Introduction to Solutions Third Edition

A note from the authors
Welcome to Solutions Third Edition. Teachers' responses to Solutions and Solutions Second Edition have been overwhelmingly positive. Solutions Third Edition has evolved, based on teacher feedback, whilst retaining the key features that teachers value in the Solutions series:

- engaging topics and texts
- a strong focus on exam topics and tasks
- a clear structure, with easy-to-follow lessons that always have an achievable outcome
- a familiar teaching and learning approach with plenty of extra practice material
- a guided and supported approach to speaking and writing

In the course of extensive research carried out for the new edition, we spoke to scores of teachers and asked them how we could improve the course. In response to their requests, we have:

- provided 100% new content
- included a Listening lesson in every unit which will develop your students' listening skills
- included a Word Skills lesson in every unit which explores the grammar of key vocabulary and includes dictionary-based exercises
- addressed mixed ability, with extra support for all levels and suggested extension activities in the Teacher's Guide
- increased the amount of language recycling and included a Recycle! activity to consolidate grammar students have studied earlier in the course
- provided added flexibility with a bank of Culture lessons with supporting DVD documentary clips at the back of the Student's Book and extra activities on the Classroom Presentation Tool

Solutions Third Edition has benefited from collaboration with teachers with extensive experience of teaching and preparing students for exams. We would like to thank Helen Halliwell for sharing her expertise in writing the procedural notes in the Teacher’s Guide.

We are confident that the result is a forward-thinking and modern course that will prepare your students for the future and provide you with all the support that you need. We hope that you and your students enjoy using it!

Solutions Third Edition – new features

New for the Student’s Book
- New Listening lesson – with a focus on sub-skills to develop students’ listening skills. Lessons include strategies, exam-like practice and speaking activities.
- New Word Skills lesson – students learn the grammar of key vocabulary in context, including word building and phrasal verbs. Students also develop their dictionary skills.
- New Culture Bank – nine Culture lessons linked to the topic and language of the main units. These ready-to-use lessons can be used at any point in the course, giving teachers the flexibility to choose when to use them.

New for the Workbook
- More listening practice.
- Five Exam Skills Trainers providing further practice of typical exam tasks.
- Nine Unit Reviews to encourage students to reflect on their progress.

New for the Classroom Presentation Tool
- Optional lesson openers – additional lead-in activities to motivate students and recycle language.
- Optional lesson closers – quiz-style round-up activities to consolidate what students have learned in the lesson.
- Optional task support – for example, useful language or extra ideas to help students complete classroom tasks.

Transcript

1 I've performed all over Britain in clubs as a stand-up comedian, and it can be hard work. I did a show in Liverpool last Saturday and the audience let me know that they didn't think I was very funny! When a show goes badly like that, you need to be thick-skinned because people can say some quite hurtful things. Fortunately, I'm quite single-minded and I won't let one bad show stop me. I've also had very successful nights, and I know that as long as I continue to be hard-working, I'll eventually do well.

2 I've always enjoyed travelling on my own because it gives me the opportunity to be a real traveller, rather than a tourist. I've made lots of friends all around the world that I wouldn't have made if I always travelled with a group of people. Of course, you need to be quite self-confident to travel alone. And it helps to be open-minded – on one of my trips, I was invited to a meal with a family, and cooked insects were on the menu! I didn't want to seem bad-mannered, so I ate them. You also need to be easy-going when you're travelling on your own and realise that things won't always go the way you plan them. Actually, it's the unexpected events that make trips more interesting anyway!
3 My brother Sean has worked as a DJ for a long time, and he does weddings and other social events. He always tells me that being a DJ is a lot more than just playing records. A DJ needs to be quick-witted and able to deal with difficult situations such as when guests are not well behaved. Two weeks ago, an argument started at a wedding between the bride and groom’s fathers, so my brother played a disco classic and in two minutes they were dancing together, and suddenly the atmosphere was much more light-hearted! Sean has had to deal with quite a few situations like that, but fortunately the majority of people just want a good time.

Exercise 1  (page 10)
(Possible answer)
A stunt double is a person who looks like an actor and who performs dangerous stunts (dangerous and difficult actions that somebody does to entertain people, especially as part of a film) instead of the actor in a film. An actor does not usually perform dangerous stunts because they might get hurt, whereas the stunt double is trained to do such stunts.

1 I think paparazzi drones should be banned. They completely disregard people's right to privacy. It's bad enough that the paparazzi have zoom lenses and sit in trees and take secret photos. But sending flying cameras down the street after celebrities, or over walls into their gardens and through their windows – I think that's horrible, and cruel to the people they are harassing. The tabloid press say that they are operating 'in the public interest', but that's just an excuse for stalking people for money.
2 Well, I'm not in favour of invading someone's privacy, of course, but I'm also not in favour of banning drones without thinking about it properly just because famous people don't like it. There's quite a lot of media regulation already, and we need a free press. I agree that famous people shouldn't be stalked or harassed, but surely drones are useful for researching other news stories in investigative journalism? In the US state of California, the police have now been given the right to use drones without needing to ask for permission first. So what's the difference, and who's going to regulate it?

3 I don't have any compassion for people who spend their whole lives looking for fame and publicity, but then want it only when it suits them. Famous people need the public to recognise them. That's the definition of fame! And so many vain and self-satisfied celebrities use mass media to portray only the image that they want the public to see – but that's false, an illusion. Why shouldn't we see famous people as they really are? I think journalists have the right to hunt out lies, hypocrisy and scandal wherever they find it.

4 I think the topic of press regulation is a difficult one. I essentially believe in a free press and serious investigative journalism – I think they are so important in a democratic country. But I think there's too much pressure to produce 'news' these days. Journalists have to always be on the hunt for the next big story, and so it sometimes seems that a lot of stories are just made up. Newspapers – especially the tabloids – just print rubbish about famous people. I'm not surprised that celebrities get fed up with it and sue them for libel.

1 Philip That went well, didn’t it?
   Sandra Yes, I think you could say it was a complete success!
   Philip Everyone seemed to be really enjoying themselves – the crowd went wild towards the end!
   Sandra Yeah. The band looked as if they were having fun too. They were grinning the whole time.
   Philip That’s because they knew it was all for a good cause.
   Sandra Absolutely. There were loads of people, weren’t there? Far more than we expected.
   Philip Well, human rights is such an important issue to a lot of people. So, how much do you think we made?
   Sandra I don’t know. The concert was sold out, but there are still a few things to deduct from the ticket sales.
   Philip The band played for free though, didn’t they?
   Sandra That’s right. We couldn’t have done it without them.

2 Newsreader Tales of extraordinary bravery are emerging from Nepal after the country was hit by an earthquake measuring 7.8 on the Richter scale. The quake caused an avalanche on Everest which swept climbers away and flattened part of the camp at the base of the mountain. The avalanche caught medics by surprise, and one of them, 34-year-old Rachel Tullet, was swept onto a rock, injuring her leg. Despite the pain, Dr Tullet leapt into action and succeeded in keeping 23 critically-injured patients alive until they could be evacuated to hospital by helicopter. What she didn’t tell anyone was that she had a gaping wound in her own leg at the time. Later, she stitched up the wound herself – without an anaesthetic. Dr Tullet is currently recovering at her home in New Zealand, but is planning to return to Nepal in a fortnight.

3 Interviewer Today, I’m talking to David Wilson from the Institute of Psychology. David, could you tell us just what it is that makes people want to be famous?
   David Wilson In my view, most people want fame for attention and money these days – you need only look at reality shows like Big Brother or Pop Idol to see what I mean. The problem is that this kind of fame can be very short-lived. Let’s take the group Hear’Say, as an example. Now, Hear’Say were the winners of the ITV1 show Popstars. Their first single sold 1.2 million copies and their debut album more than a million. But sales started to slow after their second number one single, and the band split up less than two years after first entering the limelight. Personally, I think it takes genuine talent rather than a desire to be rich to stay at the top.

Speaker 1 Well, I don't suppose it’s very important, but something that I find really irritating is when people are always updating their status on social networking sites! I'm really not interested in hearing how thrilled someone is with their new shoes, or how they feel about going to the coolest pizzeria in town. But what really gets on my nerves are the emotional messages that appear every five minutes about how somebody is missing their boyfriend or girlfriend terribly and how miserable they feel! What's more, they've usually only been going out with each other for about a week!

Speaker 2 I get really mad when I go to the cinema and people are constantly eating popcorn. I really blow my top – I don't just sit there feeling angry: I tell people to keep quiet! My boyfriend says that one day someone is going to react in a hostile way, but for the moment nobody has said anything – but they haven't stopped eating popcorn either! They eat more quietly for a while, but gradually it starts getting louder and louder. And for one week at the end of this month, my local cinema is offering free snacks with every film, so it's only going to get worse!

Speaker 3 I was over the moon when I got a new laptop for Christmas, but since I've had it, I've had nothing but problems. The first day, it took ages to start up, but I just thought it was because I had transferred all my documents to it the night before, but every time I switch it on, it works more and more slowly. It's so slow that I feel like tearing my hair out! Right now, it's downloading some photos from my mobile, and after thirty minutes it still hasn't transferred half of them! I feel really frustrated every time I use it. I'm taking it back to the shop tomorrow and I hope something can be done about it.
Speaker 4: I have to say I'm in two minds about participating in more online forums. I'm participating in one about recycling at the moment, but there are lots of trolls who are always criticising the green movement and even insulting some of the contributors. I have to admit that I'm amused by some of the comments, but the rude ones leave me fuming. The moderator is making some changes to the site next month, but the trolls always find a way of getting their silly messages through, so I'll have to decide if I'm going to continue taking part.

Gemma  George, can I talk to you in private for a minute?
George  Of course, Gemma. What’s the matter?
Gemma  Don’t tell anyone, but I’ve just seen Sarah taking some money out of Alex’s jacket pocket.
George  What? You mean she borrowed some money?
Gemma  No … I think she stole it.
George  Where was this?
Gemma  In the classroom just now. Everyone was out for break time, I just went back for something I’d forgotten.
George  Did she see you?
Gemma  I don’t think so. But there’s more to it than that. I’ve noticed that other little things have been disappearing lately. Lucy lost her necklace and Sam’s lunch money went missing.
George  But Lucy and Sam are both as forgetful as each other! It doesn’t mean their things were stolen. Why do you think it’s Sarah?
Gemma  Well, Lucy loves that necklace. She only takes it off for sports. And Sarah and Lucy do sport together. And Sam did have his dinner money earlier that day. I saw him take it out and check it. Sarah was there and saw him too.
George  But, Gemma, there’s no proof. Are you absolutely sure?
Gemma  No, of course I’m not sure. It’s just making me wonder. Don’t you think Sarah is quite down these days? I’ve asked her what’s wrong more than once. She just says everything’s fine, but I don’t believe it.
George  Come to think of it, she has been a bit quieter and more miserable lately. I’m not sure what to do. Should we speak to Sarah or her teacher?
Gemma  Oh, not a teacher. What if I’m wrong? That would be terrible.
George  Well, what are the facts? Basically, you saw Sarah put her hand in Alex’s pocket and take out some money.
Gemma  Yes.
George  So – you have to tell her what you saw and see what she says.
Gemma  I suppose so. But what if there’s a simple explanation? She might be devastated that I’m suggesting she’s a thief. Perhaps I should check with Alex first?
George  Actually, he’s someone who does get easily enraged. He might get angry and start making a big fuss. That would be worse for Sarah. Look, shall I come with you to talk to her?
Gemma  Would you? I’d be really grateful.

Monika  Well, it’s just that I think we need to decide on some rules for cleaning the flat … We want to live together successfully, don’t we?
Examiner  Really? I thought we were living together successfully! What did you have in mind?
Monika  Err, I thought perhaps we could have a cleaning rota. We’re supposed to keep the flat clean, you know. It’s in our contract.
Examiner  Well, OK. You must feel that I haven’t been doing my share of the cleaning, then.
Monika  Well, it’s just that sometimes when you’re in a hurry, you leave things in a mess.
Examiner  Oh, I’m sorry. Do you think I’m not as tidy as you are, then?
Monika  Well, yes, I’m afraid I do. I didn’t want to bring it up, but you left the kitchen very untidy last Friday evening before you went away. The sink was full of dirty plates.
Examiner  Oh, I’m sorry about that. You should have said something earlier. I’ll make sure I wash the dishes next time.
Monika  Well, OK. You must feel that I haven’t been doing my share of the cleaning, couldn’t we? You do it one week, I do it the next.
Examiner  Yes, we ought to clean the bathroom too, and vacuum the carpets.

Freddie I thought perhaps we could agree on some rules for the flat.
Examiner Well, sure. You obviously have certain things in mind, don’t you? What are they?
Freddie Well, yes. Could we possibly agree on some rules for visitors?
Examiner Really? Like what?
Freddie Well, you have friends here all the time and it’s sometimes difficult to do any studying.
Examiner Well, you have visitors too, don’t you?
Freddie Not as often as you do. And usually only one visitor at a time. You often have four or five people here at a time. We aren’t really supposed to have more than three visitors at a time. It’s in the contract.
Examiner Who cares about the contract? The landlord will never find out. But OK. Look, I’ll text you beforehand to see if it’s OK for my friends to come over. And I’ll go out to see them a bit more.
Freddie Great.
Examiner Is there anything else?
Freddie Yes. I don’t think you realise how noisy you all are when you’re together. And your music is really loud. I can’t concentrate, and I’m supposed to be studying every night for my exams.
Examiner You should have said something earlier.
Freddie But it’s embarrassing to ask your friends to be quieter.
Examiner OK. Fine. I’ll ask them in future.
Freddie OK. Great. That’s everything sorted, then.

1 If you have a cold in Japan, you should sniff rather than blow your nose. If you blow your nose in public, you might disgust a few people, so it's better to go to the bathroom to do it!

2 When a Turk raises their eyebrows, they are doing it to say 'no'. Very often this gesture is accompanied by a tutting sound, so they raise their eyebrows and make this sound – tut – at the same time.

3 If you want to wish someone good luck in Vietnam, don't do it by crossing your fingers! It's considered a very rude gesture and could get you into trouble!

4 You might shake your head to say 'no' in your country, but in Bulgaria it's exactly the opposite. Shaking the head means 'yes'!

5 It may seem normal to you, but people in many countries, Indonesia for example, will think you very rude if you point at people or things.

6 Making a noise when drinking is rude in many countries, but not in Japan. You can slurp whether you are drinking tea or eating a bowl of noodles.

7 Giving the thumbs up in Thailand is something that children do, so it's not offensive, but it's seen as childish. It's a bit like a child sticking out their tongue!

1 Interviewer: So what do you consider to be social taboos?  
Passer-by: Well, when you want to cough or sneeze, you should turn your head away and cover your mouth. Nobody wants to share your germs! And if you have a cold, take out a handkerchief, stand to one side and blow your nose! I know that sniffing is acceptable in some cultures, but if you're planning to come to Britain, you might annoy people if you constantly sniff!

2 Tom: Anyway, so how did the school exchange trip to Madrid go?  
Leah: Fantastic. We had a great time.

Tom: What was your host family like?  
Leah: They looked after me really well and they were very friendly. In fact, at first I thought they were too friendly! It's a bit like a child sticking out their tongue!

Tom: What do you mean?
Leah: Well, when they met me at the airport, they all gave me a hug and a kiss on both cheeks! I just stood there blushing!

Tom: You'd never see British people doing that with people they don't know!

Leah: I know! They also gesture a lot more. The girl I stayed with, Marta, was always shrugging her shoulders or moving her arms around. She spoke with her hands! If she comes to stay with me and my family next month, she'll have the opposite first impression to mine: she'll think we're cold and reserved!

3 Now, we're going to look at how to behave in an interview. Obviously you're going to be nervous, but you really have to make an effort to control your body language. It goes without saying that if you bite your fingernails, you won't make a very good impression. However, there are other types of body language that it is best to avoid too. If you fold your arms, you could look defensive and tense, but on the other hand, don't stretch your legs out in front of you either as you will appear too relaxed! You need to find a balance; sit with your feet flat on the ground and your arms resting on the chair with your hands together in front of you.

4 Director: Cut… cut!
   Actor: What's wrong?
   Director: It's the expression on your face. It's not right.
   Actor: But if I do the scene like that, the audience won't want it to be obvious at first. You're supposed to be a man who is not very good at expressing his feelings!
   Director: OK, OK, whatever you say!
   Director: Exactly — whatever the director says! OK, everybody, positions please! And… 3… 2… 1… action!

5 The government has issued a statement regarding travel to Africa in the near future. All those intending to visit there are advised to check with the Foreign Office as to whether their chosen destination is affected by the virus.
6 Tired of queuing in busy airports? Tired of waiting to check in? Tired of searching for a seat in the departure lounge? Then you need FASTRACK! Become a member of FASTRACK and airline travel will fast become a pleasure, not a chore!
4 One of the many delights of the street markets here is the sheer abundance of the different herbs and spices on offer. Just look here at the piles of turmeric, cumin, paprika and garlic. Wonderful. Also wonderful are all the snacks that you can buy, freshly cooked right here on the spot. They say the best food you can eat here in Morocco is on the street in the markets, not in the hotels or cafés. I’m going to try some of this local crusty bread – called *khobz* – with a rich fava bean soup, flavoured with as much garlic as possible! You don’t have to use cutlery – you can eat it with your fingers, dipping the bread into the soup. Oh my! It’s delicious! You must come here and try it for yourself.

The photos show two different family celebrations. The first is probably a wedding reception, judging by the smart clothes and the flowers. The second looks like a more informal occasion – maybe a birthday party. Both are very common family celebrations in my country – and probably in most other countries too.

As far as food is concerned, family celebrations always include some special dishes. For example, at a wedding, there is always soup, which the bride and groom eat together with one spoon. And of course, when it’s a birthday, there’s always cake.

There’s something else I’d like to talk about: there are some interesting traditions connected with weddings. For example, at the beginning of the wedding reception, somebody breaks a plate at the feet of the bride. The bride and groom then clear up the mess together. It doesn’t sound like fun, but really, it’s a symbol of the bride and groom working together. Then, towards the end of the wedding reception, some friends of the married couple take the bride away and hide her. The groom has to find her. If he fails to find her, he has to pay money.

3 Yeah, my folks have booked a vacation to South Africa in the fall. It should be cool – we’ll get to see lions and elephants and zebras and stuff.
4 Sorry I’m so late. I only stopped off to pick up some cookies and some chips, but I had to wait in line for ages. I wish I hadn’t bothered.
5 That was delicious. Shall we get the bill then? Could you pass me my purse – it’s just there in the top of my handbag.

Speaker 1 This happened to me during my Erasmus year in Germany. I'd made friends with a German girl called Lina, and one day she invited me to her grandmother's house for lunch. As we all sat down at the table, Lina's grandmother said that she hoped I would enjoy the meal: it's Guten Apetit in German. I wanted to reply Same to you which in German is gleichfalls. Unfortunately, I came out with Durchfalls instead, which means 'diarrhoea'. Everything went quiet and then Lina told me what I'd said. I nearly died of embarrassment!
Speaker 2 I made a real fool of myself when we were on holiday in Greece one year. I always like to learn a few words of the language when I go abroad, and that year was no exception. When we arrived at our hotel, I walked straight up to reception and said kalimari to the receptionist. My confidence was shattered when she burst out laughing, as did the rest of my family. It turns out that I'd used the word for squid – kalamari instead of the word for Good morning – kalimera. That was the last time I spoke any Greek on that holiday!
Speaker 3 I was in Venice on an exchange visit and for some reason or other, I was teaching my host family how to count in Spanish. I was walking backwards saying the numbers for them to repeat: seis, seis; siete, siete; ochos, ochos… OCHO! OCHOS!! – I couldn't understand what they were getting so excited about! Suddenly, I was hit by a cart full of fish: the family hadn't been repeating ochos to mean number eight; they were saying Occhio!, which means Watch out! in their particular dialect of Italian. The little old man pushing the cart was very apologetic, but I felt like a complete idiot!
Speaker 4 I had a terribly embarrassing experience once when I was trying to buy a rail ticket in France. I was at a station in Paris and I wanted to go to Avignon in the South. When it was my turn, I went up to the desk and asked for a return to Avignon. The woman looked at me for a moment and then said, Pardon? – Sorry, so I repeated my request. Imagine my surprise when she told me they didn't sell that kind of ticket at the station. It appears that I hadn't said Avignon correctly and she had understood avion – plane. She thought I was trying to buy a plane ticket!

1 Lilly If only we were already on holiday!
   Harry Well, there are only a few weeks to go.
   Lilly Have you checked out the route?
   Harry Yes. Most of it’s along country paths, so we won’t have to deal with traffic very often. In fact, there are very few real roads that cross the area. If you wanted to escape from the world, this would be a great place to live because it’s really difficult to get to.

2 Sam What are your plans for this summer?
   Amy My best friend and I have decided to help the National Trust.
   Sam Really? That sounds more like hard work than a holiday!
   Amy Well, it depends on what you understand by the word ‘holiday’! I love visiting historic buildings, and the National Trust looks after them and they organise Youth Discovery holidays for young adults.

3 Andy So what was it like?
   Ann Disappointing, to be honest. I was expecting a quiet seaside resort, but there were loads of people everywhere.
   Andy Was there any nightlife?
   Ann There was too much. The town was full of clubs, bars and restaurants, and the only shops were selling souvenirs.
   Andy It sounds awful! I’m glad I spoke to you because we were thinking of going there.
   Ann Well, I wouldn’t go if you want to relax! Instead of relaxing, we came back feeling stressed!

4 Jack My mum and dad are talking about booking a holiday in Spain at the same hotel that we went to last year, but I wish they’d change their minds. I’d prefer to stay at home!
   Chloe Why? I’d be really pleased if I had the chance to go to Spain! A nice hotel near the beach with everything organised – if only we stayed in places like that!
   Jack Well, last year, we never went anywhere and spent all our time in the hotel complex, which was really boring. The hotel was quite old as well and hadn’t been decorated in years. What did you do?
   Chloe We stayed at home and went on day trips.
   Jack At least you did different things. I wish we had done different things in Spain!

1. A Hello?
   B Hi, darling. I just made the 4.55 after all!
   A Oh, well done! You must have run to the station!
   B I did! Well, no … actually, I got a cab! Anyway, I should be back around the usual time.
   A That's great. See you in a couple of hours. Safe journey.
2. A Hey, John. Why are you carrying that huge rucksack into class?
   B I'm off to Dartmoor National Park very soon – straight after the last lesson. There's a group of us who camp up there in the hills at weekends. It's just amazing.
   A Wow, sounds great. But you don't travel light, do you?!
   B Well, I need it all. By this evening, I'll have put up the tent in some remote spot and we'll be lighting a campfire!
   A That's a good way of getting away from it all!
   B You should join us one day.
   A Nah, don't fancy sleeping rough! But have a great trip!
3. A Hi. You're Mandy, Erica's cousin, aren't you?
   B Yes, that's right.
   A Hi, I'm Ellen – a friend of Erica's from school.
   B Not at all. I've just ordered a coffee.
   A It's just that Erica said you'd done some volunteer work in South America.
   B Yes, I did, last year. Are you thinking of going?
   A I am. Did you have a good experience?
   B Yes, it was wonderful.
   A Could I just ask you some questions about it?
   B Have you got a minute to join me for a coffee just now and I'll tell you about it? I don't have to be anywhere till one. The waiter will be back in a minute.
   A Yeah, that'd be great, thanks! I'm out shopping and have plenty of time.
4. A Good evening, sir. Can I help you?
   B Yes, I have a reservation under the name of Black.
   A Let me just have a look. Yes, here we are. Mr Black, a single room for two nights. You're in room 407, which has a lovely view of the city. Can I get someone to help you with your bags?
   B Thank you, but I just have this small one. Can you tell me what time the restaurant is open?

B Would you really? I had no idea you were into that sort of thing. Isn't it extremely pricey?
B A cruise? A package trip? That's not like you. We've always avoided travel companies because you want to go off the beaten track – without queues of tourists.
A This is not the same thing! There are hardly any queues in Antarctica. It's a package holiday, sort of, but with a difference! Groups are small, around ten people, and you travel in a little boat, not an ocean liner.
B I thought that trips to Antarctica weren't supposed to be good for the environment. I read about that somewhere. Too many tourist boats were breaking up the ice or something.
A But it says here that the trip is completely environmentally friendly. The company has won awards for it.
B Well, OK. Maybe that's all right then … Anyway, I've got to order some food, quickly. I've got to go soon, or I'll be late for work.
A Me too. I've got a meeting at 9.30. Anyway, look, the best time to go is between November and March.
B Why's that?
A Because that's when it's warmest! That's the Antarctic summer.
B Really, well, how hot is it then?
A Hot . . . That's funny. It's maximum 2°C!
B Lovely. So no swimming then.
A Hmm. I can see you're taking the idea of this trip seriously . . .
B It's not my cup of tea, I'm afraid. But, are you really serious about this?
A Well, no. Not if you aren't interested.
B Why? You can go, if you want.
A Well . . . I can't go on our honeymoon on my own, can I?
B What? Did you just say what I think you just said . . . ?

1 He chooses A, the luxury coach tour. The reasons he gives are: it's cheap and all costs are included, he'll be able to see a lot from the coach windows, it's more convenient and less stressful to go on an organised coach tour.
2 He rejects B, travelling by train, because he doesn't think it's as safe. He doesn't want to organise his own transport in strange places where he doesn't know the language. He doesn't like big train stations very much and finds them stressful.
He rejects C, the cruise, because he doesn't think there'll be many young people on the ship. He gets sea-sick and it's the most expensive.

Transcript
For travelling in my gap year, I think I'll choose to travel by coach, mainly because I won't have a lot of money, and this coach trip is cheap and all costs are covered. I'll want to see as much as possible; the best option would again be the coach, as I think you see more from coach windows. That's because you travel through towns and villages, not just on the outskirts of a place. I also think it's more convenient and less stressful to go on an organised coach tour because you are always taken care of, your accommodation is sorted and you can't get lost!
I wouldn't go for the train ticket option for the reason that I don't think that sort of trip is quite so safe. I worry a lot, so I wouldn't feel comfortable organising my own transport in strange places where I didn't know the language. I also don't like big train stations very much. I find them stressful.
I wouldn't go for the cruise for a number of reasons. First of all, I don't think there'll be many young people on the ship. Secondly, I get sea-sick so I'd spend most of the time lying in my cabin. And finally, I wouldn't opt for that trip because it's the most expensive, and I won't have much money.

The people closest to me are my mum and dad. Then there are my two best friends, Anna and Laura, and my cousin Tom. Tom and I go to the same school. He enjoys doing the same things as me, and we like the same type of music. Another person who is important to me, but isn’t family or a friend, is Mrs Saunders. Mrs Saunders owns the shoe shop where I work on Saturday mornings, and at the moment she’s quite important in my life because without the money from the job, I wouldn’t be able to pay for the concerts that I go to with Tom!

_Ben_  
The two people that I’m closest to are my mum and my sister, Emma. There’s only a year between Emma and me, and we get on really well even though we don’t really share a lot of interests. I tend to go to her for advice and I often confide in her. Then there’s my best friend Callum. We’re in the same class at school, and we also play in the same football team at the weekends – actually, he is probably the person I see the most! I also see my cousin, Harry, quite often. Finally, there’s Tom Fisher, our football coach. He’s really hard on us, and we’re not always sure of what his mood is going to be, but he’s a great coach. We wouldn’t be top of the league without him!

_Mark_  
Apart from Mum and Dad, I’m also really close to my auntie, Julia. She’s much younger than my mum, and she’s more like a sister to me than an aunt. She’s so outgoing and I really admire her. And obviously I’m really close to my identical twin brother, James, despite the fact that we spend a lot of time arguing! Outside my family and friends, there are two other people that are quite important in my life. The first is my maths teacher, Mr O’Neil. I always used to hate maths, but this year I’ve started to understand it much better because of him. Then there’s my judo coach. He’s great fun, and thanks to him, I’m about to get my black belt!

_Amy_  
Well, I suppose like the majority of people, I’m closest to my immediate family. There’s my mum and dad, and my brother and sister, Nathan and Molly. My granny, Alice, has lived with us since my grandad died, and we all love her a lot! Despite the age difference, we really understand each other well. We’ve got the same terrible sense of humour! Other people that are important to me are my cousin Leah and my best friend, Lily. I always have a good time with them when we meet up! And finally, I’ve got to mention my tutor from school, Mrs White. Everybody thinks she’s a great teacher, but I really respect her because she’s so patient with everybody, and she’s always positive about life!

1. My sister, Sarah, was seven when I was born, and my arrival was a big shock to her. Until then, she'd had a very close bond with Mum. But my birth was difficult, and both Mum and I were ill for a while afterwards. I was also underweight at birth, and Mum fussed over me for a long time. So my sister went from being an adored only child to an unnoticed child, and she was miserable. Later, when she was a teenager, Mum went back to work and Sarah always had to take care of me after school instead of seeing her friends. I had no idea about any of this at the time. I just knew my sister wasn't nice to me. But since she left home, we have managed to talk, and we understand each other better. I think we're friends now.

Both photos show a group of teenagers. In the first photo, it looks as if they're in a living room. In the second photo, I can't be certain but I think they're at a bowling alley. They must have gone there together for a game. The common theme is that the friends are not getting on well together. However, the two photos show different kinds of problems. In the first photo, two of the girls are excluding the third girl from their conversation. They seem to be sharing a private joke. The other girl probably feels left out. Judging by her expression, she isn't very happy about it. The second photo, on the other hand, shows an argument between the two boys. Arguments sometimes happen when you spend a lot of time with people. They aren't always serious. For example, in the second photo, it could be a fairly minor disagreement. One boy might have accused the other of cheating. I'm sure they'll forget about it later. I don't think arguing always causes problems, provided you get over it. I think opposites do attract, but I don’t think it lasts as those different qualities that attracted you at first can annoy you later! For example, we both love sport, but we don’t support the same teams. And although we’re both sociable, Helen is more outgoing than me. So, in my view, although you may be attracted to a friend who is completely opposite to you, the best kind of friend is one that you have enough in common with, so that your friendship lasts a long time.

However, and
It is sometimes claimed that opposites attract when it comes to friendship.

Speaker 1 OK, before tonight’s run, I want to talk about what we should be eating when we’re training for a marathon. It’s essential to consume a lot of carbohydrates to boost our energy levels. These carbohydrates ought to be ‘good’ carbohydrates from whole grains, fresh and dried fruit and vegetables, so if you like fast food, it’s time to give it up until after the race!

Speaker 2 Well, I’ve got coeliac disease, which means that I mustn’t eat food that contains gluten if I don’t want to get a bad stomach. Gluten is found in wheat, so I can’t easily digest bread, cake, pastries, pizzas and things like that. Only 1% of the population has this problem, but because gluten-free diets have recently become fashionable, it’s easy to find lots of gluten-free products, and I don’t have to look hard for them in my local supermarket!

Speaker 3 In my opinion, diets are silly. There are so many strange ones where, for example, you don’t eat any carbohydrates. If you want to lose weight, you must simply eat less and exercise more! I was very inactive for years and consumed large quantities of unhealthy processed food. Not surprisingly, I was overweight! Last summer, I started doing exercise and I visited my doctor who told me I had to reduce my intake of unhealthy meals. The result? I’ve lost seventeen kilos in six months!

Speaker 4 Technology in the form of smartwatches or apps for smartphones can help us control our weight by telling...
us how many calories we have consumed during the day. We can also use these devices to scan food products when we go shopping to find out about the nutrients in them and where the ingredients were produced. This sort of thing is really going to help people be healthier.

Phew! Give me a minute … Well, that was the sound of me working very hard indeed. My heart was pumping, my lungs were bursting, and I could feel the lactic acid flooding into my legs and making my leg muscles ache. Transcript
Phew … That’s better. My heart rate is already returning to normal, my breathing is getting easier and my leg muscles are relaxing. So, what was the point of all that puffing and panting, you might ask. Well, would you believe me if I told you that three of these thirty-second bursts of high-intensity exercise a couple of times a week is all it takes to keep you fit and healthy? Some experts believe that this approach to exercise is more beneficial than an hour spent jogging or working out in the gym. This is actually how our ancestors used to exercise when they were hunting – a fast chase after an animal, followed by a short rest period before running again. And this High-Intensity Training, or HIT, has been used by athletes for a long time. But we ordinary people aren’t really aware of why it might be better than longer, slower exercise. When you push yourself briefly to the absolute limit, three things happen. Firstly, the number of mitochondria in your body is increased massively. Mitochondria are responsible for converting fat and sugar into energy. So you become fitter. They can only be increased with high-intensity training. Secondly, adrenalin is released – this is a fat-burning hormone – so you use up your body’s stores of fat. Thirdly, your appetite isn’t increased – unlike, say, after an hour’s jog – so you don’t feel you need to eat more calories afterwards. But what’s the greatest advantage to this form of exercise? It’s simply that it doesn’t take very long! So there’s no excuse for not doing it!
I’ve just been given the news that I’ve been selected for the national junior squad. I’m thrilled! And if I train hard enough, I hope to be picked for the next Olympic team.

1. I absolutely love the gym in my town and I attend all the fitness classes – they’re free to members. So, I do aerobics on a Monday night. That’s one of my real favourites because the instructor plays such cool music. Then there’s body pump on Tuesdays. That’s where we’re lifting weights, and it’s hard! On Thursdays, I do yoga, which is really good for stretching after doing weights, and on Saturday mornings, it’s a spinning class, where you pedal on an exercise bike to music. That’s the hardest work of all because you are given short bursts of high-intensity exercise, so your heart really pumps. Classes are great for me because I prefer exercising with other people around. It’s much more motivating – and fun!

2. I’m fanatical about football. I love watching it, talking about it, but most of all, playing it. I can’t remember the last time I missed a session or a match. I’m in the local football team which meets throughout the winter, and I’m also in the school team. The school football club meets on Mondays and Wednesdays after lessons finish, and sometimes we take part in tournaments with other schools. We’re quite good. Our local team is more serious and trains every Thursday night. Matches are often arranged for Saturdays against other local teams. It’s supposed to be just for fun, but I’m actually very competitive. I’m not a brilliant player by any means, but what I lack in skill is compensated for by my sheer enthusiasm, dedication and commitment! I like us all working together to beat our opponents. We play hard, so we usually do really well in local tournaments.

3. Tanya, you are now our number one junior gymnast in the South-West. How old are you now?

A I’m fifteen.

B Just fifteen! And would you say that it’s true that you have to be completely single-minded to excel in a particular sport?

A Yes, I think that’s true. I do gymnastics nearly every day, and I’ve been doing so for years. I get up at 5.30 and go to the gym before school three times a week. After school, I’m usually back there again from 4.00 till 7.00.

B That’s a lot of hours! How hard do you usually train?

A I push myself to the limit, and I’m usually covered in bruises! But I do try to avoid injury, though it’s difficult if you are being taught a new move. You’re going to make mistakes!

A What’s your favourite piece of equipment?

B The floor! I love jumping and tumbling. And it’s great to have music to move to. It really helps.

A And what are you training for in particular?

B I’ve just been given the news that I’ve been selected for the national junior squad. I’m thrilled! And if I train hard enough, I hope to be picked for the next Olympic team. That’s a complete dream for me.

4. Me and my mates are completely mad about skateboarding. I’ve had a board for a good while now. We used to skateboard along the roads and in the local park, but a couple of years ago a skateboard park was built on the edge of town. It’s pretty cool, and we try and get there whenever we can after school and at weekends. There are often quite a lot of skaters at the park. Some of the older guys are amazing, and we watch them to pick up new tricks. We also study YouTube clips and work out the moves. You can learn a lot from them. Mikey’s the best in our group, and that’s because he takes the most risks. He’s already broken his wrist, but it didn’t stop him. He turned up a couple of days later at the skate park with his arm in a plaster cast.

Examiner: So, how can I help you?
Candidate: I don’t feel very well, doctor.
Examiner: What seems to be the matter?
Candidate: Well, I’ve got a cough and a really sore throat, and I ache all over.
Examiner: Have you got a temperature too?
Candidate: I don’t think so. But I feel a bit dizzy.

Unit 6 35
Examiner  Let me have a look at your throat. Hmm. How long have you been feeling like this?
Candidate  For a couple of days, I think. Yes, my throat started to hurt on Tuesday.
Examiner  Your throat does look extremely swollen. Are you having any difficulty swallowing?
Candidate  I’m afraid I didn’t quite catch that. Would you mind saying it again?
Examiner  Can you swallow – can you still eat and drink?
Candidate  Oh, I see. Well, just about, but it is very painful.
Examiner  And have you been taking anything for it?
Candidate  Yes, I tried taking some cough medicine, but it didn’t really seem to help.
Examiner  Well, you have a virus. I think you need something stronger than cough medicine.
Candidate  What do you suggest?
Examiner  Are you allergic to any medicines?
Candidate  Sorry, what do you mean by allergic?
Examiner  Do you have an allergy to any medicines – are there any that you can’t take?
Candidate  Oh, I see. No, I don’t think so.
Examiner  In that case, I’ll write you a prescription for some tablets. They’re painkillers. They are also anti-inflammatories.
Candidate  That sounds like a better idea.
Examiner  And you need to rest, or you may get an infection.
Candidate  You should drink lots of liquids too.
Examiner  Yes, doctor. And how often do I take them?
Candidate  You need to take two tablets every four hours.
Examiner  How long for?
Candidate  For the next three days. If it doesn’t get better, come back and see me.
Candidate  Thank you, doctor.

Candidate  I haven’t been feeling very well, doctor.
Examiner  What symptoms have you got?
Candidate  Well, I cough a lot and it hurts.
Examiner  Have you got a temperature too?
Candidate  Well, I’ve been feeling quite hot lately and I’ve had a headache.
Examiner  Let’s see … Hmm. Yes, you do have a slight temperature. How long have you been feeling like this?
Candidate  Nearly a week now, but it got worse yesterday.
Examiner  Let me listen to your breathing … Yes, you have a chest infection.
Candidate  What do you mean by chest? Is that the same as lungs?
Examiner  Yes, you have an infection in your lungs. It affects your breathing.
Candidate  Oh, I see.
Examiner  You’ll need some antibiotics.
Candidate  Is that something like penicillin?
Examiner  Penicillin is one type of antibiotic. Are you allergic to penicillin?
Candidate  To be honest, I’d prefer to take another antibiotic. Penicillin makes me feel a bit nauseous.
Examiner  No problem. I’ll write you a prescription for a different antibiotic.
Candidate  OK. How often do I take it?
Examiner  Take one tablet three times a day.
Candidate  How long for?
Examiner  A week, until they are finished. And you need to rest and drink lots of liquids.

Max: Hi, Jake. Look, I’ve just spoken to a girl whose best friend lost some money in this classroom. Didn’t you say you had found £20 on the floor?

Jake: Me? You must be joking! I didn’t find anything!

Max: Are you sure? But you said you did. And I thought I saw you with some money in your hand at the end of English class.

Jake: That was my own. I do have my own money, you know!

Max: But you wanted to borrow some money from me earlier.

Jake: Oh … yeah … Er, well, I forgot that I had some on me.

Max: So the £20 was definitely yours? I’m not sure …

Jake: Just leave me alone, will you? That money was mine, OK?

Kate: Yeah … well, something unexpected has come up, and I’m afraid that I’m not going to be able to come. I really am sorry …

Tom: Oh, no, that is disappointing. What is it?

Kate: Oh, a family event. Nothing important, but it’s something which I just can’t get out of.

Tom: Well, how about Saturday? The film is still on at the cinema until Sunday, so we could go then.

Kate: I can’t on Saturday. I’m going out with my friend Emma.

Tom: Perhaps some other time, then?

Kate: Yes, some other time. We can talk about it when we see each other at school.

Tom: OK, let’s do that. Bye.

Kate: Bye, Tom … and sorry!

But she knew that she couldn’t get much further without refuelling, so she reluctantly pulled into the petrol station and asked the attendant to fill up the tank.

Jill I bet the attendant’s a murderer!

Caro Oh, no! She shouldn’t get out of the car.

Ian I’ll continue, shall I? Anyway, the attendant seemed nervous as he filled up her petrol tank, but eventually he finished the job and came over to the driver’s side to get the payment. She gave him a $50 bank note. He examined it carefully, then told her that it was a forgery. At this point, she wasn’t just uncomfortable, but really scared. The attendant explained that he would have to take her back to his office and call his manager because the forged bank note would have to be reported. Once he had convinced her to come with him, he explained that there wasn’t actually a problem with the money. He’d needed to get her out of the car because there was a man with an axe hiding in the back seat.

Caro Well, I think I like horror stories …
Ian Don’t worry, Caro. You know what an urban legend is?
Max Of course we do. Anyway, you’re not supposed to say it’s an urban legend. You’re supposed to say ‘this happened to a friend of a friend of mine’ like it was true.
Ian Well, whatever. I’m not saying it isn’t true. It could easily be true.
Caro I hope it isn’t true …
Jill Come on. Let’s just hear it!
Ian OK. I think this story comes from the American Midwest where you drive for miles on open roads without seeing anyone. Well, there was a young woman driving home alone across open country. It was dark and rainy, and it was getting late …

Dr Webster: Well, they’re a type of folklore – defined as the beliefs, stories and traditions of ordinary people, or ‘folk’ – so one way of differentiating them is by examining where they come from and how they travel. Legends arise spontaneously and can rarely be traced to a single point of origin. And again, they’re usually spread by word-of-mouth and only in rare cases through mass media. Because they end up being repeated by many different people, the stories tend to change over time. So, no two versions of an urban legend are ever exactly alike; there can be as many variations as there are tellers of the tale.

Interviewer: Do urban legends ever turn out to be true?

Dr Webster: Occasionally they do.

Interviewer: But being true disqualifies a story from being an urban legend.

Dr Webster: Remember, urban legends aren’t defined as false stories; they’re defined as stories alleged to be true in the absence of actual knowledge or evidence. True or not, as long as a story continues to be passed on as factual by folk who don’t really know the facts, it’s an urban legend.

Interviewer: And of course, people will believe anything.

Dr Webster: Maybe our brains are hard-wired in some way to be susceptible to well-told stories. It does seem to be the case that we have a built-in tendency to interpret life in narrative terms. Maybe it’s a psychological survival tactic. Perhaps one of the ways we cope is by turning the things that scare us, embarrass us, or make us laugh into stories. We’re charmed by them for the same reasons we’re charmed by Hollywood films: good guys win, bad guys are punished, everything tidied up at the end.

Interviewer: And that’s also the end of our programme. Thank you, Dr Webster.

5 What she was trying to do was to make us feel better.

It’s certainly true that social media can cause problems for people – even if they aren’t exactly crimes. So, for instance, somebody might feel very unhappy because a photograph of them is posted online without their permission. It might even get unkind comments – which is a kind of cyber-bullying. I’m not sure if it’s against the law but it certainly causes a lot of unhappiness. But social media can also be used to fight against crimes, particularly when it comes to sharing information. The kind of thing I’m talking about is when somebody has a bike stolen and posts a message on Facebook or Twitter asking for help. People then share that message online and quite often, it is seen by hundreds or even thousands of people. It often has a positive result. Social media can also help reduce crime in other ways, particularly when it is used by the criminals themselves. One example of that would be when a criminal posts a photo of himself with something that he has stolen. It sounds unbelievable, but actually it happens quite often. I suppose they imagine only their friends will see it, but they’re wrong. These days, the police use social media a lot when they’re trying to solve crimes because it’s such an easy way to look for evidence.
Tollefsen met the conman, who called himself Glenn Vanslyke, on the dating website Plenty of Fish. She was immediately attracted to the handsome grey-haired man in the photo and completely taken in by his stories of a wife he had nursed through terminal cancer, and a daughter he had raised as a single father. Mrs Tollefsen thought nothing of it when the man started asking for small sums of money, because he told her he would pay her back when his father’s inheritance came through. Sadly for Mrs Tollefsen, neither Mr Vanslyke nor his inheritance existed, and she is now heavily in debt. Now, she hopes her story will serve as a warning for others.

1 Trained lie-spotters get to the bottom of the truth 90% of the time, and that’s because we all make the same mistakes; we all use the same techniques. Let’s look at body language, for example. With body language, you’ve really got to just throw your assumptions out of the window and listen to the science. Because we all think that liars can’t keep still. Well, guess what? They’re known to freeze their upper bodies when they’re lying. We think liars won’t look you in the eye. It’s actually the opposite. They look you in the eye just a little bit too much to compensate for that myth. We think warmth and smiles convey honesty and sincerity, but a trained lie-spotter can spot a fake smile a mile away. You can consciously contract the muscles in your cheeks, but the real smile is in the eyes: the lines at the corner of your eyes cannot be consciously contracted.

2 Jane I saw a really good film last night – *Dallas Buyers Club*. Have you seen it?
Alan Yes, I saw it at the cinema when it came out.
Jane I couldn’t believe it when I found out it was a true story.
Alan Yeah, I know. It came as a big surprise to me too. But the guy – er, what was his name?
Jane Woodroof. Ron Woodroof.
Alan That’s right. I thought he was really lucky to live for so long after his diagnosis. Didn’t you?
Jane Yes, it was seven years. And he didn’t seem the type to read up on all the treatments, did he? I mean, I don’t think he’d had much of an education or anything.
Alan Hmm, I don’t know about that, but he certainly made a fortune out of all the medicine he got for people.
Jane True, but at some point, he changed, didn’t he? I’m sure he did it in the end because he wanted to help them.
Alan Mmm. I guess he turned out to be quite a good guy, after all.
Jane Yeah. I was pretty sad when they said he’d died.
Alan Me too.

1 A  Excuse me. We're students who want the council to build more cycle lanes, and we're collecting signatures.  
B  Er … OK … I don't cycle myself, but my eldest son, who is a member of a cycling club, cycles everywhere. I usually walk everywhere, and it would be safer for pedestrians if people didn't cycle on the pavement!  
A  I know, but cycling on the roads can be very dangerous. There are quite a few drivers who don't pay enough attention to cyclists.  
B  Yes … yes … You're right. And of course there isn't any form of transport which is better for the environment! Now, where do I sign?  
2 A  You're standing as a candidate at the next election for government. Now, how is this government, which has seen unemployment increase by 7%, going to persuade people to vote for it?  
B  Well, unemployment has increased because of the world economy and globalisation, not because of this government's policies. However, we are of course very concerned, and we intend to create thousands of jobs in the first year of the new government.  
A  But that's what your party promised before the last election. How do you expect people to believe you this time? What can you say to our viewers to convince them that they can trust you?  
B  The viewers know that the current situation has got nothing to do with …

3 OK … OK … Thanks to everyone for coming tonight. As you all know, we have been fundraising this week for the homeless centre in the city centre, and I'm proud to tell you that we have managed to raise £1,450 this evening! Thank you so much for your generous contributions! Now, before the band plays the final song, let me remind you that the collection ends on Monday – when we will hand over the money to the homeless centre manager, so there is still time to make a contribution if you'd like to! OK, back to the music …  

4 All students must stand up and be counted and protest against the cuts that this government has made in British university education. British university education, which is paid for by everybody, should be available to everybody. Going to university is a right for the poorest as well as the richest.  

5 Over the next month, you have a choice to make. Not just between two political parties, or even two candidates. It's a choice between two very different plans for our country.
You can choose to vote for Mary Harrison, whose plan would cut taxes for the people at the very top. She says if we do, our economy will grow and everyone will benefit. But you know what, we tried that before, and it’s what caused the economic problems in the first place. I believe that the only way to build a strong economy is to provide opportunities for the working class, asking the wealthy to pay a little more so that we can invest in education, manufacturing and national energy and create good working class jobs. The choice you face couldn’t be clearer. On 17 November, vote for me, Sam Jackson.

3 The collection for the homeless centre ends on Monday, when the money will be handed over to the homeless centre manager.  
4 The students are protesting against cuts in British university education, which is paid for by everybody.  
5 The advert says voters can choose to vote for Mary Harrison, whose plan would cut taxes for the people at the very top.

1 Many people are of the opinion that using social media to tweet or post information online is an effective form of social protest. However, I’m not sure that I completely agree with that. I mean, I guess it might help, but I think there must be other, more efficient ways of raising awareness. For instance, people often quote the ice bucket challenge as a good example of how well this sort of campaign works. You know, when people were tipping iced water over their heads and filming themselves. Obviously, I’m glad it worked. All the same, many of my friends were taking up the challenge without following the campaign behind it, finding out anything about the ALS disease or donating anything to the ALS website.

2 People have started to create hashtags to draw attention to the issues that are important to them. With hashtag trends, people now have a forum to give their views on things and be heard by like-minded people. And that can only be a good thing. Personally, I love that I can find out so much about what’s happening in the world by following trending topics on Twitter. However, I don’t always do anything about them … still, at least I am aware. The other good thing about this sort of activism is that it has no borders. I can just as easily join in with the Wall Street protests in America as I can the food shortage campaigns in Africa, even though I am in neither of these places. We now have a global voice.

3 I am an assistant professor of sociology at the University of California and have done research into the effectiveness of social media activism. You know, 58% of Americans think that tweeting or posting information online is an effective form of protest. My colleagues and I looked at the money raised by online activities for a cause as opposed to money raised by offline activities, such as direct mailing. For instance, we looked at the Save Darfur campaign over several years. What we discovered was that although the social media campaign was considered successful, less than 1% of the million people who signed up to the campaign actually donated any money. Still, this amounted to $100,000 over two and a half years. In contrast, however, direct mail contributions brought in over a million dollars for the campaign in one year alone.

4 There is absolutely no substitute for direct action if you want to make a change. I get fed up with people who just talk about things all the time. They think they have done something when they have liked a Facebook page or retweeted a post! That’s not enough. Why not write a letter to a politician or to a newspaper, or organise a protest or demonstration? If you really feel strongly about something, then you will do all you can to make something happen. I think that a lot of social media activism doesn’t actually have a clear goal. So the campaigns just fizzle out after a while because no one knows what to do next. And that’s a shame.

**Examiner** I'd like you to imagine that you are discussing practical ways in which people can help to combat climate change. How effective are each of the five suggestions?

**Student 1** Let's begin with writing to local and national governments, shall we?

**Student 2** OK. In my opinion, that wouldn't be very effective.

**Student 1** Why do you say that?

**Student 2** Well, politicians get lots of letters and they just ignore them. I think they probably often don't even read them!

**Student 1** I'm with you on that! Personally I'd say that using public transport more often would be quite effective, because the less we use our cars, the less CO₂ we pump into the atmosphere.

**Student 2** Good point. I also believe that saving electricity at home is an effective measure. Generating electricity with fossil-based fuels causes a lot of global warming, which leads to climate change.

**Student 1** Absolutely. I couldn't agree more. Turning lights off and using energy-saving light bulbs are good ideas.

**Student 2** What about planting trees? What's your view on that?

**Student 1** Mmm. I'm not sure. I'm of the opinion that planting trees wouldn't help much.

**Student 2** Really? I'm not sure I agree. Trees take CO₂ from the atmosphere and give out oxygen, so I think it's very effective.

**Student 1** You'd need to plant an awful lot of trees, though!

**Student 2** Yes. Switching off lights when you aren't using them is very easy.

**Student 1** Not only that, replacing old light bulbs with energy-saving ones is the norm, nowadays.

**Student 2** And not only that, replacing old light bulbs with energy-saving ones is the norm, nowadays.

**Student 1** Yes, I couldn't agree more. So, shall we reach a decision? My feeling is that using public transport and saving electricity at home are the easiest things for young people to do.

**Student 2** Yes, I'm with you on that.

1 Man I wasn’t sure if it would be a great buy at the time
because I really splashed out on it – it was a lot of money!
It’s my mountain bike. I’ve had it for about ten years now,
and I’ve never had a problem with it, not even a puncture!
I’ve learned that sometimes it’s a good idea to pay more
for something if it’s well-made, because it lasts longer.
Of course, it doesn’t always work like that!

2 Woman I’ve always liked leather clothes, so it’s great to
finally have my own leather jacket, and I’ve been wearing
it continuously since I bought it six months ago! I got
it at a stall in Camden Market. I like shopping around at
markets and I found this at a second-hand stall. It was in
really good condition, and it’s nice and warm. I couldn’t
have afforded a new one like it, so I’m really pleased
with it.

3 Boy I don’t know if I could call my mobile phone a
bargain, but it was certainly cheaper than my friends’
phones and is just as good. I bought it online last year and
I’ve never had a problem with it. It’s a Chinese brand that
wasn’t very well known, and you could only buy it online.
However, since then, it’s become really popular because
it’s half the price of better known brands. It’s got twice the
memory and the battery lasts for ages. I’ve been using it
all day today listening to music and I’ve still got 75% left!

4 Girl I’d say these trainers that I’m wearing were definitely
a bargain. I picked them up at a sale after Christmas, and
they still look as good as new five months later. And I’ve
worn them most days! I’ve played sport, gone walking –
done all sorts of things in them. The only problem is that
my feet haven’t stopped growing, and they’re beginning
to get a bit tight, so I’m going to have to go shopping
again and find some new ones. Still, my younger sister
wants them, so it will have been a really good deal if she
gets some use out of them as well.

1 Daniel Suelo graduated from the University of Colorado with a degree in anthropology. Then he worked with tribes in Ecuador for ten years. So, it's true that Daniel didn't always live outside society. As he worked in Ecuador, Daniel observed how the tribes started to follow western economics. They began selling their best crops instead of eating them. Then, the tribes used the cash for things which, in Daniel's view, they simply didn't need. What he noticed was that the richer the tribes became, the more their health declined. The truth is that money was impoverishing them.

2 Heidemarie Schwemmer was not born into poverty. In fact, her father was a successful businessman, but he lost everything in the Second World War. Undeniably, her family became very poor for a while, and it was a real shock to her how they were treated. Later, the family became rich again, but now Heidemarie was uncomfortable with it. She believed money had come to define her and she didn't want this any more. So she became fascinated with finding ways to live without money.

1 Welcome, listeners. In Moneybox Today, we will be talking about Mark Doyle, – 'The Moneyless Man' – and debating his tips for better living. Although Mark has now returned to the monetary world, he strongly believes that we should all cut down on our endless consumption of consumer goods. His first suggestion is – if you want to buy something, don't! First, have a look at websites such as Freecycle and Freegle, where people post things they no longer need. You will be amazed at what people don't want! Secondly, if you want new clothes, organize a clothes swap with friends and neighbours. You will be surprised at how well they can work. Try to be more...
self-sufficient – grow fruit and vegetables in pots or in your garden and get hens for eggs. But Mark’s top tip? Install a composting toilet. It saves money, water and the environment! Now, how realistic do we think these proposals are? Here in the audience, we have …

2  A Have you read this article? What do you think of these people who live without money?
   B It’s quite impressive, isn’t it? I know I couldn’t do it.
   A Impressive? I think it’s a joke. In fact, what they are doing is living off people who do earn and spend money!
   B That’s a bit harsh, isn’t it? My feeling is that people are entitled to their beliefs and to decide how they want to live.
   A No, they aren’t! Not if they’re criticising the rest of us for our beliefs and the way we live!
   B OK, but they do have a point. I mean, only the other day, you were saying how we are being over-charged by banks and energy companies, and I think you’re right – they do over-charge.
   A Yes, well that’s true. I suppose I’m just annoyed at all the things they suggest we do in order to avoid spending money. As far as I’m concerned, I haven’t got the time to grow tomatoes on the balcony or look after a chicken, or drive halfway across the country to look at someone’s second-hand fridge. I need things now and I need them fast!
   B But isn’t that part of it? That modern life is so manic and work-driven, that we don’t have time to enjoy it?

3  In a year, the average US citizen consumes 125 kilos of meat, uses 288 kilos of paper and uses energy equivalent to 7.8 metric tons of oil. Compared to just 45 years ago, these figures have increased by more than a third. In my view, this tells us how unsustainable our consumer society is. If we look back into history, we find that the birth of the consumer society is very recent. For centuries, no one spent a significant amount of time or resources on shopping for goods produced far from home. Before the Industrial Revolution in America and most of Europe in the 19th century, the vast majority of the population lived in the countryside and worked in agriculture. Clothing and possessions were extremely limited and made in the same village. It is undeniable that at that time there was little money and few things to buy. Therefore, there was no such thing as a consumer. And until very recently, people valued their leisure time far more than earning more money.

2 I guess I'm doing OK financially. I'm not rolling in it, but I'm comfortably off. I still have to save up for the bigger purchases though, like that new jacket I fancy getting.
3 Oh, hi, Sam. Yeah, I know everyone's going to the concert tomorrow. Of course I want to go, but I'm completely broke. I don't suppose you could lend me a bit of cash, could you?
4 A lot of those 'two for one' or 'buy one get one half price' deals are a rip-off. Half the time the supermarkets put their normal prices up, so you actually end up paying more than you would usually. Not great when you're hard up! It's outrageous!

Transcript
Examiner These two photos show places where you might go shopping. I'd like you to compare the photos and say which place would be better for buying a present for a friend.
Girl That's an interesting question. Well, first of all, they are two very different places to shop. The first one looks like a flea market or a street market. I can see lots of people, so it's obviously quite a popular place. This kind of market sells all sorts of second-hand goods, for example clothes and crockery, as well as crafts and individual items. They are usually quite cheap and you can often pick up a bargain. The second photo, on the other hand, shows a very different place. Um, let me see. It's a large, smart shopping centre. Shopping centres are also very popular, although I can't see many people there. Obviously the shops here are indoors, whereas the flea market is outdoors. They usually have lots of different chain stores, such as Next or H&M, selling designer brands. In addition, there'll be other shops selling almost everything you want.
If I had to choose a birthday present for a friend … Well, for one thing, it would depend which friend. For instance, if I were to choose something for my close friend Sally, I'd go to this flea market. Not because I want to buy her anything cheap, but because she likes individual things. She prefers things that no one else has. I could find her some jewellery or an interesting bag – something like that. However, I would never go to an expensive shopping centre like this one because that's not her taste. Although she has a real interest in fashion, she doesn't really wear many brands or designer clothes apart from jeans. She finds things in second-hand shops. In my opinion, she always looks great. I think she could have a career in designing clothes one day. And that's why I find it hard choosing presents for her!
Examiner Thank you. Now it's your turn to answer a question. Which place would you prefer to go shopping?
Girl Mmm, thinking about it, I suppose I'd prefer the shopping centre. First of all, it's indoors so you can go there in any weather, even when it's snowing in winter. The outdoor market isn't so much fun in bad weather. Despite the fact that things are generally cheaper in the market, I don't really like buying second-hand goods. Not only that, but the things you buy in a market may not be very good quality – that's my opinion, anyway. So, overall, I'd prefer to shop in the shopping centre.

Examiner These two photos show places where you might go shopping. I'd like you to compare the photos and say which place would be better for buying a present for a friend.
Boy The first photo shows a sort of outdoor market where there are a lot of second-hand things, all probably quite old and quite cheap. It looks quite busy. The other is a shopping mall with everything in one place under a massive glass roof, which looks very elegant. There are escalators between the levels and what looks like a café or restaurant on the first floor, though I can't be certain. Compared with the outdoor market, I should think that the shops are very expensive. As for buying a present for a friend, I'm not sure about that ... let me think. I think I'd probably go to the shopping centre. The reason I think that is you know what's there and where things are. It saves a lot of time! Another thing is, I'm not a very good shopper. I find it hard to decide what to buy for people, and there's more choice in a shopping centre. For those reasons, I think that the shopping centre is better for me. On top of that, I don't have the sort of friends that would appreciate something from a flea market. They prefer books and music, games and things that a market doesn't really offer. And as I'm not a very good shopper, it could be that I wouldn't find a good present there, anyway!

Examiner Do you ever buy second-hand goods? And can you tell me why?
Boy No, I can't say I do. It's not that I object to buying second-hand things – I don't have any strong feelings either way – it's just that I never go into second-hand shops and I've never got the hang of eBay. My brother on the other hand is always buying stuff on eBay and he's picked up quite a few bargains. Perhaps I should give it a try.

Interviewer: Talking of the internet, Gina, how will e-commerce affect the way we shop in the future?
Gina: Well, we've already seen how consumers have started to use smartphones to purchase their goods, and this habit is only going to grow. The great advantage of shopping by phone is that you can do it while you're on the move – you don't have to make a special effort to go to the shops or wait until you're in front of your computer to buy something. In general, retail will become more mobile in the future, allowing more time to shop and increasing sales.

Interviewer: Thank you, Gina Hansom, for sharing with us your predictions for the future of shopping.
Gina: My pleasure.

Presenter Hello and welcome to the On the Stage podcast. This week, I’m joined by film critic Linda Marshall who is going to be talking to us about one of the most interesting aspects of an actor’s work: getting into character. Good evening, Linda.
Linda Hello.
Presenter Now, what does getting into character actually mean?
Linda It means making your character believable to your audience. It’s quite easy to imitate certain emotions and pretend to be affectionate or bad-tempered, but to create a ‘real person’ is much more complicated than that.
Presenter Students at RADA study the Stanislavski acting technique, don’t they? How does that help?
Linda Well, Stanislavski said there were seven questions that an actor had to be able to answer about the character that they are going create. Some of them are about the character’s personality and their lives such as Who am I?, Where am I? and When is it? Others look at what the character wants and ask What do I want? and How will I achieve my goal?
Presenter And some well-known actors are really passionate about their work and do quite a bit more than just answer Stanislavski’s questions.
Linda Mmm, they certainly do. Meryl Streep, for example, is famous for her accents, but they take a lot of work. For the film about the Second World War, Sophie’s Choice, she spent two months learning Polish, and then she would walk around her house for days reading poems with a Polish accent.
Presenter Why did she do that?
Linda Because she wanted to learn how to say emotional things like a Polish person speaking English would.
Presenter It worked because she was great in the film. Another actor whose preparations are also quite famous is Leonardo DiCaprio.
Linda Yes. For the film Blood Diamond, which was set in an African country at war, DiCaprio spent a lot of time with soldiers who had fought in wars in Africa. And he also spent time in a lot of psychiatric hospitals when he was preparing for the psychological thriller Shutter Island set on an island that is home to dangerous criminals with psychiatric problems.
Presenter Well, thank you very much, Linda. It’s clear that being an actor involves a lot more work than most people realise!

Presenter Hello, and welcome to the Science Now podcast. This week, I’ve got Dr Mary Kenny, the chief scientist at the Percival Foundation, in the studio with me to discuss last night’s The One Show on the BBC.
Dr Kenny Good evening.
Presenter Now, before we begin discussing the programme, I’d just remind listeners what actually happened on The One Show. Last week, we talked about the government’s plans to offer a prize of £10 million to the scientist, amateur or professional who can come up with a solution for one of the big challenges that are facing the world. The competition is called the Longitude Prize, and last night viewers of The One Show were asked to choose one challenge from a list of six for scientists to concentrate on. Dr Kenny, are you happy with the challenge that viewers chose?
Dr Kenny Well, before we discuss that, I’d just like to make a comment on the amount of money being offered for the Longitude Prize.
Presenter You don’t agree with the idea of prize money?

Presenter This evening on Global Teenagers, we are interviewing Nikau Kamana from New Zealand. Hello, Nikau, and thank you for agreeing to speak to us.
Nikau Kia ora! It’s a pleasure to take part.
Presenter What is kia ora? Is it a Maori greeting?
Nikau Yes, it means hello in Maori. I’m a Maori, and our language is one of the two official languages of New Zealand.
Presenter Does everybody learn it at school?
Nikau No, not everybody, but there are lots of schools that do some or all of their subjects in Maori.
Presenter Now, what’s life like for a Maori teenager?
Nikau I imagine it’s the same as for teenagers all around the world, although I suppose our families make us very aware of our culture.
Presenter Can you give us an example?
Nikau Well, one very important thing for us is whenua – this is the Maori word for land and it’s about our relationship with nature. It refers to the land and our connection to it. This is very important in our culture.
Presenter Yes, I believe that Maori people have always looked after the environment.
Nikau We have. At school the other day, we were talking about how indigenous people, like us and the Aborigines in Australia, have always had a close relationship to the land and always felt a close connection between all living things. These ideas are now spreading all over the planet, and when everybody realises that this connection exists, we will stop treating the planet badly.
Presenter What do you think people around the world know about the Maori culture?
Nikau There seems to be a very big interest in to moko, traditional Maori tattooing. Lots of tourists come to New Zealand, especially for adventure holidays, and a lot of those tourists go home with a Maori tattoo on their bodies.
Presenter And of course Maoris are great rugby players.
Nikau We are indeed! There have been lots of great players, and before every match of the New Zealand national team, the All Blacks, all the players perform a haka, a traditional war dance.
Presenter Yes, I’ve seen it, and it certainly seems to frighten the opposition! Thank you very much, Nikau – it has been very interesting.
Nikau Don’t mention it!

On 4 May 1961, a group of Americans, the Freedom Riders, left Washington, D.C. on two coaches. As they pulled out of the station, there was a good mood amongst the group and they felt very close. They’d been warned about what might happen when they got down south, but they had spent a few days training how to deal non-violently with aggression, and they thought they had everything under control. The Freedom Riders didn’t experience any problems in Richmond and Farmville in Virginia. In Greensboro and Rock Hill, they felt that people had been expecting them and allowed them to use the facilities to avoid problems. Martin Luther King then met them when they arrived in Atlanta, and he warned them that in Alabama people wouldn’t be trying to avoid problems at all. When the bus arrived in Anniston, Alabama there was a crowd of around two hundred white men. They immediately
set about breaking the bus windows and then set it on fire. A group of men waited at the door, and those on board had the choice of being burned alive or beaten to death. Suddenly, the gas tank on the bus exploded and the crowd ran away, giving the Freedom Riders the chance to escape. At the same time, a police officer arrived and fired his gun into the air to keep the crowd back. Meanwhile, the Freedom Riders on the other coach were feeling very wary as they entered Birmingham. A large crowd of white men was waiting, and they were ready for action. The local police chief, Bull Conner, had promised the crowd that they would have fifteen minutes to attack the Freedom Riders before he sent police officers in. Conner kept his promise, and many of the Freedom Riders still bear the marks of their injuries today. The Freedom Riders had expected resistance to their trip, but had never expected so much violence. However, their suffering was rewarded. The images of the attacks were shown all around the world, and over three hundred Americans volunteered to take part in more Freedom Rides. The Kennedy government was forced to act, and five months later, the Whites only signs in the southern states were taken down and the law that allowed all Americans to use the same transport facilities was enforced everywhere.

Presenter On tonight’s edition of City Secrets, reporter Katie Marshall heads for a place that most people would prefer never to visit: the sewers. Katie: It’s 1 a.m., and I’m about to join one of the maintenance teams that patrol the tunnels that carry London’s waste away to be treated. With nearly fifty thousand kilometres of sewers to inspect, the maintenance teams are never short of work. In fact, some tunnels haven’t been checked for fifteen years, and they need to be, because they were built in the 19th century. Over a hundred and fifty years ago, the British Government ordered sewers to be constructed because a recent invention was polluting the River Thames. The arrival of the flushing toilet in people’s bathrooms did a lot to improve hygiene in the home, but it was a disaster for the city. The waste from the toilets went straight into the river, which was also the main source for drinking water. Thousands of Londoners quickly started feeling fatigued and then started dying; they had the disease cholera. However, the politicians didn’t act until the smell from the river was so bad that they felt nauseous during debates in the Houses of Parliament. Down in the sewer, wearing my protective clothing, I’m surprised by the smell, or should I say the lack of one. I had been expecting a strong stink of human waste, but the team tell me that 90% of the liquid rushing past my feet is rainwater, which reduces the smell considerably. They also tell me that despite the popular myth, there aren’t many rats. Apparently, they aren’t keen on flowing water. However, the men do have an enemy that they have to fight every night: fat. The increase in fast-food restaurants has seen an increase in the amount of hot, liquid fat that is poured into the sewers, but when it arrives in the tunnels, it goes cold and forms solid blocks. Solid fat is dangerous because it blocks tubes, but unfortunately it’s very hard to remove, and the men have to use axes to try and break it. A few hours later, I’m back on the London street where we left the maintenance van. The dangers that I had imagined that I would face, rats and terrible smells, have not materialised, but I have discovered that not only is fast food bad for people’s health, it threatens the health of the whole city as well.

Presenter Hello and welcome to the Cinema Giants podcast. This week we are looking at one of the great actors and directors of recent years, Clint Eastwood. And in the studio to
discuss Clint Eastwood's career, I have Ellie Harris, author of The Man with No Name. Hello, Ellie.

Ellie Hello.

Presenter Now, the title of your book comes from one of the roles that made Clint Eastwood famous. How did that film come about?

Ellie Well, Eastwood had played the role of a cowboy in the popular TV series Rawhide in the 1950s, and that brought him to the attention of the Italian film-maker Sergio Leone. At the time, westerns were extremely popular both on TV and in the cinemas, and Leone proposed that they make three films that would be different from Hollywood westerns. They were more violent and didn't have much dialogue. Eastwood himself has admitted that they weren't classics, but they did make him internationally famous.

Presenter He became the model of what everybody thought a cowboy was like, didn't he?

Ellie Exactly. He was tough, tall, good-looking, and he was capable of looking after himself. He became a role model for what some people thought an American man should be like. They decided to market the three films as stories about an anonymous man, the man with no name, and this added to his image of someone without connections to anybody or to society. It seemed to say this man depends on nobody but himself.

Presenter As we all know, Eastwood went on to make many different kinds of films as an actor and director, but in 1992, he returned to the genre when he acted in and directed Unforgiven. Eastwood played the role of a cowboy in the TV series Rawhide.

Ellie Yes, he did, but it was a very different film from his earlier cowboy films. Unforgiven reflects the change that had taken place in America as far as cowboys were concerned. One of the main characters is an African American, played brilliantly by Morgan Freeman, and although there is a lot of gun fighting, the whole film shows how horrible and frightening violence is. Even the clothes that the characters wear reflect what cowboys really wore back in the 19th century, so this film is much closer to what that period of time was really like than other westerns.

Presenter Well, thank you, Ellie Harris – a very interesting look at one of Hollywood’s most popular actors. Now, if you thought …

Presenter We’re here at the BBC Radio 1’s annual Teen Awards SSE Arena at Wembley. As I’m sure many of our listeners know, the prizes are awarded to the year’s best vloggers, sport and music stars and to teenage heroes who have inspired everyone! Best of all, they have been voted for by Britain’s teenagers! So let’s find out what the fans here thought of the show. OK, what did you think was the best moment of the afternoon?

Girl Well, for me, it has to be when Jack G got his award for standing up to bullying. If I’d been him, I wouldn’t have had the courage to start a campaign against the bullies in my school, so I really admire him for doing that.

Presenter Yes, just let me tell listeners a little bit more about Jack G. He was bullied at school, but instead of keeping quiet about it, he raised enough money to pay for the training of nine students so that they could become anti-bullying campaigners. He has also opened a room in his school that is called The Sanctuary, and it’s a place where school kids can go and chat about their worries. Right, time for more opinions. Have you had a good time?

Boy Yeah, it’s been great.

Presenter What have you enjoyed the most about it?

Boy The music. I really enjoyed hearing the winners play their songs live. The atmosphere in the arena was fantastic and the sound was great too.

Presenter And what do you think about the idea of combining celebrity awards with awards for teenagers who have done things to help society?

Boy I think it works because they are all people that we admire. Obviously, we all know that what that boy did to help his schoolmates deal with bullying is much more important than someone singing a pop song, but if it just concentrated on the inspirational heroes, they wouldn't get as much publicity for their causes. This way, it’s positive for the celebrities’ image because they appear next to the teen heroes who have done good things in society, but also more people learn about the teen heroes. Everybody wins, don’t they?

Presenter Well, those are just a couple of opinions from fans at BBC Radio 1’s Teen Awards that once again seem to have been a great success!

Presenter Do you enjoy unusual shopping experiences? Then we’re sure you’ll enjoy this week’s Shopper’s Podcast. Our reporters have been out to find alternative shopping experiences, and this is what they’ve discovered. Here’s Alice, who’s been to Manchester!

Alice It’s a sunny Sunday morning, it’s 8 a.m. and I’m standing in a large car park. Cars are parked all around me, and they’ve all got their boots open. Yes, I’m standing in the middle of a car boot sale, and the first customers are already beginning to have a look around at what’s on sale. But why do people take part in car boot sales?

Man Well, the reason we have come is to sell a few things we don’t use any more. For example, I’ve got a pile of old vinyl records here that I never listen to because I haven’t got a record player … In fact, I don’t know anybody who has! But a friend told me that vinyl records are back in fashion and collectors do come to car boot sales, so who knows!

Presenter And what about you?

Girl We’ve come to see if we can pick up any bargains in electronics … in computers to be more exact. A friend of mine told me he got a second-hand laptop for a really good price from here a few weeks ago, and I’d love to find one too. I’ve got a desktop at home, and a laptop would be useful for school, but having just spent most of my money on a new mobile, I can’t afford a new one.

Presenter Thanks, Alice. So that’s one place that’s great for buying and selling. Now, here’s Max with something completely different.

Max London is famous for its street markets, so you might think that Dover Street Market is just the same as all the others, but you would be wrong. It was set up in a building with six floors that are decorated to look like stalls from a street market. They close the building occasionally to change the way everything looks, and they get theatre designers to come in and help them. So what do people look for here?

Young man I just come to browse because most of the goods are too pricey for me, except perhaps for some of the books! I’m studying fashion design and I come to look at the different designer clothes collections. I’d love to see my own designs on display here one day!

Young woman We’re looking for a Beatles T-shirt for a friend’s birthday; he loves them! We were told that they have some really cool ones here, but the thing that has shocked us the most is the price of things – the cheapest T-shirt costs £66! Well, the designs are unique and our friend is unique too, so we’re going to buy it for him. I suppose if you want something that is different, you have to pay more for it!

Max Thanks very much! So as you can see, there’s plenty on offer – if you’re willing to pay for it!

Presenter Thanks, Max! So there you have it, something for bargain hunters and something for people who are happy to splash out a little more than usual. Which one will you visit?

2Olivia can’t go past a mirror without looking at herself in it. She always worries about her appearance. I was in town with her the other day and she spent the whole time looking at her own reflection in the shop windows!
3You never know what will happen when you visit my grandmother. She’ll suddenly decide to go to the zoo or to try and make some dish we’ve seen on a cooking show. She’s fun! She’s also great when you’ve got a problem as she’ll always listen carefully and is really kind.

1 Who reads the news these days, anyway? No-one reads newspapers anymore, especially not people of my age. For one thing, they’re far too long. Who has time to read all of that information? And who pays attention to the news? It’s always so depressing. All the news that is reported is bad news. Why do they do that? Why not have a bit of balance? I think that’s why gossip columnists have taken over from serious journalists. Newspapers and magazines try and find out lots of gossip and scandal about celebrities in order to attract people’s attention, and they hope that this will make people buy their newspapers. That’s just a waste of everybody’s time in my view.  
2 I wish people would pay more attention to what’s happening in the world and make more effort to change the things they don’t like. There’s so little interest, especially with young people my age. It really upsets me. If we don’t take the time to shout about what will make the world a better place, then who will? That’s why I think celebrities could have a useful role to play in today’s society. Instead of complaining about press intrusion and moaning that they’re always in the media spotlight, why don’t they use the press attention for a good cause and encourage their fans to copy them? Personally, I think it should be a duty of all rich, famous people to do something good for others less fortunate than themselves.  
3 I just don’t get the whole celebrity thing. Why are people interested in the fake lives of other people? Because that’s what they are – fake. I can’t help laughing when I see photos in magazines of all the perfect celebrities who have been photographed in their perfect houses with their perfect partners. They stand in the middle of their living rooms dressed as if they were about to go out to the Oscars with their arm round their husband or wife, saying what a perfect relationship they have. Then, two months later, you hear that they’ve split up! Hilarious.  
4 What’s wrong with a bit of gossip and people-watching? Wasn’t it Oscar Wilde who said ‘There is only one thing in life worse than being talked about, and that is not being talked about? People have been interested in other people’s lives since the beginning of time. Human interest stories are just that – stories that are interesting to all of us humans. People always want to talk about themselves – what they do, what they think, what they’ve got. Celebrities are no different. I look through magazines in the hairdresser’s or dentist’s waiting room like every other person there. Those papers and magazines are there because people look at them. And anybody who says they don’t pick one up is not being entirely honest!

Student In both photos, you can see a group of fans. In the first photo, the fans are waiting for the celebrities to arrive, whereas in the second photo, the celebrity must be there already. The fans are screaming and shouting – they're absolutely ecstatic. It looks like a really wonderful experience for them.

Examiner Why do you think fans get so excited about seeing their favourite celebrities?

Student I suppose it's like a dream come true for them. They see their favourite stars on TV and the internet all the time, and they seem so distant . . . almost unreal. So when they see them in real life, they feel completely thrilled. Also, I'm sure they get more excited about it when they're with a group of friends. 6. I know. But there’s nothing you can do about it on your own. You need help from somewhere – school or the police, Max.
8. Hang on a minute. First of all, you can’t do what these guys are saying. You’ll end up doing worse and worse things.
9. What kind of trouble? Tell me.
10. Josh. Well, that’s the thing … I did. I don’t know why. Well … I do. It was because they were making me, and I was a bit scared of them. And as if that wasn’t bad enough, now they’re saying that I have to steal something for them every week, or they’ll tell my dad …
11. Max. So, what happened?
12. Josh. Well, the other day we went to the shops and they stole something, and then they dared me to steal something as well.
13. Max. Oh, no. But you didn’t, did you?
14. Josh. Well, that’s the thing … I did. I don’t know why. Well … I do. It was because they were making me, and I was a bit scared of them. And as if that wasn’t bad enough, now they’re saying that I have to steal something for them every week, or they’ll tell my dad …

17. Max. Hang on a minute. First of all, you can’t do what these guys are saying. You’ll end up doing worse and worse things. You have to get out of it now. What did you steal?
18. Josh. Some cans of drink …
19. Max. Look, this is what I think. First of all, I think you should tell your dad. Tell him all about it.
20. Josh. But he’ll be furious.
21. Max. He’ll be more upset if he finds out later on. And he can help you deal with those boys. I think he’ll understand more than you think.
22. Josh. But I’m really scared of them.
23. Max. I know. But there’s nothing you can do about it on your own. You need help from somewhere – school or the police, maybe.
24. Josh. Oh no …
25. Max. Look, I’ll come with you and we’ll tell your dad.
27. Max. Yep, after school today. Come on, we’re late for chemistry …

Erika Can I have a word with you about something, please?
Examiner Of course, what is it?
Erika I didn't want to bring it up, but I feel that I'm doing all of the organising for our holiday.
Examiner Do you? Like what?
Erika Well, it's just that I've already researched the holiday and found the hotel and the flights. Now I've booked and paid for it, too. I was wondering if we could divide up the tasks more evenly.
Examiner Oh, dear. You should have said something earlier.
Erika I did!
Examiner Oh, I'm sorry. You must feel that I've been very lazy. What else needs doing, then?
Erika You need to transfer some money to me now, don't you? I don't have anything left in my bank account and I'm supposed to be buying my sister a birthday present soon!
Examiner Oh, thank you for arranging it. Just let me know how much I owe you.
Erika OK, I'll do that. And could we possibly agree on how we're getting to the airport? You said you wanted to go by train, didn't you? But I thought perhaps we could go by coach. It's much cheaper than the train, isn't it?
Examiner I suppose so. But I have a railcard. Let me have a look and see how much discount I can get for us.
Erika OK, great. And we need to buy some currency, don't we? Maybe next week?
Examiner Why don't we both go to the bank and sort it out together?
Erika That's a good idea. Let's do that. And why don't you come round to my house one evening this week and we can research things to do and see while we're there?
Examiner Thanks. I'd love to.

1 Can I have your attention, please? Thank you. As you know, we're here tonight to talk about noisy neighbours, and what we can do about them. According to the UK Noise Act of 1996, a neighbourhood should be quiet at night – that is, between the hours of 11 p.m. and 7 a.m. Now, it really isn't worth complaining if your neighbour has a birthday party once a year. As far as I'm concerned, it's when the noise occurs on a regular basis that you have the right to take action. The best way of dealing with the problem is having a friendly chat with the person or people involved. Personally, I wouldn't involve the police unless the neighbour refuses to co-operate.

2 Dave Um, I don't believe we've met. I'm, Dave, your new neighbour.
Megan Yes, I know. I'm Megan.
Dave Which flat are you in?
Megan I'm in 4A with my husband, Alex.
Dave Right. In my case, it's just me and my dog, Sammy.
Megan Ah, yes. The dog.
Dave What's wrong? Sammy hasn't been bothering you, has he?
Megan I'm afraid he has. He barks incessantly all day. He really is quite a nuisance.
Dave Well, there isn't much I can do about that, I'm afraid. I have to go to work.
Megan Of course you do, but listen to him now! The doors haven't opened yet, and you can hear him already. You have to do something about it.

3 A resident of a quiet Scottish village has been ordered to cut back her thirteen-metre-high garden hedge after a dispute that has lasted for over thirty years. Catriona MacGregor of Buchlyvie, Stirlingshire, stopped cutting back the hedge around ten years after it was planted, and since then it has grown out of control. Neighbours complained that the hedge prevented sunlight from reaching their houses, with one neighbour having to keep the lights on all day. Miss MacGregor has until October to cut the hedge to a reasonable height – between two and three metres, according to the judge's ruling. If she refuses to comply with the order, Stirling Council will go onto her property, cut back the hedge and issue Miss MacGregor with the bill.

1 I'm not bothered about what we do. I'm not particularly interested in that film, but I don't feel like going to the theatre. I'll let you decide, because I don't really mind. If we decide to go to the theatre, we'll have to buy the tickets soon – although, to be honest, I wasn't expecting you to show any interest in going to a musical.
2 I really don't know what I have to do. I've tried pressing this button and nothing happens … but that's what it says I have to do in the manual. To be honest, I think that if I press it too much, I'll break it. Really, I'm useless with technology and I don't know how anything works!
3 What?! You're joking!!! No … I can't believe he did that! … I know! I would never have thought David was capable of doing such a thing! He seems to think that by making people frightened of him, he'll be able to get what he wants. He doesn't realise that if he continues like this, he'll end up with no friends at all.
4 Well, Kate, you didn't work hard enough, did you? If you don't put the work in, you won't get good results. I have to say, I'm disappointed with you. You are an intelligent girl. If
you get more involved in your work and pay more attention, you will do well. If you don't, you won't. It's as simple as that!

B Certainly. For the past two years I’ve been employed as a designer for a clothing company in London called …

5 The one good thing about this film’s where it is set. The backstreets of Rome provide a dark, atmospheric backdrop to the action. It’s unfortunate that the action itself is rather far-fetched at times.

1  A  Good morning, Ms White. Please take a seat.
   B  Thank you.
   A  I've studied your application form in detail. Perhaps you
       would like to tell me in your own words why you would
       like to study at this college.
   B  It appears to me that the courses offered are the ones
       most suitable for my interests. I'm keen to pursue a career
       in the sciences, but I would also like to continue my language
       studies. The biology with French course seems to offer me
       just that. What's more, it's the only course that offers biology
       in French. Other courses keep these areas separate. But
       to be able to study the sciences through the medium of
       another language would be a wonderful opportunity.
   A  And how do you think you might get on with that?
   B  Well, I should imagine it won't be easy, especially at
       first. There'll be a lot of new vocabulary to acquire at
       the beginning. I'm sure. And to learn new things in a language
       that isn't your mother tongue will always provide challenges.
       However, I'm confident that I can rise to the challenge and I'll
       do extra work, if necessary, to achieve the level I need.
   A  Indeed. What do you currently do to practise French
       outside of your school studies?
   B  I have conversation classes with Veronique, a French
       teacher who lives in my town. And I have a penfriend,
       Helène, who I correspond with, and who I'm visiting again
       this summer. We've been friends for a few years now and
       I know her family really well. They always speak French to
       me, even though their English is really good.
   A  I see. Thank you. Moving on to your expected grades …
2  A  The sciences, but I would also like to continue my language
   B  A British comedian has announced his intention to
       perform on tour around the world, and not just in English.
       This popular show will be performed in 28 countries. The
       comedian intends to perform in several different languages
       during the tour. He is by no means fluent in all of these
       languages, although he has already performed shows in
       French and German. He said, 'That's a very positive thing to do.'
       He thought that London was a great place for comedy, but
       he also wanted to communicate in other countries. He felt
       that people who speak English are just lazy when it comes
       to learning foreign languages. Although there were lots
       of reasons for other people to learn English, he suggested
       that for English speakers to learn a foreign language, they
       had to make it into an adventure and a mission. He felt it
       was important to translate his show because comedians
       from other countries already perform in English. He said
       that laughter is the best way to tell if you are getting the
       translation right. He continued, 'If you are getting laughs in
       the wrong place or no laughs at all, then that's the time you
call a friend.'
4  A  Erm … excuse me?
   B  Can I help you?
   A  Can you tell me where the bus stop is for the London Eye?
   B  You can get the guided tour bus that stops there, but
       it's actually easier to walk from here than it is to get the
       bus. If you go this way, you can walk across the Golden
       Jubilee Bridge and it's a short walk from there.
   A  Ah, OK. Thanks. Yes – that's the South Bank, isn't it?
   B  That's right. There's lots to do there. There's the London
       Aquarium, or the IMAX cinema …
   A  And I think the London Dungeon is on the South Bank?
   B  Yes, that's right it's next to the aquarium.
   A  And how much is it to do those things?
   B  It's £23.50 for the aquarium – though it's cheaper if you
       buy online the day before. So if you're free tomorrow, you
       can save some money.
   A  Thank you. What about the London Dungeon?
   B  That's £22.95
   A  Hmm … It's quite expensive.
   B  There's lots to see and do on the South Bank that's free,
       though. There are markets and street performances, and
       there's always a really nice atmosphere.
   A  OK, I think I'll go over there now and have a look. Thanks
       for your help.

Well, International Women’s Day is on 8 March every year. As far as the history of the event is concerned, I’m not really an expert. I think it all began about a hundred years ago, around the time that women were trying to win the right to vote. In my country, it was originally a kind of political occasion.

Turning now to the topic of gifts, the most common one is flowers. It is traditional for men to give flowers to the important women in their lives – this includes mothers, daughters, wives, and so on. And children often take gifts to school for their female teachers. I know that in some countries, there is the custom of giving a particular type of flower as a gift – and a particular colour. This is not the case in my country.

That brings me to the subject of marches on International Women’s Day. In my country, there’s sometimes a march on International Women’s Day but it isn’t really a custom. I know that in some other countries, there is always a march. The purpose of the marches is to demand equal rights for women. There’s something else I’d like to talk about: national holidays. International Women’s Day used to be a day off work for everyone. I think this is still true in some countries, but not in my country. I think it’s a really important day, and should become a national holiday again in my country. That’s my opinion anyway!

1 Woman John, where are you? I've been waiting here at
Dino's for half an hour. I've already had two coffees!

Man Darling, did you not get my text message earlier? I'm
so sorry. I'm just out of the meeting – it went on and on –
and then I was asked to write up the meeting notes! I'm
just finishing up now.

W Well, we've missed the 6.30 film. The next showing is
two hours after that, I think. Can you get here soon so that
we can get a bite to eat first?

M Of course. I'm on my way now.

2 A Oh, that's lovely. Turn around? ... Oh, yes. You should
definitely get that for your holiday.

B You think so? OK, but I've got to stop buying stuff now.
I'm supposed to be travelling light for this trip!

A That will be the first time, then! Anyway, I've had
enough now too. Fancy a coffee, or a bit of lunch, even?
It's a bit early, I know, but I'm really hungry.

3 Boy Mum, have you seen my rucksack?
Ella Of course it will be. Anyway, we’ll ask when we book it. There are still places, I’ve checked. And we’ll have to hurry up with breakfast. The coach leaves from the car park in an hour.

John OK. If you’re really sure you want to go.

Ella Oh, come on. We’ve done nothing all week!

John I thought that was the whole point of holidays – doing nothing. Relaxing.

Ella I think the point of them is to go somewhere different and to see lots of different things! Oh, go on, please come. There’s no point in going alone.

John I didn’t say I wasn’t coming! You go and book the tickets and I’ll have an ice cream to fortify myself for the long journey ahead!

Ella Great.

I think I’ll choose the trip on the gondola – mainly because I’ve never been on one before. I’m actually not very keen on boats, but the trip is short and I think the gondola looks slow and therefore safe! I think it would be a wonderful thing to see the city from the water. Judging by the photo, the gondola looks quite comfortable as well. The gondola tour is also cheaper, though this wouldn’t be my primary reason for choosing it. I wouldn’t pick the boat trip for the simple reason that I don’t enjoy travelling by speedboat! I sometimes get seasick on a boat, which is a shame because I’m sure the tour would be wonderful. Obviously it would be an interesting way of sightseeing for other people. The other reason why I’m not choosing the boat trip is that I’m not a strong swimmer and so I sometimes don’t feel safe on a boat in open water. The boat in the picture looks quite small as well, so it might make me a bit nervous. So, all in all, the gondola is the most relaxing option for me!

1 I'm not that fond of camping, to be honest, so when my parents told me we were going on a camping holiday with my aunt and uncle and my cousins, I wasn't very pleased. I felt better when I was told that they'd booked cabins instead of tents and I actually quite enjoyed the first day. That is, until I was washing the dishes after dinner. As I bent over the sink, I suddenly realised there were hundreds of ants marching along the bottom of the cupboard where my head was – yuck! After that, we gave up using the kitchen and resorted to eating in the café on the campsite instead.

2 I used to do a lot of camping with the youth group I belonged to, and I remember one particular holiday when, for some reason or other, I wasn't getting on with the girls in my tent. Anyway, one night we'd all gone to bed and suddenly I felt something moving in my sleeping bag. I put my hand down inside and pulled out this enormous frog. Fortunately, that kind of thing doesn't scare me, so I just got up and put it outside of the tent. I thought that one of the girls had probably put it there, but when I asked them in the morning, they denied it.

3 I always go camping with my family to the Gower Peninsula in Wales in the summer – it's a beautiful area, but the campsite we stay at is basic, to say the least. We take our own food and do all our own cooking, and at night we usually play cards together – it's all pretty chilled. The only problem is that you can't rely on the weather in Wales, and it often rains. In fact, one year, it was so windy that our tent blew away while we were inside it trying to sleep. So that was the end of that. All we could do was throw everything into the car and drive home.

4 I've only been camping once, and I'm not planning on doing it again. We were in Madrid at the time, and it was so hot that we needed to get away. So we got hold of a tent and drove to a campsite in the mountains that a friend had recommended. We didn't bother taking sleeping bags, because we didn't think we would need them. How wrong we were! That night we froze! While the temperature during the day was around 30º, it went below 10º at night and we ended up sleeping in the car with the heating on. The next day, we booked ourselves into the nearest hotel for a few days.

1 Girl So what's Eva like?
Boy She's really good fun and I enjoy going out with her, but we don't seem to like doing the same kind of things. I suppose that's OK, though. We do always have a good time together.
Girl Well, they say that opposites attract, don't they?
2 Girl Look, you can't expect me to spend time with your family. I mean, they're so ... so ...
Boy What? What's so special about you and your family? You think you're better than everyone else, don't you?
Girl Well, we're from different social backgrounds, aren't we? I mean ...
3 Boy 1 Look out! It's that guy from the other day. You know, that one that was shouting at people in the shopping centre.
Boy 2 Oh yes! I remember him. We'd better keep away from him in case he starts getting aggressive again.
4 Boy Your brother's done really well. You must be really proud of him!
Girl I certainly am! He's really worked hard for everything that he's achieved. I hope I can do as well as him one day!
5 Boy I told Amy about my secret and now I wish I hadn't.
Girl Don't worry, if there's one person you can count on, it's Amy. She won't say anything to anybody.
Boy Are you sure?
Girl Definitely!
6 Girl What do you mean, Jack isn't going on the march? Everybody else is. We've got to save the park!
Boy That isn't his opinion. He actually thinks a new road would help reduce traffic problems in town!
Girl What? Are you joking?
Boy I wish I were! I really don't understand Jack at times!

1 Jake I don’t think you should hang out with Luke so much, Sam. He’s not a nice guy and I don’t think he’s a good friend to have.
Sam Luke’s fun! Why are you always commenting on my friends? You don’t like any of them!
Jake That’s not true! I like Jonathan and Charlie.
Sam That’s because they’re your friends too! Why can’t I have some of my own friends?
Jake You can and you do! Plenty of them. But I just think Luke’s a bit of a bad influence on you. He’ll get you into trouble very soon.
Sam You’re always acting the older brother and it’s so annoying.
Jake That’s cos I am the older brother and I’m looking out for you!
Sam Well, thanks, but I don’t need it. I’m old enough to make my own decisions now and I can choose my own friends.
Jake Fine, whatever. Look, I’m just warning you. Have some sense. Be careful and don’t go along with all of Luke’s stupid ideas.
Sam OK, OK. I know what you mean. He does do some stupid things, but I don’t think he’s bad, just silly. He makes me laugh.
Jake OK, fine, maybe he’s OK. But you look after him, then.
Sam Sounds like he needs it!

2 I’m one of six and I had the bad luck to be born in the middle. I’ve got two much older brothers who were born only a year apart and have always been best friends. And I have two younger brothers and a sister, and they’re triplets! You can imagine what my mum thought when the doctor told her the news! I was two and a half when the triplets were born and I think it was a real problem for me. I was still just a baby myself. My poor mum and dad tried to spend time with me, but they were exhausted looking after the triplets. And my brothers were usually somewhere else doing something I couldn’t do. It’s not that they didn’t like me, they were just doing their own thing. So I was really happy when my grandma came to live with us. She became my second mum and did everything with me that my mum wasn’t able to do. Grandma was the one who taught me how to ride a bike, tie my shoelaces, and took me to school on the first day – that sort of thing. We’re so close now, I don’t know what I’d do without her.

3 Interviewer What was it like with you girls as teenagers?
Did you get along?
Linda Well, not all the time, isn’t that right, Cathy?
Cathy That’s right, Linda. We’ve always been close and we got on well as children, but we had problems when it came to sharing a room.
Linda Yes! When our parents divorced, we went to live in a smaller house with our mum and we had to share a bedroom again.
Cathy I was seventeen and Linda was fifteen and we had a lot of stuff for one small room.
Linda You had a lot of stuff, Cathy! And you never put it away!
Cathy It’s true that I wasn’t particularly tidy then.
Linda You were extremely messy!!!
Cathy True. And I didn’t realise how messy I was and how much it bothered my little sister, until one day I was sunbathing in the back garden and all my clothes came floating out of the upstairs window.
Linda Yes, I’m afraid I threw all my sister’s things that were on the floor out of the window. The garden was covered with them!
Cathy I ran upstairs and we had an argument, but I did try to be tidier after that.
Linda You did. And the funny thing is, that when we studied at university, we chose to share a flat together! And you’re quite tidy now, aren’t you?
Cathy Yes, fortunately I’ve improved since then!

There is a family sitting on a sofa. The photo seems to show a
family discussion. It looks as if the son is in trouble. He must
have done something wrong. Judging by their expressions,
I’d say that the parents are worried about him. I might be
wrong, but I think the mother is asking him to explain
something. I can’t be certain, but I don’t think she’s shouting
at him. However, the father looks quite cross, so maybe the
boy has done something to offend him.

Exercise 5 (page 58)

Hmm, let me see what I can come up with … Nothing
springs immediately to mind … Oh, yes, I suppose the last
time was when my friend John borrowed my bike. He’s
always borrowing things and I don’t usually mind, but he
gave my bike back in really bad condition and I was pretty
upset about it. I mean, it was filthy and there was a small tear
in the seat cover. He must have realised that I wasn’t happy,
but he just started saying that the bike was already like that
when he borrowed it! Then I was absolutely furious and lost
my temper with him, so he stormed off. Later on, though, he
come back to apologise, and I had calmed down by then. He
took my bike away and cleaned it, and we’re friends as before.
He hasn’t borrowed anything else from me lately!

A balanced training schedule also means eating properly, so here are the best fitness foods. No doubt you refused to eat vegetables when you were a child, but now broccoli, which is full of nutrients, should be part of your diet. Eat it with a little oil and salt and you'll soon forget saying it tasted horrible! Accompany broccoli with sweet potatoes and tomatoes. Both are full of vitamins, especially vitamin C. I regret to say that red meat is out. Although it's a good source of protein, it contains too much fat. It's much better to eat fish, especially salmon. You must eat fruit – don't forget to eat plenty of bananas, the perfect energy food. Bananas contain fibre, which helps your body absorb the sugar they contain slowly so we produce energy for longer. Nuts are packed with minerals and make a perfect snack, but be careful! They're high in calories and you could put on weight if you eat too many of them! If you exercise in the evening, it can be difficult to sleep, so try drinking a glass of warm milk before you go to bed. Milk stimulates chemicals in the body that will make you feel sleepy and of course the calcium in milk is excellent for making our bones stronger.

1 A We don’t go to the gym or play sports much, do we, Lottie?  B No, not really. We have to do sports at school, and that’s OK, but it’s not really how I like to exercise.
2 A No, we prefer dancing! Specifically, ballroom dancing.  B Yes, we’ve been going to classes together for years, since we were ten …  A And we’ve both got partners. I’ve been dancing with Dave for four years. He’s one year younger than me but he’s really good.
 B And my partner’s Jonathon. He’s brilliant. And all we get on really well.
 A And we all practise together – almost every night when there’s a competition.
 B Yes, the four of us take part in ballroom dancing competitions together. We wear identical costumes and we all have to dance at exactly the same speed and time and movement. It’s very difficult, but we’ve got quite good at it and have started getting medals …  A And earlier this year we won our regional junior championships!
 B Yes, we were all thrilled about that. And so were our families. They’re our biggest supporters.
2 I’m a huge rugby fan, both watching it and playing it. Our local rugby club is very good and we train hard on a Friday night to prepare for matches and tournaments, which are usually on Sundays. Our team regularly wins the under-18s competitions. I love rugby because, although it is aggressive, it’s actually very disciplined. As the sport can be dangerous, you have to stick to the regulations, or you can get injured – sometimes quite badly. Our coaches are very strict with us and make sure no-one does a risky move that could endanger someone else.
 B But it’s still a fast and furious sport and I’ve always got bruises!
3 A Professor, can you explain some of the benefits of exercise for us and our bodies?  B Certainly. Firstly, exercise requires oxygen, so you breathe faster and your heart pumps more blood to your muscles, which become stronger. The heart is a muscle too, and it needs exercise to keep it strong.
 A What else happens in the body?  B Well, with regular exercise, the lungs become stronger and more efficient over time, and your bones become stronger. These are really important changes for later in life. But it appears that one of the most important effects that exercise has is on our brains.
 A And how is that?  B Exercise increases blood flow to the brain which immediately helps it function better and encourages your brain to work at optimum capacity.
 A Really? I didn’t know that.
 B Yes, and during exercise our brains release chemicals which protect the brain and the body and improve our mood at the same time. Over time, this can have a really positive effect.
 A So it’s a win-win situation?  B Yes. Regular exercise is the key to a healthier – and happier – life.
4 My dad is a triathlete. He trains in his spare time – he’s a teacher – but he’s quite dedicated, especially if he’s got a race coming up. I’ve begun to join him when I can. I now go with him on his morning swim sessions. We swim before work and school, about three times a week. I don’t like the early mornings, but once I’m there, it feels great. I’ve always been a good swimmer so it’s fun, really. Three times a week, when he comes home from work, we’ll go out for a run. I’m faster than him, but he has more endurance for the longer runs. At the weekends we cycle. Dad bought me my first racing bike, and it’s amazing. It took a bit of getting used to – especially as you have to attach your shoes to the pedals – but I love it. We’re now preparing for a triathlon at the end of the summer, which is perfect timing as we have the summer holidays to do lots of training. I’m quite excited.

Presenter Hello and welcome to the programme. Every year about a million people suffer from food poisoning in the UK, which would suggest that we need to be a bit more careful about what we eat. Our food expert, Dr Marilyn Shepherd, is here with us today to give us a few tips on food safety. Marilyn, what seems to be the biggest cause of food poisoning?

Marilyn Well, Rob, it appears to be chicken. There’s bacteria in raw chicken that causes more than a quarter of all the cases of food poisoning in the country, so you need to be really careful with it. Raw chicken should always be kept in the fridge, and you should make sure that it’s covered and doesn’t come into contact with any of the other food in there. After handling raw chicken, you should always wash your hands, knives and chopping boards with soap and hot water.

Presenter Are there any precautions we should take when we’re cooking chicken?

Marilyn When you’re cooking chicken, you need to make sure that it’s done right through to the middle so as to kill all of the bacteria. When you cut into the thickest part of the chicken, there shouldn’t be any pink meat, and the juices should be clear, not pink. If you want to be really sure that it’s cooked properly, you could buy a meat thermometer. Chicken is supposed to reach 74ºC to be safe to eat.

Presenter Thanks for that, Marilyn. So you’re saying that chicken has to be cooked thoroughly. How about other meat? Some people like their beef rare, for example.
Marilyn That’s right, Rob, and rare beef is perfectly safe, as long as it’s well-cooked on the outside to kill the surface bacteria. You see, pieces of beef have a very dense texture that bacteria can’t go through, so it’s not so important to cook it right through to the middle. You can also eat raw beef, like steak tartare, for example, but this is only safe to eat when the meat has been handled following strict food safety guidelines. As for other kinds of meat, they should all be cooked through to the middle.

Presenter Let’s talk about leftover food now, Marilyn. Is it safe to reheat it?

Marilyn Yes, reheating food is fine, as long as you heat it to 74ºC all the way through to kill the bacteria. If you’re using a microwave, you should mix the food halfway through to ensure that there aren’t any cold spots that still have bacteria. And you have to be extra careful with rice. Rice has a bacteria which produces a toxin that is not destroyed by heat. Reheating the rice kills the bacteria, but it doesn’t remove the toxin. To reduce the risk of food poisoning, put cooked rice in the fridge as soon as possible after cooking, and reheat it only once.

Presenter That all makes perfect sense, Marilyn. Thank you for joining us.

Marilyn My pleasure.

1 Jessica Look, Tom, I’m afraid that I’m not going to be able to come to the cinema tonight after all.

Tom Oh dear. Why not?

Jessica I’ve got to do something at home.

Tom Are you sure, Jessica? This is the second time that you’ve cancelled a date. If you don’t want to go out with me, just tell me. I’ll survive!

Jessica But Tom, I do want to go out with you. It’s just that …

Tom Just tell me the truth, Jessica!

Jessica I will, it’s just difficult … You see, it’s my parents … They don’t want me to go out with you.

2 Leo Are you working on the school newspaper, Grace?

Grace Yes, I’m just adding a photo to my article about our school trip.

Leo But who’s that?

Grace It’s Molly.

Leo Molly? But that doesn’t look anything like her!

Grace Well, I’ve just improved the photo a little.

Leo A little?! Even her parents wouldn’t recognise her! You can’t do that! What about the article? Have you been honest about what happened?

Grace Well, I’ve made it a little bit more interesting, otherwise it would be boring.

Leo You mean you’ve invented things.

Grace Invented things? I’d never do that, Leo! I’ve just made things seem a little funnier than they really were.

Leo But the idea of a newspaper is to explain what really happened.

Grace Oh come on, I’m not lying to anyone. I’m just making it a little more entertaining!

Max Right, you lot, I have a horror story of my own for you. It won't be as good as Ian's, of course.
Ian Of course it won't, Max! But anyway, let's hear it.
Jill Fantastic! Is it as scary as the first one?
Caro Hope not …
Ian Don't worry, Caro.
Max Are you going to listen or what?
Ian We're all ears …
Caro I hope it isn't true …
Max Shhh, Caro. Well, this story takes place on a cold, stormy night deep in the Irish countryside. John, a student, was by the side of the road, hitch-hiking. The storm was so strong that he could hardly see anything at all. He was desperate. Suddenly, he saw a car coming towards him very slowly …
Ian Oh, it's a bit like my story …
Caro Oh, dear. I don't like this story, either.
Max Shh, Caro! It's nothing like your story, Ian! Can I continue?
Jill Please do. I'm listening, at least …
Max Anyway, John was desperate for shelter so, without thinking about it, he jumped into the car … only to realise that there was nobody behind the wheel ! ! ! Then the car started moving slowly off! The rain was lashing down and the storm was howling. John tried the door handle, but it wouldn't open! He began to panic ...
Jill Good grief …
Max The car started to pick up a little speed. Frightened, John peered out of the window and could just make out a bend in the road. He was terrified and thought he was going to die.
Caro Oh no!
Max Shh … Then, just before the car hit the trees on the curve, a ghostly hand appeared through the window and turned the wheel. John was frozen with fear.
Ian Is it a ghost story … ?
Max The car was gathering speed now down the hill through the furious storm. John clung on in terror … Finally, he could make out a light in the distance. People! Gathering all his strength he pushed the car door open, fell out into the night, and ran for his life towards the lights of the pub on the roadside.
Caro Pshaw … Thank goodness for that …
Max Shhh … Soaking wet and exhausted, John staggered into the pub, dazed and shaking, and started telling the few people there about the terrible experience he'd just had.
Jill I bet.
Max Suddenly, the pub doors burst open again …
Caro Oh no …
Max Two men came into the room … like John, they were wet to the skin and out of breath … They looked around the room, and spotted John crying in the corner. One man said to the other …
All What?
Max He said, 'Look, there's that idiot that got into the car while we were pushing it!'
Ian Brilliant, Max! That's hilarious. You had us on the edge of our seats, thinking something horrible was going to happen.
Jill Yes, very clever!
Caro Now, I do like that story! What a relief!
Max Always happy to entertain … Well, there are plenty of funny urban legends as well as the horror ones.
Ian True. And it was better than my story!
Max Nah, mate. Anyway, Caro, you make a good listener. You believe anything anybody tells you!
Caro That's not fair! Well, actually, you may have a point there, Max. I can't help it if I'm naturally trusting, can I?
Jill It just means you're a very nice person, Caro. Much nicer than Max.
Max Hey! But Jill's right. You are nicer than me, Caro. Come on, you lot. I'll buy you all a coffee.
Ian Well, that's unexpectedly nice of you, Max! Let's go, guys, before he changes his mind!

car crime, credit cards, email scams, mobile phones

Transcript
Email scams are a good example of people using technology to commit crime. The kind of thing I’m talking about is an email saying you’ve won millions in a lottery. Of course, they just want your bank details! Car manufacturers use technology to combat theft. So, for instance, cars are much harder to steal these days. Car keys are very high-tech. But if you understand the technology, stealing cars is actually easier. In other words, criminals can use their knowledge of technology to commit crimes. Surveillance cameras help to reduce crime, even if they aren’t recording. What I mean by that is: people don’t commit crimes if there are cameras about. However, criminals can always find somewhere without cameras.
Or to put it another way, crime doesn’t stop, it just moves to another area. Some high-tech items have a positive and a negative effect on crime. One example of that would be the mobile phone. They often get stolen, but on the other hand, they can be used to video important evidence or call for help.

Emily Hi, Ewan!
Ewan Hi, Emily. What are you doing this weekend?
Emily I’m going to a meeting. The students’ organisation that I’m in is holding it.
Ewan And what’s it about?
Emily Quite a few things. We’re planning to organise a protest march about the lack of job opportunities and working conditions for young people.
Ewan It sounds interesting, but isn’t it a bit of a waste of time?
Emily What do you mean?
Ewan Well, don’t get me wrong, Emily. I mean, I walked through the streets of London against climate change, but afterwards I just thought, what difference does it make? The people in power don’t listen to us.
Emily I don’t agree at all! Protest does work! We collected over 10,000 signatures about the council’s plans to build a shopping centre on the park, and they changed it.
Ewan OK, maybe it works at local level, but I don’t think a few thousand young people protesting is going to make the government change its economic policies. And anyway, the world is interconnected today and it’s multinational companies, not the government, who often make the important decisions that affect people’s jobs, and they won’t listen to you.
Emily They might listen if we get people to stop buying their products.
Ewan Perhaps, but how many people do you think will do that?
Emily So what should we do? Just watch people lose their jobs and their homes and then end up on the streets? It’s difficult, I agree, but I think we have to show our disagreement with things we think are wrong! And it’s good that the people in power know that we are watching them!

1 Talking of politics, I was fed up with the lack of political education at my school, especially with the general election coming up, so I decided I would try to do something about it. I went to the head teacher and asked if I could stage a mock election in the school. I thought I would have trouble persuading him, but he was all for it. So I invited students to put themselves forward as candidates, then organised a speech day and a polling day, and guess what? The turnout was 85%! Students went home and researched the different political parties in our electoral system and what they stood for. I was delighted!

2 Did you know that in the last general election, turnout among 18–24-year-olds was poor – only 43%? Teenagers are accused of being politically apathetic, but that isn’t altogether true. For instance, in Scotland, 16- and 17-year-olds were allowed to vote for the first time in the Scottish referendum – you know, when the Scots were voting whether to be independent from Britain. And what was interesting was that young people were inspired and galvanised to think about politics and the future of Scotland – and the voting turnout among the young was incredibly high – 80%! So it just goes to show that when teenagers are included in the political system, they can act responsibly and go to the polling station.

3 As a journalist I can say that that hashtag activism is here to stay. In the past few years, a solid Twitter presence has become essential for any good protest movement. For instance, a hashtag slogan links all posts together into a debating forum, so that people can easily find and join in the discussions. Incidentally, for those of us who work in the media, news is more and more often made on Twitter than through official channels. So I don’t think it makes sense to distinguish between online and offline activism any more. Social media is not a substitute for actual demonstrations, but a complement to them. Demonstrations are organised on Facebook. Then people go on protest marches with hashtag slogans on their banners. Therefore other people can see them, go online and join the protest. Digital and traditional activism feed into one another. That’s real life today.
A rather interesting reaction happened with teenagers a while ago in the States. Thousands of teens wanting to make a point against the perfect bodies found in magazines started posting photos and videos of themselves with acne, body fat, etc. They used the hashtag ‘Don’t Judge Challenge’. You know, the hashtag was used over two million times! However, some teenagers then started making themselves intentionally unattractive. For instance, they painted on spots, big eyebrows, big glasses or missing teeth and took photos, then slowly changed themselves to show that they were attractive after all. Then a backlash started, with thousands of other teenagers criticising it on Twitter, saying that the videos didn’t empower teenagers, but gave the message that people who naturally have bad skin, wear glasses, or that sort of thing can never be attractive. So then a new hashtag was formed called ‘Beauty In All Challenge’, encouraging people to embrace their individual, personal beauty.

using more renewable energy, using public transport more often, using fewer pesticides and chemical fertiliser

Transcript Examiner  I’d like you to imagine that you are discussing practical ways in which people can help to combat pollution. How effective are each of the five suggestions?

Student 1  Shall we start with banning aerosol cans?

Student 2  OK. Personally, I would say that wouldn’t be particularly effective, because not many people use aerosol cans these days.

Student 1  Yes, I think you’re right. Although they damage the ozone layer in the atmosphere, I don’t think banning aerosols would make a huge difference. I’m of the opinion that using more renewable energy is a very effective measure because so much pollution is caused by burning fossil fuels to make electricity.

Student 2  Absolutely. I couldn’t agree more. Personally, I’d say that banning cars from city centres is quite effective, but less so than using renewable energy.

Student 1  That’s not quite how I see it. I think the air in city centres can get really polluted, especially during the rush hour.

Student 2  Yes, good point, I suppose. I feel quite strongly that using public transport is very important because there would certainly be fewer cars on the road if we all took buses, trams, trains and so on.

Student 1  Yes, I think you’re right. We should all use public transport more often. The final measure is using fewer pesticides and chemical fertilisers. What do you think?
Student 2: That would definitely be a good measure, because they can kill other plants and wildlife as well as the pests.

Student 1: I’m with you on that!

Examiner: OK, thank you very much.

banning cars from city centres, using public transport more often

Examiner: Which are the two easiest measures to put into effect?

Student 1: In my opinion, banning cars from the city centres would be a very quick and easy measure. What’s your view on that?

Student 2: And the second easiest would be —

Student 1: Hang on a moment. What’s your view on banning cars, first?

Student 2: Oh, yes, I agree with you. And the second easiest would be using more renewable energy.

Student 1: I take a rather different view on renewable energy. It is very expensive and isn’t always reliable because you rely on the wind and the sun. What if the sun doesn’t shine much or there isn’t much wind?

Student 2: That’s a good point. What do you think about banning aerosol cans?

Student 1: I think that would be very easy, although people might not like it! The other measure that would be easy to put into effect would be using public transport more often.

Student 2: Yes, I agree. It could be made much cheaper or even free so that people are encouraged to use it.

Student 1: Using fewer pesticides and fertilisers isn’t so easy to put into effect, don’t you think?

Student 2: Yes, I agree. Until there are alternatives, I think it’s impossible to ban them.

Student 1: OK … We need to come to a decision.

Student 2: Can we agree that banning cars from the city centres is the easiest?

Student 1: Yes, I’m with you on that. And the second easiest is either using public transport more often or banning aerosol cans.

Student 2: Yes. Personally I’d go for using public transport.

Student 1: Me too.

Student 2: That’s settled, then.

1 Sarah What do you think about the new reform, Mike?
   Mike I don’t agree with it at all.
   Sarah I’m not happy about it either. I mean, who has time to
do all of that assessment and evaluation at the end of the day?
   Mike Exactly. I’d rather be planning what I’m going to
do in class the next day than filling out all that paperwork.
   Sarah I know. It’s going to take ages. Oh well, I don’t
suppose there’s anything we can do about it.
   Mike Haven’t you heard about the demonstration?
   Sarah No …
   Mike There’s a demonstration against the new reform next
weekend. I’m going and some of our colleagues are going
too. You should come.
   Sarah I might well do that.

2 The latest typhoon to hit the Philippines has caused more
destruction than any of the previous natural disasters
the country has faced. Around 16 million people have
lost their homes, and more than 6,200 have been killed.
Survivors are currently sheltering in partially damaged
schools and stadiums waiting for help to arrive. They
urgently need medical attention, shelter, food and water.
With your help, Doctors without Borders can provide the
emergency assistance these people need. Your donations
will help us restore medical services, provide shelter and
sanitation facilities and offer psychological support to the
victims of this catastrophe. The relief operation is already
under way, but with your co-operation, we will be able to
reach more people sooner. Please give generously.

3 Interviewer Hello. I’m here at the Solidarity for Refugees
march with Jonathan Robbins, one of the organisers.
Jonathan, why do you think this march is necessary?
Protester Basically because of the lack of help being offered
to refugees by the government. So far, the UK has welcomed
just over 20,000 refugees while other countries have done
much more – Germany has accepted over 800,000 and
Sweden has offered permanent residence to asylum seekers.
I believe that there are many people who would welcome
more refugees in the country. In my opinion, British people
are no less generous than Germans or Swedes, but we need
to prove that to the rest of the world.
Interviewer Thank you Jonathan for that.

1 Ava Hi Layla, have you bought anything?
   Layla No, I haven’t bought a thing. I’ve been in town all
day, in all kinds of shops, but I haven’t managed to find a
dress that I like and everything is so expensive too. I was
hoping to find something cheap.
   Ava Why don’t you wait for the sales?
   Layla Yeah, I think I’ll have to!
2 Alfie What have you been doing?
   Lily Planning my InterRail trip around Europe for next summer.
   Alfie That sounds fun. Will it be expensive?
   Lily Well, I’ve been online and found the cheapest rail
tickets and camp sites that I can. I’ve also made a list of all
my possible expenses – you know, food and things like
that – and I think I should be able to pay for everything if I
save up the money from my Saturday job.
3 Jack Wow, when did you get that new laptop?
   Ella Last week.
   Jack It must have been expensive.
   Ella It was – although I managed to persuade them to
give me a 10% discount because I’m a student! I’ve been
planning to buy it for a while and I spent all my savings on
it. I want a good laptop for university and this one’s got a
really good screen and a lot of memory.
   Jack Well, it certainly looks good!
4 Ben What’s the matter, Max?
   Max I’ve splashed out on things that I didn’t need and I’ve
had to borrow some money from Lisa to pay for my ticket
for next week’s concert. Now I’ll have to stay in for a few
weeks so I can pay her back.
   Ben Well, we’ve got exams soon so you can use the time
for revising!
5 Sam I see you’ve been to the sales!
   Kate I certainly have! I got a pair of shoes that I really liked
at half price! I got to the shop early so I’d get them before
anybody else saw them.
   Sam Well done!
   Kate Although the shop assistant gave me a shock when I
went to pay for them. She wanted to charge me full price!
   Sam Why?
   Kate They’d forgotten to put the sales price into the
computer, so there was one price on the shoes and another in
the computer. Anyway, they sorted it out and I got a bargain!

1 I can quite understand why people try to live without money today. In my view, it forges a community spirit that we have lost in this technological age. If you help someone with something and they help you with something else, you form a bond with that person. I grew up in a small village in Wales where nobody had any money at all. We lived like all the other families lived – a hand-to-mouth existence, with none of the things – TVs, cars and smartphones – that we consider necessary today. But I was an extremely happy child in a happy family, living in a happy village. Every house was always open to anyone else. Children were looked after by everybody. People grew food and shared it around. And if a family was in trouble, everyone helped out. When I visit these days, everyone seems well-off, with more in the bank, and that’s good. However, it has destroyed some of the community feeling because people don’t need each other so much now. Instead, people use money to solve their problems and don’t ask their neighbours any more.
2 A What is couch-surfing? And why do you want to do it, anyway?
   B You don’t know what couch-surfing is? Personally, I think it’s a brilliant idea. You join this website and you can stay with people all over the world for free.
   A Really? Why would people do that?
   B Who? The people visiting or the people letting them stay?
A Well, both, really! Why would you go and stay with a stranger, and why would you have a stranger stay with you?
B To be nice? People are generally nice, you know. If you look on the website, the hosts are undeniably friendly people who like meeting new people.
A Hmm, OK. And they really don’t want any money for it?
B No, they do it out of the goodness of their hearts. In fact, the website’s strapline is ‘Changing the world, one couch at a time.’ Isn’t that nice?
A No, it isn’t. It’s a terrible strapline. And a bit of an exaggeration! It’s not like couch-surfing is ending global warming or world poverty, is it?
3 Interviewer Welcome to Money Concerns, the programme that deals with money issues. Today we’re looking at moneyless issues, namely the online organisation Streetbank. Our resident economist today is Patrick Barlow. Patrick, can you explain to us what Streetbank is?
Patrick Streetbank was set up by two friends in London as an online community project. It is a website that allows people to offer skills or items to others in their neighbourhood.
Interviewer In their neighbourhood? Do they really need to go online to talk to their neighbours?
Patrick Well, actually, yes they do – especially in places like London where a lot of people live in the same space, but without actually knowing anybody else. As Sam Stephens, one of the co-founders, says, the idea is to ‘bring neighbourhoods closer together and make the world a little bit nicer’.
Interviewer That’s certainly a splendid ambition. How does it work in reality?
Patrick It’s similar to Freecycle, the website where people post things online that they want to give away. But here, people also offer things they can do for other people, like gardening, dog walking, computer lessons, all sorts of things. And more importantly, people can go online to ask a favour – to borrow a vacuum cleaner or a lawnmower, ask for help with moving, anything really.
Interviewer So what’s the catch?
Patrick Oh, only a cynical, suspicious person would ask that! In my opinion, there is no catch. It doesn’t cost you anything! As the website says, people helping each other saves money and makes the world a better place. Even as an economist, I agree with those principles!

Exercise 2 (page 101)
(Possible answers)
The escalators to move shoppers between the floors are at two ends of a mall, forcing people to walk past all the shops on a floor. Glass safety barriers on the first floor allow consumers to easily see the shops above and below them. Open shop fronts, with their big glass windows removed, make it easier for people to enter them. Huge glass ceilings to let in as much natural light as possible and the use of artificial light makes shoppers unaware of the passing of time. Holding different events every week and local festivals in the space inside the mall brings in more people.

The student chooses option 1 because it is more casual, and because it is Chinese and his friend Mark likes food from different countries.

**Transcript**

**Examiner** These two photos show places where you might go and eat for a treat. I'd like you to compare the photos and say which place would be more suitable for a birthday treat for a friend.

**Student** Well, these are two very different places to eat out. Let me see … The first one looks like a Chinese buffet – very busy and casual – and the second looks like a more formal restaurant – more sophisticated and expensive. If I had to choose where to take a friend for a birthday treat? Well, for one thing, it would depend which friend. For instance, if I were to take my friend Mark, we'd go to the Chinese restaurant. Not because it's cheaper – although it's probably better value for money – but because it would be more casual. Mark is a very relaxed kind of guy. Another thing is that Mark likes food from different countries. In my view, the elegant restaurant wouldn't be Mark's kind of thing at all. Although he loves good food, he doesn't like formal restaurants. And this one looks very quiet! On top of that, he would hate having to dress up for dinner! For those reasons, I think I would prefer to take Mark to the busy, noisy Chinese restaurant.

**Girl** Mmm, that's an interesting question. I'm not sure about that … Let me see … Well, I quite like Chinese food, but I can't say it's my favourite. Looking at the other restaurant, it isn't clear what kind of food they serve, but I like the look of the place. And I like the idea of being served by a waiter rather than helping myself from the buffet. So, thinking about it, I suppose I'd go for 8 and hope that there'd be something on the menu that I like!

1 I snapped up an excellent bargain at my local supermarket once without even meaning to. I’m a big fan of discount, especially those chocolate puddings that have melted chocolate in the middle. I don’t usually buy them, but I was having a dinner party, so I thought I would get some for dessert. When I went shopping, I was delighted to see that they were on offer – two for £4.50 – so I added four to my basket and went to pay. It wasn’t until I got home that I realised that the price had been knocked down even further – I’d been charged 31p for each one! I think it was a mistake with the computers or something.

2 I’m really happy with the leather jacket I got last time I visited my grandparents – it isn’t actually leather, but it looks like it. Anyway, we were in this enormous supermarket together doing some food shopping, and I decided to pop over to the clothes section. When I saw the jackets, I grabbed one to try it on, but it was a bit tight. I tried the next size up and it was perfect! When we got to the checkout, we discovered that there was 25% off all men’s clothes that day, so the jacket was only £35. My grandad refused to let me pay for it so I think I did rather well in the end.

3 I think my best bargain was a holiday I went on – to Switzerland – I wasn’t prepared to pay through the nose for an expensive hotel, so I thought I’d check out the hostels for a change. In the end, I booked one in a place I’d never heard of for three nights at €25 a night. When I got there, I found myself with my own little wooden house, complete with painted furniture and a balcony. The hostel had a reading room with a bookcase full of books, and a terrace overlooking a lake. All I did was swim, relax and read – it turned out to be one of the best holidays I’ve ever had.

4 I tend to go to a lot of car boot sales – you know, those sales held in a car park where people sell things they don’t want from the back of their cars. Anyway, at this particular sale, there was a couple selling some old china and this lovely old teapot caught my eye. I was about to start negotiating a price when I noticed a tag on the teapot: £1. I decided that the teapot was probably worth a lot more than that, so I bought it before anybody else could. I gave it to my mum because she likes that sort of thing, and she was over the moon about it.

1 I had my photo in a German newspaper once. I was thirteen or fourteen and my class was taking part in a school exchange. The school in Germany was in a village called Wendlingen – it’s in the south west of the country, near Stuttgart. Anyway, when we landed at the airport, my ears were really hurting after the flight and I just wanted to go somewhere quiet. I suppose I must have realised that someone was taking photos, but I didn’t really care at the time. So, it was a bit of a shock to see my photo in the paper the next day. In the photo, I’m shaking hands with my host family and looking extremely uncomfortable.

2 There was a photo of me when I was really little in our local free magazine. I must have been about six at the time, because it was my first day at a new school – we’d just moved house, you see. You can see me standing at the front of the queue in the playground, waiting for the teacher to take us to our classroom. I’m wearing a black and yellow tracksuit and carrying a folder with my name on it. It’s a pretty good photograph actually, as it captures the atmosphere of the day: the children wandering around, looking a bit lost, and the teachers walking towards them, wondering what the next year will bring. I’d love to know who took it.

3 I always used to love sports day at school – not because we didn’t have any lessons in the afternoon, but because it was the day that I could show everyone that I was good at something. You see, I was the best in my class at running – I was the best in the year, in fact, so I would always win the 100 metre and 200 metre races. The races were fun, but the best part of the day was getting the medals and having my photo taken. I always felt on top of the world during the medals ceremony, and you can see that reflected in the photos. There’s one in particular where I look as if I’ve just won an Olympic Gold!

4 The only time I’ve had my photo in the newspaper was when I was about eleven. It was the awards ceremony of a programme run by the libraries in my city called the Good Readers Circle. You had to get a thousand points by reading different books – each book was worth six, eight, ten or twelve points, depending on how difficult it was. Anyway, about twelve of us received the award, and after the ceremony, we had our photo taken with the mayor. I was really looking forward to seeing the photo but I couldn’t believe my eyes when I opened the newspaper. The only person you could see properly was the mayor, and the rest of us were completely hidden behind him.

1 **Julia** So, how are we going to get to the festival then?
   **Paul** I could drive, I suppose.
   **Julia** Hmm. I don’t really see the point in taking the car. We aren’t going to use it while we’re there, and we’ll probably have to pay for parking.
   **Paul** True. How about going by train?
   **Julia** I’m not sure. I’ve heard something about a rail strike, so I’d rather not risk it.
   **Paul** What do you suggest, then?
   **Julia** Well, the website says there’s a special coach service that takes you right to the festival. Why don’t we do that?
   **Paul** Sounds good to me.

2 Autumn is coming, which means the festival season is nearly over. What better way to say goodbye to summer than at Bestival, the best medium-sized festival in the UK? Bestival is on for three days during the second weekend of September and there’s live music from 11 a.m. to 5 a.m. For those attending all weekend, the campsite’s open from midday on Thursday to Monday at 4 p.m. This year’s line-up is the best ever, and will include some big surprises. So, get your tickets for Bestival now to hear the greatest bands of the moment – do it early as they’re selling out fast!

3 **Interviewer** David, you’re a volunteer at the Boardmasters Festival in Cornwall, aren’t you? Can you tell us what you do to keep the festival site clean?
   **Volunteer** First of all, we encourage festivalgoers to use bin bags for their rubbish – when they arrive we give them a black bag for general rubbish and a green one for recycled waste.
   **Interviewer** What about water bottles and plastic cups?
   **Volunteer** We’ve got a stall with reusable bottles that people can buy – fairly cheaply, in fact. With the plastic cups, you get 10p for every cup you take back to the stall – we make quite a difference to the site, actually.

4 The fine weather hasn’t lasted at Glastonbury as it’s been pouring down with rain this afternoon. Festivalgoers will be glad of their boots tonight as they make their way to the stages to watch the headline acts perform. However, tomorrow will be dry, according to forecasters, and there’ll be some sunshine, which will give everyone time to dry out. Unfortunately, heavy rain will hit Worthy Farm once more on Sunday in time for the last day. Once again, we’re likely to see mud at Glastonbury, something that has become the trademark of the festival in recent years.

5 **Son** Mum, when are we going on holiday this year?
   **Mum** Uh, the first two weeks of August.
   **Son** Will we be back before the 20th?
   **Mum** Yeeeeeaaah. Why?
   **Son** Because it’s the V Festival that weekend.
   **Mum** The V Festival?
   **Son** Yes. It’s a music festival. Tom and Josh are going.
   **Mum** OK. If it lasts all weekend, where are you going to stay?
   **Son** Tom’s got a tent.
   **Mum** Right, so you’re camping. How much are the tickets?
Trudy Presenter spent fourteen years in prison and then he was deported to Italy. He didn’t have. His scheme collapsed, and Ponzi was arrested. He couldn’t pay: he owed them millions of dollars he just invested people get nervous. They started asking for their money back, to investigate where Ponzi’s money was coming from and the course, was completely illegal, but it made him very rich – it’s accepting investments to pay off his earlier investors. This, of actually illegal. Then he ran into trouble because of the quantity Exchange Company, to try and make an even bigger profit. Trudy (Presenter) helps to smuggle Italian immigrants across the border.

Before that, he had already been to prison twice: the first time in Canada for forging a cheque, and the second in the USA for helping to smuggle Italian immigrants across the border.

Presenter Tell us about Ponzi’s scheme, Trudy. How did it work?

Trudy It started when Ponzi received a letter from a company in Spain. The letter contained an International Reply Coupon that covered the cost of the stamps he would have to buy to send a reply. Ponzi noticed that the reply coupon cost less in Spain than the stamps would cost in the USA and he realised he could make money out of this. He began sending money to his friends and family in Europe to buy reply coupons which they would send back to him to exchange for stamps. He would then sell the stamps for a profit.

Presenter So when did investors get involved in the scheme?

Trudy Ponzi decided to set up his own company, the Securities Exchange Company, to try and make an even bigger profit. At first, he continued using the reply coupons, which was not actually illegal. Then he ran into trouble because of the quantity of reply coupons he needed to deal with. With investors still queuing outside his door, Ponzi changed his strategy. He began accepting investments to pay off his earlier investors. This, of course, was completely illegal, but it made him very rich – it’s said he could make around $250,000 a day. 

Presenter Wow! That’s a lot of money. So, what went wrong?

Trudy Eventually, people got suspicious. The Boston Post began to investigate where Ponzi’s money was coming from and the investors got nervous. They started asking for their money back, but Ponzi couldn’t pay: he owed them millions of dollars he just didn’t have. His scheme collapsed, and Ponzi was arrested. He spent fourteen years in prison and then he was deported to Italy. From there, he went to Brazil, where he died penniless in 1949.

Presenter Which just goes to show that it doesn’t pay to cheat. Trudy Metcalf, thank you for joining us.

Trudy My pleasure.
