What Is ACTIVE Reading?

ACTIVE reading is an approach to reading, advocated by Neil J Anderson, that focuses on the following elements:

A = Activate Prior Knowledge
- Activation of background knowledge improves reading comprehension.
- *Getting Ready* and *Before You Read* sections elicit learners’ prior knowledge, and generate interest in the topic, through use of visual prompts and questions.

C = Cultivate Vocabulary
- Vocabulary plays a crucial role in the development of reading ability.
- *Vocabulary Comprehension* sections in each unit examine vocabulary items encountered in the main reading passage.
- *Vocabulary Skill* sections provide learners with explicit skills-based instruction in how to learn, process, and decipher new vocabulary.

T = Think About Meaning
- In addition to testing for comprehension, the ACTIVE approach encourages learners to think deeply about the meaning of the text.
- *Check Your Understanding* questions focus learners on the main ideas and key details of the text.
- *Critical Thinking* questions require learners to go beyond reading comprehension to analyze each text and the author’s intent.

= Increase Reading Fluency
- Conscious development of reading rate and comprehension are key ingredients in building reading fluency.
- *Tips for Fluent Reading* (pages 8 and 9) encourage learners to become more aware of their own reading habits.
- *Four Review Units* reinforce learners’ use of strategies and provide additional reading fluency practice.

V = Verify Strategies
- Learners are encouraged to be aware of what they are doing and why they are doing it, as they read.
- Reading strategies are presented in the *Reading Skill* sections, the *Vocabulary Skill* sections, and the *Real Life Skill* section in each unit.
- *Self Check* sections in each Review Unit require learners to monitor the effectiveness of their own use of strategies.

E = Evaluate Progress
- Both qualitative and quantitative evaluation of learners’ progress is advocated.
- The *Reading Rate Chart* and the *Reading Comprehension Chart* allow learners to plot their achievements in building reading fluency.
- *What Do You Think?* sections provide opportunities for learners to show comprehension of the unit theme, through verbal or written discussion.

For more information on his ACTIVE reading methodology, see Neil J Anderson’s professional title *Exploring Second Language Reading: Issues and Strategies*, part of National Geographic Learning’s TeacherSource series (ISBN: 0-8384-6685-0) as well as his online professional development course, *ELT Advantage: Teaching ESL/EFL Reading*. 
Dedication & Acknowledgments

This book is dedicated to the students and teachers who have used ACTIVE Skills for Reading over the past 10 years. Since 2002/2003 when the first edition of ACTIVE Skills for Reading was published, thousands of students and teachers have used the book. I know that I had no idea that the series would be this popular and that we would reach the stage of publishing a third edition.

The pedagogical framework for this series is as viable today as it has ever been. As students and teachers use each of the elements of ACTIVE, stronger reading will result.

My associations with the editorial team in Singapore continue to be some of my greatest professional relationships. I express appreciation to Sean Bermingham, Derek Mackrell, Andrew Robinson, and Sarah Tan for their commitment to excellence in publishing. I also express appreciation to Jenny Wilsen and John Mum for their commitment to helping the third edition be stronger than the two previous editions.

Neil J Anderson

The third edition of Active Skills for Reading maintains the ACTIVE approach developed by reading specialist Professor Neil J Anderson, while introducing several significant improvements.

This new edition now has a full color design, presenting the series’ content in an attractive and student-friendly way. Approximately half of the passages have been replaced with new and engaging topics; the rest have been updated. It also has a wide variety of text types including articles, journals, blogs, and interviews, with later levels featuring readings based on content from National Geographic.

Each of the 24 chapters now includes a “Motivational Tips” section from Professor Anderson, reflecting his current research into student motivation and learning. His reading charts have also been updated to more accurately track students’ reading fluency and comprehension progress.

Active Skills for Reading, Third Edition features an Assessment CD-ROM with ExamView® Pro, which has been revised to reflect the needs of learners preparing for standardized tests.

This latest edition of Active Skills for Reading series is designed to further enhance students’ progress, helping them to become more confident, independent-and active-readers.

Vocabulary Learning Tips

Learning new vocabulary is an important part of learning to be a good reader. Remember that the letter C in ACTIVE Skills for Reading reminds us to cultivate vocabulary.

1 Decide if the word is worth learning now

As you read, you will find many words you do not know. You will slow your reading fluency if you stop at every new word. For example, you should stop to find out the meaning of a new word if:

a. you read the same word many times.
b. the word appears in the heading of a passage, or in the topic sentence of a paragraph—the sentence that gives the main idea of the paragraph.

2 Record information about new words you decide to learn

Keep a vocabulary notebook in which you write words you want to remember. Complete the following information for words that you think are important to learn:

<table>
<thead>
<tr>
<th>New word</th>
<th>Translation</th>
<th>Part of speech</th>
<th>Sentence where found</th>
<th>My own sentence</th>
</tr>
</thead>
<tbody>
<tr>
<td>healthy</td>
<td>健康</td>
<td>adjective</td>
<td>Oliver is well-known for sharing his secrets of cooking healthy food.</td>
<td>I exercise to stay fit and healthy.</td>
</tr>
</tbody>
</table>

3 Learn words from the same family

For many important words in English that you will want to learn, the word is part of a word family. As you learn new words, learn words in the family from other parts of speech (nouns, verbs, adjectives, adverbs, etc.).

<table>
<thead>
<tr>
<th>Noun</th>
<th>Verb</th>
<th>Adjective</th>
<th>Adverb</th>
</tr>
</thead>
<tbody>
<tr>
<td>happiness</td>
<td>take</td>
<td>go on</td>
<td>need</td>
</tr>
<tr>
<td></td>
<td>long</td>
<td>two-week</td>
<td>short</td>
</tr>
<tr>
<td></td>
<td>vacation</td>
<td>in Italy</td>
<td>with my family</td>
</tr>
</tbody>
</table>

4 Learn words that go with the key word you are learning

When we learn new words, it is important to learn what other words are frequently used with them. These are called collocations. Here is an example from a student's notebook.

| take | go on | need | have | a | long | two-week | short | summer | school | vacation | next week | in Italy | with my family | by myself |
5 Create a word web

A word web is a picture that helps you connect words together and helps you increase your vocabulary. Here is a word web for the word frightened:

6 Memorize common prefixes, roots, and suffixes

Many English words can be divided into different parts. We call these parts prefixes, roots, and suffixes. A prefix comes at the beginning of a word, a suffix comes at the end of a word, and the root is the main part of the word. In your vocabulary notebook, make a list of prefixes and suffixes as you come across them. On page 238 there is a list of prefixes and suffixes in this book. For example, look at the word unhappily.

Prefix: un- (meaning not)  Suffix: -ly (meaning an adverb)

unhappily

Root: happy

7 Regularly review your vocabulary notebook

You should review the words in your vocabulary notebook very often. The more often you review your list of new words, the sooner you will be able to recognize the words when you see them during reading. Set up a schedule to go over the words you are learning.

8 Make vocabulary flash cards

Flash cards are easy to make, and you can carry them everywhere with you. You can use them to study while you are waiting for the bus, walking to school or work, or eating a meal. You can use the flash cards with your friends to quiz each other. Here is an example of a flash card:

- Front: cut
- Back: He is cutting an apple.
- Translation: potong
- Example sentence: He is cutting an apple.
Tips for Fluent Reading

Find time to read every day.
Find the best time of day for you to read. Try to read when you are not tired. By reading every day, even for a short period, you will become a more fluent reader.

Look for a good place to read.
It is easier to read and study if you are comfortable. Make sure that there is good lighting in your reading area and that you are sitting in a comfortable chair. To make it easier to concentrate, try to read in a place where you won’t be interrupted.

Use clues in the text to make predictions.
Fluent readers make predictions before and as they read. Use the title, subtitle, pictures, and captions to ask yourself questions about what you are going to read. Find answers to the questions when you read. After reading, think about what you have learned and decide what you need to read next to continue learning.

Establish goals before you read.
Before you read a text, think about the purpose of your reading. For example, do you just want to get a general idea of the passage? Or do you need to find specific information? Thinking about what you want to get from the reading will help you decide what reading skills you need to use.

Notice how your eyes and head are moving.
Good readers use their eyes, and not their heads, when they read. Moving your head back and forth when reading will make you tired. Practice avoiding head movements by placing your elbows on the table and resting your head in your hands. Do you feel movement as you read? If you do, hold your head still as you read. Also, try not to move your eyes back over a text. You should reread part of a text only when you have a specific purpose for rereading, for example, to make a connection between what you read previously and what you are reading now.

Try not to translate.
Translation slows down your reading. Instead of translating new words into your first language, first try to guess the meaning. Use the context (the other words around the new word) and word parts (prefixes, suffixes, and word roots) to help you guess the meaning.
Read in phrases rather than word by word.
Don’t point at each word while you read. Practice reading in phrases—groups of words that go together.

Engage your imagination.
Good readers visualize what they are reading. They create a movie in their head of the story they are reading. As you read, try sharing with a partner the kinds of pictures that you create in your mind.

Avoid subvocalization.
Subvocalization means quietly saying the words as you read. You might be whispering the words or just silently saying them in your mind. Your eyes and brain can read much faster than you can speak. If you subvocalize, you can only read as fast as you can say the words. As you read, place your finger on your lips or your throat. Do you feel movement? If so, you are subvocalizing. Practice reading without moving your lips.

Don’t worry about understanding every word.
Sometimes, as readers, we think we must understand the meaning of everything that we read. It isn’t always necessary to understand every word in a passage in order to understand the meaning of the passage as a whole. Instead of interrupting your reading to find the meaning of a new word, circle the word and come back to it after you have finished reading.

Enjoy your reading.
Your enjoyment of reading will develop over time. Perhaps today you do not like to read in English, but as you read more, you should see a change in your attitude. The more you read in English, the easier it will become. You will find yourself looking forward to reading.

Read as much as you can.
The best tip to follow to become a more fluent reader is to read whenever and wherever you can. Good readers read a lot. They read many different kinds of material: newspapers, magazines, textbooks, websites, and graded readers. To practice this, keep a reading journal. Every day, make a list of the kinds of things you read during the day and how long you read each for. If you want to become a more fluent reader, read more!
Are You an ACTIVE Reader?

Before you use this book to develop your reading skills, think about your reading habits, and your strengths and weaknesses when reading in English. Check the statements that are true for you.

Follow the tips on pages 8–9. These will help you become a more active reader. At the end of the course, answer this quiz again to see if you have become a more fluent, active reader.
Discuss the following questions with a partner.

1. How often do students take tests in your country? What kinds of tests do they take?
2. What kinds of tests do adults take? Which of these tests have you taken?
3. Are you good at taking tests? How do you prepare for them?
Before You Read

Do you remember?

A Think about answers to the following questions.
1. Do you think you have a good memory? Why, or why not?
2. What do you do when you need to remember something important?
3. How do you usually study for a test?

B Discuss your answers with a partner.

Reading Skill

Describing a Process

Some articles tell us how to do something. You can draw a diagram to help you understand things that are in a certain order. First, find the steps. Then, decide how best to arrange the steps in a diagram.

A Read the third paragraph of the article on the next page. Write the three kinds of memory described.
1. 
2. 
3. 

B Decide which diagram below is best for organizing the information above. Explain your answer to a partner.

C Read the entire passage carefully. Then answer the questions on page 14.

Motivational Tip: I love reading—do you? When I remember how much I like to read, it helps me stay positive, even when I have to read things that are not of my choice (like a textbook). Reading becomes much easier when you have a positive attitude.
If you're like most students, you probably started this new academic year with a resolution to study harder. Now, science can help you keep your resolution. Recent discoveries in brain research point to better ways to learn.

How does the brain save new information? Think of the last time someone told you their phone number. Could you remember that number five minutes later? Probably not! That’s because it was in your short-term memory.

Our memory actually has three components. Sensory memory takes in information from our five senses and is stored for just a few seconds while our brain processes it. Short-term memory works like a “holding area” for new information—that’s where you keep the phone number while you dial it. But if you can put the phone number into long-term memory, you’ll remember that same phone number next week. This part of your memory holds everything from irregular verbs to the names of all your cousins.

When you study, you transfer new information into long-term memory. Every time we learn something new, the structure of the brain actually changes as we build new connections to information that we already know. When there are more connections to the new information, it’s easier to find it again.

Brain researchers have discovered four key points for effective study.

1. **Make an effort.** The brain remembers better when we are interested in the subject, already know a little about it, and know we will need the information in the future.

2. **Find the most important information and organize it.** Your brain can process only a limited amount of information at one time, so don’t try to remember every detail. When studying a textbook, look for titles, headings, and illustrations to show you the main ideas.

3. **Make the new brain connections stronger.** One technique is to recite the ideas out loud in your own words. This is the most powerful way to transfer information from short-term to long-term memory. Another method is drawing a picture of the information to activate the visual part of the brain.

4. **Give the new material time to soak in.** Your brain has to build new physical connections. For this reason, it’s better to study for several short sessions than one long one. And cramming the night before a big test doesn’t help.

By understanding how the brain works, and following these four tips, you can make this your most successful academic year ever.

---

1. When you recite something, you say it aloud after practising or memorizing it.
2. When you cram for an exam, you try to study for it in a short space of time.
**Reading Comprehension**

**Check Your Understanding**

**A** Choose the correct answers for the following questions.

1. Which topic is NOT discussed in the passage?
   - a. short and long-term memory
   - b. how to study for tests better
   - c. why some people are very smart

2. According to the passage, what does drawing a picture do?
   - a. It puts information into short-term memory.
   - b. It shows people you are trying to learn.
   - c. It makes the connections in the brain stronger.

3. Which sentence is most likely to be true?
   - a. Reciting ideas out loud is better than drawing them.
   - c. It’s better to have information in your long-term memory when doing a test.

**B** Read the following sentences. Check (✓) true (T) or false (F).

<table>
<thead>
<tr>
<th></th>
<th>T</th>
<th>F</th>
</tr>
</thead>
<tbody>
<tr>
<td>1. When we learn new facts, we save them in our long-term memory.</td>

</tr>
</tbody>
</table>

**Critical Thinking**

**C** Discuss the following questions with a partner.

1. Which study techniques sound useful and which do not? Why? Have you tried any of them?
2. What other ideas do you have for how to study better?

**Vocabulary Comprehension**

**Words in Context**

**A** Choose the best answer. The words in blue are from the passage.

1. Some components of a healthy life are __________.
   - a. exercise and a good diet
   - b. more energy and better skin

2. Which of these are long-term plans?
   - a. having a family
   - b. going on holiday

3. You can transfer money __________.
   - a. at the bank
   - b. in your wallet
4 You need to make an effort if a task is __________.
   a easy   b difficult
5 If you use effective ways to study, your grades will get __________.
   a better   b worse
6 The structure of something is how it is __________.
   a used   b organized
7 One technique for remembering new English words is __________.
   a writing them in a notebook   b taking an exam
8 Which of these is an academic skill?
   a writing an essay   b baking a cake

B Answer the following questions, then discuss your answers with a partner. The words in blue are from the passage.
1 What are the main components of a computer?
2 What is a useful technique for taking good notes in class?
3 What do you think is the most effective way to manage stress?
4 What are your long-term goals when it comes to learning English?

A Look at the word web below. Are there other words you can think of to add to this web? Explain your diagram to a partner. How do your ideas connect to each other?

B On a sheet of paper, create a word web using one of the categories in the box below (or one of your own). See how many branches and words you can add. Share your ideas with a partner.

- travel
- music
- the future
- food

Vocabulary Skill
Word Webs

One helpful strategy that you can use to memorize new vocabulary is to create a word web. Word webs can help you remember the meaning of new vocabulary and relate this vocabulary to other words you know.
UNIT 1

CHAPTER 2 Oh, No! Not Another Test!

Before You Read

Too many tests?

A Think about answers to the following questions.

- a spoken English test
- a driving test
- a vocabulary quiz
- a test to get a job
- a piano or violin exam
- a school or university entrance exam
- a large international test like TOEFL® or IELTS®

1. Which of the tests above have you taken? Which ones are you planning to take?
2. Which do you find the most difficult? Why?
3. Which are the most important for your future?

B Discuss your answers with a partner.

Reading Skill

Identifying Main and Supporting Ideas

Every paragraph has a main idea, or topic. Often, you will find the main idea is given in the first or second sentence of a paragraph. Supporting ideas usually follow the main idea. Sentences with supporting ideas explain or give more information about the main idea.

A Read paragraph 1 of the passage on the next page. Underline the sentence that best describes the main idea. (Circle) at least one supporting idea in the paragraph. Discuss your answers with a partner.

B Skim the rest of the passage, then read the following sentences. (Circle) the sentence that best describes the main idea of each paragraph.

Paragraph 2
a. Multiple-choice style tests are not very effective.
b. Tests are easy to grade but the scores might not be useful.

Paragraph 3
a. Reformers say that other assessment methods are better than tests.
b. Group interviews and portfolios are two ways to assess a person’s abilities.

Paragraph 4
a. Some schools do not focus on giving tests to their students.
b. Students can learn from other students as well as their teachers.

Paragraph 5
a. New test methods will continue to develop.
b. There is no one best way to test learners.

C Read the entire passage carefully. Then answer the questions on page 18.
Think about the last test you took. How much of what you learned for the test do you still remember? Many people take tests to pass a course or get a promotion, but they often forget the information afterward! This is especially the case for people taking large international tests like TOEFL or IELTS. These tests usually involve multiple-choice questions, and people often study to increase their scores, not to learn important information. In fact, educators are divided on whether these kinds of tests are the most effective way to assess a person's abilities.

Those who support such tests say they are the only way for educators and employers to compare people based on their test scores. However, there are people trying to reform this system. They believe that standard tests aren’t the best way to measure a person’s ability. These reformers also believe that intelligent people are not always good at taking tests or memorizing facts. A multiple-choice test cannot always tell what people have learned, or whether they can apply that knowledge in the future.

Reformers believe that other types of evaluation achieve better results. Tests that contain a mix of written and spoken questions give a more complete assessment of what the person is capable of. A portfolio, or a collection of work done throughout a course, can show how much the student has improved individually. Group interviews, where a group of people are interviewed at the same time, can also be useful for employers, since they show how people interact with others.

Alternative educational institutions such as Montessori and Waldorf schools don’t believe that education should be focused on testing. At these schools, the classroom is very relaxed and “free,” with students learning from each other as much as they learn from teachers. Some of these schools even allow students to choose what they study. Teachers create activities designed to let students show their abilities or knowledge of a certain subject. In these schools, the focus is on learning by experiencing and doing things.

The debate on testing continues, and educators have yet to find a perfect method of evaluating learning. Until that day comes, old test methods will be used and new test methods will continue to develop. But one thing’s for sure, testing will continue to play an important part in all our lives—so study hard!
A Match the sentence parts to make correct statements.

1 _____ Multiple choice tests   a want to find better ways to evaluate students’ abilities.
2 _____ Portfolios              b let people demonstrate how they interact with others.
3 _____ Assessments             c have scores that are easy to compare.
4 _____ Educational reformers   d are examples of a student’s work.
5 _____ Group interviews        e are tests that measure how much a person has learned.

B Read the following sentences. Who would agree with each sentence? Check (✓) supporters (S) or reformers (R).

C Discuss the following questions with a partner.

1 Can you think of other alternatives to tests like TOEFL or IELTS?
2 Why do you think it is so hard to replace such tests with alternatives?

A Match each word with its definition. The words in blue are from the passage.

1 _____ apply       a discussion about opinions on a topic
2 _____ reform      b to judge or evaluate someone or something
3 _____ measure     c to talk to each other or work together
different than what is usual or expected
e to determine the size or amount of something
f to change or improve something
g remember something
h to use an idea or skill for a particular situation
B  Complete the following sentences with the words in blue from A. You
might have to change the form of the words.

1  You can tell she’ll be a good mother from the way she _________
with children.
2  In a school _________, two teams will discuss the benefits and
issues of a certain topic.
3  The new principal was considered a(n) _________ . His main goal
was to change the school’s testing system and make it better.
4  The only way to learn irregular verb forms is to _________ them.

A  Look at the following words and use the suffix -ize to write the verb
form next to each one. Use your dictionary to help you with spelling.

1  standard ___________
2  theory ___________
3  modern ___________
4  revolution ___________
5  fantasy ___________

B  Match each verb above to its definition below.

1  ___________ : to form an idea or explanation about something
2  ___________ : to imagine or dream of having things you desire
3  ___________ : to change the way of doing something completely
4  ___________ : to bring something up-to-date; to make it current
5  ___________ : to make things the same or to fit a certain measurement

C  Complete the following questions with a verb from A. Make sure you
use the correct verb tense. Then answer the questions with a partner.

1  What would you do to ___________ the look of your apartment?
2  Do you ever ___________ about where you will live in the future?
3  Do you think the Internet has ___________ the way people learn?

Motivational Tip: Using vocabulary skills. The vocabulary skills throughout this book can
increase your range of vocabulary and help you with your general reading. How can you apply these vocabulary
skills in your reading outside of class?
A Below are four common types of questions used in tests. Read the instructions for each item. Then answer each question.

1 Choose the word or phrase that best completes the sentence.
   Mary is (a nice/the nicer/the nicest) person I have ever met.

2 Circle the sentence that best describes the photo.
   a The man is looking for his key.
   b The man is watching television.
   c The man is getting dressed.
   d The man is putting clothes in a suitcase

3 Look at the word one in the sentence below. Underline the word or phrase that means the same as one.
   I don’t have a car now, but I want to buy one next year.

4 Write a sentence to describe the main idea of the passage below.
   When should a person begin learning a second language? Is learning a second language not spoken in the home really easier for children? While many people think children are able to learn new languages easily, many experts now believe that second language learning can be as difficult for many children as it is for adults.

B Discuss the following questions with a partner.

1 What do you think each question type above is testing?
2 Which instructions were easiest to understand? Why?
3 Which question is easiest to give a score to? Which question is hardest?

What do you think?

1 What effect do tests have on education in your country?
2 Why do you think we need to take so many tests in modern society?
3 How you would design the perfect test? What kinds of questions would it have?
Discuss the following questions with a partner.

1. What do you like to do on vacation? Relax on a beach? Go shopping in a city?
2. Look at the photos above. Where are you able to do these activities?
3. Which of the places above would you most want to visit? Why?
CHAPTER 1 We're in Vietnam!

Travel Knowledge

A Answer the following questions.

1 What do you know about Vietnam? Write a few words about each topic.
   a location  
   b climate  
   c cities  
   d history  

2 Vietnam is becoming a very popular destination for tourists. Can you think of any reasons for this?

B Discuss your answers with a partner.

Reading Skill

Scanning for Details

An important use for scanning is to find a piece of information that we need. We do this in everyday life when we look up a word in the dictionary, or check a telephone number in the phone directory. Use scanning when you need to find a fact in a reading.

A Scan the passage on the next page and find the dates of the four blog posts.

Post 1: ____________
Post 2: ____________
Post 3: ____________
Post 4: ____________

B Read each blog post quickly to find the following information.

Post 1: Which city did they go to first? ____________
Post 2: Where is the market that they visited? ____________
Post 3: How long did they go hiking for? ____________
Post 4: What is in Vung Tau? ____________

C Now read the entire passage carefully. Then answer the questions on page 24.

Motivational Tip: Expect success! As you begin this chapter, what success do you expect to achieve? Do you expect to increase your reading fluency? Do you expect to increase your vocabulary? Success comes when you identify what you want to achieve and then work hard to achieve it. I challenge you to set a reasonable goal and expect success.
Hue is a unique city with lots to see. I would love to stay longer, but Tom and I are both ready for the beach. Tomorrow we’ll take the train back to the south, and then we’re going to a town called Vung Tau. It has several beaches and is famous for crafts made out of seashells. Vietnam is an amazing country with so much variety—big modern cities, small traditional towns, mountains, jungles, and beaches. Two weeks here just isn’t enough.

Now we’re in the old capital city of Hue. After hiking around the Sapa mountains, it’s nice to have accommodation with electricity and a shower! Our trip to Sapa was long and exhausting. From there, we took a van to a small village in the mountains and went hiking for three days. The people who live there are called Hmong. They live a very basic life—no electricity or telephones. They don’t have many possessions, but they are the kindest, friendliest people I’ve ever met. Everyone smiles and says “hello.” Kathy and I can only speak a few words of Vietnamese, so smiling is the best way of communicating. This afternoon, we’re taking a walking tour in Hue. We’re going to visit the Forbidden Purple City, where the emperor lived.

Ho Chi Minh City is fantastic! The pagodas are fabulous and the different Buddha statues are wonderful to look at. We visited a market in Cholon, in the western part of the city, and saw an amazing range of fruits and vegetables. Everything was so colorful. We took hundreds of photographs! Later today we take the train north. We’ll stay in Hanoi for two days, then catch a bus to Sapa. Tom can’t wait to go trekking in the mountains.

Greetings from Vietnam! Tom and I arrived here this afternoon tired but excited. This is our first trip to Asia and the friendliness of the people is amazing. All the different sights and smells make us eager to try everything—especially the food! We’re looking forward to eating spring rolls and pho for dinner. Our hotel is cheap and very clean. The owners are friendly and helpful; they seem to like us. They gave us drinks when we arrived and have told us about some places that we shouldn’t miss. We plan to stay here in Ho Chi Minh City for a few days and visit temples in the city, then travel to the north.

Vocabulary Skill
Adjective Endings -ed and -ing

When we talk about how we feel, it’s common to use adjectives that end in -ed. To describe something, or how we feel about it, use adjectives ending in -ing.
Prepapring to Travel

A Think about answers to the following questions.
1. What are some risks or dangers of traveling abroad?
2. How can you prepare for a safe trip? What should you do during the trip?

B Discuss your answers with a partner.

Reading Skill
Predicting

A Look at the article on the next page. Read the title, the subheadings, and look at the pictures. Check (√) advice you think the article will give. Discuss your answers with a partner.

1. ☐ learn basic phrases of the local language
2. ☐ go to local markets for cheap shopping
3. ☐ check the dates on your passport
4. ☐ keep your luggage close to you
5. ☐ walk instead of taking taxis to see more
6. ☐ book accommodation online for better prices
7. ☐ make sure you have the correct currency

B Skim the article to check your answers. Were your predictions correct?

C Now read the entire passage carefully. Then answer the questions on page 28.

Motivational Tip: Pause and think. Before you answer the questions on page 28, pause and think. What was the most important information from this passage? How was it supported with examples? What do you now know that you didn’t know before reading this passage? When we pause and think after we read, our comprehension will increase.
Many travelers feel nervous about going to a new and unfamiliar place. If you plan your trip carefully and learn to take precautions, you can relax and enjoy yourself.

Check Your Paperwork

While you prepare for your departure, make sure your paperwork is organized. You'll want to check the dates on your visas and passport. Having an important document expire before or during your trip is the last thing you want to happen. Be sure to get an international driver's license if you plan to drive while you are abroad. Also, do some research on the local currency. Some countries—like Jamaica and—use more than one currency. It's best to know how and when to use each.

Mind Your Health

If you need to take medication along, keep it in its original container. If you are carrying prescription drugs, bring a letter from your doctor in case customs officials question you at your destination. Also, make sure that you travel with proper medical insurance so that if you are sick or injured while traveling, you will be able to get treatment.

Pay Attention

As a tourist, you'll probably stand out on the street. Unlike local people, you'll carry guide books, refer to maps, take photos, and look up at buildings. Because of this, you may appear vulnerable. Stay safe by keeping one eye on the amazing sights and the other on your personal items.

When you get into a taxi, make sure there is a meter and that it is turned on. If there is no meter, agree on a price before starting out. Tour guides recommend protecting your luggage in busy transportation areas by always keeping it in front of you or between your legs. Also, if you are going anywhere that requires purchasing tickets, be sure to buy them at an authorized location. Never purchase tickets on the street, as these are often overpriced, fake, or expired.

Learn About the Locals

It's always a good idea to buy a guidebook and a map, and read about the local culture of the country you will be visiting. For example, it's important to know that in India you should use the right hand to eat, or to give and accept things. In Thailand, it's rude to point with your feet at someone or something. Also, try to learn a few basic words and phrases of the local language.

Don't assume that everyone will speak your language or that they will understand English.

If you have trouble communicating, look for students and young people who might speak a foreign language. And remember to smile. It's the friendliest and most sincere form of communication, and is understood everywhere in the world.

Travel Tips for San Francisco

1. Don’t try to predict the weather. Bring a warm jacket and sweater so that you’re prepared for changes in the temperature; even in the summer months of July and August, it gets cold.
2. Buy a prepaid phone card. Many of the phone booths at San Francisco airport and in the center of the city only accept prepaid calling cards.
3. Pre-arrange your hotel stay—especially in the summer months. Don’t assume that it will be easy to find a room when you arrive. Hotels fill up quickly in San Francisco, particularly in the summer.
4. San Francisco is a great city for walking—but there are hills! Bring a comfortable pair of walking shoes if you’re planning to go around on foot. Also, you can prevent stiff muscles by stretching, or avoiding the hills on the first day.
5. There are many wonderful cultural events happening in San Francisco all year round. Go online to get a preview of events happening at the time of your visit.

B Write a pre- word from A for each definition below. Can you think of any other words that begin with pre-? Share your answers with a partner.

1. ____________________: ready for something before it happens

Before You Read
Making a Movie

Reading Skill
Using Headings to Understand Main Ideas

A Think about answers to the following questions.
1 Why do you think it usually costs so much money to make a movie?
2 What kinds of jobs are needed to make a movie? Why are these jobs important?

B Discuss your answers with a partner.

A Look at the title and subheadings of the passage on the next page. Then circle the correct word or phrase in each of the main ideas below.
1 Makeup artists help the actors and actresses (sound great / look different).
2 The prop master gets (objects / money) needed for the movie.
3 The special effects coordinator creates things that (are / are not) real.
4 Foley artists work with the things you (hear / see) in a movie.

B Now read the entire passage to see if your answers in A were correct.

C Read the passage again carefully. Then answer the questions on page 34.

CHAPTER 1 Behind the Scenes

Motivational Tip: Sit in a different seat today. In most classrooms, students sit in the same seat near their friends. Today, I challenge you today to sit in a different seat, next to someone you don’t know very well. In this class, when invited by your teacher, share what you are learning from today’s chapter with your new partner.
Who makes movies? Actors and directors, of course. But if you watch the credits at the end of a movie, you’ll find hundreds of other names and jobs. Most of the crucial people in filmmaking aren’t famous because they do their work behind the scenes. Here are four important jobs.

**Makeup artist: Making characters look believable**

The makeup artist’s work sounds simple, but there’s more to it than making the lead actress look beautiful. If the hero gets a cut on his face, the makeup artist must create that cut and ensure it looks exactly the same tomorrow and the day after. Some movies may require actors to look older or younger, or like a monster or a space alien. Putting on special makeup can sometimes take more time than the actor’s scene! For example, Jim Carrey’s makeup artist needed two and a half hours every day to transform him into his character for the movie, The Grinch. The audience should notice the character, and not the makeup.

**Property Master: Setting the scene**

The property (or “prop”) master is responsible for selecting parts of the set and costumes. This includes large items like furniture and vehicles, but also small items like tools and weapons. When you see a mother cooking breakfast for her kids, the prop master has chosen the stove, the frying pan, the plates, and almost everything else in the scene. For a prop master, details are everything. In the 2011 movie The Social Network, the prop master had to find the exact model of computer that Facebook founder Mark Zuckerberg used when he was studying at Harvard University back in 2004. Part of the job is also keeping track of every item purchased for the movie and making sure no item disappears during production.

**Special effects coordinator: Making the impossible look real**

After a movie, people often ask, “How did they do that?” In movies, people can fly, dinosaurs roam through cities, and spaceships travel to other planets. These are all the work of the special effects coordinator. This person is responsible for creating fires and explosions, rainy days, or snowy nights. Most special effects nowadays are made with computers. A big movie like Avatar took several years to make, and had many special effects companies working on different things. One company had about 120 people working exclusively on the look of the aliens on the planet Pandora.

**Foley artist: Creating the sounds of the cinema**

Think of your favorite scary movie and its sounds—footsteps, loud rain, and creaking doors. All of these are the work of the Foley artist. Many sounds can’t be recorded during the filming of a movie, so Foley artists produce them in their studios. They create the punching and kicking sounds of a fight scene, and the wind, rain, and thunder in the background. They often have unexpected methods—for example, to make the sound of bones breaking, Foley artists have recorded the sound of celery sticks being snapped in half. In a Foley artist’s studio, there might even be special floors for recording different kinds of footsteps. So next time you watch a film, be sure to look for these jobs in the credits. The movie wouldn’t be the same without these hardworking people!

Reading Skill

Recognizing Sequence of Events

Dates and times in a passage are often introduced with words like first, then, next, when, in, today, and finally to indicate the sequence of events. Recognizing the sequence, or order, of events can help you to understand the reading better.

A Read the following sentences about J. J. Abrams’ life and career. Without reading the passage, put the events in order from 1–6. Compare your ideas with a partner.

1. When he was 11 or 12, Abrams’ grandfather gave him a movie camera called a Super 8.
2. His movie success caught the attention of top filmmaker Steven Spielberg.
3. Abrams made his movie directing debut almost a decade later in 2006, with Mission: Impossible III.
4. Not long after the camera, Abrams’ grandfather gave him a box of magic tricks.
5. His next move was into television in 1998, when he helped create the popular TV series Felicity.
6. Today, the couple and their three children live near Los Angeles, California, where Abrams has his own production company called Bad Robot.

B Circle the words or numbers in the sentences that helped you choose the order. Then skim the entire passage to see if your answers in A were correct.

C Read the entire passage carefully. Then answer the questions on page 38.
THE RISE OF J. J. ABRAMS

J. J. Abrams was born in New York City in 1966. Growing up, Abrams loved mysteries and magic tricks—anything that was unexpected. His favorite movies and television programs were science fiction ones like *The Twilight Zone*.

When he was 11 or 12, Abrams' grandfather gave him a movie camera called a Super 8. He used the camera to make short movies with his sister and their friends. From then on, Abrams' ambition was to work in Hollywood and make movies and TV shows. He soon got his first opportunity at 16 years old, when he wrote music for a movie called *Nightbeast*.

In college, Abrams co-wrote and sold a screenplay to a Hollywood production company. He started gaining popularity for his work, and his next two dramas—*Regarding Henry* and *Forever Young*—were hit movies. Abrams continued to write and produce screenplays throughout his 20s, the biggest being *Armageddon*.

But Abrams never lost his passion for the mysterious and wanted to create shows like the ones he enjoyed as a child. His next move was into television in 1998, when he helped create the popular TV series *Felicity*. Some of his shows became huge hits, like the spy drama *Alias* and the Emmy-winning mystery thriller *Lost*. Abrams made his movie directing debut almost a decade later in 2006, with *Mission: Impossible III*. He then went on to direct science fiction movie *Star Trek* in 2009. His movie success caught the attention of top filmmaker Steven Spielberg. Together, they created the monster movie *Super 8*, named for the camera both men experimented with when they were young.

The Super 8 camera has proved to be very influential in Abrams' life, but there is another special gift that has helped Abrams become who he is today. Not long after the camera, Abrams' grandfather gave him a box of magic tricks. Abrams calls it a 'mystery box,' because he never opened it. He says he wants to preserve the mystery, and remind himself to create unexpected stories. To him, the box "represents infinite possibility. It represents hope. It represents potential."

Abrams has even used the box metaphor to describe movie theaters. "What's a bigger mystery box than a movie theater? You go to the theater, you're just so excited to see anything... mystery boxes are everywhere in what I do." The box remains a source of inspiration for Abrams, and he keeps it on a shelf in his office.

At a dinner party in 1994, Abrams met a woman named Katie McGrath and they got married soon after. Today, the couple and their three children live near Los Angeles, California, where Abrams runs his own production company called Bad Robot. He keeps busy, usually working on many projects at once, and is always looking to create more and more mystery boxes.
A Choose the correct answers for the following questions.

1 What kind of passage is this?
   - a biography  b a newspaper article  c a critical review

2 What can be understood from the passage?
   - a J.J. Abrams is no longer making movies.  
   - b J.J. Abrams has opened the magic box.  
   - c J.J. Abrams still enjoys making entertainment.

3 Abrams compares _____________ to his box of magic tricks.
   - a the love of a boy and his grandfather  
   - b the mystery of going to a movie theater  
   - c watching mystery television shows

Vocabulary Skill
Organizing Vocabulary

One helpful way to remember new words is to group them into meaningful categories, for example, by part of speech or by topic. Organizing your vocabulary can also help you to relate new vocabulary to other words you know.

Motivational Tip: Reading for pleasure. As a class, discuss what you are reading for pleasure—not because you are assigned to read it but because you want to. When you choose to make reading a regular part of your life, you will find greater levels of satisfaction.

Understanding the Use of Italics

Italics are used to distinguish certain words in a text from the others. We commonly use italics to emphasize or stress a word or phrase (I am not going), to set apart a word from others (What does station mean?), and to identify titles of books, newspapers, magazines, and movies.

A Why are italics used in each example below? Write a, b, or c.

- to set apart a word from others
- to emphasize or stress a word
- to identify a title

1. J. J. Abrams has been nominated many times for an Emmy Award, but he has only won once.
2. The Twilight Zone was a very popular science fiction television show.
3. Words like first, second, then, next, later, and finally indicate a sequence of events.

B Why are italics used in the movie review below? Explain your answers to a partner.

New Movie The Spirits Opens to Glowing Reviews

Scary and exciting are words that Big Screen magazine and viewers around the country are using to describe the movie The Spirits, which opened today in theaters everywhere. Set in a village outside London at the end of World War II, the movie tells the story of a woman living in a house visited by ghosts from the war. The movie is based on the book The Haunting of Powell Manor by Robert Johnston.

"I was really impressed," said moviegoer Diana Owens of Los Angeles. "It's a ghost story that will keep you guessing and jumping. At one point, a scene in the movie was so scary that everyone in the theater screamed." There's also a surprise ending to the story. "I won't tell you what it is," said Owens, "but pay attention to the word invitation in the movie."

C Write sentences of your own to show the three different uses of italics. Circle the words that should be in italics.

Fluency Strategy: PRO

PRO stands for Preview, Read, Organize. This reading strategy will help you build your reading fluency by helping you to organize and understand what you read.

Preview

The first stage of PRO is to preview the reading material by looking for features of the text that can help you. Read the title of the passage and any other headings. If any words in the passage are written in italics, read them. Read the first paragraph, the first sentences in the middle paragraphs, and the final paragraph. After doing this, stop for a minute and think about what the reading is about. Think about what you already know about the topic, and any questions you have that you hope the passage can answer.

Preview the reading passage on the next page, Are Human Beings Getting Smarter? What do you think the answer to the title question will be? Then skim the rest of the passage and write a list of questions you hope to answer as you read the passage in detail.

Read

Now, read Are Human Beings Getting Smarter? When you read, think about the questions you listed in the Preview stage. Look for answers to your questions.

Organize

The final stage of PRO is to organize the information in some way that will help you remember what you have read. One way is by creating a word web. The word web can help you easily see how the information in the passage is organized.

A Here is an incomplete word web based on Are Human Beings Getting Smarter? Complete the rest of the word web using the information in the passage.

Are Human Beings Getting Smarter?

Do you think you're smarter than your parents, and grandparents? According to James Flynn, a professor at a New Zealand university, you might be. Over the course of the last century, IQ test scores of people in some countries have gotten increasingly better—on average, three points better for every decade that has passed. This trend of improving scores is known as “the Flynn effect,” and scientists want to know what is behind it.

IQ tests and other similar tests are designed to measure general intelligence rather than knowledge. Flynn knew that intelligence is partly inherited from our parents and partly the result of our environment and experiences, but the improvement in test scores was happening too quickly to be explained by heredity. So what happened in the 20th century that led to higher test scores?

Scientists have proposed several explanations for the Flynn effect. Some suggest that the improved test scores simply reflect an increased exposure to tests in general. Because we take so many tests, we learn test-taking techniques that help us perform better. Others have pointed to better nutrition, which results in babies being born larger, healthier, and with more brain development than in the past. Another possible explanation is a change in educational styles—children are encouraged to discover things for themselves rather than just memorizing information. This could prepare people to do the kind of problem-solving that intelligence tests require.

Flynn himself suggested that learning new technologies may have improved people’s problem-solving skills. This may be true for the first decade of his tests, when IQ scores in many countries increased. However, in recent years, IQ test scores in some countries have begun to decline. Data from Norway, the Netherlands, Australia, and Great Britain have shown that as these countries become more and more modern, IQ scores have begun to drop.

While scientists aren’t sure what’s causing this decline, they think technology is dramatically changing the way that we learn and get information. For example, people are now able to access all kinds of information very easily using online resources like Google or Wikipedia. The danger is when they start to rely too much on these sources of information, and not do any thinking for themselves. Lifestyle changes that come with modern technology may also have a negative effect on intelligence, such as video games and television making people less social. So while the world may have gotten smarter over the 20th century, improving technology and changing lifestyles may soon reverse that trend.

1 Heredity is the process by which features and characteristics are passed on to you from your parents through your genes.
B Choose the best answer for the following questions. Use the word web from A to help you.

1. What best describes the Flynn effect?
   a. a way to measure intelligence
   b. an increase in IQ test scores
   c. a way of teaching university students
   d. an explanation for why people are less smart

2. The Flynn effect is probably the result of _______.
   a. heredity
   b. our environment and experiences
   c. taking fewer tests
   d. memorizing information

3. IQ tests evaluate our _______.
   a. knowledge
   b. environment
   c. intelligence
   d. memories

4. Who does others in line 14 refer to?
   a. babies
   b. scientists
   c. people in general
   d. people who take tests

5. Which sentence gives the main idea of the passage?
   a. This trend of improving scores is known as “the Flynn effect,” and scientists want to know what is behind it.
   b. Because we take so many tests, we learn test-taking techniques that help us perform better.
   c. However, in recent years, IQ test scores in some countries have begun to decline.
   d. Lifestyle changes that come with modern technology may also have a negative effect on intelligence.

6. The writer uses video games as an example of how _______.
   a. we are becoming less social
   b. technology can increase problem-solving skills
   c. people don’t think for themselves
   d. countries are becoming more technologically advanced

7. Which statement would the writer probably agree with?
   a. People today are more intelligent in every way.
   b. People today have fewer problems to solve.
   c. People today don’t take enough tests.
   d. People today use computers too much.

Answer the following questions.

1. Have you ever used the PRO method before?
   - Yes
   - No
   - I'm not sure.

2. Will you practice PRO in your reading outside of English class?
   - Yes
   - No

6. What have you read in English outside of class recently?

7. What distractions do you face when you read? What can you do to minimize those distractions?

8. How will you try to improve your reading fluency from now on?
When a popular book gets made into a movie, there will always be a debate about whether the novel or film is better. The filmmakers always have to consider certain things: do they want to follow the book closely to please dedicated readers, or do they want to change parts of the book if they don’t translate well on-screen? No matter what they do, there will always be people who feel the movie will never be as good as the book, people who will love the movie without ever reading the book, and people who enjoy both.

The vampire series Twilight, by Stephenie Meyer, became so popular that movie companies wanted to produce it for the big screen. Most Twilight fans were excited about seeing characters such as Edward and Bella ‘come to life,’ but there were other fans who did not trust the movie script. They assumed the scriptwriters would change parts of the story to make it seem more interesting as a movie.

By the time the first Twilight movie was released, millions of people had read the series. Many of these people went on to watch the film, which made $35.7 million just on its opening day. While many fans and critics liked it and said the movie more or less followed the book’s storyline, some fans were not impressed. One change that angered them was that certain sound effects were added to the movie, such as a ‘whooshing’ sound when the vampires jumped. This was not mentioned in the book, and many fans felt that it was too distracting.

Those who liked the movie said they enjoyed the light mood and excitement. This was very different from the book. The writing in Twilight is dark and gloomy, like many vampire novels. The movie, however, added more energy to the story and more personality to the characters. For example, many characters in the book are portrayed as being quiet, and they spend most of their time at school. But in the movie, the characters are cooler and funnier—one scene even shows them going surfing together. The director of the first movie, Catherine Hardwicke, thought it was important for the characters to be believable. She wanted them to have a wide variety of emotions, since the series is for, and about, teenagers.

In the end, the films were considered a success, even if there were both happy and unhappy fans. It’s a great accomplishment to make films that are watched by millions of people, and you can’t expect to be able to please everyone all of the time.

   a a comparison of a book and a movie
   b a review of a movie
   c an introduction to a book
   d a discussion of how books are made into movies
In 1971, Sue Coppar sold worked as a secretary in London. While she enjoyed city life, Sue also misses the countryside where she spent most of her time as a child. So she offered to help out on a farm, or more specifically, an organic farming program organized by a nearby college. She got a few people to volunteer as well, and they spent the weekend doing ‘housework,’ which involved clearing bushes and cleaning drains. Afterwards, the farm managers said they could come back anytime to help out.

Sue put a small ad in a magazine, offering people the chance to volunteer at the organic farm. The volunteer program grew quickly, and soon other organic farmers joined in, asking for people to help out. With so many people and farms involved, someone needed to organize the different groups. A few of the original volunteers started WWOOF (World Wide Opportunities on Organic Farms) to help volunteers and farmers find one another. Today, at least 50 different countries have WWOOF organizations, and many other countries have individual farms that participate in the movement.

While WWOOF is still a weekend activity for some, it now welcomes travelers and people who wish to live and work on farms for longer periods of time. WWOOF volunteers can stay on a farm for weeks or even months at a time in exchange for hands-on farming and gardening experience. The work can be exhausting, but volunteers think it’s worth it. By working on farms, the volunteers interact with farmers and develop a love for the outdoors and organic farming. Many travelers now use WWOOFing as a way to visit new countries and experience new cultures.

As travelers will discover, every WWOOF opportunity is a bit different. In Serbia, you can find Misa and Olja, a couple whose farm is known for its hard cheeses and for its bread made from homegrown grains. Finca Amiruca, a farm in Ecuador, teaches volunteers how to grow peanuts, plantains, and yucca. When volunteering in Japan, you may get to learn about growing rice.

WWOOF is only one of the many unique volunteer opportunities available. Volunteering is something that anyone can do, and a wide variety of organizations accept or even welcome volunteers. So the next time you get the itch to be active on the weekend or on vacation, why not look for a good cause to spend your energy on?

### Reading Skill

**Previewing**

Previewing involves skills like skimming, scanning, and predicting in preparation for reading a new passage. Ask yourself questions like: What is this about? What kind of text is this? What do I already know about it?

Take one minute to preview the reading passage. Think about the title and the picture, scan the passage for interesting information, and skim the first and last paragraph.

Now discuss the following questions with a partner.

1. What do you think the passage is about?
2. What do you already know about this subject?
3. What is interesting or special about Laura Dekker?

Read the entire passage carefully. Then answer the questions on page 52.
All athletes aspire to be the best in their sport, and young athletes are no different. More young athletes now aim to win competitions, set records, or perform amazing feats. And some, like Dutch sailor Laura Dekker, achieve that goal.

As a child, Laura Dekker loved the sea. She was born on a boat in New Zealand, and has hardly stepped off one since. Laura first sailed by herself at age six, displaying a talent for understanding her boat and the confidence to control it. At 13 years old, Laura felt ready for the biggest challenge of all: she wanted to set the record for the youngest person ever to sail around the world alone.

Before she could do that, she had to face many challenges. While her parents were confident that she could do it, the Dutch government tried to stop her, arguing that she was too young to risk her life. Many people also felt that she should be focusing on her studies. After a long battle, she finally got permission. She had to go for classes to learn how to care for herself while alone at sea, and had to use a bigger boat than she was used to. To avoid falling behind in her studies, she had to sign up with a special distance-learning school and promise to do her homework at sea.

Finally, at the age of 15, Laura was ready. On January 20, 2011, she set out from the island of St. Maarten in the Caribbean on her 38-foot (11.5-meter) sailboat, Guppy. Her trip lasted 500 days in total, partly because she had to stop at different ports to study and check her boat. During this time, she visited exotic islands like the Galápagos, Bora Bora, and Vanuatu, and also found time to go surfing, scuba diving, and cliff diving. She even discovered a new hobby: playing the flute! Laura was alone for most of her journey, but she kept a blog that was read by many people around the world.

Laura returned to St. Maarten at the age of 16 years and 123 days, and was greeted by her family, friends, and many fans. She had become the youngest sailor to circle the globe alone. However, Guinness World Records and the World Sailing Speed Record Council did not verify her claim, saying they no longer recognize records for youngest sailors because it could encourage other young people to do dangerous things. Despite this, Laura felt a sense of achievement. She said that spending so much time alone on her trip helped her to focus on the important things in her life. "I became good friends with my boat," Laura said. "I learned a lot about myself."
A Choose the correct answers for the following questions.

1 Which is NOT a reason people were against Laura's trip?
   a It would cost too much money.
   b It would cause her to miss school.
   c It was too dangerous for a young girl.

2 What do you think the line in paragraph 2, *She was born on a boat in New Zealand, and has hardly stepped off one since* means?
   a Laura has always lived on a boat.
   b Laura decided to live in New Zealand.
   c Laura has had a passion for sailing since she was very young.

3 What is the main idea of the last paragraph?
   a Laura had many problems trying to get her record recognized.
   b Laura felt her trip was successful despite all the problems.
   c Laura liked spending time alone on her boat.

Vocabulary Skill
Verbs Used to Talk about Sports and Games

When we talk about participating in sports and games, we use the verbs play, go, or do before the name of the sport or game, for example, Let's play baseball; Let's go skateboarding; Let's do karate.

Motivational Tip: Are you applying yourself? Are you giving your best effort? When we are honest with ourselves, often we recognize that we could be doing more to achieve our best. On a scale of 1–10 (1 = low effort, 10 = high effort) where would you rate yourself in terms of applying your effort in this unit? If your effort falls between 7–10, congratulations, you are doing well! If it’s below 7, what could you do to apply yourself more?

**Predicting**

> When we know the topic of a passage, we can use it to predict the kind of words or information we might read. Using this skill can help us to understand what we will read about.

A Look at the title and picture in the passage on the next page. The passage is about a female athlete who became very successful at a young age. Check (✓) what you think the passage will mention.

- [ ] physical strength
- [ ] the right body type
- [ ] the right personality
- [ ] a supportive family
- [ ] good luck
- [ ] good coaches and training
- [ ] hard work
- [ ] lots of money

**B** Now skim the passage to see if your answers in A were correct.

**C** Read the entire passage carefully. Then answer the questions on page 56.
The Unbeatable Yani Tseng

Yani Tseng is one of the brightest stars of the golfing world, not to mention a superstar in Taiwan, where she grew up. By the age of 22, she had achieved things most golfers can only dream of. She had been named LPGA Player of the Year twice, and was the youngest professional golfer—male or female—to win five major tournaments.

Yani started playing golf when she was very young, thanks to her enthusiastic parents who are both golfers. Her father gave her a set of golf clubs when she was only five years old. At 13 years old, she told him she wanted to take up golf as an occupation. Just one year later, Yani won the Callaway Junior World Golf Championships and went on to become the top amateur player in Taiwan. She finally started playing in professional tournaments when she was 18 years old, and then her career really took off.

Brittany Lang, who came second to Yani at the Women’s British Open in 2011, calls her “unbelievable.” She says Yani is “so mentally strong and she’s so aggressive and confident. She’s just got it all. It’s pretty cool to watch.”

But Yani was not always so confident, especially off the golf course. When she first left her home to start playing in international tournaments, she didn’t speak English very well. She struggled to communicate with other golfers and had to use an interpreter for interviews. Because she was shy about her English, Yani had a reputation as a very quiet person. Yani’s coach, Gary Gilchrist, says that studying English has helped Yani change this. “She worked so hard to improve her English,” said Gilchrist. “Now her confidence is a 9 on a scale of 10.”

Today, Yani is well known for her big smile and sense of humor. She loves to chat and joke with reporters, fans, and other golfers. Once, before a tournament near her home in Florida, Yani invited a number of golfers and golf reporters to her place for a dinner party. Halfway through the party, she decided to dress up as Harry Potter, and even gave a speech wearing her black coat and round spectacles.

As a teenager, Yani looked up to adult golfers like Annika Sorenstam and saw them as her role models. Today, she herself hopes to inspire young girls to take up golf, the same way Sorenstam influenced a whole generation of woman golfers. Yani is also an inspiration to people trying to pick up English. Her advice to English learners: “Keep talking. I’m not afraid to be talking to other people, no matter what I say. I’m learning from the way [I talk] to you, and the vocabulary, I use it for the next time [I talk].”

1 An interpreter is someone who translates from one language to another.
2 Your reputation is the opinion people have of you.
A  Choose the correct answers for the following questions.

1  Which event happened first?
   a  Yani began playing golf.
   b  Yani moved to the United States.
   c  Yani turned 13.

2  How did Yani change after learning English?
   a  She became more confident.
   b  She began studying other languages.
   c  She became more interested in golf.

3  Which is NOT mentioned as helping Yani speak better English?
   a  She talks to people in English.
   b  She learns vocabulary and tries to use it.
   c  She takes lessons with her interpreter.

B  Read the following sentences. Check (√) true (T) or false (F).

1  Yani won major tournaments before she turned professional.
2  Yani's parents supported her interest in playing golf.
3  Brittany Lang beat Yani in the Women's British Open.
4  Yani asked people to dress up as Harry Potter for her party.
5  Annika Sorenstam says Yani is one of her role models.

C  Discuss the following questions with a partner.

1  Do you think athletes make good role models? Why, or why not?

Reading Skill
Identifying Main Ideas within Paragraphs

Every paragraph has a main idea, or topic, which gives us the most important information in that paragraph. The main idea is often mentioned in the beginning or concluding sentence of the paragraph.

A Skim the first paragraph on the next page. Circle the sentence that describes the main idea. Discuss your answer with a partner.

a Many facts about your body are surprising.
b Your body is mostly made of water.

B Skim the rest of the paragraphs. Circle the main idea for each paragraph.

Paragraph 2
a Your body is very complicated, like a machine.
b Your body can develop many different problems.

Paragraph 3
a Stress can cause many health problems.
b We do many things that can damage our bodies.

Paragraph 4
a Doctors can treat many health problems that come with old age.
b Modern medicine helps people live much longer than in the past.

Paragraph 5
a The most important habit for good health is regular exercise.
b We can do many things to take care of our bodies.

C Now read the entire passage carefully. Then answer the questions on page 62.
Did you know that your small intestine is nearly six meters long? Or that there are about 60 muscles in your face, and you use 40 of them to frown but only 20 to smile? How about the fact that our bodies consist of 73 percent water, and that our hearts beat over 100,000 times each day? You really are amazing!

The human body is a complex machine. From the day we are born, our bodies grow and change in response to our environment, diet, and habits. The body has many different organ systems and parts that work together to allow us to breathe, move, see, talk, and digest food all at the same time. Most of the time we are unaware of what is happening in our bodies; usually it is only when we get sick or feel pain that we notice.

Many people do not take care of their complex machines. Bad habits like smoking, drinking too much alcohol, and eating junk food damage our bodies. Stress can also cause health problems. People who worry a lot or have busy jobs often don’t get enough sleep, or don’t eat properly. We also can damage our bodies when we play sports or get into accidents. Studies done by the Australian government show that most people get hurt because of an accidental slip or fall, or because of injuries from car accidents. It’s true that a lot of people go to hospital because of serious illnesses, but far more people end up there because they simply weren’t being careful.

Like machines, different body parts sometimes wear down from old age. People over the age of 65 are more likely to fall and hurt themselves, and these injuries—from bad cuts to broken bones—usually require serious medical attention. Due to the increase in the population of elderly people, gerontology is now one of the fastest growing areas of medicine. There are many treatments available to help older people recover from illness and injury. It is now common for older people with damaged joints, for example, to have surgery to replace the old joint with a new one made of plastic or metal. Instead of suffering aches and pains through their retirement days, older people are able to lead happier and more comfortable lives.

As with any machine, the better you take care of it, the longer it will last. The best way to take care of your amazing machine is to eat the right foods, do regular exercise, and get enough sleep. Oh, and don’t forget to smile!

1 When you frown, you make an angry or unhappy expression with your face.
2 An organ is a part of your body that has a special function, such as your heart or lungs.
3 Your stomach digests food by breaking it down and taking what it needs for your body.
A Choose the correct answers for the following questions.

1. The writer lists facts about our body in paragraph 1 to ___________.
   - a. show us how amazing our bodies are
   - b. test our knowledge about the body
   - c. remind us to take care of our body

2. Why does the writer say that we are unaware of what is happening in our bodies (line 13)?
   - a. We still don’t know much about how our bodies work.
   - b. Our body works so smoothly that we don’t notice it.
   - c. We don’t really care about what happens in our body.

3. Doctors who study gerontology focus on ___________.
   - a. doing research on the population of elderly people
   - b. creating technology for bones and joints
   - c. improving the health of older people

B Circle the correct answer to complete each sentence.

According to the passage . . .

1. Most people know (a lot / very little) about their bodies.
2. Most visits to the hospital are caused by (bad habits / accidents).
3. Our body is compared to a machine because it (is expensive to fix / has many complicated parts).
4. (Children / Old people) have the most accidents and health emergencies.

C Discuss the following questions with a partner.

1. The article talks about ways that our bodies are similar to machines. How are our bodies different from machines?
2. What advice would the writer give to readers who want to be healthier?

A Choose the best answer. The words in blue are from the passage.

1. Which is an example of an illness?
   - a. a broken leg
   - b. a bad cold

2. What does surgery involve?
   - a. giving medicine
   - b. cutting open a body

3. Which would make you suffer?
   - a. an injury
   - b. a treatment

4. A cake consists of ___________.
   - a. flour and eggs
   - b. mixing and baking

5. Your body needs ___________ to breathe.
   - a. air
   - b. food
6 Which is an example of an injury from a car accident?
   a broken glass   b a broken leg
7 Which machine is more complex?
   a a computer   b a coffee maker
8 One treatment for a headache is ________________.
   a resting       b listening to loud music

B Answer the following questions, then discuss your answers with a partner. The words in blue are from the passage.
1 Name a serious illness: What does it do to the body?
2 How long can you hold your breath?
3 What was the worst injury you've ever had? How did it happen?
4 Suggest a treatment for a stomachache.

Vocabulary Skill
Nouns Ending in -logy/-ology

Learning the meanings of root words and suffixes can help you increase your vocabulary. In this chapter, you saw the word gerontology. The word is made up of the root word geronto, which means old person, and the suffix -ology, which means the study of.

Motivational Tip: Set high expectations! Why are you studying English? Why is reading an important part of learning English? Five years from now, what do you hope to be doing in English? These questions can help you set higher expectations, or goals, for yourself.
Before You Read

Motivational Tip: What do others say about learning English? Have you read anything recently in a newspaper or a magazine about the importance of being a good reader? Who made the statement? Many influential people want to improve reading skills among people in their country. Do the leaders in your country have the same goals? How can you support those goals?
The human body is an amazing thing. People can train themselves to achieve unbelievable feats, from setting Olympic records to finding ways to overcome physical disabilities. Ben Underwood is a great example of someone who trained his body to do something incredible.

At the age of three, Ben went blind from retinal cancer, a type of eye cancer. When Ben was about five years old, his mother noticed him making a clicking sound with his tongue that seemed to help him understand his surroundings. This skill, known as echolocation, is normally used by animals with very sensitive hearing, like dolphins and bats, for communication and to find food. They make sounds and listen for the echo made when the sound waves hit an object and bounce back. Doctors tested Ben’s hearing ability, but found it was normal. If Ben did not have superior hearing, how was he able to use echolocation?

Doctors used to believe blind people developed a sharper sense of hearing to help them overcome their loss of sight. Doctors did tests to try to confirm this, but just like in Ben’s case, the research showed that the test subjects generally had normal human hearing. It was through brain scans that doctors began to understand the phenomenon of echolocation. The scans show that when a blind person hears an echo, the parts of the brain that are related to vision are stimulated.

So even though blind people can’t see with their eyes, their brains are able to determine the shape and size of nearby objects. They move around an object, clicking and listening, to better understand its shape. This refines the picture of the object in their minds. In this way, blind people come to “see” their environment.

By the time he was a teenager, Ben Underwood could safely ride a bike and skateboard around his neighborhood using echolocation. Of course, it took Ben years of training his mind and his senses to overcome his lack of sight. Sadly, Ben passed away in 2009 at the age of 16, but he remains a shining example of people are capable of if they are determined enough.

1 A disability is a permanent injury or illness that affects the way someone can live their life.

You have the following problems. Using the page from the phone book above, write the phone number of the doctor you should call.

1 __________ You have a toothache.
2 __________ You can’t read, so you need new glasses.
3 __________ Your sister is going to have a baby.
4 __________ You’ve been getting spots all over your face.
5 __________ You’ve been feeling really nervous and upset recently but you don’t know why.
6 __________ The sides of your feet hurt when you run.

What do you think?

1 Why don’t many people take good care of their bodies?
2 What more can you do to take better care of your health?
3 Do you think people are held back by their physical limitations or their mental limitations? Why?
Discuss the following questions with a partner.

1. Look at the pie chart above. Which activities involve leisure time?
2. What activities do you do in your leisure time?
3. How do you spend your day? Make a pie chart using your own information.

Finding Definitions

Sometimes a passage will give definitions or explanations of words that are related to the topic. The definitions may be shown by quotation marks """, parentheses ( ), or a dash -. When you find a new word, look carefully to see if the author has explained its meaning.

**CHAPTER 1 Scrapbooking**

A Think about the answers to the following questions.

1. Do you have many photos of your family and friends? Where do you keep them? Do you look at them often?
2. When you go on vacation, what do you keep to remember your trip?
3. Did your parents save any letters, documents, and photos from your childhood? Do you ever look at them?

B Discuss your answers with a partner.

A Look at the first paragraph of the passage on the next page and find the meaning of the word scrapbook.

B Read the rest of the article and write the explanations for these terms.

What can you learn from making mistakes that will help you improve your reading?
The dictionary defines a scrapbook as "an empty book for collecting and preserving photographs, newspaper articles, and other papers." Today, scrapbooking is also a verb—and a popular new hobby. We talked with Diane Lucas, who runs a scrapbooking club.

**What is scrapbooking exactly?**
When I make a scrapbook page, I take a few of my family photos and put them into a "layout," which is a page that uses fancy paper, stickers, drawings, and words to show the theme.

For example, I'm working on a page about my son called "First Day at School," so there's a photo of him and one of his drawings, and I decorated it with alphabet stickers. I use lots of things on my pages—ribbons, stickers, beads, and much more. When you make a scrapbook, you put words and pictures together to show the important times in your life. It's like a personal history.

**How did you get started?**
When I was a child, I always saved bits of paper. Things like movie tickets, vacation postcards, and even paper napkins. I loved looking at them and remembering. I made my first scrapbook ten years ago when my father died. When I looked through his desk, I found the most wonderful things—like my parents' anniversary cards and photos from his army days. I couldn't throw away anything, so I made two scrapbooks, one for my brother and one for me.

**How do you learn about new scrapbooking techniques and trends?**
The Internet is a great resource for new ideas. Many new "scrapers"—people who make scrapbooks—work from their computers, using digital photos and special software. But my favorite place to get new ideas is at scrapbooking trade shows. These shows feature new materials and techniques, offer workshops, and are a great way to meet people with the same interests.

**Why is scrapbooking so popular these days?**
I think people want to preserve their family history and display it for other people to see. When you make a scrapbook, you can pass the stories on to your children and your grandchildren. So many people today want to do that! In the U.S. alone, there are 2,500 LSS's (sorry; that's Local Scrapbooking Stores!) that sell paper and other supplies for scrapbooking. If you go online, you'll find scrapbooking websites from Norway, New Zealand, and South Africa. It's universal. We all have boxes of pictures and we all want to keep those precious memories. That's the real meaning of scrapbooking: sharing your family experiences and your story.
A Choose the correct answers for the following questions.

1 Which would you probably NOT put in a scrapbook?
   a pictures of your graduation ceremony
   b your household electricity bill
   c a poster of the concert that you performed in

2 When did Diane Lucas make her first scrapbook?
   a ten years ago, after her father died
   b on her parent’s ten-year anniversary
   c on her son’s first day at school

3 According to the last paragraph of the passage, which is true?
   a People prefer to buy scrapbooking supplies online.
   b Scrapbooking is more popular in South Africa than Norway.
   c People all over the world are taking an interest in scrapbooking.

B Read the following sentences. Check (√) true (T) or false (F).

1 A scrapbook page usually has a theme.
2 People use a scrapbook to help them plan their future.
3 People attend trade shows to learn new scrapbooking techniques.
4 Most scrapbooks are about national history.

B Now read the entire passage carefully. Then answer the questions on page 76.
It used to be that if you wanted to watch a sitcom or a sporting event, you’d have to watch it from your television. As Internet technology improves, more and more shows and movies are becoming available online. Broadcasting companies are putting their primetime shows directly on the Internet, and movie rental stores are converting their DVD collections to digital libraries.

This is probably a good change—at least for viewers. People can now pick exactly what they want to watch, and decide when and how they want to watch it. A study done by Harris Interactive found that more than half of Americans (56 percent) surf the Internet while “watching” television, and approximately 40 percent say that they read blogs or go on social networking sites at the same time. But this trend could be a problem for television stations. Advertisers aren’t getting a response from viewers, and they don’t want to pay money if their commercials aren’t being seen. In contrast, people who watch things online seem more engaged with what they watch. They read and write comments on the show, they look up details about the show, and they are less likely to ignore commercials. For broadcasters, online viewers may turn out to be more loyal fans.

Changing people’s habits takes time. Even though many people are interested in watching television on the Internet, some may not want to make the switch completely. And some might be persuaded to, but only under certain circumstances. According to Harris, almost half of television viewers (44 percent) would cancel their cable television if they could get the same programs for free online. However, the number fell to 16 percent when people were told they had to pay a small fee for online viewing. This is strange, since most household’s monthly cable bills are the same or even more than what they would pay for the same shows online. It’s possible that people have become so used to getting online entertainment for free that they learn not to value it as much.

Even with growing interest in online entertainment, people still think it is important to watch television shows with their friends and family. People used to think that watching television would make families spend less time together, but it actually brought families closer for a few hours each night. Now it’s feared that viewing shows online could make people more isolated. Who knows? Perhaps as online programming becomes more popular, people will find a way to make it into a social activity.

1 A broadcast is a television program. Broadcasting companies create and sell these programs.
2 Primetime is the time period when the most number of people are watching TV, usually between 6 pm and 10 pm on weekdays.
A Choose the correct answer for the following questions.

1 The writer puts quote marks around *watching* in line 12 to show viewers
   a are not happy watching shows on television
   b are not paying attention to what they watch
   c would prefer to watch shows on the Internet

2 Which is NOT mentioned as proof that online viewers are more loyal?
   a They are willing to pay money to watch shows.
   b They watch the commercials during the show.
   c They want to find out more about the show.

3 What does the line *people have become so used to getting online entertainment for free that they learn not to value it as much* mean?
   a Online entertainment is becoming much more expensive.
   b The quality of online entertainment is not as good as on TV.
   c People feel they should not pay for something they used to get free.

B Read the following sentences. Check (√) if they are true for television (T) or the Internet (I).

Real Life Skill
Using Key Words for Internet Searches

Before you begin to search for information on the Internet, ask yourself, "What am I looking for?" To find information about a specific topic (e.g., the origin of pop music), you should use key nouns, verbs, and adjectives. Think of some key word synonyms that might also help you find information about your topic.

A You have to do some Internet research for an essay with the topic The Origins of Pop Music. Can you think of more key words you can use?

Key words: origins, beginning, pop music, pop songs

B Look at the following topics. Circle the key words you would use for your Internet research. Then write other words which would be useful. Compare your ideas with a partner.

1. learning how to use a digital camera to take photographs
   Other words: ________________________________
2. keeping tropical fish in an aquarium at home
   Other words: ________________________________
3. simple recipes for beginners to learn cooking
   Other words: ________________________________
4. biographies of film actors and actresses
   Other words: ________________________________

C Choose one topic from B and do an Internet search using your key words. Share any useful websites you find with your classmates.

Topic: ________________________________
Sites that were useful: ________________________________

Can the information on a website be trusted? Remember to ask yourself:

- Who wrote the information? How experienced are they in the topic?
- Are there many facts, or is the information mostly the writer's opinion?
- When was the information written? Is it up-to-date?
- Does the website provide links to other useful websites?

Motivational Tip: How can this be applied beyond the textbook? Reading is a very important life skill and is used every day to accomplish real life tasks. How can the real life skill of doing research on the Internet be used in everyday life?

What do you think?

1. How has modern technology changed the way people spend their leisure time?
2. Do people in your country have enough time for leisure? Why, or why not?
3. What leisure activities are popular with young people in your country? Which are popular more with older people?
Fluency Strategy: PQR+E

Parsing, Questioning, Rephrasing, and Explaining (PQR+E) is a reading strategy to help you build your reading comprehension in stages from sentences to paragraphs to full texts. Use this strategy when you have difficulty understanding large pieces of text that you are reading.

Parsing

The first step in PQR+E is parsing—breaking a sentence into smaller parts. When you come to sentences that are long or difficult to understand, try parsing them into smaller pieces.

A Look at one way the first sentence in the passage on the next page, Movies for the Blind, can be broken into smaller parts. Doing this can make it much easier to work out the overall meaning of the sentence.

When you think of the cinema, the phrase watching a movie probably comes to mind, and, indeed, moviemakers work very hard to make their films interesting visually.

B Now look at another sentence of the passage. Parse this sentence by dividing it into smaller parts.

Movies also contain dialogue, music, and sound effects—things that people don’t need to see in order to enjoy.

Questioning

The second step in PQR+E is questioning. Once you have finished parsing a long sentence, ask yourself questions about the parts of the sentence. What do you understand? What do you not understand?

Review the first two sentences from Movies for the Blind. What questions do you have as you read them? Read the example question for the first sentence, then write your own for the second sentence.

1 How are movies interesting, besides visually?
2
Rephrasing

In step 3 of PQR+E, rephrasing, write in your own words what the sentence you parsed means. Rephrasing helps you show that you have understood what you have read.

Read the example paraphrase of the first sentence of *Movies for the Blind*. Then write in your own words what the other sentence means to you.

1. **When people think about movies, they mostly think about the visual features.**
   - The visual features of movies are also very important to filmmakers.

2. 

Explaining (or Extending)

In the final step of PQR+E you explain what you have understood to a partner. Explaining what you understand to someone else helps strengthen your comprehension.

A. Explain the meaning of the two example sentences from *Movies for the Blind* to a partner.

B. Use PQR+E as you continue reading the passage, especially if there is a sentence you do not understand.

---

**Movies for the Blind**

When you think of the cinema, the phrase *watching a movie* probably comes to mind, and, indeed, moviemakers work very hard to make their films interesting visually. They may use elaborate costumes, beautiful locations, or amazing special effects to tell a story. An actor’s expression or movements can also sometimes say more than words.

But what about people who are blind or have trouble seeing? Movies also contain dialogue, music, and sound effects—things that people don’t need to see in order to enjoy. Movie reviewer Marty Klein, who is blind, created a website called Blindspots to help people choose movies that they can follow without the help of someone explaining what is happening on the screen. He gave a rating, from 1 to 10, based on several things. A movie received a high rating if it has only a few main characters whose voices are easy to recognize. Klein also liked interesting stories without too many changes in time and place. A large amount of dialogue between the characters was better than long silences or noisy action scenes. His reviews are still online, but the site is no longer updated.

Another blind movie reviewer, Jay Forry, maintains the website Blindside Reviews. He also writes for newspapers and is a guest on radio shows. Forry gives movies one of five ratings, including, “So good, blind people like it” and “I'm glad I couldn’t see it.” Forry became a writer after going blind at the age of 28, and his writing skills and sense of humor are what keep people reading his reviews or listening to him on the radio. After “watching” the animated movie *Up*, Forry commented that he wished he, too, could have a talking dog to tell him to watch out for cars and not “go into the ladies’ restroom again.”

Sometimes, though, it’s nice to go to a movie without reading reviews and knowing what to expect. Some movie theaters have begun to offer recorded audio descriptions of the movements, scenery, and special effects so that blind moviegoers can follow what other audience members see on the screen. They usually receive a wireless headset to wear during the movie. This allows them to listen to the narration while still hearing the movie’s music and other sounds that surround them in the theater. Jay Forry also notes that modern theaters now have excellent sound systems, something he appreciates more than the average moviegoer.

In the end, going to the movies should be a fun and exciting experience—for both the sighted and the blind.
C Answer the following comprehension questions.

1 What is the main idea of the article?
   a Jay Forry writes movie reviews for blind people.
   b Blind people have resources to help them enjoy movies.
   c Some movie reviews are written specifically for blind people.
   d Blind people do not enjoy going to movies.

2 Which movie would probably receive the best rating from Marty Klein?
   a a foreign martial arts film with many fight scenes
   b a drama that often shifts between the past and the present
   c a romantic comedy with four main characters and lots of conversation
   d a space adventure with many explosions and special effects

3 Movie reviewer Jay Forry has his own _____.
   a website
   b newspaper
   c radio show
   d movie theater

4 What is Jay Forry most likely to say about a movie he dislikes?
   a He wishes it hadn't been made.
   b It might have been good if he could see.
   c He is very happy he is blind.
   d Other blind people might like it.

5 Why does the author include this quotation: "go into the ladies' restroom again"?
   a to recommend the movie Up to readers
   b to compare Forry to the dog in the movie Up
   c to illustrate Forry's sense of humor
   d to demonstrate Forry's need for help

6 To help blind people, some theaters _____.
   a offer special headsets that play a recorded description of the movie
   b hold events for blind people to see movies together
   c give a discount on movie tickets to blind people
   d provide people to sit next to blind people and describe the movie

7 What does line 46–47 something he appreciates. .. average moviegoer mean?
   a Jay Forry is a better movie critic than most people in the audience.
   b Jay Forry needs to test if wireless headsets help blind people.
   c Jay Forry needs to pay attention to sound so he can write a movie review.
   d As a blind person, Jay Forry pays more attention to sound as a blind person.

7. What improvements are you making as a reader? Look again at the Tips for Fluent Reading on pages 8 and 9. Write down one or two things that you know you can do better today than when you started the course.

8. What other improvements do you still want to make as a reader?
Raising a Child Athlete

In many countries, children with sporting potential are identified early and encouraged to achieve athletic greatness by training for hours every day. While some people see this as a great opportunity for kids to be healthy, others argue that too much focus on training can hurt young people. How parents should raise child athletes has become a big topic of their debate.

People who are against such serious commitment to sports say that there are many negatives to training so intensely. Here are some of their arguments:

- The long hours spent training can distance the child from his or her family.
- Athletes who spend too much time training miss out on education. The child may not be prepared for other real world activities, such as going to college and having a non-athletic job.
- Pressure from parents and coaches to win can be psychologically damaging for the child. Parents may also become too pushy and end up caring more about athletic achievements than the child.

Dr. Christine Carr, a psychologist, suggests that parents take some important steps to make sure that their kids are getting the most out of sports. Carr says that the focus should be on the child's happiness and about learning life lessons. Self-discipline, determination, and learning to deal with failure are some of the important life skills and lessons kids can learn from sports.

Other experts point to the importance of letting children make their own decisions. Top athletes Tiger Woods and Michael Phelps have said that they appreciated their parents letting them decide how much or how little they wanted to train. In fact, according to Phelps' mother, he had trouble focusing in the classroom until he found a sport that he was passionate about. By allowing Michael to focus on his sport, his mother also saw him improve as a student.

Another thing that many parents and doctors agree on is the importance of developing a close relationship with the family. Dr. Carr suggests eating dinner together and says it is a simple way to remind children that family is important, and that support can always be found at home. Woods and Phelps both had supportive families and made it public, with parents attending their many competitions.

Raising an athlete is not easy. By balancing life and training, parents can set their children up for success and help them become winners in sport and in life.
Reading Comprehension

1. What is this passage mainly about?
   a. why training child athletes is wrong
   b. when child athletes should begin training
   c. how parents can decide if their child would make a good athlete
   d. how parents can raise child athletes the right way

2. The purpose of the second paragraph is to ___.
   a. examine what child psychologists say
   b. list arguments against training young athletes
   c. compare arguments for and against training young athletes
   d. list bad ways to train children

3. What best describes Dr. Carr’s opinion of children in sports?
   a. She thinks sports have the potential to benefit children.
   b. She is against children playing sports.
   c. She thinks only teenagers should play sports.
   d. She thinks sports are good but meaningless for children.

4. What is said about failure in the third paragraph?
   a. It should be avoided.
   b. It happens when athletes don’t train hard enough.
   c. It is something child athletes should not think about.
   d. It is something children should learn to deal with.

5. Why does the writer use Tiger Woods and Michael Phelps as examples?
   a. They are very rich and successful athletes.

Gordon Hayward has a pretty cool job—he plays basketball for the team Utah Jazz in the American National Basketball Association (NBA). But in his free time, he also works as a professional gamer, competing in *Starcraft 2* tournaments. Even as a top-level athlete, Gordon is impressed with the amount of commitment needed for these competitions. “These guys are professionals,” he says. “They play this game for their job, so they take this as seriously as I take playing basketball for a living.”

Competitive gaming has been around for almost as long as video games themselves, but it’s only recently that people have started earning money from it. This is because companies sponsor gamers and tournaments. The gaming industry is now worth about $6 billion, and it is growing every year. Michel Masquelier, President of IMG Media (one of the world’s largest entertainment companies), called gaming the number one activity in the world for men aged 18 to 24. Just as young people aspire to play in the NBA, many also dream of becoming professional gamers.

There are now big global tournaments like World Cyber Games and Major League Gaming Championships, where hundreds of gamers come to compete in popular games like *Starcraft*, *Warcraft*, *Counterstrike*, and the football game *FIFA* in front of an audience. The prize money in a tournament can reach a few million dollars.

One thing gamers and athletes have in common is that they often play in teams. These “clans,” as gamers call them, usually play tournaments together and practice against one another. Professional gamers and their clans earn money through sponsorships, winning tournaments, and teaching and training people to play video games better.

Like athletes, gamers must train long and hard to become the best at the games that they play. Most gamers only compete in one game, the same way that most professional athletes only play one sport. Adrian Kwong, a professional gamer, says that he usually practices *Starcraft 2* for more than three hours. Some days he even plays for more than five hours! “To become a pro player, it takes determination, skill, and extensive practice,” says Katie Goldberg, who is vice-president of communications at Major League Gaming.

Gordon Hayward isn’t going to give up his basketball career anytime soon, but he says that athletes and gamers are not that different: “You have to train hard if you want to be the best, and that goes for everything, not just basketball. That also goes for video games like *Starcraft*.”

Reading Skill
Predicting

A Circle the words or phrases which best completes the following sentences. Can you predict what the passage on the next page will be about?

1 Traditional music is found in (many / only a few) countries in the world.
2 To keep traditional music alive, young people need to (learn music from / teach music to) older people.
3 Researchers think music is an (important / unimportant) part of history.
4 Researchers are trying to record older, traditional music so that it (doesn't disappear / becomes more popular).
5 If you are listening to a field recording, you are listening to musicians performing in a (studio / natural setting).

B Scan the passage on the next page to see if your answers in A were correct.

C Now read the entire passage carefully. Then answer the questions on page 90.

Motivational Tip: Success or failure? Effort or ability? When you succeed, is it because of your effort or your ability? Success can be a combination of both, but effort is perhaps more important. When you succeed, remember that it is because of the time you spent working on it. When you fail, remember it is not because you are not good enough, but because you need to spend more time and energy on the task.
Much of the music we listen to today is a mixture of styles from various countries and time periods. A lot of music has roots in older traditional songs heard in many different countries around the world. Traditional, or folk, music is collected over decades, if not centuries. Younger generations learn these songs from their elders through practice and repetition.

Since music can tell us a lot about different cultures through its lyrics, melodies, and the instruments used, researchers and music fans see it as an essential part of history. They fear that traditional and older types of music are slowly disappearing, partly because they are less likely to be written down or recorded, or because the format in which they are recorded is no longer in use. Also, younger generations may not find such music very appealing, so once older generations pass away, the music may die out with them. Whole genres of music may go extinct.

There is a growing effort to preserve music in its many forms. Some researchers create field recordings—recordings made outside of a recording studio—to capture live performances. For example, in the early 1900s, social scientist Frances Densmore made recordings of Native American songs that had been sung for many generations but were in danger of being forgotten. Researchers also transcribe old music by listening to old recordings—sometimes the only one of its kind left. They try to write out the music so that it can be studied and played by modern musicians.

Collecting music is another form of music preservation. Some collectors are extremely passionate about their music, and will spend a lot of time and money looking for things that have not been produced or sold for many years. Their efforts help to document music of different cultures, genres, time periods, and places. For example, some punk rock fans still collect cassette tapes from the 70s, while many jazz fans prefer to listen to old vinyl records.

There are also associations and societies to preserve and celebrate very specific kinds of music. For example, the Idelsohn Society helps to preserve old and rare Jewish music, the Suni Project celebrates the work of Grikor Marzaian Suni, an old and influential Armenian composer, while the Videogame Music Preservation Foundation lets people listen to old videogame music in its original form.

Now, modern technology makes it much easier to preserve music. Smart phones can be used to record music, while the Internet lets us share these recordings and find people with similar interests. Soon, losing a piece of music may be a thing of the past.
A Check (✓) the statements that you think the author would agree with.

1  □ Young people are less likely to care about traditional songs and music than older people.
2  □ People like Frances Densmore have worked hard to save traditional music.
3  □ Music researchers and music collectors are actually quite similar in what they do.
4  □ Modern musicians can learn from traditional music.
5  □ The Internet and smart phones have the potential to help save traditional music.

B Choose the correct answers for the following sentences.

Tokyo Concert Review

Last night was the first Asian concert of rock band Small Minds' world tour. The band began their exhausting tour six months ago in New York. They are so popular in the States that they extended their stay there by a week, and played five extra concerts that sold out within hours.

In an interview before their concert yesterday, guitarist Lee Gray and lead singer Mark Lang said they were very excited to be in Tokyo. "This is our first trip to Japan, so it's a fantastic experience for us," said Lang.

The extensive four continues to Nagoya, Osaka, and Fukuoka before moving to Korea, China, Thailand, Malaysia, Singapore, and the Philippines. Small Minds then plan to take a hard-earned break at an exclusive island resort before heading back home to the U.K. From there they will start the European leg of the tour. If you're lucky enough to get tickets to see them, expect a loud and energetic show, with some fantastic new versions of their album songs.

B Match each of the ex- words from A with the definitions below.

1 ________: limited or restricted to certain groups or people
2 ________: very tiring
3 ________: feeling happy and thrilled
4 ________: great or large in size, length
5 ________: made something longer in space or time

CHAPTER 2  For the Record: Album Reviews

A Answer the following questions.
1. Do you have a favorite musician? Why do you like him or her?
2. How do you get information about new music? E.g. through friends, music websites, magazines, etc.
3. How do you decide which music to buy?

B Discuss your answers with a partner.

A Skim the reviews on the next page and answer the following questions.
1. How many albums are reviewed?
2. Which album was released earliest?
3. How many albums play for longer than one hour?

B The information below can be found in the album reviews on the next page. Scan the reviews, then number the information from 1–6 as it appears.

_____ the date the album was released
1. the name of the musician or band
_____ the length of the album
_____ summary of the writer’s opinion
_____ the writer’s opinion of the album
____ the name of the album

C Now read the reviews carefully. Then answer the questions on page 94.

Motivational Tip: Share with others. Think of two ways to share what you learn from this chapter with people who are not in your class. Do you have a friend that you could send an email to after class? Tell him or her about the importance of preserving traditional music, or share information about an album you just discovered. As you share what you read with others, your reading skills will improve.
In this month’s *For the Record*, we review a selection of classic records that created a *revolution* in the music world. Each of these records appeared in the top 10 of *Rolling Stone* magazine’s 500 greatest albums of all time.

**The Beach Boys – *Pet Sounds*** (1966)
Length 35:57

When The Beach Boys released *Pet Sounds*, they were already famous for their all-American image and California-style "surf rock" sound. However, *Pet Sounds* showed how the band had grown stronger and more *mature* in their music. Not only did they use more instruments than usual, they used a variety of sounds such as dog barks and trains to create their music. The *album* features the hit songs "Wouldn’t It Be Nice" and "God Only Knows," and inspired another great album—The Beatles’ *Sgt. Pepper’s Lonely Hearts Club Band.*

*In short*: This is a great record for both fans and general listeners.

**Bob Dylan – *Highway 61 Revisited*** (1965)
Length 51:26

In his early career, Bob Dylan was considered a folk music hero. He was known for his live shows, playing the acoustic guitar, and singing songs about everyday life. Named for the road he grew up on, *Highway 61 Revisited* is very different from Dylan’s earlier sound. On the record, Dylan plays an electric guitar and sings songs about politics and culture in America in the 1960s. Many fans were shocked by this change, but the record affected the course of music forever.

*In short*: Buy this classic album for Dylan’s poetic lyrics.

**Marvin Gaye – *What’s Going On*** (1971)
Length 35:38

In the late 1960s, American soul singer Marvin Gaye saw many problems around him—war, poverty, homelessness, the negative effects of drug use—and felt the need to make a *statement*. *What’s Going On* is written from the perspective of a war veteran, and the songs comment on social problems in a way that soul music never had before. Gaye’s record company was sure the record—his 11th—would fail, but the title track was very successful, and so was the record. *What’s Going On* was the first of many soul records to take on social issues.

*In short*: This is an important record for any music fan. Focus your attention on the lyrics to really understand the music.

**The Clash – *London Calling*** (1979)
Length 65:07

Punk *pioneers* The Clash crossed many music *boundaries* with their third album, *London Calling*. While the band kept their original punk sound, these songs also *incorporate* bits of jazz, ska, reggae, pop, and soul. The Clash were known for expressing their political views through their music, and *London Calling* comments on many problems in Britain at that time. This album showed that punk can and should be taken seriously.

*In short*: This album is a great introduction to punk rock, but for true fans, spend your money on the rare live-music recordings.

---

1. Someone living in *poverty* is very poor.
2. A *veteran* is someone who has fought in a war.
3. An *acoustic guitar* is a traditional guitar that doesn’t use electricity.

3. What kind of person do you have to be to start and run your own business?

B Discuss your answers with a partner.

Reading Skill

Making Inferences

Information in a reading passage is not always stated directly. Sometimes a reader has to infer (make guesses about) events, information, or a writer’s opinion, using information in the reading.

A Skim the first paragraph of the passage on the next page to answer the following question. You will have to infer information from the passage. Underline the sentences in the first paragraph that helped you find the answer.

Which is considered the most common career path?

- go to university, then get a job afterwards
- start a business while in university.
- start a business after university

B Skim the rest of the passage, then read the sentences below. Circle the sentence that best describes the secret behind each person’s success.

Brian Laoruangroch

- Sell products from your own store or website to save money.
- Find the simplest way to sell your products, even if you have to pay extra for the service.

Whitney Williams

- Fall in love with someone who has the same interests as you.
- Spending time on your work now will help you be successful later.

Zac Workman

- Start small and let your company grow.
- Think big and don’t listen to people who tell you “No.”

C Now read the entire passage carefully. Then answer the questions on page 100.

Motivational Tip: Setting goals.

Set a goal for your own personal reading rate on the next reading passage. When we set a goal, we have something to work toward. The goal must be realistic but challenging. When you work toward and achieve your reading rate goals, you will feel a great sense of satisfaction.
College Start-Ups

Most college students see their time at university as the first step in their career path; afterwards, they will go out into the working world and get a job. But some students have great ideas that simply cannot wait until graduation day. With many free resources and technologies available to them, more and more university students are finding ways to start small businesses while they are still in school. Let’s take a look at a few enterprising undergraduates and their companies.

Green Mobile

As a student at the University of Missouri, Brian Laoruangroch used to sell refurbished cell phones on eBay as a hobby. But when Brian realized how much money he could make by buying, fixing, and reselling phones, he decided to create his own website to resell the phones. His parents loaned him money, and he received money from his local government to found a company called Green Mobile, which now has local retail stores and about 20 employees. Brian said balancing work and studies was challenging, but he didn’t forget to pay attention in class. “I was learning important business concepts while I was using them in my own business,” he said.

Whitney Williams Collection

Whitney Williams has always been creative, and she enjoys making things in her spare time. While in elementary school, she sold handmade stationery to people in her neighborhood, and later she expanded her offerings to include one-of-a-kind purses. When Whitney visited Italy as a student at Texas Christian University, she fell in love with the handmade jewelry she saw there. It inspired her to start her own jewelry business. Instead of partying with friends or traveling, Whitney spent most of her weekends for the next two years selling her high-quality jewelry at small shows and private sales. As a result, the Whitney Williams Collection is now produced and sold around the world. Whitney hopes to eventually expand her brand to include shoes, clothing, and accessories.

Punch

As a competitive swimmer, Zac Workman became very familiar with energy drinks. However, Zac found problems with most energy drinks. They either tasted bad, used chemicals that weren’t healthy, or made the user feel tired again when its sugary energy was used up. This spurred Zac to do some research when he got to the University of Indiana. Using an old family recipe for fruit punch, Zac developed an energy drink with natural ingredients, and found a partner to produce it. His energy drink, called Punch, became popular on his campus. As his business grows, Zac says he’s learning on the job. “People would think it would be difficult to balance class and a business,” he said, “but I’m learning more now than I ever have in the classroom.”

Something that is refurbished is made clean, fresh, or like new again.
A Choose the correct answers for the following questions.

1. According to the article, how many employees does Green Mobile have?
   - a) only 1
   - b) about 20

A Job That Fits You

**Before You Read**

**A** Think about each of these jobs. What kind of person is the best match for each job?

- Nurse
- Engineer
- Athlete

**B** Discuss your answers with a partner.

**Reading Skill**

**Skimming for General Ideas**

When we skim while reading, we read quickly to get a general idea of the meaning of the text. Later we can go back and read more slowly to understand all of the details.

**A** Look at the title of the article on the next page. Think of three words that describe your personality and write them here.

_________  _________  _________

**B** Skim the different personality groups in the article and quickly decide which group sounds the most similar to your personality. (Circle) the group in the box below.

- Realistic
- Social
- Investigative
- Enterprising
- Artistic
- Conventional

**C** Read the entire article carefully. Then answer the questions on page 104.
Choosing a career is an important life decision, yet many people settle on one based on the opinions of friends and family. It's very difficult to find something you really enjoy doing, but scientists have devised tests to help people come closer to finding their dream job.

One of the most widely-used tests is the Holland Code. Psychologist John Holland worked for more than 50 years to develop his theories about personality and career choice. He created a set of six personality types to help people understand what careers might be best for them. Dr. Holland believed that people work best in environments that match their personalities, and the key to finding a satisfying career is to match your fundamental interests with an occupation.

Take a look at the six personality types below and see which jobs might be right for you. Most people are a combination of two or three types.

### Realistic
Realistic people like to work with things they can see or touch. They are inclined to solve problems by doing them, rather than thinking or talking about them. They generally like to work outside and are good with tools, machines, plants, and animals.

**Job matches:** carpenter, chef, nurse, pilot

### Investigative
People of this personality type value ideas and are strong at tasks that allow them to investigate facts and figure out complex problems. They are better at individual work like research and study, rather than leading groups of people or working in teams.

**Job matches:** computer programmer, historian, psychologist, surgeon

### Artistic
Artists are creative people. They don’t work well with structure and rules, and thrive instead in environments that allow communication and a free flow of ideas. They enjoy tasks that allow them to express themselves and mix with people.

**Job matches:** actor, art therapist, graphic designer, writer

### Social
Social personalities love to work with people. They get the most satisfaction out of teaching and helping others, and are driven to serve the community as opposed to making money.

**Job matches:** coach, counselor, social worker, teacher

### Enterprising
Many great leaders and business people have enterprising personalities. These are persuasive people who are good at making decisions and leading teams. They tend to value money, power, and status, and will work toward achieving them.

**Job matches:** business owner, event manager, lawyer, salesperson

### Conventional
Conventional people appreciate rules and regulations, and like having structure to their lives. They are logical thinkers and have a lot of self-control, making them the perfect people to work with data and details.

**Job matches:** accountant, analyst, editor, librarian

Nowadays, anyone can take a Holland Code personality test online to find what jobs might be right for them. Why not try it today?
A  Match the personality type with the description.
1  ___ Realistic  a  likes to lead and influence other people
2  ___ Investigative  b  likes to organize things and check details
3  ___ Artistic  c  likes to create new things and express their ideas
4  ___ Social  d  likes to work with their bodies and do practical things
5  ___ Enterprising  e  likes to work with ideas and problems
6  ___ Conventional  f  likes to work with and help other people

A Brief History of Chocolate

One of the most beloved foods in the world, chocolate is not just a modern treat. In fact, chocolate—or rather, cacao seeds—has been part of our culinary history for thousands of years.

More than 2,000 years ago in Central America, the Mayan people began consuming a drink made from cacao seeds. There was no sugar in America in those days, and so they flavored the drink with chili peppers and other spices. It was called xocolatl, meaning bitter water. The Mayans used xocolatl for important rituals, such as religious ceremonies or weddings, and believed that consuming it would enhance their health and cure illnesses. Caco seeds became highly valued throughout Central America, and were even used as currency by the Aztecs.

On his fourth voyage to America in 1502, the explorer Christopher Columbus landed in what is now called Nicaragua. He was the first European to discover cacao seeds being used as money, but he did not consider it very significant. It was only later, in the 16th century, that another explorer, Hernando Cortez, saw cacao’s value, and brought the drink and the equipment used to make it back to Spain. The Spanish didn’t quite take to the bitter taste, and added other ingredients such as sugar and vanilla, so that chocolate more closely resembled the sweet treat we know today.

As popular as chocolate was in Spain, it didn’t spread to the rest of Europe until nearly a hundred years later, when a Spanish princess married the French king and made chocolate fashionable. By the 17th century, the chocolate drink had gained widespread popularity in France, and an ambitious Frenchman opened the first chocolate house in London. Soon, chocolate drinks were sold everywhere in London, and English bakers began using it in cakes—the first mention of chocolate being eaten and not drunk.

But the biggest development in modern chocolate consumption happened by accident in 1828. C. J. Van Houten, a Dutch chemist, discovered a method for making powdered chocolate when he tried to extract oils from cacao to make the drink smoother. This product became known as “cocoa powder.” Not long after, in 1847, a British man named Joseph Fry developed “eating chocolate,” which were chocolate bars made of cocoa powder, cocoa butter, and sugar. This led to the first milk chocolate bars, sold by Nestlé, a Swiss company. These were created by adding condensed milk to Fry’s chocolate bar recipe. Fry’s company, Fry & Sons, was later bought by Cadbury. Today, Nestlé and Cadbury remain the world’s leading chocolate producers.

Chocolate hasn’t lost its popularity, and has yet to stop evolving. Stop in your local specialty chocolate shop and you might find chocolates filled with fruit jellies and even flower petals. Food scientists have made chocolate sauces that can harden in seconds, and chocolate bars that don’t melt in hot weather. For people who cannot live without chocolate, scientists have added the smell and taste to products like soap, perfume, toothpaste, and lipstick. As world-famous chocolatier Jacques Torres once said, “Chocolate is a magical product.”

Motivational Tip: Strengthen your personal relationships. Your friends can help you achieve your reading goals. Sharing your goals can also strengthen your personal relationships. As you begin this unit, share with a friend what you hope to learn in this unit about chocolate that will help you become a better user of English.
If you ever crave chocolate, you’re not alone—millions of people around the world admit to being “chocolate addicts.” But have you wondered if this addiction is damaging to your health? Let’s separate the myths from the facts concerning this popular food.

1 **Eating chocolate makes you happier.**

   It’s not your imagination. Chocolate contains over three hundred known chemicals, which stimulate areas of the brain that enable us to feel pleasure. Chocolate contains small amounts of theobromine, which help to enhance your mood, and caffeine, which gives you more energy and is also found in coffee and tea.

2 **Chocolate makes you fat.**

   Chocolate is commonly regarded as a fattening food that contains no nutritional value. In fact, cocoa beans are full of antioxidants that are beneficial to health. However, they undergo a lot of processing to remove their distinctive bitterness, which also removes a large portion of the antioxidants. Most store-bought chocolates have high sugar and fat content, and only small amounts of cocoa. Eating these and other high-calorie chocolate desserts, like cakes and cookies, can indeed cause you to gain weight.

3 **There have been studies in recent years linking chocolate to a healthy heart.** Cocoa contains chemicals called flavanols which fight heart disease by lowering blood pressure and cholesterol levels. But you’ll have to consume dark chocolate with a high proportion of cocoa if you want to see the benefits, or just eat more fruits and vegetables, which contain flavanols as well and in higher amounts. “If you want to reduce your heart disease risk, there are much better places to start than at the bottom of a box of chocolates,” says Victoria Taylor from the British Heart Foundation.

4 **Chocolate gives you pimples.**

   Despite what you might have heard from your mother or grandmother, there is absolutely no evidence that chocolate gives you pimples or acne. It’s not chocolate that causes problems, but the highly-processed nature of the products containing chocolate, and their high levels of sugar and fat. While it’s great that chocolate isn’t to blame, bad skin could still indicate a bad diet.

5 **Chocolate causes tooth decay.**

   This is another myth that just won’t go away. It’s not chocolate itself that causes tooth decay, but the sugar in chocolate products—and bad teeth-brushing habits! In fact, it is believed that cocoa butter forms a coating over our teeth, and this might actually protect rather than hurt them.

   As with most things, chocolate only becomes a danger when you overdo it. It’s important to remember that most of the health benefits of chocolate come from cocoa, which is why dark chocolate is the healthiest option. So choose your chocolate wisely, eat it in moderation, and you’ll get the best of both worlds—happiness AND health.
A Choose the correct answer for the following questions.

1. Most commercial chocolates contain lots of _______.
   a. antioxidants
   b. cocoa
   c. sugar

2. Why does Victoria Taylor mean in her quote in lines 21–23?
   a. She thinks chocolates are actually bad for your heart.
   b. There are better things out there to help prevent heart disease.
   c. Most boxes of chocolate only contain white or milk chocolates.

3. Why does the writer mention mother and grandmother in line 26?
   a. to show that chocolates causing pimples is an old belief
   b. to show that modern chocolates don’t cause pimples
   c. to show that women tend to get pimples from eating chocolate

3 People are not allowed to keep tigers as pets because it’s in their ________ to be aggressive, and they might harm their owners.
4 Keep healthy by eating fresh fruit, vegetables and other ________ foods, and consuming oily or salty foods in ________.

A Read the article below and find synonyms for the vocabulary definitions in the following chart.

Health News
It’s accepted that exercising regularly is good for health. But is too much of it a good thing? A recent report in a leading medical journal may have proof that exercising too much can in fact be dangerous. When we work out, we get a lift or high from chemicals released into the brain. It is this “high” that people become addicted to, and it can have negative effects on body and mind.

Over-exercisers may find their muscles are constantly sore; some may even get stress fractures, or small cracks in their bones, from doing intense workouts. A person obsessed with exercising day after day can end up feeling exhausted all the time. They may also feel restless or unable to sleep at night. If you find yourself weaker instead of stronger after working out, it may be evidence of over-exercising. But those who are hooked on exercise should not quit altogether. Doctors advise to slowly cut back on the number of days a week that you exercise, and to limit yourself to only an hour a day.

Definitions
something that is bad for you

Synonyms
A synonym is a word that has the same or similar meaning as another word. One way of increasing your vocabulary is by learning synonyms.
Look at the dictionary entries below. Then read the following sentences and decide which definition is correct. Write 1 or 2 next to each sentence.

**consume v.** 1 to eat and drink; 2 to destroy

**contribute v.** 1 to give or donate something (time, money, etc.); 2 to help make something successful

**cultivate v.** 1 to prepare land for growing crops, trees, and flowers; plowing, planting seeds, and fertilizing soil; 2 to study and develop a good understanding of something (books, art, music)

1. Fire consumed the entire restaurant in less than an hour. Fortunately, all the diners and staff escaped unhurt.
   -
2. Each person in the office contributed $10 to help pay the hospital bill for their sick colleague.
   -
3. Steven cultivated his knowledge of Asian culture while taking many business trips to Korea and Japan.

Fluency Strategy: KWL

You can ask yourself three questions to improve your reading fluency and comprehension. The letters K, W, and L can be used to remind you of these questions. KWL stands for Know, Want, Learn.

Know

The first step in KWL is similar to the Preview step in PRO (page 41) and the A in the Active approach (inside front cover). This step will help you prepare yourself before reading.

A Look at the title of the passage on the next page, Will Shortz: Puzzle Maker. Then read only the first paragraph of the passage. From the title and first paragraph, decide what is the topic of the passage.

B Ask yourself, “What do I already know about this topic?” Write down three or four facts that you already know about the topic in the Know column of the table below.

Want

In the second stage of KWL, ask yourself, “What do I want to learn as I read?” By doing this you are reading with a purpose. This step is similar to the Question stage in PQR+E.

A Ask yourself what you want to learn as you read Will Shortz: Puzzle Maker. Write down some things you hope to learn in the Want column above.

B Before going on to the L in KWL, read the passage on the next page carefully.
When you ask a child what they would like to be when they grow up, common responses might include firefighter, pilot, doctor, or athlete. But those jobs don't capture the attention of all kids. Take Will Shortz, for example. In eighth grade, at the age of 14, Will had to write an essay about what he wanted to do with his life. He wrote about his desire to become a puzzle maker—someone who creates games and puzzles, such as sudoku or crossword puzzles. That same year, he sold his first puzzle to the magazine Venture. By the age of 14, Will was regularly contributing puzzles to magazines.

In college, Will found that there was no traditional way to study puzzles or become a puzzle maker. There were no classes offered on puzzles. Fortunately, after becoming bored with his economics studies, Will learned that his university offered a special program that allowed students to suggest and create unique fields of study. After creating and completing two courses on word and math puzzles, Will switched his major to enigmatology—the study of puzzles.

Will and his professors then created new classes that explored all aspects of puzzle-making. He studied the history, construction, and psychology of puzzles, mostly on his own. Because there were no professors of enigmatology, Will realized that he probably was the only student at his university to know more about his field than any of his professors!

He did well in school, but upon graduating, Will did not know how to get a job creating puzzles. For summer work, he joined the magazine Penny Press, where he realized that he could find work as a puzzle editor. Will then found a job creating and editing puzzles for Games magazine. This seemed like a dream job because he could create new kinds of puzzles and be surrounded by great puzzle makers.

After fifteen years at Games, Will accepted a position as the editor of The New York Times' crossword puzzle. When he first joined, the newspaper's crossword puzzle was seen as very difficult, and few readers could complete it. Will made fundamental changes, such as including everyday language in the clues and answers so that many more people could enjoy it. Today, he is credited with making the crossword appealing to a wider audience. Some of Will's most famous puzzles have related to the news for that day, such as the name of the winning president on Election Day, and a love-themed puzzle on Valentine's Day.
Learn

Now that you have finished reading, ask yourself, “What did I learn while reading?” Did you learn what you wanted to?

A Write down three or four things you learned about Will Shortz in the Learn column of the chart on page 117.

B Now test how much you learned from the passage by answering the following questions.

1 The writer mentions other children in the introduction to show ________.
   a how every child has a different ambition
   b how Will Shortz was different from other children
   c that they were not interested in puzzles
   d that none of them were as successful as Will Shortz

2 When did Will first become interested in puzzles?
   a before he was 14 years old
   b when he was 14 years old
   c when he was 16 years old
   d when he entered university

3 What kind of classes did Will Shortz take in college?
   a classes by professors who study puzzle writing
   b classes that he and his professors developed
   c classes taught by professional puzzle makers
   d classes that art students take

4 Which sentence describes Will Shortz’ college experience?
   a He enjoyed his time in college very much.
   b He was bored in college and did not finish.
   c He felt he did not learn very much.
   d He thought it was too challenging.

5 Why is *Penny Press* mentioned in the fourth paragraph?
   a It is the first company at which Will Shortz worked.
   b It is where he was allowed to develop new puzzles.
   c The owner of the company did not hire Will Shortz.
   d It is where Will Shortz worked during college.

6 Why did Will Shortz consider his job at *Games* magazine a “dream job”?
   a He earned a lot of money writing crossword puzzles.
   b *Games* was the only puzzle magazine in the U.S.
   c He could study the history of puzzle making at the magazine.
   d He designed new puzzles and worked with other puzzle makers.

7 At *The New York Times*, Will Shortz ________.
   a changed the kind of puzzle the newspaper published
   b made the crossword puzzle more interesting for most people
   c made the crossword puzzle more difficult to solve
   d wrote newspaper articles about puzzles and games

The People Behind the Music

Think for a moment about the last music album you bought. Most likely, you'll think of the singer or band that made you want to buy the album. You might even know the name of the guitar player or the drummer. Those talented performers, however, are only some of the people involved in making the music you enjoy. The majority of people in the music industry work behind the scenes, but the roles they play in the musical process are very important.

**Songwriters**

Songs begin with the songwriter, of course. Some songwriters work alone, but many work in teams that combine the talents of a lyricist, who writes the words to songs, and an instrumentalist, often a piano player or guitarist, who writes the music. Many of today's pop stars work with songwriters. For example, some of Lady Gaga's biggest hits were written by Nadir Khayat, also known as "RedOne." Some songwriting teams have become very famous, such as Mike Stock, Matt Aitken and Pete Waterman, who were responsible for many big 80s pop hits.

**Arrangers**

After a song has been written, music arrangers make it more appealing by deciding which instruments will be used, what tempo, or speed, the song will have, and whether the song should have a lower or higher pitch. A good arrangement can bring a song to life and make it a classic.

**Studio Musicians**

Not every singer or instrumentalist can be a star, and many work in the background as studio musicians. These artists are not a part of any one musical group. Instead, they are hired for recording sessions that eventually become the albums you buy, as well as soundtracks for television shows, movies, and radio ads.

**Recording Engineers**

Recording engineers also play a major role in creating the final sound that you hear. First, these engineers set up the recording studio, the room where the performers play, placing musicians and microphones in exactly the right places to get the best sound. Next, they use electronic equipment, such as multi-track recorders, to capture the music. Finally, long after the musicians have gone home, recording engineers use a mixing board to balance the melodies and rhythms of each musician, and sometimes to incorporate special sound effects or additional tracks.

Many people make a living with music. You may not recognize all of their names, but all of them work together to create the songs you love to listen to.

Candy, cake, brownies, ice cream, pie, fudge—these are some common uses for chocolate. But did you know that chocolate also has a savory side? Michael Laiskonis, a pastry chef, says that while chocolate is certainly thought of most often as a sweet snack or dessert, it is being used more frequently in savory dishes.

Cocoa, and later chocolate, was first enjoyed by the Mayans and Aztecs of Central America, and then by the Europeans, particularly in countries like Spain, Portugal, and Italy. It makes sense, then, that many savory chocolate dishes can be found in these cuisines, most commonly in their sauces. This is because chocolate adds a dark, shiny color and a rich flavor to the sauce.

Mexican moles are a good example of sauces that heavily feature chocolate. Moles are rich and spicy sauces that originated in southern Mexico around the 16th and 17th centuries. They get their complex flavor and dark brown color from chili peppers and chocolate, much like the original cocoa drinks from Mayan times. Moles are commonly served with meat and rice. Over in Europe, an Italian wine or vinegar sauce called agrodolce also uses chocolate, and is most often served with lamb and pasta. Some recipes for coq au vin, a classic French chicken dish, call for chocolate as well.

Chocolate is being used in less traditional dishes, too. Chefs and home cooks alike are rubbing steaks with cocoa powder and adding pieces of chocolate to meat stews. Many recipes follow the Mexican idea of adding cocoa or dark chocolate, which has a bitter flavor, to spicy dishes, but it has recently become very popular in America to cover salty bacon or potato chips in chocolate.

This combination sounds odd but can actually be explained through science. Studies called “flavor-study research” have shown that certain foods with similar chemical structures taste good when eaten together. For example, chef Heston Blumenthal combined white chocolate and caviar because he thought the two offered a tasty balance of sweet and salty. Scientists later found that these two flavors go well together because they have some proteins in common. This is also the reason why scientists think cocoa tastes good with cauliflower and garlic.

This might all sound a little strange if you’ve only ever known chocolate to be a sweet treat. But it’s also good news for chocolate lovers—as Laiskonis says, “No matter what your mother may have told you, it’s perfectly acceptable to eat chocolate for dinner!”

Reading Skill
Scanning for Proper Nouns

One way to quickly recognize what a reading passage is about is by first scanning for proper nouns. Proper nouns are specific names of people, places, and things. They are easy to find because they start with capital letters.

A Scan the passage on the next page for proper nouns. Write the proper nouns you find in each paragraph below. Then circle the correct option.

Paragraph 2 _____________________________
This paragraph is probably about (clothing / exercise).

Paragraph 3 _____________________________
This paragraph is probably about (drinks people buy / entertainment).

Paragraph 5 _____________________________
This paragraph is probably about (the Internet / animals).

B Now skim the passage to see if your answers were correct.

C Read the entire passage carefully. Then answer the questions on page 128.

Motivational Tip: Set a class goal. Together with your classmates, set a class goal for reading rate and reading comprehension for the two chapters in this unit. How many words-per-minute do you think your class can achieve? What level of comprehension can you achieve? Check to see if you have met your class goals at the end of this unit.
Would you believe that the average person sees nearly 3,000 ads every day? That seems unbelievable, but advertising has become so common that ads are virtually everywhere we look. Furthermore, most advertisements today don’t seem like advertising. Newspapers and television are no longer the only way for companies to reach their target audience. Today, advertisers are far more subtle in their selling.

Take a look: your clothes may have a brand name or logo on them. Many designer brands like Gucci and Louis Vuitton display their logo prominently on their clothes and bags. Branding is also very important for big sports companies and professional sports teams. For example, Nike has spent hundreds of millions of dollars creating and promoting their instantly recognizable “swoosh” logo.

Your favorite forms of entertainment are also filled with ads. Companies actively seek to sponsor concerts and TV shows: for example, the Coca-Cola Company sponsored American Idol, one of the most popular shows on American television, since its first season. Similarly, many sports tournaments would be impossible to hold if not for money given by sponsors, who want their ads clearly visible in stadiums. In movies, you’ll see characters driving a particular brand of car, or eating a popular snack, because companies pay for their products to be there. In the James Bond film Casino Royale, car manufacturer Ford paid about $22 million for James Bond to drive one of its cars—for only three minutes!

The problem for advertisers is that people have learned to ignore traditional advertising, such as TV ads and billboards. Advertisers must find new ways to get the public to notice them—and continue noticing them. The key word now is “engagement”: companies are trying to create deeper, more interactive experiences, which could be anything from contests to parties to charity runs, and link the experience with the brand.

Companies have started using the Internet to reach a wider audience. For example, brand websites can be accessed by anyone, anywhere. Advertisers are using social networking sites like Facebook to post videos and entertaining stories that feature the company’s products. Their goal is for people to share these posts with their friends, and eventually reach millions of people. The energy drink company Red Bull has been very successful in creating online content that viewers respond to. By sponsoring and making short films focused on extreme sports like skateboarding and surfing, Red Bull has attracted more than hundreds of millions of views on its YouTube channel.

Advertisers are finding new and different ways to grab our attention. As a result, ads are getting more creative. Instead of telling us what is so special about a product, advertisers are making products part of our lives.
A Choose the correct answers for the following questions.

Making Inferences

Information in a reading passage is not always stated directly. Sometimes a reader has to infer (make guesses about) events or a writer’s opinion, using the information that is available in the reading.

A Skim the first paragraph of the passage on the next page. Make inferences to answer the following questions.
1. What do you think the main topic of the passage is?
   a. advertisements that no one liked
   b. famous commercials and slogans
   c. advertisements that caused problems
2. The two examples in the passage were mostly (positive / negative) experiences for the companies.

B Skim the remaining paragraphs. Make inferences to answer the following questions.
1. American Apparel was (happy / unhappy) about Nancy Upton winning the contest.
2. People felt bigger women were treated (well / badly) by the fashion industry.
3. Some people did not like the Chevrolet Tahoe because of its (price / size).

C Now read the entire passage carefully. Then answer the questions on page 132.
Take a walk down the street and count the number of advertisements you see. With so many brands and companies competing for your attention, advertisers have to work harder than ever. One popular method of engaging consumers is by holding competitions where consumers come up with their own commercials or slogans. These have proven to be successful, and do increase the number of people who come into contact with the brand. But allowing strangers to be active in a brand’s identity can lead to great problems. Here are two cases of advertising gone wrong.

Not a Model Spokesperson

When fashion brand American Apparel introduced its new range of plus-sized clothing, the company held a contest to find new models. In the contest, women could submit photos of themselves that showed off how nice the company’s clothes look on larger women. But when the company advertised that it was looking for “the next BIG thing,” some women were offended because they thought the company was being disrespectful to women.

An American actress called Nancy Upton decided to enter the contest to show the world how insensitive she thought American Apparel was. Nancy took photos of herself in poses that made fun of the contest. She wore American Apparel clothes and copied the style of their ads, but also ate fattening food, like burgers, in the photos. The photos became an Internet hit and she won the popular vote. While American Apparel did not recognize Nancy as the winner, her photos started a big discussion about how bigger women were treated in fashion, and Nancy became a hero to many.

Crashing the Commercial

Car manufacturer Chevrolet thought they had a good idea: organize a contest where people could create their own commercials for Chevrolet’s newest and biggest vehicle, the Tahoe. The company supplied video and sound clips, and people could use computers to mix them and add their own text. The contest accomplished its goal of promoting the Tahoe, as more than 30,000 videos were made.

While many entries focused on the best features of the truck, a few were less flattering; they pointed out that the Tahoe was bad for the environment and that owning a big vehicle can sometimes lead to unsafe driving. Unfortunately, the negative videos spread fast, and Chevy got as much bad publicity as it did good publicity.

Word Families

When you learn a new word in English, it is helpful to also learn words in the same “family” that form the different parts of speech. Since a word can have a slightly different meaning in a different form, learning word families can help you to expand your vocabulary.

Shy? Lacking confidence? If the idea of speaking in public (1) ________ you, our program will change your life. With (2) ________ coaches who will (3) ________ you every step of the way, you’ll soon overcome your fear.

Many advertisements try to engage or "talk to" people's feelings and emotions—like fear and love—to persuade us that we need a product. They use certain words and images to produce reactions in us. For example, a company selling blankets can show images of puppies and use words like warm or cuddly.

A Read the following descriptions of commercials. Match each to the correct advertising message.

a A woman is driving a car with her two small children in the backseat. Suddenly, another car turns in front of her. The mother hits the brakes, and her car immediately stops. The children are laughing and smiling.

b A group of college-age friends are relaxing at the beach. All of a sudden, the sky turns grey and it starts to rain heavily. The friends get cans of soda from their cooler, and an invisible umbrella forms above them. They stay dry as they continue drinking soda.

c An older couple are watching the sunrise from a cruise ship. Then, they are seen playing golf. Lastly, they are eating dinner in a beautiful restaurant. The watches on their wrists are clearly seen the whole time.

1 ___ This product will help you have fun.
2 ___ This product will show people you are rich.
3 ___ This product will keep you safe.

B Read the following slogans. With a partner, discuss what the advertising message of each slogan is.

1 The world's most beautiful women use SoftSilk Shampoo.
2 Drink Crystal Water. Cleaner, purer, safer.
3 Where is your child? You'll always know with Saftel cell phone.

ECO QUIZ

1. A ______ is a more eco-friendly place to buy groceries.
   a) supermarket    b) farmer's market

2. Microwaves use up to two-thirds _____ electricity than regular electric ovens.
   a) less   b) more

3. Bottled water is cleaner than tap water.
   a) true   b) false

4. It's better for the environment if you wash dishes _____ after a big dinner party.
   a) using a dishwasher b) by hand

5. Which type of drink container would be better for the planet?
   a) aluminum can   b) glass bottle

Getting Ready

A. Complete the quiz above, then discuss your answers with a partner.

B. Check your answers below. How many did you get correct?
   1. b: A farmer's market is more likely to sell foods that are grown in the area, while a
      supermarket normally sells foods that have traveled thousands of kilometers. Buying
      local foods saves fuel and reduces pollution caused by transportation.
   2. a: A microwave uses 50–65 percent less energy to heat food than regular ovens. This
      is because it works faster and focuses energy directly on the food, as compared to
      heating the surrounding air like in an oven.
   3. b: In many countries, tap water has to meet higher standards than bottled water.
      So bottled water is not necessarily cleaner!
   4. a: If you have many things to wash, use a dishwasher. It uses half the energy, one-sixth
      of the water, and less soap compared to washing everything by hand.
   5. a: Making aluminum cans requires less energy than making glass bottles. They're also
      more commonly recycled and are usually made from 40 percent recycled aluminum.

Distinguishing between Main and Supporting Ideas

Every paragraph has a main idea, with supporting ideas that explain the main idea. The main idea is usually in the beginning of the paragraph—but not always! By knowing the difference between main and supporting ideas, you can understand the purpose of a passage more clearly.

CHAPTER 1 Engineering a Better Burger

A Think about answers to the following questions.
1 Which would you rather eat from each pair of foods below? Why?
2 Which are natural foods and which are processed? Which do you think is healthier? Why?

B Discuss your answers with a partner.

A Skim each paragraph in the passage on the next page. Circle the sentence that describes the main idea of each paragraph.

Paragraph 1
a Most people on the planet are omnivores.
   b People are eating more meat.

Paragraph 2
a Raising animals for meat has changed the world for the worse.
   b Methane and carbon dioxide are greenhouse gasses.

Paragraph 3
a Scientists are coming up with new ways to produce meat.
   b Stem cells can be used to create beef in a laboratory.

B Read paragraph 4. Write the main idea and one supporting idea.

Paragraph 4
Main idea: ________________________________
Supporting idea: ________________________________

C Now read the entire passage carefully. Then answer the questions on page 138.
Humans have traditionally been omnivores, with a diet of both meat and vegetables. But lately it seems we’ve become a society of meat eaters. According to the United Nation’s Food and Agriculture Organization (FAO), global demand for meat has increased over 500 percent in the past 50 years. Two things explain this: the Earth’s population is rising rapidly, and people with higher incomes tend to consume more meat. With the population expected to reach nine billion people around 2050, and with developing countries getting richer, this trend won’t stop any time soon.

If meat production rises to match demand, the consequences could be devastating for the planet. Thirty percent of Earth’s entire land surface—a massive 70 percent of all land available for agricultural use—is used for raising livestock. And more land is required each year as farmers struggle to meet the rising demand, which comes at the cost of rain forests and other valuable land. Reports by FAO show that meat production is responsible for 70 percent of the Amazon deforestation in South America. Large factory farms are also big consumers of energy and cause a lot of pollution. It’s clear that our hunger for meat, and the way we produce it, is not sustainable in the long run.

Fortunately, food scientists have been anticipating this need for change. They are working on some interesting alternatives to current methods of meat production. A group of Dutch scientists are engineering meats that can be grown in laboratories. This involves using cells taken from cows to grow “muscle” that can be mixed with other things to make beef. They say that this process could reduce the amount of energy and land needed to raise cattle by about 40 percent.

Other scientists from the United States and China are working to create “meaty” flavors from mushrooms, which could be used to flavor foods. They feel people can detect chemical flavors, and that natural flavors are better for the body.

For now, lab-grown meat is not a threat to traditional farming. Although scientists say that their beef could be ready for testing (and eating) soon, large-scale manufacturing won’t be possible for another ten years. It’s far too expensive to develop in large quantities—the Dutch team will spend over $200,000 making enough meat for one burger—and not everyone will be keen on the idea of eating lab-grown meat. While the general public isn’t quite ready to accept “fake” meat, the day will come when we may not have a choice.

B Complete the following summary with words or phrases from the passage.

Global demand for meat has risen by (1) _________ in the last 50 years, partly because the population has grown, and also because people are generally getting (2) _________. This rising demand has a huge effect on the environment. Livestock farms already occupy (3) _________ of all agricultural land, and (4) _________ are being destroyed to create even more land for this purpose. Raising large numbers of livestock also consumes a lot of (5) _________ and causes a lot of (6) _________. But science may have a solution. Some scientists are trying to make meat in a (7) _________ by taking (8) _________ from cows to grow (9) _________. However, it will take at least ten years to produce meat in large quantities, because it is (10) _________. Other scientists are creating "meaty" flavors from (11) _________; they believe these (12) _________ flavors taste better and are healthier. In the end, though, a lot depends on whether the public can accept these meat alternatives.

C Discuss the following questions with a partner.

1. Would you rather eat foods that are created in a lab or grown naturally? Why?
2. Can you think of any meat alternatives that are already available to the public?

B Complete the following sentences with the words in blue from A. You might have to change the form of the words.

1. He does not have enough customers to ___________ his business.
2. Many people ___________ to lose weight. The problem is they are ___________ to diet and exercise but never really follow through.
3. Cycling is a good ___________ to driving.
4. The boxer ___________ his opponent's punch and moved out of the way.

A Look at some examples of where adverbs are placed in a sentence.

Many adverbs can be placed either before or after the verb they describe.

She spoke confidently about her new project.
She confidently spoke about her new project.

Some adverbs appear at the very beginning of a sentence and describe the entire sentence. Some adverbs describe a clause within the sentence.

Suddenly, it started raining, but luckily I had my umbrella with me.

Sometimes adverbs appear at the end of a sentence. If a sentence has more than one verb, we avoid putting the adverb at the end.

X The boys sang the songs that they had prepared in class loudly.
✓ The boys loudly sang the songs that they had prepared in class.

Understanding Cause and Effect

Sometimes a reading is organized around the causes and effects of a problem or situation. Understanding these cause and effect relationships will help you to understand the author's main idea.

A The following sentences are from the passage on the next page. Write the cause and the effect.

1 Some adopt a vegetarian diet as the ethical alternative to eating meat, because they believe killing animals is wrong.
   Cause some people believe killing animals is wrong
   Effect these people become vegetarian

2 Animals such as cows, pigs, and sheep release methane—a greenhouse gas that causes global warming—when they pass wind.
   Cause
   Effect

3 A vegan diet may deprive us of vitamins and minerals that are essential to our health.
   Cause
   Effect

B Read the entire passage carefully. Then answer the questions on page 142.
People become vegetarian for different reasons. Some adopt a vegetarian diet as the ethical alternative to eating meat, because they believe killing animals is wrong. People who are concerned about their health see it as a good way to keep slim and lower their risk of various diseases. Lately, more people are replacing meat with vegetables because of the vital role this plays in protecting the environment.

Researchers from the Union of Concerned Scientists in the U.S. released a report on the impact of consumer behavior on the environment. Their study showed that meat consumption is one of the main ways that humans can damage the environment, second only to the use of motor vehicles.

But how will modifying our diets make a difference? We can compare the amount of resources needed to produce meat and crops. For example, we need almost 20,000 liters of water to produce a kilogram of beef, whereas only 150 liters of water is needed to produce a kilogram of wheat. Similarly, one hectare (or 10,000 square meters) of farmland that is used for raising livestock produces about 227 kilograms of beef, but the same amount of farmland can produce 13,600 kilograms of carrots, 18,000 kilograms of potatoes, or 22,700 kilograms of tomatoes. It's clear that we can make more efficient use of land and water if we produce crops instead of meat.

Raising livestock also contributes to rising global temperatures. Animals such as cows, pigs, and sheep release methane—a greenhouse gas that causes global warming—when they pass wind, with one cow producing an estimated 500 liters of methane each day. A 2006 report by the Food and Agriculture Organization (FAO) says that livestock farming accounts for 37 percent of all methane production, and warns that methane may have a more damaging effect on the atmosphere than carbon dioxide.

There is growing support for vegetarianism. For example, schools across England and the U.S. hold “Meat Free Mondays” to show students how easy it is to eat less meat. Some people go one step further and eat a vegan diet, which excludes all animal products such as cheese, eggs, and milk. However, some nutritionists believe that a vegan diet may deprive us of vitamins and minerals that are essential to our health.

One does not have to become vegan or fully vegetarian to help save the environment. Whether it's just being vegetarian for one day a week—or just eating less meat—a small effort on our part can go a long way.

1 Crops are plants such as wheat and potatoes that are grown in large amounts for food.
A Choose the correct answers for the following questions.

1 Which is NOT mentioned as a reason people become vegetarian?
   a They think meat is too expensive.
   b They think eating meat is morally wrong.
   c They think eating meat is bad for health.

2 What do you think “Meat Free Mondays” is about?
   a Meat is free for students on Mondays.
   b Students try not to eat meat on Mondays.
   c Students take classes on environmental issues.

3 What does go one step further in lines 23—24 mean?

B Which amount is larger? (Circle) the correct item in each pair.

1 the damage done to the environment by (eating meat / driving)
2 the amount of global warming caused by (methane gas / carbon dioxide)
3 the water needed to produce a kilogram of (meat / vegetables)
4 the amount of (meat / vegetables) you can produce on a piece of land
5 the vitamins in a (vegan / vegetarian) diet

C Discuss the following questions with a partner.

1 Can you think of any disadvantages of being vegetarian?
2 Do you agree with the final sentence of the passage—that a small effort can go a long way?

A Choose the best answer. The words in blue are from the passage.

Vocabulary Skill
The Root Word vit / viv

In this chapter, you learned the adjective vital, a word made by combining the root word vit, meaning life, with the suffix -al, meaning like or relating to. Vit, also sometimes written as viv, can be combined with other prefixes and suffixes to form many words in English.

Motivational Tip: Too challenging or too easy? Challenging reading provides the opportunity to use effective reading strategies. Easier reading provides the opportunity to practice reading fluency. In order to improve your reading abilities, you will need a combination of both.
Real Life Skill
Understanding Units of Measure

Most of the world uses the metric system to measure things like length and weight. Some countries, though, use non-metric measures, or a combination of both. The metric system uses prefixes to indicate the size of the number. The most common prefixes are milli (0.001), centi (0.01), and kilo (1,000). For example, one kilometer is equal to 1,000 meters, while one meter is equal to 100 centimeters.

A Review the comparisons in the chart. What does each measure? Complete the chart using the words from the box below. One word is used twice.

Scanning for Names and Numbers

Key information in a passage often contains numbers, dates, or names of people, places, and events. Sometimes numbers are written as digits (1, 2, 3) and sometimes as words (one, two, three).

A  Read the following questions. Circle the type of information you need to scan for.
1  When did Ian Kiernan organize his first Clean Up event? date  name  number
   Answer: ________________
2  How many people took part in the first Clean Up Australia? date  name  number
   Answer: ________________
3  Which organization helped Kiernan organize Clean Up the World? date  name  number
   Answer: ________________
4  How many countries took part in the first Clean Up the World? date  name  number
   Answer: ________________
5  What program helps people reuse and recycle cell phones? date  name  number
   Answer: ________________

B  Now scan the passage on the next page and answer the questions in A.

C  Read the entire passage carefully. Then answer the questions on page 148.

Motivational Tip: Reevaluate the questions. Review each of your responses on the comprehension questions in this unit. For the items you got correct, identify why you got them correct. For the items you got incorrect, identify reasons why you missed those questions. When you review questions you missed, you can identify mistakes and learn from them.
Ian Kiernan was taking part in an around-the-world sailing race in 1987 when he noticed an alarming amount of garbage in the oceans. Returning home to Australia, Kiernan felt he had to do something about it.

He started close to home by organizing a community event in 1989 called Clean Up Sydney Harbour. To his surprise, more than 40,000 volunteers came out to clear away garbage. Encouraged by this success, Kiernan decided to make the clean-up a national event the following year. It took off—across Australia, an estimated 300,000 people spent the day working to improve their local environment.

Clean Up Australia Day has been held annually since then, growing bigger every year. In 1993, Kiernan started an even more ambitious program. With the help of the United Nations Environment Program, he launched Clean Up the World to support communities around the world in cleaning up and conserving the environment. In its first year, more than 30 million people in 80 countries participated. Clean Up the World now falls on the third weekend of September every year, and has grown more popular as the years go by.

Today, Clean Up Australia Day welcomes more than half a million volunteers who help to clear thousands of tonnes of garbage from beaches, parks, streets, and waterways. They pick up used cigarettes, glass and plastic bottles, plastic bags, and thousands of snack food wrappers.

In recent years Kiernan says that there has been an increase in harmful electronic waste—such as computers and cell phones—and that e-waste is accumulating faster than other trash. E-waste sometimes makes up 70 percent of the overall waste found in landfills, according to Global Futures Foundation. Kiernan feels that companies need to take more responsibility for the cleanup and recycling of their products, since chemicals from e-waste can cause health problems if they leak into the ground or into the water supply. To help deal with e-waste, Kiernan started a program called Clean Up Mobile Phones to collect used cell phones for reuse and recycling.

Ian saw a problem that needed fixing, and he chose to take action. By starting Clean Up Australia Day, he raised awareness of how we treat our Earth. What's more, he united millions of people in their goal to make the world a cleaner place. Through persistence and hard work, Ian has shown that anyone who puts their mind to it can make a difference.
A Choose the correct answer for the following questions.

1 What is another possible title for this passage?
   a The Dangers of Electronic Waste
   b Small Ideas, Big Impact
   c Who Is Ian Kiernan?

2 Which event is no longer running?
   a Clean Up Sydney Harbour
   b Clean Up Australia
   c Clean Up The World

3 Which is NOT true about e-waste?
   a It is dangerous to people.
   b It has been a growing problem over the last few years.
   c Many companies have special programs to deal with it.

4 The purpose of the last paragraph is to show that ____________.
   a even one person can make a difference to the world
   b lots of people want to help the environment
   c Ian Kiernan should be rewarded for doing a good job

B Put these events in the correct order from 1–6.

1 Kiernan competed in international sailing races.
2 Kiernan worked with the United Nations to start an international program.
3 Forty thousand people picked up garbage in Sydney.
4 Kiernan became concerned about environmental problems.
5 Kiernan began focusing on recycling old computers and cell phones.
6 People across Australia worked to clean up garbage.

C Discuss the following questions with a partner.

1 Would a clean-up day be popular in your country? Why, or why not?
2 Where do you think all the trash goes after being collected?

A Choose the best answer. The words in blue are from the passage.

1 The baby was alarmed by the _______ noise.
   a soft                    b loud

2 Volunteers _______ for the work they do.
   a get paid                    b don’t receive pay

3 When you start an ambitious project, it will ________.
   a take a lot of time and effort       b be very easy to finish

4 If you launch something, you ________ it.
   a start                              b stop
5 Waste is generally ___________.
   a kept on a computer       b thrown into a trash can
6 When money accumulates, it is earned ___________.
   a over a long period of time   b all at once
7 An army that is united is usually ___________.
   a weaker             b stronger
8 A person who is persistent is likely to be ___________.
   a hardworking        b lazy

B Answer the following questions, then discuss your answers with a partner. The words in blue are from the passage.
1 Do you like to accumulate things, or throw things away?
2 Name a volunteer organization that does important work in your country.
3 What is your ambition in life? How will you accomplish it?
4 Is persistence or talent more important for success? Why do you think so?

Reading Skill
Skimming to Assess a Passage

Skimming can help you decide whether a reading contains the information that you are looking for. If it does contain useful information, then you can read it again more slowly.

A Imagine that you need to choose an essay topic on the environment. Skim the article on the next page and check (✓) the topics that it would help you with.

1 □ Animals in the Rain Forest
2 □ Why We Need Freshwater
3 □ Government Laws on Natural Resources
4 □ Turning Seawater into Freshwater
5 □ The Importance of the Amazon
6 □ Natural Resources: Running Out?

B Skim the article again and write the correct paragraph number for each main idea.

1 _____ We all need to contribute to saving our environment.
2 _____ Our food supply is linked to the amount of fresh water available.
3 _____ Rain forests are being destroyed at an alarming rate.
4 _____ Water is important for every form of life.
5 _____ The Earth's rising population is threatening natural resources

C Now read the entire passage carefully. Then answer the questions on page 152.
We are a planet of seven billion people, and this number is growing by about 370,000 people every day. This is putting a huge strain on the planet's natural resources. For many governments and environmental organizations, the race is on to drastically reduce our consumption of resources before they run out.

Water is one of our most precious resources. Our quality of life, as well as life itself, depends on the availability of clean, fresh water. It is the most widely used resource in industry, and plays a major role in energy production. Although 70 percent of the world is covered in water, only 2.5 percent of that is freshwater, and less than one percent of that freshwater is readily available to us. Yet we often overestimate how much water we have, and reduce it further through pollution or inefficient use.

Some 92 percent of all freshwater used annually is dedicated to growing plants and raising animals for food. This means that if water runs out, our food supply might follow. In India, it is estimated that future water shortages could reduce grain harvests by 25%. In a country where the population exceeds 1.2 billion people and is growing rapidly every year, this is a huge concern. India, like many developing countries, is already struggling to provide for its population. While most people in developed countries can get water at the turn of a tap, nearly four billion people elsewhere lack access to safe water, according to a 2012 United Nations' World Water Development Report.

Rain forests are another endangered resource. They once covered 14 percent of the Earth's land surface, but this has shrunk to only six percent. Every second, an area of rain forest the size of a football field is destroyed—at this rate, rain forests will disappear completely in less than 40 years. All rain forests are important, but it would be a disaster if the Amazon rain forest was gone. Often called the "Lungs of the Planet," the Amazon stretches across a large portion of South America. It is so big that it produces 20 percent of the Earth's oxygen, and is home to more than half of the world's estimated ten million species of plants and animals.

Governments around the world have laws to help protect and conserve these precious resources. But, no matter how many rules there are, it is ultimately individuals who must help the planet to sustain itself. Changing our lifestyle and limiting our use of natural resources is the only way to ensure a better future for our children, and our children's children.
Reading Comprehension
Check Your Understanding

A  Choose the correct answers for the following questions.

1  What does the writer mean when he says people in developed countries can get water at the turn of a tap in line 20?
   a  Water is easily available to people in developed countries.
   b  People in developing countries do not have taps.
   c  People in developed countries waste more water.

2  The writer uses India as an example of a country that __________
   a  pollutes and wastes water
   b  depends on water to grow food
   c  has access to lots of clean water

3  Why does the author discuss our children's children in the last line?
   a  to say people who have children cause the most problems
   b  to compare the lifestyle of children and adults
   c  to suggest our actions affect the world beyond a few years

B  Read the following sentences. Check (✔) if the sentence is true for water (W) or rain forests (R).

Critical Thinking

C  Answer the following questions, then discuss your answers with a partner.

1  Have you ever been in a situation where there was no clean water? How long did you not have water for? What did you do?
2  Can you think of any natural resources that will never run out? Explain your answer.

Complete the following movie review with the correct form of the words from A.

Movie Review
Opening this week is Eat Less/Live More, a movie that follows the journey of Jacob Harris from (1) _________ achiever to environmental hero. At the start of the movie, Jacob is 30 kilograms (2) _________ weight and miserable in his (3) _________ paid job. When his car (4) _________ heats one hot summer day, he decides to walk to work. This inspires him to think of ways he can lose weight while living a more sustainable life. As his transformation gets (5) _________ way, the benefits turn out to be mental as much as physical, like in one hilarious scene where he stands up to a colleague who keeps trying to (6) _________ mine him. This movie has an (7) _________ stated style and an (8) _________ sized heart. 9/10

Motivational Tip: More than the definition. After completing this vocabulary exercise, think about what it means to truly know a word. If you know a word, you know more than the definition. You know it the context in which this word will appear, and what other words can be used near this word. I challenge you to think about more than just the definition of a word in order to improve your vocabulary skills.

5 _____________ ten thousand seven hundred

C Read the following passage to yourself. Then read one paragraph aloud to a partner, and listen as your partner reads the second paragraph to you.

Cigarettes and the Environment

When you think about trash, you probably don’t think about cigarette butts. With almost 4.5 trillion cigarettes being smoked worldwide each year, where are the butts (the unused ends of cigarettes) going? About 66 percent of butts don’t go into trash cans, but litter our beaches and streets. During the 2007 Great Canadian Shoreline Cleanup, volunteers collected some 270,000 cigarette butts.

Making cigarettes also affects the environment. Farmers use wood fires to dry tobacco leaves, using over 11 million tonnes of wood each year. This means nearly 600 million trees are cut down every single year. In southern Africa alone, 200,000 hectares of forest are chopped down annually. To make things worse, manufacturing cigarettes creates lots of factory waste, reaching a high of 2,460 million kilograms in 1995. That’s a lot of trash!

What do you think?

1 How can individual people preserve the environment? How?
2 Do you think volunteer activities are a good way to solve environmental problems? Explain your answer.
3 Whose responsibility is it to keep the ocean and land clean? Why?
Fluency Strategy: Reading ACTIVELY

In order to become a more fluent reader, remember to follow the six points of the ACTIVE approach—before, while, and after you read. See the inside front cover for more information on the ACTIVE approach.

Activate Prior Knowledge

Before you read, it’s important to think about what you already know about the topic, and what you want to get out of the text.

A Look at the passage on the next page. Read the title and look at the photo. What do you think the article is about? What are billboards?

B Think more about the topic. What do you know about billboards? Where can you see them in your country? What products are advertised on them? Discuss with a partner.

Cultivate Vocabulary

As you read, you may come across unknown words. Remember, you don’t need to understand all the words to understand the meaning of the passage. Skip the unknown words for now, or guess at their meaning and come back to them later. Note useful new vocabulary in your vocabulary notebook—see page 6 for more advice on vocabulary.

A Now read the first paragraph of the passage. Circle any words or phrases you don’t know. Can you understand the rest of the paragraph even if you don’t understand those items?

B Write the unknown words here. Without using a dictionary, try to guess their meaning. Use the words around the unknown word and any prefixes, suffixes, or word roots to help you.

Think About Meaning

As you read, think about what you can infer, or “read between the lines,” for example, about the author’s intention, attitudes, and purpose for writing.

Read the opening paragraph again and discuss these questions with a partner.

• What do you think is the purpose of the reading? Why did the author write it?
• How do you think the author feels about billboards with advanced technology? Do you think he or she is in favor of it, or against it?
• Why does the author call the billboards high-tech devices? How are the billboards high-tech?
Increase Reading Fluency

To increase your reading fluency, it's important to monitor your own reading habits as you read. Look again at the tips on page 8. As you read, follow these tips.

Now read the whole passage Billboards That Recognize You. As you read, check your predictions from Think About Meaning.

BILLBOARDS THAT RECOGNIZE YOU

1. Have you ever felt you were being watched? Some new technologies might make you feel that way. Digital billboards are being created that have the ability to recognize certain characteristics. These high-tech devices have cameras pointed at the people on the street, and software that tries to recognize people by age and gender. A computer inside the billboard then uses this information to display ads that are directed at the people who are looking at the billboard. For example, if a man passes a billboard featuring an ad for cosmetics, the computer can change the ad to something that is more likely to catch the man's attention, such as a restaurant, or sporting goods.

2. While advertisers see this as a great opportunity to reach their target customers, some people feel that this kind of profiling is an invasion of their privacy. People are now much more aware of how information is exposed, shared, bought, and sold on the Internet. Now this debate will include technologies such as these "smart" billboards. But advertisers claim that they are sensitive to people's concerns about privacy—companies that have tested the billboards in Japan and the U.S. assure consumers that the billboards can only guess your age and gender, but they will not be able to recognize your face or obtain any personal information about you.

3. Until recently, this kind of "personal" advertising has been mostly limited to the Internet. Search engines like Google and Bing can follow what we search for because each computer that connects to those sites has a unique identity. Companies then pay search engines to use this information to display ads for products and services that you have searched for. So if you search for travel information, you are likely to see ads for airlines and hotels. This kind of advertising has proven to be much more effective—and valuable—than traditional advertising.

4. In addition to taking steps to deliver more personalized messages, advertisers are using billboards to offer more useful information. Digital billboards can connect to the Internet to display information such as the time, weather, and news headlines. In the future, this technology could be used to reflect activity on social media sites or to broadcast ads that relate to local events.

5. In today's world, people ignore thousands of ads every day. Advertisers are trying to change that trend by personalizing the experience of seeing an ad. So pay attention the next time you see a billboard—it could be talking to you.

Verify Strategies

To build your reading fluency, it's important to be aware of how you use strategies to read, and to consider how successfully you are using them.

Use the questions in the Self Check on page 158 to think about your use of reading strategies.
Evaluate Progress

Evaluating your progress means thinking about how much you understood from the passage, and how fluently you were able to read the passage to get the information you needed.

Check how well you understood the passage by answering the following questions.

1. What is another possible title for the passage?
   a. The Dangers of Technology
   b. Billboards Past and Present
   c. How Information Is Sold
   d. A New Level of Advertising

2. What does a digital billboard’s camera look for?
   a. a person’s fashion style
   b. what a person is carrying
   c. a person’s age and gender
   d. whether someone is alone

3. What is the main idea of the second paragraph?
   a. High-tech billboards do not collect personal information.
   b. People do not mind the billboards tested in Japan and in the U.S.
   c. Advertisers buy information about consumers on the Internet.
   d. People are worried about the type of information collected by billboards.

4. Why does the passage mention Google?
   a. It is an example of a search engine that sells information to companies.
   b. It is better than other search engines in gathering information.
   c. It has started using high-tech billboards to get information.
   d. It plans to develop better ways to profile Internet users.

5. Because of advertising profiling, a person buying airline tickets online will ___.
   a. see ads for hotels and car rental companies
   b. get better prices on their airline tickets
   c. see no ads on the airline’s website
   d. be offered discounts on shoes and clothing

6. In the passage, the writer says that video billboards ___.
   a. allow people on the street to use the Internet
   b. show movies and commercials
   c. display information about the weather and news
   d. are placed inside stores and buildings

7. What is the reason for advertisers making high-tech billboards?
   a. People ignore regular advertisements.
   b. Regular billboards are not in good locations.
   c. It is cheaper to make high-tech billboards.
   d. People are suspicious of regular advertising.

C Look again at the *Are You an Active Reader?* quiz on page 10 and complete the chart again. How has your reading fluency improved since you started this course?
You’ve seen restaurant reviews in newspapers, or perhaps in magazines or on the Internet. People read these reviews when they want to know about the quality and price of the food at a restaurant. Or maybe they’re looking for a restaurant with a distinctive atmosphere—dark and romantic, bright and cheerful, or modern and sophisticated. But who writes the articles? Who gets paid to eat? Those lucky people are food critics.

Food critics are journalists who eat at restaurants and write reviews that give readers the feeling that they have visited the restaurant themselves. The articles almost always include a description of the restaurant, for example, whether it is nicely decorated or has a beautiful view of the ocean. The menu, prices, and service are generally described as well, but a food critic’s main task is to write about their opinion of the food.

For “foodies”—people who love and study food and cooking—dining is a feast for the senses, not just for the stomach. Food critics may tell readers about the colors of fresh vegetables, the silky texture of a soup, or the rich aroma of a perfectly cooked chicken. They will mention whether they were listening to soft music while they ate, or the noises of pots and pans being washed in the restaurant’s kitchen. And most importantly, they will describe the taste of every dish on the table, starting with the appetizer and ending with the dessert. Every detail of the meal is important.

All of this may sound easy enough, but food critics do face some challenges. First, food critics must be excellent writers. Their job is to give accurate information in an entertaining way because newspapers and other publications want the restaurant review to be an enjoyable feature. It is also important for food critics to be very observant by nature, and to have an excellent memory, since taking notes at the table is not something typical customers do.

Looking like a typical customer is essential for remaining anonymous, but is perhaps the most difficult challenge. Food critic Ruth Reichl, former editor-in-chief of Gourmet magazine, used to go to restaurants wearing disguises so that she received the same food and service as any other diner.

Despite the challenges, a career as a food critic appeals to many people. Anyone who is thinking about becoming a food critic should start by developing strong writing skills and learning as much about food and cooking as possible.
Reading Comprehension

1. Food critics are _____.
   a. Restaurant owners
   b. Professional cooks
   c. Professional writers
   d. Magazine editors

2. Which of the following would probably NOT be included in a restaurant review?
   a. A description of a restaurant's atmosphere
   b. Information about a restaurant's hiring procedures
   c. Information about a restaurant's prices
   d. A description of a restaurant's food

3. What is the purpose of paragraph 3?
   a. To say that a critic must use all his or her senses when at a restaurant
   b. To teach critics what they need to pay attention to when at a restaurant
   c. To show that it is a very difficult job being a food critic
   d. To say that the taste of the food is the most important detail of a review

4. Why does the author mention soft music and the noises of pots and pans being washed?
   a. Because food critics must listen carefully to the waiters
   b. Because it's important for restaurants to use clean dishes
   c. Because food critics generally focus on the positive
   d. Because food critics must pay attention to every single detail

5. According to the passage, food critics need a good memory because _____.
   a. They have to avoid taking notes at the table
   b. They have very busy schedules every day
   c. They like having a challenging job
   d. They need to remember which restaurants they have been to

6. Why did Ruth Reichl go to restaurants wearing disguises?
   a. She didn't want to get special food and service.
   b. She didn't want her friends to know she was a food critic.
   c. She enjoyed seeing people's reactions.
   d. She had a different job during the day.

7. How does the writer end the passage?
   a. With a writing tip
   b. With a warning
   c. With a personal example
   d. With advice
Cities are home to skyscrapers and apartment buildings, and it's rare to find wide, open spaces within them. With limited space for parks and gardens, architects and city planners often find it challenging to incorporate greenery in neighborhoods. One creative solution is to grow plants on unused areas like walls and rooftops. It's a popular idea, and now rooftop gardens and green walls have been sprouting up\(^1\) in cities around the world.

There are many benefits to having green spaces to the urban landscape. Adding gardens to rooftops or walls can create a pleasant environment—what was once a gray cement wall can become a colorful, blooming garden. The CaxiaForum art gallery in Madrid, Spain, is a famous example—one of its walls is covered with 15,000 plants from over 250 different species.

In other cities, green walls are being used more functionally, to cover up construction sites and empty buildings and to prominently decorate the lobbies of office buildings.

Using plants to cover walls and rooftops can also keep cities cooler in the summer. Buildings and roads absorb the sun's heat and hold it, causing a building or neighborhood to stay warmer longer. Plants, on the other hand, provide an enormous amount of shade. There is evidence that growing a roof or wall garden can lower a building's energy costs. Many cities offer tax discounts to businesses with these features.

In New York City, public schools plant rooftop gardens that can reduce heating and cooling costs. In addition to saving the school money, teachers and parents love the gardens because of their educational value—it's a fun and healthy way for their kids to investigate the world around them. "For the children, it's exciting when you grow something edible,"\(^2\) said Lauren Fontana, principal of New York's The Public School.

These green spaces are also used to grow food. In recent years, rooftop gardens have slowly been included in the "local food movement." This is based on the concept that locally grown food reduces pollution since it does not have to be transported far. Vegetables are being grown in rooftop gardens by schools, churches, neighborhoods and even restaurants. Chef Rick Bayless serves "Rooftop Salsa" at his restaurant in Chicago, USA, using only ingredients grown in his rooftop garden.

Rooftop gardens and green walls may require a bit more effort to grow and maintain. However, hard work always brings rewards, and with green spaces, the rewards are plentiful.

\(^1\)When something sprouts up, it appears suddenly. A sprout is a young plant.

\(^2\)Something that is edible can be eaten.

Reading Comprehension

1 What is this article mainly about?
   a gardens in Madrid, New York, and Chicago
   b people growing plants on roofs and walls
   c private gardens in the city’s unused spaces
   d how to grow your own food in the city

2 According to the article, people ____ as cities have little space for gardens,
   a grow plants in their apartments
   b go to the countryside on the weekends
   c paint their walls and roofs green
   d grow trees and flowers on top of roofs

3 Why is the green wall in Madrid mentioned in the article?
   a It is the most expensive green wall in the world.
   b It is located on the side of a government building.
   c It is a famous example of a green wall.
   d It was made to provide jobs for homeless people.

4 Which is NOT mentioned as a benefit of a rooftop garden?
   a It becomes a park that the community can use.
   b Having one might mean paying less taxes.
   c Children can use it to learn about the environment.
   d Growing plants on a roof keeps buildings cooler.

5 Because food can now be grown in cities, ____
   a the food at expensive restaurants is cheaper
   b governments are making many rules about city gardens
   c farmers in the countryside are moving to the city
   d there’s less pollution caused by transporting food

6 Why did Chef Bayless name his dish “Rooftop Salsa”?
   a He got the idea while cooking on his rooftop.
   b He buys the salsa from other rooftop gardeners.
   c It is made from food grown on his rooftop garden.
   d The money earned from the dish is given to rooftop gardeners.

7 What is the main idea of the last paragraph?
   a Rooftop gardens and green walls will take a long time to develop.
   b Rooftop gardens and green walls are worth the time and effort.
   c People with rooftop gardens will be able to grow and sell their own food.
   d People underestimate the effort needed to maintain rooftop gardens and green walls.

**Calculating your words-per-minute (wpm)** At the end of each passage you see the number of words in the text (i.e., Practice Reading #1 = 175 words). Divide your time into the number of words in the passage to get your wpm. For example, if you read Practice Reading #1 in 45 seconds, your wpm equals 233 wpm (175/.75 = 233).

**Quadrant 1:** You are reading slower than 200 wpm with less than 70% comprehension.
**Quadrant 2:** You are reading faster than 200 wpm with less than 70% comprehension.
**Quadrant 3:** You are reading slower than 200 wpm with greater than 70% comprehension.
**Quadrant 4:** You are reading faster than 200 wpm with greater than 70% comprehension.

ACTIVE Skills for Reading 2

ACTIVE Skills for Reading is an exciting five-level reading series that develops learners' reading comprehension and vocabulary skills. Written by reading specialist Neil J Anderson, the new edition of this best-selling series uses an ACTIVE approach to help learners become more confident, independent — and active — readers.

What's New in the Third Edition of ACTIVE Skills for Reading?

- **New readings!** A substantial number of the reading passages have been replaced. All other readings retained from the previous edition have been revised and updated.

- **New Motivational Tips!** Each chapter contains a tip box with Neil J Anderson’s suggestions to students on ways to boost their motivation and become stronger readers.

- **New!** Full-color design and photographs to engage students' interest.

- **New!** Completely revised assessment CD-ROM with ExamView® test generator software.
