Foreword

The Voice of America has been broadcasting programs in Special English since 1959. Special English is VOA’s method of communicating with English learners around the world in a way that is easy to understand. The vocabulary is limited to about 1,500 words. The sentences are short. The speed is slower than normal.

Special English programs are broadcast on the Voice of America, on radio stations around the world, on satellite television and on the Internet. These programs present the latest world news as well as information about science, medicine, education, economics, American history and life in the United States.

This book explains the meaning of the words used in our broadcasts and on our Web site. The first edition was published in 1962. The list of words has changed since then, as the language itself has changed. We thank all those people at VOA who started the process and who helped make this edition possible.

You can download transcripts and audio files of our programs at our Web site, www.VOASpecialEnglish.com. You can also get details of where to find our programs on radio and television.

Some Organs of the Body

breast – produces mothers’ milk to feed a baby

heart – pumps blood through the body

intestines – tubes through which food passes after it is broken down in the stomach; a part of the intestines also removes solid wastes from the body

kidneys – clean liquid wastes from the body

liver – makes some proteins and enzymes; removes poisons from the blood

lungs – take in and expel air from the body

prostate – a part of the male reproductive system

stomach – breaks down food for the body to use

uterus – a part of the female reproductive system where a fetus develops
Computer Terms

**blog** - *n.* short term for Web log, a personal Web site where people write about whatever they want

**database** - *n.* information gathered and stored in a computer in a systematic way so computers can search it

**e-mail** - *n.* electronic mail that is sent over a computer system or wireless telephone network

**hardware** - *n.* the physical equipment of a computer or a device that is connected to a computer

**mouse** - *n.* a small hand-held device used to control a computer

**network** - *n.* a group of computers or other devices, such as telephones, connected by telecommunications links

**processor** - *n.* the brain of a computer which carries out software instructions that operate the hardware of the computer and devices attached to it. Also called a CPU or chip.
**server** - *n.* a powerful computer that serves a network of computers and processes their requests

**software** - *n.* electronic instructions given to computers and devices connected to them

**World Wide Web** - *n.* part of the Internet that can be easily searched using software called a browser
Business Terms

**account** - *n.* a record of financial dealings. For example, a bank account is a record of how much money a person or company has in a bank.

**bond** - *n.* an agreement to pay interest on a loan, generally for a period of years, until the loan is repaid. A bond can be bought or sold.

**capital** - *n.* money or property used to create more wealth.

**contract** - *n.* a legal agreement between people or groups to do, provide or trade something.

**corporation** - *n.* a business that is organized as a legal company separate from its owners and workers.

**dividend** - *n.* part of a company's earnings that is given to shareholders. Not all stocks pay dividends.

**index** - *n.* a way of measuring the value of a group of securities. For example, a stock index measures the value of a group of stocks.
security - *n.* evidence of ownership that has financial value, such as a stock or bond. Security can also mean a financial contract that has value.

stock - *n.* a share in ownership of a company. The stock of public companies is traded on stock exchanges.
The Legislative Branch
The Legislative Branch makes laws for the nation.

The Executive Branch
The executive branch enforces the laws of the land.

The Judicial Branch
Courts decide arguments about the meaning of laws, how they are applied, and whether they break the rules of the Constitution.
