960 mg/kg;
TLV/TWA 1 mg (Cu)/m³; harmful; irritating;
human poison by unspecified routes;
moderately toxic by ing.; corrosive to eyes;
nontoxic dermally or by inh.; nonirritating
to skin; tumorigen, mutagen

Environmental: LC₅₀ (rainbow trout) ≥ 1 mg/l;
toxic to bees

Precaution: Absorbs moisture readily when exposed to air

Hazardous Decomp. Prods.: Heated to decomp., emits toxic fumes of SO₃

HMIS: Health 2, Flammability 0, Reactivity 0

Storage: Store @ R.T.

Uses: In pharmaceuticals

Regulatory: FDA 21CFR §184.1261, GRAS

Cyanocobalamin

CAS 68-19-9; EINECS/ELINCS 200-680-0

Synonyms: Cyanocobal(v) alamin; Dimethylbenzimidazolycobamide; 5,6-Dimethylbenzimidazolycobamide cyanide; α-(5,6-Dimethylbenzimidazolyl)cyanoocobamide; Vitamin B12; Vitamin B₁₂ complex

Classification: Organic compd.

Definition: Produced commercially from cultures of Streptomyces griseus

Empirical: C₆₃H₆₈CoN₁₄O₁₄P

Properties: Dark red cryst. or powd., odorless and tasteless; sol. in alcohol; sl. sol. in water; insol. in acetone, ether, chloroform; m.w. 1355.55

Toxicology: LDLo (subcut., mouse) 3 mg/kg,
(IP, mouse) 1364 mg/kg; poison by subcut.
route, mod. toxic by IP route; no hazard to
humans from excessive ing. in foods;
experimental teratogen, reproductive
effects; TSCA listed

Hazardous Decomp. Prods.: Heated to decomp., emits very toxic fumes of PO₃,
NOₓ

Storage: Very hygroscopic; light-sensitive

Uses: Vitamin B₁₂ source; dietary
supplement; nutrient; hematopoietic
vitamin; medicine (blood and nerve
treatment)

Regulatory: FDA 21CFR §101.9, 107.100,
172.775, 184.1945, GRAS; Japan approved;

Chemical Component Cross-Reference

**Empirical:** C_{13}H_{18}O
**Properties:** Colorless to pale yel. liq.; strong floral odor; sol. in fixed oils, 1 vol. of 80% alcohol; insol. in propylene glycol, glycerin, water; dens. 0.946-0.952; ref. index 1.503-1.508
**Toxicology:** LD_{50} (oral, rat) 3810 mg/kg; mod. toxic by ing.; human skin irritant; TSCA listed
**Hazardous Decomp. Prods.:** Heated to decomps., emits acrid smoke and irritating fumes
**NFPA:** Flammability 2, Reactivity 0
**Uses:** Synthetic flavor for pharmaceuticals
**Regulatory:** FDA 21CFR §172.515; FEMA GRAS; Canada DSL

---

**Empirical:** C_{10}H_{16}O
**Properties:** Colorless to pale cl. yel. liq.; sol. in alcohol; insol. in water; m.w. 152.24; dens. 0.943; b.p. 62–63 C (3 mm); flash pt. > 230 F
**Uses:** Flavor in medicines
**Features:** Minty fruity green odor
**Regulatory:** FEMA GRAS; Canada DSL

---

**Cyclomaltoheptaose**
Cyclic polysaccharide comprised of six to eight glucopyranose units
**Empirical:** C_{42}H_{70}O_{35}
**Properties:** Bioavailability enhancer, solubilizer, taste/odor/color masking agent, stabilizer, antioxidant for pharmaceuticals
**Uses:** Antioxidant for pharmaceuticals
**Synonyms:** Cyclodextrin; Cyclomaltooctaose; Cyclomaltohexaose

---

**Cyclodextrin**
Cyclic volatile methyl siloxane
**Empirical:** C_{36}H_{60}O_{30}
**Properties:** Biodegradable, non-mutagenic, non-carcinogenic, good solubility, nontoxic, non-irritant
**Uses:** Bioavailability enhancer, solubilizer, taste/odor/color masking agent, stabilizer, antioxidant for pharmaceuticals
**Synonyms:** Alphadex; Betadex; Cycloamylose; α-Cyclodextrin; β-Cyclodextrin; γ-Cyclodextrin; Cyclohexamylose; Cyclohexaglucosan; Cyclomaltohexaose; Cyclomaltohexoase; Schardinger α-dextrin
**Definition:** Cyclic polysaccharide comprised of six to eight glucopyranose units

---

**Cyclohydroxyolefin (Cyclohexene-1-carboxaldehyde)**
**Empirical:** C_{13}H_{18}O
**Properties:** Colorless to pale yel. liq., strong floral odor; sol. in fixed oils, 1 vol. of 80% alcohol; insol. in propylene glycol, glycerin, water; dens. 0.946-0.952; ref. index 1.503-1.508
**Toxicology:** LD_{50} (oral, rat) 3810 mg/kg; mod. toxic by ing.; human skin irritant; TSCA listed
**Hazardous Decomp. Prods.:** Heated to decomps., emits acrid smoke and irritating fumes
**NFPA:** Flammability 2, Reactivity 0
**Uses:** Synthetic flavor for pharmaceuticals
**Regulatory:** FDA 21CFR §172.515; FEMA GRAS; Canada DSL

---

**β-Cyclocitral**
**CAS:** 432-25-7; EINECS/ELINCS 207-081-3
**FEMA:** 3639
**Synonyms:** 2,6,6-Trimethyl-1 and 2-cyclohexen-1-carboxaldehyde

---

**α-Cyclocitrylidene acetone**
**See:** α-Ionone
**β-Cyclocitrylideneacetone**
**See:** β-Ionone
**α-Cyclocitrylidenebutanone**
**See:** Methyl α-ionone
**α-Cyclocitrylidene butanone**
**See:** α-Isomethylionone
**β-Cyclocitrylidenebutanone**
**See:** Methyl β-ionone
**α-Cyclocitrylidenedemethyl ethyl ketone**
**See:** Methyl α-ionone

---

**Cyclodextrin**
**CAS:** 7585-39-9 (β); 10016-20-3 (α); 17465-86-0 (γ); EINECS/ELINCS 231-493-2 (β); 233-007-4 (α); 241-482-4 (γ)
**Synonyms:** Alphadex; Betadex; Cycloamylose; α-Cyclodextrin; β-Cyclodextrin; γ-Cyclodextrin; Cyclohexamylose; Cyclohexaglucosan; Cyclomaltohexaose; Cyclomaltohexoase; Schardinger α-dextrin
**Definition:** Cyclic polysaccharide comprised of six to eight glucopyranose units

α-Cyclodextrin. See Cyclodextrin

β-Cyclodextrin

CAS 7585-39-9; EINECS/ELINCS 231-493-2

Synonyms: Betadex; Cycloheptaamylose; Cycloheptaglucosan; Cyclomaltoheptaose; Schardinger β-dextrin

Definition: Cyclic polysaccharide comprised of 7 glucopyranosyl units, produced by action of the enzyme cycloglucosyltransferase on partially hydrolyzed starch

Empirical: C42H70O35

Uses: Sequestrant, bioavailability enhancer, solubilizer, taste/odor/color masking agent, stabilizer, antioxidant for pharmaceuticals

Regulatory: USP/NF compliance; Canada DSL

| Precaution: DOT: Flamm. liq.; dangerous fire hazard exposed to heat or flame; reactive with oxidizers; mod. explosion hazard as vapor exposed to flame; explosive mixed |

Cyclohexene oxide
CAS 286-20-4; EINECS/ELINCS 206-007-7
Synonyms: Bicyclo [4.1.0] heptane, 7-oxa-; CCHO; Cyclohexane, 1,2-epoxy-; Cyclohexane oxide; Cyclohexene epoxide; Cyclohexene-1-oxide; 1,2-Cyclohexene oxide; Epoxycyclohexane; 1,2-Epoxycyclohexane; 7-Oxabicyclo [4.1.0] heptane; Tetramethyleneoxirane
Empirical: C₆H₁₀O
Properties: Colorless liq.; strong odor; sol. in alcohol, ether, acetone; insol. in water; m.w. 98.16; sp.gr. 0.97; m.p. -40 C; b.p. 129-130 C; flash pt. 27 C; ref. index 1.4503
Toxicology: LD50 (oral, rat) 1090 µl/kg, (IP, rat) 549 mg/kg, (IM, mouse) 1 g/kg, (skin, rabbit) 630 µl/kg; toxic; harmful by inh., ing., skin contact; may cause eye/skin irritation; readily absorbed through skin; may cause tremors; target organ: lungs; tumorigenic; mutagen; TSCA listed
Precaution: Flamm.; dangerous fire risk; vapor may travel considerable distance to source of ignition and flash back; container explosion may occur under fire conditions; explosion limits 1.15-12.36%; incompat. with acids, bases, oxidizing agents
Hazardous Decomp. Prods.: CO, CO₂; emits toxic fumes under fire conditions
Storage: Keep tightly closed; store in cool, dry place
Uses: Hydrogen halide or inorg. halide scavenger for pharmaceuticals
Regulatory: Canada DSL

Cyclohexyl acetate
CAS 622-45-7; EINECS/ELINCS 210-736-6
UN 2243 (DOT); FEMA 2349
Synonyms: Acetic acid cyclohexyl ester; Adronol acetate; Cyclohexanol acetate; Cyclohexanyl acetate; Hexalin acetate; Hexaline acetate
Classification: Acetic acid ester
Empirical: C₆H₁₄O₂
Formula: CH₃COOC₆H₁₁
Properties: Colorless to pale yel. oily liq.; fruity odor; sol. in alcohol, ether; pract. insol. in water; m.w. 142.20; sp.gr. 0.966; b.p. 172-173 C; flash pt. (CC) 58 C; ref. index 1.4400-1.4410
Toxicology: LD50 (oral, rat) 6730 mg/kg, (skin, rabbit) 10 g/kg; mod. toxic by subcut. route; mildly toxic by ing., skin contact; human systemic effects by inh. (conjunctiva irritation, unspecified respiratory changes); systemic irritant to humans; TSCA listed
Precaution: Flamm. exposed to heat or flame; incompat. with strong oxidizing agents (increases risk of fire and explosion), strong bases (decomp. can occur)
Hazardous Decomp. Prods.: Cyclohexanol, acetic acid; heated to decomp., emits acrid smoke and irritating fumes
NFPA: Health 1, Flammability 2, Reactivity 0
Storage: Store in cool, dry, well-ventilated area out of direct sunlight; avoid generating mist; ground drums and bond transfer containers
Uses: Synthetic flavor and fragrance for pharmaceuticals
Features: Fruity flavor
Regulatory: FDA 21CFR §172.515; FEMA GRAS; Japan approved as flavoring; Canada DSL

Cyclohexylacetic acid. See Cyclohexanecetic acid

Cyclohexylacetic acid allyl ester. See Ally cyclohexanacetate

Cyclohexyl 2-aminobenzoate; Cyclohexyl o- aminobenzoate. See Cyclohexyl anthranilate

3-(Cyclohexylamino)-propanesulfonic acid

CAS 1135-40-6; EINECS/ELINCS 214-492-1

Synonyms: CAPS; 3-(Cyclohexylamino)-1-propanesulfonic acid; N-Cyclohexyl-3-aminopropanesulfonic acid; 1-Propanesulfonic acid, 3-(cyclohexylamino)-

Classification: Zwitterionic amino acid

Empirical: C₉H₁₉NO₃S

Properties: Wh. solid; m.w. 221.35; m.p. 324 C; flash pt. > 110 C

Toxicology: LD₅₀ (oral, quail) > 316 mg/kg; avoid contact with skin and eyes; TSCA listed

Storage: Store in cool, dry, well-ventilated area away from incompatible substances.

Uses: Biological buffer for cell cultures, biological productions, electrophoresis, diagnostics, tissue studies.

Trade Names: CAPS

3-(Cyclohexylamino)-1-propanesulfonic acid; N-Cyclohexyl-3-aminopropanesulfonic acid. See 3-(Cyclohexylamino)-propanesulfonic acid

Cyclohexyl anthranilate

CAS 7779-16-0; EINECS/ELINCS 231-920-2

FEMA 2350

Synonyms: Benzoic acid, 2-amino-, cyclohexyl ester; Cyclohexyl 2-aminobenzoate; Cyclohexyl o-aminobenzoate

Definition: Obtained from isatoic anhydride and cyclohexanol

Empirical: C₁₃H₁₇NO₂

Properties: Colorless to pale yel. visc. liq.; mild orange blossom odor, grape-like taste; sol. in alcohol, methanol, toluene; sol. 10-50 mg/ml in DMSO; insol. in water; m.w. 170.25; dens. 0.957; b.p. 212 C; flash pt. 173 F; ref. index 1.4490

Toxicology: LD₅₀ (skin, guinea pig) > 5 g/kg; LDLo (oral, rat) 5 g/kg; low toxicity by ing. and skin contact; TSCA listed

Precaution: Combustible liq.

Hazardous Decomp. Prods.: Heated to decomp., emits acrid smoke and irritating vapors

Uses: Synthetic flavor for pharmaceuticals

Features: Apple-, pineapple-like flavor

Regulatory: FDA 21CFR §172.515; FEMA GRAS; Japan approved as flavoring; Canada DSL

Cy clohexyl cinnamate
CAS 7779-17-1; EINECS/ELINCS 231-921-8
FEMA 2352
Synonyms: Cinnamic acid, cyclohexyl ester;
Cyclohexyl β-phenylacrylate; Cyclohexyl 3-
phenylpropenoate; 2-Propenoic acid, 3-
phenyl-, cyclohexyl ester
Definition: Obtained from cyclohexanol and
 cinnamic acid
Empirical: C_{15}H_{18}O_2
Properties: Colorless visc. liq., solidifies when
cold; fruity peach cherry almond odor; sol. in
alcohol; insol. in water; m.w. 230.31; sp.gr.
1.054; m.p. 82.4 C; b.p. 195 C (12 mm)
Uses: Synthetic flavor for pharmaceuticals
Features: Fruity peach cherry almond odor
Regulatory: FDA 21CFR §172.515; FEMA
GRAS; Canada DSL
Manuf./Distrib.: Advanced Synthesis Tech.
http://www.advancedsynthesis.com
Degussa AG/Health & Nutrition

Cy clohexyl disulfide; (Cyclohexyl) disulfide.
See Dicyclohexyl disulfide

Cy clohexylethyl acetate
CAS 21722-83-8; EINECS/ELINCS 244-543-3
FEMA 2348
Synonyms: Acetic acid, cyclohexylethyl ester;
Cyclohexaneethanol, acetate; Cyclohexane
ethyl acetate; 2-Cyclohexylethyl acetate;
Hexahydrophenethyl acetate;
Hexahydrophenyl ethyl acetate
Classification: Nonaromatic ester
Definition: Obtained from the corresponding
alcohol by acetylation with sodium acetate in
acetic acid sol'n.
Empirical: C_{10}H_{18}O_2
Formula: CH_3CO_2CH_2CH_2C_6H_{11}
Properties: Colorless liq., sweet fruity odor; sol.
in alcohol; insol. in water; m.w. 170.25; dens.
0.950; b.p. 104 C (15 mm); acid no. 1.0 max.;
flash pt. 178 F; ref. index 1.4470
Toxicology: May be irritating to eyes and skin;
TSCA listed
Environmental: Prevent contamination of soil,
ground- and surf. water
Precaution: Flamm. liq.; incompat. with strong
oxidizing agents
Hazardous Decomp. Prods.: CO, CO_2, water
NFPA: Health 1, Flammability 2, Reactivity 1
Storage: Store in cool, well-ventilated area; keep
away from ignition sources and open flame
Uses: Synthetic flavor for pharmaceuticals
Features: Ether cooling sweet fruity banana
cherry jam odor; slightly cooling, green and
fruity banana taste
Regulatory: FDA 21CFR §172.515; FEMA
GRAS; DOT nonregulated; Canada DSL
Manuf./Distrib.: ABCR http://www.abcr.de
Advanced Synthesis Tech.
http://www.advancedsynthesis.com
Bedoukian Research http://www.bedoukian.com
Degussa AG/Health & Nutrition

Cy clohexyl formate
CAS 4351-54-6; EINECS/ELINCS 224-415-3
FEMA 2353
Synonyms: Cyclohexanol formate;
Cyclohexanyl formate; Formic acid
cyclohexyl ester
Empirical: C_{7}H_{12}O_2
Properties: Colorless liq.; fresh minty cherry-like
odor; sol. in alcohol; insol. in water; m.w.
128.17; sp.gr. 0.990-0.999; b.p. 162-163 C;
flash pt. (CC) 48 C; ref. index 1.4417 (24 C)
Toxicology: May be irritating to eyes and skin;
TSCA listed
Environmental: Prevent contamination of soil,
ground- and surf. water
Precaution: Flamm. liq.; incompat. with strong
oxidizing agents
Hazardous Decomp. Prods.: CO, CO_2, water
NFPA: Health 1, Flammability 2, Reactivity 1
Storage: Store in cool, well-ventilated area; keep
away from ignition sources and open flame
Uses: Synthetic flavor for pharmaceuticals
Features: Ether cooling sweet fruity banana
cherry jam odor; slightly cooling, green and
fruity banana taste
Regulatory: FDA 21CFR §172.515; FEMA

Cy clohexyl isovalerate
CAS 7774-44-9; EINECS/ELINCS 231-874-3
FEMA 2355
Synonyms: Cyclohexyl 3-methylbutanoate
Definition: Synthesized from cyclohexane and
isovaleric acid in the presence of perchloric
acid
Empirical: C_{11}H_{20}O_2
Properties: Liq., apple-banana odor; m.w.
Chemical Component Cross-Reference

†=pharmaceutical grade

Cyclic dimethylsiloxane;
Cyclohexasiloxane, dodecamethyl-;
Cyclopentasiloxane; Cyclopentasiloxane, decamethyl-; Cyclopolydimethylsiloxane;
Cyclotrisiloxane, hexamethyl-;
Decamethylocyclopentasiloxane;
Dodecamethyloclohexasiloxane; Hexamethylocloctrisiloxane; Polydimethylsiloxy cyclics

Definition: Fully methylated cyclic dimethyl polysiloxane

Empirical: \((C_2H_6OSi)_n\)

Formula: \([-\text{CH}_3\text{SiO}—\]_n, avg. n = 3-6

Properties: Insol. in water; completely misc. in lower alcohols and other solvs.

Toxicology: LD50 (skin, rabbit) > 16 ml/kg;

Uses: Water repellent in pharmaceuticals, orals, injectables (percutaneous), topicals;
conditioner, emollient for antiperspirants

Regulatory: FDA approved for orals, injectables, topicals; USP/NF compliance

Classification: Aromatic hydrocarbon

Definition: Obtained chiefly from the wash water of sulfite paper

Empirical: C10H14

Formula: (CH3)2CHC6H4CH3

Properties: Colorless to pale yel. liq., odorless; sol. in alcohol, ether, acetone, benzene, oxygenated and aromatic solvs.; insol. in water; m.w. 134.24; dens. 0.853; m.p. -68 C; b.p. 176 C; flash pt. (CC) 117 F; ref. index 1.489

Toxicology: LD50 (oral, rat) 4750 mg/kg; mildly toxic by ing.; human CNS effects at low doses; skin irritant; mutagenic data; TSCA listed

Precaution: Flamm. or combustible liq.; sl. explosion hazard in vapor form

Hazardous Decomp. Prods.: Heated to decomp., emits acrid smoke and fumes

Uses: Synthetic flavor for pharmaceuticals

Features: Citrus flavor

Regulatory: FDA 21CFR §172.515; FEMA

GRAS; Canada DSL

p-Cymene-7-carboxaldehyde. See p-Isopropylphenylacetaldehyde

2-p-Cymenol. See Carvacrol

3-p-Cymenol; p-Cymen-3-ol. See Thymol

L-Cysteine

CAS 52-90-4; EINECS/ELINCS 200-158-2

FEMA 3263; INS920; E920

Synonyms: L-2-Amino-3-mercaptopropanoic acid; (+)-2-Amino-3-mercaptopropionic acid; α-Amino-β-thiopropionic acid; L-2-Amino-3-thiopropionic acid; Cystein; Cysteine (INCI); 3,3′-Dithiobis (2-amino propanoic acid); β-Mercaptotalanine; L-β-Mercaptotalanine; Tioserine

Classification: A nonessential amino acid

Empirical: C3H7NO2S

Formula: HSCH2CH(NH2)COOH

Properties: Colorless cryst.; sol. in water, ammonium hydroxide, acetic acid; insol. in ether, acetone, benzene, carbon disulfide, CCl4; m.w. 121.16; m.p. 220 C (dec.)

Toxicology: LD50 (oral, rat) 1870 mg/kg, (IP, rat) 1620 mg/kg, (subcut., rat) 1550 mg/kg; mod. toxic by ing., IP, subcut. routes; irritant; harmful solid; human mutagenic data; experimental reproductive effects; TSCA listed

Hazardous Decomp. Prods.: Heated to decomp., emits very toxic fumes of SOx and NOx

Storage: Refrigerate

Uses: Pharmaceutical injectables; biochemical and nutrition research
Chemical Component Cross-Reference

Regulatory: FDA 21CFR §172.320 (2.3% max. by wt.), 184.1271, GRAS; FEMA GRAS; FDA approved for injectables; Canada DSL

L-Cysteine, N-acetyl-. See Acetylcysteine Cysteine chlorhydrate. See Cysteine hydrochloride anhydrous

Cysteine hydrochloride; L-Cysteine hydrochloride. See Cysteine hydrochloride anhydrous

Cysteine hydrochloride anhydrous
CAS 52-89-1; EINECS/ELINCS 200-157-7 INS920

Synonyms: L-2-Amino-3-mercaptopropanoic acid monohydrochloride; Cysteine chlorhydrate; Cysteine HCl (INCI); Cysteine hydrochloride; L-Cysteine hydrochloride anhydrous; L-Cysteine monohydrochloride

Classification: Hydrochloride of an amino acid

Empirical: C₃H₇NO₂S • HCl

Formula: HSCH₂CH(NH₂)COOH • HCl

Properties: Wh. cryst. powd., char. acetic taste; sol. in water, alcohol; m.w. 157.62; m.p. 175°C (dec.)

Toxicology: LD₅₀ (IP, mouse) 1250 mg/kg, (IV, mouse) 771 mg/kg; mod. toxic by IP, IV routes; mutagenic data; TSCA listed

Hazardous Decomp. Prods.: Heated to decomp., emits very toxic fumes of NO₅, SO₅, and Cl⁻

Uses: Antioxidant, reducing agent in pharmaceuticals, orals; dietary supplement; nutrient

Regulatory: FDA 21CFR §172.320, limitation 2.3%, 184.1272, GRAS; Japan approved; Europe listed; UK approved; FDA approved for orals; BP, EP compliance; Canada DSL
L-Cysteine hydrochloride anhydrous. See Cysteine hydrochloride anhydrous.

Cysteine hydrochloride monohydrate
CAS 7048-04-6; EINECS/ELINCS 200-157-7 INS920

Synonyms: L-2-Amino-3-mercaptopropanoic acid monohydrochloride monohydrate; Cysteine chlorhydrate monohydrate; Cysteine HCl monohydrate; L-Cysteine hydrochloride monohydrate; L-Cysteine monohydrochloride monohydrate

Empirical: C3H7NO2S • HCl • H2O
Formula: HSCH2CH(NH2)COOH • HCl • H2O
Properties: Colorless to wh. powd.; sol. in water, alcohol, acetone; insol. in ether; m.w. 175.64
HMIS: Health 1, Flammability 1, Reactivity 0
Storage: Store @ R.T.
Uses: Pharmaceutical injectables; nutrient; dietary supplement
Regulatory: BP, EP compliance; approved for injectables

D&C Green No. 5
CAS 4403-90-1; EINECS/ELINCS 224-546-6
Synonyms: Acid green 25; Alizarine cyanine green F; CI 61570; 2,2’-[(9,10-Dihydro-9,10-dioxo-1,4-anthracenediyl) diimino] bis (5-methyl) benznesulfonic acid disodium salt
Classification: Anthraquinone color
Empirical: C28H20N2O8S2 • 2Na
Formula: C28H22N2O2 • 2Na
Properties: Dullish blue-grn.; m.w. 622.57
Toxicology: Low skin toxicity; may cause skin irritation and sensitivity; TSCA listed
Uses: Colorant for pharmaceuticals and for nylon 6 and 6/6 nonabsorbable surgical sutures
Use Level: 0.6% max. (sutures)
Regulatory: FDA 21CFR §74.1205, 74.2205, 82.1205; subject to certification, permanently listed; Canada DSL
See also CI 61565

D&C Green No. 6
CAS 128-80-3; EINECS/ELINCS 204-909-5
Synonyms: 9,10-Anthracenedione, 1,4-bis [[4-methylphenyl) amino]--; 1,4-Bis [[4-methylphenyl)amino]-9,10-anthracenedione; 1,4-Bis (p-tolylamino) anthraquinone; CI 61565; 1,4-Di-p-toluidinoanthraquinone; Green no. 2; Quinizarin green SS
Classification: Anthraquinone color
Empirical: C28H22N2O2
Properties: Dk. green cryst. or powd.; sol. in C6H6 or acids; insol. in water, ethanol; m.w. 418.50
Toxicology: LD50 (oral, rat) 3660 mg/kg; mod. toxic by ing.; eye irritant; TSCA listed
Hazardous Decomp. Prods.: Heated to decomp., emits toxic fumes of NOx
Uses: Colorant for external pharmaceuticals, surgical sutures, haptics, contact lenses
Use Level: 0.01% max. (external pharmaceuticals/cosmetics)
Regulatory: FDA 21CFR §74.1206, 74.2206; FDA approved for external drugs/cosmetics, permanently listed; subject to certification, limits in regulation for use in medical devices
See also CI 59040

D&C Orange No. 3. See Acid orange 10

D&C Orange No. 4
CAS 633-96-5; EINECS/ELINCS 211-199-0
Synonyms: Acid leather orange extra; Acid orange 7 monosodium salt; Benzenesulfonic acid, 4-[(2-hydroxy-1-naphthalenyl) azo]-, monosodium salt; Betanaphthol orange; CI 15510; 4-[(2-Hydroxy-1-naphthalenyl) azo] benzenesulfonic acid monosodium salt; 4-(2-Hydroxy-1-naphthylazo) benzenesulfonic acid sodium salt, 4-[(2-Hydroxy-1-naphthylazo) benzenesulfonic acid sodium salt; Naphthalene Orange G; Naphthol orange; β-Naphthol orange; β-Naphthyl orange; Orange II; Persian orange; Sodium 4-[(2-hydroxy-1-naphthyl) azo] benzenesulfonate
Acid orange 7

Classification: Monoazo color
Empirical: C16H12N2NaO4S
Formula: C16H12N2O4S • Na
Properties: M.w. 351.35
Toxicology: TDLo (oral, male rat, 43 wks) 150 g/kg; irritating to eyes, skin, respiratory system; may cause liver and blood changes; experimental reproductive effects; mutagenic data; TSCA listed
Hazardous Decomp. Prods.: Heated to decomp., emits toxic vapors of NOx and SOx
Uses: Colorant for external pharmaceuticals; biological stain
Regulatory: FDA 21CFR §74.1254, 74.2254, 82.1254; subject to certification, permanently listed

See also Acid orange 7

D&C Orange No. 5
CAS 596-03-2; EINECS/ELINCS 209-876-0
Synonyms: Acid orange 11; Cl 45370:1; 4`,5`-Dibromo-3`,6`-dihydroxyxyspiro [isobenzofuran-1(3H),9`-[9H] xanthen]-3-one; Dibromofluorescein; Solvent red 72
Classification: Fluoran color
Empirical: C20H10Br2O5
Properties: Reddish-orange; m.w. 490.10
Toxicology: TSCA listed
Uses: Colorant for external pharmaceuticals and ingested mouthwashes and dentifrices
Use Level: ≤ 5 mg/day
Regulatory: FDA 21CFR §74.1255, 74.2255, 82.1254; subject to certification, permanently listed

D&C Orange No. 10
CAS 518-40-1; 38577-97-8
Synonyms: Cl 45370:1; 3`,6`-Dihydroxy-4`,5`-diiodospiro [isobenzofuran-1(3H),9`-[9H] xanthen]-3-one; Diiodofluorescein; Solvent red 73
Classification: Fluoran color
Empirical: C20H10I2O5
Properties: Orange-red powd.; m.w. 584.10
Toxicology: TSCA listed
Uses: Colorant for external pharmaceuticals
Regulatory: FDA 21CFR §74.1260, 74.2260, 82.1260; subject to certification, permanently listed

Synonyms: CI 45410:1; Solvent red 48; 2’,4’,5’,7’-Tetrabromo-4,5,6,7-tetrachloro-3’,6’-dihydroxyspiro [isobenzofuran-1(3H),9’-[9H] xanthen]-3-one; Tetrabromotetrafluorobenzene; Tetrachlorotetrafluorobenzene
Classification: Indigoid color
Empirical: C_{18}H_{10}Cl_{2}O_{2}S_{2}
Properties: Bluish pink; m.w. 393.30
Toxicology: TSCA listed
Uses: Colorant for pharmaceuticals, orals
Regulatory: FDA 21CFR §74.1330, 74.2330; FDA approved for orals; subject to certification, permanently listed
See also CI 45410

D&C Red No. 30
CAS 2379-74-0; EINECS/ELINCS 219-163-6
Synonyms: 6-Chloro-2-(6-chloro-4-methyl-3-oxobenzo [b] thien-2(3H)-yldene)-4-methylbenzo [b] thiophen-3(2H)-one; CI 73360; Helindone pink CN; Val red 1
Classification: Indigoid color
Empirical: C_{18}H_{10}Cl_{2}O_{2}S_{2}
Properties: Bluish pink; m.w. 393.30
Toxicology: TSCA listed
Uses: Colorant for pharmaceuticals, orals
Regulatory: FDA 21CFR §74.1330, 74.2330; FDA approved for orals; subject to certification, permanently listed; Canada DSL
Manuf./Distrib.: Noveon† http://www.carbopol.com;
Chemical Component Cross-Reference

D&C Red No. 30 aluminum lake
CAS 2379-74-0
Synonyms: Thioindigoid pink R
Classification: Thioindigoid color
Uses: Colorant for pharmaceuticals, orals
Regulatory: FDA approved for orals
Manuf./Distrib.: RTD Hallstar
http://www.rtdhallstar.com; TKB Trading
http://www.wholesalecolors.com

D&C Red No. 31
CAS 6371-76-2; EINECS/ELINCS 228-899-7
Synonyms: Brilliant lake red R; CI 15800:1; 3-Hydroxy-4-[1-sulfo-2-naphthalenecarboxylic acid calcium salt; Pigment red 64:1
Classification: Monoazo color
Empirical: C17H12N2O3 • ½Ca
Properties: M.w. 311.33
Toxicology: TSCA listed
Uses: Colorant for external pharmaceuticals
Regulatory: FDA 21CFR §74.1331, 74.2331, 82.1331; subject to certification, permanently listed

D&C Red No. 33
CAS 3567-66-6; EINECS/ELINCS 222-656-9
Synonyms: Acid fuchsine; Acid red 33; 5-Amino-4-hydroxy-3-(phenylazo)-2,7-naphthalenedisulfonic acid disodium salt; CI 17200
Classification: Monoazo color
Empirical: C16H13N3Na2O7S2
Formula: C16H13N3O7S2 • 2Na
Properties: Powd.; odorless; insol. in water, most solvs.; m.w. 469.42
Toxicology: TSCA listed
Uses: Colorant for pharmaceuticals, mouthwashes, dentifrices
Use Level: 3% max. (lipstick on wt. of finished prod.); 0.75 max. mg/day (ingested drugs other than mouthwashes and dentifrices)
Regulatory: FDA 21CFR §74.1331, 74.2333, 82.1333; subject to certification, permanently listed
Manuf./Distrib.: Noveon†
http://www.spectrumchemical.com; TKB Trading http://www.wholesalecolors.com

D&C Red No. 34
CAS 6417-83-0; EINECS/ELINCS 229-142-3
Synonyms: CI 15880:1; 3-Hydroxy-4-[1-sulfo-2-naphthalenecarboxylic acid calcium salt (1:1); Lake bordeaux B; Pigment red 63:1; Red no. 22 Japan
Classification: Monoazo color
Definition: Calcium salt of 3-hydroxy-4-[1-sulfo-2-naphthalenyl]azo-2-naphthalene-carboxylic acid
Empirical: C21H14CaN2O6S
Properties: M.w. 462.48
Toxicology: TSCA listed
Uses: Colorant for external pharmaceuticals
Regulatory: FDA 21CFR §74.1334, 74.2334, 82.1334; subject to certification, permanently listed; Canada DSL

D&C Red No. 36
CAS 2814-77-9; EINECS/ELINCS 220-562-2
Synonyms: 1-[2-Chloro-4-nitrophenyl] azo]-2-naphthalenol; CI 12085; Flaming red; Pigment red 4; Tiger orange; Vulcan red R
Classification: Monoazo color; organic pigment
Empirical: C16H10ClN3O3
Properties: Powd.; odorless; insol. in water, most solvs.; m.w. 327.73
Toxicology: LD50 (oral, rat) > 5 mg/kg; nonirritating to eyes, skin; TSCA listed
Precaution: Airborne dust may be an explosion hazard; avoid dust formation; take precautions against static discharge if dust formation occurs
Hazardous Decomp. Prods.: Hydrogen chloride can be formed in fire
Uses: Colorant for pharmaceuticals, orals, topicals, mouthwashes, dentifrices
Use Level: 1.7 max. mg/day (ingested drugs other than mouthwashes and dentifrices, if taken continuously for < 1 yr), ≤ 1.0 mg/day (if taken continuously for > 1 yr); ≤ 3% (lipsticks, on wt. of prod.)
Regulatory: FDA 21CFR §74.1336, 74.2336, 82.1336; FDA approved for orals, topicals; subject to certification, permanently listed; OSHA nonhazardous; Canada DSL
Manuf./Distrib.: Impex Colors & Addit.
http://www.impexcolors.com
See also 1-[2-Chloro-4-nitrophenyl] azo]-2-naphthalenol
**D&C Red No. 37**
CAS 6363-07-5

Synonyms: CI 45170:1; 3-Ethostearate of 9-o-carboxyphenyl-6-diethylamino-3-ethylimino-3-isoxanthene; Rhodamine B stearate

Classification: Xanthene color

Empirical: C_{46}H_{66}N_{2}O_{5}

Properties: M.w. 727.04

Uses: Colorant for external pharmaceuticals (FDA delisted)

Regulatory: FDA delisted, banned in 1988 in U.S.

**D&C Red No. 39**
CAS 6371-55-7

Synonyms: Alba red; CI 13058; o-[p-(β,β’-Dihydroxydiethylamino) phenylazo]benzoic acid; Pigment red 100

Classification: Monoazo color

Empirical: C_{17}H_{19}N_{3}O_{4}

Properties: M.w. 329.36

Uses: Colorant for externally applied quat. ammonium germicides

Use Level: 0.1% max. (quat. germicides)

Regulatory: FDA 21CFR §74.1339; subject to certification, permanently listed

**D&C Violet No. 1.** See Acid violet 49

**D&C Violet No. 2**
CAS 81-48-1; EINECS/ELINCS 201-353-5

Synonyms: Alizurol purple SS; Anthraquinone, 1-hydroxy-4-(p-toluidino); CI 60725; Disperse blue 72; N-(4-Hydroxy-1-anthraquinonyl)-4-methylaniline; N-(4-Hydroxy-1-anthraquinonyl)-p-toluidine; 1-Hydroxy-4-[(4-methylphenyl) amino]-9,10-anthracenedione; Solvent violet 13; N-(p-Tolyl)-4-hydroxy-1-anthraquinonylamine

Classification: Anthraquinone color

Empirical: C_{21}H_{15}NO_{3}

Properties: Dull bluish violet; m.w. 329.35

Toxicology: LD50 (oral, rat) 6721 mg/kg; TSCA listed

Uses: Colorant for external pharmaceuticals; colorant for absorbable sutures, polymethylmethacrylate intraocular lens haptics, absorbable meniscal tacks made from poly (L-lactic acid)

Use Level: 0.2% max. (intraocular lens haptics); 0.15% max. (meniscal tacks)

Regulatory: FDA 21CFR §74.1602, 74.2602, 74.3602, 82.1602; subject to certification, permanently listed for external drugs/cosmetics; permanently listed for use in medical devices

**D&C Yellow No. 5.** See FD&C Yellow No. 5; Tartrazine

**D&C Yellow No. 7**
CAS 2321-07-5; EINECS/ELINCS 219-031-8

Synonyms: Acid yellow 73; CI 45350:1; 3’,6’-Dihydroxydiisopyrro [isobenzofuran-1(3H),9’-[9H] xanthen]-3-one; Fluorescein; Solvent yellow 94

Classification: Fluoran color

Empirical: C_{20}H_{12}O_{5}

Properties: Ylsh.-red powd.; freely sol. in water; water-absorbing; fluorescence disappears when sol’n. is made acid and reappears when made neutral; m.w. 332.31

Toxicology: Believed to be nontoxic to humans; TSCA listed

Uses: Colorant for external pharmaceuticals

Regulatory: FDA 21CFR §74.1707, 74.2707, 82.1707; subject to certification, permanently listed; Canada DSL

**DEA-cellulose.** See Diethylylaminoethanol cellulose

**DEA-lauryl sulfate**

**Synonyms** Bis (2-hydroxyethyl) ammonium decyl sulfate; Diethanolamine lauryl sulfate; Sulfuric acid, monododecyl ester, compd. with 2,2’-iminodiethanol (1:1)

**Definition** Diethanolamine salt of cetyl phosphate

**Empirical** C16H34O4 • C4H11NO2

**Formula** CH3(CH2)14CH2OPO3H2 • HN(CH2CH2OH)2

**Properties** Anionic

**Toxicology** TSCA listed

**Uses** Emulsifier, emulsion stabilizer for pharmaceuticals

**Trade Names** Amphisol®

**Deadburned magnesite** See Magnesium oxide

**DEAE.** See Diethylaminoethanol

**DEAE-cellulose.** See Diethylylaminoethyl cellulose

**DEA-lauryl sulfate**

**Synonyms** Bis (2-hydroxyethyl) ammonium decyl sulfate; Diethanolamine lauryl sulfate; Sulfuric acid, monododecyl ester, compd. with 2,2’-iminodiethanol (1:1)

**Definition** Diethanolamine salt of lauryl sulfate

**Formula** C12H26O4S • C4H11NO2

**Properties** Anionic

**Toxicology** TSCA listed
### Chemical Component Cross-Reference

**DEA methoxycinnamate**
- **CAS**: 56265-46-4; EINECS/ELINCS 260-082-0
- **Synonyms**: Diethanolamine methoxycinnamate; 3-(4-(Methoxyphenyl)-2-propenoic acid compd. with 2,2'-iminobis (ethanol); 2-Propenoic acid, 3-(4-methoxyphenyl)-, compd. with 2,2'-iminobis (ethanol)
- **Definition**: Diethanolamine salt of methoxycinnamic acid
- **Formula**: $C_{10}H_{10}O_3 \cdot C_4H_11NO_2$
- **Uses**: Preservative for pharmaceuticals; OTC drug active
- **Regulatory**: Canada DSL
- **Trade Names**: Nipasorb D, Deanol

**DEA-oleth-3 phosphate**
- **CAS**: 58855-63-3 (generic)
- **Synonyms**: Diethanolamine oleth-3 phosphate; Diethanolammonium POE (3) oleyl ether phosphate; PEG-3 oleyl ether phosphate, diethanolamine salt; POE (3) oleyl ether phosphate, diethanolamine salt
- **Definition**: Diethanolamine salt of a complex mixture of esters of oleth-3 phosphate
- **Properties**: Anionic
- **Uses**: Surfactant, conditioner, emulsifier, gellant for pharmaceuticals; corrosion inhibitor and antigellant in aerosol antiperspirants

**DEA-oleth-10 phosphate**
- **CAS**: 58855-63-3 (generic)
- **Synonyms**: Diethanolamine oleth-10 phosphate; Diethanolammonium POE (10) oleyl ether phosphate; PEG-10 oleyl ether phosphate, diethanolamine salt; PEG 500 oleyl ether phosphate, diethanolamine salt; POE (10) oleyl ether phosphate, diethanolamine salt
- **Definition**: Diethanolamine salt of a complex mixture of esters of phosphoric acid and oleth-10
- **Properties**: Anionic
- **Uses**: Surfactant, conditioner, emulsifier, gellant for pharmaceuticals; corrosion inhibitor and antigellant in aerosol antiperspirants

### Regulatory Information

**γ-Decalactone**

CAS: 706-14-9; EINECS/ELINCS 211-892-8

**FEMA 2360**

**Synonyms:** γ-N-Decalactone; Decanolide-1.4; γ-N-Hexyl-γ-butyrolactone; 5-Hexylidihydro-2(3H)-furanone; 4-Hydroxydecanoic acid lactone; 4-Hydroxydecanoic acid, γ-lactone; Hydroxydecanoic acid-γ-lactone

**Classification:** Nonaromatic lactone

**Empirical:** C_{10}H_{18}O_{2}

**Properties:** Colorless liq., fruity peach odor; sl. sol. in water; m.w. 170.25 dens. 0.952; b.p. 281 C; flash pt. > 230 F; ref. index 1.4490

**Toxicology:** LD_{50} (IV, mouse) 56 mg/kg; poison by IV route; primary skin irritant; TSCA listed

**Environmental:** Do not discharge into lakes, streams, ponds, public waters

**Precaution:** Wear safety glasses or goggles, rubber gloves, apron

**Hazardous Decomp. Prods.:** Heated to decomp., emits acrid smoke and fumes

**Storage:** 6 mos. when stored at 40-70 F in tightly sealed original containers with minimum head space; avoid prolonged exposure to light, heat, air

**Uses:** Synthetic flavor for pharmaceuticals

**Features:** Peach-like flavor

**Regulatory:** FDA 21CFR §172.515; FEMA GRAS; Australia AICS; Canada DSL; Japan MITI

**Manuf./Distrib.:** Acme-Hardesty

γ-N-Decalactone. See γ-Decalactone

Decamethycyclodisiloxane
CAS 541-02-6; EINECS/ELINCS 208-764-9
Synonyms: Cyclic dimethylsiloxane pentamer; Cyclic pentamer-D5; Decamethylpentacyclolsiloxane; Dimethylsiloxane pentamer
Classification: Cyclic volatile methyl siloxane
Empirical: C10H30O5Si5
Properties: Oily liq.; m.w. 370.78; dens. 0.9593; vapor pressure 2 mm (50 C); m.p. -38 C; b.p. 210 C; flash pt. 55 C; ref. index 1.3982; dielec. const. 2.50
Toxicology: Skin and eye irritant; TSCA listed
Precaution: Combustible
Hazardous Decomp. Prods.: Heated to decomp., emits acrid smoke and irritating fumes
Storage: 6 mos. when stored at 40-70 F in tightly sealed original containers with minimum head space; avoid prolonged exposure to light, heat, air
Uses: Flavor for pharmaceuticals
Features: Citrus flavor
Regulatory: FDA 21CFR §182.60, GRAS; FEMA GRAS; Japan approved as flavoring; Canada DSL; Australia AICS
See also Undecanal

Decanal
CAS 112-31-2; EINECS/ELINCS 203-957-4
FEMA 2362
Synonyms: Aldehyde C10; C10 aldehyde; Capraldehyde; Capric aldehyde; Caprinaldehyde; n-Decanal; Decyl aldehyde; 1-Decyl aldehyde; n-Decyl aldehyde; Decylaldehyde
Empirical: C10H20O
Formula: CH3(CH2)8CH3
Properties: Colorless to lt. yel. liq., floral fatty odor; sol. in 80% alcohol, fixed oils, volatile oils, min. oils; insol. in water, glycerin; m.w. 156.30; dens. 0.830 (15/4 C); m.p. 17-18 C; b.p. 208 C; flash pt. 185 F; ref. index 1.4260-1.4300
Toxicology: LD50 (oral, rat) 3730 mg/kg, (skin, rabbit) 5040 mg/kg; mod. toxic by ing.; 
†=pharmaceutical grade
mildly toxic by skin contact; severe skin irritant; mutagenic data; risk of serious damage to eyes; TSCA listed
Precaution: Combustible liq.; wear safety glasses or goggles, rubber gloves, apron; incompat. with strong oxidizers, reducers
Hazardous Decomp. Prods.: Heated to decomp., emits acrid smoke and irritating fumes
Storage: 6 mos. when stored at 40-70 F in tightly sealed original containers with minimum head space; avoid prolonged exposure to light, heat, air
Uses: Flavor for pharmaceuticals
Features: Citrus flavor
Regulatory: FDA 21CFR §182.60, GRAS; FEMA GRAS; Japan approved as flavoring; Canada DSL; Australia AICS

Decanoic acid, 2,2-dimethyl-1,3-propanediol diester.  See Neopentyl glycol dicaprate

Decanoic acid ethyl ester.  See Ethyl decanoate

Decanoic acid, 1-methyl-1,2-ethanediyl ester.  See Propylene glycol dicaprate

Decanoic acid, 1-methyl-1,2-ethanediyl ester mixed with 1-methyl-1,2-ethanediyl diocctanoate; Decanoic acid, mixed diesters with octanoic acid and propylene glycol.  See Propylene glycol dicaprylate/dicaprate

Decanoic acid, mixed esters with hexanoic acid, octanoic acid, and trimethylolpropane.  See Trimethylolpropane triacrylate/tricaprate

Decanoic acid, mixed esters with octanoic acid and pentaerythritol.  See Pentaerythrityl tetraacrylate/tetracaprate

Decanoic acid, monoester with 1,2,3-propanetriol.  See Glyceryl caprate

n-Decanoic acid, 1,3-propanediyl ester.  See Propylene glycol dicaprate

Decanol; 1-Decanol; Decan-1-ol; n-Decanol.  See Decyl alcohol

Decanolide-1,4.  See γ-Decalactone
Decanolide-1,5; Decan-5-olide. See Δ-Decalactone
1-Decanol, 2-octyl. See 2-Octyl-1-decanol

3-Decanone
CAS 928-80-3
FEMA 3966
Synonyms: Decan-3-one; Ethyl heptyl ketone
Empirical: C₁₀H₂₀O
Properties: M.w. 156.27; dens. 0.825; m.p. -4 to -3 C; b.p. 204-205 C; flash pt. 80 F
Uses: Flavor for pharmaceuticals
Features: Citrus, orange flavor
Regulatory: FEMA GRAS; Canada DSL
Manuf./Distrib.: Fluka http://www.sigma-aldrich.com; SAFC Specialties http://www.safcspecialties.com; Sigma http://www.sigma-aldrich.com/belgium

Decan-3-one. See 3-Decanone
Decanyl acetate. See Decyl acetate
Decaoletic acid, decaester with decaglycerol. See Polyglyceryl-10 decaoleate
3,6,9,12,15,18,21,24,27,30-Decaoxadopentacontan-1-ol. See Beheneth-10
3,6,9,12,15,18,21,24,27,30-Decaoxaoctatetracontan-1-ol. See Steareth-10
3,6,9,12,15,18,21,24,27,30-Decaoxaoctacont-39-en-1-ol. See Oleth-10
4-Decenal; 4-cis-Decenal; cis-4-Decenal. See cis-4-Decen-1-al
cis-4-Decen-1-al
CAS 21662-09-9; EINECS/ELINCS 244-514-5
FEMA 3264
Synonyms: 4-Decenal; 4-cis-Decenal; cis-4-Decenal; (Z)-4-Decenal
Classification: Nonaromatic aldehyde
Empirical: C₁₀H₁₈O
Properties: Colorless to sl. yel. liq., orange-like fatty odor; sol. in alcohol; insol. in water; m.w. 154.28; dens. 0.847-0.848; b.p. 78-80 C (10 mm); ref. index 1.442-1.444
Toxicology: LD₅₀ (oral, mouse) > 10,000 mg/kg, (dermal) > 10,000 mg/kg; low acute inhalation toxicity; sl. toxic by ingestion
Precaution: Flamm. liq.; avoid contact with air or oxygen (explosion danger, adverse effect on subsequent reactions)
NFPA: Health 0, Flammability 2, Reactivity 0
Storage: Store under nitrogen
Uses: Intermediate for surfactants and specialty chemicals for the pharmaceutical industry
Regulatory: Canada DSL

1-Decene. See Decene-1
Decene, homopolymer. See Polydecene

1-Decene, homopolymer, hydrogenated
CAS 68037-01-4
Synonyms: Hydrogenated decene homopolymer; Hydrogenated poly-1-decen; Hydrogenated polydecene
Classification: Syn. hydrocarbon base oil
Properties: Colorless liq.; odorless; sol. < 0.1% in water; sp.gr. 0.83 (15.6 C); vapor pressure < 1 mm Hg (20 C); pour pt. -60 C max.; flash pt. (PMCC) 238 C
Toxicology: Inh. of oil mist or vapors at elevated
Chemical Component Cross-Reference

- Decylic alcohol
  - Synonyms: Decan-1-ol
  - CAS: 624-36-0
  - EINECS: 211-888-2
  - FEMA: 2365
  - Synonyms: C10 alcohol
  - Properties: Clear colorless liquid, sweet odor; sol. in alcohol, ether, acetone, benzene, chloroform, acetic acid; pract. insol. in water; m.w. 158.32; sp.gr. 0.8297 (20/4 C); m.p. 7 C; b.p. 232.9 C; flash pt. (OC) 82 C; ref. index 1.43587; surf. tens. 28.9 dynes/cm (20 C)
  - Toxicology: LD50 (oral, rat) 4720 mg/kg; mod. toxic by skin contact; mildly toxic by ing.; inh.; irritating to eyes, skin, respiratory system; inh. may cause nose/throat irritation; high concs. may cause CNS depression, headache, nausea, drowsiness; ing. may cause headache, dizziness, nausea, vomiting, and unconsciousness or coma in severe cases; if aspirated into lungs, may cause severe lung damage and possibly death; possible carcinogen, tumorigen; TSCA listed
  - Precaution: Combustible; flamm. when exposed to heat or flame; incompat. with oxidizing agents (increases fire/explosion risk)

- Decyl alcohol
  - CAS: 112-30-1; 68526-85-2
  - EINECS/ELINCS: 203-956-9
  - Synonyms: Alcohol C10; C10 alcohol; Caprylic alcohol; Caprinic alcohol; Decanal dimethyl acetal; Decan-1-ol; 1-Decanol; Decan-1-ol; n-Decanol; n-Decyl alcohol; Decyl alcohol; 1-Hydroxydecane; Noncarbinol; Nonylcarbinol; Primary decyl alcohol
  - Empirical: C10H22O
  - Formula: CH3(CH2)9CH2OH
  - Properties: Colorless to lt. yel. mod. visc. liq., sweet odor; sol. in alcohol, ether, acetone, benzene, chloroform, acetic acid; pract. insol. in water; m.w. 158.32; sp.gr. 0.8297 (20/4 C); m.p. 7 C; b.p. 232.9 C; flash pt. (OC) 82 C; ref. index 1.43587; surf. tens. 28.9 dynes/cm (20 C)
  - Toxicology: LD50 (oral, rat) 4720 mg/kg; mod. toxic by skin contact; mildly toxic by ing.; inh.; irritating to eyes, skin, respiratory system; inh. may cause nose/throat irritation; high concs. may cause CNS depression, headache, nausea, drowsiness; ing. may cause headache, dizziness, nausea, vomiting, and unconsciousness or coma in severe cases; if aspirated into lungs, may cause severe lung damage and possibly death; possible carcinogen, tumorigen; TSCA listed
  - Precaution: Combustible; flamm. when exposed to heat or flame; incompat. with oxidizing agents (increases fire/explosion risk)

---

2-Decenoic acid butylo decenoate
- CAS: 10519-33-2
- EINECS/ELINCS: 234-059-0
- FEMA: 3532
- Synonyms: Heptylidene acetone; Oenanthylidene acetone
- Classification: Aliphatic ketone
- Empirical: C10H18O
- Properties: Needle-like odor; sol. in alcohol, perfume oils; insol. in water; m.w. 154.25; m.p. 16-17 C; b.p. 125-126 C (12 mm)
- Uses: Synthetic flavor for pharmaceuticals
- Features: Fruity
- Regulatory: FDA 21CFR §172.515; FEMA GRAS; Canada DSL
- Toxicity: TSCA listed
- Precaution: Combustible

3-Decenal
- CAS: 1193
- EINECS/ELINCS: 203-956-9
- FEMA: 2365
- Synonyms: Alcohol C10; C10 alcohol; Caprylic alcohol; Caprinic alcohol; Decanal dimethyl acetal; Decanal; 1-Decanol; Decan-1-ol; n-Decanol; n-Decyl alcohol; Decyl alcohol; 1-Hydroxydecane; Noncarbinol; Nonylcarbinol; Primary decyl alcohol
- Empirical: C10H22O
- Formula: CH3(CH2)9CH2OH
- Properties: Colorless to lt. yel. mod. visc. liq., sweet odor; sol. in alcohol, ether, acetone, benzene, chloroform, acetic acid; pract. insol. in water; m.w. 158.32; sp.gr. 0.8297 (20/4 C); m.p. 7 C; b.p. 232.9 C; flash pt. (OC) 82 C; ref. index 1.43587; surf. tens. 28.9 dynes/cm (20 C)
- Toxicology: LD50 (oral, rat) 4720 mg/kg; mod. toxic by skin contact; mildly toxic by ing.; inh.; irritating to eyes, skin, respiratory system; inh. may cause nose/throat irritation; high concs. may cause CNS depression, headache, nausea, drowsiness; ing. may cause headache, dizziness, nausea, vomiting, and unconsciousness or coma in severe cases; if aspirated into lungs, may cause severe lung damage and possibly death; possible carcinogen, tumorigen; TSCA listed
- Precaution: Combustible; flamm. when exposed to heat or flame; incompat. with oxidizing agents (increases fire/explosion risk)

---

3-Decylacrolein. See 2-Tridecenal

Decylic acid; n-Decylic acid. See Capric acid

Decolorizing carbon. See Carbon, activated

Decyl acetate
- CAS: 112-17-4; EINECS/ELINCS: 203-942-2
- FEMA: 2367
- Synonyms: Acetate C-10; Capryl acetate; Decanoyl acetate; Decyl ethanoate
- Definition: Synthesized by direct acetylation of n-decanol with acetic acid
- Empirical: C12H24O2
- Formula: CH3(CH2)9OOCCH3
- Properties: Liq., floral orange-rose odor; sol. in 80% alcohol, ether, benzene; insol. in water; m.w. 200.32; dens. 0.862-0.866; b.p. 187-190

---

3-Decan-2-one
- CAS: 10519-33-2
- EINECS/ELINCS: 234-059-0
- FEMA: 3532
- Synonyms: Heptylidene acetone; Oenanthylidene acetone
- Classification: Aliphatic ketone
- Empirical: C10H18O
- Properties: Needle-like odor; sol. in alcohol, perfume oils; insol. in water; m.w. 154.25; m.p. 16-17 C; b.p. 125-126 C (12 mm)
- Uses: Synthetic flavor for pharmaceuticals
- Features: Fruity
- Regulatory: FDA 21CFR §172.515; FEMA GRAS; Canada DSL
- Toxicity: TSCA listed
- Precaution: Combustible

---

3-Decanol
- CAS: 112-30-1; 68526-85-2
- EINECS/ELINCS: 203-956-9
- FEMA: 2365
- Synonyms: Alcohol C10; C10 alcohol; Caprylic alcohol; Caprinic alcohol; Decanal dimethyl acetal; Decan-1-ol; 1-Decanol; Decan-1-ol; n-Decanol; n-Decyl alcohol; Decyl alcohol; 1-Hydroxydecane; Noncarbinol; Nonylcarbinol; Primary decyl alcohol
- Empirical: C10H22O
- Formula: CH3(CH2)9CH2OH
- Properties: Colorless to lt. yel. mod. visc. liq., sweet odor; sol. in alcohol, ether, acetone, benzene, chloroform, acetic acid; pract. insol. in water; m.w. 158.32; sp.gr. 0.8297 (20/4 C); m.p. 7 C; b.p. 232.9 C; flash pt. (OC) 82 C; ref. index 1.43587; surf. tens. 28.9 dynes/cm (20 C)
- Toxicology: LD50 (oral, rat) 4720 mg/kg; mod. toxic by skin contact; mildly toxic by ing.; inh.; irritating to eyes, skin, respiratory system; inh. may cause nose/throat irritation; high concs. may cause CNS depression, headache, nausea, drowsiness; ing. may cause headache, dizziness, nausea, vomiting, and unconsciousness or coma in severe cases; if aspirated into lungs, may cause severe lung damage and possibly death; possible carcinogen, tumorigen; TSCA listed
- Precaution: Combustible; flamm. when exposed to heat or flame; incompat. with oxidizing agents (increases fire/explosion risk)

Decyl octyl alcohol. See Stearyl alcohol

Decyl oleate
CAS 3687-46-5; EINECS/ELINCS 222-981-6
Synonyms: Decyl 9-octadecenoate; 9-Octadecenoic acid decyl ester
Definition: Ester of decyl alcohol and oleic acid
Empirical: C_{28}H_{54}O_{2}
Formula: \( \text{CH}_3(CH_2)_{17}\text{CH} = \text{CH}(CH_2)_7\text{COOCH}_2(CH_2)_{18}\text{CH}_3 \)
Properties: Wh. to straw liq.; sol. in min. oil, 95% ethanol, IPM, oleyl alcohol; insol. in water; m.w. 422.74; dens. 0.855-0.865; m.p. 3-6 C; ref. index 1.4530-1.4555

Toxicology: TSCA listed
Uses: Emollient, cosolvent, lubricant, superfatting agent for pharmaceuticals, creams, lotions
Regulatory: BP,EP compliance; Canada DSL
Manuf./Distrib.: A&E Connock http://www.connock.co.uk; Chempri; Mosselman NV http://www.mosselman.be
Trade Names: Ceraphyl® 140; Cerette V; Cetiol® V; Dynacerin® DO; Pelemol® DO; Saboderm DO; Tegosoft® DO

Decyl polyglucose. See Decyl glucoside
Decyl propanoate. See Decyl propionate

Decyl propionate
CAS 5454-19-3; EINECS/ELINCS 226-703-4
FEMA 2369
Synonyms: Capryl propionate; Decyl propanoate
Empirical: C_{13}H_{26}O_{2}
Properties: Liq., ethereal rum fruity odor; m.w. 214.35; dens. 0.864; b.p. 123-134 C (8 mm); flash pt. 225 F; ref. index 1.4291
Uses: Synthetic flavor for pharmaceuticals
Features: Fruity flavor
Regulatory: FDA 21CFR §172.515; FEMA GRAS; Canada DSL

2-Decyl tetradecanoic acid
CAS 93778-52-0
Uses: Pharmaceuticals
Trade Names: Jaric I-24

Decyltetradecanol (INCI); 2-Decyltetradecanol. See 2-Decyl-1-tetradecanol

2-Decyl-1-tetradecanol
CAS 58670-89-6; EINECS/ELINCS 216-385-0

†=pharmaceutical grade

Synonyms: Decyltetradecanol (INCI); 2-Decyltetradecanol; Isolignoceryl alcohol; Isotetracosanol; Isotetracosyl alcohol; 1-Tetradecanol, 2-decyl-
Classification: Aliphatic alcohol
Empirical: C_{24}H_{50}O
Properties: Liq.; insol. in water; m.w. 354.66; dens. 0.84 kg/l (17 C)
Uses: Solubilizer for lipid-sol. actives, pharmaceutical creams, ointments, emulsions, sticks
Trade Names: ISOFOL® 24; Jarcol™ I-24

DEG. See Diethylene glycol
DEGEE. See Ethoxydiglycol
Debras. See Lanolin
Dehydracetic acid. See Dehydroacetic acid
Dehydrated beets. See Beet powder

Dehydroacetic acid
CAS 520-45-6; 771-03-9; EINECS/ELINCS 208-293-9; 212-227-4
INS265
Synonyms: 3-Acetyl-5-hydroxy-3-oxo-4-hexenoic acid \( \Delta^1 \)-lactone; 3-Acetyl-6-methyl-1,2-pyran-2,4(3H)-dione; 3-Acetyl-6-methyl-2,4-pyridandione; 3-Acetyl-6-methylpyridandione-2,4; 3-Acetyl-6-methyl-2H-pyran-2,4(3H)-dione; Dehydracetic acid; DHA; DHS; Methylacetopyronone
Classification: Cyclic ketone
Empirical: C_{8}H_{8}O_{4}
Properties: Wh. cryst. or cryst. powd.; sol. in oxygenated and aromatic solvs.; insol. in water; m.w. 168.16; vapor pressure 1 mm (91.7 C); m.p. 109-111 C; b.p. 269 C
Toxicology: LD50 (oral, rat) 500 mg/kg, (IP, mouse) 922 mg/kg; poison by ing. and IV routes; mod. toxic by IP route; questionable carcinogen; experimental tumorigen; TSCA listed
Precaution: Combustible when exposed to heat or flame
Hazardous Decomp. Prods.: Heated to decomp., emits acrid smoke and irritating fumes
NFPA: Health 1, Flammability 1, Reactivity 0
Uses: Antimicrobial, preservative for pharmaceuticals, medicated toothpaste
Regulatory: FDA 21CFR §172.130, 65 ppm max. residue in or on prepared squash, GRAS; 175.105; Canada DSL
Manuf./Distrib.: Aldrich† http://www.sigma-aldrich.com; Alfa Aesar† http://www.alfa.com; Alfa Chem†
### Dehydroacetic acid sodium salt

### Denatonium benzoate

**CAS:** 3734-33-6 (anhyd.); 86398-53-0 (monohydrate); EINECS/ELINCS 223-095-2

**Synonyms:** Ammonium, benzylidethyl ((2,6-xylylcarbamoyl) methyl)-, benzoate; Benzenemethanaminium, N-[(2,6-dimethylphenyl) amino]-2-oxoethyl]-N,N-diethyl-, benzoate; Benzyldiethyl [(2,6-xylylcarbamoyl) methyl] ammonium benzoate; N-[2-[(2,6-Dimethylphenyl) amino]-2-oxoethyl]N,N-diethylbenzenemethanaminium benzoate; Lignocaine benzyl benzoate

**Classification:** Organic compd.

**Empirical:** C28H34N2O3; C28H34N2O3 • H2O

**Formula:** C21H29N2O • C7H5O2

**Properties:** WH. cryst. powd., odorless, extremely bitter taste; very sol. in chloroform, methanol; sol. in water, alcohol; sparingly sol. in acetone; pract. insol. in ether; m.w. 446.59 (anhyd.); m.p. 174-176 C; pH 6.5-7.5 (3%)

**Toxicology:** Anhyd.: LD50 (oral, rat) 584 mg/kg; harmful solid; mod. toxic by ing.; irritant; TSCA listed

**Hazardous Decomp. Prods.:** Heated to decomp., emits toxic vapors of NOx

**Storage:** Hygroscopic (anhyd.)

**Uses:** Pharmaceutical aid; alcohol denaturant, flavor for pharmaceuticals; aversive bitterant added to toxic substances as a deterrent to ingestion

**Regulatory:** FDA 27CFR §21.151; USP/NF compliance; Canada DSL

**Trade Names Containing:** Punctilious® SDA 1-1 190 Proof; Punctilious® SDA 1-1 Anhydrous

### Denatonium saccharide

**CAS:** 90823-38-4

**Synonyms:** Benzenemethanaminium, N-[2-[(2,6-dimethylphenyl)amino]-2-oxoethyl]-N,N-diethyl-, saccharide; Benzenemethanaminium, N-[2-[[2,6-dimethylphenyl] amino]-2-oxoethyl]-N,N-diethyl-, salt with 1,2-benzisothiazol-3(2H)-one 1,1-dioxide; Benzyldiethyl [(2,6-xylylcarbamoyl) methyl] ammonium saccharide

**Classification:** Organic compd.

**Empirical:** C28H33N3O4S

**Formula:** C21H28N2O • CrH4NO3

**Properties:** WH. cryst. powd.; odorless; bitter taste; m.w. 507.626; m.p. 176-182 C

**Toxicology:** LD50 (oral, rat) 1430 mg/kg; avoid dust inhalation

**Precaution:** Avoid excessive heat; wear protective gloves and dust respirator

**Hazardous Decomp. Prods.:** CO, CO2, NOx

**HMIS:** Health 1, Flammability 1, Reactivity 0

**Uses:** Aversive bitterant; denaturant

Deodorized kerosene
CAS 8008-20-6; EINECS/ELINCS 232-366-4
UN 1223 (DOT)
Synonyms: Kerosene, deodorized; Kerosene, odorless; Odorless kerosene
Definition: Mixt. of petrol.-derived hydrocarbons contg. 10 to 16 carbon atoms
Toxicology: TSCA listed
Precaution: DOT: Flamm. liq.
HMIS: Health 1, Flammability 2, Reactivity 1
Uses: Solvent, defoamer, diluent for pharmaceutical creams and lotions
Regulatory: FDA 21CFR §176.200, 176.210
Manuf./Distrib.: Ruger
http://www.rugerchemical.com
Trade Names: PD-23

Deodorized winterized cottonseed oil. See Cottonseed (Gossypium) oil
Deoiled lanolin. See Lanolin wax
Deoxycholate sodium; Deoxycholic acid sodium salt; 7-Deoxycholic acid sodium salt. See Sodium deoxycholate
6-Deoxy-L-mannose. See Rhamnose

Dexpanthenol. See D-Panthenol; DL-Panthenol

Dextran
CAS 9004-54-0; EINECS/ELINCS 232-677-5
Synonyms: Macrose
Definition: Polymers of glucose with chain-like structures and m.w. to 200,000
Empirical: (C₆H₁₀O₅)n
Properties: Water-sol.; m.w. = 15,000-200,000
Toxicology: Histamine-releasing props.; may cause anaphylactoid reactions; questionable carcinogen; experimental tumorigen, teratogen, reproductive effects; TSCA listed
Precaution: Combustible
Hazardous Decomp. Prods.: Heated to decomp., emits acrid smoke and fumes
Storage: Hygroscopic
Uses: Visc. control agent in artificial tear prods., topical ophthalmics; blood plasma substitute or expander
Regulatory: FDA 21CFR §186.1275, GRAS as indirect additive; Japan approved; BP, EP compliance; Canada DSL
Manuf./Distrib.: AMRESCO
http://www.amresco-inc.com; Accurate Chem. & Scientific
http://www.accuratechemical.com; Am. Biorganics; CPI Chems.

Dextran
See Dextrin

Dextrates
Definition: Purified mixt. of saccharides resulting from controlled enzymatic hydrolysis of starch; either anhyd. or hydrated
Properties: Wh. free-flowing porous spherical gran., odorless, sweet taste producing cooling sensation in mouth; freely sol. in water; sol. in dil. acids and alkalis, basic org. solvs.; insol. in common org. solvs.; pH 3.8-5.8 (20%); DE 93-99%
Toxicology: Essentially nontoxic
Uses: Sweetener for pharmaceuticals; diluent, excipient in tablets and capsules
Features: May be compressed directly into self-binding tablets
Regulatory: USP/NF compliance
Manuf./Distrib.: AMRESCO
http://www.amresco-inc.com; Adept Sol’ns.; Ashland

Dextrin
CAS 9004-53-9; EINECS/ELINCS 232-675-4
INS 1400
Synonyms: Artificial gum; British gum; Corn dextrin; Dextrins; Dextrin corn; Dextrine; Dextrins; Pyrodextrin; Starch gum; Tapioca; Vegetable gum; White dextrin; Yellow dextrin
Classification: Food starch modified
Definition: Gum produced by incomplete hydrolysis of starch
Empirical: (C6H10O5)n • xH2O
Properties: Wh., yel. or brn. powd. or gran.; odorless; sol. in water; insol. in alcohol, ether; forms colloids; sp.gr. 1.45; autoignition temp. 400 C
Toxicology: ACGIH 10 mg/m³ (total dust);
LD50 (IV, mouse) 350 mg(Fe)/kg; mildly toxic by IV route; may be harmful by ing., inh., skin absorp.; may cause irritation; if inhaled in sufficient amts., nuisance particulate will evoke some reversible cellular response in the lungs; TSCA listed
Precaution: Potentially explosive as dust; incompat. with strong oxidizing agents; avoid excessive temps., excessive dusting
Hazardous Decomp. Prods.: Toxic fumes of CO, CO2; heated to decomp., emits acrid smoke and irritating fumes; emits toxic fumes under fire conditions
Storage: Hygroscopic; protect from moisture; store @ R.T. in cool, dry place away from direct sunlight, heat, incompat. materials; keep container closed
Uses: Emulsifier, suspending agent, thickener for pharmaceuticals, orals (infant formulas), topicalcs; binder, diluent in tablets; adhesive and stiffener in surgical dressings; mfg. of penicillin
Regulatory: FDA 21CFR §184.1277, 186.1275, GRAS; USDA 9CFR §318.7, 381.147; FDA approved for orals, topicalcs; DOT nonregulated; SARA §302/311/312/313

Diacetylated monoglyceride
Synonyms: Diacetylated monoglyceride
Definition: Glycerin esterified with edible fat-forming fatty acids and acetic acid
Properties: Clear liq.; sol. in 80% aq. alcohol, veg. and min. oils; acid no. 3 max.; sapon. no. 365-395; hyd. no. 15 max.
Storage: Preserve in tight, light-resist. containers
Uses: Excipient, solvent, plasticizer for pharmaceuticals, orals, parenterals
Regulatory: FDA approved for orals; USP/NF compliance
Trade Names: Dynacet® 285

Diacetyl ether. See Ethylacetoacetate
Diacetylmethane. See Acetylacetone
1,2-Diacetyl-sn-glycero-3-phosphocholine. See Hydrogenated lecithin
Di-n-alkyl (C7-C9) phthalate. See n-Diocetyl phthalate

Dialkyl dimethyl ammonium chloride
CAS 68514-95-4; 977065-95-4
Synonyms: Dimethyl dialkyl ammonium chloride
Properties: Cationic
Toxicology: TSCA listed
Hazardous Decomp. Prods.: Heated to decomp., emits acrid smoke and irritating fumes
Uses: Surfactant, antimicrobial in pharmaceuticals
Regulatory: FDA 21CFR §173.400, 177.1200
Trade Names Containing: Bio-Gentle® Formulation

Dialkyl methyl benzyl ammonium chloride
CAS 68391-06-0
Uses: Surfactant, antimicrobial in pharmaceuticals
Regulatory: FDA 21CFR §176.300
Trade Names Containing: BTC® 776

Diallyl disulfide. See Allyl disulfide

Diallyl maleate
CAS 999-21-3; EINECS/ELINCS 213-658-0
Synonyms: But-2-enedioic acid diallyl ester; DAM; Maleic acid diallyl ester
Classification: Nonaromatic ester
Empirical: C₁₀H₁₂O₄
Formula: CH₂:CHCH₂OCOCH:CHCOOCH₂CH:CH₂
Properties: Colorless to straw-colored liq.; pungent odor; insol. in water; m.w. 196.22; dens. 1.077 (20 C); b.p. 109-110 C (3 mm); ref. index 1.4699 (20 C); polymerizes on
heating
Toxicology:  LD50 (oral, rat) 300 mg/kg, (IP, mouse) 160 mg/kg, (skin, rabbit) 1150 mg/kg; toxic by ing. and IP routes; mod. toxic by skin contact; skin and eye irritant; TSCA listed
Precaution:  Polymerizes readily when exposed to light or temps. above 50 C Hazardous Decomp. Prods.:  Heated to decomp., emits acrid smoke and irritating fumes Storage:  Refrigerate; protect from light Uses:  Pharmaceutical intermediate Regulatory:  Canada DSL Manuf./Distrib.:  Aceto† http://www.aceto.com; Aldrich† http://www.sigma-aldrich.com; Ashland http://www.ashchem.com; Clariant/Functional Chems. http://www.fun.clariant.com; Fluka http://www.sigma-aldrich.com Diallyl monosulfide; Diallyl sulfide; Diallylthioether. Diasmol. See 1,3-Nonanediol acetate, mixed esters

Diatomaceous earth
CAS 6067-86-0; 7631-86-9; 68855-54-9; 61790-53-2
EINECS/ELINCS 231-545-4
Synonyms: Diatomaceous silica; Diatomite; Fossil flour; Infusorial earth; Kieselguhr; Siliceous earth; Silicon dioxide, diatomaceous; Solum diatomeae
Definition: Mineral material consisting chiefly of the siliceous frustules and fragments of various species of diatoms
Properties: Wh. to pale buff soft bulky solid; insol. in water, acids except HF, dil. alkalis; sol. in strong alkalis; dens. 1.9-2.35; bulk dens. 8-15 lb/ft³; bulking value 0.06 gal/lb; oil absorp. 135-185%; GE brightness 87-90; ref. index 1.42-1.49; hardness (Mohs) 4.5-6.0; 88% silica
Toxicology: TLV/TWA 10 mg/m³ (dust); poison by inhalation and ing.; dust may cause fibrosis of the lungs; tumorigen
Precaution: Noncombustible
HMIS: Health 1, Flammability 0, Reactivity 0
Uses: Filter aid, sorbent for pharmaceuticals, dentifrices; excipient for pill masses; absorbent for liqs.
Manuf./Distrib.: Alban Muller
†=pharmaceutical grade

Trade Names: Celite® 503; Celite® 512; Celite® 545; Celite® 577; Hyflo Super-Cel® Standard Super-Cel
Trade Names Containing: Sag 471

Diatomaceous earth, amorphous
CAS 61790-53-2
Synonyms: Amorphous silica; Diatomaceous earth, natural; Diatomaceous silica; Diatomite; Infusorial earth; Kieselguhr
Definition: Diatomaceous earth contg. < 1% cryst. silica
Properties: Wh. to tan solid; sol. in hydrofluoric acid; insol. in water
Toxicology: ACGIH TLV/TWA 10 mg/m³ (total dust); NIOSH REL:TWA 6 mg/m³; harmful dust; nuisance dust; may cause fibrosis of the lungs; irritating to eyes, respiratory system; possible carcinogen; tumorigen; TSCA listed
Uses: Filler, flattting agent, rheology control agent in dental applics.
Regulatory: FDA 21CFR §182.90, 184.1420, 573.340
Manuf./Distrib.: Aldrich http://www.sigma-aldrich.com; Sigma http://www.sigma-aldrich.com/belgium
Trade Names: DiaFil® 525; DiaFil® 570; DiaFil® 590; DiaFil® 880; DiaFil® 890
Trade Names Containing: Silbine™ 70451; Silbine™ 70454

Diatomaceous silica. See Diatomaceous earth, amorphous; Diatomaceous earth

Diatomite. See Diatomaceous earth, amorphous; Diatomaceous earth

Diatrizoic acid
CAS 117-96-4
Synonyms: Amidotrizoic acid; 3,5-Bis(acetylamino)-1,4,6-triiodobenzoic acid; 3,5-Diacetamido-2,4,6-triiodobenzoic acid; Urografiin acid; Urogranoic acid
Empirical: C₁₁H₁₀I₃N₂O₄
Properties: Cryst.; m.w. 613.92
Toxicology: LD₅₀ (IP, rat) 14,300 mg/kg, (IV, rat) 11,300 mg/kg; mildly toxic by IP and IV routes
Hazardous Decomp. Prods.: Heated to decomp., emits very toxic fumes of NOₓ and I⁻
Uses: Pharmaceutical injectables; x-ray
Chemical Component Cross-Reference

Diazolidinyl urea

CAS 78491-02-8; EINECS/ELINCS 278-928-2

Synonyms: N-[1,3-Bis (hydroxymethyl)-2,5-dioxo-4-imidazolidinyl]-N,N′-bis (hydroxymethyl) urea; N-(Hydroxymethyl)-N-(1,3-dihydroxymethyl-2,5-dioxo-4-imidazolidinyl)-N′-(hydroxymethyl) urea; Imidazolidinyl urea 11; Urea, N-[1,3-bis (hydroxymethyl)-2,5-dioxo-4-imidazolidinyl]-N,N′-bis (hydroxymethyl)-

Classification: Heterocyclic substituted urea

Empirical: C9H14N4O7

Properties: Colorless clear liq.; mild to pungent odor; highly water sol.; m.w. 278.23; dens. 1.23-1.25; vapor pressure 1.0 mm Hg (20 C); ref. index 1.5590; b.p. 219 C; flash pt. > 110 C; odor; highly water sol.; m.w. 278.23; dens.

Toxicology: LD50 (oral, rat) 2600 mg/kg, (dermal, rabbit) > 2000 mg/kg; mod. toxicity by ing.; may cause mod. skin and eye irritation; may be respiratory irritant; TSCA listed

Environmental: Low avian toxicity; low toxicity to aquatic life

Precaution: May release formaldehyde

Hazardous Decomp. Prods.: Heated to decomp., emits toxic vapors of NOx

Uses: Antimicrobial, preservative for

Intermediate for pharmaceuticals

Features: Broad-spectrum

Regulatory: USA CIR approved; Europe listed; Japan not approved; Canada DSL

Manuf./Distrib.: ISP Sutton Labs; ISP

Trade Names: Germall® II; Unidacide U-26

### 4,4-Dibutyl-γ-butyrolactone

**CAS**: 7774-47-2; EINECS/ELINCS 231-875-9  
**FEMA**: 2372  
**Synonyms**: 4-Butyl-4-hydroxyoctanoic acid, γ-lactone; Dibutyl butyrolactone; 4,4-Dibutyl-4-hydroxybutyric acid, γ-lactone  
**Definition**: Synthesized from butyl pentanol and methyl acrylate using a catalyst  
**Empirical**: C₁₂H₂₂O₂  
**Properties**: Colorless oily liq., oily coconut-butter odor, coconut-like flavor; sol. in alcohol; insol. in water; m.w. 198.31  
**Uses**: Synthetic flavor for pharmaceuticals  
**Regulatory**: FDA 21CFR §172.515; FEMAGRAS; Canada approved  
**Manuf./Distrib.**: Degussa AG/Health & Nutrition  

#### Dibutyl adipate

**CAS**: 105-99-7; EINECS/ELINCS 203-350-4  
**Synonyms**: Adipic acid, dibutyl ester; Butyl adipate; Di-n-butyl adipate; Dibutyl adipinate; Dibutyl hexanedioate; Hexanedioic acid, dibutyl ester  
**Definition**: Diester of butyl alcohol and adipic acid  
**Empirical**: C₁₄H₂₆O₄  
**Formula**: [-CH₂CH₂CO₂(CH₂)₃CH₃]₂  
**Properties**: M.w. 258.36; dens. 0.962; b.p. 305°C; flash pt. > 110°C  
**Toxicology**: LD₅₀ (oral, rat) 12,900 mg/kg, (skin, rabbit) 20,000 mg/kg; mildly toxic; primary irritant to skin and eyes; experimental teratogen, reproductive effects; TSCA listed  
**Hazardous Decomp. Prods.:** Heated to decomp., emits acrid smoke and irritating fumes  
**Uses**: Emollient, oily component in pharmaceutical sun and skin protective oils; solvent for lipid-sol. ingreds.  
**Regulatory**: Canada DSL  
**Manuf./Distrib.**: A&E Connock  

#### Dibutyl phthalate

**CAS**: 84-74-2; EINECS/ELINCS 201-557-4  
**UN 9095 (DOT)**  
**Synonyms**: 1,2-Benzenedicarboxylic acid, dibutyl ester; o-Benzenedicarboxylic acid dibutyl ester; Benzene-o-dicarboxylic acid di-n-butyl ester; Butyl phthalate; n-Butyl phthalate; DBP; Dibutyl-1,2-benzene dicarboxylate; Di-n-butyl phthalate  
**Classification**: Ester  
**Definition**: Aromatic diester of butyl alcohol and phthalic acid  
**Empirical**: C₁₆H₂₄O₄  
**Formula**: C₆H₄(COOC₄H₉)₂  
**Properties**: Colorless to yel. stable oily liq., odorless; misc. with common org. solvs.; insol. in water; m.w. 278.17; dens. 1.0484 (20/20°C); f.p. -35°C; b.p. 340°C; flash pt. (COC) 340°F; autoignition temp. 402°C; ref. index 1.4920; surf. tens. 33.4 dynes/cm; dielec. const. 6.44  
**Toxicology**: ACGIH TLV/TWA 5 mg/m³; LD₅₀ (oral, rat) 8000 mg/kg, (IP, rat) 3050 mg/kg;
Di-n-butyphthalate. See Dibutyl phthalate

Dibutyl sebacate
CAS 109-43-3; EINECS/ELINCS 203-672-5
FEMA 2373
Synonyms: Bis (n-buty) sebacate; DBS; Decanedioic acid, dibutyl ester; Dibutyl decanedioate; Di-n-buty sebacate; Sebacic acid, dibutyl ester
Definition: Diester of butyl alcohol and sebamic acid
Empirical: C_{18}H_{34}O_{4}
Formula: C_4H_9OCO(CH_2)_8OCOC_4H_9
Properties: Colorless clear liq., odorless; sol. in alcohol, IPA, min. oil; sl. sol. in propylene glycol; insol. in water; m.w. 314.47; dens. 0.936 (20/20 C); b.p. 349 C (760 mm); f.p. -11 C; acid no. 0.1 max.; sapon. no. 352-357; flash pt. 350 F; ref. index 1.429-1.441
Toxicology: LD50 (oral, rat) 16 g/kg; mildly toxic by ing.; experimental reproductive effects; TSCA listed
Precaution: Combustible when exposed to heat or flame; can react with oxidizing materials; NFPA: Health 0, Flammability 1, Reactivity 0
Storage: Preserve in tight containers
Uses: Plasticizer for pharmaceutical orals
Regulatory: FDA 21CFR §172.515, 175.105, 175.300, 175.320, 176.170, 177.2600, 178.3910, 181.22, 181.27; FEMA GRAS; FDA approved for orals; USP/NF compliance; Canada DSL

Dicarboxymethane. See Malonic acid

Dicetyl dimethyl ammonium chloride. See Dicetyldimonomium chloride

Dicetyldimonomium chloride

CAS 1812-53-9; 68391-05-9; EINECS/ELINCS 217-325-0

Synonyms: Ammonium dihexadecyldimethyl-, chloride; Dicetyl dimethyl ammonium chloride; Dihexadecyldimethylammonium chloride; Dicetyl dimethyl ammonium chloride; N-Hexadecyl-N,N-dimethyl-1-hexadecanaminium chloride; Quaternium-31; Quaternium-31

Classification: Quaternary ammonium salt

Empirical: C_{34}H_{72}N • Cl

Formula: \([CH_3(CH_2)_{14}CH_2N(CH_3)_{2}CH_2(CH_2)_{14}CH_3]^+Cl^-\)

Properties: Liq.; m.w. 530.52; cationic

Toxicology: TDLo (subcut., mouse) 50 mg/kg; experimental reproductive effects

Handbook of Pharmaceutical Additives, Third Edition 1205
Dicetyl phosphate

Chemical Component Cross-Reference

†=pharmaceutical grade

Hazardous Decomp. Prods.: Heated to decomp., emits toxic fumes of NOx and Cl–
Uses: Conditioner, softener, emollient, emulsifier in pharmaceuticals
Regulatory: FDA 21 CFR §172.710, 177.1200
Manuf./Distrib.: A&E Connock
http://www.connock.co.uk

CAS 2197-63-9; EINECS/ELINCS 218-594-7
Synonyms: Dihexadecyl hydrogen phosphate; Dihexadecyl phosphate; 1-Hexadecanol, hydrogen phosphate; Phosphoric acid, dihexadecyl ester
Definition: Complex mixture of diesters of cetyl alcohol and phosphoric acid
Empirical: C32H67O4P
Formula: [CH3(CH2)15O]2P(O)OH
Properties: M.w. 546.86; m.p. 74-75 C
Uses: Emulsifier in biomedical research
Manuf./Distrib.: Aldrich†

Trade Names Containing: Crodafos CES; Crodafos CS20A

Dichlorantin. See 1,3-Dichloro-5,5-dimethyl hydantoin
1,4-Dichlorobenzene. See p-Dichlorobenzene

p-Dichlorobenzene

CAS 106-46-7; EINECS/ELINCS 203-400-5
UN 1592 (DOT)
Synonyms: p-Chlorophenyl chloride; 1,4-DCB; 1,4-Dichlorobenzene; p-Dichlorobenzol; Paradichlorobenzene; Paradichlorobenzol; Parazene; PDB; PDCB
Classification: Halogenated aromatic hydrocarbon; halobenzene
Empirical: C7H6Cl2
Properties: Wh. cryst. solid, penetrating camphor-like odor; sol. in alcohol, benzene, ether, acetone, diethyl ether, chloroform, CS2, oxygenated/chlorinated/aromatic solvs.; insol. in water; m.w. 147.00; dens. 1.241; vapor pressure 10 mm (54.8 C); m.p. 54-56 C; b.p. 173 C; flash pt. 65 C
Toxicology: ACGIH TLV/TWA 75 ppm; STEL 110 ppm; LD50 (oral, rat) 810 mg/kg; (skin, rabbit) 400 mg/kg; poison by skin contact; mod. toxic by ing.
Hazardous Decomp. Prods.: Heated to decomp., emits toxic fumes of Cl–
Uses: Topical antiseptic, antifungal, preservative in pharmaceuticals
Use Level: 0.05-0.5%
Regulatory: USA CIR approved; Europe listed 0.15% max.; Japan not approved
Manuf./Distrib.: Advanced Synthesis Tech.

### Dichlorodifluoromethane

**CAS**: 75-71-8; EINECS/ELINCS 200-893-9

**UN**: 1028 (DOT); INS 940

**Synonyms**: CFC 12; Difluorodichloromethane; F 12; FC 12; Fluorocarbon 12; Food freezeant 12; Halon; Propellant 12; R 12; Refrigerant 12

**Classification**: Halogenated aliphatic hydrocarbon

**Empirical**: CCl₂F₂

**Formula**: CICF₂Cl

**Properties**: Colorless gas; may be liquefied under pressure; odorless; noncorrosive; insol. in water; sol. in most org. solvs., alcohol, ether, acetic acid; m.w. 120.9; sp.gr. 1.325 (21 C, liq.); vapor pressure 5 atm (16 C); f.p. -158 C; m.p. 132-134 C; flash pt. (CC) 174 C; pH 4.4

**Toxicology**: ACGIH TLV/TWA 1000 ppm; LC₅₀ (inh., rat, 30 min) 80 pph; human systemic effects by inh.; narcotic in high concs.; may cause nose/throat/respiratory irritation, light-headedness, drowsiness, incoordination, liver changes; severe exposure may cause irregular heartbeat, cardiac arrest, death; contact with aerosol or liq. may cause frostbite to skin and eyes; TSCA listed

**Precaution**: Compressed gas; incompat. with reactive metals, e.g., sodium, potassium, aluminum, magnesium, zinc (can react violently or explosively), water (can cause violent spattering or explosion)

**Hazardous Decomp. Prods.**: Heated to decomp., emits highly toxic fumes of phosgene, CI⁻, and F⁻

**Storage**: Store cylinders in a cool, dry, well-ventilated area away from corrosive atmospheres, out of direct sunlight; leaked gas can accumulate in low areas

**Uses**: Aerosol propellant for pharmaceuticals, implants, inhalers, rectals, topicals; prep. of frozen tissue

**Trade Names**: Myacide® SP

**Regulatory**: FDA approved for implants, inhalers, rectals, topicals; USP/NF compliance; SARA §313 reportable; CERCLA hazardous substance; Canada DSL

**Manuf./Distrib.**: Air Prods.

**Synthetic Sources**: Aventis Pharmaceuticals†

**Reportable**: CERCLA hazardous substance; SARA §313 sections

### 7,16-Dichloro-6,15-dihydro-5,9,14,18-anthrazinetetronate

**CAS**: 118-52-5; EINECS/ELINCS 204-258-7

**Synonyms**: Dactin; DCDMH; DDH; Dichlorantin; Dichlorodimethylhydantoin; 1,3-Dichloro-5,5-dimethyl-2,4-imidazolidinedione; 1,3-Dichloro-5,5´-methyl hydantoin; Halane; Hydantoin, 1,3-dichloro-5,5-dimethyl-

**Classification**: Chlorinated hydantoin

**Empirical**: C₄H₆Cl₂N₂O₂

**Formula**: CINCONClO(CH₃)₂

**Properties**: Wh. powd., mild chlorine odor; sol. in benzene, chloroform, ethylene dichloride, alcohol, chlorinated and highly polar solvs.; sl. sol. in water; m.w. 185.01; sp.gr. 1.5 (20 C); m.p. 132-134 C; flash pt. (GC) 174 C; pH 4.4 (aq.); subl. @ 100 C; confлагrates @ 212 C

**Toxicology**: ACGIH TLV/TWA 0.2 mg/m³; STEL 0.4 mg/m³; LD₅₀ (oral, rat) 452 mg/kg; LCLo (inh., rat, 1 h) 20 g/m³; toxic by inhalation; mod. toxic by ing.; severe skin irritant; causes cancer when injected into rats; mutation data reported; TSCA listed

**Precaution**: Combustion with evolution of chlorine; will react with water or steam to produce toxic and corrosive fumes; mixts.

UN 1150

Synonyms: Acetylene dichloride; 1,2-
Dichloroethene; 1,2-Dichloroethylene; cis-
trans-1,2-Dichloroethylene; sym-
Dichloroethylene; Ethylene, 1,2-dichloro-

Empirical: C2H2Cl2

Formula: CICH=CHCl

Properties: Colorless to lt. yel. clear liq.;
ethereal, sl. acrid odor; sol. in DMSO, 95%
ethanol, acetone, ether, most org. solvs.; sol. <
1 mg/ml in water; m.w. 96.94; sp.gr. 1.27;
vapor pressure 180-265 mm Hg (20 C); m.p.-
57 C; b.p. 48-60 C; flash pt. 3.9 C; ref. index
1.4463 (20 C)

Toxicology: ACGIH TLV/TWA 200 ppm; LD50

†=pharmaceutical grade

(oral, rat) 770 mg/kg, (IP, mouse) 2 g/kg;
LD50 (inh., frog, 1 h) 117 mg/m3; poison by
inh.; mod. toxic by ing. and other routes;
may be harmful by skin contact; may cause
irritation of eyes, skin, mucous
membranes, upper respiratory
tract; prolonged contact can have narcotic effect;
may cause drowsiness, unconsciousness,
digestive disturbances, CNS depression,
nausea, vomiting, weakness, tremors,
epigastric cramps, etc.; target organs: CNS,
liver, kidneys; TSCA listed

Precaution: Flamm.; reacts violently with Na,
NaOH, Cu/alloys; can react with caustic
alkalis; forms explosive mixts. with N2O4;
incompat. with strong oxidizers, bases;
corrosive to metals; attacks some plastics,
rubber, coatings; vapor can flash back

Hazardous Decomp. Prods.: Heated to
decom., emits highly toxic fumes of
hydrogen chloride gas, CO, CO2, phosgene
gas; emits toxic fumes under fire
conditions

NFPA: Health 2, Flammability 3, Reactivity 2

Storage: Air-, light-, and moisture-sensitive; keep
container tightly closed under inert
atmosphere; store in explosion-proof
refrigerator; protect from light

Uses: Solvent for pharmaceuticals; medicine

Regulatory: SARA §313 reportable

Manuf./Distrib.: Aldrich http://www.sigma-
aldrich.com

Dichlorofluoromethane

CAS 75-43-4

UN 1029 (DOT)

Synonyms: Dichloromonofluoromethane; F
21; FC 21; Fluorocarbon 21;
Fluorodichloromethane; Freon 21; HCFC
21; HFC 21; R 21; Refrigerant 21

Classification: Halogenated aliphatic
hydrocarbon

Empirical: CHClF2

Formula: Cl2CHF

Properties: Colorless clear gas or liquefied
compressed gas; sl. sweetish ether-like odor;
sol. in alcohol, ether, acetic acid, chloroform;
sl. sol. in water; m.w. 102.92; dens. 1.48;
vapor pressure 2 atm (28.4 C); m.p. -135 C;
b.p. 8.9 C; ref. index 1.356; surf. tens. 18
dynes/cm; dielec. const. 5.34; nonflamm.

Toxicology: ACGIH TLV/TWA 10 ppm; LC50
(inh., rat, 4 h) 49,900 ppm; mildly toxic by
inh.; may cause cooling of skin or eye tissue
Chemical Component Cross-Reference

due to rapid evaporation; gas unlikely to cause eye irritation; may cause CNS symptoms, mild nose/throat, airway irritation, lightheadedness, drowsiness, incoordination; severe exposure may cause irregular heartbeat, cardiac arrest, death; experimental reproductive effects; TSCA listed

Environmental: VOC; ThOD 0.16; replacement for CFC but characterized as global warming gas by the Kyoto Conference on Climate Change

Precaution: Incompat. with reactive metals (can react violently with sodium, potassium, calcium, powd. aluminum, zinc, magnesium and alloys), strong bases (can react violently with sodium, potassium, calcium, powd. aluminum, zinc, magnesium and alloys), strong bases (hydrolysis (dec.) can occur in presence of water)

Hazardous Decomp. Prods.: Heated to decomp., emits very toxic fumes of Cl– and F–

Storage: Store cylinders in a cool, dry, well-ventilated area away from flamm. materials and corrosive atmospheres, out of direct sunlight

Uses: Pharmaceutical orals

Regulatory: FDA approved for orals; SARA §313 reportable; Canada DSL

Manuf./Distrib.: Aldrich† http://www.sigma-aldrich.com

Dichloroindanthrone. See D&C Blue No. 9; Indanthrene blue

3,3’-Dichloroindanthrone. See D&C Blue No. 9; Indanthrene blue

7,16-Dichloroindanthrone. See D&C Blue No. 9; Indanthrene blue

7,16-Dichloro-6,15-indanthrone. See D&C Blue No. 9; Indanthrene blue

1,3-Dichloro-5,5’-methyl hydantoin. See 1,3-Dichloro-5,5’-methyl hydantoin

Dichloromonofluoromethane. See Dichlorofluoromethane

Dichlorophenoxyphosphine oxide. See Phenyl dichlorophosphate

1-(3’,4’-Dichlorophenyl)-3-(4’-chlorophenyl) urea; N-(3,4-Dichlorophenyl)-N’-(4-chlorophenyl) urea. See 3,4,4’-Trichlorocarbanilide

1,6-Di (4´-chlorophenylidiguanidino) hexane diacetate. See Chlorhexidine diacetate

Dichlorotetrafluoroethane

CAS 1320-37-2

†=pharmaceutical grade

UN 1958 (DOT)

Synonyms: Ethane, dichlorotetrafluoro-; CFC 114; Cryofluorane; Dichlorotetrafluoroethane; Freon 114; Fluorane 114; Fluorocarbon 114; Freron 114; Halocarbon 114; Propellant 114; R 114; Refrigerant 114; Tetrafluorodichloroethane; 1,1,2,2-Tetrafluoro-1,2-dichloroethane

Empirical: C2Cl2F4

Properties: Colorless gas; m.w. 170.92; b.p. 3.5 C; nonflamm.

Toxicology: LC50 (inh., rat, 30 min) 700,000 ppm; mildly toxic irritant; narcotic in high concs.; asphyxiant; TSCA listed

Precaution: Reacts violently with alcohol

Hazardous Decomp. Prods.: Heated to decomp., emits toxic fumes of F– and Cl–

Uses: Aerosol propellant for pharmaceuticals

Regulatory: USP/NF compliance; Canada DSL

Manuf./Distrib.: Refron http://www.refron.com

See also 1,2-Dichlorotetrafluoroethane

1,2-Dichlorotetrafluoroethane

CAS 76-14-2; EINECS/ELINCS 200-937-7

UN 1958

Synonyms: CFC 114; Cryofluorane; Dichlorotetrafluoroethane; Ethane, 1,2-dichloro-1,1,2,2-tetrafluoroethylene; Freon 114; Fluorocarbon 114; Fluorane 114; Methylene chloride; Refrigerant 114; Tetrafluorodichloroethane; 1,1,2,2-Tetrafluoro-1,2-dichloroethane

Classification: Halogenated aliphatic hydrocarbon

Empirical: C2Cl2F4

Formula: CCIF2CCIF2

Properties: Colorless clear gas or liquefied compressed gas; nearly odorless to faint ethereal odor; pract. insol. in water; sol. in alcohol, ether; m.w. 170.92; sp.gr. 1.5312 (liq., 0 C); vapor pressure 1620 mm Hg; f.p. -94 C; b.p. 3.55 C; ref. index 1.3092; surf. tens. 12 dynes/cm; dielec. const. 2.26; nonflamm.

Toxicology: ACGIH TLV/TWA 1000 ppm; LC50 (inh., rat, 30 min) 72 ppm; toxic by inhalation; an asphyxiant; may cause mild irritation of nose, throat, upper airways; high concs. may cause lightheadedness, dizziness, drowsiness; TSCA listed

Environmental: ThOD 0.09

Precaution: Compressed gas; incompat. with reactive metals (sodium, potassium, magnesium, zinc, powd. aluminum); can react violently or explosively

Storage: Store cylinders in cool, dry, well-ventilated area away from corrosive atmospheres, out of direct sunlight; leaked gas
can accumulate in low areas

Uses: Aerosol propellant for pharmaceuticals, inhalants, nasals, rectals, topicals

Regulatory: FDA 21CFR §701.30; FDA approved for inhalants, nasals, rectals, topicals; NF compliance; SARA §313 reportable; Canada DSL

Trade Names: Genetron® 114

See also Dichlorotetrafluoroethane

1,2-Dichloro-1,1,2,2-tetrafluoroethane; sym-Dichlorotetrafluoroethane. See 1,2-Dichlorotetrafluoroethane

Dichlorotetrafluoroethane

CAS 76-14-2
Synonyms: Cryfluorane; Tetrafluorodichloromethane
Empirical: C2Cl2F4
Formula: ClCF2CF2Cl
Properties: M.p. -137.2 F; b.p. 38.6 F
Uses: Aerosol propellant for pharmaceuticals

Dichromium trioxide. See Chromium oxide (ic); Chromium hydroxide green

Dicocoyl pentaerythrityl distearyl citrate

Synonyms: Citric acid, 1,2-dodecyl ester, ester with bis (coco acyl) pentaerythrytol
Classification: Synthetic compd.
Definition: Coconut oil derivative
Uses: Emollient, moisturizer, emulsifier for pharmaceutical emulsions and lip balms

Di-C12-15 pareth-2 phosphate

CAS 149919-01-7
Definition: Complex mixt. of diesters of phosphoric acid and C12-15 pareth-2
Properties: Anionic
Uses: Surfactant, emulsifier, stabilizer, dispersant, detergent for pharmaceuticals
Trade Names: DDP-2

Di-C12-15 pareth-4 phosphate

CAS 149919-02-8
Definition: Complex mixt. of diesters of phosphoric acid and C12-15 pareth-4
Properties: Anionic
Uses: Surfactant, emulsifier, stabilizer, dispersant, detergent for pharmaceuticals
Trade Names: DDP-4

Di-C12-15 pareth-6 phosphate

CAS 149919-03-9
Definition: Complex mixt. of diesters of phosphoric acid and a syn. C12-15 ethoxylated alcohol with avg. 6 moles EO
Properties: Anionic
Uses: Surfactant, emulsifier, stabilizer, dispersant, detergent for pharmaceuticals
Trade Names: DDP-6

Di-C12-15 pareth-8 phosphate

CAS 25982-05-8
Definition: Complex mixt. of diesters of phosphoric acid and a syn. C12-15 ethoxylated alcohol with avg. 8 moles EO
Properties: Anionic
Toxicology: TSCA listed
Uses: Surfactant, emulsifier, stabilizer, dispersant, detergent for pharmaceuticals
Trade Names: DDP-8

Di-C12-15 pareth-10 phosphate

CAS 149919-04-0
Definition: Complex mixt. of diesters of phosphoric acid and a syn. C12-15 ethoxylated alcohol with avg. 10 moles EO
Properties: Anionic
Uses: Surfactant, emulsifier, stabilizer, dispersant, detergent for pharmaceuticals
Trade Names: DDP-10

Dicy. See Dicyandiamide

Dicyandiamide

CAS 461-58-5; EINECS/ELINCS 207-312-8
Synonyms: Cyanoguanidine; Dicyandiamide; Dicyanodiamide
Classification: Aliphatic organic compd.
Empirical: C2H4N4
Formula: NH2C(NH)(NHCN)
Properties: Pure wh. crystals; sol. in liq. ammonia; partly sol. in hot water; sl. sol. in alcohol; m.w. 84.08; dens. 1.4 (25 C); m.p. 207-209 C; stable when dry; nonflamm.
Toxicology: LD50 (oral, rat) > 500 mg/kg; TSCA listed
Precaution: Mixts. with ammonium nitrate, potassium chlorate, and related compds. are powerful explosives
Hazardous Decomp. Prods.: Heated to
Chemical Component Cross-Reference

### Chemical Component Cross-Reference

**Chemical:** [CH₃(CH₂)₉N(CH₃)₂(CH₂)₉CH₃]⁺Cl⁻

**Properties:** Liq.; sol. in acetone; extremely sol. in benzene; m.w. 362.08; cationic

**Toxicology:** LD₅₀ (oral, rat) 84 mg/kg, (IP, rat) 45 mg/kg; poison by ing. and IP routes; primary irritant; causes eye damage and skin irritation; harmful if swallowed; TSCA listed

**Hazardous Decomp. Prods.:** Heated to decomp., emits very toxic fumes of NOₓ, NH₃, and Cl⁻

**Uses:** Antiseptic for pharmaceuticals, topicals (hand scrubs, athlete's foot prevention); biocide; disinfectant; surfactant

**Regulatory:** FDA 21CFR §177.1200; Canada DSL

**Manuf./Distrib.:** Dishman USA [http://www.dishman-usa.com]; Lonza [http://www.lonza.com]

**Trade Names:** Bardac® 2240; Bardac® 2270

**Trade Names Containing:** Bardac® 2270E; BTC® 885; BTC® 885 P40

**D-2,3-Didehydro-erythro-hexono-1,4-lactone.** See Erythorbic acid

**Didodecyl 3,3’-thiodipropionate.** See Dilauryl thiodipropionate

**3,7-Diemthyl-1,6-octadien-3-yl hexanoate.** See Linalyl hexanoate

**Diethamine.** See Diethylamine

**Diethanolamide condensate from soybean oil fatty acids.** See Soyamide DEA

**Diethanolamine**

**CAS:** 111-42-2; EINECS/ELINCS 203-868-0

**UN:** 1760

**Synonyms:** Bis (2-hydroxyethyl) amine; N,N-Bis (2-hydroxyethyl) amine; DEA; DELA; Diethylolamine; 2,2'-Dihydroxydiethlamine; Di (2-hydroxyethyl) amine; Diolamone; 2-(2-Hydroxyethylamino) ethanol; 2,2’-Iminobisethanol; 2,2’-Iminodietanol

**Classification:** Aliphatic amine; alkanolamine

**Empirical:** C₆H₁₁NO₂

**Formula:** (HOCH₂CH₂)₂NH

**Properties:** Colorless cryst. or liq., mild ammoniacal odor; very sol. in water and alcohol; misc. with acetone, chloroform, glycerin; insol. in ether, benzene; m.w. 105.09; dens. 1.0881 (30/4 C); m.p. 28 C; b.p. 268 C; flash pt. 300 F; ref. index 1.4770

**Toxicology:** ACGIH TLV/TWA 3 ppm in air; LD₅₀ (oral, rat) 12.76 g/kg, (IP, mouse) 2300 mg/kg, (subcut., mouse) 3553 mg/kg, (skin, rabbit) 12,200 mg/kg; mod. toxic by ing., IP, and subcut. routes; severe eye and skin irritant; mucous membrane irritant; experimental reproductive effects; TSCA listed

**Environmental:** ThOD 1.52

**Precaution:** Combustible; DOT: corrosive material; normally stable; slowly oxidized by air; incompatible with oxidizing agents, strong acids, acid anhydrides, nitrosating agents

**NFPA:** Health 1, Flammability 1, Reactivity 0

**Storage:** Hygroscopic, deliq.; light-sensitive; store @ R.T. in cool, dry, well-ventilated area away from heat and ignition sources

**Uses:** Alkalizer, detergent, emulsifier, solubilizer, and dispersant in pharmaceuticals, injectables (IV), ophthalmics

**Regulatory:** FDA 21CFR §175.105, 176.170, 176.180, 176.210, 177.2600; FDA approved for injectables (IV), ophthalmics; USP/NF compliance; SARA §313 reportable; HAP; Canada DSL

Diethylethanolamine

CAS 100-37-8; EINECS/ELINCS 202-845-2
UN 2686 (DOT)

Synonyms: DEAE; 2-Diethylethanolamine; β-Diethylethanolamine; N-N-Diethylethanolamine; N,N-Diethylethanolamine; N,N-Diethylethanolamine; N,N-Diethylethanolamine; N,N-Diethylethanolamine; Ethanol, 2-(diethylethanolamine)-2-Hydroxytriethylamine

Classification: Aliphatic amino alcohol

Empirical: C_6H_{15}NO

Formula: (C_2H_5)_2NCH_2CH_2OH

Properties: Colorless liq.; strong ammonia-like odor; sol. in water, alcohol, acetone, ether, benzene, petrol. ether; misc. with most org. solvs.; m.w. 117.19; dens. 0.88-0.89 (20/20 C); vapor pressure 1.4 mm Hg (20 C); f.p. -70 C; b.p. 161 C; flash pt. (OC) 140 F; ref. index 1.4389

Toxicology: ACGIH TLV/TWA 10 ppm (skin); LD50 (oral, rat) 1300 mg/kg, (IP, rat) 1220 mg/kg, (subcut., mouse) 1561 mg/kg, (IV, mouse) 188 mg/kg; poison by IP, IV routes; mod. toxic by ing., skin contact, subcut. routes; human systemic effects by inh. (nausea, vomiting); skin, severe eye irritant; corrosive; TSCA listed

Environmental: VOC; ThOD 2.32

Precaution: DOT: Flamm. liq.; moderate fire risk; reactive with oxidizing materials

Hazardous Decomp. Prods.: Heated to decomp., emits toxic fumes of NOx

NFPA: Health 3, Flammability 2, Reactivity 0

Storage: Hygroscopic

Uses: Pharmaceutical intermediate

Regulatory: FDA 21CFR §173.310 (15 ppm max. in steam); Canada DSL
N-[2-(Diethylamino)ethyl]stearamide phosphate. See Diethylaminoethyl stearamide phosphate

Diethylaminoethyl stearate
CAS 3179-81-5; EINECS/ELINCS 221-662-9
Synonyms: 2-(Diethylamino) ethyl octadecanoate; 2-(Diethylamino) ethyl stearate; Octadecanoic acid, 2-(diethylamino) ethyl ester
Classification: Aliphatic ester
Empirical: C_{32}H_{54}NO_2
Properties: Straw to amber liq. to semisolid, amine odor; sol. in ethanol, IPM, oleyl alcohol; partly sol. in min. oil; disp. in water; sp.gr. 0.860-0.880; pH 9.5-10.5 (3%); sapon. no. 150-160
Toxicology: TSCA listed
Uses: Emulsifier, dispersant for pharmaceuticals, topicals
Regulatory: Canada DSL
Trade Names: Cerasynt® 303

2-(Diethylamino) ethyl stearate. See Diethylaminoethyl stearate

Diethyl-m-aminophenolphthalein hydrochloride. See Basic violet 10; D&C Red No. 19

Diethyl carbinol. See 3-Pentanol

Diethyl 'Carbitol'. See Diethylene glycol diethyl ether

Diethyl cyanomethylphosphonate
CAS 2537-48-6; EINECS/ELINCS 219-806-0
Synonyms: Cyanomethyl phosphonic acid diethyl ester; (Diethylphosphono) acetonitrile
Classification: Nonaromatic phosphorus compd.
Empirical: C_{6}H_{12}NO_3P
Properties: M.w. 177.14; dens. 1.095; b.p. 101-102 C (0.4 mm); ref. index 1.4320
Toxicology: Harmful vapor; irritating to eyes, skin, respiratory system; avoid contact and inh.
Precaution: Corrosive
Uses: Pharmaceuticals intermediate

Precaution: Corrosive

Diethylaminoethyl stearate phosphate
CAS 68133-34-6
Synonyms: N-[2-(Diethylamino)ethyl]stearamide phosphate; Stearamidoethyl diethylamine phosphate
Uses: Pharmaceutical topicals
Diethylenediamine. See Diethylene glycol diethyl ether
Diethyl diglycol. See Diethylene glycol diethyl ether
Diethyl 2,3-dihydroxybutanedioate; Diethyl 2,3-dihydroxyisuccinate. See Diethyl tartrate
Diethyl diketone. See 3,4-Hexanedione
Diethylenediamine; 1,4-Diethylenediamine; N,N-Diethylenediamine. See Piperazine
Diethylene dioxide; 1,4-Diethylene dioxide; Diethylene ether. See 1,4-Dioxane
Diethylene glycol
CAS 111-46-6; EINECS/ELINCS 203-872-2
Synonyms: Bis (2-hydroxyethyl) ether; DEG; Diglycol; Digo; Dihydroxydiethyl ether; β,β'-Dihydroxydiethyl ether; 2,2'- Dihydroxyethyl ether; Ethanol, 2,2'-oxydi-; Ethylene diglycol; Glycol ether; Glycol ethyl ether; 3-Oxapentane-1,5-diol; 3-Oxa-1,5-pentanediol; 2,2'-Oxybisethanol; 2,2'-Oxydiethanol
Classification: Aliphatic diol; glycol ether
Empirical: C4H10O3
Formula: CH2OHCH2OCH2CH2OH
Properties: Colorless clear syrupy liq., pract. odorless, sweetish taste; lowers f.p. of water; misc. with water, ethanol, acetone, ether, ethylene glycol; m.w. 106.12; dens. 1.1184 (20/20 C); vapor pressure 1 mm Hg (91.8 C); f.p. -80 C; b.p. 245 C; flash pt. 124 C
Toxicology: LD50 (oral, human) 1000 mg/kg, (oral, rat) 12,565 mg/kg, (skin, rabbit) 11,890 mg/kg; poison by inh.; mod. toxic to humans by ing., IV routes; hazardous for household use in conc. of 10% or more; may cause acidosis and renal failure; experimental carcinogen, tumorigen, teratogen; eye and human skin irritant; TSCA listed
Environmental: VOC; BOD5 0.12; COD 1.51;

ThOD 1.51
Precaution: Combustible exposed to heat or flame; reactive with oxidizing materials; dec. exothermically with sodium hydroxide @ 230 C and releases explosive hydrogen gas
Hazardous Decomp. Prods.: CO, CO2; heated to decomp., emits acid smoke and irritating fumes
NFPA: Health 1, Flammability 1, Reactivity 0
Storage: Extremely hygroscopic
Uses: Solvent in pharmaceuticals
Regulatory: FDA 21CFR §175.105, 177.2420; Canada DSL

Handbook of Pharmaceutical Additives, Third Edition
Diethylene glycol dibutyl ether

CAS: 112-73-2; EINECS/ELINCS: 204-001-9

Synonyms: Bis (butoxyethyl) ether; Bis (2-butoxyethyl) ether; 2-Butoxyethyl ether; Butyl diglyme; Butyl glycol ether; Dibutoxy diethylene glycol; 2,2´-Dibutoxyethyl ether; Dibutyl 'Carbitol'; Dibutyl diglycol; Diethylene glycol di-n-butyl ether; Ether, bis (2-butoxyethyl); 1,1´-(Oxybis (2,1-ethanediol)) bisbutane; 5,8,11-Trioxapentadecane

Empirical: C12H26O3

Formula: C4H9O(C2H4O)2C4H9

Properties: Almost colorless liq.; char. mild ether odor; sol. in DMSO, 95% ethanol, acetone; misc. with ether, ketones, esters, CC14; sol. <1 mg/ml in water; m.w. 218.38; dens. 0.8853 (20/20 C); vapor pressure 0.02 mm Hg (20 C); f.p. -60.2 C; b.p. 256 C; flash pt. 118 C; ref. index 1.423 (20 C); vapor pressure 0.02 mm Hg (20 C); f.p. -60.2 C; b.p. 256 C; flash pt. 118 C; ref. index 1.423 (20 C)

Toxicology: LD50 (oral, rat) 3900 mg/kg, (skin, rabbit) 4040 mg/kg; mod. toxic by ing.; mildly toxic by skin contact; skin and eye irritant; experimental reproductive effects; TSCA listed

Environmental: ThOD 1.54

Precaution: Combustible exposed to heat or flame; may decompose violently on contact with nitric acid; can react with strong oxidizers; incompatible with strong acids, copper, and copper alloys; can form peroxides on exposure to air or oxygen

Hazardous Decomp. Prods.: Heated to decomp., emits acrid smoke, irritating fumes, and toxic fumes of CO and CO2

NFPA: Health 1, Flammability 1, Reactivity 0

Storage: Store in tightly closed container under inert atmosphere at refrigerated temps.

Uses: Solvent, carrier, stabilizer for pharmaceuticals

Features: High-boiling; inert

Regulatory: SARA §313 reportable; HAP; Canada DSL

Trade Names: Butyl Diglyme

Diethylene glycol di-n-butyl ether. See Diethylene glycol dibutyl ether

Diethylene glycol diethyl ether

CAS: 112-36-7; EINECS/ELINCS: 203-963-7

Synonyms: Bis (2-ethoxyethyl) ether; Diethyl 'Carbitol'; Diethyl diglycol; Diglycol diethyl ether; 1-Ethoxy-2-(β-ethoxyethoxy) ethane; Ethoxyethyl ether; 2-Ethoxyethyl ether; Ethyl diglyme; 3,6,9-Trioxaundecane

Classification: Glycol ether

Empirical: C8H18O3

Formula: C2H5O(C2H4O)2C2H5

Properties: Colorless liq.; sol. in hydrocarbons, most org. solvs., and water; m.w. 162.93; dens. 0.9082 (20/20 C); vapor pressure 0.38 mm Hg (20 C); f.p. -44.3 C; b.p. 189 C; flash pt. 180 F; ref. index 1.412 (20 C); surf. tens. 26.68 dynes/cm; dielec. const. 5.70

Toxicology: LD50 (oral, rat) 4970 mg/kg; mod. toxic by ing.; primary irritant; eye irritant; experimental reproductive effects; TSCA listed

Environmental: VOC; ThOD 2.17

Precaution: Flamm. exposed to heat or flame

Hazardous Decomp. Prods.: Heated to decomp., emits acrid smoke and irritating fumes

NFPA: Health 1, Flammability 2, Reactivity 0

Uses: Organic synthesis

Regulatory: SARA §313 reportable; HAP; Canada DSL

Trade Names: Ethyl Diglyme

Diethylene glycol dimethyl ether

CAS: 111-96-6; EINECS/ELINCS: 203-924-4

Synonyms: Bis (2-methoxyethyl) ether; Diethylene glycol dimethyl ether; Diglycol methyl ether; Diglyme; Dimethoxydiglycol;

Diethylene glycol stearate. See PEG-2 stearate

Diethyleneimide oxide; Diethylene imidoxide. See Morpholine

Diethylene oxide. See Tetrahydrofuran

Di (ethylene oxide); 1,4-Diethylene oxide. See 1,4-Dioxane

Diethylene oxime. See Morpholine

Diethylenetriamine pentaacetic acid, calcium trisodium salt. See Calcium trisodium pentatate

Diethylenetriaminopentaacetic acid, pentasodium salt. See Pentasodium pentatate

Diethyleneimide oxide. See Morpholine

Diethyl ethanedicarboxylate. See Diethyl succinate

Diethylethanolamine; N,N-Diethylethanolamine. See Diethylaminoethanol

Diethyl ether. See Ethyl ether

Diethyl ethoxycarbonylmethylphosphonate. See Triethyl phosphonoacetate

Diethyl glycol dimethyl ether. See Diethylene glycol dimethyl ether

Di (2-ethylhexyl) adipate. See Dioctyl adipate

Di(2-ethylhexyl) succinate. See Dioctyl succinate

N,N-Diethyl-N-(β-hydroxyethyl) amine. See Diethylaminoethanol

Diethyl ketone

CAS 96-22-0; EINECS/ELINCS 202-490-3 UN 1156 (DOT)

Synonyms: DEK; Dimethylacetone; Metacetone; Methaceton; 3-Pentanone; Pentanone-3; Propione

Empirical: C₆H₁₀O

Formula: CH₃CH₂COCH₂CH₃

Properties: Colorless mobile liq.; acetone odor; misc. with alcohol, ether, oxygenated solvs.; sol. in 25 parts water; m.w. 86.14; dens. 0.814; m.p. -42 C; b.p. 99-103 C; flash pt. 55 F; ref. index 1.392

Toxicology: LD₅₀ (oral, rat) 2.1 g/kg, (IV, mouse) 513 mg/kg, (skin, rabbit) 20 g/kg; mod. toxic by ing., IP, IV routes; skin and eye irritant; mutagenic data; TSCA listed

Precaution: Highly flamm.; dangerous fire hazard exposed to heat or flame; can react vigorously with oxidizing materials; reacts with hydrogen peroxide + nitric acid to form a shock- and heat-sensitive explosive
**Chemical Component Cross-Reference**

**Diethyl malate.** See Diethyl DL-malate

**Diethyl DL-malate**

CAS 626-11-9; EINECS/ELINCS 210-930-0

**Synonyms:** Diethyl malate; Ethyl malate; DL-Malic acid diethyl ester

**Empirical:** C₈H₁₄O₅

**Properties:** Colorless to ylsh. liq.; fruity odor and flavor; m.w. 190.20; dens. 1.128 g/ml; b.p. 122-124 C (12 mm); flash pt. 85 C

**Toxicology:** May be harmful by inh., ing., or skin absorp.; may cause eye/skin irritation; TSCA listed

**Precaution:** Combustible; incompat. with strong oxidizing agents

**Hazardous Decomp. Prods.:** Toxic fumes of CO, CO₂; emits toxic fumes under fire conditions

**Storage:** Store in cool, dry place; keep tightly closed; keep away from heat, open flame

**Uses:** Synthetic flavor for pharmaceuticals

**Features:** Fruity flavor

**Regulatory:** FDA 21CFR §172.515; FEMA GRAS

**Diethyl maleate**

CAS 141-05-9; EINECS/ELINCS 205-451-9

**Synonyms:** (Z)-2-Butenedioic acid diethyl ester; EM; Ethyl maleate; Maleic acid, diethyl ester

**Classification:** Nonaromatic ester

**Empirical:** C₈H₁₂O₄

**Formula:** C₈H₁₂O₄CH₂COOCH₃

**Properties:** Water-wh. liq.; readily sol. in alcohol, diethyl ether, paraffinic hydrocarbons, common org. solvs.; insol. in water; m.w. 172.18; dens. 1.064; m.p. -10 C; b.p. 225 C; flash pt. 200 F; ref. index 1.4400 (20 C); surf. tens. 3.70 dynes/cm (20 C); dielec. const. 2.18

**Toxicology:** LD₅₀ (oral, rat) 3200 mg/kg, (IP, rat) 3070 mg/kg, (skin, rabbit) 4000 mg/kg; mod. toxic by ing., skin contact, IP routes; skin and eye irritant; mutagen; TSCA listed

**Precaution:** Combustible; readily hydrolyzed by alkaline sol’ns.; can react with oxidizers

**Hazardous Decomp. Prods.:** Heated to decomp., emits acrid smoke and irritating fumes

**NFPA:** Health 1, Flammability 1, Reactivity 0

**Uses:** Synthetic flavor for pharmaceuticals

**Features:** Fruity, mild citrus banana-like flavor

**Regulatory:** Canada DSL

**Diethyl malonate**

CAS 105-53-3; EINECS/ELINCS 203-305-9

**FEMA 2375**

**Synonyms:** Carbethoxyacetic ester; DEM; Dicarbethoxymethane; Diethyl propanedioate; Ethyl malonate; Malonic acid, diethyl ester; Malonic ester; Methanedicarboxylic acid, diethyl ester; Propanedioic acid diethyl ester

**Classification:** Aliphatic organic compd.

**Empirical:** C₇H₁₂O₄

**Formula:** CH₂(COOC₂H₅)₂

**Properties:** Colorless liq., sl. aromatic pleasant odor; sol. in fixed oils, propylene glycol, oxygenated solvs.; misc. with alcohol, ether; sol. 1 g/50 ml in water; insol. in glycerin, min. oil; m.w. 160.17; dens. 1.055 (20/4 C); vapor pressure 1 mm (40 C); f.p. -50 C; b.p. 94-95 C (11 mm); flash pt. 80 C; ref. index 1.413 (20 C)

**Toxicology:** LD₅₀ (oral, rat) 15 g/kg; mildly toxic by ing.; skin irritant; TSCA listed

**Precaution:** Combustible; can react with oxidizers
Chemical Component Cross-Reference

**Hazardous Decomp. Prods.:** Heated to decomp., emits acrid smoke and irritating fumes

**NFPA:** Health 0, Flammability 1, Reactivity 0

**Uses:** Synthetic flavor for pharmaceuticals

**Features:** Fruity flavor

**Regulatory:** FDA 21CFR §172.515; FEMA GRAS; Canada DSL

**Diethyl 1,8-octanedicarboxylate.** See **Diethyl sebacate**

**Diethylenolamine.** See **Diethanolamine**

**Diethyl oxide.** See **Ethyl ether**

(Diethylphosphono) acetonitrile. See **Diethyl cyanomethylphosphonate**

**Diethyl phthalate**

CAS 84-66-2; EINECS/ELINCS 201-550-6

**Synonyms:** 1,2-Benzenedicarboxylic acid diethyl ester; DEP; Diethyl 1,2-benzenedicarboxylate; Diethyl-o-phthalate; Ethyl phthalate; Phthalic acid, diethyl ester; Phthalol

**Definition:** Aromatic diester of ethyl alcohol and phthalic acid

**Empirical:** C\textsubscript{12}H\textsubscript{14}O\textsubscript{4}

**Formula:** C\textsubscript{6}H\textsubscript{4}(CO\textsubscript{2}C\textsubscript{2}H\textsubscript{5})\textsubscript{2}

†=pharmaceutical grade

**Properties:** Water-wh. oily liq., odorless, bitter taste; misc. with alcohol, ketones, esters, oxygenated and aromatic solvs.; insol. in water; m.w. 222.24; dens. 1.120 (25/25 C); f.p. -40.5 C; b.p. 298 C; flash pt. (OC) 325 F; visc. 31.3 cs (0 C); ref. index 1.500-1.505; stable

**Toxicology:** ACGIH TLV/TWA 5 mg/m\textsuperscript{3}; LD50 (oral, rat) 8600 mg/kg, (IP, rat) 5058 mg/kg; poison by IV route; mod. toxic by ingestion, subcut., IP routes; human systemic effects; strong irritant to eyes and mucous membranes; narcotic in high concs.; experimental teratogen, reproductive effects; TSCA listed

**Precaution:** Combustible when exposed to heat or flame

**Hazardous Decomp. Prods.:** Heated to decomp., emits acrid smoke and irritating fumes

**NFPA:** Health 0, Flammability 1, Reactivity 0

**Uses:** Plasticizer, fragrance in pharmaceuticals, orals

**Regulatory:** FDA 21CFR §175.105, 175.300, 175.320, 178.3910, 181.22, 181.27, 212.177; 27CFR §21.105; FDA approved for orals; USP/NF, BP, EP compliance; SARA reportable; Canada DSL

Chemical Component Cross-Reference

Diethylo-phthalate. See Diethyl phthalate
Diethyl propanedioate. See Diethyl malonate
3,3-Diethylo-2,4(1H,3H)pyridinedione. See Pyridylidine

Diethyl sebacate
CAS 110-40-7; EINECS/ELINCS 203-764-5
FEMA 2376
Synonyms: Diethyl decanedioate; Diethyl-1,10-decanedioate; Diethyl 1,8-octanedicarboxylate; Dodecanedioic acid diethyl ester; Ethyl sebacate; Sebacic acid, diethyl ester
Definition: Diester of ethyl alcohol and sebacic acid
Empirical: C₁₄H₂₆O₄
Formula: CH₃CH₂OCO(CH₂)₈COOCH₂CH₃
Properties: Colorless to sl. yel. liq., faint fruity odor; misc. with alcohol, ether, other org. solvs., fixed oils; insol. in water; m.w. 174.22; dens. 1.039 (20/4 C); m.p. -20 C; b.p. 97-99 C (10 mm); flash pt. 230 F; ref. index 1.420
Toxicology: LD50 (oral, rat) 8530 mg/kg; mildly toxic by ing.; skin and eye irritant; TSCA listed
Precaution: Combustible liq.; may cause fire or explosion on reaction with ethyl trifluoroacetate + sodium hydride
Hazardous Decomp. Prods.: Heated to decomp., emits acrid smoke and irritating fumes
NFPA: Health 1, Flammability 1, Reactivity 0
Uses: Synthetic flavor for pharmaceuticals; emollient
Regulatory: FDA 21CFR §172.515; FEMA GRAS; Canada DSL
Manuf./Distrib.: Boith China

Diethyl succinate
CAS 123-25-1; EINECS/ELINCS 204-612-0
FEMA 2377
Synonyms: Butanedioic acid diethyl ester; Diethyl butanedioate; Diethyl ethanedicarboxylate; Ethyl succinate; Succinic acid diethyl ester
Empirical: C₈H₁₄O₄
Formula: C₄H₆OCOCH₂CH₂COOC₂H₅
Properties: Colorless to lt. yel. clear mobile liq., pleasant odor; sol. in alcohol, fixed oils, ether, oxygenated solvs.; insol. in water; m.w. 174.22; dens. 1.039 (20/4 C); m.p. -20 C; b.p. 97-99 C (10 mm); flash pt. 230 F; ref. index 1.420
Toxicology: LD50 (oral, rat) 14,470 mg/kg; mildly toxic by ing.; skin and eye irritant; TSCA listed
Precaution: Combustible liq.; may cause fire or explosion on reaction with ethyl trifluoroacetate + sodium hydride
Hazardous Decomp. Prods.: Heated to decomp., emits acrid smoke and irritating fumes
NFPA: Health 1, Flammability 1, Reactivity 0
Uses: Synthetic flavor for pharmaceuticals; emollient
Regulatory: FDA 21CFR §172.515; FEMA GRAS; Canada DSL
Manuf./Distrib.: ChemService
http://www.chemservice.com; Elan
http://www.elan-chemical.com; Firmenich
Chemical Component Cross-Reference

dihydroxysuccinate; (+)-Diethyl L-tartrate; (R)-2,3-Dihydroxybutanedioic acid diethyl ester; Ethyl tartrate
Empirical: C₈H₁₄O₆
Formula: C₂H₅OOCH(OH)CH(OH)COOC₂H₅
Properties: Colorless thick oily liq.; sl. sol. in water; misc. with alcohol, ether; m.w. 206.19; dens. 1.204 (20/4 C); m.p. 17 C; b.p. 280 C; flash pt. 93 C; ref. index 1.4476 (20 C)
Precaution: Combustible
NFPA: Health 0, Flammability 1, Reactivity 0
Uses: Synthetic flavor for pharmaceuticals
Features: Fruity flavor
Regulatory: FDA 21CFR §172.515; FEMA GRAS; Canada DSL

(+)-Diethyl L-tartrate. See Diethyl tartrate

2,5-Diethyltetrahydrofuran
CAS 41239-48-9
FEMA 3743
Synonyms: Furan, 2,5-diethyltetrahydro-
Empirical: C₈H₁₆O
Properties: Colorless liq., sweet herbaceous caramelic odor; sol. in alcohol, propylene glycol; sl. sol. in water; m.w. 128.21; b.p. 116 C
Toxicology: LD₅₀ (oral, rat) 3400 mg/kg; mod. toxic by ing.; TSCA listed
Hazardous Decomp. Prods.: Heated to decomp., emits acrid smoke and irritating vapors
Uses: Synthetic flavor for pharmaceuticals
Regulatory: FDA 21CFR §172.515; FEMA GRAS; Canada DSL
Manuf./Distrib.: Degussa AG http://www.degussa.com

Diethyl toluenediamine
CAS 68479-98-1
Synonyms: DETDA; 2,4-Diamino-3,5-diethyldiamine; 3,5-Diethyltoluenediamine
Classification: Orthoalkylated aromatic
Definition: Mixed prod. contg. 75% 3,5-diethyl-2,4-toluenediamine, 20% 3,5-diethyl-2,6-toluenediamine, and 5% other amines
Empirical: C₁₂H₂₀N₂
Properties: M.w. 192.30
Uses: Intermediate for pharmaceuticals
Regulatory: Canada DSL

†=pharmaceutical grade

Manuf./Distrib.: Albemarle http://www.albemarle.com

3,5-Diethyltoluenediamine. See Diethyl toluene diamine

Difluorodichloromethane. See Dichlorodifluoromethane

Diglycerine sesquioleate. See Polyglyceryl-2 sesquioleate

Diglyceryl dioleate. See Polyglyceryl-2 dioleate

Diglyceryl monooleate. See Polyglyceryl-2 oleate

Diglyceryl monostearate. See Polyglyceryl-2 stearate

Diglyceryl PEG-4 stearate. See Polyglyceryl-2-PEG-4 stearate

Diglyceryl sesquisoostearate. See Polyglyceryl-2 sesquisoostearate

Diglyceryl sesquioleate. See Polyglyceryl-2 sesquioleate

Diglycol. See Diethylene glycol

Diglycol/CHDM/isophthalates/SIP copolymer
Synonyms:
- Diglycol/cyclohexanenedimethanol/isophthalates/sulfoisophthalates copolymer

Definition: Copolymer of diethylene glycol, 1,4-cyclohexanenedimethanol, and the simple esters of isophthalic acid and sulfoisophthalic acid
Uses: Film-former in topical pharmaceuticals

Diglycol/cyclohexanenedimethanol/isophthalates/sulfoisophthalates copolymer. See Diglycol/CHDM/isophthalates/SIP copolymer

Diglycol diethyl ether. See Diethylene glycol diethyl ether

Diglycol methyl ether. See Diethylene glycol dimethyl ether

Diglycol monoethyl ether. See Ethoxydiglycol

Diglycol monostearate. See PEG-2 stearate

Diglycol oleate. See PEG-2 oleate

Diglycol stearate. See PEG-2 stearate

Diglyme. See Diethylene glycol dimethyl ether

Digol. See Diethylene glycol

Diheptadecyl ketone. See Stearone

Dihexadecyl(dimethylammonium) chloride. See Dietyl(dimmonium) chloride

Dihexadecyl hydrogen phosphate; Dihexadeyl phosphate. See Diglyceryl phosphate

Dihexyl ether. See Hexyl acetate

Dihydroabietyl alcohol. See Hydroabietyl
Chemical Component Cross-Reference

†=pharmaceutical grade

Dihydroabietyl behenate
CAS 127036-29-7
Synonyms: Behenic acid, dihydroabietyl ester; 1-Phenanthrenemethanol, dodecahydro-1,4a-dimethyl-7-(1-methylethyl)-, docosanoate
Definition: Ester of dihydroabietyl alcohol and behenic acid
Empirical: C42H76O2
Properties: Sol. in oil, insol. in water
Uses: Emollient, barrier, substantivity agent for pharmaceuticals, topicals
Trade Names: Pelemol® HAB
Dihydroanethole. See p-Propyl anisole
3,4-Dihydro-2H-1-benzopyran-2-one. See Dihydrocoumarin

Dihydrobutadiene sulfone. See Sulfolane

Dihydrocarveol
CAS 619-01-2; 17699-09-1; EINECS/ELINCS 210-575-1
FEMA 2379
Synonyms: 1,6-Dihydrocarveol; 8-p-Menth-2-en-2-ol; 6-Methyl-3-isopropenylcyclohexanol; 2-Methyl-5-(1-methylethyl) cyclohexanol; Tuberyl alcohol
Definition: Synthesized by reducing carvone and separating the resulting isomers
Empirical: C10H18O
Properties: Almost colorless liq.; herbaceous spearmint odor; sol. in alcohol; m.w. 152.24; dens. 0.926; vapor dens. 5.2; b.p. 224-225 C; flash pt. 178 F; ref. index 1.4710
Toxicology: LD50 (oral, rat) > 5 g/kg, (subcut., mouse) 2900 mg/kg, (dermal, rabbit) > 5 g/kg; mod. toxic by subcutaneous route; primary irritant; TSCA listed
Precaution: Combustible liq.; wear safety glasses or goggles, rubber gloves
Hazardous Decomp. Prods.: Heated to decomp., emits acrid smoke and fumes, CO, CO2
HMIS: Health 1, Flammability 2, Reactivity 1
Storage: Store away from heat, open flames, strong acids, strong bases; keep container tightly closed when not in use
Uses: Flavor for pharmaceuticals
Features: Minty flavor
Use Level: 0.03-0.50%
Regulatory: FDA 21CFR §172.515; FEMA GRAS; Australia AICS; Canada DSL; Japan IEC; Philippines PICSS; China SEPA/CICS; EPA hazardous waste

CAS 20777-49-5; EINECS/ELINCS 244-029-9
FEMA 2380
Synonyms: Dihydrocarveol acetate; l-Dihydrocarvyl acetate; Diydrocrevyl acetate; p-Menthen-8-en-2-ol, acetate; 8-p-Menthen-2-yl acetate; p-Menthen-8-en-2-yl acetate; 6-Methyl-3-isopropenyl cyclohexyl acetate; 2-Methyl-5-(1-methylethyl) cyclohexyl acetate
Classification: Nonaromatic ester
Definition: Acetylation of dihydrocarveol
Empirical: C12H20O2
Properties: Colorless liq., sweet floral rose-like

Dihydrocarvone
CAS 5524-05-0; 7764-50-3; EINECS/ELINCS 231-857-0
FEMA 3565
Synonyms: Dihydrocarvone; p-Menthen-8-en-2-one; d-2-Methyl-5-(1-methylethenyl)-cyclohexanone
Classification: Nonaromatic ketone
Empirical: C10H16O
Properties: Cl. nearly colorless liq.; herbaceous spearmint odor; sol. in alcohol; m.w. 152.24; dens. 0.926; vapor dens. 5.2; b.p. 87-88 C (6 mm); flash pt. 178 F; ref. index 1.4710
Toxicology: LD50 (oral, rat) > 5 g/kg, (subcut., mouse) 2900 mg/kg, (dermal, rabbit) > 5 g/kg; mod. toxic by subcutaneous route; primary irritant; TSCA listed
Precaution: Combustible liq.; wear safety glasses or goggles, rubber gloves
Hazardous Decomp. Prods.: Heated to decomp., emits acrid smoke and fumes, CO, CO2
HMIS: Health 1, Flammability 2, Reactivity 1
Storage: Store away from heat, open flames, strong acids, strong bases; keep container tightly closed when not in use
Uses: Flavor for pharmaceuticals
Features: Minty flavor
Use Level: 0.03-0.50%
Regulatory: FDA 21CFR §172.515; FEMA GRAS; Australia AICS; Canada DSL; Japan IEC; Philippines PICSS; China SEPA/CICS; EPA hazardous waste
Manuf./Distrib.: Frutarom Ltd

Handbook of Pharmaceutical Additives, Third Edition 1223
Chemical Component Cross-Reference

Dihydro-2,5-dioxofuran. See Maleic anhydride
1,4-Dihydro-1-ethyl7-methyl4-oxo-1,8-naphthyridine-3-carboxylic acid. See Nalidixic acid
Dihydro-2,5-furandione. See Succinic anhydride
2,5-Dihydrofuran-2,5-dione. See Maleic anhydride
Dihydro-2(3H)-furanone. See Butyrolactone

Dihydrogenated tallow phthalic acid amide
CAS 127733-92-0
Synonyms: Benzoic acid, 2-[bis (hydrogenated tallow alkyl)] aminocarbonyl-
Classification: Organic compd.
Properties: Nonionic
Uses: Emulsifier, suspending agent for antidandruff shampoos
Regulatory: Canada DSL
Chemical Component Cross-Reference

Dihydroxyacetone
CAS 96-26-4; EINECS/ELINCS 202-494-5
Synonyms: DHA; 1,3-Dihydroxyacetone; 1,3-Dihydroxydimethyl ketone; 1,3-Dihydroxy-2-propanone; Oxatone chromelin
Classification: Aliphatic ketone
Empirical: C₃H₆O₃
Formula: HOCH₂COCH₂OH
Properties: Almost wh. crystals, char. odor, sweet taste; sol. in water, ethanol; m.w. 90.09; m.p. 78-80 C; pH 4-6 (5% aq.)
Toxicology: LD₅₀ (oral, rat) 16 g/kg; no known skin toxicity; can cause allergic contact dermatitis; TSCA listed
HMIS: Health 1, Flammability 1, Reactivity 0
Storage: Hygroscopic
Uses: Colorant for external pharmaceuticals
to impart color to human body; stain for suntan lotion
Regulatory: FDA 21CFR §73.1150, 73.2150; exempt from certification, permanently listed for drug use; Canada DSL

Protocatechualdehyde
Empirical: C₇H₆O₃
Properties: M.w. 138.12; m.p. 152-157 C
Storage: Store at 2-8 C; keep tightly closed.
Uses: Flavor for pharmaceuticals

3,4-Dihydroxybenzaldehyde methylene ketal.
See Heliotropine

Dihydroxybenzene. See Hydroquinone
1,2-Dihydroxybenzene. See Pyrocatechol
1,3-Dihydroxybenzene. See Resorcinol
1,4-Dihydroxybenzene. See Hydroquinone
m-Dihydroxybenzene. See Resorcinol
o-Dihydroxybenzene. See Pyrocatechol
p-Dihydroxybenzene. See Hydroquinone
2,5-Dihydroxybenzoic acid. See Gentisic acid
2,5-Dihydroxybenzoic acid ethanolamide.
See Gentisic acid ethanolamide
2,4-Dihydroxybenzophenone. See Benzophenone-1
2,3-Dihydroxy-1,2-benzothiazolin-3-one-1,1-dioxide. See Saccharin
1,3-Dihydroxybutane. See Butylene glycol

Dihydroxybutanedioic acid diethyl ester. See Diethyl tartrate

2,3-Dihydroxybutanedioic acid, monopotassium monosodium salt. See Potassium sodium tartrate

(3R,3’R)-Dihydroxy-β-carotene. See Zeaxanthin
(3-α,5-β,12-α)-3,12-Dihydroxy-cholan-24-oic acid monosodium salt; 3-α,12-α-Dihydroxy-5-β-cholan-24-oic acid sodium salt. See Sodium desoxycholate
1,10-Dihydroxydecane. See 1,10-Decanediol

2,2’-Dihydroxydiethylamine. See Diethanolamine

Dihydroxydiethyl ether; β,β’-Dihydroxydiethyl ether. See Diethyylene glycol

3,6-Dihydroxy-4,5-diidoanthene-9-spiro-1’-3H-isobenzofuran-3’-one disodium salt. See Acid red 95
3',6'-Dihydroxy-4',5'-diiodospiro
- [isobenzofuran-1(3H),9'-[9H] xanthen]-3-one. See D&C Orange No. 10
3',6'-Dihydroxy-4',5'-diiodospiro
- [isobenzofuran-1(3H),9'-[9H] xanthen]-3-one, disodium salt. See D&C Orange No. 11; Acid red 95
N-(2,4-Dihydroxy-3,3-dimethylbutyryl-β-alanine calcium. See Calcium D-pantothenate
1,3-Dihydroxydimethyl ketone. See Dihydroxyacetone
N,N-(2,4-Dihydroxy-3,3-dimethylbutyryl)-β-alanine calcium salt. See Calcium D-pantothenate
1,2-Dihydroxyethane. See Ethylene glycol
Di-β-hydroxyethoxyethane. See Triethylene glycol
Di (2-hydroxyethyl) amine. See Diethanolamine
2,2'-Dihydroxyethyl ether. See Diethylene glycol
3',6'-Dihydroxyfluorane; Dihydroxyfluorane. See Fluorescein
2,2'-Dihydroxy-3,3',5,5',6,6'-hexachlorodiphenylmethane. See Hexachlorophene
1,3-Dihydroxy-4-hexylbenzene. See 4-Hexylresorcinol
2,4-Dihydroxy-N-(3-hydroxypropyl)-3,3-dimethylbutanamide. See D-Panthenol; DL-Panthenol
d-(+)-2,4-Dihydroxy-N-(3-hydroxypropyl)-3,3-dimethylbutyramide. See D-Panthenol
1,3-Di(hydroxymethyl)-5,5-dimethylhydantoin. See DMDM hydantoin
2,4-Dihydroxy-2-methylpentane. See Hexylene glycol
1-O-(Dihydroxymethylsilyl)-β-D-mannopyranuronic acid. See Methylsilanol mannuronate
3,5-Dihydroxyphenol. See 1,3,5-Trihydroxybenzene
(2,4-Dihydroxyphenyl) phenylmethanone. See Benzophenone-1
Dihydroxypivalic acid. See Dimethylolpropionic acid
1,2-Dihydroxypropene. See Propylene glycol
1,3-Dihydroxy-2-propanone. See Dihydroxyacetone
(R)-2-[[2,3-Dihydroxypropoxy]hydroxyphosphinyl]oxy]-N,N,N-trimethylethanaminium hydroxide
†=pharmaceutical grade
inner salt. See Glycerophosphocholine
2,3-Dihydroxypropyl docosanoate. See Glyceryl behenate
2,3-Dihydroxypropyl octadecanoate. See Glyceryl stearate
3',6'-Dihydroxypropyl [isobenzofuran-1(3H),9'-[9H] xanthen]-3-one disodium salt. See D&C Yellow No. 7; Fluorescein
3',6'-Dihydroxypropyl [isobenzofuran-1(3H),9'-[9H] xanthen]-3-one disodium salt. See D&C Yellow No. 8; Fluorescein sodium
Dihydroxysuccinic acid; α,β-Dihydroxysuccinic acid. See L-Tartaric acid
2,3-Dihydroxysuccinic acid, potassium salt. See Potassium acid tartrate
2,2'-Dihydroxy-3,3',5,5'-tetrachlorodiphenylsulfide. See 2,2'-Thiobis (4,6-dichlorophenol)
3',6'-Dihydroxy-2',4',5',7'-tetaiodospiro [isobenzofuran-1(3H),9'-[9H] xanthen]-3-one disodium salt. See FD&C Red No. 3
3',6'-Dihydroxy-2',4',5',7'-tetaiodospiro [isobenzofuran-1(3H),9'-[9H] xanthen]-3-one disodium salt. See Acid red 51
Diiododifluorescein. See D&C Orange No. 10
1,1-Diisobutylx-2-phenylethane. See Phenylacetaldehyde diisobutyl acetal
Diisobutyaluminum hydride
CAS 1191-15-7; EINECS/ELINCS 214-729-9
UN UN 3076
Synonyms: Bis (isobutyl) hydroaluminum; DIBAH; DIBAL-H; Diisobutyl hydroaluminum; Hydrobis (2-methylpropyl) aluminum; Hydrodialuminum
Empirical: C8H10Al
Formula: [(CH3)2CHCH2]2AlH
Properties: Colorless, pyrophoric liq.; sol. in Et2O, C6H6, toluene, cyclohexane, aliphatic and aromatic hydrocarbons, ether-type solvs.; m.w. 142.25; dens. 0.798; vapor pressure 0.000174 mm Hg (20 C); f.p. -80 C; b.p. 269 C; sp. heat 0.489 cal/g C
Toxicology: ACGIH TLV/TWA 2 mg(Al)/m3; LCLo (inh., guinea pig, 1 h) 70 g/m3; mildly toxic by inh.; TSCA listed
Precaution: Ignites spontaneously in air; dangerous fire risk; reacts violently with water
NFPA: Flammability 3, Reactivity 3
Storage: Air-sensitive; handle and store under nitrogen
Uses: Reducing agent in pharmaceuticals,
**Chemical Component Cross-Reference**

**Disobutyl hydroaluminum.** See Diisobutylaluminum hydride

**Disobutyl ketone**

**CAS 108-83-8; EINECS/ELINCS 203-620-1**  
**UN 1157 (DOT); FEMA 3537**

**Synonyms:** DIBK; Dibutyl ketone; s-Diisopropylacetone; 2,6-Dimethyl-4-heptanone; 2,6-Dimethylheptan-4-one; Isobutyl ketone; Isovalerone; Valerone

**Classification:** Aliphatic ketone

**Empirical:** C₉H₁₈O

**Formula:** (CH₃)₂CHCH₂COCH₂CH(CH₃)₂

**Properties:** Colorless liq.; mild sweet peppermint odor; misc. with most org. liqs.; pract. insol. in water; m.w. 142.24; dens. 0.8076; vapor pressure 1.65 mm Hg; m.p. -46 C; b.p. 165 C; flash pt. (CC) 49 C; autoignition temp. 396 C; pressure 1.65 mm Hg; m.p. -46 C; b.p. 165 C; flash pt. (CC) 49 C; autoignition temp. 396 C; ref. index 1.4130 (20 C); pH neutral; surf. tens. 24.54 dynes/cm

**Toxicology:** ACGIH TLV/TWA 25 ppm; LD₅₀ (oral, rat) 4300 mg/kg, (skin, rabbit) 16 g/kg; mod. toxic by ing. and inh.; irritant to respiratory system; extremely high vapor concs. may cause dizziness, nausea, incoordination, possibly death; severe exposure unlikely; narcotic in high concs.; mild skin and eye irritant; ing. may cause irritation of mouth and stomach; may cause lung injury if aspirated; TSCA listed

**Environmental:** VOC; BOD₅ 1.37; COD 2.88; ThOD 2.93

**Precaution:** Flamm. exposed to heat or flame; LEL 0.81%; UEL 7.1%; incompat. with strong oxidizing agents (increases fire and explosion hazard)

**Hazardous Decomp. Prods.:** Heated to decomp., emits acrid smoke and fumes

**NFPA:** Health 1, Flammability 2, Reactivity 0

**Storage:** Store in cool, dry, well-ventilated area, out of direct sunlight

**Uses:** Flavor for pharmaceuticals

---

**Diisobutylphenoxycethoxyethyl dimethyl benzyl ammonium chloride.** See Benzethonium chloride

**Diisopropanolamine**

**CAS 110-97-4; EINECS/ELINCS 203-820-9**

**Synonyms:** Bis (2-hydroxypropyl) amine; Bis (2-propanol) amine; DIPA; Dipropyl-2,2'-dihydroxyamine; 1,1'-iminobis-2-propanol; 1,1'-iminobis (propan-2-ol); 1,1'-iminodipropan-2-ol

**Classification:** Aliphatic amine alcohol compd.

**Empirical:** C₆H₁₅NO₂

**Formula:** HN(CH₂CHOHCH₃)₂

**Properties:** Wh. cryst. solid; mild ammoniacal odor; very sol. in water; sol. in ethanol, acetone; sl. sol. in diethyl ether; m.w. 133.19; dens. 1.004; m.p. 44.5-45.5 C; b.p. 249-250 C (745 mm); flash pt. 126 C

**Toxicology:** LD₅₀ (oral, rat) 6720 mg/kg, (IP, mouse) 96 mg/kg; poison by IP route; mildly toxic by ing.; skin and severe eye irritant; TSCA listed

**Precaution:** Combustible

**Hazardous Decomp. Prods.:** Heated to decomp., emits toxic fumes of NOₓ

**NFPA:** Health 2, Flammability 1, Reactivity 0

**Storage:** Hygroscopic; protect from light

**Uses:** Emulsifier for pharmaceuticals

| Diisostearyl dimerate. **See** Diisostearyl dimer dilinoleate |
Diisostearyl dimer dilinoleate
CAS 103213-19-0; 127358-81-0
Synonyms: Diisostearyl dimerate; Dimer acid, diisostearyl ester
Definition: Diester of isostearyl alcohol and dilinoleic acid
Empirical: C_{75}H_{145}O_{4}
Properties: Clear to sl. hazy yel. liq., mild fatty odor; sp.gr. 0.9; b.p. > 390 C; flash pt. (COC) 170 C
Toxicology: Nonhazardous
Precaution: Incompat. with oxidizing agents
Storage: Store away from strong oxidizing agents; avoid excessive heat
Uses: Moisturizer
Regulatory: Canada DSL
Trade Names: Dermol DISD

2,3-Diketobutane. See Diacetyl
4,4´-Diketo-β-carotene. See Canthaxanthine
2,3-Diketoin diline. See Isatin
2,5-Diketotetrahydrofuran. See Succinic anhydride

Dialaurin. See Glyceryl dialaurate
1,2-Dilauroyl-sn-glycero(3) phosphocholine
CAS 18194-25-7
Synonyms: 1,2-Dilauroylphosphatidylcholine
Classification: Lipid
Empirical: C_{32}H_{64}NO_{8}P
Properties: Wh. to off-wh. solid; sol in chloroform (20 mg/l); insol. in methanol; m.w. 621.8
Storage: Store protected from light @-20 C
Uses: Emulsifier, solubilizer for dermatology; for mfg. of liposomes and mixed micelles

1,2-Dilauroylphosphatidylcholine. See 1,2-Dilauroyl-sn-glycero(3) phosphocholine

Dilauryl thiodipropionate
CAS 123-28-4; EINECS/ELINCS 204-614-1
INS389
Synonyms: Bis (dodecylxlycarbonylethyl)sulfide; Didodecyl 3,3´-thiodipropionate; Dilauryl 3,3´-thiodipropionate; DLT; DLTP; LTD; Propionic acid, 3,3´-thiodi, didodecyl ester; Thiobis (dodecyl propionate); 3,3´-Thiobispropanoic acid, didodecyl ester; Thiodipropionic acid dilauryl ester
Classification: Diester
Definition: Diester of lauryl alcohol and 3,3´-thiodipropionic acid
Empirical: C_{30}H_{68}O_{4}S
Formula: (C_{12}H_{25}OOCCH_{2}CH_{2})_{2}S
Properties: Wh. flakes, sweetish odor; sol. in benzene, toluene, acetone, ether, chloroform; sl. sol. in alcohols, ethyl acetate; insol. in water; m.w. 514.94; dens. 0.975; m.p. 40 C; b.p. 240 C (1 mm); acid no. < 1; flash pt. 110 C
Toxicology: LD50 (oral, rat) > 10.3 g/kg; no known toxicity; eye irritant; TSCA listed
Precaution: Combustible
Hazardous Decomp. Prods.: Heated to decomp., emits toxic fumes; thermal decomp. prods.: SOx
Uses: Antioxidant, preservative for pharmaceuticals
Regulatory: FDA 21CFR §175.300, 177.1010, 181.22, 181.24 (0.005% migrating from food pkg.), 182.3280 (0.02% max. fat/oil); Canada DSL

Dilauryl 3,3´-thiodipropionate. See Dilauryl thiodipropionate

Dill. See Dill (Anethum graveolens)

Dill (Anethum graveolens)
CAS 977050-60-4
FEMA 2382
Synonyms: Anethum graveolens; Dill; Dill leaf; Dill leaves; Dill seed
Definition: Seeds and/or leaves of Anethum graveolens
Uses: Natural flavor for pharmaceuticals
Regulatory: BP compliance; FDA 21CFR §184.1282, GRAS; FEMA GRAS; Japan approved
Manuf./Distrib.: Biolandes http://www.biolandes.com; Degussa AG/Health & Nutrition

Dill (Anethum graveolens) seed oil
CAS 8006-75-5; 8016-05-5; 8016-06-6
FEMA 2383
Synonyms: American dill seed oil; Anethum graveolens oil; Anethum graveolens seed oil; Dill fruit oil; Dill oil; Dill seed oil; Dill seed oil, European; European dill seed oil
Definition: Volatile oil from dried ripe fruit of...
Anethum graveolens, contg. 50% carvone, d-limonene, phellandrene, other terpenes

**Properties:** Colorless or pale yel. liq., char. odor; sol. in fixed oils, min. oil, propylene glycol; sol. in 1 vol. 90% alcohol; insol. in water, glycerin; dens. 0.900-0.915 (15/15 C); ref. index 1.481-1.492 (20 C)

**Toxicology:** LD50 (oral, rat) 4040 mg/kg; mildly toxic by ing.; primary skin irritant; mutagen; TSCA listed

**Hazardous Decomp. Pros.:** Heated to decomp., emits acrid smoke and fumes

**Storage:** Keep cool, well closed; protect from light

**Uses:** Natural flavor and adjuvant in pharmaceuticals; aromatic; carminative

**Regulatory:** FDA 21CFR §184.1282, GRAS; FEMA GRAS; BP compliance

**Manuf./Distrib.:** Buckton Page Ltd [http://www.bucktonpage.com](http://www.bucktonpage.com); De Monchy Aromatics [http://www.demonchyaromatics.com](http://www.demonchyaromatics.com); F.D. **Dill (Anethum graveolens) weed oil**

**CAS:** 8006-75-5

**Synonyms:** Anethum graveolens; Anethum graveolens oil; Dill oil; Dill weed oil

**Definition:** Oil from dill herb, contg. d-phellandrene, terpinene, limonene, carvone, dillapiole, isomyristicin, and myristicin

**Properties:** Sl. yel.; typical dill odor; flash pt. 118 F

**Toxicology:** LD50 (oral, rat) 4040 mg/kg; mildly toxic by ing.; skin irritant; mutagenic data; TSCA listed

**Precaution:** Avoid contact with skin, wear protective clothing

**Hazardous Decomp. Pros.:** Heated to decomp., emits acrid smoke and fumes

**Uses:** Natural flavor in pharmaceuticals

**Regulatory:** FDA 21CFR §184.1282, GRAS; FEMA GRAS; Europe listed, no restrictions; Canada DSL

**Dill fruit oil.** See Dill (Anethum graveolens) seed oil

**Dill leaf; Dill leaves.** See Dill (Anethum graveolens)

**Dill oil.** See Dill (Anethum graveolens) weed oil; Dill (Anethum graveolens) seed oil

**Dill seed.** See Dill (Anethum graveolens)

**Dimagnesium monohydrogen monophosphate; Dimagnesium orthophosphate; Dimagnesium phosphate.** See Magnesium phosphate dibasic

**Dimagnesium trisilicate.** See Magnesium trisilicate

**Dimer acid, bis[amidopropyl-N,N-dimethyl-N-ethyl ammonium ethosulfate].** See Quaternium-61

**Dimer acid, diisostearyl ester.** See Diisostearyl dimer dilinoleate

**Dimercury dichloride**

**CAS:** 10112-91-1; EINECS/ELINCS 233-307-5

**UN 2025**

**Synonyms:** Mercurous chloride; Mercury chloride; Mercury (I) chloride; Mercury subchloride

**Classification:** Halide

**Empirical:** Cl₂Hg₂

**Formula:** Hg₂Cl₂

**Properties:** Off-wh. heavy powd. or cryst.; odorless; tasteless; pract. insol. in water; insol. in alcohol, ether, cold dil. acids; m.w. 472.08; dens. 7.15; m.p. 302 C; b.p. 384 C; sublimes @ 400-500 C without melting; dec. by sunlight into mercuric chloride and metallic mercury; dec. by alkalis

**Toxicology:** LD50 (oral, rat) 210 mg/kg; TDLo (oral, rat, 12 wks intermittent) 84 mg/kg; toxic; poison by ing.; sensitizer;
Chemical Component Cross-Reference

eyes/skin/respiratory system irritant; excessive doses may cause mercury poisoning; neurologic hazard; readily absorbed through skin; may cause proteinuria, changes in urine, kidney damage, CNS effects, reproductive and fetal effects; possible mutagen; target organ: kidneys, CNS; TSCA listed

Precaution: Incompat. with bromides, iodides, alkali chlorides, sulfates, sulfites, carbonates, hydroxides, lime water, acacia, ammonia, golden antimony sulfide, cyanides, copper salts, hydrogen peroxide, iodine, lead and silver salts, soaps

Hazardous Decomp. Prods.: Hydrogen chloride, mercury oxides; heated to decom., emits toxic vapors of Cl– and Hg

Storage: Light-sensitive; protect from light

Uses: Pharmaceuticals; cathartic; diuretic; antiseptic

Regulatory: Canada DSL

Dimethicone

CAS 9006-65-9

Synonyms: Dimethicones; Dimethylpolysiloxane; Dimethyl silicone; Dimeticone; Polydimethylsiloxane; Poly(oxy (dimethylsilyleylene), α-(trimethylsilyl)-ω-methyl-; α-(Trimethylsilyl)-ω-methylpoly[oxy (dimethylsilyleylene)]

Definition: Silicone oil consisting of a mixt. of fully methylated linear siloxane polymers end-blocked with trimethylsiloxy units

Empirical: \( \text{(C}_2\text{H}_6\text{OSi})_x\text{C}_4\text{H}_{12}\text{Si} \)

Properties: Colorless clear liq.; misc. with chloroform, ether; immisc. with water, alcohol; visc. inc. with degree of polymerization

Uses: Antifoam, vehicle, emollient, water repellent for ointments and topical pharmaceuticals; skin protectant; prosthetic aid (soft tissue); antiflatulent

Features: Oleaginous

†=pharmaceutical grade

listed; UK approved; Canada DSL; FDA approved for topicals; USP/NF, BP, EP compliance

Trade Names: Dow Corning® 360 Medical Fluid (20 cst); Dow Corning® 360 Medical Fluid (100 cst); Dow Corning® 360 Medical Fluid (350 cst); Dow Corning® 360 Medical Fluid (1000 cst); Dow Corning® 360 Medical Fluid (12,500 cst); Dow Corning® Q7-9120 Silicone Fluid; Foamkill® 810F; Foamkill® 830F; L-45 Series; Sentry® Dimethicone NF Silbione® Antifoam 70452 Compound; Silbione™ Oils 70047 V50

  - **Uses:** Film-former, conditioner for pharmaceuticals
  - **Features:** Thermoset props.
Dimethiconol
CAS 31692-79-2; 70131-67-8
Synonyms: Dimethyl silicones and siloxanes, hydroxy-terminated; Dimethysiloxane, hydroxy-terminated; Poly[oxy(dimethylsilylene)], α-hydro-ω-hydroxy-; Siloxanes and silicones, dimethyl, hydroxy-terminated
Definition: Dimethyl silicone terminated with hydroxyl groups
Properties: Anionic
Toxicology: TSCA listed
Uses: Emollient, spreading agent for pharmaceuticals
Manuf./Distrib.: Fluka http://www.sigma-aldrich.com
Trade Names Containing: Dow Corning®Dimethiconol Blend 20; Lubrasil® DS
Dimethiconol arginate. See Dimethiconol arginine

Dimethiconol arginine
Synonyms: Dimethiconol arginate
Definition: Reaction prod. of dimethiconol and arginine
Uses: Substantivity agent for pharmaceuticals, topicals, creams, lotions, skin care

Dimethiconol cysteinate. See Dimethiconol cysteine

Dimethiconol cysteine
Synonyms: Dimethiconol cysteinate
Definition: Reaction prod. of dimethiconol and cysteine
Uses: Ingrd. for pharmaceuticals, creams/lotions
Trade Names: Biosil Basics L-Cysteine

Dimethiconol panthenate. See Dimethiconol panthenol

Dimethiconol panthenol
Synonyms: Dimethiconol panthenate
Definition: Reaction prod. of dimethiconol and panthenol
Uses: Conditioner and bodying agent for pharmaceuticals, creams and lotions, skin care
Trade Names: Biosil Basics DL-30

1,3-Dimethoxybenzene. See m-Dimethoxybenzene
1,4-Dimethoxybenzene. See p-Dimethoxybenzene

m-Dimethoxybenzene
CAS 151-10-0; EINECS/ELINCS 205-783-4
FEMA 2385
Synonyms: Benzene, 1,3-dimethoxy-; Benzene, m-dimethoxy-; 1,3-Dimethoxybenzene; Dimethylether resorcinol; Dimethylresorcinol; 3-Methoxyanisole; Resorcinol dimethyl ether
Definition: Synthesized from resorcinol by methylation using dimethyl sulfate and alkali
Empirical: C₈H₁₀O₂
Formula: C₆H₄(OCH₃)₂
Properties: Pale straw liq., acrid fruity odor reminiscent of nerolin; sol. in alcohol, ether, benzene; sl. sol. in water; m.w. 138.17; dens. 1.067 (20/4 C); b.p. 85-87 C (10 mm); flash pt. 190 F; ref. index 1.525 (20 C)
Toxicology: LD₅₀ (IP, mouse) 900 mg/kg; mod. toxic by IP route; skin irritant; TSCA listed
Precaution: Combustible
Hazardous Decomp. Prods.: Heated to decomp., emits acrid smoke and irritating vapors
Uses: Synthetic flavor for pharmaceuticals
Regulatory: FDA 21CFR §172.515; FEMA GRAS; Canada DSL

o-Dimethoxybenzene
CAS 91-16-7; EINECS/ELINCS 202-045-3
FEMA 3799
Synonyms: 1,2-Dimethoxybenzene; Pyrocatechol dimethyl ether; Veratrol; Veratrole
Classification: Aromatic ether
Empirical: C₈H₁₀O₂
Formula: C₆H₄(OCH₃)₂
Properties: Colorless cryst. or liq.; sol. in alcohol, ether; sl. sol. in water; m.w. 138.17; dens. 1.084; m.p. 15 C; b.p. 205-207 C; flash pt. 189
**Chemical Component Cross-Reference**

**Regulatory:** Canada DSL

**Features:** Vanilla-like flavor

**Uses:** Flavor in pharmaceuticals; medicine (antiseptic)

**Regulatory:** FDA 21CFR §172.515; FEMA GRAS; Canada DSL

**Precaution:** Flamm. exposed to heat or flame; can react with oxidizers

**Hazardous Decomp. Prods.:** Heated to dep., emits acrid smoke and irritating fumes

**Properties:** Wh. flakes; sweet clover odor; very sol. in benzene, ether; sol. in 95% ethanol; sl. sol. in water; m.w. 138.17; dens. 1.053 (55/55 C); m.p. 53-56 C; b.p. 213 C; flash pt. 98 C

dimethylamine hydrochloride; N-(2-Chloroethoxy) dimethylamine hydrochloride; 2-Chloroethyldimethylammonium chloride; 2-Dimethylaminooethyl chloride hydrochloride; Dimethyl (2-chloroethyl) amine hydrochloride; Dimethyl-\( \beta \)-chloethyamine hydrochloride; DMC
Classification: Nonaromatic amine
Empirical: C_4H_{10}Cl \( \text{N} \) • HCl
Formula: (CH_3)_2NCH_2CH_2Cl • HCl
Properties: Solid; sol. in water, alcohol; m.w. 144.05; m.p. 205-208 C
Toxicology: LD50 (IP, mouse) 280 mg/kg, (subcut., mouse) 250 mg/kg; highly toxic; poison by IP and subcut. routes; severe eye irritant; suspected carcinogen; tumorigen; mutagen; TSCA listed
Hazardous Decomp. Prods.: Heated to decomp., emits very toxic fumes of NO_x and Cl_
Storage: Hygroscopic
Uses: Mfg. of antihistamines and other pharmaceuticals
Regulatory: Canada DSL

2-Dimethylaminoethyl chloride hydrochloride. See Dimethylaminoethyl chloride hydrochloride
7-(Dimethylamino)-3-(methylimino)-3H-phenothiazine, 3-methochloride, trihydrate. See Methylene blue trihydrate
4-(Dimethylamino)-1,4a,5,5a,6,11,12a-octahydro-3,5,6,10,12,12a-hexahydroxy-6-methyl-1,11-dioxo-2-naphthacenecarboxamide monohydrochloride. See Oxytetracycline hydrochloride
N-[3-(Dimethylamino) propyl] coco amides-N-oxide. See Cocamidopropylamine oxide
N-[3-(Dimethylamino) propyl] octadecanamide; Dimethylaminopropyl stearamide. See Stearamidopropyl dimethylamine
Dimethyl anthranilate

**Empirical:** C₉H₁₁NO₂

**Classification:** aromatic compd.

**Synonyms:**
- 2-Methylamino methyl benzoate
- N-Methylanthranilic acid, methyl ester
- Methyl methylaminobenzoate
- Methyl 2-methylaminobenzoate
- Methyl N-methyl-2-aminobenzoate
- N-Methyl methyl anthranilate
- Methyl-N-methyl anthranilate

**Properties:**
- Pale yel. liq. or solid; grape-like odor; sol. in fixed oils, oxygenated solvs.; sl. sol. in propylene glycol; insol. in water, glycerin; m.w. 165.21; dens. 1.126-1.132; m.p. 19 C; b.p. 256 C; flash pt. 196 F; ref. index 1.578-1.581

**Toxicology:**
- LD₅₀ (IV, mouse) 180 mg/kg
- LD₅₀ (oral, rat) 3380 mg/kg; poison by IV route; mod. toxic by ing.; TSCA listed

**Precaution:**
- Combustible

**Health 1; Flammability 2, Reactivity 0**

**Storage:**
- 6 mos. when stored at 40-70 F in tightly sealed original containers with minimum head space; avoid prolonged exposure to light, heat, air

**Uses:**
- Synthetic flavor for pharmaceuticals

**Features:**
- Orange, grape-like flavor

**Regulatory:**
- FDA 21 CFR §172.515; FEMA GRAS; Japan approved as flavoring; Canada DSL; Australia AICS

Dimethylbenzaldehyde

**Empirical:** C₉H₁₀O

**Classification:** Aromatic aldehyde

**Synonyms:**
- Benzydimethyl carbinol; α,α-Dimethylbenzenepropanol acetate
- See 2-Methyl-4-phenyl-2-butyl acetate
- Dimethylbenzene sulfonic acid, sodium salt
- See Sodium xylenesulfonate
- Dimethylbenzimidazolycobamide; 5,6-Dimethylbenzimidazolycobamide cyanide; α-(5,6-Dimethylbenzimidazolyl) cyanocobamide
  - See Cyanocobalamin

**Properties:**
- Wh. cryst. solid or liq.; fresh floral odor; bitter taste; sol. in oxygenated and aromatic solvs.; insol. in water; m.w. 150.22; dens. 0.98 kg/l (20 C); m.p. 24 C; b.p. 108 C (11 mm); flash pt. 92 C

**Toxicology:**
- LD₅₀ (oral, rat) 1280 mg/kg; mod. toxic by ingestion; TSCA listed

**Precaution:**
- Combustible liq.

**Health 1; Flammability 2, Reactivity 0**

**Storage:**
- Heated to decomp., emits acrid smoke and fumes

**Uses:**
- Synthetic flavor for pharmaceuticals

**Regulatory:**
- FDA 21 CFR §172.515; FEMA GRAS; Canada DSL

Dimethylbenzyl carbinyl acetate
CAS 151-05-3; EINECS/ELINCS 205-781-3
FEMA 2392
Synonyms: Benzyldimethyl carbinyl acetate; Benzylpropyl acetate; Dimethylbenzyl carbinylacetate; α,α-Dimethylphenethyl acetate; 1,1-Dimethyl-2-phenylacetate; DMBCA
Classification: aromatic compd.
Definition: Obtained by acetylation of dimethylbenzyl carbinol
Empirical: C12H16O2
Formula: C6H5CH2C(CH3)2OOCCH3
Properties: Water-wh. liq. or solid; floral fruity odor; sol. in fixed oils; sol. in alcohol (4 parts/70%); sl. sol. in propylene glycol; insol. in water; m.w. 192.26; dens. 0.995-0.999 (supercooled); m.p. 29.5 C; flash pt. > 100 C; ref. index 1.4900-1.4940 (supercooled)
Toxicology: LD50 (oral, rat) 3300 mg/kg; mod. toxic by ing.; skin irritant
Precaution: Combustible liq.
Hazardous Decomp. Prods.: Heated to decomp., emits acrid smoke and irritating fumes
NFPA: Health 1, Flammability 1, Reactivity 0
Uses: Synthetic flavor for pharmaceuticals
Regulatory: FDA 21CFR §172.515; FEMA GRAS; Canada DSL
Manuf./Distrib.: Degussa AG/Health & Nutrition

Dimethyldimethylbenzylcarbinyl butyrate. See α,α-Dimethylphenethyl butyrate

Dimethyldimethylbenzylcarbinyl formate. See α,α-Dimethylphenethyl formate

4,5-Dimethyl-2-benzyl-1,3-dioxolan. See Phenylacetaldehyde 2,3-butylen glycol acetel

α,α-Dimethylbenzyl isobutyrate
CAS 7774-60-9; EINECS/ELINCS 231-876-4

Dimethyl formamide

CAS 68-12-2; EINECS/ELINCS 200-679-5

UN NA 1693 (DOT); UN 2265 (DOT)

Synonyms: N,N-Dimethylformamide; N,N-Dimethylmethanamide; DMF; DMFA; Formic acid, amide, N,N-dimethyl-; N-Formyldimethylamine

Classification: Amide

Empirical: C3H7NO

Formula: CHCON(CH3)2

Properties: Water-wh. clear liq.; fishy unpleasant odor; a dipolar aprotic solv.; sol. in water; misc. with alcohol, ether, acetone, benzene, most org. solvs.; insol. in aliphatic hydrocarbons; m.w. 73.10; sp.gr. 0.953-0.954 (15.6/15.6 C); f.p. -61 C; b.p. 152.8 C; flash pt. 57.7 C; ref. index 1.423-1.431; pH 6.6-8.0 (20 C, 20% aq.)

Toxicology: ACGIH TLV/TWA 10 ppm (skin)

LD50 (oral, rat) 2800 mg/kg, (IP, rat) 1400 mg/kg, (IV, rat) 2000 mg/kg; mod. toxic by ing., IV, IP, subcut. routes; mildly toxic by skin contact, inh.; strong irritant to skin and tissue; severe eye irritant; inh. may cause abdominal pains, loss of appetite, nausea, vomiting, constipation, diarrhea, increased blood pressure, liver injury, irritation of mucous membranes of respiratory tract; suspected carcinogen; teratogen; human mutagenic data; TSCA listed

Precaution: Combustible; moderate fire risk;

FEMA 2389

Synonyms: Bergamal; Dimethylheptenal; 2,6-Dimethylhept-5-enal; 5-Heptenal, 2,6-dimethyl-; Melomor; Melonal; Melonyl
Empirical: C₉H₁₆O
Formula: (CH₃)₂C:CH(CH₂)₂CH(CH₃)CHO
Properties: Pale yel. liq. or oil; melon odor; sol. in 2 parts 70% alcohol; m.w. 140.23; dens. 0.852-0.858; b.p. 80 C (19 mm); flash pt. (TOC) 62.2 C; ref. index 1.443-1.448
Toxicology: LD₅₀ (oral, rat) > 5 g/kg, (skin, rabbit) > 5 g/kg; skin and eye irritant; TSCA listed
Precaution: Combustible

Hazardous Decomp. Prods.: Heated to decomp., emits CO, CO₂, acrid smoke and irritating fumes

Storage: 6 mos. when stored in tightly sealed original containers with minimum head space; avoid prolonged exposure to light, heat, cold, air

Uses: Synthetic flavor for pharmaceuticals
Features: Melon-like flavor

Regulatory: FDA 21CFR §172.515; FEMA GRAS; Australia AICS; Canada DSL; Japan MITI

Manuf./Distrib.: Advanced BioTech

Dimethyl lauramine

CAS 112-18-5; 67700-98-5; EINECS/ELINCS 203-943-8; 266-922-2

Synonyms:  DDA; N,N-Dimethyl-1-dodecanamine; Dimethyldodecylamine; N,N-Dimethyldodecylamine; Dimethyl laurylamine; N,N-Dimethyl laurylamine; Dodecyl dimethylamine; N-Dodecyl dimethylamine; Lauryl dimethylamine; N-Lauryl dimethylamine; Monolauryl dimethylamine

Classification:  Tertiary aliphatic amine

Empirical:  C₁₄H₂₁N

Formula:  CH₃(CH₂)₁₀CH₂N(CH₃)₂

Properties:  Liq.; m.w. 213.46; m.p. -10°C; cationic

Toxicology:  LD₅₀ (oral, rat) 740 mg/kg; mod. toxic by ing.; severe skin and eye irritant; TSCA listed

Environmental:  LC₅₀ (fish, 96 h) 0.71-1.0 mg/l, (daphnia magna, 48 h) 0.083 mg/l, (activated sludge, 3 h) 27.3 mg/l; readily biodeg.

Hazardous Decomp. Prods.:  Heated to decomp., emits toxic NOₓ

Uses:  Bactericide precursor in pharmaceuticals

Features:  Acid-stable

Regulatory:  FDA 21CFR §177.1680; Canada DSL

†=pharmaceutical grade

2,6-Dimethyl octanol
CAS 7779-07-9
FEMA 2390
Synonyms: 2,6-Dimethyl octanoic aldehyde; Isoaldehyde C-10; Isodecylaldehyde
Empirical: C10H20O
Properties: Colorless liq., sweet fruity odor, somewhat green flavor; sol. in alcohol; insol. in water; m.w. 156.26
Uses: Synthetic flavor for pharmaceuticals
Regulatory: FDA 21CFR §172.515; FEMA GRAS; Canada DSL
3,7-Dimethyloctane-1,7-diol; 3,7-Dimethyloctanediol. See Hydroyxycitronellol
3,7-Dimethyloctane-3-ol. See Tetrahydrocitronellol
2,6-Dimethyl octanoic aldehyde. See 2,6-Dimethyl octanal
Dimethyl octanol; 2,6-Dimethyl-8-octanol. See 3,7-Dimethyl-1-octanol
3,7-Dimethyl-1-octanol
CAS 106-21-8; EINECS/ELINCS 203-374-5
FEMA 2391
Synonyms: Dihydrocitronellol; Dimethyl octanol; 2,6-Dimethyl-8-octanol; 3,7-Dimethyloctan-1-ol; Geraniol tetrahydride; Perhydrogeranial; Tetrahydrogeranial
Classification: acrylic terpene
Definition: Usually prepared by hydrogenation of geraniol, citronellol, or citronellal
Empirical: C10H22O
Formula: (CH3)2CH(CH2)3CH(CH3)CH2CH2OH
Properties: Colorless liq., sweet rosy odor, bitter taste; sol. in fixed oils, min. oil, propylene glycol, alcohol, hydrocarbon solvs.; insol. in glycerol; m.w. 158.29; dens. 0.828 (20/4 C); b.p. 98-99 C (9 mm); flash pt. 97 C; ref. index 1.435 (20 C); tenacity 12 hrs. on blotter
Toxicology: LD50 (oral, rat) > 5 g/kg, (skin, rabbit) 2400 mg/kg; mod. toxic by skin contact; skin irritant; TSCA listed
Precaution: Combustible
Hazardous Decomp. Prods.: Heated to decomp., emits acrid smoke and fumes
HMIS: Health 1, Flammability 1, Reactivity 0
Storage: Store in cool, dry place in tightly sealed containers, protected from heat, light
Uses: Synthetic flavor for pharmaceuticals
Features: Sweet flavor
Regulatory: FDA 21CFR §172.515; FEMA GRAS; Australia; Canada DSL; Japan ENCS (no. 2-217); Philippines PICCS
Manuf./Distrib.: Citrus and Allied Essences

Handbook of Pharmaceutical Additives, Third Edition 1245

3,7-Dimethyl-6 or 7-octen-1-yl isobutyrate. See Rhodinyl isobutyrate
(S)-3,7-Dimethyloct-7-enyl isovalerate. See Rhodinyl isovalerate
3,7-Dimethyl-6 or 7-octen-1-yl methanoate.
6,10-Dimeth-3-oxa-9-undecenal. See Citronelloxyacetaldehyde

Dimethyl oxazolidine
CAS 51200-87-4; EINECS/ELINCS 257-048-2
Synonyms: 4,4-Dimethyloxazolidine; Oxazolidine A
Classification: Heterocyclic compd.
Empirical: C₅H₁₁NO
Properties: Sol. in water and oil; m.w. 101.17; dens. 0.942; flash pt. 48 C; ref. index 1.4320
Toxicology: LD₅₀ (oral, rat) > 5 g/kg, (skin, rabbit) > 5 g/kg; low oral toxicity; skin irritant; TSCA listed
Precaution: Combustible liq.
Hazardous Decomp. Prods.: Heated to decomp., emits acrid smoke and fumes
Uses: Synthetic flavor for pharmaceuticals
Regulatory: FDA 21CFR §172.515; FEMA GRAS; Canada DSL
Trade Names: Oxaban®-A

4,4-Dimethyloxazolidine. See Dimethyl oxazolidine

Dimethyl oxobenzo dioxasilane
Classification: Organic compd.
Empirical: C₉H₁₀O₃Si
Properties: In pharmaceuticals
Trade Names Containing: Pro D.S.B.®

Dimethyloxychinizin. See Antipyrine
2,2-Dimethyl-4-oxyethyl-1,3-dioxolane. See 2,2-Dimethyl-1,3-dioxolane-4-methanol

Dimethyloxyquinazine. See Antipyrine
α,α-Dimethylphenethyl acetate. See Dimethylbenzyl carbinyl acetate
α,α-Dimethylphenethyl alcohol. See Dimethylbenzyl carbinol
α,α-Dimethylphenethyl alcohol acetate. See Dimethylbenzyl carbinyl acetate
α,α-Dimethylphenethyl butanoate. See α,α-Dimethylphenethyl butanoate. See α,α-

†=pharmaceutical grade

Dimethylphenethyl butyrate
α,α-Dimethylphenethyl butyrate
CAS 10094-34-5; EINECS/ELINCS 233-221-8
FEMA 2394
Synonyms: Benzyl dimethylcarbinyl butyrate; Dimethylbenzylcarbinyl butyrate; α,α-Dimethylphenethyl butanoate; DMBC butyrate
Classification: aromatic compd.
Definition: Obtained by esterification of dimethyl benzyl carbinol with n-butyric acid
Empirical: C₁₄H₂₀O₂
Properties: Colorless liq., plum-prune odor, apricot/peach/plum-like taste; sol. in alcohol; insol. in water; m.w. 220.31
Toxicology: LD₅₀ (oral, rat) > 5 g/kg, (skin, rabbit) > 5 g/kg; low oral toxicity; skin irritant; TSCA listed
Precaution: Combustible liq.
Hazardous Decomp. Prods.: Heated to decomp., emits acrid smoke and fumes
Uses: Synthetic flavor for pharmaceuticals
Regulatory: FDA 21CFR §172.515; FEMA GRAS; Canada DSL

Dimethyl phenethyl carbinyl acetate. See 2-Methyl-4-phenyl-2-butyl acetate

Dimethylphenethyl carbinyl isobutyrate. See 2-Methyl-4-phenyl-2-butyl isobutyrate

α,α-Dimethylphenethyl formate
CAS 10058-43-2
FEMA 2395
Synonyms: Benzyl dimethylcarbinyl formate; 2-Benzyl-2-propyl formate; Dimethylbenzylcarbinyl formate; DMBC formate
Definition: Synthesized from dimethyl benzyl carbinol and formic acid using acetic anhydride
Empirical: C₁₁H₁₄O₂
Properties: Colorless liq., lily-jasmine odor, spicy taste; sol. in alcohol; almost insol. in water; m.w. 178.23
Uses: Synthetic flavor for pharmaceuticals
Regulatory: FDA 21CFR §172.515; FEMA GRAS; Canada DSL
Manuf./Distrib.: Degussa AG/Health &

CAS 106-65-0; EINECS/ELINCS 203-419-9

**FEMA 2396**

**Synonyms:** Butanediolic acid, dimethyl ester; Dimethyl butanedioate; Methyl succinate; Succinic acid, dimethyl ester

**Empirical:** C₆H₁₀O₄

**Formula:** CH₃OCOCH₂CH₂COOCH₃

**Properties:** Colorless liq., disagreeable cabbage-like odor; sol. in alcohol, ether, oxygenated solvs.; insol. in water; m.w. 62.14; dens. 0.8458; m.p. -83.2 °C; b.p. 37.5-38 °C; flash pt. -38 °C; autoignition temp. 206 °C; ref. index 1.435 (20 °C)

**Toxicology:** LD₅₀ (oral, rat) 3300 mg/kg, (IP, mouse) 8 g/kg; LC₅₀ (inh., rat) 40,250 ppm; poison by inh.; mod. toxic by ing.; skin and severe eye irritant; TSCA listed

**Precaution:** Flamm., dangerous fire hazard; flamm. limits in air 2.2-19.7%; explosive as vapor; vigorous reactions with oxidizers

**Hazardous Decomp. Prods.:** Heated to decomp., emits highly toxic fumes of SOₓ and may explode

**NFPA:** Health 1, Flammability 4, Reactivity 0

**Storage:** 12 mos. when stored at 40-70 °F in tightly sealed original containers with minimum head space; avoid prolonged exposure to light, heat, air

**Uses:** Synthetic flavor for pharmaceuticals

**Regulatory:** FDA 21CFR §172.515; FEMA GRAS; Canada DSL; Japan MITI

Synonyms: 1,2-Dimysteryl phosphatidylcholine; 1,2-Ditetradecanoyl-sn-glycero-3-phosphocholine; DMPC; 3-sn-Phosphatidylcholine-1,2-dimysteryl

Classification: Phospholipid

Empirical: C₃₆H₇₂N₀₉₈

Properties: Wh. powd.; sol. in methylene chloride and methanol

Precaution: Incompatible with strong oxidizing agents
Chemical Component Cross-Reference

Storage: Store in freezer @ <-20 C

Uses: Emulsifier, solubilizer for dermatology

Manuf./Distrib.: Fluka http://www.sigma-aldrich.com; Genzyme http://www.genzyme.com; Sigma http://www.sigma-aldrich.com/belgium

1,2-Dimyristoyl-sn-glycero(3)phosphoglycerol sodium salt. See Sodium 1,2-dimyristoyl-sn-glycero (3) phosphatidylcholine

1,2-Dimyristoyl phosphatidylcholine. See 1,2-Dimyristoyl-sn-glycero(3) phosphatidylcholine

Dimyristoyl thiodipropionate

CAS 16545-54-3; EINECS/ELINCS 240-613-2

Synonyms: Dimyristyl 3,3'-thiodipropionate; Ditetradecyl 3,3'-thiobispropanoate; Ditetradecyl 3,3'-thiobispropanoate; DMTDP: Propanoic acid, 3,3'-thiobis-, ditetradecyl ester

Classification: Diester; thioether

Definition: Diester of myristyl alcohol and thiodipropionic acid

Empirical: C₃₄H₆₆O₄S

Formula: S(CH₂CH₂COOC₁₄H₂₉)₂

Properties: Lt.-colored oily liq.; insol. in water; m.w. 370.64; dens. 0.9268 (20/20 C); b.p. 417 C; flash pt. 196 C; ref. index 1.4472

Uses: Antioxidant for pharmaceuticals

Regulatory: FDA 21CFR §175.105, 175.300, 177.1200, 177.1210, 177.1400, 177.2600, 178.0700, 178.0800, 178.1000, 178.1600; Canada DSL

Dimyristyl 3,3’-thiodipropionate. See Dimyristyl thiodipropionate

Dimyristoyl thiodipropionate

Dinaphtho (2,3-a:2’,3’-i) naphth (2’,3’:6,7) indolo (2,3-c) carbazole-5,10,15,17,22,24-hexone, 16,23-dihydro. See Vat brown 1

Dinitroaniline red. See D&C Orange No. 17

Dinitrogen monoxide; Dinitrogen oxide. See Nitrous oxide

2,4-Dinitro-1-naphthol-7-sulfonic acid disodium salt. See CI 10316; Ext. D&C Yellow No. 7

1-(2,4-Dinitrophenylazo)-2-naphthol. See D&C Orange No. 17

Dinitrosoamide. See Isosorbide dinitrate

Dinkum oil. See Eucalyptus globulus oil

Dioctadecyl dimethyl ammonium chloride. See Distearylidimonium chloride

Dioctadecyl thiodipropionate, 3,3’-

Trade Names: Wickenol® 158
Trade Names Containing: Wickenol® 161

Diocetyl-o-benzenedicarboxylate. See n-Dioctyl phthalate

Diocetyl calcium sulfosuccinate
Synonyms: Calcium diocetyl sulfosuccinate; DCS; Docusate calcium
Uses: Surfactant in pharmaceuticals, stool softeners, vitamin formulations, ear wax removal compds.; lubricant, emollient in laxative prod.
Regulatory: FDA approved
Trade Names Containing: Docusate Calcium USP in Corn Oil NF So’n.

Diocetyl cyclohexane
CAS 84753-08-2; 100182-46-5; EINECS/ELINCS 283-854-9
Synonyms: 1,3-Bis (2-ethylhexyl) cyclohexane; Cyclohexane, 1,3-bis (2-ethylhexyl) -; Cyclohexane, disooctyl-; 1,3 Diocetyl cyclohexane
Classification: Organic compd.
Empirical: C22H44
Uses: Emollient, superfatting agent for pharmaceutical creams and emulsions
Trade Names: Cetiol® S

1,3 Diocetyl cyclohexane. See Diocetyl cyclohexane
Diocetyl dimethyl ammonium chloride; Di-n-octyl dimethyl ammonium chloride. See

†=pharmaceutical grade

Diocetyl dimonium chloride
CAS 5538-94-3; EINECS/ELINCS 226-901-0
Synonyms: Chloride diocetyl dimethylammonium; Dimethyldioctyl ammonium chloride; N,N-Dimethyl-N-octyl-1-octanaminium chloride; Diocetyl dimethyl ammonium chloride; Di-n-octyl dimethyl ammonium chloride; Octanaminium, N,N-dimethyl-N-octyl-, chloride; 1-Octanaminium, N-octyl-N,N-dimethyl-, chloride
Classification: Quaternary ammonium compd.
Empirical: C18H40ClN
Formula: [CH3(CH2)7]2N(CH3)2+ Cl–
Properties: M.w. 305.97
Uses: Disinfectant drug
Regulatory: Canada DSL
Manuf./Distrib.: Lonza http://www.lonza.com; Spectrum Labs http://www.speclab.com
Trade Names Containing: BTC® 885; BTC® 885 P40

Diocytldodecyl fluoroheptyl citrate
Classification: Organic compd.
Formula: HOCCH2COORCOORCH2CO(CH2)2(CF2)4CF3 where R rep. the octyldodecyl radical
Uses: Emollient, pigment dispersant for pharmaceuticals, creams, lotions, gels, pigmented prods.
Trade Names: Biosil Basics Fluoro Guerbet 3.5%

Diocetyl ether
CAS 629-82-3; EINECS/ELINCS 211-112-6
Synonyms: Caprylic ether; Dicapryl ether; Dicaprylyl ether; Di-n-octyl ether; Ether, di-n-octyl; Octane, 1,1’-oxybis-; Octyl ether; 1,1’-Oxybisoctane
Empirical: C16H34O
Formula: (C8H17)2O
Properties: Colorless liq.; m.w. 242.50; dens. 0.805 (17/4 C); f.p. -7.6 C; b.p. 291.7 C; flash pt. > 100 C; ref. index 1.4329 (24 C)
Toxicology: LD50 (IV, mouse) 1183 mg/kg; mod. toxic by IV route; may be harmful by ing., inh., skin absorp.; may cause eye/skin irritation; TSCA listed
Precaution: Combustible; incompat. with strong oxidizing agents; can react vigorously with oxidizers; forms explosive peroxides on prolonged storage
Hazardous Decomp. Prods.: Toxic fumes of CO, CO2; heated to decomp., emits acrid

Handbook of Pharmaceutical Additives, Third Edition 1254
Chemical Component Cross-Reference

**smoke and irritating fumes**

*NFPA: Health 0, Flammability 1, Reactivity 0*

**Storage:** Store in cool, dry place; keep tightly closed

**Uses:** Emollient, spreading agent for pharmaceutical emulsions

**Regulatory:** Canada DSL

**Manuf./Distrib.:** Aldrich [http://www.sigma-aldrich.com]; Fluka [http://www.sigma-aldrich.com]

**Trade Names:** Cetiol® OE; Saboderm DOE

### Di-n-octyl ether.

See Dioctyl ether

### Dioctyl maleate

**CAS:** 15763-02-7; 56235-92-8; EINECS/ELINCS 260-070-5

**Synonyms:** Bis (2-ethylhexyl) maleate; Butanedic acid, hydroxy-, bis(2-ethylhexyl) ester; Hydroxybutanedic acid, dioctyl ester

**Definition:** Diester of malic acid and 2-ethylhexanol

**Empirical:** C_{20}H_{36}O_{5}

**Formula:** C_{8}H_{17}OCOCH_{2}CHOHCOC_{8}H_{17}

**Uses:** Emollient, binder for pharmaceuticals, topicals, hypoallergenic prods.; coupling agent for fragrances; solubilizer; antitackifier in antiperspirants, carbomer formulations

**Trade Names:** Ceraphyl® 45

### Dioctyl maleate

**CAS:** 2915-53-9; EINECS/ELINCS 220-835-6

**Synonyms:** Bis (1-octyl) maleate; 2-Butanedioc acid, (Z)-, dioctyl ester; Dicaprylyl maleate (INCI); Di-N-octyl maleate; DOM; Maleic acid, dioctyl ester

**Definition:** Diester of capryl alcohol and maleic acid

**Empirical:** C_{20}H_{36}O_{4}

**Formula:** CH_{3}(CH_{2})_{7}OCOCH=CHCOO(CH_{2})_{7}CH_{3}

**Properties:** Lt.-colored liq., odorless, bitter taste; misc. with min. oil; insol. in water; m.w. 340.56; sp.gr. 0.94 (20 °C); m.p. -20 °C; b.p. 229-239 °C; flash pt. (COC) 160 °C; ref. index 1.4836

**Toxicology:** LD_{50} (oral, rat) 14,200 mg/kg, (skin, rabbit) 14 g/kg; mildly toxic by ing.; mildly toxic by effects; experimental teratogen; affects human GI tract; experimental teratogen, reproductive effects; TSCA listed

**Precaution:** Combustible

**Hazardous Decomp. Prods.:** Heated to decomps., emits acrid smoke and irritating fumes

**NFPA:** Health 0, Flammability 1, Reactivity 0

**Uses:** Solvent, fixing agent in pharmaceuticals

**Regulatory:** FDA 21CFR §175.105, 177.1460, 177.2600; Canada DSL

**Manuf./Distrib.:** AAE Chemie NV† [http://www.aaechemie.com]; Aldrich

Di-n-octyl phthalate. See n-Di-octyl phthalate

Diocetyl sodium sulfosuccinate
CAS 577-11-7; 1369-66-3; EINECS/ELINCS 209-406-4
INS480
Synonyms: Bis (2-ethylhexyl) sodium sulfosuccinate; 1,4-Bis (2-ethylhexyl) sulfobutanedioic acid sodium salt; Dioctyl sulfosodiumsuccinate; Diocetyl sulfosuccinate sodium salt; Docusate sodium; DSS; 2-Ethylhexyl sulfosuccinate sodium; NaDOSS; Sodium 1,4-bis (2-ethylhexyl) sulfosuccinate; Sodium bis (2-ethylhexyl) sulfosuccinate; Sodium di (2-ethylhexyl) sulfosuccinate; Sodium dioctyl sulfosuccinate; Sulfo-butanedioic acid 1,4-bis (2-ethylhexyl) ester sodium salt; Sulfosuccinic acid 1,4-bis (2-ethylhexyl) ester sodium salt
Definition: Sodium salt of the diester of 2-ethylhexyl alcohol and sulfosuccinic acid
Empirical: C₂₀H₃₇NaO₇S

†=pharmaceutical grade

Formula: C₈H₁₇OCOC₂H₇(CH(SO₃Na)COOC₈H₁₇
Properties: Wh. wax-like solid. char. octyl alcohol odor; slowly sol. in water; freely sol. in alcohol, glycerol, CCl₄, acetone, xylene, hexane; m.w. 445.63; m.p. 173-179 C; anionic
Toxicology: LD₅₀ (oral, rat) 1900 mg/kg, (IP, rat) 590 mg/kg, (IV, mouse) 60 mg/kg; mod.
toxic by ing., IP routes; poison by IV route;
skin, severe eye irritant; TSCA listed
Hazardous Decomp. Prods.: Heated to
decomps. emits toxic fumes of SOₓ and Na₂O
HMIS: Health 2, Flammability 1, Reactivity 0
Storage: Hygroscopic; preserve in well-closed containers
Uses: Emulsifier, wetting agent, solubilizer in pharmaceuticals, injectables (IM), orals,
topicals, vaginals; adjuvant in tablet formation; stool softener; lubricant, emollient in laxatives

Regulatory: FDA 21CFR §73.1, with cocoa,
131.130, 131.132, 133.124, 133.133, 133.134,
133.162, 133.178, 133.179, 163.114, 163.117,

Granular; DSS Tablet Grade

Diocyl succinate
CAS 2915-57-3; EINECS/ELINCS 220-836-1
Synonyms: Bis (2-ethylhexy l) butanedi olate; Butanedioc acid, bis(2-ethylhexyl) ester;
Di(2-ethylhexyl) suc cinate
Definition: Diester of 2-ethylhexyl alcohol and succinic acid
Empirical: C_{20}H_{38}O_4
Formula: C_{8}H_{17}OCOCH_{2}CH_{2} COOCH_{2}CH_{2}COOC_{8}H_{17}
Properties: Liq.; sol. < 0.01% in water @ 20°C;
dens. 0.9346 (20/20°C); b.p. 257°C (50 mm);
f.p. set to glass < -60°C; flash pt. (OC) 157°C
Toxicology: No known skin toxicity
Uses: Wetting agent in calamine lotion formulation; emollient, film-former,
moisturizer, pigment dispersant/wetting agent in pharmaceuticals
Regulatory: Canada DSL
Trade Names: Wickenol® 159

Diocyl sulfosomusuccinate; Diocyl sul fosuccinate sodium salt. See Diocyl
sodium sulfosuccinate

Diolamine. See Diethanolamine
Dioleic acid, diester with decaglycerol. See Polyglyceryl-10 dioleate

Dioxan; 1,4-Dioxan; Dioxane. See 1,4-Dioxane
1,4-Dioxane
CAS 123-91-1; EINECS/ELINCS 204-661-8
UN 1165 (DOT)
Synonyms: Diethylene dioxide; 1,4-Diethylen e dioxide; Diethylene ether; Di (ethylene oxide);
1,4-Diethylen e oxide; 1,4-Dioxy cacyclohexane; Dioxan; 1,4-Dioxan;
Dioxane; Dioxane-1,4; p-Dioxane; p-Dioxin, tetrahydro-;
Dioxyethylen e ether; Ethylene glycol ethylene ether; Glycol ethylene ether;
Tetrahydro-1,4-dioxin; Tetrahydro-p-dioxin
Classification: Sat. cyclic aliphatic ether
Empirical: C_{4}H_{8}O_2
Formula: OCH_{2}CH_{2}OCH_{2}CH_{2}
Properties: Colorless clear liq., ethereal odor;
stable; sol. in water, most org. solvs.; m.w. 88.11; sp.gr. 1.0356 (20/20°C);
b.p. 101.3°C; flash pt. 18.3°C; autoignition temp. 180°C; ref. index 1.4220
Toxicology: ACGIH TLV/TWA 25 ppm (skin);
LD50 (oral, mouse) 5700 mg/kg, (skin, rabbit) 7600 mg/kg; poison by IP route; mod. toxic by inh., ing., absorbed by skin; eye and skin irritant; inh. may cause nose/throat irritation, tearing, and burning; coughing, nausea, vomiting, headache, drowsiness, stomach pains; repeated exposure may cause severe injury or death; target organs: liver, kidneys; carcinogen; tumorigen; teratogen; mutagen; TSCA listed
Environmental: VOC; BOD5 0; ThOD 1.09
Precaution: DOT: Flamm. liq.; dangerous fire risk; stable if properly inhibited; may form explosive peroxides on exposure to air/moisture; incompat. with strong oxidizers, catalytic hydrogen, sulfur trioxide, triethylnaluminum
Hazardous Decomp. Prods.: May form
Dioxane-1,4; p-Dioxane. See 1,4-Dioxane
3,6-Dioxoactane-1,8-diol. See Triethylene glycol
1,1-Dioxide-1,2-benzisothiazol-3(2H)-one sodium salt. See Saccharin sodium anhydrous

Dioxymethyleneprotocatechuic aldehyde. See Heliotropine
DIPA. See Diisopropyl adipate;
Diisopropanolamine

Dipalmitylolethyl hydroxyethylmonium methosulfate
Synonyms: Hexadecanoic acid, diester with N,N,N-tris (2-hydroxyethyl) methanaminium methyl sulfate
Classification: Quaternary ammonium salt
Formula: [RCO–OCH2CH2N(CH2CH2OH)CH2CH2OCRO]+CH3OSO3–
Properties: Cationic
Uses: Surfactant, emulsifier, conditioner, softener, emollient in pharmaceuticals, skin care prod.
Features: Mild
Trade Names: AMMONYX® GA-90

1,2-Dipalmitoyl-sn-glycero(3) phosphatidylcholine
CAS 2644-64-6
Synonyms: Dipalmityllecithin; L-α-1,2-Dipalmityl phosphatidylcholine; Disaturated phosphatidylcholine; DPPC
Empirical: C5H14NO
Properties: M.w. 104.17
Uses: Emulsifier, solubilizer for dermatology; for mfg. of liposomes and mixed micelles; drug carrier

Dipalmitylolethylchitin; L-α-1,2-Dipalmityl phosphatidylcholine. See 1,2-Dipalmitoyl-sn-glycero(3) phosphatidylcholine
L-α-1,2-Dipalmitoyl-sn-phosphatidylglycerol sodium salt. See Sodium 1,2-dipalmitoyl-sn-glycero (3) phosphatidylcholine
Dipanol; Dipentene (INCI). See dl-Limonene
o-Diphenol. See Pyrocatechol
Diphenyl. See Biphenyl
Diphenylamine, p-amino-. See N-Phenyl-p-phenylenediamine
Chemical Component Cross-Reference

N,N-Diphenyl-1,4-benzenediamine. See N,N′-Diphenyl-p-phenylenediamine

Diphenyl chlorophosphate
CAS 2524-64-3
Synonyms: Diphenyl phosphorochloridate; Diphenyl phosphoryl chloride; DPCP; Phosphorochlorodic acid diphenyl ester
Classification: Aromatic phosphorus compd.
Empirical: C12H10ClO3P
Formula: (C6H5)2P(O)Cl
Properties: Liq.; sol. in inert org. solvs.; hydrolyzes with water; m.w. 268.64; dens. 1.296; b.p. 145-148 C; flash pt. 113 C; ref. index 1.5500
Toxicology: Harmful; causes burns; TSCA listed
Precaution: Corrosive; hydrolyzes on contact with water to form HCl and diphenyl acid phosphate; reacts with alcohols, phenols, amines; mild dehydrating agent
Storage: Moisture-sensitive; store under nitrogen
Uses: Pharmaceutical intermediate

Diphenyl dichlorosilane
CAS 80-10-4; EINECS/ELINCS 201-251-0
UN 1769 (DOT)
Synonyms: Dichlorodiphenylsilane; Diphenylsilicon dichloride; Diphenylsilyle dichloride; Silane, dichlorodiphenyl-
Empirical: C12H10Cl2Si
Formula: (C6H5)2SiCl2
Properties: Colorless liq.; m.w. 253.21; dens. 1.19 (20 C); m.p. -22 C; b.p. 305 C; flash pt. (COC) 142 C; ref. index 1.19 (20 C); m.p. -22 C; b.p. 305 C; flash pt. (COC) 142 C; ref. index 1.5773 (25 C)
Toxicology: LD50 (skin, rabbit) 100 µl/kg; poison; corrosive; causes burns; strong irritant to skin, eyes, mucous membranes; harmful by ing., inh., skin absorp.; extremely destructive to tissue of mucous membranes, upper respiratory tract, eyes, skin; inh. may cause spasm/inflamm./edema of larynx/bronchi; chem. pneumonitis, pulmonary edema; may cause burning sensation, coughing, wheezing, laryngitis, shortness of breath, headache, nausea, vomiting; TSCA listed
Precaution: Combustible; incompat. with

Diphenyl ether. See Diphenyl oxide
Diphenyl ketone; Diphenyl methanone. See Benzophenone
Di (phenylmethyl) disulfide. See Benzyl disulfide
o-Diphenylol. See o-Phenylphenol

Diphenyl oxide
CAS 101-84-8; EINECS/ELINCS 202-981-2
FEMA 3667
Synonyms: Biphenyl oxide; Diphenyl ether; Geranin crystals; 1,1′-Oxybisbenzene; Phenoxybenzene; Phenyl ether
Classification: Aromatic ether
Empirical: C12H10O
Formula: (C6H5)2O
Properties: Colorless cryst.; geranium odor; sol. in ethanol, benzene, diethyl ether, glacial acetic acid; misc. with oxygenated solvs.; insol. in
Chemical Component Cross-Reference

<table>
<thead>
<tr>
<th>Water; m.w. 170.21; dens. 1.073; vapor pressure 0.0213 mm Hg; m.p. 26-30 C; b.p. 259 C; flash pt. 96 C; autoignition temp. 618 C; ref. index 1.5790; surf. tens. 38.82 dynes/cm</th>

N,N'-Diphenyl-p-phenylenediamine

CAS 74-31-7; EINECS/ELINCS 200-806-4

Synonyms: 1,4-Bis(phenylamino)benzene; 1,4-Dianilinobenzene; N,N-Diphenyl-1,4-benzenediamine; DPPD

Classification: Aromatic organic compd.; alkylated p-phenylenediamine

Empirical: C_{18}H_{16}N_{2}

Formula: (C_{6}H_{5}NH)_{2}C_{6}H_{4}

Properties: Gray powd.; insol. in water; sol. in acetone, benzene, monochlorobenzene,

†=pharmaceutical grade

isopropyl acetate, DMF, ether, chloroform, ethyl acetate, glacial acetic acid; m.w. 260.36; dens. 1.28; m.p. 145-152 C; b.p. 220-225 C (0.5 mm)

Toxicology: LD50 (oral, rat) 2370 mg/kg, (IP, mouse) 300 mg/kg; poison by intravenous, intraperitoneal routes; moderately toxic by ing.; eye irritant; weak allergen; suspected carcinogen; TSCA listed

Precaution: Combustible; incompat. with oxidizing materials; emits toxic fumes of NOx

Uses: Intermediate for pharmaceuticals

Regulatory: FDA 21CFR §175.105, 175.320, 176.170, 177.2600; Canada DSL

1,3-Diphenyl-2-propanone

CAS 102-04-5; EINECS/ELINCS 203-000-0

FEMA 2397

Synonyms: Benzyl ketone; Dibenzyl ketone

Classification: aromatic ketone

Empirical: C_{15}H_{14}O

Formula: (C_{6}H_{5}CH_{2})_{2}CO

Properties: Low-melting solid, bitter almond odor; sol. in ether; insol. in water; m.w. 210.28; m.p. 32-34 C; b.p. 330 C; flash pt. > 230 F

Uses: Synthetic flavor for pharmaceuticals

Regulatory: FDA 21CFR §172.515; FEMA GRAS; Canada DSL

Manuf./Distrib.: Fluka http://www.sigma-aldrich.com

SAFC Specialties http://www.safcspecialties.com

Diphensilicon dichloride; Diphensilsilyl dichloride. See Diphensildichlorosilane

N,N´-Diphenylthiourea

CAS 102-08-9; EINECS/ELINCS 203-004-2
Chemical Component Cross-Reference

Synonyms: N,N´-Diphenylthiocarbamide; sym-Diphenylthiocarbamide; Diphenylthiourea; 1,3-Diphenylthiourea; 1,3-Diphenyl-2-thiourea; sym-Diphenylthiourea; Sulfocarbanilide; Thiocarbanilide
Classification: Aromatic organic compd.

Empirical: C_{13}H_{12}N_{2}S
Formula: CS(NHC_{6}H_{5})_{2}

Properties: Wh. to faint gray cryst. powd.; bitter taste; sol. in acetone, alcohol, ether, chloroform, oxygenated and chlorinated solvs.; pract. insol. in water; m.w. 228.33; dens. 1.32 (25 C); m.p. 153-154 C; b.p. dec.

Toxicology: LD_{50} (oral, rat) 50 mg/kg, (IP, rat) 1000 mg/kg; mod. toxic by ing. and IP routes; experimental reproductive effector; TSCA listed

Precaution: Combustible

Hazardous Decomp. Prods.: Heated to decomp., emits highly toxic fumes of SO_{x} and NO_{x}

Uses: Synthetic organic pharmaceuticals

Regulatory: FDA 21CFR §175.105, 177.2600, 178.2010; Canada DSL

Manuf./Distrib.: Aldrich† http://www.sigma-aldrich.com; Boehme Filatex http://www.boehmefilatex.com; Charkit http://www.charkit.com; Fluka http://www.sigma-aldrich.com; Ouchi Shinko Chem. Ind.†

Diphenphoric acid, calcium salt (1:2). See Calcium pyrophosphate

Diphenphoric acid tetrasodium salt. See Tetrasodium pyrophosphate

Diphenphoric acid, tin salt (1:2); Diphosphoric acid tin (2+) salt. See Stannous pyrophosphate

Dipotassium carbonate. See Potassium carbonate

Dipotassium dichloride. See Potassium chloride

Dipotassium disulfite. See Potassium metabisulfite

Dipotassium EDTA dihydrate

CAS 25102-12-9

Synonyms: Edetate dipotassium; EDTA dipotassium; Ethylenediaminetetraacetic acid, dipotassium salt dihydrate; (Ethylenedinitrilo) tetraacetic acid, dipotassium salt

Classification: Nonaromatic amino acid

†=pharmaceutical grade

Empirical: C_{10}H_{14}K_{2}N_{2}O_{8} • 2H_{2}O

Properties: Wh. powd.; sol. in water; m.w. 404.47; m.p. 272 C (dec.)

Toxicology: Irritating to eyes, skin, respiratory system; TSCA listed

Storage: Store @ R.T. in tightly closed container

Uses: Chelating agent for pharmaceuticals; treatment of lead and heavy metal poisoning of farm animals

Dipotassium glycyrrhizate

CAS 68797-35-3; EINECS/ELINCS 272-296-1

Synonyms: Dipotassium glycyrrhizinate; α-D-Glucopyranosiduronic acid, (3β,20β)-20-carboxy-11-oxo-30-norlean-12-en-3-yl-2-O-β-D-glucopyranuronosyl-, dipotassium salt

Definition: Dipotassium salt of glycyrrhizic acid

Empirical: C_{42}H_{62}O_{16} • 2K

Properties: Pale yel. cryst. powd.; water-sol.

Toxicology: TSCA listed

Uses: Flavor and colorant for pharmaceuticals; anti-inflammatory; anti-allergenic; soothes skin

Trade Names: Nikkol Dipotassium Glycyrrhizinate

Dipotassium glycyrrhizinate. See Dipotassium glycyrrhizate

Dipotassium hydrogen orthophosphate; Dipotassium hydrogen phosphate; Dipotassium monophosphate; Dipotassium orthophosphate. See Potassium phosphate dibasic

Dipotassium persulfate. See Potassium persulfate

Dipotassium phosphate. See Potassium phosphate dibasic

Dipotassium pyrosulfite. See Potassium metabisulfite

Dipotassium L-(+)-tartrate. See Potassium acid tartrate

Dipping acid. See Sulfuric acid

Diisopropanolamine
Dipropyl disulfide. See Propyl disulfide
Dipropylene carbonate. See Propylene carbonate
Dipropylene glycol monosalicylate. See Dipropylene glycol salicylate
Dipropylene glycol, myristyl ether, propionate. See PPG-2 myristyl ether propionate
Dipropylene glycol salicylate
CAS 7491-14-7; 68683-31-8; EINECS/ELINCS 272-070-2
Synonyms: Dipropylene glycol monosalicylate; 2-(2-Hydroxypropyl)-1-methylethyl salicylate; POP (2) monosalicylate; PPG (2) monosalicylate; PPG-2 salicylate
Definition: Ester of dipropylene glycol and salicylic acid
Empirical: C₇H₆O₃ • xC₆H₁₄O₃
Formula: C₃H₆(COOC₆H₄OH)OC₃H₆OH
Properties: Lt. colored oil; fragrant odor; sol. in alcohol; insol. in water; dens. 1.16 (40 C); ref. index 1.52
Uses: Plasticizer, emollient, UV absorber in pharmaceuticals
Regulatory: Canada DSL
Manuf./Distrib.: Ruger
http://www.rugerchemical.com

Dipropyl ketone. See 4-Heptanone
Dipropyl methane. See Heptane
DIPS. See Diisopropyl sebacate
Dirosorcinolphthalein. See Fluorescein
Disaturated phosphatidylycholine. See 1,2-Dipalmitoyl-sn-glycero(3)phosphatidylcholine
DISIDA. See Disofenin
Disiloxane, hexamethyl-. See Hexamethyldisiloxane
Disodium acid phosphate. See Sodium phosphate dibasic anhydrous
Disodium 5-amino-4-hydroxy-3-(phenylaz)naphthalene-2,7-disulfonate. See CI 17200
Disodium ascorbyl sulfate
CAS 53910-28-4
Synonyms: L-Ascorbic acid, sulfate monoester, disodium salt
Definition: Disodium salt of sulfated ascorbic acid
Empirical: C₆H₈O₉S • 2Na
Properties: Water-sol.
Uses: Antioxidant
Trade Names: VC-SS

Disodium butanedioate. See Sodium succinate
Disodium calcium ethylenediaminetetraacetate. See Calcium disodium EDTA
Disodium capryloamphodipropionate
CAS 68815-55-4
Synonyms: Capryloamphocarboxypropionate; Capryloamphodipropionate; Octanamide, N-[2-[N-(2-carboxyethyl)]-N-[2-(2-carboxyethoxy) ethyl] aminoethyl]-, disodium salt
Classification: Organic compd.
Empirical: C₁₉H₃₄N₂O₆ • 2Na
Properties: Amphoteric
Uses: Surfactant
Regulatory: Canada DSL
Trade Names: Miranol® JBS

Disodium carbonate. See Sodium carbonate
Disodium 1-[2-(carboxymethoxy) ethyl]-1-(carboxymethyl)-4,5-dihydro-2-undecyl-1H-imidazolium hydroxide. See Disodium lauroamphodiacetate
Disodium cocoamphodiacetate
CAS 61791-32-0; 68650-39-5; EINECS/ELINCS 263-164-4; 272-043-5
Synonyms: N-Cocamidoethyl-N-2-hydroxyethyl-N-carboxyethylglycine, sodium salt; Cocoamphocarboxyglycinate; Cocoamphodiacetate; Imidazolium compds., 1-[2-(carboxymethoxy) ethyl]-1-(carboxymethyl)-4,5-dihydro-2-norcoco alkyl, hydroxides, sodium salts
Classification: Organic compd.
Formula: RCO–NH(CH₂)₅ON(COO)₂Na₂, RCO–represents the coconut acid radical
Properties: Amphoteric
Toxicology: TSCA listed
Uses: Surfactant, foaming agent, wetting agent, emulsifier, solubilizer, coupling agent for pharmaceuticals
Regulatory: Canada DSL
Manuf./Distrib.: Cosmetic Supplies USA
http://www.cosmeticsuppliesusa.com
Trade Names: Ampholak® XCO-30; Miranol® C2M Conc. NP
Trade Names Containing: Cephalipin

Disodium cocoamphodipropionate
CAS 68411-57-4; 68604-71-7; 68910-41-5; 86438-35-9; EINECS/ELINCS 270-131-8; 271-704-5; 272-897-9
Synonyms: Cocoamphocarboxypropionate;
Cocoamphodipropionate; Imidazolium compds., 1-[2-(2-carboxyethoxy) ethyl]-1(or 3)-(2-carboxyethyl)-4,5-dihydro-2-norcoco alkyl, hydroxides, disodium salts; Sodium cocoamphodipropionate

Classification: Organic compd.

Formula: \( RCO–NH(CH_2)_8ON(COO)\textsubscript{2}Na_2, RCO– \) represents the coconut acid radical

Properties: Amphoteric

Uses: Visc. builder, stabilizer, solubilizer

Manuf./Distrib.: Cosmetic Supplies USA
http://www.cosmeticsuppliesusa.com

Trade Names: Miranol\textsuperscript{®} C2M-SF 70%; Miranol\textsuperscript{®} C2M-SF Conc.

Disodium dihydrogen ethylenediaminetetraacetate. See Disodium EDTA

Disodium 5,5\textsuperscript{-}(2-(1,3-dihydro-3-oxo-2H-indazol-2-ylidene)-1,2-dihydro-3H-indol-3-one) disulfonate. See CI 73015

Disodium (2,4-dimethylphenylazo)-2-hydroxynaphthalene-3,6-disulfonate. See Acid red 26

Disodium 3-((2,4-dimethyl-5-sulfonatophenylazo)-4-hydroxynaphthalene-1-sulfonate. See CI 14700

Disodium 5,7-dinitro-8-oxidonaphthalene-2-sulfonate. See CI 10316

Disodium dithionite. See Sodium peroxide

Disodium dithionate. See Sodium metabisulfite

Disodium hydrosulfite

Disodium 4-dodecyl 2-sulfonatosuccinate. See Disodium lauryl sulfosuccinate

Disodium edetate. See Disodium EDTA

Disodium EDTA

CAS 139-33-3 (anhyd.); 6381-92-6 (dihydrate);
EINECS/ELINCS 205-358-3

INS386

Synonyms: Disodium dihydrogen ethylenediaminetetraacetate; Disodium edetate; Disodium ethylenediamine tetraacetate; Edetate disodium; Ethylenediaminetetraacetic acid, disodium salt; (Ethylenedinitrilato) tetraacetic acid, sodium salt; Glycine, N,N\textsuperscript{-}1,2-ethanediylibis[N-(carboxymethyl)]-, disodium salt dihydrate

Classification: Substituted diamine

Empirical: \( C_{10}H_{14}N_2Na_2O_8 \)

Formula: \( (–OOCCH_2)\textsubscript{2}NCH_2CH_2N(CH_2COO^-)\textsubscript{2}2H^+ \cdot 2Na^+ \)

Properties: Wh. cryst. powd.; odorless; freely sol. in water; m.w. 336.24 (anhyd.); 372.24 (dihydrate); m.p. 252 (dec.); pH 4-6

Toxicology: LD50 (oral, rat) 2 g/kg, (IV, mouse) 56 mg/kg, (IP, mouse) 260 mg/kg; poison by IP and IV route; mod. toxic by ing.; experimental teratogen, reproductive effects; mutagenic data; TSCA listed

Hazardous Decomp. Prods.: Heated to decomp., emits toxic fumes of NO\textsubscript{x} and Na\textsubscript{2}O

HMIS: Health 2, Flammability 1, Reactivity 0

Storage: Store @ R.T.

Uses: Pharmaceutical aid; chelating agent, complexing agent in pharmaceuticals, injectables, inhalants, intravenous, ophthalmics, orals, otics, rectals, topicals; preservative in nasal drops, decongestants

Regulatory: FDA 21CFR §73.1, 155.200, 169.115, 169.140, 169.150, 172.120, 172.135, 175.105, 176.150, 176.170, 177.1200, 177.2800, 178.1010, 178.3570, 178.3910, 573.360; USDA 9CFR §318.7; Canada DSL; Japan approved (0.25 g/kg max. as calcium disodium EDTA); FDA approved for injectables, inhalants, IV, ophthalmics, orals, otics, rectals, topicals; USP/NF, BP, EP compliance

| Uses: Flavor for pharmaceuticals; in eye drops for treatment of corneal damage |
| Regulatory: FDA 21CFR §155.120, 155.130, 155.170, 155.200, 155.201, 170.60, 172.530; USDA 9CFR §318.7, 381.147; FEMA GRAS; Japan approved; Europe listed; UK approved; Canada DSL |

**Disodium guanylate**

**CAS 5550-12-9 (anhyd.)**

**FEMA 3668; INS627; E627**

**Synonyms:** Disodium GMP; Disodium guanosine-5´-monophosphate; Disodium 5´-guanylate

**Empirical:** C10H12N5O8P • 2Na

**Formula:** Na2C10H12N5O8P • 2NaOH

**Properties:** Colorless to wh. cryst., char. taste; sol. in cold water, very sol. in hot water; sl. sol. in alcohol; insol. in ether; m.w. 407.18

**Toxicology:** LD50 (oral, mouse) 15 g/kg, (IP, rat) 3880 mg/kg, (subcut., rat) 3400 mg/kg, (IV, rat) 2720 mg/kg; mod. toxic by IP, subcut., IV routes; mildly toxic by ing.; mutagenic data; TSCA listed

**Hazardous Decomp. Prods.:** Heated to decomp., emits toxic fumes of POx, NOx, Na2O

**Storage:** Moisture-sensitive; keep under argon

**Uses:** Flavor for pharmaceuticals; in eye drops for treatment of corneal damage

**Regulatory:** FDA 21CFR §155.120, 155.130, 155.170, 155.200, 155.201, 170.60, 172.530; USDA 9CFR §318.7, 381.147; FEMA GRAS; Japan approved; Europe listed; UK approved; Canada DSL

Chemical Component Cross-Reference

†=pharmaceutical grade

Properties: Amphoteric
Toxicology: TSCA listed
Uses: Visc. control agent, surfactant
Trade Names: Colateric J49

Disodium laureth sulfo succinate
CAS 13192-12-6; 19040-44-9; 26838-05-1; 36409-57-1; EINECS/ELINCS 236-149-5; 248-030-5
Synonyms: Disodium 4-dodecyl 2-sulfonatosuccinate; Sulfo butanedioic acid, 1-dodecyl ester, disodium salt
Definition: Disodium salt of a lauryl alcohol half ester of sulfo succinic acid
Empirical: C_{16}H_{28}Na_{2}O_{7}S
Properties: Wh. liq. or solid; m.w. 410.43; anionic
Toxicology: TSCA listed
Uses: Surfactant, foaming agent for pharmaceuticals
Features: High-foaming
Regulatory: Canada DSL
Manuf./Distrib.: DeWolf Chem.
http://www.dewolfchem.com

Disodium 4,4′-methylenebis3-hydroxy-2-naphthoate. See Disodium pamoate
Disodium 4-[1-methyl-2-[(1-oxooctadec-9-enyl) amino] ethyl] 2-sulfonatosuccinate. See Disodium oleamido MIPA-sulfosuccinate
Disodium monofluorophosphate. See Sodium fluorophosphate
Disodium monohydrogen orthophosphate; Disodium monohydrogen phosphate. See Sodium phosphate dibasic anhydrous
Disodium monoo leamido MIPA-sulfosuccinate. See Disodium oleamido MIPA-sulfosuccinate
Disodium oleamido diglycol sulfo succinate. See Disodium oleamido PEG-2 sulfo succinate
Disodium oleamido MIPA-sulfosuccinate
CAS 43154-85-4; 67815-88-7; EINECS/ELINCS 256-120-0; 267-199-6
Synonyms: Butanedioic acid, sulfo-, 1-[1-methyl-2-[(1-oxooctadec-9-enyl) amino] ethyl] ester, disodium salt; Butanedioic acid, sulfo-, 4-[1-methyl-2-[(1-oxooctadec-9-enyl) amino] ethyl] ester, disodium salt; Disodium 4-[1-methyl-2-[(1-oxooctadec-9-enyl) amino] ethyl] 2-
Chemical Component Cross-Reference

†=pharmaceutical grade

**sulfonatosuccinate**; **Disodium monoolemido MIPA-sulfosuccinate**; **Disodium oleic monoisopropanolamide sulfosuccinate**; **Disodium oleoyl isopropanolamide sulfosuccinate**; **Oleoyl monoisopropanolamide disodium sulfosuccinate**; **Sulfobutanedioic acid, 4-[1-methyl-2-[(1-oxo-9-octadecenyl) amino] ethyl] ester, disodium salt**

Classification: Sulfosuccinate

Definition: Disodium salt of a substituted isopropanolamide half ester of sulfosuccinic acid

Empirical: \( \text{C}_{25}\text{H}_{43}\text{Na}_{2}\text{NO}_{8}\text{S} \)

Properties: Amber liq.; m.w. 549.65; anionic

Toxicology: TSCA listed

Uses: Surfactant

Regulatory: FDA 21CFR §175.105, 176.170; Canada DSL

Trade Names: **Fizul MD-318C**

**Disodium oleamido PEG-2 sulfosuccinate**

CAS 56388-43-3; 68227-80-5; EINECS/ELINCS 260-143-1; 269-392-0

Definition: Disodium salt of the monooleyl amide of the PEG-2 half ester of sulfosuccinic acid

Empirical: \( \text{C}_{26}\text{H}_{47}\text{NO}_{9}\text{S} \cdot 2\text{Na} \)

Properties: Anionic

Uses: Surfactant, cleanser, foaming agent for pharmaceuticals

Features: Mild; skin-friendly

Trade Names: **Rewopol® SB Z**

**Disodium PEG-4 coca monoolemido MIPA sulfosuccinate**

**Disodium peroxide**. See Sodium peroxide

**Disodium phosphate**. See Sodium phosphate dibasic anhydrous

**Disodium phosphate heptahydrate**. See Sodium phosphate dibasic heptahydrate

**Disodium phosphofluoridate**. See Sodium fluorophosphate

**Disodium phosphoric acid**. See Sodium phosphate dibasic anhydrous

**Disodium pyrosulfite**. See Sodium metabisulfite

**Disodium ricinoleamido MEA-sulfosuccinate**

**Disodium ricinoleamido MEA-sulfosuccinate**

CAS 6640-22-8

Synonyms: Disodium 4,4'-methylenebis3-hydroxy-2-naphthoate; 4,4'-Methylenebis(3-hydroxy-2-naphthoic acid) disodium salt; Pamoic acid, disodium salt

Empirical: \( \text{C}_{23}\text{H}_{14}\text{O}_{6}\text{Na}_{2} \)

Properties: Yel. to tan powd.; m.w. 432.34; m.p. 300 C

Uses: Masks bitter taste in pharmaceutical prods.; permits slow release of active drugs; prod. of pamoate salts

Manuf./Distrib.: Aceto† http://www.aceto.com

**Disodium pamoate**

**Disodium phosphate**. See Sodium phosphate dibasic anhydrous

**Disodium phosphate heptahydrate**. See Sodium phosphate dibasic heptahydrate

**Disodium phosphofluoridate**. See Sodium fluorophosphate

**Disodium phosphoric acid**. See Sodium phosphate dibasic anhydrous

**Disodium pyrosulfite**. See Sodium metabisulfite

**Disodium ricinoleamido MEA-sulfosuccinate**

CAS 40754-60-7; 65277-54-5; 67893-42-9; EINECS/ELINCS 267-617-7; 265-672-1

**Disodium ricinoleamido MEA-sulfosuccinate**

CAS 40754-60-7; 65277-54-5; 67893-42-9; EINECS/ELINCS 267-617-7; 265-672-1

**Disodium ricinoleamido MEA-sulfosuccinate**

CAS 40754-60-7; 65277-54-5; 67893-42-9; EINECS/ELINCS 267-617-7; 265-672-1

Chemical Component Cross-Reference

†=pharmaceutical grade

Disofenin
CAS 65717-97-7
Synonyms: N-[[2,6-
Diisopropylphenyl]carbamoyl]-
methyl]iminodiacetic acid; DISIDA; Glycine,
N-[2-[2,6-bis(1-methylphenyl)amino]-
2-oxoethenyl]-N-(carboxymethyl)-

Definition: A diisopropyl-substituted analogue of
iminodiacetic acid
Empirical: C₁₉H₂₆N₂O₅
Properties: Wh. crystals; sol in DMSO and
ethanol
Uses: Used in injectables (IV, infusion)
Regulatory: FDA approved for injectables (IV,
infusion)

Manuf./Distrib.: Sigma http://www.sigma-
aldrich.com/belgium

Disperse blue 72
CAS 81-48-1; EINECS/ELINCS 201-353-5
Synonyms: Alizuroil purple SS; CI 60725; D&C
Violet No. 2; N-(4-Hydroxy-1-
anthaquinonyl)-4-methylaniline; N-(4-
Hydroxy-1-anthaquinonyl)-p-toluidine; 1-
Hydroxy-4-[4-methylphenyl] amino]-9,10-
anthracenedione; 1-Hydroxy-4-(p-toluidino)
anthraquinone; Solvent violet 13; N-(p-
Tolyl)-4-hydroxy-1-anthaquinonylamine
Classification: Anthraquinone color
Empirical: C₂₁H₁₅NO₃
Properties: Dull bluish violet cryst.; sol. in conc.
H₂O₄; m.w. 329.35
Toxicology: LD₅₀ (intratracheal, rat) 250
mg/kg; poison by intratracheal
route; mutagenic data; TSCA listed
Hazardous Decomp. Prods.: Heated to
decomp., emits toxic fumes of NOₓ
Uses: Colorant for external pharmaceuticals
Regulatory: D&C Violet No. 2: FDA 21CFR
§74.1602, 74.2602, 74.3602, 82.1602

Handbook of Pharmaceutical Additives, Third Edition 1267
Distarch phosphate
CAS 55963-33-2; 977088-74-6; 977088-75-7
INS1412; E1412
Synonyms: Phosphate crosslinked starch
Classification: Food starch modified
Definition: Prod. from crosslinking of starch with sodium metaphosphate, sodium trimetaphosphate, or phosphorus oxychloride
Properties: Wh. or nearly wh. powd. or gran.; flakes, amorphous powd. or coarse particles if pregelatinized
Toxicology: No known toxicity
Uses: Absorbable dusting powd. for surgical gloves; production aid, filler, carrier for pharmaceuticals; water softener, sequestrant, and texturizer in dandruff shampoos
Regulatory: FDA 21CFR §175.105; Canada DSL
Manuf./Distrib.: AB R Lundberg http://www.norfoods.se/lundberg

Distearic acid, diester with hexaglycerol. See Polyglyceryl-6 distearate

N,N´-Distearoylethlenediamine. See Ethylene distearamide

1,2-Distearoyl-sn-glycero(3) phosphatidylcholine
CAS 816-94-4; EINECS/ELINCS 212-440-2
Synonyms: L-α,1,2-Distearoylphosphatidylcholine; DSPC
Classification: Phospholipid
Empirical: C₄₄H₈₈NO₈P
Properties: Wh. to off-wh. solid; m.w. 790.16
Precaution: Incompatible with strong oxidizing agents
HMIS: Health 1, Flammability 0, Reactivity 0
Storage: Sore @ -20 C
Uses: Emulsifier, solubilizer for dermatology; for mfg. of liposomes and mixed micelles
Manuf./Distrib.: Genzyme http://www.genzyme.com; Sigma http://www.sigma-aldrich.com/belgium

1,2-Distearoyl-sn-glycero(3)phosphoglycerol sodium salt. See Sodium 1,2-distearoyl-sn-glycero (3) phosphatidylcholine

L-α,1,2-Distearoylphosphatidylcholine. See 1,2-Distearoyl-sn-glycero(3) phosphatidylcholine

†=pharmaceutical grade

Distearyl dimethyl ammonium chloride. See Distearyldimonium chloride

Distearyldimonium chloride
CAS 107-64-2; EINECS/ELINCS 203-508-2
Synonyms: Ammonium, dimethyldioctadecyl-, chloride; Dimethyldioctadecylammonium chloride; N,N-Dimethyl-N-octadecyl-1-octadecanaminium chloride; Dioctadecyl dimethyl ammonium chloride; Distearyl dimethyl ammonium chloride; Octadecanaminium, N,N-dimethyl-N-octadecyl-, chloride; Quaternium-5
Classification: Quaternary ammonium salt
Empirical: C₃₈H₇₆N • Cl
Properties: Paste; m.w. 586.52; m.p. 36-44 C; cationic
Toxicology: LD50 (oral, rat) 11,300 mg/kg; mildly toxic by ing.; TSCA listed
Hazardous Decomp. Prods.: Heated to decomp., emits toxic vapors of NOₓ and Cl⁻
Uses: Visc. builder in pharmaceuticals
Regulatory: FDA 21CFR §172.710, 177.1200; Canada DSL
Manuf./Distrib.: Fluka http://www.sigma-aldrich.com

Distearyl ketone. See Stearone

Distearyl phthalic acid amide
Uses: Surfactant for pharmaceuticals; emulsifier, suspending agent for triglycerides, min. oil, and silicones
Trade Names: STEPAN® SAB-2

Distearoyl thiodipropionate
CAS 693-36-7; EINECS/ELINCS 211-750-5
INS390
Synonyms: Dioctadecyl thiodipropionate; 3,3´-Dioctadecyl thiodipropionate; Di-n-octadecyl 3,3´-thiodipropionate; Distearyl 3,3´-thiodipropionate; Distearyl β-thiodipropionate; Distearyl β,β´-thiodipropionate; Distearyl thiopropionate; DSTDP; DSTP; Propanoic acid, 3,3´-thiobis-, dioctadecyl ester; Propionic acid, 3,3´-thiobis-, dioctadecyl ester; 3,3´-Thiobispropanoic acid, dioctadecyl ester; Thiodipropionic acid, distearyl ester
Classification: Aliphatic organic compd.; thioether
Definition: Diester of stearyl alcohol and 3,3´-thiodipropionic acid
Empirical: C₄₂H₆₂O₄S
Formula: (C₁₈H₃₇OOCCH₂CH₂)₂S
Properties: Wh. flakes; insol. in water; sol. in...
Hazardous Decomp. Prods.: Heated to decomp., emits toxic fumes of SOx
Uses: Antioxidant for pharmaceuticals
Regulatory: FDA 21 CFR §175.105, 175.300, 181.22, 181.24 (0.005% migrating from food pkg.); Canada DSL

Distearyl 3,3´-thiodipropionate; Distearyl β-thiodipropionate; Distearyl β,β´-thiodipropionate; Distearyl thiopropionate. See Distearyl thiodipropionate

Disteardimonium hectorite
CAS 97280-96-1; EINECS/ELINCS 306-493-1
Synonyms: 1-Octadecanaminium, N,N-dimethyl-N-octadecyl-, chloride, reaction products with hectorite
Uses: Suspending agent
Trade Names Containing: Bentone Gel® EUG V

Distilled lime oil. See Lime (Citrus aurantifolia) oil
Distilled spirits. See Alcohol
Disulfide dibenzyl. See Benzyl disulfide
Disulfide, di-2-propenyl. See Allyl disulfide
Disulfurous acid dipotassium salt. See Potassium metabisulfite
Disulfurous acid disodium salt. See Sodium metabisulfite
1,2-Ditetradecanoyl-sn-glycero-3-phosphocholine. See 1,2-Dimyristoyl-sn-glycero(3) phosphatidylcholine
Ditetradecyl 3,3´-thiobispropanoate; †=pharmaceutical grade

Dithiothreitol
CAS 3483-12-3; EINECS/ELINCS 240-263-0
Synonyms: 2,3-Butanediol, 1,4-dimercapto-, D-threo; Cleland's reagent; 1,4-Dithiothreitol; 1,4-Dithio-L-threitol; D-1,4-Dithiothreitol; DTT; D-DTT; D-Threo-1,4-dimercapto-2,3-butanediol
Empirical: C4H10O2S2
Properties: Solid; m.w. 154.26; m.p. 42-43.5 C; b.p. 115-116 (1 mm)
Toxicology: LD50 (IP, mouse) 154 mg/kg, (intramuscular, mouse) 108 mg/kg; poison by IP and intramuscular routes; TSCA listed

Hazardous Decomp. Prods.: Heated to decomp., emits toxic fumes of SOx
Uses: Reducing agent for proteins and enzymes, biochemical research; drug
Regulatory: Canada DSL

1,4-Dithiothreitol; 1,4-Dithio-L-threitol; D-1,4-Dithiothreitol. See Dithiothreitol
Ditip diphasphate. See Stannous pyrophosphate
1,4-Di-p-toluidinoantraquinone. See D&C Green No. 6; Solvent green 3

Ditridecyl thiodipropionate
CAS 10595-72-9; EINECS/ELINCS 234-206-9
Synonyms: Ditridecyl 3,3'-thiodipropionate; DTDTP; 3,3'-Tetramethylmononyl thiodipropionate; 3,3'-Thiobispropanoic acid, ditridecyl ester; Thiodipropionic acid ditridecyl ester
Classification: Thioether
Definition: Diester of tridecyl alcohol and 3,3'-thiodipropionic acid
Empirical: C_{32}H_{62}O_{4}S
Formula: S(CH_{2}CH_{2}COOC_{13}H_{27})_{2}
Properties: Colorless mobile liq.; sol. in most org. solvs., oxygenated solvs.; sl. sol. in methanol; insol. in water; m.w. 542.91; dens. 0.936; m.p. < -24 C; b.p. 265 C (0.25 mm); flash pt. > 110 C
Toxicology: LD_{50} (oral, rat) > 10 ml/kg, (skin, rabbit) > 5 ml/kg; TSCA listed
Precaution: Combustible
Uses: Antioxidant, stabilizer, plasticizer, and softener for pharmaceuticals
Regulatory: Canada DSL
Manuf./Distrib.: Aldrich†; http://www.sigma-aldrich.com; Cytec Ind.; http://www.cytec.com; Hampshire; http://www.hampshire-chemical.com

Ditridecyl 3,3'-thiodipropionate. See Ditridecyl thiodipropionate
Di (trimethylsilyl) amine. See Hexamethyldisilazane

Dittany of Crete
CAS 977017-92-7
FEMA 2399
Synonyms: Cretan dittany; Origanum dictamnus; Spanish hops
Definition: From Origanum dictamnus
Properties: Intense pleasant odor, bitter aromatic flavor
Uses: Natural flavor for pharmaceuticals
Regulatory: FDA 21CFR §172.510; FEMA GRAS

Diuretic salt. See Potassium acetate
Divinylbenzene; 1,3-Divinylbenzene. See m-Divinylbenzene
m-Divinylbenzene
CAS 108-57-6
Synonyms: Benzene, 1,3-diethenyl-; Benzene, m-divinyl; Divinylbenzene; 1,3-Divinylbenzene; DVB; m-Vinylstyrene

Empirical: C_{10}H_{10}
Properties: Pale straw-colored liq.; sol. in ether, methanol; insol. in water; m.w. 130.19; dens. 0.90 kg/l (22% sol'n.); m.p. -87 C; b.p. 180 C; flash pt. 173.9 C
Toxicology: ACGIH TLV/TWA 10 ppm; primary irritant; eye irritant; TSCA listed
Precaution: Combustible; sol'n. contg. higher DVB concs. polymerize explosively
Hazardous Decomp. Prods.: Heated to decomp., emits acrid smoke and irritating fumes
NFPA: Health 1, Flammability 2, Reactivity 2
Uses: Pharmaceuticals (polymers for enzyme immobilization, dental cements, prostheses)
Manuf./Distrib.: Deltech; http://www.deltechcorp.com; Varsal Instruments; http://www.varsal.com
Trade Names: DVB 55; DVB 63; DVB HP

Divinylene oxide. See Furan
Divinylene sulfide. See Thiophene
Divinylbenzene. See Pyrrole
Diydrocarvyl acetate. See Dihydrocarvyl acetate
DKP. See Potassium phosphate dibasic
DLT; DLTDP; DLTP. See Dilauryl thiodipropionate
DMA; DMAC. See Dimethyl acetamide
DMAE. See Dimethylethanolamine
DMB. See p-Dimethoxybenzene
DMBC. See Dimethylbenzyl carbinoxil
DMBCA. See Dimethylbenzyl carbinoxil acetate
DMBC butyrate. See α,α-Dimethylenephenthyl butyrate
DMBC formate. See α,α-Dimethylenephenthyl formate
DMC. See Dimethylaminoethyl chloride hydrochloride
DMDH; DMDMH. See DMDM hydantoin
DMDM hydantoin
CAS 6440-58-0; EINECS/ELINCS 229-222-8
Synonyms: Bis (hydroxymethyl)-5,5-dimethylhydantoin; 1,3-Bis (hydroxymethyl)-5,5-dimethylimidazolidinedione; 1,3-Bis (hydroxymethyl)-5,5-dimethylimidazolidinedione-2,4-dione; Bis (hydroxymethyl)-5,5-dimethyl-2,4-imidazolidinedione; 1,3-Di (hydroxymethyl)-5,5-dimethylhydantoin; Dimethyol dimethyl hydantoin; 1,3-Dimethyl-5,5-dimethylhydantoin; Dimethyl-5,5-dimethylhydantoin; DMDH;

Docusate sodium. See Dioctyl sodium sulfosuccinate
Dodecahydro-1,4a-dimethyl-7-(1-methylethyl)-1-phenanthrenemethanol. See Hydroabietyl alcohol
Dodecahydrosqualene. See Squalane
δ-Dodecalactone
CAS 713-95-1; EINECS/ELINCS 211-932-4
FEMA 2401
Synonyms: Dodecan-5-olide; 5-Hydroxydodecanoic acid, δ-lactone
Classification: Nonaromatic lactone
Definition: Obtained by lactonization of 5-hydroxydodecanoic acid
Empirical: C_{12}H_{22}O_2
Properties: Colorless to very pale straw-yel. visc. liq., fresh-fruit oily odor; sol. in alcohol, propylene glycol, veg. oil; insol. in water; m.w. 198.31; dens. 0.942; m.p. -12 C; b.p. 140-141 C (1 mm); flash pt. > 230 F; ref. index 1.4600
Toxicology: LD_{50} (oral, rat) > 5 g/kg, (skin, rabbit) > 5 g/kg; primary irritant; TSCA listed
Precaution: Combustible liq.; wear safety glasses or goggles, rubber gloves, apron; incompat. with strong oxidizers, reducers
Hazardous Decomp. Prods.: Heated to decomp., emits CO, CO_2, acrid smoke and irritating fumes
Uses: Synthetic flavor for pharmaceuticals
Features: Coconut, peach-like flavor
Regulatory: FDA 21CFR §172.515; FEMA GRAS; Australia AICS; Canada DSL; Japan MITI

γ-Dodecalactone
CAS 2305-05-7; EINECS/ELINCS 218-971-6
FEMA 2400
Synonyms: Dodecanolide-1,4; 2(3H)-Furanone, dihydro-5-octyl-; 4-Hydroxydodecanoic acid γ-lactone; γ-Octyl-γ-butyrolactone; γ-n-Octyl-γ-n-butyrolactone
Classification: Nonaromatic lactone
Empirical: C_{12}H_{22}O_2
Properties: Colorless oily liq., fatty peachy odor, butter peach-like flavor; sol. in alcohol; insol. in water; m.w. 198.31; dens. 0.936; m.p. 17-18 C; b.p. 258 C; ref. index 1.4520
Toxicology: Primary skin irritant; TSCA listed
Hazardous Decomp. Prods.: Heated to decomp., emits acrid smoke and irritating vapors
Uses: Synthetic flavor for pharmaceuticals
Features: Fruity flavor
Regulatory: FDA 21CFR §172.515; FEMA GRAS; Canada DSL

Dodecylbenzenesulfonate, triethanolamine salt; Dodecylbenzenesulfonic acid, compd. with 2,2’,2”-nitrotris[ethanol] (1:1). See TEA-dodecylbenzenesulfonate

Dodecylbenzenesulfonic acid sodium salt. See Sodium dodecylbenzenesulfonate

Dodecylbenzenesulfonic acid triethanolamine salt. See TEA-dodecylbenzenesulfonate

Dodecyl dimethylamine; N-Dodecyl dimethylamine. See Dimethyl lauramine

Dodecylidimethylamine oxide. See Dimethyl lauramine oxide

Dodecyl dimethyl benzyl ammonium chloride. See Lauralkonium chloride

Dodecyl dimethyl ethylbenzyl ammonium chloride. See Quaternium-14

Dodecyltrimethyl (2-phenoxyethyl) ammonium bromide. See Domiphen bromide

Dodecyl docosanoate. See Lauryl behenate

α-Dodecylene. See Dodecene-1

Dodecyl (ethylbenzyl) dimethylammonium chloride; N-Dodecyl-ar-ethyl-N,N-dimethylbenzenemethanaminium chloride. See Quaternium-14

Dodecyl gallate

**CAS 1166-52-5; EINECS/ELINCS 214-620-6**

**INS 312**

**Synonyms:** Dodecyl-3,4,5-trihydroxybenzoate; Gallic acid dodecyl ester; Gallic acid lauryl ester; Lauryl gallate; 3,4,5-Trihydroxybenzoic acid, dodecyl ester

**Definition:** Ester of gallic acid

**Empirical:** C_{19}H_{30}O_{5}

**Properties:** Wh. cryst. solid; sol. in ethanol,
Chemical Component Cross-Reference

†=pharmaceutical grade

Dodecyl trimethyl ammonium chloride. See Laurtrimonium chloride

Dog rose hips extract. See Dog rose (Rosa canina) hips extract

Dog rose hips oil. See Dog rose (Rosa canina) hips oil

Dog rose (Rosa canina) hips extract
CAS 84696-47-9
FEMA 2990
Synonyms: Dog rose hips extract; Rosa canina; Rosa canina hips extract; Rose hips extract
Definition: Extract of the hips of the dog rose, Rosa canina
Properties: Brown to dark brown powd.; sol. in water; pH 2.5-4. (10% sol'n.)
Toxicology: Skin irritant
Precaution: Wear safety glasses, dust respirator, protective gloves, and lab coat
HMIS: Health 1, Flammability 1, Reactivity 0
Storage: Store in a tightly closed container in a cool, well-ventilated area @ ≤ 24 C
Uses: Natural flavor for pharmaceuticals
Regulatory: FEMA GRAS
Manuf./Distrib.: Bell Flavors & Fragrances
http://www.bellff.com; Bio-Botanica
http://www.bio-botanica.com; Carrubba
http://www.carrubba.com; Frutarom
http://www.frutarom.com; Mini Star Int'l.
http://www.ministar.com; Pharmachem Labs

Dog rose (Rosa canina) hips oil
CAS 84603-93-0
Synonyms: Dog rose hips oil; Rosa canina; Rosa canina fruit oil; Rose hips oil
Definition: Oil derived from rose hips, Rosa canina; main components are linoleic acid and linolenic acid
Properties: Lt. yel. liq.
Uses: Emollient in pharmaceuticals
Features: Oily
Manuf./Distrib.: Alzo
http://www.alzointernational.com; Desert Whale Jojoba http://www.desertwhale.com
Trade Names: Lipovol RHO

Dolcymene. See p-Cymene

Dolomite. See Calcium carbonate

DOM. See Dioctyl maleate
Domiphen bromide
CAS 538-71-6; EINECS/ELINCS 208-702-0
Synonyms: N,N-Dimethyl-N-(2-phenoxethyl)-1-dodecanaminium bromide; 1-Dodecanaminium, N,N-dimethyl-N-(2-phenoxethyl)-, bromide; Dodecyldimethyl(2-phenoxethyl) ammonium bromide; PDDB; Phenododecinium bromide; β-Phenoxethylidimethyldodecylammonium bromide
Classification: Quaternary ammonium salt
Empirical: C₂₂H₄₆BrNO
Formula: C₆H₅OC₂H₄N(C₁₂H₂₅)(CH₃)₂Br
Properties: Crystals, mild char. odor, bitter taste; sol. in water, ethanol, acetone, ethyl acetate, chloroform; very sl. sol. in benzene; m.w. 414.54; m.p. 112 C
Toxicology: LD₅₀ (IP, rat) 40 mg/kg, (IV< rat) 18 mg/kg; poison by IP and IV routes; mutagenic data; TSCA listed
Hazardous Decomp. Prods.: Heated to decomp., emits very toxic fumes of NOₓ, NH₃, and Br⁻
Uses: Antimicrobial, fungicide for mouthwashes, cold sterilization; antiseptic in oral rinse prods.; anti-infective
Regulatory: BP compliance; Canada DSL
DOP. See n-Dioctyl phthalate
1-Dotriacontanol
CAS 6624-79-9
Synonyms: Lacceryl alcohol
Classification: Fatty alcohol
Empirical: C₃₂H₆₆O
Formula: M.w. 466.90; m.p. 120 C; b.p. 89 C
Properties: Crystals, mild char. odor, bitter taste; sol. in water, ethanol, acetone, ethyl acetate, chloroform; very sl. sol. in benzene; m.w. 414.54; m.p. 112 C
Toxicology: LD₅₀ (IP, rat) 40 mg/kg, (IV< rat) 18 mg/kg; poison by IP and IV routes; mutagenic data; TSCA listed
Hazardous Decomp. Prods.: Heated to decomp., emits very toxic fumes of NOₓ, NH₃, and Br⁻
Uses: Antimicrobial, fungicide for mouthwashes, cold sterilization; antiseptic in oral rinse prods.; anti-infective
Regulatory: BP compliance; Canada DSL
Trade Names Containing: Lesstanol™ Natural Octacosanol 30%
Douglas fir oil. See Balsam Oregon (Pseudotsuga menziesii)
DPCP. See Diphenyl chlorophosphate
DPPC. See 1,2-Dipalmityl-sn-glycero(3) phosphatidylcholine

EGDS. See Glycol distearate
EGEE. See Ethoxyethanol
Egg albumin. See Albumen

Egg oil
CAS 8001-17-0; EINECS/ELINCS 232-271-8
Synonyms: Oil of egg; Oil of egg yolk
Definition: Oil obtained by extraction of the yolks of fresh chicken eggs
Properties: Dark oil; sol. in common org. solvs.; misc. with other oils; insol. in water, but readily forms emulsions on strong agitation; dens. 0.95; ref. index 1.4790 (20 C)
Uses: Emollient, moisturizer, emulsifier, superfatting agent, humectant, mold release agent for hydrophilic pharmaceutical ointments
Regulatory: Canada DSL
Manuf./Distrib.: Alban Muller http://www.albanmuller.com; Fanning http://www.fanncorpc.com

Eglandine. See Isobutyl benzoate
EGME. See Methoxyethanol
EGMEE. See Ethoxyethanol

EGMS. See Glycol stearate
2-EH. See 2-Ethylhexanol
Eicosanol; 1-Eicosanol. See Arachidyl alcohol
1-Eicosanol, 2-hexadecyl-. See Cetylarchidol
1-Eicosanol, 2-tetradecyl-. See Tetradeceyleicosanol
Eicosanyl propanoate; Eicosanyl propionate. See Arachidyl propionate

Eicosapentaenoic acid
CAS 10417-94-4
Synonyms: 5,8,11,14,17-Eicosapentaenoic acid; EPA
Classification: Unsaturated acid
Empirical: C20H30O2
Formula: CH3(CH2CH=CH)5CH2CH2CH2COOH
Properties: M.w. 302.46; dens. 0.943; m.p. -54 to 53 C; flash pt. 200 F; ref. index 1.4977
Storage: Light-sensitive
Uses: Additive

Trade Names Containing: Incromega DHA 500TG SR; Incromega E3322; Incromega TG3322; Ropufa® '10' n-3 INF Powder

5,8,11,14,17-Eicosapentaenoic acid. See Eicosapentaenoic acid

1-Eicoseny, polymer with 1-ethenyl-2-pyrroolidinone. See PVP/eicosene copolymer

Eicosyl erucate. See Octyldodecyl erucate

Elaeis guineensis; Elaeis guineensis oil. See Palm (Elaeis guineensis) oil
Elaeis guineensis seed oil. See Palm (Elaeis guineensis) kernel oil
Elaic acid. See Oleic acid

Elastin
CAS 9007-58-3; EINECS/ELINCS 232-701-4
Classification: Scleroprotein
Definition: Fibrous protein found in animal connective tissue
Properties: Yel. fibrous mass; insol. in water, dil. acids, alkalis, salt sol'ns., alcohol; partly digested by pepsin sol'n.; wholly digested by trypsin
Storage: Store under argon; sensitive to humidity
Uses: Emollient for pharmaceuticals,
Chemical Component Cross-Reference

**Elder flowers**
- CAS 977002-47-3
- FEMA 2406
- Synonyms: Sambucus; Sambucus canadensis; Sambucus nigra; Sweet elder
- Definition: From Sambucus canadensis or S. nigra
- Properties: Aromatic bitter tonic
- Uses: Natural flavor for pharmaceuticals
- Regulatory: BP, EP compliance; FDA 21 CFR §182.10, GRAS; FEMA GRAS

**Elm** (Ulmus campestris) extract
- Definition: Extract of the bark of the elm, Ulmus campestris
- Uses: Botanical; in herbal medicine to soothe the skin; in pharmaceutical orals
- Regulatory: FDA approved for orals

**Elder flowers oil.** See Sambucus nigra oil

**Elecrol**
- Synonyms: RITA†, Ethylene/methylacrylic acid copolymer
- Properties: Aromatic elixir

**Elp**
- Synonyms: Ethyl-2-furanpropionate

**Emulsifying wax NF**
- CAS 97069-99-0
- Definition: A waxy solid derived from cetostearyl alcohol contg. a polyoxyethylene deriv. of a fatty acid ester of sorbitan
- Properties: Creamy wh. waxy solid, mild char.

†=pharmaceutical grade

**Enanth**
- Synonyms: Ethyl methylphenylglycidate

**Emulsion stabilizer for pharmaceuticals**
- Odor; sol. in alcohol, ether, chloroform, hydrocarbon solvs., aerosol propellants; insol. in water; m.p. 50-54 C; iodine no. 3.5 max.; sapon. no. 14 max.; hyd. no. 178-192; pH 5.5-7.0 (3% disp.); nonionic
- Uses: Emulsifier, thickener, opacifier, solubilizer, suspending agent, stiffener, emulsion stabilizer for pharmaceuticals
- Regulatory: USP/NF compliance

**Enamel white.** See Barium sulfate

**Enanthal; Enanthaldehyde.** See Heptanal

**Enanthic acid.** See Heptanoic acid

**Enanthic alcohol.** See Heptyl alcohol

**Enanthic aldehyde.** See Heptanal

**Enanthic anhydride.** See Heptanoic acid

**Enanthole.** See Heptanal

**Enanthyl alcohol.** See Heptyl alcohol

**Enanthyllic acid.** See Heptanoic acid

**Enanthyl ether.** See Ethyl heptanoate

**English chamomile extract.** See Chamomile (Anthemis nobilis) extract

**English white.** See Calcium carbonate

**Engraver's acid.** See Nitric acid
Chemical Component Cross-Reference

Enocianina; Enocyainin. See Grape skin extract

Enoxolone. See Glycyrrhetinic acid

Entsufon; Entsufon sodium. See Sodium octoxynol-2 ethane sulfonate

Enzactin. See Triacetin

EO. See Ethylene oxide

EO/PO block polymer or copolymer
CAS 9003-11-6 (generic); 106392-12-5
Synonyms: Ethylene glycol/propylene glycol block copolymer; POE/POP copolymer; Polyoxyethylene/polyoxypropylene block copolymer; Polyoxyethylene/polyoxypropylene block copolymer; POP/POE copolymer

Formula: (C₃H₆O • C₂H₄O)ₓ

Properties: Liq., powd., or flake; 10-80% EO content; m.w. 1100-10,000; HLB 9.5-18.7; nonionic

Toxicology: LD₅₀ (IV, mouse) 129 mg/kg; TSCA listed

Uses: Wetting agent, dispersant, defoamer, gellant, solubilizer, lubricant base for medical applics., pharmaceuticals

Trade Names: PEP-101 See also Merocapol Series; Poloxamer Series

EO/PO ethylenediamine block copolymer
CAS 26314-40-5; 107397-59-1
Synonyms: Ethylenediamine propoxylate/ethoxyxlate

Definition: Block copolymer with PO blocks adjacent to the amine group; prods. with EO block in this position are also avail.

Properties: Liq. or flakes; nonionic

Uses: Dispersant

Trade Names: Tetronic® 50R1; Tetronic® 90R4; Tetronic® 150R1

Eosin. See D&C Red No. 21

Eosin blue. See CI 45410

Eosin disodium. See D&C Red No. 22; Acid red 87

Eosine. See D&C Red No. 22; D&C Red No. 21; Acid red 87

Eosine blue; Eosine bluish. See CI 45410

Eosine G; Eosin Y. See Acid red 87

Eosin YS. See D&C Red No. 22; Acid red 87

EP. See p-Ethylphenol; Propylene glycol ethyl ether

†=pharmaceutical grade

EPA. See Eicosapentaenoic acid

(-)-Epigallocatechin gallate
CAS 989-51-5

Synonyms: EGCG; Epigallocatechin 3-gallate; (-)-Epigallocatechin-3-O-gallate; 3,4,5-trihydroxybenzoic acid, (2R-cis)-3,4-dihydro-5,7-dihydroxy-2-(3,4,5-trihydroxyphenyl)-2H-1-benzopyran-3-yl ester; (2R, 3R)-2-(3,4,5-trihydroxyphenyl)-3,4-dihydro-1(2H)-benzopyran-3,5,7-triol 3-(3,4,5-trihydroxybenzoate)

Classification: Flavenol

Definition: Major component of green tea extract

Empirical: C₂₂H₁₈O₁₁

Properties: Wh. to faint pink cream-colored powd. or crystals; odorless; sol in water (5 mg/ml, acetone, ethanol, methanol, pyridine, and tetrahydrofuran; m.w. 458.40; m.p. 218 C

Toxicology: TSCA listed

Uses: Dietary supplement and antioxidant

Regulatory: Canada DSL

Trade Names Containing: Teavigo™ TG

Epigallocatechin 3-gallate; (-)-Epigallocatechin-3-O-gallate. See (-)-Epigallocatechin gallate

Ephydalin alcohol. See Glycidol

Epilobium angustifolium extract

Definition: Alkaloids obtained from the plant belonging to the family Onagraceae

Toxicology: LD₅₀ (IP, mouse) 200 mg/kg

Uses: Counter-irritant in topicals

Trade Names: Canadian Willowherb Extract (5% clear)

Epoxides, polymers, epoxy resins. See Epoxy resin

1,4-Epoxy-1,3-butadiene. See Furan

1,4-Epoxybutane. See Tetrahydrofuran

Epoxy compds. See Epoxy resin

Epoxy cyclohexane; 1,2-Epoxy cyclohexene. See Cyclohexene oxide

Epoxyethane; 1,2-Epoxyethane. See Ethylene oxide

Epoxy linalool. See Linalool oxide

1,4-Epoxy-p-menthane. See 1,4-Cineole

1,8-Epoxy-p-menthane. See Eucalyptol

α-β-Epoxy-β-methylhydrocinnamic acid, ethyl ester. See Ethyl methylphenylglycidate

1,2-Epoxy-3-phenoxypropane. See Phenyl glycidyl ether
2,3-Epoxypropanol; 2,3-Epoxy-1-propanol.  
See Glycidol

2,3-Epoxypropyl phenyl ether.  See Phenyl glycidyl ether

Epoxy resin
CAS 25928-94-3

Synonyms:  Condensation prods., epoxy; Epoxides, polymers, epoxy resins; Epoxy compds.; Ethers, cyclic, epoxides, polymers; Plastics, epoxy; Polyethers, epoxy resins

Classification:  Polymer

Definition:  A thermosetting resin based on the reactivity of the epoxide group

Toxicology:  LD50 (oral, rat) 2200 mg/kg; strong skin irritant in uncured state; poison by inhalation; moderately toxic by ing.; little or no toxicity in cured state

Hazardous Decomp. Prods.:  Heated to decomp., emits toxic fumes of Cl-

Uses:  Biomaterial for topicals, slow-release and microencapsulation prods.

Regulatory:  FDA 21CFR §175.300, 177.1390, 177.1650

†=pharmaceutical grade

propanesulfonic acid
Epsom salts.  See Magnesium sulfate heptahydrate; Magnesium sulfate anhydrous

Equisetum arvense
Equisetic acid.  See Aconitic acid

Equisetum arvense arvensium.  See Horsetail (Equisetum arvense) extract

Ercalciol.  See Ergocalciferol

Ergocalciferol
CAS 50-14-6; EINECS/ELINCS 200-014-9

Synonyms:  Calciferol; Ercalciol; Ergorone; Ergosterol, activated; Ergosterol, irradiated; Irradiated ergosta-5,7,22-trien-3-β-ol; Oleovitamin D; 9,10-Secoergosta-5,7,10(19),22-tetraen-3-β-ol; 9,10-Seco (5Z,7E,22E)-5,7,10(19),22-ergostatetraen-3-ol; Viosterol; Vitamin D2

Definition:  Derived from ergosterol by irradiation with UV light

Empirical:  C28H44O

Properties:  Wh. cryst., odorless; sol. in alcohol, chloroform, ether, fatty oils; insol. in water; m.w. 396.72; m.p. 115-118 C

Toxicology:  LD50 (oral, rat) 56 mg/kg; LDL0 (IP, dog) 10 mg/kg, (IV, dog) 5 mg/kg, (intramuscular, dog) 5 mg/kg; poison by ing. IP, IV, and intramuscular routes; human systemic effects by ingestion (anorexia, nausea, etc.); experimental teratogen, reproductive effects; TSCA listed

Hazardous Decomp. Prods.:  Heated to decomp., emits acrid smoke and irritating fumes

Storage:  Light-sensitive

Uses:  Dietary supplement, nutrient for mfg. of human and veterinary specialties for oral and parenteral use; antirachitic drug

Regulatory:  FDA 21CFR §166.110, 184.1950, GRAS; SARA reportable; Japan approved; Canada DSL

Chemical Component Cross-Reference

| Varsal Instruments† | http://www.varsal.com |

Ergorone; Ergosterol, activated; Ergosterol, irradiated. See Ergocalciferol

Ergot sugar. See Trehalose

Eriodictyon californicum; Eriodictyon californicum extract. See Yerba santa (Eriodictyon californicum) extract

Erioglaucine. See D&C Blue No. 4

Eruvic acid
CAS 112-86-7; EINECS/ELINCS 204-011-3

Synonyms: Docos-13-enoic acid; 13-Docosenoic acid, (Z); cis-13-Docosenoic acid; â-13:14-Docosenoic acid; â-(13)-cis-13-Docosenoic acid; (Z)-13-Docosenoic acid

Classification: Monoethenoid acid

Definition: C22 fatty acid with one double bond; a homologue of oleic acid with 4 more carbons

Empirical: C22H42O2

Formula: C15H27CH(CH(2)11)COOH

Properties: Colorless needles; very sol. in ether; sol. in alcohol; insol. in water; m.w. 338.56; dens. 0.860 (55/4°C); m.p. 33-34°C; b.p. 381°C (dec.); iodine no. 74.98; flash pt. 110°C; ref. index 1.4534 (45°C)

Precaution: Combustible

Uses: Pharmaceuticals; flavors

Regulatory: Canada DSL

†=pharmaceutical grade

Eruvic acid, 2-octylidodecyl ester. See Octylidodecyl erucate

Eruvic acid, oleyl ester. See Oleyl erucate

Erycorbin. See Erythorbic acid

Erythorbic acid
CAS 89-65-6; EINECS/ELINCS 201-928-0; FEMA 2410; INS315

Synonyms: Araboascorbic acid; d-Araboascorbic acid; D-2,3-Didehydro-erythro-hexono-1,4-lactone; Erycorbin; d-Erythorbic acid; D-Erythro-ascorbic acid; D-Erythro-hex-2-enonic acid, γ-lactone; D-Erythro-3-ketohexonic acid lactone; Glucosaccharonic acid; Isoascorbic acid; D-Isoascorbic acid; Isovitamin C; Saccharosonic acid

Definition: Isomer of ascorbic acid

Empirical: C6H8O6

Properties: Wh. or sl. yel. cryst. or powd.; darkens on exposure to light; sol. in water, alcohol, pyridine, oxygenated solvs.; mod. sol. in acetone; sl. sol. in glycerin; m.w. 176.14; m.p. 164-171°C (dec.)

Toxicology: Nontoxic; mutagenic; causes DNA damage; TSCA listed

Hazardous Decomp. Prods.: Heated to decomps., emits acrid smoke and irritating fumes

Storage: Light-sensitive

Uses: Antioxidant, preservative for pharmaceuticals

Regulatory: FDA 21CFR §101.33, 145.110, 155.200, 175.105, 182.3041, GRAS; FEMA GRAS; USDA 9CFR §318.7, 381.147; Japan restricted for purpose of anti-oxidation; Canada DSL

Handbook of Pharmaceutical Additives, Third Edition 1282
d-Erythorbic acid. See Erythorbic acid
Erythrite. See Erythritol

Erythritol
CAS 149-32-6; EINECS/ELINCS 205-737-3
Synonyms: 1,2,3,4-Butanetetrol; 2(r),3(s)-1,2,3,4-Butanetetrol; Erythritole; L-Erythritol; Erythritol, meso-; Erythrogulcin; Erythrol; meso-Erythritol; Tetrahydroxybutane
Classification: Organic compd.
Empirical: C\textsubscript{4}H\textsubscript{10}O\textsubscript{4}
Formula: CH\textsubscript{2}OH(CH\textsubscript{2}OH)\textsubscript{2}CH\textsubscript{2}OH
Properties: Wh. powd.; m.w. 122.12; m.p. 121.5 C; b.p. 330.5 C
Toxicology: LD\textsubscript{50} (IP, mouse) 7 g/kg; LD\textsubscript{10} (IV, dog) 5 g/kg; irritating to eyes, skin, mucous membranes, upper respiratory tract; may be harmful by inh., ing., or skin absorb.
Precaution: Incomp. with strong oxidizing agents, strong bases
Hazardous Decomp. Prods.: CO, CO\textsubscript{2}; emits toxic fumes under fire conditions
Storage: Store in cool, dry place below 0 C; keep tightly closed
Uses: Sweetener for pharmaceutical tablets and coatings; excipient for pharmaceutical syrups and medicated candies; taste masking agent to mask unpleasant bitter
taste of actives in pharmaceutical syrups and oral care prods.; coolant for oral care prods.
Features: Low-calorie
Regulatory: BP, EP compliance; Canada DSL

Esbericard. See Crataegus monogina extract

Escarin
CAS 680541-0; EINECS/ELINCS 229-880-6
Definition: Saponin occurring in the seed of the horse chestnut tree, Aesculus hippocastanum
Empirical: C\textsubscript{54}H\textsubscript{84}O\textsubscript{23}
Formula: http://www.sigma-aldrich.com/belgium
Properties: M.w. 1101.38; \( \alpha \): Amorphous powd.; very sol. in water; m.p. 222-225 C; \( \beta \): leaflets; pract. insol. in water; m.p. 222-223 C
Toxicology: LD\textsubscript{50} (oral, rat) 833 mg/kg, (IP, rat) 10,150 \mu g/kg, (subcut., rat) 150 mg/kg; poison by ing., subcut., IV, and IP routes; experimental teratogen
Hazardous Decomp. Prods.: Heated to decomp., emits acid smoke and irritating fumes
Uses: In pharmaceuticals
Regulatory: Canada DSL
Manuf./Distrib.: Chemos GmbH
http://www.chemos-group.com
Trade Names Containing: Escarin/\( \beta \)-Sitosterol
Phytosome®

Esdragol. See Estragole
Esdragol oil; Esdragon oil. See Tarragon (Artemisia dracunculus) oil
Essence of niobe. See Ethyl benzoate; Methyl benzoate
### Essence of rose. See Rose oil

**Estragole**

**CAS 140-67-0; EINECS/ELINCS 205-427-8**

- **FEMA 2411**

- **Synonyms:** 4-Allylanisole; p-Allylanisole; 4-Allyl-1-methoxybenzene; Chavicol methyl ether; Chavicyl methyl ether; Esdragon; Isoanethole; p-Methoxyallylbenezene; 1-Methoxy-4-(2-propenyl) benzene; Methyl chavicol

- **Definition:** Main constituent of tarragon oil derived from *Artemisia dracunculus*

- **Empirical:** C_{10}H_{12}O

- **Formula:** C_{6}H_{4}(C_{3}H_{5})(OCH_{3})

- **Properties:** Colorless to sl. yel. liq.; anise odor; sol. in alcohol, chloroform; forms azeotropic mixts. with water; m.w. 148.20; dens. 0.9645 (21/4 C); b.p. 216 C (764 mm); flash pt. 178 F; m.w. 148.20; dens. 0.9645; sol. in alcohol, chloroform; forms azeotropic mixts. with water; m.w. 148.20; dens. 0.9645 (21/4 C); b.p. 216 C (764 mm); flash pt. 178 F; tenacity 4 hrs. on blotter

- **Toxicology:** LD50 (oral, rat) 1820 mg/kg, (IP, rat) 1030 mg/kg; mod. acute toxicity by many routes; primary irritant; skin irritant; questionable carcinogen; mutagen; tumorigen; TSCA listed

- **Precaution:** Combustible

- **Hazardous Decomp. Prods.:** Heated to decomp., emits acrid smoke and irritating fumes

- **Uses:** Synthetic flavor for pharmaceuticals

- **Features:** Sweet, minty flavor

- **Use Level:** < 1%

- **Regulatory:** FDA 21CFR §172.515, 186.60; FEMA GRAS; Australia; Canada DSL; Japan ENCS (no. 3-572); Philippines PICCS

- **N,N’-1,2-Ethanediylbis[N-(carboxymethyl) glycine]. See Edetic acid**

- **N,N’-1,2-Ethandiyilbis (N-(carboxymethyl)) glycine tetrasodium salt. See Tetrasodium EDTA**

- **N,N’-1,2-Ethandiyilbis [N-(carboxymethyl) glycine], trisodium salt. See Trisodium EDTA**

- **N,N’-1,2-Ethandiyilbisoctadecanamide. See Ethylene distearamide**

- **2,2’-[1,2-Ethandiyilbis (oxy)] bisethanol. See Triethylene glycol**

- **Ethanene, hexafluoro-. See Hexafluoroethane**

- **Ethanene-1-hydroxy-1,1-diphosphonic acid. See Etidronic acid**

- **Ethanene-1-hydroxy-1,1-diphosphonic acid, tetrasodium salt. See Tetrasodium etidronate**

- **Ethanenitrile. See Acetonitrile**

- **Ethanene, nitro-. See Nitroethane**
Chemical Component Cross-Reference

Ethaneperoxic acid. See Peracetic acid
Ethanesulfonic acid, 2-amino-. See Taurine
Ethanesulfonic acid, 2-(methylamino)-, N-coco acyl derivs., sodium salts. See Sodium methyl cocoyl taurate
Ethane trichloride. See 1,1,2-Trichloroethane
Ethane, 1,1,1-trichloro-. See 1,1,1-Trichloroethane
Ethane, 1,1,2-trichloro-1,2,2-trifluoro. See Trichlorotrifluoroethane
1,1,1-Ethanetriol diphosphonate. See Ethylenediphosphonic acid
Ethanoic anhydride. See Acetic anhydride
Ethanol. See Alcohol
N-Ethanolacetamide. See Acetamide MEA
Ethanolamine. See Acetamide

Ethanolamine
CAS 141-43-5; EINECS/ELINCS 205-483-3
UN 2491 (DOT)
Synonyms: 2-Aminoethanol; 2-Aminoethyl alcohol; β-Aminoethyl alcohol; β-Ethanolamine; Ethylolamine; Glycolin; 2-Hydroxyethylamine; β-Hydroxyethylamine; MEA; MELA; Monoethanolamine
Classification: Aliphatic amino alcohol; alkanolamine
Empirical: C2H7NO
Formula: NH2CH2CH2OH
Properties: Colorless clear mod. visc. liq.;
ammoniacal odor; misc. with water, alcohol, acetone, glycerin; sol. in chloroform; sl. sol. in benzene; m.w. 61.10; dens. 1.012; vapor pressure 0.26 mm Hg; m.p. 10.5 C; b.p. 170 C; flash pt. 93 C; autoignition temp. 410 C; ref. pressure 0.26 mm Hg; m.p. 10.5 C; b.p. 170 C; flash pt. 93 C; dielec. index 1.4540; pH 12.1; surf. tens. 48.89 dynes/cm; dielec. const. 37.72
Toxicology: ACGIH TLV/TWA 3 ppm; LD50 (oral, rat) 2140 mg/kg, (skin, rat) 1500 mg/kg; poison by IP route; mod. toxic by ingestion, skin contact, subcut., IV routes; corrosive irritant to eyes, skin, mucous membranes; TSCA listed
Environmental: VOC; BOD5 0.85; COD 1.28; ThOD 1.31
Precaution: DOT: Corrosive material; flamm. exposed to heat or flame; powerful reactive base; incompat. with sulfuric acid, HCl, CO2 in air, copper and alloys, aluminum, acrylic acid, nitric acid, etc.
Hazardous Decomp. Prods.: CO, CO2, NOx
NFPA: Health 3, Flammability 2, Reactivity 0

†=pharmaceutical grade

Storage: Hygroscopic; store in cool, dry well-ventilated area away from heat and ignition sources
Uses: Emulsifier for pharmaceuticals
Regulatory: FDA 21CFR §173.315, 175.105, 176.180, 176.210, 176.300, 178.3120; not permitted for use in foods intended for babies and young infants in UK; USP/NF, BP compliance; Canada DSL

</tbody>
</table>
Empirical: C9H10O2

Properties: Red-brn., sweet floral odor and taste; sol. in alcohol; misc. with ether; pract. insol. in water; m.w. 150.18; dens. 1.081 (20/4 C); m.p. 13–16 C; b.p. 255 C; flash pt. 75 C; ref. index 1.559 (20 C)

Toxicology: LD50 (oral, rat) 2100 mg/kg; mod. toxic by ing.; severe skin irritant; TSCA listed

Hazardous Decomp. Prods.: Heated to decomp., emits acrid smoke and irritating fumes

Storage: Air-sensitive; store under nitrogen

Uses: Synthetic flavor for pharmaceuticals

Features: Sweet flavor

Regulatory: FDA 21CFR §172.515; FEMA GRAS; Canada DSL

4-(Ethoxycarbonyl) aniline. See Ethyl-p-aminobenzoate

Ethoxycarbonylethylene. See Ethyl acrylate

Ethyox (35) castor oil. See PEG-35 castor oil

2-Ethoxy-p-cymene. See Carvacryl ethyl ether

Ethoxydiglycol

CAS 111-90-0; EINECS/ELINCS 203-919-7

Synonyms: ’Carbitol’; DEGEE; Diethylene glycol ethyl ether; Diethylene glycol monoethyl ether; Diglycol monoethyl ether; Ethanol, 2-(2-ethoxyethoxy); 2-(2-Ethoxyethoxy) ethanol; Ethyl diethylene glycol; Ethylene diglycol monoethyl ether

Classification: Aliphatic ether alcohol; glycol ether

Empirical: C6H14O3

Formula: CH2OHCH2OCH2CH2OC2H5

Properties: Colorless liq., mild pleasant odor; sol. in water and org. solvs., e.g., acetone, benzene, chloroform, ethanol, ether; m.w. 134.20; dens. 0.990 (20 C); m.p. -76 C; b.p. 195-202 C; flash pt. (OC) 96.1 C; ref. index 1.425 (25 C)

Toxicology: LD50 (oral, rat) 5500 mg/kg, (IP, rat) 6310 mg/kg, (IV, rat) 2200 mg/kg, (skin, rat) 6000 mg/kg; mod. toxic by ing., IP, IV, and other routes; mildly toxic by skin contact; skin and eye irritant; can be absorbed through skin; ing. may cause CNS depression, respiratory depression, sl. kidney injury, thirst, metabolic acidosis and cyanosis; high/repeated exposure may affect kidney; experimental reproductive effects; mutation data; TSCA listed

Environmental: VOC; BOD5 0.58; COD 1.85; ThOD 1.91

Precaution: Combustible liq. and vapor; peroxide former; can react with oxidizers

Hazardous Decomp. Prods.: Heated to decomp., emits acrid smoke and irritating fumes

NFPA: Health 1, Flammability 1, Reactivity 0

Storage: Store in cool, dry, well-ventilated area, out of direct sunlight; very hygroscopic

Uses: Ointment base, solvent, solubilizer, cosurfactant for pharmaceuticals

Regulatory: FDA 21CFR §175.105, 176.180; USP/NF compliance; SARA §313 reportable; HAP; Canada DSL

**Ethyl acetate**  
CAS 141-78-6; EINECS/ELINCS 205-500-4  
UN 1173 (DOT); FEMA 2414
Acetic acid, ethyl ester; Acetic ester; Acetic ether; Acetoxymethane; Ethyl acetic ester; Ethyl ethanoate; Vinegar naphtha

Classification: Sat. aliphatic carboxylic acid ester

Definition: Ester of ethyl alcohol and acetic acid

Empirical: \( \text{C}_4\text{H}_8\text{O}_2 \)

Formula: \( \text{CH}_3\text{COOC}_2\text{H}_5 \)

Properties: Colorless liq., fragrant fruity odor, acetous burning taste; sol. in chloroform, alcohol, ether, acetone, benzene, fixed and volatile oils; sl. sol. in water; m.w. 88.12; dens. 0.902 (20/4 C); bulk dens. 0.8945 g/ml; f.p. -83.6 C; b.p. 77 C; flash pt. -4.4 C; ref. index 1.3723; surf. tens. 24 dynes/cm (20 C)

Toxicology: ACGIH TLV/TWA 400 ppm; LD50 (oral, rat) 5620 mg/kg, (IP, mouse) 709 mg/kg; LC50 (inh., rat, 8 h) 1600 ppm; poison by inh.; mod. toxic by IP and subcut. routes; mildly toxic by ing.; irritant to eyes, skin, mucous membranes; human systemic effects by inh.; mildly narcotic; CNS depressant; can cause dermatitis; high concs. can cause liver/kidney congestion; mutagenic data; TSCA listed

Environmental: VOC; BOD5 1.00; COD 1.69; ThOD 1.82

Precaution: DOT: Flamm. liq.; very dangerous fire hazard exposed to heat or flame; can react vigorously with oxidizers; incompat. with strong oxidizers, strong acids, bases, potassium t-butoxide

Hazardous Decomp. Prods.: Ethanol, acetic acid; heated to decomp., emits acrid smoke and irritating fumes

NFPA: Health 1, Flammability 3, Reactivity 0

Storage: Store in cool, dry, well-ventilated area, out of direct sunlight, away from heat/ignition sources

Uses: Solvent in pharmaceuticals, ophthalmics, orals, topicals; flavor in pharmaceuticals; recovery, crystallization of drugs

Features: Pineapple-like flavor

Regulatory: FDA 21CFR §73.1, 172.560, 172.859, 173.228, 175.320, 177.1200, 182.60, GRAS; 27CFR §21.106; FEMA GRAS; FDA approved for ophthalmics, orals, topicals; USP/NF, BP, EP compliance; Australia AICS; Canada DSL; CERCLA hazardous substance; Japan approved with restrictions

Ethyl acetic ester. See Ethyl acetate

Ethylacetoacetate

CAS 141-97-9; EINECS/ELINCS 205-516-1
UN 1993 (DOT); FEMA 2415
Synonyms: Acetoacetic acid ethyl ester;
Acetoacetic ester; Diacetic ether; Diacetyl ether; EAA; EEA; Ethyl acetaldehyde; Ethyl acetylacetone; Ethyl benzyl acetoacetate;
Etyl 3-oxobutanoate; Ethyl 3-oxobutyrate;
3-Oxobutanoic acid ethyl ester
Classification: Aliphatic organic compd.
Empirical: C₆H₁₂O₃
Formula: CH₃COCH₂COOC₂H₅
Properties: Colorless liq., fruity odor; sol. in ≈ 35 parts water; misc. with oxygenated, chlorinated, and aromatic solvs.; m.w. 130.14;
dens. 1.0213 (25/4 C); m.p. -45 C; b.p. 180.8 C; flash pt. (CC) 184 F; ref. index 1.4180-1.4195
Toxicology: LD50 (oral, rat) 3.98 g/kg; mod. toxic by ing.; mod. irritating to skin, mucous membranes, eyes; TSCA listed
Precaution: DOT: Flamm. liq.; combustible liq. when exposed to heat or flame; can react with oxidizing materials; explosive reactions possible
Hazardous Decomp. Prods.: Heated to decomp., emits acrid smoke and irritating fumes
NFPA: Health 2, Flammability 2, Reactivity 0
Uses: Synthetic flavor for pharmaceuticals; intermediate for vitamins, drugs
Features: Sweet flavor
Regulatory: FDA 21CFR §172.515, 175.300; FEMA GRAS; Japan approved as flavoring; Canada DSL

†=pharmaceutical grade

Ethyl 3-acetylpropionate. See Ethyl levulinate

Ethyl aconitate, mixed esters
CAS 1321-30-8
FEMA 2417
Synonyms: Ethyl-2-carboxyglutaconate; Ethyl 1-propene-1,2,3-tricarboxylate; Mono-ethyl 1-propene-1,2,3-tricarboxylate; 1Ppropene-1,2,3-tricarboxylic acid ethyl ester
Properties: Colorless oily liq., sweet fruity winey odor and flavor; sol. in alcohol; sl. sol. in water; dens. 1.0961; b.p. 260 C; ref. index 1.45771 (14.5 C)
Uses: Synthetic flavor for pharmaceuticals
Features: Sweet fruity wine odor
Regulatory: FDA 21CFR §172.515; FEMA GRAS; Canada DSL
Manuf./Distrib.: Degussa AG/Health & Nutrition

Ethyl acrylate
CAS 140-88-5; EINECS/ELINCS 205-438-8
UN 1917 (DOT); FEMA 2418
Synonyms: Acrylic acid, ethyl ester; Ethoxycarbonylethylene; Ethyl propenoate; Ethyl 2-propenoate; 2-Propenoic acid, ethyl ester
Definition: Esterification of acrylic acid
Empirical: C5H8O2
Formula: CH2:CHCOOC2H5
Properties: Colorless liq., penetrating and persistent odor; sol. in alcohol, ether, oxygenated solvs.; sl. sol. in water; m.w. 100.12; sp.gr. 0.918; m.p. -71 to -75 C; f.p. 60 F; b.p. 99-100 C; ref. index 1.4068
Toxicology: ACGIH TLV/TWA 5 ppm; STEL 15 ppm; LD50 (oral, rat) 800 mg/kg, (IP, rat) 450 mg/kg; LC50 (inh., mouse) 16,200 mg/m3; poison by ing. and inh.; mod. toxic by skin contact and IP routes; skin and eye irritant; human systemic effects by inh.; pulmonary changes; can severely irritate gastrointestinal tract; may cause dyspnea, cyanosis, convulsions; migrates to food from pkg.; delisted as human carcinogen; TSCA listed
Precaution: Flamm. liq.; very dangerous fire hazard exposed to heat/flame; can react vigorously with oxidizers; readily polymerized; violent reaction with chlorosulfonic acid
Hazardous Decomp. Prods.: Heated to decomp., emits acrid smoke and irritating fumes
NFPA: Health 2, Flammability 3, Reactivity 2
Uses: Synthetic flavor for pharmaceuticals
Features: Fruity flavor
Regulatory: FDA 21CFR §172.515, 174.2420, 175.105, 175.300, 175.360, 176.170, 177.1010, 177.1200, 177.1630, 178.3790; FEMA GRAS; SARA reportable; HAP; Canada DSL

Ethyl acrylate/methyl methacrylate copolymer
Uses: Controlled-release permeable film coatings in pharmaceuticals
Trade Names: Eudragit® NE 30 D; Eudragit® NE 40 D
Trade Names Containing: Kollicoat® EMM 30 D

Ethyl alcohol; Ethyl alcohol, undenatured. See Alcohol

Ethyl alcohol. See Acetaldehyde

Ethylaminobenzoate. See Ethyl-p-aminobenzoate

Ethyl 2-aminobenzoate. See Ethyl anthranilate

Ethyl-4-aminobenzoate. See Ethyl-p-aminobenzoate

Ethyl o-aminobenzoate. See Ethyl anthranilate

Ethyl-p-aminobenzoate
CAS 94-09-7; EINECS/ELINCS 202-303-5
Synonyms: 4-Aminobenzoic acid ethyl ester; p-Aminobenzoic acid ethyl ester; Benzocaine; Benzocic acid, 4-aminoc-, ethyl ester; Benzoic acid, p-amino-, ethyl ester; 4-Carboxethoxyaniline; 4-(Ethoxycarbonyl) aniline; Ethylaminobenzoate; Ethyl-4-
aminobenzoate; Ethyl p-aminophenylcarboxylate; Ethyl PABA (INCI)

Classification: Aromatic ester

Definition: Ester of ethyl alcohol and p-aminobenzoic acid

Empirical: C₉H₁₁NO₂

Properties: Cryst. or needles; sol. in oxygenated and chlorinated solvs.; sol. 1 g in 2500 ml water, 5 ml alcohol, 2 ml chloroform, 4 ml ether, 30-50 ml olive oil or almond oil; m.w. 165.19; m.p. 88-90 C; b.p. 183-184 C (14 mm)

Toxicology: LD₅₀ (IP, mouse) 216 mg/kg, (oral, bird) 56 mg/kg; harmful; poison by ing. and IP routes; primary skin irritant; mild sensitizer; human systemic effects by rectal route; may cause contact dermatitis; target organs: blood, nerves; TSCA listed

Hazardous Decomp. Prods.: Heated to decomp., emits highly toxic fumes of NOₓ

Uses: Topical anesthetic; sunscreening agent

Regulatory: Canada DSL

FEMA 2420

Synonyms: p-Anisic acid ethyl ester; Ethyl anisate; Ethyl-4-methoxybenzoate; Ethyl-p-methoxybenzoate

Definition: Obtained by esterification of anisic acid with ethanol in presence of an acid catalyst

Empirical: C₁₀H₁₂O₃

Properties: Colorless liq., fruity anise odor; sol. in alcohol, ether; sl. sol. in water; m.w. 180.21; dens. 1.103; m.p. 7-8 C; b.p. 269-270 C; flash pt. > 100 C; ref. index 1.522-1.526

Toxicology: LD₅₀ (oral, rat) 2040 mg/kg; mod. toxic by ingestion; TSCA listed

Precaution: Combustible liq.

Hazardous Decomp. Prods.: Heated to decomp., emits acrid smoke and irritating fumes

Uses: Synthetic flavor for pharmaceuticals

Features: Fruity flavor

Regulatory: FDA 21CFR §172.515; FEMA GRAS; Canada DSL

Ethyl anthranilate

CAS 87-25-2; EINECS/ELINCS 201-735-1

FEMA 2421

Synonyms: o-Aminobenzoic acid, ethyl ester; Ethyl 2-aminobenzoate; Ethyl o-aminobenzoate

Handbook of Pharmaceutical Additives, Third Edition 1292
**4-Ethylbenzaldehyde**

*Definition:* Obtained by esterification of anthranilic acid with ethanol in presence of acid catalysts

*Empirical:* C₉H₁₁NO₂

*Formula:* NH₂C₆H₄COOC₂H₅

*Properties:* Colorless to amber liq.; fruity odor; sol. in alcohol, propylene glycol, fixed oils; m.w. 165.19; dens. 1.118 (20/4 C); m.p. 13-15 C; b.p. 264-268 C; ref. index 1.564 (20 C)

*Toxicology:* LD₅₀ (oral, rat) 3750 mg/kg; mod. toxic by ing.; skin irritant; TSCA listed

*Precaution:* Combustible liq.

*Hazardous Decomp. Prods.:* Heated to decomp., emits toxic fumes of NOₓ

*Toxicity:* LD₅₀ (oral, rat) 3750 mg/kg; mod. toxic by ing.; skin irritant; TSCA listed

*Uses:* Synthetic flavor for pharmaceuticals

*Features:* Sweet grape-like flavor

*Regulatory:* FDA 21CFR §172.515; FEMA GRAS; Canada DSL

*Manufacturers/Distributors:*
- Bell Flavors & Fragrances [http://www.bellff.com](http://www.bellff.com)

**Ethylbenzene**

*Definition:* See p-Ethylbenzaldehyde

*Synonyms:* EB; Ethylbenzol; Phenylethane

*Classification:* Aromatic hydrocarbon

*Empirical:* C₈H₁₀

*Formula:* C₆H₅C₂H₅

*Properties:* Colorless liq., aromatic odor; sol. in ethanol, ether, toluene; insol. in water; m.w. 106.17; dens. 0.867 (20 C); vapor pressure 10 mm (25.9 C); f.p. -95 C; b.p. 136.187 C; flash pt. (TCC) 15 C; autoignition temp. 432 C; ref. index 1.495 (20 C); surf. tens. 28.48 dynes/cm; KB value 96; dielec. const. 2.042

*Toxicology:* ACGIH TLV/TWA 100 ppm; STEL 125 ppm; LD₅₀ (oral, rat) 3500 mg/kg, (dermal, rabbit) 17,800 mg/kg; mod. toxic by ing., IP route; mildly toxic by inh. and skin contact; eye irritant; inh. of vapor can irritate nose and throat, cause CNS depression, headache, vomiting, nausea; can cause severe lung damage or death if liq. is aspirated into lungs; experimental teratogen; human mutagenic data; TSCA listed

*Environmental:* VOC; BOD₅ 0.92; ThOD 3.17

*Precaution:* Highly flamm.; LEL 1%; UEL 6.7%; dangerous fire risk; incompat. with strong oxidizing agents (can react violently; increased risk of fire and explosion)

*Hazardous Decomp. Prods.:* Heated to decomp., emits acrid smoke and irritating fumes

*NFPA:* Health 2, Flammability 3, Reactivity 0

*Storage:* Store in cool, dry, well-ventilated area of out direct sunlight, away from ignition sources

*Uses:* Reagent

*Regulatory:* SARA §313 reportable; CERCLA hazardous substance; HAP; Canada DSL

*Manufacturers/Distributors:*

| CAS: **97-96-1**; EINECS/ELINCS: **202-623-5**; UN 1178 (DOT); FEMA: **2426** |
| Synonyms: Butanal, 2-ethyl-; Butyraldehyde, 2-ethyl-; Diethyl acetaldehyde; 2-Ethylbutanal; 2-Ethyl-1-butanal; Ethyl butyraldehyde; α-Ethylbutyrinaldehyde; 2-Ethylbutyric aldehyde; α-Ethylbutyric aldehyde; Ethylbenzyl butyrate; Ethyl benzyl butyrate; Ethyl-3-butylacrolein; Ethyl benzyl butyrate; Ethyl-3-butylacrolein |
| Classification: Nonaromatic aldehyde |
| Empirical: **C₆H₁₂O** |
| Formula: (C₂H₅)₂CHCHO |
| Properties: Colorless liq., pungent odor; misc. with alcohol, ether; sl. sol. in water; m.w. 100.16; dens. 0.811; vapor pressure 13.7 mm Hg (20°C); m.p. -89°C; b.p. 117°C; flash pt. (OC) 70°F; ref. index 1.40398 |
| Toxicology: LD₅₀ (oral, rat) 3980 mg/kg, (skin, rabbit) 5990 µl/kg; (skin, rabbit) 5990 µl/kg; mod. toxic by ing.; mildly toxic by inh.; skin and eye irritant; TSCA listed |
| Precaution: Flamm. liq.; dangerous fire risk; can react vigorously with oxidizing materials |
| Hazardous Decomp. Prods.: Heated to decomp., emits acrid smoke and fumes |
| **NFPA:** Health 2, Flammability 3, Reactivity 1 |
α-Ethylbutyraldehyde. See 2-Ethylbutyraldehyde

Ethyl butyrate
CAS 105-54-4; EINECS/ELINCS 203-306-4
UN 1180 (DOT); FEMA 2427
Synonyms: Butanoic acid, ethyl ester; Butyric acid, ethyl ester; Butyric ether; Ethyl butanoate; Ethyl n-butyrate
Classification: Butanoic acid ester
Definition: Obtained by esterification of n-butyric acid with ethyl alcohol in presence of Twitchell's reagent or MgCl₂
Empirical: C₈H₁₆O₂
Formula: CH₃(CH₂)₄COOC₂H₅
Properties: Colorless liq., banana-pineapple odor; sol. in water, fixed oils, propylene glycol; misc. with alcohol, ether; insol. in glycerin @ 121 C; m.w. 116.18; dens. 0.874; m.p. -100.8 C; b.p. 121.6 C; flash pt. (CC) 24 C; ref. index 1.391
Toxicology: LD₅₀ (oral, rat) 13 g/kg; mildly toxic by ing.; skin irritant; TSCA listed
Precaution: Flamm. liq.; can react vigorously with oxidizing materials
Hazardous Decomp. Pros.: Heated to decomp., emits acrid smoke and irritating fumes
NFPA: Health 0, Flammability 3, Reactivity 0
Storage: 12 mos. when stored at 40-70 F in tightly sealed original containers with minimum head space; avoid prolonged exposure to light, heat, air
Uses: Synthetic flavor and fragrance for pharmaceuticals
Features: Banana-, pineapple-like flavor
Regulatory: FDA 21 CFR §182.60, GRAS; FEMA GRAS; Australia AICS; Japan approved as flavoring; Canada DSL
Manufacturers/Distributors:

Ethyl n-butyrate. See Ethyl butyrate

Ethylbutyric acid; 2-Ethylbutyric acid; α-Ethylbutyric acid. See Diethylacetic acid

2-Ethylbutyric aldehyde; α-Ethylbutyric aldehyde. See 2-Ethylbutyraldehyde

Ethyl butyro lactone; γ-Ethylbutyro lactone. See γ-Hexalactone

Ethyl caprate; Ethyl caprinate. See Ethyl decanoate

Ethyl caproate
CAS 123-66-0; EINECS/ELINCS 204-640-3
UN 3272; FEMA 2439
Synonyms: Ethyl butyrate; Ethanol caprate; Ethyl hexanoate; Ethyl hexoate; Ethyl hexylate; Hexanoic acid ethyl ester
Definition: Obtained by esterification of caproic acid with ethyl alcohol in presence of conc. H₂SO₄ or HCl
Empirical: C₈H₁₆O₂
Formula: CH₃(CH₂)₄COOC₂H₅
Properties: Colorless to ylsh. liq.; fruity ester-like, tropical, mild wine odor; sol. in fixed oils, most
Chemical Component Cross-Reference

org. solvs.; sl. sol. in propylene glycol; misc. with alcohol, ether; insol. in water, glycerin; m.w. 144.24; dens. 0.867-0.871; vapor dens. 4.9; b.p. 163; ref. index 1.406-1.409

Toxicology: Skin irritant; TSCA listed
Precaution: Flamm. or combustible liq.; can react with oxidizing materials

Hazardous Decomp. Prods.: Heated to decomp., emits acrid smoke and irritating fumes

NFPA: Health 2, Flammability 2, Reactivity 0

Storage: 12 mos. when stored at 40-70 F in tightly sealed original containers with minimum head space; avoid prolonged exposure to light, heat, air

Uses: Synthetic flavor and fragrance for pharmaceuticals

Features: Apple, banana, pineapple-like flavor

Regulatory: FDA 21CFR §172.515; FEMA GRAS; Japan approved as flavoring; Canada DSL; Australia AICS

### Ethyl cetab

**See** Cetethyldimonium bromide

### Ethyl cinnamate

**CAS** 103-36-6; EINECS/ELINCS 203-104-6

**FEMA** 2430

**Synonyms:** Ethyl-trans-cinnamate; Ethyl phenylacrylate; Ethyl-β-phenylacrylate; Ethyl-3-phenylpropenoate; Ethyl 3-phenyl-2-propenoate; Ethyl (E)-3-phenylprop-2-enolate; 3-Phenyl-2-propenoic acid, ethyl ester; 2-Propenoic acid, 3-phenyl-, ethyl ester

**Definition:** Esters of ethyl alcohol and cinnamic acid; obtained by heating cinnamic acid; alcohol and sulfuric acid to 100°C in presence of aluminum sulfate

**Empirical:** C_{11}H_{12}O_2

**Properties:** Nearly colorless oily liq., faint cinnamon odor; misc. with alcohol, ether, fixed oils; insol. in glycerin, water; m.w. 176.23; dens. 1.049 (20/4°C); m.p. 9°C; b.p. 271°C; flash pt. > 212°F; ref. index 1.558-1.561

**Toxicology:** LD50 (oral, rat) 4000 mg/kg; mod. toxic by ingestion; TSCA listed

**Precaution:** Combustible liq.

**Hazardous Decomp. Prods.:** Heated to decompo., emits acrid smoke and irritating fumes

**Uses:** Synthetic flavor for pharmaceuticals

**Features:** Sweet cinnamon, plum-like flavor

---

### Ethyl-trans-cinnamate

**See** Ethyl cinnamate

### Ethyl citrate

**See** Triethyl citrate

### Ethyl crotonate

**CAS** 623-70-1; 10544-63-5 (trans); EINECS/ELINCS 210-808-7; 234-125-9 (trans)

**UN** 1862 (DOT); FEMA 3486

**Synonyms:** 2-Butenoic acid, ethyl ester; trans-2-Butenoic acid ethyl ester; Crotonic acid, ethyl ester; Ethyl trans-2-butenoate; Ethyl α-crotonate; Ethyl β-methylacrylate

**Definition:** Obtained by esterification of crotonic acid with ethyl alcohol in presence of conc. H₂O₄

**Empirical:** C_6H_{10}O_2

**Formula:** CH₃CH:C=CHCOOC₂H₅

**Properties:** Water-wh. solid or liq., char. pungent persistent odor; sol. in alcohol, ether, oxygenated solvs.; insol. in water; m.w. 114.15; dens. 0.916 (20/4°C); m.p. 45°C; b.p. 126°C (cis), 145°C (trans); flash pt. 2°C; ref. index 1.425 (20°C)

**Toxicology:** LD50 (oral, rat) 3 g/kg; corrosive; sl. toxic by ing.; lachrymator; strong irritant to eyes, skin, respiratory system; TSCA listed

**Precaution:** Highly flamm.; dangerous fire risk; incompat. with oxidizers, acids

**Hazardous Decomp. Prods.:** Heated to decompo., emits acrid smoke and irritating fumes, CO₂
Ethyl α-crotonate. See Ethyl crotonate

Ethyl cyclohexanepropionate
CAS 10094-36-7; EINECS/ELINCS 233-222-3
FEMA 2431
Synonyms: Cyclohexane ethyl propionate; Ethyl 3-cyclohexylpropionate; Ethyl cyclohexylpropionate; Hexahydro phenylethylpropionate
Definition: Obtained by esterification of ethyl cyclohexanol with propionic acid or anhydride
Empirical: C11H20O2
Properties: Colorless oily liq., fruity sweet pineapple-like odor; sol. in alcohol; insol. in water; m.w. 184.28; dens. 0.940; b.p. 216 F; ref. index 1.425 (20 C)
Uses: Synthetic flavor for pharmaceuticals
Features: Grape, pear-like flavor
Regulatory: FDA 21CFR §172.515; FEMA GRAS; Canada DSL; Australia AICS

Ethyl cyclohexylpropionate; Ethyl cyclohexanepropionate. See Ethyl cyclohexanepropionate

Ethyl decanoate
CAS 110-38-3; EINECS/ELINCS 203-761-9
FEMA 2432
Synonyms: Capric acid ethyl ester; Decanoic acid ethyl ester; Ethyl caprate; Ethyl caprinate; Ethyl decylate
Definition: Obtained by esterification of decanoic acid and ethyl alcohol in presence of HCl or H2SO4
Empirical: C12H24O2
Formula: CH3(CH2)10COOC2H5
Properties: Colorless liq.; fragrant, green grassy, fruity ester-like odor; sol. in fixed oils; misc. with alcohol, chloroform, ether; insol. in water, glycerin, propylene glycol; m.w. 200.32; dens. 0.862 (20 C); m.p. -20 C; b.p. 243-245 C; flash pt. 216 F; ref. index 1.425 (20 C)
Toxicology: Skin irritant; TSCA listed
Precaution: Combustible liq.; reacts with oxidizing materials
Hazardous Decomp. Prods.: Heated to decomp., emits acrid smoke and irritating fumes
NFPA: Health 0, Flammability 1, Reactivity 0
Storage: 6 mos. when stored at 40-70 F in tightly sealed original containers with minimum head space; avoid prolonged exposure to light, heat, air
Uses: Synthetic flavor for pharmaceuticals
Features: Grape, pear-like flavor
Regulatory: FDA 21CFR §172.515; FEMA GRAS; Japan approved as flavoring; Canada DSL; Australia AICS

†=pharmaceutical grade

Chemical Component Cross-Reference

**tiglate**
N-Ethyl-N,N-dimethyl-1-hexadecanaminium bromide. See Cetethyldimonium bromide
N-Ethyl-N,N-dimethyl-3-[(1-oxircinoleyl) amino]-1-propanaminium ethosulfate. See Ricinoleamidopropyl ethyldimonium ethosulfate
2-Ethyl-3,5-dimethylpyrazine. See 2-Ethyl-3,5(6)-dimethylpyrazine

2-Ethyl-3,5(6)-dimethyl pyrazine

- IL: Colorless to sl. yel. liq.; pungent, nutty, roasted cocoa odor; sol. in alcohol, most org. solvs.; insol. in water; m.w. 270.37; dens. 1.05; b.p. 332 C; flash pt. > 100 C; ref. index 1.4690-1.4730; tenacity 1 wk. on blotter
- Inh.: Harmful by ing., inh.; skin, eye, respiratory system irritant
- Environ.: Do not contaminate sewers, water sources
- Precaution: Combustible liq.; wear protective gloves, splash-proof eye goggles; incompat. with strong oxidizers, acids
- Decomp.: CO, CO₂; heated to decomp., emits toxic fumes of NOx
- Storage: Keep in original, tightly closed container; keep away from heat, sparks, open flame
- Uses: Synthetic flavor for pharmaceuticals
- Features: Chocolate flavor
- Regulatory: FEMA GRAS; Canada DSL
- 2-Ethyl-3(5/6)-dimethyl pyrazine. See 2-Ethyl-3,5(6)-dimethylpyrazine

**Ethyl dodecanoate; Ethyl dodecylate. See Ethyl laurate**

**Ethyl enanthate. See Ethyl heptanoate**

**Ethylene/acrylic acid copolymer**
CAS 9010-77-9
Synonyms: EAA; Poly (ethylene-co-acrylic acid); 2-Propenoic acid with ethene; 2-Propenoic acid, polymer with ethene
Definition: Copolymer of ethylene and acrylic acid monomers
Formula: \((\text{C}_2\text{H}_4\text{CH}_2\text{CH}(_2)\text{CO}_2\text{H})_y\)
Properties: Solid; dens. 0.960
Toxicology: Irritant; TSCA listed
Uses: Emollient, gellant, film-former for pharmaceuticals
Regulatory: FDA 21CFR §176.170, 177.1310, 178.1005; Canada DSL
Manuf./Distrib.: Aldrich http://www.sigma-aldrich.com
Trade Names: A-C® 540; A-C® 5120

**Ethylene alcohol. See Ethylene glycol**

**Ethylene aldehyde. See Acrolein**

**Ethylenebis (iminodiacetic acid) tetrasodium salt. See Tetrasodium EDTA**

**Ethylene bis (stearamide); N,N’-Ethylene bisstearamide; Ethylenebisstearoamide; Ethylenebis (stearylamine). See Ethylene distearamide**

**Ethylene brassylate**
CAS 105-95-3; EINECS/ELINCS 203-347-8
FEMA 3543
Synonyms: Cyclo-1,13-ethylenedioxytridecan-1,13-dione; Cyclo-1,13-ethylenedioxytridecan-1,13-dione, 1,4-Dioxacycloheptadecane-5,17-dione; Ethyl brassylate; Ethylene glycol brassylate; Ethylene glycol brassylate cyclic diester; Ethylene undecane dicarboxylate; Muss T; Tridecanedioic acid cyclic ethylene glycol diester; 1,13-Tridecanedioic acid, 1,2-ethanediol ester; 1,13-Tridecanedioic acid ethylene ester; Tridecanoic acid, cyclic ethylene ester; 1,1’-Undecanedicarboxylic acid ester with ethylene glycol
Classification: Cyclic ester; macrocyclic musk
Definition: Obtained by esterification of brassyllic acid
Empirical: \(\text{C}_{15}\text{H}_{26}\text{O}_4\)
Properties: Wh. to lt. yel. liq., sweet musk-like odor; sol. in alcohol, most org. solvs.; insol. in water; m.w. 270.37; dens. 1.05; b.p. 332 C; flash pt. > 100 C; ref. index 1.4690-1.4730; tenacity 1 wk. on blotter
Ethylene carbonate
CAS 96-49-1; EINECS/ELINCS 202-510-0
Synonyms: Carbonic acid, cyclic ethylene ester; 1,3-Carboxyldioxethane; Cyclic ethylene carbonate; 1,3-Dioxolan-2-one; Dioxolone-2; 1,2-Ethanediol carbonate; Ethylene carbonate acid; Ethylene glycol carbonate; Ethylene glycol cyclic carbonate; Glycol carbonate
Classification: Carbonic acid ester
Empirical: C3H4O3
Formula: (CH2O)2CO
Properties: Colorless solid (below 36.4 °C) or liq., odorless; very sol. in water; sol. in ether, n-butanol, CCl4; misc. with alcohol, ethyl acetate, benzene, chloroform; m.w. 88.07; dens. 1.3218 (39/4 °C); vapor pressure 0.01 mm Hg (20 °C); m.p. 36.4 °C; b.p. 248 °C; flash pt. (OC) 143 °C; ref. index 1.4158 (50 °C)
Toxicology: LD50 (oral, rat) 10 g/kg; LDLo (IP, mouse) 500 mg/kg; moderately toxic by IP route; mildly toxic by ing.; skin and eye irritant; TSCA listed
Environmental: Biodeg.
Precaution: Combustible exposed to heat or flame; incompat. with strong oxidizing

Ethylene chloride. See Ethylene dichloride

Ethylene, chloro-, polymer. See Polyvinyl chloride

Ethylenediamine
CAS 107-15-3 (anhdy.); 6780-13-8 (monohydrate); EINECS/ELINCS 203-468-6
UN 1604 (DOT)
Synonyms: 1,2-Diaminoethane; Dimethylenediamine; EDA; 1,2-Ethanediamine
Classification: Aliphatic organic compd.; aliphatic polyamine
Empirical: C2H8N2
Formula: NH2CH2CH2NH2
Properties: Colorless to sl. yel. clear volatile liq., ammonia-like odor; sol. in acetone, ethanol, dimethylsulfoxide, benzene, water; sl. sol. in diethyl ether, heptane; misc. with water, alcohol, oxygenated and aromatic solvs.; m.w. 60.12; dens. 0.8994 (20/4 °C); m.p. 8.5 °C; b.p. 117.2 °C; flash pt. (CC) 42 °C; ref. index 1.4565
Toxicology: TLV/TWA 10 ppm; LD50 (oral, rat) 500 mg/kg; human irritant poison by inh.; mod. toxic by ingestion, skin contact; corrosive; severe skin and eye irritant; lachrymator; allergen, sensitizer; mutagenic data; TSCA listed
Precaution: DOT: Corrosive material; flamm. exposed to heat, flame, oxidizers; can react...
violently with acetic acid, acetic anhydride,
acrylic acid, epichlorohydrin, many others;
absorbs CO₂ from air to form the carbamate salt

Hazardous Decomp. Prods.: CO, CO₂,
hydrogen cyanide, volatile amines; heated
to decomp., emits toxic fumes of NOₓ and
NH₃

NFPA: Health 3, Flammability 2, Reactivity 0
Storage: Hygroscopic; air-sensitive
Uses: Stabilizer, buffer in pharmaceuticals,
intravenous drugs, injectables, orals,
rectals, topicals, aminophylline
formulations, antihistamines, topical
steroids, topical creams incl. Mycolog
cream

Regulatory: FDA 21CFR §173.320 (1 ppm
max.), 175.105, 175.300, 175.320, 176.180,
176.300, 178.1010, 178.3120, 181.30,
556.270; FDA approved for IV, injectables,
orals, rectals, topicals; BP, EP, JP compliance;
Canada DSL

2,2′-Ethenediethyoxyl; 2,2′-Ethenediethanol. See Triethylene glycol

Ethylene distearamide

CAS 110-30-5; 68955-45-3; EINECS/ELINCS 203-755-6; 273-277-0

Synonyms: 1,2-Bis (octadecanamido) ethane; 1,2-Bis (stearoylamino) ethane; N,N-Bis(stearoylethylendiamine); N,N′-Distearylethylendiamine; N,N′-1,2-Ethenediybisoctadecanamide; Ethylene bis(stearamide); N,N′-Ethylene bistearamide; Ethylenebisstearamamide; Ethylenebis(stearylamide); Ethylenediamine bistearamide; Ethylenediamine stearidamide; N,N′-Ethylendistearamide; N,N′-Ethylene distearlamid; Octadecanamide, N,N′-1,2-ethanediylbis-; Octadecanamide, N,N′-ethylenebis-; Stearic acid, ethylenediamine diamide

Classification: Diamide

Empirical: C_{38}H_{76}N_{2}O_{2}

Formula:

\[ \text{C}_{38}\text{H}_{76}\text{N}_{2}\text{O}_{2} \]

Properties: Solid; insol. in water; m.w. 593.04; bulk dens. 0.6 g/ml; m.p. 143 C; flash pt. (COC) 290 C; nonionic

Toxicology: TSCA listed

Uses: Carrier for hormonal veterinary prods.
Chemical Component Cross-Reference

Environmental: VOC; BOD5 0.47; COD 1.29; ThOD 1.29
Precaution: Combustible; incompat. with strong oxidizing agents, perchloric acid, strong bases, phosphorus (V) sulfide, strong acids, silvered copper wires carrying dc current; mod. explosion hazard; violent reactions possible
Hazardous Decomp. Prods.: Heated to decomp., emits acrid smoke and irritating fumes
NFPA: Health 1, Flammability 1, Reactivity 0
Storage: Very hygroscopic; store in cool, dry, well-ventilated area
Uses: Solvent in pharmaceuticals, topicals, ear drops
Regulatory: FDA 21CFR §175.105, 176.300; FDA approved for topicals; SARA §313 reportable; HAP; Canada DSL

Ethylene glycol dilaurate. See Glycol dilaurate

Ethylene glycol dimethyl ether
CAS 110-71-4; EINECS/ELINCS 203-794-9
UN 2252 (DOT)

Synonyms: Dimethoxyethane; 1,2-Dimethoxyethane; α,β-Dimethoxyethane;
Dimethylglycol; 2,5-Dioxahexane; DME; EGDME; Ethylene dimethyl ether; Glycol dimethyl ether; Glyme; Monoethylene glycol dimethyl ether; Monoglyme

Empirical: C₄H₁₀O₂
Formula: CH₃OCH₂CH₂OCH₃
Chemical Component Cross-Reference

Properties: Water-wh. liq., sharp ethereal odor; sol. in hydrocarbons, most org. solvs.; misc. with water, alcohol; m.w. 90.12; dens. 0.86285 (20/4 C); m.p. -58 C; b.p. 82-83 (760 mm); flash pt. 4.5 C; ref. index 1.3813 (20 C)

Toxicology: Experimental reproductive effects; possible teratogen; target organs: liver, kidneys; TSCA listed

Precaution: DOT: Flamm. liq.; very dangerous fire hazard exposed to heat, flames, oxidizers; readily forms explosive peroxides; mixt. with lithium tetrahydroaluminate may ignite or explode if heated

Hazardous Decomp. Prods.: Heated to decomp., emits acrid smoke and fumes

NFPA: Health 2, Flammability 2, Reactivity 0

Storage: Store under nitrogen

Uses: Solvent, vehicle in pharmaceuticals

Regulatory: Canada DSL

Trade Names: Monoglyme

Ethylene glycol distearate. See Glycol distearate

Ethylene glycol ethylene ether. See 1,4-Dioxane

Ethylene glycol ethyl ether. See Ethoxyethanol

Ethylene glycol methyl ether. See Methoxyethanol

Ethylene glycol monocetyl ether. See Ceteth

Ethylene glycol monoethyl ether. See Ethoxyethanol

Ethylene glycol monohydroxystearate. See Glycol hydroxystearate

Ethylene glycol monomethyl ether. See Methoxyethanol

Ethylene glycol monophenyl ether. See Phenoxyethanol

Ethylene glycol monostearate. See Glycol stearate

Ethylene glycol monostearate SE. See Glycol stearate SE

Ethylene glycol nonyl phenyl ether. See Nonoxynol-1

Ethylene glycol octyl phenyl ether. See Octoxynol-1

Ethylene glycol/propylene glycol block copolymer. See EO/PO block polymer or copolymer

Ethylene glycol stearate. See Glycol stearate

Ethylene homopolymer; Ethylene latex. See Polyethylene

Ethylene/MA copolymer

CAS 9006-26-2

Synonyms: EMA; Ethylene/maleic anhydride copolymer; 2,5-Furandione, polymer with ethene; Maleic anhydride/polyethylene copolymer

Definition: Polymer of ethylene and maleic anhydride monomers

Formula: \([\text{CH}_2\text{CH}_2]_x[\text{CHC}O\text{OCH}_2\text{COOH}]_y\)

Properties: Fine powd.; water-sol.

Precaution: Reacts readily with alcohols and amines

Uses: Film-former producing water-sol. films for pharmaceutical capsules

Regulatory: FDA 21CFR §175.105, 177.1210, 177.1520; Canada DSL

Ethylene/maleic anhydride copolymer. See Ethylene/MA copolymer

Ethylene/methacrylic acid copolymer

CAS 25053-53-6

Synonyms: EMAA; Poly (ethylene-co-methacrylic acid)

Classification: Acrylic polymer

Formula: \((\text{CH}_2\text{CH}_2)_x[\text{CHC}(\text{CH}_3)(\text{CO}_2\text{H})]_y\)

Properties: Pellets; dens. 0.970; m.p. 76-83 C; tens. str. 21.4-25 MPa

Toxicology: May be harmful by inh., ing., or skin absorption; may cause eye/skin irritation; TSCA listed

Precaution: Incompat. with strong oxidizing agents

Hazardous Decomp. Prods.: Toxic fumes of CO, CO₂, acids, aldehydes, alcohols; emits toxic fumes under fire conditions

Storage: Store in cool, dry place; keep tightly closed

Uses: Medical/pharmaceutical packaging
Chemical Component Cross-Reference

Regulatory: Canada DSL
Manuf./Distrib.: Aldrich http://www.sigma-aldrich.com
Trade Names: Nucrel® 1202HC

Ethylene oxide monochloride. See Vinyl chloride

Ethylene oxide
CAS 75-21-8; EINECS/ELINCS 200-849-9
UN 1040 (DOT); FEMA 2433
Synonyms: Dihydrooxirene; Dimethylene oxide; EO; Epoxyethane; 1,2-Epoxyethane; Ethene oxide; ETO; Oxacyclopropane; Oxane; Oxidoethane; α,β-Oxidoethane; Oxirane
Classification: Ether
Empirical: C2H4O
Properties: Colorless gas or liq.; ether-like odor; very sol. in ether; sol. in org. solvs.; misc. with water, alcohol, oxygenated solvs.; m.w. 44.06; dens. 0.8711 (20/20 C); vapor pressure 1310 mm Hg; m.p. -111.3 C; b.p. 10.73 C; flash pt. -29 C; ref. index 1.359; dielec. const. 13.0
Toxicology: ACGIH TLV/TWA 1 ppm; LD50 (oral, rat) 72 mg/kg; poison by ing., IP, subcut., IV routes; mod. toxic by inh.; irritating to eyes, skin, respiratory tract; human systemic effects by inh. (convulsions, nausea, vomiting, pulmonary changes); suspected human carcinogen; experimental tumorigen, neoplasticigen, teratogen; mutagenic data; TSCA listed
Environmental: VOC; BOD5 0.06; COD 1.74; ThOD 1.82
Precaution: Flamm.; LEL 3%; UEL 100%; severe explosion hazard exposed to flame; violent polymerization on contact with ammonia, alkali hydroxides, amines, acids, etc.
Hazardous Decomp. Prods.: Heated to decomp., emits acrid smoke and irritating fumes
Uses: Sterilant; in ophthalmics, topicals
Regulatory: FDA 21CFR §172.710, 172.808, 175.105, 176.180, 176.210, 177.2470, 178.3520; FEMA GRAS; FDA approved for ophthalmics, topicals; Canada DSL; SARA §302a extremely hazardous, §313 reportable; CERCLA hazardous substance; Calif. Prop. 65 reportable; HAP

Ethylene polymer; Ethylene polymers
Ethylene resin. See Polyethylene

Ethylenesuccinic acid. See Succinic acid

Ethylene terephthalate polymer. See Polyethylene terephthalate

Ethylene thioglycol. See 2-Mercaptoethanol
Ethylene trichloride. See Trichloroethylene
Ethylene undecane dicarboxylate. See Ethylene brassylate

Ethylene/VA copolymer
CAS 24937-78-8
Synonyms: Acetic acid, ethenyl ester, polymer with ethene; Ethylene vinyl acetate; Ethylene/vinyl acetate copolymer; EVA; EVA copolymer; EVM; Poly (ethylene-co-vinyl acetate); VAE; VA/ethylene copolymer; Vinyl acetate/ethylene copolymer
Classification: Elastomer
Definition: Thermoplastic copolymer of ethylene and vinyl acetate monomers
Formula: (CH2CH2)x[CH2CH(O2CCH3)]y
Properties: Dens. 0.930; m.p. 99 C
Toxicology: Suspected cancer agent, mutagen
Uses: Coating binder and saturant for medical/surgical applics.; film-former; in ophthalmics, otics, topicals, slow-release and microencapsulation prods.
Regulatory: FDA 21CFR §175.300, 177.1200, 177.1210, 177.1350, 178.1005; FDA approved for ophthalmics, otics; Canada DSL
Ethylene vinyl acetate; Ethylene/vinyl acetate copolymer. See Ethylene/VA copolymer
Ethyl-α,β-epoxyhydrocinnamate. See Ethyl phenylglycidate
Ethyl α,β-epoxy-β-methylhydrocinnamate; Ethyl 2,3-epoxy-3-methyl-3-phenylpropionate. See Ethyl methylphenylglycidate
Ethyl-α,β-epoxy-α-phenylpropionate. See Ethyl phenylglycidate
N-Ethylethanamine. See Diethylamine
Ethyl ethanoate. See Ethyl acetate
Ethyl ether
CAS 60-29-7; EINECS/ELINCS 200-467-2
UN 1155 (DOT)
Synonyms: Anesthetic ether; Diethyl ether; Diethyl oxide; Ether; Ethoxyethane; Ethyl oxide; 1,1′-Oxybisethane; Oxybis-1,1′-ethane; Solvent ether; Sulfuric ether
Classification: Sat. aliphatic ether
Empirical: C₄H₁₀O
Formula: CH₃CH₂OCH₂CH₃
Properties: Colorless clear volatile liq., sweet pungent odor; sol. in chloroform, benzene, conc. HCl; sol. 85 g/l water (15 C); misc. with alcohol, ether, most org. solvs.; m.w. 74.12; sp.gr. 0.7135 (20/4 C); vapor pressure 537 mm Hg; m.p. -116.2 C; b.p. 34.6 C; flash pt. (CC) - 45 C; autoignition temp. 160 C; surf. tens. 16.5 dynes/cm; dielec. const. 4.197
Toxicology: ACGIH TLV/TWA 400 ppm; STEL 500 ppm; LD₅₀ (oral, rat) 1215 mg/kg, (IP, mouse) 2420 mg/kg, (IV, mouse) 996 mg/kg; poison by subcut. route; mod. toxic by ing., IP, IV routes; mildly toxic by inh.; mod. toxic to humans by ing.; human systemic effects by inh.; CNS depressant; anesthetic; mod. to severe skin and eye irritant; extreme exposure may cause respiratory failure and death; mutagenic data; TSCA listed
Environmental: VOC; BOD₂₀ 0.50; ThOD 2.59
Precaution: DOT: Flamm. liq.; LEL 1.9%; UEL 36%; severe fire and explosion hazard when exposed to heat or flame; forms explosive peroxides; incompat. with sulfur compds., halogens, interhalogens, strong oxidizers; violent or explosive reactions possible
Hazardous Decomp. Prods.: Can form peroxides on prolonged exposure to air and light, in absence of inhibitors; heated to decomps., emits acrid smoke and irritating fumes
NFPA: Health 2, Flammability 4, Reactivity 1
Storage: Store in cool, dry, well-ventilated area, out of direct sunlight; hygroscopic
Uses: Solvent, antiseptic in pharms., transmucosal pharms.; anesthetic; analgesic; expectorant
Regulatory: FDA approved for transmucosal pharmaceuticals; CERCLA hazardous substance; Canada DSL

Ethylethylacetaldehyde. See 2-
Chemical Component Cross-Reference

Ethylbutyraldehyde
N-Ethyl-N-[4-[4-[(ethyl [(3-sulfophenyl)methyl] amino] phenyl] (2-sulfophenyl)methylene]-2,5-cyclohexadien-1-ylidene]-3-sulfobenzzenemethanaminium, hydroxide, inner salt, aluminum salt. See FD&C Blue No. 1 Aluminum Lake

N-Ethyl-N-[4-[4-[(ethyl [(3-sulfophenyl)methyl] amino] phenyl] (2-sulfophenyl)methylene]-2,5-cyclohexadien-1-ylidene]-3-sulfobenzzenemethanaminium hydroxide inner salt, disodium salt. See FD&C Blue No. 1; Acid blue 9

Ethyl ethynyl methyl carbinol. See Methyl penty nol

Ethyl formate
CAS 109-94-4; EINECS/ELINCS 203-721-0
UN 1190 (DOT); FEMA 2434
Synonyms: Ethyl formic ester; Ethyl methanoate; Formic acid ethyl ester; Formic ether
Classification: Aliphatic organic compd.; carboxylic acid ester
Definition: Ester of ethyl alcohol and formic acid
Empirical: C₃H₆O₂
Formula: HCOOC₂H₅
Properties: Colorless liq., sharp rum-like odor; very sol. in water; sol. in acetone, alcohol, benzene, ether, fixed oils, propylene glycol; sl. sol. in min. oil; m.w. 74.09; sp.gr. 0.9236 (20/20 C); vapor pressure 100 mm Hg (5.4 C); m.p. -79 C; b.p. 54 C; flash pt. (CC) -20 C; ref. index 1.359
Toxicology: ACGIH TLV/TWA 100 ppm; LD₅₀ (oral, rat) 1850 mg/kg, (skin, rabbit) 20 g/kg; mod. toxic by ing., subcut. routes; mildly toxic by skin contact and inh.; skin and eye irritant; vapor can irritate nose, throat, lungs; high concs. may cause CNS depression, unconsciousness; severe exposure may cause potentially fatal pulmonary edema; experimental tumorigen; TSCA listed
Precaution: DOT: Flamm. liq.; dangerous fire and explosion hazard exposed to heat, flame, oxidizers; incompat. with oxidizing materials, acids (decomp. can occur), bases (vigorous decomp. can occur), moisture
Hazardous Decomp. Prods.: Ethanol, formic acid; dec. slowly in water, releasing formic acid; heated to decomp., emits acrid smoke and irritating fumes

†=pharmaceutical grade

NFPA: Health 2, Flammability 3, Reactivity 0
Storage: Store in cool, dry, well-ventilated area, out of direct sunlight; ground drums and bond transfer containers
Uses: Solvent for pharmaceuticals; pharmaceutical intermediate; synthetic flavor and adjuvant in pharmaceuticals
Features: Fruity flavor
Regulatory: FDA 21CFR §184.1295, GRAS; 193.210, insecticide residue tolerance of 250 ppm in raisins and currants; FEMA GRAS; Canada DSL

Ethylformic acid. See Propionic acid
Ethyl formic ester. See Ethyl formate

2-Ethylfuran
CAS 3208-16-0; EINECS/ELINCS 221-714-0
UN 1993; FEMA 3673
Definition: Obtained by dehydration of furyl methyl carbinol followed by reduction
Empirical: C₆H₈O
Chemical Component Cross-Reference

**Ethyl-2-furanpropionate**

**CAS**: 10031-90-0; EINECS/ELINCS 233-097-5
FEMA 2435

**Synonyms**: Emanol; Ethyl furfuralacetate; Ethyl-3-(2-furyl)-propanoate; Ethyl furylpropanoate; 2-Furan propanoic acid ethyl ester

**Empirical**: C9H12O3

**Properties**: Pale yel to cl. liq. solid; turns yel. on exposure to air; fruity odor; m.w. 168.19; m.p. 24.5 C; b.p. 234-236 C; flash pt. 226 F; ref. index 1.524-1.534

**Toxicology**: Eye, skin, respiratory system irritant

**Precaution**: Flamm. liq.; wear safety glasses, lab coat, and impervious gloves; avoid ignition sources and oxidizing agents

**Hazardous Decomp. Prods.**: Heated to decomp., emits acrid smoke and irritating vapors, COx

**HMIS**: Health 1, Flammability 1, Reactivity 1

**Storage**: Store in a tightly sealed container in a cool, dry place

**Uses**: Synthetic flavor for pharmaceuticals

**Features**: Sweet fruity pineapple balsam odor; pineapple, fruity, sweet slightly spicy, tropical, ripe and slightly jammy taste

**Regulatory**: FDA 21CFR §172.515; FEMA GRAS; Canada DSL

**Manuf./Distrib.**: SAFC Specialties
http://www.safcspecialties.com

**Ethyl glycol**

See Ethoxyethanol

**Ethyl gallate**

**CAS**: 831-61-8; EINECS/ELINCS 212-608-5

**Synonyms**: Benzoic acid, 3,4,5-trihydroxy-, ethyl ester; Ethyl 3,4,5-trihydroxybenzoate; Gallic acid ethyl ester

**Empirical**: C9H10O5

**Properties**: Powd.; sl. sol. in water; m.w. 198.19; m.p. 149-153 C

**Toxicology**: LD50 (oral, mouse) 5810 mg/kg; mildly toxic by ing.; TSCA listed

**Precaution**: Wear safety glasses, lab coat, and impervious gloves; avoid ignition sources and oxidizing agents

**Hazardous Decomp. Prods.**: Heated to decomp., emits acrid smoke and irritating vapors, COx

**HMIS**: Health 1, Flammability 1, Reactivity 1

**Storage**: Keep away from heat, sparks, open flame

**Uses**: Antioxidant for preventing oxidative rancidity in pharmaceuticals

**Features**: Effective at low concs.

**Regulatory**: BP compliance

**Manuf./Distrib.**: Alfa Aesar
http://www.alfa.com

**4-Ethylguaiacol**

**CAS**: 2785-89-9; EINECS/ELINCS 220-500-4
FEMA 2436

**Synonyms**: 4-Ethyl-2-methoxyphenol; Homocreosol; 1-Hydroxy-2-methoxy-4-ethylbenzene; 2-Methoxy-2-ethylphenol

**Classification**: aromatic alcohol

**Empirical**: C9H12O2

**Properties**: Oily liq., smoky bacon-like odor; insol. in water; sol. in most org. solvs.; m.w. 152.19; dens. 1.063; vapor 5.2; m.p. 15 C; b.p. 234-236 C; flash pt. 226 F; ref. index 1.524-1.534

**Toxicology**: Eye, skin, respiratory system irritant; harmful by ing.; TSCA listed

**Storage**: Keep away from heat, sparks, open flame; keep in tightly closed container

**Uses**: Synthetic flavor for pharmaceuticals

**Regulatory**: FDA 21CFR §172.515; FEMA GRAS; Canada DSL

**Manuf./Distrib.**: Advanced BioTech
http://www.adv-bio.com; Advanced Synthesis Tech.
http://www.advancedsynthesis.com; Oxford Chems. Ltd

**SAFC Specialties**
Ethyl decanoate. See Ethyl undecanoate
Ethyl 10-hdecenoate. See Ethyl 10-undecenoate

Ethyl heptanoate
CAS 106-30-9; EINECS/ELINCS 203-382-9
FEMA 2437
Synonyms: Cognac oil; Cognac oil, synthetic; Enanthyl ether; Ethyl enanthate; Ethyl n-heptanoate; Ethyl heptanoate; Ethyl n-heptate; Ethyl heptylate; Ethyl oenanthate; Ethyl oenanthylate; Heptanoic acid ethyl ester; Oenanthic ether; Oil of grapes
Properties: Colorless oily liq., fruity wine-like odor and taste with burning aftertaste; sol. in oxygenated solvs.; misc. with alcohol, ether, chloroform; insol. in water; m.w. 146.26; dens. 0.868 (20/4 C); m.p. -66.3 C; b.p. 186-188 C; flash pt. 74 C; ref. index 1.413 (20 C)
Toxicology: LD50 (oral, rat) > 34,640 mg/kg, (skin, rabbit) > 5 g/kg; low toxicity by ingestion and skin contact; TSCA listed
Precaution: Combustible liq.
Hazardous Decomp. Prods.: Heated to decompo. emits acrid smoke and irritating fumes
Storage: Store at 40-70 F in tightly sealed original containers with minimum head space; avoid prolonged exposure to light, heat, air
Uses: Synthetic flavor for pharmaceuticals
Features: Berry, melon, peach, pineapple, plum-like flavor
Regulatory: FDA 21CFR §172.515; FEMA GRAS; Japan approved as flavoring; Canada DSL; Australia AICS

Ethyl n-heptanoate. See Ethyl heptanoate

2-Ethyl-2-heptenal
CAS 10031-88-6
FEMA 2438
Synonyms: 2-Ethyl-3-butylacrolein; α-Ethyl-β-butyl acrolein; 2-Ethyl hept-2-enal
Empirical: C9H14O
Properties: Colorless, cl. liq.; sol. in alcohol; insol. in water; m.w. 140.23
Uses: Synthetic flavor for pharmaceuticals
Regulatory: FDA 21CFR §172.515; FEMA GRAS; Canada DSL
Manuf./Distrib.: Degussa AG/Health & Nutrition

2-Ethyl hept-2-enal. See 2-Ethyl-2-heptenal
Ethyl heptate; Ethyl n-heptate; Ethyl heptylate. See Ethyl heptanoate
Ethyl heptyl ketone. See 3-Decanone
Ethyl hexadecanoate. See Ethyl palmitate
Ethylhexadecyldimethylammonium bromide. See Cetethyldimonium bromide
Ethyl-2,4-hexadienoate. See Ethyl sorbate

Ethyl hexanediol
CAS 94-96-2; EINECS/ELINCS 202-377-9
Synonyms: Ethohexadiol; 2-Ethylhexanediol; 2-Ethyl-1,3-hexanediol; 2-Ethylhexane-1,3-diol; 2-Ethylhexanediol-1,3; Ethyl hexylene glycol; 2-Ethyl-3-propyl-1,3-propanediol; 3-Hydroxymethyl-n-heptan-4-ol; Hydroxymethyl-n-heptan-4-ol; 1,3-Octanediol; Octylene glycol; 1,3-Octylene glycol
Classification: Aliphatic alcohol
Empirical: C8H16O2
Formula: CH3CH2CH2CHOHCH2CH3CH2OH
Properties: Colorless, sl. visc. liq., odorless; sol. in alcohol, ether, acetone, toluene, benzene, CCl4; partly sol. in water; m.w. 146.26; dens. 0.9422 (20/20 C); bulk dens. 7.8 lb/gal (20 C); vapor pressure < 0.01 mm Hg (20 C); f.p. -40 C; b.p. 244 C; flash pt. 126 C; autoignition temp. 225 C; ref. index 1.4465-1.4515
Chemical Component Cross-Reference

**Toxicology:** LD₅₀ (oral, rat) 1400 mg/kg, (skin rabbit) 2000 mg/kg; moderately toxic by ingestion and skin contact; skin and severe eye irritating; TSCA listed

**Precaution:** Combustible exposed to heat or flame; can react with oxidizers

**Hazardous Decomp. Prods.:** Heated to decomp., emits acrid smoke and irritating fumes

**NFPA:** Health 2, Flammability 1, Reactivity 0

**Uses:** Solvent for pharmaceuticals, topical ointments; medicine

**Regulatory:** FDA approved for topicals; Canada DSL

CAS 77-83-8; EINECS/ELINCS 201-061-8
FEMA 2444

Synonyms: Aldehyde C-16; Aldehyde C-16 pure; C-16 aldehyde; EMPG: α-β-Epoxy-β-methylhydrocinnamic acid, ethyl ester; Ethyl α,β-epoxy-β-methylhydrocinnamate; Ethyl 2,3-epoxy-3-methyl-3-phenylpropionate; Ethyl 3-methyl-3-phenyloxiranecarboxylate; Ethyl 3-methyl-3-phenyl glycidic acid ethyl ester; 3-Methyl-3-phenyloxiranecarboxylic acid, ethyl ester; Oxiranecarboxylic acid, 3-methyl-3-phenyl-, ethyl ester; 'Strawberry aldehyde'
Classification: Organic compd.
Definition: Commercial prod. is a mixt. of cis and trans isomers
Empirical: C₁₂H₁₄O₃
Properties: Colorless to pale yel. liq., fruity strawberry-like odor; sol. in most fixed oils, propylene glycol; sol. in 3 vols. of 60% alcohol; insol. in glycerin; m.w. 206.24; dens. 1.104-1.123; b.p. 272-275 C; flash pt. 273 F; ref. index 1.509-1.511
Toxicology: LD₅₀ (oral, rat) 5470 mg/kg, (oral, guinea pig) 4050 mg/kg; mildly toxic by ing.; mutagen; TSCA listed
Precaution: Combustible liq.
Hazardous Decomp. Prods.: Heated to decomp., emits acrid smoke and fumes
Storage: Moisture-sensitive; refrigerate
Uses: Synthetic flavor for pharmaceuticals
Features: Sweet strawberry-like flavor
Regulatory: FDA 21CFR §182.60, GRAS; FEMA GRAS; Canada DSL
Manuf./Distrib.: Adrian Amer.
Advanced Synthesis Tech.

Ethyl 3-methyl-3-phenylglycidate; Ethyl 3-methyl-3-phenyloxiranecarboxylate. See Ethyl methylphenylglycidate

Ethyl 2-methylpropanoate; Ethyl-2-methylpropionate. See Ethyl isobutyrate

Ethyl 3-(methylthio) propionate

CAS 13327-56-5; EINECS/ELINCS 236-370-7  
FEMA 3343

Synonyms: Ethyl 3-methyl mercaptopropionate; Ethyl β-methylmercaptopropionate; Ethyl β-methylthiopropionate; 3-(Methyl thio) propionic acid ethyl ester

Empirical: C₆H₁₂O₂S

Properties: Colorless to pale yel. liq.; stench; sol. in alcohol; insol. in water; m.w. 148.23; sp.gr. 1.032; vapor dens. 5.11; b.p. 197 C; flash pt. 80.55 C; ref. index 1.4600

Toxicology: May be harmful by inh., ing., skin absorp.; may cause eye/skin irritation, nausea, headache, vomiting; may cause cancer, heritable genetic damage; TSCA listed

Precaution: Combustible liq.; incompat. with strong oxidizing agents, strong acids, strong bases

Hazardous Decomp. Prods.: Toxic fumes of CO, CO₂, SOₓ; emits toxic fumes under fire conditions

NFPA: Health 1, Flammability 2, Reactivity 0

Storage: Store in cool, dry place; keep tightly closed; keep away from heat, open flame

Uses: Synthetic flavor for pharmaceuticals

Features: Citrus, pineapple flavor

Regulatory: FEMA GRAS; Canada DSL

Ethyl nitrile. **See** Acetonitrile

**Ethyl nitrile**  
CAS **109-95-5**

**Synonyms:** Nitrosyl ethoxide; Nitrurous acid ethyl ester; Nitrurous ether; Nitrurous ethyl ether; Spirit of ethyl nitrile; Spirit of nitrurous ether; Sweet spirit of niter

**Empirical:** C₂H₅NO₂

**Properties:** Ylsh. volatile liq. or gas, ether-like odor; burning taste; dec. on standing; sol. in alcohol; misc. with ether; sl. sol. in water; m.w. 75.04; dens. 0.90; b.p. 16.4 C; flash pt. -35 C

**Toxicology:** LC₅₀ (inh., rat, 4 h) 160 ppm; poison by inh. and ing.; narcotic in high concs.; may cause methemoglobinemia and hypotension; lowers blood pressure; TSCA listed

**Precaution:** Highly flamm.; very dangerous fire hazard; explosive limits in air 3-50%; explodes; dec. spontaneously @ 90 C; explodes @ 194 F; powerful oxidizer; incompat. with acid or acid fumes

**Hazardous Decomp. Prods.:** Heated to decomp., emits toxic fumes of NOx

**Storage:** Keep tightly closed in a cool place; protect from light

**Uses:** Synthetic flavor for pharmaceuticals; prep. of spirit of nitrous ether (a diaphoretic and diuretic)

**Regulatory:** FDA 21CFR §172.515; FEMA GRAS; Canada DSL

**Manuf./Distrib.:** Aldrich  [http://www.sigma-aldrich.com](http://www.sigma-aldrich.com)

2-Ethyl-2-nitropropan-1,3-diol; 2-Ethyl-2-nitro-1,3-propanediol. **See** 2-Nitro-2-ethyl-1,3-propanediol

**Ethyl nonanoate; Ethyl nonylate. **See** Ethyl pelargonate

**Ethyl nonynoate. **See** Ethyl-2-nonynoate

**Ethyl-2-nonynoate**  
CAS **10031-92-2**; EINECS/ELINCS **233-098-0**

**Synonyms:** Ethyl nonynoate; Ethyl octyne carbonate; 2-Nonynoic acid ethyl ester

**Empirical:** C₁₁H₁₈O₂

**Properties:** Oily liq., green violet-like odor; m.w. 182.26; dens. 0.9032 (25 C); b.p. 227 C; ref. index 1.4527

**Uses:** Synthetic flavor for pharmaceuticals

**Features:** Apricot, pineapple-like flavor

**Regulatory:** FDA 21CFR §172.515; FEMA GRAS; Japan approved as flavoring; Canada DSL; Australia AICS

Ethyl octoate; Ethyl octylate. See Ethyl octanoate

Ethyl octyne carbonate. See Ethyl-2-nonynoate

Ethyl oenanthate. See Ethyl heptanoate

‘Ethyl oenanthate’. See Cognac oil, green or white

Ethyl oenanthylate. See Ethyl heptanoate

Ethylolamine. See Ethanolamine

Ethyl oleate

CAS 111-62-6; 85049-36-1; EINECS/ELINCS 203-889-5; 285-206-0

FEMA 2450

Synonyms: Ethyl 9-octadecenoate; 9-Octadecenoic acid ethyl ester

Definition: Ester of ethyl alcohol and oleic acid

Empirical: C_{20}H_{36}O_{2}

Formula: CH_{3}(CH_{2})_{7}CH:CH(CH_{2})_{7}COOC_{2}H_{5}

Properties: Ylsh. oily liq.; misc. with alcohol, ether, veg. oils; insol. in water; m.w. 310.52; dens. 0.870 (20/4 C); visc. 75.15 cp; m.p. -32 C; b.p. 216-218 (15 mm); acid no. 0.5 max.; iodine no. 75-85; sapon. no. 177-188; flash pt. 175 C; ref. index 1.451

Toxicology: LD_{50} (oral, rat) > 5 g/kg; TSCA listed

Precaution: Combustible

Storage: Air- and light-sensitive; freeze

Uses: Vehicle, solvent for pharmaceuticals, intramuscular injectables, parenterals, topicals; diagnostic aid

Features: Oleaginous

Regulatory: FDA 21CFR §172.225, 172.515; FEMA GRAS; NF, BP, EP compliance; Canada DSL

Manuf./Distrib.: A&E Connock†

Chemical Component Cross-Reference

Ethylparaben, potassium salt.  See Potassium ethylparaben
Ethylparaben, sodium salt.  See Sodium ethylparaben
Ethyl parahydroxybenzoate.  See Ethylparaben

Ethyl pelargonate
CAS 123-29-5; EINECS/ELINCS 204-615-7
FEMA 2447
Synonyms:  Ethyl nonanoate; Ethyl nonylate; Nonanoic acid, ethyl ester; Wine ether
Definition:  Ester of ethyl alcohol and pelargonic acid
Empirical:  C_{11}H_{22}O_{2}
Formula:  CH_{3}(CH_{2})_{7}COOCH_{2}CH_{3}
Properties:  Colorless liq., fruity cognac odor; sol. in alcohol, ether; misc. with propylene glycol; insol. in water; m.w. 186.33; dens. 0.866 (18/4 C); vapor dens. 6.4; b.p. \approx 220 C; f.p. -44 C; flash pt. 185 F; ref. index 1.4220 (20 C)
Toxicology:  LD50 (oral, rat) > 43,000 mg/kg; mildly toxic by ing.; skin, eye irritant; TSCA listed

Environmental:  Keep run-off out of sewers, water sources
Precaution:  Combustible liq.; incompat. with strong oxidizers
Hazardous Decomp. Prods.:  Heated to decomps., emits acrid smoke and irritating fumes
Storage:  Keep away from heat, sparks, open flame; keep in original, tightly closed container
Uses:  Synthetic flavor for pharmaceuticals
Features:  Fruity flavor
Regulatory:  FDA 21CFR §172.515; FEMA GRAS; Canada DSL
Manuf./Distrib.:  Advanced BioTech
http://www.adv-bio.com;  Advanced Synthesis Tech.
R.C. Treatt & Co. Ltd http://www.rctreatt.com;  SAFC Specialties

p-Ethylphenol
CAS 123-07-9; EINECS/ELINCS 204-598-6
FEMA 3156
Synonyms:  EP; 4-Ethylphenol; Phenol, p-ethyl-
Empirical:  C_{8}H_{10}O
Formula:  HOC_{6}H_{4}C_{2}H_{5}
Properties:  Colorless needles; sol. in alcohol, ether; sl. sol. in water; m.w. 122.17; m.p. 42-46 C; b.p. 218-219 C; flash pt. 213 F
Toxicology:  LD50 (IP, mouse) 138 mg/kg; toxic; poison by IP route; irritating to eyes, skin, respiratory system; TSCA listed
Precaution:  DOT: Keep away from food
Hazardous Decomp. Prods.:  Heated to decomps., emits acrid smoke and irritating vapors
Uses:  Flavor for pharmaceuticals
Regulatory:  FEMA GRAS; Canada DSL
Manuf./Distrib.:  Advanced Synthesis Tech.

Ethyl phenylacetate
CAS 101-97-3; EINECS/ELINCS 202-993-8
FEMA 2452
Synonyms:  Benzeneacetic acid, ethyl ester; Ethyl benzenecetate; Ethyl phenacetate; Ethyl-2-phenylethanoate; Ethyl-α-toluate; Phenylacetic acid, ethyl ester; α-Toluic acid ethyl ester
Classification:  aromatic compd.
Definition:  Ester of ethyl alcohol and phenylacetic acid
Empirical:  C_{10}H_{12}O_{2}
Formula:  C_{6}H_{5}CH_{2}COOC_{2}H_{5}
Properties:  Colorless liq., sweet honey-like odor; sol. in fixed oils, oxygenated solvs.; insol. in glycerin, propylene glycol, water; m.w. 164.22; dens. 1.033 (20 C); vapor dens. 5.6; b.p. 227 C; flash pt. > 100 C; ref. index 1.496-1.500
Toxicology:  LD50 (oral, rat) 3300 mg/kg; mod. toxic by ing.; mutagenic data; skin, eye irritant; TSCA listed

†=pharmaceutical grade
http://www.safcspecialties.com;  Sigma http://www.sigma-aldrich.com/belgium
Ethyl pentyl carbinol.  See 3-Octanol
Ethyl pentyl ketone.  See 3-Octanone
Ethyl phenylacetate.  See Ethyl phenylacetate
4-Ethylphenol.  See p-Ethylphenol

Handbook of Pharmaceutical Additives, Third Edition 1324
Ethyl phenylacrylate; Ethyl-β-phenylacrylate.  See Ethyl cinnamate

Ethyl phenylbutyrate.  See Ethyl-4-phenylbutyrate

Ethyl-4-phenylbutyrate
CAS 10031-93-3
FEMA 2453
Synonyms:  Ethyl phenylbutyrate; Ethyl-γ-phenylbutyrate; 4-Phenyl butanoic acid ethyl ester
Definition:  Ester of ethanol and γ-phenylbutyric acid
Empirical:  C₁₂H₁₆O₂
Properties:  Colorless somewhat oily liq., plum-like odor, plum-prune taste; sol. in alcohol; insol. in water; m.w. 192.26
Uses:  Synthetic flavor for pharmaceuticals

Regulatory:  FDA 21CFR §172.515; FEMA GRAS; Canada DSL

Ethyl-γ-phenylbutyrate.  See Ethyl-4-phenylbutyrate

Ethyl phenyl carbinol.  See 1-Phenyl-1-propanol

Ethyl phenyl carbonyl butyrate.  See α-Ethylbenzyl butyrate

Ethyl 3-phenyl-2,3-epoxypropionate.  See Ethyl phenylglycidate

Ethyl-2-phenylethanoate.  See Ethyl phenylacetate

Ethyl phenylglycidate
CAS 121-39-1;  EINECS/ELINCS 204-467-3
FEMA 2454
Synonyms:  Ethyl-α,β-epoxyhydrocinnamate;  Ethyl-α,β-epoxy-α-phenylpropionate;  Ethyl 3-phenyl-2,3-epoxypropionate;  Ethyl 3-phenylglycidate;  Ethyl 3-phenylxirane-2-carboxylate
Empirical:  C₁₁H₁₂O₃
Properties:  Colorless to pale yel. liq., fruity strawberry odor; sol. in alcohol, chloroform, ether; insol. in water; m.w. 192.22; dens. 1.120; b.p. 104 C (0.04 kPa); flash pt. > 100 C; ref. index 1.5190-1.5230
Toxicology:  LD₅₀ (oral, rat) 2300 mg/kg;  mod. toxic by ing.;  irritant;  mutagenic data;  TSCA listed

Hazardous Decomp. Prods.:  Heated to decomp., emits acrid smoke and irritating fumes

Uses:  Synthetic flavor for pharmaceuticals
Features:  Caramel, strawberry-like flavor

Regulatory:  FDA 21CFR §172.515; FEMA GRAS; Canada DSL
propenoate: Ethyl (E)-3-phenylprop-2-enooate. See Ethyl cinnamate

Ethyl-3-phenylpropionate
CAS 2021-28-5; EINECS/ELINCS 217-966-6
FEMA 2455
Synonyms: Ethyl hydrocinnamate
Empirical: C11H14O2
Formula: C6H5CH2CH2COOC2H5
Properties: Colorless liq., floral odor; sol. in most org. solvs.; insol. in water; m.w. 178.23; dens. 1.013 (20/4 C); b.p. 247-249 C; flash pt. > 98 C; ref. index 1.494 (20 C)
Uses: Synthetic flavor for pharmaceuticals
Features: Fruity flavor
Regulatory: FDA 21CFR §172.515; FEMA GRAS; Canada DSL
Manuf./Distrib.: Fluka http://www.sigma-aldrich.com; SAFC Specialties http://www.safcspecialties.com; Sigma http://www.sigma-aldrich.com/belgium

Ethyl phthalate. See Diethyl phthalate
Ethyl propanoate. See Ethyl propionate
1-Ethyl-1-propanol. See 3-Pentanol
Ethyl 1-propene-1,2,3-tricarboxylate. See Ethyl aconitate, mixed esters
Ethyl propenoate; Ethyl 2-propenoate. See Ethyl acrylate

Ethyl propionate
CAS 105-37-3; EINECS/ELINCS 203-291-4
UN 1195 (DOT); FEMA 2456
Synonyms: Ethyl propanoate; Propanoic acid ethyl ester; Propionic acid, ethyl ester; Propionic ether
Classification: Carboxylic acid ester
Definition: Ester of propionic acid and ethyl alcohol
Empirical: C3H10O2
Formula: CH3CH2COOC2H5
Properties: Colorless liq., fruity rum odor; sol. in ~ 60 parts water; sol. in fixed oils, most org. solvs.; misc. with alcohol, ether; m.w. 102.14; dens. 0.890 (20/4 C); vapor pressure 40 mm (27.2 C); m.p. -73 C; b.p. 96-99 C; flash pt. (CC) 12 C; autoignition temp. 440 C; ref. index 1.384 (20 C); surf. tens. 24.27 dynes/cm; dielec. const. 5.65
Toxicology: LD50 (oral, rabbit) 3500 mg/kg, (IP, rat) 1200 mg/kg; mod. toxic by ing. and IP routes; skin and eye irritant; probable respiratory tract irritant; high concs. may cause dizziness, headache; extreme concs. may cause unconsciousness, death; ing. may cause gasping breathing, hypothermia, acidosis; TSCA listed
Environmental: VOC; ThOD 2.04
Precaution: Highly flamm. liq.; dangerous fire risk and explosion hazard; LEL 1.9; UEL 11%; reacts vigorously with oxidizing materials
Hazardous Decomp. Prods.: May hydrolyze slowly to ethanol and propionic acid if water is present; heated to decomp., emits acrid smoke and irritating fumes
NFPA: Flammability 3, Reactivity 0
Storage: Store in tightly closed electrically grounded containers in cool, well-ventilated area, separate from workplace; limit quantities in use
Uses: Synthetic flavor for pharmaceuticals
Features: Pineapple-like flavor
Regulatory: FDA 21CFR §172.515; FEMA GRAS; Japan approved as flavoring; Canada DSL; Australia AICS
†=pharmaceutical grade
Ethyl propyl ketone. See 3-Hexanone
2-Ethyl-3-propyl-1,3-propanediol. See Ethyl hexanediol

Ethyl salicylate
CAS 118-61-6; EINECS/ELINCS 204-265-5
FEMA 2458

Synonyms: Ethyl 2-hydroxybenzoate; Ethyl-O-hydroxybenzoate; Sal ethyl; Salicylic ether; Salicylic ethyl ester
Definition: Ester of salicylic acid and ethyl alcohol

Empirical: C₉H₁₀O₃
Formula: HO • C₆H₄ • CO₂ • C₂H₅

Properties: Colorless liq., wintergreen odor; sol. in alcohol, ether, acetic acid, fixed oils; sl. sol. in water, glycerin; m.w. 166.18; dens. 1.127; m.p. 1.3 C; b.p. 233-234 C; flash pt. 225 F; ref. index 1.520

Toxicology: LD₅₀ (oral, rat) 1320 mg/kg; LD₅₀ (subcut., guinea pig) 1500 mg/kg; mod. toxic by ing., subcut. routes; skin irritant; TSCA listed

Precaution: Combustible
Hazardous Decomp. Prods.: Heated to decomp., emits acrid smoke and irritating fumes

Uses: Synthetic flavor for pharmaceuticals

Features: Sweet, fruity, minty flavor

Regulatory: FDA 21CFR §172.515; FEMA GRAS; Canada DSL

Ethyl sebacate. See Diethyl sebacate
Ethyl (sodium o-mercaptobenzoato) mercury. See Thimerosal

Ethyl sorbate
CAS 2396-84-1; EINECS/ELINCS 219-258-2
FEMA 2459
Chemical Component Cross-Reference

Ethyl 2,4-hexadienoate; Sorbic acid ethyl ester
†=pharmaceutical grade

Handbook of Pharmaceutical Additives, Third Edition 1328

Synonyms: Ethyl-2,4-hexadienoate; Sorbic acid ethyl ester
Classification: Nonaromatic ester
Definition: Ester of sorbyl chloride and ethyl alcohol
Empirical: C₇H₁₂O₂
Properties: Liq.; warm fruity ethereal odor; m.w. 140.18; dens. 0.956; b.p. 81 C (15 mm); flash pt. 157 F; ref. index 1.502
Toxicology: LD₅₀ (oral, mouse) > 8 g/kg, (IP, mouse) 5600 mg/kg; TSCA listed
Precaution: Combustible
Uses: Synthetic flavor for pharmaceuticals
Features: Fruity flavor
Regulatory: FDA 21CFR §172.515; FEMA GRAS; Canada DSL

Ethyl steareate
CAS 111-61-5; 91031-43-5; EINECS/ELINCS 203-892-4; 292-945-2
FEMA 3490

Synonyms: Ethyl octadecanoate; Ethyl n-octadecanoate; Octadecanoic acid, ethyl ester; Stearic acid, ethyl ester
Definition: Ester of ethyl alcohol and stearic acid
Empirical: C₂₀H₄₀O₂
Formula: CH₃(CH₂)₁₆COOCH₂CH₃
Properties: Wh. cryst. solid, odorless; insol. in water; sol. in alcohol, ether; m.w. 312.54; m.p. 33-35 C; b.p. 213-215 (15 mm); flash pt. 110 C
Toxicology: Skin irritant; Hazardous Decomp. Prods.: Heated to decomp., emits acrid smoke and irritating vapors
Uses: Synthetic flavor for pharmaceuticals; emollient
Regulatory: FDA 21CFR §172.225; FEMA GRAS; Canada DSL

Ethyl succinate. See Diethyl succinate

Ethyl tetradecanoate. See Ethyl myristate

Ethyl tiglate
CAS 5837-78-5; 55514-48-2; EINECS/ELINCS 227-425-6; 259-688-8
FEMA 2460

Synonyms: 2-Butenoic acid, 2-methyl-, ethyl ester, (E)-; Crotonic acid, 2-methyl-, ethyl ester, (E)-; Ethyl trans-2,3-dimethyl acrylate; Ethyl 2-methyl-2-butenate; Ethyl (E)-2-methyl-2-butenoate; Ethyl trans-2-methyl-2-butenoate; Ethyl α-methylcrotonate; Ethyl (E)-2-methylcrotonate; (E)-2-Methyl-2-butoenoic acid ethyl ester; Tigic acid, ethyl ester
Classification: Nonaromatic ester
Definition: Ester of tiglic acid and ethyl alcohol
Empirical: C₇H₁₂O₂
Formula: CH₃CH=C(CH₃)CO₂C₂H₅
Properties: Colorless liq., fruity caramel odor; sol. in most org. solvs.; insol. in water; m.w. 128.17; dens. 0.923; b.p. 112 F; ref. index 1.4347 (16.8 C)
Toxicology: LD₅₀ (oral, rat) > 5 g/kg, (skin, rabbit) > 5 g/kg; low toxicity by ing. and skin contact; may be harmful by inh., ing., or skin absorp.; may cause irritation; TSCA listed
Precaution: Combustible; keep away from heat and open flame; incompat. with strong oxidizing agents, strong bases
Hazardous Decomp. Prods.: Toxic fumes of CO, CO₂; heated to decomp., emits acrid smoke and irritating vapors; emits toxic fumes under fire conditions
Storage: Store in cool, dry place; keep tightly closed
Uses: Synthetic flavor for pharmaceuticals
Features: Raspberry-like flavor
Regulatory: FDA 21CFR §172.515; FEMA GRAS; Canada DSL

Ethyl-α-toluate. See Ethyl phenylacetate
Ethyl 4-toluenesulfonate; Ethyl toluene-4-sulfonate. See Ethyl-p-toluenesulfonate

Ethyl-p-toluenesulfonate
CAS 80-40-0; EINECS/ELINCS 201-276-7
UN 3261
Ethyl p-methylbenzenesulfonate; Ethyl PTS; Ethyl 4-toluenesulfonate; Ethyl toluene-4-sulfonate; Ethyl tosylate; Ethyl p-tosylate

**Empirical:** C₉H₁₂O₃S

**Formula:** CH₃C₆H₄SO₃C₂H₅

**Properties:** Liq. or cryst.; sol. in oxygenated solvs.; insol. in water; m.w. 200.27; dens. 1.17; m.p. 33 C; b.p. 221 C; flash pt. (CC) 158 C; ref. index 1.5110 (20 C)

**Toxicology:** LD₅₀ (IP, mouse) 1000 mg/kg; mod. toxic by subcut. and IP routes; questionable carcinogen; experimental tumorigen; mutagenic data; TSCA listed

**Precaution:** Combustible exposed to heat or flame; can react with oxidizers

**Hazardous Decomp. Prods.:** Heated to decomp., emits highly toxic fumes of SOₓ

**Storage:** Hygroscopic

**Uses:** Ethylating agent and intermediate for use in pharmaceuticals

**Regulatory:** Canada DSL

**Manuf./Distrib.:**
- Aldrich \[http://www.sigma-aldrich.com\]
- Fluka \[http://www.sigma-aldrich.com\]
- Seal Sands Chems. Ltd† \[http://www.rutherfordchemicals.com\]

Ethyl undecanoate; Ethyl p-toluenesulfonate

**Empirical:** C₁₉H₂₄O₂

**Properties:** Colorless to pale yel. liq., wine-like odor; m.w. 324.46; dens. 0.859; b.p. 258-259 C; flash pt. > 230 F; ref. index 1.4382

**Toxicology:** LD₅₀ (oral, rat) > 5 g/kg, (skin, rabbit) > 5 g/kg; sl. toxic by ing.; primary skin irritant; TSCA listed

**Hazardous Decomp. Prods.:** Heated to decomp., emits acrid smoke and irritating vapors

**Uses:** Synthetic flavor for pharmaceuticals

**Features:** Soapy waxy buttery cognac coconut odor; waxy, creamy, slight fruity with a coconut and cheesy nuance taste

**Regulatory:** Canada DSL

**Manuf./Distrib.:**
- Advanced Synthesis Tech. \[http://www.advancedsynthesis.com\]
- Grau Aromatics \[http://www.grau-aromatics.de\]
- Penta Mfg.† \[http://www.pentamfg.com\]
- SAFC Specialties

Ethyl undecylenate; Ethyl undecylenoate

**Classification:** Nonaromatic ester

**Empirical:** C₁₃H₂₄O₂

**Properties:** Colorless liq.; fruity odor; misc. with alcohol, oxygenated solvs.; insol. in water; m.w. 212.34; dens. 0.879; b.p. 258-259 C; flash pt. > 230 F; ref. index 1.4382

**Toxicology:** LD₅₀ (oral, rat) > 5 g/kg, (skin, rabbit) > 5 g/kg; sl. toxic by ing.; primary skin irritant; TSCA listed

**Hazardous Decomp. Prods.:** Heated to decomp., emits acrid smoke and irritating vapors

**Uses:** Synthetic flavor for pharmaceuticals

**Features:** Fruity flavor

**Regulatory:** FDA 21CFR §172.515; FEMA GRAS; Canada DSL

**Manuf./Distrib.:**
- SAFC Specialties \[http://www.safcspecialties.com\]

Ethyl undecylenoate

**Synonyms:** Ethyl 10-hendecenoate; Ethyl undecylenate; Ethyl undecylenoate; 10-Undecenoic acid, ethyl ester

**Classification:** Nonaromatic ester

**Empirical:** C₁₃H₂₄O₂

**Properties:** Colorless to pale yel. liq., wine-like odor; m.w. 212.34; dens. 0.879; b.p. 258-259 C; flash pt. > 230 F; ref. index 1.4382

**Toxicology:** LD₅₀ (oral, rat) > 5 g/kg, (skin, rabbit) > 5 g/kg; sl. toxic by ing.; primary skin irritant; TSCA listed

**Hazardous Decomp. Prods.:** Heated to decomp., emits acrid smoke and irritating vapors

**Uses:** Synthetic flavor for pharmaceuticals

**Features:** Fruity flavor

**Regulatory:** FDA 21CFR §172.515; FEMA GRAS; Canada DSL

**Manuf./Distrib.:**
- Advanced Synthesis Tech. \[http://www.advancedsynthesis.com\]
- Augustus Oils Ltd \[http://www.augustus-oils.ltd.uk\]

Ethyl valerate

**Synonyms:** Ethyl n-valerate

**Empirical:** C₇H₁₄O₂

**Properties:** Colorless liq.; fruity odor; misc. with alcohol, oxygenated solvs.; insol. in water; m.w. 130.19; dens. 0.877 (20/4 C); b.p. 142-146 C; flash pt. 34 C; ref. index 1.372-1.400 (20 C)

**Toxicology:** Irritant; TSCA listed

**Precaution:** Flamm.

**Uses:** Synthetic flavor for pharmaceuticals

**Features:** Apple-like flavor

**Regulatory:** USP/NF compliance; FDA 21CFR §172.515; FEMA GRAS; Canada DSL

**Manuf./Distrib.:**

Ethyl n-valerate. See Ethyl valerate

Ethyl vanillin
CAS 121-32-4; EINECS/ELINCS 204-464-7
FEMA 2464
Synonyms: Benzaldehyde, 3-thoxy-4-hydroxy-; Bourbonal; Ethavan; Ethovan; 3-Ethoxy-4-hydroxybenzaldehyde; Ethylprotal; 4-Hydroxy-3-ethoxybenzaldehyde; Protocatechuic aldehyde ethyl ether; Vanillal
Classification: Substituted phenolic; aromatic organic compd.
Empirical: C₉H₉O₃
Properties: Wh. fine cryst., vanilla odor; sol in alcohol, chloroform, propylene glycol, ether, most org. solvs.; sl. sol. in water; m.w. 166.19; m.p. 76.5 °C; b.p. 285 °C; flash pt. > 212 °F
Toxicology: LD₅₀ (oral, rat) 1590 mg/kg, (IP, mouse) 750 mg/kg; LDLo (subcut., rat) 1800 mg/kg, (IV, dog) 760 mg/kg; mod. toxic by ing., IP, subcut., and IV routes; human skin irritant; mutagenic data; TSCA listed
Precaution: Flamm. liq.
Hazardous Decomp. Prods.: Heated to decomp., emits acrid smoke and irritating fumes
Storage: Light-sensitive
Uses: Synthetic flavor and fragrance for pharmaceuticals, orals
Features: Sweet, vanilla-like flavor
Regulatory: FDA 21 CFR §163.111, 163.112, 163.113, 163.114, 163.117, 163.123, 163.130, 163.135, 163.140, 163.145, 163.150, 163.153, 163.155, 182.60, 182.90, GRAS; FEMA GRAS; Canada DSL; Japan approved as flavoring; FDA approved for orals
Manuf./Distrib.: ADA Int'l.

Eucalyptus globulus oil

**CAS** 8000-48-4; 90028-48-1
**FEMA** 2466

**Synonyms:** Dinkum oil; Eucalyptus globulus; Eucalyptus oil

**Definition:** Volatile oil obtained from leaves of *Eucalyptus globulus*, contg. eucalyptol (70-80%), plus α-pinene, phellandrene, terpineol, citronellal, geranyl acetate, pipertone, etc.

**Properties:** Colorless to pale yel. liq., char. camphoraceous odor, pungent spicy cooling taste; sol. in 5 vols 70% alcohol; misc. with abs. alcohol, oils, fats; pract. insol. in water; dens. 0.905-0.925; m.p. -15.4 C; ref. index 1.458-1.470 (20 C)

**Toxicology:** LD50 (oral, rat) 2480 mg/kg, (skin, rabbit) 2480 mg/kg; human poison and human systemic effects by ing.; skin and eye irritant; can cause allergic reaction; ing. can cause eye spasms, nausea, vomiting, respiratory depression, sweating; TSCA listed

**Hazardous Decomp. Prods.:** Heated to decomp., emits acrid smoke and irritating fumes

**HMIS:** Health 1, Flammability 2, Reactivity 0
**Storage:** Keep cool, well closed; protect from light

**Uses:** Natural flavor in pharmaceuticals, orals; local antiseptic; antispasmodic, stimulant

**Regulatory:** FDA 21CFR §172.510, 27CFR §21.65, 21.151; FEMA GRAS; Japan approved; Europe listed, no restrictions; FDA approved for orals; BP, EP compliance; Canada DSL

Exsiccated sodium sulfite. **See** Sodium sulfite

Ext. D&C Yellow No. 7
CAS 846-70-8; EINECS/ELINCS 212-690-2
Synonyms: Acid yellow 1; CI 10316; 2,4-Dinitro-1-naphthol-7-sulfonic acid disodium salt; 8-Hydroxy-5,7-dinitro-2-naphthalenesulfonic acid disodium salt; Naphthol yellow S
Classification: Nitro color
Empirical: C_{10}H_{6}N_{2}Na_{2}O_{8}S
Formula: (CH_{3})_{2}CCHCH_{2}CH_{2}CCH_{2}CH_{2}CCH_{3}CH_{2}OH
Properties: Colorless to lt. yel. liq.; floral odor; insol. in water; dens. 0.8871 (20/4 C); b.p. 111 C; ref. index 1.487-1.492
Toxicology: LD_{50} (oral, rat) 6000 mg/kg, (IP, mouse) 4443 mg/kg; mod. toxic by IP route; mildly toxic by ing.; mutagenic data; TSCA listed
Precaution: Combustible
Hazardous Decomp. Prods.: Heated to decomp., emits acrid smoke and irritating fumes
Uses: Synthetic flavor and fragrance for pharmaceuticals, topicals
Regulatory: FDA 21CFR §172.515; FEMA GRAS; Canada DSL
Trade Names: Farnesol
Trade Names Containing: Unitrienol T-27

Farnesyl acetate
CAS 29548-30-9; EINECS/ELINCS 249-689-1
Synonyms: 2,6,10-Dodecatrien-1-ol, 3,7,11-trimethyl-, acetate; 3,7,11-Trimethyl-2,6,10-dodecatrien-1-ol, acetate; 3,7,11-Trimethyldecosa-2,6,10-trienyl acetate
### Chemical Component Cross-Reference

**Definition:** Ester of farnesol and acetic acid  
**Empirical:** C\(_{17}\)H\(_{28}\)O\(_2\)  
**Properties:** Colorless liq.; sol. in alcohol; insol. in water; sp.gr. 0.905-0.914; b.p. 162 C (10 mm); flash pt. 110 C; ref. index. 1.470-1.478  
**Uses:** Blocks cholesterol synthesis  
**Regulatory:** Canada DSL

| Fast green FCF  
CAS 2353-45-9; EINECS/ELINCS 219-091-5  
INS143  
Synonyms: CI 42053; Dihydrogen (ethyl) [4-[4-[ethyl (3-sulfonatobenzyl) amino] (4-hydroxy-2-sulfonatobenzhydrylidene) cyclohexa-2,5-dien-1-ylidene] (3-sulfonatobenzyl) ammonium, disodium salt; FD&C Green No. 3; Food green 3  
Classification: Triphenylmethylene color  
**Empirical:** C\(_{37}\)H\(_{36}\)N\(_2\)O\(_{10}\)S\(_3\) • 2Na  
Properties: Red to brn.-violet powd. or dk. grn. cryst.; sol. in water, conc. sulfuric acid, ethanol; m.w. 810.91; m.p. 290 C (dec.)  
Toxicology: LD\(_{50}\) (oral, rat) > 2 g/kg; questionable carcinogen; experimental neoplastigen; may cause bladder tumors; mutagenic data; TSCA listed  
Hazardous Decomp. Prods.: Heated to decomp., emits very toxic fumes of NO\(_x\) and SO\(_x\)  
Storage: Store @ R.T.  
Uses: Colorant for pharmaceuticals, orals, topicals; reagent for staining proteins  
Regulatory: FD&C Green No. 3: FDA 21CFR §74.203, 74.1203, 74.2203, 82.203; FDA approved for orals, topicals; not permitted in food (EU)

FD&C Blue No. 1
CAS 3844-45-9; EINECS/ELINCS 223-339-8
INS133

Synonyms: Acid blue 9; Acid blue 9 disodium salt; Brilliant blue FCF; CI 42090; D&C Blue No. 4; N-Ethyl-N-[4-[4-[ethyl[[3-sulfophenyl]methylene]-2,5-cyclohexadien-1-ylidene]-3-sulfo-benzenemethanaminium hydroxide, inner salt, disodium salt; Food blue 2; Patent blue AC

Classification: Triphenylmethane color

Empirical: C_{37}H_{34}N_{2}O_{9}S_{3} • 2Na

Properties: Greenish-blue powd., gran.; sol. (oz/gal): 52 oz propylene glycol, 36 oz glycerin, 25 oz dist. water, 2 oz 95% ethanol; sol. in veg. oils; m.w. 792.86; m.p. 283 C (dec.)

Toxicology: LD50 (subcut., mouse) 4600 mg/kg; may cause allergic reactions; possible carcinogen; produces malignant tumors at site of injection and by ing. in rats; experimental neoplastigen; mutagenic data; TSCA listed

Hazardous Decomp. Prods.: Heated to decomp., emits very toxic fumes of NOx, Na2O, and SOx

Uses: Colorant for pharmaceuticals, orals, topicals, buccal, eye use

Regulatory: FDA 21CFR §74.101, 74.2101, 74.2101, 81.1, 82.50, 82.51, 82.101, 176.180; subject to certification, permanently listed; Canada DSL

FD&C Blue No. 2
CAS 860-22-0; EINECS/ELINCS 212-728-8
E132

Synonyms: Acid blue 74; Blue X; Ceruleinum; CI 73015; 2-(1,3-Dihydro-3-oxo-5-sulfo-2H-indol-2-ylidene)-2,3-dihydro-3-oxo-1H-indole-5-sulfonic acid disodium salt; Disodium indigo-5,5-disulfonate; Food blue 1; Indigo carmine; Indigo carmine disodium salt; 5,5´-Indigotin disulfonic acid; Indigotine; Indigotine disodium salt; Sodium 5,5´-indigotidisulfonate; Soluble indigo

Classification: Indigoid color

Definition: Disodium salt of 5,5´-indigotin disulfonic acid

Empirical: C_{16}H_{32}N_{2}O_{8}S_{2} • 2Na

Properties: Blue-brn. to red-brn. powd.; sol. in

http://www.sigma-aldrich.com/belgium;
Chemical Component Cross-Reference

water, conc. sulfuric acid; sl. sol. in alcohol; m.w. 466.36

Toxicology: LD50 (oral, rat) 2 g/kg, (IV, rat) 93 mg/kg; poison by IV route; mod. toxic by ing., subcut. routes; may cause brain tumors, asthma, rashes, hyperactivity; IV use may produce severe headache, acute pulmonary edema with cardiac arrest, hypertension; questionable carcinogen; experimental neoplasticigen; mutagenic data; TSCA listed

Precaution: Sensitive to oxidizing agents

Hazardous Decomp. Prods.: Heated to decomp., emits very toxic fumes of SOx, NOx, Na2O

Storage: Light-sensitive

Uses: Colorant for pharmaceuticals, oral tablets and capsules, nylon surgical sutures, buccals; dye in functional kidney test

Use Level: 1% max. (sutures)

Regulatory: FDA 21CFR §74.102, 74.1102, 81.1, 82.102; FDA approved for orals, buccals, subject to certification, permanently listed

See also Acid blue 74; Cl 73015

FD&C Blue No. 2 Aluminum Lake
CAS 16521-38-3
E132

Synonyms: CI 73015
Definition: Insoluble pigment made by absorbing FD&C Blue No. 2 on an alumina substrate

Properties: Blue; water-insol.

Storage: Store in closed container @ ambient temps.; avoid high humidity

Uses: Colorant for pharmaceuticals

Regulatory: FDA 21CFR §74.1102, 74.3102, 82.203, 82.203; FDA approved for orals, topicals; subject to certification, permanently listed; Canada DSL

Manuf./Distrib.: Parchem Trading http://www.par-chem.com

FD&C Green No. 3
CAS 2353-45-9; EINECS/ELINCS 219-091-5
Synonyms: CI 42053; Fast green FCF; Food green 3
Classification: Triphenylmethane color

Empirical: C_{37}H_{36}N_{2}O_{10}S_{3} \cdot 2Na

Properties: Red to brn.-violet powd. or dk. grn. cryst.; sol. in water, conc. sulfuric acid, ethanol; m.w. 810.91; m.p. 290 C (dec.)

Toxicology: LD50 (oral, rat) > 2 g/kg; questionable carcinogen; experimental neoplasticigen; may cause bladder tumors; mutagenic data; TSCA listed

Hazardous Decomp. Prods.: Heated to decomp., emits very toxic fumes of NOx and SOx

Storage: Store @ R.T.

Uses: Colorant for pharmaceuticals, orals, topicals; reagent for staining proteins

Features: Exhibits bluish-grn. hue in sol'n.

Regulatory: FDA 21CFR §74.203, 74.1203, 74.2203, 82.203; FDA approved for orals, topicals, subject to certification, permanently listed; Canada DSL

FD&C Red No. 2. See Amaranth

FD&C Red No. 3
CAS 16423-68-0; EINECS/ELINCS 240-474-8
INS127; E127

Synonyms: Acid red 51; 9-(o-Carboxyphenyl)-6-hydroxy-2,4,5,7-tetraiodo-3-isoxanthone; CI 45430; D&C Red No. 3; 3’,6’-Dihydroxy-2’,4’,5’,7’-tetraiodoSpiro [isobenzofuran-1(3H),9´-(9H) xanthen]-3-one disodium salt; Erythrosine; Erythrosine bluish; Food red 14; 2’,4’,5’,7’-Tetraiodofluorescein disodium salt; Tetraiodofluorescein sodium salt

Classification: Xanthene color

Definition: Disodium salt of 2’,4’,5’,7’ -tetraiodofluorescein
Chemical Component Cross-Reference

Empirical: C_{20}H_{64}O_{5} • 2Na

Properties: Bluish pink to brown powd., gran.; sol. (oz/gal): 30 oz glycerin, 28 oz propylene glycol, 12 oz dist. water, 2 oz 95% ethanol; m.w. 879.84

Toxicology: LD_{50} (oral, rat) 1840 mg/kg, (IV, rat) 200 mg/kg; poison by IV route; mod. toxic by ing.; questionable carcinogen, mutagen; human mutagenic data; may cause thyroid tumors, chromosomal damage, asthma, rashes, hyperactivity; TSCA listed

Precaution: Suspected phototoxicity

Hazardous Decomp. Prods.: Heated to decomp., emits very toxic fumes of Na_{2}O and I_{2}

Uses: Colorant for ingested pharmaceuticals, tablets, capsules, and liq. oral formulations

Regulatory: FDA 21CFR §74.303, 74.1303, 81.1; FDA approved for foods, orals; cosmetic and external drug uses terminated; Canada DSL
