Health and Sports Day is an interesting traditional event in Japan. I'm interested in finding out about it. Aiko, can you tell me about this special day?

Of course, Dan. In my village, we always have lots of exciting races and games. My race was very tiring!

Did you win?

No, I didn't. I was disappointed. I was surprised, too, because I'm a very good, fast runner. But there are lots of amazing athletes here today!

There's a band here today, too. Their music is very entertaining.

That's right! It's relaxing to sit in the sun and listen to music. There's some great traditional dancing later, too. I'm very excited about that!

B Underline the adjectives that Aiko and Dan used. List them here.

Piñatas are traditional in Mexico. When you make a piñata, you need a balloon and some papier mâché. A piñata can be any shape. If you use a round balloon, you get a round piñata.

Put papier mâché (paper and glue) on the balloon. When the papier mâché is dry, it stays in the shape of the balloon. Now you can pop the balloon!

Cut a small hole in the piñata and fill the piñata with candy. When the piñata is full of candy, it’s ready for you to decorate it with paint or colored paper.

When people have parties, they often have piñatas. The piñata is hung from a tree or post and children hit it with sticks. If the piñata breaks, lots of candy falls out!

Hi Nico,

How are you? I'm very excited because we're going on vacation tomorrow. We're going to the Bay of Fundy in Canada. We will see the highest tides in the world there.

There will be two high tides and two low tides every day. When there is a high tide, 100 billion tons of water will move into the bay. The water will be as high as a four-story building! We'll go tidal-bore rafting on the water. I can't wait!

When there is a low tide in the Bay of Fundy, all the water will move out of the bay, and we'll see the seabed. We'll hunt for fossils in the sand, and we will explore the caves.

I'll be back in two weeks! See you soon!

Coal and oil are fossil fuels. The gas in cars comes from oil. Today, lots of cars use gas, but one day the oil will run out and we will have no gas. We will need a new kind of car.

Electric cars might be the answer to this problem. Electric cars won’t use fossil fuels. One day, there may be more alternative energy to power electric cars, too. In the future, people might use wind power to make electricity for their electric cars.

Hydrogen-fuel-cell cars may be more popular than electric cars one day. Electric cars have batteries, and their batteries might run out on long trips. In the future, hydrogen-fuel-cell cars might create electricity while they are moving, so people may not need to stop for fuel.

Read again. Underline the sentences with will + verb in blue. Underline the sentences with may + verb in red. Underline the sentences with might + verb in green. Which sentences express certainty? Which express uncertainty?
May and Might for Possibility

Orville and Wilbur Wright wanted to fly when they were small boys. They liked to play with flying toys.

In 1903, Wilbur and Orville successfully made the world’s first airplane flight. Their plane flew further than the glider. It flew more quickly than the glider, too. But it only stayed in the sky for one minute.

When the boys were older, they decided to make a flying machine. In 1900, they built a glider. It didn’t fly very quickly, and it didn’t fly very far.

The Wright brothers made another plane in 1908. It was their best machine. It flew the most quickly. It flew the furthest, too. People watched excitedly as the plane stayed in the air for thirty minutes. It was a wonderful sight!

Food Labels

Food labels on packages, cartons, and cans give us information about the foods we buy.

Are you worried about eating lots of chemicals? You can read the list of ingredients. People are often surprised by how many chemicals are in some products. You should also read the label if you’re afraid of eating something that you are allergic to.

If you’re interested in eating healthily, you can find out how much salt, fat, etc., is in a product. Don’t buy it if you’re not happy with it.

Are you curious about how to cook the product? Read the instructions on the label.

If you’re not sure about what a product is, you can look at the picture!

When you climb a mountain, you have to climb for long hours in the cold, with a heavy backpack. Your body has to be ready for that, and your mind has to be ready, too.
